(5) *Payments to single-member entity.* A withholding agent that, upon reliance on a valid withholding certificate, treats a payment as made to a wholly-owned entity that is disregarded to federal tax purposes under § 301.7701–2(c)(2) of this chapter as an entity separate from its owner and whose single owner is a foreign person shall make an information return on Form 1042–S in the name of the foreign single owner, using the owner's taxpayer identifying number if such a number is required to be stated on the form.

(6) *Special rules in the case of claims of treaty benefits by hybrid entities or their interest holders.* A withholding agent must make an information return on a Form 1042–S for each beneficial owner (within the meaning of the applicable tax treaty) upon whose withholding certificate or other appropriate documentation the withholding agent relies to reduce the rate of withholding under a tax treaty. Therefore, in the case of concurrent and consistent claims of reduced rates under several tax treaties by the entity and by one or more interest holders, the withholding agent must make an information return for the entity and for each of the interest holders claiming to derive an allocable share of amounts paid to the entity as a resident of an applicable treaty country.

(7) *Effect of grace period on filing requirements.* A withholding agent who relies on the provisions of § 1.1441–1(b)(3)(iv) to treat the payee as a foreign person during a 90-day grace period while awaiting the documentation must make an information return on a Form 1042–S to report all payments to such person during the grace period even if such person is (or is presumed to be) a U.S. person based upon documentation furnished to the withholding agent when the grace period expired or subsequently, or based upon applicable presumptions in § 1.1441–1(b)(3).

(8) *Magnetic media reporting.* A withholding agent that makes 250 or more Form 1042–S information returns for a taxable year must file Form 1042–S returns on magnetic media. See § 301.6011–2 of this chapter for requirements applicable to a withholding agent that files Forms 1042–S with the IRS on magnetic media and publications of the IRS relating to magnetic media filing.

(d) *Report of taxpayer identifying numbers.* When so required under procedures that the IRS may prescribe in published guidance (see § 601.601(d)(2) of this chapter), a withholding agent must attach to the Form 1042 a list of all the taxpayer identifying numbers (and corresponding names) that have been furnished to the withholding agent and upon which the withholding agent has relied to grant a reduced rate of withholding and that are not otherwise required to be reported on a Form 1042–S under the provisions of this section.

(e) *Indemnification of withholding agent.* A withholding agent is indemnified against the claims and demands of any person for the amount of any tax it deducts and withholds in accordance with the provisions of chapter 3 of the Code and the regulations under that chapter. A withholding agent that withholds based on a reasonable belief that such withholding is required under chapter 3 of the Code and the regulations under that chapter is treated for purposes of section 1461 and this paragraph (e) as having withheld tax in accordance with the provisions of chapter 3 of the Code and the regulations under that chapter. In addition, a withholding agent is indemnified against the claims and demands of any person for the amount of any payments made in accordance with the grace period provisions set forth in § 1.1441–1(b)(3)(iv). This paragraph (e) does not apply to relieve a withholding agent from tax liability under chapter 3 of the Code or the regulations under that chapter.

(f) *Amounts paid not constituting gross income.* Any amount withheld in accordance with § 1.1441–3 shall be reported and paid in accordance with this section, even though the amount paid to the beneficial owner may not constitute gross income in whole or in part. For this purpose, a reference in this section and §1.1461–2 to an amount shall, where appropriate, be deemed to refer to the amount subject to withholding under §1.1441–3.

(g) *Extensions of time to file Forms 1042 and 1042–S.* The IRS may grant an extension of time in which to file a Form 1042 or a Form 1042–S. Form 2758, Application for Extension of Time to File Certain Excise, Income, Information, and Other Returns (or such other form as the IRS may prescribe), must be used to request an extension of time for a Form 1042. Form 8809, Request for Extension of Time to File Information Returns (or such other form as the IRS may prescribe) must be used to request an extension of time for a Form 1042–S. The request must contain a statement of the reasons for requesting the extension and such other information as the forms or instructions may require. It must be mailed or delivered not later than March 15 of the year following the end of the calendar year for which the return will be filed.

(h) *Penalties.* For penalties and additions to the tax for failure to file returns or furnish statements in accordance with this section, see sections 6651, 6662, 6663, 6721, 6722, 6723, 6724(c), 7201, 7203, and the regulations under those sections.

(i) *Effective date.* This section shall apply to returns required for payments made after December 31, 1999.

[T.D. 8734, 62 FR 53467, Oct. 14, 1997, as amended by T.D. 8804, 63 FR 72188, Dec. 31, 1998]

EFFECTIVE DATE NOTE: By T.D. 8734, 62 FR 53467, Oct. 14, 1997, §1.1461–1 was revised, effective Jan. 1, 1999. By T.D. 8804, 63 FR 72183, Dec. 31, 1998, the effectiveness of §1.1461–1 was delayed until Jan. 1, 2000. For the convenience of the user, the superseded text is set forth as follows:

§1.1461–1 Ownership certificates for bond interest.

(a) *Tax-free covenant bond interest of citizens and residents of the United States.* Citizens, resident individuals, fiduciaries, and partnerships, and nonresident partnerships all of the members of which are citizens or residents, owning bonds, mortgages, or deeds of trust, or other similar obligations issued by a domestic corporation, a resident foreign corporation, or a nonresident foreign corporation having a fiscal or paying agent in the United States, shall, when presenting interest coupons for payment, file ownership certificates for each issue of such obligations issued before January 1, 1934, and containing a tax-free covenant. This rule shall apply without regard to the amount of the interest coupons.

(b) *Nonresident aliens and foreign corporations.* (1) Nonresident alien individuals, foreign partnerships, foreign corporations, and unknown owners, owning bonds, mortgages, or deeds of trust, or other similar obligations of a corporation, shall, when presenting interest coupons for payment, file ownership certificates for each issue of all such obligations whether or not the obligation contains a tax-free covenant. This rule shall apply without regard to the amount of the interest coupons and without regard to the date on which the obligations were issued.

(2) Ownership certificates shall also be filed in the case of interest paid on obligations of the United States or of any agency or instrumentality thereof, irrespective of the date on which the obligations are issued or of the amount of the interest, if the obligations are owned by a nonresident alien individual, foreign partnership, foreign corporation, or an unknown owner.

(3) Notwithstanding subparagraphs (1) and (2) of this paragraph, ownership certificates are not required to be filed by:

(i) A nonresident alien individual, foreign partnership, or foreign corporation, engaged in a trade or business in the United States during the taxable year, if the interest is effectively connected with the conduct of a trade or business within the United States by such person and is exempted from withholding under section 1441 or section 1442 by reason of paragraph (a) of §1.1441–4,

(ii) A nonresident alien individual, a foreign corporation, or a foreign partnership composed wholly of nonresident alien individuals and foreign corporations, if the interest is treated under section 861(a)(1) and the regulations thereunder as income not from sources within the United States, or

(iii) A foreign partnership or foreign corporation engaged in trade or business in the United States during the taxable year, with respect to interest which is exempted from withholding under section 1441 or 1442 by reason of paragraph (f) of §1.1441–4.

(4) See §1.1441–6 in case of coupon bond interest which is subject to a reduced rate of, or an exemption from, tax pursuant to a tax convention.

(c) *Overdue coupon bonds.* In the case of interest payments on overdue coupon bonds, the interest coupons of which have been exhausted, ownership certificates are required to be filed when collecting the interest in the same manner as if interest coupons were presented for collection.

(d) *Information shown on ownership certificate.* The ownership certificate shall include such information as is required by the form and accompanying instructions. This paragraph shall apply to all special variations of Form 1001 referred to in paragraph (i) of this section.

(e) *Ownership certificates not required.* Ownership certificates are not required to be filed in the case of interest payments on:

(1) Obligations of a State, Territory, or possession of the United States, or any political subdivision of any of the foregoing, or of the District of Columbia;

(2) Bonds, mortgages, or deeds of trust, or other similar obligations issued by an individual or a partnership; and

(3) Obligations owned by a domestic corporation or foreign government.

(f) *Interest coupons unaccompanied by ownership certificates.* (1) When interest coupons detached from corporate bonds, or from obligations of the United States or of any agency or instrumentality thereof, are received unaccompanied by ownership certificates, the first bank to which the coupons are presented for payment shall require of the payee a statement showing the name and address of the person from whom the coupons were received by the payee and alleging that the owner of the bonds is unknown to the payee. This rule shall not apply if the owner of the bonds is known to the bank and the bank is satisfied that the owner is a person who is not required to file an ownership certificate.

(2) The bank shall also require the payee to prepare an ownership certificate on Form 1001, which shall be modified by crossing out ''owner,'' inserting ''payee,'' stamping or writing across the face of the certificate ''Statement furnished,'' and adding the name of the bank.

(3) The statement furnished pursuant to this paragraph shall be forwarded to the Internal Revenue Service Center, Philadelphia, PA 19255 with the annual return on Form 1042.

(g) *Noncoupon bonds*—(1) *General rule.* Ownership certificates on Form 1000 or, in case of payments made on or before December 31, 1971, on Form 1001, are required in connection with interest payments on noncoupon bonds as in the case of coupon bonds. If an ownership certificate is not furnished by the owner of a noncoupon bond, the certificate shall be prepared by the withholding agent but is not required to be signed by the owner.

(2) *Application of tax treaties.* Ownership certificates are not required when claiming the benefit of an exemption from tax, or reduced rate of tax, granted by an applicable tax convention in respect of interest payments on noncoupon bonds. Regulations under the various income tax conventions require, in lieu of an ownership certificate, the use of an exemption (or reduced rate) certificate (or corresponding letter) in the case of such interest payments. These regulations are effective with respect to payments made prior to December 31, 1974, if such certificate was filed with respect to such income prior to December 31, 1971. Such a certificate may not be prepared by the withholding agent but must be signed by the owner of the interest, or by his trustee or agent in accordance with the applicable tax treaty regulation. See § 1.1441–6 for requirements with respect to payments to which such certificates do not apply.

(h) *Form of ownership certificate for citizens and residents.* Form 1000 shall be used in preparing ownership certificates of individuals or fiduciaries who are citizens or residents of the United States, of resident partnerships, and of nonresident partnerships all of the members of which are citizens or residents. If the obligations are issued by a nonresident foreign corporation having a fiscal or paying agent in the United States, Form 1000 shall be modified to show the name and address of the fiscal agent or the paying agent in addition to the name and address of the debtor corporation. Duplicate copies of Form 1000 are not required.

(i) *Form of ownership certificate for nonresident aliens and foreign corporations.* Form 1001 shall be used in preparing ownership certificates of nonresident alien individuals, foreign partnerships, foreign corporations, and unknown owners. For payments of interest made prior to December 31, 1971, a special variation of Form 1001 (designated by a letter or letters following the number 1001) shall be used, however, in preparing ownership certificates of persons claiming the benefit of an exemption from tax, or reduced rate of tax, granted by an applicable income tax convention in respect of interest payments on coupon bonds. See the applicable tax treaty regulation and paragraph (d) of this section. Form 1001, and the special variations of such form, for payments of interest made before December 31, 1971, shall be filed in duplicate. Form 1001, for payments of interest made on or after January 1, 1972, shall be retained by the withholding agent for at least 4 years after the interest is paid.

(j) *Ownership certificates in the case of fiduciaries and joint owners.* (1) Fiduciaries having the control and custody of more than one estate or trust, the assets of which include bonds of corporations and other securities, shall execute a certificate of ownership for each estate or trust even though the bonds are of the same issue. The ownership certificate shall show both the name of the estate or trust and the name and address of the fiduciary.

(2) Separate ownership certificates shall be executed in behalf of each person owning bonds jointly with another.

(k) *Inconsistent regulations.* All regulations inconsistent with the provisions of this section shall be deemed to have been modified accordingly.

(Approved by the Office of Management and Budget under control number 1545–0795)

[T.D. 6500, 25 FR 12077, Nov. 26, 1960, as amended by T.D. 6908, 31 FR 16774, Dec. 31, 1966; T.D. 7157, 36 FR 25228, Dec. 30, 1971; T.D. 7977, 49 FR 36835, Sept. 20, 1984]

§1.1461–2 Adjustments for overwithholding or underwithholding of tax.

(a) *Adjustments of overwithheld tax*—(1) *In general.* A withholding agent that has overwithheld under chapter 3 of the Internal Revenue Code (Code) and made a deposit of the tax as provided in §1.6302–2(a) may adjust the overwithheld amount either pursuant to the reimbursement procedure described in paragraph (a)(2) of this section or pursuant to the set-off procedure described in paragraph (a)(3) of this section. Adjustments under this paragraph (a) may only be made within the time prescribed under paragraph (a) (2) or (3) of this section. After such time, a refund of the amount overwithheld can only be claimed by the beneficial owner with the Internal Revenue Service (IRS) pursuant to the procedures described in chapter 65 of the Code. For purposes of this section, the term overwithholding means any amount actually withheld (determined before application of the adjustment procedures under this section) from an item of income pursuant to chapter 3 of the Code or the regulations thereunder in excess of the actual tax liability due, regardless of whether such overwithholding was in error or appeared correct at the time it occurred.

(2) *Reimbursement of tax*—(i) *General rule.* Under the reimbursement procedure, the withholding agent repays the beneficial owner or payee for the amount overwithheld. In such a case, the withholding agent may reimburse itself by reducing, by the amount of tax actually repaid to the beneficial owner or payee, the amount of any deposit of tax made by the withholding agent under §1.6302–2(a)(1)(iii) for any subsequent payment period occurring before the end of the calendar year following the calendar year of overwithholding. Any such reduction that occurs for a payment period in the calendar year following the calendar year of overwithholding shall be allowed only if—

(A) The withholding agent states, on a timely filed (not including extensions) Form 1042–S for the calendar year of overwithholding, the amount of tax withheld and the amount of any actual repayment; and

(B) The withholding agent states on a timely filed (not including extensions) Form 1042 for the calendar year of overwithholding, that the filing of the Form 1042 constitutes a claim for credit in accordance with §1.6414–1.

(ii) *Record maintenance.* If the beneficial owner is repaid an amount of withholding tax under the provisions of this paragraph (a)(2), the withholding agent shall keep as part of its records a receipt showing the date and amount of repayment and the withholding agent must provide a copy of such receipt to the beneficial owner. For this purpose, a canceled check or an entry in a statement is sufficient provided that the check or statement contains a specific notation that it is a refund of tax overwithheld.

(3) *Set-offs.* Under the set-off procedure, the withholding agent may repay the beneficial owner or payee by applying the amount overwithheld against any amount which otherwise would be required under chapter 3 of the Code or the regulations thereunder to be withheld from income paid by the withholding agent to such person before the earlier of the due date (without regard to extensions) for filing the Form 1042–S for the calendar year of overwithholding or the date that the Form 1042–S is actually filed with the IRS. For purposes of making a return on Form 1042 or 1042–S (or an amended form) for the calendar year of overwithholding and for purposes of making a deposit of the amount withheld, the reduced amount shall be considered the amount required to be withheld from such income under chapter 3 of the Code and the regulations thereunder.

(4) *Examples.* The principles of this paragraph (a) are illustrated by the following examples:

Example 1. (i) N is a nonresident alien individual who is a resident of the United Kingdom. In December 2000, a domestic corporation C pays a dividend of $100 to N, at which time C withholds $30 and remits the balance of $70 to N. On February 10, 2001, prior to the time that C files its Form 1042, N furnishes a valid Form W–8 described in § 1.1441–1(e)(2)(i) upon which C may rely to reduce the rate of withholding to 15 percent under the provisions of the U.S.–U.K. tax treaty. Consequently, N advises C that its tax liability is only $15 and not $30 and requests reimbursement of $15. Although C has already deposited the $30 that was withheld, as required by § 1.6302–2(a)(1)(iv), C repays N in the amount of $15.

(ii) During 2000, C makes no other payments upon which tax is required to be withheld under chapter 3 of the Code; accordingly, its return on Form 1042 for such year, which is filed on March 15, 2001, shows total tax withheld of $30, an adjusted total tax withheld of $15, and $30 previously paid for such year. Pursuant to § 1.6414–1(b), C claims a credit for the overpayment of $15 shown on the Form 1042 for 2000. Accordingly, it is permitted to reduce by $15 any deposit required by § 1.6302–2 to be made of tax withheld during the calendar year 2001. The Form 1042–S required to be filed by C with respect to the dividend of $100 paid to N in 2000 is required to show tax withheld of $30 and tax released of $15.

Example 2. The facts are the same as in *Example 1.* In addition, during 2001, C makes payments to N upon which it is required to withhold $200 under chapter 3 of the Code, all of which is withheld in June 2001. Pursuant to § 1.6302–2(a)(1)(iii), C deposits the amount of $185 on July 15, 2001 ($200 less the $15 for which credit is claimed on the Form 1042 for 2000). On March 15, 2002, C Corporation files its return on Form 1042 for calendar year 2001, which shows total tax withheld of $200, $185 previously deposited by C, and $15 allowable credit.

Example 3. The facts are the same as in *Example 1.* Under § 1.6032–2(a)(1)(ii)), C is required to deposit on a quarter-monthly basis the tax withheld under chapter 3 of the Code. C withholds tax of $100 between February 8 and February 15, 2001, and deposits $75 [($100 x 90 percent) less $15] of the withheld tax within 3 banking days after February 15, 2001, and by depositing $10 [($100 − $15) less $75] within 3 banking days after March 15, 2001.

(b) *Withholding of additional tax when underwithholding occurs.* A withholding agent may withhold from future payments made to a beneficial owner the tax that should have been withheld from previous payments to such beneficial owner. In the alternative, the withholding agent may satisfy the tax from property that it holds in custody for the beneficial owner or property over which it has control. Such additional withholding or satisfaction of the tax owed may only be made before the date that the Form 1042 is required to be filed (not including extensions) for the calendar year in which the underwithholding occurred. See § 1.6302–2 for making deposits of tax or § 1.1461–1(a) for making payment of the balance due for a calendar year.

(c) *Definition.* For purposes of this section, the term *payment period* means the period for which the withholding agent is required by § 1.6302–2(a)(1) to make a deposit of tax withheld under chapter 3 of the Code.

(d) *Effective date.* This section applies to payments made after December 31, 1999.

[T.D. 8734, 62 FR 53470, Oct. 14, 1997, as amended by T.D. 8804, 63 FR 72188, Dec. 31, 1998]

EFFECTIVE DATE NOTE: By T.D. 8734, 62 FR 53467, Oct. 14, 1997, § 1.1461–2 was revised, effective Jan. 1, 1999. By T.D. 8804, 63 FR 72183, Dec. 31, 1998, the effectiveness of § 1.1461–2 was delayed until Jan. 1, 2000. For the convenience of the user, the superseded text is set forth as follows:

§ 1.1461–2 Return of tax withheld.

(a) *Effective date.* This section shall apply only with respect to payments of income occurring after December 31, 1966.

(b) *Form 1042*—(1) *Filing requirement.* Every withholding agent shall make on or before March 15 an annual return on Form 1042 of the tax required to be withheld under chapter 3 of the Code during the preceding calendar year. Form 1042 is required to be made in respect of a calendar year, even though no tax was required to be withheld under such chapter during such year, if the withholding agent is required by paragraph (c)(1) of this section to make an information return on Form 1042S with respect to any payments made during such year. Form 1042 shall be filed with the Internal Revenue Service Center, Philadelphia, PA. 19255. The return shall be prepared in duplicate and shall include such information as is required by the form and accompanying instructions. If an adjustment is required on Form 1042 because of repayments of withheld tax pursuant to paragraph (a)(1) of § 1.1461–4, only the aggregate amount of such adjustment shall be shown thereon and no itemized explanation of such aggregate amount shall be required to accompany such form. See paragraph (b) of §1.1461–4. If, pursuant to paragraph (a)(2) of §1.1461–3, any additional amount of tax is required to be paid to the Internal Revenue Service Center, Philadelphia, PA. for the preceding calendar year when filing Form 1042, no itemized explanation of such additional payment of tax shall be required to accompany such form. The duplicate copy of Form 1042 shall be retained by the withholding agent.

(2) *Summary of accompanying forms.* Form 1042 shall be accompanied by the original copies of all Forms 1042S which were prepared by the withholding agent during the previous calendar year, including such forms upon which income exempt from withholding of tax is reported. The forms so forwarded with Form 1042 are not required to be listed thereon; but they shall be summarized on Form 1042 in the manner prescribed thereon and in the instructions applicable thereto. The exemption and reduced rate certificates, such as Form 1001A–D or Form 1001A–J, referred to in paragraph (g)(2) of §1.1461–1 are not required to accompany, or to be summarized on, Form 1042.

(c) *Form 1042S*—(1) *Filing requirement.* Every withholding agent shall make on or before March 15 an annual information return on Form 1042S of all items of income specified in §1.1441–2 paid during the previous calendar year to nonresident alien individuals, foreign partnerships, nonresident alien or foreign fiduciaries of a trust or estate, or foreign corporations if such items consist of—

(i) Amounts upon which tax would have been required to be withheld under chapter 3 of the Code,

(ii) Amounts upon which tax would have been required to be withheld under such chapter but for an exclusion from gross income applicable under any income tax treaty to which the United States is a party,

(iii) Amounts upon which tax would have been required to be withheld under such chapter but for the provisions of any specific complete or partial exemption from withholding applicable under the authority of any regulation under this title or any ruling or procedure of the Commissioner, or

(iv) Amounts in respect of which tax withheld under such chapter has, pursuant to such authority, been released or refunded to the payee by the withholding agent.

All amounts shall be shown in U.S. currency. Notwithstanding subdivisions (i) through (iv) of this subparagraph (1), income paid to nonresident alien individual, foreign partnerships, nonresident alien or foreign fiduciaries of a trust or estate, or foreign corporations and required to be shown on Form W–2, or in the case of income paid prior to January 1, 1972, on Form 1001 (or on any special variation of Form 1001 referred to in paragraph (i) of §1.1461–1, or the substitute thereof) is not required to be shown on Form 1042S. However, a return under this subparagraph is required on Form 1042S (rather than on Form W–2) in respect of amounts which otherwise would be required to be shown on Form W–2 solely by reason of §1.6041–2 (relating to return of information as to payments to employees) or §1.6052–1 (relating to information regarding payment of wages in the form of group-term life insurance). The original Form 1042S shall accompany Form 1042 and shall be filed with the Internal Revenue Service Center, Philadelphia, PA 19255.

(2) *Information to be furnished.* (i) Form 1042S shall include such information as is required by the form and accompanying instructions.

(ii) If a Form 1042S is prepared in respect of an item of income upon which tax has not been withheld under chapter 3 of the Code, a brief statment as to the authority for such failure to withhold shall be made upon the form itself. If necessary, however, a separate statement as to such authority may be attached to the original copy of the Form 1042S.

(iii) If a Form 1042S is prepared in respect of compensation from which the personal exemption is deducted in accordance with paragraph (e) of §1.1441–3, the amount of the compensation allocable to labor or personal services performed within the United States, together with the amount of the deduction for the prorated personal exemption, shall be shown on a separate statement attached to the original copy of that form.

(iv) If any certificate, statement, letter, or form relating to an exemption (as described in §1.1441–4) is filed with or presented to a withholding agent, such certificate, statement, letter, or form shall be attached to each Form 1042S relating to the income subject to the exemption.

(3) *Manner of preparing Form 1042S.* (i) Form 1042S shall be prepared with respect to all payments of any item of income made during the calendar year to the same payee in the manner prescribed by the form and accompanying instructions. Payment of an item of income to a nominee or representative for the benefit of other persons in respect of whom Form 1042S are required may not be shown on a single Forms 1042S but must be identified with the ultimate recipients of the income if such information is known to the payer of the income.

(ii) The duplicate copy of Form 1042S shall be furnished to the payee indicated thereon, and a copy shall be retained by the withholding agent.

(4) *Alternative methods.* To the extent that the withholding agent's system of record keeping makes impractical the use of Form 1042S in the manner prescribed by paragraph (c)(3) of this section, he may devise and submit for the prior annual approval of the

Commissioner a variation of Form 1042S which will include the information required by paragraph (c)(2) of this section and which will substantially comply with the requirements of paragraph (c)(3) of this section. Request for such approval shall be sent to: Internal Revenue Service, Attn: Substitute Forms Program, 1111 Constitution Avenue, NW., Washington, DC 20224 and shall be accompanied by an explanation as to why such variation is necessary.

(d) *Information to be furnished by Commissioner.* If a foreign country has entered into an income tax treaty with the United States which provides for the mutual exchange of information, the Commissioner shall, as soon as practicable after the close of a calendar year during which the treaty is in effect, transmit to the appropriate authority designated in the treaty with that country the information contained in Forms 1042S showing a payee with an address in the country. This information is not to be furnished to any such foreign country, however, if the Commissioner ascertains through appropriate channels that the information is not required by that country.

(e) *Penalties.* For penalties and additions to the tax attaching upon failure to comply with this section, see sections 6651, 6656, 6676, and 7203.

(f) *Special items.* The tax withheld in accordance with paragraphs (b)(1), (c)(3), and (d)(1) of § 1.1441–3 shall be returned and paid in accordance with this section even though the items involved may not constitute gross income in whole or in part. For such purpose, a reference in this section to an item or amount of income shall, where appropriate, be deemed to refer also to the items specified in such paragraphs or the amount thereof.

(g) *Inconsistent regulations.* All regulations inconsistent with the provisions of this section shall be deemed to have been modified accordingly.

(Approved by the Office of Management and Budget under control number 1545–0795)

(Secs. 1441(c)(4) (80 Stat. 1553; 26 U.S.C. 1441(c)(4)), 3401(a)(6) (80 Stat. 1554; 26 U.S.C. 3401(a)(6)), and 7805 (68A Stat. 917; 26 U.S.C. 7805) of the Internal Revenue Code of 1954)

[T.D. 6500, 25 FR 12078, Nov. 26, 1960, as amended by T.D. 6922, 32 FR 8711, June 17, 1967; T.D. 7157, 36 FR 25228, Dec. 30, 1971; T.D. 7977, 49 FR 36835, Sept. 20, 1984]

§ 1.1461–3 Payment of withheld tax.

(a) *Payments of tax*—(1) *Quarterly payments*—(i) *Years prior to 1973.* Every withholding agent who, pursuant to chapter 3 of the Code, withholds tax during any calendar quarter beginning after December 31, 1966, and ending on or before December 31, 1972, shall, to the extent such amounts have not been deposited pursuant to § 1.6302–2 with a Federal Reserve bank or an authorized commercial bank, pay such withheld tax to the Internal Revenue Service Center, Philadelphia, PA 19255, on or before the last day of the first calendar month following the close of the calendar quarter. Any amounts required to be paid to the Director pursuant to this subdivision shall be made with quarterly transmittal Form 4277, even though the withholding agent has made no deposits pursuant to paragraph (a)(2) of § 1.6302–2 and has no validated depositary receipts to accompany that transmittal form.

(ii) *1973 and subsequent years.* Payments are not required to be made for calendar quarters ending after December 31, 1972.

(2) *Payment of balance of tax with Form 1042.* If for any reason the total amount of tax required to be returned for any calendar year pursuant to paragraph (b) of § 1.1461–2 has not been deposited pursuant to § 1.6302–2 (or, for years prior to 1973 deposited pursuant to § 1.6302–2 or paid pursuant to subparagraph (1) of this paragraph), the withholding agent shall pay the balance of tax due for such year to the Internal Revenue Service Center, Philadelphia, PA 19255, when filing Form 1042 for such year.

(b) *Penalties for failure to pay tax.* For penalties and additions to the tax for failure to pay the tax required to be withheld under chapter 3 of the Code, see sections 6653 and 7202.

(c) *Deposits of tax.* For provisions relating to the use of Federal Reserve banks or authorized financial institutions for the deposit of tax required to be withheld under chapter 3 of the Code, see § 1.6302–2.

(Approved by the Office of Management and Budget under control number 1545–0257)

[T.D. 6922, 32 FR 8712, June 17, 1967, as amended by T.D. 7243, 38 FR 21, Jan. 3, 1973; T.D. 7953, 49 FR 19644, May 9, 1984; T.D. 7977, 49 FR 36836, Sept. 20, 1984]

EFFECTIVE DATE NOTE: By T.D. 8734, 62 FR 53471, Oct. 14, 1997, § 1.1461–3 was removed, effective Jan. 1, 1999. By T.D. 8804, 63 FR 72183, Dec. 31, 1998, the effectiveness of the removal of § 1.1461–3 was delayed until Jan. 1, 2000.

§1.1461–4 Adjustments for overwithholding of tax.

(a) *Repayment of erroneously withheld tax after payment of tax by withholding agent*—(1) *Repayment of tax to payee.* If, in any payment period (as defined in paragraph (c) of this section) occurring in a calendar year, a withholding agent (i) withholds from amounts paid to any person more than the correct amount of tax required to be withheld under chapter 3 of the Code and (ii) makes a deposit of the amount of such overwithholding as provided in §1.6302–2 (or, for years prior to 1973, makes a payment or deposit of the amount of such overwithholding as provided in §1.1461–3 or §1.6302–2), the withholding agent may repay such amount, at any time before filing Form 1042 for such calendar year, to the person from whose income such amount was withheld.

(2) *Reimbursement of payee.* If the withholding agent does not repay the amount of the overwithholding pursuant to subparagraph (1) of this paragraph, the withholding agent may reimburse the person entitled to such amount by applying the amount of the overwithholding against any tax which otherwise would be required under chapter 3 of the Code to be withheld from income paid by the withholding agent to such person before filing Form 1042 for the calendar year in which such overwithholding occurred. For purposes of making a return on Form 1042 and for purposes of making a payment or deposit of the amount withheld, the reduced amount so withheld shall be considered the amount required to be withheld from such income under chapter 3 of the Code.

(b) *Adjustment of tax payments or deposits.* If, pursuant to paragraph (a)(1) of this section, a withholding agent repays a person the amount of tax overwithheld from such person under Chapter 3 of the Code during any payment period of the calendar year, the withholding agent may reduce, by the amount so overwithheld, the amount of any deposit of tax required by paragraph (a) of §1.6302–2 (or, for years prior to 1973, the amount of any payment or deposit of tax required by §1.1461–3 or paragraph (a) of §1.6302–2) to be made by the withholding agent for any subsequent payment period occurring before the end of the calendar year following the calendar year of overwithholding. The reduction of a payment or deposit of tax for a payment period occurring in the calendar year following the calendar year of overwithholding shall be made only if the withholding agent files, on his Form 1042 for the calendar year of overwithholding, a claim for credit in accordance with paragraph (b) of §1.6414–1. The application of this paragraph may be illustrated by the following examples:

Example (1). (a) A is a nonresident alien individual who is a resident of the United Kingdom. In December 1973, a domestic corporation M pays a dividend of $100 to A, at which time M Corporation withholds $30 and remits the balance of $70 to A. On February 16, 1974, A advises M Corporation that, pursuant to the income tax convention with the United Kingdom, only $15 tax should have been withheld from the $100 dividend and requests repayment of the $15 which was erroneously withheld. Although M Corporation has already deposited the $30 which was withheld, as permitted by paragraph (a)(1)(iv) of §1.6302–2, such corporation repays A in the amount of $15.

(b) During 1973 M Corporation makes no other payments upon which tax is required to be withheld under Chapter 3 of the Code; accordingly, its return on Form 1042 for such year, which is filed on March 15, 1974, shows total tax withheld of $30, which is reduced by an adjustment of $15 for the amount repaid to A, an adjusted total tax withheld of $15, and $30 previously paid for such year. Pursuant to paragraph (b) of §1.6414–1, M Corporation claims credit for the overpayment of $15 shown on the Form 1042 for 1973. Accordingly, it is permitted to reduce by $15 any deposit required by §1.6302–2 to be made of tax withheld during 1974. The Form 1042S required to be filed by M Corporation with respect to the dividend of $100 paid to A in 1973 is required to show tax withheld of $30 and tax released of $15. The Form 1042S (or authorized substitute) is required to accompany the Form 1042 for 1973 which is filed on March 15, 1974. No additional explanation is required to be filed with the Form 1042 for 1973 in support of the $15 adjustment claimed thereon.

(c) During 1974 M Corporation is required to withhold under chapter 3 of the Code $200, all of such amount being withheld in June of that year. Pursuant to §1.6302–2, M Corporation deposits on July 15, 1974, the amount of $185, that is, $200 less the $15 for which credit is claimed on the Form 1042 for 1973. On March 17, 1975, M Corporation files its return on Form 1042 for 1974, which shows total tax withheld of $200, $185 previously deposited by M Corporation, and $15 allowable credit.

Example (2). The facts are the same as in example (1) except that paragraph (c) of such example does not apply and that M Corporation is required to deposit on a quarter-monthly basis the tax withheld under chapter 3 of the Code. M Corporation withholds tax of $100 between February 22, and February 28, 1974, and complies with the quarter-monthly deposit requirement of paragraph (a)(1)(ii) of § 1.6302–2 by depositing $75 [(100×90 percent) less $15] of the withheld tax by March 5, 1974 (3 banking days after February 28, 1974) and by depositing $10 [($100 − $15) less $75] by March 20, 1974 (3 banking days after March 15, 1974).

(c) *Definition*—(1) *1973 and subsequent years.* For purposes of this section, for calendar years beginning on or after January 1, 1973, the term *payment period* means a calendar month or a quarter-monthly period (as the case may be) in such a calendar year with respect to which the withholding agent is required by paragraph (a)(1) of § 1.6302–2 to make a deposit of tax withheld under Chapter 3 of the Code.

(2) *Years prior to 1973.* For the purposes of this section, for calendar years ending on or before December 31, 1972, the term *payment period* means (i)*(a)* a calendar month or *(b)* a semimonthly period (as the case may be) in such a calendar year with respect to which the withholding agent is required by paragraph (a)(2) of § 1.6302–2 to make a deposit of tax withheld under Chapter 3 of the Code, or (ii) a calendar quarter in such a calendar year with respect to which he is required by paragraph (a)(1) of § 1.1461–3 to make a payment of such tax.

[T.D. 6922, 32 FR 8712, June 17, 1967, as amended by T.D. 7243, 38 FR 22, Jan. 3, 1973]

EFFECTIVE DATE NOTE: By T.D. 8734, 62 FR 53471, Oct. 14, 1997, § 1.1461–4 was removed, effective Jan. 1, 1999. By T.D. 8804, 63 FR 72183, Dec. 31, 1998, the effectiveness of the removal of § 1.1461–4 was delayed until Jan. 1, 2000.

§ 1.1462–1 Withheld tax as credit to recipient of income.

(a) *Creditable tax.* The entire amount of the income from which the tax is required to be withheld (including amounts calculated under the gross-up formula in § 1.1441–3(f)(1)) shall be included in gross income in the return required to be made by the beneficial owner of the income, without deduction for the amount required to be or actually withheld, but the amount of tax actually withheld shall be allowed as a credit against the total income tax computed in the beneficial owner's return.

(b) *Amounts paid to persons who are not the beneficial owner.* Amounts withheld at source under chapter 3 of the Internal Revenue Code (Code) on payments to a fiduciary, partnership, or intermediary is deemed to have been paid by the taxpayer ultimately liable for the tax upon such income. Thus, for example, if a beneficiary of a trust is subject to the taxes imposed by section 1, 2, 3, or 11 upon any portion of the income received from a foreign trust, the part of any amount withheld at source which is properly allocable to the income so taxed to such beneficiary shall be credited against the amount of the income tax computed upon the beneficiary's return, and any excess shall be refunded. Further, if a partnership withholds an amount under chapter 3 of the Code with respect to the distributive share of a partner that is a partnership or with respect to the distributive share of partners in an upper tier partnership, such amount is deemed to have been withheld by the upper tier partnership.

(c) *Effective date.* This section applies to payments made after December 31, 1999.

[T.D. 8734, 62 FR 53471, Oct. 14, 1997, as amended by T.D. 8804, 63 FR 72188, Dec. 31, 1998]

EFFECTIVE DATE NOTE: By T.D. 8734, 62 FR 53471, Oct. 14, 1997, § 1.1462–1 was revised, effective Jan. 1, 1999. By T.D. 8804, 63 FR 72183, Dec. 31, 1998, the effectiveness of § 1.1462–1 was delayed until Jan. 1, 2000. For the convenience of the user, the superseded text is set forth as follows:

§ 1.1462–1 Withheld tax as credit to recipient of income.

(a) *Return of income from which tax was withheld.* The entire amount of the income from which the tax is required to be withheld shall be included in gross income in the return required to be made by the recipient of the income, without deduction for the amount required to be withheld, but the tax so withheld shall be allowed as a credit against the total income tax computed in the taxpayer's return.

(b) *Amounts paid to fiduciaries.* Tax withheld at the source under chapter 3 of the Code upon income paid to any fiduciary is deemed to have been paid by the taxpayer ultimately liable for the tax upon such income. Thus, for example, if any taxpayer is subject to the taxes imposed by section 1, 2, 3, or 11 upon any portion of the income of a nonresident alien estate or trust, the part of any tax withheld at the source which is properly allocable to the income so taxed to such taxpayer shall be credited against the amount of the income tax computed upon the taxpayer's return, and any excess shall be credited against any income, war profits, or excess profits tax, or installment thereof, then due from the taxpayer, and any balance shall be refunded.

(Secs. 1441(c)(4) (80 Stat. 1553; 26 U.S.C. 1441(c)(4)), 3401(a)(6) (80 Stat. 1554; 26 U.S.C. 3401(a)(6)), and 7805 (68A Stat. 917; 26 U.S.C. 7805) of the Internal Revenue Code of 1954)

[T.D. 6500, 25 FR 12080, Nov. 26, 1960, as amended by T.D. 7977, 49 FR 36836, Sept. 20, 1984]

§1.1463–1 Tax paid by recipient of income.

(a) *Tax paid.* If the tax required to be withheld under chapter 3 of the Internal Revenue Code is paid by the beneficial owner of the income or by the withholding agent, it shall not be recollected from the other, regardless of the original liability therefor. However, this section does not relieve the person that did not withhold tax from liability for interest or any penalties or additions to tax otherwise applicable. See §1.1441–7(b) for additional applicable rules.

(b) *Effective date.* This section applies to failures to withhold occurring after December 31, 1999.

[T.D. 8734, 62 FR 53471, Oct. 14, 1997, as amended by T.D. 8804, 63 FR 72188, Dec. 31, 1998]

EFFECTIVE DATE NOTE: By T.D. 8734, 62 FR 53471, Oct. 14, 1997, §1.1463–1 was revised, effective Jan. 1, 1999. By T.D. 8804, 63 FR 72183, Dec. 31, 1998, the effectiveness of §1.1463–1 was delayed until Jan. 1, 2000. For the convenience of the user, the superseded text is set forth as follows:

§1.1463–1 Tax paid by recipient of income.

If the tax required to be withheld under chapter 3 of the Code is paid by the recipient of the income or by the withholding agent, it shall not be recollected from the other, regardless of the original liability therefor; and, in such event, no penalty will be asserted against either person for failure to return or pay the tax where no fraud or purpose to evade payment is involved.

[T.D. 6500, 25 FR 12081, Nov. 26, 1960]

§1.1464–1 Refunds or credits.

(a) *In general.* The refund or credit under chapter 65 of the Code of an overpayment of tax which has actually been withheld at the source under chapter 3 of the Code shall be made to the taxpayer from whose income the amount of such tax was in fact withheld. To the extent that the overpayment under chapter 3 was not in fact withheld at the source, but was paid, by the withholding agent the refund or credit under chapter 65 of the overpayment shall be made to the withholding agent. Thus, where a debtor corporation assumes liability pursuant to its tax-free covenant for the tax required to be withheld under chapter 3 upon interest and pays the tax in behalf of its bondholder, and it can be shown that the bondholder is not in fact liable for any tax, the overpayment of tax shall be credited or refunded to the withholding agent in accordance with chapter 65 since the tax was not actually deducted and withheld from the interest paid to the bondholder. In further illustration, where a withholding agent who is required by chapter 3 to withhold $300 tax from rents paid to a nonresident alien individual mistakenly withholds $320 and mistakenly pays $350 as internal revenue tax, the amount of $30 shall be credited or refunded to the withholding agent in accordance with chapter 65 and the amount of $20 shall be credited or refunded in accordance with such chapter to the person from whose income such amount has been withheld.

(b) *Tax repaid to payee.* For purposes of this section and §1.6414–1, any amount of tax withheld under chapter 3 of the Code, which, pursuant to paragraph (a)(1) of §1.1461–2, is repaid by the withholding agent to the person from whose income such amount was erroneously withheld shall be considered as tax which, within the meaning of sections 1464 and 6414, was not actually withheld by the withholding agent.

[T.D. 6922, 32 FR 8713, June 17, 1967, as amended by T.D. 8804, 63 FR 72188, Dec. 31, 1998]

EFFECTIVE DATE NOTE: By T.D. 8804, 63 FR 72188, Dec. 31, 1998, in § 1.1464–1 paragraph (b) was amended by removing ''§ 1.1461–4'' and inserting in its place ''1.1461–2'', effective Jan. 1, 2000.

Rules Applicable to Recovery of Excessive Profits on Government Contracts

RECOVERY OF EXCESSIVE PROFITS ON GOVERNMENT CONTRACTS

§ 1.1471–1 Recovery of excessive profits on government contracts.

The inclusion of the statutory provisions of section 1471 in this part does not supersede the provisions of 26 CFR (1939) part 17 (Treasury Decision 4906) and 26 CFR (1939) part 16 (Treasury Decision 4909) as made applicable to section 1471 by Treasury Decision 6091 (19 FR 5167, C.B. 1954–2, 47).

[T.D. 6500, 25 FR 12081, Nov. 26, 1960]

EDITORIAL NOTE: For the convenience of the user, the text of parts 16 and 17 (not entirely superseded) of 26 CFR (1939) referred to above is set forth below:

PART 16—EXCESS PROFITS ON ARMY CONTRACTS FOR AIRCRAFT

REGULATIONS UNDER SECTION 14 OF THE ACT OF APRIL 3, 1939, AND OTHER PROVISIONS

AUTHORITY: Sections 16.1 to 16.18 issued under 52 Stat. 467; 26 U.S.C. 3791. Interpret or apply sec. 3, 48 Stat. 505, as amended, sec. 14, 53 Stat. 560; 34 U.S.C. 496, 10 U.S.C. 311, 312.2206

SOURCE: Sections 16.1 to 16.18 contained in T.D. 4909, 4 FR 2733, July 1, 1939, except as otherwise noted.

§ 16.1 *Definitions.* As used in the regulations in this part the term:

(a) ''Act'' means the act of April 3, 1939 (53 Stat. 560; 10 U.S.C. 311, 312, 34 U.S.C. 496), together with the applicable provisions of section 3 of the act of March 27, 1934, 48 Stat. 505; 34 U.S.C. 496, as amended by the act of June 25, 1936, 49 Stat. 1926; 34 U.S.C., Sup. IV, 496, and as further amended by the act of April 3, 1939 (53 Stat. 560; 34 U.S.C. 496).

(b) ''Person'' includes an individual, a corporation, a partnership, a trust or estate, a joint-stock company, an association, or a syndicate, group, pool, joint venture or other unincorporated organization or group, through or by means of which any business, financial operation or venture is carried on.

(c) ''Contract'' means an agreement made by authority of the Secretary of the Army for the construction or manufacture of any complete aircraft or any portion thereof for the Army.

(d) ''Contractor'' means a person entering into a direct contract with the Secretary of the Army or his duly authorized representative.

(e) ''Subcontract'' means an agreement entered into by one person with another person for the construction or manufacture of any complete aircraft or any portion thereof for the Army, the prime contract for such aircraft or portion thereof having been entered into between a contractor and the Secretary of the Army or his duly authorized representative.

(f) ''Subcontractor'' means any person other than a contractor entering into a subcontract.

(g) ''Contracting party'' means a contractor or subcontractor as the case may be.

(h) ''Contract price'' or ''total contract price'' means the amount or total amount to be received under a contract or subcontract as the case may be.

(i) ''Income-taxable year'' means the calendar year, the fiscal year ending during such calendar year, or the fractional part of such calendar or fiscal year, upon the basis of which the contracting party's net income is computed and for which its income tax returns are made for Federal income tax purposes.

§ 16.2 *Contracts and subcontracts under which excess profit liability may be incurred.* Except as otherwise provided with respect to contracts or subcontracts for certain scientific equipment (see § 16.3), every contract awarded for an amount exceeding $10,000 and entered into after the enactment of the act of April 3, 1939 for the construction or manufacture of any complete aircraft or any portion thereof for the Army, is subject to the provisions of the act relating to excess profit liability. Any subcontract made with respect to such a contract and involving an amount in excess of $10,000 is also within the scope of the act. If a contracting party places orders with another party, aggregating an amount in excess of $10,000, for articles or materials which constitute a part of the cost of performing the contract or subcontract, the placing of such orders shall constitute a subcontract within the scope of the act, unless it is clearly shown that each of the orders involving $10,000 or less is a bona fide separate and distinct subcontract and not a subdivision made for the purpose of evading the provisions of the act.

§ 16.3 *Contracts or subcontracts for scientific equipment.* No excess profit liability is incurred upon a contract or subcontract entered into after the enactment of the act of April 3, 1939, if at the time or prior to the time such contract or subcontract is made it is designated by the Secretary of the Army as being exempt under the provisions of the act pertaining to scientific equipment used for communication, target detection, navigation, and fire control.

§ 16.4 *Completion of contract defined.* The date of delivery of the aircraft or portion thereof covered by the contract or subcontract shall be considered the date of completion of the contract or subcontract unless otherwise determined jointly by the Secretary of the Army and the Secretary of the Treasury or their duly authorized representatives. Except as otherwise provided in the preceding sentence, the replacement of defective parts or delivered articles or the performance of other guarantee work in respect of such articles will not operate to extend the date of completion. As to the treatment of the cost of such work as a cost of performing a contract or subcontract, see § 16.8(h). As to a refund in case of adjustment due to any subsequently incurred additional costs, see § 16.18. If a contract or subcontract is at any time cancelled or terminated, it is completed at the time of the cancellation or termination.

§ 16.5 *Manner of determining liability.* (a) The first step in the determination of the excess profit to be paid to the United States by a contracting party with respect to contracts and subcontracts completed within an income-taxable year is to ascertain the total contract prices of all contracts and subcontracts completed by the contracting party within the income-taxable year. As to total contract prices, see § 16.7.

(b) The second step is to ascertain the cost of performing such contracts and subcontracts and to deduct such cost from the total contract prices of such contracts and subcontracts as computed in the first step. See § 16.8. The amount remaining after such subtraction is the amount of net profit or net loss upon the contracts and subcontracts completed within the income-taxable year.

(c) The third step, in case there is a net profit upon such contracts and subcontracts, is to subtract from the amount of such net profit as computed in the second step the sum of:

(1) An amount equal to 12 percent of the total contract prices of the contracts and subcontracts completed within the income-taxable year;

(2) The amount of any net loss allowable as a credit in determining the excess profit for the income-taxable year (see § 16.9); and

(3) The amount of any deficiency in profit allowable as a credit in determining the excess profit for the income-taxable year (see § 16.9). The amount remaining after such subtraction is the amount of excess profit for the income-taxable year.

(d) The fourth step is to ascertain the amount of credit allowed for Federal income taxes paid or remaining to be paid upon the amount of such excess profit (see § 16.10) and then subtract from the amount of such excess profit the amount of credit for Federal income taxes. The amount remaining after this subtraction is the amount of excess profit to be paid to the United States by the contracting party for the income-taxable year.

[T.D. 4909, 4 FR 2733, July 1, 1939, as amended by T.D. 6511, 25 FR 12442, Dec. 6, 1960]

§ 16.6 *Computation of excess profit liability.* The application of the provisions of § 16.5 may be illustrated by the following example:

Example. On September 1, 1939, the B Corporation, which keeps its books and makes its Federal income tax returns on a calendar year basis, entered into a contract for the construction of Army aircraft coming within the scope of the act, the total contract price of which was $200,000. On March 10, 1940, the corporation entered into another such contract, the total contract price of which was $40,000. Both contracts were completed within the calendar year 1940, the first at a cost of $155,000 and the second at a cost of $45,000. During the year 1940, the B Corporation also completed at a deficiency in profit of $2,000 a contract entered into after April 3, 1939, for the construction of naval aircraft coming within the scope of 10 U.S.C. 2382 (formerly section 3 of the Act of March 27, 1934 (48 Stat. 505)). For the year 1939, the B Corporation sustained a net loss of $1,500 and a deficiency in profit of $1,000 on all contracts and subcontracts entered into after April 3, 1939, for Army aircraft coming within the scope of the act and completed within the calendar year 1939. For the year 1939, the B Corporation also sustained a net loss of $1,000 on a contract, entered into after April 3, 1939, and completed within the calendar year 1939, for naval aircraft coming within the scope of 10 U.S.C. 2382 (formerly section 3 of the Act of March 27, 1934 (48 Stat. 505)). For purposes of the Federal income tax, the net income of the B Corporation for the year 1940, on which the tax was paid, amounted to $96,000, which included the total net profit of $40,000 upon the two contracts entered into on September 1, 1939, and March 10, 1940. The excess profit liability is $4,332, computed as follows:

Total contract prices:		
Contract No. 1	$200,000	
Contract No. 2	40,000	
		$240,000
Less: Cost of performing contracts:		
Contract No. 1	155,000	
Contract No. 2	45,000	

		$200,000
Net profit on contracts		$40,000
Less:		
12 percent of total contract prices (12 percent of $240,000)	$28,800	
Deficiency in profit (in naval aircraft contracts) in 1940	2,000	
Net loss (in Army aircraft contracts) from 1939	1,500	
Net loss (in naval aircraft contracts) from 1939	1,000	
Deficiency in profit (in Army aircraft contracts) from 1939	1,000	....
Excess profit for year 1940		5,700
Less: Credit for Federal income taxes (Federal income tax on $5,700 at rates for 1940)		1,368
		34,300
Amount of excess profit payable to the United States		4,332

[T.D. 4909, 4 FR 2733, July 1, 1939, as amended by T.D. 6511, 25 FR 12442, Dec. 6, 1960]

§ 16.7 *Total contract price.* The total contract price of a particular contract or subcontract (see § 16.1) may be received in money or its equivalent. If something other than money is received, only the fair market value of the thing received, at the date of receipt, is to be included in determining the amount received. Bonuses earned for bettering performance and penalties incurred for failure to meet the contract guarantees are to be regarded as adjustments of the original contract price. Trade or other discounts granted by a contracting party in respect of a contract or subcontract performed by such party are also to be deducted in determining the true total contract price of such contract or subcontract.

§ 16.8 *Cost of performing a contract or subcontract.*—(a) *General rule.* The cost of performing a particular contract or subcontract shall be the sum of (1) the direct costs, including therein expenditures for materials, direct labor and direct expenses, incurred by the contracting party in performing the contract or subcontract; and (2) the proper proportion of any indirect costs (including therein a reasonable proportion of management expenses) incident to and necessary for the performance of the contract or subcontract.

(b) *Elements of cost.* No definitions of the elements of cost may be stated which are of invariable application to all contractors and subcontractors. In general, the elements of cost may be defined for purposes of the act as follows:

(1) Manufacturing cost, which is the sum of factory cost (see paragraph (c) of this section) and other manufacturing cost (see paragraph (d) of this section);

(2) Miscellaneous direct expenses (see paragraph (e) of this section);

(3) General expenses, which are the sum of indirect engineering expenses, usually termed ‘‘engineering overhead’’ (see paragraph (f) of this section) and expenses of distribution, servicing and administration (see paragraph (g) of this section); and

(4) Guarantee expenses (see paragraph (h) of this section).

(c) *Factory cost.* Factory cost is the sum of the following:

(1) *Direct materials.* Materials, such as those purchased for stock and subsequently issued for contract operations and those acquired under subcontracts, which become a component part of the finished product or which are used directly in fabricating, converting or processing such materials or parts.

(2) *Direct productive labor.* Productive labor, usually termed ‘‘shop labor,’’ which is performed on and is properly chargeable directly to the article manufactured or constructed pursuant to the contract or subcontract, but which ordinarily does not include direct engineering labor (see subparagraph (3) of this paragraph).

(3) *Direct engineering labor.* The compensation of professional engineers and other technicists (including reasonable advisory fees), and of draftsmen, properly chargeable directly to the cost of the contract or subcontract.

(4) *Miscellaneous direct factory charges.* Items which are properly chargeable directly to the factory cost of performing the contract or subcontract but which do not come within the classifications in subparagraphs (1), (2), and (3) of this paragraph, as for example, royalties which the contracting party pays to another party and which are properly chargeable to the cost of performing the contract or subcontract (but see paragraph (d) of this section).

(5) *Indirect factory expenses.* Items, usually termed ‘‘factory overhead,’’ which are not directly chargeable to the factory cost of performing the contract or subcontract but which are properly incident to and necessary for the performance of the contract or subcontract and consist of the following:

(i) *Labor.* Amounts expended for factory labor, such as supervision and inspection, clerical labor, timekeeping, packing and shipping, stores supply, services of tool crib attendants, and services in the factory employment bureau, which are not chargeable directly to productive labor of the contract or subcontract.

(ii) *Materials and supplies.* The cost of materials and supplies for general use in the factory in current operations, such as shop fuel, lubricants, heat-treating, plating, cleaning and anodizing supplies, nondurable tools and gauges, stationery (such as time tickets and other forms), and boxing and wrapping materials.

(iii) *Service expenses.* Factory expenses of a general nature, such as those for power, heat and light (whether purchased or produced), ventilation and air-conditioning and operation and maintenance of general plant assets and facilities.

(iv) *Fixed charges and obsolescence.* Recurring charges with respect to property used for manufacturing purposes of the contract or subcontract, such as premiums for fire and elevator insurance, property taxes, rentals and allowances for depreciation of such property, including maintenance and depreciation of reasonable stand-by equipment; and depreciation and obsolescence of special equipment and facilities necessarily acquired primarily for the performance of the contract or subcontract. In making allowances for depreciation, consideration shall be given to the number and length of shifts.

(v) *Miscellaneous indirect factory expenses.* Miscellaneous factory expenses not directly chargeable to the factory cost of performing the contract or subcontract, such as purchasing expenses; ordinary and necessary expenses of rearranging facilities within a department or plant; employees' welfare expenses; premiums or dues on compensation insurance; employers' payments to unemployment, old age and social security Federal and State funds not including payments deducted from or chargeable to employees or officers; pensions and retirement payments to factory employees; factory accident compensation (as to self-insurance, see paragraph (g) of this section); but not including any amounts which are not incident to services, operations, plant, equipment or facilities involved in the performance of the contract or subcontract.

(d) *Other manufacturing cost.* Other manufacturing cost as used in paragraph (b) of this section includes items of manufacturing costs which are not properly or satisfactorily chargeable to factory costs (see paragraph (c) of this section) but which upon a complete showing of all pertinent facts are properly to be included as a cost of performing the contract or subcontract, as for instance, payments of royalties and amortization of the cost of designs purchased and patent rights over their useful life; and ‘‘deferred’’ or ‘‘unliquidated’’ experimental and development charges. For example, in case experimental and development costs have been properly deferred or capitalized and are amortized in accordance with a reasonably consistent plan, a proper portion of the current charge, determined by a ratable allocation which is reasonable in consideration of the pertinent facts, may be treated as a cost of performing the contract or subcontract. In the case of general experimental and development expenses which may be charged off currently, a reasonable portion thereof may be allocated to the cost of performing the contract or subcontract. If a special experimental or development project is carried on in pursuance of a contract, or in anticipation of a contract which is later entered into, and the expense is not treated as a part of general experimental and development expenses or is not otherwise allowed as a cost of performing the contract, there clearly appearing no reasonable prospect of an additional contract for the type of article involved, the entire cost of such project may be allowed as a part of the cost of performing the contract.

(e) *Miscellaneous direct expenses.* Miscellaneous direct expenses as used in paragraph (b) of this section include:

(1) *Cost of installation and construction.* Cost of installation and construction includes the cost of materials, labor and expenses necessary for the erection and installation prior to the completion of the contract and after the delivery of the product or material manufactured or constructed pursuant to the contract or subcontract.

(2) *Sundry direct expenses.* Items of expense which are properly chargeable directly to the cost of performing a contract or subcontract and which do not constitute guarantee expenses (see paragraph (h) of this section) or direct costs classified as factory cost or other manufacturing cost (see paragraphs (c) and (d) of this section), such as premiums on performance or other bonds required under the contract or subcontract; State sales taxes imposed on the contracting party; freight on outgoing shipments; fees paid for wind tunnel and model basin tests; demonstration and test expenses; crash insurance premiums; traveling expenses. In order for any such item to be allowed as a charge directly to the cost of performing a contract or subcontract, (i) a detailed record shall be kept by the contracting party of all items of a similar character, and (ii) no item of a similar character which is properly a direct charge to other work shall be allowed as a part of any indirect expenses in determining the proper proportion thereof chargeable to the cost of performing the contract or subcontract. As to allowable indirect expenses, see paragraphs (c)(5), (f), (g) and (j) of this section.

(f) *Indirect engineering expenses.* Indirect engineering expenses, usually termed ‘‘engineering overhead,’’ which are treated in this section as a part of general expenses in determining the cost of performing a contract or subcontract (see paragraph (b) of this section), comprise the general engineering expenses which are incident to and necessary for the performance of the contract or subcontract, such as the following:

(1) *Labor.* Reasonable fees of engineers employed in a general consulting capacity, and compensation of employees for personal services to the engineering department, such as supervision, which is properly chargeable to the contract or subcontract, but which is not chargeable as direct engineering labor (see paragraph (c)(3) of this section).

(2) *Material.* Supplies for the engineering department, such as paper and ink for drafting and similar supplies.

(3) *Miscellaneous expenses.* Expenses of the engineering department, such as (i) maintenance and repair of engineering equipment, and (ii) services purchased outside of the engineering department for blue printing, drawing, computing, and like purposes.

(g) *Expenses of distribution, servicing and administration.* Expenses of distribution, servicing and administration, which are treated in this section as a part of general expenses in determining the cost of performing a contract or subcontract (see paragraph (b) of this section), comprehend the expenses incident to and necessary for the performance of the contract or subcontract, which are incurred in connection with the distribution and general servicing of the contracting party's products and the general administration of the business, such as:

(1) *Compensation for personal services of employees.* The salaries of the corporate and general executive officers and the salaries and wages of administrative clerical employees and of the office services employees such as telephone operators, janitors, cleaners, watchmen and office equipment repairmen.

(2) *Bidding and general selling expenses.* Bidding and general selling expenses which by reference to all the pertinent facts and circumstances reasonably constitute a part of the cost of performing a contract or subcontract. The treatment of bidding and general selling expenses as a part of general expenses in accordance with this paragraph is in lieu of any direct charges which otherwise might be made for such expenses. The term ''bidding expenses'' as used in this section includes all expenses in connection with preparing and submitting bids.

(3) *General servicing expenses.* Expenses which by reference to all the pertinent facts and circumstances reasonably constitute a part of the cost of performing a contract or subcontract and which are incident to delivered or installed articles and are due to ordinary adjustments or minor defects; but including no items which are treated as a part of guarantee expenses (see paragraph (h) of this section) or as a part of direct costs, such as direct materials, direct labor, and other direct expense.

(4) *Other expenses.* Miscellaneous office and administrative expenses, such as stationery and office supplies; postage; repair and depreciation of office equipment; contributions to local charitable or community organizations to the extent constituting ordinary and necessary business expenses; employees' welfare expenses; premiums and dues on compensation insurance; employers' payments to unemployment, old age and social security Federal and State funds not including payments deducted from or chargeable to employees or officers; pensions and retirement payments to administrative office employees and accident compensation to office employees (as to self-insurance, see subdivision (i) of this subparagraph.

(i) Subject to the exception stated in this subdivision, in cases where a contracting party assumes its own insurable risks (usually termed ''self-insurance''), losses and payments will be allowed in the cost of performing a contract or subcontract only to the extent of the actual losses suffered or payments incurred during, and in the course of, the performance of the contract or subcontract and properly chargeable to such contract or subcontract. If however, a contracting party assumes its own insurable risks (a) for compensation paid to employees for injuries received in the performance of their duties, or (b) for unemployment risks in States where insurance is required, there may be allowed as a part of the cost of performing a contract or subcontract a reasonable portion of the charges set up for purposes of self-insurance under a system of accounting regularly employed by the contracting party, as determined by the Commissioner of Internal Revenue, at rates not exceeding the lawful or approved rates of insurance companies for such insurance, reduced by amounts representing the acquisition cost in such companies, provided the contracting party adopts and consistently follows this method with respect to self-insurance in connection with all contracts and subcontracts subsequently performed by him.

(ii) Allowances for interest on invested capital are not allowable as costs of performing a contract or subcontract.

(iii) Among the items which shall not be included as a part of the cost of performing a contract or subcontract or considered in determining such cost, are the following: Entertainment expenses; dues and memberships other than of regular trade associations; donations except as otherwise provided above; losses on other contracts; profits or losses from sales or exchanges of capital assets; extraordinary expenses due to strikes or lockouts; fines and penalties; amortization of unrealized appreciation of values of assets; expenses, maintenance and depreciation of excess facilities (including idle land and building, idle parts of a building, and excess machinery and equipment) vacated or abandoned, or not adaptable for future use in performing contracts or subcontracts; increases in reserve accounts for contingencies, repairs, compensation insurance (except as above provided with respect to self-insurance) and guarantee work; Federal and State income and excess-profits taxes and surtaxes; cash discount earned up to one percent of the amount of the purchase, except that all discounts on subcontracts subject to the act will be considered; interest incurred or earned; bond discount or finance charges;

premiums for life insurance on the lives of officers; legal and accounting fees in connection with reorganizations, security issues, capital stock issues and the prosecution of claims against the United State (including income tax matters); taxes and expenses on issues and transfers of capital stock; losses on investments; bad debts; and expenses of collection and exchange.

(iv) In order that the cost of performing a contract or subcontract may be accounted for clearly, the amount of any excess profits repayable to the United States pursuant to the act should not be charged to or included in such cost.

(h) *Guarantee expenses.* Guarantee expenses include the various items of factory cost, other manufacturing cost, cost of installation and construction, indirect engineering expenses and other general expenses (see paragraphs (c) to (g), of this section) which are incurred after delivery or installation of the article manufactured or constructed pursuant to the particular contract or subcontract and which are incident to the correction of defects or deficiencies which the contracting party is required to make under the guarantee provisions of the particular contract or subcontract. If the total amount of such guarantee expenses is not ascertainable at the time of filing the report required to be filed with the district director of internal revenue (see §16.15) and the contracting party includes any estimated amount of such expenses as part of the claimed total cost of performing the contract or subcontract, such estimated amount shall be separately shown on the report and the reasons for claiming such estimated amount shall accompany the report; but only the amount of guarantee expenses actually incurred will be allowed. If the amount of guarantee expenses actually incurred is greater than the amount (if any) claimed on the report and the contracting party has made an overpayment of excess profit, a refund of the overpayment shall be made in accordance with the provisions of §16.18. If the amount of guarantee expenses actually incurred is less than the amount claimed on the report and an additional amount of excess profit is determined to be due, the additional amount of excess profit shall be assessed and paid in accordance with the provisions of §16.18.

(i) *Unreasonable compensation.* (1) The salaries and compensation for services which are treated as a part of the cost of performing a contract or subcontract include reasonable payments for salaries, bonuses, or other compensation for services. As a general rule, bonuses paid to employees (and not to officers) in pursuance of a regularly established incentive bonus system may be allowed as a part of the cost of performing a contract or subcontract.

(2) The test of allowability is whether the aggregate compensation paid to each individual is for services actually rendered incident to, and necessary for, the performance of the contract or subcontract, and is reasonable. Excessive or unreasonable payments, whether in cash, stock or other property ostensibly as compensation for services shall not be included in the cost of performing a contract or subcontract.

(j) *Allocation of indirect costs.* No general rule applicable to all cases may be stated for ascertaining the proper proportion of the indirect costs to be allocated to the cost of performing a particular contract or subcontract. Such proper proportion depends upon all the facts and circumstances relating to the performance of the particular contract or subcontract. Subject to a requirement that all items which have no relation to the performance of the contract or subcontract shall be eliminated from the amount to be allocated, the following methods of allocation are outlined as acceptable in a majority of cases:

(1) *Factory indirect expenses.* The allowable indirect factory expenses (see paragraph (c)(5) of this section) shall ordinarily be allocated or ''distributed'' to the cost of the contract or subcontract on the basis of the proportion which the direct productive labor (see paragraph (c)(2) of this section) attributable to the contract or subcontract bears to the total direct productive labor of the production department or particular section thereof during the period within which the contract or subcontract is performed, except that if the indirect factory expenses are incurred in different amounts and in different proportions by the various producing departments consideration shall be given to such circumstances to the extent necessary to make a fair and reasonable determination of the true profit and excess profit.

(2) *Engineering indirect expenses.* The allowable indirect engineering expenses (see paragraph (f) of this section) shall ordinarily be allocated or ''distributed'' to the cost of the contract or subcontract on the basis of the proportion which the direct engineering labor attributable to the contract or subcontract (see paragraph (c)(3) of this section) bears to the total direct engineering labor of the engineering department or particular section thereof during the period within which the contract or subcontract is performed. If the expenses of the engineering department are not sufficient in amount to require the maintenance of separate accounts, the engineering indirect costs may be included in the indirect factory expenses (see paragraph (c)(5) of this section) and allocated or distributed to the cost of performing the contract or subcontract as a part of such expenses, provided the proportion so allocated or distributed is proper under the facts and circumstances relating to the performance of the particular contract or subcontract.

(3) *Administrative expenses (or ''overhead'').* The allowable expenses of administration (see paragraph (g) of this section) or other general expenses except indirect engineering expenses, bidding and general selling expenses, and general servicing expenses shall ordinarily be allocated or distributed to the cost of performing a contract or subcontract on the basis of the proportion which the sum of the manufacturing cost (see paragraph (b) of this section) and the cost of installation and construction (see paragraph (e) of this section) attributable to the particular contract or subcontract bears to the sum of the total manufacturing cost and the total cost of installation and construction during the period within which the contract or subcontract is performed.

(4) *Bidding, general selling, and general servicing expenses.* The allowable bidding and general selling expenses and general servicing expenses (see paragraph (g) (2) and (3) of this section) shall ordinarily be allocated or distributed to the cost of performing a contract or subcontract on the basis of:

(i) The proportion which the contract price of the particular contract or subcontract bears to the total sales made(including contracts or subcontracts completed) during the period within which the particular contract or subcontracts is performed, or

(ii) The proportion which the sum of the manufacturing cost (see paragraph (b) of this section) and the cost of installation and construction (see paragraph (e) of this section) attributable to the particular contract or subcontract bears to the sum of the total manufacturing cost and the total cost of installation and construction during the period within which the contract or subcontract is performed,

except that special consideration shall be given to the relation which certain classes of such expenses bear to the various classes of articles produced by the contracting party in each case in which such consideration is necessary in order to make a fair and reasonable determination of the true profit and excess profit. See §16.13.

§16.9 *Credit for net loss or for deficiency in profit in computing excess profit.* (a) The term ''net loss'' as used in the act and as applied to contracts and subcontracts for aircraft or portions thereof coming within the regulations prescribed under the act or under 10 U.S.C. 2382 (formerly section 3 of the Act of March 27, 1934 (48 Stat. 505)) means the amount by which the total cost of performing all such contracts and subcontracts for aircraft entered into after April 3, 1939, and completed by a particular contracting party within the income-taxable year exceeds the total contract prices of such contracts and subcontracts. As to the meaning of income-taxable year, see §16.1.

(b) The term ''deficiency in profit'', as used in the act and as applied to contracts and subcontracts for aircraft or portions thereof coming within the regulations prescribed under the act or under 10 U.S.C. 2882 (formerly section 3 of the Act of March 27, 1934 (48 Stat. 505)), means the amount by which 12 percent of the total contract prices of all such contracts and subcontracts for aircraft entered into after April 3, 1939, and completed by a particular contracting party within the income-taxable year exceeds the net profit upon all such contracts and subcontracts.

(c) A net loss or a deficiency in profit sustained by a contracting party for an income-taxable year is allowable as a credit in computing the contracting party's excess profit on contracts and subcontracts for aircraft coming within the regulations prescribed under the act or under 10 U.S.C. 2382 (formerly section 3 of the Act of March 27, 1934 (48 Stat. 505)) and completed during the four next succeeding income-taxable years. Credit for such a net loss or deficiency in profit may be claimed in the contracting party's annual report of profit filed with the district director of internal revenue (see §16.15), but it shall be supported by separate schedules for each contract or subcontract involved showing total contract prices, costs of performance and pertinent facts relative thereto, together with a summarized computation of the net loss or deficiency in profit. The net loss or deficiency in profit claimed is subject to verification and adjustment. As to preservation of books and records, see §16.13.

(d) Net loss or deficiency in profit sustained on contracts and subcontracts completed within one income-taxable year may not be considered in computing net loss or deficiency in profit sustained on contracts and subcontracts completed within another income-taxable year.

(e) The provisions of this section may be illustrated by the following example:

Example. For the calendar year 1939, the A Corporation, which keeps its books and makes its Federal income tax returns on a calendar year basis, sustained a net loss of $30,000 on the contracts and subcontracts for Army aircraft and portions thereof coming within the scope of the act and completed within that year. During the year 1939, the A Corporation also completed contracts for naval aircraft coming within the scope of 10 U.S.C. 2382 (formerly section 3 of the Act of March 27, 1934 (48 Stat. 505)) at a deficiency in profit of $10,000. In 1940, the A Corporation completed similar contracts for Army aircraft totaling $175,000 at a cost of $155,000, whereby the A Corporation realized a net profit of $20,000 but sustained a deficiency in profit of $1,000 (i.e., 12 percent of $175,000, or $21,000, less $20,000. During the year 1940, the A Corporation also completed contracts for naval aircraft coming within the scope of 10 U.S.C. 2382 (formerly section 3 of the Act of March 27, 1934 (48 Stat. 505)) at a net loss of

$2,000. In 1941, the A Corporation completed contracts for Army aircraft coming within the scope of the act totaling $400,000 at a cost of $300,000, or at a net profit of $100,000. After deducting from the net profit of $100,000 for the year 1941 the amount of $48,000 (i.e., 12 percent of the total contract price of $400,000), there remains $52,000 in excess profit on the contracts completed in the year 1941. The A Corporation may deduct from such $52,000, in determining the amount of excess profit it must pay for the year 1941 with respect to the contracts completed in such year, the net loss of $30,000 and the deficiency in profit of $10,000 sustained in 1939 on Army and naval aircraft contracts, respectively, and the net loss of $2,000 and the deficiency in profit of $1,000 sustained in 1940 on naval and Army aircraft contracts, respectively.

[T.D. 4909, 4 FR 2733, July 1, 1939, as amended by T.D. 6511, 25 FR 12442, Dec. 6, 1960]

§16.10 *Credit for Federal income taxes.* For the purpose of computing the amount of excess profit to be paid to the United States, a credit is allowable against the excess profit for the amount of Federal income taxes paid or remaining to be paid on the amount of such excess profit. The ''Federal income taxes'' in respect of which this credit is allowable include the income taxes imposed by Titles I and IA of the Revenue Act of 1938, and Chapter 1 and Subchapter A of Chapter 2 of the Internal Revenue Code, and the excess-profits taxes imposed by section 602 of the Revenue Act of 1938 and Subchapter B of Chapter 2 of the Internal Revenue Code. This credit is allowable for these taxes only to the extent that it is affirmatively shown that they have been finally determined and paid or remain to be paid and that they were imposed upon the excess profit against which the credit is to be made. In case such a credit has been allowed and the amount of Federal income taxes imposed upon the excess profit is redetermined, the credit previously allowed shall be adjusted accordingly.

§16.11 *Failure of contractor to require agreement by subcontractor.* (a) Every contract or subcontract coming within the scope of the act and the regulations in this part is required by the act to contain, among other things, an agreement by the contracting party to make no subcontract unless the subcontractor agrees:

(1) To make a report, as described in the act, under oath to the Secretary of War upon the completion of the subcontract;

(2) To pay into the Treasury excess profit, as determined by the Treasury Department, in the manner and amounts specified in the act;

(3) To make no subdivision of the subcontract for the same article or articles for the purpose of evading the provisions of the act;

(4) That the manufacturing spaces and books of its own plant, affiliates, and subdivisions shall at all times be subject to inspection and audit as provided in the act.

(b) If a contracting party enters into a subcontract with a subcontractor who fails to make such agreement, such contracting party shall, in addition to its liability for excess profit determined on contracts or subcontracts performed by it, be liable for any excess profit determined to be due the United States on the subcontract entered into with such subcontractor. In such event, however, the excess profit to be paid to the United States in respect of the subcontract entered into with such subcontractor shall be determined separately from any contracts or subcontracts performed by the contracting party entering into the subcontract with such subcontractor.

§16.12 *Evasion of excess profit.* Section 3 of the act of March 27, 1934, as amended, provides that the contracting party shall agree to make no subdivisions of any contract or subcontract for the same article or articles for the purpose of evading the provisions of the act. If any such subdivision or subcontract is made it shall constitute a violation of the agreement provided for in the act, and the cost of completing a contract or subcontract by a contracting party which violates such agreement shall be determined in a manner necessary clearly to reflect the true excess profit of such contracting party.

§16.13 *Books of account and records.* (a) It is recognized that no uniform method of accounting can be prescribed for all contracting parties subject to the provisions of the act. Each contracting party is required by law to make a report of its true profits and excess profit. Such party must, therefore, maintain such accounting records as will enable it to do so. See §16.8. Among the essentials are the following:

(1) The profit or loss upon a particular contract or subcontract shall be accounted for and fully explained in the books of account separately on each contract or subcontract.

(2) Any cost accounting methods, however standard they may be and regardless of long continued practice, shall be controlled by, and be in accord with, the objectives and purposes of the act and of any regulations prescribed thereunder.

(3) The accounts shall clearly disclose the nature and amount of the different items of cost of performing a contract or subcontract.

(b) In cases where it has been the custom priorly to use so-called ''normal'' rates of overhead expense or administrative expenses, or ''standard'' or ''normal'' prices of material or labor charges, no objection will be made to the use temporarily during the period of performing the contract or subcontract of such methods in charging the contract or subcontract, if the method of accounting employed is such as clearly to reflect, in the final determination upon the books of account, the actual profit derived from the performance of the contract or subcontract and if the necessary adjusting entries are entered upon the books and they explain in full detail the revisions necessary to accord with the facts. As to the elements of cost, see § 16.8.

(c) All books, records, and original evidences of costs (including, among other things, production orders, bills or schedules of materials, purchase requisitions, purchase orders, vouchers, requisitions for materials, standing expense orders, inventories, labor time cards, pay rolls, cost distribution sheets) pertinent to the determination of the true profit, excess profit, deficiency in profit or net loss from the performance of a contract or subcontract shall be kept at all times available for inspection by internal-revenue officers, and shall be carefully preserved and retained so long as the contents thereof may become material in the administration of the act. This provision is not confined to books, records, and original evidences pertaining to items which may be considered to be a part of the cost of performing a contract or subcontract. It is applicable to all books, records, and original evidences of costs of each plant, branch or department involved in the performance of a contract or subcontract or in the allocation or distribution of costs to the contract or subcontract.

§ 16.14 *Report to Secretary of the Army.* (a) Upon the completion of a contract or subcontract coming within the scope of the act and the regulations in this part, the contracting party is required to make a report, under oath, to the Secretary of the Army. As to the date of completion of a contract or subcontract, see § 16.4. Such report shall be in the form prescribed by the Secretary of the Army and shall state the total contract price, the cost of performing the contract, the net income from such contract, and the per centum such income bears to the contract price. The contracting party shall also include as a part of such report a statement showing:

(1) The manner in which the indirect costs were determined and allocated to the cost of performing the contract or subcontract (see § 16.8);

(2) The name and address of every subcontractor with whom a subcontract was made, the object of such subcontract, the date when completed and the amount thereof; and

(3) The name and address of each affiliate or other organization, trade or business owned or controlled directly or indirectly by the same interests as those who so own or control the contracting party, together with a statement showing in detail all transactions which were made with such affiliate or other organization, trade or business and are pertinent to the determination of the excess profit.

(b) A copy of the report required to be made to the Secretary of the Army is required to be transmitted by the contracting party to the Secretary of the Treasury. Such copy shall not be transmitted directly to the Secretary of the Treasury but shall be filed as a part of the annual report. See § 16.15.

§ 16.15 *Annual reports for income-taxable years*—(a) *General requirements.* Every contracting party completing a contract or subcontract within the contracting party's income-taxable year ending after April 3, 1939 shall file with the district director of internal revenue for the internal revenue district in which the contracting party's Federal income tax returns are required to be filed an annual report on the prescribed form of the profit and excess profit on all contracts and subcontracts coming within the scope of the act and the regulations in this part and completed within the particular income-taxable year. There shall be included as a part of such a report a statement, preferably in columnar form, showing separately for each such contract or subcontract completed by the contracting party within the income-taxable year the total contract price, the cost of performing the contract or subcontract and the resulting profit or loss on each contract or subcontract together with a summary statement showing in detail the computation of the net profit or net loss upon all contracts and subcontracts completed within the income-taxable year and the amount of the excess profit, if any, for the income-taxable year covered by the report. A copy of the report made to the Secretary of the Army (see § 16.14) with respect to each contract or subcontract covered in the annual report, shall be filed as a part of such annual report. In case the income-taxable year of the contracting party is a period of less than twelve months (see § 16.1), the report required by this section shall be made for such period and not for a full year.

(b) *Time for filing annual reports.* Annual reports of contracts and subcontracts coming within the scope of the act and the regulations in this part completed by a contracting party within an income-taxable year must be filed on or before the 15th day of the ninth month following the close of the contracting party's income-taxable year. It is important that the contracting party render on or before the due date an annual report as nearly complete and final as it is possible for the contracting party to prepare. An extension of time granted the contracting party for filing its Federal income tax return does not serve to extend the time for filing the annual report required by this section. Authority consistent with authorizations for granting extensions of time for filing Federal income tax returns is hereby delegated to the various collectors of internal revenue for granting extensions of time for filing the reports required by this section. Application for extensions of time for filing such reports should be addressed to the district director of internal revenue for the district in which the contracting party files its Federal income tax returns and must contain a full recital of the causes for the delay.

§16.16 *Payment of excess profit liability.* The amount of the excess profit liability to be paid to the United States shall be paid on or before the due date for filing the report with the district director of internal revenue. See §16.15. At the option of the contracting party, the amount of the excess profit liability may be paid in four equal installments instead of in a single payment, in which case the first installment is to be paid on or before the date prescribed for the payment of the excess profit as a single payment, the second installment on or before the 15th day of the third month, the third installment on or before the 15th day of the sixth month, and the fourth installment on or before the 15th day of the ninth month, after such date.

§16.17 *Liability of surety.* The surety under contracts entered into with the Secretary of the Army for the construction or manufacture of any complete aircraft or any portion thereof for the Army shall not be liable for payment of excess profit due the United States in respect of such contracts.

§16.18 *Determination of liability for excess profit, interest and penalties; assessment, collection, payment, refunds.* (a) The duty of determining the correct amount of excess profit liability on contracts and subcontracts coming within the scope of the act and the regulations in this part is upon the Commissioner of Internal Revenue. Under section 3(b) of the act of March 27, 1934, as last amended, all provisions of law (including the provisions of law relating to interest, penalties and refunds) applicable with respect to the taxes imposed by Title I of the Revenue Act of 1934 and not inconsistent with section 3 of the act of March 27, 1934, as last amended, are applicable with respect to the assessment, collection, or payment of excess profits on contracts and subcontracts coming within the scope of the act and the regulations in this part and to refunds of overpayments of profits into the Treasury under the act. Claims by a contracting party for the refund of an amount of excess profit, interest, penalties, and additions to such excess profit shall conform to the general requirements prescribed with respect to claims for refund of overpayments of taxes imposed by Title I of the Revenue Act of 1934 and, if filed on account of any additional costs incurred pursuant to guarantee provisions in a contract, shall be supplemented by a statement under oath showing the amount and nature of such costs and all facts pertinent thereto.

(b) Administrative procedure for the determination, assessment and collection of excess profit liability under the act and the regulations in this part and the examination of reports and claims in connection therewith will be prescribed from time to time by the Commissioner of Internal Revenue.

PART 17—EXCESS PROFITS ON NAVY CONTRACTS

REGULATIONS FOR INCOME-TAXABLE YEARS ENDING AFTER APRIL 3, 1939

AUTHORITY: Sections 17.1 to 17.19 issued under 52 Stat. 467; 26 U.S.C. 3791. Interpret or apply sec. 3, 48 Stat. 505, as amended, 53 Stat. 112; 34 U.S.C. 496, 26 U.S.C. 650, 651.

SOURCE: Sections 17.1 to 17.19 contained in T.D. 4906, 4 FR 2492, June 27, 1939, except as otherwise noted.

§17.1 *Definitions.* As used in the regulations in this part the term:

(a) *Act* means the act of March 27, 1934 (48 Stat. 505; 34 U.S.C. 496), as originally enacted, as amended by the act of June 25, 1936 (49 Stat. 1926; 34 U.S.C. 496), and as further amended by the act of April 3, 1939 (53 Stat. 560; 34 U.S.C. 496).

(b) *Person* includes an individual, a corporation, a partnership, a trust or estate, a joint-stock company, an association, or a syndicate, group, pool, joint venture or other unincorporated organization or group, through or by means of which any business, financial operation or venture is carried on.

(c) *Contract* means an agreement made by authority of the Secretary of the Navy for the construction or manufacture of any complete naval vessel or aircraft or any portion thereof.

(d) *Contractor* means a person entering into a direct contract with the Secretary of the Navy or his duly authorized representative.

(e) *Subcontract* means an agreement entered into by one person with another person for the construction or manufacture of a complete naval vessel or aircraft or any portion thereof, the prime contract for such vessel or aircraft or portion thereof having been entered into between a contractor and the Secretary of the Navy or his duly authorized representative.

(f) *Subcontractor* means any person other than a contractor entering into a subcontract.

(g) *Contracting party* means a contractor or subcontractor as the case may be.

(h) *Contract price* or *contract price* means the amount or total amount to be received under a contract or subcontract as the case may be.

(i) *Income-taxable year* means the calendar year, the fiscal year ending during such calendar year or the fractional part of such calendar or fiscal year, upon the basis of which the contracting party's net income is computed and for which its income tax returns are made for Federal income tax purposes.

§ 17.2 *Scope of this part.* The regulations in this part deal with liability for excess profit on contracts and subcontracts for the construction or manufacture of any complete naval vessel or aircraft or any portion thereof completed within income-taxable years ending after April 3, 1939. As to the date of the completion of a contract or subcontract, see § 17.5.

§ 17.3 *Contracts and subcontracts under which excess profit liability may be incurred.* Except as otherwise provided with respect to contracts or subcontracts for certain scientific equipment (see § 17.4), every contract awarded for an amount exceeding $10,000 and entered into after the enactment of the act of March 27, 1934 for the construction or manufacture of any complete naval vessel or aircraft, or any portion thereof, is subject to the provisions of the act relating to excess profit liability. Any subcontract made with respect to such a contract and involving an amount in excess of $10,000 is also within the scope of the act. If a contracting party places orders with another party, aggregating an amount in excess of $10,000, for articles or materials which constitute a part of the cost of performing the contract or subcontract, the placing of such orders shall constitute a subcontract within the scope of the act, unless it is clearly shown that each of the orders involving $10,000 or less is a bona fide separate and distinct subcontract and not a subdivision made for the purpose of evading the provisions of the act.

§ 17.4 *Contracts or subcontracts for scientific equipment.* No excess profit liability is incurred upon a contract or subcontract entered into after the amendment of section 3(b) of the act of June 25, 1936, if at the time or prior to the time such contract or subcontract is made it is designated by the Secretary of the Navy as being exempt under the provisions of the act pertaining to scientific equipment used for communication, target detection, navigation, or fire control. The exemption of contracts or subcontracts for scientific equipment does not extend to any contract or subcontract entered into prior to the enactment of such amendment of section 3(b) of the act.

§ 17.5 *Completion of contract defined.* The date of delivery of the vessel, aircraft or portion thereof covered by the contract or subcontract shall be considered the date of completion of the contract or subcontract unless otherwise determined jointly by the Secretary of the Navy and the Secretary of the Treasury or their duly authorized representatives. Except as otherwise provided in the preceding sentence, the replacement of defective parts of delivered articles or the performance of other guarantee work in respect to such articles will not operate to extend the date of completion. As to the treatment of the cost of such work as a cost of performing a contract or subcontract, see § 17.9(h). As to a refund in case of adjustment due to any subsequently incurred additional costs, see § 17.19. If a contract or subcontract is at any time cancelled or terminated, it is completed at the time of the cancellation or termination.

§ 17.6 *Manner of determining liability with respect to contracts or subcontracts for complete naval vessles or portions thereof.* If in an income-taxable year ending after April 3, 1939 a contracting party completes one or more contracts or subcontracts coming within the scope of the act and entered into for the construction or manufacture of any complete naval vessel or any portion thereof, the amount of excess profit to be paid to the United States with respect to all such contracts and subcontracts completed within the income-taxable year shall be computed as follows:

(a) The first step is to ascertain the total contract prices of all such contracts and subcontracts completed by the contracting party within the income-taxable year. As to total contract prices, see §§ 17.1 and 17.8.

(b) The second step is to ascertain the cost of performing such contracts and subcontracts (see § 17.9) and to deduct such cost from the total contract prices of such contracts and subcontracts as computed in the first step.

The amount remaining after such subtraction is the amount of net profit or net loss upon such contracts and subcontracts completed within the income-taxable year.

(c) The third step, in case there is a new profit upon such contracts and subcontracts, is to subtract from the amount of such net profit as computed in the second step the sum of:

(1) An amount equal to 10 percent of the total contract prices of such contracts and subcontracts completed within the income-taxable year; and

(2) The amount of any net loss which was sustained in the preceding income-taxable year with respect to contracts or subcontracts entered into for the construction or manufacture of any complete naval vessel or any portion thereof, and which is allowable as a credit in determining the excess profit for the income-taxable year with respect to contracts and subcontracts entered into for the construction or manufacture of any complete naval vessel or any portion thereof (see § 17.10(a)).

The amount remaining after such subtraction is the amount of excess profit for the income-taxable year with respect to contracts and subcontracts entered into for the construction or manufacture of any complete naval vessel or any portion thereof.

(d) The fourth step is to ascertain the amount of credit allowed for Federal income taxes paid or remaining to be paid upon the amount of such excess profit as computed in the third step (see §17.11) and then subtract from the amount of such excess profit the amount of credit for Federal income taxes. The amount remaining after this subtraction is the amount of excess profit to be paid to the United States by the contracting party for the income-taxable year with respect to contracts and subcontracts entered into for the construction or manufacture of any complete naval vessel or any portion thereof and completed within the income- taxable year.

(e) The application of the provisions of this section of the regulations may be illustrated by the following example:

Example: On September 1, 1939 the A Corporation, which keeps its books and makes its Federal income tax returns on a calendar year basis, entered into a contract with the Secretary of the Navy for the construction of portions of a naval vessel coming within the scope of the act, the total contract price of which $200,000. On March 10, 1940 the A Corporation entered into another such contract, the total contract price of which was $40,000. Both contracts were completed within the calendar year 1940, the first at a cost of $155,000 and the second at a cost of $45,000. During the year 1940 the A Corporation also completed at a loss of $10,000 two contracts entered into for the construction or manufacture of naval aircraft coming within the scope of the act. For the year 1939 the A Corporation sustained a net loss of $2,500 on all contracts and subcontracts for any complete naval vessel or any portion thereof coming within the scope of the act and completed within the calendar year 1939. For the year 1939 the A Corporation also sustained a net loss of $1,800 on all other contracts and subcontracts coming within the scope of the act which were completed within the calendar year 1939. For purposes of Federal income tax, the net income of the A Corporation for the year 1940 amounted to $96,000, which amount included the net profit of $40,000 upon the contracts entered into on September 1, 1939 and March 10, 1940. For the year 1940 the A Corporation paid Federal income taxes amounting to $19,200. The excess profit liability of the A Corporation for 1940 is payable with respect to the contracts for portions of a naval vessel which were completed in 1940. The loss of $10,000 on other contracts completed in 1940 and the net loss of $1,800 for 1939 on contracts and subcontracts for naval aircraft do not enter into the computation of such liability. Accordingly, the excess profit liability of the A Corporation for 1940 is $10,800 computed as follows:

Total contract prices:		
Contract No. 1	$200,000	
Contract No. 2	40,000	
		$240,000
Less cost of performing contracts:		
Contract No. 1	155,000	
Contract No. 2	45,000	
		200,000
Net profit on contracts		40,000
Less:		
10 percent of total contract prices (10 percent of $240,000)	24,000	
Net loss from 1939	2,500	
		26,500
Excess profit for year 1940		13,500
Less credit for Federal income taxes (Federal income tax on $13,500 at rates for 1940)		2,700
Amount of excess profit payable to the United States		10,800

§17.7 *Manner of determining liability with respect to contracts or subcontracts for complete naval aircraft or portions thereof.* If in an income-taxable year ending after April 3, 1939 a contracting party completes one or more contracts or subcontracts coming within the scope of the act and entered into for the construction or manufacture of any complete naval aircraft or any portion thereof, the amount of excess profit to be paid to the United States with respect to all such contracts and subcontracts completed within the income-taxable year shall be computed as follows:

(a) The first step is to ascertain the total contract prices of all such contracts and subcontracts completed by the contracting party within the income-taxable year. As to total contract prices, see §§17.1 and 17.8.

(b) The second step is to ascertain the cost of performing such contracts and subcontracts (see §17.9) and to deduct such cost from the total contract prices of such contracts and subcontracts as computed in the first step.

The amount remaining after such subtraction is the amount of net profit or net loss upon such contracts and subcontracts completed within the income-taxable year.

(c) The third step, in case there is a net profit upon such contracts and subcontracts, is to subtract from the amount of such net profit as computed in the second step the sum of:

(1) An amount equal to 12 percent of the total contract prices of such contracts and subcontracts completed within the income-taxable year;

(2) The amount of any net loss which was sustained in the same or a prior income- taxable year with respect to contracts or subcontracts for the construction or manufacture of any complete aircraft or any portion

thereof, and which is allowable as a credit in determining the excess profit for the income-taxable year with respect to contracts and subcontracts entered into for the construction or manufacture of complete aircraft or any portion thereof (see § 17.10(b)); and

(3) The amount of any deficiency in profit which was sustained in the same or a prior income-taxable year with respect to contracts or subcontracts for the construction or manufacture of any complete aircraft or any portion thereof, and which is allowable as a credit in determining the excess profit for the income-taxable year with respect to contracts and subcontracts entered into for the construction or manufacture of complete aircraft or any portion thereof (see § 17.10(c)).

The amount remaining after such subtraction is the amount of excess profit for the income-taxable year with respect to contracts and subcontracts entered into for the construction or manufacture of complete naval aircraft or any portion thereof.

(d) The fourth step is to ascertain the amount of credit allowed for Federal income taxes paid or remaining to be paid upon the amount of such excess profit as computed in the third step (see § 17.11) and then subtract from the amount of such excess profit the amount of credit for Federal income taxes. The amount remaining after this subtraction is the amount of excess profit to be paid to the United States by the contracting party for the income-taxable year with respect to contracts and subcontracts entered into for the construction or manufacture of complete naval aircraft or any portion thereof and completed within the income-taxable year.

(e) The application of the provisions of this section of the regulations may be illustrated by the following example:

Example. On September 1, 1939, the B Corporation, which keeps its books and makes its Federal income tax returns on a calendar year basis, entered into a contract with the Secretary of the Navy for the construction of naval aircraft coming within the scope of the act, the total contract price of which was $200,000. On March 10, 1940, the B Corporation entered into another such contract, the total contract price of which was $40,000. Both contracts were completed within the calendar year 1940, the first at a cost of $155,000 and the second at a cost of $45,000. During the year 1940, the B Corporation also completed at a deficiency in profit of $2,000 a contract entered into for the construction of Army aircraft coming within the scope of the act. During the year 1940, the B Corporation also completed at a loss of $10,000 two contracts entered into for the construction or manufacture of portions of a naval vessel coming within the scope of the act. For the year 1939, the B Corporation sustained a net loss of $2,500 and a deficiency in profit of $1,000 on all contracts and subcontracts for naval aircraft coming within the scope of the act and completed within the calendar year 1939. For the year 1939, the B Corporation also sustained a net loss of $1,800 on a contract for the construction of Army aircraft coming within the scope of the act which was completed within the calendar year 1939. For the purposes of the Federal income tax, the net income of the B Corporation for the year 1940, on which the tax was paid, amounted to $96,000, which included the net profit of $40,000 upon the contracts entered into on September 1, 1939, and March 10, 1940. The excess profit liability of the B Corporation for 1940 is payable with respect to the contracts for naval aircraft which were completed in 1940. The loss of $10,000 on the contracts for portions of a naval vessel completed in 1940 does not enter into the computation of such liability. Accordingly, the excess profit liability of the B Corporation for 1940 is $2,964 computed as follows:

Total contract prices:		
Contract No. 1	$200,000	
Contract No. 2	40,000	
		$240,000
Less: Cost of performing contracts:		
Contract No. 1	155,000	
Contract No. 2	45,000	
		200,000
Net profit on contracts		40,000
Less:		
12 percent of total contract prices (12 percent of $240,000)	28,800	
Deficiency in profit (in Army aircraft contracts) in 1940	2,000	
Net loss (in naval aircraft contracts) from 1939	2,500	
Net loss (in Army aircraft contracts) from 1939	1,800	
Deficiency in profit (in naval aircraft contracts) from 1939	1,000	
		36,100
Excess profit for year 1940		3,900
Less: Credit for Federal income taxes (Federal income tax on $3,900 at rates for 1940)		936
Amount of excess profit payable to the United States		2,964

[T.D. 4906, 4 FR 2492, June 27, 1939, as amended by T.D. 6512, 25 FR 12443, Dec. 6, 1960]

§ 17.8 *Total contract price.* The total contract price of a particular contract or subcontract (see § 17.1) may be received in money or its equivalent. If something other than money is received, only the fair market value of the thing received, at the date of receipt, is to be included in determining the amount received. Bonuses earned for bettering performance and penalties incurred for failure to meet the contract guarantees are to be regarded as adjustments of the original contract price. Trade or other discounts granted by a contracting party in respect of a contract or subcontract performed by such party are also to be deducted in determining the true total contract price of such contract or subcontract.

§17.9 *Cost of performing a contract or subcontract*—(a) *General rule.* The cost of performing a particular contract or subcontract shall be the sum of (1) the direct costs, including therein expenditures for materials, direct labor and direct expenses, incurred by the contracting party in performing the contract or subcontract; and (2) the proper proportion of any indirect costs (including therein a reasonable proportion of management expenses) incident to and necessary for the performance of the contract or subcontract.

(b) *Elements of cost.* No definitions of the elements of cost may be stated which are of invariable application to all contractors and subcontractors. In general, the elements of cost may be defined for purposes of the act as follows:

(1) Manufacturing cost, which is the sum of factory cost (see paragraph (c) of this section) and other manufacturing cost (see paragraph (d) of this section);

(2) Miscellaneous direct expenses (see paragraph (e) of this section);

(3) General expenses, which are the sum of indirect engineering expenses, usually termed ‘‘engineering overhead’’ (see paragraph (f) of this section) and expenses of distribution, servicing and administration (see paragraph (g) of this section); and

(4) Guarantee expenses (see paragraph (h) of this section).

(c) *Factory cost.* Factory cost is the sum of the following:

(1) *Direct materials.* Materials, such as those purchased for stock and subsequently issued for contract operations and those acquired under subcontracts, which become a component part of the finished product or which are used directly in fabricating, converting or processing such materials or parts.

(2) *Direct productive labor.* Productive labor, usually termed ‘‘shop labor,’’ which is performed on and is properly chargeable directly to the article manufactured or constructed pursuant to the contract or subcontract, but which ordinarily does not include direct engineering labor (see subparagraph (3) of this paragraph).

(3) *Direct engineering labor.* The compensation of professional engineers and other technicists (including reasonable advisory fees), and of draftsmen, properly chargeable directly to the cost of the contract or subcontract.

(4) *Miscellaneous direct factory charges.* Items which are properly chargeable directly to the factory cost of performing the contract or subcontract but which do not come within the classifications in subparagraphs (1), (2), and (3) of this paragraph, as for example, royalties which the contracting party pays to another party and which are properly chargeable to the cost of performing the contract or subcontract (but see paragraph (d) of this section).

(5) *Indirect factory expenses.* Items, usually termed ‘‘factory overhead,’’ which are not directly chargeable to the factory cost of performing the contract or subcontract but which are properly incident to and necessary for the performance of the contract or subcontract and consist of the following:

(i) *Labor.* Amounts expended for factory labor, such as supervision and inspection, clerical labor, timekeeping, packing and shipping, stores supply, services of tool crib attendants, and services in the factory employment bureau, which are not chargeable directly to productive labor of the contract or subcontract.

(ii) *Materials and supplies.* The cost of materials and supplies for general use in the factory in current operations, such as shop fuel, lubricants, heat-treating, plating, cleaning and anodizing supplies, nondurable tools and gauges, stationery (such as time tickets and other forms), and boxing and wrapping materials.

(iii) *Service expenses.* Factory expenses of a general nature, such as those for power, heat and light (whether purchased or produced), ventilation and air conditioning and operation and maintenance of general plant assets and facilities.

(iv) *Fixed charges and obsolescence.* Recurring charges with respect to property used for manufacturing purposes of the contract or subcontract, such as premiums for fire and elevator insurance, property taxes, rentals and allowances for depreciation of such property, including maintenance and depreciation of reasonable standby equipment; and depreciation and obsolescence of special equipment and facilities necessarily acquired primarily for the performance of the contract or subcontract. In making allowances for depreciation, consideration shall be given to the number and length of shifts.

(v) *Miscellaneous indirect factory expenses.* Miscellaneous factory expenses not directly chargeable to the factory cost of performing the contract or subcontract, such as purchasing expenses; ordinary and necessary expenses of rearranging facilities within a department or plant; employees’ welfare expenses; premiums or dues on compensation insurance; employers’ payments to unemployment, old age and social security, Federal and State funds not including payments deducted from or chargeable to employees or officers; pensions and retirement payments to factory employees; factory accident compensation (as to self-insurance, see paragraph (g) of this section); but not including any amounts which are not incident to services, operations, plant, equipment or facilities involved in the performance of the contract or subcontract.

(d) *Other manufacturing cost.* Other manufacturing cost as used in paragraph (b) of this section includes items of manufacturing costs which are not properly or satisfactorily chargeable to factory costs (see paragraph (c) of this section) but which upon a complete showing of all pertinent facts are properly to be included as a cost of performing the contract or subcontract, as for instance, payments of royalties and amortization of the cost of designs purchased and patent rights over their useful life; and ''deferred'' or ''unliquidated'' experimental and development charges. For example, in case experimental and development costs have been properly deferred or capitalized and are amortized in accordance with a reasonably consistent plan, a proper portion of the current charge, determined by a ratable allocation which is reasonable in consideration of the pertinent facts, may be treated as a cost of performing the contract or subcontract. In the case of general experimental and development expenses which may be charged off currently, a reasonable portion thereof may be allocated to the cost of performing the contract or subcontract. If a special experimental or development project is carried on in pursuance of a contract, or in anticipation of a contract which is later entered into, and the expense is not treated as a part of general experimental and development expenses or is not otherwise allowed as a cost of performing the contract, there clearly appearing no reasonable prospect of an additional contract for the type of article involved, the entire cost of such project may be allowed as a part of the cost of performing the contract.

(e) *Miscellaneous direct expenses.* Miscellaneous direct expenses as used in paragraph (b) of this section include:

(1) *Cost of installation and construction.* Cost of installation and construction includes the cost of materials, labor and expenses necessary for the erection and installation prior to the completion of the contract and after the delivery of the product or material manufactured or constructed pursuant to the contract or subcontract.

(2) *Sundry direct expenses.* Items of expense which are properly chargeable directly to the cost of performing a contract or subcontract and which do not constitute guarantee expenses (see paragraph (h) of this section) or direct costs classified as factory cost or other manufacturing cost (see paragraphs (c) and (d) of this section), such as premiums on performance or other bonds required under the contract or subcontract; State sales taxes imposed on the contracting party; freight on outgoing shipments; fees paid for wind tunnel and model basin tests; demonstration and test expenses; crash insurance premiums; traveling expenses. In order for any such item to be allowed as a charge directly to the cost of performing a contract or subcontract, (i) a detailed record shall be kept by the contracting party of all items of a similar character, and (ii) no item of a similar character which is properly a direct charge to other work shall be allowed as a part of any indirect expenses in determining the proper proportion thereof chargeable to the cost of performing the contract or subcontract. As to allowable indirect expenses, see paragraphs (c)(5), (f), (g), and (j) of this section.

(f) *Indirect engineering expenses.* Indirect engineering expenses, usually termed ''engineering overhead,'' which are treated in this section as a part of general expenses in determining the cost of performing a contract or subcontract (see paragraph (b) of this section), comprise the general engineering expenses which are incident to and necessary for the performance of the contract or subcontract, such as the following:

(1) *Labor.* Reasonable fees of engineers employed in a general consulting capacity, and compensation of employees for personal services to the engineering department, such as supervision, which is properly chargeable to the contract or subcontract, but which is not chargeable as direct engineering labor (see paragraph (c)(3) of this section).

(2) *Material.* Supplies for the engineering department, such as paper and ink for drafting and similar supplies.

(3) *Miscellaneous expenses.* Expenses of the engineering department, such as (i) maintenance and repair of engineering equipment, and (ii) services purchased outside of the engineering department for blue- printing, drawing, computing, and like purposes.

(g) *Expenses of distribution, servicing and administration.* Expenses of distribution, servicing and administration, which are treated in this section as a part of general expenses in determining the cost of performing a contract or subcontract (see paragraph (b) of this section), comprehend the expenses incident to and necessary for the performance of the contract or subcontract, which are incurred in connection with the distribution and general servicing of the contracting party's products and the general administration of the business, such as:

(1) *Compensation for personal services of employees.* The salaries of the corporate and general executive officers and the salaries and wages of administrative clerical employees and of the office services employees such as telephone operators, janitors, cleaners, watchmen and office equipment repairmen.

(2) *Bidding and general selling expenses.* Bidding and general selling expenses which by reference to all the pertinent facts and circumstances reasonably constitute a part of

the cost of performing a contract or subcontract. The treatment of bidding and general selling expenses as a part of general expenses in accordance with this paragraph is in lieu of any direct charges which otherwise might be made for such expenses. The term ‘‘bidding expenses’’ as used in this section includes all expenses in connection with preparing and submitting bids.

(3) *General servicing expenses.* Expenses which by reference to all the pertinent facts and circumstances reasonably constitute a part of the cost of performing a contract or subcontract and which are incident to delivered or installed articles and are due to ordinary adjustments or minor defects; but including no items which are treated as a part of guarantee expenses (see paragraph (h) of this section) or as a part of direct costs, such as direct materials, direct labor, and other direct expense.

(4) *Other expenses.* Miscellaneous office and administrative expenses, such as stationery and office supplies; postage; repair and depreciation of office equipment; contributions to local charitable or community organizations to the extent constituting ordinary and necessary business expenses; employees’ welfare expenses; premiums and dues on compensation insurance; employers’ payments to unemployment, old age and social security Federal and State funds not including payments deducted from or chargeable to employees or officers; pensions and retirement payments to administrative office employees and accident compensation to office employees (as to self-insurance, see subdivision (i) of this subparagraph).

(i) Subject to the exception stated in this subdivision, in cases where a contracting party assumes its own insurable risks (usually termed ‘‘self-insurance’’), losses and payments will be allowed in the cost of performing a contract or subcontract only to the extent of the actual losses suffered or payments incurred during, and in the course of, the performance of the contract or subcontract and properly chargeable to such contract or subcontract. If, however, a contracting party assumes its own insurable risks *(a)* for compensation paid to employees for injuries received in the performance of their duties, or *(b)* for unemployment risks in States where insurance is required, there may be allowed as a part of the cost of performing a contract or subcontract a reasonable portion of the charges set up for purposes of self-insurance under a system of accounting regularly employed by the contracting party, as determined by the Commissioner of Internal Revenue, at rates not exceeding the lawful or approved rates of insurance companies for such insurance, reduced by amounts representing the acquisition cost in such companies, provided the contracting party adopts and consistently follows this method with respect to self-insurance in connection with all contracts and subcontracts subsequently performed by him.

(ii) Allowances for interest on invested capital are not allowable as costs of performing a contract or subcontract.

(iii) Among the items which shall not be included as a part of the cost of performing a contract or subcontract or considered in determining such cost, are the following: Entertainment expenses; dues and memberships other than of regular trade associations; donations except as otherwise provided above; losses on other contracts; profits or losses from sales or exchanges of capital assets; extraordinary expenses due to strikes or lockouts; fines and penalties; amortization of unrealized appreciation of values of assets; expenses, maintenance and depreciation of excess facilities (including idle land and building, idle parts of a building, and excess machinery and equipment) vacated or abandoned, or not adaptable for future use in performing contracts or subcontracts; increases in reserve accounts for contingencies, repairs, compensation insurance (except as above provided with respect to self-insurance) and guarantee work; Federal and State income and excess-profits taxes and surtaxes; cash discount earned up to one percent of the amount of the purchase, except that all discounts on subcontracts subject to the act will be considered; interest incurred or earned; bond discount or finance charges; premiums for life insurance on the lives of officers; legal and accounting fees in connection with reorganizations, security issues, capital stock issues and the prosecution of claims against the United States (including income tax matters); taxes and expenses on issues and transfers of capital stock; losses on investments; bad debts; and expenses of collection and exchange.

(iv) In order that the cost of performing a contract or subcontract may be accounted for clearly, the amount of any excess profits repayable to the United States pursuant to the act should not be charged to or included in such cost.

(h) *Guarantee expenses.* Guarantee expenses include the various items of factory, cost, other manufacturing cost, cost of installation and construction, indirect engineering expenses and other general expenses (see paragraphs (c) to (g) of this section) which are incurred after delivery or installation of the article manufactured or constructed pursuant to the particular contract or subcontract and which are incident to the correction of defects or deficiencies which the contracting party is required to make under the guarantee provisions of the particular contract or subcontract. If the total amount of such guarantee expenses is not ascertainable at the time of filing the report required to be filed with the district director of internal revenue (see §17.16) and the contracting party includes any estimated amount of such expenses as part of the claimed total cost of performing the contract or subcontract, such estimated amount shall be separately shown on the report and the reasons for claiming such estimated amount shall accompany the report; but only the amount of guarantee expenses actually incurred will be allowed. If the amount of guarantee expenses actually incurred is greater than the amount (if any) claimed on the report and the contracting party has made an overpayment of excess profit, a refund of the overpayment shall be made, in accordance with the provisions of § 17.19. If the amount of guarantee expenses actually incurred is less than the amount claimed on the report and an additional amount of excess profit is determined to be due, the additional amount of excess profit shall be assessed and paid in accordance with the provisions of § 17.19.

(i) *Unreasonable compensation.* (1) The salaries and compensation for services which are treated as a part of the cost of performing a contract or subcontract include reasonable payments for salaries, bonuses, or other compensation for services. As a general rule, bonuses paid to employees (and not to officers) in pursuance of a regularly established incentive bonus system may be allowed as a part of the cost of performing a contract or subcontract.

(2) The test of allowability is whether the aggregate compensation paid to each individual is for services actually rendered incident to, and necessary for, the performance of the contract or subcontract, and is reasonable. Excessive or unreasonable payments whether in cash, stock or other property ostensibly as compensation for services shall not be included in the cost of performing a contract or subcontract.

(j) *Allocation of indirect costs.* No general rule applicable to all cases may be stated for ascertaining the proper proportion of the indirect costs to be allocated to the cost of performing a particular contract or subcontract. Such proper proportion depends upon all the facts and circumstances relating to the performance of the particular contract or subcontract. Subject to a requirement that all items which have no relation to the performance of the contract or subcontract shall be eliminated from the amount to be allocated, the following methods of allocation are outlined as acceptable in a majority of cases:

(1) *Factory indirect expenses.* The allowable indirect factory expenses (see paragraph (c)(5) of this section) shall ordinarily be allocated or ‘‘distributed’’ to the cost of the contract or subcontract on the basis of the proportion which the direct productive labor (see paragraph (c)(2) of this section) attributable to the contract or subcontract bears to the total direct productive labor of the production department or particular section thereof during the period within which the contract or subcontract is performed, except that if the indirect factory expenses are incurred in different amounts and in different proportions by the various producing departments consideration shall be given to such circumstances to the extent necessary to make a fair and reasonable determination of the true profit and excess profit.

(2) *Engineering indirect expenses.* The allowable indirect engineering expenses (see paragraph (f) of this section) shall ordinarily be allocated or ‘‘distributed’’ to the cost of the contract or subcontract on the basis of the proportion which the direct engineering labor attributable to the contract or subcontract (see paragraph (c)(3) of this section) bears to the total direct engineering labor of the engineering department or particular section thereof during the period within which the contract or subcontract is performed. If the expenses of the engineering department are not sufficient in amount to require the maintenance of separate accounts, the engineering indirect costs may be included in the indirect factory expenses (see paragraph (c)(5) of this section) and allocated or distributed to the cost of performing the contract or subcontract as a part of such expenses, provided the proportion so allocated or distributed is proper under the facts and circumstances relating to the performance of the particular contract or subcontract.

(3) *Administrative expenses (or ‘‘overhead’’).* The allowable expenses of administration (see paragraph (g) of this section) or other general expenses except indirect engineering expenses, bidding and general selling expenses, and general servicing expenses shall ordinarily be allocated or distributed to the cost of performing a contract or subcontract on the basis of the proportion which the sum of the manufacturing cost (see paragraph (b) of this section) and the cost of installation and construction (see paragraph (e) of this section) attributable to the particular contract or subcontract bears to the sum of the total manufacturing cost and the total cost of installation and construction during the period within which the contract or subcontract is performed.

(4) *Bidding, general selling, and general servicing expenses.* The allowable bidding and general selling expenses and general servicing expenses (see paragraph (g) (2) and (3) of this section) shall ordinarily be allocated or distributed to the cost of performing a contract or subcontract on the basis of:

(i) The proportion which the contract price of the particular contract or subcontract bears to the total sales made (including contracts or subcontracts completed) during the period within which the particular contract or subcontract is performed, or

(ii) The proportion which the sum of the manufacturing cost (see paragraph (b) of this section) and the cost of installation and construction (see paragraph (e) of this section) attributable to the particular contract or subcontract bears to the sum of the total manufacturing cost and the total cost of installation and construction during the period within which the contract or subcontract is performed.

except that special consideration shall be given to the relation which certain classes of such expenses bear to the various classes of article produced by the contracting party in each case in which such consideration is necessary in order to make a fair and reasonable determination of the true profit and excess profit. See §17.14.

§17.10 *Credits for net loss and deficiency in profit in computing excess profit—(a) Net loss on contracts and subcontracts for naval vessels or portions thereof.* In the case of contracts or subcontracts for the construction or manufacture of any complete naval vessel or any portion thereof coming within the scope of the act which are completed within an income-taxable year ending after April 3, 1939, the term ''net loss'' as used in the act and in this part means the amount by which the total costs of performing all such contracts and subcontracts completed within such income-taxable year exceeds the total contract prices of such contracts and subcontracts. Such net loss sustained by a contracting party for an income-taxable year ending after April 3, 1939, is allowable as a credit in computing the contracting party's excess profit on contracts and subcontracts for the construction or manufacture of any complete naval vessel or any portion thereof which are completed within the next succeeding income-taxable year.

(b) *Net loss on contracts and subcontracts for aircraft or portions thereof.* In the case of contracts or subcontracts for the construction or manufacture of any complete aircraft or any portion thereof coming within the scope of the act, which are completed within an income-taxable year ending after April 3, 1939, the term ''net loss'' as used in the act and in these regulations means the amount by which the total costs of performing all such contracts and subcontracts completed within such income-taxable year exceeds the total contract prices of such contracts and subcontracts. Such net loss sustained by a contracting party for an income-taxable year ending after April 3, 1939, is allowable as a credit in computing the contracting party's excess profit on contracts and subcontracts for the construction or manufacture of any complete aircraft or any portion thereof which are completed within the four next succeeding income-taxable years.

(c) *Deficiency in profit.* The term ''deficiency in profit'' as used in the act and in this part relates to contracts and subcontracts coming within the scope of the act which are for the construction or manufacture of any complete aircraft or any portion thereof and are completed within an income-taxable year ending after April 3, 1939. As so used, the term ''deficiency in profit'' means the amount by which 12 percent of the total contract prices of such contracts and subcontracts which are completed by a particular contracting party within the income-taxable year exceeds the net profit upon such contracts and subcontracts. A deficiency in profit sustained by a contracting party with respect to such contracts and subcontracts for the construction or manufacture of complete aircraft or any portion thereof and completed within any income-taxable year ending after April 3, 1939, is allowable as a credit in computing the contracting party's excess profit on contracts and subcontracts for the construction or manufacture of complete aircraft or any portion thereof which are completed within the same or the four next succeeding income-taxable years.

(d) *Claim for credit.* Credit for a deficiency in profit or a net loss may be claimed in the contracting party's annual report of profit filed with the district director of internal revenue (see §17.16), but it shall be supported by separate schedules for each contract or subcontract involved showing total contract prices, costs of performance and pertinent facts relative thereto, together with a summarized computation of the deficiency in profit or net loss. The deficiency in profit or net loss claimed is subject to verification and adjustment. As to preservation of books and records, see §17.14. A deficiency in profit or net loss sustained on contracts and subcontracts completed within one income-taxable year may not be considered in computing a net loss or deficiency in profit sustained on contracts and subcontracts completed within another income- taxable year.

(e) *Examples.* The provisions of this section of the regulations may be illustrated by the following examples:

Example (1) For the calendar year 1939 the A Corporation, which keeps its books and makes its Federal income tax returns on a calendar year basis, sustained a net loss of $50,000 upon all contracts and subcontracts coming within the scope of the act which were entered into for the construction or manufacture of any complete naval vessel or any portion thereof and were completed within the calendar year 1939. For the calendar year 1940 the A Corporation had a net profit of $30,000 upon all such contracts and subcontracts completed within the year 1940. It also had a net profit of $10,000 upon other contracts completed within that year all such contracts being for naval aircraft coming within the scope of the act. For the calendar year 1941 the corporation had a net profit of $25,000 upon contracts completed within that year. The net loss of $50,000 sustained in 1939 may be taken as a credit against the net profit of $30,000 realized in

1940 upon the contracts for the construction or manufacture of complete naval vessels or portions thereof completed within that year; but the excess of $20,000 ($50,000 minus $30,000) may not be taken as a credit in computing the excess profit realized upon the other contracts completed in 1940 at a net profit of $10,000 or as a credit in computing the excess profit upon the contracts completed within the year 1941 at a net profit of $25,000.

Example (2). For the calendar year 1939, the B Corporation, which keeps its books and makes its Federal income tax returns on a calendar year basis, sustained a net loss of $10,000 and a deficiency in profit of $35,000 upon all contracts and subcontracts for naval aircraft and portions thereof coming within the scope of the act and completed within that year. During the year 1939, the B Corporation also completed contracts for Army aircraft coming within the scope of the Act at a net profit which was $15,000 in excess of 12 percent of the total contract prices of such contracts. On all contracts and subcontracts for naval aircraft coming within the scope of the act and completed within the calendar year 1940, the B Corporation realized a net profit which was $25,000 in excess of 12 percent of the total contract prices of such contracts and subcontracts while sustaining a deficiency in profit of $10,000 on like contracts and subcontracts for Army aircraft. On all contracts and subcontracts for naval aircraft coming within the scope of the act and completed within the calendar year 1941, the B Corporation realized a net profit which was $20,000 in excess of 12 percent of the total contract prices of such contracts. The net loss of $10,000 and deficiency in profit of $35,000 (or a total of $45,000) sustained in 1939 with respect to contracts and subcontracts for naval aircraft completed within that year may be taken as a credit to the extent of $15,000 in computing the excess profit on the contracts and subcontracts for Army aircraft completed in 1939. The remainder of such net loss and such deficiency in profit ($45,000 minus $15,000, or $30,000) may be combined with the deficiency in profit of $10,000 sustained in 1940 on contracts for Army aircraft and taken as a credit to the extent of $25,000 in computing the excess profit on the contracts and subcontracts for aircraft completed during 1940. The sum of such net loss and such deficiency in profit then remaining ($40,000 minus $25,000, or $15,000) may be taken as a credit in computing the excess profit realized on the contracts and subcontracts for aircraft completed in the year 1941.

[T.D. 4906, 4 FR 2492, June 27, 1939, as amended by T.D. 6512, 25 FR 12444, Dec. 6, 1960]

§ 17.11 *Credit for Federal income taxes.* For the purpose of computing the amount of excess profit to be paid to the United States, a credit is allowable against the excess profit for the amount of Federal income taxes paid or remaining to be paid on the amount of such excess profit. The ''Federal income taxes'' in respect of which this credit is allowable include the income taxes imposed by Titles I and IA of the Revenue Act of 1938, and Chapter 1 and Subchapter A of Chapter 2 of the Internal Revenue Code, and the excess-profits taxes imposed by section 602 of the Revenue Act of 1938, and Subchapter B of Chapter 2 of the Internal Revenue Code. This credit is allowable for these taxes only to the extent that it is affirmatively shown that they have been finally determined and paid or remain to be paid and that they were imposed upon the excess profit against which the credit is to be made. In case such a credit has been allowed and the amount of Federal income taxes imposed upon the excess profit is redetermined, the credit previously allowed shall be accordingly adjusted.

§ 17.12 *Failure of contractor to require agreement by subcontractor.* (a) Every contract or subcontract coming within the scope of the act is required by the act to contain, among other things, an agreement by the contracting party to make no subcontract unless the subcontractor agrees:

(1) To make a report, as described in the act, under oath to the Secretary of the Navy upon the completion of the subcontract;

(2) To pay into the Treasury excess profit, as determined by the Treasury Department, in the manner and amounts specified in the act;

(3) To make no subdivision of the subcontract for the same article or articles for the purpose of evading the provisions of the act;

(4) That the manufacturing spaces and books of its own plant, affiliates, and subdivisions shall at all times be subject to inspection and audit as provided in the act.

(b) If a contracting party enters into a subcontract with a subcontractor who fails to make such agreement, such contracting party shall, in addition to its liability for excess profit determined on contracts or subcontracts performed by it, be liable for any excess profit determined to be due the United States on the subcontract entered into with such subcontractor. In such event, however, the excess profit to be paid to the United States in respect of the subcontract entered into with such subcontractor shall be determined separately from any contracts or subcontracts performed by the contracting party entering into the subcontract with such subcontractor.

§ 17.13 *Evasion of excess profit.* Section 3 of the act provides that the contracting party shall agree to make no subdivisions of any contract or subcontract for the same article or articles for the purpose of evading the provisions of the act. If any such subdivision or subcontract is made it shall constitute a violation of the agreement provided for in the act, and the cost of completing a contract or subcontract by a contracting party which violates such agreement shall be determined in a manner necessary clearly to reflect the true excess profit of such contracting party.

§17.14 *Books of account and records.* (a) It is recognized that no uniform method of accounting can be prescribed for all contracting parties subject to the provisions of the act. Each contracting party is required by law to make a report of its true profit and excess profit. Such party must, therefore, maintain such accounting records as will enable it to do so. See §17.9. Among the essentials are the following:

(1) The profit or loss upon a particular contract or subcontract shall be accounted for and fully explained in the books of account separately on each contract or subcontract.

(2) Any cost accounting methods, however standard they may be and regardless of long continued practice, shall be controlled by, and be in accord with, the objectives and purposes of the act and of any regulations prescribed thereunder.

(3) The accounts shall clearly disclose the nature and amount of the different items of cost of performing a contract or subcontract.

(b) In cases where it has been the custom priorly to use so-called ''normal'' rates of overhead expense or administrative expenses, or ''standard'' or ''normal'' prices of material or labor charges, no objection will be made to the use temporarily during the period of performing the contract or subcontract of such methods in charging the contract or subcontract, if the method of accounting employed is such as clearly to reflect, in the final determination upon the books of account, the actual profit derived from the performance of the contract or subcontract and if the necessary adjusting entries are entered upon the books and they explain in full detail the revisions necessary to accord with the facts. As to the elements of cost, see §17.9.

(c) All books, records, and original evidences of costs (including, for example, production orders, bills or schedules of materials, purchase requisitions, purchase orders, vouchers, requisitions for materials, standing expense orders, inventories, labor time cards, payrolls, cost distribution sheets) pertinent to the determination of the true profit, excess profit, deficiency in profit, or net loss from the performance of a contract or subcontract shall be kept at all times available for inspection by internal revenue officers, and shall be carefully preserved and retained so long as the contents thereof may become material in the administration of the act. This provision is not confined to books, records and original evidences pertaining to items which may be considered to be a part of the cost of performing a contract or subcontract. It is applicable to all books, records and original evidences of costs of each plant, branch or department involved in the performance of a contract or subcontract or in the distribution of costs to the contract or subcontract.

§17.15 *Report to Secretary of the Navy.* (a) Upon the completion of a contract or a subcontract coming within the scope of the act and this part, the contracting party is required to make a report, under oath, to the Secretary of the Navy. As to the date of completion of a contract or subcontract, see §17.5. The act requires that such report shall be in the form prescribed by the Secretary of the Navy and shall state the total contract price, the cost of performing the contract, the net income from such contract, and the per centum such income bears to the contract price. The contracting party shall also include as a part of such report a statement showing:

(1) The manner in which the indirect costs were determined and allocated to the cost of performing the contract or subcontract (see §17.9);

(2) The name and address of every subcontractor with whom a subcontract was made, the object of such subcontract, the date when completed and the amount thereof; and

(3) The name and address of each affiliate or other organization, trade or business owned or controlled directly or indirectly by the same interests as those who so own or control the contracting party, together with a statement showing in detail all transactions which were made with such affiliate or other organization, trade or business and are pertinent to the determination of the excess profit.

(b) A copy of the report required to be made to the Secretary of the Navy is required to be transmitted by the contracting party to the Secretary of the Treasury. Such copy shall not be transmitted directly to the Secretary of the Treasury but shall be filed as a part of the annual report. See §17.16.

§17.16 *Annual reports for income-taxable years*—(a) *General requirements.* Every contracting party completing a contract or subcontract within the contracting party's income-taxable year ending after April 3, 1939 shall file, with the district director of internal revenue for the internal revenue district in which the contracting party's Federal income tax return is required to be filed, annual reports on the prescribed forms of the profit and excess profit on all contracts and subcontracts coming within the scope of the act. If any contracts or subcontracts so completed by the contracting party were entered into for the construction or manufacture of any complete naval vessel or any portion thereof, the profit and excess profit on all such contracts and subcontracts completed within the income-taxable year ending after April 3, 1939 shall be computed in accordance with the provisions of § 17.6. If any contracts or subcontracts so completed by the contracting party were entered into for the construction or manufacture of any complete naval aircraft or any portion thereof, the profit and excess profit on all such contracts and subcontracts completed within the income-taxable year ending after April 3, 1939 shall be computed in accordance with the provisions of § 17.7. There shall be included as a part of the annual report a statement, preferably in columnar form, showing separately for each contract or subcontract completed by the contracting party within the income-taxable year and covered by the report, the total contract price, the cost of performing the contract or subcontract and resulting profit or loss on each contract or subcontract together with a summary statement showing in detail the computation of the net profit or net loss upon each group of contracts and subcontracts covered by the report and the amount of the excess profit, if any, with respect to each group of contracts and subcontracts covered by the report. A copy of the report made to the Secretary of the Navy (see § 17.15) with respect to each contract or subcontract covered in the annual report, shall be filed as a part of such annual report. In case the income-taxable year of the contracting party is a period of less than twelve months (see § 17.1), the reports required by this section shall be made for such period and not for a full year.

(b) *Time for filing annual reports.* Annual reports of contracts and subcontracts completed by a contracting party within an income-taxable year ending after April 3, 1939 shall be filed on or before the 15th day of the ninth month following the close of the contracting party's income-taxable year. It is important that the contracting party render on or before the due date annual reports as nearly complete and final as it is possible for the contracting party to prepare. An extension of time granted the contracting party for filing its Federal income tax return does not serve to extend the time for filing the annual reports required by this section. Authority consistent with authorizations for granting extensions of time for filing Federal income tax returns is hereby delegated to the various district directors of internal revenue for granting extensions of time for filing the reports required by this section. Application for extensions of time for filing such reports should be addressed to the district director of internal revenue for the district in which the contracting party files its Federal income tax returns and must contain a full recital of the causes for the delay.

§ 17.17 *Payment of excess profit liability.* The amount of the excess profit liability to be paid to the United States shall be paid on or before the due date for filing the report with the district director of internal revenue. See § 17.16. At the option of the contracting party, the amount of the excess profit liability may be paid in four equal installments instead of in a single payment, in which case the first installment is to be paid on or before the date prescribed for the payment of the excess profit as a single payment, the second installment on or before the 15th day of the third month, the third installment on or before the 15th day of the sixth month, and the fourth installment on or before the 15th day of the ninth month, after such date.

§ 17.18 *Liability of surety.* The surety under contracts entered into after the amendment of section 3(b) of the act of June 25, 1936 shall not be liable for payment of excess profit due the United States in respect of such contracts.

§ 17.19 *Determination of liability for excess profit, interest and penalties; assessment, collection, payment, refunds.* (a) The duty of determining the correct amount of excess profit liability on contracts and subcontracts coming within the scope of the act is upon the Commissioner of Internal Revenue. Under section 3(b) of the act, as amended, and section 651 of the Internal Revenue Code, all provisions of law (including the provisions of law relating to interest, penalties and refunds) applicable with respect to the taxes imposed by Title I of the Revenue Act of 1934 and not inconsistent with section 3 of the act are applicable with respect to the assessment, collection, or payment of excess profits on contracts and subcontracts coming within the scope of the act and to refunds of overpayments of profits into the Treasury under the act. Claims by a contracting party for the refund of an amount of excess profit, interest, penalties, and additions to such excess profit shall conform to the general requirements prescribed with respect to claims for refund of overpayments of taxes imposed by Title I of the Revenue Act of 1934 and, if filed on account of any additional costs incurred pursuant to guarantee provisions in a contract, shall be supplemented by a statement under oath showing the amount and nature of such costs and all facts pertinent thereto.

(b) Administrative procedure for the determination, assessment and collection of excess profit liability under section 3 of the act, sections 650 and 651 of the Internal Revenue Code, and this part, and the examination of reports and claims in connection therewith will be prescribed from time to time by the Commissioner of Internal Revenue.

MITIGATION OF EFFECT OF RENEGOTIATION OF GOVERNMENT CONTRACTS

§1.1481–1 [Reserved]

Tax on Transfers To Avoid Income Tax

§1.1491–1 Imposition of tax.

Section 1491 imposes an excise tax upon transfers of stock or securities by a citizen or resident of the United States, or by a domestic corporation or partnership, or by a trust which is not a foreign trust, to a foreign corporation as paid-in surplus or as a contribution to capital, or to a foreign trust, or to a foreign partnership. The tax is in an amount equal to 27½ percent of the excess of (a) the value of the stock or securities so transferred over (b) its adjusted basis, as provided in section 1011, for determining gain in the hands of the transferor.

[T.D. 6500, 25 FR 12082, Nov. 26, 1960]

§1.1492–1 Nontaxable transfers.

(a) The tax imposed by section 1491 does not apply:

(1) If the transferee is an organization (other than an organization described in section 401(a) exempt from income tax under the provisions of sections 501 to 504, inclusive; or

(2) If before the transfer it has been established to the satisfaction of the Commissioner that the transfer is not in pursuance of a plan having as one of its principal purposes the avoidance of Federal income taxes.

(b) Whether a transfer of stock or securities is in pursuance of a plan having as one of its principal purposes the avoidance of Federal income taxes is a question to be determined from the facts and circumstances of each particular case. In any such case where a transferor desires to establish that the transfer is not in pursuance of such a plan, a statement of the facts relating to the plan under which the transfer is to be made or was made, together with a copy of the plan if in writing, shall be forwarded to the Commissioner of Internal Revenue, Washington, DC 20225, for a ruling. This statement shall contain, or be verified by, a written declaration that it is made under the penalties of perjury. A letter notifying the transferor of the Commissioner's determination will be mailed to the transferor.

[T.D. 6500, 25 FR 12082, Nov. 26, 1960]

§1.1493–1 Definition of foreign trust.

For taxable years beginning before January 1, 1967, a trust is to be considered a ''foreign trust'' within the meaning of chapter 5 of the Code, if, assuming a subsequent sale by the trustee, outside the United States and for cash, of the property transferred to the trust, the profit, if any, from such sale (being income from sources without the United States under the provisions of part I (section 861 and following), subchapter N, chapter 1 of the Code), would not be included in the gross income of the trust under subtitle A of the Code. For taxable years beginning after December 31, 1966, the term ''foreign trust,'' as used in chapter 5 of the Code, shall have the meaning prescribed by section 7701(a)(31).

[T.D. 7332, 39 FR 44230, Dec. 23, 1974]

§1.1494–1 Returns; payment and collection of tax.

(a) *Returns and payment.* Every person making a transfer described in section 1491 shall make a return to the district director on the day on which the transfer is made and, unless the transfer is nontaxable under section 1492, pay the tax due on such transfer. This return, which shall contain, or be verified by, a written declaration that it is made under the penalties of perjury, shall be made on Form 926 and shall be filed with the district director to whom the transferor's return of income is required to be made. The return shall set forth in detail the following information:

(1) Name and address of transferor, and place of organization or creation, if a corporation, partnership, or trust.

(2) Name and address of transferee, place of organization or creation, and whether the transferee is a foreign corporation, a foreign trust, or a foreign partnership. If the transferee is a foreign trust or a foreign partnership, the name and address of the fiduciary and each beneficiary, in the case of a trust,

or of each partner, in the case of a partnership, must be shown.

(3) Description and amount of stock or securities transferred, the date of transfer, and a complete statement showing all the facts relating to the transfer, accompanied by a copy of the plan under which the transfer was made.

(4) The fair market value of the stock or securities transferred as of the date of transfer, and the adjusted basis provided in section 1011 for determining gain in the hands of the transferor.

(5) Whether the transfer was made in pursuance of a plan submitted to and approved by the Commissioner as not having as one of its principal purposes the avoidance of Federal income taxes. If the plan has been so approved, a copy of the Commissioner's letter approving the plan shall accompany the return.

(6) Such other information as may be required by the return form.

(b) *Certificate.* (1) If the transferee of the stock or securities, the transfer of which is reported in the return, is a foreign organization meeting the tests of exemption from income tax provided in part I (section 501 and following), subchapter F, chapter 1 of the Code, and the transferor on that account claims that no liability for tax is imposed by section 1491, such transferor must file with Form 926 a certificate establishing the exemption of the transferee under such part I. This certificate, which shall contain, or be verified by, a written declaration that it is made under the penalties of perjury, shall contain complete information showing the character of the transferee, the purpose for which it was organized, its actual activities, the source of its income and the disposition of such income, whether or not any of its income is credited to surplus or may inure to the benefit of any private shareholder or individual, and in general all facts relating to its operations which affect its right to exemption. To such certificate shall be attached a copy of the charter or articles of incorporation, the by-laws of the organization, and the latest financial statement showing the assets, liabilities, receipts, and disbursements of the organization.

(2) If the transferee is a foreign organization which has been held to be exempt from income tax under such part I (or corresponding provisions of prior law), a copy of the Commissioner's letter so holding shall be filed with Form 926 in lieu of the above certificate and attachments.

(c) *Assessment and collection.* The determination, assessment, and collection of the tax and the examination of returns and claims filed pursuant to chapter 5 of the Code will be made under such procedure as may be prescribed from time to time by the Commissioner.

[T.D. 6500, 25 FR 12082, Nov. 26, 1960]

§ 1.1494–2 Effective date.

Chapter 5 (section 1491 and following) of the Internal Revenue Code of 1954 and the regulations prescribed thereunder apply with respect to transfers occurring after December 31, 1954. (See section 7851(a)(1)(B).) Chapter 7 (section 1250 and following) of the Internal Revenue Code of 1939 and the regulations applicable thereto apply with respect to transfers occurring prior to January 1, 1955.

[T.D. 6500, 25 FR 12083, Nov. 26, 1960]

Consolidated Returns

RETURNS AND PAYMENT OF TAX

CONSOLIDATED RETURN REGULATIONS

§ 1.1502–0 Effective dates.

(a) The regulations under section 1502 are applicable to taxable years beginning after December 31, 1965, except as otherwise provided therein.

(b) The provisions of §§ 1.1502–0A through 1.1502–3A, 1.1502–10A through 1.1502–19A, and 1.1502–30A through 1.1502–51A (as contained in the 26 CFR part 1 edition revised April 1, 1996) are applicable to taxable years beginning before January 1, 1966.

[T.D. 8677, 61 FR 33325, June 27, 1996]

§ 1.1502–1 Definitions.

(a) *Group.* The term *group* means an affiliated group of corporations as defined in section 1504. See § 1.1502–75(d) as to when a group remains in existence. Except as the context otherwise requires, references to a group are references to a consolidated group (as defined in paragraph (h) of this section).

(b) *Member.* The term *member* means a corporation (including the common parent) that is included in the group, or as the context may require, a corporation that is included in a subgroup.

(c) *Subsidiary.* The term *subsidiary* means a corporation other than the common parent which is a member of such group.

(d) *Consolidated return year.* The term *consolidated return year* means a taxable year for which a consolidated return is filed or required to be filed by such group.

(e) *Separate return year.* The term *separate return year* means a taxable year of a corporation for which it files a separate return or for which it joins in the filing of a consolidated return by another group.

(f) *Separate return limitation year*—(1) *In general.* Except as provided in paragraphs (f)(2) and (3) of this section, the term *separate return limitation year* (or *SRLY*) means any separate return year of a member or of a predecessor of a member.

(2) *Exceptions.* The term *separate return limitation year* (or *SRLY*) does not include:

(i) A separate return year of the corporation which is the common parent for the consolidated return year to which the tax attribute is to be carried (except as provided in §1.1502–75(d)(2)(ii) and subparagraph (3) of this paragraph),

(ii) A separate return year of any corporation which was a member of the group for each day of such year, or

(iii) A separate return year of a predecessor of any member if such predecessor was a member of the group for each day of such year,

Provided that an election under section 1562(a) (relating to the privilege to elect multiple surtax exemptions) was never effective (or is no longer effective as a result of a termination of such election) for such year. An election under section 1562(a) which is effective for a taxable year beginning in 1963 and ending in 1964 shall be disregarded.

(3) *Reverse acquisitions.* In the event of an acquisition to which §1.1502–75(d)(3) applies, all taxable years of the first corporation and of each of its subsidiaries ending on or before the date of the acquisition shall be treated as separate return limitation years, and the separate return years (if any) of the second corporation and each of its subsidiaries shall not be treated as separate return limitation years (unless they were so treated immediately before the acquisition). For example, if corporation P merges into corporation T, and the persons who were stockholders of P immediately before the merger, as a result of owning the stock of P, own more than 50 percent of the fair market value of the outstanding stock of T, then a loss incurred before the merger by T (even though it is the common parent), or by a subsidiary of T, is treated as having been incurred in a separate return limitation year. Conversely, a loss incurred before the merger by P, or by a subsidiary of P in a separate return year during all of which such subsidiary was a member of the group of which P was the common parent and for which section 1562 was not effective, is treated as having been incurred in a year which is not a separate return limitation year.

(4) *Predecessors and successors.* The term *predecessor* means a transferor or distributor of assets to a member (the *successor*) in a transaction—

(i) To which section 381(a) applies; or

(ii) That occurs on or after January 1, 1997, in which the successor's basis for the assets is determined, directly or indirectly, in whole or in part, by reference to the basis of the assets of the transferor or distributor, but only if the amount by which basis differs from value, in the aggregate, is material. In the case of such a transaction, only one member may be considered a predecessor to or a successor of one other member.

(g) *Consolidated return change of ownership*—(1) *In general.* A consolidated return change of ownership occurs during any taxable year (referred to in this subparagraph as the ''year of change'') of the corporation which is the common parent for the taxable year to which the tax attribute is to be carried, if, at the end of the year of change:

(i) Any one or more of the persons described in section 382(a)(2) own a percentage of the fair market value of the outstanding stock of such corporation which is more than 50 percentage points greater than such person or persons owned at:

(a) The beginning of such taxable year, or

(b) The beginning of the preceding taxable year, and

(ii) The increase in percentage points at the end of such year is attributable to:

(a) A purchase (within the meaning of section 382(a)(4)) by such person or persons of such stock, the stock of another corporation owning stock in such corporation, or an interest in a partnership or trust owning stock in such corporation, or

(b) A decrease in the amount of such stock outstanding or the amount of stock outstanding of another corporation owning stock in such corporation, except a decrease resulting from a redemption to pay death taxes to which section 303 applies.

For purposes of subdivision (i) *(a)* and *(b)* of this subparagraph, the beginning of the taxable years specified therein shall be the beginning of such taxable years or October 1, 1965, whichever occurs later.

(2) *Operating rules.* For purposes of this paragraph:

(i) The term *stock* means all shares except nonvoting stock which is limited and preferred as to dividends, and

(ii) Section 318 (relating to constructive ownership of stock) shall apply in determining the ownership of stock, except that section 318(a) (2)(C) and (3)(C) shall be applied without regard to the 50-percent limitation contained therein.

(3) *Old members.* The term *old members* of a group means:

(i) Those corporations which were members of such group immediately preceding the first day of the taxable year in which the consolidated return change of ownership occurs, or

(ii) If the group was not in existence prior to the taxable year in which the consolidated return change of ownership occurs, the corporation which is the common parent for the taxable year to which the tax attribute is to be carried.

(4) *Reverse acquisitions.* If there has been a consolidated return change of ownership of a corporation under subparagraph (1) of this paragraph and the stock or assets of such corporation are subsequently acquired by another corporation in an acquisition to which § 1.1502–75(d)(3) applies so that the group of which the former corporation is the common parent is treated as continuing in existence, then the ‘‘old members’’, as defined in subparagraph (3) of this paragraph, of such group immediately before the acquisition shall continue to be treated as ‘‘old members’’ immediately after the acquisition. For example, assume that corporations P and S comprise group PS, and PS undergoes a consolidated return change of ownership. Subsequently, the stock of P, the common parent, is acquired by corporation T, the common parent of group TU, in an acquisition to which section 368(a)(1)(B) and § 1.1502–75(d)(3) apply. The PS group is treated as continuing in existence with T as the common parent. P and S continue to be treated as old members, as defined in subparagraph (3) of this paragraph.

(h) *Consolidated group.* The term ‘‘consolidated group’’ means a group filing (or required to file) consolidated returns for the tax year.

(i) [Reserved]

(j) *Affiliated.* Corporations are affiliated if they are members of a group with each other.

[T.D. 6894, 31 FR 11794, Sept. 8, 1966, as amended by T.D. 7246, 38 FR 758, Jan. 4, 1973; T.D. 8294, 55 FR 9434, Mar. 14, 1990; T.D. 8319, 55 FR 49038, Nov. 26, 1990; T.D. 8560, 59 FR 41675, Aug. 15, 1994; T.D. 8677, 61 FR 33325, June 27, 1996]

CONSOLIDATED TAX LIABILITY

§ 1.1502–2 Computation of tax liability.

The tax liability of a group for a consolidated return year shall be determined by adding together:

(a) The tax imposed by section 11 on the consolidated taxable income for such year (see § 1.1502–11 for the computation of consolidated taxable income);

(b) The tax imposed by section 541 on the consolidated undistributed personal holding company income;

(c) If paragraph (b) of this section does not apply, the aggregate of the taxes imposed by section 541 on the separate undistributed personal holding company income of the members which are personal holding companies;

(d) If paragraph (b) of this section does not apply, the tax imposed by section 531 on the consolidated accumulated taxable income (see §1.1502–43);

(e) The tax imposed by section 594(a) in lieu of the taxes imposed by section 11 or 1201 on the taxable income of a life insurance department of the common parent of a group which is a mutual savings bank;

(f) The tax imposed by section 802(a) on consolidated life insurance company taxable income;

(g) The tax imposed by section 831(a) on the consolidated insurance company taxable income of the members which are subject to such tax;

(h) The tax imposed by section 1201, instead of the taxes computed under paragraphs (a) and (g) of this section, computed by reference to the net capital gain of the group (see §1.1502–22T) (or, for consolidated return years to which §1.1502–22T does not apply, computed by reference to the excess of the consolidated net long-term capital gain over the consolidated net short-term capital loss (see §1.1502–41A for the determination of the consolidated net long-term capital gain and the consolidated net short-term capital loss));

(i) [Reserved]

(j) The tax imposed by section 1333 on war loss recoveries; and

by allowing as a credit against such taxes the investment credit under section 38 (see §1.1502–3), and the foreign tax credit under section 33 (see §1.1502–4). For purposes of this section, the surtax exemption of the group for a consolidated return year is $25,000, or if a lesser amount is allowed under section 1561, such lesser amount. See §1.1561–2(a)(2). For increase in tax due to the application of section 47, see §1.1502–3(f). For amount of tax surcharge, see section 51 and §1.1502–7.

[T.D. 6894, 31 FR 11794, Sept. 8, 1966, as amended by T.D. 7093, 36 FR 4871, Mar. 13, 1971; T.D. 7937, 49 FR 3462, Jan. 27, 1984; T.D. 8677, 61 FR 33326, June 27, 1996]

§1.1502–3 Consolidated investment credit.

(a) *Determination of amount of consolidated credit*—(1) *In general.* The credit allowed by section 38 for a consolidated return year of a group shall be equal to the consolidated credit earned. The consolidated credit earned is equal to the aggregate of the credit earned (as determined under subparagraph (2) of this paragraph) by all members of the group for the consolidated return year.

(2) *Determination of credit earned.* The credit earned of a member is an amount equal to 7 percent of such member's qualified investment (determined under section 46(c)). For purposes of computing a member's qualified investment, the basis of property shall not include any gain or loss realized with respect to such property by another member in an intercompany transaction (as defined in §1.1502–13(b)), whether or not such gain or loss is deferred. Thus, if section 38 property acquired in an intercompany transaction has a basis of $100 to the purchasing member, and if the selling member has a $20 gain with respect to such property, the basis of such property for purposes of computing the purchaser's qualified investment is only $80. Such $80 basis shall also be used for purposes of applying section 47 to such property. See paragraph (f) of this section.

(3) *Consolidated limitation based on amount of tax.* (i) Notwithstanding the amount of the consolidated credit earned for the taxable year, the consolidated credit allowed by section 38 to the group for the consolidated return year is limited to:

(a) So much of the consolidated liability for tax as does not exceed $25,000, plus

(b) For taxable years ending on or before March 9, 1967, 25 percent of the consolidated liability for tax in excess of $25,000, or

(c) For taxable years ending after March 9, 1967, 50 percent of the consolidated liability for tax in excess of $25,000.

The $25,000 amount referred to in the preceding sentence shall be reduced by any part of such $25,000 amount apportioned under § 1.46–1 to component members of the controlled group (as defined in section 46(a)(5)) which do not join in the filing of the consolidated return. For further rules for computing the limitation based on amount of tax with respect to the suspension period (as defined in section 48(j)), see section 46(a)(2). The amount determined under this subparagraph is referred to in this section as the ''consolidated limitation based on amount of tax.''

(ii) If an organization to which section 593 applies or a cooperative organization described in section 1381(a) joins in the filing of the consolidated return, the $25,000 amount referred to in subdivision (i) of this subparagraph (reduced as provided in such subdivision) shall be apportioned equally among the members of the group filing the consolidated return. The amount so apportioned equally to any such organization shall then be decreased in accordance with the provisions of section 46(d). Finally, the sum of all such equal portions (as decreased under section 46(d)) of each member of the group shall be substituted for the $25,000 amount referred to in subdivision (i) of this subparagraph.

(4) *Consolidated liability for tax.* For purposes of subparagraph (3) of this paragraph, the consolidated liability for tax shall be the income tax imposed for the taxable year upon the group by chapter 1 of the Code, reduced by the consolidated foreign tax credit allowable under § 1.1502–4. The tax imposed by section 56 (relating to minimum tax for tax preferences), section 531 (relating to accumulated earnings tax), section 541 (relating to personal holding company tax), and any additional tax imposed by section 1351(d)(1) (relating to recoveries of foreign expropriation losses), shall not be considered tax imposed by chapter 1 of the Code. In addition, any increase in tax resulting from the application of section 47 (relating to certain dispositions, etc., of section 38 property) shall not be treated as tax imposed by chapter 1 for purposes of computing the consolidated liability for tax.

(b) *Carryback and carryover of unused credits*—(1) *Allowance of unused credit as consolidated carryback or carryover.* A group shall be allowed to add to the amount allowable as a credit under paragraph (a)(1) of this section for any consolidated return year an amount equal to the aggregate of the consolidated investment credit carryovers and carrybacks to such year. The consolidated investment credit carryovers and carrybacks to the taxable year shall consist of any consolidated unused credits of the group, plus any unused credits of members of the group arising in separate return years of such members, which may be carried over or back to the taxable year under the principles of section 46(b). However, such consolidated carryovers and carrybacks shall not include any consolidated unused credits apportioned to a corporation for a separate return year pursuant to paragraph (c) of § 1.1502–79 and shall be subject to the limitations contained in paragraphs (c) and (e) of this section. A consolidated unused credit for any consolidated return year is the excess of the consolidated credit earned over the consolidated limitation based on amount of tax for such year.

(2) *Absorption rules.* For purposes of determining the amount, if any, of an unused credit (whether consolidated or separate) which can be carried to a taxable year (consolidated or separate), the amount of such unused credit which is absorbed in a prior consolidated return year under section 46(b) shall be determined by:

(i) Applying all unused credits which can be carried to such prior year in the order of the taxable years in which such unused credits arose, beginning with the taxable year which ends earliest, and

(ii) Applying all such unused credits which can be carried to such prior year from taxable years ending on the same date on a pro rata basis.

(c) *Limitation on investment credit carryovers and carrybacks from separate return limitation years*—(1) *General rule.* In the case of an unused credit of a member of the group arising in a separate return limitation year (as defined in paragraph (f) of §1.1502–1) of such member (and in a separate return limitation year of any predecessor of such member), the amount which may be included under paragraph (b) of this section (computed without regard to the limitation contained in paragraph (e) of this section) shall not exceed the amount determined under subparagraph (2) of this paragraph.

(2) *Computation of limitation.* The amount referred to in subparagraph (1) of this paragraph with respect to a member of the group is the excess, if any, of:

(i) The limitation based on amount of tax of the group, minus such limitation recomputed by excluding the items of income, deduction, and foreign tax credit of such member, over

(ii) The sum of *(a)* the investment credit earned by such member for such consolidated return year, and *(b)* the unused credits attributable to such member which may be carried to such consolidated return year arising in unused credit years ending prior to the particular separate return limitation year.

(3) *Special effective date.* This paragraph (c) applies to consolidated return years for which the due date of the income tax return (without extensions) is on or before March 13, 1998. See §1.1502-3T(c) for the rule that limits the group's use of a section 38 credit carryover or carryback from a SRLY for a consolidated return year for which the due date of the income tax return (without extensions) is after March 13, 1998. For taxable years not subject to §1.1502–3T(c), prior law applies. See §1.1502–3(c) in effect prior to January 12, 1998 (§1.1502–3(c) as contained in the 26 CFR part 1 edition revised April 1, 1997) for prior law. See also §1.1502–3T(c)(4) for an optional effective date rule (generally making the rules of this paragraph (c) inapplicable to a consolidated return year beginning after December 31, 1996, if the due date of the income tax return (without extensions) for such year is on or before March 13, 1998).

(d) *Examples.* (1) *Examples.* The provisions of paragraphs (a), (b), and (c) of this section may be illustrated by the following examples:

Example (1). Corporation P is incorporated on January 1, 1966. On that same day P incorporates corporation S, a wholly owned subsidiary. P and S file consolidated returns for calendar years 1966 and 1967. P's and S's credit earned, the consolidated credit earned, and the consolidated limitation based on amount of tax for 1966 and 1967 are as follows:

	Credit earned	Consolidated credit earned	Consolidated limitation based on amount of tax
1966:			
P	$60,000		
S	30,000	$90,000	$100,000
1967:			
P	40,000		
S	25,000	65,000	50,000

(i) P's and S's credit earned for 1966 are aggregated and the group's consolidated credit earned, $90,000, is allowable in full to the group as a credit under section 38 for 1966 since such amount is less than the consolidated limitation based on amount of tax for 1966, $100,000.

(ii) Since the consolidated limitation based on amount of tax for 1967 is $50,000, only $50,000 of the $65,000 consolidated credit earned for such year is allowable to the group under section 38 as a credit for 1967. The consolidated unused credit for 1967 of $15,000 ($65,000 less $50,000) is a consolidated investment credit carryback and carryover to the years prescribed in section 46(b). In this case the consolidated unused credit is a consolidated investment credit carryback to 1966 (since P and S were not in existence in 1964 and 1965) and a consolidated investment credit carryover to 1968 and subsequent years. The portion of the consolidated unused credit for 1967 which is allowable as a credit for 1966 is $10,000. This amount shall be added to the amount allowable as a credit to the group for 1966. The balance of the consolidated unused credit for 1967 to be carried to 1968 is $5,000. These amounts are computed as follows:

Consolidated carryback to 1966			$15,000
1966 consolidated limitation based on tax		$100,000	
Less: Consolidated credit earned for 1966	$90,000		
Consolidated unused credits attributable to years preceding 1967 ...	0	90,000	

Limit on amount of 1967 consolidated unused credit which may be added as a credit for 1966	10,000
Balance of 1967 consolidated unused credit to be carried to 1968	5,000

Example (2) (i) Assume the same facts as in example (1), except that all the stock of corporation T, also a calendar year taxpayer, is acquired by P on January 1, 1968, and that P, S, and T file a consolidated return for 1968. In 1966 T had an unused credit of $10,000 which has not been absorbed and is available as an investment credit carryover to 1968. Such carryover is from a separate return limitation year. P's and S's credit earned for 1968 is $10,000 each and T's credit earned is $8,000; the consolidated credit earned is therefore $28,000. The group's consolidated limitation based on amount of tax for 1968 is $50,000. Such limitation recomputed by excluding the items of income, deduction, and foreign tax credit of T is $30,000. Thus, the amount determined under paragraph (c)(2)(i) of this section is $20,000 ($50,000 minus $30,000). Accordingly, the limitation on the carryover of T's unused credit is $12,000, the excess of $20,000 over $8,000 (the sum of T's credit earned for the taxable year and any carryovers from prior unused credit years (none in this case)). Therefore T's $10,000 unused credit from 1966 may be carried over to the consolidated return year without limitation.

(ii) The group's consolidated credit earned for 1968, $28,000, is allowable in full as a credit under section 38 since such amount is less than the consolidated limitation based on amount of tax, $50,000.

(iii) The group's consolidated investment credit carryover to 1968 is $15,000, consisting of the consolidated unused credits of the group ($5,000), plus T's separate return year unused credit ($10,000). The entire $15,000 consolidated carryover shall be added to the amount allowable to the group as a credit under section 38 for 1968, since such amount is less than $22,000 (the excess of the consolidated limitation based on tax, $50,000, over the sum of the consolidated credit earned for 1968, $28,000, and unused credits arising in prior unused credit years, zero).

Example (3). Assume the same facts as in example (2), except that the amount determined under paragraph (c)(2)(i) of this section is $12,000. Therefore, the limitation on the carryover of T's unused credit is $4,000. Accordingly, the consolidated investment credit carryover is only $9,000 since the amount of T's separate return year unused credit which may be added to the group's $5,000 consolidated unused credit is $4,000. These amounts are computed as follows:

T's carryover to 1968			$10,000
Consolidated limitation based on amount of tax minus recomputed limitation		$12,000	
Less: T's credit earned for 1968	$8,000		
Unused credits attributable to T arising in unused credit years preceding 1966	0	8,000	
Limit on amount of 1966 unused credit of T which may be added to consolidated investment credit carryover			4,000
Balance of 1966 unused credit of T to be carried to 1969 (subject to the limitation contained in paragraph (c) of this section)			6,000

(2) *Example (2)* and *Example (3)* of this paragraph (d) do not apply to consolidated return years for which the due date of the income tax return (without extensions) is after March 13, 1998. For consolidated return years for which the due date of the income tax return (without extensions) is after March 13, 1998, see § 1.1502–3T(d).

(e) *Limitation on investment credit carryovers where there has been a consolidated return change of ownership*— (1) *General rule.* If a consolidated return change of ownership (as defined in paragraph (g) of § 1.1502–1) occurs during the taxable year or an earlier taxable year, the amount which may be included under paragraph (b) of this section in the consolidated investment credit carryovers to the taxable year with respect to the aggregate unused credits attributable to old members of the group (as defined in paragraph (g)(3) of § 1.1502–1) arising in taxable years (consolidated or separate) ending on the same day and before the taxable year in which the consolidated return change of ownership occurred shall not exceed the amount determined under subparagraph (2) of this paragraph.

(2) *Computation of limitation.* The amount referred to in subparagraph (1) of this paragraph shall be the excess of the consolidated limitation based on the amount of tax for the taxable year, recomputed by including only the items of income, deduction, and foreign tax credit of the old members, over the sum of:

(i) The aggregate investment credits earned by the old members for the taxable year, and

(ii) The aggregate unused investment credits attributable to the old members which may be carried to the taxable year arising in unused credit years ending prior to the particular unused credit year or years.

(3) *Special effective date.* This paragraph (e) applies only to a consolidated return change of ownership that occurred during a consolidated return year for which the due date of the income tax return (without extensions) is on or before March 13, 1998. See §1.1502–3T(c)(4) for an optional effective date rule (generally making the rules of this paragraph (e) inapplicable if the consolidated return change of ownership occurred on or after January 1, 1997, and during a consolidated return year for which the due date of the income tax return (without extensions) is on or before March 13, 1998).

(f) *Early dispositions, etc., of section 38 property*—(1) *Dispositions of section 38 property during and after consolidated return year.* If property is subject to section 47(a) (1) or (2) with respect to a member during a consolidated return year, any increase in tax shall be added to the tax liability of the group under §1.1502–2 (regardless of whether the property was placed in service in a consolidated or separate return year). Also, if property is subject to section 47(a) (1) or (2) with respect to a corporation during a taxable year for which such corporation files on a separate return basis, any increase in tax shall be added to the tax liability of such corporation (regardless of whether such property was placed in service in a consolidated or separate return year).

(2) *Exception for transfer to another member.* (i) Except as provided in subdivisions (ii) and (iii) of this subparagraph, a transfer of section 38 property from one member of the group to another member of such group during a consolidated return year shall not be treated as a disposition or cessation within the meaning of section 47(a)(1). If such section 38 property is disposed of, or otherwise ceases to be section 38 property or becomes public utility property with respect to the transferee, before the close of the estimated useful life which was taken into account in computing qualified investment, then section 47(a) (1) or (2) shall apply to the transferee with respect to such property (determined by taking into account the period of use, qualified investment, other dispositions, etc., of the transferor). Any increase in tax due to the application of section 47(a) (1) or (2) shall be added to the tax liability of such transferee (or the tax liability of a group, if the transferee joins in the filing of a consolidated return).

(ii) Except as provided in subdivision (iii) of this subparagraph, if section 38 property is disposed of during a consolidated return year by one member of the group to another member of such group which is an organization to which section 593 applies or a cooperative organization described in section 1381(a), the tax under chapter 1 of the Code for such consolidated return year shall be increased by an amount equal to the aggregate decrease in the credits allowed under section 38 for all prior taxable years which would result solely from treating such property, for purposes of determining qualified investment, as placed in service by such organization to which section 593 applies or such cooperative organization described in section 1381(a), as the case may be, but with due regard to the use of the property before such transfer.

(iii) Section 47(a)(1) shall apply to a transfer of section 38 property by a corporation during a consolidated return year if such corporation is liquidated in a transaction to which section 334(b)(2) applies.

(3) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example (1). P, S, and T file a consolidated return for calendar year 1967. In such year S places in service section 38 property having an estimated useful life of more than 8 years. In 1968, P, S, and T file a consolidated return and in such year S sells such property to T. Such sale will not cause section 47(a)(1) to apply.

Example (2). Assume the same facts as in example (1), except that P, S, and T filed separate returns for 1967. The sale from S to T will not cause section 47(a)(1) to apply.

Example (3). Assume the same facts as in example (1), except that P, S, and T continue to file consolidated returns through 1971 and in such year T disposes of the property to individual A. Section 47(a)(1) will apply to the group and any increase in tax shall be added to the tax liability of the group. For the purposes of determining the actual period of use by T, such period shall include S's period of use.

Example (4). Assume the same facts as in example (3), except that T files a separate return in 1971. Again, the actual periods of use by S and T will be combined in applying section 47. If the disposition results in an increase in tax under section 47(a)(1), such additional tax shall be added to the separate tax liability of T.

Example (5). Assume the same facts as in example (1), except that in 1969, P sells all the stock of T to a third party. Such sale will not cause section 47(a)(1) to apply.

[T.D. 6894, 31 FR 11794, Sept. 8, 1966, as amended by T.D. 7246, 38 FR 758, Jan. 4, 1973; T.D. 8597, 60 FR 36679, July 18, 1995; T.D. 8751, 63 FR 1742, Jan. 12, 1998; T.D. 8766, 63 FR 12642, Mar. 16, 1998]

§ 1.1502–3T Consolidated investment credit (temporary).

(a) and (b) [Reserved]. For further guidance, see § 1.1502–3 (a) and (b).

(c) *Limitation on tax credit carryovers and carrybacks from separate return limitation years*—(1) *General rule.* The aggregate of a member's unused section 38 credits arising in SRLYs that are included in the consolidated section 38 credits for all consolidated return years of the group may not exceed—

(i) The aggregate for all consolidated return years of the member's contributions to the consolidated section 38(c) limitation for each consolidated return year; reduced by—

(ii) The aggregate of the member's section 38 credits arising and absorbed in all consolidated return years (whether or not absorbed by the member).

(2) *Computational rules*—(i) *Member's contribution to the consolidated section 38(c) limitation.* If the consolidated section 38(c) limitation for a consolidated return year is determined by reference to the consolidated tentative minimum tax (see section 38(c)(1)(A)), then a member's contribution to the consolidated section 38(c) limitation for such year equals the member's share of the consolidated net income tax minus the member's share of the consolidated tentative minimum tax. If the consolidated section 38(c) limitation for a consolidated return year is determined by reference to the consolidated net regular tax liability (see section 38(c)(1)(B)), then a member's contribution to the consolidated section 38(c) limitation for such year equals the member's share of the consolidated net income tax minus 25 percent of the quantity which is equal to so much of the member's share of the consolidated net regular tax liability less its portion of the $25,000 amount specified in section 38(c)(1)(B). The group computes the member's shares by applying to the respective consolidated amounts the principles of section 1552 and the percentage method under § 1.1502–33(d)(3), assuming a 100% allocation of any decreased tax liability. The group must make proper adjustments so that taxes and credits not taken into account in computing the limitation under section 38(c) are not taken into account in computing the member's share of the consolidated net income tax, etc. (See, for example, the taxes described in section 26(b) that are disregarded in computing regular tax liability.) Also, the group may apportion all or a part of the $25,000 amount (or lesser amount if reduced by section 38(c)(3)) for any year to one or more members.

(ii) *Years included in computation.* For purposes of computing the limitation under this paragraph (c), the consolidated return years of the group include only those years, including the year to which a credit is carried, that the member has been continuously included in the group's consolidated return, but exclude—

(A) For carryovers, any years ending after the year to which the credit is carried; and

(B) For carrybacks, any years ending after the year in which the credit arose.

(iii) *Subgroups and successors.* The SRLY subgroup principles under § 1.1502–21T(c)(2) apply for purposes of this paragraph (c). The predecessor and successor principles under § 1.1502–21T(f) also apply for purposes of this paragraph (c).

(3) *Effective date.* This paragraph (c) applies to consolidated return years for which the due date of the income tax return (without extensions) is after March 13, 1998. However, a group does not take into account a consolidated taxable year for which the due date of the income tax return (without extensions) is on or before March 13, 1998, in

determining a member's (or subgroup's) contributions to the consolidated section 38(c) limitation under this paragraph (c). See also §1.1502–3(c).

(4) *Optional effective date of January 1, 1997.* In lieu of paragraphs (c)(3) and (d)(2) of this section and §§1.1502–3(c)(3), (d)(2) and (e)(3) (relating to the general business credit), 1.1502–4(f)(3) and (g)(3), 1.1502–4T(f) and (g)(3) (relating to the foreign tax credit), 1.1502–9(a) (the next to last sentence), 1.1502–9T(b)(1)(v) (relating to overall foreign losses), and 1.1502–55T(h)(4)(iii)(C) (relating to the alternative minimum tax credit), a consolidated group may apply such paragraphs as they appear in 1998–10 I.R.B. 23 (see §601.601(d)(2) of this chapter). A consolidated group making this choice generally must apply all such paragraphs for all relevant years. However, a consolidated group making the election provided in §1.1502–9T(b)(1)(vi) (electing not to apply §1.1502–9T(b)(1)(v) to years beginning before January 1, 1998) may nevertheless choose to apply all such paragraphs other than §1.1502–9T(b)(1)(v) for all relevant years.

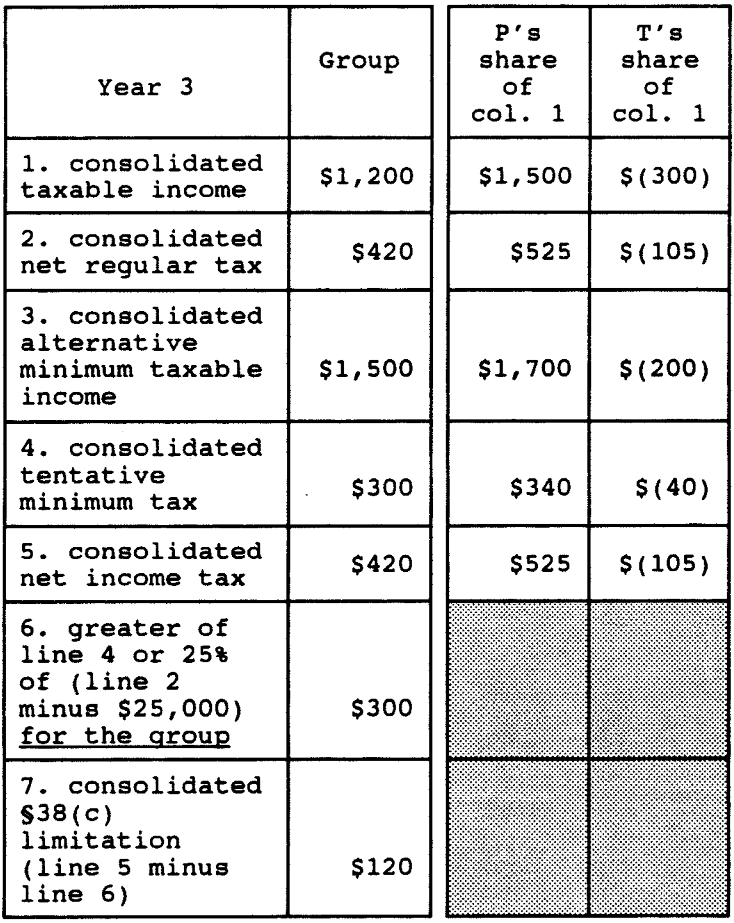
(d) *Example.* (1) The following example illustrates the provisions of paragraph (c) of this section:

Example. (i) P, the common parent of the P group, acquires all the stock of T at the beginning of Year 2. T carries over an unused section 38 general business credit from Year 1 of $100,000. The table below shows the group's net consolidated income tax, consolidated tentative minimum tax, and consolidated net regular tax liabilities, and T's share of such taxes computed under the principles of section 1552 and the percentage method under §1.1502–33(d)(3), assuming a 100% allocation of any decreased tax liability, for Year 2. (The effects of the lower section 11 brackets are ignored, there are no other tax credits affecting a group amount or member's share, and $1,000s are omitted.)

Year 2	Group	P's share of col. 1	T's share of col. 1
1. consolidated taxable income	$2,000	$1,200	$800
2. consolidated net regular tax	$700	$420	$280
3. consolidated alternative minimum taxable income	$4,000	$3,200	$800
4. consolidated tentative minimum tax	$800	$640	$160
5. consolidated net income tax	$800	$520	$280
6. greater of line 4 or 25% of (line 2 minus $25,000) for the group	$800		
7. consolidated §38(c) limitation (line 5 minus line 6)	$0		

(ii) The amount of T's unused section 38 credits from Year 1 that are included in the consolidated section 38 credits for Year 2 may not exceed T's contribution to the consolidated section 38(c) limitation. For Year 2, the group determines the consolidated section 38(c) limitation by reference to consolidated tentative minimum tax for Year 2. Therefore, T's contribution to the consolidated section 38(c) limitation for Year 2 equals its share of consolidated net income tax minus its share of consolidated tentative minimum tax. T's contribution is $280,000 minus $160,000, or $120,000. However, because the group has a consolidated section 38 limitation of zero, it may not include any of T's unused section 38 credits in the consolidated section 38 credits for Year 2.

(iii) The following table shows similar information for the group for Year 3:



Year 3	Group	P's share of col. 1	T's share of col. 1
1. consolidated taxable income	$1,200	$1,500	$(300)
2. consolidated net regular tax	$420	$525	$(105)
3. consolidated alternative minimum taxable income	$1,500	$1,700	$(200)
4. consolidated tentative minimum tax	$300	$340	$(40)
5. consolidated net income tax	$420	$525	$(105)
6. greater of line 4 or 25% of (line 2 minus $25,000) for the group	$300	▨	▨
7. consolidated §38(c) limitation (line 5 minus line 6)	$120	▨	▨

(iv) The amount of T's unused section 38 credits from Year 1 that are included in the consolidated section 38 credits for Year 3 may not exceed T's aggregate contribution to the consolidated section 38(c) limitation for Years 2 and 3. For Year 3, the group determines the consolidated section 38(c) limitation by reference to the consolidated tentative minimum tax for Year 3. Therefore, T's contribution to the consolidated section 38(c) limitation for Year 3 equals its share of consolidated net income tax minus its share of consolidated tentative minimum tax. Applying the principles of section 1552 and §1.1502–33(d) (taking into account, for example, that T's positive earnings and profits adjustment under §1.1502–33(d) reflects its losses actually absorbed by the group), T's contribution is $(105,000) minus $(40,000), or $(65,000). T's aggregate contributions to the consolidated section 38(c) limitation for Years 2 and 3 is $120,000 + $(65,000), or $55,000. The group may include $55,000 of T's Year 1 unused section 38 credits in its consolidated section 38 tax credit in Year 3.

(2) This paragraph (d) applies to consolidated return years for which the due date of the income tax return (without extensions) is after March 13, 1998. See also §1.1502–3(d) for years for which the due date of the income tax return (without extensions) is on or before March 13, 1998.

(e) and (f) [Reserved]. For further guidance, see § 1.1502–3 (e) and (f).

[T.D. 8751, 63 FR 1742, Jan. 12, 1998, as amended by T.D. 8766, 63 FR 12642, Mar. 16, 1998; T.D. 8800, 63 FR 71590, Dec. 29, 1998]

§ 1.1502–4 Consolidated foreign tax credit.

(a) *In general.* The credit under section 901 for taxes paid or accrued to any foreign country or possession of the United States shall be allowed to the group only if the common parent corporation chooses to use such credit in the computation of the tax liability of the group for the consolidated return year. If this choice is made, no deduction may be taken on the consolidated return for such taxes paid or accrued by any member of the group. See section 275(a)(4).

(b) *Limitation effective under section 904(a) for the group*—(1) *Common parent's limitation effective for group.* The determination of whether the overall limitation or the per-country limitation applies for a consolidated return year shall be made by reference to the limitation effective with respect to the common parent corporation for such year. If the limitation effective with respect to a member for its immediately preceding separate return year differs from the limitation effective with respect to the common parent corporation for the consolidated return year, then such member shall, if the overall limitation is effective with respect to the common parent, be deemed to have made an election to use such overall limitation, or, if the per-country limitation is effective with respect to the common parent, be deemed to have revoked its election to use the overall limitation. Consent of the Secretary or his delegate (if otherwise required) is hereby given to such member for such election or revocation. Any such election or revocation shall apply only prospectively beginning with such consolidated return year.

(2) *Limitation effective for subsequent years.* The limitation effective with respect to a member for the last year for which it joins in the filing of a consolidated return with a group shall remain in effect for a subsequent separate return year and may be changed by such corporation for such subsequent year only in accordance with the provisions of section 904(b) (and this paragraph if it joins in the filing of a consolidated return with another group). Any retroactive change in the limitation by the common parent corporation for such member's last consolidated return year shall change the election effective with respect to such member for such last period. Thus, if the common parent (P) elects the overall limitation with respect to calendar year 1966, such election would be effective with respect to its subsidiary S for 1966. If S leaves the group at the beginning of calendar year 1967, such election shall be effective for 1967 with respect to S (unless S revokes such election for 1967 or a subsequent year in accordance with section 904(b), or this paragraph if it joins in the filing of a consolidated return with another group). However, if P retroactively changes back to the per-country limitation with respect to 1966, such limitation would be effective with respect to S for 1966 and subsequent years (unless S elects the overall limitation for any such subsequent year).

(c) *Computation of consolidated foreign tax credit.* The foreign tax credit for the consolidated return year shall be determined on a consolidated basis under the principles of sections 901 through 905 and section 960. For example, if the per-country limitations applies to the consolidated return year, taxes paid or accrued for such year (including those deemed paid or accrued under sections 902 and 960(a) and paragraph (e) of this section) to each foreign country or possession by the members of the group shall be aggregated. If the overall limitation applies, taxes paid or accrued for such year (including those deemed paid or accrued) to all foreign countries and possessions by members of the group shall be aggregated. If the overall limitation applies and a member of the group qualifies as a Western Hemisphere trade corporation, see section 1503(b).

(d) *Computation of limitation on credit.* For purposes of computing the group's applicable limitation under section 904(a), the following rules shall apply:

(1) *Computation of taxable income from foreign sources.* The numerator of the applicable limiting fraction under section 904(a) shall be an amount (not in

excess of the amount determined under subparagraph (2) of this paragraph) equal to the aggregate of the separate taxable incomes of the members from sources within each foreign country or possession of the United States (if the per-country limitation is applicable), or from sources without the United States (if the overall limitation is applicable), determined under §1.1502–12, adjusted for the following items taken into account in the computation of consolidated taxable income:

(i) The portion of the consolidated net operating loss deduction, the consolidated charitable contributions deduction, the consolidated dividends received deduction, and the consolidated section 922 deduction, attributable to such foreign source income;

(ii) Any such foreign source capital gain net income (net capital gain for taxable years beginning before January 1, 1977) (determined without regard to any net capital loss carryover or carryback);

(iii) Any such foreign source net capital loss and section 1231 net loss, reduced by the portion of the consolidated net capital loss attributable to such foreign source loss; and

(iv) The portion of any consolidated net capital loss carryover or carryback attributable to such foreign source income which is absorbed in the taxable year.

(2) *Computation of entire taxable income.* The denominator of the applicable limiting fraction under section 904(a) (that is, the entire taxable income of the group) shall be the consolidated taxable income of the group computed in accordance with §1.1502–11.

(3) *Computation of tax against which credit is taken.* The tax against which the limiting fraction under section 904(a) is applied shall be the consolidated tax liability of the group determined under §1.1502–2, but without regard to paragraphs (b), (c), (d), and (j) thereof, and without regard to any credit against such liability.

(e) *Carryover and carryback of unused foreign tax*—(1) *Allowance of unused foreign tax as consolidated carryover or carryback.* The aggregate of the consolidated unused foreign tax carryovers and carrybacks to the taxable year, to the extent absorbed for such year under the principles of section 904(d), shall be deemed to be paid or accrued to a foreign country or possession for such year. The consolidated unused foreign tax carryovers and carrybacks to the taxable year shall consist of any consolidated unused foreign tax, plus any unused foreign tax of members for separate return years of such members, which may be carried over or back to the taxable year under the principles of section 904 (d) and (e). However, such consolidated carryovers and carrybacks shall not include any consolidated unused foreign taxes apportioned to a corporation for a separate return year pursuant to §1.1502–79(d) and shall be subject to the limitations contained in paragraphs (f) and (g) of this section. A consolidated unused foreign tax is the excess of the foreign taxes paid or accrued by the group (or deemed paid or accrued by the group, other than by reason of section 904(d) over the applicable limitation for the consolidated return year.

(2) *Absorption rules.* For purposes of determining the amount, if any, of an unused foreign tax (consolidated or separate) which can be carried to a taxable year (consolidated or separate), the amount of such unused tax which is absorbed in a prior consolidated return year under section 904(d) shall be determined by:

(i) Applying all unused foreign taxes which can be carried to such prior year in the order of the taxable years in which such unused taxes arose, beginning with the taxable year which ends earliest, and

(ii) Applying all such unused taxes which can be carried to such prior year from taxable years ending on the same date on a pro rata basis.

(f) *Limitation on unused foreign tax carryover or carryback from separate return limitation years*—(1) General rule. In the case of an unused foreign tax of a member of the group arising in a separate return limitation year (as defined in paragraph (f) of §1.1502–1) of such member, the amount which may be included under paragraph (e) of this section (computed without regard to the limitation contained in paragraph (g) of this section) shall not exceed the amount determined under subparagraph (2) of this paragraph.

(2) *Computation of limitation.* The amount referred to in subparagraph (1) of this paragraph with respect to a member of the group is the excess, if any, of:

(i) The section 904(a) limitation of the group, minus such limitation recomputed by excluding the items of income and deduction of such member, over

(ii) The sum of *(a)* the foreign taxes paid (or deemed paid, other than by reason of section 904(d)) by such member for the consolidated return year, and *(b)* the unused foreign tax attributable to such member which may be carried to such consolidated return year arising in taxable years ending prior to the particular separate return limitation year.

(3) *Special effective date ending SRLY limitation.* See § 1.1502–4T(f) for the rule that ends the SRLY limitation with respect to foreign tax credits for consolidated return years for which the due date of the income tax return (without extensions) is after March 13, 1998. See also § 1.1502–3T(c)(4) for an optional effective date rule (generally making the rules of this paragraph (f) inapplicable to a consolidated return year beginning after December 31, 1996, if the due date of the income tax return (without extensions) for such year is on or before March 13, 1998).

(g) *Limitation on unused foreign tax carryover where there has been a consolidated return change of ownership*—(1) *General rule.* If a consolidated return change of ownership (as defined in paragraph (g) of § 1.1502–1) occurs during the taxable year or an earlier taxable year, the amount which may be included under paragraph (e) of this section in the consolidated unused foreign tax carryovers to the taxable year with respect to the aggregate unused credits attributable to the old members of the group (as defined in paragraph (g)(3) of § 1.1502–1) arising in taxable years (consolidated or separate) ending on the same day and before the taxable year in which the consolidated return change of ownership occurred shall not exceed the amount determined under subparagraph (2) of this paragraph.

(2) *Computation of limitation.* The amount referred to in subparagraph (1) of this paragraph shall be the excess of the section 904(a) limitation of the group for the taxable year, recomputed by including only the items of income and deduction of the old members of the group, over the sum of:

(i) The aggregate foreign taxes paid (or deemed paid, other than by reason of section 904(d)) by the old members for the taxable year, and

(ii) The aggregate unused foreign tax attributable to the old members which can be carried to the taxable year arising in taxable years ending prior to the particular unused foreign tax year or years.

(3) *Special effective date for CRCO limitation.* See § 1.1502–4T(g)(3) for the rule that ends the CRCO limitation with respect to a consolidated return change of ownership that occurs on or after the first day of a taxable year for which the due date of the income tax return (without extensions) is after March 13, 1998. See also § 1.1502–3T(c)(4) for an optional effective date rule (generally making the rules of this paragraph (g) inapplicable if the consolidated return change of ownership occurred on or after January 1, 1997, and during a consolidated return year for which the due date of the income tax return (without extensions) is on or before March 13, 1998).

(h) *Amount of credit with respect to interest income.* If any member of the group has interest income described in section 904(f)(2) (for a year for which it filed on a consolidated or separate basis), the group's foreign tax credit with respect to such interest shall be computed separately in accordance with the principles of section 904(f) and this section.

(i) [Reserved]

(j) *Examples.* The provisions of this section may be illustrated by the following examples:

Example (1). Domestic corporation P is incorporated on January 1, 1966. On that same day it also incorporates domestic corporations S and T, wholly owned subsidiaries. P, S, and T file consolidated returns for 1966 and 1967 on the basis of a calendar year. T engages in business solely in country A. S transacts business solely in countries A and B. P does business solely in the United States. During 1966 T sold an item of inventory to P at a profit of $2,000. Under § 1.1502–13 (as contained in the 26 CFR part 1 edition revised as of April 1, 1995) such profit is deferred and none of the circumstances of restoration contained in paragraph (d), (e), or (f) of §1.1502–13 have occurred as of the close of 1966. The taxable income for 1966 from foreign and United States sources, and the foreign taxes paid on such foreign income are as follows:

Corporation	U.S. taxable income	Country A		Country B		Total taxable income
		Taxable income	Foreign tax paid	Taxable income	Foreign tax paid	
P	$40,000	....	....	....	....	$40,000
T	....	$20,000	$12,000	....	....	20,000
S	....	10,000	6,000	$10,000	$3,000	20,000
						$80,000

Such taxable income was computed by taking into account the rules provided in §1.1502–12. Thus, the $2,000 deferred profit is not included in T's taxable income for 1966 (but will be included for the taxable year for which one of the events specified in paragraph (d), (e), or (f) of §1.1502–13 occurs). The consolidated taxable income of the group (computed in accordance with §1.1502–11) is $80,000. The consolidated tax liability against which the credit may be taken (computed in accordance with paragraph (d)(3) of this section) is $31,900.

(i) Assuming P chooses to use the foreign taxes paid as a credit and the group is subject to the per-country limitation, the group may take as a credit against the consolidated tax liability $11,962.50 of the amount paid to country A, plus the $3,000 paid to country B. Such amounts are computed as follows: The aggregate taxes paid to country A of $18,000 is limited to $11,962.50 ($31,900 times $30,000/$80,000). The unused foreign tax with respect to country A is $6,037.50 ($18,000 less $11,962.50), and is a consolidated unused foreign tax which shall be carried to the years prescribed by section 904(d). A credit of $3,000 is available with respect to the taxes paid to country B since such amount is less than the limitation of $3,987.50 ($31,900 times $10,000/$80,000).

(ii) Assuming the overall limitation is in effect for the taxable year, the group may take $15,950 as a credit, computed as follows: The aggregate taxes paid to all foreign countries of $21,000 is limited to $15,950 ($31,900 times $40,000/$80,000). The unused foreign tax is $5,050 ($21,000 less $15,950), and is a consolidated unused foreign tax which shall be carried to the years prescribed by section 904(d).

Example (2). Assume the same facts as in example (1), except that T has a $10,000 long-term capital gain (derived from a sale to a nonmember in country A) and P has a $10,000 long-term capital loss (derived from a sale to a nonmember in the United States). Notwithstanding that the consolidated net capital gain (capital gain net income for taxable years beginning after December 31, 1976) of the group is zero, T's capital gain shall be reflected in full in the computation of taxable income from foreign sources.

Example (3). Assume the same facts as in example (1), except that the group had a consolidated section 172 deduction of $8,000 which is attributable to a net operating loss sustained by T. The $8,000 consolidated net operating loss deduction is offset against T's income from country A, thus reducing T's taxable income from country A to $12,000.

[T.D. 6894, 31 FR 11794, Sept. 8, 1966, as amended by T.D. 7728, 45 FR 72650, Nov. 3, 1980; T.D. 8597, 60 FR 36679, July 18, 1995; T.D. 8766, 63 FR 12642, Mar. 16, 1998]

§1.1502–4T Consolidated foreign tax credit (temporary).

(a) through (e) [Reserved]. For further guidance, see §1.1502–4 (a) through (e).

(f) *Limitation on unused foreign tax carryover or carryback from separate return limitation years.* Section 1.1502–4(f) does not apply for consolidated return years for which the due date of the income tax return (without extensions) is after March 13, 1998. For consolidated return years for which the due date of the income tax return (without extensions) is after March 13, 1998, a group shall include an unused foreign tax of a member arising in a SRLY without regard to the contribution of the member to consolidated tax liability for the consolidated return year. See also §1.1502–3T(c)(4) for an optional effective date rule (generally making the rules of this paragraph (f) applicable to a consolidated return year beginning after December 31, 1996, if the due date of the income tax return (without extensions) for such year is on or before March 13, 1998).

(g) (1) and (2) [Reserved]. For further guidance, see §1.1502–4(g) (1) and (2).

(g)(3) *Special effective date for CRCO limitation.* Section 1.1502–4(g) applies only to a consolidated return change of ownership that occurred during a consolidated return year for which the due date of the income tax return (without extensions) is on or before March 13, 1998. See also § 1.1502–3T(c)(4) for an optional effective date rule (generally making the rules of this paragraph (g)(3) applicable if the consolidated return change of ownership occurred on or after January 1, 1997, and during a consolidated return year for which the due date of the income tax return (without extensions) is on or before March 13, 1998).

[T.D. 8751, 63 FR 1744, Jan. 12, 1998, as amended by T.D. 8766, 63 FR 12643, Mar. 16, 1998]

§ 1.1502–5 Estimated tax.

(a) *General rule*—(1) *Consolidated estimated tax.* If a group files a consolidated return for two consecutive taxable years, it must make payments of estimated tax on a consolidated basis for each subsequent taxable year, until such time as separate returns are properly filed. Until such time, the group is treated as a single corporation for purposes of section 6154 (relating to payment of estimated tax by corporations). If separate returns are filed by the members for a taxable year, the amount of any estimated tax payments made with respect to a consolidated payment of estimated tax for such year shall be credited against the separate tax liabilities of the members in any manner designated by the common parent which is satisfactory to the Commissioner. The consolidated payments of estimated tax shall be deposited with the authorized commercial dispositary or Federal Reserve Bank with which the common parent deposits its estimated tax payments. A statement should be attached to the payment setting forth the name, address, employer identification number, and internal revenue service center of each member.

(2) *First two consolidated return years.* For the first 2 years for which a group files a consolidated return, it may make payments of estimated tax on either a consolidated or separate basis. If a consolidated return is filed for such year, the amount of any estimated tax payments made for such year by any member shall be credited against the tax liability of the group.

(3) *Effective date.* This section applies to taxable years for which the due date (without extensions) for filing returns is after August 6, 1979. For prior taxable years see 26 CFR 1.1502–5 (Revised as of April 1, 1978).

(b) *Addition to tax for failure to pay estimated tax under section 6655*—(1) *Consolidated return filed.* For the first two taxable years for which a group files a consolidated return, the group may compute the amount of the penalty (if any) under section 6655 on a consolidated basis or separate member basis, regardless of the method of payment. Thereafter, for a taxable year for which the group files a consolidated return, the group must compute the penalty on a consolidated basis.

(2) *Computation of penalty on consolidated basis.* (i) This paragraph (b)(2) gives the rules for computing the penalty under section 6655 on a consolidated basis.

(ii) The tax and facts shown on the return for the preceding taxable year referred to in section 6655(d) (1) and (2) are, if a consolidated return was filed for that preceding year, such items shown on the consolidated return for that preceding year or, if one was not filed for that preceding year, the aggregate taxes and the facts shown on the separate returns of the common parent and any other corporation that was a member of the same affiliated group as the common parent for that preceding year.

(iii) If estimated tax was not paid on a consolidated basis, then the amount of the group's payments of estimated tax for the taxable year is the aggregate of the payments made by all members for the year.

(iv) Section 6655(d)(1) applies only if the common parent's consolidated return, or each member's separate return, for the preceding taxable year (as the case may be) was a taxable year of 12 months.

(3) *Computation of penalty on separate member basis.* To compute any penalty under section 6655 on a separate member basis, for purposes of section 6655(b)(1), the ''tax shown on the return for the taxable year'' is the portion of

the tax shown on the consolidated return allocable to the member under paragraph (b)(5) of this section. If the member was included in the consolidated return filed by the group for the preceding taxable year then:

(i) For purposes of section 6655(d)(1), the ''tax shown on the return'' for any member shall be the portion of the tax shown on the consolidated return for the preceding year allocable to the member under paragraph (b)(5) of this section.

(ii) For purposes of section 6655(d)(2), the ''facts shown on the return'' shall be the facts shown on the consolidated return for the preceding year and the tax computed under that section shall be allocated under the rules of paragraph (b)(5) of this section.

(4) *Consolidated payments if separate returns filed.* If the group does not file a consolidated return for the taxable year, but makes payments of estimated tax on a consolidated basis, for purposes of section 6655(b)(2), the ''amount, if any of the installment paid'' by any member is an amount apportioned to the member in a manner designated by the common parent that is satisfactory to the Commissioner. If the member was included in the consolidated return filed by the group for the preceding taxable year, the amount of a member's penalty under section 6655 is computed on the separate member basis described in paragraph (b)(3) (i) and (ii) of this section.

(5) *Rules for allocation of consolidated tax liability.* For purposes of subparagraphs (1) and (2) of this paragraph, the tax shown on a consolidated return shall be allocated to the members of the group under the method which the group has elected pursuant to section 1552 and 1.1502–33(d)(2).

(c) *Examples.* The provisions of this section may be illustrated by the following examples:

Example (1). Corporations P and S–1 file a consolidated return for the first time for calendar year 1978. P and S–1 also file consolidated returns for 1979 and 1980. For 1978 and 1979, P and S–1 may make payments of estimated tax on either a separate or consolidated basis. For 1980, however, the group must pay its estimated tax on a consolidated basis. In determining whether P and S–1 come within the exception provided in section 6655(d)(1) for 1980, the ''tax shown on the return'' is the tax shown on the consolidated return for 1979.

Example (2). Assume the same facts as in example (1). Assume further that corporation S–2 was a member of the group during 1979, and joins in the filing of the consolidated return for such year but ceases to be a member of the group on September 15, 1980. In determining whether the group (which no longer includes S–2) comes within the exception provided in section 6655(d)(1) for 1980, the ''tax shown on the return'' is the tax shown on the consolidated return for 1979.

Example (3). Assume the same facts as in example (1). Assume further that corporation S–2 becomes a member of the group on July 1, 1980, and joins in the filing of the consolidated return for 1968. In determining whether the group (which now includes S–2) comes within the exception provided in section 6655(d)(1) for 1980, the ''tax shown on the return'' is the tax shown on the consolidated return for 1979. Any tax of S–2 for any separate return year is not included as a part of the ''tax shown on the return'' for purposes of applying section 6655(d)(1).

Example (4). Corporations X and Y filed consolidated returns for the calendar years 1977 and 1978 and separate returns for 1979. In determining whether X and Y comes within the exception provided in section 6655(d)(1) for 1979, the ''tax shown on the return'' is the amount of tax shown on the consolidated return for 1978 allocable to X and Y in accordance with paragraph (b)(5) of this section.

(d) *Cross reference.* For provisions relating to quick refunds of corporate estimated tax payments, see §1.1502–78, and §§1.6425–1 through 1.6425–3.

[T.D. 6894, 31 FR 11794, Sept. 8, 1966, as amended by T.D. 7059, 35 FR 14549, Sept. 17, 1970; T.D. 7637, 44 FR 46840, Aug. 9, 1979; 62 FR 23657, May 1, 1997]

§1.1502–6 Liability for tax.

(a) *Several liability of members of group.* Except as provided in paragraph (b) of this section, the common parent corporation and each subsidiary which was a member of the group during any part of the consolidated return year shall be severally liable for the tax for such year computed in accordance with the regulations under section 1502 prescribed on or before the due date (not including extensions of time) for the filing of the consolidated return for such year.

(b) *Liability of subsidiary after withdrawal.* If a subsidiary has ceased to be a member of the group and in such cessation resulted from a bona fide sale or exchange of its stock for fair value and occurred prior to the date upon which any deficiency is assessed, the district director may, if he believes that the assessment or collection of the balance of the deficiency will not be jeopardized, make assessment and collection of such deficiency from such former subsidiary in an amount not exceeding the portion of such deficiency which the district director may determine to be allocable to it. If the district director makes assessment and collection of any part of a deficiency from such former subsidiary, then for purposes of any credit or refund of the amount collected from such former subsidiary the agency of the common parent under the provisions of § 1.1502–77 shall not apply.

(c) *Effect of intercompany agreements.* No agreement entered into by one or more members of the group with any other member of such group or with any other person shall in any case have the effect of reducing the liability prescribed under this section.

[T.D. 6894, 31 FR 11794, Sept. 8, 1966]

§ 1.1502–9 Application of overall foreign loss recapture rules to corporations filing consolidated returns.

(a) *In general.* An affiliated group of corporations filing a consolidated return sustains an overall foreign loss (a consolidated overall foreign loss) in any taxable year in which its gross income from sources without the United States subject to a separate limitation (as defined in § 1.904(f)–1(c)(2)) is exceeded by the sum of the deductions properly allocated and apportioned thereto. However, for taxable years prior to 1983, affiliated groups may have determined their overall foreign losses for income subject to the passive interest limitation, DISC dividend limitation, and general limitation on a combined basis in accordance with the rules in § 1.904(f)–1(c)(1). The rules contained in §§ 1.904(f)–1 through 1.904(f)–6 are applicable to affiliated groups filing consolidated returns. This section provides special rules for applying those sections to such groups. Paragraph (b) provides rules for additions and subtractions of a portion of overall foreign losses to and from consolidated overall foreign loss accounts. Paragraph (c) requires that separate notional overall foreign loss accounts be kept for each member of the group that contributes to a consolidated overall foreign loss account and provides for allocation of a portion of the group's overall foreign loss account to a member when the member leaves the group prior to recapture of the entire amount of the loss account. These rules are similar to the rules provided in § 1.1502–21T(b)(2) (or § 1.1502-79A, as appropriate) concerning the apportionment of consolidated net operating losses to a member who leaves the group. However, the rules differ somewhat because the absorption rule of § 1.1502–21T(b)(1) (or § 1.1502-79A, as appropriate) is applied year-by-year, consistently with the sequence rules of section 172(b), and recapture of overall foreign losses is based on overall foreign loss accounts that may consist of losses in more than one year. Paragraph (d) provides rules for recapture of amounts in consolidated overall foreign loss accounts. Paragraph (e) provides special rules pertaining to section 904(f)(3) dispositions between members of a group. Paragraphs (b), (c), and (e) also contain special rules that apply to overall foreign losses that arise in separate return limitation years; the principles therein also apply to overall foreign losses when there has been a consolidated return change of ownership (as defined in § 1.1502–1(g)). See § 1.1502–9T(b)(1)(v) for the rule that ends the separate return limitation year limitation for consolidated return years for which the due date of the income tax return (without extensions) is after March 13, 1998, and § 1.1502–9T(b)(1)(vi) for an election to continue the separate return limitation year limitation for consolidated return years beginning before January 1, 1998. See also § 1.1502–3T(c)(4) for an optional effective date rule (generally making the rules of paragraphs (b)(1)(iii) and (iv) of this section inapplicable for a consolidated return year beginning after December 31, 1996, if the due date of the income tax return (without extensions) for such year is on or before March 13, 1998).

(b) *Consolidated overall foreign loss accounts.* Any group that sustains an overall foreign loss (or acquires a member with a balance in an overall foreign loss account) must establish a consolidated overall foreign loss account for such loss, and amounts shall be added to and subtracted from such account as provided in §§1.904(f)–1 through 1.904(f)–6 and this section.

(1) *Additions to the consolidated overall foreign loss accounts*—(i) *Consolidated overall foreign losses.* Any consolidated overall foreign loss shall be added to the applicable consolidated overall foreign loss account for such separate limitation, to the extent that the overall foreign loss has reduced United States source income, in accordance with the rules of §§1.904(f)–1 and 1.904(f)–3.

(ii) *Overall foreign losses from separate return years.* If a corporation joins in the filing of a consolidated return in a taxable year in which such corporation has a balance in an overall foreign loss account from a prior separate return year that is not a separate return limitation year, such balance shall be added to the applicable consolidated overall foreign loss account in such year and treated as a consolidated overall foreign loss incurred in the previous year (and shall therefore be subject to recapture, in accordance with paragraph (d) of this section, beginning in the same year in which it is added to the consolidated overall foreign loss account).

(iii) *Overall foreign losses from separate return limitation years.* If a corporation joins in the filing of a consolidated return in a taxable year in which such corporation has a balance in an overall foreign loss account from a prior separate return limitation year, such balance shall be added to the applicable consolidated overall foreign loss account in such consolidated return year to the extent of the lesser of the balance in the overall foreign loss account from the separate return limitation year or 50 percent (or such larger percentage as the taxpayer may elect) of the difference between the consolidated foreign source taxable income subject to the same separate limitation (computed in accordance with §§1.904(f)–2(b) and 1.1502–4(d)(1)) minus such consolidated foreign source taxable income recomputed by excluding the items of income and deduction of such corporation (but not less than zero). The amount added to a consolidated overall foreign loss account in any taxable year under this paragraph (b)(1)(iii) shall be treated as a consolidated overall foreign loss in the previous year (and shall therefore be subject to recapture, in accordance with paragraph (d) of this section, beginning in the same year in which it is added to the consolidated overall foreign loss account).

(iv) *Overall foreign losses that are part of a net operating loss or net capital loss carried over from a separate return limitation year.* Overall foreign losses that are part of a net operating loss or net capital loss carryover from a separate return limitation year of a member that is absorbed in a consolidated return year shall be treated as though they were added to an overall foreign loss account in a separate return limitation year of such member and will be subject to the limitation on recapture of SRLY losses contained in paragraph (b)(1)(iii) of this section. See paragraph (c)(2) of this section for rules regarding the addition of such losses to the applicable overall foreign loss account of such member.

(2) *Reductions of the consolidated overall foreign loss accounts*—(i) *Amounts allocated to members leaving the group.* When a member leaves the group, each applicable consolidated overall foreign loss account shall be reduced by the amount allocated from such account to such member in accordance with paragraph (c)(3)(i) of this section.

(ii) *Amounts recaptured.* A consolidated overall foreign loss account shall be reduced by the amount of any overall foreign loss under the same separate limitation that is recaptured from consolidated income in accordance with §1.904(f)–2.

(c) *Allocation of overall foreign losses among members of an affiliated group*—(1) *Notional overall foreign loss accounts.* Separate notional overall foreign loss accounts shall be established for each member of a group that contributes to a consolidated overall foreign loss account. Additions to and reductions of such notional accounts shall be made when additions or reductions are made to consolidated overall foreign loss accounts in accordance with paragraph (b) of this section and § 1.904(f)–1.

(i) *Additions to notional accounts*—(A) *Consolidated overall foreign losses.* When a consolidated overall foreign loss is added to a consolidated overall foreign loss account, each member shall add its pro rata share of the amount of such loss to the member's notional overall foreign loss account. A member's pro rata share of a consolidated overall foreign loss for any taxable year is determined by multiplying the consolidated loss by a fraction.The numerator of this fraction is the amount by which the member's separate gross income for the taxable year from sources without the United States subject to the applicable separate limitation is exceeded by the sum of the deductions properly allocated and apportioned thereto (including such member's share of any consolidated net operating loss deduction and consolidated net capital loss carryovers and carrybacks to the taxable year), for each member with such deductions in excess of such income. The denominator of this fraction is the sum of the numerators of this fraction for all such members of the group.

(B) *Overall foreign losses from separate return years and separate return limitation years.* When an amount from a member's overall foreign loss account from a separate return year or separate return limitation year is added to a consolidated overall foreign loss account in accordance with paragraph (b)(1) (ii) or (iii) of this section, such amount shall also be added to that member's notional overall foreign loss account for such separate limitation.

(ii) *Reductions of notional accounts.* When a consolidated overall foreign loss account is reduced by recapture, in accordance with paragraph (b)(2)(ii) of this section, each member of the group shall reduce its notional overall foreign loss account for that separate limitation by its pro rata share of the amount by which the consolidated overall foreign loss account is reduced. A member's pro rata share of the amount by which a consolidated overall foreign loss account is reduced and determined by multiplying the amount recaptured by a fraction, the numerator of which is the amount in such member's notional account under such separate limitation, and the denominator of which is the amount in the consolidated overall foreign loss account under such separate limitation before reduction for the amount recaptured for that taxable year.

(2) *Overall foreign losses that are part of a net operating loss or net capital loss from a separate return limitation year.* An overall foreign loss that is part of a net operating loss or net capital loss carryover from a separate return limitation year of a member that is absorbed in a consolidated return year shall be treated as an overall foreign loss of such member (rather than the group) and shall be added to such member's separate overall foreign loss account to the extent it reduces United States source income, in accordance with § 1.904(f)–1(d)(5). Such overall foreign losses shall be added to the appropriate consolidated overall foreign loss account in later years in accordance with paragraph (b)(1)(iii) of this section.

(3) *Allocation of a portion of overall foreign loss accounts to a member leaving the group*—(i) *Consolidated overall foreign losses.* When a corporation ceases to be a member of an affiliated group filing consolidated returns, a portion of the balance in each applicable consolidated overall foreign loss account shall be allocated to such corporation. The amount allocated to such corporation shall be equal to the amount, if any, in such member's notional overall foreign loss account under the same separate limitation.

(ii) *Overall foreign losses from separate return limitation years.* When a corporation ceases to be a member of an affiliated group filing consolidated returns, it shall take with it the remaining portion of each separate overall foreign loss account for overall foreign losses from separate return limitation years (including amounts added to such accounts under paragraph (c)(2) of this section).

(d) *Recapture of consolidated overall foreign losses.* The amount in any consolidated overall foreign loss account shall be recaptured under §§ 1.904(f)–1 through 1.904(f)–6 by recharacterizing consolidated foreign source taxable income subject to the separate limitation under which the loss arose as

United States source taxable income. For purposes of recapture, consolidated foreign source taxable income subject to the separate limitation under which the loss arose shall be determined in accordance with §§1.904(f)–2 and 1.1502–4. Amounts in a member's excess loss account that are included in income under §1.1502–19 shall be subject to recapture to the extent that they are included in consolidated foreign source taxable income subject to the separate limitation under which the loss arose.

(e) *Dispositions of property between members of the same affiliated group during a consolidated return year*—(1) *In general*. Except as provided in paragraph (2) with respect to overall foreign losses of a selling member from a separate return limitation year, the rules of §1.1502–13 with respect to intercompany transactions will apply to dispositions of property to which section 904(f)(3)(A) applies.

(2) *Recapture of overall foreign loss from a separate return limitation year*. Paragraph (1) will not apply and gain will be recognized to the extent that the selling member has a balance in its overall foreign loss account from a separate return limitation year unless the selling member adds the entire amount of its overall foreign loss account from separate return limitation years to the applicable consolidated overall foreign loss account and treats such amount as an overall foreign loss incurred in the previous year. Such loss shall be subject to recapture, in accordance with paragraph (d) of §1.1502–9, beginning in the same year in which it is added to the consolidated overall foreign loss account.

(f) *Illustrations*. The provisions of this section are illustrated by the following examples. All foreign source income or loss in these examples is subject to the general limitation.

Example (1). A, B, and C are the members of an affiliated group of corporations (as defined in section 1504), and all use the calendar year as their taxable year. For 1983, A, B, and C file a consolidated return. ABC has United States source income of $1,000 and foreign source losses (overall foreign loss) of $400. In accordance with paragraph (b)(1)(i) of this section, ABC adds $400 to its consolidated overall foreign loss account at the end of 1983. For 1983, the separate foreign source taxable income (or loss) of A is $400, of B is ($200), and of C is ($600). Under paragraph (c)(1) of this section, B and C must establish separate notional overall foreign loss accounts. Under paragraph (c)(1)(i)(A) of this section, the amount added to each notional account is the pro rata share of the consolidated overall foreign loss of each member contributing to such loss. The pro rata share is determined by multiplying the consolidated loss by the member's proportionate share of the total foreign source losses of all members having such losses. B's foreign source loss if $200 and C's foreign source loss is $600, totaling $800. B must add $400x200/800, or $100, to its notional overall foreign loss account. C must add $400x600/800, or $300, to its notional overall foreign loss account.

Example (2). The facts are the same as in example (1). In 1984, ABC has consolidated foreign source taxable income of $200. Under paragraph (d) of this section and §1.904(f)–2, ABC is required to recapture $100 of the amount in its consolidated overall foreign loss account, which reduces that account by $100 under paragraph (b)(2)(ii) of this section. In accordance with paragraph (c)(1)(ii) of this section, B reduces its notional account by $100x100/400, or $25, and C reduces it notional account by $100x300/400, or $75. At the end of 1984 ABC has $300 in its consolidated overall foreign loss account, B has $75 in its notional account, and C has $225 in its notional account.

Example (3). D and E are members of an affiliated group and file separate returns using the calendar year as their taxable year for 1980. In 1980, D has an overall foreign loss of $200, which it adds to its overall foreign loss account, and E has no overall foreign losses. For 1981, D and E file a consolidated return, and DE must establish a consolidated overall foreign loss account, to which D's overall foreign loss from 1980 is added under paragraph (b)(1)(ii) of this section. D also adds the same amount $200 to its notional account under paragraph (c)(1)(i)(B) of this section. In 1981, DE has consolidated foreign source taxable income of $300. Since the amount added to the consolidated overall foreign loss account in 1981 is treated as a consolidated overall foreign loss from 1980, DE must recapture $150 in 1981 under paragraph (d) of this section and §1.904(f)–2. DE's consolidated overall foreign loss account is reduced by $150 under paragraph (b)(2)(ii) of this section, and D's notional account is reduced by $150 under paragraph (c)(1)(ii) of this section, leaving balances of $50 in each of those accounts at the end of 1981.

Example (4). F and G are not members of an affiliated group in 1980, and G has an overall foreign loss of $200, which it adds to its overall foreign loss account. F has no overall foreign loss. On January 1, 1981, F acquires G, and FG files a consolidated return for the calendar year 1981. In 1981, F has no foreign source taxable income or loss, and G has $100 of foreign source taxable income. FG's consolidated foreign source taxable income, $100, minus such income without G's items of income and deduction, $0, is $100. Therefore 50% of that amount, $50, of G's overall foreign loss from its 1980 separate return limitation year is added to FG's consolidated overall foreign loss account under paragraph (b)(1)(iii) of this section, and the same amount is added to G's notional account under paragraph (c)(1)(i)(B) of this section. In accordance with paragraph (d) of this section and § 1.904(f)–2, FG must recapture the $50 balance in its consolidated overall foreign loss account in 1981 because the amount added from G's separate return limitation year is treated as a 1980 consolidated overall foreign loss. At the end of 1981, FG has a balance of $0 in its consolidated overall foreign loss account, G has $0 in its notional account, and G also has $150 remaining from its 1980 overall foreign loss that has not yet been added to the consolidated overall foreign loss account.

On January 1, 1982, F sells G and G leaves the affiliated group. Under paragraph (c)(3)(i) of this section, G takes with it the balance in its overall foreign loss account from 1980 (its prior separate return limitation year) that has not been added to the consolidated account. G has $150 of overall foreign loss in its overall foreign loss account. Because the amount in the consolidated overall foreign loss account is zero, no amount from that account is allocated to G.

Example (5). (i) In 1982 corporation H has United States source income of $300 and foreign source losses of $500, resulting in a net operating loss of $200 and a balance in H's overall foreign loss account at the end of 1982 of $300.

(ii) On January 1, 1983, H is acquired by J, and for the calendar year 1983 JH files a consolidated return. JH has consolidated taxable income of $700 in 1983, including a consolidated net operating loss deduction of $100. This net operating loss deduction is $100 of H's $200 net operating loss from 1982 (a separate return limitation year), which is limited by § 1.1502–21A(c). For 1983, H has separate taxable income of $100, comprised of $100 of United States source taxable income and zero foreign source taxable income, and J has separate taxable income of $700, comprised of $700 of United States source taxable income and zero foreign source taxable income. Under paragraph (c)(2) of this section, H adds $100 to its separate overall foreign loss account, since that amount of its net operating loss has reduced United States source income. H has $400 in its separate overall foreign loss account at the end of 1983, none of which has been added to a consolidated overall foreign loss account.

(iii) In 1984, H has separate taxable income of $400, comprised of $100 of United States source taxable income and $300 of foreign source taxable income. J has separate taxable income of $900, comprised of $700 of United States source taxable income and $200 of foreign source taxable income. JH has consolidated taxable income of $1200, which includes $100 of consolidated net operating loss deduction from H's 1982 net operating loss. Since this net operating loss deduction is allocated to foreign source income, it does not reduce United States source income and will not be added to an overall foreign loss account. Under paragraph (b)(1)(iii) of this section, $100, from H's overall foreign loss is added to the consolidated overall foreign loss account computed as follows:

Consolidated foreign source taxable income	$400
Consolidated foreign source taxable income recomputed by excluding H's foreign source income and deduction	−200
$200.	
× 50%	$100
Amount from H's separate return limitation year overall foreign loss account added to the consolidated overall foreign loss account	$100

This amount is subject to recapture beginning in the same taxable year, as it is treated as a consolidated overall foreign loss incurred in a previous year. Therefore, under paragraph (d) of this section and § 1.904(f)–2 JH also recaptures this $100, reducing the consolidated overall foreign loss account to $0. H has $300 remaining in its separate overall foreign loss account at the end of 1984.

(iv) In 1985, H has separate taxable income of $400, comprised of $100 of United States source taxable income and $300 of foreign source taxable income. J has separate taxable income of $300 comprised of $600 of United States source taxable income and $300 of foreign source losses. JH has consolidated taxable income of $700, all of which is United States source. Under paragraph (b)(1)(iii) of this section an additional $150 from H's separate overall foreign loss is added to the consolidated overall foreign loss account, computed as follows:

Consolidated foreign source taxable income	$0
Consolidated foreign source taxable income recomputed by excluding H's foreign source income and deductions	−(300)
300.	
× 50%	$150
Amount from H's separate return limitation year overall foreign loss account added to the consolidated overall foreign loss account	$150

Thus, an additional $150 of H's separate overall foreign loss is added to the consolidated overall foreign loss account, and, under paragraph (c)(1)(i)(B) of this section, the same amount is added to J's notional account. While this amount is subject to recapture beginning in the same taxable year, JH has no consolidated foreign source taxable income in 1985, so no overall foreign loss is recaptured. H has a remaining balance of $150 in its separate return limitation year overall foreign loss account and HJ has $150 in its consolidated overall foreign loss account.

Example (6). A, B, and C are members of an affiliated group of corporations (as defined in section 1504), and all use the calendar year as their taxable year. For 1986, A, B, and C file a consolidated return. A has an overall foreign loss account which arose in a separate return limitation year. The amount in the overall foreign loss account is $2,000. A makes a disposition of all its assets to B on January 1, 1986. The gain on the transfer is $1,500, all of which would be recognized under section 904(f)(3). However, if A adds the total amount of its overall foreign loss from separate return limitation years to ABC's consolidated overall foreign loss account, no gain will be recognized on the transfer until the intercompany gain is taken into account under §1.1502–13. In the interim, any foreign source gain of the purchasing member (or any other member of the consolidated group) may be used to recapture on a consolidated basis the amount in ABC's consolidated overall foreign loss account.

[T.D. 8153, 52 FR 32005, Aug. 25, 1987; 52 FR 43434, Nov. 12, 1987, as amended by T.D. 8597, 60 FR 36679, July 18, 1995; T.D. 8677, 61 FR 33323, June 27, 1996; T.D. 8766, 63 FR 12643, Mar. 16, 1998; T.D. 8800, 63 FR 71590, Dec. 29, 1998]

§1.1502–9T Application of overall foreign loss recapture rules to corporations filing consolidated returns (temporary).

(a) and (b) introductory text through (b)(1)(iv) [Reserved]. For further guidance, see §1.1502–9 (a) and (b) introductory text through (b)(1)(iv).

(b)(1)(v) *Special effective date for SRLY limitation.* Except as provided in paragraph (b)(1)(vi) of this section, §1.1502–9(b)(1)(iii) and (iv) apply only to consolidated return years for which the due date of the income tax return (without extensions) is on or before March 13, 1998. For consolidated return years for which the due date of the income tax return (without extensions) is after March 13, 1998, the rules of §1.1502–9(b)(1)(ii) shall apply to overall foreign losses from separate return years that are separate return limitation years. For purposes of applying §1.1502–9(b)(1)(ii) in such years, the group treats a member with a balance in an overall foreign loss account from a separate return limitation year on the first day of the first consolidated return year for which the due date of the income tax return (without extensions) is after March 13, 1998, as a corporation joining the group on such first day. An overall foreign loss that is part of a net operating loss or net capital loss carryover from a separate return limitation year of a member that is absorbed in a consolidated return year for which the due date of the income tax return (without extensions) is after March 13, 1998, shall be added to the appropriate consolidated overall foreign loss account in the year that it is absorbed. For consolidated return years for which the due date of the income tax return (without extensions) is after March 13, 1998, similar principles apply to overall foreign losses when there has been a consolidated return change of ownership (regardless of when the change of ownership occurred). See also §1.1502–3T(c)(4) for an optional effective date rule (generally making this paragraph (b)(1)(v) applicable to a consolidated return year beginning after December 31, 1996, if the due date of the income tax return (without extensions) for such year is on or before March 13, 1998).

(vi) *Election to defer application of special effective date.* A consolidated group may elect not to apply paragraph (b)(1)(v) of this section to consolidated return years beginning before January 1, 1998. To make this election, a consolidated group must write ‘‘Election Pursuant to Notice 98–40’’ across the top of page 1 of an original or amended tax return for each consolidated return year subject to the election. For the first consolidated return year to which the overall foreign loss provisions of paragraph (b)(1)(v) of this section apply (i.e., the first year beginning on or after January 1, 1998), such consolidated group must write ‘‘Notice 98–40 Election in Effect in Prior Years’’ across the top of page 1 of the consolidated tax return for that year. For purposes of applying §1.1502–9(b)(1)(ii) with respect to such year, any member with a balance in an overall foreign loss account from a separate return limitation year on the first day of such year shall be treated as joining the group on such first day.

(b)(2) through (f) [Reserved]. For further guidance, see § 1.1502–9(b)(2) through (f).

[T.D. 8751, 63 FR 1745, Jan. 12, 1998, as amended by T.D. 8766, 63 FR 12643, Mar. 16, 1998; T.D. 8800, 63 FR 71590, Dec. 29, 1998]

COMPUTATION OF CONSOLIDATED TAXABLE INCOME

§ 1.1502–11 Consolidated taxable income.

(a) *In general.* The consolidated taxable income for a consolidated return year shall be determined by taking into account:

(1) The separate taxable income of each member of the group (see § 1.1502–12 for the computation of separate taxable income);

(2) Any consolidated net operating loss deduction (see §§ 1.1502–21T (or 1.1502-21A, as appropriate) for the computation of the consolidated net operating loss deduction);

(3) Any consolidated capital gain net income (net capital gain for taxable years beginning before January 1, 1977) (see §§ 1.1502–22T (or 1.1502-22A, as appropriate) for the computation of the consolidated capital gain net income (net capital gain for taxable years beginning before January 1, 1977));

(4) Any consolidated section 1231 net loss (see §§ 1.1502–23T (or 1.1502-23A, as appropriate) for the computation of the consolidated section 1231 net loss);

(5) Any consolidated charitable contributions deduction (see § 1.1502–24 for the computation of the consolidated charitable contributions deduction);

(6) Any consolidated section 922 deduction (see § 1.1502–25 for the computation of the consolidated section 922 deduction);

(7) Any consolidated dividends received deduction (see § 1.1502–26 for the computation of the consolidated dividends received deduction); and

(8) Any consolidated section 247 deduction (see § 1.1502–27 for the computation of the consolidated section 247 deduction).

(b) *Elimination of circular stock basis adjustments*—(1) *In general.* If one member (P) disposes of the stock of another member (S), this paragraph (b) limits the use of S's deductions and losses in the year of disposition and the carryback of items to prior years. The purpose of the limitation is to prevent P's income or gain from the disposition of S's stock from increasing the absorption of S's deductions and losses, because the increased absorption would reduce P's basis (or increase its excess loss account) in S's stock under § 1.1502–32 and, in turn, increase P's income or gain. See paragraph (b)(3) of this section for the application of these principles to P's deduction or loss from the disposition of S's stock, and paragraph (b)(4) of this section for the application of these principles to multiple stock dispositions. See § 1.1502–19(c) for the definition of disposition.

(2) *Limitation on deductions and losses*—(i) *Determination of amount of limitation.* If P disposes of one or more shares of S's stock, the extent to which S's deductions and losses for the tax year of the disposition (and its deductions and losses carried over from prior years) may offset income and gain is subject to limitation. The amount of S's deductions and losses that may offset income and gain is determined by tentatively computing taxable income (or loss) for the year of disposition (and any prior years to which the deductions or losses may be carried) without taking into account P's income and gain from the disposition.

(ii) *Application of limitation.* S's deductions and losses offset income and gain only to the extent of the amount determined under paragraph (b)(2)(i) of this section. To the extent S's deductions and losses in the year of disposition cannot offset income or gain because of the limitation under this paragraph (b), the items are carried to other years under the applicable provisions of the Internal Revenue Code and regulations as if they were the only items incurred by S in the year of disposition. For example, to the extent S incurs an operating loss in the year of disposition that is limited, the loss is treated as a separate net operating loss attributable to S arising in that year.

The tentative computation does not affect the manner in which S's unlimited deductions and losses are absorbed or the manner in which deductions and losses of other members are absorbed. (If the amount of S's unlimited deductions and losses actually absorbed is less than the amount absorbed in the tentative computation, P's stock basis adjustments under §1.1502–32 reflect only the amounts actually absorbed.)

(iii) *Examples.* For purposes of the examples in this paragraph (b), unless otherwise stated, P owns all of the only class of S's stock for the entire year, S owns no stock of lower-tier members, the tax year of all persons is the calendar year, all persons use the accrual method of accounting, the facts set forth the only corporate activity, all transactions are between unrelated persons, and tax liabilities are disregarded. The principles of this paragraph (b)(2) are illustrated by the following examples.

Example 1. Limitation on losses with respect to stock gain. (a) P has a $500 basis in S's stock. For Year 1, P has ordinary income of $30 (determined without taking P's gain or loss from the disposition of S's stock into account) and S has an $80 ordinary loss. P sells S's stock for $520 at the close of Year 1.

(b) To determine the amount of the limitation on S's loss under paragraph (b)(2)(i) of this section, and the effect under §1.1502–32(b) of the absorption of S's loss on P's basis in S's stock, P's gain or loss from the disposition of S's stock is not taken into account. The group is tentatively treated as having a consolidated net operating loss of $50 (P's $30 of income minus S's $80 loss). Thus, $50 of S's loss is limited under this paragraph (b).

(c) Because $30 of S's loss is absorbed in the determination of consolidated taxable income under paragraph (b)(2)(ii) of this section, P's basis in S's stock is reduced under §1.1502–32(b) from $500 to $470 immediately before the disposition. Consequently, P recognizes a $50 gain from the sale of S's stock and the group has consolidated taxable income of $50 for Year 1 (P's $30 of ordinary income and $50 gain from the sale of S's stock, less the $30 of S's loss). In addition, S's limited loss of $50 is treated as a separate net operating loss attributable to S and, because S ceases to be a member, the loss is apportioned to S under §1.1502–21T (or §1.1502-79A, as appropriate) and carried to its first separate return year.

Example 2. Carrybacks and carryovers. (a) For Year 1, the P group has consolidated taxable income of $30, and a consolidated net capital loss of $100 ($50 attributable to P and $50 to S). At the beginning of Year 2, P has a $300 basis in S's stock. For Year 2, P has ordinary income of $30, and a $20 capital gain (determined without taking the $100 consolidated net capital loss carryover or P's gain or loss from the disposition of S's stock into account), and S has a $100 ordinary loss. P sells S's stock for $280 at the close of Year 2.

(b) To determine the amount of the limitation under paragraph (b)(2)(i) of this section on S's losses, and the effect of the absorption of S's losses on P's basis in S's stock under §1.1502–32(b), P's gain or loss from the disposition of S's stock is not taken into account. For Year 2, the P group is tentatively treated as having a $70 consolidated net operating loss (S's $100 ordinary loss, less P's $30 of ordinary income). The P group is also treated as having no consolidated net capital gain in Year 2, because P's $20 capital gain is reduced by $20 of the consolidated net capital loss carryover from Year 1 under section 1212(a) (the absorption of which is attributed equally to P and S). In addition, of the $70 consolidated net operating loss, $30 is carried back to Year 1 and offsets P's ordinary income in that year, and $40 is carried forward. Consequently, $40 of S's operating loss from Year 2, and $40 of the consolidated net capital loss carryover from Year 1 attributable to S, are limited under this paragraph (b).

(c) Under paragraph (b)(2)(ii) of this section, the limitation under this paragraph (b) does not affect the absorption of any deductions and losses attributable to P, $60 of S's operating loss from Year 2, and $10 of the consolidated net capital loss from Year 1 attributable to S. Consequently, P's basis in S's stock is reduced under §1.1502–32(b) by $70, from $300 to $230, and P recognizes a $50 gain from the sale of S's stock in Year 2. Thus, the P group is treated as having a $20 unlimited net operating loss that is carried back to Year 1:

Ordinary income:	
P	$30
S (excluding the $40 limited loss)	(60)
Sub Total	$(30)
Consolidated net capital gain:	
P ($20 + $50 from S stock − $50 from Year 1)	$20
S (−$10 from Year 1)	(10)
Sub Total	$10
Consolidated taxable income	$(20)

(d) Under paragraph (b)(2)(ii) of this section, S's $40 ordinary loss from Year 2 that is limited under this paragraph (b) is treated as a separate net operating loss arising in Year 2. Similarly, $40 of the consolidated net capital loss from Year 1 attributable to S is treated as a separate net capital loss carried over from Year 1. Because S ceases to be a member, the $40 net operating loss from Year

2 and the $40 consolidated net capital loss from Year 1 are allocated to S under §§ 1.1502–21T and 1.1502–22T, respectively (or § 1.1502-79A, as appropriate) and are carried to S's first separate return year.

Example 3. Allocation of basis adjustments. (a) For Year 1, the P group has consolidated taxable income of $100. At the beginning of Year 2, P has a $40 basis in each of the 10 shares of S's stock. For Year 2, P has an $80 ordinary loss (determined without taking into account P's gain or loss from the disposition of S's stock) and S has an $80 ordinary loss. P sells 2 shares of S's stock for $85 each at the close of Year 2.

(b) Under paragraph (b)(2)(i) of this section, the amount of the limitation on S's loss is determined by tentatively treating the P group as having a $160 consolidated net operating loss for Year 2. Of this amount, $100 is carried back under section 172 and absorbed in Year 1 ($50 attributable to S and $50 attributable to P). Consequently, $30 of S's loss is limited under this paragraph (b).

(c) Under paragraph (b)(2)(ii) of this section, the limitation under this paragraph (b) does not affect the absorption of P's $80 ordinary loss or $50 of S's ordinary loss. Consequently, P's basis in each share of S's stock is reduced from $40 to $35 under § 1.1502–32(b), and P recognizes a $100 gain from the sale of the 2 shares. Thus, the P group is treated as having a $30 unlimited net operating loss:

Ordinary loss:	
P	$ (80)
S (excluding the $30 limited loss)	(50)
Sub Total	$(130)
Consolidated net capital gain:	
P	$100
S	0
Sub Total	$100
Unlimited consolidated net operating loss	$(30)

(d) A portion of the $130 of unlimited operating losses for Year 2 is fully absorbed in that year, and a portion is carried back to Year 1. Thus, $61.50 of P's $80 loss ($100 multiplied by $80/$130) and $38.50 of S's $50 unlimited loss ($100 multiplied by $50/$130) are absorbed in Year 2. P's remaining $18.50 of loss and S's remaining $11.50 of loss are not subject to limitation and are carried back and absorbed in Year 1.

(e) Under paragraph (b)(2)(ii) of this section, S's $30 of loss limited under this paragraph (b) is treated as a separate net operating loss.

(3) *Loss dispositions*—(i) *General rule.* The principles of paragraph (b)(2) of this section apply to the extent necessary to carry out the purposes of paragraph (b)(1) of this section if P recognizes a deduction or loss from the disposition of S's stock.

(ii) *Example.* The principles of this paragraph (b)(3) are illustrated by the following example.

Example. (a) P has a $400 basis in S's stock. For Year 1, P has a capital gain of $100 (determined without taking P's gain or loss from the disposition of S's stock into account) and S has both a $60 capital loss and a $200 ordinary loss. P sells S's stock for $140 at the close of Year 1.

(b) Under paragraph (b)(3) of this section, the amount of S's ordinary and capital losses that may offset income and gain is determined by tentatively computing the group's consolidated net operating loss and consolidated net capital loss without taking into account P's loss from the disposition of S's stock. The limitation is necessary to prevent P's loss from the disposition of S's stock from affecting the absorption of S's losses and thereby the adjustments to P's basis in S's stock under § 1.1502–32(b) (which would, in turn, affect P's loss).

(c) Under the principles of paragraph (b)(2)(i) of this section, the amount of the limitation on S's loss is determined by tentatively treating the P group as having a $40 consolidated net capital gain and a $200 ordinary loss, which results in a $160 consolidated net operating loss for Year 1, all of which is attributable to S. Thus, $160 of S's ordinary loss is limited under this paragraph (b). See also § 1.1502–20 for rules applicable to losses from the sale of stock of subsidiaries.

(4) *Multiple dispositions*—(i) *Stock of a member.* To the extent income, gain, deduction, or loss from a prior disposition of S's stock is deferred under any rule of law, the limitation under paragraph (b)(2) of this section is determined by treating the year the deferred amount is taken into account as the year of the disposition.

(ii) *Stock of different members.* If S is a higher-tier corporation with respect to another member (T), and all of T's items of income, gain, deduction, and loss (including the absorption of T's deduction or loss) would be fully reflected in P's basis in S's stock under § 1.1502–32, the limitation under paragraph (b)(2)(i) of this section with respect to T's deductions and losses is determined without taking into account any income, gain, deduction, or loss from the disposition of the stock of S or T (or of the stock of members owned in the chain connecting S and T). However, this paragraph (b) does not otherwise limit the absorption of one member's deduction or loss with respect to the disposition of another member's stock.

(iii) *Examples.* The principles of this paragraph (b)(4) are illustrated by the following examples.

Example 1. Chain of subsidiaries. (a) P owns all of S's stock with a $500 basis, and S owns all of T's stock with a $500 basis. For Year 1, P has ordinary income of $30, S has no income or loss, and T has an $80 ordinary loss. P sells S's stock for $520 at the close of Year 1.

(b) Under paragraph (b)(4) of this section, to determine the amount of the limitation under paragraph (b) of this section on T's loss, and the effect of the absorption of T's loss on P's basis in S's stock under §1.1502–32(b), P's gain or loss from the disposition of S's stock is not taken into account. The group is tentatively treated as having a consolidated net operating loss of $50 (P's $30 of income minus T's $80 loss). Because only $30 of T's loss offsets income or gain, P's basis in S's stock is reduced under §1.1502–32(b) from $500 to $470 immediately before the disposition of S's stock. Thus, P takes into account a $50 gain from the sale of S's stock.

(c) The facts are the same as in paragraph (a) of this *Example 1,* except that S has a $10 excess loss account in T's stock (rather than a $500 basis). Under paragraph (b)(4) of this section, neither P's gain or loss from the disposition of S's stock nor S's gain or loss from the disposition of T's stock (under §1.1502–19) are taken into account for purposes of the tentative computations and the effect of any absorption under §1.1502–32(b) on P's basis in S's stock and S's excess loss account in T's stock. The group is tentatively treated as having a consolidated net operating loss of $50 (P's $30 of income minus T's $80 loss), and only $30 of T's loss may offset the group's income or gain. Under §1.1502–32(b), the absorption of $30 of T's loss increases S's excess loss account in T's stock to $40 and, under §1.1502–19, the excess loss account is taken into account. Moreover, under §1.1502–32(b), P's basis in S's stock is increased immediately before the sale by $10 (S's $40 gain under §1.1502–19(b) minus T's $30 loss absorbed and tiered up under §1.1502–32(b)), from $500 to $510. Thus, P takes into account a $10 gain from the sale of S's stock, and S takes into account a $40 gain from its excess loss account in T's stock.

Example 2. Brother-sister subsidiaries. (a) P owns all of the stock of S1 and S2, each with a $50 basis. For Year 1, the group has a $100 consolidated net operating loss ($50 of which is attributable to S1, and $50 to S2) determined without taking gain or loss from the disposition of member stock into account. At the close of Year 1, P sells the stock of S1 and S2 for $100 each.

(b) Paragraph (b)(4) of this section does not limit the loss of S1 or S2 with respect to the disposition of stock of the other. Consequently, each subsidiary's loss may offset P's gain from the disposition of the stock of the other subsidiary. Because this absorption results in a $50 reduction in P's basis in the stock of each subsidiary under §1.1502–32(b), P's aggregate gain from the stock dispositions is increased from $100 to $200, $100 of which is offset by the losses of the subsidiaries.

(5) *Effective date.* This paragraph (b) applies to stock dispositions occurring in consolidated return years beginning on or after January 1, 1995. For prior years, see §1.1502–11(b) as contained in the 26 CFR part 1 edition revised as of April 1, 1994.

(c) *Disallowance of loss attributable to pre-1966 distributions.* No loss shall be allowed upon the sale or other disposition of stock, bonds, or other obligations of a member or former member to the extent that such loss is attributable to a distribution made in an affiliated year beginning before January 1, 1966, out of earnings and profits accumulated before the distributing corporation became a member.

[T.D. 7246, 38 FR 759, Jan. 4, 1973, as amended by T.D. 7728, 45 FR 72650, Nov. 3, 1980; T.D. 8560, 59 FR 41675, Aug. 15, 1994; T.D. 8677, 61 FR 33323, 33326, June 27, 1996; T.D. 8560, 62 FR 12097, Mar. 14, 1997]

COMPUTATION OF SEPARATE TAXABLE INCOME

§1.1502–12 Separate taxable income.

The separate taxable income of a member (including a case in which deductions exceed gross income) is computed in accordance with the provisions of the Code covering the determination of taxable income of separate corporations, subject to the following modifications:

(a) Transactions between members and transactions with respect to stock, bonds, or other obligations of members shall be reflected according to the provisions of §1.1502–13;

(b) Any deduction which is disallowed under §§1.1502–15A or 1.1502–15T shall be taken into account as provided in those sections;

(c) The limitation on deductions provided in section 615(c) or section 617(h) shall be taken into account as provided in § 1.1502–16;

(d) The method of accounting under which such computation is made and the adjustments to be made because of any change in method of accounting shall be determined under § 1.1502–17;

(e) Inventory adjustments shall be made as provided in § 1.1502–18;

(f) Any amount included in income under § 1.1502–19 shall be taken into account;

(g) In the computation of the deduction under section 167, property shall not lose its character as new property as a result of a transfer from one member to another member during a consolidated return year if:

(1) The transfer occurs on or before January 4, 1973, or

(2) The transfer occurs after January 4, 1973, and the transfer is an intercompany transaction as defined in § 1.1502–13 or the basis of the property in the hands of the transferee is determined (in whole or in part) by reference to its basis in the hands of the transferor;

(h) No net operating loss deduction shall be taken into account;

(i) [Reserved]

(j) No capital gains or losses shall be taken into account;

(k) No gains and losses subject to section 1231 shall be taken into account;

(l) No deduction under section 170 with respect to charitable contributions shall be taken into account;

(m) No deduction under section 922 (relating to the deduction for Western Hemisphere trade corporations) shall be taken into account;

(n) No deductions under section 243(a)(1), 244(a), 245, or 247 (relating to deductions with respect to dividends received and dividends paid) shall be taken into account;

(o) Basis shall be determined under §§ 1.1502–31 and 1.1502–32, and earnings and profits shall be determined under § 1.1502–33; and

(p) The limitation on deductions provided in section 613A shall be taken into account for each member's oil and gas properties as provided in § 1.1502–44.

(q) A thrift institution's deduction under section 593(b)(2) (relating to the addition to the reserve for bad debts of a thrift institution under the percentage of taxable income method) shall be determined under § 1.1502–42.

(r) For rules relating to loss disallowance or basis reduction on the disposition or deconsolidation of stock of a subsidiary, see §§ 1.337(d)–1, 1.337(d)–2 and § 1.1502–20.

(Secs. 1502 and 7805 of the Internal Revenue Code of 1954 (68A Stat. 637; 917; 26 U.S.C. 1502, 7805))

[T.D. 6894, 31 FR 11794, Sept. 8, 1966, as amended by T.D. 7191, 37 FR 12949, June 30, 1972; T.D. 7246, 38 FR 760, Jan. 4, 1973; T.D. 7725, 45 FR 65561, Oct. 3, 1980; T.D. 7876, 48 FR 11258, Mar. 17, 1983; T.D. 8294, 55 FR 9434, Mar. 14, 1990; T.D. 8319, 55 FR 49038, Nov. 26, 1990; T.D. 8364, 56 FR 47401, Sept. 19, 1991; T.D. 8597, 60 FR 36679, July 18, 1995; T.D. 8677, 61 FR 33323, June 27, 1996]

§ 1.1502–13 Intercompany transactions.

(a) *In general*—(1) *Purpose.* This section provides rules for taking into account items of income, gain, deduction, and loss of members from intercompany transactions. The purpose of this section is to provide rules to clearly reflect the taxable income (and tax liability) of the group as a whole by preventing intercompany transactions from creating, accelerating, avoiding, or deferring consolidated taxable income (or consolidated tax liability).

(2) *Separate entity and single entity treatment.* Under this section, the selling member (S) and the buying member (B) are treated as separate entities for some purposes but as divisions of a single corporation for other purposes. The *amount* and *location* of S's intercompany items and B's corresponding items are determined on a separate entity basis (separate entity treatment). For example, S determines its gain or loss from a sale of property to B on a separate entity basis, and B has a cost basis in the property. The *timing,* and the *character, source,* and other *attributes* of the intercompany items and corresponding items, although initially determined on a separate entity basis, are redetermined under this section to produce the effect of transactions between divisions of a single corporation (single entity treatment). For example, if S sells land to B at a gain and B sells the land to a nonmember, S does not

take its gain into account until B's sale to the nonmember.

(3) *Timing rules as a method of accounting*—(i) *In general.* The timing rules of this section are a method of accounting for intercompany transactions, to be applied by each member in addition to the member's other methods of accounting. See §1.1502–17. To the extent the timing rules of this section are inconsistent with a member's otherwise applicable methods of accounting, the timing rules of this section control. For example, if S sells property to B in exchange for B's note, the timing rules of this section apply instead of the installment sale rules of section 453. S's or B's application of the timing rules of this section to an intercompany transaction clearly reflects income only if the effect of that transaction as a whole (including, for example, related costs and expenses) on consolidated taxable income is clearly reflected.

(ii) *Automatic consent for joining and departing members*—(A) *Consent granted.* Section 446(e) consent is granted under this section to the extent a change in method of accounting is necessary solely by reason of the timing rules of this section—

(*1*) For each member, with respect to its intercompany transactions, in the first consolidated return year which follows a separate return year and in which the member engages in an intercompany transaction; and

(*2*) For each former member, with respect to its transactions with members that would otherwise be intercompany transactions if the former member were still a member, in the first separate return year in which the former member engages in such a transaction.

(B) *Cut-off basis.* Any change in method of accounting described in paragraph (a)(3)(ii)(A) of this section is to be effected on a cut-off basis for transactions entered into on or after the first day of the year for which consent is granted under paragraph (a)(3)(ii)(A) of this section.

(4) *Other law.* The rules of this section apply in addition to other applicable law (including nonstatutory authorities). For example, this section applies in addition to sections 267(f) (additional rules for certain losses), 269 (acquisitions to evade or avoid income tax), and 482 (allocations among commonly controlled taxpayers). Thus, an item taken into account under this section can be deferred, disallowed, or eliminated under other applicable law, for example, section 1091 (losses from wash sales).

(5) *References.* References in other sections to this section include, as appropriate, references to prior law. For effective dates and prior law see paragraph (l) of this section.

(6) *Overview*—(i) *In general.* The principal rules of this section that implement single entity treatment are the matching rule and the acceleration rule of paragraphs (c) and (d) of this section. Under the matching rule, S and B are generally treated as divisions of a single corporation for purposes of taking into account their items from intercompany transactions. The acceleration rule provides additional rules for taking the items into account if the effect of treating S and B as divisions cannot be achieved (for example, if S or B becomes a nonmember). Paragraph (b) of this section provides definitions. Paragraph (e) of this section provides simplifying rules for certain transactions. Paragraphs (f) and (g) of this section provide additional rules for stock and obligations of members. Paragraphs (h) and (j) of this section provide anti-avoidance rules and miscellaneous operating rules.

(ii) *Table of examples.* Set forth below is a table of the examples contained in this section.

Matching rule. (§1.1502–13(c)(7)(ii))

Example 1. Intercompany sale of land.

Example 2. Dealer activities.

Example 3. Intercompany section 351 transfer.

Example 4. Depreciable property.

Example 5. Intercompany sale followed by installment sale.

Example 6. Intercompany sale of installment obligation.

Example 7. Performance of services.

Example 8. Rental of property.

Example 9. Intercompany sale of a partnership interest.

Example 10. Net operating losses subject to section 382 or the SRLY rules.

Example 11. Section 475.

Example 12. Section 1092.

Example 13. Manufacturer incentive payments.

Example 14. Source of income under section 863.
Example 15. Section 1248.

Acceleration rule. (§ 1.1502–13(d)(3))

Example 1. Becoming a nonmember—timing.
Example 2. Becoming a nonmember—attributes.
Example 3. Selling member's disposition of installment note.
Example 4. Cancellation of debt and attribute reduction under section 108(b).
Example 5. Section 481.

Simplifying rules—inventory. (§ 1.1502–13(e)(1)(v))

Example 1. Increment averaging method.
Example 2. Increment valuation method.
Example 3. Other reasonable inventory methods.

Stock of members. (§ 1.1502–13(f)(7))

Example 1. Dividend exclusion and property distribution.
Example 2. Excess loss accounts.
Example 3. Intercompany reorganization.
Example 4. Stock redemptions and distributions.
Example 5. Intercompany stock sale followed by section 332 liquidation.
Example 6. Intercompany stock sale followed by section 355 distribution.

Obligations of members. (§ 1.1502–13(g)(5))

Example 1. Interest on intercompany debt.
Example 2. Intercompany debt becomes nonintercompany debt.
Example 3. Loss or bad debt deduction with respect to intercompany debt.
Example 4. Nonintercompany debt becomes intercompany debt.
Example 5. Notional principal contracts.

Anti-avoidance rules. (§ 1.1502–13(h)(2))

Example 1. Sale of a partnership interest.
Example 2. Transitory status as an intercompany obligation.
Example 3. Corporate mixing bowl.
Example 4. Partnership mixing bowl.
Example 5. Sale and leaseback.

Miscellaneous operating rules. (§ 1.1502–13(j)(9))

Example 1. Intercompany sale followed by section 351 transfer to member.
Example 2. Intercompany sale of member stock followed by recapitalization.
Example 3. Back-to-back intercompany transactions—matching.
Example 4. Back-to-back intercompany transactions—acceleration.
Example 5. Successor group.
Example 6. Liquidation—80% distributee.
Example 7. Liquidation—no 80% distributee.

(b) *Definitions.* For purposes of this section—

(1) *Intercompany transactions*—(i) *In general.* An intercompany transaction is a transaction between corporations that are members of the same consolidated group immediately after the transaction. S is the member transferring property or providing services, and B is the member receiving the property or services. Intercompany transactions include—

(A) S's sale of property (or other transfer, such as an exchange or contribution) to B, whether or not gain or loss is recognized;

(B) S's performance of services for B, and B's payment or accrual of its expenditure for S's performance;

(C) S's licensing of technology, rental of property, or loan of money to B, and B's payment or accrual of its expenditure; and

(D) S's distribution to B with respect to S stock.

(ii) *Time of transaction.* If a transaction occurs in part while S and B are members and in part while they are not members, the transaction is treated as occurring when performance by either S or B takes place, or when payment for performance would be taken into account under the rules of this section if it were an intercompany transaction, whichever is earliest. Appropriate adjustments must be made in such cases by, for example, dividing the transaction into two separate transactions reflecting the extent to which S or B has performed.

(iii) *Separate transactions.* Except as otherwise provided in this section, each transaction is analyzed separately. For example, if S simultaneously sells two properties to B, one at a gain and the other at a loss, each property is treated as sold in a separate transaction. Thus, the gain and loss cannot be offset or netted against each other for purposes of this section. Similarly, each payment or accrual of interest on a loan is a separate transaction. In addition, an accrual of premium is treated as a separate transaction, or as an offset to interest that is not a separate transaction, to the extent required under separate entity treatment. If two members exchange property, each member is S with respect to the property it transfers and B with respect to the property it receives. If two members enter into a notional principal contract, each payment under the contract is a separate transaction and the member making the payment is B with respect to that payment and the member receiving the payment is S. See paragraph (j)(4) of this section for rules aggregating certain transactions.

(2) *Intercompany items*—(i) *In general.* S's income, gain, deduction, and loss from an intercompany transaction are its intercompany items. For example, S's gain from the sale of property to B is intercompany gain. An item is an intercompany item whether it is directly or indirectly from an intercompany transaction.

(ii) *Related costs or expenses.* S's costs or expenses related to an intercompany transaction are included in determining its intercompany items. For example, if S sells inventory to B, S's direct and indirect costs properly includible under section 263A are included in determining its intercompany income. Similarly, related costs or expenses that are not capitalized under S's separate entity method of accounting are included in determining its intercompany items. For example, deductions for employee wages, in addition to other related costs, are included in determining S's intercompany items from performing services for B, and depreciation deductions are included in determining S's intercompany items from renting property to B.

(iii) *Amounts not yet recognized or incurred.* S's intercompany items include amounts from an intercompany transaction that are not yet taken into account under its separate entity method of accounting. For example, if S is a cash method taxpayer, S's intercompany income might be taken into account under this section even if the cash is not yet received. Similarly, an amount reflected in basis (or an amount equivalent to basis) under S's separate entity method of accounting that is a substitute for income, gain, deduction or loss from an intercompany transaction is an intercompany item.

(3) *Corresponding items*—(i) *In general.* B's income, gain, deduction, and loss from an intercompany transaction, or from property acquired in an intercompany transaction, are its corresponding items. For example, if B pays rent to S, B's deduction for the rent is a corresponding deduction. If B buys property from S and sells it to a nonmember, B's gain or loss from the sale to the nonmember is a corresponding gain or loss; alternatively, if B recovers the cost of the property through depreciation, B's depreciation deductions are corresponding deductions. An item is a corresponding item whether it is directly or indirectly from an intercompany transaction (or from property acquired in an intercompany transaction).

(ii) *Disallowed or eliminated amounts.* B's corresponding items include amounts that are permanently disallowed or permanently eliminated, whether directly or indirectly. Thus, corresponding items include amounts disallowed under section 265 (expenses relating to tax-exempt income), and amounts not recognized under section 311(a) (nonrecognition of loss on distributions), section 332 (nonrecognition on liquidating distributions), or section 355(c) (certain distributions of stock of a subsidiary). On the other hand, an amount is not permanently disallowed or permanently eliminated (and therefore is not a corresponding item) to the extent it is not recognized in a transaction in which B receives a successor asset within the meaning of paragraph (j)(1) of this section. For example, B's corresponding items do not include amounts not recognized from a transaction with a nonmember to which section 1031 applies or from another transaction in which B receives exchanged basis property.

(4) *Recomputed corresponding items.* The recomputed corresponding item is the corresponding item that B would take into account if S and B were divisions of a single corporation and the intercompany transaction were between those divisions. For example, if S sells property with a $70 basis to B for $100, and B later sells the property to a nonmember for $90, B's corresponding item is its $10 loss, and the recomputed corresponding item is $20 of gain (determined by comparing the $90 sales price with the $70 basis the

property would have if S and B were divisions of a single corporation). Although neither S nor B actually takes the recomputed corresponding item into account, it is computed as if B did take it into account (based on reasonable and consistently applied assumptions, including any provision of the Internal Revenue Code or regulations that would affect its timing or attributes).

(5) *Treatment as a separate entity.* Treatment as a separate entity means treatment without application of the rules of this section, but with the application of the other consolidated return regulations. For example, if S sells the stock of another member to B, S's gain or loss on a separate entity basis is determined with the application of § 1.1502–80(b) (non-applicability of section 304), but without redetermination under paragraph (c) or (d) of this section.

(6) *Attributes.* The attributes of an intercompany item or corresponding item are all of the item's characteristics, except *amount, location,* and *timing,* necessary to determine the item's effect on taxable income (and tax liability). For example, attributes include character, source, treatment as excluded from gross income or as a noncapital, nondeductible amount, and treatment as built-in gain or loss under section 382(h) or 384. In contrast, the characteristics of property, such as a member's holding period, or the fact that property is included in inventory, are not attributes of an item, but these characteristics might affect the determination of the attributes of items from the property.

(c) *Matching rule.* For each consolidated return year, B's corresponding items and S's intercompany items are taken into account under the following rules:

(1) *Attributes and holding periods*—(i) *Attributes.* The separate entity attributes of S's intercompany items and B's corresponding items are redetermined to the extent necessary to produce the same effect on consolidated taxable income (and consolidated tax liability) as if S and B were divisions of a single corporation, and the intercompany transaction were a transaction between divisions. Thus, the activities of both S and B might affect the attributes of both intercompany items and corresponding items. For example, if S holds property for sale to unrelated customers in the ordinary course of its trade or business, S sells the property to B at a gain and B sells the property to an unrelated person at a further gain, S's intercompany gain and B's corresponding gain might be ordinary because of S's activities with respect to the property. Similar principles apply if S performs services, rents property, or engages in any other intercompany transaction.

(ii) *Holding periods.* The holding period of property transferred in an intercompany transaction is the aggregate of the holding periods of S and B. However, if the basis of the property is determined by reference to the basis of other property, the property's holding period is determined by reference to the holding period of the other property. For example, if S distributes stock to B in a transaction to which section 355 applies, B's holding period in the distributed stock is determined by reference to B's holding period in the stock of S.

(2) *Timing*—(i) *B's items.* B takes its corresponding items into account under its accounting method, but the redetermination of the attributes of a corresponding item might affect its timing. For example, if B's sale of property acquired from S is treated as a dealer disposition because of S's activities, section 453(b) prevents any corresponding income of B from being taken into account under the installment method.

(ii) *S's items.* S takes its intercompany item into account to reflect the difference for the year between B's corresponding item taken into account and the recomputed corresponding item.

(3) *Divisions of a single corporation.* As divisions of a single corporation, S and B are treated as engaging in their actual transaction and owning any actual property involved in the transaction (rather than treating the transaction as not occurring). For example, S's sale of land held for investment to B for cash is not disregarded, but is treated

as an exchange of land for cash between divisions (and B therefore succeeds to S's basis in the property). Similarly, S's issuance of its own stock to B in exchange for property is not disregarded, B is treated as owning the stock it receives in the exchange, and section 1032 does not apply to B on its subsequent sale of the S stock. Although treated as divisions, S and B nevertheless are treated as:

(i) Operating separate trades or businesses. See, e.g., §1.446–1(d) (accounting methods for a taxpayer engaged in more than one business).

(ii) Having any special status that they have under the Internal Revenue Code or regulations. For example, a bank defined in section 581, a domestic building and loan association defined in section 7701(a)(19), and an insurance company to which section 801 or 831 applies are treated as divisions having separate special status. On the other hand, the fact that a member holds property for sale to customers in the ordinary course of its trade or business is not a special status.

(4) *Conflict or allocation of attributes.* This paragraph (c)(4) provides special rules for redetermining and allocating attributes under paragraph (c)(1)(i) of this section.

(i) *Offsetting amounts*—(A) *In general.* To the extent B's corresponding item offsets S's intercompany item in amount, the attributes of B's corresponding item, determined based on both S's and B's activities, control the attributes of S's offsetting intercompany item. For example, if S sells depreciable property to B at a gain and B depreciates the property, the attributes of B's depreciation deduction (ordinary deduction) control the attributes of S's offsetting intercompany gain. Accordingly, S's gain is ordinary.

(B) *B controls unreasonable.* To the extent the results under paragraph (c)(4)(i)(A) are inconsistent with treating S and B as divisions of a single corporation, the attributes of the offsetting items must be redetermined in a manner consistent with treating S and B as divisions of a single corporation. To the extent, however, that B's corresponding item on a separate entity basis is excluded from gross income, is a noncapital, nondeductible amount, or is otherwise permanently disallowed or eliminated, the attributes of B's corresponding item always control the attributes of S's offsetting intercompany item.

(ii) *Allocation.* To the extent S's intercompany item and B's corresponding item do not offset in amount, the attributes redetermined under paragraph (c)(1)(i) of this section must be allocated to S's intercompany item and B's corresponding item by using a method that is reasonable in light of all the facts and circumstances, including the purposes of this section and any other rule affected by the attributes of S's intercompany item and B's corresponding item. A method of allocation or redetermination is unreasonable if it is not used consistently by all members of the group from year to year.

(5) *Special status.* Notwithstanding the general rule of paragraph (c)(1)(i) of this section, to the extent an item's attributes determined under this section are permitted or not permitted to a member under the Internal Revenue Code or regulations by reason of the member's special status, the attributes required under the Internal Revenue Code or regulations apply to that member's items (but not the other member). For example, if S is a bank to which section 582(c) applies, and sells debt securities at a gain to B, a nonbank, the character of S's intercompany gain is ordinary as required under section 582(c), but the character of B's corresponding item as capital or ordinary is determined under paragraph (c)(1)(i) of this section without the application of section 582(c). For other special status issues, see, for example, sections 595(b) (foreclosure on property securing loans), 818(b) (life insurance company treatment of capital gains and losses), and 1503(c) (limitation on absorption of certain losses).

(6) *Treatment of intercompany items if corresponding items are excluded or nondeductible*—(i) *In general.* Under paragraph (c)(1)(i) of this section, S's intercompany item might be redetermined to be excluded from gross income or treated as a noncapital, nondeductible amount. For example, S's intercompany loss from the sale of property to

B is treated as a noncapital, nondeductible amount if B distributes the property to a nonmember shareholder at no further gain or loss (because, if S and B were divisions of a single corporation, the loss would not have been recognized under section 311(a)). Paragraph (c)(6)(ii) of this section, however, provides limitations on the application of this rule to intercompany income or gain. See also §§ 1.1502–32 and 1.1502–33 (adjustments to S's stock basis and earnings and profits to reflect amounts so treated).

(ii) *Limitation on treatment of intercompany items as excluded from gross income.* Notwithstanding the general rule of paragraph (c)(1)(i) of this section, S's intercompany income or gain is redetermined to be excluded from gross income only to the extent one of the following applies:

(A) *Disallowed amounts.* B's corresponding item is a deduction or loss and, in the taxable year the item is taken into account under this section, it is permanently and explicitly disallowed under another provision of the Internal Revenue Code or regulations. For example, deductions that are disallowed under section 265 are permanently and explicitly disallowed. An amount is not permanently and explicitly disallowed, for example, to the extent that—

(*1*) The Internal Revenue Code or regulations provide that the amount is not recognized (for example, a loss that is realized but not recognized under section 332 or section 355(c) is not permanently and explicitly disallowed, notwithstanding that it is a corresponding item within the meaning of paragraph (b)(3)(ii) of this section (certain disallowed or eliminated amounts));

(*2*) A related amount might be taken into account by B with respect to successor property, such as under section 280B (demolition costs recoverable as capitalized amounts);

(*3*) A related amount might be taken into account by another taxpayer, such as under section 267(d) (disallowed loss under section 267(a) might result in nonrecognition of gain for a related person);

(*4*) A related amount might be taken into account as a deduction or loss, including as a carryforward to a later year, under any provision of the Internal Revenue Code or regulations (whether or not the carryforward expires in a later year); or

(*5*) The amount is reflected in the computation of any credit against (or other reduction of) Federal income tax (whether allowed for the taxable year or carried forward to a later year).

(B) *Section 311.* The corresponding item is a loss that is realized, but not recognized under section 311(a) on a distribution to a nonmember (even though the loss is not a permanently and explicitly disallowed amount within the meaning of paragraph (c)(6)(ii)(A) of this section).

(C) *Other amounts.* The Commissioner determines that treating S's intercompany item as excluded from gross income is consistent with the purposes of this section and other applicable provisions of the Internal Revenue Code and regulations.

(7) *Examples*—(i) *In general.* For purposes of the examples in this section, unless otherwise stated, P is the common parent of the P consolidated group, P owns all of the only class of stock of subsidiaries S and B, X is a person unrelated to any member of the P group, the taxable year of all persons is the calendar year, all persons use the accrual method of accounting, tax liabilities are disregarded, the facts set forth the only corporate activity, no member has any special status, and the transaction is not otherwise subject to recharacterization. If a member acts as both a selling member and a buying member (e.g., with respect to different aspects of a single transaction, or with respect to related transactions), the member is referred to as M, M1, or M2 (rather than as S or B).

(ii) *Matching rule.* The matching rule of this paragraph (c) is illustrated by the following examples.

Example 1. Intercompany sale of land followed by sale to a nonmember. (a) *Facts.* S holds land for investment with a basis of $70. S has held the land for more than one year. On January 1 of Year 1, S sells the land to B for $100. B also holds the land for investment. On July 1 of Year 3, B sells the land to X for $110.

(b) *Definitions.* Under paragraph (b)(1) of this section, S's sale of the land to B is an intercompany transaction, S is the selling member, and B is the buying member. Under paragraphs (b)(2) and (3) of this section, S's $30 gain from the sale to B is its intercompany item, and B's $10 gain from the sale to X is its corresponding item.

(c) *Attributes.* Under the matching rule of paragraph (c) of this section, S's $30 intercompany gain and B's $10 corresponding gain are taken into account to produce the same effect on consolidated taxable income (and consolidated tax liability) as if S and B were divisions of a single corporation. In addition, the holding periods of S and B for the land are aggregated. Thus, the group's entire $40 of gain is long-term capital gain. Because both S's intercompany item and B's corresponding item on a separate entity basis are long-term capital gain, the attributes are not redetermined under paragraph (c)(1)(i) of this section.

(d) *Timing.* For each consolidated return year, S takes its intercompany item into account under the matching rule to reflect the difference for the year between B's corresponding item taken into account and the recomputed corresponding item. If S and B were divisions of a single corporation and the intercompany sale were a transfer between the divisions, B would succeed to S's $70 basis in the land and would have a $40 gain from the sale to X in Year 3, instead of a $10 gain. Consequently, S takes no gain into account in Years 1 and 2, and takes the entire $30 gain into account in Year 3, to reflect the $30 difference in that year between the $10 gain B takes into account and the $40 recomputed gain (the recomputed corresponding item). Under §§1.1502–32 and 1.1502–33, P's basis in its S stock and the earnings and profits of S and P do not reflect S's $30 gain until the gain is taken into account in Year 3. (Under paragraph (a)(3) of this section, the results would be the same if S sold the land to B in an installment sale to which section 453 would otherwise apply, because S must take its intercompany gain into account under this section.)

(e) *Intercompany loss followed by sale to a nonmember at a gain.* The facts are the same as in paragraph (a) of this *Example 1,* except that S's basis in the land is $130 (rather than $70). The attributes and timing of S's intercompany loss and B's corresponding gain are determined under the matching rule in the manner provided in paragraphs (c) and (d) of this *Example 1.* If S and B were divisions of a single corporation and the intercompany sale were a transfer between the divisions, B would succeed to S's $130 basis in the land and would have a $20 loss from the sale to X instead of a $10 gain. Thus, S takes its entire $30 loss into account in Year 3 to reflect the $30 difference between B's $10 gain taken into account and the $20 recomputed loss. (The results are the same under section 267(f).) S's $30 loss is long-term capital loss, and B's $10 gain is long-term capital gain.

(f) *Intercompany gain followed by sale to a nonmember at a loss.* The facts are the same as in paragraph (a) of this *Example 1,* except that B sells the land to X for $90 (rather than $110). The attributes and timing of S's intercompany gain and B's corresponding loss are determined under the matching rule. If S and B were divisions of a single corporation and the intercompany sale were a transfer between the divisions, B would succeed to S's $70 basis in the land and would have a $20 gain from the sale to X instead of a $10 loss. Thus, S takes its entire $30 gain into account in Year 3 to reflect the $30 difference between B's $10 loss taken into account and the $20 recomputed gain. S's $30 gain is long-term capital gain, and B's $10 loss is long-term capital loss.

(g) *Intercompany gain followed by distribution to a nonmember at a loss.* The facts are the same as in paragraph (a) of this *Example 1,* except that B distributes the land to X, a minority shareholder of B, and at the time of the distribution the land has a fair market value of $90. The attributes and timing of S's intercompany gain and B's corresponding loss are determined under the matching rule. Under section 311(a), B does not recognize its $10 loss on the distribution to X. If S and B were divisions of a single corporation and the intercompany sale were a transfer between divisions, B would succeed to S's $70 basis in the land and would have a $20 gain from the distribution to X instead of an unrecognized $10 loss. Under paragraph (b)(3)(ii) of this section, B's loss that is not recognized under section 311(a) is a corresponding item. Thus, S takes its $30 gain into account under the matching rule in Year 3 to reflect the difference between B's $10 corresponding unrecognized loss and the $20 recomputed gain. B's $10 corresponding loss offsets $10 of S's intercompany gain and, under paragraph (c)(4)(i) of this section, the attributes of B's corresponding item control the attributes of S's intercompany item. Paragraph (c)(6) of this section does not prevent the redetermination of S's intercompany item as excluded from gross income. (See paragraph (c)(6)(ii)(B) of this section). Thus, $10 of S's $30 gain is redetermined to be excluded from gross income.

(h) *Intercompany sale followed by section 1031 exchange with nonmember.* The facts are the same as in paragraph (a) of this *Example 1,* except that, instead of selling the land to X, B exchanges the land for land owned by X in a transaction to which section 1031 applies. There is no difference in Year 3 between B's $0 corresponding item taken into account and the $0 recomputed corresponding item. Thus, none of S's intercompany gain is taken into account under the matching rule as a result of the section 1031 exchange. Instead, B's gain is preserved in the land received from X and, under the successor asset rule of paragraph (j)(1) of this section, S's intercompany gain is taken into account by reference to the replacement property. (If B takes gain into account as a result of boot received in the exchange, S's intercompany gain is taken into account under the matching rule to the extent the boot causes a difference between B's gain taken into account and the recomputed gain.)

(i) *Intercompany sale followed by section 351 transfer to nonmember.* The facts are the same as in paragraph (a) of this *Example 1,* except that, instead of selling the land to X, B transfers the land to X in a transaction to which section 351(a) applies and X remains a nonmember. There is no difference in Year 3 between B's $0 corresponding item taken into account and the $0 recomputed corresponding item. Thus, none of S's intercompany gain is taken into account under the matching rule as a result of the section 351(a) transfer. However, S's entire gain is taken into account in Year 3 under the acceleration rule of paragraph (d) of this section (because X, a nonmember, reflects B's $100 cost basis in the land under section 362).

Example 2. Dealer activities. (a) *Facts.* S holds land for investment with a basis of $70. On January 1 of Year 1, S sells the land to B for $100. B develops the land as residential real estate, and sells developed lots to customers during Year 3 for an aggregate amount of $110.

(b) *Attributes.* S and B are treated under the matching rule as divisions of a single corporation for purposes of determining the attributes of S's intercompany item and B's corresponding item. Thus, although S held the land for investment, whether the gain is treated as from the sale of property described in section 1221(1) is based on the activities of both S and B. If, based on both S's and B's activities, the land is described in section 1221(1), both S's gain and B's gain are ordinary income.

Example 3. Intercompany section 351 transfer. (a) *Facts.* S holds land with a $70 basis and a $100 fair market value for sale to customers in the ordinary course of business. On January 1 of Year 1, S transfers the land to B in exchange for all of the stock of B in a transaction to which section 351 applies. S has no gain or loss under section 351(a), and its basis in the B stock is $70 under section 358. Under section 362, B's basis in the land is $70. B holds the land for investment. On July 1 of Year 3, B sells the land to X for $100. Assume that if S and B were divisions of a single corporation, B's gain from the sale would be ordinary income because of S's activities.

(b) *Timing and attributes.* Under paragraph (b)(1) of this section, S's transfer to B is an intercompany transaction. Under paragraph (c)(3) of this section, S is treated as transferring the land in exchange for B's stock even though, as divisions, S could not own stock of B. S has no intercompany item, but B's $30 gain from its sale of the land to X is a corresponding item because the land was acquired in an intercompany transaction. B's $30 gain is ordinary income that is taken into account under B's method of accounting.

(c) *Intercompany section 351 transfer with boot.* The facts are the same as in paragraph (a) of this *Example 3,* except that S receives $10 cash in addition to the B stock in the transfer. S recognizes $10 of gain under section 351(b), and its basis in the B stock is $70 under section 358. Under section 362, B's basis in the land is $80. S takes its $10 intercompany gain into account in Year 3 to reflect the $10 difference between B's $20 corresponding gain taken into account and the $30 recomputed gain. Both S's $10 gain and B's $20 gain are ordinary income.

(d) *Partial disposition.* The facts are the same as in paragraph (c) of this *Example 3,* except B sells only a one- half, undivided interest in the land to X for $50. The timing and attributes are determined in the manner provided in paragraph (b) of this *Example 3,* except that S takes only $5 of its gain into account in Year 3 to reflect the $5 difference between B's $10 gain taken into account and the $15 recomputed gain.

Example 4. Depreciable property. (a) *Facts.* On January 1 of Year 1, S buys 10-year recovery property for $100 and depreciates it under the straight-line method. On January 1 of Year 3, S sells the property to B for $130. Under section 168(i)(7), B is treated as S for purposes of section 168 to the extent B's $130 basis does not exceed S's adjusted basis at the time of the sale. B's additional basis is treated as new 10-year recovery property for which B elects the straight-line method of recovery. (To simplify the example, the half-year convention is disregarded.)

(b) *Depreciation through Year 3; intercompany gain.* S claims $10 of depreciation for each of Years 1 and 2 and has an $80 basis at the time of the sale to B. Thus, S has a $50 intercompany gain from its sale to B. For Year 3, B has $10 of depreciation with respect to $80 of its basis (the portion of its $130 basis not exceeding S's adjusted basis). In addition, B has $5 of depreciation with respect to the $50 of its additional basis that exceeds S's adjusted basis.

(c) *Timing.* S's $50 gain is taken into account to reflect the difference for each consolidated return year between B's depreciation taken into account with respect to the property and the recomputed depreciation. For Year 3, B takes $15 of depreciation into account. If the intercompany transaction were a transfer between divisions of a single corporation, B would succeed to S's adjusted basis in the property and take into account only $10 of depreciation for Year 3. Thus, S takes $5 of gain into account in Year 3. In each subsequent year that B takes into account $15 of depreciation with respect to the property, S takes into account $5 of gain.

(d) *Attributes.* Under paragraph (c)(1)(i) of this section, the attributes of S's gain and B's depreciation must be redetermined to the extent necessary to produce the same effect on consolidated taxable income as if the intercompany transaction were between divisions of a single corporation (the group must have a net depreciation deduction of $10). In each year, $5 of B's corresponding depreciation deduction offsets S's $5 intercompany gain taken into account and, under paragraph (c)(4)(i) of this section, the attributes of B's corresponding item control the attributes of S's intercompany item. Accordingly, S's intercompany gain that is taken into account as a result of B's depreciation deduction is ordinary income.

(e) *Sale of property to a nonmember.* The facts are the same as in paragraph (a) of this *Example 4,* except that B sells the property to X on January 1 of Year 5 for $110. As set forth in paragraphs (c) and (d) of this *Example 4,* B has $15 of depreciation with respect to the property in each of Years 3 and 4, causing S to take $5 of intercompany gain into account in each year as ordinary income. The $40 balance of S's intercompany gain is taken into account in Year 5 as a result of B's sale to X, to reflect the $40 difference between B's $10 gain taken into account and the $50 of recomputed gain ($110 of sale proceeds minus the $60 basis B would have if the intercompany sale were a transfer between divisions of a single corporation). Treating S and B as divisions of a single corporation, $40 of the gain is section 1245 gain and $10 is section 1231 gain. On a separate entity basis, S would have more than $10 treated as section 1231 gain, and B would have no amount treated as section 1231 gain. Under paragraph (c)(4)(ii) of this section, all $10 of the section 1231 gain is allocated to S. S's remaining $30 of gain, and all of B's $10 gain, is treated as section 1245 gain.

Example 5. Intercompany sale followed by installment sale. (a) *Facts.* S holds land for investment with a basis of $70x. On January 1 of Year 1, S sells the land to B for $100x. B also holds the land for investment. On July 1 of Year 3, B sells the land to X in exchange for X's $110x note. The note bears a market rate of interest in excess of the applicable Federal rate, and provides for principal payments of $55x in Year 4 and $55x in Year 5. The interest charge under section 453A(c) applies to X's note.

(b) *Timing and attributes.* S takes its $30x gain into account to reflect the difference in each consolidated return year between B's gain taken into account for the year and the recomputed gain. Under section 453, B takes into account $5x of gain in Year 4 and $5x of gain in Year 5. Thus, S takes into account $15x of gain in Year 4 and $15x of gain in Year 5 to reflect the $15x difference in each of those years between B's $5x gain taken into account and the $20x recomputed gain. Both S's $30x gain and B's $10x gain are subject to the section 453A(c) interest charge beginning in Year 3.

(c) *Election out under section 453(d).* If, under the facts in paragraph (a) of this *Example 5,* the P group wishes to elect not to apply section 453 with respect to S's gain, an election under section 453(d) must be made for Year 3 with respect to B's gain. This election will cause B's $10x gain to be taken into account in Year 3. Under the matching rule, this will result in S's $30x gain being taken into account in Year 3. (An election by the P group solely with respect to S's gain has no effect because the gain from S's sale to B is taken into account under the matching rule, and therefore must reflect the difference between B's gain taken into account and the recomputed gain.)

(d) *Sale to a nonmember at a loss, but overall gain.* The facts are the same as in paragraph (a) of this *Example 5,* except that B sells the land to X in exchange for X's $90x note (rather than $110x note). If S and B were divisions of a single corporation, B would succeed to S's basis in the land, and the sale to X would be eligible for installment reporting under section 453, because it resulted in an overall gain. However, because only gains may be reported on the installment method, B's $10x corresponding loss is taken into account in Year 3. Under paragraph (b)(4) of this section the recomputed corresponding item is $20x gain that would be taken into account under the installment method, $0 in Year 3 and $10x in each of Years 4 and 5. Thus, in Year 3 S takes $10x of gain into account to reflect the difference between B's $10x loss taken into account and the $0 recomputed gain for Year 3. Under paragraph (c)(4)(i) of this section, B's $10x corresponding loss offsets $10x of S's intercompany gain, and B's attributes control. S takes $10x of gain into account in each of Years 4 and 5 to reflect the difference in those years between B's $0 gain taken into account and the $10x recomputed gain that would be taken into account under the installment method. Only the $20x of S's gain taken into account in Years 4 and 5 is subject to the interest charge under section 453A(c) beginning in Year 3. (If P elects under section 453(d) for Year 3 not to apply section 453 with respect to the gain, all of S's $30x gain will be taken into account in Year 3 to reflect the difference between B's $10x loss taken into account and the $20x recomputed gain.)

(e) *Intercompany loss, installment gain.* The facts are the same as in paragraph (a) of this *Example 5,* except that S has a $130x (rather than $70x) basis in the land. Under paragraph (c)(1)(i) of this section, the separate entity attributes of S's and B's items from the intercompany transaction must be redetermined to produce the same effect on consolidated taxable income (and tax liability) as if the transaction had been a transfer between divisions. If S and B were divisions of a single corporation, B would succeed to S's basis in the land and the group would have $20x loss from the sale to X, installment reporting would be unavailable, and the interest charge under section 453A(c) would not apply. Accordingly, B's gain from the transaction is not eligible for installment treatment under section 453. B takes its $10x gain into account in Year 3, and S takes its $30x of loss into account in Year 3 to reflect the difference between B's $10x gain and the $20x recomputed loss.

(f) *Recapture income.* The facts are the same as in paragraph (a) of this *Example 5,* except that S bought depreciable property (rather than land) for $100x, claimed depreciation deductions, and reduced the property's basis to $70x before Year 1. (To simplify the example, B's depreciation is disregarded.) If the intercompany sale of property had been a transfer between divisions of a single corporation, $30x of the $40x gain from the sale to X would be section 1245 gain (which is ineligible for installment reporting) and $10x would be section 1231 gain (which is eligible for installment reporting). On a separate entity basis, S would have $30x of section 1245 gain and B would have $10x of section 1231 gain. Accordingly, the attributes are not redetermined under paragraph (c)(1)(i) of this section. All of B's $10x gain is eligible for installment reporting and is taken into account $5x each in Years 4 and 5 (and is subject to the interest charge under section 453A(c)). S's $30x gain is taken into account in Year 3 to reflect the difference between B's $0 gain taken into account and the $30x of recomputed gain. (If S had bought the depreciable property for $110x and its recomputed basis under section 1245 had been $110x (rather than $100x), B's $10x gain and S's $30x gain would both be recapture income ineligible for installment reporting.)

Example 6. Intercompany sale of installment obligation. (a) *Facts.* S holds land for investment with a basis of $70x. On January 1 of Year 1, S sells the land to X in exchange for X's $100x note, and S reports its gain on the installment method under section 453. X's note bears interest at a market rate of interest in excess of the applicable Federal rate, and provides for principal payments of $50x in Year 5 and $50x in Year 6. Section 453A applies to X's note. On July 1 of Year 3, S sells X's note to B for $100x, resulting in $30x gain from S's prior sale of the land to X under section 453B(a).

(b) *Timing and attributes.* S's sale of X's note to B is an intercompany transaction, and S's $30x gain is intercompany gain. S takes $15x of the gain into account in each of Years 5 and 6 to reflect the $15x difference in each year between B's $0 gain taken into account and the $15x recomputed gain. S's gain continues to be treated as its gain from the sale to X, and the deferred tax liability remains subject to the interest charge under section 453A(c).

(c) *Worthlessness.* The facts are the same as in paragraph (a) of this *Example 6,* except that X's note becomes worthless on December 1 of Year 3 and B has a $100x short-term capital loss under section 165(g) on a separate entity basis. Under paragraph (c)(1)(ii) of this section, B's holding period for X's note is aggregated with S's holding period. Thus, B's loss is a long- term capital loss. S takes its $30x gain into account in Year 3 to reflect the $30x difference between B's $100x loss taken into account and the $70x recomputed loss. Under paragraph (c)(1)(i) of this section, S's gain is long-term capital gain.

(d) *Pledge.* The facts are the same as in paragraph (a) of this *Example 6,* except that, on December 1 of Year 3, B borrows $100x from an unrelated bank and secures the indebtedness with X's note. X's note remains subject to section 453A(d) following the sale to B. Under section 453A(d), B's $100x of proceeds from the secured indebtedness is treated as an amount received on December 1 of Year 3 by B on X's note. Thus, S takes its entire $30x gain into account in Year 3.

Example 7. Performance of services. (a) *Facts.* S is a driller of water wells. B operates a ranch in a remote location, and B's taxable income from the ranch is not subject to section 447. B's ranch requires water to maintain its cattle. During Year 1, S drills an artesian well on B's ranch in exchange for $100 from B, and S incurs $80 of expenses (e.g., for employees and equipment). B capitalizes its $100 cost for the well under section 263, and takes into account $10 of cost recovery deductions in each of Years 2 through 11. Under its separate entity method of accounting, S would take its income and expenses into account in Year 1. If S and B were divisions of a single corporation, the costs incurred in drilling the well would be capitalized.

(b) *Definitions.* Under paragraph (b)(1) of this section, the service transaction is an intercompany transaction, S is the selling member, and B is the buying member. Under paragraph (b)(2)(ii) of this section, S's $100 of income and $80 of related expenses are both included in determining its intercompany income of $20.

(c) *Timing and attributes.* S's $20 of intercompany income is taken into account under the matching rule to reflect the $20 difference between B's corresponding items taken into account (based on its $100 cost basis in the well) and the recomputed corresponding items (based on the $80 basis that B would have if S and B were divisions of a single corporation and B's basis were determined by reference to S's $80 of expenses). In

Year 1, S takes into account $80 of its income and the $80 of expenses. In each of Years 2 through 11, S takes $2 of its $20 intercompany income into account to reflect the annual $2 difference between B's $10 of cost recovery deductions taken into account and the $8 of recomputed cost recovery deductions. S's $100 income and $80 expenses, and B's cost recovery deductions, are ordinary items (because S's and B's items would be ordinary on a separate entity basis, the attributes are not redetermined under paragraph (c)(1)(i) of this section). If S's offsetting $80 of income and expense would not be taken into account in the same year under its separate entity method of accounting, they nevertheless must be taken into account under this section in a manner that clearly reflects consolidated taxable income. See paragraph (a)(3)(i) of this section.

(d) *Sale of capitalized services.* The facts are the same as in paragraph (a) of this *Example 7,* except that B sells the ranch before Year 11 and recognizes gain attributable to the well. To the extent of S's income taken into account as a result of B's cost recovery deductions, as well as S's offsetting $80 of income and expense, the timing and attributes are determined in the manner provided in paragraph (c) of this *Example 7.* The attributes of the remainder of S's $20 of income and B's gain from the sale are redetermined to produce the same effect on consolidated taxable income as if S and B were divisions of a single corporation. Accordingly, S's remaining intercompany income is treated as recapture income or section 1231 gain, even though it is from S's performance of services.

Example 8. Rental of property. B operates a ranch that requires grazing land for its cattle. S owns undeveloped land adjoining B's ranch. On January 1 of Year 1, S leases grazing rights to B for Year 1. B's $100 rent expense is deductible for Year 1 under its separate entity accounting method. Under paragraph (b)(1) of this section, the rental transaction is an intercompany transaction, S is the selling member, and B is the buying member. S takes its $100 of income into account in Year 1 to reflect the $100 difference between B's rental deduction taken into account and the $0 recomputed rental deduction. S's income and B's deduction are ordinary items (because S's intercompany item and B's corresponding item would both be ordinary on a separate entity basis, the attributes are not redetermined under paragraph (c)(1)(i) of this section).

Example 9. Intercompany sale of a partnership interest. (a) *Facts.* S owns a 20% interest in the capital and profits of a general partnership. The partnership holds land for investment with a basis equal to its value, and operates depreciable assets which have value in excess of basis. S's basis in its partnership interest equals its share of the adjusted basis of the partnership's land and depreciable assets. The partnership has an election under section 754 in effect. On January 1 of Year 1, S sells its partnership interest to B at a gain. During Years 1 through 10, the partnership depreciates the operating assets, and B's depreciation deductions from the partnership reflect the increase in the basis of the depreciable assets under section 743(b).

(b) *Timing and attributes.* S's gain is taken into account during Years 1 through 10 to reflect the difference in each year between B's depreciation deductions from the partnership taken into account and the recomputed depreciation deductions from the partnership. Under paragraphs (c)(1)(i) and (c)(4)(i) of this section, S's gain taken into account is ordinary income. (The acceleration rule does not apply to S's gain as a result of the section 743(b) adjustment, because the adjustment is solely with respect to B and therefore no nonmember reflects any part of the intercompany transaction.)

(c) *Partnership sale of assets.* The facts are the same as in paragraph (a) of this *Example 9,* and the partnership sells some of its depreciable assets to X at a gain on December 31 of Year 4. In addition to the intercompany gain taken into account as a result of the partnership's depreciation, S takes intercompany gain into account in Year 4 to reflect the difference between B's partnership items taken into account from the sale (which reflect the basis increase under section 743(b)) and the recomputed partnership items. The attributes of S's additional gain are redetermined to produce the same effect on consolidated taxable income as if S and B were divisions of a single corporation (recapture income or section 1231 gain).

(d) *B's sale of partnership interest.* The facts are the same as in paragraph (a) of this *Example 9,* and on December 31 of Year 4, B sells its partnership interest to X at no gain or loss. In addition to the intercompany gain taken into account as a result of the partnership's depreciation, the remaining balance of S's intercompany gain is taken into account in Year 4 to reflect the difference between B's $0 gain taken into account from the sale of the partnership interest and the recomputed gain. The character of S's remaining intercompany item and B's corresponding item are determined on a separate entity basis under section 751, and then redetermined to the extent necessary to produce the same effect as treating the intercompany transaction as occurring between divisions of a single corporation.

(e) *No section 754 election.* The facts are the same as in paragraph (d) of this *Example 9,* except that the partnership does not have a section 754 election in effect, and B recognizes a capital loss from its sale of the partnership interest to X on December 31 of Year 4. Because there is no difference between B's depreciation deductions from the partnership taken into account and the recomputed depreciation deductions, S does not take any of its gain into account during Years 1 through 4 as a result of B's partnership's items. Instead, S's entire intercompany gain is taken into account in Year 4 to reflect the difference between B's loss taken into account from the sale to X and the recomputed gain or loss.

Example 10. Net operating losses subject to section 382 or the SRLY rules. (a) *Facts.* On January 1 of Year 1, P buys all of S's stock. S has net operating loss carryovers from prior years. P's acquisition results in an ownership change under section 382 with respect to S's loss carryovers, and S has a net unrealized built-in gain (within the meaning of section 382(h)(3)). S owns nondepreciable property with a $70 basis and $100 value. On July 1 of Year 3, S sells the property to B for $100, and its $30 gain is recognized built-in gain (within the meaning of section 382(h)(2)) on a separate entity basis. On December 1 of Year 5, B sells the property to X for $90.

(b) *Timing and attributes.* S's $30 gain is taken into account in Year 5 to reflect the $30 difference between B's $10 loss taken into account and the recomputed $20 gain. S and B are treated as divisions of a single corporation for purposes of applying section 382 in connection with the intercompany transaction. Under a single entity analysis, the single corporation has losses subject to limitation under section 382, and this limitation may be increased under section 382(h) if the single corporation has recognized built-in gain with respect to those losses. B's $10 corresponding loss offsets $10 of S's intercompany gain, and thus, under paragraph (c)(4)(i) of this section, $10 of S's intercompany gain is redetermined not to be recognized built-in gain. S's remaining $20 intercompany gain continues to be treated as recognized built-in gain.

(c) *B's recognized built-in gain.* The facts are the same as in paragraph (a) of this *Example 10,* except that the property declines in value after S becomes a member of the P group, S sells the property to B for its $70 basis, and B sells the property to X for $90 during Year 5. Treating S and B as divisions of a single corporation, S's sale to B does not cause the property to cease to be built-in gain property. Thus, B's $20 gain from its sale to X is recognized built-in gain that increases the section 382 limitation applicable to S's losses.

(d) *SRLY limitation.* The facts are the same as in paragraph (a) of this *Example 10,* except that S's net operating loss carryovers are subject to the separate return limitation year (SRLY) rules. See §1.1502–21T(c). The application of the SRLY rules depends on S's status as a separate corporation having losses from separate return limitation years. Under paragraph (c)(5), the attribute of S's intercompany item as it relates to S's SRLY limitation is not redetermined, because the SRLY limitation depends on S's special status. Accordingly, S's $30 intercompany gain is included in determining its SRLY limitation for Year 5.

Example 11. Section 475. (a) *Facts.* S, a dealer in securities within the meaning of section 475(c), owns a security with a basis of $70. The security is held for sale to customers and is not identified under section 475(b) as within an exception to marking to market. On July 1 of Year 1, S sells the security to B for $100. B is not a dealer and holds the security for investment. On December 31 of Year 1, the fair market value of the security is $100. On July 1 of Year 2, B sells the security to X for $110.

(b) *Attributes.* Under section 475, a dealer in securities can treat a security as within an exception to marking to market under section 475(b) only if it timely identifies the security as so described. Under the matching rule, attributes must be redetermined by treating S and B as divisions of a single corporation. As a result of S's activities, the single corporation is treated as a dealer with respect to securities, and B must continue to mark to market the security acquired from S. Thus, B's corresponding items and the recomputed corresponding items are determined by continuing to treat the security as not within an exception to marking to market. Under section 475(d)(3), it is possible for the character of S's intercompany items to differ from the character of B's corresponding items.

(c) *Timing and character.* S has a $30 gain when it disposes of the security by selling it to B. This gain is intercompany gain that is taken into account in Year 1 to reflect the $30 difference between B's $0 gain taken into account from marking the security to market under section 475 and the recomputed $30 gain that would be taken into account. The character of S's gain and B's gain are redetermined as if the security were transferred between divisions. Accordingly, S's gain is ordinary income under section 475(d)(3)(A)(i), but under section 475(d)(3)(B)(ii) B's $10 gain from its sale to X is capital gain that is taken into account in Year 2.

(d) *Nondealer to dealer.* The facts are the same as in paragraph (a) of this Example 11, except that S is not a dealer and holds the security for investment with a $70 basis, B is a dealer to which section 475 applies and, immediately after acquiring the security from S for $100, B holds the security for sale to customers in the ordinary course of its trade or business. Because S is not a dealer and held the security for investment, the security is treated as properly identified as held for investment under section 475(b)(1) until it is sold to B. Under section 475(b)(3), the security thereafter ceases to be described in section 475(b)(1) because B holds the security for sale to customers. The mark-to-market requirement applies only to changes in the value of the security after B's acquisition. B's mark-to-market gain taken into account and the recomputed mark-to-market gain are both determined based on changes from the $100 value of the security at the time of B's acquisition. There is no difference between B's $0 mark-to-market gain taken into account in Year 1 and the $0 recomputed mark-to-market gain. Therefore, none of S's gain is taken into account in Year 1 as a result of B's marking the security to market in Year 1. In Year 2, B has a $10 gain when it disposes of the security by selling it to X, but would have had a $40 gain if S and B were divisions of a single corporation. Thus, S takes its $30 gain into account in Year 2 under the matching rule. Under section 475(d)(3), S's gain is capital gain even though B's subsequent gain or loss from marking to market or disposing of the security is ordinary gain or loss. If B disposes of the security at a $10 loss in Year 2, S's gain taken into account in Year 2 is still capital because on a single entity basis section 475(d)(3) would provide for $30 of capital gain and $10 of ordinary loss. Because the attributes are not redetermined under paragraph (c)(1)(i) of this section, paragraph (c)(4)(i) of this section does not apply. Furthermore, if B held the security for investment, and so identified the security under section 475(b)(1), the security would continue to be excepted from marking to market.

Example 12. Section 1092. (a) *Facts.* On July 1 of Year 1, S enters into offsetting long and short positions with respect to actively traded personal property. The positions are not section 1256 contracts, and they are the only positions taken into account for purposes of applying section 1092. On August 1 of Year 1, S sells the long position to B at an $11 loss, and there is $11 of unrealized gain in the offsetting short position. On December 1 of Year 1, B sells the long position to X at no gain or loss. On December 31 of Year 1, there is still $11 of unrealized gain in the short position. On February 1 of Year 2, S closes the short position at an $11 gain.

(b) *Timing and attributes.* If the sale from S to B were a transfer between divisions of a single corporation, the $11 loss on the sale to X would have been deferred under section 1092(a)(1)(A). Accordingly, there is no difference in Year 1 between B's corresponding item of $0 and the recomputed corresponding item of $0. S takes its $11 loss into account in Year 2 to reflect the difference between B's corresponding item of $0 taken into account in Year 2 and the recomputed loss of $11 that would have been taken into account in Year 2 under section 1092(a)(1)(B) if S and B had been divisions of a single corporation. (The results are the same under section 267(f)).

Example 13. Manufacturer incentive payments. (a) *Facts.* B is a manufacturer that sells its products to independent dealers for resale. S is a credit company that offers financing, including financing to customers of the dealers. S also purchases the product from the dealers for lease to customers of the dealers. During Year 1, B initiates a program of incentive payments to the dealers' customers. Under B's program, S buys a product from an independent dealer for $100 and leases it to a nonmember. S pays $90 to the dealer for the product, and assigns to the dealer its $10 incentive payment from B. Under their separate entity accounting methods, B would deduct the $10 incentive payment in Year 1 and S would take a $90 basis in the product. Assume that if S and B were divisions of a single corporation, the $10 payment would not be deductible and the basis of the property would be $100.

(b) *Timing and attributes.* Under paragraph (b)(1) of this section, the incentive payment transaction is an intercompany transaction. Under paragraph (b)(2)(iii) of this section, S has a $10 intercompany item not yet taken into account under its separate entity method of accounting. Under the matching rule, S takes its intercompany item into account to reflect the difference between B's corresponding item taken into account and the recomputed corresponding item. In Year 1 there is a $10 difference between B's $10 deduction taken into account and the $0 recomputed deduction. Accordingly, under the matching rule S must take the $10 incentive payment into account as intercompany income in Year 1. S's $10 of income and B's $10 deduction are ordinary items. S's basis in the product is $100 rather than the $90 it would be under S's separate entity method of accounting. S's additional $10 of basis in the product is recovered based on subsequent events (e.g., S's cost recovery deductions or its sale of the product).

Example 14. Source of income under section 863. (a) *Intercompany sale with no independent factory price.* S manufactures inventory in the United States, and recognizes $75 of income on sales to B in Year 1. B distributes the inventory in Country Y and recognizes $25 of income on sales to X, also in Year 1. Title passes from S to B, and from B to X, in Country Y. There is no independent factory price (as defined in regulations under section 863) for the sale from S to B. Under the matching rule, S's $75 intercompany income and B's $25 corresponding income are taken into account in Year 1. In determining the source of income, S and B are treated as divisions of a single corporation, and section 863 applies as if $100 of income were recognized from producing in the United States and selling in Country Y. Assume that applying the section 863 regulations on a single entity basis, $50 is treated as foreign source income and $50 as U.S. source income. Assume further that on a separate entity basis, S would have $37.50 of foreign source income and $37.50 of U.S. source income, and that all of B's $25 of income would be foreign source income. Thus, on a separate entity basis, S and B would have $62.50 of combined foreign source income and $37.50 of U.S. source income. Accordingly, under single entity treatment, $12.50 that would be treated as foreign source income on a separate entity basis is redetermined to be U.S. source income. Under paragraph (c)(1)(i) of this section, attributes are redetermined only to the extent of the $12.50 necessary to achieve the same effect as a single entity determination. Under paragraph (c)(4)(ii) of this section, the redetermined attribute must be allocated between S and B using a reasonable method. For example, it may be reasonable to recharacterize only S's foreign source income as U.S. source income because only S would have any U.S. source income on a separate entity basis. However, it may also be reasonable to allocate the redetermined attribute between S and B in proportion to their separate entity amounts of foreign source income (in a 3:2 ratio, so that $7.50 of S's foreign source income is redetermined to be U.S. source and $5 of B's foreign source income is redetermined to be U.S. source), provided the same method is applied to all similar transactions within the group.

(b) *Intercompany sale with independent factory price.* The facts are the same as in paragraph (a) of this *Example 14,* except that an independent factory price exists for the sale by S to B such that $70 of S's $75 of income is attributable to the production function. Assume that on a single entity basis, $70 is treated as U.S. source income (because of the existence of the independent factory price) and $30 is treated as foreign source income. Assume that on a separate entity basis, $70 of S's income would be treated as U.S. source, $5 of S's income would be treated as foreign source income, and all of B's $25 income would be treated as foreign source income. Because the results are the same on a single entity basis and a separate entity basis, the attributes are not redetermined under paragraph (c)(1)(i) of this section.

(c) *Sale of property reflecting intercompany services or intangibles.* S earns $10 of income performing services in the United States for B. B capitalizes S's fees into the basis of property that it manufactures in the United States and sells to an unrelated person in Year 1 at a $90 profit, with title passing in Country Y. Under the matching rule, S's $10 income and B's $90 income are taken into account in Year 1. In determining the source of income, S and B are treated as divisions of a single corporation, and section 863 applies as if $100 were earned from manufacturing in the United States and selling in Country Y. Assume that on a single entity basis $50 is treated as foreign source income and $50 is treated as U.S. source income. Assume that on a separate entity basis, S would have $10 of U.S. source income, and B would have $45 of foreign source income and $45 of U.S. source income. Accordingly, under single entity treatment, $5 of income that would be treated as U.S. source income on a separate entity basis is redetermined to be foreign source income. Under paragraph (c)(1)(i) of this section, attributes are redetermined only to the extent of the $5 necessary to achieve the same effect as a single entity determination. Under paragraph (c)(4)(ii) of this section, the redetermined attribute must be allocated between S and B using a reasonable method. (If instead of performing services, S licensed an intangible to B and earned $10 that would be treated as U.S. source income on a separate entity basis, the results would be the same.)

Example 15. Section 1248. (a) *Facts.* On January 1 of Year 1, S forms FT, a wholly owned foreign subsidiary, with a $10 contribution. During Years 1 through 3, FT has earnings and profits of $40. None of the earnings and profits is taxed as subpart F income under section 951, and FT distributes no dividends to S during this period. On January 1 of Year 4, S sells its FT stock to B for $50. While B owns FT, FT has a deficit in earnings and profits of $10. On July 1 of Year 6, B sells its FT stock for $70 to X, an unrelated foreign corporation.

(b) *Timing.* S's $40 of intercompany gain is taken into account in Year 6 to reflect the difference between B's $20 of gain taken into account and the $60 recomputed gain.

(c) *Attributes.* Under the matching rule, the attributes of S's intercompany gain and B's corresponding gain are redetermined to have the same effect on consolidated taxable income (and consolidated tax liability) as if S and B were divisions of a single corporation. On a single entity basis, there is $60 of gain and the portion which is characterized as a dividend under section 1248 is determined on the basis of FT's $30 of earnings and profits at the time of the sale of FT to X (the sum of FT's $40 of earnings and profits while held by S and FT's $10 deficit in earnings and profits while held by B). Therefore, $30 of the $60 gain is treated as a dividend under section 1248. The remaining $30 is treated as capital gain. On a separate entity basis, all of S's $40 gain would be treated as a dividend under section 1248 and all of B's $20 gain would be treated as capital gain. Thus, as a result of the single entity determination, $10 that would be treated as a dividend under section 1248 on a separate entity basis is redetermined to be capital gain. Under paragraph (c)(4)(ii) of this section, this redetermined attribute must be allocated between S's intercompany item and B's corresponding item by using a reasonable method. On a separate entity basis, only S would have any amount treated as a dividend under section 1248 available for redetermination. Accordingly, $10 of S's income is redetermined to be not subject to section 1248, with the result that $30 of S's intercompany gain is treated as a dividend and the remaining $10 is treated as capital gain. All of B's corresponding gain is treated as capital gain, as it would be on a separate entity basis.

(d) *B has loss.* The facts are the same as in paragraph (a) of this *Example 15,* except that FT has no earnings and profits or deficit in earnings and profits while B owns FT, and B sells the FT stock to X for $40. On a single entity basis, there is $30 of gain, and section 1248 is applied on the basis of FT's $40 earnings and profits at the time of the sale of FT to X. Under section 1248, the amount treated as a dividend is limited to $30 (the amount of the gain). On a separate entity basis, S's entire $40 gain would be treated as a dividend under section 1248, and B's $10 loss would be a capital loss. B's $10 corresponding loss offsets $10 of S's intercompany gain and, under paragraph (c)(4)(i) of this section, the attributes of B's corresponding item control. Accordingly, $10 of S's gain must be redetermined to be capital gain. B's $10 loss remains a capital loss. (If, however, S sold FT to B at a loss and B sold FT to X at a gain, it may be unreasonable for the attributes of B's corresponding gain to control S's offsetting intercompany loss. If B's attributes were to control, for example, the group could possibly claim a larger foreign tax credit than would be available if S and B were divisions of a single corporation.)

(d) *Acceleration rule.* S's intercompany items and B's corresponding items are taken into account under this paragraph (d) to the extent they cannot be taken into account to produce the effect of treating S and B as divisions of a single corporation. For this purpose, the following rules apply:

(1) *S's items*—(i) *Timing.* S takes its intercompany items into account to the extent they cannot be taken into account to produce the effect of treating S and B as divisions of a single corporation. The items are taken into account immediately before it first becomes impossible to achieve this effect. For this purpose, the effect cannot be achieved—

(A) To the extent an intercompany item or corresponding item will not be taken into account in determining the group's consolidated taxable income (or consolidated tax liability) under the matching rule (for example, if S or B becomes a nonmember, or if S's intercompany item is no longer reflected in the difference between B's basis (or an amount equivalent to basis) in property and the basis (or equivalent amount) the property would have if S and B were divisions of a single corporation); or

(B) To the extent a nonmember reflects, directly or indirectly, any aspect of the intercompany transaction (e.g., if B's cost basis in property purchased from S is reflected by a nonmember under section 362 following a section 351 transaction).

(ii) *Attributes.* The attributes of S's intercompany items taken into account under this paragraph (d)(1) are determined as follows:

(A) *Sale, exchange, or distribution.* If the item is from an intercompany sale, exchange, or distribution of property, its attributes are determined under the principles of the matching rule as if B sold the property, at the time the item is taken into account under paragraph (d)(1)(i) of this section, for a cash payment equal to B's adjusted basis in the property (i.e., at no net gain or loss), to the following person:

(*1*) *Property leaves the group.* If the property is owned by a nonmember immediately after S's item is taken into account, B is treated as selling the property to that nonmember. If the nonmember is related for purposes of any provision of the Internal Revenue Code or regulations to any party to the intercompany transaction (or any related transaction) or to the common parent, the nonmember is treated as related to B for purposes of that provision. For example, if the nonmember is related to P within the meaning of section 1239(b), the deemed sale is treated as being described in section 1239(a). See paragraph (j)(6) of this section, under which property is not treated as being owned by a nonmember if it is owned by the common parent after the common parent becomes the only remaining member.

(*2*) *Property does not leave the group.* If the property is not owned by a nonmember immediately after S's item is taken into account, B is treated as selling the property to an affiliated corporation that is not a member of the group.

(B) *Other transactions.* If the item is from an intercompany transaction other than a sale, exchange, or distribution of property (e.g., income from S's services capitalized by B), its attributes are determined on a separate entity basis.

(2) *B's items*—(i) *Attributes.* The attributes of B's corresponding items continue to be redetermined under the principles of the matching rule, with the following adjustments:

(A) If S and B continue to join with each other in the filing of consolidated returns, the attributes of B's corresponding items (and any applicable holding periods) are determined by continuing to treat S and B as divisions of a single corporation.

(B) Once S and B no longer join with each other in the filing of consolidated returns, the attributes of B's corresponding items are determined as if the S division (but not the B division) were transferred by the single corporation to an unrelated person. Thus, S's activities (and any applicable holding period) before the intercompany transaction continue to affect the attributes of the corresponding items (and any applicable holding period).

(ii) *Timing.* If paragraph (d)(1) of this section applies to S, B nevertheless continues to take its corresponding items into account under its accounting method. However, the redetermination of the attributes of a corresponding item under this paragraph (d)(2) might affect its timing.

(3) *Examples.* The acceleration rule of this paragraph (d) is illustrated by the following examples.

Example 1. Becoming a nonmember—timing. (a) *Facts.* S owns land with a basis of $70. On January 1 of Year 1, S sells the land to B for $100. On July 1 of Year 3, P sells 60% of S's stock to X for $60 and, as a result, S becomes a nonmember.

(b) *Matching rule.* Under the matching rule, none of S's $30 gain is taken into account in Years 1 through 3 because there is no difference between B's $0 gain or loss taken into account and the recomputed gain or loss.

(c) *Acceleration of S's intercompany items.* Under the acceleration rule of paragraph (d) of this section, S's $30 gain is taken into account in computing consolidated taxable income (and consolidated tax liability) immediately before the effect of treating S and B as divisions of a single corporation cannot be produced. Because the effect cannot be produced once S becomes a nonmember, S takes its $30 gain into account in Year 3 immediately before becoming a nonmember. S's gain is reflected under § 1.1502–32 in P's basis in the S stock immediately before P's sale of the stock. Under § 1.1502–32, P's basis in the S stock is increased by $30, and therefore P's gain is reduced (or loss is increased) by $18 (60% of $30). See also §§ 1.1502–33 and 1.1502–76(b). (The results would be the same if S sold the land to B in an installment sale to which section 453 would otherwise apply, because S must take its intercompany gain into account under this section.)

(d) *B's corresponding items.* Notwithstanding the acceleration of S's gain, B continues to take its corresponding items into account under its accounting method. Thus, B's items from the land are taken into account based on subsequent events (e.g., its sale of the land).

(e) *Sale of B's stock.* The facts are the same as in paragraph (a) of this *Example 1,* except that P sells 60% of B's stock (rather than S stock) to X for $60 and, as a result, B becomes a nonmember. Because the effect of treating S and B as divisions of a single corporation cannot be produced once B becomes a nonmember, S takes its $30 gain into account under the acceleration rule immediately before B becomes a nonmember. (The results would be the same if S sold the land to B in an installment sale to which section 453 would otherwise apply, because S must take its intercompany gain into account under this section.)

(f) *Discontinue filing consolidated returns.* The facts are the same as in paragraph (a) of this *Example 1,* except that the P group receives permission under § 1.1502–75(c) to discontinue filing consolidated returns beginning in Year 3. Under the acceleration rule, S takes its $30 gain into account on December 31 of Year 2.

(g) *No subgroups.* The facts are the same as in paragraph (a) of this *Example 1,* except that P simultaneously sells all of the stock of both S and B to X (rather than 60% of S's stock), and S and B become members of the X consolidated group. Because the effect of treating S and B as divisions of a single corporation in the P group cannot be produced once S and B become nonmembers, S takes its $30 gain into account under the acceleration rule immediately before S and B become nonmembers. (Paragraph (j)(5) of this section does not apply to treat the X consolidated group as succeeding to the P group because the X group acquired only the stock of S and B.) However, so long as S and B continue to join with each other in the filing of consolidated returns, B continues to treat S and B as divisions of a single corporation for purposes of determining the attributes of B's corresponding items from the land.

Example 2. Becoming a nonmember—attributes. (a) *Facts.* S holds land for investment with a basis of $70. On January 1 of

Year 1, S sells the land to B for $100. B holds the land for sale to customers in the ordinary course of business, and expends substantial resources over a two-year period subdividing, developing, and marketing the land. On July 1 of Year 3, before B has sold any of the land, P sells 60% of S's stock to X for $60 and, as a result, S becomes a nonmember.

(b) *Attributes.* Under the acceleration rule, the attributes of S's gain are redetermined under the principles of the matching rule as if B sold the land to an affiliated corporation that is not a member of the group for a cash payment equal to B's adjusted basis in the land (because the land continues to be held within the group). Thus, whether S's gain is capital gain or ordinary income depends on the activities of both S and B. Because S and B no longer join with each other in the filing of consolidated returns, the attributes of B's corresponding items (e.g., from its subsequent sale of the land) are redetermined under the principles of the matching rule as if the S division (but not the B division) were transferred by the single corporation to an unrelated person at the time of P's sale of the S stock. Thus, B continues to take into account the activities of S with respect to the land before the intercompany transaction.

(c) *Depreciable property.* The facts are the same as in paragraph (a) of this *Example 2*, except that the property sold by S to B is depreciable property. Section 1239 applies to treat all of S's gain as ordinary income because it is taken into account as a result of B's deemed sale of the property to a affiliated corporation that is not a member of the group (a related person within the meaning of section 1239(b)).

Example 3. Selling member's disposition of installment note. (a) *Facts.* S owns land with a basis of $70. On January 1 of Year 1, S sells the land to B in exchange for B's $110 note. The note bears a market rate of interest in excess of the applicable Federal rate, and provides for principal payments of $55 in Year 4 and $55 in Year 5. On July 1 of Year 3, S sells B's note to X for $110.

(b) *Timing.* S's intercompany gain is taken into account under this section, and not under the rules of section 453. Consequently, S's sale of B's note does not result in its intercompany gain from the land being taken into account (e.g., under section 453B). The sale does not prevent S's intercompany items and B's corresponding items from being taken into account in determining the group's consolidated taxable income under the matching rule, and X does not reflect any aspect of the intercompany transaction (X has its own cost basis in the note). S will take the intercompany gain into account under the matching rule or acceleration rule based on subsequent events (e.g., B's sale of the land). See also paragraph (g) of this section for additional rules applicable to B's note as an intercompany obligation.

Example 4. Cancellation of debt and attribute reduction under section 108(b). (a) *Facts.* S holds land for investment with a basis of $0. On January 1 of Year 1, S sells the land to B for $100. B also holds the land for investment. During Year 3, B is insolvent and B's nonmember creditors discharge $60 of B's indebtedness. Because of insolvency, B's $60 discharge is excluded from B's gross income under section 108(a), and B reduces the basis of the land by $60 under sections 108(b) and 1017.

(b) *Acceleration rule.* As a result of B's basis reduction under section 1017, $60 of S's intercompany gain will not be taken into account under the matching rule (because there is only a $40 difference between B's $40 basis in the land and the $0 basis the land would have if S and B were divisions of a single corporation). Accordingly, S takes $60 of its gain into account under the acceleration rule in Year 3. S's gain is long-term capital gain, determined under paragraph (d)(1)(ii) of this section as if B sold the land to an affiliated corporation that is not a member of the group for $100 immediately before the basis reduction.

(c) *Purchase price adjustment.* Assume instead that S sells the land to B in exchange for B's $100 purchase money note, B remains solvent, and S subsequently agrees to discharge $60 of the note as a purchase price adjustment to which section 108(e)(5) applies. Under applicable principles of tax law, $60 of S's gain and $60 of B's basis in the land are eliminated and never taken into account. Similarly, the note is not treated as satisfied and reissued under paragraph (g) of this section.

Example 5. Section 481. (a) *Facts.* S operates several trades or businesses, including a manufacturing business. S receives permission to change its method of accounting for valuing inventory for its manufacturing business. S increases the basis of its ending inventory by $100, and the related $100 positive section 481(a) adjustment is to be taken into account ratably over six taxable years, beginning in Year 1. During Year 3, S sells all of the assets used in its manufacturing business to B at a gain. Immediately after the transfer, B does not use the same inventory valuation method as S. On a separate entity basis, S's sale results in an acceleration of the balance of the section 481(a) adjustment to Year 3.

(b) *Timing and attributes.* Under paragraph (b)(2) of this section, the balance of S's section 481(a) adjustment accelerated to Year 3 is intercompany income. However, S's $100 basis increase before the intercompany transaction eliminates the related difference for this amount between B's corresponding items taken into account and the recomputed corresponding items in subsequent periods. Because the accelerated section 481(a) adjustment will not be taken into account in determining the group's consolidated taxable income (and consolidated tax liability) under the matching rule, the balance of S's section 481 adjustment is taken into account under the acceleration rule as ordinary income at the time of the intercompany transaction. (If S's sale had not resulted in accelerating S's section 481(a) adjustment on a separate entity basis, S would have no intercompany income to be taken into account under this section.)

(e) *Simplifying rules*—(1) *Dollar-value LIFO inventory methods*—(i) *In general.* This paragraph (e)(1) applies if either S or B uses a dollar-value LIFO inventory method to account for intercompany transactions. Rather than applying the matching rule separately to each intercompany inventory transaction, this paragraph (e)(1) provides methods to apply an aggregate approach that is based on dollar-value LIFO inventory accounting. Any method selected under this paragraph (e)(1) must be applied consistently.

(ii) *B uses dollar-value LIFO*—(A) *In general.* If B uses a dollar-value LIFO inventory method to account for its intercompany inventory purchases, and includes all of its inventory costs incurred for a year in its cost of goods sold for the year (that is, B has no inventory increment for the year), S takes into account all of its intercompany inventory items for the year. If B does not include all of its inventory costs incurred for the year in its cost of goods sold for the year (that is, B has an inventory increment for the year), S does not take all of its intercompany inventory income or loss into account. The amount not taken into account is determined under either the increment averaging method of paragraph (e)(1)(ii)(B) of this section or the increment valuation method of paragraph (e)(1)(ii)(C) of this section. Separate computations are made for each pool of B that receives intercompany purchases from S, and S's amount not taken into account is layered based on B's LIFO inventory layers.

(B) *Increment averaging method.* Under this paragraph (e)(1)(ii)(B), the amount not taken into account is the amount of S's intercompany inventory income or loss multiplied by the ratio of the LIFO value of B's current-year costs of its layer of increment to B's total inventory costs incurred for the year under its LIFO inventory method. If B includes more than its inventory costs incurred during any subsequent year in its cost of goods sold (a decrement), S takes into account the intercompany inventory income or loss layers in the same manner and proportion as B takes into account its inventory decrements.

(C) *Increment valuation method.* Under this paragraph (e)(1)(ii)(C), the amount not taken into account is the amount of S's intercompany inventory income or loss for the appropriate period multiplied by the ratio of the LIFO value of B's current-year costs of its layer of increment to B's total inventory costs incurred in the appropriate period under its LIFO inventory method. The principles of paragraph (e)(1)(ii)(B) of this section otherwise apply. The appropriate period is the period of B's year used to determine its current-year costs.

(iii) *S uses dollar-value LIFO.* If S uses a dollar-value LIFO inventory method to account for its intercompany inventory sales, S may use any reasonable method of allocating its LIFO inventory costs to intercompany transactions. LIFO inventory costs include costs of prior layers if a decrement occurs. For example, a reasonable allocation of the most recent costs incurred during the consolidated return year can be used to compute S's intercompany inventory income or loss for the year if S has an inventory increment and uses the earliest acquisitions costs method, but S must apportion costs from the most recent appropriate layers of increment if an inventory decrement occurs for the year.

(iv) *Other reasonable methods.* S or B may use a method not specifically provided in this paragraph (e)(1) that is expected to reasonably take into account intercompany items and corresponding items from intercompany inventory transactions. However, if the method used results, for any year, in a cumulative amount of intercompany inventory items not taken into account by S that significantly exceeds the cumulative amount that would not be taken into account under paragraph (e)(1)(ii) or (iii) of this section, S must take into account for that year the amount necessary to eliminate the excess. The method is thereafter applied with appropriate adjustments to reflect the amount taken into account.

(v) *Examples.* The inventory rules of this paragraph (e)(1) are illustrated by the following examples.

Example 1. Increment averaging method. (a) *Facts.* Both S and B use a double-extension, dollar-value LIFO inventory method, and both value inventory increments using the earliest acquisitions cost valuation method. During Year 2, S sells 25 units of product Q to B on January 15 at $10/unit. S sells another 25 units on April 15, on July 15, and on September 15, at $12/unit. S's earliest cost of product Q is $7.50/unit and S's most recent cost of product Q is $8.00/unit. Both S and B have an inventory increment for the year. B's total inventory costs incurred during Year 2 are $6,000 and the LIFO value of B's Year 2 layer of increment is $600.

(b) *Intercompany inventory income.* Under paragraph (e)(1)(iii) of this section, S must use a reasonable method of allocating its LIFO inventory costs to intercompany transactions. Because S has an inventory increment for Year 2 and uses the earliest acquisitions cost method, a reasonable method of determining its intercompany cost of goods sold for product Q is to use its most recent costs. Thus, its intercompany cost of goods sold is $800 ($8.00 most recent cost, multiplied by 100 units sold to B), and its intercompany inventory income is $350 ($1,150 sales proceeds from B minus $800 cost).

(c) *Timing.* (i) Under the increment averaging method of paragraph (e)(1)(ii)(B) of this section, $35 of S's $350 of intercompany inventory income is not taken into account in Year 2, computed as follows:

$$\frac{\begin{array}{c}\text{LIFO value of B's Year}\\ \text{2 layer of increment}\end{array}}{\begin{array}{c}\text{B's total inventory}\\ \text{costs for Year 2}\end{array}} = \frac{\$600}{\$6{,}000} = 10\%$$

$$\frac{10\% \times \text{S's \$350 intercompany}}{\text{inventory income}} = \$35$$

(ii) Thus, $315 of S's intercompany inventory income is taken into account in Year 2 ($350 of total intercompany inventory income minus $35 not taken into account).

(d) *S incurs a decrement.* The facts are the same as in paragraph (a) of this *Example 1,* except that in Year 2, S incurs a decrement equal to 50% of its Year 1 layer. Under paragraph (e)(1)(iii) of this section, S must reasonably allocate the LIFO cost of the decrement to the cost of goods sold to B to determine S's intercompany inventory income.

(e) *B incurs a decrement.* The facts are the same as in paragraph (a) of this *Example 1,* except that B incurs a decrement in Year 2. S must take into account the entire $350 of Year 2 intercompany inventory income because all 100 units of product Q are deemed sold by B in Year 2.

Example 2. Increment valuation method. (a) The facts are the same as in Example 1. In addition, B's use of the earliest acquisition's cost method of valuing its increments results in B valuing its year-end inventory using costs incurred from January through March. B's costs incurred during the year are: $1,428 in the period January through March; $1,498 in the period April through June; $1,524 in the period July through September; and $1,550 in the period October through December. S's intercompany inventory income for these periods is: $50 in the period January through March ((25×$10) − (25×$8)); $100 in the period April through June ((25×$12) − (25×$8)); $100 in the period July through September ((25×$12) − (25×$8)); and $100 in the period October through December ((25×$12) − (25×$8)).

(b) *Timing.* (i) Under the increment valuation method of paragraph (e)(1)(ii)(C) of this section, $21 of S's $350 of intercompany inventory income is not taken into account in Year 2, computed as follows:

$$\frac{\text{LIFO value of B' s Year 2 layer of increment}}{\text{B' s total inventory costs from January through March of Year 2}} = \frac{\$600}{\$1{,}428} = 42\%$$

$$42\% \times \text{S' s \$50 intercompany inventory income for the period from January through March} = \$21$$

(ii) Thus, $329 of S's intercompany inventory income is taken into account in Year 2 ($350 of total intercompany inventory income minus $21 not taken into account).

(c) *B incurs a subsequent decrement.* The facts are the same as in paragraph (a) of this *Example 2.* In addition, assume that in Year 3, B experiences a decrement in its pool that receives intercompany purchases from S. B's decrement equals 20% of the base-year costs for its Year 2 layer. The fact that B has incurred a decrement means that all of its inventory costs incurred for Year 3 are included in cost of goods sold. As a result, S takes into account its entire amount of intercompany inventory income from its Year 3 sales. In addition, S takes into account $4.20 of its Year 2 layer of intercompany inventory income not already taken into account (20% of $21).

Example 3. Other reasonable inventory methods. (a) *Facts.* Both S and B use a dollar-value LIFO inventory method for their inventory transactions. During Year 1, S sells inventory to B and to X. Under paragraph (e)(1)(iv) of this section, to compute its intercompany inventory income and the amount of this income not taken into account, S computes its intercompany inventory income using the transfer price of the inventory items less a FIFO cost for the goods, takes into account these items based on a FIFO cost flow assumption for B's corresponding items, and the LIFO methods used by S and B are ignored for these computations. These computations are comparable to the methods used by S and B for financial reporting purposes, and the book methods and results are used for tax purposes. S adjusts the amount of intercompany inventory items not taken into account as required by section 263A.

(b) *Reasonable method.* The method used by S is a reasonable method under paragraph (e)(1)(iv) of this section if the cumulative amount of intercompany inventory items not taken into account by S is not significantly greater than the cumulative amount that would not be taken into account under the methods specifically described in paragraph (e)(1) of this section. If, for any year, the method results in a cumulative amount of intercompany inventory items not taken into account by S that significantly exceeds the cumulative amount that would not be taken into account under the methods specifically provided, S must take into account for that year the amount necessary to eliminate the excess. The method is thereafter applied with appropriate adjustments to reflect the amount taken into account (e.g., to prevent the amount from being taken into account more than once).

(2) *Reserve accounting*—(i) *Banks and thrifts.* Except as provided in paragraph (g)(3)(iv) of this section (deferral of items from an intercompany obligation), a member's addition to, or reduction of, a reserve for bad debts that is maintained under section 585 or 593 is taken into account on a separate entity basis. For example, if S makes a loan to a nonmember and subsequently sells the loan to B, any deduction for an addition to a bad debt reserve under section 585 and any recapture income (or reduced bad debt deductions) are taken into account on a separate entity basis rather than as intercompany items or corresponding items taken into account under this section. Any gain or loss of S from its sale of the loan to B is taken into account under this section, however, to the extent it is not attributable to recapture of the reserve.

(ii) *Insurance companies*—(A) *Direct insurance.* If a member provides insurance to another member in an intercompany transaction, the transaction is taken into account by both members on a separate entity basis. For example, if one member provides life insurance coverage for another member with respect to its employees, the premiums, reserve increases and decreases, and death benefit payments are determined and taken into account by both members on a separate entity basis rather than taken into account under this section as intercompany items and corresponding items.

(B) *Reinsurance*—(*1*) *In general.* Paragraph (e)(2)(ii)(A) of this section does not apply to a reinsurance transaction that is an intercompany transaction. For example, if a member assumes all or a portion of the risk on an insurance contract written by another member, the amounts transferred as reinsurance premiums, expense allowances, benefit reimbursements, reimbursed policyholder dividends, experience rating adjustments, and other similar items are taken into account under the matching rule and the acceleration rule. For purposes of this section, the assuming company is treated as B and the ceding company is treated as S.

(*2*) *Reserves determined on a separate entity basis.* For purposes of determining the amount of a member's increase or decrease in reserves, the amount of any reserve item listed in section 807(c) or 832(b)(5) resulting from a reinsurance transaction that is an intercompany transaction is determined on a separate entity basis. But see section 845, under which the Commissioner may allocate between or among the members any items, recharacterize any such items, or make any other adjustments necessary to reflect the proper source and character of the separate taxable income of a member.

(3) *Consent to treat intercompany transactions on a separate entity basis*—(i) *General rule.* The common parent may request consent to take into account on a separate entity basis items from intercompany transactions other than intercompany transactions with respect to stock or obligations of members. Consent may be granted for all items, or for items from a class or classes of transactions. The consent is effective only if granted in writing by the Internal Revenue Service. Unless revoked with the written consent of the Internal Revenue Service, the separate entity treatment applies to all affected intercompany transactions in the consolidated return year for which consent is granted and in all subsequent consolidated return years. Consent under this paragraph (e)(3) does not apply for purposes of taking into account losses and deductions deferred under section 267(f).

(ii) *Time and manner for requesting consent.* The request for consent described in paragraph (e)(3)(i) of this section must be made in the form of a ruling request. The request must be signed by the common parent, include any information required by the Internal Revenue Service, and be filed on or before the due date of the consolidated return (not including extensions of time) for the first consolidated return year to which the consent is to apply. The Internal Revenue Service may impose terms and conditions for granting consent. A copy of the consent must be attached to the group's consolidated returns (or amended returns) as required by the terms of the consent.

(iii) *Effect of consent on methods of accounting.* A consent for separate entity accounting under this paragraph (e)(3), and a revocation of that consent, may require changes in members' methods of accounting for intercompany transactions. Because the consent, or a revocation of the consent, is effective for all intercompany transactions occurring in the consolidated return year for which the consent or revocation is first effective, any change in method is effected on a cut-off basis. Section 446(e) consent is granted for any changes in methods of accounting for intercompany transactions that are necessary solely to conform a member's methods to a binding consent with respect to the group under this paragraph (e)(3) or the revocation of that consent, provided the changes are made in the first consolidated return year for which the consent or revocation under this paragraph (e)(3) is effective. Therefore, section 446(e) consent must be separately requested under applicable administrative procedures if a member has failed to conform its practices to the separate entity accounting provided under this paragraph (e)(3) or the revocation of that treatment in the first consolidated return year for which the consent to use separate entity accounting or revocation of that consent is effective.

(iv) *Consent to treat intercompany transactions on a separate entity basis* *under prior law.* A group that has received consent that is in effect as of the first day of the first consolidated return year beginning on or after July 12, 1995 to treat certain intercompany transactions as provided in § 1.1502–13(c)(3) of the regulations (as contained in the 26 CFR part 1 edition revised as of April 1, 1995) will be considered to have obtained the consent of the Commissioner to take items from intercompany transactions into account on a separate entity basis as provided in paragraph (e)(3)(i) of this section. This treatment is applicable only to the items, class or classes of transactions for which consent was granted under prior law.

(f) *Stock of members*—(1) *In general.* In addition to the general rules of this section, the rules of this paragraph (f) apply to stock of members.

(2) *Intercompany distributions to which section 301 applies*—(i) *In general.* This paragraph (f)(2) provides rules for intercompany transactions to which section 301 applies (intercompany distributions). For purposes of determining whether a distribution is an intercompany distribution, it is treated as occurring under the principles of the entitlement rule of paragraph (f)(2)(iv) of this section. A distribution is not an intercompany distribution to the extent it is deducted by the distributing member. See, for example, section 1382(c)(1).

(ii) *Distributee member.* An intercompany distribution is not included in the gross income of the distributee member (B). However, this exclusion applies to a distribution only to the extent there is a corresponding negative adjustment reflected under § 1.1502–32 in B's basis in the stock of the distributing member (S). For example, no amount is included in B's gross income under section 301(c)(3) from a distribution in excess of the basis of the stock of a subsidiary that results in an excess loss account under § 1.1502–32(a) which is treated as negative basis under § 1.1502–19. B's dividend received deduction under section 243(a)(3) is determined without regard to any intercompany distributions under this paragraph (f)(2) to the extent they are not included in gross income. See § 1.1502–26(b) (applicability of the dividends received deduction to distributions not excluded from gross income, such as a distribution from the common parent to a subsidiary owning stock of the common parent).

(iii) *Distributing member.* The principles of section 311(b) apply to S's loss, as well as gain, from an intercompany distribution of property. Thus, S's loss is taken into account under the matching rule if the property is subsequently sold to a nonmember. However, section 311(a) continues to apply to distributions to nonmembers (for example, loss is not recognized).

(iv) *Entitlement rule*—(A) *In general.* For all Federal income tax purposes, an intercompany distribution is treated as taken into account when the shareholding member becomes entitled to it (generally on the record date). For example, if B becomes entitled to a cash distribution before it is made, the distribution is treated as made when B becomes entitled to it. For this purpose, B is treated as entitled to a distribution no later than the time the distribution is taken into account under the Internal Revenue Code (e.g., under section 305(c)). To the extent a distribution is not made, appropriate adjustments must be made as of the date it was taken into account.

(B) *Nonmember shareholders.* If nonmembers own stock of the distributing corporation at the time the distribution is treated as occurring under this paragraph (f)(2)(iv), appropriate adjustments must be made to prevent the acceleration of the distribution to members from affecting distributions to nonmembers.

(3) *Boot in an intercompany reorganization*—(i) *Scope.* This paragraph (f)(3) provides additional rules for an intercompany transaction in which the receipt of money or other property (nonqualifying property) results in the application of section 356. For example, the distribution of stock of a lower-tier member to a higher-tier member in an intercompany transaction to which section 355 would apply but for the receipt of nonqualifying property is a transaction to which this paragraph (f)(3) applies. This paragraph (f)(3) does not apply if a party to the transaction becomes a member or nonmember as part of the same plan or arrangement.

For example, if S merges into a nonmember in a transaction described in section 368(a)(1)(A), this paragraph (f)(3) does not apply.

(ii) *Treatment.* Nonqualifying property received as part of a transaction described in this paragraph (f)(3) is treated as received by the member shareholder in a separate transaction. See, for example, sections 302 and 311 (rather than sections 356 and 361). The nonqualifying property is treated as taken into account immediately after the transaction if section 354 would apply but for the fact that nonqualifying property is received. It is treated as taken into account immediately before the transaction if section 355 would apply but for the fact that nonqualifying property is received. The treatment under this paragraph (f)(3)(ii) applies for all Federal income tax purposes.

(4) *Acquisition by issuer of its own stock.* If a member acquires its own stock, or an option to buy or sell its own stock, in an intercompany transaction, the member's basis in that stock or option is treated as eliminated for all purposes. Accordingly, S's intercompany items from the stock or options of B are taken into account under this section if B acquires the stock or options in an intercompany transaction (unless, for example, B acquires the stock in exchange for successor property within the meaning of paragraph (j)(1) of this section in a nonrecognition transaction). For example, if B redeems its stock from S in a transaction to which section 302(a) applies, S's gain from the transaction is taken into account immediately under the acceleration rule.

(5) *Certain liquidations and distributions*—(i) *Netting allowed.* S's intercompany item from a transfer to B of the stock of another corporation (T) is taken into account under this section in certain circumstances even though the T stock is never held by a nonmember after the intercompany transaction. For example, if S sells all of T's stock to B at a gain, and T subsequently liquidates into B in a separate transaction to which section 332 applies, S's gain is taken into account under the matching rule. Under paragraph (c)(6)(ii) of this section, S's intercompany gain taken into account as a result of a liquidation under section 332 or a comparable nonrecognition transaction is not redetermined to be excluded from gross income. Under this paragraph (f)(5)(i), if S has both intercompany income or gain and intercompany deduction or loss attributable to stock of the same corporation having the same material terms, only the income or gain in excess of the deduction or loss is subject to paragraph (c)(6)(ii) of this section. This paragraph (f)(5)(i) applies only to a transaction in which B's basis in its T stock is permanently eliminated in a liquidation under section 332 or any comparable nonrecognition transaction, including—

(A) A merger of B into T under section 368(a);

(B) A distribution by B of its T stock in a transaction described in section 355; or

(C) A deemed liquidation of T resulting from an election under section 338(h)(10).

(ii) *Elective relief*—(A) *In general.* If an election is made pursuant to this paragraph (f)(5)(ii), certain transactions are recharacterized to prevent S's items from being taken into account or to provide offsets to those items. This paragraph (f)(5)(ii) applies only if T is a member throughout the period beginning with S's transfer and ending with the completion of the nonrecognition transaction.

(B) *Section 332*—(*1*) *In general.* If section 332 applies to T's liquidation into B, and B transfers T's assets to a new member (new T) in a transaction not otherwise pursuant to the same plan or arrangement as the liquidation, the transfer is nevertheless treated for all Federal income tax purposes as pursuant to the same plan or arrangement as the liquidation. For example, if T liquidates into B, but B forms new T by transferring substantially all of T's former assets to new T, S's intercompany gain or loss generally is not taken into account solely as a result of the liquidation if the liquidation and transfer would qualify as a reorganization described in section 368(a). (Under paragraph (j)(1) of this section, B's stock in new T would be a successor asset to B's stock in T, and S's gain would be taken into account based on the new T stock.)

(*2*) *Time limitation and adjustments.* The transfer of an asset to new T not otherwise pursuant to the same plan or arrangement as the liquidation is treated under this paragraph (f)(5)(ii)(B) as pursuant to the same plan or arrangement only if B transfers it to new T pursuant to a written plan, a copy of which is attached to a timely filed original return (including extensions) for the year of T's liquidation, and the transfer is completed within 12 months of the filing of that return. Appropriate adjustments are made to reflect any events occurring before the formation of new T and to reflect any assets not transferred to new T as part of the same plan or arrangement. For example, if B retains an asset in the reorganization, the asset is treated under paragraph (f)(3) of this section as acquired by new T but distributed to B immediately after the reorganization.

(*3*) *Downstream merger, etc.* The principles of this paragraph (f)(5)(ii)(B) apply, with appropriate adjustments, if B's basis in the T stock is eliminated in a transaction similar to a section 332 liquidation, such as a transaction described in section 368 in which B merges into T. For example, if S and B are subsidiaries, and S sells all of T's stock to B at a gain followed by B's merger into T in a separate transaction described in section 368(a), S's gain is not taken into account solely as a result of the merger if T (as successor to B) forms new T with substantially all of T's former assets.

(C) *Section 338(h)(10)—*(*1*) *In general.* This paragraph (f)(5)(ii)(C) applies to a deemed liquidation of T under section 332 as the result of an election under section 338(h)(10). This paragraph (f)(5)(ii)(C) does not apply if paragraph (f)(5)(ii)(B) of this section is applied to the deemed liquidation. Under this paragraph, B is treated with respect to each share of its T stock as recognizing as a corresponding item any loss or deduction it would recognize (determined after adjusting stock basis under § 1.1502–32) if section 331 applied to the deemed liquidation. For all other Federal income tax purposes, the deemed liquidation remains subject to section 332.

(*2*) *Limitation on amount of loss.* The amount of B's loss or deduction under this paragraph (f)(5)(ii)(C) is limited as follows—

(*i*) The aggregate amount of loss recognized with respect to T stock cannot exceed the amount of S's intercompany income or gain that is in excess of S's intercompany deduction or loss with respect to shares of T stock having the same material terms as the shares giving rise to S's intercompany income or gain; and

(*ii*) The aggregate amount of loss recognized under this paragraph (f)(5)(ii)(C) from T's deemed liquidation cannot exceed the net amount of deduction or loss (if any) that would be taken into account from the deemed liquidation if section 331 applied with respect to all T shares.

(*3*) *Asset sale, etc.* The principles of this paragraph (f)(5)(ii)(C) apply, with appropriate adjustments, if T transfers all of its assets to a nonmember and completely liquidates in a transaction comparable to the section 338(h)(10) transaction described in paragraph (f)(5)(ii)(C)(*1*) of this section. For example, if S sells all of T's stock to B at a gain followed by T's merger into a nonmember in exchange for a cash payment to B in a transaction treated for Federal income tax purposes as T's sale of its assets to the nonmember and complete liquidation, the merger is ordinarily treated as a comparable transaction.

(D) *Section 355.* If B distributes the T stock in an intercompany transaction to which section 355 applies (including an intercompany transaction to which 355 applies because of the application of paragraph (f)(3) of this section), the redetermination of the basis of the T stock under section 358 could cause S's gain or loss to be taken into account under this section. This paragraph (f)(5)(ii)(D) applies to treat B's distribution as subject to sections 301 and 311 (as modified by this paragraph (f)), rather than section 355. The election will prevent S's gain or loss from being taken into account immediately to the extent matching remains possible, but B's gain or loss from the distribution will also be taken into account under this section.

(E) *Election.* An election to apply this paragraph (f)(5)(ii) is made in a separate statement entitled ''[Insert Name and Employer Identification Number of Common Parent] HEREBY ELECTS THE APPLICATION OF §1.1502–13(f)(5)(ii).'' The election must include a description of S's intercompany transaction and T's liquidation (or other transaction). It must specify which provision of §1.1502–13(f)(5)(ii) applies and how it alters the otherwise applicable results under this section (including, for example, the amount of S's intercompany items and the amount deferred or offset as a result of this §1.1502–13(f)(5)(ii)). A separate election must be made for each application of this paragraph (f)(5)(ii). The election must be signed by the common parent and filed with the group's income tax return for the year of T's liquidation (or other transaction). The Commissioner may impose reasonable terms and conditions to the application of this paragraph (f)(5)(ii) that are consistent with the purposes of this section.

(6) *Stock of common parent.* In addition to the general rules of this section, this paragraph (f)(6) applies to parent stock (P stock) and positions in P stock held or entered into by another member. For this purpose, P stock is any stock of the common parent held (directly or indirectly) by another member or any stock of a member (the issuer) that was the common parent if the stock was held (directly or indirectly) by another member while the issuer was the common parent.

(i) *Loss stock*—(A) *Recognized loss.* Any loss recognized, directly or indirectly, by a member with respect to P stock is permanently disallowed and does not reduce earnings and profits. See §1.1502–32(b)(3)(iii)(A) for a corresponding reduction in the basis of the member's stock.

(B) *Other cases.* If a member, M, owns P stock, the stock is subsequently owned by a nonmember, and, immediately before the stock is owned by the nonmember, M's basis in the share exceeds its fair market value, then, to the extent paragraph (f)(6)(i)(A) of this section does not apply, M's basis in the share is reduced to the share's fair market value immediately before the share is held by the nonmember. For example, if M owns shares of P stock with a $100x basis and M becomes a nonmember at a time when the P shares have a value of $60x, M's basis in the P shares is reduced to $60x immediately before M becomes a nonmember. Similarly, if M contributes the P stock to a nonmember in a transaction subject to section 351, M's basis in the shares is reduced to $60x immediately before the contribution. See §1.1502–32(b)(3)(iii)(B) for a corresponding reduction in the basis of M's stock.

(C) *Waiver of built-in loss on P stock*—(*1*) *In general.* If a nonmember that owns P stock with a basis in excess of its fair market value becomes a member of the P consolidated group in a qualifying cost basis transaction, the group may make an irrevocable election to reduce the basis of the P stock to its fair market value immediately before the nonmember becomes a member of the P group. If the nonmember was a member of another consolidated group immediately before becoming a member of the P group, the reduction in basis is treated as occurring immediately after it ceases to be a member of the prior group. A qualifying cost basis transaction is the purchase (i.e., a transaction in which basis is determined under section 1012) by members of the P consolidated group (while they are members) in a 12-month period of an amount of the nonmember's stock satisfying the requirements of section 1504(a)(2).

(*2*) *Election.* The election described in this paragraph (6)(i)(C) must be made in a separate statement entitled ''ELECTION TO REDUCE BASIS OF P STOCK UNDER §1.1502–13(f)(6).'' The statement must be filed with the P consolidated group's return for the year in which the nonmember becomes a member, and it must be signed by both P and the nonmember. The statement must identify the fair market value of, and the amount of the basis reduction in, the P stock.

(ii) *Gain stock.* If a member, M, would otherwise recognize gain on a qualified disposition of P stock, then immediately before the qualified disposition, M is treated as purchasing the P stock from P for fair market value with cash contributed to M by P (or, if necessary, through any intermediate members). A disposition is a qualified disposition only if—

(A) The member acquires the P stock directly from the common parent (P) through a contribution to capital or a transaction qualifying under section 351(a) (or, if necessary, through a series of such transactions involving only members);

(B) Pursuant to a plan, the member transfers the stock immediately to a nonmember that is not related, within the meaning of section 267(b) or 707(b), to any member of the group;

(C) No nonmember receives a substituted basis in the stock within the meaning of section 7701(a)(42);

(D) The P stock is not exchanged for P stock;

(E) P neither becomes nor ceases to be the common parent as part of, or in contemplation of, the disposition or plan; and

(F) M is neither a nonmember that becomes a member nor a member that becomes a nonmember as part of, or in contemplation of, the disposition or plan.

(iii) *Mark-to-market of P stock.* Paragraphs (f)(6)(i) and (ii) of this section shall not apply to any gain or loss from a share of P stock held by a member, M, if—

(A) M regularly trades in P stock (of the same class) with customers in the ordinary course of its business as a dealer;

(B) The gain or loss on the share is taken into account by M pursuant to section 475(a);

(C) M's basis in the share is not adjusted by reference to the basis of any other property or by reference to income, gain, deduction, or loss from other property; and

(D) Neither M nor any other member of the group has structured or engaged in any transaction while a member (or in anticipation of becoming a member), during the taxable year or in any year within the preceding five taxable years that is open for assessment under section 6501, with a principal purpose of avoiding gain or creating loss on P stock subject to section 475(a).

(iv) *Options, warrants, and other positions*—(A) *In general.* This paragraph (f)(6) applies with appropriate adjustments to positions in P stock to the extent that P's gain or loss from an equivalent position would not be recognized under section 1032. Thus, if M purchases an option to buy or sell P stock and sells the option at a loss, the loss is permanently disallowed under paragraph (f)(6)(i)(A) of this section. Similarly, if M is the grantor of such an option and becomes a nonmember, then the principles of paragraph (f)(6)(i)(B) of this section apply to the extent that M would recognize loss from cash settlement of the option at its fair market value immediately before M becomes a nonmember, and proper adjustments must be made in the amount of any gain or loss subsequently realized from the position by M. If P grants M an option to acquire P stock in a transaction meeting the requirements of paragraph (f)(6)(ii) of this section, M is treated as having purchased the option from P for fair market value with cash contributed to M by P.

(B) *Mark-to-market of positions in P stock.* For purposes of paragraph (f)(6)(iii) of this section, gain or loss with respect to a position taken into account under section 1256(a) is treated as taken into account under section 475(a) to the extent that the gain or loss would be taken into account under the principles of section 475.

(v) *Effective date.* This paragraph (f)(6) applies to gain or loss taken into account on or after July 12, 1995, and to transactions occurring on or after July 12, 1995. For example, if S sells P stock to B at a loss prior to July 12, 1995, and B sells the P stock to a nonmember after July 12, 1995, S's loss is disallowed because it is taken into account after July 12, 1995. If a taxpayer takes a gain or loss into account or engages in a transaction on or after July 12, 1995, during a tax year ending prior to December 31, 1995, the taxpayer may treat the gain or loss or the transaction under the rules published in 1995–32 I.R.B. 47, instead of under the rules of this paragraph (f)(6).

(7) *Examples.* The application of this section to intercompany transactions with respect to stock of members is illustrated by the following examples.

Example 1. Dividend exclusion and property distribution. (a) *Facts*. S owns land with a $70 basis and $100 value. On January 1 of Year 1, P's basis in S's stock is $100. During Year 1, S declares and makes a dividend distribution of the land to P. Under section 311(b), S has a $30 gain. Under section 301(d), P's basis in the land is $100. On July 1 of Year 3, P sells the land to X for $110.

(b) *Dividend elimination and stock basis adjustments*. Under paragraph (b)(1) of this section, S's distribution to P is an intercompany distribution. Under paragraph (f)(2)(ii) of this section, P's $100 of dividend income is not included in gross income. Under §1.1502–32, P's basis in S's stock is reduced from $100 to $0 in Year 1.

(c) *Matching rule and stock basis adjustments*. Under the matching rule (treating P as the buying member and S as the selling member), S takes its $30 gain into account in Year 3 to reflect the $30 difference between P's $10 gain taken into account and the $40 recomputed gain. Under §1.1502–32, P's basis in S's stock is increased from $0 to $30 in Year 3.

(d) *Loss property*. The facts are the same as in paragraph (a) of this *Example 1*, except that S has a $130 (rather than $70) basis in the land. Under paragraph (f)(2)(iii) of this section, the principles of section 311(b) apply to S's loss from the intercompany distribution. Thus, S has a $30 loss that is taken into account under the matching rule in Year 3 to reflect the $30 difference between P's $10 gain taken into account and the $20 recomputed loss. (The results are the same under section 267(f).) Under §1.1502–32, P's basis in S's stock is reduced from $100 to $0 in Year 1, and from $0 to a $30 excess loss account in Year 3. (If P had distributed the land to its shareholders, rather than selling the land to X, P would take its $10 gain under section 311(b) into account, and S would take its $30 loss into account under the matching rule with $10 offset by P's gain and $20 recharacterized as a noncapital, nondeductible amount.)

(e) *Entitlement rule*. The facts are the same as in paragraph (a) of this *Example 1*, except that, after P becomes entitled to the distribution but before the distribution is made, S issues additional stock to the public and becomes a nonmember. Under paragraph (f)(2)(i) of this section, the determination of whether a distribution is an intercompany distribution is made under the entitlement rule of paragraph (f)(2)(iv) of this section. Treating S's distribution as made when P becomes entitled to it results in the distribution being an intercompany distribution. Under paragraph (f)(2)(ii) of this section, the distribution is not included in P's gross income. S's $30 gain from the distribution is intercompany gain that is taken into account under the acceleration rule immediately before S becomes a nonmember. Thus, there is a net $70 decrease in P's basis in its S stock under §1.1502–32 ($100 decrease for the distribution and a $30 increase for S's $30 gain). See also §1.1502–20(b) (additional stock basis reductions applicable to certain deconsolidations). Under paragraph (f)(2)(iv) of this section, P does not take the distribution into account again under separate return rules when received, and P is not entitled to a dividends received deduction.

Example 2. Excess loss accounts. (a) *Facts*. S owns all of T's only class of stock with a $10 basis and $100 value. S has substantial earnings and profits, and T has $10 of earnings and profits. On January 1 of Year 1, S declares and distributes a dividend of all of the T stock to P. Under section 311(b), S has a $90 gain. Under section 301(d), P's basis in the T stock is $100. During Year 3, T borrows $90 and declares and makes a $90 distribution to P to which section 301 applies, and P's basis in the T stock is reduced under §1.1502–32 from $100 to $10. During Year 6, T has $5 of earnings that increase P's basis in the T stock under §1.1502–32 from $10 to $15. On December 1 of Year 9, T issues additional stock to X and, as a result, T becomes a nonmember.

(b) *Dividend exclusion*. Under paragraph (f)(2)(ii) of this section, P's $100 of dividend income from S's distribution of the T stock, and its $10 of dividend income from T's $90 distribution, are not included in gross income.

(c) *Matching and acceleration rules*. Under §1.1502–19(b)(1), when T becomes a nonmember P must include in income the amount of its excess loss account (if any) in T stock. P has no excess loss account in the T stock. Therefore P's corresponding item from the deconsolidation of T is $0. Treating S and P as divisions of a single corporation, the T stock would continue to have a $10 basis after the distribution, and the adjustments under §1.1502–32 for T's $90 distribution and $5 of earnings would result in a $75 excess loss account. Thus, the recomputed corresponding item from the deconsolidation is $75. Under the matching rule, S takes $75 of its $90 gain into account in Year 9 as a result of T becoming a nonmember, to reflect the difference between P's $0 gain taken into account and the $75 recomputed gain. S's remaining $15 of gain is taken into account under the matching and acceleration rules based on subsequent events (for example, under the matching rule if P subsequently sells its T stock, or under the acceleration rule if S becomes a nonmember).

(d) *Reverse sequence*. The facts are the same as in paragraph (a) of this *Example 2*, except that T borrows $90 and makes its $90 distribution to S before S distributes T's stock to P. Under paragraph (f)(2)(ii) of this section, T's $90 distribution to S ($10 of which is a dividend) is not included in S's gross income. The corresponding negative adjustment under §1.1502–32 reduces S's basis in the

T stock from $10 to an $80 excess loss account. Under section 311(b), S has a $90 gain from the distribution of T stock to P. Under section 301(d) P's initial basis in the T stock is $10 (the stock's fair market value), and the basis increases to $15 under § 1.1502–32 as a result of T's earnings in Year 6. The timing and attributes of S's gain are determined in the manner provided in paragraph (c) of this *Example 2.* Thus, $75 of S's gain is taken into account under the matching rule in Year 9 as a result of T becoming a nonmember, and the remaining $15 is taken into account under the matching and acceleration rules based on subsequent events.

(e) *Partial stock sale.* The facts are the same as in paragraph (a) of this *Example 2,* except that P sells 10% of T's stock to X on December 1 of Year 9 for $1.50 (rather than T's issuing additional stock and becoming a nonmember). Under the matching rule, S takes $9 of its gain into account to reflect the difference between P's $0 gain taken into account ($1.50 sale proceeds minus $1.50 basis) and the $9 recomputed gain ($1.50 sale proceeds plus $7.50 excess loss account).

(f) *Loss, rather than cash distribution.* The facts are the same as in paragraph (a) of this *Example 2,* except that T retains the loan proceeds and incurs a $90 loss in Year 3 that is absorbed by the group. The timing and attributes of S's gain are determined in the same manner provided in paragraph (c) of this *Example 2.* Under § 1.1502–32, the loss in Year 3 reduces P's basis in the T stock from $100 to $10, and T's $5 of earnings in Year 6 increase the basis to $15. Thus, $75 of S's gain is taken into account under the matching rule in Year 9 as a result of T becoming a nonmember, and the remaining $15 is taken into account under the matching and acceleration rules based on subsequent events. (The timing and attributes of S's gain would be determined in the same manner provided in paragraph (d) of this *Example 2* if T incurred the $90 loss before S's distribution of the T stock to P.)

(g) *Stock sale, rather than stock distribution.* The facts are the same as in paragraph (a) of this *Example 2,* except that S sells the T stock to P for $100 (rather than distributing the stock). The timing and attributes of S's gain are determined in the same manner provided in paragraph (c) of this *Example 2.* Thus, $75 of S's gain is taken into account under the matching rule in Year 9 as a result of T becoming a nonmember, and the remaining $15 is taken into account under the matching and acceleration rules based on subsequent events.

Example 3. Intercompany reorganization. (a) *Facts.* P forms S and B by contributing $200 to the capital of each. During Years 1 through 4, S and B each earn $50, and under § 1.1502–32 P adjusts its basis in the stock of each to $250. (See § 1.1502–33 for adjustments to earnings and profits.) On January 1 of Year 5, the fair market value of S's assets and its stock is $500, and S merges into B in a tax-free reorganization. Pursuant to the plan of reorganization, P receives B stock with a fair market value of $350 and $150 of cash.

(b) *Treatment as a section 301 distribution.* The merger of S into B is a transaction to which paragraph (f)(3) of this section applies. P is treated as receiving additional B stock with a fair market value of $500 and, under section 358, a basis of $250. Immediately after the merger, $150 of the stock received is treated as redeemed, and the redemption is treated under section 302(d) as a distribution to which section 301 applies. Because the $150 distribution is treated as not received as part of the merger, section 356 does not apply and no basis adjustments are required under section 358(a)(1)(A) and (B). Because B is treated under section 381(c)(2) as receiving S's earnings and profits and the redemption is treated as occurring after the merger, $100 of the distribution is treated as a dividend under section 301 and P's basis in the B stock is reduced correspondingly under § 1.1502–32. The remaining $50 of the distribution reduces P's basis in the B stock. Section 301(c)(2) and § 1.1502–32. Under paragraph (f)(2)(ii) of this section, P's $100 of dividend income is not included in gross income. Under § 1.302–2(c), proper adjustments are made to P's basis in its B stock to reflect its basis in the B stock redeemed, with the result that P's basis in the B stock is reduced by the entire $150 distribution.

(c) *Depreciated property.* The facts are the same as in paragraph (a) of this *Example 3,* except that property of S with a $200 basis and $150 fair market value is distributed to P (rather than cash of B). As in paragraph (b) of this *Example 3,* P is treated as receiving additional B stock in the merger and a $150 distribution to which section 301 applies immediately after the merger. Under paragraph (f)(2)(iii) of this section, the principles of section 311(b) apply to B's $50 loss and the loss is taken into account under the matching and acceleration rules based on subsequent events (e.g., under the matching rule if P subsequently sells the property, or under the acceleration rule if B becomes a nonmember). The results are the same under section 267(f).

(d) *Divisive transaction.* Assume instead that, pursuant to a plan, S distributes the stock of a lower-tier subsidiary in a spin-off transaction to which section 355 applies together with $150 of cash. The distribution of stock is a transaction to which paragraph (f)(3) of this section applies. P is treated as receiving the $150 of cash immediately before the section 355 distribution, as a distribution to which section 301 applies. Section 356(b) does not apply and no basis adjustments are required under section 358(a)(1) (A) and (B). Because the $150 distribution is treated as made before the section 355 distribution, the distribution reduces P's basis in the S stock under §1.1502–32, and the basis allocated under section 358(c) between the S stock and the lower-tier subsidiary stock received reflects this basis reduction.

Example 4. Stock redemptions and distributions. (a) *Facts.* Before becoming a member of the P group, S owns P stock with a $30 basis. On January 1 of Year 1, P buys all of S's stock. On July 1 of Year 3, P redeems the P stock held by S for $100 in a transaction to which section 302(a) applies.

(b) *Gain under section 302.* Under paragraph (f)(4) of this section, P's basis in the P stock acquired from S is treated as eliminated. As a result of this elimination, S's intercompany item will never be taken into account under the matching rule because P's basis in the stock does not reflect S's intercompany item. Therefore, S's $70 gain is taken into account under the acceleration rule in Year 3. The attributes of S's item are determined under paragraph (d)(1)(ii) of this section by applying the matching rule as if P had sold the stock to an affiliated corporation that is not a member of the group at no gain or loss. Although P's corresponding item from a sale of its stock would have been excluded from gross income under section 1032, paragraph (c)(6)(ii) of this section prevents S's gain from being treated as excluded from gross income; instead S's gain is capital gain.

(c) *Gain under section 311.* The facts are the same as in paragraph (a) of this *Example 4*, except that S distributes the P stock to P in a transaction to which section 301 applies (rather than the stock being redeemed), and S has a $70 gain under section 311(b). The timing and attributes of S's gain are determined in the manner provided in paragraph (b) of this *Example 4*.

(d) *Loss stock.* The facts are the same as in paragraph (a) of this *Example 4*, except that S has a $130 (rather than $30) basis in the P stock and has a $30 loss under section 302(a). The limitation under paragraph (c)(6)(ii) of this section does not apply to intercompany losses. Thus, S's loss is taken into account in Year 3 as a noncapital, nondeductible amount.

Example 5. Intercompany stock sale followed by section 332 liquidation. (a) *Facts.* S owns all of the stock of T, with a $70 basis and $100 value, and T's assets have a $10 basis and $100 value. On January 1 of Year 1, S sells all of T's stock to B for $100. On July 1 of Year 3, when T's assets are still worth $100, T distributes all of its assets to B in an unrelated complete liquidation to which section 332 applies.

(b) *Timing and attributes.* Under paragraph (b)(3)(ii) of this section, B's unrecognized gain or loss under section 332 is a corresponding item for purposes of applying the matching rule. In Year 3 when T liquidates, B has $0 of unrecognized gain or loss under section 332 because B has a $100 basis in the T stock and receives a $100 distribution with respect to its T stock. Treating S and B as divisions of a single corporation, the recomputed corresponding item would have been $30 of unrecognized gain under section 332 because B would have succeeded to S's $70 basis in the T stock. Thus, under the matching rule, S's $30 intercompany gain is taken into account in Year 3 as a result of T's liquidation. Under paragraph (c)(1)(i) of this section, the attributes of S's gain and B's corresponding item are redetermined as if S and B were divisions of a single corporation. Although S's gain ordinarily would be redetermined to be treated as excluded from gross income to reflect the nonrecognition of B's gain under section 332, S's gain remains capital gain because B's unrecognized gain under section 332 is not permanently and explicitly disallowed under the Code. See paragraph (c)(6)(ii) of this section. However, relief may be elected under paragraph (f)(5)(ii) of this section.

(c) *Intercompany sale at a loss.* The facts are the same as in paragraph (a) of this *Example 5*, except that S has a $130 (rather than $70) basis in the T stock. The limitation under paragraph (c)(6)(ii) of this section does not apply to intercompany losses. Thus, S's intercompany loss is taken into account in Year 3 as a noncapital, nondeductible amount. However, relief may be elected under paragraph (f)(5)(ii) of this section.

Example 6. Intercompany stock sale followed by section 355 distribution. (a) *Facts.* S owns all of the stock of T with a $70 basis and a $100 value. On January 1 of Year 1, S sells all of T's stock to M for $100. On June 1 of Year 6, M distributes all of its T stock to its nonmember shareholders in a transaction to which section 355 applies. At the time of the distribution, M has a basis in T stock of $100 and T has a value of $150.

(b) *Timing and attributes.* Under paragraph (b)(3)(ii) of this section, M's $50 gain not recognized on the distribution under section 355 is a corresponding item. Treating S and M as divisions of a single corporation, the recomputed corresponding item would be $80 of unrecognized gain under section 355 because M would have succeeded to S's $70 basis in the T stock. Thus, under the matching rule, S's $30 intercompany gain is taken into account in Year 6 as a result of the distribution. Under paragraph (c)(1)(i) of this section, the attributes of S's intercompany item and M's corresponding item are redetermined to produce the same effect on consolidated taxable income as if S and M were divisions of a single corporation. Although S's gain ordinarily would be redetermined to be treated as excluded from gross income to reflect the nonrecognition of M's gain under section 355(c), S's gain remains capital gain because M's unrecognized gain under section 355(c) is not permanently and explicitly disallowed under the Code. See paragraph (c)(6)(ii) of this section. Because M's distribution of the T stock is not an intercompany transaction, relief is not available under paragraph (f)(5)(ii) of this section.

(c) *Section 355 distribution within the group.* The facts are the same as under paragraph (a) of this *Example 6*, except that M distributes the T stock to B (another member of the group), and B takes a $75 basis in the T stock under section 358. Under paragraph (j)(2) of this section, B is a successor to M for purposes of taking S's intercompany gain into account, and therefore both M and B might have corresponding items with respect to S's intercompany gain. To the extent it is possible, matching with respect to B's corresponding items produces the result most consistent with treating S, M, and B as divisions of a single corporation. See paragraphs (j)(3) and (j)(4) of this section. However, because there is only $5 difference between B's $75 basis in the T stock and the $70 basis the stock would have if S, M, and B were divisions of a single corporation, only $5 can be taken into account under the matching rule with respect to B's corresponding items. (This $5 is taken into account with respect to B's corresponding items based on subsequent events.) The remaining $25 of S's $30 intercompany gain is taken into account in Year 6 under the matching rule with respect to M's corresponding item from its distribution of the T stock. The attributes of S's remaining $25 of gain are determined in the same manner as in paragraph (b) of this *Example 6*.

(d) *Relief elected.* The facts are the same as in paragraph (c) of this *Example 6* except that P elects relief pursuant to paragraph (f)(5)(ii)(D) of this section. As a result of the election, M's distribution of the T stock is treated as subject to sections 301 and 311 instead of section 355. Accordingly, M recognizes $50 of intercompany gain from the distribution, B takes a basis in the stock equal to its fair market value of $150, and S and M take their intercompany gains into account with respect to B's corresponding items based on subsequent events. (None of S's gain is taken into account in Year 6 as a result of M's distribution of the T stock.)

(g) *Obligations of members*—(1) *In general.* In addition to the general rules of this section, the rules of this paragraph (g) apply to intercompany obligations.

(2) *Definitions.* For purposes of this section—

(i) *Obligation of a member.* An obligation of a member is—

(A) Any obligation of the member constituting indebtedness under general principles of Federal income tax law (for example, under nonstatutory authorities, or under section 108, section 163, section 171, or section 1275), but not an executory obligation to purchase or provide goods or services; and

(B) Any security of the member described in section 475(c)(2)(D) or (E), and any comparable security with respect to commodities, but not if the security is a position with respect to the member's stock. See paragraphs (f)(4) and (6) of this section for special rules applicable to positions with respect to a member's stock.

(ii) *Intercompany obligations.* An intercompany obligation is an obligation between members, but only for the period during which both parties are members.

(3) *Deemed satisfaction and reissuance of intercompany obligations*—(i) *Application*—(A) *In general.* If a member realizes an amount (other than zero) of income, gain, deduction, or loss, directly or indirectly, from the assignment or extinguishment of all or part of its remaining rights or obligations under an intercompany obligation, the intercompany obligation is treated for all Federal income tax purposes as satisfied under paragraph (g)(3)(ii) of this section and, if it remains outstanding, reissued under paragraph (g)(3)(iii) of this section. Similar principles apply under this paragraph (g)(3) if a member realizes any such amount, directly or indirectly, from a comparable transaction (for example, a marking-to-market of an obligation or a bad debt deduction), or if an intercompany obligation becomes an obligation that is not an intercompany obligation.

(B) *Exceptions.* This paragraph (g)(3) does not apply to an obligation if any of the following applies:

(*1*) The obligation became an intercompany obligation by reason of an event described in § 1.108–2(e) (exceptions to the application of section 108(e)(4)).

(*2*) The amount realized is from reserve accounting under section 585 or section 593 (see paragraph (g)(3)(iv) of this section for special rules).

(*3*) The amount realized is from the conversion of an obligation into stock of the obligor.

(*4*) Treating the obligation as satisfied and reissued will not have a significant effect on any person's Federal income tax liability for any year. For this purpose, obligations issued in connection with the same transaction or related transactions are treated as a single obligation. However, this paragraph (g)(3)(i)(B)(*4*) does not apply to any obligation if the aggregate effect of this treatment for all obligations in a year would be significant.

(ii) *Satisfaction*—(A) *General rule.* If a creditor member sells intercompany debt for cash, the debt is treated as satisfied by the debtor immediately before the sale for the amount of the cash. For other transactions, similar principles apply to treat the intercompany debt as satisfied immediately before the transaction. Thus, if the debt is transferred for property, it is treated as satisfied for an amount consistent with the amount for which the debt is deemed reissued under paragraph (g)(3)(iii) of this section, and the basis of the property is also adjusted to reflect that amount. If this paragraph (g)(3) applies because the debtor or creditor becomes a nonmember, the obligation is treated as satisfied for cash in an amount equal to its fair market value immediately before the debtor or creditor becomes a nonmember. Similar principles apply to intercompany obligations other than debt.

(B) *Timing and attributes.* For purposes of applying the matching rule and the acceleration rule—

(*1*) Paragraph (c)(6)(ii) of this section (limitation on treatment of intercompany income or gain as excluded from gross income) does not apply to prevent any intercompany income or gain from being excluded from gross income; and

(*2*) Any gain or loss from an intercompany obligation is not subject to section 108(a), section 354 or section 1091.

(iii) *Reissuance.* If a creditor member sells intercompany debt for cash, the debt is treated as a new debt (with a new holding period) issued by the debtor immediately after the sale for the amount of cash. For other transactions, if the intercompany debt remains outstanding, similar principles apply to treat the debt as reissued immediately after the transaction. Thus, if the debt is transferred for property, it is treated as new debt issued for the property. See, for example, section 1273(b)(3) or section 1274. If this paragraph (g)(3) applies because the debtor or creditor becomes a nonmember, the debt is treated as new debt issued for an amount of cash equal to its fair market value immediately after the debtor or creditor becomes a nonmember. Similar principles apply to intercompany obligations other than debt.

(iv) *Bad debt reserve.* A member's deduction under section 585 or section 593 for an addition to its reserve for bad debts with respect to an intercompany obligation is not taken into account, and is not treated as realized under this paragraph (g)(3) until the intercompany obligation becomes an obligation that is not an intercompany obligation, or, if earlier, the redemption or cancellation of the intercompany obligation.

(4) *Deemed satisfaction and reissuance of obligations becoming intercompany obligations*—(i) *Application*—(A) *In general.* This paragraph (g)(4) applies if an obligation that is not an intercompany obligation becomes an intercompany obligation.

(B) *Exceptions.* This paragraph (g)(4) does not apply to an obligation if—

(*1*) The obligation becomes an intercompany obligation by reason of an event described in §1.108–2(e) (exceptions to the application of section 108(e)(4)); or

(*2*) Treating the obligation as satisfied and reissued will not have a significant effect on any person's Federal income tax liability for any year. For this purpose, obligations issued in connection with the same transaction or related transactions are treated as a single obligation. However, this paragraph (g)(4)(i)(B)(*2*) does not apply to any obligation if the aggregate effect of this treatment for all obligations in a year would be significant.

(ii) *Intercompany debt.* If this paragraph (g)(4) applies to an intercompany debt—

(A) Section 108(e)(4) does not apply;

(B) The debt is treated for all Federal income tax purposes, immediately after it becomes an intercompany debt, as satisfied and a new debt issued to the holder (with a new holding period) in an amount determined under the principles of §1.108–2(f);

(C) The attributes of all items taken into account from the satisfaction are determined on a separate entity basis, rather than by treating S and B as divisions of a single corporation;

(D) Any intercompany gain or loss taken into account is treated as not subject to section 354 or section 1091; and

(E) Solely for purposes of § 1.1502–32(b)(4) and the effect of any election under that provision, any loss taken into account under this paragraph (g)(4) by a corporation that becomes a member as a result of the transaction in which the obligation becomes an intercompany obligation is treated as a loss carryover from a separate return limitation year.

(iii) *Other intercompany obligations.* If this paragraph (g)(4) applies to an intercompany obligation other than debt, the principles of paragraph (g)(4)(ii) of this section apply to treat the intercompany obligation as satisfied and reissued for an amount of cash equal to its fair market value immediately after the obligation becomes an intercompany obligation.

(5) *Examples.* The application of this section to obligations of members is illustrated by the following examples.

Example 1. Interest on intercompany debt. (a) *Facts.* On January 1 of Year 1, B borrows $100 from S in return for B's note providing for $10 of interest annually at the end of each year, and repayment of $100 at the end of Year 5. B fully performs its obligations. Under their separate entity methods of accounting, B accrues a $10 interest deduction annually under section 163, and S accrues $10 of interest income annually under section 61(a)(4).

(b) *Matching rule.* Under paragraph (b)(1) of this section, the accrual of interest on B's note is an intercompany transaction. Under the matching rule, S takes its $10 of income into account in each of Years 1 through 5 to reflect the $10 difference between B's $10 of interest expense taken into account and the $0 recomputed expense. S's income and B's deduction are ordinary items. (Because S's intercompany item and B's corresponding item would both be ordinary on a separate entity basis, the attributes are not redetermined under paragraph (c)(1)(i) of this section.)

(c) *Original issue discount.* The facts are the same as in paragraph (a) of this *Example 1,* except that B borrows $90 (rather than $100) from S in return for B's note providing for $10 of interest annually and repayment of $100 at the end of Year 5. The principles described in paragraph (b) of this *Example 1* for stated interest also apply to the $10 of original issue discount. Thus, as B takes into account its corresponding expense under section 163(e), S takes into account its intercompany income. S's income and B's deduction are ordinary items.

(d) *Tax-exempt income.* The facts are the same as in paragraph (a) of this *Example 1,* except that B's borrowing from S is allocable under section 265 to B's purchase of state and local bonds to which section 103 applies. The timing of S's income is the same as in paragraph (b) of this *Example 1.* Under paragraph (c)(4)(i) of this section, the attributes of B's corresponding item of disallowed interest expense control the attributes of S's offsetting intercompany interest income. Paragraph (c)(6)(ii) of this section does not prevent the redetermination of S's intercompany item as excluded from gross income, because section 265 permanently and explicitly disallows B's corresponding deduction. Accordingly, S's intercompany income is treated as excluded from gross income.

Example 2. Intercompany debt becomes nonintercompany debt. (a) *Facts.* On January 1 of Year 1, B borrows $100 from S in return for B's note providing for $10 of interest annually at the end of each year, and repayment of $100 at the end of Year 20. As of January 1 of Year 3, B has paid the interest accruing under the note and S sells B's note to X for $70, reflecting a change in the value of the note as a result of increases in prevailing market interest rates. B is never insolvent within the meaning of section 108(d)(3).

(b) *Deemed satisfaction.* Under paragraph (g)(3) of this section, B's note is treated as satisfied for $70 immediately before S's sale to X. As a result of the deemed satisfaction of the obligation for less than its adjusted issue price, B takes into account $30 of discharge of indebtedness income under section 61(a)(12). On a separate entity basis, S's $30 loss would be a capital loss under section 1271(a)(1). Under the matching rule, however, the attributes of S's intercompany item and B's corresponding item must be redetermined to produce the same effect as if the transaction had occurred between divisions of a single corporation. B's corresponding item completely offsets S's intercompany item in amount. Accordingly, under paragraph (c)(4)(i) of this section, the attributes of B's $30 of discharge of indebtedness income control the attributes of S's loss. Thus, S's loss is treated as ordinary loss.

(c) *Deemed reissuance.* Under paragraph (g)(3) of this section, B is also treated as reissuing, directly to X, a new note with a $70 issue price and a $100 stated redemption price at maturity. The new note is not an intercompany obligation, it has a $70 issue price and $100 stated redemption price at maturity, and the $30 of original issue discount will be taken into account by B and X under sections 163(e) and 1272.

(d) *Creditor deconsolidation.* The facts are the same as in paragraph (a) of this *Example 2*, except that P sells S's stock to X (rather than S's selling the note of B). Under paragraph (g)(3) of this section, the note is treated as satisfied by B for its $70 fair market value immediately before S becomes a nonmember, and B is treated as reissuing a new note to S immediately after S becomes a nonmember. The results for S's $30 of loss and B's discharge of indebtedness income are the same as in paragraph (b) of this *Example 2*. The new note is not an intercompany obligation, it has a $70 issue price and $100 stated redemption price at maturity, and the $30 of original issue discount will be taken into account by B and S under sections 163(e) and 1272.

(e) *Debtor deconsolidation.* The facts are the same as in paragraph (a) of this *Example 2*, except that P sells B's stock to X (rather than S's selling the note of B). The results are the same as in paragraph (d) of this *Example 2*.

(f) *Appreciated note.* The facts are the same as in paragraph (a) of this *Example 2*, except that S sells B's note to X for $130 (rather than $70), reflecting a decline in prevailing market interest rates. Under paragraph (g)(3) of this section, B's note is treated as satisfied for $130 immediately before S's sale of the note to X. Under §1.163–7(c), B takes into account $30 of repurchase premium. On a separate entity basis, S's $30 gain would be a capital gain under section 1271(a)(1), and B's $30 premium deduction would be an ordinary deduction. Under the matching rule, however, the attributes of S's intercompany item and B's corresponding item must be redetermined to produce the same effect as if the transaction had occurred between divisions of a single corporation. Under paragraph (c)(4)(i) of this section, the attributes of B's corresponding premium deduction control the attributes of S's intercompany gain. Accordingly, S's gain is treated as ordinary income. B is also treated as reissuing a new note directly to X which is not an intercompany obligation. The new note has a $130 issue price and a $100 stated redemption price at maturity. Under §1.61–12(c), B's $30 premium income under the new note is taken into account over the life of the new note.

Example 3. Loss or bad debt deduction with respect to intercompany debt. (a) *Facts.* On January 1 of Year 1, B borrows $100 from S in return for B's note providing for $10 of interest annually at the end of each year, and repayment of $100 at the end of Year 5. In Year 3, S sells B's note to P for $60. B is never insolvent within the meaning of section 108(d)(3). Assume B's note is not a security within the meaning of section 165(g)(2).

(b) *Deemed satisfaction and reissuance.* Under paragraph (g)(3) of this section, B is treated as satisfying its note for $60 immediately before the sale, and reissuing a new note directly to P with a $60 issue price and a $100 stated redemption price at maturity. On a separate entity basis, S's $40 loss would be a capital loss, and B's $40 income would be ordinary income. Under the matching rule, however, the attributes of S's intercompany item and B's corresponding item must be redetermined to produce the same effect as if the transaction had occurred between divisions of a single corporation. Under paragraph (c)(4)(i) of this section, the attributes of B's corresponding discharge of indebtedness income control the attributes of S's intercompany loss. Accordingly, S's loss is treated as ordinary loss.

(c) *Partial bad debt deduction.* The facts are the same as in paragraph (a) of this *Example 3*, except that S claims a $40 partial bad debt deduction under section 166(a)(2) (rather than selling the note to P). The results are the same as in paragraph (b) of this *Example 3*. B's note is treated as satisfied and reissued with a $60 issue price. S's $40 intercompany deduction and B's $40 corresponding income are both ordinary.

(d) *Insolvent debtor.* The facts are the same as in paragraph (a) of this *Example 3*, except that B is insolvent within the meaning of section 108(d)(3) at the time that S sells the note to P. On a separate entity basis, S's $40 loss would be capital, B's $40 income would be excluded from gross income under section 108(a), and B would reduce attributes under section 108(b) or section 1017. However, under paragraph (g)(3)(ii)(B) of this section, section 108(a) does not apply to B's income to characterize it as excluded from gross income. Accordingly, the attributes of S's intercompany loss and B's corresponding income are redetermined in the same manner as in paragraph (b) of this *Example 3*.

Example 4. Nonintercompany debt becomes intercompany debt. (a) *Facts.* On January 1 of Year 1, B borrows $100 from X in return for B's note providing for $10 of interest annually at the end of each year, and repayment of $100 at the end of Year 5. As of January 1 of Year 3, B has fully performed its obligations, but the note's fair market value is $70. On January 1 of Year 3, P buys all of X's stock. B is solvent within the meaning of section 108(d)(3).

(b) *Deemed satisfied and reissuance.* Under paragraph (g)(4) of this section, B is treated as satisfying its indebtedness for $70 (determined under the principles of §1.108–2(f)(2)) immediately after X becomes a member. Both X's $30 capital loss under section 1271(a)(1) and B's $30 of discharge of indebtedness income under section 61(a)(12) are taken into account in determining consolidated taxable income for Year 3. Under paragraph (g)(4)(ii)(C) of this section, the attributes of items resulting from the satisfaction are determined on a separate entity basis. But see section 382 and § 1.1502–15T (or § 1.1502-15A, as appropriate) (limitations on the absorption of built-in losses). B is also treated as reissuing a new note. The new note is an intercompany obligation, it has a $70 issue price and $100 stated redemption price at maturity, and the $30 of original issue discount will be taken into account by B and X in the same manner as provided in paragraph (c) of *Example 1* of this paragraph (g)(5).

(c) *Election to file consolidated returns.* Assume instead that B borrows $100 from S during Year 1, but the P group does not file consolidated returns until Year 3. Under paragraph (g)(4) of this section, B's indebtedness is treated as satisfied and a new note reissued immediately after the debt becomes intercompany debt. The satisfaction and reissuance are deemed to occur on January 1 of Year 3, for the fair market value of the note (determined under the principles of § 1.108–2(f)(2)) at that time.

Example 5. Notional principal contracts. (a) *Facts.* On April 1 of Year 1, M1 enters into a contract with counterparty M2 under which, for a term of five years, M1 is obligated to make a payment to M2 each April 1, beginning in Year 2, in an amount equal to the London Interbank Offered Rate (LIBOR), as determined on the immediately preceding April 1, multiplied by a $1,000 notional principal amount. M2 is obligated to make a payment to M1 each April 1, beginning in Year 2, in an amount equal to 8% multiplied by the same notional principal amount. LIBOR is 7.80% on April 1 of Year 1. On April 1 of Year 2, M2 owes $2 to M1.

(b) *Matching rule.* Under § 1.446–3(d), the net income (or net deduction) from a notional principal contract for a taxable year is included in (or deducted from) gross income. Under § 1.446–3(e), the ratable daily portion of M2's obligation to M1 as of December 31 of Year 1 is $1.50 ($2 multiplied by 275/365). Under the matching rule, M1's net income for Year 1 of $1.50 is taken into account to reflect the difference between M2's net deduction of $1.50 taken into account and the $0 recomputed net deduction. Similarly, the $.50 balance of the $2 of net periodic payments made on April 1 of Year 2 is taken into account for Year 2 in M1's and M2's net income and net deduction from the contract. In addition, the attributes of M1's intercompany income and M2's corresponding deduction are redetermined to produce the same effect as if the transaction had occurred between divisions of a single corporation. Under paragraph (c)(4)(i) of this section, the attributes of M2's corresponding deduction control the attributes of M1's intercompany income. (Although M1 is the selling member with respect to the payment on April 1 of Year 2, it might be the buying member in a subsequent period if it owes the net payment.)

(c) *Dealer.* The facts are the same as in paragraph (a) of this *Example 5*, except that M2 is a dealer in securities, and the contract with M1 is not inventory in the hands of M2. Under section 475, M2 must mark its securities to market at year-end. Assume that under section 475, M2's loss from marking to market the contract with M1 is $100. Under paragraph (g)(3) of this section, M2 is treated as making a $100 payment to M1 to terminate the contract immediately before section 475 is applied. M1's $100 of income from the termination payment is taken into account under the matching rule to reflect M2's deduction under § 1.446–3(h). The attributes of M1's intercompany income and M2's corresponding deduction are redetermined to produce the same effect as if the transaction had occurred between divisions of a single corporation. Under paragraph (c)(4)(i) of this section, the attributes of M2's corresponding deduction control the attributes of M1's intercompany income. Accordingly, M1's income is treated as ordinary income. Paragraph (g)(3) of this section also provides that, immediately after section 475 would apply, a new contract is treated as reissued with an upfront payment of $100. Under § 1.446–3(f), the deemed $100 up front payment by M1 to M2 is taken into account over the term of the new contract in a manner reflecting the economic substance of the contract (for example, allocating the payment in accordance with the forward rates of a series of cash-settled forward contracts that reflect the specified index and the $1,000 notional principal amount). (The timing of taking items into account is the same if M1, rather than M2, is the dealer subject to the mark-to-market requirement of section 475 at year-end. However in this case, because the attributes of the corresponding deduction control the attributes of the intercompany income, M1's income from the deemed termination payment might be ordinary or capital.)

(h) *Anti-avoidance rules*—(1) *In general.* If a transaction is engaged in or structured with a principal purpose to avoid the purposes of this section (including, for example, by avoiding treatment as an intercompany transaction), adjustments must be made to carry out the purposes of this section.

(2) *Examples.* The anti-avoidance rules of this paragraph (h) are illustrated by the following examples. The examples set forth below do not address common law doctrines or other authorities that might apply to recast a transaction or to otherwise affect the tax treatment of a transaction. Thus, in addition to adjustments under this paragraph (h), the Commissioner can,

for example, apply the rules of section 269 or §1.701–2 to disallow a deduction or to recast a transaction.

Example 1. Sale of a partnership interest. (a) *Facts.* S owns land with a $10 basis and $100 value. B has net operating losses from separate return limitation years (SRLYs) subject to limitation under §1.1502–21T(c). Pursuant to a plan to absorb the losses without limitation by the SRLY rules, S transfers the land to an unrelated, calendar-year partnership in exchange for a 10% interest in the capital and profits of the partnership in a transaction to which section 721 applies. The partnership does not have a section 754 election in effect. S later sells its partnership interest to B for $100. In the following year, the partnership sells the land to X for $100. Because the partnership does not have a section 754 election in effect, its $10 basis in the land does not reflect B's $100 basis in the partnership interest. Under section 704(c), the partnership's $90 built-in gain is allocated to B, and B's basis in the partnership interest increases to $190 under section 705. In a later year, B sells the partnership interest to a nonmember for $100.

(b) *Adjustments.* Under §1.1502–21T(c), the partnership's $90 built-in gain allocated to B ordinarily increases the amount of B's SRLY limitation, and B's $90 loss from its sale of the partnership interest ordinarily is not subject to limitation under the SRLY rules. Because the contribution of property to the partnership and the sale of the partnership interest were part of a plan a principal purpose of which was to achieve a reduction in consolidated tax liability by creating offsetting gain and loss for B while deferring S's intercompany gain, B's allocable share of the partnership's gain from its sale of the land is treated under paragraph (h)(1) of this section as not increasing the amount of B's SRLY limitation.

Example 2. Transitory status as an intercompany obligation. (a) *Facts.* P historically has owned 70% of X's stock and the remaining 30% is owned by unrelated shareholders. On January 1 of Year 1, S borrows $100 from X in return for S's note requiring $10 of interest annually at the end of each year, and repayment of $100 at the end of Year 20. As of January 1 of Year 3, the P group has substantial net operating loss carryovers, and the fair market value of S's note falls to $70 due to an increase in prevailing market interest rates. X is not permitted under section 166(a)(2) to take into account a $30 loss with respect to the note. Pursuant to a plan to permit X to take into account its $30 loss without disposing of the note, P acquires an additional 10% of X's stock, causing X to become a member, and P subsequently resells the 10% interest. X's $30 loss with respect to the note is a net unrealized built-in loss within the meaning of §1.1502–15T.

(b) *Adjustments.* Under paragraph (g)(4) of this section, X ordinarily would take into account its $30 loss as a result of the note becoming an intercompany obligation, and S would take into account $30 of discharge of indebtedness income. Under §1.1502–22T, X's loss is not combined with items of the other members and the loss would be carried to X's separate return years as a result of X becoming a nonmember. However, the transitory status of S's indebtedness to X as an intercompany obligation is structured with a principal purpose to accelerate the recognition of X's loss. Thus, S's note is treated under paragraph (h)(1) of this section as not becoming an intercompany obligation.

Example 3. Corporate mixing bowl. (a) *Facts.* M1 and M2 are subsidiaries of P. M1 operates a manufacturing business on land it leases from M2. The land is the only asset held by M2. P intends to dispose of the M1 business, including the land owned by M2; P's basis in the M1 stock is equal to the stock's fair market value. M2's land has a value of $20 and a basis of $0 and P has a $0 basis in the stock of M2. In Year 1, with a principal purpose of avoiding gain from the sale of the land (by transferring the land to M1 with a carry-over basis without affecting P's basis in the stock of M1 or M2), M1 and M2 form corporation T; M1 contributes cash in exchange for 80% of the T stock and M2 contributes the land in exchange for 20% of the stock. In Year 3, T liquidates, distributing $20 cash to M2 and the land (plus $60 cash) to M1. Under §1.1502–34, section 332 applies to both M1 and M2. Under section 337, T recognizes no gain or loss from its liquidating distribution of the land to M1. T has neither gain nor loss on its distribution of cash to M2. In Year 4, P sells all of the stock of M1 to X and liquidates M2.

(b) *Adjustments.* A principal purpose for the formation and liquidation of T was to avoid gain from the sale of M2's land. Thus, under paragraph (h)(1) of this section, M2 must take $20 of gain into account when the stock of M1 is sold to X.

Example 4. Partnership mixing bowl. (a) *Facts.* M1 owns a self-created intangible asset with a $0 basis and a fair market value of $100. M2 owns land with a basis of $100 and a fair market value of $100. In Year 1, with a principal purpose of creating basis in the intangible asset (which would be eligible for amortization under section 197), M1 and M2 form partnership PRS; M1 contributes the intangible asset and M2 contributes the land. X, an unrelated person, contributes cash to PRS in exchange for a substantial interest in the partnership. PRS uses the contributed assets in legitimate business activities. Five years and six months later, PRS liquidates, distributing the land to M1, the intangible to M2, and cash to X. The group reports no gain under sections 707(a)(2)(B) and 737(a) and claims that M2's basis in the intangible asset is $100 under section 732 and that the asset is eligible for amortization under section 197.

(b) *Adjustments.* A principal purpose of the formation and liquidation of PRS was to create additional amortization without an offsetting increase in consolidated taxable income by avoiding treatment as an intercompany transaction. Thus, under paragraph (h)(1) of this section, appropriate adjustments must be made.

Example 5. Sale and leaseback. (a) *Facts.* S operates a factory with a $70 basis and $100 value, and has loss carryovers from SRLYs. Pursuant to a plan to take into account the $30 unrealized gain while continuing to operate the factory, S sells the factory to X for $100 and leases it back on a long-term basis. In the transaction, a substantial interest in the factory is transferred to X. The sale and leaseback are not recharacterized under general principles of Federal income tax law. As a result of S's sale to X, the $30 gain is taken into account and increases S's SRLY limitation.

(b) *No adjustments.* Although S's sale was pursuant to a plan to accelerate the $30 gain, it is not subject to adjustment under paragraph (h)(1) of this section. The sale is not treated as engaged in or structured with a principal purpose to avoid the purposes of this section.

(i) [Reserved]

(j) *Miscellaneous operating rules.* For purposes of this section—

(1) *Successor assets.* Any reference to an asset includes, as the context may require, a reference to any other asset the basis of which is determined, directly or indirectly, in whole or in part, by reference to the basis of the first asset.

(2) *Successor persons*—(i) *In general.* Any reference to a person includes, as the context may require, a reference to a predecessor or successor. For this purpose, a predecessor is a transferor of assets to a transferee (the successor) in a transaction—

(A) To which section 381(a) applies;

(B) In which substantially all of the assets of the transferor are transferred to members in a complete liquidation;

(C) In which the successor's basis in assets is determined (directly or indirectly, in whole or in part) by reference to the basis of the transferor, but the transferee is a successor only with respect to the assets the basis of which is so determined; or

(D) Which is an intercompany transaction, but only with respect to assets that are being accounted for by the transferor in a prior intercompany transaction.

(ii) *Intercompany items.* If the assets of a predecessor are acquired by a successor member, the successor succeeds to, and takes into account (under the rules of this section), the predecessor's intercompany items. If two or more successor members acquire assets of the predecessor, the successors take into account the predecessor's intercompany items in a manner that is consistently applied and reasonably carries out the purposes of this section and applicable provisions of law.

(3) *Multiple triggers.* If more than one corresponding item can cause an intercompany item to be taken into account under the matching rule, the intercompany item is taken into account in connection with the corresponding item most consistent with the treatment of members as divisions of a single corporation. For example, if S sells a truck to B, its intercompany gain from the sale is not taken into account by reference to B's depreciation if the depreciation is capitalized under section 263A as part of B's cost for a building; instead, S's gain relating to the capitalized depreciation is taken into account when the building is sold or as it is depreciated. Similarly, if B purchases appreciated land from S and transfers the land to a lower-tier member in exchange for stock, thereby duplicating the basis of the land in the basis of the stock, items with respect to both the stock and the land can cause S's intercompany gain to be taken into account; if the lower-tier member becomes a nonmember as a result of the sale of its stock, the attributes of S's intercompany gain are determined with respect to the land rather than the stock.

(4) *Multiple or successive intercompany transactions.* If a member's intercompany item or corresponding item affects the accounting for more than one intercompany transaction, appropriate adjustments are made to treat all of the intercompany transactions as transactions between divisions of a single corporation. For example, if S sells property to M, and M sells the property to B, then S, M, and B are treated as divisions of a single corporation for purposes of applying the rules of this

section. Similar principles apply with respect to intercompany transactions that are part of the same plan or arrangement. For example, if S sells separate properties to different members as part of the same plan or arrangement, all of the participating members are treated as divisions of a single corporation for purposes of determining the attributes (which might also affect timing) of the intercompany items and corresponding items from each of the properties.

(5) *Acquisition of group*—(i) *Scope.* This paragraph (j)(5) applies only if a consolidated group (the terminating group) ceases to exist as a result of—

(A) The acquisition by a member of another consolidated group of either the assets of the common parent of the terminating group in a reorganization described in section 381(a)(2), or the stock of the common parent of the terminating group; or

(B) The application of the principles of §1.1502–75(d)(2) or (d)(3).

(ii) *Application.* If the terminating group ceases to exist under circumstances described in paragraph (j)(5)(i) of this section, the surviving group is treated as the terminating group for purposes of applying this section to the intercompany transactions of the terminating group. For example, intercompany items and corresponding items from intercompany transactions between members of the terminating group are taken into account under the rules of this section by the surviving group. This treatment does not apply, however, to members of the terminating group that are not members of the surviving group immediately after the terminating group ceases to exist (for example, under section 1504(a)(3) relating to reconsolidation, or section 1504(c) relating to includible insurance companies).

(6) *Former common parent treated as continuation of group.* If a group terminates because the common parent is the only remaining member, the common parent succeeds to the treatment of the terminating group for purposes of applying this section so long as it neither becomes a member of an affiliated group filing separate returns nor becomes a corporation described in section 1504(b). For example, if the only subsidiary of the group liquidates into the common parent in a complete liquidation to which section 332 applies, or the common parent merges into the subsidiary and the subsidiary is treated as the common parent's successor under paragraph (j)(2)(i) of this section, the taxable income of the surviving corporation is treated as the group's consolidated taxable income in which the intercompany and corresponding items must be included. See §1.267(f)–1 for additional rules applicable to intercompany losses or deductions.

(7) *Becoming a nonmember.* For purposes of this section, a member is treated as becoming a nonmember if it has a separate return year (including another group's consolidated return year). A member is not treated as having a separate return year if its items are treated as taken into account in computing the group's consolidated taxable income under paragraph (j)(5) or (6) of this section.

(8) *Recordkeeping.* Intercompany and corresponding items must be reflected on permanent records (including work papers). See also section 6001, requiring records to be maintained. The group must be able to identify from these permanent records the amount, location, timing, and attributes of the items, so as to permit the application of the rules of this section for each year.

(9) *Examples.* The operating rules of this paragraph (j) are illustrated generally throughout this section, and by the following examples.

Example 1. Intercompany sale followed by section 351 transfer to member. (a) *Facts.* S holds land for investment with a basis of $70. On January 1 of Year 1, S sells the land to M for $100. M also holds the land for investment. On July 1 of Year 3, M transfers the land to B in exchange for all of B's stock in a transaction to which section 351 applies. Under section 358, M's basis in the B stock is $100. B holds the land for sale to customers in the ordinary course of business and, under section 362(b), B's basis in the land is $100. On December 1 of Year 5, M sells 20% of the B stock to X for $22. In an unrelated transaction on July 1 of Year 8, B sells 20% of the land for $22.

(b) *Definitions.* Under paragraph (b)(1) of this section, S's sale of the land to M and M's transfer of the land to B are both intercompany transactions. S is the selling member and M is the buying member in the first intercompany transaction, and M is the selling member and B is the buying member in the second intercompany transaction. M has no intercompany items under paragraph (b)(2) of this section. Because B acquired the land in an intercompany transaction, B's items from the land are corresponding items to be taken into account under this section. Under the successor asset rule of paragraph (j)(1) of this section, references to the land include references to M's B stock. Under the successor person rule of paragraph (j)(2) of this section, references to M include references to B with respect to the land.

(c) *Timing and attributes resulting from the stock sale.* Under paragraph (c)(3) of this section, M is treated as owning and selling B's stock for purposes of the matching rule even though, as divisions, M could not own and sell stock in B. Under paragraph (j)(3) of this section, both M's B stock and B's land can cause S's intercompany gain to be taken into account under the matching rule. Thus, S takes $6 of its gain into account in Year 5 to reflect the $6 difference between M's $2 gain taken into account from its sale of B stock and the $8 recomputed gain. Under paragraph (j)(4) of this section, the attributes of this gain are determined by treating S, M, and B as divisions of a single corporation. Under paragraph (c)(1) of this section, S's $6 gain and M's $2 gain are treated as long-term capital gain. The gain would be capital on a separate entity basis (assuming that section 341 does not apply), and this treatment is not inconsistent with treating S, M, and B as divisions of a single corporation because the stock sale and subsequent land sale are unrelated transactions and B remains a member following the sale.

(d) *Timing and attributes resulting from the land sale.* Under paragraph (j)(3) of this section, S takes $6 of its gain into account in Year 8 under the matching rule to reflect the $6 difference between B's $2 gain taken into account from its sale of an interest in the land and the $8 recomputed gain. Under paragraph (j)(4) of this section, the attributes of this gain are determined by treating S, M, and B as divisions of a single corporation and taking into account the activities of S, M, and B with respect to the land. Thus, both S's gain and B's gain might be ordinary income as a result of B's activities. (If B subsequently sells the balance of the land, S's gain taken into account is limited to its remaining $18 of intercompany gain.)

(e) *Sale of successor stock resulting in deconsolidation.* The facts are the same as in paragraph (a) of this *Example 1,* except that M sells 60% of the B stock to X for $66 on December 1 of Year 5 and B becomes a nonmember. Under the matching rule, M's sale of B stock results in $18 of S's gain being taken into account (to reflect the difference between M's $6 gain taken into account and the $24 recomputed gain). Under the acceleration rule, however, the entire $30 gain is taken into account (to reflect B becoming a nonmember, because its basis in the land reflects M's $100 cost basis from the prior intercompany transaction). Under paragraph (j)(4) of this section, the attributes of S's gain are determined by treating S, M, and B as divisions of a single corporation. Because M's cost basis in the land will be reflected by B as a nonmember, all of S's gain is treated as from the land (rather than a portion being from B's stock), and B's activities with respect to the land might therefore result in S's gain being ordinary income.

Example 2. Intercompany sale of member stock followed by recapitalization. (a) *Facts.* Before becoming a member of the P group, S owns P stock with a basis of $70. On January 1 of Year 1, P buys all of S's stock. On July 1 of Year 3, S sells the P stock to M for $100. On December 1 of Year 5, P acquires M's original P stock in exchange for new P stock in a recapitalization described in section 368(a)(1)(E).

(b) *Timing and attributes.* Although P's basis in the stock acquired from M is eliminated under paragraph (f)(4) of this section, the new P stock received by M is exchanged basis property (within the meaning of section 7701(a)(44)) having a basis under section 358 equal to M's basis in the original P stock. Under the successor asset rule of paragraph (j)(1) of this section, references to M's original P stock include references to M's new P stock. Because it is still possible to take S's intercompany item into account under the matching rule with respect to the successor asset, S's gain is not taken into account under the acceleration rule as a result of the basis elimination under paragraph (f)(4) of this section. Instead, the gain is taken into account based on subsequent events with respect to M's new P stock (for example, a subsequent distribution or redemption of the new stock).

Example 3. Back-to-back intercompany transactions—matching. (a) *Facts.* S holds land for investment with a basis of $70. On January 1 of Year 1, S sells the land to M for $90. M also holds the land for investment. On July 1 of Year 3, M sells the land for $100 to B, and B holds the land for sale to customers in the ordinary course of business. During Year 5, B sells all of the land to customers for $105.

(b) *Timing.* Under paragraph (b)(1) of this section, S's sale of the land to M and M's sale of the land to B are both intercompany transactions. S is the selling member and M is the buying member in the first intercompany transaction, and M is the selling member and B is the buying member in the second intercompany transaction. Under paragraph (j)(4) of this section, S, M and B are treated as divisions of a single corporation for purposes of determining the timing of their items from the intercompany transactions. See also paragraph (j)(2) of this section (B is treated as a successor to M for purposes of taking S's intercompany gain into account). Thus, S's $20 gain and M's $10 gain are both taken into account in Year 5 to reflect the difference between B's $5 gain taken into account with respect to the land and the $35 recomputed gain (the gain that B would have taken into account if the intercompany sales had been transfers between divisions of a single corporation, and B succeeded to S's $70 basis).

(c) *Attributes.* Under paragraphs (j)(4) of this section, the attributes of the intercompany items and corresponding items of S, M, and B are also determined by treating S, M, and B as divisions of a single corporation. For example, the attributes of S's and M's intercompany items are determined by taking B's activities into account.

Example 4. Back-to-back intercompany transactions—acceleration. (a) *Facts.* During Year 1, S performs services for M in exchange for $10 from M. S incurs $8 of employee expenses. M capitalizes the $10 cost of S's services under section 263 as part of M's cost to acquire real property from X. Under its separate entity method of accounting, S would take its income and expenses into account in Year 1. M holds the real property for investment and, on July 1 of Year 5, M sells it to B at a gain. B also holds the real property for investment. On December 1 of Year 8, while B still owns the real property, P sells all of M's stock to X and M becomes a nonmember.

(b) *M's items.* M takes its gain into account immediately before it becomes a nonmember. Because the real property stays in the group, the acceleration rule redetermines the attributes of M's gain under the principles of the matching rule as if B sold the real property to an affiliated corporation that is not a member of the group for a cash payment equal to B's adjusted basis in the real property, and S, M, and B were divisions of a single corporation. Thus, M's gain is capital gain.

(c) *S's items.* Under paragraph (b)(2)(ii) of this section, S includes the $8 of expenses in determining its $2 intercompany income. In Year 1, S takes into account $8 of income and $8 of expenses. Under paragraph (j)(4) of this section, appropriate adjustments must be made to treat both S's performance of services for M and M's sale to B as occurring between divisions of a single corporation. Thus, S's $2 of intercompany income is not taken into account as a result of M becoming a nonmember, but instead will be taken into account based on subsequent events (e.g., under the matching rule based on B's sale of the real property to a nonmember, or under the acceleration rule based on P's sale of the stock of S or B to a nonmember). See the successor person rules of paragraph (j)(2) of this section (B is treated as a successor to M for purposes of taking S's intercompany income into account).

(d) *Sale of S's stock.* The facts are the same as in paragraph (a) of this *Example 4,* except that P sells all of S's stock (rather than M's stock) and S becomes a nonmember on July 1 of Year 5. S's remaining $2 of intercompany income is taken into account immediately before S becomes a nonmember. Because S's intercompany income is not from an intercompany sale, exchange, or distribution of property, the attributes of the intercompany income are determined on a separate entity basis. Thus, S's $2 of intercompany income is ordinary income. M does not take any of its intercompany gain into account as a result of S becoming a nonmember.

(e) *Intercompany income followed by intercompany loss.* The facts are the same as in paragraph (a) of this *Example 4,* except that M sells the real property to B at a $1 loss (rather than a gain). M takes its $1 loss into account under the acceleration rule immediately before M becomes a nonmember. But see §1.267(f)–1 (which might further defer M's loss if M and B remain in a controlled group relationship after M becomes a nonmember). Under paragraph (j)(4) of this section appropriate adjustments must be made to treat the group as if both intercompany transactions occurred between divisions of a single corporation. Accordingly, P's sale of M stock also results in S taking into account $1 of intercompany income as capital gain to offset M's $1 of corresponding capital loss. The remaining $1 of S's intercompany income is taken into account based on subsequent events.

Example 5. Successor group. (a) *Facts.* On January 1 of Year 1, B borrows $100 from S in return for B's note providing for $10 of interest annually at the end of each year, and repayment of $100 at the end of Year 20. As of January 1 of Year 3, B has paid the interest accruing under the note. On that date, X acquires all of P's stock and the former P group members become members of the X consolidated group.

(b) *Successor.* Under paragraph (j)(5) of this section, although B's note ceases to be an intercompany obligation of the P group, the note is not treated as satisfied and reissued under paragraph (g) of this section as a result of X's acquisition of P stock. Instead, the X consolidated group succeeds to the treatment of the P group for purposes of paragraph (g) of this section, and B's note is treated as an intercompany obligation of the X consolidated group.

(c) *No subgroups.* The facts are the same as in paragraph (a) of this *Example 5,* except that X simultaneously acquires the stock of S and B from P (rather than X acquiring all of P's stock). Paragraph (j)(5) of this section does not apply to X's acquisitions. Unless an exception described in paragraph (g)(3)(i)(B) applies, B's note is treated as satisfied immediately before S and B become nonmembers, and reissued immediately after they become members of the X consolidated group. The amount at which the note is satisfied and reissued under paragraph (g)(3) of this section is based on the fair market value of the note at the time of P's sales to X. Paragraph (g)(4) of this section does not apply to the reissued B note in the X consolidated group, because the new note is always an intercompany obligation of the X consolidated group.

Example 6. Liquidation—80% distributee. (a) *Facts.* X has had preferred stock described in section 1504(a)(4) outstanding for several years. On January 1 of Year 1, S buys all of X's common stock for $60, and B buys all of X's preferred stock for $40. X's assets have a $0 basis and $100 value. On July 1 of Year 3, X distributes all of its assets to S and B in a complete liquidation. Under § 1.1502–34, section 332 applies to both S and B. Under section 337, X has no gain or loss from its liquidating distribution to S. Under sections 336 and 337(c), X has a $40 gain from its liquidating distribution to B. B has a $40 basis under section 334(a) in the assets received from X, and S has a $0 basis under section 334(b) in the assets received from X.

(b) *Intercompany items from the liquidation.* Under the matching rule, X's $40 gain from its liquidating distribution to B is not taken into account under this section as a result of the liquidation (and therefore is not yet reflected under §§ 1.1502–32 and 1.1502–33). Under the successor person rule of paragraph (j)(2)(i) of this section, S and B are both successors to X. Under section 337(c), X recognizes gain or loss only with respect to the assets distributed to B. Under paragraph (j)(2)(ii) of this section, to be consistent with the purposes of this section, S succeeds to X's $40 intercompany gain. The gain will be taken into account by S under the matching and acceleration rules of this section based on subsequent events. (The allocation of the intercompany gain to S does not govern the allocation of any other attributes.)

Example 7. Liquidation—no 80% distributee. (a) *Facts.* X has only common stock outstanding. On January 1 of Year 1, S buys 60% of X's stock for $60, and B buys 40% of X's stock for $40. X's assets have a $0 basis and $100 value. On July 1 of Year 3, X distributes all of its assets to S and B in a complete liquidation. Under § 1.1502–34, section 332 applies to both S and B. Under sections 336 and 337(c), X has a $100 gain from its liquidating distributions to S and B. Under section 334(b), S has a $60 basis in the assets received from X and B has a $40 basis in the assets received from X.

(b) *Intercompany items from the liquidation.* Under the matching rule, X's $100 intercompany gain from its liquidating distributions to S and B is not taken into account under this section as a result of the liquidation (and therefore is not yet reflected under §§ 1.1502–32 and 1.1502–33). Under the successor person rule of paragraph (j)(2)(i) of this section, S and B are both successors to X. Under paragraph (j)(2)(ii) of this section, to be consistent with the purposes of this section, S succeeds to X's $40 intercompany gain with respect to the assets distributed to B, and B succeeds to X's $60 intercompany gain with respect to the assets distributed to S. The gain will be taken into account by S and B under the matching and acceleration rules of this section based on subsequent events. (The allocation of the intercompany gain does not govern the allocation of any other attributes.)

(k) *Cross references*—(1) *Section 108.* See § 1.108–3 for the treatment of intercompany deductions and losses as subject to attribute reduction under section 108(b).

(2) *Section 263A(f).* See section 263A(f) and § 1.263A–9(g)(5) for special rules regarding interest from intercompany transactions.

(3) *Section 267(f).* See section 267(f) and § 1.267(f)–1 for special rules applicable to certain losses and deductions from transactions between members of a controlled group.

(4) *Section 460.* See § 1.460–4(j) for special rules regarding the application of section 460 to intercompany transactions.

(5) *Section 469.* See § 1.469–1(h) for special rules regarding the application of section 469 to intercompany transactions.

(6) *§ 1.1502–80.* See § 1.1502–80 for the non-application of certain Internal Revenue Code rules.

(l) *Effective dates*—(1) *In general.* This section applies with respect to transactions occurring in years beginning on or after July 12, 1995. If both this section and prior law apply to a transaction, or neither applies, with the result that items may be duplicated, omitted, or eliminated in determining taxable income (or tax liability), or items may be treated inconsistently, prior law (and not this section) applies to the transaction. For example, S's and B's items from S's sale of property to B which occurs in a consolidated return year beginning before July 12, 1995, are taken into account under prior law, even though B may dispose of the property in a consolidated return year beginning on or after July 12,

1995. Similarly, an intercompany distribution to which a shareholder becomes entitled in a consolidated return year beginning before July 12, 1995, but which is distributed in a consolidated return year beginning on or after that date is taken into account under prior law (generally when distributed), because this section generally takes dividends into account when the shareholder becomes entitled to them but this section does not apply at that time. If application of prior law to S's deferred gain or loss from a deferred intercompany transaction (as defined under prior law) occurring in a consolidated return year beginning prior to July 12, 1995, would be affected by an intercompany transaction (as defined under this section) occurring in a consolidated return year beginning on or after July 12, 1995, S's deferred gain or loss continues to be taken into account as provided under prior law, and the items from the subsequent intercompany transaction are taken into account under this section. Appropriate adjustments must be made to prevent items from being duplicated,omitted, or eliminated in determining taxable income as a result of the application of both this section and prior law to the successive transactions, and to ensure the proper application of prior law.

(2) *Avoidance transactions.* This paragraph (l)(2) applies if a transaction is engaged in or structured on or after April 8, 1994, with a principal purpose to avoid the rules of this section (and instead to apply prior law). If this paragraph (l)(2) applies, appropriate adjustments must be made in years beginning on or after July 12, 1995, to prevent the avoidance, duplication, omission, or elimination of any item (or tax liability), or any other inconsistency with the rules of this section. For example, if S is a dealer in real property and sells land to B on March 16, 1995 with a principal purpose of converting any future appreciation in the land to capital gain, B's gain from the sale of the land on May 11, 1997 might be characterized as ordinary income under this paragraph (l)(2).

(3) *Election for certain stock elimination transactions*—(i) *In general.* A group may elect pursuant to this paragraph (l)(3) to apply this section (including the elections available under paragraph (f)(5)(ii) of this section) to stock elimination transactions to which prior law would otherwise apply. If an election is made, this section, and not prior law, applies to determine the timing and attributes of S's and B's gain or loss from stock with respect to all stock elimination transactions.

(ii) *Stock elimination transactions.* For purposes of this paragraph (l)(3), a stock elimination transaction is a transaction in which stock transferred from S to B—

(A) Is cancelled or redeemed on or after July 12, 1995;

(B) Is treated as cancelled in a liquidation pursuant to an election under section 338(h)(10) with respect to a qualified stock purchase with an acquisition date on or after July 12, 1995;

(C) Is distributed on or after July 12, 1995; or

(D) Is exchanged on or after July 12, 1995 for stock of a member (determined immediately after the exchange) in a transaction that would cause S's gain or loss from the transfer to be taken into account under prior law.

(iii) *Time and manner of making election.* An election under this paragraph (l)(3) is made by attaching to a timely filed original return (including extensions) for the consolidated return year including July 12, 1995 a statement entitled ''[Insert Name and Employer Identification Number of Common Parent] HEREBY ELECTS THE APPLICATION OF §1.1502–13(l)(3).'' See paragraph (f)(5)(ii)(E) of this section for the manner of electing the relief provisions of paragraph (f)(5)(ii) of this section.

(4) *Prior law.* For transactions occurring in S's years beginning before July 12, 1995, see the applicable regulations issued under section 1502. See §§1.1502–13, 1.1502–13T, 1.1502–14, 1.1502–14T, 1.1502–31, and 1.1502–32 (as contained in the 26 CFR part 1 edition revised as of April 1, 1995).

(5) *Consent to adopt method of accounting.* For intercompany transactions occurring in a consolidated group's first taxable year beginning on or after July 12, 1995, the Commissioner's consent under section 446(e) is hereby granted for any changes in methods of accounting that are necessary solely by reason of the timing rules of this section.

Changes in method of accounting for these transactions are to be effected on a cut-off basis.

[T.D. 8597, 60 FR 36685, July 18, 1995, as amended by T.D. 8660, 61 FR 10449, 10450, Mar. 14, 1996; T.D. 8677, 61 FR 33323, June 27, 1996; T.D. 8660, 62 FR 12097, Mar. 14, 1997; T.D. 8677, 62 FR 12542, Mar. 17, 1997]

§ 1.1502–15T SRLY limitation on built-in losses (temporary).

(a) *SRLY limitation.* Built-in losses are subject to the SRLY limitation under §§ 1.1502–21T(c) and 1.1502–22T(c) (including applicable subgroup principles). Built-in losses are treated as deductions or losses in the year recognized, except for the purpose of determining the amount of, and the extent to which the built-in loss is limited by, the SRLY limitation for the year in which it is recognized. Solely for such purpose, a built-in loss is treated as a hypothetical net operating loss carryover or net capital loss carryover arising in a SRLY, instead of as a deduction or loss in the year recognized. To the extent that a built-in loss is allowed as a deduction under this section in the year it is recognized, it offsets any consolidated taxable income for the year before any loss carryovers or carrybacks are allowed as a deduction. To the extent not so allowed, it is treated as a separate net operating loss or net capital loss carryover or carryback arising in the year of recognition and, under § 1.1502–21T(c) or § 1.1502–22T(c), the year of recognition is treated as a SRLY.

(b) *Built-in losses*—(1) *Defined.* If a corporation has a net unrealized built-in loss under section 382(h)(3) (as modified by this section) on the day it becomes a member of the group (whether or not the group is a consolidated group), its deductions and losses are built-in losses under this section to the extent they are treated as recognized built-in losses under section 382(h)(2)(B) (as modified by this section). This paragraph (b) generally applies separately with respect to each member, but see paragraph (c) of this section for circumstances in which it is applied on a subgroup basis.

(2) *Operating rules.* Solely for purposes of applying paragraph (b)(1) of this section, the principles of § 1.1502–94T(c) apply with appropriate adjustments, including the following:

(i) *Ownership change.* A corporation is treated as having an ownership change under section 382(g) on the day the corporation becomes a member of a group, and no other events (e.g., a subsequent ownership change under section 382(g) while it is a member) are treated as causing an ownership change. In the case of an asset acquisition by a group, the assets and liabilities acquired directly from the same transferor pursuant to the same plan are treated as the assets and liabilities of a corporation that becomes a member of the group (and has an ownership change) on the date of the acquisition. –

(ii) *Recognized built-in gain or loss.* A loss that is included in the determination of net unrealized built-in gain or loss and that is recognized but disallowed or deferred (e.g., under § 1.1502–20 or section 267) is not treated as a built-in loss unless and until the loss would be allowed during the recognition period without regard to the application of this section. Section 382(h)(1)(B)(ii) does not apply to the extent it limits the amount of recognized built-in loss that may be treated as a pre-change loss to the amount of the net unrealized built-in loss.

(c) *Built-in losses of subgroups*—(1) *In general.* In the case of a subgroup, the principles of paragraph (b) of this section apply to the subgroup, and not separately to its members. Thus, the net unrealized built-in loss and recognized built-in loss for purposes of paragraph (b) of this section are based on the aggregate amounts for each member of the subgroup. –

(2) *Members of subgroups.* A subgroup is composed of those members that have been continuously affiliated with each other for the 60 consecutive month period ending immediately before they become members of the group in which the loss is recognized. A member remains a member of the subgroup until it ceases to be affiliated with the loss member. For this purpose, the principles of § 1.1502–21T(c)(2) (iv) through (vi) apply with appropriate adjustments.

(3) *Built-in amounts.* Solely for purposes of determining whether the subgroup has a net unrealized built-in loss

or whether it has a recognized built-in loss, the principles of §§ 1.1502–91T (g) and (h) apply with appropriate adjustments.

(d) *Examples.* For purposes of the examples in this section, unless otherwise stated, all groups file consolidated returns, all corporations have calendar taxable years, the facts set forth the only corporate activity, value means fair market value and the adjusted basis of each asset equals its value, all transactions are with unrelated persons, and the application of any limitation or threshold under section 382 is disregarded. The principles of this section are illustrated by the following examples:

Example 1. Determination of recognized built-in loss. (a) P buys all the stock of T during Year 1 for $100, and T becomes a member of the P group. T has three depreciable assets. Asset 1 has an unrealized loss of $20 (basis $45, value $25), asset 2 has an unrealized loss of $25 (basis $50, value $25), and asset 3 has an unrealized gain of $25 (basis $25, value $50).

(b) Under paragraph (b)(2)(i) of this section, T is treated as having an ownership change under section 382(g) on becoming a member of the P group. This treatment does not depend on whether P's acquisition of the T stock actually constitutes an ownership change under section 382(g), or whether T is subject to any limitation under section 382. Under paragraph (b)(1) of this section, none of T's $45 of unrealized loss is treated as a built-in loss unless T has a net unrealized built-in loss under section 382(h)(3) on becoming a member of the P group.

(c) Under section 382(h)(3)(A), T has a $20 net unrealized built-in loss on becoming a member of the P group (($20)+($25)+$25=($20)). Assume that this amount exceeds the threshold requirement in section 382(h)(3)(B). Under section 382(h)(2)(B), the entire amount of T's $45 unrealized loss is treated as a built-in loss to the extent it is recognized during the 5-year recognition period described in section 382(h)(7). Under paragraph (b)(2)(ii) of this section, the restriction under section 382(h)(1)(B)(ii), which limits the amount of recognized built-in loss that is treated as pre-change loss to the amount of the net unrealized built-in loss, is inapplicable for this purpose. Consequently, the entire $45 of unrealized loss (not just the $20 net unrealized loss) is treated under paragraph (b)(1) of this section as a built-in loss to the extent it is recognized within 5 years of T's becoming a member of the P group. Under paragraph (a) of this section, a built-in loss is subject to the SRLY limitation under § 1.1502–21T(c)(1).

(d) Under paragraph (b)(2)(i) of this section, the results would be the same if T transferred all of its assets and liabilities to a subsidiary of the P group in a single transaction described in section 351.

Example 2. Actual application of section 382 not relevant. (a) The facts are the same as in *Example 1,* except that P buys 55 percent of the stock of T during Year 1, resulting in an ownership change of T under section 382(g). During Year 2, P buys the 45 percent balance of the T stock, and T becomes a member of the P group.

(b) Although T has an ownership change for purposes of section 382 in Year 1 and not Year 2, T's joining the P group in Year 2 is treated as an ownership change under section 382(g) for purposes of this section. Consequently, for purposes of this section, whether T has a net unrealized built-in loss under section 382(h)(3) is determined as if the day T joined the P group were a change date. Thus, the results are the same as in *Example 1.*

Example 3. Determination of a recognized built-in loss of a subgroup. (a) During Year 1, P buys all of the stock of S for $100, and S becomes a member of the P group. M is the common parent of another group. At the beginning of Year 7, M acquires all of the stock of P, and P and S become members of the M group. At the time of M's acquisition of the P stock, P has (disregarding the stock of S) a $10 net unrealized built-in gain (two depreciable assets, asset 1 with a basis of $35 and a value of $55, and asset 2 with a basis of $55 and a value of $45), and S has a $75 net unrealized built-in loss (two depreciable assets, asset 3 with a basis of $95 and a value of $10, and asset 4 with a basis of $10 and a value of $20).

(b) Under paragraph (c) of this section, P and S compose a subgroup on becoming members of the M group because P and S were continuously affiliated for the 60 month period ending immediately before they became members of the M group. Consequently, paragraph (b) of this section does not apply to P and S separately. Instead, their separately computed unrealized gains and losses are aggregated for purposes of determining whether and the extent to which any unrealized loss is treated as built-in loss under this section and is subject to the SRLY limitation under § 1.1502–21T(c).

(c) Under paragraph (c) of this section, the P subgroup has a net unrealized built-in loss on the day P and S become members of the M group determined by treating the day they become members as a change date. The net unrealized built-in loss is the aggregate of P's net unrealized built-in gain of $10 and S's net unrealized built-in loss of $75, or an aggregate net unrealized built-in loss of $65. (The stock of S owned by P is disregarded for purposes of determining the net unrealized built-in loss. However, any loss allowed on the sale of the stock within the recognition period is taken into account in determining recognized built-in loss.) Assume that the $65 net unrealized built-in loss exceeds the threshold requirement under section 382(h)(3)(B).

(d) Under paragraphs (b)(1), (b)(2)(ii), and (c) of this section, a loss recognized during the 5-year recognition period on an asset of P or S held on the day that P and S became members of the M group is a built-in loss except to the extent the group establishes that such loss exceeds the amount by which the adjusted basis of such asset on the day the member became a member exceeded the fair market value of such asset on that same day. If P sells asset 2 for $45 in Year 7 and recognizes a $10 loss, the entire $10 loss is treated as a built-in loss under paragraphs (b)(2)(ii) and (c) of this section. If S sells asset 3 for $10 in Year 7 and recognizes an $85 loss, the entire $85 loss is treated as a built-in loss under paragraphs (b)(2)(ii) and (c) of this section (not just the $55 balance of the P subgroup's $65 net unrealized built-in loss).

(e) The determination of whether P and S constitute a SRLY subgroup for purposes of loss carryovers and carrybacks, and the extent to which built-in losses are not allowed under the SRLY limitation, is made under § 1.1502–21T(c).

Example 4. Computation of SRLY limitation. (a) During Year 1, individual A forms T by contributing $300 and T sustains a $100 net operating loss. During Year 2, T's assets decline in value to $100. At the beginning of Year 3, P buys all the stock of T for $100, and T becomes a member of the P group with a net unrealized built-in loss of $100. Assume that $100 exceeds the threshold requirements of section 382(h)(3)(B). During Year 3, T recognizes its unrealized built-in loss as a $100 ordinary loss. The members of the P group contribute the following net income to the consolidated taxable income of the P group (disregarding T's recognized built-in loss and any consolidated net operating loss deduction under § 1.1502–21T) for Years 3 and 4:

	Year 3	Year 4	Total
P group (without T)	$100	$100	$200
T	60	40	100
CTI	160	140	300

(b) Under paragraph (b) of this section, T's $100 ordinary loss in Year 3 (not taken into account in the consolidated taxable income computations above) is a built-in loss. Under paragraph (a) of this section, the built-in loss is treated as a net operating loss carryover for purposes of determining the SRLY limitation under § 1.1502–21T(c).

(c) For Year 3, § 1.1502–21T(c) limits T's $100 built-in loss and $100 net operating loss carryover from Year 1 to the aggregate of the P group's consolidated taxable income through Year 3 determined by reference to only T's items. For this purpose, consolidated taxable income is determined without regard to any consolidated net operating loss deductions under § 1.1502–21T(a).

(d) The P group's consolidated taxable income through Year 3 is $60 when determined by reference to only T's items. Under § 1.1502–21T(c), the SRLY limitation for Year 3 is therefore $60.

(e) Under paragraph (a) of this section, the $100 built-in loss is treated as a current deduction for all purposes other than determination of the SRLY limitation under § 1.1502–21T(c). Consequently, a deduction for the built-in loss is allowed in Year 3 before T's loss carryover from Year 1 is allowed, but only to the extent of the $60 SRLY limitation. None of T's Year 1 loss carryover is allowed because the built-in loss ($100) exceeds the SRLY limitation for Year 3.

(f) The $40 balance of the built-in loss that is not allowed in Year 3 because of the SRLY limitation is treated as a $40 net operating loss arising in Year 3 that is carried to other years in accordance with the rules of § 1.1502–21T(b). The $40 net operating loss is treated under paragraph (a) of this section and § 1.1502–21T(c)(1)(ii) as a loss carryover or carryback from Year 3 that arises in a SRLY, and is subject to the rules of § 1.1502–21T (including § 1.1502–21T(c)) rather than this section.

(g) The facts are the same as in paragraphs (a) through (f) of this *Example 4,* except that T also recognizes additional built-in losses in Year 4. For purposes of determining the SRLY limitation for these additional losses in Year 4 (or any subsequent year), the $60 of built-in loss allowed as a deduction in Year 3 is treated under paragraph (a) of this section as a deduction in Year 3 that reduces the P group's consolidated taxable income when determined by reference to only T's items.

Example 5. Built-in loss exceeding consolidated taxable income in the year recognized. (a) P buys all the stock of T during Year 1, and T becomes a member of the P group. At the time of acquisition, T has a depreciable asset with an unrealized loss of $45 (basis $100, value $55), which exceeds the threshold requirements of section 382(h)(3)(B). During Year 2, T sells its asset for $55 and recognizes the unrealized built-in loss. The P group has $10 of consolidated taxable income in Year 2, computed by disregarding T's recognition of the $45 built-in loss and the consolidated net operating loss deduction, while the consolidated taxable income would be $25 if determined by reference to only T's items (other than the $45 loss).

(b) T's $45 loss is recognized in Year 2 and, under paragraph (b) of this section, constitutes a built-in loss. Under paragraph (a) of this section and § 1.1502–21T(c)(1)(ii), the loss is treated as a net operating loss carryover to Year 2 for purposes of applying the SRLY limitation under §1.1502–21T(c).

(c) For Year 2, T's SRLY limitation is the aggregate of the P group's consolidated taxable income through Year 2 determined by reference to only T's items. For this purpose, consolidated taxable income is determined by disregarding any built-in loss that is treated as a net operating loss carryover, and any consolidated net operating loss deductions under §1.1502–21T(a). Consolidated taxable income so determined is $25.

(d) Under §1.1502–21T(c), $25 of the $45 built-in loss could be deducted in Year 2. Because the P group has only $10 of consolidated taxable income (determined without regard to the $45), the $25 loss creates a consolidated net operating loss of $15. This loss is carried back or over under the rules of §1.1502–21T(b) and absorbed under the rules of §1.1502–21T(a). This loss is not treated as arising in a SRLY (see §1.1502–21T(c)(1)(ii)) and therefore is not subject to the SRLY limitation under §1.1502–21T(c) in any consolidated return year of the group to which it is carried. The remaining $20 is treated as a loss carryover arising in a SRLY and is subject to the limitation of §1.1502–21T(c) in the year to which it is carried.

(e) *Predecessors and successors.* For purposes of this section, any reference to a corporation or member includes, as the context may require, a reference to a successor or predecessor, as defined in §1.1502–1(f)(4).

(f) *Effective date*—(1) *In general.* This section applies to built-in losses recognized in consolidated return years beginning on or after January 1, 1997.

(2) *Application to prior periods.* See §1.1502–21T(g)(3) for rules generally permitting a group to apply the rules of this section to consolidated return years ending on or after January 29, 1991, and beginning before January 1, 1997. A group must treat all corporations that were affiliated on January 1, 1987, and continuously thereafter as having met the 60 consecutive month requirement of paragraph (c)(2) of this section on any day before January 1, 1992, on which the determination of net unrealized built-in gain or loss of a subgroup is made.

[T.D. 8677, 61 FR 33326, June 27, 1996]

§1.1502–16 Mine exploration expenditures.

(a) *Section 617*—(1) *In general.* If the aggregate amount of the expenditures to which section 617(a) applies, paid or incurred with respect to mines or deposits located outside the United States (as defined in section 638 and the regulations thereunder), does not exceed:

(i) $400,000 minus

(ii) All amounts deducted or deferred during the taxable year and all preceding taxable years under section 617 or section 615 of the Internal Revenue Code of 1954 and section 23(ff) of the Internal Revenue Code of 1939 by corporations which are members of the group during the taxable year (and individuals or corporations which have transferred any mineral property to any such member within the meaning of section 617(g)(2)(B)) for taxable years ending after December 31, 1950 and prior to the taxable year, then the deduction under section 617 with respect to such foreign expenditures and paragraph (c) of §1.1502–12 for each member shall be no greater than an allocable portion of such amount hereinafter referred to as the ‘‘consolidated foreign exploration limitation.’’ Such allocable portion shall be determined under subparagraph (2) of this paragraph. If the amount of such expenditures exceeds the consolidated foreign exploration limitation, no deduction shall be allowed with respect to such excess.

(2) *Allocable portion of limitation.* A member's allocable portion of the consolidated foreign exploration limitation for a consolidated return year shall be:

(i) The amount allocated by the common parent pursuant to an allocation plan adopted by the consolidated group, but in no event shall a member be allocated more than the amount it could have deducted had it filed a separate return. Such allocation plan must include a statement which also contains the total foreign exploration expenditures of each member which could have been deducted under section 617 if the member had filed a separate return. Such plan must be attached to a consolidated return filed on or before the due date of such return (including extensions of time), and may not be changed after such date, or

(ii) If no plan is filed in accordance with subdivision (i) of this subparagraph, then the portion of the consolidated foreign exploration limitation allocable to each member incurring such expenditures is an amount equal to such limitation multiplied by a fraction, the numerator of which is the amount of foreign exploration expenditures which could have been deducted under section 617 by such member had it filed a separate return and the denominator of which is the aggregate of such amounts for all members of the group.

(b) *Section 615*—(1) *In general.* If the aggregate amount of the expenditures, to which section 615(a) applies, which are paid or incurred by the members of the group during any consolidated return year exceeds the lesser of:

(i) $100,000, or

(ii) $400,000 minus all such expenditures deducted (or deferred) by corporations which are members of the group during the taxable year (and individuals or corporations which have transferred any mineral property to any such member within the meaning of section 615(c)(2)(B)) for taxable years ending after December 31, 1950, and prior to the taxable year, then the deduction (or amount deferrable) under section 615 and paragraph (c) of § 1.1502–12 for each member shall be no greater than an allocable portion of such lesser amount, hereinafter referred to as the ‘‘consolidated exploration limitation’’. Such allocable portion shall be determined under subparagraph (2) of this paragraph.

(2) *Allocable portion of limitation.* A member’s allocable portion of the consolidated exploration limitation for a consolidated return year shall be:

(i) The amount allocated by the common parent pursuant to an allocation plan adopted by the consolidated group, but in no event shall a member be allocated more than the amount it could have deducted (or deferred) had it filed a separate return. Such allocation plan must include a statement which also contains the total exploration expenditures of each member for the taxable year, and the expenditures of each member which could have been deducted (or deferred) under section 615 if the member had filed a separate return. Such plan must be attached to a consolidated return filed on or before the due date of such return (including extensions of time), and may not be changed after such date, or

(ii) If no plan is filed in accordance with subdivision (i) of this subparagraph, then the portion of the consolidated exploration limitation allocable to each member incurring such expenditures is an amount equal to such limitation multiplied by a fraction, the numerator of which is the amount which could have been deducted (or deferred) under section 615 by such member had it filed a separate return and the denominator of which is the aggregate of such amounts for all members of the group.

(c) *Examples.* The provisions of this section may be illustrated by the following examples:

Example (1). Corporation X and its wholly owned subsidiaries, corporations Y and Z, file a consolidated return for the calendar year 1971. None of the corporations have incurred exploration expenditures described in section 617 in previous years. During 1971, X incurred foreign exploration expenditures of $30,000, Y of $20,000, and Z of $40,000. The amount of foreign exploration expenditures deductible under section 617 for purposes of computing separate taxable income under § 1.1502–12 will be the amount actually expended by each corporation.

Example (2). Assume the same facts as in example (1) except that prior to 1971, X, Y, and Z had deducted (or deferred) under section 615 and 617 a total of $300,000 of exploration expenditures. During 1971, with respect to deposits located outside the United States X incurred exploration expenditures of $25,000, Y of $75,000, and Z of $125,000. The consolidated exploration limitation under paragraph (a) of this section with respect to the foreign deposits (there is no limitation with respect to the domestic expenditures) is $100,000. X may allocate the $100,000 in any manner among the three members, except that X may not be allocated more than $25,000 nor Y more than $75,000, the amount actually expended by X and Y and which they could have deducted had they each filed a separate return. If the allocation is not made in accordance with paragraph (a)(2)(i) of this section, the $100,000 limitation will be allocated under paragraph (a)(2)(ii) of this section as follows:

Corporation	Expenditure	Fraction	Limitation	Allocable portion
X	$25,000	$\frac{25,000}{200,000}$	×$100,000=	$12,500
Y	$75,000	$\frac{75,000}{200,000}$	×$100,000=	$37,500
Z	$125,000	$\frac{100,000}{200,000}$	×$100,000=	$50,000

The denominator of $200,000 was calculated as follows:

X=$25,000
Y=$75,000
Z=$100,000 (maximum amount allowed if filed separately)
Total $200,000.

Example (3). Assume the same facts as in example (2) and that on January 1, 1971, X acquired all of the stock of corporation T which prior to its taxable year beginning January 1, 1971, had previously deducted (or deferred) $310,000 of exploration expenditures. Assume further that in 1971 X incurred $25,000 of foreign exploration expenditures, Y $50,000, T $50,000, and Z none. A consolidated return is filed for 1971. None of the expenditures may be deducted under section 617 since the consolidated exploration limitation is zero. The limitation is zero since the aggregate amount of previously deducted (or deferred) exploration expenditures by the members of the group exceeds $400,000. (The total of such expenditures is $410,000, of which $310,000 is attributable to T and, assuming the allocation of the limitation in example (2) is made under paragraph (a)(2)(ii) of this section, $12,500 is attributable to X, $37,500 to Y, and $50,000 to Z.

Example (4). Assume the same facts as in example (3) except that on December 31, 1971, X sold all of the stock in Z to an unrelated party. The consolidated exploration limitation for 1972 will be $40,000, computed by subtracting from $400,000, the aggregate amount of previously deducted (or deferred) exploration expenditures incurred by the members of the group prior to 1972. (The total of such expenditures is $360,000, of which $12,500 is attributable to X, $37,500 to Y and $310,000 to T.) Amounts previously deducted (or deferred) by Z are not taken into account since it was not a member of the group at any time during 1972. Amounts previously deducted (or deferred) by Z shall be taken into account by it for subsequent separate return years.

[T.D. 7192, 37 FR 12949, June 30, 1972]

§1.1502–17 Methods of accounting.

(a) *General rule.* The method of accounting to be used by each member of the group shall be determined in accordance with the provisions of section 446 as if such member filed a separate return. For treatment of depreciable property after a transfer within the group, see paragraph (g) of §1.1502–12.

(b) *Adjustments required if method of accounting changes*—(1) *General rule.* If a member of a group changes its method of accounting for a consolidated return year, the terms and conditions prescribed by the Commissioner under section 446(e), including section 481(a) where applicable, shall apply to the member. If the requirements of section 481(b) are met because applicable adjustments under section 481(a) are substantial, the increase in tax for any prior year shall be computed upon the basis of a consolidated return or a separate return, whichever was filed for such prior year.

(2) *Changes in method of accounting for intercompany transactions.* If a member changes its method of accounting for intercompany transactions for a consolidated return year, the change in method generally will be effected on a cut-off basis.

(c) *Anti-avoidance rules*—(1) *General rule.* If one member (B) directly or indirectly acquires an activity of another member (S), or undertakes S's activity, with the principal purpose to avail the group of an accounting method that would be unavailable (or would be unavailable without securing consent from the Commissioner) if S and B were treated as divisions of a single corporation, B must use the accounting method for the acquired or undertaken activity determined under paragraph (c)(2) of this section or must secure consent from the Commissioner under applicable administrative procedures to use a different method.

(2) *Treatment as divisions of a single corporation.* B must use the method of accounting that would be required if B acquired the activity from S in a transaction to which section 381 applied. Thus, the principles of section 381 (c)(4) and (c)(5) apply to resolve any conflicts between the accounting methods of S and B, and the acquired or undertaken activity is treated as having the accounting method used by S. Appropriate adjustments are made to treat all acquisitions or undertakings that are part of the same plan or arrangement as a single acquisition or undertaking.

(d) *Examples.* The provisions of this section are illustrated by the following examples:

Example 1. Separate return treatment generally. X and its wholly-owned subsidiary Y filed separate returns for their calendar years ending December 31, 1965. During calendar year 1965, X employed an accrual method of accounting, established a reserve for bad debts, and elected under section 171 to amortize bond premiums with respect to its fully taxable bonds. During calendar year 1965, Y employed the cash receipts and disbursements method, used the specific charge-off method with respect to its bad debts, and did not elect to amortize bond premiums under section 171 with respect to its bonds. X and Y filed a consolidated return for 1966. For 1966 X and Y must continue to compute income under their respective methods of accounting (unless a change in method under section 446 is made).

Example 2. Adopting methods. Corporation P is a member of a consolidated group. P provides consulting services to customers under various agreements. For one type of customer, P's agreements require payment only when the contract is completed (payment-on-completion contracts). P uses an overall accrual method of accounting. Accordingly, P takes its income from consulting contracts into account when earned, received, or due, whichever is earlier. With the principal purpose to avoid seeking the consent of the Commissioner to change its method of accounting for the payment-on-completion contracts to the cash method, P forms corporation S, and S begins to render services to those customers subject to the payment-on-completion contracts. P continues to render services to those customers not subject to these contracts.

(b) Under paragraph (c) of this section, S must account for the consulting income under the payment-on-completion contracts on an accrual method rather than adopting the cash method contemplated by P.

Example 3. Changing inventory sub-method. (a) Corporation P is a member of a consolidated group. P operates a manufacturing business that uses dollar-value LIFO, and has built up a substantial LIFO reserve. P has historically manufactured all its inventory and has used one natural business unit pool. P begins purchasing goods identical to its own finished goods from a foreign supplier, and is concerned that it must establish a separate resale pool under § 1.472–8(c). P anticipates that it will begin to purchase, rather than manufacture, a substantial portion of its inventory, resulting in a recapture of most of its LIFO reserve because of decrements in its manufacturing pool. With the principal purpose to avoid the decrements, P forms corporation S in Year 1. S operates as a distributor to nonmembers, and P sells all of its existing inventories to S. S adopts LIFO, and elects dollar-value LIFO with one resale pool. Thereafter, P continues to manufacture and purchase inventory, and to sell it to S for resale to nonmembers. P's intercompany gain from sales to S is taken into account under § 1.1502–13. S maintains its Year 1 base dollar value of inventory so that P will not be required to take its intercompany items (which include the effects of the LIFO reserve recapture) into account.

(b) Under paragraph (c) of this section, S must maintain two pools (manufacturing and resale) to the same extent that P would be required to maintain those pools under § 1.472–8 if it had not formed S.

(e) *Effective dates.* Paragraph (b) of this section applies to changes in method of accounting effective for years beginning on or after July 12, 1995. For changes in method of accounting effective for years beginning before that date, see § 1.1502–17 (as contained in the 26 CFR part 1 edition revised as of April 1, 1995). Paragraphs (c) and (d) apply with respect to acquisitions occurring or activities undertaken in years beginning on or after July 12, 1995.

[T.D. 6894, 31 FR 11794, Sept. 8, 1966, as amended by T.D. 8597, 60 FR 36708, July 18, 1995]

§ 1.1502–18 Inventory adjustment.

(a) *Definition of intercompany profit amount.* For purposes of this section, the term ''intercompany profit amount'' for a taxable year means an amount equal to the profits of a corporation (other than those profits which such corporation has elected not to defer pursuant to § 1.1502– 13(c)(3) or which have been taken into account pursuant to §1.1502–13(f)(1)(viii)) arising in transactions with other members of the group with respect to goods which are, at the close of such corporation's taxable year, included in the inventories of any member of the group. See §1.1502–13(c)(2) with respect to the determination of profits. See the last sentence of §1.1502–13(f)(1)(i) for rules for determining which goods are considered to be disposed of outside the group and therefore not included in inventories of members.

(b) *Addition of initial inventory amount to taxable income.* If a corporation:

(1) Is a member of a group filing a consolidated return for the taxable year,

(2) Was a member of such group for its immediately preceding taxable year, and

(3) Filed a separate return for such preceding year,

then the intercompany profit amount of such corporation for such separate return year (hereinafter referred to as the ''initial inventory amount'') shall be added to the income of such corporation for the consolidated return year (or years) in which the goods to which the initial inventory amount is attributable are disposed of outside the group or such corporation becomes a nonmember. Such amount shall be treated as gain from the sale or exchange of property which is neither a capital asset nor property described in section 1231.

(c) *Recovery of initial inventory amount*—(1) *Unrecovered inventory amount.* The term ''unrecovered inventory amount'' for any consolidated return year means the lesser of:

(i) The intercompany profit amount for such year, or

(ii) The initial inventory amount.

However, if a corporation ceases to be a member of the group during a consolidated return year, its unrecovered inventory amount for such year shall be considered to be zero.

(2) *Recovery during consolidated return years.* (i) To the extent that the unrecovered inventory amount of a corporation for a consolidated return year is less than such amount for its immediately preceding year, such decrease shall be treated for such year by such corporation as a loss from the sale or exchange of property which is neither a capital asset nor property described in section 1231.

(ii) To the extent that the unrecovered inventory amount for a consolidated return year exceeds such amount for the preceding year, such increase shall be treated as gain from the sale or exchange of property which is neither a capital asset nor property described in section 1231.

(3) *Recovery during first separate return year.* For the first separate return year of a member following a consolidated return year, the unrecovered inventory amount for such consolidated return year (minus any part of the initial inventory amount which has not been added to income pursuant to paragraph (b) of this section) shall be treated as a loss from the sale or exchange of property which is neither a capital asset nor property described in section 1231.

(4) *Acquisition of group.* For purposes of this section, a member of a group shall not become a nonmember or be considered as filing a separate return solely because of a termination of the group (hereinafter referred to as the ''terminating group'') resulting from:

(i) The acquisition by a nonmember corporation of *(a)* the assets of the common parent in a reorganization described in subparagraph (A), (C), or (D) (but only if the requirements of subparagraphs (A) and (B) of section 354(b)(1) are met) of section 368 (a)(1), or (b) stock of the common parent, or

(ii) The acquisition (in a transaction to which §1.1502–75(d)(3) applies) by a member of *(a)* the assets of a nonmember corporation in a reorganization referred to in subdivision (i) of this subparagraph, or *(b)* stock of a nonmember corporation,

if all the members of the terminating group (other than such common parent if its assets are acquired) immediately before the acquisition are members immediately after the acquisition of another group (hereinafter referred to as the ''succeeding group'') which files a consolidated return for the first taxable year ending after the date of acquisition. The members of the succeeding group shall succeed to any initial inventory amount and to any unrecovered inventory amount of members of the terminating group. This subparagraph shall not apply with respect to acquisitions occurring before August 25, 1971.

(d) *Examples.* The provisions of paragraphs (a), (b), and (c) of this section may be illustrated by the following examples:

Example (1). Corporations P, S, and T report income on the basis of a calendar year. Such corporations file separate returns for 1965. P manufactures widgets which it sells to both S and T, who act as distributors. The inventories of S and T at the close of 1965 are comprised of widgets which they purchased from P and with respect to which P derived profits of $5,000 and $8,000, respectively. P, S, and T file a consolidated return for 1966. During 1966, P sells widgets to S and T with respect to which it derives profits of $7,000 and $10,000, respectively. The inventories of S and T as of December 31, 1966, are comprised of widgets on which P derived net profits of $4,000 and $8,000, respectively. P's initial inventory amount is $13,000, P's intercompany profit amount for 1965 (such $13,000 amount is the profits of P with respect to goods sold to S and T and included in their inventories at the close of 1965). Assuming that S and T identify their goods on a first-in, first-out basis, the entire opening inventory amount of $13,000 is added to P's income for 1966 as gain from the sale or exchange of property which is neither a capital asset nor properly described in section 1231, since the goods to which the initial inventory amount is attributable were disposed of in 1966 outside the group. However, since P's unrecovered inventory amount for 1966, $12,000 (the intercompany profit amount for the year, which is less than the initial inventory amount), is less than the unrecovered inventory amount for 1965, $13,000, this decrease of $1,000 is treated by P for 1966 as a loss from the sale or exchange of property which is neither a capital asset nor property described in section 1231.

Example (2). Assume the same facts as in example (1) and that at the close of 1967, a consolidated return year, the inventories of S and T are comprised of widgets on which P derived profits of $5,000 and $3,000, respectively. Since P's unrecovered inventory amount for 1967, $8,000, is less than $12,000, the unrecovered inventory amount for 1966, this decrease of $4,000 is treated by P for 1967 as a loss from the sale or exchange of property which is neither a capital asset nor property described in section 1231.

Example (3). Assume the same facts as in examples (1) and (2) and that in 1968, a consolidated return year, P's intercompany profit amount is $11,000. P will report $3,000 (the excess of $11,000, P's unrecovered inventory amount for 1968, over $8,000, P's unrecovered inventory amount for 1967) for 1968 as a gain from the sale or exchange of property which is neither a capital asset nor property described in section 1231.

Example (4). Assume the same facts as in examples (1), (2), and (3) and that in 1969 P, S, and T file separate returns. P will report $11,000 (its unrecovered inventory amount for 1968, $11,000, minus the portion of the initial inventory amount which has not been added to income during 1966, 1967, and 1968, zero) as a loss from the sale or exchange of property which is neither a capital asset nor property described in section 1231.

Example (5). Corporations P and S file a consolidated return for the first time for the calendar year 1966. P manufactures machines and sells them to S, which sells them to users throughout the country. At the close of 1965, S has on hand 20 machines which it purchased from P and with respect to which P derived profits of $3,500. During 1966, P sells 6 machines to S on which it derives profits of $1,300, and S sells 5 machines which it had on hand at the beginning of the year (S specifically identifies the machines which it sells) and on which P had derived profits of $900. P's initial inventory amount is $3,500, of which $900 is added to P's income in 1966 as gain from the sale or exchange of property which is neither a capital asset nor property described in section 1231, since such $900 amount is attributable to goods disposed of in 1966 outside the group, which goods were included in S's inventory at the close of 1965. If P and S continue to file consolidated returns, the remaining $2,600 of the initial inventory amount will be added to P's income as the machines on which such profits were derived are disposed of outside the group.

Example (6). Assume that in example (5) S had elected to inventory its goods under section 472 (relating to last-in, first-out inventories). None of P's initial inventory amount of $3,500 would be added to P's income in 1966, since none of the goods to which such amount is attributable would be considered to be disposed of during such year under the last-in, first-out method of identifying inventories.

(e) *Section 381 transfer.* If a member of the group is a transferor or distributor of assets to another member of the group within the meaning of section 381(a), then the acquiring corporation shall be treated as succeeding to the initial inventory amount of the transferor or distributor corporation to the extent that as of the date of distribution or transfer such amount has not yet been added to income. Such amount shall then be added to the acquiring corporation's income under the provisions of paragraph (b) of this section. For purposes of applying paragraph (c) of this section:

(1) The initial inventory amount of the transferor or distributor corporation shall be added to such amount of the acquiring corporation as of the close of the acquiring corporation's taxable year in which the date of distribution or transfer occurs, and

(2) The unrecovered inventory amount of the transferor or distributor corporation for its taxable year preceding the taxable year of the group in which the date of distribution or transfer occurs shall be added to such amount of the acquiring corporation.

(f) *Transitional rules for years before 1966*—(1) *In general.* If:

(i) A group filed a consolidated return for the taxable year immediately preceding the first taxable year to which this section applies,

(ii) Any member of such group made an opening adjustment to its inventory pursuant to paragraph (b) of §1.1502–39A (as contained in the 26 CFR edition revised as of April 1, 1996), and

(iii) Paragraph (c) of §1.1502–39A (as contained in the 26 CFR edition revised as of April 1, 1996), has not been applicable for any taxable year subsequent to the taxable year for which such adjustment was made,

then subparagraphs (2) and (3) of this paragraph shall apply.

(2) *Closing adjustment to inventory.* (i) For the first consolidated return year to which this section applies, the increase in inventory prescribed in paragraph (c) of §1.1502–39A (as contained in the 26 CFR edition revised as of April 1, 1996), shall be made as if such year were a separate return year.

(ii) For the first separate return year of a member to which this section applies, the adjustment to inventory (whether an increase or a decrease) prescribed in paragraph (c) of §1.1502–39A (as contained in the 26 CFR edition revised as of April 1, 1996), minus any adjustment already made pursuant to subdivision (i) of this subparagraph, shall be made to the inventory of such member.

(3) *Addition and recovery of initial inventory amount.* Each selling member shall treat as an initial inventory amount its share of the net amount by which the inventories of all members are increased pursuant to subparagraph (2)(i) of this paragraph for the first taxable year to which this section applies. A member's share shall be such net amount multiplied by a fraction, the numerator of which is its initial inventory amount (computed under paragraph (b) as if such taxable year were its first consolidated return year), and the denominator of which is the sum of such initial inventory amounts of all members. Such initial inventory amount shall be added to the income of such selling member and shall be recovered at the time and in the manner prescribed in paragraphs (b) and (c) of this section.

(4) *Example.* The provisions of this paragraph may be illustrated by the following example:

Example. (i) Corporations P, S, and T file consolidated returns for calendar 1966, having filed consolidated returns continuously since 1962. P is a wholesale distributor of groceries selling to chains of supermarkets, including those owned by S and T. The opening inventories of S and T for 1962 were reduced by $40,000 and $80,000, respectively, pursuant to paragraph (b) of §1.1502–39A (as contained in the 26 CFR edition revised as of April 1, 1996). At the close of 1965, S and T have on hand in their inventories goods on which P derived profits of $80,000 and $90,000, respectively. The inventories of S and T at the close of 1966 include goods which they purchased from P during the year on which P derived profits of $85,000 and $105,000, respectively.

(ii) The opening inventories of S and T for 1966, the first year to which this section applies, are increased by $40,000 and $80,000, respectively, pursuant to the provisions of subparagraph (2)(i) of this paragraph. P will take into account (as provided in paragraphs (b) and (c) of this section) an initial inventory amount of $120,000 as of the beginning of 1966, the net amount by which the inventories of S and T were increased in such year. Since the increases in the inventories of S and T are the maximum allowable under paragraph (c) of §1.1502–39A (as contained in the 26 CFR edition revised as of April 1, 1996) (i.e., the amount by which such inventories were originally decreased), no further adjustments will be made pursuant to subparagraph (2)(ii) of this paragraph to such inventories in the event that separate returns are subsequently filed.

(5) *Election not to eliminate.* If a group filed a consolidated return for the taxable year immediately preceding the

first taxable year to which this section applies, and for such preceding year the members of the group did not eliminate gain or loss on intercompany inventory transactions pursuant to the adoption under § 1.1502–31A(b)(1) (as contained in the 26 CFR edition revised as of April 1, 1996) of a consistent accounting practice taking into account such gain or loss, then for purposes of this section each member shall be treated as if it had filed a separate return for such immediately preceding year.

(g) *Transitional rules for years beginning on or after July 12, 1995.* Paragraphs (a) through (f) of this section do not apply for taxable years beginning on or after July 12, 1995. Any remaining unrecovered inventory amount of a member under paragraph (c) of this section is recovered in the first taxable year beginning on or after July 12, 1995, under the principles of paragraph (c)(3) of this section by treating the first taxable year as the first separate return year of the member. The unrecovered inventory amount can be recovered only to the extent it was previously included in taxable income. The principles of this section apply, with appropriate adjustments, to comparable amounts under paragraph (f) of this section.

[T.D. 6894, 31 FR 11794, Sept. 8, 1966, as amended by T.D. 7246, 38 FR 762, Jan. 4, 1973; T.D. 8597, 60 FR 36709, July 18, 1995: T.D. 8677, 61 FR 33323, June 27, 1996]

§ 1.1502–19 Excess loss accounts.

(a) *In general*—(1) *Purpose.* This section provides rules for a member (P) to include in income its excess loss account in the stock of another member (S). The purpose of the excess loss account is to recapture in consolidated taxable income P's negative adjustments with respect to S's stock (e.g., under § 1.1502–32 from S's deductions, losses, and distributions), to the extent the negative adjustments exceed P's basis in the stock.

(2) *Excess loss accounts*—(i) *In general.* P's basis in S's stock is adjusted under the consolidated return regulations and other rules of law. Negative adjustments may exceed P's basis in S's stock. The resulting negative amount is P's excess loss account in S's stock. For example:

(A) Once P's negative adjustments under § 1.1502–32 exceed its basis in S's stock, the excess is P's excess loss account in the S stock. If P has further adjustments, they first increase or decrease the excess loss account.

(B) If P forms S by transferring property subject to liabilities in excess of basis, § 1.1502–80(d) provides for the nonapplicability of section 357(c) and the resulting negative basis under section 358 is P's excess loss account in the S stock.

(ii) *Treatment as negative basis.* P's excess loss account is treated for all Federal income tax purposes as basis that is a negative amount, and a reference to P's basis in S's stock includes a reference to P's excess loss account.

(3) *Application of other rules of law.* The rules of this section are in addition to other rules of law. See, e.g., §§ 1.1502–32 (investment adjustment rules establishing and adjusting excess loss accounts) and 1.1502–80(d) (nonapplicability of section 357(c)). The provisions of this section and other rules of law must not be applied to recapture the same amount more than once. For purposes of this section, the definitions in § 1.1502–32 apply.

(b) *Excess loss account taken into account as income or gain*—(1) *General rule.* If P is treated under this section as disposing of a share of S's stock, P takes into account its excess loss account in the share as income or gain from the disposition. Except as provided in paragraph (b)(4) of this section, the disposition is treated as a sale or exchange for purposes of determining the character of the income or gain.

(2) *Nonrecognition or deferral*—(i) *In general.* P's income or gain under paragraph (b)(1) of this section is subject to any nonrecognition or deferral rules applicable to the disposition. For example, if S liquidates and the exchange of P's stock in S is subject to section 332, or P transfers all of its assets (including S's stock) to S in a reorganization to which section 361(a) applies, P's income or gain from the excess loss account is not recognized under these rules.

(ii) *Nonrecognition or deferral inapplicable.* If P's income or gain under paragraph (b)(1) of this section is from a disposition described in paragraph (c)(1) (ii) or (iii) of this section (relating to deconsolidations and worthlessness), the income or gain is taken into account notwithstanding any nonrecognition or deferral rules (even if the disposition is also described in paragraph (c)(1)(i) of this section). For example, if P transfers S's stock to a nonmember in a transaction to which section 351 applies, P's income or gain from the excess loss account is taken into account.

(3) *Tiering up in chains.* If the stock of more than one subsidiary is disposed of in the same transaction, the income or gain under this section is taken into account in the order of the tiers, from the lowest to the highest.

(4) *Insolvency*—(i) *In general.* Gain under this section is treated as ordinary income to the extent of the amount by which S is insolvent (within the meaning of section 108(d)(3)) immediately before the disposition. For this purpose S's liabilities include any amount to which preferred stock would be entitled if S were liquidated immediately before the disposition, and any former liabilities that were discharged to the extent the discharge was treated as tax-exempt income under §1.1502–32(b)(3)(ii)(C) (special rule for discharges).

(ii) *Reduction for amount of distributions.* The amount treated as ordinary income under this paragraph (b)(4) is reduced to the extent it exceeds the amount of P's excess loss account redetermined without taking into account S's distributions to P to which §1.1502–32(b)(2)(iv) applies.

(c) *Disposition of stock.* For purposes of this section:

(1) *In general.* P is treated as disposing of a share of S's stock:

(i) *Transfer, cancellation, etc.* At the time—

(A) P transfers or otherwise ceases to own the share for Federal income tax purposes, even if no gain or loss is taken into account; or

(B) P takes into account gain or loss (in whole or in part) with respect to the share.

(ii) *Deconsolidation.* At the time—

(A) P becomes a nonmember, or a nonmember determines its basis in the share (or any other asset) by reference to P's basis in the share, directly or indirectly, in whole or in part (e.g., under section 362); or

(B) S becomes a nonmember, or P's basis in the share is reflected, directly or indirectly, in whole or in part, in the basis of any asset other than member stock (e.g., under section 1071).

(iii) *Worthlessness.* At the time—

(A) Substantially all of S's assets are treated as disposed of, abandoned, or destroyed for Federal income tax purposes (e.g., under section 165(a) or §1.1502–80(c), or, if S's asset is stock of a lower-tier member, the stock is treated as disposed of under this paragraph (c)). An asset of S is not considered to be disposed of or abandoned to the extent the disposition is in complete liquidation of S or is in exchange for consideration (other than relief from indebtedness);

(B) An indebtedness of S is discharged, if any part of the amount discharged is not included in gross income and is not treated as tax-exempt income under §1.1502–32(b)(3)(ii)(C); or

(C) A member takes into account a deduction or loss for the uncollectibility of an indebtedness of S, and the deduction or loss is not matched in the same tax year by S's taking into account a corresponding amount of income or gain from the indebtedness in determining consolidated taxable income.

(2) *Becoming a nonmember.* A member is treated as becoming a nonmember if it has a separate return year (including another group's consolidated return year). For example, S may become a nonmember if it issues additional stock to nonmembers, but S does not become a nonmember as a result of its complete liquidation. A disposition under paragraph (c)(1)(ii) of this section must be taken into account in the consolidated return of the group. For example, if a group ceases under §1.1502–75(c) to file a consolidated return as of the close of its consolidated return year, the disposition under paragraph (c)(1)(ii) of this section is treated as occurring immediately before the close of the year. If S becomes a nonmember because P sells S's stock to a nonmember, P's sale is a disposition under both paragraphs (c)(1) (i) and (ii) of this section. If a group terminates under §1.1502–75(d) because the

common parent is the only remaining member, the common parent is not treated as having a deconsolidation event under paragraph (c)(1)(ii) of this section.

(3) *Exception for acquisition of group*—(i) *Application.* This paragraph (c)(3) applies only if a consolidated group (the terminating group) ceases to exist as a result of—

(A) The acquisition by a member of another consolidated group of either the assets of the common parent of the terminating group in a reorganization described in section 381(a)(2), or the stock of the common parent of the terminating group; or

(B) The application of the principles of § 1.1502–75(d)(2) or (d)(3).

(ii) *General rule.* Paragraph (c)(1)(ii) of this section does not apply solely by reason of the termination of a group in a transaction to which this paragraph (c)(3) applies, if there is a surviving group that is, immediately thereafter, a consolidated group. Instead, the surviving group is treated as the terminating group for purposes of applying this section to the terminating group. This treatment does not apply, however, to members of the terminating group that are not members of the surviving group immediately after the terminating group ceases to exist (e.g., under section 1504(a)(3) relating to reconsolidation, or section 1504(c) relating to includible insurance companies).

(d) *Special allocation of basis adjustments or determinations.* If a member has an excess loss account in shares of a class of S's stock at the time of a basis adjustment or determination under the Internal Revenue Code with respect to other shares of the same class of S's stock owned by the member, the adjustment or determination is allocated first to equalize and eliminate that member's excess loss account. For example, if P owns 50 shares of S's only class of stock with a $100 basis and 50 shares with a $100 excess loss account, and P contributes $200 to S without receiving additional shares, the contribution first eliminates P's excess loss account, then increases P's basis in each share by $1. (If P transfers the $200 in exchange for an additional 100 shares of S's stock in a transaction to which section 351 applies, P's excess loss account is first eliminated, and P's basis in the additional shares is $100.) See § 1.1502–32(c) for similar allocations of investment adjustments to prevent or eliminate excess loss accounts.

(e) *Anti-avoidance rule.* If any person acts with a principal purpose contrary to the purposes of this section, to avoid the effect of the rules of this section or apply the rules of this section to avoid the effect of any other provision of the consolidated return regulations, adjustments must be made as necessary to carry out the purposes of this section.

(f) *Predecessors and successors.* For purposes of this section, any reference to a corporation (or to a share of the corporation's stock) includes a reference to a successor or predecessor (or to a share of stock of a predecessor or successor), as the context may require.

(g) *Examples.* For purposes of the examples in this section, unless otherwise stated, P owns all 100 shares of the only class of S's stock and S owns all 100 shares of the only class of T's stock, the stock is owned for the entire year, T owns no stock of lower-tier members, the tax year of all persons is the calendar year, all persons use the accrual method of accounting, the facts set forth the only corporate activity, all transactions are between unrelated persons, and tax liabilities are disregarded. The principles of this section are illustrated by the following examples.

Example 1. Taxable disposition of stock. (a) *Facts.* P has a $150 basis in S's stock, and S has a $100 basis in T's stock. For Year 1, P has $500 of ordinary income, S has no income or loss, and T has a $200 ordinary loss. S sells T's stock to a nonmember for $60 at the close of Year 1.

(b) *Analysis.* Under paragraph (c) of this section, the sale is a disposition of T's stock at the close of Year 1 (the day of the sale). Under § 1.1502–32(b), T's loss results in S having a $100 excess loss account in T's stock immediately before the sale. Under paragraph (b)(1) of this section, S takes into account the $100 excess loss account as an additional $100 of gain from the sale. Consequently, S takes into account a $160 gain from the sale in determining the group's consolidated taxable income. Under § 1.1502–32(b), T's $200 loss and S's $160 gain result in a net $40 decrease in P's basis in S's stock as of the close of Year 1, from $150 to $110.

(c) *Intercompany sale followed by sale to nonmember.* The facts are the same as in paragraph (a) of this *Example 1*, except that S sells T's stock to P for $60 at the close of Year 1, and P sells T's stock to a nonmember at a gain at the beginning of Year 5. Under paragraph (c) of this section, S's sale is treated as a disposition of T's stock at the close of Year 1 (the day of the sale). Under §1.1502–13 and paragraph (b)(2) of this section, S's $160 gain from the sale is deferred and taken into account in Year 5 as a result of P's sale of the T stock. Under §1.1502–32(b), the absorption of T's $200 loss in Year 1 results in P having a $50 excess loss account in S's stock at the close of Year 1. In Year 5, S's $160 gain taken into account eliminates P's excess loss account in S's stock and increases P's basis in the stock to $110.

(d) *Intercompany distribution followed by sale to a nonmember.* The facts are the same as in paragraph (a) of this *Example 1*, except that the value of the T stock is $60 and S declares and distributes a dividend of all of the T stock to P at the close of Year 1, and P sells the T stock to a nonmember at a gain at the beginning of Year 5. Under paragraph (c) of this section, S's distribution is treated as a disposition of T's stock at the close of Year 1 (the day of the distribution). S's $100 excess loss account in T's stock is treated as additional gain under section 311(b) from the distribution. Under section 301(d), P's basis in the T stock is $60. Under §1.1502–13, and paragraph (b)(2) of this section, S's $160 gain from the distribution is deferred and taken into account in Year 5 as a result of P's sale of the T stock. Under §1.1502–32(b), T's $200 loss and S's $60 distribution result in P having a $110 excess loss account in S's stock at the close of Year 1. In Year 5, S's $160 gain taken into account eliminates P's excess loss account in S's stock and increases P's basis in the stock to $50.

Example 2. Basis determinations under the Internal Revenue Code in intercompany reorganizations. (a) *Facts.* P owns all of the stock of S and T. P has a $150 basis in S's stock and a $100 excess loss account in T's stock. P transfers T's stock to S without receiving additional S stock, in a transaction to which section 351 applies.

(b) *Analysis.* Under paragraph (c) of this section, P's transfer is treated as a disposition of T's stock. Under section 351 and paragraph (b)(2) of this section, P does not recognize gain from the disposition. Under section 358 and paragraph (a)(2)(ii) of this section, P's $100 excess loss account in T's stock decreases P's $150 basis in S's stock to $50. In addition, S takes a $100 excess loss account in T's stock under section 362. (If P had received additional S stock, paragraph (d) of this section would not apply to shift basis from P's original S stock because the basis of the original stock is not adjusted or determined as a result of the contribution; but paragraph (d) would apply to shift basis if P had transferred S's stock to T in exchange for additional T stock, because the basis of the additional T stock would be determined when P has an excess loss account in its original T stock.)

(c) *Intercompany merger.* The facts are the same as in paragraph (a) of this *Example 2*, except that T merges into S in a reorganization described in section 368(a)(1)(A) (and in section 368(a)(1)(D)), and P receives no additional S stock in the reorganization. Under section 354 and paragraph (b)(2) of this section, P does not recognize gain. Under section 358 and paragraph (a)(2)(ii) of this section, P's $100 excess loss account in T's stock decreases P's $150 basis in the S stock to $50. (Similarly, if S merges into T and P does not receive additional T stock, P's $150 basis in S's stock eliminates P's excess loss account in T's stock, and increases P's basis in T's stock to $50.)

(d) *Liquidation of only subsidiary.* Assume instead that P and S are the only members of the P group, P has a $100 excess loss account in S's stock, and S liquidates in a transaction to which section 332 applies. Under paragraph (c)(2) of this section, the liquidation is not a deconsolidation event under paragraph (c)(1)(ii) of this section merely because P is the only remaining member. Under section 332 and paragraph (b)(2) of this section, P does not recognize gain. Under section 334(b), P succeeds to S's basis in the assets it receives from S in the liquidation. (P would also not recognize gain if P transferred all of its assets (including S's stock) to S in a reorganization to which section 361(a) applied, because S would be a successor to P under paragraph (f) of this section.)

Example 3. Section 355 distribution of stock with an excess loss account. (a) *Facts.* P has a $30 excess loss account in S's stock, and S has a $90 excess loss account in T's stock. S distributes the T stock to P in a transaction to which section 355 applies, and neither P nor S recognizes any gain or loss. At the time of the distribution, the T stock represents 33% of the value of the S stock. Following the distribution, P's basis in the S stock is allocated under §1.358–2 in proportion to the fair market values of the S stock and the T stock.

(b) *Analysis.* Under paragraph (c) of this section, S's distribution of the T stock is treated as a disposition. Under section 355(c) and paragraph (b)(2) of this section, S does not recognize any gain from the distribution. Under section 358, S's excess loss account in the T stock is eliminated, and P's $30 excess loss account in the S stock is treated as basis allocated between the S stock and the T stock based on their relative values. Consequently, P has a $20 excess loss account in the S stock and a $10 excess loss account in the T stock. (If P had a $30 basis rather than a $30 excess loss account in the S stock, S would not recognize gain, its excess loss account in the T stock would be eliminated, and P's basis in the stock of S and T would be $20 and $10, respectively.)

(c) *Section 355 distribution to nonmember.* The facts are the same as in paragraph (a) of this *Example 3,* except that P also distributes the T stock to its shareholders in a transaction to which section 355 applies. Under paragraph (c) of this section, P's distribution is treated as a disposition of T's stock. Under paragraph (b)(2) of this section, because P's disposition is described in paragraph (c)(1)(ii) of this section, P's $10 excess loss account in the T stock must be taken into account at the time of the distribution, notwithstanding the nonrecognition rules of section 355(c).

Example 4. Deconsolidation of a member. (a) *Facts.* P has a $50 excess loss account in S's stock, and S has a $100 excess loss account in T's stock. T issues additional stock to a nonmember and, as a consequence, T becomes a nonmember.

(b) *Analysis.* Under paragraph (c)(2) of this section, S is treated as disposing of each of its shares of T's stock immediately before T becomes a nonmember. Under paragraph (b)(1) of this section, S takes into account its $100 excess loss account as gain from the sale or exchange of T's stock. Under § 1.1502–32(b) of this section, S's $100 gain eliminates P's excess loss account in S's stock and increases P's basis in S's stock to $50.

(c) *Deconsolidation of a higher-tier member.* The facts are the same as in paragraph (a) of this *Example 4,* except that S (rather than T) issues the stock and, as a consequence, both S and T become nonmembers. Under paragraph (c)(2) of this section, P is treated as disposing of S's stock and S is treated as disposing of T's stock immediately before S and T become nonmembers. Under § 1.1502–32(b) and paragraph (b)(3) of this section, because S and T become nonmembers in the same transaction and T is the lower-tier member, S is first treated under paragraph (b)(1) of this section as taking into account its $100 excess loss account as gain from the sale or exchange of T's stock. Under § 1.1502–32(b), S's $100 gain eliminates P's excess loss account in S's stock and increases P's basis in S's stock to $50 immediately before S becomes a nonmember. Thus, only S's $100 gain is taken into account in the determination of the group's consolidated taxable income.

(d) *Intercompany gain and deconsolidation.* The facts are the same as in paragraph (c) of this *Example 4,* except that T has $30 of gain that is deferred under § 1.1502–13 and taken into account in determining consolidated taxable income immediately before T becomes a nonmember. Under § 1.1502–32(b), T's $30 gain decreases S's excess loss account in T's stock from $100 to $70 immediately before S is treated as disposing of T's stock. Under paragraph (b)(1) of this section, S is treated as taking into account its $70 excess loss account as gain from the disposition of T's stock. Under § 1.1502–32(b), S's $70 gain from the excess loss account and T's $30 deferred gain that is taken into account eliminate P's $50 excess loss account in S's stock and increase P's basis in S's stock to $50 immediately before S becomes a nonmember.

Example 5. Worthlessness. (a) *Facts.* P forms S with a $150 contribution, and S borrows $150. For Year 1, S has a $50 ordinary loss that is carried over as part of the group's consolidated net operating loss. For Year 2, P has $160 of ordinary income, and S has a $160 ordinary loss. Under § 1.1502–32(b), S's loss results in P having a $10 excess loss account in S's stock. During Year 3, the value of S's assets (without taking S's liabilities into account) continues to decline and S's stock becomes worthless within the meaning of section 165(g) (without taking into account § 1.1502–80(c)). For Year 4, S has $10 of ordinary income.

(b) *Analysis.* Under paragraph (c)(1)(iii)(A) of this section, P is not treated as disposing of S's stock in Year 3 solely because S's stock becomes worthless within the meaning of section 165(g) (taking S's liabilities into account). In addition, because S's stock is not treated as worthless, section 382(g)(4)(D) does not prevent the Year 1 consolidated net operating loss carryover from offsetting S's $10 of income in Year 4.

(c) *Discharge of indebtedness.* The facts are the same as in paragraph (a) of this *Example 5,* except that, instead of S's stock becoming worthless within the meaning of section 165(g), S's creditor discharges $40 of S's indebtedness during Year 3, S is insolvent by more than $40 before the discharge, the discharge is excluded from the P group's gross income under section 108(a), and $40 of the $50 consolidated net operating loss carryover attributable to S is eliminated under section 108(b). Under § 1.1502- 32(b)(3)(ii)(C), S's $40 of discharge income is treated as tax-exempt income because there is a corresponding decrease under § 1.1502–32(b)(3)(iii) for elimination of the loss carryover. Under paragraph (c)(1)(iii)(B) of this section, P is treated as disposing of S's stock if the amount discharged is not included in gross income and is not treated as tax-exempt income under § 1.1502–32(b)(3)(ii)(C). Because the discharge is treated as tax-exempt income, P is not treated as disposing of S's stock by reason of the discharge.

Example 6. Avoiding worthlessness. (a) *Facts.* P forms S with a $100 contribution and S borrows $150. For Years 1 through 5, S has a $210 ordinary loss that is absorbed by the group. Under § 1.1502–32(b), S's loss results in P having a $110 excess loss account in S's stock. S defaults on the indebtedness, but the creditor does not discharge the debt (or initiate collection procedures). At the beginning of

Year 6, S ceases any substantial operations with respect to the assets, but maintains their ownership with a principal purpose to avoid P's taking into account its excess loss account in S's stock.

(b) *Analysis.* Under paragraph (c)(1)(iii)(A) of this section, P's excess loss account on each of its shares of S's stock ordinarily is taken into account at the time substantially all of S's assets are treated as disposed of, abandoned, or destroyed for Federal income tax purposes. Under paragraph (e) of this section, however, S's assets are not taken into account at the beginning of Year 6 for purposes of applying paragraph (c)(1)(iii)(A) of this section. Consequently, S is treated as worthless at the beginning of Year 6, and P's $110 excess loss account is taken into account.

(h) *Effective date*—(1) *Application.* This section applies with respect to determinations of the basis of (including an excess loss account in) the stock of a member in consolidated return years beginning on or after January 1, 1995. If this section applies, basis (and excess loss accounts) must be determined or redetermined as if this section were in effect for all years (including, for example, the consolidated return years of another consolidated group to the extent adjustments during those consolidated return years are still reflected). Any such determination or redetermination does not, however, affect any prior period.

(2) *Dispositions of stock before effective date*—(i) *In general.* If P was treated as disposing of stock of S in a tax year beginning before January 1, 1995 (including, for example, a deemed disposition because S was worthless) under the rules of this section then in effect, the amount of P's income, gain, deduction, or loss, and the stock basis reflected in that amount, are not redetermined under paragraph (h)(1) of this section. See paragraph (h)(3) of this section for the applicable rules.

(ii) *Intercompany amounts.* For purposes of this paragraph (h)(2), a disposition does not include a transaction to which §1.1502–13, §1.1502–13T, §1.1502–14, or §1.1502–14T applies. Instead, the transaction is deemed to occur as the income, gain, deduction, or loss (if any) is taken into account.

(3) *Prior law.* For prior determinations, see prior regulations under section 1502 as in effect with respect to the determination. See, e.g., §1.1502–19 as contained in the 26 CFR part 1 edition revised as of April 1, 1994.

[T.D. 8560, 59 FR 41677, Aug. 15, 1994, as amended by T.D. 8597, 62 FR 12097, Mar. 14, 1997]

§1.1502–20 Disposition or deconsolidation of subsidiary stock.

(a) *Loss disallowance*—(1) *General rule.* No deduction is allowed for any loss recognized by a member with respect to the disposition of stock of a subsidiary. See also §§1.1502–11(c) (stock losses attributable to certain pre-1966 distributions) and 1.1502–80(c) (deferring the treatment of stock of members as worthless under section 165(g)).

(2) *Disposition. Disposition* means any event in which gain or loss is recognized, in whole or in part.

(3) *Coordination with loss deferral and other disallowance rules*—(i) *In general.* Loss with respect to the stock of a subsidiary may be deferred or disallowed under other applicable provisions of the Code and regulations, including section 267(f). Paragraph (a)(1) of this section does not apply to loss that is disallowed under any other provision. If loss is deferred under any other provision, paragraph (a)(1) of this section applies when the loss is taken into account. However, if an overriding event described in paragraph (a)(3)(ii) of this section occurs before the deferred loss is taken into account, paragraph (a)(1) of this section applies to the loss immediately before the event occurs even though the loss may not be taken into account until a later time. Any loss not disallowed under paragraph (a)(1) of this section is subject to disallowance or deferral under other applicable provisions of the Code and regulations.

(ii) *Overriding events.* For purposes of paragraph (a)(3)(i) of this section, the following are overriding events:

(A) The stock ceases to be owned by a member of the consolidated group.

(B) The stock is canceled or redeemed (regardless of whether it is retired or held as treasury stock).

(C) The stock is treated as disposed of under §1.1502–19(c)(1)(ii)(B) or (c)(1)(iii).

(4) *Netting.* Paragraph (a) (1) of this section does not apply to loss with respect to the disposition of stock of a

subsidiary, to the extent that, as a consequence of the same plan or arrangement, gain is taken into account by members with respect to stock of the same subsidiary having the same material terms. If the gain to which this paragraph (a)(4) applies is less than the amount of the loss with respect to the disposition of the subsidiary's stock, the gain is applied to offset loss with respect to each share disposed of as a consequence of the same plan or arrangement in proportion to the amount of the loss deduction that would have been disallowed under paragraph (a)(1) of this section with respect to such share before the application of this paragraph (a)(4). If the same item of gain could be taken into account more than once in limiting the application of paragraphs (a)(1) and (b)(1) of this section, the item is taken into account only once.

(5) *Examples.* For purposes of the examples in this section, unless otherwise stated, all corporations have only one class of stock outstanding, all groups file consolidated returns on a calendar-year basis, the facts set forth the only corporate activity, all transactions are between unrelated persons, and tax liabilities are disregarded. The basis of each asset is the same for determining earnings and profits adjustments and taxable income. References to the investment adjustment system are references to the rules of §§ 1.1502–19, 1.1502–32 and 1.1502–33. The principles of this paragraph (a) are illustrated by the following examples.

Example 1. Loss attributable to recognized built-it gain. P buys all the stock of T for $100, and T becomes a member of the P group. T has an asset with a basis of $0 and a value of $100. T sells the asset for $100. Under the investment adjustment system, P's basis in the T stock increases to $200. Five years later, P sells all the T stock for $100 and recognizes a loss of $100. Under paragraph (a)(1) of this section, no deduction is allowed to P for the $100 loss.

Example 2. Effect of post-acquisition appreciation. P buys all the stock of T for $100, and T becomes a member of the P group. T has an asset with a basis of $0 and a value of $100. T sells the asset for $100. Under the investment adjustment system, P's basis in the T stock increases to $200. T reinvests the proceeds of the sale in an asset that appreciates in value to $180. Five years after the sale, P sells all the stock of T for $180 and recognizes a $20 loss. Under paragraph (a)(1) of this section, no deduction is allowed to P for the $20 loss.

Example 3. Disallowance of duplicated loss. P forms S with a contribution of $100 in exchange for all of the S stock, and S becomes a member of the P group. S has an operating loss of $60. The group is unable to use the loss, and the loss becomes a consolidated net operating loss carryover attributable to S. Five years later, P sells the stock of S for $40, recognizing a $60 loss. Under paragraph (a)(1) of this section, P's $60 loss on the sale of the S stock is disallowed. (See paragraph (g) of this section for the elective reattribution of S's $60 net operating loss to P in connection with the sale.)

Example 4. Deemed asset sale election. (i) P forms S with a contribution of $100 in exchange for all of the S stock, and S becomes a member of the P group. S buys an asset for $100, and the value of the asset declines to $40. P sells all the S stock to P1 for $40. Under paragraph (a)(1) of this section, P's $60 loss on the sale of the S stock is disallowed.

(ii) If P and P1 instead elect deemed asset sale treatment under section 338 (h) (10), S is treated as selling all of its assets, and no loss is recognized by P on its sale of the S stock. As a result of the recharacterization of the stock sale as an asset sale, the $60 loss in the asset is recognized. Under section 338 (h)(10), S's $60 loss is included in the consolidated return of the P group, and S is treated as liquidating into P under section 332 following the deemed asset sale. Paragraph (a)(1) of this section does not apply to S's $60 loss.

Example 5. Gain and loss recognized with respect to stock as a consequence of the same plan or arrangement. P, the common parent of a group, owns 50 shares of the stock of T with an aggregate basis of $50, and S, a wholly owned subsidiary of P, owns the remaining 50 shares of T's stock with an aggregate basis of $100. All of the stock has the same terms. P and S sell all the T stock to the public for $140 pursuant to a single public offering. P therefore recognizes a gain of $20 and S recognizes a loss of $30. For purposes of paragraph (a)(4) of this section, the gain and loss recognized by P and S is considered to be a consequence of the same plan or arrangement. Accordingly, the amount of S's $30 loss disallowed under paragraph (a)(1) of this section is limited to $10 (the $30 reduced by P's $20 gain).

Example 6. Deferred loss and recognized gain. (i) P is the common parent of a consolidated group, S is a wholly owned subsidiary of P, and T is a recently purchased, wholly owned subsidiary of S. S has a $100 basis in the T stock, and T has an asset with a basis of $40 and a value of $100. T sells the asset for $100, recognizing a $60 gain. Under the investment adjustment system, S's basis in the T stock increases from $100 to $160. S sells its T stock to P for $100 in an intercompany transaction, recognizing a $60 intercompany loss that is deferred under section 267(f) and §1.1502–13. P subsequently sells all the stock of T for $100 to X, a member of the same controlled group (as defined in section 267(f)) as P but not a member of the P consolidated group.

(ii) Under paragraph (a)(3)(i) of this section, the application of paragraph (a)(1) of this section to S's $60 intercompany loss on the sale of its T stock to P is deferred, because S's intercompany loss is deferred under section 267(f) and §1.1502–13. P's sale of the T stock to X ordinarily would result in S's intercompany loss being taken into account under the matching rule of §1.1502–13(c). The deferred loss is not taken into account under §1.267(f)–1, however, because P's sale to X (a member of the same controlled group as P) is a second intercompany transaction for purposes of section 267(f). Nevertheless, paragraph (a)(3)(ii) of this section provides that paragraph (a)(1) of this section applies to the intercompany loss as a result of P's sale to X because the T stock ceases to be owned by a member of the P consolidated group. Thus, the loss is disallowed under paragraph (a)(1) of this section immediately before P's sale and is therefore never taken into account under section 267(f).

(iii) The facts are the same as in (i) of this *Example,* except that S is liquidated after its sale of the T stock to P, but before P's sale of the T stock to X, and P sells the T stock to X for $110. Under §§1.1502–13(j) and 1.267(f)–1(b), P succeeds to S's intercompany loss as a result of S's liquidation. Thus, paragraph (a)(3)(i) of this section continues to defer the application of paragraph (a)(1) of this section until P's sale to X. Under paragraph (a)(4) of this section, the amount of S's $60 intercompany loss disallowed under paragraph (a)(1) of this section is limited to $50 because P's $10 gain on the disposition of the T stock is taken into account as a consequence of the same plan or arrangement.

(iv) The facts are the same as in (i) of this *Example,* except that P sells the T stock to A, a person related to P within the meaning of section 267(b)(2). Although S's intercompany loss is ordinarily taken into account under the matching rule of §1.1502–13(c) as a result of P's sale, §1.267(f)–1(c)(2)(ii) provides that none of the intercompany loss is taken into account because A is a nonmember that is related to P under section 267(b). Under paragraph (a)(3)(i) of this section, paragraph (a)(1) of this section does not apply to loss that is disallowed under any other provision. Because §1.267(f)–1(c)(2)(ii) and section 267(d) provide that the benefit of the intercompany loss is retained by A if the property is later disposed of at a gain, the intercompany loss is not disallowed for purposes of paragraph (a)(3)(i) of this section. Thus, the intercompany loss is disallowed under paragraph (a)(1) of this section immediately before P's sale and is therefore never taken into account under section 267(d).

(b) *Basis reduction on deconsolidation*—(1) *General rule.* If a member's basis in a share of stock of a subsidiary exceeds its value immediately before a deconsolidation of the share, the basis of the share is reduced at that time to an amount equal to its value. If both a disposition and a deconsolidation occur with respect to a share in the same transaction, paragraph (a) of this section applies and, to the extent necessary to effectuate the purposes of this section, this paragraph (b) applies following the application of paragraph (a) of this section.

(2) *Deconsolidation.* Deconsolidation means any event that causes a share of stock of a subsidiary that remains outstanding to be no longer owned by a member of any consolidated group of which the subsidiary is also a member.

(3) *Value. Value* means fair market value.

(4) *Netting.* Paragraph (b)(1) of this section does not apply to reduce the basis of stock of a subsidiary, to the extent that, as a consequence of the same plan or arrangement as that giving rise to the deconsolidation, gain is taken into account by members with respect to stock of the same subsidiary having the same material terms. If the gain to which this paragraph (b)(4) applies is less than the amount of basis reduction with respect to shares of the subsidiary's stock, the gain is applied to offset basis reduction with respect to each share deconsolidated as a consequence of the same plan or arrangement in proportion to the amount of the reduction that would have been required under paragraph (b)(1) of this section with respect to such share before the application of this paragraph (b)(4). If the same item of gain could be taken into account more than once in limiting the application of paragraphs (a)(1) and (b)(1) of this section, the time is taken into account only once.

(5) *Loss within 2 years after basis reduction*—(i) *In general.* If a share is deconsolidated and a direct or indirect disposition of the share occurs within 2 years after the date of the deconsolidation, a separate statement entitled ‘‘Statement Pursuant to Section §1.1502–20(b)(5)'' must be filed with

the taxpayer's return for the year of disposition. If the taxpayer fails to file the statement as required, no deduction is allowed for any loss recognized with respect to the disposition. A disposition after the 2-year period described in this paragraph (b)(5) that is pursuant to an agreement, option, or other arrangement entered into within the 2-year period is treated as a disposition within the 2-year period for purposes of this section.

(ii) *Contents of statement.* The statement required under paragraph (b)(5)(i) of this section must contain—

(A) The name and employer identification number (E.I.N.) of the subsidiary.

(B) The amount of prior basis reduction (if any) with respect to the stock of the subsidiary under paragraph (b)(1) of this section.

(C) The basis of the stock of the subsidiary immediately before the disposition.

(D) The amount realized on the disposition.

(E) The amount of the loss recognized on the disposition.

(6) *Examples.* The principles of this paragraph (b) are illustrated by the following examples.

Example 1. Simultaneous application of loss disallowance rule and basis reduction rule to stock of the same subsidiary. (i) P buys all the stock of T for $100, and T becomes a member of the P group. T has an asset with a basis of $0 and a value of $100. T sells the asset for $100. Under the investment adjustment system, P's basis in the T stock increases to $200. Five years later, P sells 60 shares of T stock for $60 and recognizes $60 loss on the sale. The sale causes a deconsolidation of the remaining 40 shares of T stock held by P.

(ii) P's $60 loss on the sale of T stock is disallowed under paragraph (a)(1) of this section. Under paragraph (b)(1) of this section, P must reduce the basis of the 40 shares of T stock it continues to own from $80 to $40, the value of the shares immediately before the deconsolidation.

(iii) Although P's disposition of the 60 shares also causes a deconsolidation of these shares, paragraph (b)(1) of this section provides that, if both paragraph (a) and paragraph (b) of this section apply to a share in the same transaction, paragraph (a) of this section applies first and this paragraph (b) applies only to the extent necessary to effectuate the purposes of this section. Under paragraph (a)(1) of this section, P's $60 loss on the sale of the 60 shares is disallowed. Under the facts of this example, it is not necessary to also apply this paragraph (b) to the 60 shares in order to effectuate the purposes of this section.

Example 2. Deconsolidation of subsidiary stock on contribution to a partnership. (i) P buys all the stock of T for $100, and T becomes a member of the P group. T has an asset with a basis of $0 and a value of $100. T sells the asset for $100. Under the investment adjustment system, P's basis in the T stock increases to $200. Five years later, P transfers all the stock of T to partnership M in exchange for a partnership interest in M, in a transaction to which section 721 applies.

(ii) At the time of the exchange, P's basis in the T stock is $200 and the T stock's value is $100. Under paragraph (b) of this section, the transfer to M causes a deconsolidation of the T stock, and P must reduce its basis in the T stock, immediately before the transfer to M, from $200 to the stock's $100 value at the time of the transfer. As a result, P has a basis of $100 in its interest in M, and M has a basis of $100 in the stock of T.

Example 3. Simultaneous application of loss disallowance and basis reduction to stock of different subsidiaries. (i) P owns all the stock of S, which in turn owns all the stock of S1, and S and S1 are members of the P group. P's basis in the S stock is $100 and S's basis in the S1 stock is $100. S1 buys all the stock of T for $100, and T becomes a member of the P group. T has an asset with a basis of $0 and a value of $100. T sells the asset for $100. Under the investment adjustment system, S1's basis in the T stock, S's basis in the S1 stock, and P's basis in the S stock each increase from $100 to $200. S then sells all the S1 stock for $100 and recognizes a loss of $100.

(ii) Under paragraph (a)(1) of this section, S's $100 loss on the sale of the S1 stock is disallowed.

(iii) If S1 and T are not members of a consolidated group immediately after the sale of the stock of S1, the T stock is deconsolidated and, under paragraph (b)(1) of this section, S1 must reduce the basis of the T stock to its $100 value immediately before the sale.

(iv) If S1 and T are members of a consolidated group immediately after the sale of the S1 stock, the T stock is not deconsolidated, and no reduction is required under paragraph (b)(1) of this section.

Example 4. Extending the time period for dispositions. (i) In Year 1, P, the common parent of a group, buys all 100 shares of the stock of T for $100. T's only asset has a basis of $0 and a value of $100. T sells the asset for $100. Under the investment adjustment system, P's basis in the T stock increases from $100 to $200. At the beginning of Year 5, P causes T to issue 30 additional shares of stock to the public for $30. This issuance causes a deconsolidation of the T stock owned by P, and paragraph (b)(1) of this section requires

P to reduce its basis in the T stock from $200 to $100.

(ii) Within 2 years after the date of the basis reduction, P agrees to sell all of its T stock for $90 at the end of Year 7. Under paragraph (b)(5) of this section, P's disposition of the T stock at the end of Year 7 is treated as occurring within the 2-year period following the basis reduction, because the disposition is pursuant to an agreement reached within 2 years after the basis reduction. Accordingly, P's $10 loss may not be deducted unless P files the statement required under paragraph (b)(5) of this section. This result is reached whether or not the agreement is in writing. P's disposition would also have been treated as occurring within the 2-year period if the disposition were pursuant to an option issued within the period.

Example 5. Deferred loss and subsequent basis reduction. (i) P is the common parent of a consolidated group, S is a wholly owned subsidiary of P, and T is a recently purchased, wholly owned subsidiary of S. S has a $100 basis in the T stock, and T has an asset with a basis of $40 and a value of $100. T sells the asset for $100, recognizing $60 of gain. Under the investment adjustment system, S's basis in the T stock increases from $100 to $160. S sells its T stock to P for $100 in an intercompany transaction, recognizing a $60 intercompany loss that is deferred under section 267(f) and §1.1502–13. T issues 30 additional shares of stock to the public for $30 which causes a deconsolidation of the T stock owned by P.

(ii) Under paragraph (a)(3)(i) of this section, the application of paragraph (a)(1) of this section to S's intercompany loss on the sale of its T stock to P is deferred because S's loss is deferred under section 267(f) and §1.1502–13. Because the fair market value of the T stock owned by P is $100 immediately before the deconsolidation and P has a $100 basis in the stock at that time, no basis reduction is required under paragraph (b)(1) of this section.

(iii) T's issuance of additional shares to the public results in S's intercompany loss being taken into account under the acceleration rule of §1.1502–13(d) because there is no difference between P's $100 basis in the T stock and the $100 basis the T stock would have had if P and S had been divisions of a single corporation. S's loss taken into account is disallowed under paragraph (a)(1) of this section.

Example 6. Gain and basis reduction with respect to the same plan or arrangement. (i) P, the common parent of a group, owns 50 shares of T stock with an aggregate basis of $50, and S, a wholly owned subsidiary of P, owns the remaining 50 shares of T stock with an aggregate basis of $100. All of the stock has the same terms. P sells all of its T stock to the public for $70 and recognizes a $20 gain. The sale causes a deconsolidation of S's 50 shares of T stock.

(ii) Under paragraph (b)(1) of this section, S must reduce the basis of its 50 shares of T stock from $100 to $70, the value of the shares immediately before the deconsolidation. However, under paragraph (b)(4) of this section, because P's $20 gain is recognized as a consequence of the same plan or arrangement as that giving rise to the deconsolidation, S's basis reduction is eliminated to the extent of $20. Thus, S must reduce the basis of its T stock from $100 to $90.

Example 7. Netting allocated between loss disallowance and basis reduction. (i) P is the common parent of a group and S is its wholly owned subsidiary. P and S each own 50 shares of T stock and each has an aggregate basis of $50. All of the stock has the same terms. S recently purchased its T stock from S1, a lower tier subsidiary, in an intercompany transaction in which S1 recognized a $30 intercompany gain that was deferred under §1.1502–13. T has an asset with a basis of $0 and a value of $100. T sells the asset for $100, recognizing $100 of gain. Under the investment adjustment system, P and S each increase the basis of their T stock to $100. S sells all of its T stock to the public for $50 and recognizes a $50 loss. The sale causes a deconsolidation of P's T stock.

(ii) S's $50 loss on the sale of T stock is disallowed under paragraph (a)(1) of this section. Under paragraph (b)(1) of this section, P must reduce its $100 basis in the T stock to the $50 value immediately before the deconsolidation.

(iii) Under the matching rule of §1.1502–13, S's sale of its T stock results in S1's $30 intercompany gain being taken into account. Under paragraphs (a)(4) and (b)(4) of this section, the gain may be taken into account by P and S in limiting the application of paragraphs (a)(1) and (b)(1) of this section, but it may be taken into account only once. Under paragraph (a)(4) of this section, S may apply the gain to decrease the amount of loss disallowed under paragraph (a)(1) of this section from $50 to $20. None of the gain remains to decrease the $50 of P's basis reduction under paragraph (b)(1) of this section. (P may instead apply the gain to decrease the basis reduction under paragraph (b)(1) of this section instead of S decreasing its disallowed loss, but if the T stock is sold within 2 years, the statement described in paragraph (b)(5) of this section must be filed if a deduction is to be allowed for any loss recognized on the disposition.)

(c) *Allowable loss*—(1) *General rule.* The amount of loss disallowed under paragraph (a)(1) of this section and the amount of basis reduction under paragraph (b)(1) of this section with respect to a share of stock shall not exceed the sum of the following amounts—

(i) *Extraordinary gain dispositions.* The amount of income or gain (or its equivalent), net of directly related expenses, that is allocated to the share from extraordinary gain dispositions.

(ii) *Positive investment adjustments.* The amount of the positive adjustment (if any) with respect to the share under § 1.1502–32 for each consolidated return year, but only to the extent the amount exceeds the amount described in paragraph (c)(1)(i) of this section for the year.

(iii) *Duplicated loss.* The amount of duplicated loss with respect to the share.

(2) *Operating rules.* For purposes of applying paragraph (c)(1) of this section—

(i) *Extraordinary gain dispositions.* An ‘‘extraordinary gain disposition’’ is—

(A) An actual or deemed disposition of—

(*1*) A capital asset as defined in section 1221 (determined without the application of any other rules of law).

(*2*) Property used in a trade or business as defined in section 1231(b) (determined without the application of any holding period requirement).

(*3*) An asset described in section 1221 (1), (3), (4), or (5), if substantially all the assets in such category from the same trade or business are disposed of in one transaction (or series of related transactions).

(*4*) Assets disposed of in an applicable asset acquisition under section 1060(c).

(B) A positive section 481(a) adjustment.

(C) A discharge of indebtedness.

(D) Any other event (or item) identified in guidance published in the Internal Revenue Bulletin.

An extraordinary gain disposition is taken into account under paragraph (c)(1)(i) of this section only if it occurs on or after November 19, 1990. For this purpose, federal income taxes may be directly related to extraordinary gain dispositions only to the extent of the excess (if any) of the group's income tax liability actually imposed under subtitle A of the Internal Revenue Code for the taxable year of the extraordinary gain dispositions over the group's income tax liability for the taxable year redetermined by not taking into account the extraordinary gain dispositions. For this purpose, the group's income tax liability actually imposed and its redetermined income tax liability are determined without taking into account the foreign tax credit under section 27(a) of the Code.

(ii) *Positive investment adjustments.* For purposes of paragraph (c)(1)(ii) of this section, a positive adjustment under § 1.1502–32 is the sum of the amounts under § 1.1502–32(b)(2) (i) through (iii) for the consolidated return year (the adjustment determined without taking distributions into account). However, amounts included in any loss carryover are taken into account in the year they arise rather than the year absorbed.

(iii) *Applicable amounts.* Amounts are described in paragraphs (c)(1)(i) and (ii) of this section only to the extent they are reflected in the basis of the share, directly or indirectly, immediately before the disposition or deconsolidation. For this purpose, an amount is reflected in the basis of a share if the share's basis would have been different without the amount. However, amounts included in any loss carryover are taken into account in the year they arise rather than the year absorbed.

(iv) *Related party rule.* The amounts described in paragraphs (c)(1) (i) and (ii) of this section are not reduced or eliminated by reason of an acquisition of the share from a person related within the meaning of section 267(b) or section 707(b)(1), substituting ‘‘10 percent’’ for ‘‘50 percent’’ each place that it appears, even if the share is not transferred basis property as defined in section 7701 (a)(43).

(v) *Pre-September 13, 1991 positive investment adjustments—(A) In general.* The amount determined under paragraph (c)(1)(ii) of this section is limited for tax years of the subsidiary ending on or before September 13, 1991. The amount may not exceed the net increase, if any, in the basis of the share from—

(*1*) The date the share was first acquired by a member (whether or not a member at that time); to

(*2*) The end of the last taxable year ending on or before September 13, 1991 (or, if earlier, the date of the disposition or deconsolidation). If the share is transferred basis property (within the meaning of section 7701 (a)(43) from a prior consolidated group, the date under paragraph (c)(2)(v)(A)(*1*) of this section is the date the share was first acquired by a member of the prior group. For purposes of this paragraph (c)(2)(v)(A), an increase in an excess loss account is treated as a decrease in stock basis and a decrease in an excess loss account is treated as an increase in stock basis.

(B) *Cessation of netting.* If a lower amount would result under paragraph (c)(1)(ii) of this section by determining the amount under this paragraph (c)(2)(v) as of the end of an earlier taxable year ending after December 31, 1986—

(*1*) The amount under this paragraph (c)(2)(v) is determined as of the earlier year end; and

(*2*) The amount determined under paragraph (c)(1)(ii) of this section is not limited for tax years of the subsidiary ending after the earlier year end.

(vi) *Duplicated loss.* ''Duplicated loss'' is determined immediately after a disposition or deconsolidation, and equals the excess (if any) of—

(A) The sum of—

(*1*) The aggregate adjusted basis of the assets of the subsidiary other than any stock and securities that the subsidiary owns in another subsidiary, and

(*2*) Any losses attributable to the subsidiary and carried to the subsidiary's first taxable year following the disposition or deconsolidation, and

(*3*) Any deferred deductions (such as deductions deferred under section 469) of the subsidiary, over

(B) The sum of—

(*1*) The value of the subsidiary's stock, and

(*2*) Any liabilities of the subsidiary, and

(*3*) Any other relevant items.

The amounts determined under this paragraph (c)(2)(vi) with respect to a subsidiary include its allocable share of corresponding amounts with respect to all lower tier subsidiaries. If 80 percent or more in value of the stock of a subsidiary is acquired by purchase in a single transaction (or in a series of related transactions during any 12-month period), the value of the subsidiary's stock may not exceed the purchase price of the stock divided by the percentage of the stock (by value) so purchased. For this purpose, stock is acquired by purchase if the transferee is not related to the transferor within the meaning of sections 267(b) and 707(b)(1), substituting ''10 percent'' for ''50 percent'' each place that it appears, and the transferee's basis in the stock is determined wholly by reference to the consideration paid for such stock.

(vii) *Disallowance amounts applied only once.* The amounts described in paragraph (c)(1) of this section are not applied more than once to disallow a loss, reduce basis, or reattribute loss under this section.

(3) *Statement of allowed loss.* Paragraph (c)(1) of this section applies only if the separate statement required under this paragraph (c)(3) is filed with the taxpayer's return for the year of the disposition or deconsolidation. The statement must be entitled ''ALLOWED LOSS UNDER SECTION 1.1502–20(c)'' and must contain—

(i) The name and employer identification number (E.I.N.) of the subsidiary.

(ii) The basis of the stock of the subsidiary immediately before the disposition or deconsolidation.

(iii) The amount realized on the disposition and the amount of fair market value on the deconsolidation.

(iv) The amount of the deduction not disallowed under paragraph (a)(1) of this section by reason of this paragraph (c) and the amount of basis not reduced under paragraph (b)(1) of this section by reason of this paragraph (c).

(v) The amount of loss disallowed under paragraph (a)(1) of this section and the amount of basis reduced under paragraph (b)(1) of this section.

(4) *Examples.* For purposes of the examples in this paragraph, unless otherwise stated, the group files the statement required under paragraph (c)(3) of this section. The principles of this paragraph (c) are illustrated by the following examples.

Example 1. Allowable loss attributable to lost built-in gain. (i) Individual A forms T. P buys all the stock of T from A for $100, and T becomes a member of the P group. T has a capital asset with a basis of $0 and a value of $100. The value of the asset declines, and T sells the asset for $40. Under the investment adjustment system, P's basis in the T stock increases to $140. P then sells all the stock of T for $40 and recognizes a loss of $100.

(ii) The amount of the $100 loss disallowed under paragraph (a)(1) of this section may not exceed the amount determined under paragraph (c)(1) of this section. Under paragraphs (c)(2) (i) and (iii) of this section, T's $40 gain is from an extraordinary gain disposition and the amount is reflected in the basis of the T stock under § 1.1502–32 immediately before the disposition. Thus, the gain is described in paragraph (c)(1)(i) of this section. Because this amount is the only amount described in paragraph (c)(1) of this section, the amount of P's $100 loss that is disallowed under paragraph (a)(1) of this section is limited to $40. (No amount is described in paragraph (c)(1)(ii) of this section because the amount of T's positive investment adjustments does not exceed the amount included under paragraph (c)(1)(i) of this section.)

(iii) The results would be the same if the asset, instead of being owned by T, is owned by a partnership in which T is a partner and T is allocated the $40 of gain under section 704(b). Under paragraphs (c)(2) (i) and (iii) of this section, T's $40 gain is from an extraordinary gain disposition, and the gain is reflected in the basis of the T stock under § 1.1502–32 immediately before the disposition.

Example 2. Extraordinary gain dispositions. (i) Individual A forms T. P buys all the stock of T from A for $100 in Year 1, and T becomes a member of the P group. T owns a capital asset, asset 1, with a basis of $0 and a value of $100. T sells asset 1 for $100 in Year 1 and invests the proceeds in a trade or business asset, asset 2. For Year 2, asset 2 produces $30 of gross operating income and $20 of cost recovery deductions. On December 31 of Year 2, asset 2 has an $80 adjusted basis and T disposes of asset 2 for $85; however, because T incurs $20 of expenses directly related to the sale of asset 2, the disposition produces a $15 loss that is taken into account in the determination of taxable income or loss under § 1.1502–32(b)(2)(i) (the loss offsets T's $10 of operating income for Year 2, as well as $5 of operating income of P in that year). Under the investment adjustment system, P's basis in the T stock increases by $95, to $195, because T has $110 of income and a $15 loss. P sells the T stock for $95 in Year 5 and recognizes a $100 loss.

(ii) Under paragraphs (c)(2) (i) and (iii) of this section, the $100 gain from the disposition of asset 1 is from an extraordinary gain disposition and is reflected in the basis of the T stock. Thus, the gain is described in paragraph (c)(1)(i) of this section. The sale of asset 2 is not taken into account under paragraph (c)(1)(i) of this section because, net of directly related expenses, T does not have income or gain from the sale. (No amount is described under paragraph (c)(1)(ii) of this section because T's positive investment adjustments are taken into account under paragraph (c)(1)(i) of this section.) Because the $100 amount described under paragraph (c)(1)(i) of this section equals P's $100 loss from the disposition of the T stock, all of the loss is disallowed.

Example 3. Positive investment adjustments. (i) Individual A forms T. S, a member of the P group, buys all the stock of T from A for $100, and T becomes a member of the P group. T has an asset with a basis of $0 and a value of $100. The asset earns $100 of operating income in Year 1 and declines in value to $0. T invests the operating income in another asset that produces a $25 operating loss for Year 2. Under the investment adjustment system, S's basis in the T stock increases to $200 at the end of Year 1, and decreases to $175 at the end of Year 2. S sells all the stock of T for $75 in Year 5 and recognizes a loss of $100.

(ii) Under paragraph (c)(1)(ii) of this section, the $100 of income from Year 1 is a positive investment adjustment. The amount is not reduced by the $25 operating loss for Year 2. Because the $100 amount described under paragraph (c)(1)(ii) of this section equals S's $100 loss from the disposition of the T stock, all of the loss is disallowed.

Example 4. Treatment of net operating income as attributable to built-in gain. (i) Individual A forms T. P buys all the stock of T from A for $100, and T becomes a member of the P group. T has a capital asset with a basis of $0 and a value of $100. The asset declines in value to $40. The asset earns $100 of operating income unrelated to its $60 decline in value. Under the investment adjustment system, P's basis in the T stock increases to $200. P then sells all the stock of T for $140 (the asset worth $40 and $100 cash) and recognizes a loss of $60.

(ii) The $100 adjustment to the basis of the T stock is an amount described in paragraph (c)(1)(ii) of this section. Because this amount exceeds the amount of loss otherwise disallowed under paragraph (a)(1) of this section, P's entire $60 loss from the disposition of T stock is disallowed.

Example 5. Carryover basis transactions—amounts attributable to separate return years. (i) Individual A forms T. S purchases all the stock of T from A for $100, and T becomes a member of the S group. T has a capital asset with a basis of $0 and a value of $100. T sells the asset for $100. Under the investment adjustment system, S's basis in the T stock increases to $200. P buys all of the stock of S for $100, and both S and T become members of the P group. S then sells the T stock for $100 and recognizes a loss of $100.

(ii) Under paragraph (c)(2)(iii) of this section, the $100 adjustment to S's basis in the T stock while a member of the S group is an amount described in paragraph (c)(1)(i) of this section with respect to the P group because it continues to be reflected in the basis of the T stock immediately before the stock is disposed of. Because this amount equals the loss otherwise disallowed under paragraph (a)(1) of this section, S's $100 loss from the disposition of T stock is disallowed.

Example 6. Cost basis for subsidiary stock. (i) In Year 1, individual A forms T. T's assets appreciate in value from $0 to $100, and T recognizes $100 of gain in an extraordinary gain disposition. T reinvests the sale proceeds in assets that appreciate in value to $150. In Year 3, A sells all of the T stock to P for $150, and T becomes a member of the P group. While a member of the P group, T's assets decline in value to $130 and P sells the T stock in Year 7 for $130 and recognizes a $20 loss.

(ii) Although T has a $100 gain from extraordinary gain dispositions, the gain is not reflected in P's basis in the T stock within the meaning of paragraph (c)(2)(iii) of this section. P's basis reflects the stock's value at the time of P's purchase, and is determined without regard to whether T recognized the gain before the purchase. Thus, no part of T's gain is described in paragraph (c)(1) of this section, and no part of the $20 loss is disallowed under paragraph (a) of this section. (For rules that apply if A and P are related persons, see paragraph (c)(2)(iv) of this section.)

Example 7. Adjustments to stock basis under applicable rules of law. (i) Individual A forms T, and T's assets subsequently appreciate. T borrows $100 on a nonrecourse basis secured by the appreciated assets. P buys all of the stock of T from A for $150. After becoming a member of the P group, T has a $100 operating loss that is absorbed in the determination of consolidated taxable income and P's basis in the T stock is reduced to $50 under §1.1502–32. Because T's assets have declined in value, T's creditors discharge $60 of T's indebtedness. The $60 discharge is not included in T's gross income under section 108(a), but no attributes are reduced under section 108(b).

(ii) Under paragraph (c)(2)(i) of this section, the discharge of indebtedness is an extraordinary gain disposition. Under §1.1502–32(b)(3)(ii), however, the $60 discharge of indebtedness is not treated as tax-exempt income that increases P's basis in the T stock. Consequently, under paragraph (c)(2)(iii) of this section, T's discharge of indebtedness income is not reflected in P's basis in the T stock. Thus, there is no amount under paragraph (c)(1) of this section.

(iii) The facts are the same as in paragraph (i) of this *Example,* except that $60 of T's operating loss is not absorbed and is included in a consolidated net operating loss that is carried over under §§1.1502–21A or 1.1502–21T, and the $60 is eliminated from the carryover under section 108(b) as a result of T's discharge of indebtedness. The absorption of $40 of T's loss reduces P's basis in the T stock from $150 to $110. The $60 discharge of indebtedness is treated as tax-exempt income that increases P's basis in the T stock, and the $60 attribute reduction is treated as a noncapital, nondeductible expense that reduces P's basis in the T stock. Thus, P's basis in T's stock remains $110 following the discharge and attribute reduction. Because P's basis is $110, rather than $50, the discharge of indebtedness income is reflected in P's basis for purposes of paragraph (c)(2)(iii) of this section. Thus, the amount under paragraph (c)(1)(i) of this section is $60.

Example 8. Duplicated loss. (i) Individual A forms T with a contribution of $100 in exchange for all of the T stock. Individual B forms T1 with a contribution of land that has a $90 basis and $100 value. T buys all the stock of T1 from B for $100. P buys all the stock of T from A for $100, and both T and T1 become members of the P group. The value of T1's land declines to $40. P sells all of the T stock for $40 and recognizes a loss of $60.

(ii) Under paragraph (c)(1)(iii) of this section, P's amount of duplicated loss is $50. This is computed under paragraph (c)(2)(vi) of this section immediately after the disposition as the excess of—

(A) The $90 aggregate adjusted basis of the assets of T and T1 (other than stock and securities of T1 owned by T), over

(B) The $40 fair market value of the T stock (determined under paragraph (c)(2)(vi) of this section). Because this amount is the only amount described in paragraph (c)(1) of this section, the amount of P's $60 loss disallowed under paragraph (a)(1) of this section is limited to $50.

(iii) The result would be the same if the value of T1's property did not decline and T1 instead had an operating loss of $60 (attributable to borrowed funds) which the P group was unable to use. In that case, the $50 excess of the sum of—

(A) The $90 aggregate adjusted basis of the assets of T and T1 (other than stock and securities of members of the P group), plus the $60 net operating loss attributable to T1 and carried to its first taxable year following the disposition, over

(B) The sum of the $40 fair market value of the T stock, plus the $60 of T1 liabilities, is an amount described in paragraph (c)(2)(vi) of this section. (See paragraph (g) of this section for the elective reattribution of T1's $60 net operating loss to P in connection with the sale.)

Example 9. Intercompany stock sales.

(i) P is the common parent of a consolidated group, S is a wholly owned subsidiary of P, and T is a wholly owned recently purchased subsidiary of S. S has a $100 basis in the T stock, and T has a capital asset with a basis of $0 and a value of $100. T's asset declines in value to $60. Before T has any positive investment adjustments or extraordinary gain dispositions, S sells its T stock to P for $60. T's asset reappreciates and is sold for $100, and T recognizes $100 of gain. Under the investment adjustment system, P's basis in the T stock increases to $160. P then sells all of the T stock for $100 and recognizes a loss of $60.

(ii) S's sale of the T stock to P is an intercompany transaction. Thus, S's $40 loss is deferred under section 267(f) and § 1.1502–13. Under paragraph (a)(3) of this section, the application of paragraph (a)(1) of this section to S's $40 loss is deferred until the loss is taken into account. Under the matching rule of § 1.1502–13(c), the loss is taken into account to reflect the difference for each year between P's corresponding items taken into account and P's recomputed corresponding items (the corresponding items that P would take into account for the year if S and P were divisions of a single corporation). If S and P were divisions of a single corporation and the intercompany sale were a transfer between the divisions, P would succeed to S's $100 basis and would have a $200 basis in the T stock at the time it sells the T stock ($100 of initial basis plus $100 under the investment adjustment system). S's $40 loss is taken into account at the time of P's sale of the T stock to reflect the $40 difference between the $60 loss P takes into account and P's recomputed $100 loss.

(iii) Under the matching rule of § 1.1502–13(c), the attributes of S's $40 loss and P's $60 loss are redetermined to produce the same effect on consolidated taxable income (and consolidated tax liability) as if S and P were divisions of a single corporation. Under § 1.1502–13(b)(6), attributes of the losses include whether they are disallowed under this section. Because the amount described in paragraph (c)(1) of this section is $100, both S's $40 loss and P's $60 loss are disallowed.

(d) *Successors*—(1) *General rule.* This section applies, to the extent necessary to effectuate the purposes of this section, to any property the basis of which is determined, directly or indirectly, in whole or in part, by reference to the basis of a subsidiary's stock.

(2) *Examples.* The principles of this paragraph (d) are illustrated by the following examples.

Example 1. Status of successor as member. (i) P, the common parent of a group, buys all the stock of T for $100. T's only asset has a basis of $0 and a value of $100. T sells the asset for $100, and buys another asset for $100. Under the investment adjustment system, P's basis in the T stock increases to $200, and the earnings and profits of P increase by $100. P later transfers all the stock of T to an unrelated consolidation group in exchange for 10 percent of the stock of X, the common parent of that group, in a transaction described in section 368(a)(1)(B). At the time of the exchange, the value of the X stock received by P is $80.

(ii) Under section 358, P has a basis of $200 in the X stock it receives in exchange for T. Under section 362, X has a $200 basis in the T stock.

(iii) Neither paragraph (a)(1) nor (b)(1) of this section applies to the stock of T on P's transfer of the stock to the X group, because no gain or loss is recognized on the transfer, and the transfer is not a deconsolidation of the stock of T under paragraph (b)(2) of this section.

(iv) The X stock owned by P after the reorganization is a successor interest to the T stock because P's basis in the X stock is determined by reference to P's basis in the T stock. The purposes of this section require that the reorganization exchange be treated as a deconsolidation event with respect to P's interest in the X stock. Because X is not a member of the P group, a failure to reduce the basis of the X stock owned by P to its fair market value would permit the P group to recognize and deduct the loss attributable to the T stock. However, because T is a member of the X group, a reduction in the basis of the T stock is not necessary to prevent the X group from recognizing and deducting the loss arising in the P group. The transfer of T stock to X therefore constitutes a deconsolidation of the X stock but not the T stock. Therefore, P must reduce its basis in the X stock from $200 to its $80 value at that time. However, X's basis in the T stock remains $200.

Example 2. Continued application after deconsolidation. (i) P, the common parent of a group, buys all the stock of T for $100. T's only asset has a basis of $0 and a value of $100. T sells the asset for $100, and buys another asset for $100. Under the investment adjustment system, P's basis in the T stock increases to $200. P later transfers all the stock of T to partnership M in exchange for a partnership interest in M, in a transaction to which section 721 applies. The value of the T stock immediately before the transfer to M is $100. Less than 2 years later, P sells its interest in M for $80.

(ii) Under paragraph (b)(1) of this section, because the stock of T is deconsolidated on the transfer to M, immediately before the transfer to M, P reduces its basis in the T stock to the stock's $100 value immediately before the transfer. As a result, P has a basis of $100 in its interest in M, and M has a basis of $100 in the T stock.

(iii) When P sells its interest in M for $80, it recognizes a $20 loss. Because the basis of P's interest in M is determined by reference to P's basis in the T stock, and the reporting requirements could otherwise be circumvented, P's partnership interest in M is a successor interest to the T stock. Under paragraph (b)(5) of this section, P is required to file a statement with its return for the year of its disposition of its interest in M in order to deduct its loss. If P does not file the required statement described in paragraph (b)(5) of this section, P's loss on the disposition of its interest in M is disallowed.

(e) *Anti-avoidance rules*—(1) *General rule.* The rules of §1.1502–20 must be applied in a manner that is consistent with and reasonably carries out their purposes. If a taxpayer acts with a view to avoid the effect of the rules of this section, adjustments must be made as necessary to carry out their purposes.

(2) *Anti-stuffing rule*—(i) *Application.* This paragraph (e)(2) applies if—

(A) A transfer of any asset (including stock and securities) on or after March 9, 1990 is followed within 2 years by a direct or indirect disposition or a deconsolidation of stock, and

(B) The transfer is with a view to avoiding, directly or indirectly, in whole or in part—

(*1*) The disallowance of loss on the disposition or the basis reduction on the deconsolidation of stock of a subsidiary, or

(*2*) The recognition of unrealized gain following the transfer.

A disposition or deconsolidation after the 2-year period described in this paragraph (e)(2)(i) that is pursuant to an agreement, option, or other arrangement entered into within the 2-year period is treated as a disposition or deconsolidation within the 2-year period for purposes of this section.

(ii) *Basis reduction.* If this paragraph (e)(2) applies, the basis of the stock is reduced, immediately before the disposition or deconsolidation, to cause the disallowance of loss, the reduction of basis, or the recognition of gain, otherwise avoided by reason of the transfer.

(3) *Examples.* The principles of this paragraph (e) are illustrated by the following examples.

Example 1. Shifting of value. (i) P buys all the stock of T for $100, and T becomes a member of the P group. T has an asset with a basis of $0 and a value of $100. With the view described in paragraph (e)(1) of this section, P transfers land with a value of $100 and a basis of $100 to T in exchange for preferred stock with a $200 redemption price and liquidation preference. The $100 redemption premium (the excess of the $200 redemption price over the $100 issue price) ultimately increases the value of the preferred stock from $100 to $200 (and decreases the value of the common stock). T sells the built-in gain asset for $100, and P's aggregate basis in S's common and preferred stock increases to $300. In addition, as a result of a cumulative redetermination under §1.1502–32(c)(4), P's basis in the T preferred stock increases from $100 to $200 and P's basis in the common stock remains $100. P subsequently sells the common stock at a loss.

(ii) Under section 305, the redemption premium is treated as a distribution of property to which section 301 and §1.1502–13(f)(2) apply. Under §§1.1502–13 and 1.1502–32, P's aggregate basis in the preferred and common stock is unaffected by the deemed distributions.

(iii) P's loss on the sale of the common stock is disallowed under paragraph (e)(1) of this section. This disallowance prevents the preferred stock from shifting value and stock basis adjustments from the common stock to avoid the disallowance of loss under this section.

Example 2. Basic stuffing case. (i) In Year 1, P buys all the stock of T for $100, and T becomes a member of the P group. T has an asset with a basis of $0 and a value of $100. T sells the asset for $100. Under the investment adjustment system, P's basis in the T stock increases from $100 to $200. In Year 5, P transfers to T an asset with a basis of $0 and a value of $100 in a transaction to which section 351 applies, with the view described in paragraph (e)(2)(i) of this section. In Year 6, P sells all the stock of T for $200.

(ii) Under paragraph (e)(2)(ii) of this section, P must reduce the basis in its T stock by $100 immediately before the sale. This basis reduction causes a $100 gain to be recognized on the sale.

(iii) The $100 basis reduction also would be required if the T stock is deconsolidated in Year 6 instead of being sold. P must reduce the basis in its T stock by $100 immediately before the deconsolidation.

(iv) The $100 basis reduction also would be required if the P stock were acquired at the beginning of Year 6 by the M consolidated group, even though the asset transfer took place outside the M group. Paragraph (e)(2)(i) of this section requires only that the transferor have the view at the time of the transfer.

Example 3. Stacking rules. (i) In Year 1, P buys all the stock of T for $100, and T becomes a member of the P group. T has an asset with a basis of $0 and a value of $100. T sells the asset for $100. Under the investment adjustment system, P's basis in the T stock increases from $100 to $200. In Year 5, when the value of the T stock remains $100, P transfers to T an asset with a basis of $0 and a value of $100 in a transaction to which section 351 applies, with the view described in paragraph (e)(2)(i) of this section. Thereafter, the value of the contributed asset declines to $10. In Year 6, P sells all the T stock for $110 and recognizes a $90 loss.

(ii) Because the transferred asset declined in value by $90, the transfer enabled P to avoid the disallowance of loss by the sale of T only to the extent of $10. Under paragraph (e)(2)(ii) of this section, P must reduce the basis in its T stock immediately before the sale to cause recognition of gain in an amount equal to the loss disallowance otherwise avoided by reason of the transfer. The amount of this basis reduction is $100, causing a $10 gain to be recognized on the sale.

(iii) The facts are the same as in (i) of this *Example*, except that the transferred asset does not decline in value and that T reinvests the $100 in proceeds from the asset sale in another asset that appreciates in value to $190. In Year 6, P sells T for $290. Because the new asset appreciated in value by $90, the transfer enabled P to avoid the disallowance of loss on the sale of T only to the extent of $10. Under paragraph (e)(2)(ii) of this section, P must reduce the basis in its T stock immediately before the sale to cause recognition of gain in an amount equal to the loss disallowance otherwise avoided by reason of the transfer. The amount of this basis reduction is $10, causing a $100 gain to be recognized on the sale.

Example 4. Contribution of built-in loss asset. (i) In Year 1, P forms S with a contribution of $100 in exchange for all of S's stock, and S becomes a member of the P group. S buys an asset for $100, and the asset appreciates in value to $200. P then buys all the stock of T for $100, and T becomes a member of the P group. T has an asset with a basis of $0 and a value of $100. T sells the asset for $100, and under the investment adjustment system P's basis in the T stock increases from $100 to $200. In Year 5, when the value of the T stock remains $100, P transfers the T stock to S in a transaction to which section 351 applies, with the view described in paragraph (e)(2)(i) of this section. The transfer causes P's basis in the S stock to increase from $100 to $300 and the value of S to increase from $200 to $300. In Year 6, P sells the S stock for $300.

(ii) Under paragraph (e)(2)(ii) of this section, P must reduce the basis in its S stock immediately before the sale to cause recognition of gain in an amount equal to the gain recognition otherwise avoided by reason of the transfer. The amount of this basis reduction is $100, causing a $100 gain to be recognized on the sale.

Example 5. Absence of a view. (i) In Year 1, P buys all the stock of T for $100, and T becomes a member of the P group. T has 2 historic assets, asset 1 with a basis of $40 and value of $90, and asset 2 with a basis of $60 and value of $10. In Year 2, T sells asset 1 for $90. Under the investment adjustment system, P's basis in the T stock increases from $100 to $150. Asset 2 is not essential to the operation of T's business, and T distributes asset 2 to P in Year 5 with a view to having the group retain its $50 loss inherent in the asset. Under § 1.1502–13(f)(2), and the application of the principles of this rule in section 267(f), T has a $50 intercompany loss that is deferred. Under § 1.1502–32(b)(3)(iv), the distribution reduces P's basis in the T stock by $10 to $140 in Year 5. In Year 6, P sells all the T stock for $90. Under the acceleration rule of § 1.1502–13(d), and the application of the principles of this rule in section 267(f), T's intercompany loss is ordinarily taken into account immediately before P's sale of the T stock. Assuming that the loss is absorbed by the group, P's basis in T's stock would be reduced from $140 to $90 under § 1.1502–32(b)(3)(i), and there would be no gain or loss from the stock disposition. (Alternatively, if the loss is not absorbed and the loss is reattributed to P under paragraph (g) of this section, the reattribution would reduce P's basis in T's stock from $140 to $90.)

(ii) A $50 loss is reflected both in T's basis in asset 2 and in P's basis in the T stock. Because the distribution results in the loss with respect to asset 2 being taken into account before the corresponding loss reflected in the T stock, and asset 2 is an historic asset of T, the distribution is not with the view described in paragraph (e)(2) of this section.

Example 6. Extending the time period for dispositions. (i) In Year 1, P buys all the stock of T for $100, and T becomes a member of the P group. T has an asset with a basis of $0 and a value of $100. T sells the asset for $100. Under the investment adjustment system, P's basis in the T stock increases from $100 to $200. At the beginning of Year 5, P transfers to T an asset with a basis of $0 and a value of $100 in a transaction to which section 351 applies, with the view described in paragraph (e)(2)(i) of this section. Within 2 years, P agrees to sell all the stock of T for $200 at the end of Year 7.

(ii) Under paragraph (e)(2) (i) of this section, P's disposition of the T stock at the end of Year 7 is treated as occurring within the 2-year period following P's transfer of the asset to T, because the disposition is pursuant to an agreement reached within 2 years after the transfer. Accordingly, under paragraph (e)(2)(ii) of this section, P must reduce the basis in its T stock by $100 immediately before the sale. This result is reached whether or not the agreement is in writing. P's disposition would also have been treated as occurring within the 2-year period if the disposition were pursuant to an option issued within the period.

(f) *No tiering up of certain adjustments*—(1) *General rule.* If the basis of stock of a subsidiary (S) owned by a another member (P) is reduced under this section on the deconsolidation of the S stock, no corresponding adjustment is made under §1.1502–32 to the basis of the stock of P if there is a disposition or deconsolidation of the P stock in the same transaction. If there is a disposition or deconsolidation in the same transaction of less than all the stock of P, appropriate adjustments must be made under §1.1502–32 with respect to P (and any higher-tier members).

(2) *Example.* The principles of this paragraph (f) are illustrated by the following example.

Example. (i) P, the common parent of a group, owns all the stock of S, S owns all the stock of S1, and S1 owns all the stock of S2. P's basis in the S stock is $100, S's basis in the S1 stock is $100, and S1's basis in the S2 stock is $100. In Year 1, S2 buys all the stock of T for $100. T has an asset with a basis of $0 and a value of $100. In Year 2, T sells the asset for $100. Under the investment adjustment system, the basis of each subsidiary's stock increases from $100 to $200. In Year 6, S sells all the stock of S1 for $100 to A, an individual, and recognizes a loss of $100. S1, S2, and T are not members of a consolidated group immediately after the sale because the new S1 group does not file a consolidated return for its first tax year.

(ii) Under paragraph (a)(1) of this section, no deduction is allowed to S for its loss from the sale of the S1 stock. Under §1.1502–32(b)(3)(iii), S's disallowed loss is treated as a noncapital, nondeductible expense for Year 6 that reduces P's basis in the S stock. (Under §1.1502–33, S's earnings and profits for Year 6 are reduced by the amount of S's disallowed loss for earnings and profits purposes and, under §1.1502–33(b), this reduction is reflected in P's earnings and profits.)

(iii) Under paragraphs (b)(1) and (f)(1) of this section, because the stock of T and S2 are deconsolidated as a result of S's sale of the S1 stock, the basis of their stock must be reduced immediately before the sale from $200 to $100 (the value immediately before the deconsolidation). Under §1.1502–32(b)(3)(iii), the basis reductions are treated as noncapital, nondeductible expenses for Year 6. Under paragraph (f)(2) of this section, however, because the S2 stock is deconsolidated in the same transaction, the basis reduction to the T stock does not tier up under §1.1502–32(a)(3). Similarly, because the S1 stock is disposed of in the same transaction, the basis reduction to the S2 stock also does not tier up. (Comparable treatment applies for purposes of earnings and profits under §1.1502–33.)

(g) *Reattribution of subsidiary's losses to common parent*—(1) *Reattribution rule.* If a member disposes of stock of a subsidiary and the member's loss would be disallowed under paragraph (a)(1) of this section, the common parent may make an irrevocable election to reattribute to itself any portion of the net operating loss carryovers and net capital loss carryovers attributable to the subsidiary (and any lower tier subsidiary) without regard to the order in which they were incurred. The amount reattributed may not exceed the amount of loss that would be disallowed if no election is made under this paragraph (g). For this purpose, the amount of loss that would be disallowed is determined by applying paragraph (c)(1) of this section (without taking into account the requirement under paragraph (c)(3) of this section that a statement be filed) and by not taking the reattribution into account. The amount of loss that would be disallowed and the losses that may be reattributed are determined immediately after the disposition, but the reattribution is deemed to be made immediately before the disposition. The common parent succeeds to the reattributed losses as if the losses were succeeded to in a transaction described in section 381(a). Any owner shift of the subsidiary (including any deemed owner shift resulting from section 382(g)(4)(D) or 382(l)(3)) in connection with the disposition is not taken into account under section 382 with respect to the reattributed losses.

(2) *Insolvency limitation.* If the subsidiary whose losses are to be reattributed, or any higher tier subsidiary, is insolvent within the meaning of section 108(d)(3) at the time of the disposition, losses of the subsidiary may be reattributed only to the extent they exceed the sum of the separate insolvencies of any subsidiaries (taking into account only the subsidiary and its

higher tier subsidiaries) that are insolvent. For purposes of determining insolvency, liabilities owed to higher tier members are not taken into account, and stock of a subsidiary that is limited and preferred as to dividends and that is not owned by higher tier members is treated as a liability to the extent of the amount of preferred distributions to which the stock would be entitled if the subsidiary were liquidated on the date of the disposition.

(3) *Examples.* The principles of this paragraph (g) are illustrated by the following examples.

Example 1. Basic reattribution case. (i) P, the common parent of a group, forms S with a $100 contribution. For Year 1, S has a $60 operating loss that is not absorbed and is included in the group's consolidated net operating loss that is carried over under §§ 1.1502–21A or 1.1502–21T. Under § 1.1502–32(b)(3)(i), P's basis in the S stock is not reduced to reflect S's loss because the loss is not absorbed. Under § 1.1502–33(b), S's deficit in earnings and profits is reflected in P's earnings and profits even though the loss is not absorbed for tax purposes. During Year 2, S's remaining assets appreciate in value and P sells the S stock for $55. But for an election to reattribute losses under paragraph (g) of this section, P would have a $45 loss from the sale that would be disallowed.

(ii) P elects under paragraph (g)(1) of this section to reattribute to itself $45 of S's losses (the maximum amount permitted). As a result, $45 of the $60 net operating loss carryover attributable to S is reattributed to P. This reattributed loss may be included in the net operating loss carryover to subsequent consolidated return years of the P group. P succeeds to these losses as if the losses were succeeded to in a transaction described in section 381(a) and they retain their character as ordinary losses. The remaining $15 of net operating loss carryover attributable to S is carried over to the first separate return year of S.

(iii) Under § 1.1502–32(b)(3)(iii), the reattribution of $45 of loss is a noncapital, nondeductible expense that reduces P's basis in the S stock from $100 to $55 immediately before the disposition. Consequently, P does not recognize any gain or loss from the disposition.

(iv) Assume that $20 of S's losses arose in Year 1 and $40 in Year 2, and that P elects to reattribute all $40 from Year 2 and $5 from Year 1. P succeeds to these losses as if the losses were succeeded to in a transaction described in section 381(a), and the losses retain their character as ordinary losses arising in Years 1 and 2. The losses continue to be subject to any limitations originally applicable to S, but P succeeds to them and may absorb the losses independently of S. (For example, P's use of the Year 2 losses does not depend on S's use of the Year 1 losses that were not reattributed to P.)

Example 2. Lower tier subsidiary. (i) P, the common parent of a group, forms S with a $100 contribution. S then forms T with a $40 contribution and T borrows $60. For Year 1, S has a $30 operating loss and T has a $55 operating loss. The losses are not absorbed and are included in the group's consolidated net operating loss that is carried over under §§ 1.1502–21A or 1.1502–21T. Under § 1.1502–32(b)(3)(i), P's basis in the S stock, and S's basis in the T stock, are not reduced to reflect the S and T losses because the group is unable to absorb the losses. (Under § 1.1502–33(b), the deficits in earnings and profits of S and T are tiered up for earnings and profits purposes even though not absorbed for tax purposes.) During Year 2, P sells the S stock for $30 ($100 invested, minus S's $30 loss and $40 unrealized loss from its investment in the T stock). But for an election to reattribute losses under paragraph (g) of this section, P would have a $70 loss from the sale, which would be disallowed.

(ii) S's $30 portion of the net operating loss carryover may be reattributed to P under paragraph (g)(1) of this section. Because T is insolvent by $15, paragraph (g)(2) of this section provides that only $40 of its $55 portion of the net operating loss carryover may be reattributed to P under paragraph (g)(1) of this section. There is no limitation, however, on which $40 of T's $55 loss may be reattributed.

(iii) P elects under paragraph (g)(1) of this section to reattribute to itself $40 of T's losses (the maximum amount permitted). P does not elect, however, to reattribute to itself any of S's losses. As a result, $40 of the $85 net operating loss carryover is reattributed to P. This reattributed loss may be included in the net operating loss carryover to subsequent consolidated return years of the P group. Of the $45 remaining net operating loss carryover, the $15 attributable to T and $30 attributable to S are carried over to their first separate return years.

(iv) Under § 1.1502–32(b)(3)(iii), the reattribution of loss is a noncapital, nondeductible expense that reduces P's basis in the S stock to $60 immediately before the disposition. Consequently, P recognizes only a $30 loss from the disposition of its S stock ($30 sale proceeds and $60 basis), and this loss is disallowed.

Example 3. Separate return limitation year losses. (i) P, the common parent of a group, buys the stock of S for $100. S has a net operating loss carryover of $40 from a separate return limitation year, and assets with a value and basis of $100. The assets of S decline in value by $40, and P sells all the stock of S for $60. But for an election to reattribute losses under this paragraph (g), P would have a $40 loss on the sale of S that would be disallowed.

(ii) S's $40 loss carryover from a separate return limitation year may be reattributed to P under paragraph (g)(1) of this section.

(iii) P elects under paragraph (g)(1) of this section to reattribute to itself S's $40 (loss the maximum amount permitted). Following the reattribution, the loss is included in the net operating loss carryover to subsequent consolidated return years of the P group.

(iv) Under §1.1502–32(b)(3)(iii), the reattribution of loss is a noncapital, nondeductible expense that reduces P's basis in the S stock to $60 immediately before the disposition. Consequently, P recognizes no gain or loss from the disposition of its S stock. For P's treatment of the $40 reattributed loss, see §1.1502–1(f).

(4) [Reserved]

(5) *Time and manner of making the election*—(i) *In general.* The election described in paragraph (g)(1) of this section must be made in a separate statement entitled ‘‘this is an election under §1.1502–20(g)(1) To reattribute losses of [insert names and employer identification numbers (E.I.N.) of each subsidiary whose losses are reattributed] to [insert name and employer identification number of common parent].'' The statement must include the following information—

(A) For each subsidiary, the amount of each net operating loss and net capital loss, and the year in which each arose, that is reattributed to the common parent, and

(B) If a subsidiary ceases to be a member, the name and employer identification number of the person acquiring the subsidiary's stock.

The statement must be signed by the common parent, and by each subsidiary with respect to which loss is reattributed under this paragraph (g) that does not remain a member of the common parent's group immediately following the disposition. The statement must be filed with the group's income tax return for the tax year of the disposition and a copy of the statement must be retained by the subsidiary. If the acquirer is a subsidiary in a consolidated group, the name and employer identification number of the common parent of the group must be included in the statement, and a copy of the statement must also be delivered to the common parent.

(ii) *Filing of subsidiary's copy of statement.* The subsidiary whose losses are reattributed (or the common parent of any consolidated group that acquires the subsidiary or lower tier subsidiary) must attach its copy of the statement described in paragraph (g)(5)(i) of this section to its income return for the first tax year ending after the due date, including extensions, of the return in which the election required by paragraph (g)(5)(i) of this section is to be filed.

(h) *Effective dates*—(1) *General rule.* Except as otherwise provided in this paragraph (h), this section applies with respect to dispositions and deconsolidations on or after February 1, 1991. For this purpose, dispositions deferred under §1.1502–13 are deemed to occur at the time the deferred gain or loss is taken into account unless the stock was deconsolidated before February 1, 1991. If stock of a subsidiary became worthless during a taxable year including February 1, 1991, the disposition with respect to the stock is treated as occurring on the date the stock became worthless.

(2) *Election to accelerate effective date*—(i) *In general.* A group may make an irrevocable election to apply this section to all its members, instead of §1.337(d)–2, with respect to all dispositions and deconsolidations on or after November 19, 1990.

(ii) *Time and manner of making the election—in general.* The election described in paragraph (h)(2)(i) of this section must be made in a separate statement entitled ‘‘this is an election under §1.1502–20(h)(2) to accelerate the application of §1.1502–20 to the consolidated group of which [insert name and employer identification number of common parent] is the common parent.'' The statement must be signed by the common parent and filed with the group's income tax return for the tax year of the first disposition or deconsolidation to which the election applies. If the separate statement required under this paragraph (h) (2) (ii) is to be filed with a return the due date (including extensions) of which is before April 16, 1991, the statement may be filed with an amended return for the year of the disposition or deconsolidation. Any other filings required under this § 1.1502–20, such as the statement required under § 1.1502–20(c)(3), which ordinarily cannot be made with an amended return, must be made at such time and in such manner as permitted by the Commissioner.

(3) *Binding contract rule.* For purposes of this paragraph (h), if a disposition or deconsolidation is pursuant to a binding written contract entered into before March 9, 1990, and in continuous effect until the disposition or deconsolidation, the date the contract became binding is treated as the date of the disposition or deconsolidation.

(4) *Application of § 1.1502–20T to certain transactions*—(i) *In general.* If a group files the certification described in paragraph (h)(4)(ii) of this section, it may apply § 1.1502–20T (as contained in the CFR edition revised as of April 1, 1990), to all of its members with respect to all dispositions and deconsolidations by the certifying group to which § 1.1502–20T otherwise applied by its terms occurring—

(A) On or after March 9, 1990 (but only if not pursuant to a binding contract described in § 1.337(d)–1T(e)(2) (as contained in the CFR edition revised as of April 1, 1990) that was entered into before March 9, 1990); and

(B) Before November 19, 1990 (or thereafter, if pursuant to a binding contract described in § 1.1502–20T(g)(3) that was entered into on or after March 9, 1990 and before November 19, 1990).

The certification under this paragraph (h)(4)(i) with respect to the application of § 1.1502–20T to any transaction described in this paragraph (h)(4)(i) may not be withdrawn and, if the certification is filed, § 1.1502–20T must be applied to all such transactions on all returns (including amended returns) on which such transactions are included.

(ii) *Time and manner of filing certification.* The certification described in paragraph (h)(4)(i) of this section must be made in a separate statement entitled ‘‘[insert name and employer identification number of common parent] hereby certifies under § 1.1502–20 (h)(4) that the group of which it is the common parent is applying § 1.1502–20T to all transactions to which that section otherwise applied by its terms.’’ The statement must be signed by the common parent and filed with the group’s income tax return for the taxable year of the first disposition or deconsolidation to which the certification applies. If the separate statement required under this paragraph (h)(4) is to be filed with a return the due date (including extensions) of which is before November 16, 1991, the statement may be filed with an amended return for the year of the disposition or deconsolidation that is filed within 180 days after September 13, 1991. Any other filings required under § 1.1502–20T, such as the statement required under § 1.1502–20T(f)(5), may be made with the amended return, regardless of whether § 1.1502–20T permits such filing by amended return.

(5) *Cross reference.* For transitional loss limitation rules, see §§ 1.337(d)–1 and 1.337(d)–2.

[T.D. 8364, 56 FR 47392, Sept. 19, 1991; 57 FR 53550, Nov. 12, 1992, as amended by T.D. 8560, 59 FR 41680, Aug. 15, 1994; T.D. 8597, 60 FR 36709, July 18, 1995; T.D. 8677, 61 FR 33323, June 27, 1996; T.D. 8597, 62 FR 12098, Mar. 14, 1997]

COMPUTATION OF CONSOLIDATED ITEMS

§ 1.1502–21T Net operating losses (temporary).

(a) *Consolidated net operating loss deduction.* The consolidated net operating loss deduction (or CNOL deduction) for any consolidated return year is the aggregate of the net operating loss carryovers and carrybacks to the year. The net operating loss carryovers and carrybacks consist of—

(1) Any CNOLs (as defined in paragraph (e) of this section) of the consolidated group; and

(2) Any net operating losses of the members arising in separate return years.

(b) *Net operating loss carryovers and carrybacks to consolidated return and separate return years.* Net operating losses of members arising during a consolidated return year are taken into account in determining the group’s CNOL under paragraph (e) of this section for that year. Losses taken into account in determining the CNOL may be carried to other taxable years (whether consolidated or separate) only under this paragraph (b).

(1) *Carryovers and carrybacks generally*. The net operating loss carryovers and carrybacks to a taxable year are determined under the principles of section 172 and this section. Thus, losses permitted to be absorbed in a consolidated return year generally are absorbed in the order of the taxable years in which they arose, and losses carried from taxable years ending on the same date, and which are available to offset consolidated taxable income for the year, generally are absorbed on a pro rata basis. See *Example 2* of paragraph (c)(1)(iii) of this section for an illustration of pro rata absorption of losses subject to a SRLY limitation. Additional rules provided under the Code or regulations also apply. See, e.g., section 382(l)(2)(B).

(2) *Carryovers and carrybacks of CNOLs to separate return years*—(i) *In general*. If any CNOL that is attributable to a member may be carried to a separate return year of the member, the amount of the CNOL that is attributable to the member is apportioned to the member (apportioned loss) and carried to the separate return year. If carried back to a separate return year, the apportioned loss may not be carried back to an equivalent, or earlier, consolidated return year of the group; if carried over to a separate return year, the apportioned loss may not be carried over to an equivalent, or later, consolidated return year of the group. For rules permitting the reattribution of losses of a subsidiary to the common parent when loss is disallowed on the disposition of subsidiary stock, see § 1.1502–20(g).

(ii) *Special rules*—(A) *Year of departure from group*. If a corporation ceases to be a member during a consolidated return year, net operating loss carryovers attributable to the corporation are first carried to the consolidated return year, and only the amount so attributable that is not absorbed by the group in that year is carried to the corporation's first separate return year.

(B) *Offspring rule*. In the case of a member that has been a member continuously since its organization, the CNOL attributable to the member is included in the carrybacks to consolidated return years before the member's existence. See paragraph (f) of this section for applications to predecessors and successors. If the group did not file a consolidated return for a carryback year, the loss may be carried back to a separate return year of the common parent under paragraph (b)(2)(i) of this section, but only if the common parent was not a member of a different consolidated group or of an affiliated group filing separate returns for the year to which the loss is carried or any subsequent year in the carryback period. Following an acquisition described in § 1.1502–75(d) (2) or (3), references to the common parent are to the corporation that was the common parent immediately before the acquisition.

(iii) *Equivalent years*. Taxable years are equivalent if they bear the same numerical relationship to the consolidated return year in which a CNOL arises, counting forward or backward from the year of the loss. For example, in the case of a member's third taxable year (which was a separate return year) that preceded the consolidated return year in which the loss arose, the equivalent year is the third consolidated return year preceding the consolidated return year in which the loss arose. See paragraph (b)(3)(iii) of this section for certain short taxable years that are disregarded in making this determination.

(iv) *Amount of CNOL attributable to a member*. The amount of a CNOL that is attributable to a member is determined by a fraction the numerator of which is the separate net operating loss of the member for the year of the loss and the denominator of which is the sum of the separate net operating losses for that year of all members having such losses. For this purpose, the separate net operating loss of a member is determined by computing the CNOL by reference to only the member's items of income, gain, deduction, and loss, including the member's losses and deductions actually absorbed by the group in the taxable year (whether or not absorbed by the member).

(v) *Examples*. For purposes of the examples in this section, unless otherwise stated, all groups file consolidated returns, all corporations have calendar taxable years, the facts set forth the only corporate activity, value means fair market value and the adjusted basis of each asset equals its value, all transactions are with unrelated persons, and the application of any limitation or threshold under section 382 is disregarded. The principles of this paragraph (b)(2) are illustrated by the following examples:

Example 1. Offspring rule. (a) P is formed at the beginning of Year 1 and files a separate return. P forms S on March 15 of Year 2, and P and S file a consolidated return. P purchases all the stock of T at the beginning of Year 3, and T becomes a member of the P group. T was formed in Year 2 and filed a separate return for that year. P, S, and T sustain a $1,100 CNOL in Year 3 and, under paragraph (b)(2)(iv) of this section, the loss is attributable $200 to P, $300 to S, and $600 to T.

(b) Of the $1,100 CNOL in Year 3, the $500 amount of the CNOL that is attributable to P and S ($200 + $300) may be carried to P's separate return in Year 1. Even though S was not in existence in Year 1, the $300 amount of the CNOL attributable to S may be carried back to P's separate return in Year 1 because S (unlike T) has been a member of the P group since its organization and P is a qualified parent under paragraph (b)(2)(ii)(B) of this section. To the extent not absorbed in that year, the loss may then be carried to the P group's return in Year 2. The $600 amount of the CNOL attributable to T is a net operating loss carryback to T's separate return in Year 2.

Example 2. Departing members. (a) The facts are the same as in *Example 1.* In addition, on June 15 of Year 4, P sells all the stock of T. The P group's consolidated return for Year 4 includes the income of T through June 15. T files a separate return for the period from June 16 through December 31.

(b) $600 of the Year 3 CNOL attributable to T is apportioned to T and is carried back to its separate return in Year 2. To the extent the $600 is not absorbed in T's separate return in Year 2, it is carried to the consolidated return in Year 4 before being carried to T's separate return in Year 4. Any portion of the loss not absorbed in T's Year 2 or in the P group's Year 4 is then carried to T's separate return in Year 4.

(3) *Special rules*—(i) *Election to relinquish carryback.* A group may make an irrevocable election under section 172(b)(3) to relinquish the entire carryback period with respect to a CNOL for any consolidated return year. The election may not be made separately for any member (whether or not it remains a member), and must be made in a separate statement entitled ''THIS IS AN ELECTION UNDER SECTION 1.1502–21T(b)(3)(i) TO WAIVE THE ENTIRE CARRYBACK PERIOD PURSUANT TO SECTION 172(b)(3) FOR THE [insert consolidated return year] CNOLs OF THE CONSOLIDATED GROUP OF WHICH [insert name and employer identification number of common parent] IS THE COMMON PARENT.'' The statement must be signed by the common parent and filed with the group's income tax return for the consolidated return year in which the loss arises.

(ii) *Special election for groups that include insolvent financial institutions.* For rules applicable to relinquishing the entire carryback period with respect to losses attributable to insolvent financial institutions, see § 301.6402–7 of this chapter.

(iii) *Short years in connection with transactions to which section 381(a) applies.* If a member distributes or transfers assets to a corporation that is a member immediately after the distribution or transfer in a transaction to which section 381(a) applies, the transaction does not cause the distributor or transferor to have a short year within the consolidated return year of the group in which the transaction occurred that is counted as a separate year for purposes of determining the years to which a net operating loss may be carried.

(iv) *Special status losses.* [Reserved]

(c) *Limitations on net operating loss carryovers and carrybacks from separate return limitation years*—(1) *SRLY limitation*—(i) *General rule.* The aggregate of the net operating loss carryovers and carrybacks of a member arising (or treated as arising) in SRLYs that are included in the CNOL deductions for all consolidated return years of the group under paragraph (a) of this section may not exceed the aggregate consolidated taxable income for all consolidated return years of the group determined by reference to only the member's items of income, gain, deduction, and loss. For this purpose—

(A) Consolidated taxable income is computed without regard to CNOL deductions;

(B) Consolidated taxable income takes into account the member's losses and deductions (including capital losses) actually absorbed by the group in consolidated return years (whether or not absorbed by the member);

(C) In computing consolidated taxable income, the consolidated return years of the group include only those years, including the year to which the loss is carried, that the member has been continuously included in the group's consolidated return, but exclude:

(*1*) For carryovers, any years ending after the year to which the loss is carried; and

(*2*) For carrybacks, any years ending after the year in which the loss arose; and

(D) The treatment under §1.1502–15T of a built-in loss as a hypothetical net operating loss carryover in the year recognized is solely for purposes of determining the limitation under this paragraph (c) with respect to the loss in that year and not for any other purpose. Thus, for purposes of determining consolidated taxable income for any other losses, a built-in loss allowed under this section in the year it arises is taken into account.

(ii) *Losses treated as arising in SRLYs.* If a net operating loss carryover or carryback did not arise in a SRLY but is attributable to a built-in loss (as defined under §1.1502–15T), the carryover or carryback is treated for purposes of this paragraph (c) as arising in a SRLY if the built-in loss was not allowed, after application of the SRLY limitation, in the year it arose. For an illustration, see §1.1502–15T(d), *Example 5.*

(iii) *Examples.* The principles of this paragraph (c)(1) are illustrated by the following examples:

Example 1. Determination of SRLY limitation. (a) In Year 1, individual A forms T and T sustains a $100 net operating loss that is carried forward. P buys all the stock of T at the beginning of Year 2, and T becomes a member of the P group. The P group has $300 of consolidated taxable income in Year 2 (computed without regard to the CNOL deduction). Such consolidated taxable income would be $70 if determined by reference to only T's items.

(b) T's $100 net operating loss carryover from Year 1 arose in a SRLY. See §1.1502–1(f)(2)(iii). Thus, the $100 net operating loss carryover is subject to the SRLY limitation in paragraph (c)(1) of this section. The SRLY limitation for Year 2 is consolidated taxable income determined by reference to only T's items, or $70. Thus, $70 of the loss is included under paragraph (a) of this section in the P group's CNOL deduction for Year 2.

(c) The facts are the same as in paragraph (a) of this *Example 1*, except that such consolidated taxable income (computed without regard to the CNOL deduction and by reference to only T's items) is a loss (a CNOL) of $370. Because the SRLY limitation may not exceed the consolidated taxable income determined by reference to only T's items, and such items aggregate to a CNOL, T's $100 net operating loss carryover from Year 1 is not allowed under the SRLY limitation in Year 2. Moreover, if consolidated taxable income (computed without regard to the CNOL deduction and by reference to only T's items) did not exceed $370 in Year 3, the carryover would still be restricted under §1.1502–21T(c) in Year 3, because the aggregate consolidated taxable income for all consolidated return years of the group computed by reference to only T's items would not be a positive amount.

Example 2. Net operating loss carryovers. (a) In Year 1, individual A forms P and P sustains a $40 net operating loss that is carried forward. P has no income in Year 2. Unrelated corporation T sustains a net operating loss of $50 in Year 2 that is carried forward. P buys the stock of T during Year 3, but T is not a member of the P group for each day of the year. P and T file separate returns and sustain net operating losses of $120 and $60, respectively, for Year 3. The P group files consolidated returns beginning in Year 4. During Year 4, the P group has $160 of consolidated taxable income (computed without regard to the CNOL deduction). Such consolidated taxable income would be $70 if determined by reference to only T's items. These results are summarized as follows:

	Separate year 1	Separate year 2	Separate affiliated year 3	Consolidated year 4
P	$(40)	$0	$(120)	$90
T	0	(50)	(60)	70
CTI				160

(b) P's Year 1, Year 2, and Year 3 are not SRLYs with respect to the P group. See § 1.1502–1(f)(2)(i). Thus, P's $40 net operating loss arising in Year 1 and $120 net operating loss arising in Year 3 are not subject to the SRLY limitation under paragraph (c) of this section. Under the principles of section 172, paragraph (b) of this section requires that the loss arising in Year 1 be the first loss absorbed by the P group in Year 4. Absorption of this loss leaves $120 of the group's consolidated taxable income available for offset by other loss carryovers.

(c) T's Year 2 and Year 3 are SRLYs with respect to the P group. See § 1.1502–1(f)(2)(ii). Thus, T's $50 net operating loss arising in Year 2 and $60 net operating loss arising in Year 3 are subject to the SRLY limitation. Under paragraph (c)(1) of this section, the SRLY limitation for Year 4 is $70, and under paragraph (b) of this section, T's $50 loss from Year 2 must be included under paragraph (a) of this section in the P group's CNOL deduction for Year 4. The absorption of this loss leaves $70 of the group's consolidated taxable income available for offset by other loss carryovers.

(d) P and T each carry over net operating losses to Year 4 from a taxable year ending on the same date (Year 3). The losses carried over from Year 3 total $180. Under paragraph (b) of this section, the losses carried over from Year 3 are absorbed on a pro rata basis, even though one arises in a SRLY and the other does not. However, the group cannot absorb more than $20 of T's $60 net operating loss arising in Year 3 because its $70 SRLY limitation for Year 4 is reduced by T's $50 Year 2 SRLY loss already included in the CNOL deduction for Year 4. Thus, the absorption of Year 3 losses is as follows:

Amount of P's Year 3 losses absorbed = $120/($120 + $20) x $70 = $60.

Amount of T's Year 3 losses absorbed = § 20/ ($120 + $20) x $70 = $10.

(e) The absorption of $10 of T's Year 3 loss further reduces T's SRLY limitation to $10 ($70 of initial SRLY limitation, reduced by the $60 net operating loss already included in the CNOL deductions for Year 4 under paragraph (a) of this section).

(f) P carries its remaining $60 Year 3 net operating loss and T carries its remaining $50 Year 3 net operating loss over to Year 5. Assume that, in Year 5, the P group has $90 of consolidated taxable income (computed without regard to the CNOL deduction). The group's CTI determined by reference to only T's items is a CNOL of $4. For Year 5, the CNOL deduction includes $60 of P's Year 3 loss but only $6 of T's Year 3 loss (the aggregate consolidated taxable income for Years 4 and 5 determined by reference to T's items, or $66, reduced by T's SRLY losses actually absorbed by the group in Year 4, or $60).

Example 3. Net operating loss carrybacks. (a)(1) P owns all of the stock of S and T. The members of the P group contribute the following to the consolidated taxable income of the P group for Years 1, 2, and 3:

	Year 1	Year 2	Year 3	Total
P	$100	$60	$80	$240
S	20	20	30	70
T	30	10	(50)	(10)
CTI	150	90	60	300

(2) P sells all of the stock of T to individual A at the beginning of Year 4. For its Year 4 separate return year, T has a net operating loss of $30.

(b) T's Year 4 is a SRLY with respect to the P group. See § 1.1502–1(f)(1). T's $30 net operating loss carryback to the P group from Year 4 is not allowed under § 1.1502–21T(c) to be included in the CNOL deduction under paragraph (a) of this section for Year 1, 2, or 3, because the P group's consolidated taxable income would not be a positive amount if determined by reference to only T's items for all consolidated return years through Year 4 (without regard to the $30 net operating loss). However, the $30 loss is carried forward to T's Year 5 and succeeding taxable years as provided under the Code.

Example 4. Computation of SRLY limitation for built-in losses treated as net operating loss carryovers. (a) In Year 1, individual A forms T by contributing $300 and T sustains a $100 net operating loss. During Year 2, T's assets decline in value by $100. At the beginning of Year 3, P buys all the stock of T for $100, and T becomes a member of the P group. At the time of the acquisition, T has a $100 net unrealized built-in loss, which exceeds the threshold requirements of section 382(h)(3)(B). During Year 3, T recognizes its unrealized loss as a $100 ordinary loss. The members of the P group contribute the following to the consolidated taxable income of the P group for Years 3 and 4 (computed without regard to T's recognition of its unrealized loss and any CNOL deduction under § 1.1502–21T):

	Year 3	Year 4	Total
P group (without T)	$100	$100	$200
T	60	40	100
CTI	160	140	300

(b) Under § 1.1502–15T(a), T's $100 of ordinary loss in Year 3 constitutes a built-in loss that is subject to the SRLY limitation under § 1.1502–21T(c). The amount of the limitation is determined by treating the deduction as a net operating loss carryover from a SRLY. The built-in loss is therefore subject to a $60 SRLY limitation for Year 3. The built-in loss is treated as a net operating loss carryover solely for purposes of determining the extent to which the loss is not allowed by reason of the SRLY limitation, and for all other purposes the loss remains a loss arising in Year 3. Consequently, under paragraph (b) of this section, the $60 allowed under the SRLY limitation is absorbed by the P group before T's $100 net operating loss carryover from Year 1 is allowed.

(c) Under § 1.1502–15T(a), the $40 balance of the built-in loss that is not allowed in Year 3 because of the SRLY limitation is treated as a $40 net operating loss arising in Year 3 that is subject to the SRLY limitation because, under § 1.1502–21T(c)(1)(ii), Year 3 is treated as a SRLY, and is carried to other years in accordance with the rules of paragraph (b) of this section. The SRLY limitation for Year 4 is the P group's consolidated taxable income for Year 3 and Year 4 determined by reference to only T's items and without regard to the group's CNOL deductions ($60+$40), reduced by T's loss actually absorbed by the group in Year 3 ($60). The SRLY limitation for Year 4 is $40.

(d) Under paragraph (c) of this section and the principles of section 172(b), $40 of T's $100 net operating loss carryover from Year 1 is included in the CNOL deduction under paragraph (a) of this section in Year 4.

Example 5. Dual SRLY registers and accounting for SRLY losses actually absorbed. (i) In Year 1, T sustains a $100 net operating loss and a $50 net capital loss. At the beginning of Year 2, T becomes a member of the P group. Both of T's carryovers from Year 1 are subject to SRLY limits under this paragraph (c) and § 1.1502–22T(c). The members of the P group contribute the following to the consolidated taxable income for Years 2 and 3 (computed without regard to T's CNOL deduction under § 1.1502–21T or net capital loss carryover under § 1.1502–22T):

		P	T
Year 1 (SRLY)	Ordinary	....	(100)
	Capital	....	(50)
Year 2	Ordinary	30	60
	Capital	0	(20)
Year 3	Ordinary	10	40
	Capital	0	30

(ii) For Year 2, the group computes separate SRLY limits for each of T's SRLY carryovers from Year 1. Under normal Internal Revenue Code rules, it determines its ability to use its capital loss carryover before it determines its ability to use its ordinary loss carryover. Under section 1211, because the group has no Year 2 capital gain, it cannot absorb any capital losses in Year 2. T's Year 1 net capital loss and the group's Year 2 consolidated net capital loss (all of which is attributable to T) are carried over to Year 3.

(iii) Under this section, the aggregate amount of T's $100 NOL carryover from Year 1 that may be included in the CNOL deduction of the group for Year 2 may not exceed $60—the amount of the consolidated taxable income computed by reference only to T's items, including losses and deductions to the extent actually absorbed (i.e., $60 of T's ordinary income for Year 2). Thus, the group may include $60 of T's ordinary loss carryover from Year 1 in its Year 2 CNOL deduction. T carries over its remaining $40 of its Year 1 loss to Year 3.

(iv) For Year 3, the group again computes separate SRLY limits for each of T's SRLY carryovers from Year 1. The group has consolidated net capital gain (without taking into account a net capital loss carryover deduction) of $30. Under § 1.1502–22T(c), the aggregate amount of T's $50 capital loss carryover from Year 1 that may be included in computing the group s consolidated net capital gain for all years of the group (here Years 2 and 3) may not exceed $30 (the aggregate consolidated net capital gain computed by reference only to T's items, including losses and deductions actually absorbed (i.e., $30 of capital gain in Year 3)). Thus, the group may include $30 of T's Year 1 capital loss carryover in its computation of consolidated net capital gain for Year 3, which offsets the group's capital gains for Year 3. T carries over its remaining $20 of its Year 1 loss to Year 4. The group carries over the Year 2 consolidated net capital loss to Year 4.

(v) Under this section, the aggregate amount of T's NOL carryover from Year 1 that may be included in the CNOL deduction of the group for Years 2 and 3 may not exceed $100, which is the amount of the aggregate consolidated taxable income for Years 2 and 3 determined by reference only to T's items, including losses and deductions actually absorbed (i.e., $60 of ordinary income in Year 2 plus $40 of ordinary income, $30 of capital gain, and $30 of SRLY capital losses actually absorbed in Year 3). The group included $60 of T's ordinary loss carryover in its Year 2 CNOL deduction. It may include the remaining $40 of the carryover in its Year 3 CNOL deduction.

(2) *SRLY subgroup limitation.* In the case of a net operating loss carryover or carryback for which there is a SRLY subgroup, the principles of paragraph (c)(1) of this section apply to the SRLY subgroup, and not separately to its

members. Thus, the contribution to consolidated taxable income and the net operating loss carryovers and carrybacks arising (or treated as arising) in SRLYs that are included in the CNOL deductions for all consolidated return years of the group under paragraph (a) of this section are based on the aggregate amounts of income, gain, deduction, and loss of the members of the SRLY subgroup for the relevant consolidated return years (as provided in paragraph (c)(1)(i)(C) of this section). For an illustration of aggregate amounts during the relevant consolidated return years following the year in which a member of a SRLY subgroup ceases to be a member of the group, see paragraph (c)(2)(vii) *Example 4* of this section. A SRLY subgroup may exist only for a carryover or carryback arising in a year that is not a SRLY (and is not treated as a SRLY under paragraph (c)(1)(ii) of this section) with respect to another group (the former group), whether or not the group is a consolidated group. A separate SRLY subgroup is determined for each such carryover or carryback. A consolidated group may include more than one SRLY subgroup and a member may be a member of more than one SRLY subgroup. Solely for purposes of determining the members of a SRLY subgroup with respect to a loss:

(i) *Carryovers.* In the case of a carryover, the SRLY subgroup is composed of the member carrying over the loss (the loss member) and each other member that was a member of the former group that becomes a member of the group at the same time as the loss member. A member remains a member of the SRLY subgroup until it ceases to be affiliated with the loss member. The aggregate determination described in paragraph (c)(1) of this section and this paragraph (c)(2) includes the amounts of income, gain, deduction, and loss of each member of the SRLY subgroup for the consolidated return years during which it remains a member of the SRLY subgroup. For an illustration of the aggregate determination of a SRLY subgroup, see paragraph (c)(2)(vii) *Example 2* of this section.

(ii) *Carrybacks.* In the case of a carryback, the SRLY subgroup is composed of the member carrying back the loss (the loss member) and each other member of the group from which the loss is carried back that has been continuously affiliated with the loss member from the year to which the loss is carried through the year in which the loss arises.

(iii) *Built-in losses.* In the case of a built-in loss, the SRLY subgroup is composed of the member recognizing the loss (the loss member) and each other member that was part of the subgroup with respect to the loss determined under § 1.1502–15T(c)(2) immediately before the members became members of the group. The principles of paragraphs (c)(2)(i) and (ii) of this section apply to determine the SRLY subgroup for the built-in loss that is, under paragraph (c)(1)(ii) of this section, treated as arising in a SRLY with respect to the group in which the loss is recognized. For this purpose and as the context requires, a reference in those paragraphs to a group or former group is a reference to the subgroup determined under § 1.1502–15T(c)(2).

(iv) *Principal purpose of avoiding or increasing a SRLY limitation.* The members composing a SRLY subgroup are not treated as a SRLY subgroup if any of them is formed, acquired, or availed of with a principal purpose of avoiding the application of, or increasing any limitation under, this paragraph (c). Any member excluded from a SRLY subgroup, if excluded with a principal purpose of so avoiding or increasing any SRLY limitation, is treated as included in the SRLY subgroup.

(v) *Coordination with other limitations.* This paragraph (c)(2) does not allow a net operating loss to offset income to the extent inconsistent with other limitations or restrictions on the use of losses, such as a limitation based on the nature or activities of members. For example, any dual consolidated loss may not reduce the taxable income to an extent greater than that allowed under section 1503(d) and § 1.1503–2. See also § 1.1502–47(q) (relating to preemption of rules for life-nonlife groups).

(vi) *Anti-duplication.* If the same item of income or deduction could be taken into account more than once in determining a limitation under this paragraph (c), or in a manner inconsistent with any other provision of the Code or regulations incorporating this paragraph (c), the item of income or deduction is taken into account only once and in such manner that losses are absorbed in accordance with the ordering rules in paragraph (b) of this section and the underlying purposes of this section.

(vii) *Examples.* The principles of this paragraph (c)(2) are illustrated by the following examples:

Example 1. Members of SRLY subgroups. (a) During Year 1, P sustains a $50 net operating loss. At the beginning of Year 2, P buys all the stock of S at a time when the aggregate basis of S's assets exceeds their aggregate value by $70 (as determined under § 1.1502–15T). At the beginning of Year 3, P buys all the stock of T, T has a $60 net operating loss carryover at the time of the acquisition, and T becomes a member of the P group. During Year 4, S forms S1 and T forms T1, each by contributing assets with built-in gains which are, in the aggregate, material. S1 and T1 become members of the P group. M is the common parent of another group. During Year 7, M acquires all of the stock of P, and the members of the P group become members of the M group for the balance of Year 7. The $50 and $60 loss carryovers of P and T are carried to Year 7 of the M group, and the value and basis of S's assets did not change after it became a member of the former P group.

(b) Under paragraph (c)(2) of this section, a separate SRLY subgroup is determined for each loss carryover and built-in loss. In the P group, P's $50 loss carryover is not treated as arising in a SRLY. See § 1.1502–1(f). Consequently, the carryover is not subject to limitation under paragraph (c) of this section in the P group.

(c) In the M group, P's $50 loss carryover is treated as arising in a SRLY and is subject to the limitation under paragraph (c) of this section. A SRLY subgroup with respect to that loss is composed of members which were members of the P group, the group as to which the loss was not a SRLY. The SRLY subgroup is composed of P, the member carrying over the loss, and each other member of the P group that became a member of the M group at the same time as P. A member of the SRLY subgroup remains a member until it ceases to be affiliated with P. For Year 7, the SRLY subgroup is composed of P, S, T, S1, and T1.

(d) In the P group, S's $70 unrealized loss, if recognized within the 5-year recognition period after S becomes a member of the P group, is subject to limitation under paragraph (c) of this section. See § 1.1502–15T and paragraph (c)(1)(ii) of this section. Because S was not continuously affiliated with P, T, or T1 for 60 consecutive months prior to joining the P group, these corporations cannot be included in a SRLY subgroup with respect to S's unrealized loss in the P group. See paragraph (c)(2)(iii) of this section. As a successor to S, S1 is included in a subgroup with S in the P group. Because S did not cease to exist, however, S1's contribution to consolidated taxable income may not be used to increase the consolidated taxable income of the P group that may be offset by the built-in loss. See paragraph (f) of this section.

(e) In the M group, S's $70 unrealized loss, if recognized within the 5-year recognition period after S becomes a member of the M group, is subject to limitation under paragraph (c) of this section. Prior to becoming a member of the M group, S had been continuously affiliated with P (but not T or T1) for 60 consecutive months and S1 is a successor that has remained continuously affiliated with S. Those members had a net unrealized built-in loss immediately before they became members of the group under § 1.1502–15T(c). Consequently, in Year 7, S, S1, and P compose a subgroup in the M group with respect to S's unrealized loss. S1's contribution to consolidated taxable income may not be used to increase the consolidated taxable income of the M group that may be offset by the recognized built-in loss. See paragraph (f) of this section.

(f) In the P group, T's $60 loss carryover arose in a SRLY and is subject to limitation under paragraph (c) of this section. P, S, and S1 were not members of the group in which T's loss arose and cannot be members of a SRLY subgroup with respect to the carryover in the P group. See paragraph (c)(2)(i) of this section. As a successor to T, T1 is included in a SRLY subgroup with T in the P group; however, because T did not cease to exist, T1's contribution to consolidated taxable income may not be used to increase the consolidated taxable income of the P group that may be offset by the carryover. See paragraph (f) of this section.

(g) In the M group, T's $60 loss carryover arose in a SRLY and is subject to limitation under paragraph (c) of this section. T and T1 remain the only members of a SRLY subgroup with respect to the carryover, but T1's contribution to consolidated taxable income may not be used to increase consolidated taxable income of the M group that may be offset by the carryover. See paragraph (f) of this section.

Example 2. Computation of SRLY subgroup limitation. (a) Individual A forms S. Individual B forms T. In Year 2, P buys all the stock of S and T from A and B, and S and T become members of the P group. For Year 3, the P group has a $45 CNOL, which is attributable to P, and which P carries forward. M is the common parent of another group. At the beginning of Year 4, M acquires all of the stock of P and the former members of the P group become members of the M group.

(b) P's year to which the loss is attributable, Year 3, is a SRLY with respect to the M group. See § 1.1502–1(f)(1). However, P, S, and T compose a SRLY subgroup with respect to the Year 3 loss under paragraph (c)(2)(i) of this section because Year 3 is not a SRLY (and is not treated as a SRLY) with respect to the P group. P's loss is carried over to the M group's Year 4 and is therefore subject to the SRLY subgroup limitation in paragraph (c)(2) of this section.

(c) In Year 4, the M group has $10 of consolidated taxable income (computed without regard to the CNOL deduction for Year 4). However, such consolidated taxable income would be $45 if determined by reference to only the items of P, S, and T, the members included in the SRLY subgroup with respect to P's loss carryover. Therefore, the SRLY subgroup limitation under paragraph (c)(2) of this section for P's net operating loss carryover from Year 3 is $45. Because the M group has only $10 of consolidated taxable income in Year 4, however, only $10 of P's net operating loss carryover is included in the CNOL deduction under paragraph (a) of this section in Year 4.

(d) In Year 5, the M group has $100 of consolidated taxable income (computed without regard to the CNOL deduction for Year 5). Neither P, S, nor T has any items of income, gain, deduction, or loss in Year 5. Although the members of the SRLY subgroup do not contribute to the $100 of consolidated taxable income in Year 5, the SRLY subgroup limitation for Year 5 is $35 (the sum of SRLY subgroup consolidated taxable income of $45 in Year 4 and $0 in Year 5, less the $10 net operating loss carryover actually absorbed by the M group in Year 4). Therefore, $35 of P's net operating loss carryover is included in the CNOL deduction under paragraph (a) of this section in Year 5.

Example 3. Inclusion in more than one SRLY subgroup. (a) At the beginning of Year 1, S buys all the stock of T, and T becomes a member of the S group. For Year 1, the S group has a CNOL of $10, all of which is attributable to S and is carried over to Year 2. At the beginning of Year 2, P buys all the stock of S, and S and T become members of the P group. For Year 2, the P group has a CNOL of $35, all of which is attributable to P and is carried over to Year 3. At the beginning of Year 3, M acquires all of the stock of P and the former members of the P group become members of the M group.

(b) P's and S's net operating losses arising in SRLYs with respect to the M group are subject to limitation under paragraph (c) of this section. P, S, and T compose a SRLY subgroup for purposes of determining the limitation for P's $35 net operating loss carryover arising in Year 2 because, under paragraph (c)(2)(i) of this section, Year 2 is not a SRLY with respect to the P group. Similarly, S and T compose a SRLY subgroup for purposes of determining the limitation for S's $10 net operating loss carryover arising in Year 1 because Year 1 is not a SRLY with respect to the S group.

(c) S and T are members of both the SRLY subgroup with respect to P's losses and the SRLY subgroup with respect to S's losses. Under paragraph (c)(2) of this section, S's and T's items cannot be included in the determination of the SRLY subgroup limitation for both SRLY subgroups for the same consolidated return year; paragraph (c)(2)(vi) of this section requires the M group to consider the items of S and T only once so that the losses are absorbed in the order of the taxable years in which they were sustained. Because S's loss was incurred in Year 1, while P's loss was incurred in Year 2, the items will be added in the determination of the consolidated taxable income of the S and T SRLY subgroup to enable S's loss to be absorbed first. The taxable income of the P, S, and T SRLY subgroup is then computed by including the consolidated taxable income for the S and T SRLY subgroup less the amount of any net operating loss carryover of S that is absorbed after applying this section to the S subgroup for the year.

Example 4. Corporation ceases to be affiliated with a SRLY subgroup. (a) P and S are members of the P group and the P group has a CNOL of $30 in Year 1, all of which is attributable to P and carried over to Year 2. At the beginning of Year 2, M acquires all of the stock of P, and P and S become members of the M group. P and S compose a SRLY subgroup with respect to P's net operating loss carryover. For Year 2, consolidated taxable income of the M group determined by reference to only the items of P (and without regard to the CNOL deduction for Year 2) is $40. However, such consolidated taxable income of the M group determined by reference to the items of both P and S is a loss of $20. Thus, the SRLY subgroup limitation under paragraph (c)(2) of this section prevents the M group from including any of P's net operating loss carryover in the CNOL deduction under paragraph (a) of this section in Year 2, and P carries the loss to Year 3.

(b) At the end of Year 2, P sells all of the S stock and S ceases to be a member of the M group and, in turn, ceases to be affiliated with the P subgroup. For Year 3, consolidated taxable income of the M group is $50 (determined without regard to the CNOL deduction for Year 3), and such consolidated taxable income would be $10 if determined by reference to only items of P. However, the limitation under paragraph (c) of this section for Year 3 for P's net operating loss carryover still prevents the M group from including any of P's loss in the CNOL deduction under paragraph (a) of this section. The limitation results from the inclusion of S's items for Year 2 in the determination of the SRLY subgroup limitation for Year 3 even though S ceased to be a member of the M group (and the P subgroup) at the end of Year 2. Thus, the M group's consolidated taxable income determined by reference to only the SRLY subgroup members' items for all consolidated return years of the group through Year 3 (determined without regard to the CNOL deduction) is not a positive amount.

(d) *Coordination with consolidated return change of ownership limitation and transactions subject to old section 382*—(1) *Consolidated return changes of ownership.* If a consolidated return change of ownership occurred before January 1, 1997, the principles of §1.1502–21A(d) apply to determine the amount of the aggregate of the net operating losses attributable to old members of the group that may be included in the consolidated net operating loss deduction under paragraph (a) of this section. For this purpose, §1.1502–1(g) is applied by treating that date as the end of the year of change.

(2) *Old section 382.* The principles of §1.1502–21A(e) apply to disallow or reduce the amount of a net operating loss carryover of a member as a result of a transaction subject to old section 382.

(e) *Consolidated net operating loss.* Any excess of deductions over gross income, as determined under §1.1502–11(a) (without regard to any consolidated net operating loss deduction), is also referred to as the consolidated net operating loss (or CNOL).

(f) *Predecessors and successors*—(1) *In general.* For purposes of this section, any reference to a corporation, member, common parent, or subsidiary, includes, as the context may require, a reference to a successor or predecessor, as defined in §1.1502–1(f)(4).

(2) *Limitation on SRLY subgroups.* Except as the Commissioner may otherwise determine, any increase in the consolidated taxable income of a SRLY subgroup that is attributable to a successor is disregarded unless the successor acquires substantially all the assets and liabilities of its predecessor and the predecessor ceases to exist.

(g) *Effective date.*—(1) *In general.* This section generally applies to consolidated return years beginning on or after January 1, 1997.

(2) *SRLY limitation.* Except in the case of those members (including members of a SRLY subgroup) described in paragraph (g)(3)(iii) of this section, a group does not take into account a consolidated taxable year beginning before January 1, 1997, in determining the aggregate of the consolidated taxable income under paragraph (c)(1) of this section (including for purposes of §1.1502–15T and §1.1502–22T(c)) for the members (or SRLY subgroups).

(3) *Application to prior periods.* A consolidated group may apply the rules of this section to all consolidated return years ending on or after January 29, 1991, and beginning before January 1, 1997, provided that—

(i) The group's tax liability as shown on an original or an amended return is consistent with the application of the rules of this section (other than this paragraph (g)) and §§1.1502–15T, 1.1502–22T, 1.1502–23T, 1.1502–91T through 1.1502–96T, and 1.1502–98T for each such year for which the statute of limitations does not preclude the filing of an amended return on January 1, 1997;

(ii) Each section described in paragraph (g)(3)(i) of this section and §1.1502–1(f)(4)(ii) is applied by substituting ''taxable years ending on or after January 29, 1991'' for ''taxable years beginning on or after January 1, 1997'' (and ''before January 29, 1991'' for ''before January 1, 1997'' in the case of consolidated return changes of ownership) as the context requires;

(iii) The rules of paragraph (c) of this section and §§1.1502–15T and 1.1502–22T(c) are applied only with respect to the losses and deductions of those corporations that became members of the group (including members of a subgroup), and to acquisitions occurring, on or after January 29, 1991, (and only with respect to such losses and deductions);

(iv) The rules of §§1.1502–15A, 1.1502–21A(c) and 1.1502–22A(c) are applied with respect to the losses and deductions of those corporations that became members of the group, and to acquisitions occurring, before January 29, 1991; and

(v) Appropriate adjustments are made in the earliest subsequent open year to reflect any inconsistency in a year for which the statute of limitations precludes the filing of an amended return on January 1, 1997.

(4) *Waiver of carrybacks.* Paragraph (b)(3)(i) of this section (relating to the waiver of carrybacks) applies to net operating losses arising in a consolidated return year for which the due date of the income tax return (without regard to extensions) is on or after August 26, 1996.

[T.D. 8677, 61 FR 33328, June 27, 1996, as amended by T.D. 8751, 63 FR 1745, Jan. 12, 1998]

§ 1.1502–22T Consolidated capital gain and loss (temporary).

(a) *Capital gain.* The determinations under section 1222, including capital gain net income, net long-term capital gain, and net capital gain, with respect to members during consolidated return years are not made separately. Instead, consolidated amounts are determined for the group as a whole. The consolidated capital gain net income for any consolidated return year is determined by reference to—

(1) The aggregate gains and losses of members from sales or exchanges of capital assets for the year (other than gains and losses to which section 1231 applies);

(2) The consolidated net section 1231 gain for the year (determined under § 1.1502–23T); and

(3) The net capital loss carryovers or carrybacks to the year.

(b) *Net capital loss carryovers and carrybacks.*—(1) *In general.* The determinations under section 1222, including net capital loss and net short-term capital loss, with respect to members during consolidated return years are not made separately. Instead, consolidated amounts are determined for the group as a whole. Losses included in the consolidated net capital loss may be carried to consolidated return years, and, after apportionment, may be carried to separate return years. The net capital loss carryovers and carrybacks consist of—

(i) Any consolidated net capital losses of the group; and

(ii) Any net capital losses of the members arising in separate return years.

(2) *Carryovers and carrybacks generally.* The net capital loss carryovers and carrybacks to a taxable year are determined under the principles of section 1212 and this section. Thus, losses permitted to be absorbed in a consolidated return year generally are absorbed in the order of the taxable years in which they were sustained, and losses carried from taxable years ending on the same date, and which are available to offset consolidated capital gain net income, generally are absorbed on a pro rata basis. Additional rules provided under the Code or regulations also apply, as well as the SRLY limitation under paragraph (c) of this section. See, e.g., section 382(l)(2)(B).

(3) *Carryovers and carrybacks of consolidated net capital losses to separate return years.* If any consolidated net capital loss that is attributable to a member may be carried to a separate return year under the principles of § 1.1502–21T(b)(2), the amount of the consolidated net capital loss that is attributable to the member is apportioned and carried to the separate return year (apportioned loss).

(4) *Special rules*—(i) *Short years in connection with transactions to which section 381(a) applies.* If a member distributes or transfers assets to a corporation that is a member immediately after the distribution or transfer in a transaction to which section 381(a) applies, the transaction does not cause the distributor or transferor to have a short year within the consolidated return year of the group in which the transaction occurred that is counted as a separate year for purposes of determining the years to which a net capital loss may be carried.

(ii) *Special status losses.* [Reserved]

(c) *Limitations on net capital loss carryovers and carrybacks from separate return limitation years.* The aggregate of the net capital losses of a member arising (or treated as arising) in SRLYs that are included in the determination of consolidated capital gain net income for all consolidated return years of the group under paragraph (a) of this section may not exceed the aggregate of the consolidated capital gain net income for all consolidated return years of the group determined by reference to only the member's items of gain and loss from capital assets as defined in section 1221 and trade or business assets defined in section 1231(b), including the member's losses actually absorbed by the group in the taxable year (whether or not absorbed by the member). The principles of §1.1502–21T(c)(including the SRLY subgroup principles under §1.1502–21T(c)(2)) apply with appropriate adjustments for purposes of applying this paragraph (c).

(d) *Coordination with respect to consolidated return change of ownership limitation occurring in consolidated return years beginning before January 1, 1997.* If a consolidated return change of ownership occurred before January 1, 1997, the principles of §1.1502–22A(d) apply to determine the amount of the aggregate of the net capital loss attributable to old members of the group (as those terms are defined in §1.1502–1(g)), that may be included in the net capital loss carryover under paragraph (b) of this section. For this purpose, §1.1502–1(g) is applied by treating that date as the end of the year of change.

(e) *Consolidated net capital loss.* Any excess of losses over gains, as determined under paragraph (a) of this section (without regard to any carryovers or carrybacks), is also referred to as the consolidated net capital loss.

(f) *Predecessors and successors.* For purposes of this section, the principles of §1.1502–21T(f) apply with appropriate adjustments.

(g) *Effective date*—(1) *In general.* This section applies to consolidated return years beginning on or after January 1, 1997.

(2) *Application to prior periods.* See §1.1502–21T(g)(3) for rules generally permitting a group to apply the rules of this section to consolidated return years ending on or after January 29, 1991, and beginning before January 1, 1997.

[T.D. 8677, 61 FR 33333, June 27, 1996]

§1.1502–23T Consolidated net section 1231 gain or loss (temporary).

(a) *In general.* Net section 1231 gains and losses of members arising during consolidated return years are not determined separately. Instead, the consolidated net section 1231 gain or loss is determined under this section for the group as a whole.

(b) *Example.* The following example illustrates the provisions of this section:

Example. Use of SRLY registers with net gains and net losses under section 1231. (i) In Year 1, T sustains a $20 net capital loss. At the beginning of Year 2, T becomes a member of the P group. T's capital loss carryover from Year 1 is subject to SRLY limits under §1.1502–22T(c). The members of the P group contribute the following to the consolidated taxable income for Year 2 (computed without regard to T's net capital loss carryover under §1.1502–22T):

		P	T
Year 1 (SRLY)	Ordinary	....	....
	Capital	....	(20)
Year 2	Ordinary	10	20
	Capital	70	0
	§1231	(60)	30

(ii) Under section 1231, if the section 1231 losses for any taxable year exceed the section 1231 gains for such taxable year, such gains and losses are treated as ordinary gains or losses. Because the P group's section 1231 losses, $(60), exceed the section 1231 gains, $30, the P group's net loss is treated as an ordinary loss. T's net section 1231 gain has the same character as the P group's consolidated net section 1231 loss, so T's $30 of section 1231 income is treated as ordinary income for purposes of applying §1.1502–22T(c). Under §1.1502–22T(c), the group's consolidated net capital gain determined by reference only to T's items is $0. None of T's capital loss carryover from Year 1 may be taken into account in Year 2.

(c) *Recapture of ordinary loss.* [Reserved]

(d) *Effective date*—(1) *In general.* This section applies to gains and losses arising in the determination of consolidated net section 1231 gain or loss for taxable years beginning on or after January 1, 1997.

(2) *Application to prior periods.* See §1.1502–21T(g)(3) for rules generally permitting a group to apply the rules of this section to consolidated return years ending on or after January 29, 1991, and beginning before January 1, 1997.

[T.D. 8677, 61 FR 33334, June 27, 1996, as amended by T.D. 8751, 63 FR 1745, Jan. 12, 1998]

§1.1502–24 Consolidated charitable contributions deduction.

(a) *Determination of amount of consolidated charitable contributions deduction.* The deduction allowed by section 170 for the taxable year shall be the lesser of:

(1) The aggregate deductions of the members of the group allowable under section 170 (determined without regard to section 170(b)(2)), plus the consolidated charitable contribution carryovers to such year, or

(2) Five percent of the adjusted consolidated taxable income as determined under paragraph (c) of this section.

(b) *Carryover of excess charitable contributions.* The consolidated charitable contribution carryovers to any consolidated return year shall consist of any excess consolidated charitable contributions of the group, plus any excess charitable contributions of members of the group arising in separate return years of such members, which may be carried over to the taxable year under the principles of section 170(b) (2) and (3). However, such consolidated carryovers shall not include any excess charitable contributions apportioned to a corporation for a separate return year pursuant to paragraph (e) of § 1.1502–79.

(c) *Adjusted consolidated taxable income.* For purposes of this section, the adjusted consolidated taxable income of the group for any consolidated return year shall be the consolidated taxable income computed without regard to this section, section 242, section 243(a) (2) and (3), § 1.1502–25, § 1.1502–26, and § 1.1502–27, and without regard to any consolidated net operating or net capital loss carrybacks to such year.

[T.D. 6894, 31 FR 11794, Sept. 8, 1966]

§ 1.1502–26 Consolidated dividends received deduction.

(a) *In general.* (1) The consolidated dividends received deduction for the taxable year shall be the lesser of:

(i) The aggregate of the deduction of the members of the group allowable under sections 243(a)(1), 244(a), and 245 (computed without regard to the limitations provided in section 246(b)), or

(ii) 85 percent of the consolidated taxable income computed without regard to the consolidated net operating loss deduction, consolidated section 247 deduction, the consolidated dividends received deduction, and any consolidated net capital loss carryback to the taxable year.

Subdivision (ii) of this subparagraph shall not apply for any consolidated return year for which there is a consolidated net operating loss. (See §§ 1.1502–21T(e) or 1.1502–21A(f), as appropriate for the definition of a consolidated net operating loss.)

(2) If any member computes a deduction under section 593(b)(2) for a taxable year beginning after July 11, 1969, and ending before August 30, 1975, the deduction otherwise computed under this section shall be reduced by an amount determined by multiplying the deduction (determined without regard to this sentence and without regard to dividends received by the common parent if such parent does not use the percentage of income method provided by section 593(b)(2)) by the applicable percentage of the member with the highest applicable percentage (determined under subparagraphs (A) and (B) of section 593(b)(2)).

(3) For taxable years ending on or after August 30, 1975, the deduction otherwise computed under this section shall be reduced by the sum of the amounts determined under paragraph (a)(4) of this section for each member that is a thrift institution that computes a deduction under section 593(b)(2).

(4) For each thrift institution, the amount determined under this subparagraph is the product of:

(i) The portion of the deduction determined with regard to the sum of the dividends received by: (A) The thrift institution, and (B) any member in which that thrift institution owns, directly and with the application of paragraph (a)(5) of this section, 5 percent or more of the stock on any day during the consolidated return year, and

(ii) The thrift institution's applicable percentage determined under subparagraphs (A) and (B) of section 593(b)(2).

For purposes of this subparagraph, dividends allocated to a thrift institution under § 1.596–1(c) shall be considered received by the thrift institution.

(5) For purposes of paragraph (a)(4)(i) of this section, a member owning stock of another member (the ''second member'') shall be considered as owning its proportionate share of any stock of a member owned by the second member. Stock considered as being owned by

reason of the preceding sentence shall, for purposes of applying that sentence, be treated as actually owned. The proportionate share of stock in a member owned by another member is the proportion which the value of the stock so owned bears to the value of all the outstanding stock in the member. For purposes of this paragraph the term ''stock'' includes nonvoting stock which is limited and preferred as to dividends.

(6) For purposes of paragraph (a)(4)(i) of this section, if two or more thrift institutions that are both members of the group each owns 5 percent or more of the same member's stock, the member's stock will be considered to be owned only by the thrift institution with the highest applicable percentage.

(b) *Intercompany dividends.* The deduction determined under paragraph (a) of this section is determined without taking into account intercompany dividends to the extent that, under §1.1502–13(f)(2), they are not included in gross income. See §1.1502–13 for additional rules relating to intercompany dividends.

(c) *Examples.* The provisions of this section may be illustrated by the following examples:

Example (1). Corporations P, S, and S–1 filed a consolidated return for the calendar year 1966 showing consolidated taxable income of $100,000 (determined without regard to the consolidated net operating loss deduction, consolidated dividends received deduction, and the consolidated section 247 deduction). Such corporations received dividends during such year from nonmember domestic corporations as follows:

	Dividends
Corporation:	
P	$6,000
S	10,000
S–1	34,000
Total	50,000

The dividends received deduction allowable to each member under section 243(a)(1) (computed without regard to the limitation in section 246(b)) is as follows: P has $5,100 (85 percent of $6,000), S has $8,500 (85 percent of $10,000), and S–1 has $28,900 (85 percent of $34,000), or a total of $42,500. Since $42,500 is less than $85,000 (85 percent of $100,000), the consolidated dividends received deduction is $42,500.

Example (2). Assume the same facts as in example (1) except that consolidated taxable income (computed without regard to the consolidated net operating loss deduction, consolidated dividends received deduction, and the consolidated section 247 deduction) was $40,000. The aggregate of the dividends received deductions, $42,500, computed without regard to section 246(b), results in a consolidated net operating loss of $2,500. See section 172(d)(6). Therefore, paragraph (a)(2) of this section does not apply and the consolidated dividends received deduction is $42,500.

[T.D. 6894, 31 FR 11794, Sept. 8, 1966, as amended by T.D. 7631, 44 FR 40497, July 11, 1979; T.D. 8597, 60 FR 36710, July 18, 1995; T.D. 8677, 61 FR 33323, June 27, 1996]

§1.1502–27 Consolidated section 247 deduction.

(a) *Amount of deduction.* The consolidated section 247 deduction for the taxable year shall be an amount computed as follows:

(1) First, determine the amount which is the lesser of:

(i) The aggregate of the dividends paid (within the meaning of section 247(a)) during such year by members of the group which are public utilities (within the meaning of section 247(b)(1)) on preferred stock (within the meaning of section 247(b)(2)), other than dividends paid to other members of the group, or

(ii) The aggregate of the taxable income (or loss) (as determined under paragraph (b) of this section) of each such member which is a public utility.

(2) Then, multiply the amount determined under subparagraph (1) of this paragraph by the fraction specified in section 247(a)(2).

(b) *Computation of taxable income.* For purposes of paragraph (a)(1)(ii) of this section, the taxable income (or loss) of a member of the group described in paragraph (a)(1)(i) shall be determined under §1.1502–12, adjusted for the following items taken into account in the computation of consolidated taxable income:

(1) The portion of the consolidated net operating loss deduction, the consolidated charitable contributions deduction, and the consolidated dividends received deduction, attributable to such member;

(2) Such member's capital gain net income (net capital gain for taxable years beginning before January 1, 1977) (determined without regard to any net

capital loss carryover or carryback attributable to such member);

(3) Such member's net capital loss and section 1231 net loss, reduced by the portion of the consolidated net capital loss attributable to such member; and

(4) The portion of any consolidated net capital loss carryover or carryback attributable to such member which is absorbed in the taxable year.

[T.D. 6894, 31 FR 11794, Sept. 8, 1966, as amended by T.D. 7728, 45 FR 72650, Nov. 3, 1980]

BASIS, STOCK OWNERSHIP, AND EARNINGS AND PROFITS RULES

§ 1.1502–30 Stock basis after certain triangular reorganizations.

(a) *Scope.* This section provides rules for determining the basis of the stock of an acquiring corporation as a result of a triangular reorganization. The definitions and nomenclature contained in § 1.358–6 apply to this section.

(b) *General rules*—(1) *Forward triangular merger, triangular C reorganization, or triangular B reorganization. P* adjusts its basis in the stock of S as a result of a forward triangular merger, triangular C reorganization, or triangular B reorganization under § 1.358–6(c) and (d), except that § 1.358–6 (c)(1)(ii) and (d)(2) do not apply. Instead, *P* adjusts such basis by taking into account the full amount of—

(i) *T* liabilities assumed by *S* or the amount of liabilities to which the *T* assets acquired by *S* are subject, and

(ii) The fair market value of any consideration not provided by *P* pursuant to the plan of reorganization.

(2) *Reverse triangular merger.* If *P* adjusts its basis in the *T* stock acquired as a result of a reverse triangular merger under § 1.358–6 (c)(2)(i) and (d), § 1.358–6 (c)(1)(ii) and (d)(2) do not apply. Instead, *P* adjusts such basis by taking into account the full amount of—

(i) *T* liabilities deemed assumed by *S* or the amount of liabilities to which the *T* assets deemed acquired by *S* are subject, and

(ii) The fair market value of any consideration not provided by *P* pursuant to the plan of reorganization.

(3) *Excess loss accounts.* Negative adjustments under this section may exceed *P*'s basis in its *S* or *T* stock. The resulting negative amount is *P*'s excess loss account in its *S* or *T* stock. See § 1.1502–19 for rules treating excess loss accounts as negative basis, and treating references to stock basis as including references to excess loss accounts.

(4) *Application of other rules of law.* The rules for this section are in addition to other rules of law. See § 1.1502–80(d) for the non-application of section 357(c) to *P*.

(5) *Examples.* The rules of this paragraph (b) are illustrated by the following examples. For purposes of these examples, *P*, *S*, and *T* are domestic corporations, *P* and *S* file consolidated returns, *P* owns all of the only class of *S* stock, the *P* stock exchanged in the transaction satisfies the requirements of the applicable triangular reorganization provisions, the facts set forth the only corporate activity, and tax liabilities are disregarded.

Example 1. Liabilities.(a) *Facts. T* has assets with an aggregate basis of $60 and fair market value of $100. *T*'s assets are subject to $70 of liabilities. Pursuant to a plan, *P* forms *S* with $5 of cash (which S retains), and *T* merges into *S*. In the merger, the *T* shareholders receive *P* stock worth $30 in exchange for their *T* stock. The transaction is a reorganization to which sections 368 (a)(1)(A) and (a)(2)(D) apply.

(b) *Basis adjustment.* Under § 1.358–6, *P* adjusts its $5 basis in the *S* stock as if *P* had acquired the *T* assets with a carryover basis under section 362 and transferred these assets to *S* in a transaction in which *P* determines its basis in the *S* stock under section 358. Under the rules of this section, the limitation described in § 1.358–6(c)(1)(ii) does not apply. Thus, *P* adjusts its basis in the *S* stock by –$10 (the aggregate adjusted basis of *T*'s assets decreased by the amount of liabilities to which the *T* assets are subject). Consequently, as a result of the reorganization, *P* has an excess loss account of $5 in its *S* stock.

Example 2. Consideration not provided by P. (a) *Facts. T* has assets with an aggregate basis of $10 and fair market value of $100 and no liabilities. *S* is an operating company with substantial assets that has been in existence for several years. *P* has a $5 basis in its *S* stock. Pursuant to a plan, *T* merges into *S* and the *T* shareholders receive $70 of *P* stock provided by *P* pursuant to the plan of reorganization and $30 of cash provided by *S* in exchange for their *T* stock. The transaction is a reorganization to which sections 368 (a)(1)(A) and (a)(2)(D) apply.

(b) *Basis adjustment.* Under §1.358–6, *P* adjusts its $5 basis in the *S* stock as if *P* had acquired the *T* assets with a carryover basis under section 362 and transferred these assets to *S* in a transaction in which *P* determines its basis in the *S* stock under section 358. Under the rules of this section, the limitation described in §1.358–6(d)(2) does not apply. Thus, *P* adjusts its basis in the *S* stock by –$20 (the aggregate adjusted basis of *T*'s assets decreased by the fair market value of the consideration provided by *S*). As a result of the reorganization, *P* has an excess loss account of $15 in its *S* stock.

(c) *Appreciated asset.* The facts are the same as in paragraph (a) of this *Example 2,* except that in the reorganization *S* provides an asset with a $20 adjusted basis and $30 fair market value instead of $30 cash. The basis is adjusted in the same manner as in paragraph (b) of this *Example 2.* In addition, because *S* recognizes a $10 gain from the asset under section 1001, *P*'s basis in its *S* stock is increased under §1.1502–32(b) by *S*'s $10 gain. Consequently, as a result of the reorganization, *P* has an excess loss account of $5 in its *S* stock. (The results would be the same if the appreciated asset provided by *S* was *P* stock with respect to which *S* recognized gain. See §1.1032–2(c)).

Example 3. Reverse triangular merger. (a) *Facts. T* has assets with an aggregate basis of $60 and fair market value of $100. *T*'s assets are subject to $70 of liabilities. *P* owns all of the only class of *S* stock. *P* has a $5 basis in its *S* stock. Pursuant to a plan, *S* merges into *T* with *T* surviving. In the merger, the *T* shareholders exchange their *T* stock for $2 cash from *P* and $28 worth of *P* stock provided by *P* pursuant to the plan. The transaction is a reorganization to which sections 368 (a)(1)(A) and (a)(2)(E) apply.

(b) *Basis adjustment.* Under §1.358–6, *P*'s basis in the *T* stock acquired equals its $5 basis in its *S* stock immediately before the transaction adjusted by the $60 basis in the *T* assets deemed transferred, and the $70 of liabilities to which the *T* assets are subject. Under the rules of this section, the limitation described in §1.358–6(c)(1)(ii) does not apply. Consequently, *P* has an excess loss account of $5 in its *T* stock as a result of the transaction.

(c) *Effective date.* This section applies to reorganizations occurring on or after December 21, 1995.

[T.D. 8648, 60 FR 66082, Dec. 21, 1995]

§1.1502–31 Stock basis after a group structure change.

(a) *In general*—(1) *Overview.* If one corporation (P) succeeds another corporation (T) under the principles of §1.1502–75(d) (2) or (3) as the common parent of a consolidated group in a group structure change, the basis of members in the stock of the former common parent (or the stock of a successor) is adjusted or determined under this section. See §1.1502–33(f)(1) for the definition of group structure change. For example, if P owns all of the stock of another corporation (S), and T merges into S in a group structure change that is a reorganization described in section 368(a)(2)(D) in which P becomes the common parent of the T group, P's basis in S's stock must be adjusted to reflect the change in S's assets and liabilities. The rules of this section coordinate with the earnings and profits adjustments required under §1.1502–33(f)(1), generally conforming the results of transactions in which the T group continues under §1.1502–75 with P as the common parent. By preserving in P the relationship between T's earnings and profits and asset basis, these adjustments limit possible distortions under section 1502 (e.g., in the deconsolidation rules for earnings and profits under §1.1502–33(e), and the continued filing requirements under §1.1502–75(a)). This section applies whether or not T continues to exist after the group structure change.

(2) *Application of other rules of law.* The rules of this section are in addition to other rules of law. The provisions of this section and other rules of law must not have the effect of duplicating an amount in P's basis in S's stock.

(b) *General rules.* Except as otherwise provided in this section—

(1) *Asset acquisitions.* If a corporation acquires the former common parent's assets (and any liabilities assumed or to which the assets are subject) in a group structure change, the basis of members in the stock of the acquiring corporation is adjusted immediately after the group structure change to reflect the acquiring corporation's allocable share of the former common parent's net asset basis as determined under paragraph (c) of this section. For example, if S acquires all of T's assets in a group structure change that is a reorganization described in section 368(a)(2)(D), P's basis in S's stock is adjusted to reflect T's net asset basis. If P owned some of T's stock before the group structure change, the results

would be the same because P's basis in the T stock is not taken into account in determining P's basis in S's stock. If T's net asset basis is a negative amount, it reduces P's basis in S's stock and, if the reduction exceeds P's basis in S's stock, the excess is P's excess loss account in S's stock. See § 1.1502–19 for rules treating P's excess loss account as negative basis, and treating a reference to P's basis in S's stock as including an excess loss account.

(2) *Stock acquisitions.* If a corporation acquires stock of the former common parent in a group structure change, the basis of the members in the former common parent's stock immediately after the group structure change (including any stock of the former common parent owned before the group structure change) is redetermined in accordance with the results for an asset acquisition described in paragraph (b)(1) of this section. For example, if all of T's stock is contributed to P in a group structure change to which section 351 applies, P's basis in T's stock is T's net asset basis, rather than the amount determined under section 362. Similarly, if S merges into T in a group structure change described in section 368(a)(2)(E), P's basis in T's stock is the basis that P would have in S's stock under paragraph (b)(1) of this section if T had merged into S in a group structure change described in section 368(a)(2)(D).

(c) *Net asset basis.* The former common parent's net asset basis is the basis it would have in the stock of a newly formed subsidiary, if—

(1) The former common parent transferred its assets (and any liabilities assumed or to which the assets are subject) to the subsidiary in a transaction to which section 351 applies;

(2) The former common parent and the subsidiary were members of the same consolidated group (see § 1.1502–80(d) for the non-application of section 357(c) to the transfer); and

(3) The asset basis taken into account is each asset's basis immediately after the group structure change (e.g., taking into account any income or gain recognized in the group structure change and reflected in the asset's basis).

(d) *Additional adjustments.* In addition to the adjustments in paragraph (b) of this section, the following adjustments are made:

(1) *Consideration not provided by P.* The basis is reduced to reflect the fair market value of any consideration not provided by the member. For example, if S acquires T's assets in a group structure change described in section 368(a)(2)(D), and S provides an appreciated asset (e.g., stock of P) as partial consideration in the transaction, P's basis in S's stock is reduced by the fair market value of the asset.

(2) *Allocable share*—(i) *Asset acquisitions.* If a corporation receives less than all of the former common parent's assets and liabilities in the group structure change, the former common parent's net asset basis taken into account under paragraph (b)(1) of this section is adjusted accordingly.

(ii) *Stock acquisitions.* If a corporation owns less than all of the former common parent's stock immediately after a group structure change described in paragraph (b)(2) of this section, the percentage of the former common parent's net asset basis taken into account equals the percentage (by fair market value) of the former common parent's stock owned immediately after the group structure change. For example, if P owns less than all of the former common parent's stock immediately after the group structure change, only an allocable part of the basis determined under this section is reflected in the shares owned by P (and the amount allocable to shares owned by nonmembers has no effect on the basis of their shares).

(3) *Allocation among shares of stock.* The basis determined under this section is allocated among shares under the principles of section 358. For example, if P owns multiple classes of the former common parent's stock immediately after the group structure change, only an allocable part of the basis determined under this section is reflected in the basis of each share. See § 1.1502–19(d), for special allocations with respect to excess loss accounts.

(4) *Higher-tier members.* To the extent that the former common parent is owned by members other than the new common parent, the basis of members

in the stock of all subsidiaries owning, directly or indirectly, in whole or in part, an interest in the former common parent's assets or liabilities is adjusted in accordance with the principles of this section. The adjustments are applied in the order of the tiers, from the lowest to the highest.

(e) *Waiver of loss carryovers of former common parent* —(1) *General rule.* An irrevocable election may be made to treat all or any portion of a loss carryover attributable to the common parent as expiring for all Federal income tax purposes immediately before the group structure change. Thus, if the loss carryover is treated as expiring under the election, it will not result in a negative adjustment to the basis of P's stock under §1.1502–32(b).

(2) *Election.* The election described in this paragraph (e) must be made in a separate statement entitled ''ELECTION TO TREAT LOSS CARRYOVER AS EXPIRING UNDER §1.1502–31(e).'' The statement must be filed with the consolidated group's return for the year that includes the group structure change, and it must be signed by the former and the new common parent. The statement must identify the amount of each loss carryover deemed to expire (or the amount of each loss carryover deemed not to expire, with any balance of any loss carryovers being deemed to expire).

(f) *Predecessors and successors.* For purposes of this section, any reference to a corporation includes a reference to a successor or predecessor as the context may require. See §1.1502–32(f) for definitions of predecessor and successor.

(g) *Examples.* For purposes of the examples in this section, unless otherwise stated, all corporations have only one class of stock outstanding, the tax year of all persons is the calendar year, all persons use the accrual method of accounting, the facts set forth the only corporate activity, all transactions are between unrelated persons, and tax liabilities are disregarded. The principles of this section are illustrated by the following examples.

Example 1. Forward triangular merger. (a) *Facts.* P is the common parent of one group and T is the common parent of another. T has assets with an aggregate basis of $60 and fair market value of $100 and no liabilities. T's shareholders have an aggregate basis of $50 in T's stock. In Year 1, pursuant to a plan, P forms S and T merges into S with the T shareholders receiving $100 of P stock in exchange for their T stock. The transaction is a reorganization described in section 368(a)(2)(D). The transaction is also a reverse acquisition under §1.1502- 75(d)(3) because the T shareholders, as a result of owning T's stock, own more than 50% of the value of P's stock immediately after the transaction. Thus, the transaction is a group structure change under §1.1502–33(f)(1), and P's earnings and profits are adjusted to reflect T's earnings and profits immediately before T ceases to be the common parent of the T group.

(b) *Analysis.* Under paragraph (b)(1) of this section, P's basis in S's stock is adjusted to reflect T's net asset basis. Under paragraph (c) of this section, T's net asset basis is $60, the basis T would have in the stock of a subsidiary under section 358 if T had transferred all of its assets and liabilities to the subsidiary in a transaction to which section 351 applies. Thus, P has a $60 basis in S's stock.

(c) *Pre-existing S.* The facts are the same as in paragraph (a) of this *Example 1,* except that P has owned the stock of S for several years and P has a $50 basis in the S stock before the merger with T. Under paragraph (b)(1) of this section, P's $50 basis in S's stock is adjusted to reflect T's net asset basis. Thus, P's basis in S's stock is $110 ($50 plus $60).

(d) *Excess loss account included in former common parent's net asset basis.* The facts are the same as in paragraph (a) of this *Example 1,* except that T has two assets, an operating asset with an $80 basis and $90 fair market value, and stock of a subsidiary with a $20 excess loss account and $10 fair market value. Under paragraph (c) of this section, T's net asset basis is $60 ($80 minus $20). See sections 351 and 358, and §1.1502–19. Consequently, P has a $60 basis in S's stock. Under section 362 and §1.1502–19, S has an $80 basis in the operating asset and a $20 excess loss account in the stock of the subsidiary.

(e) *Liabilities in excess of basis.* The facts are the same as in paragraph (a) of this *Example 1,* except that T's assets have a fair market value of $170 (and $60 basis) and are subject to $70 of liabilities. Under paragraph (c) of this section, T's net asset basis is ($10) ($60 minus $70). See sections 351 and 358, and §§1.1502–19 and 1.1502–80(d). Thus, P has a $10 excess loss account in S's stock. Under section 362, S has a $60 basis in its assets (which are subject to $70 of liabilities). (Under paragraph (a)(2) of this section, because the liabilities are taken into account in determining net asset basis under paragraph (c) of this section, the liabilities are not also taken into account as consideration not provided by P under paragraph (d)(1) of this section.)

(f) *Consideration provided by S.* The facts are the same as in paragraph (a) of this *Example 1,* except that P forms S with a $100 contribution at the beginning of Year 1, and during Year 6, pursuant to a plan, S purchases $100 of P stock and T merges into S with the T shareholders receiving P stock in exchange for their T stock. Under paragraph (b)(1) of this section, P's $100 basis in S's stock is increased by $60 to reflect T's net asset basis. Under paragraph (d)(1) of this section, P's basis in S's stock is decreased by $100 (the fair market value of the P stock) because the P stock purchased by S and used in the transaction is consideration not provided by P.

(g) *Appreciated asset provided by S.* The facts are the same as in paragraph (a) of this *Example 1,* except that P has owned the stock of S for several years, and the shareholders of T receive $60 of P stock and an asset of S with a $30 adjusted basis and $40 fair market value. S recognizes a $10 gain from the asset under section 1001. Under paragraph (b)(1) of this section, P's basis in S's stock is increased by $60 to reflect T's net asset basis. Under paragraph (d)(1) of this section, P's basis in S's stock is decreased by $40 (the fair market value of the asset provided by S). In addition, P's basis in S's stock is increased under § 1.1502–32(b) by S's $10 gain.

(h) *Depreciated asset provided by S.* The facts are the same as in paragraph (a) of this *Example 1,* except that P has owned the stock of S for several years, and the shareholders of T receive $60 of P stock and an asset of S with a $50 adjusted basis and $40 fair market value. S recognizes a $10 loss from the asset under section 1001. Under paragraph (b)(1) of this section, P's basis in S's stock is increased by $60 to reflect T's net asset basis. Under paragraph (d)(1) of this section, P's basis in S's stock is decreased by $40 (the fair market value of the asset provided by S). In addition, S's $10 loss is taken into account under § 1.1502–32(b) in determining P's basis adjustments under that section.

Example 2. Stock acquisition. (a) *Facts.* P is the common parent of one group and T is the common parent of another. T has assets with an aggregate basis of $60 and fair market value of $100 and no liabilities. T's shareholders have an aggregate basis of $50 in T's stock. Pursuant to a plan, P forms S and S acquires all of T's stock in exchange for P stock in a transaction described in section 368(a)(1)(B). The transaction is also a reverse acquisition under § 1.1502–75(d)(3). Thus, the transaction is a group structure change under § 1.1502–33(f)(1), and the earnings and profits of P and S are adjusted to reflect T's earnings and profits immediately before T ceases to be the common parent of the T group.

(b) *Analysis.* Under paragraph (d)(4) of this section, although S is not the new common parent of the T group, adjustments must be made to S's basis in T's stock in accordance with the principles of this section. Although S's basis in T's stock would ordinarily be determined under section 362 by reference to the basis of T's shareholders in T's stock immediately before the group structure change, under the principles of paragraph (b)(2) of this section, S's basis in T's stock is determined by reference to T's net asset basis. Thus, S's basis in T's stock is $60.

(c) *Higher-tier adjustments.* Under paragraph (d)(4) of this section, P's basis in S's stock is adjusted to $60 (to be consistent with the adjustment to S's basis in T's stock).

(d) *Cross ownership.* The facts are the same as in paragraph (a) of this *Example 2,* except that S has owned 10% of T's stock for several years and, pursuant to the plan, S acquires the remaining 90% of T's stock in exchange for P stock. The results are the same as in paragraphs (b) and (c) of this *Example 2,* because S's basis in the initial 10% of T's stock is redetermined under this section.

(e) *Allocable share.* The facts are the same as in paragraph (a) of this *Example 2,* except that P owns only 90% of S's stock immediately after the group structure change. S's basis in T's stock is the same as in paragraph (b) of this *Example 2.* Under paragraph (d)(2) of this section, P's basis in its S stock is adjusted to $54 (90% of S's $60 adjustment).

Example 3. Taxable stock acquisition. (a) *Facts.* P is the common parent of one group and T is the common parent of another. T has assets with an aggregate basis of $60 and fair market value of $100 and no liabilities. T's shareholders have an aggregate basis of $50 in T's stock. Pursuant to a plan, P acquires all of T's stock in exchange for $70 of P's stock and $30 in a transaction that is a group structure change under § 1.1502–33(f)(1). P's acquisition of T's stock is a taxable transaction. (Because of P's use of cash, the acquisition is not a transaction described in section 368(a)(1)(B).)

(b) *Analysis.* Under paragraph (b)(2) of this section, P's basis in T's stock is adjusted to reflect T's net asset basis. Thus, although P's basis in T's stock would ordinarily be a cost basis of $100, P's basis in T's stock under this section is $60.

(h) *Effective date*—(1) *General rule.* This section applies to group structure changes occurring in consolidated return years beginning on or after January 1, 1995.

(2) *Prior law.* For prior years, see prior regulations under section 1502 as

in effect with respect to the transaction. See, e.g., §1.1502–31T as contained in the 26 CFR part 1 edition revised as of April 1, 1994.

[T.D. 8560, 59 FR 41683, Aug. 15, 1994]

§1.1502–32 Investment adjustments.

(a) *In general*—(1) *Purpose.* This section provides rules for adjusting the basis of the stock of a subsidiary (S) owned by another member (P). These rules modify the determination of P's basis in S's stock under applicable rules of law by adjusting P's basis to reflect S's distributions and S's items of income, gain, deduction, and loss taken into account for the period that S is a member of the consolidated group. The purpose of the adjustments is to treat P and S as a single entity so that consolidated taxable income reflects the group's income. For example, if P forms S with a $100 contribution, and S takes into account $10 of income, P's $100 basis in S's stock under section 358 is increased by $10 under this section to prevent S's income from being taken into account a second time on P's disposition of S's stock. Comparable adjustments are made for tax-exempt income and noncapital, nondeductible expenses that S takes into account, to preserve their treatment under the Internal Revenue Code.

(2) *Application of other rules of law.* The rules of this section are in addition to other rules of law. See, e.g., section 358 (basis determinations for distributees), section 1016 (adjustments to basis), §1.1502–11(b) (limitations on the use of losses), §1.1502–19 (treatment of excess loss accounts), §1.1502–20 (additional rules relating to stock loss), and §1.1502–31 (basis after a group structure change). P's basis in S's stock must not be adjusted under this section and other rules of law in a manner that has the effect of duplicating an adjustment. See also paragraph (h)(5) of this section for basis reductions applicable to certain former subsidiaries.

(3) *Overview*—(i) *In general.* The amount of the stock basis adjustments and their timing are determined under paragraph (b) of this section. Under paragraph (c) of this section, the amount of the adjustment is allocated among the shares of S's stock. Paragraphs (d) through (g) of this section provide definitions, an anti-avoidance rule, successor rules, and record-keeping requirements.

(ii) *Excess loss account.* Negative adjustments under this section may exceed P's basis in S's stock. The resulting negative amount is P's excess loss account in S's stock. See §1.1502–19 for rules treating excess loss accounts as negative basis, and treating references to stock basis as including references to excess loss accounts.

(iii) *Tiering up of adjustments.* The adjustments to S's stock under this section are taken into account in determining adjustments to higher-tier stock. The adjustments are applied in the order of the tiers, from the lowest to the highest. For example, if P is also a subsidiary, P's adjustment to S's stock is taken into account in determining the adjustments to stock of P owned by other members.

(b) *Stock basis adjustments*—(1) *Timing of adjustments*—(i) *In general.* Adjustments under this section are made as of the close of each consolidated return year, and as of any other time (an interim adjustment) if a determination at that time is necessary to determine a tax liability of any person. For example, adjustments are made as of P's sale of S's stock in order to measure P's gain or loss from the sale, and if P's interest in S's stock is not uniform throughout the year (e.g., because P disposes of a portion of its S stock, or S issues additional shares to another person), the adjustments under this section are made by taking into account the varying interests. An interim adjustment may be necessary even if tax liability is not affected until a later time. For example, if P sells only 50% of S's stock and S becomes a nonmember, adjustments must be made for the retained stock as of the disposition (whether or not P has an excess loss account in that stock). Similarly, if S liquidates during a consolidated return year, adjustments must be made as of the liquidation (even if the liquidation is tax free under section 332).

(ii) *Allocation of items.* If §1.1502–76(b) applies to S for purposes of an adjustment before the close of the group's consolidated return year, the amount of the adjustment is determined under that section. If § 1.1502–76(b) does not apply to the interim adjustment, the adjustment is determined under the principles of § 1.1502–76(b), consistently applied, and ratable allocation under the principles of § 1.1502–76(b)(2)(ii) or (iii) may be used without filing an election under § 1.1502–76(b)(2). The principles would apply, for example, if P becomes a nonmember but S remains a member.

(2) *Amount of adjustments.* P's basis in S's stock is increased by positive adjustments and decreased by negative adjustments under this paragraph (b)(2). The amount of the adjustment, determined as of the time of the adjustment, is the net amount of S's—

(i) Taxable income or loss;

(ii) Tax-exempt income;

(iii) Noncapital, nondeductible expenses; and

(iv) Distributions with respect to S's stock.

(3) *Operating rules.* For purposes of determining P's adjustments to the basis of S's stock under paragraph (b)(2) of this section—

(i) *Taxable income or loss.* S's taxable income or loss is consolidated taxable income (or loss) determined by including only S's items of income, gain, deduction, and loss taken into account in determining consolidated taxable income (or loss), treating S's deductions and losses as taken into account to the extent they are absorbed by S or any other member. For this purpose:

(A) To the extent that S's deduction or loss is absorbed in the year it arises or is carried forward and absorbed in a subsequent year (e.g., under section 172, 465, or 1212), the deduction or loss is taken into account under paragraph (b)(2) of this section in the year in which it is absorbed.

(B) To the extent that S's deduction or loss is carried back and absorbed in a prior year (whether consolidated or separate), the deduction or loss is taken into account under paragraph (b)(2) of this section in the year in which it arises and not in the year in which it is absorbed.

(ii) *Tax-exempt income*—(A) *In general.* S's tax-exempt income is its income and gain which is taken into account but permanently excluded from its gross income under applicable law, and which increases, directly or indirectly, the basis of its assets (or an equivalent amount). For example, S's dividend income to which § 1.1502–13(f)(2)(ii) applies, and its interest excluded from gross income under section 103, are treated as tax-exempt income. However, S's income not recognized under section 1031 is not treated as tax- exempt income because the corresponding basis adjustments under section 1031(d) prevent S's nonrecognition from being permanent. Similarly, S's tax-exempt income does not include gain not recognized under section 332 from the liquidation of a lower-tier subsidiary, or not recognized under section 118 or section 351 from a transfer of assets to S.

(B) *Equivalent deductions.* To the extent that S's taxable income or gain is permanently offset by a deduction or loss that does not reduce, directly or indirectly, the basis of S's assets (or an equivalent amount), the income or gain is treated as tax-exempt income and is taken into account under paragraph (b)(3)(ii)(A) of this section. In addition, the income and the offsetting item are taken into account under paragraph (b)(3)(i) of this section. For example, if S receives a $100 dividend with respect to which a $70 dividends received deduction is allowed under section 243, $70 of the dividend is treated as tax-exempt income. Accordingly, P's basis in S's stock increases by $100 because the $100 dividend and $70 deduction are taken into account under paragraph (b)(3)(i) of this section (resulting in $30 of the increase), and $70 of the dividend is also taken into account under paragraph (b)(3)(ii)(A) of this section as tax-exempt income (resulting in $70 of the increase). (See paragraph (b)(3)(iii) of this section if there is a corresponding negative adjustment under section 1059.) Similarly, income from mineral properties is treated as tax-exempt income to the extent it is offset by deductions for depletion in excess of the basis of the property.

(C) *Discharge of indebtedness income*—(*1*) *In general.* Discharge of indebtedness income of S that is excluded from gross income under section 108 is treated as tax-exempt income only to the extent the discharge is applied to reduce tax attributes (e.g., under section 108 or 1017). Discharge of S's indebtedness is treated as applied to reduce tax attributes only to the extent the attribute reduction is taken into account as a reduction under paragraph (b)(3)(iii) of this section.

(*2*) *Expired loss carryovers.* If the amount of the discharge exceeds the amount of the attribute reduction, the excess is nevertheless treated as applied to reduce tax attributes to the extent a loss carryover expired without tax benefit, the expiration was taken into account as a noncapital, nondeductible expense under paragraph (b)(3)(iii) of this section, and the loss carryover would have been reduced had it not expired.

(D) *Basis shifts.* An increase in the basis of S's assets (or an equivalent as described in paragraph (b)(3)(iv)(B) of this section) is treated as tax-exempt income to the extent that the increase is not otherwise taken into account in determining stock basis, it corresponds to a negative adjustment that is taken into account by the group under this paragraph (b) (or incurred by the common parent), and it has the effect (viewing the group in the aggregate) of a permanent recovery of the reduction. For example, S's basis increase under section 50(c)(2) is treated as tax-exempt income to the extent the preceding basis reduction under section 50(c)(1) is reflected in the basis of a member's stock. On the other hand, if S increases the basis of an asset as the result of an accounting method change, and the related positive section 481(a) adjustment is taken into account over time, the basis increase is not treated as tax-exempt income.

(iii) *Noncapital, nondeductible expenses*—(A) *In general.* S's noncapital, nondeductible expenses are its deductions and losses that are taken into account but permanently disallowed or eliminated under applicable law in determining its taxable income or loss, and that decrease, directly or indirectly, the basis of its assets (or an equivalent amount). For example, S's Federal taxes described in section 275 and loss not recognized under section 311(a) are noncapital, nondeductible expenses. Similarly, if a loss carryover (e.g., under section 172 or 1212) attributable to S expires or is reduced under section 108(b), it becomes a noncapital, nondeductible expense at the close of the last tax year to which it may be carried. However, if S sells and repurchases a security subject to section 1091, the disallowed loss is not a noncapital, nondeductible expense because the corresponding basis adjustments under section 1091(d) prevent the disallowance from being permanent.

(B) *Nondeductible basis recovery.* Any other decrease in the basis of S's assets (or an equivalent as described in paragraph (b)(3)(iv)(B) of this section) may be a noncapital, nondeductible expense to the extent that the decrease is not otherwise taken into account in determining stock basis and is permanently eliminated for purposes of determining S's taxable income or loss. Whether a decrease is so treated is determined by taking into account both the purposes of the Code or regulatory provision resulting in the decrease and the purposes of this section. For example, S's noncapital, nondeductible expenses include any basis reduction under section 50(c)(1), section 1017, section 1059, §1.1502–20(b), or §1.1502–20(g). Also included as a noncapital, nondeductible expense is the amount of any gross-up for taxes paid by another taxpayer that S is treated as having paid (e.g., income included under section 78, or the portion of an undistributed capital gain dividend that is treated as tax deemed to have been paid by a shareholder under section 852(b)(3)(D)(ii), whether or not any corresponding amount is claimed as a tax credit). In contrast, a decrease generally is not a noncapital, nondeductible expense if it results because S redeems stock in a transaction to which section 302(a) applies, S receives assets in a liquidation to which section 332 applies and its basis in the assets is less than its basis in the stock canceled, or S distributes the stock of a subsidiary in a distribution to which section 355 applies.

(iv) *Special rules for tax-exempt income and noncapital, nondeductible expenses.* For purposes of paragraphs (b)(3)(ii) and (iii) of this section:

(A) *Treatment as permanent.* An amount is permanently excluded from gross income, or permanently disallowed or eliminated, if it is so treated by S even though another person may take a corresponding amount into account. For example, if S sells property to a nonmember at a loss that is disallowed under section 267(a), S's loss is a noncapital, nondeductible expense even though under section 267(d) the nonmember may treat a corresponding amount of gain as not recognized. (If the nonmember is a subsidiary in another consolidated group, its gain not recognized under section 267(d) is tax-exempt income under paragraph (b)(3)(ii)(A) of this section.)

(B) *Amounts equivalent to basis and adjustments to basis.* Amounts equivalent to basis include the amount of money, the amount of a loss carryover, and the amount of an adjustment to gain or loss under section 475(a) for securities described in section 475(a)(2). An equivalent to a basis increase includes a decrease in an excess loss account, and an equivalent to a basis decrease includes the denial of basis for taxable income.

(C) *Timing.* An amount is taken into account in the year in which it would be taken into account under paragraph (b)(3)(i) of this section if it were subject to Federal income taxation.

(D) *Tax sharing agreements.* Taxes are taken into account by applying the principles of section 1552 and the percentage method under § 1.1502–33(d)(3) (and by assuming a 100% allocation of any decreased tax liability). The treatment of amounts allocated under this paragraph (b)(3)(iv)(D) is analogous to the treatment of allocations under § 1.1552–1(b)(2). For example, if one member owes a payment to a second member, the first member is treated as indebted to the second member. The right to receive payment is treated as a positive adjustment under paragraph (b)(3)(ii) of this section, and the obligation to make payment is treated as a negative adjustment under paragraph (b)(3)(iii) of this section. If the obligation is not paid, the amount not paid generally is treated as a distribution, contribution, or both, depending on the relationship between the members.

(v) *Distributions.* Distributions taken into account under paragraph (b)(2) of this section are distributions with respect to S's stock to which section 301 applies and all other distributions treated as dividends (e.g., under section 356(a)(2)). See § 1.1502–13(f)(2)(iv) for taking into account distributions to which section 301 applies (but not other distributions treated as dividends) under the entitlement rule.

(4) *Waiver of loss carryovers from separate return limitation years*—(i) *General rule.* If S has a loss carryover from a separate return limitation year when it becomes a member of a consolidated group, the group may make an irrevocable election to treat all or any portion of the loss carryover as expiring for all Federal income tax purposes immediately before S becomes a member of the consolidated group (deemed expiration). If S was a member of another group immediately before it became a member of the consolidated group, the expiration is also treated as occurring immediately after it ceases to be a member of the prior group.

(ii) *Stock basis adjustments from a waiver*—(A) *Qualifying transactions.* If S becomes a member of the consolidated group in a qualifying cost basis transaction and an election under this paragraph (b)(4) is made, the noncapital, nondeductible expense resulting from the deemed expiration does not result in a corresponding stock basis adjustment for any member under this section. A qualifying cost basis transaction is the purchase (i.e., a transaction in which basis is determined under section 1012) by members of the acquiring consolidated group (while they are members) in a 12-month period of an amount of S's stock satisfying the requirements of section 1504(a)(2).

(B) *Nonqualifying transactions.* If S becomes a member of the consolidated group other than in a qualifying cost basis transaction and an election under this paragraph (b)(4) is made, the basis of its stock that is owned by members immediately after it becomes a member is subject to reduction under the principles of this section to reflect the deemed expiration. The reduction occurs immediately before S becomes a member, but after it ceases to be a member of any prior group, and it therefore does not result in a corresponding stock basis adjustment for any higher-tier member of the transferring or acquiring consolidated group. Any basis reduction under this paragraph (b)(4)(ii)(B) is taken into account in making determinations of basis under the Code with respect to S's stock (e.g., a determination under section 362 because the stock is acquired in a transaction described in section 368(a)(1)(B)), but it does not result in corresponding stock basis adjustments under this section for any higher-tier member. If the basis reduction exceeds the basis of S's stock, the excess is treated as an excess loss account to which the members owning S's stock succeed.

(C) *Higher-tier corporations.* If S becomes a member of the consolidated group as a result, in whole or in part, of a higher-tier corporation becoming a member (whether or not in a qualifying cost basis transaction), additional adjustments are required. The highest-tier corporation (T) whose becoming a member resulted in S becoming a member, and T's chain of lower-tier corporations that includes S, are subject to the adjustment. The deemed expiration of S's loss carryover that results in a negative adjustment for the first higher-tier corporation is treated as an expiring loss carryover of that higher-tier corporation for purposes of applying paragraph (b)(4)(ii)(B) of this section to that corporation. For example, if P purchases all of the stock of T, T owns all of the stock of T1, T1 owns all of the stock of S, S becomes a member as a result of T becoming a member, and the election under this paragraph (b)(4) is made, the basis of the S stock is reduced and the reduction tiers up to T1, T1 treats the negative adjustment to its basis in S's stock as an expiring loss carryover of T1, and T then adjusts its basis in T1's stock. In addition, if T becomes a member of the acquiring group in a transaction other than a qualifying cost basis transaction, the amount that tiers up to T also reduces the basis of its stock under paragraph (b)(4)(ii)(B) of this section (but the amount does not tier up to higher-tier members).

(iii) *Net asset basis limitation.* Basis reduced under this paragraph (b)(4) is restored before S becomes a member (and before the basis of S's stock is taken into account in determining basis under the Code) to the extent necessary to conform a share's basis to its allocable portion of net asset basis. In the case of higher-tier corporations under paragraph (b)(4)(ii)(C) of this section, the restoration does not tier up but is instead applied separately to each higher-tier corporation. For purposes of determining each corporation's net asset basis (including the basis of stock in lower-tier corporations), the restoration is applied in the order of tiers, from the lowest to the highest. For purposes of the restoration:

(A) A member's net asset basis is the positive or negative difference between the adjusted basis of its assets (and the amount of any of its loss carryovers that are not deemed to expire) and its liabilities. Appropriate adjustments must be made, for example, to disregard liabilities that subsequently will give rise to deductions (e.g., liabilities to which section 461(h) applies).

(B) Within a class of stock, each share has the same allocable portion of net asset basis. If there is more than one class of common stock, the net asset basis is allocated to each class by taking into account the terms of each class and all other facts and circumstances relating to the overall economic arrangement.

(iv) *Election.* The election described in this paragraph (b)(4) must be made in a separate statement entitled ''ELECTION TO TREAT LOSS CARRYOVER AS EXPIRING UNDER §1.1502–32(b)(4).'' The statement must be filed with the consolidated group's return for the year S becomes a member, and it must be signed by the common parent and S. A separate statement must be made for each member whose loss carryover is deemed to expire. The statement must identify the amount of each loss carryover deemed to expire (or the amount of each loss carryover deemed not to expire, with any balance of any loss carryovers being deemed to expire), the basis of any stock reduced as a result of the deemed expiration, and the computation of the basis reduction.

(5) *Examples*—(i) *In general.* For purposes of the examples in this section, unless otherwise stated, P owns all of

the only class of S's stock, the stock is owned for the entire year, S owns no stock of lower-tier members, the tax year of all persons is the calendar year, all persons use the accrual method of accounting, the facts set forth the only corporate activity, preferred stock is described in section 1504(a)(4), all transactions are between unrelated persons, and tax liabilities are disregarded.

(ii) *Stock basis adjustments.* The principles of this paragraph (b) are illustrated by the following examples.

Example 1. Taxable income. (a) *Current taxable income.* For Year 1, the P group has $100 of taxable income when determined by including only S's items of income, gain, deduction, and loss taken into account. Under paragraph (b)(1) of this section, P's basis in S's stock is adjusted under this section as of the close of Year 1. Under paragraph (b)(2) of this section, P's basis in S's stock is increased by the amount of the P group's taxable income determined by including only S's items taken into account. Thus, P's basis in S's stock is increased by $100 as of the close of Year 1.

(b) *Intercompany gain that is not taken into account.* The facts are the same as in paragraph (a) of this *Example 1,* except that S also sells property to another member at a $25 gain in Year 1, the gain is deferred under § 1.1502–13 and taken into account in Year 3, and P sells 10% of S's stock to nonmembers in Year 2. Under paragraph (b)(3)(i) of this section, S's deferred gain is not additional taxable income for Year 1 or 2 because it is not taken into account in determining the P group's consolidated taxable income for either of those years. The deferred gain is not tax-exempt income under paragraph (b)(3)(ii) of this section because it is not permanently excluded from S's gross income. The deferred gain does not result in a basis adjustment until Year 3, when it is taken into account in determining the P group's consolidated taxable income. Consequently, P's basis in the S shares sold is not increased to reflect S's gain from the intercompany sale of the property. In Year 3, the deferred gain is taken into account, but the amount allocable to the shares sold by P does not increase their basis because these shares are held by nonmembers.

(c) *Intercompany gain taken into account.* The facts are the same as in paragraph (b) of this *Example 1,* except that P sells all of S's stock in Year 2 (rather than only 10%). Under § 1.1502–13, S takes the $25 gain into account immediately before S becomes a nonmember. Thus, P's basis in S's stock is increased to reflect S's gain from the intercompany sale of the property.

Example 2. Tax loss. (a) *Current absorption.* For Year 2, the P group has a $50 consolidated net operating loss when determined by taking into account only S's items of income, gain, deduction, and loss. S's loss is absorbed by the P group in Year 2, offsetting P's income for that year. Under paragraph (b)(3)(i)(A) of this section, because S's loss is absorbed in the year it arises, P has a $50 negative adjustment with respect to S's stock. Under paragraph (b)(2) of this section, P reduces its basis in S's stock by $50. Under paragraph (a)(3)(ii) of this section, if the decrease exceeds P's basis in S's stock, the excess is P's excess loss account in S's stock.

(b) *Interim determination from stock sale.* The facts are the same as in paragraph (a) of this *Example 2,* except that S's Year 2 loss arises in the first half of the calendar year, P sells 50% of S's stock on July 1 of Year 2, and P's income for Year 2 does not arise until after the sale of S's stock. P's income for Year 2 (exclusive of the sale of S's stock) is offset by S's loss, even though the income arises after the stock sale, and no loss remains to be apportioned to S. See §§ 1.1502–11 and 1.1502–21T(b). Under paragraph (b)(3)(i)(A) of this section, because S's $50 loss is absorbed in the year it arises, it reduces P's basis in the S shares sold by $25 immediately before the stock sale. Because S becomes a nonmember, the loss also reduces P's basis in the retained S shares by $25 immediately before S becomes a nonmember. See also § 1.1502–20(b) (possible stock basis reduction on the deconsolidation of S).

(c) *Loss carryback.* The facts are the same as in paragraph (a) of this *Example 2,* except that P has no income or loss for Year 2, S's $50 loss is carried back and absorbed by the P group in Year 1 (offsetting the income of P or S), and the P group receives a $17 tax refund in Year 2 that is paid to S. Under paragraph (b)(3)(i)(B) of this section, because the $50 loss is carried back and absorbed in Year 1, it is treated as a tax loss for Year 2 (the year in which it arises). Under paragraph (b)(3)(ii) of this section, the refund is treated as tax-exempt income of S. Under paragraph (b)(3)(iv)(C) of this section, the tax- exempt income is taken into account in Year 2 because that is the year it would be taken into account under S's method of accounting if it were subject to Federal income taxation. Thus, under paragraph (b)(2) of this section, P reduces its basis in S's stock by $33 as of the close of Year 2 (the $50 tax loss, less the $17 tax refund).

(d) *Loss carryforward.* The facts are the same as in paragraph (a) of this *Example 2,* except that P has no income or loss for Year 2, and S's loss is carried forward and absorbed by the P group in Year 3 (offsetting the income of P or S). Under paragraph (b)(3)(i)(A) of this section, the loss is not treated as a tax loss under paragraph (b)(2) of this section until Year 3.

Example 3. Tax-exempt income and noncapital, nondeductible expenses. (a) *Facts.* For Year 1, the P group has $500 of consolidated taxable income. However, the P group has a $100 consolidated net operating loss when determined by including only S's items of income, gain, deduction, and loss taken into account. Also for Year 1, S has $80 of interest income that is permanently excluded from gross income under section 103, and S incurs $60 of related expense for which a deduction is permanently disallowed under section 265.

(b) *Analysis.* Under paragraph (b)(3)(i)(A) of this section, S has a $100 tax loss for Year 1. Under paragraph (b)(3)(ii)(A) of this section, S has $80 of tax-exempt income. Under paragraph (b)(3)(iii)(A) of this section, S has $60 of noncapital, nondeductible expense. Under paragraph (b)(3)(iv)(C) of this section, the tax-exempt income and noncapital, nondeductible expense are taken into account in Year 1 because that is the year they would be taken into account under S's method of accounting if they were subject to Federal income taxation. Thus, under paragraph (b) of this section, P reduces its basis in S's stock as of the close of Year 1 by an $80 net amount (the $100 tax loss, less $80 of tax-exempt income, plus $60 of noncapital, nondeductible expenses).

Example 4. Discharge of indebtedness. (a) *Facts.* P forms S on January 1 of Year 1 and S borrows $200. During Year 1, S's assets decline in value and the P group has a $100 consolidated net operating loss when determined by including only S's items of income, gain, deduction, and loss taken into account. None of the loss is absorbed by the group in Year 1, and S is discharged from $100 of indebtedness at the close of Year 1. Under section 108(a), S's $100 of discharge of indebtedness income is excluded from gross income because of insolvency. Under section 108(b), S's $100 net operating loss is reduced to zero at the close of Year 1.

(b) *Analysis.* Under paragraph (b)(3)(iii)(B) of this section, the reduction of the net operating loss is treated as a noncapital, nondeductible expense in Year 1 because the net operating loss is permanently disallowed by section 108(b). Under paragraph (b)(3)(ii)(C) of this section, all $100 of S's discharge of indebtedness income is treated as tax-exempt income in Year 1 because the discharge results in a $100 reduction to S's net operating loss. Consequently, the loss and the cancellation of the indebtedness result in no net adjustment to P's basis in S's stock under paragraph (b) of this section. (If the basis of assets were reduced under section 1017, rather than S's loss, the reduction would not occur until the beginning of Year 2 and the discharge would not be treated as tax-exempt income until that time.)

(c) *Insufficient attributes.* The facts are the same as in paragraph (a) of this *Example 4*, except that $70 of S's net operating loss is absorbed in Year 1, offsetting P's income for that year, and the indebtedness is discharged at the beginning of Year 2. Under paragraph (b) of this section, the $70 of S's loss absorbed in Year 1 reduces P's basis in S's stock by $70 as of the close of Year 1. Under section 108(a), S's discharge of indebtedness income in Year 2 is excluded from the P group's gross income because of insolvency. Under section 108(b), the remaining $30 of S's net operating loss carryover from Year 1 is reduced to zero at the close of Year 2. No other attributes are reduced. Under paragraph (b)(3)(iii)(B) of this section, the elimination of the remaining $30 net operating loss by section 108(b) is treated as a noncapital, nondeductible expense. Under paragraph (b)(3)(ii)(C) of this section, only $30 of the discharge is treated as tax-exempt income because only that amount is applied to reduce tax attributes. See also §1.1502–19(c)(1)(iii) (taking into account any excess loss account of P in S's stock). The remaining $70 of discharge income excluded under section 108(a) has no effect on P's basis in S's stock.

(d) *Purchase price adjustment.* Assume instead that S buys land in Year 1 in exchange for S's $100 purchase money note (bearing interest at a market rate of interest in excess of the applicable Federal rate, and providing for a principal payment at the end of Year 10), and the seller agrees with S in Year 4 to discharge $60 of the note as a purchase price adjustment to which section 108(e)(5) applies. S has no discharge of indebtedness income that is treated as tax-exempt income under paragraph (b)(3)(ii) of this section. In addition, the $60 purchase price adjustment is not a noncapital, nondeductible expense under paragraph (b)(3)(iii) of this section. A purchase price adjustment is not equivalent to a discharge of indebtedness that is offset by a deduction or loss. Consequently, the purchase price adjustment results in no net adjustment to P's basis in S's stock under paragraph (b) of this section.

Example 5. Distributions. (a) *Amounts declared and distributed.* For Year 1, the P group has $120 of consolidated taxable income when determined by including only S's items of income, gain, deduction, and loss taken into account. S declares and makes a $10 dividend distribution to P at the close of Year 1. Under paragraph (b) of this section, P increases its basis in S's stock as of the close of Year 1 by a $110 net amount ($120 of taxable income, less a $10 distribution).

(b) *Distributions in later years.* The facts are the same as in paragraph (a) of this *Example 5*, except that S does not declare and distribute the $10 until Year 2. Under paragraph (b) of this section, P increases its basis in S's stock by $120 as of the close of Year 1, and decreases its basis by $10 as of the close of Year 2. (If P were also a subsidiary, the basis of its stock would also be increased in Year

1 to reflect P's $120 adjustment to basis of S's stock; the basis of P's stock would not be changed as a result of S's distribution in Year 2, because P's $10 of tax-exempt dividend income under paragraph (b)(3)(ii) of this section would be offset by the $10 negative adjustment to P's basis in S's stock for the distribution.)

(c) *Amounts declared but not distributed.* The facts are the same as in paragraph (a) of this *Example 5,* except that, during December of Year 1, S declares (and P becomes entitled to) another $70 dividend distribution with respect to its stock, but P does not receive the distribution until after it sells all of S's stock at the close of Year 1. Under §1.1502–13(f)(2)(iv), S is treated as making a $70 distribution to P at the time P becomes entitled to the distribution. (If S is distributing an appreciated asset, its gain under section 311 is also taken into account under paragraph (b)(3)(i) of this section at the time P becomes entitled to the distribution.) Consequently, under paragraph (b) of this section, P increases its basis in S's stock as of the close of Year 1 by only a $40 net amount ($120 of taxable income, less two distributions totalling $80). Any further adjustments after S ceases to be a member and the $70 distribution is made would be duplicative, because the stock basis has already been adjusted for the distribution. Accordingly, the distribution will not result in further adjustments or gain, even if the distribution is a payment to which section 301(c)(2) or (3) applies.

Example 6. Reorganization with boot. (a) *Facts.* P owns all of the stock of S and T. On January 1 of Year 1, P has a $100 basis in the S stock and a $60 basis in the T stock. S and T have no items of income, gain, deduction, or loss for Year 1. S and T each have substantial earnings and profits. At the close of Year 1, T merges into S in a reorganization described in section 368(a)(1)(A) (and in section 368(a)(1)(D)). P receives no additional S stock, but does receive $10 which is treated as a dividend under section 356(a)(2).

(b) *Analysis.* Under section 358, P's basis in the S stock is increased by its basis in the T stock. Under §1.1502–13(f)(3) the money received is treated as being taken into account immediately after the transaction. Thus, the $10 is treated as a dividend distribution under section 301 and under paragraph (b)(3)(v) of this section, the $10 is a distribution to which paragraph (b)(2)(iv) of this section applies. Accordingly, P's basis in the S stock is $160 immediately after the merger, which is then decreased by the $10 distribution taken into account immediately after the transaction, resulting in a basis of $150.

Example 7. Tiering up of basis adjustments. P owns all of S's stock, and S owns all of T's stock. For Year 1, the P group has $100 of consolidated taxable income when determined by including only T's items of income, gain, deduction, and loss taken into account, and $50 of consolidated taxable income when determined by including only S's items taken into account. S increases its basis in T's stock by $100 under paragraph (b) of this section. Under paragraph (a)(3) of this section, this $100 basis adjustment is taken into account in determining P's adjustments to its basis in S's stock. Thus, P increases its basis in S's stock by $150 under paragraph (b) of this section.

Example 8. Allocation of items. (a) *Acquisition in mid-year.* P is the common parent of a consolidated group, and S is an unaffiliated corporation filing separate returns on a calendar-year basis. P acquires all of S's stock and S becomes a member of the P group on July 1 of Year 1. For the entire calendar Year 1, S has $100 of ordinary income and under §1.1502–76(b) $60 is allocated to the period from January 1 to June 30 and $40 to the period from July 1 to December 31. Under paragraph (b) of this section, P increases its basis in S's stock by $40.

(b) *Sale in mid-year.* The facts are the same as in paragraph (a) of this *Example 8,* except that S is a member of the P group at the beginning of Year 1 but ceases to be a member on June 30 as a result of P's sale of S's stock. Under paragraph (b) of this section, P increases its basis in S's stock by $60 immediately before the stock sale. (P's basis increase would be the same if S became a nonmember because S issued additional shares to nonmembers.)

(c) *Absorption of loss carryovers.* Assume instead that S is a member of the P group at the beginning of Year 1 but ceases to be a member on June 30 as a result of P's sale of S's stock, and a $100 consolidated net operating loss attributable to S is carried over by the P group to Year 1. The consolidated net operating loss may be apportioned to S for its first separate return year only to the extent not absorbed by the P group during Year 1. Under paragraph (b)(3)(i) of this section, if the loss is absorbed by the P group in Year 1, whether the offsetting income arises before or after P's sale of S's stock, the absorption of the loss carryover is included in the determination of S's taxable income or loss for Year 1. Thus, P's basis in S's stock is adjusted under paragraph (b) of this section to reflect any absorption of the loss by the P group.

Example 9. Gross-ups. (a) *Facts.* P owns all of the stock of S, and S owns all of the stock of T, a newly formed controlled foreign corporation that is not a passive foreign investment company. In Year 1, T has $100 of subpart F income and pays $34 of foreign income tax, leaving T with $66 of earnings and profits. The P group has $100 of consolidated taxable income when determined by taking into account only S's items (the inclusion under section 951(a), taking into account the section 78 gross-up). As a result of the section

951(a) inclusion, S increases its basis in T's stock by $66 under section 961(a).

(b) *Analysis.* Under paragraph (b)(3)(i) of this section, S has $100 of taxable income. Under paragraph (b)(3)(iii)(B) of this section, the $34 gross-up for taxes paid by T that S is treated as having paid is a noncapital, nondeductible expense (whether or not any corresponding amount is claimed by the P group as a tax credit). Thus, P increases its basis in S's stock under paragraph (b) of this section by the net adjustment of $66.

(c) *Subsequent distribution.* The facts are the same as in paragraph (a) of this *Example 9,* except that T distributes its $66 of earnings and profits in Year 2. The $66 distribution received by S is excluded from S's income under section 959(a) because the distribution represents earnings and profits attributable to amounts that were included in S's income under section 951(a) for Year 1. In addition, S's basis in T's stock is decreased by $66 under section 961(b). The excluded distribution is not tax-exempt income under paragraph (b)(3)(ii) of this section because of the corresponding reduction to S's basis in T's stock. Consequently, P's basis in S's stock is not adjusted under paragraph (b) of this section for Year 2.

Example 10. Recapture of tax-exempt items. (a) *Facts.* S is a life insurance company. For Year 1, the P group has $200 of consolidated taxable income, determined by including only S's items of income, gain, deduction, and loss taken into account (including a $300 small company deduction under section 806). In addition, S has $100 of tax-exempt interest income, $60 of which is S's *company share.* The remaining $40 of tax-exempt income is the *policyholders' share* that reduces S's deduction for increase in reserves.

(b) *Tax-exempt items generally.* Under paragraph (b)(3)(i) of this section, S has $200 of taxable income for Year 1. Also for Year 1, S has $100 of tax-exempt income under paragraph (b)(3)(ii)(A) of this section, and another $300 is treated as tax-exempt income under paragraph (b)(3)(ii)(B) of this section because of the deduction under section 806. Under paragraph (b)(3)(iii) of this section, S has $40 of noncapital, nondeductible expenses for Year 1 because S's deduction under section 807 for its increase in reserves has been permanently reduced by the $40 policyholders' share of the tax-exempt interest income. Thus, P increases its basis in S's stock by $560 under paragraph (b) of this section.

(c) *Recapture.* Assume instead that S is a property and casualty company and, for Year 1, S accrues $100 of estimated salvage recoverable under section 832. Of this amount, $87 (87% of $100) is excluded from gross income because of the ''fresh start'' provisions of Sec. 11305(c) of P.L. 101–508 (the Omnibus Budget Reconciliation Act of 1990). Thus, S has $87 of tax-exempt income under paragraph (b)(3)(ii)(A) of this section that increases P's basis in S's stock for Year 1. (S also has $13 of taxable income over the period of inclusion under section 481.) In Year 5, S determines that the $100 salvage recoverable was overestimated by $30 and deducts $30 for the reduction of the salvage recoverable. However, S has $26.10 (87% of $30) of taxable income in Year 5 due to the partial recapture of its fresh start. Because S has no basis corresponding to this income, S is treated under paragraph (b)(3)(iii)(B) of this section as having a $26.10 noncapital, nondeductible expense in Year 5. This treatment is necessary to reflect the elimination of the erroneous fresh start in S's stock basis and causes a decrease in P's basis in S's stock by $30 for Year 5 (a $3.90 taxable loss and a $26.10 special adjustment).

(c) *Allocation of adjustments among shares of stock*—(1) *In general.* The portion of the adjustment under paragraph (b) of this section that is described in paragraph (b)(2)(iv) of this section (negative adjustments for distributions) is allocated to the shares of S's stock to which the distribution relates. The remainder of the adjustment, described in paragraphs (b)(2)(i) through (iii) of this section (adjustments for taxable income or loss, tax-exempt income, and noncapital, nondeductible expenses), is allocated among the shares of S's stock as provided in paragraphs (c)(2) through (4) of this section. If the remainder of the adjustment is positive, it is allocated first to any preferred stock to the extent provided in paragraph (c)(3) of this section, and then to the common stock as provided in paragraph (c)(2) of this section. If the remainder of the adjustment is negative, it is allocated only to common stock as provided in paragraph (c)(2) of this section. An adjustment under this section allocated to a share for the period the share is owned by a nonmember has no effect on the basis of the share. See paragraph (c)(4) of this section for the reallocation of adjustments, and paragraph (d) of this section for definitions. See §1.1502-19(d) for special allocations of basis determined or adjusted under the Code with respect to excess loss accounts.

(2) *Common stock*—(i) *Allocation within a class.* The portion of the adjustment described in paragraphs (b)(2)(i) through (iii) of this section (the adjustment determined without taking distributions into account) that is allocable to a class of common stock is

generally allocated equally to each share within the class. However, if a member has an excess loss account in shares of a class of common stock at the time of a positive adjustment, the portion of the adjustment allocable to the member with respect to the class is allocated first to equalize and eliminate that member's excess loss accounts and then to increase equally its basis in the shares of that class. Similarly, any negative adjustment is allocated first to reduce the member's positive basis in shares of the class before creating or increasing its excess loss account. Distributions and any adjustments or determinations under the Internal Revenue Code (e.g., under section 358, including any modifications under § 1.1502–19(d)) are taken into account before the allocation is made under this paragraph (c)(2)(i).

(ii) *Allocation among classes*—(A) *General rule.* If S has more than one class of common stock, the extent to which the adjustment described in paragraphs (b)(2)(i) through (iii) of this section (the adjustment determined without taking distributions into account) is allocated to each class is determined, based on consistently applied assumptions, by taking into account the terms of each class and all other facts and circumstances relating to the overall economic arrangement. The allocation generally must reflect the manner in which the classes participate in the economic benefit or burden (if any) corresponding to the items of income, gain, deduction, or loss allocated. In determining participation, any differences in voting rights are not taken into account, and the following factors are among those to be considered—

(*1*) The interest of each share in economic profits and losses (if different from the interest in taxable income);

(*2*) The interest of each share in cash flow and other non-liquidating distributions; and

(*3*) The interest of each share in distributions in liquidation.

(B) *Distributions and Code adjustments.* Distributions and any adjustments or determinations under the Internal Revenue Code are taken into account before the allocation is made under this paragraph (c)(2)(ii).

(3) *Preferred stock.* If the adjustment under paragraphs (b)(2)(i) through (iii) of this section (the adjustment determined without taking distributions into account) is positive, it is allocated to preferred stock to the extent required (when aggregated with prior allocations to the preferred stock during the period that S is a member of the consolidated group) to reflect distributions described in section 301 (and all other distributions treated as dividends) to which the preferred stock becomes entitled, and arrearages arising, during the period that S is a member of the consolidated group. For this purpose, the preferred stock is treated as entitled to a distribution no later than the time the distribution is taken into account under the Internal Revenue Code (e.g., under section 305). If the amount of distributions and arrearages exceeds the positive amount (when aggregated with prior allocations), the positive amount is first allocated among classes of preferred stock to reflect their relative priorities, and the amount allocated to each class is then allocated pro rata within the class. An allocation to a share with respect to arrearages and distributions for the period the share is owned by a nonmember is not reflected in the basis of the share under paragraph (b) of this section. However, if P and S cease to be members of one consolidated group and remain affiliated as members of another consolidated group, P's ownership of S's stock during consolidated return years of the prior group is treated for this purpose as ownership by a member to the extent that the adjustments during the prior consolidated return years are still reflected in the basis of the preferred stock.

(4) *Cumulative redetermination*—(i) *General rule.* A member's basis in each share of S's preferred and common stock must be redetermined whenever necessary to determine the tax liability of any person. See paragraph (b)(1) of this section. The redetermination is made by reallocating S's net adjustment described in paragraphs (b)(2)(i) through (iii) of this section (the adjustment determined without taking distributions into account) for each consolidated return year (or other applicable period) of the group by taking into

account all of the facts and circumstances affecting allocations under this paragraph (c) as of the redetermination date with respect to all of S's shares. For this purpose:

(A) Amounts may be reallocated from one class of S's stock to another class, but not from one share of a class to another share of the same class.

(B) If there is a change in the equity structure of S (e.g., as the result of S's issuance, redemption, or recapitalization of shares), a cumulative redetermination is made for the period before the change. If a reallocation is required by another redetermination after a change, amounts arising after the change are reallocated before amounts arising before the change.

(C) If S becomes a nonmember as a result of a change in its equity structure, any reallocation is made only among the shares of S's stock immediately before the change. For example, if S issues stock to a nonmember creditor in exchange for its debt, and the exchange results in S becoming a nonmember, any reallocation is only among the shares of S's stock immediately before the exchange.

(D) Any reallocation is treated for all purposes after it is made (including subsequent redeterminations) as the original allocation of an amount under this paragraph (c), but the reallocation does not affect any prior period.

(ii) *Prior use of allocations.* An amount may not be reallocated under paragraph (c)(4)(i) of this section to the extent that the amount has been used before the reallocation. For this purpose, an amount has been used to the extent it has been taken into account, directly or indirectly, by any member in determining income, gain, deduction, or loss, or in determining the basis of any property that is not subject to this section (e.g., stock of a corporation that has become a nonmember). For example, if P sells a share of S stock, an amount previously allocated to the share cannot be reallocated to another share of S stock, but an amount allocated to another share of S stock can still be reallocated to the sold share because the reallocated amount has not been taken into account; however, any adjustment reallocated to the sold share may effectively be eliminated, because the reallocation was not in effect when the share was previously sold and P's gain or loss from the sale is not redetermined. If, however, P sells the share of S stock to another member, the amount is not used until P's gain or loss is taken into account under §1.1502–13.

(5) *Examples.* The principles of this paragraph (c) are illustrated by the following examples.

Example 1. Ownership of less than all the stock. (a) *Facts.* P owns 80% of S's only class of stock with an $800 basis. For Year 1, S has $100 of taxable income.

(b) *Analysis.* Under paragraph (c)(1) of this section, the $100 positive adjustment under paragraph (b) of this section for S's taxable income is allocated among the shares of S's stock, including shares owned by nonmembers. Under paragraph (c)(2)(i) of this section, the adjustment is allocated equally to each share of S's stock. Thus, P increases its basis in S's stock under paragraph (b) of this section as of the close of Year 1 by $80. (The basis of the 20% of S's stock owned by nonmembers is not adjusted under this section.)

(c) *Varying interest.* The facts are the same as in paragraph (a) of this *Example 1,* except that P buys the remaining 20% of S's stock at the close of business on June 30 of Year 1 for $208. Under paragraph (b)(1) of this section and the principles of §1.1502–76(b), S's $100 of taxable income is allocable $40 to the period from January 1 to June 30 and $60 to the period from July 1 to December 31. Thus, for the period ending June 30, P is treated as having a $32 adjustment with respect to the S stock that P has owned since January 1 (80% of $40) and, under paragraph (c)(2)(i) of this section, the adjustment is allocated equally among those shares. For the period ending December 31, P is treated as having a $60 adjustment (100% of $60) that is also allocated equally among P's shares of S's stock owned after June 30. P's basis in the shares owned as of the beginning of the year therefore increases by $80 (the sum of 80% of $40 and 80% of $60), from $800 to $880, and P's basis in the shares purchased on June 30 increases by $12 (20% of $60), from $208 to $220. Thus, P's aggregate basis in S's stock as of the end of Year 1 is $1,100.

(d) *Tax liability.* The facts are the same as in paragraph (a) of this *Example 1,* except that P pays S's $34 share of the group's consolidated tax liability resulting from S's taxable income, and S does not reimburse P. S's $100 of taxable income results in a positive adjustment under paragraph (b)(3)(i) of this section, and S's $34 of tax liability results in a negative adjustment under paragraph (b)(3)(iv)(D) of this section and the principles of section 1552. Because S does not make any payment in recognition of the additional tax liability, by analogy to the treatment under § 1.1552–1(b)(2), S is treated as having made a $34 payment that is described in paragraph (b)(3)(iii) of this section (noncapital, nondeductible expenses) and as having received an equal amount from P as a capital contribution. Thus, P increases its basis in its S stock by $52.80 (80% of the $100 of taxable income, less 80% of the $34 tax payment). In addition, P increases its basis in S's stock by $34 under the Internal Revenue Code and paragraph (a)(2) of this section to reflect the capital contribution. In the aggregate, P increases its basis in S's stock by $86.80. (If, as in paragraph (c) of this *Example 1,* P buys the remaining 20% of S's stock at the close of business on June 30, P increases its basis in S's stock by another $7.90 for the additional 20% interest in S's income after June 30 ($60 multiplied by 20%, less 20% of the $20.40 tax payment on $60); the $34 capital contribution by P is reflected in all of its S shares (not just the original 80%), and P's aggregate basis adjustment under this section is $94.70 ($86.80 plus $7.90).)

Example 2. Preferred stock. (a) *Facts.* P owns all of S's common stock with an $800 basis, and nonmembers own all of S's preferred stock. The preferred stock was issued for $200, has a $20 annual, cumulative preference as to dividends, and has an initial liquidation preference of $200. For Year 1, S has $50 of taxable income and no distributions are declared or made.

(b) *Analysis of arrearages.* Under paragraphs (c) (1) and (3) of this section, $20 of the $50 positive adjustment under paragraph (b) of this section is allocated first to the preferred stock to reflect the dividend arrearage arising in Year 1. The remaining $30 of the positive adjustment is allocated to the common stock, increasing P's basis from $800 to $830 as of the close of Year 1. (The basis of the preferred stock owned by nonmembers is not adjusted under this section.)

(c) *Current distribution.* The facts are the same as in paragraph (a) of this *Example 2,* except that S declares and makes a $20 distribution with respect to the preferred stock during Year 1 in satisfaction of its preference. The results are the same as in paragraph (b) of this *Example 2.*

(d) *Varying interest.* The facts are the same as in paragraph (a) of this *Example 2,* except that S has no income or loss for Years 1 and 2, P purchases all of S's preferred stock at the beginning of Year 3 for $240, and S has $70 of taxable income for Year 3. Under paragraph (c)(3) of this section, $60 of the $70 positive adjustment under paragraph (b) of this section is allocated to the preferred stock to reflect the dividends arrearages for Years 1 through 3, but only the $20 for Year 3 is reflected in the basis of the preferred stock under paragraph (b) of this section. (The remaining $40 is not reflected because the preferred stock was owned by nonmembers during Years 1 and 2.) Thus, P increases its basis in S's preferred stock from $240 to $260, and its basis in S's common stock from $800 to $810, as of the close of Year 3. (If P had acquired all of S's preferred stock in a transaction to which section 351 applies, and P's initial basis in S's preferred stock was $200 under section 362, P's basis in S's preferred stock would increase from $200 to $220.)

(e) *Varying interest with current distributions.* The facts are the same as in paragraph (d) of this *Example 2,* except that S declares and makes a $20 distribution with respect to the preferred stock in each of Years 1 and 2 in satisfaction of its preference, and P purchases all of S's preferred stock at the beginning of Year 3 for $200. Under paragraph (c)(3) of this section, $40 of the $70 positive adjustment under paragraph (b) of this section is allocated to the preferred stock to reflect the distributions in Years 1 and 2, and $20 of the $70 is allocated to the preferred stock to reflect the arrearage for Year 3. However, as in paragraph (d) of this *Example 2,* only the $20 attributable to Year 3 is reflected in the basis of the preferred stock under paragraph (b) of this section. Thus, P increases its basis in S's preferred stock from $200 to $220, and P increases its basis in S's common stock from $800 to $810.

Example 3. Cumulative redetermination. (a) *Facts.* P owns all of S's common and preferred stock. The preferred stock has a $100 annual, cumulative preference as to dividends. For Year 1, S has $200 of taxable income, the first $100 of which is allocated to the preferred stock and the remaining $100 of which is allocated to the common stock. For Year 2, S has no adjustment under paragraph (b) of this section, and P sells all of S's common stock at the close of Year 2.

(b) *Analysis.* Under paragraph (c)(4) of this section, P's basis in S's common stock must be redetermined as of the sale of the stock. The redetermination is made by reallocating the $200 positive adjustment under paragraph (b) of this section for Year 1 by taking into account all of the facts and circumstances affecting allocations as of the sale. Thus, the $200 positive adjustment for Year 1 is reallocated entirely to the preferred stock to reflect the dividend arrearages for Years 1 and 2. The reallocation away from the common stock reflects the fact that, because of the additional amount of arrearage in Year 2, the common stock is not entitled to any part of the $200 of taxable income from Year 1. Thus, the common stock has no positive or negative adjustment, and the preferred stock has a $200 positive adjustment. These reallocations are treated as the original allocations for Years 1 and 2. (The results for the common stock would be the same if the common and preferred stock were not owned by the same member, or the preferred stock were owned by nonmembers.)

(c) *Preferred stock issued after adjustment arises.* The facts are the same as in paragraph (a) of this *Example 3,* except that S does not issue its preferred stock until the beginning of Year 2, S has no further adjustment under paragraph (b) of this section for Years 2 and 3, and P sells S's common stock at the close of Year 3. Under paragraphs (c) (1) and (2) of this section, the $200 positive adjustment for Year 1 is initially allocated entirely to the common stock. Under paragraph (c)(4) of this section, the $200 adjustment is reallocated to the preferred stock to reflect the arrearages for Years 2 and 3. Thus, the common stock has no positive or negative adjustment.

(d) *Common stock issued after adjustment arises.* The facts are the same as in paragraph (a) of this *Example 3,* except that S has no preferred stock, S issues additional common stock of the same class at the beginning of Year 2, S has no further adjustment under paragraph (b) of this section in Years 2 and 3, and P sells its S common stock at the close of Year 3. Under paragraphs (c) (1) and (2) of this section, the $200 positive adjustment for Year 1 is initially allocated entirely to the original common stock. Under paragraph (c)(4)(i)(A) of this section, the $200 adjustment is not reallocated among the original common stock and the additional stock. Unlike the preferred stock in paragraph (c) of this *Example 3,* the additional common stock is of the same class as the original stock, and there is no reallocation between shares of the same class.

(e) *Positive and negative adjustments.* The facts are the same as in paragraph (a) of this *Example 3,* except that S has a $200 loss for Year 2 that results in a negative adjustment to the common stock before any redetermination. For purposes of the basis redetermination under paragraph (c)(4) of this section, the Year 1 and 2 adjustments under paragraph (b) of this section are not netted. Thus, as in paragraph (b) of this *Example 3,* the redetermination is made by reallocating the $200 positive adjustment for Year 1 entirely to the preferred stock. The $200 negative adjustment for Year 2 is allocated entirely to the common stock. Consequently, the preferred stock has a $200 positive cumulative adjustment, and the common stock has a $200 negative cumulative adjustment. (The results would be the same if there were no other adjustments described in paragraph (b) of this section, P sells S's common stock at the close of Year 3 rather than Year 2, and an additional $100 arrearage arises in Year 3; only adjustments under paragraph (b) of this section may be reallocated, and there is no additional adjustment for Year 3.)

(f) *Current distributions.* The facts are the same as in paragraph (a) of this *Example 3,* except that, during Year 1, S declares and makes a distribution to P of $100 as a dividend on the preferred stock and $100 as a dividend on the common stock. The taxable income and distributions result in no Year 1 adjustment under paragraph (b) of this section for either the common or preferred stock. For example, if T merges into S, S is treated, as the context may require, as a successor to T and as becoming a member of the group. However, as in paragraph (b) of this *Example 3,* the redetermination under paragraph (c)(4) of this section is made by reallocating a $200 positive adjustment for Year 1 (S's net adjustment described in paragraph (b) of this section, determined without taking distributions into account) to the preferred stock. Consequently, the preferred stock has a $100 positive cumulative adjustment ($200 of taxable income, less a $100 distribution with respect to the preferred stock) and the common stock has a $100 negative cumulative adjustment (for the distribution).

(g) *Convertible preferred stock.* The facts are the same as in paragraph (a) of this *Example 3,* except that the preferred stock is convertible into common stock that is identical to the common stock already outstanding, the holders of the preferred stock convert the stock at the close of Year 2, and no stock is sold until the close of Year 5. Under paragraph (c)(4) of this section, the $200 positive adjustment for Year 1 is reallocated entirely to the preferred stock immediately before the conversion. The newly issued common stock is treated as a second class of S common stock, and adjustments under paragraph (b) of this section are allocated between the original and the new common stock under paragraph (c)(2)(ii) of this section. Although the preferred stock is converted to common stock, the $200 adjustment to the preferred stock is not subsequently reallocated between the original and the new common stock. Because the original and the new stock are equivalent, adjustments under paragraph (b) of this section for subsequent periods are allocated equally to each share.

(h) *Prior use of allocations.* The facts are the same as in paragraph (a) of this *Example 3,* except that P sells 10% of S's common stock at the close of Year 1, and the remaining 90% at the close of Year 2. P's basis in the common stock sold in Year 1 reflects $10 of the adjustment allocated to the common stock for Year 1. Under paragraph (c)(4)(ii) of this section, because $10 of the Year 1 adjustment was used in determining P's gain or loss, only $90 is reallocated to the preferred stock, and $10 remains allocated to the common stock sold.

(i) *Lower-tier members.* The facts are the same as in paragraph (a) of this *Example 3,* except that P owns only S's common stock, and P is also a subsidiary. If there is a redetermination under paragraph (c)(4) of this section by a member owning P's stock, a redetermination with respect to S's stock must be made first, and the effect of that redetermination on P's adjustments is taken into account under paragraph (b) of this section. However, as in paragraph (h) of this *Example 3,* to the extent an amount of the initial adjustments with respect to S's common stock have already been tiered up and used by a member owning P's stock, that amount remains with S's common stock (and the higher-tier member using the adjustment with respect to P's stock), and may not be reallocated to S's preferred stock.

Example 4. Allocation to preferred stock between groups. (a) *Facts.* P owns all of S's only class of stock, and S owns all of T's common and preferred stock. The preferred stock has a $100 annual, cumulative preference as to dividends. For Year 1, T has $200 of taxable income, the first $100 of which is allocated to the preferred stock and the remaining $100 of which is allocated to the common stock, and S has no adjustments other than the amounts tiered up from T. S and T have no adjustments under paragraph (b) of this section for Years 2 and 3. X, the common parent of another consolidated group, purchases all of S's stock at the close of Year 3, and S and T become members of the X group. For Year 4, T has $200 of taxable income, and S has no adjustments other than the amounts tiered up from T.

(b) *Analysis for Years 1 through 3.* Under paragraph (c)(4) of this section, the allocation of S's adjustments under paragraph (b) of this section (determined without taking distributions into account) must be redetermined as of the time P sells S's stock. As a result of this redetermination, T's common stock has no positive or negative adjustment and the preferred stock has a $200 positive adjustment.

(c) *Analysis for Year 4.* Under paragraph (c)(3) of this section, the allocation of T's $200 positive adjustment in Year 4 to T's preferred stock with respect to arrearages is made by taking into account the consolidated return years of both the P group and the X group. Thus, the allocation of the $200 positive adjustment for Year 4 to T's preferred stock is not treated as an allocation for a period for which the preferred stock is owned by a nonmember. Thus, the $200 adjustment is reflected in S's basis in T's preferred stock under paragraph (b) of this section.

(d) *Definitions.* For purposes of this section—

(1) *Class.* The shares of a member having the same material terms (without taking into account voting rights) are treated as a single class of stock.

(2) *Preferred stock.* Preferred stock is stock that is limited and preferred as to dividends and has a liquidation preference. A class of stock that is not described in section 1504(a)(4), however, is not treated as preferred stock for purposes of paragraph (c) of this section if members own less than 80% of each class of common stock (determined without taking this paragraph (d)(2) into account).

(3) *Common stock.* Common stock is stock that is not preferred stock.

(4) *Becoming a nonmember.* A member is treated as becoming a nonmember if it has a separate return year (including another group's consolidated return year). For example, S may become a nonmember if it issues additional stock to nonmembers, but S does not become a nonmember as a result of its complete liquidation.

(e) *Anti-avoidance rule*—(1) *General rule.* If any person acts with a principal purpose contrary to the purposes of this section, to avoid the effect of the rules of this section or apply the rules of this section to avoid the effect of any other provision of the consolidated return regulations, adjustments must be made as necessary to carry out the purposes of this section.

(2) *Examples.* The principles of this paragraph (e) are illustrated by the following examples.

Example 1. Preferred stock treated as common stock. (a) *Facts.* S has 100 shares of common stock and 100 shares of preferred stock described in section 1504(a)(4). P owns 80 shares of S's common stock and all of S's preferred stock. The shareholders expect that S will have negative adjustments under paragraph (b) of this section for Years 1 and 2 (all of which will be allocable to S's common stock), the negative adjustments will have no significant effect on the value of S's stock, and S will have offsetting positive adjustments thereafter. When the preferred stock was issued, P intended to cause S to recapitalize the preferred stock into additional common stock at the end of Year 2 in a transaction described in section 368(a)(1)(E). P's temporary ownership of the preferred stock is with a principal purpose to limit P's basis reductions under paragraph (b) of this section to 80% of the anticipated negative adjustments. The recapitalization is intended to cause significantly more than 80% of the anticipated positive adjustments to increase P's basis in S's stock because of P's increased ownership of S's common stock immediately after the recapitalization.

(b) *Analysis.* S has established a transitory capital structure with a principal purpose to enhance P's basis in S's stock under this section. Under paragraph (e)(1) of this section, all of S's common and preferred stock is treated as a single class of common stock in

Years 1 and 2 for purposes of this section. Thus, S's items are allocated under the principles of paragraph (c)(2)(ii) of this section, and P decreases its basis in both the common and preferred stock accordingly.

Example 2. Contribution of appreciated property. (a) *Facts.* P owns all of the stock of S and T, and S and T each own 50% of the stock of U. P's S stock has a $150 basis and $200 value, and P's T stock has a $200 basis and $200 value. With a principal purpose to eliminate P's gain from an anticipated sale of S's stock, T contributes to U an asset with a $100 value and $0 basis, and S contributes $100 cash. U sells T's asset and recognizes a $100 gain that results in a $100 positive adjustment under paragraph (b) of this section.

(b) *Analysis.* Under paragraph (c)(2) of this section, U's adjustment ordinarily would be allocated equally to each share of U's stock. If so allocated, P's basis in S's stock would increase from $150 to $200 and P would recognize no gain from the sale of S's stock for $200. Under paragraph (e)(1) of this section, however, because T transferred an appreciated asset to U with a principal purpose to shift a portion of the stock basis increase from P's stock in T to P's stock in S, the allocation of the $100 positive adjustment under paragraph (c) of this section between the shares of U's stock must take into account the contribution. Consequently, all $100 of the positive adjustment is allocated to the U stock owned by T, rather than $50 to the U stock owned by S and $50 to the U stock owned by T. P's basis in S's stock remains $150, and its basis in T's stock increases to $300. Thus, P recognizes a $50 gain from its sale of S's stock for $200.

Example 3. Reorganizations. (a) *Facts.* P forms S with an $800 contribution, $200 of which is in exchange for S's preferred stock described in section 1504(a)(4) and the balance of which is for S's common stock. For Years 1 through 3, S has a total of $160 of ordinary income, $60 of which is distributed with respect to the preferred stock in satisfaction of its $20 annual preference as to dividends. Under this section, P's basis in S's preferred stock is unchanged, and its basis in S's common stock is increased from $600 to $700. To reduce its gain from an anticipated sale of S's preferred stock, P forms T at the close of Year 3 with a contribution of all of S's stock in exchange for corresponding common and preferred stock of T in a transaction to which section 351 applies. At the time of the contribution, the fair market value of the common stock is $700 and the fair market value of the preferred stock is $300 (due to a decrease in prevailing market interest rates). P subsequently sells T's preferred stock for $300.

(b) *Analysis.* Under section 358(b), P ordinarily has a $630 basis in T's common stock (70% of the $900 aggregate stock basis) and a $270 basis in T's preferred stock (30% of the $900 aggregate stock basis). However, because P transferred S's stock to T with a principal purpose to shift the allocation of basis adjustments under this section, adjustments are made under paragraph (e)(1) of this section to preserve the allocation under this section. Thus, P has a $700 basis in T's common stock and a $200 basis in T's preferred stock. Consequently, P recognizes a $100 gain from the sale of T's preferred stock.

Example 4. Post-deconsolidation basis adjustments. (a) *Facts.* For Year 1, the P group has $40 of taxable income when determined by including only S's items of income, gain, deduction, and loss taken into account, and P increases its basis in S's stock by $40 under paragraph (b) of this section. P anticipates that S will have a $40 ordinary loss for Year 2 that will be carried back and offset S's income in Year 1 and result in a $40 reduction to P's basis in S's stock for Year 2 under paragraph (b) of this section. With a principal purpose to avoid the reduction, P causes S to issue voting preferred stock that results in S becoming a nonmember at the beginning of Year 2. (Section 1.1502–20(b) does not reduce P's basis in the S stock as a result of S's deconsolidation.) As anticipated, S has a $40 loss for Year 2, which is carried back to Year 1 and offsets S's income from Year 1.

(b) *Analysis.* Under paragraph (e)(1) of this section, because P caused S to become a nonmember with a principal purpose to absorb S's loss but avoid the corresponding negative adjustment under this section, and P bears a substantial portion of the loss because of its continued ownership of S common stock, the basis of P's common stock in S is decreased by $40 for Year 2. (If P has less than a $40 basis in the retained S stock, P must recognize income for Year 2 to the extent of the excess.) Section 1504(a)(3) limits the ability of S to subsequently rejoin the P group's consolidated return.

(c) *Carryback to pre-consolidation year.* The facts are the same as in paragraph (a) of this *Example 4*, except that P anticipates that S's loss will be carried back and absorbed in a separate return year of S before Year 1 (rather than to the P group's consolidated return for Year 1). Although P causes S to become a nonmember with a principal purpose to avoid the negative adjustment under this section, and P bears a substantial portion of the loss because of its continued ownership of S common stock, both S's income and loss are taken into account under the separate return rules. Consequently, no one has acted with a principal purpose contrary to the purposes of this section, and no adjustments are necessary to carry out the purposes of this section.

Example 5. Pre-consolidation basis adjustments. (a) *Facts.* P forms S with a $100 contribution, and S becomes a member of the P affiliated group which does not file consolidated returns. For Years 1 through 3, S earns $300. P anticipates that it will elect under section 1501 for the P group to begin filing consolidated returns in Year 5. In anticipation of filing consolidated returns, and to avoid the negative stock basis adjustment that would result under paragraph (b) of this section from distributing S's earnings after Year 5, P causes S to distribute $300 during Year 4 as a qualifying dividend within the meaning of section 243(b). There is no plan or intention to recontribute the funds to S after the distribution.

(b) *Analysis.* Although S's distribution of $300 is with a principal purpose to avoid a corresponding negative adjustment under this section, the $300 was both earned and distributed entirely under the separate return rules. Consequently, P and S have not acted with a principal purpose contrary to the purposes of this section, and no adjustments are necessary to carry out the purposes of this section.

(f) *Predecessors and successors.* For purposes of this section, any reference to a corporation or to a share of stock includes a reference to a successor or predecessor as the context may require. A corporation is a successor if the basis of its assets is determined, directly or indirectly, in whole or in part, by reference to the basis of another corporation (the predecessor). For example, if T merges into S, S is treated, as the context may require, as a successor to T and as becoming a member of the group. A share is a successor if its basis is determined, directly or indirectly, in whole or in part, by reference to the basis of another share (the predecessor).

(g) *Recordkeeping.* Adjustments under this section must be reflected annually on permanent records (including work papers). See also section 6001, requiring records to be maintained. The group must be able to identify from these permanent records the amount and allocation of adjustments, including the nature of any tax-exempt income and noncapital, nondeductible expenses, so as to permit the application of the rules of this section for each year.

(h) *Effective date*—(1) *General rule.* This section applies with respect to determinations of the basis of the stock of a subsidiary (e.g., for determining gain or loss from a disposition of stock) in consolidated return years beginning on or after January 1, 1995. If this section applies, basis must be determined or redetermined as if this section were in effect for all years (including, for example, the consolidated return years of another consolidated group to the extent adjustments from those years are still reflected). For example, if the portion of a consolidated net operating loss carryover attributable to S expired in 1990 and is treated as a noncapital, nondeductible expense under paragraph (b) of this section, it is taken into account in tax years beginning on or after January 1, 1995 as a negative adjustment for 1990. Any such determination or redetermination does not, however, affect any prior period. Thus, the negative adjustment for S's noncapital, nondeductible expense is not taken into account for tax years beginning before January 1, 1995.

(2) *Dispositions of stock before effective date*—(i) *In general.* If P disposes of stock of S in a consolidated return year beginning before January 1, 1995, the amount of P's income, gain, deduction, or loss, and the basis reflected in that amount, are not redetermined under this section. See § 1.1502–19 as contained in the 26 CFR part 1 edition revised as of April 1, 1994 for the definition of disposition, and paragraph (h)(5) of this section for the rules applicable to such dispositions.

(ii) *Lower-tier members.* Although P disposes of S's stock in a tax year beginning before January 1, 1995, S's determinations or adjustments with respect to the stock of a lower-tier member with which it continues to file a consolidated return are redetermined in accordance with the rules of this section (even if they were previously taken into account by P and reflected in income, gain, deduction, or loss from the disposition of S's stock). For example, assume that P owns all of S's stock, S owns all of T's stock, and T owns all of U's stock. If S sells 80% of T's stock in a tax year beginning before January 1, 1995 (the effective date), the amount of S's income, gain, deduction, or loss from the sale, and the stock basis adjustments reflected in that amount, are not redetermined if P sells S's stock after the effective date. If S sells the remaining 20% of T's stock after the effective date, S's stock basis adjustments with respect to that

T stock are also not redetermined because T became a nonmember before the effective date. However, if T and U continue to file a consolidated return with each other and T sells U's stock after the effective date, T's stock basis adjustments with respect to U's stock are redetermined (even though some of those adjustments may have been taken into account by S in its prior sale of T's stock before the effective date).

(iii) *Deferred amounts.* For purposes of this paragraph (h)(2), a disposition does not include a transaction to which §1.1502–13, §1.1502–13T, §1.1502–14, or §1.1502–14T applies. Instead, the transaction is deemed to occur as the income, gain, deduction, or loss (if any) is taken into account.

(3) *Distributions*—(i) *Deemed dividend elections.* If there is a deemed distribution and recontribution pursuant to §1.1502–32(f)(2) as contained in the 26 CFR part 1 edition revised as of April 1, 1994 in a consolidated return year beginning before January 1, 1995, the deemed distribution and recontribution under the election are treated as an actual distribution by S and recontribution by P as provided under the election.

(ii) *Affiliated earnings and profits.* This section does not apply to reduce the basis in S's stock as a result of a distribution of earnings and profits accumulated in separate return years, if the distribution is made in a consolidated return year beginning before January 1, 1995, and the distribution does not cause a negative adjustment under the investment adjustment rules in effect at the time of the distribution. See paragraph (h)(5) of this section for the rules in effect with respect to the distribution.

(4) *Expiring loss carryovers.* If S became a member of a consolidated group in a consolidated return year beginning before January 1, 1995, and S had a loss carryover from a separate return limitation year at that time, the group does not treat any expiration of the loss carryover (even if in a tax year beginning on or after January 1, 1995) as a noncapital, nondeductible expense resulting in a negative adjustment under this section. If S becomes a member of a consolidated group in a consolidated return year beginning on or after January 1, 1995, and S has a loss carryover from a separate return limitation year at that time, adjustments with respect to the expiration are determined under this section.

(5) *Prior law*—(i) *In general.* For prior determinations, see prior regulations under section 1502 as in effect with respect to the determination. See, e.g., §§1.1502–32 and 1.1502–32T as contained in the 26 CFR part 1 edition revised as of April 1, 1994.

(ii) *Continuing basis reductions for certain deconsolidated subsidiaries.* If a subsidiary ceases to be a member of a group in a consolidated return year beginning before January 1, 1995, and its basis was subject to reduction under §1.1502–32T or §1.1502–32(g) as contained in the 26 CFR part 1 edition revised as of April 1, 1994, its basis remains subject to reduction under those principles. For example, if S ceased to be a member in 1990, and P's basis in any retained S stock was subject to a basis reduction account, the basis remains subject to reduction. Similarly, if an election could be made to apply §1.1502–32T instead of §1.1502–32(g), the election remains available. However, §§1.1502–32T and 1.1502–32(g) do not apply as a result of a subsidiary ceasing to be a member in tax years beginning on or after January 1, 1995.

[T.D. 8560, 59 FR 41685, Aug. 15, 1994, as amended by T.D. 8677, 61 FR 33323, June 27, 1996; T.D. 8560, 62 FR 12098, Mar. 14, 1997]

§1.1502–33 Earnings and profits.

(a) *In general*—(1) *Purpose.* This section provides rules for adjusting the earnings and profits of a subsidiary (S) and any member (P) owning S's stock. These rules modify the determination of P's earnings and profits under applicable rules of law, including section 312, by adjusting P's earnings and profits to reflect S's earnings and profits for the period that S is a member of the consolidated group. The purpose for modifying the determination of earnings and profits is to treat P and S as a single entity by reflecting the earnings and profits of lower-tier members in the earnings and profits of higher-tier members and consolidating the group's earnings and profits in the common parent. References in this section to earnings and profits include deficits in earnings and profits.

(2) *Application of other rules of law.* The rules of this section are in addition to other rules of law. For example, the allowance for depreciation is determined in accordance with section 312(k). P's earnings and profits must not be adjusted under this section and other rules of law in a manner that has the effect of duplicating an adjustment. For example, if S's earnings and profits are reflected in P's earnings and profits under paragraph (b) of this section, and S transfers its assets to P in a liquidation to which section 332 applies, S's earnings and profits that P succeeds to under section 381 must be adjusted to prevent duplication.

(b) *Tiering up earnings and profits*—(1) *General rule.* P's earnings and profits are adjusted under this section to reflect changes in S's earnings and profits in accordance with the applicable principles of § 1.1502–32, consistently applied, and an adjustment to P's earnings and profits for a tax year under this paragraph (b)(1) is treated as earnings and profits of P for the tax year in which the adjustment arises. Under these principles, for example, the adjustments are made as of the close of each consolidated return year, and as of any other time if a determination at that time is necessary to determine the earnings and profits of any person. Similarly, S's earnings and profits are allocated under the principles of § 1.1502–32(c), and the adjustments are applied in the order of the tiers, from the lowest to the highest. However, modifications to the principles include:

(i) The amount of P's adjustment is determined by reference to S's earnings and profits, rather than S's taxable and tax-exempt items (and therefore, for example, the deferral of a negative adjustment for S's unabsorbed losses does not apply).

(ii) The tax sharing rules under paragraph (d) of this section apply rather than those of § 1.1502–32(b)(3)(iv)(D).

(2) *Affiliated earnings and profits.* The reduction in S's earnings and profits under section 312 from a distribution of earnings and profits accumulated in separate return years of S that are not separate return limitation years does not tier up to P's earnings and profits. Thus, the increase in P's earnings and profits under section 312 from receipt of the distribution is not offset by a corresponding reduction.

(3) *Examples*—(i) *In general.* For purposes of the examples in this section, unless otherwise stated, P owns all of the only class of S's stock, the stock is owned for the entire year, S owns no stock of lower-tier members, the tax year of all persons is the calendar year, all persons use the accrual method of accounting, the facts set forth the only corporate activity, preferred stock is described in section 1504(a)(4), all transactions are between unrelated persons, and tax liabilities are disregarded.

(ii) *Tiering up earnings and profits.* The principles of this paragraph (b) are illustrated by the following examples.

Example 1. Tier-up and distribution of earnings and profits. (a) *Facts.* P forms S in Year 1 with a $100 contribution. S has $100 of earnings and profits for Year 1 and no earnings and profits for Year 2. During Year 2, S declares and distributes a $50 dividend to P.

(b) *Analysis.* Under paragraph (b)(1) of this section, S's $100 of earnings and profits for Year 1 increases P's earnings and profits for Year 1. P has no additional earnings and profits for Year 2 as a result of the $50 distribution in Year 2, because there is a $50 increase in P's earnings and profits as a result of the receipt of the dividend and a corresponding $50 decrease in S's earnings and profits under section 312(a) that is reflected in P's earnings and profits under paragraph (b)(1) of this section.

(c) *Distribution of current earnings and profits.* The facts are the same as in paragraph (a) of this *Example 1,* except that S distributes the $50 dividend at the end of Year 1 rather than during Year 2. Under paragraph (b)(1) of this section, P's earnings and profits are increased by $100 (S's $50 of undistributed earnings and profits, plus P's receipt of the $50 distribution). Thus, S's earnings and profits increase by $50 and P's earnings and profits increase by $100.

(d) *Affiliated earnings and profits.* The facts are the same as in paragraph (a) of this *Example 1,* except that P and S do not begin filing consolidated returns until Year 2. Because P and S file separate returns for Year 1, P's basis in S's stock remains $100 under § 1.1502–32 and this section, S has $100 of earnings and profits, and none of S's earnings and profits is reflected in P's earnings and profits under paragraph (b) of this section. S's distribution in Year 2 ordinarily would reduce S's earnings and profits but not increase P's earnings and profits. (P's $50 of earnings and profits from the dividend would be offset by S's $50 reduction in earnings and profits that tiers up under paragraph (b) of this section.) However, under paragraph (b)(2) of this section, the negative adjustment for S's distribution to P does not apply. Thus, S's distribution reduces its earnings and profits by $50 but increases P's earnings and profits by $50. (If S's earnings and profits had been accumulated in a separate return limitation year, paragraph (b)(2) of this section would not apply and the distribution would reduce S's earnings and profits but not increase P's earnings and profits.)

(e) *Earnings and profits deficit.* Assume instead that after P forms S in Year 1 with a $100 contribution, S borrows additional funds and has a $150 deficit in earnings and profits for Year 1. The corresponding loss for tax purposes is not absorbed in Year 1, and is included in the group's consolidated net operating loss carried forward to Year 2. Under paragraph (b)(1) of this section, however, S's $150 deficit in earnings and profits decreases P's earnings and profits for Year 1 by $150. (Absorption of the loss in a later tax year has no effect on the earnings and profits of P and S.)

Example 2. Section 355 distribution. (a) *Facts.* P owns all of S's stock and S owns all of T's stock. For Year 1, T has $100 of earnings and profits. Under paragraph (b)(1) of this section, the earnings and profits of T tier up to S and to P. S and P have no other earnings and profits for Year 1. S distributes T's stock to P at the end of Year 1 in a distribution to which section 355 applies.

(b) *Analysis.* Because S's distribution of T's stock is a distribution to which section 355 applies, the applicable principles of §1.1502–32(b)(2)(iv) do not require P's earnings and profits to be adjusted by reason of the distribution. In addition, although S's earnings and profits may be reduced under section 312(h) as a result of the distribution, the applicable principles of §1.1502–32(b)(3)(iii) do not require P's earnings and profits to be adjusted to reflect this reduction in S's earnings and profits.

Example 3. Allocating earnings and profits among shares. P owns 80% of S's stock throughout Year 1. For Year 1, S has $100 of earnings and profits. Under paragraph (b)(1) of this section, $80 of S's earnings and profits is allocated to P based on P's ownership of S's stock. Accordingly, $80 of S's earnings and profits for Year 1 is reflected in P's earnings and profits for Year 1.

(c) *Special rules.* For purposes of this section—

(1) *Stock of members.* For purposes of determining P's earnings and profits from the disposition of S's stock, P's basis in S's stock is adjusted to reflect S's earnings and profits determined under paragraph (b) of this section, rather than under §1.1502–32. For example, P's basis in S's stock is increased by positive earnings and profits and decreased by deficits in earnings and profits. Similarly, P's basis in S's stock is not reduced for distributions to which paragraph (b)(2) of this section applies (affiliated earnings and profits). P may have an excess loss account in S's stock for earnings and profits purposes (whether or not there is an excess loss account under §1.1502–32), and the excess loss account is determined, adjusted, and taken into account in accordance with the principles of §§1.1502–19 and 1.1502–32.

(2) *Intercompany transactions.* Intercompany items and corresponding items are not reflected in earnings and profits before they are taken into account under §1.1502–13. See §1.1502–13 for the applicable rules and definitions.

(3) *Example.* The principles of this paragraph (c) are illustrated by the following example.

Example. Adjustments to stock basis. (a) *Facts.* P forms S in Year 1 with a $100 contribution. For Year 1, S has $75 of taxable income and $100 of earnings and profits. For Year 2, S has no taxable income or earnings and profits, and S declares and distributes a $50 dividend to P. P sells all of S's stock for $150 at the end of Year 2.

(b) *Analysis.* Under paragraph (c)(1) of this section, P's basis in S's stock for earnings and profits purposes immediately before the sale is $150 (the $100 initial basis, plus S's $100 of earnings and profits for Year 1, minus the $50 distribution of earnings and profits in Year 2). Thus, P recognizes no gain or loss from the sale of S's stock for earnings and profits purposes.

(c) *Earnings and profits deficit.* Assume instead that S has a $100 tax loss and earnings and profits deficit for Year 1. The tax loss is not absorbed in Year 1 and is included in the group's consolidated net operating loss carried forward to Year 2. Under paragraph (b) of this section, S's $100 deficit in earnings and profits decreases P's earnings and profits for Year 1. Under paragraph (c) of this section, P decreases its basis in S's stock for purposes of determining earnings and profits from $100 to $0. (If S had borrowed an additional $50 that it also lost in Year 1, P would have decreased its earnings and profits for Year 1 by the additional $50, and P would have had a $50 excess loss account in S's stock for earnings and profits purposes, which would be taken into account in determining P's earnings and profits from its sale of S's stock.)

(d) *Affiliated earnings and profits.* Assume instead that P and S do not begin filing consolidated returns until Year 2. Under paragraph (b) of this section, the negative adjustment under § 1.1502–32(b) for distributions does not apply to S's distribution of earnings and profits accumulated in a separate return year that is a not separate return limitation year. Thus, P's basis in S's stock for earnings and profits purposes remains $100, and P has $50 of earnings and profits from the sale of S's stock.

(d) *Federal income tax liability*—(1) *In general*—(i) *Extension of tax allocations.* Section 1552 allocates the tax liability of a consolidated group among its members for purposes of determining the amounts by which their earnings and profits are reduced for taxes. Section 1552 does not reflect the absorption by one member of another member's tax attributes (e.g., losses, deductions and credits). For example, if P's $100 of income is offset by S's $100 of deductions, consolidated tax liability is $0 and no amount is allocated under section 1552. However, the group may elect under this paragraph (d) to allocate additional amounts to reflect the absorption by one member of the tax attributes of another member. Permissible methods are set forth in paragraphs (d)(2) through (4) of this section, and election procedures are provided in paragraph (d)(5) of this section. Allocations under this paragraph (d) must be reflected annually on permanent records (including work papers). Any computations of separate return tax liability are subject to the principles of section 1561.

(ii) *Effect of extended tax allocations.* The amounts allocated under this paragraph (d) are treated as allocations of tax liability for purposes of § 1.1552–1(b)(2). For example, if P's taxable income is offset by S's loss, and tax liability is allocated under the percentage method of paragraph (d)(3) of this section, P's earnings and profits are reduced as if its income were subject to tax, P is treated as liable to S for the amount of the tax, and corresponding adjustments are made to S's earnings and profits. If the liability of one member to another is not paid, the amount not paid generally is treated as a distribution, contribution, or both, depending on the relationship between the members.

(2) *Wait-and-see method.* The wait-and-see method under this paragraph (d)(2) is derived from Securities and Exchange Commission procedures. In the year that a member's tax attribute is absorbed, the group's consolidated tax liability is allocated in accordance with the group's method under section 1552. When, in effect, the member with the tax attribute could have absorbed the attribute on a separate return basis in a later year, a portion of the group's consolidated tax liability for the later year that is otherwise allocated to members under section 1552 is reallocated. The reallocation takes into account all consolidated return years to which this paragraph (d) applies (the computation period), and is determined by comparing the tax allocated to a member during the computation period with the member's tax liability determined as if it had filed separate returns during the computation period.

(i) *Cap on allocation under section 1552.* A member's allocation under section 1552 for a tax year may not exceed the excess, if any, of—

(A) The total of the tax liabilities of the member for the computation period (including the current year), determined as if the member had filed separate returns; over

(B) The total amount allocated to the member under section 1552 and this paragraph (d) for the computation period (except the current year).

(ii) *Reallocation of capped amounts.* To the extent that the amount allocated to a member under section 1552 exceeds the limitation under paragraph (d)(2)(i) of this section, the excess is allocated among the remaining members in proportion to (but not to exceed the amount of) each member's excess, if any, of—

(A) The total of the tax liabilities of the member for the computation period (including the current year), determined as if the member had filed separate returns; over

(B) The total amount allocated to the member under section 1552 and this paragraph (d) for the computation period (including for the current year only the amount allocated under section 1552).

(iii) *Reallocation of excess capped amounts.* If the reductions under paragraph (d)(2)(i) of this section exceed the amounts allocable under paragraph (d)(2)(ii) of this section, the excess is allocated among the members in accordance with the group's method under section 1552 without taking this paragraph (d)(2) into account.

(3) *Percentage method.* The percentage method under this paragraph (d)(3) allocates tax liability based on the absorption of tax attributes, without taking into account the ability of any member to subsequently absorb its own tax attributes. The allocation under this method is in addition to the allocation under section 1552.

(i) *Decreased earnings and profits.* A member's allocation under section 1552 for any year is increased, thereby decreasing its earnings and profits, by a fixed percentage (not to exceed 100%) of the excess, if any, of—

(A) The member's separate return tax liability for the consolidated return year as determined under §1.1552–1(a)(2)(ii); over

(B) The amount allocated to the member under section 1552.

(ii) *Increased earnings and profits.* An amount equal to the total decrease in earnings and profits under paragraph (d)(3)(i) of this section (including amounts allocated as a result of a carryback) increases the earnings and profits of the members whose attributes are absorbed, and is allocated among them in a manner that reasonably reflects the absorption of the tax attributes.

(4) *Additional methods.* The absorption by one member of the tax attributes of another member may be reflected under any other method approved in writing by the Commissioner.

(5) *Election of allocation method*—(i) *In general.* Tax liability may be allocated under this paragraph (d) only if an election is filed with the group's first return. The election must—

(A) Be made in a separate statement entitled ‘‘ELECTION TO ALLOCATE TAX LIABILITY UNDER §1.1502–33(d)’’;

(B) State the allocation method elected under §1.1502–33(d) and under section 1552;

(C) If the percentage method is elected, state the percentage (not to exceed 100%) to be used; and

(D) If a method is permitted under paragraph (d)(4) of this section, attach evidence of approval of the method by the Commissioner.

(ii) *Consent*—(A) *Electing or changing methods.* An election for a later year, or an election to change methods, may be made only with the written consent of the Commissioner.

(B) *Prior law elections.* An election in effect for the last tax year beginning before January 1, 1995, remains in effect under this section. However, a group may elect to conform its earnings and profits computations to the method described in §1.1502–32(b)(3)(iv)(D) (the percentage method, using a 100% allocation), whether or not it has previously made an election for earnings and profits purposes. If a conforming election is made, the group must make all adjustments necessary to prevent amounts from being duplicated or omitted. The conforming election is made by attaching a statement entitled ‘‘ELECTION TO CONFORM TAX ALLOCATIONS UNDER §§1.1502–32 and 1.1502–33(d)’’ to the consolidated group's return for its first tax year beginning on or after January 1, 1995. The statement must be signed by the common parent, and must specify whether the method is conformed only for years beginning on or after January 1, 1995 or as if the method were in effect for all prior years. The statement must also describe the adjustments made by reason of the change (e.g., to reflect prior use of earnings and profits).

(6) *Examples.* The principles of this paragraph (d) are illustrated by the following examples.

Example 1. Wait-and-see method. (a) *Facts.* P owns all of the stock of S1 and S2. The P group uses the wait-and-see method of allocation under paragraph (d)(2) of this section in conjunction with §1.1552–1(a)(1). For Year 1, each member's taxable income, both for purposes of §1.1552–1(a)(1) and redetermined as if the member had filed separate returns, is as follows: P $0, S1 $2,000, and S2 ($1,000). Thus, the P group's consolidated tax liability for Year 1 is $340 (assuming a 34% tax rate).

(b) *Analysis.* Under § 1.1552–1(a)(1)(i), the tax liability of the P group is allocated among the members in accordance with the portion of the consolidated taxable income attributable to each member having taxable income. Thus, all of the P group's $340 consolidated tax liability is allocated to S1. As a result, S1 decreases its earnings and profits under section 1552 by $340 (even if S1 does not pay the tax liability). No further allocations are made under paragraph (d)(2) of this section because S2 cannot yet absorb its loss on a separate return basis.

(c) *Payment of tax liability.* If S1 pays the $340 tax liability, there is no further effect on the income, earnings and profits, or stock basis of any member. If P pays the $340 tax liability (and the payment is not a loan from P to S1), P is treated as making a $340 contribution to the capital of S1; if S2 pays the $340 tax liability (and the payment is not a loan from S2 to S1), S2 is treated as making a $340 distribution to P with respect to its stock, and P is treated as making a $340 contribution to the capital of S1. See § 1.1552–1(b)(2).

(d) *Year 2.* For Year 2, each member's taxable income, under § 1.1552–1(a)(1)(ii) and redetermined as if the member had filed separate returns, without taking into account any carryover from Year 1, is as follows: P $0, S1 $1,000, and S2 $3,000. Thus, the P group's consolidated tax liability for Year 2 is $1,360 (assuming a 34% tax rate). Of this amount, section 1552 would allocate $340 to S1 and $1,020 to S2. However, under paragraph (d)(2)(i) of this section, no more than $680 may be allocated to S2. This is because S2 would have had an aggregate tax liability of $680 if it had filed separate returns for Years 1 and 2 (a $0 tax liability for Year 1, and a $680 tax liability for Year 2, taking into account a $1,000 net operating loss carryover from Year 1). Under paragraph (d)(2)(ii) of this section, the entire excess of $340 which would otherwise be allocated to S2 under § 1.1552–1(a)(1) is allocated to S1. This is because S1 would have had an additional $340 of aggregate tax liability if it had filed separate returns for Years 1 and 2 (a $680 tax liability for Year 1, and a $340 tax liability for Year 2, not taking into account S2's $1,000 net operating loss for Year 1). The effect of the allocation of $680 to S1 and $680 to S2 is determined under § 1.1552–1(b)(2).

Example 2. Percentage method. (a) *Facts.* The facts are the same as in *Example 1,* but the P group uses the percentage method of allocation under paragraph (d)(3) of this section, with a percentage of 100%. In addition, the taxable incomes and losses of the members are the same if computed as provided in § 1.1552–1(a)(2)(ii).

(b) *Analysis.* Under § 1.1552–1(a)(2)(ii), $340 of tax liability is allocated to S1 for Year 1. Under paragraph (d)(3)(i) of this section, S1 is allocated another $340 of tax liability because S1 would have had a $680 tax liability if it had filed separate returns but only $340 is allocated to S1 under section 1552. Thus, S1's earnings and profits are decreased by the $680 total. Under paragraph (d)(3)(ii) of this section, S2's earnings and profits are increased by $340 because the additional $340 allocated to S1 under paragraph (d)(3)(i) of this section is attributable to the absorption of S2's losses.

(c) *Payment of tax liability.* If S1 pays the $340 tax liability of the P group and pays $340 to S2, the Year 1 tax liability results in no further adjustments to the income, earnings and profits, or basis of any member's stock. If S1 pays the $340 tax liability of the P group and pays the other $340 to P instead of S2 because, for example, of an agreement among the members, S2 is treated as distributing $340 to P with respect to its stock in the year that S1 makes the payment to P. See § 1.1552–1(b)(2).

(d) *Year 2.* For Year 2, $340 is allocated to S1 and $1,020 is allocated to S2 under section 1552. No additional amounts are allocated under paragraph (d)(3) of this section.

(e) *Deconsolidations*—(1) *In general.* Immediately before it becomes a nonmember, S's earnings and profits are eliminated to the extent they were taken into account by any member under this section. If S's earnings and profits are eliminated under this paragraph (e)(1), no corresponding adjustment is made to the earnings and profits of P (or any other member) under paragraph (b) of this section or to any basis in a member's stock under paragraph (c) of this section. For this purpose, S is treated as becoming a nonmember on the first day of its first separate return year (including another group's consolidated return year).

(2) *Acquisition of group*—(i) *Application.* This paragraph (e)(2) applies only if a consolidated group (the terminating group) ceases to exist as a result of—

(A) The acquisition by a member of another consolidated group of either the assets of the common parent of the terminating group in a reorganization described in section 381(a)(2), or the stock of the common parent of the terminating group; or

(B) The application of the principles of § 1.1502–75(d)(2) or (d)(3).

(ii) *General rule.* Paragraph (e)(1) of this section does not apply solely by reason of the termination of a group because it is acquired, if there is a surviving group that is, immediately thereafter, a consolidated group. Instead, the surviving group is treated as the terminating group for purposes of applying this paragraph (e) to the terminating group. This treatment does not apply, however, to members of the terminating group that are not members of the surviving consolidated group immediately after the terminating group ceases to exist (e.g., under section 1504(a)(3) relating to reconsolidation, or section 1504(c) relating to includible insurance companies).

(3) *Certain corporate separations and reorganizations.* The adjustments under paragraph (e)(1) of this section must be modified to the extent necessary to effectuate the principles of section 312(h). Thus, P's earnings and profits rather than S's earnings and profits may be eliminated immediately before S becomes a nonmember. P's earnings and profits are eliminated to the extent that its earnings and profits reflect S's earnings and profits after applying section 312(h) immediately after S becomes a nonmember (determined without taking this paragraph (e) into account).

(4) *Special uses of earnings and profits.* Paragraph (e)(1) of this section does not apply for purposes of determining—

(i) The extent to which a distribution is charged to reserve accounts under section 593(e);

(ii) The extent to which a distribution is taxable to the recipient under sections 805(a)(4) and 832; and

(iii) Any other special use identified in guidance published in the Internal Revenue Bulletin.

(5) *Example.* The principles of this paragraph (e) are illustrated by the following example.

Example. (a) *Facts.* Individuals A and B own all of P's stock, and P owns all of the stock of S and T, each with a $500 basis. For Year 1, S has $100 of earnings and profits and T has $50 of earnings and profits. Under paragraph (b)(1) of this section, the earnings and profits of S and T tier up to P, and P has $150 of earnings and profits for Year 1. P sells all of S's stock for $600 at the close of Year 1.

(b) *Analysis.* Under paragraph (e)(1) of this section, S's $100 of earnings and profits is eliminated immediately before S becomes a nonmember because the earnings and profits are taken into account under paragraph (b) of this section in P's earnings and profits. However, no corresponding adjustment is made to P's earnings and profits or to P's basis in S's stock for purposes of earnings and profits. P's earnings and profits for Year 1 remain $150 following the sale of S's stock.

(c) *Forward merger.* The facts are the same as in paragraph (a) of this *Example,* except that, rather than P selling S's stock, S merges into a nonmember in a transaction described in section 368(a)(2)(D). Under paragraph (h) of this section, the nonmember is treated as a successor to S. Thus, as in paragraph (b) of this *Example,* S's $100 of earnings and profits is eliminated immediately before S ceases to be a member.

(d) *Acquisition of entire group.* The facts are the same as in paragraph (a) of this *Example,* except that X, the common parent of another consolidated group, purchases all of P's stock at the close of Year 1, and P sells S's stock during Year 3. Under paragraph (e)(2) of this section, the earnings and profits of S and T are not eliminated as a result of X purchasing P's stock. However, S's earnings and profits from consolidated return years of both the P group and the X group are eliminated immediately before S becomes a nonmember of the X group.

(e) *Earnings and profits deficit.* The facts are the same as in paragraph (d) of this *Example,* except that S has a $550 deficit in earnings and profits for Year 1. The effect of paragraph (e)(1) of this section is the same. Under paragraph (c)(1) of this section, P would have an excess loss account in S's stock for earnings and profits purposes under the principles of §§1.1502–19 and 1.1502–32, and, under the principles of §1.1502–19(c)(2), the excess loss account is not taken into account as a result of X's purchase of P's stock. Under paragraph (e)(2) of this section, S's deficit is not eliminated under paragraph (e)(1) of this section immediately before X's purchase of P's stock. However, S's earnings and profits (or deficit) is eliminated immediately before S becomes a nonmember of the X group.

(f) *Section 355 distribution.* The facts are the same as in paragraph (a) of this *Example,* except that, rather than selling S's stock, P distributes S's stock to A at the close of Year 1 in a distribution to which section 355 applies. Under paragraph (e)(3) of this section, P's earnings and profits may be reduced under section 312(h) as a result of the distribution. To the extent that P's earnings and profits are reduced, S's earnings and profits are not eliminated under paragraph (e)(1) of this section.

(f) *Changes in the structure of the group*—(1) *Changes in the common parent*—(i) *General rule.* If P succeeds another corporation under the principles of §1.1502–75(d) (2) or (3) as the common parent of a consolidated group (a group structure change), the earnings and profits of P are adjusted immediately after P becomes the new common parent to reflect the earnings and profits of the former common parent immediately before the former common parent ceases to be the common parent. The adjustment is made as if P succeeds to the earnings and profits of the former common parent in a transaction described in section 381(a). See § 1.1502–31 for the basis of the stock of members following a group structure change.

(ii) *Minority shareholders.* If the former common parent's stock is not wholly owned by members of the consolidated group immediately after the former common parent ceases to be the common parent, appropriate adjustments must be made to reflect in the new common parent only an allocable part of the former common parent's earnings and profits.

(iii) *Higher-tier members.* To the extent that earnings and profits are adjusted under this paragraph (f)(1), and the former common parent is owned by members other than P, the earnings and profits of the intermediate subsidiaries must be adjusted in accordance with the principles of this section.

(iv) *Example.* The principles of this paragraph (f)(1) are illustrated by the following example.

Example. (a) *Facts.* X is the common parent of a consolidated group with $100 of earnings and profits, and P is the common parent of another consolidated group with $20 of earnings and profits. P acquires all of X's stock at the close of Year 1 in exchange for 70% of P's stock. The exchange is a reverse acquisition under § 1.1502–75(d)(3), and the X group is treated as remaining in existence with P as its new common parent.

(b) *Adjustments for X group earnings and profits.* Under paragraph (f)(1) of this section, P's earnings and profits are adjusted immediately after P becomes the new common parent, to reflect X's $100 of earnings and profits immediately before X ceases to be the common parent. The adjustment is made as if P succeeds to X's earnings and profits in a transaction described in section 381(a). Thus, immediately after the acquisition, P has $120 of accumulated earnings and profits and X continues to have $100 of accumulated earnings and profits.

(c) *Adjustments for P group earnings and profits.* Although the P group terminates on P's acquisition of X's stock, under paragraph (e)(2) of this section, no adjustments are made to the earnings and profits of any subsidiaries in the terminating P group.

(d) *Acquisition of separate return corporation.* The facts are the same as in paragraph (a) of this *Example,* except that, immediately before the acquisition of its stock by P, X is not affiliated with any other corporation. The exchange is a reverse acquisition under § 1.1502–75(d)(3), and P is treated as the common parent of the X group. Consequently, the results are the same as in paragraphs (b) and (c) of this *Example.*

(2) *Change in the location of subsidiaries.* If the location of a member within a group changes, appropriate adjustments must be made to the earnings and profits of the members to prevent the earnings and profits from being eliminated. For example, if P transfers all of S's stock to another member in a transaction to which section 351 and § 1.1502–13 apply, the transferee's earnings and profits are adjusted immediately after the transfer to reflect S's earnings and profits immediately before the transfer from consolidated return years. On the other hand, if the transferee purchases S's stock from P, the transferee's earnings and profits are not adjusted.

(g) *Anti-avoidance rule.* If any person acts with a principal purpose contrary to the purposes of this section, to avoid the effect of the rules of this section or apply the rules of this section to avoid the effect of any other provision of the consolidated return regulations, adjustments must be made as necessary to carry out the purposes of this section.

(h) *Predecessors and successors.* For purposes of this section, any reference to a corporation or to a share includes a reference to a successor or predecessor as the context may require. A corporation is a successor if its earnings and profits are determined, directly or indirectly, in whole or in part, by reference to the earnings and profits of another corporation (the predecessor). A share is a successor if its basis is determined, directly or indirectly, in whole or in part, by reference to the basis of another share (the predecessor).

(i) [Reserved]

(j) *Effective date*—(1) *General rule.* This section applies with respect to determinations of the earnings and profits of a member (e.g., for purposes of a characterizing a distribution to which section 301 applies) in consolidated return years beginning on or after January 1, 1995. If this section applies, earnings and profits must be determined or redetermined as if this section were in effect for all years (including, for example, the consolidated return years of another consolidated group to the extent the earnings and profits from those years are still reflected). For example, if a distribution by P to a nonmember shareholder in 1990 was a dividend because of an unabsorbed loss carryover attributable to S, P's earnings and profits in tax years beginning after January 1, 1995 are redetermined by taking into account a negative adjustment in the tax year S's loss arose and in 1990 for P's distribution, and any subsequent absorption of the loss has no effect on earnings and profits. Any such determination or redetermination does not, however, affect any prior period. Thus, the shareholder's treatment in 1990 of the distribution as a dividend (and the effect of the distribution on stock basis) is not redetermined under this section.

(2) *Dispositions of stock before effective date*—(i) *In general.* If P disposes of stock of S in a consolidated return year beginning before January 1, 1995, the amount of P's earnings and profits with respect to S are not redetermined under paragraph (j)(1) of this section. See §1.1502–19 as contained in the 26 CFR part 1 edition revised as of April 1, 1994 for the definition of disposition, and paragraph (j)(5) of this section for the rules applicable to such dispositions.

(ii) *Lower-tier members.* Although P disposes of S's stock in a tax year beginning before January 1, 1995, S's determinations or adjustments with respect to lower-tier members with which it continues to file a consolidated return are redetermined in accordance with the rules of this section (even if S's earnings and profits were previously taken into account by P). For example, assume that P owns all of S's stock, S owns all of T's stock, and T owns all of U's stock. If S sells 80% of T's stock in a tax year beginning before January 1, 1995 (the effective date), the amount of S's earnings and profits from the sale, and the adjustments to stock basis for earnings and profits purposes that are reflected in that amount, are not redetermined if P sells S's stock after the effective date. If S sells the remaining 20% of T's stock after the effective date, S's stock basis adjustments with respect to that T stock are also not redetermined because T became a nonmember before the effective date. However, if T and U continue to file a consolidated return with each other, paragraph (e)(1) of this section did not apply, and T sells U's stock after the effective date, T's earnings and profits with respect to U are redetermined (even though some of the earnings and profits may have been taken into account by S in its prior sale of T's stock before the effective date).

(iii) *Deferred amounts.* For purposes of this paragraph (j)(2), a disposition does not include a transaction to which §1.1502–13, §1.1502–13T, §1.1502–14, or §1.1502–14T applies. Instead, the transaction is deemed to occur as the earnings and profits (if any) are taken into account.

(3) *Deconsolidations and group structure changes*—(i) *In general.* Paragraphs (e) and (f) of this section apply with respect to deconsolidations and group structure changes occurring in consolidated return years beginning on or after January 1, 1995.

(ii) *Prior period group structure changes.* If there was a group structure change in a consolidated return year beginning before January 1, 1995, and earnings and profits were not determined under §1.1502–33T(a) as contained in the 26 CFR part 1 edition revised as of April 1, 1994, a distribution in a tax year ending after September 7, 1988, of earnings and profits that are not reflected in the earnings and profits of the distributee member, but would have been so reflected if §1.1502–33T(a) as contained in the 26 CFR part 1 edition revised as of April 1, 1994 had applied, the negative adjustment under paragraph (b) of this section for distributions does not apply (and there is therefore no offset to the increase in the earnings and profits of the distributee).

(4) *Deemed dividend elections.* If there is a deemed distribution and recontribution pursuant to §1.1502–32(f)(2) as contained in the 26 CFR part 1 edition

revised as of April 1, 1994 in a consolidated return year beginning before January 1, 1995, the deemed distribution and recontribution under the election are treated as an actual distribution by S and recontribution by P as provided under the election.

(5) *Prior law.* For prior determinations, see prior regulations under section 1502 as in effect with respect to the determination. See, e.g., §§ 1.1502–33 and 1.1502–33T as contained in the 26 CFR part 1 edition revised as of April 1, 1994.

[T.D. 8560, 59 FR 41695, Aug. 15, 1994, as amended by T.D. 8597, 60 FR 36710, July 18, 1995]

§ 1.1502–34 Special aggregate stock ownership rules.

For purposes of §§ 1.1502–1 through 1.1502–80, in determining the stock ownership of a member of a group in another corporation (the ''issuing corporation'') for purposes of determining the application of section 165(g)(3)(A), 332(b)(1), 333(b), 351(a), or 904(f), in a consolidated return year, there shall be included stock owned by all other members of the group in the issuing corporation. Thus, assume that members A, B, and C each own 33⅓ percent of the stock issued by D. In such case, A, B, and C shall each be treated as meeting the 80-percent stock ownership requirement for purposes of section 332, and no member can elect to have section 333 apply. Furthermore, the special rule for minority shareholders in section 337(d) cannot apply with respect to amounts received by A, B, or C in liquidation of D.

[T.D. 6894, 31 FR 11794, Sept. 8, 1966

SPECIAL TAXES AND TAXPAYERS

§ 1.1502–42 Mutual savings banks, etc.

(a) *In general.* This section applies to mutual savings banks and other institutions described in section 593(a).

(b) *Total deposits.* In computing for purposes of section 593(b)(1)(B)(ii) total deposits or withdrawable accounts at the close of the taxable year, the total deposits or withdrawable accounts of other members shall be excluded.

(c) *Taxable income; taxable years for which the due date (without extensions) for filing returns is before March 15, 1983.* For taxable years for which the due date (without extensions) for filing returns is before March 15, 1983, a member's taxable income for purposes of section 593(b)(2) is determined under § 1.1502–27(b) (computed without regard to any deduction under section 593(b)(2)). In addition, for taxable years beginning after July 11, 1969, taxable income as computed under the preceding sentence is subject to the adjustments provided in section 593(b)(2)(E). See § 1.593–6A(b)(5).

(d) *Taxable income; taxable years for which the due date (without extensions) for filing returns is after March 14, 1983*—(1) *In general.* For a taxable year for which the due date (without extensions) for filing returns is after March 14, 1983, a thrift's taxable income for purposes of section 593(b)(2) is its tentative taxable income (as defined in paragraph (e)(1) of this section).

(2) *Definitions.* For purposes of this section:

(i) A *thrift* is a member described in section 593(a).

(ii) A *nonthrift* is a member that is not a thrift.

(e) *Tentative taxable income (or loss)*—(1) *Thrift.* For purposes of this section, a thrift's tentative taxable income (or loss) is its separate taxable income (determined under § 1.1502–12 without paragraph (q) thereof and without any deduction under section 593(b)), subject to the following adjustments in the following order:

(i) The adjustments described in paragraph (e)(3) of this section;

(ii) The adjustments described in section 593(b)(2)(E) for those thrifts with separate taxable income greater than zero (determined after the adjustments under paragraph (e)(3) of this section); and

(iii) The adjustments described in paragraph (f) of this section.

(2) *Nonthrift.* For purposes of this section, a nonthrift's tentative taxable income (or loss) is its separate taxable income (determined under § 1.1502–12), adjusted for the portion of the consolidated net operating loss deduction attributable to the member, the portion of the consolidated net capital loss carryover or carryback attributable to the

member, and further adjusted as described in paragraph (e)(3) of this section.

(3) *Adjustments for all members.* For each member, the following adjustments taken into account in the computation of consolidated taxable income are included in determining its tentative taxable income (or loss) in order to adjust separate taxable income of the member to take into account certain consolidated items:

(i) The portions of the consolidated charitable contributions deduction and the consolidated dividends received deduction attributable to the member.

(ii) The member's capital gain net income, determined without any net capital loss carryover or carryback attributable to the member.

(iii) The member's net capital loss and section 1231 net loss, reduced by the portion of the consolidated net capital loss attributable to the member.

(f) *Adjustments for thrifts*—(1) *Reductions.* A thrift's separate taxable income (as adjusted under paragraph (e)(3) of this section) is reduced (but not below zero) by losses of thrifts and to the extent attributable to functionally related activities, losses of a nonthrift. Certain operating rules for determining the amount of the reductions are provided in paragraph (f)(4) of this section. The reductions are made in the following amounts in the following order:

(i) The thrift's allocable share (as determined under paragraph (h)(2) of this section) of another thrift's tentative taxable loss. That tentative taxable loss is determined by including a deduction under section 593(b) (other than paragraph (2) thereof) for the year in which the loss arises.

(ii) The thrift's allocable share (as determined under paragraph (h)(3) of this section) of the portion of the consolidated net operating loss deduction attributable to it or another thrift. That consolidated net operating loss deduction is determined by including a deduction under section 593(b) (other than paragraph (2) thereof) for the year in which the loss arose. The portion of a consolidated net operating loss deduction attributable to another thrift is computed by excluding losses arising in taxable years for which the due date (without extensions) for filing returns is before March 15, 1983.

(iii) The thrift's allocable share (as determined under paragraph (h)(4) of this section) of the loss attributable to functionally related activities of a nonthrift (as determined under paragraph (g) of this section). For a rule netting that share against certain income attributable to functionally related activities of that nonthrift, see paragraph (f)(4)(iv) of this section.

(iv) The thrift's allocable share (as determined under paragraph (h)(3) of this section) of the portion of the consolidated net operating loss deduction attributable to functionally related activities of a nonthrift (as determined under paragraph (h)(5) of this section). That consolidated net operating loss deduction is determined by excluding losses arising in taxable years for which the due date (without extensions) for filing returns is before March 15, 1983. For a rule netting that share against certain income attributable to functionally related activities of that nonthrift, see paragraph (f)(4)(iv) of this section.

(2) *Increases.* (i) A thrift's separate taxable income (as adjusted under paragraphs (e)(3) and (f)(1) of this section) is increased in a subsequent consolidated return year to restore reductions made in a prior consolidated return year to a thrift's separate taxable income by reason of losses of a nonthrift. This increase is the amount of the thrift's allocable share (as determined under paragraph (h)(6) of this section) of the income attributable to functionally related activities of a nonthrift in a consolidated return year and is made only in that year. This increase is made only if both the thrift and the nonthrift were members of the group in the consolidated return years in which both the reduction and increase are made.

(ii) This subdivision (ii) limits the increases to a thrift's separate taxable income to assure that income of a particular nonthrift is used to restore reductions of a thrift only to the extent that such nonthrift's losses reduced the thrift's income. Therefore, as of the end of a consolidated return year, the cumulative increases to a thrift's tentative taxable income (by reason of income attributable to functionally related activities of a nonthrift) may not exceed the cumulative reductions to the thrift's separate taxable income made (by reason of the nonthrift's functionally related activities) under paragraph (f)(1) (iii) and (iv) of this section in the current and all prior consolidated return years during which both the thrift institution and the nonthrift institution were members of the group.

(iii) For a netting rule, see paragraph (f)(4)(iv) of this section.

(3) *Special Rule.* (i) If a carryback to a thrift's separate taxable income diminishes the reduction to a thrift's separate taxable income for a prior consolidated return year otherwise required by paragraph (f)(1) (iii) or (iv) of this section, then any increases to a thrift's separate taxable income under paragraph (f)(2) of this section for an intervening consolidated return year must be recomputed to take into account the effect of such carryback. Thus, if a net operating loss attributable to a thrift is carried back and completely offsets the thrift's separate taxable income (before the reductions under paragraph (f)(1) (iii) or (iv) or this section), any increase to the thrift's separate taxable income under paragraph (f)(2) of this section (attributable to a reduction in the year to which the loss is carried) for an intervening consolidated return year will be eliminated. The recomputation required by this subparagraph (3) must be reflected on an amended return for the intervening consolidated return year for which the increase was previously reported. See example (2) in paragraph (j) of this section.

(ii) If a deficiency for an intervening consolidated return year results from the application of paragraph (f)(3)(i) of this section with respect to an item to which section 6501(h) applies, the deficiency may be assessed at any time within the period described in section 6501(h).

(iii) For purposes of chapter 67 of the Code (relating to interest), the last date prescribed for payment of any tax owed as a result of the application of paragraph (f)(3)(i) of this section is deemed to be the last day of the taxable year for which the item carried back arose.

(4) *Operating rules.* For purposes of paragraphs (d) through (j) of this section:

(i) The portion of a consolidated net operating loss deduction attributable to a member is determined as follows:

(A) First, determine under §§ 1.1502–21T(b) (or § 1.1502–79A(a)(3), as appropriate) the portion of each consolidated net operating loss attributable to the member for the particular year in which the loss arose.

(B) Second, apply the anti-double-counting rule in paragraph (h)(3)(iii) of this section so as not to take the same loss into account twice.

(C) Finally, apply the loss absorption limit in paragraph (f)(4)(iii) of this section to the total amount of the consolidated net operating loss deduction from a particular loss year.

(ii) Capital loss carryovers and carrybacks shall be taken into account in a manner consistent with the principles of paragraphs (d) through (j) of this section.

(iii) This subdivision (iii) prescribes a loss absorption limit. The total amount of the consolidated net operating loss deduction from a given year (loss year) taken into account as reductions under paragraph (f)(1) of this section for another year (absorption year) shall not exceed the amount of the consolidated net operating loss deduction attributable to the loss year absorbed in computing consolidated taxable income for the absorption year. For this purpose, consolidated taxable income for the absorption year shall include a deduction under section 593(b) (other than paragraph (2) thereof) for each thrift member.

(iv) This subdivision (iv) prescribes a rule for netting in certain cases income attributable to functionally related activities of a nonthrift in a consolidated return year ("income year") against losses attributable to functionally related activities of that nonthrift which arise in a consolidated return year ("loss year"). That nonthrift's income is netted against the portion of that nonthrift's loss which would otherwise be applied in a consolidated return year (“reduction year”) under paragraph (f)(1) (iii) or (iv) of this section to reduce a thrift’s tentative taxable income, but:

(A) Only if the income year is not later than the loss year and the reduction year, and

(B) Only to the extent the income had not previously been taken into account under paragraph (f)(2) of this section or this subdivision (iv) as of the close of the later of the loss year and the reduction year.

(g) *Income (or loss) attributable to functionally related activities of a nonthrift*—(1) *In general.* For purposes of this section, the income (or loss) attributable to functionally related activities of a nonthrift is the income (or loss) of the nonthrift:

(i) Attributable to the provision of assets or the rendition of services to a thrift (such as the leasing of office space or providing computer or financial services), or

(ii) Derived from the assets described in section 7701(a)(19)(C) (iii) through (x), but only if such assets comprise 5 percent or more of the gross assets of the nonthrift.

(2) *Amount of income (or loss).*The amount of income (or loss) from such activities is the excess of (i) gross income from such activities over (ii) the deductions of the nonthrift allocable and apportionable to that gross income under the principles of §1.861–8. The loss attributable to functionally related activities of a nonthrift is the excess (if any) of such deductions over such gross income. That loss, however, may not exceed the amount of the tentative taxable loss of that nonthrift (determined by excluding losses arising in taxable years for which the due date (without extensions) for filing returns is before March 15, 1983).

(h) *Allocation of income and losses*—(1) *In general.* Paragraphs (h)(2) through (5) of this section provides rules for allocating different losses among thrifts that have tentative taxable income greater than zero. Generally, these allocations are made in the order listed in paragraph (f)(1) of this section and are based upon the relative tentative taxable income of the thrifts to which the particular loss is allocated. For purposes of each allocation under a subdivision of such paragraph (f)(1), the tentative taxable income of the thrifts used in making this allocation is reduced by the thrift’s allocable share of losses allocated to the thrift under a prior subdivision of such paragraph (f)(1). Accordingly, for purposes of this paragraph (h), tentative taxable income is determined without regard to paragraph (f) of this section, except as otherwise provided. Paragraph (h)(6) of this section provides rules for allocating income attributable to functionally related activities of a nonthrift based upon the relative reductions to thrift income made on account of that nonthrift.

(2) *Allocation of tentative taxable loss of other thrifts.* For purposes of paragraph (f)(1)(i) of this section, a thrift’s allocable share of another thrift’s tentative taxable loss is the loss multiplied by a fraction. The numerator of the fraction is the tentative taxable income (if greater than zero) of the thrift, and the denominator is the aggregate of such tentative taxable income of each thrift.

(3) *Allocation of portions of a consolidated net operating loss deduction.* (i) For purposes of paragraph (f)(1)(ii) of this section, a first thrift’s allocable share of the portion of the consolidated net operating loss deduction attributable to another thrift is determined under paragraph (h)(2) of this section as if that portion were a tentative taxable loss of that other thrift and by computing tentative taxable income under such paragraph (h)(2) by taking into account paragraph (f)(1)(i) of this section. A thrift’s allocable share of the portion of the consolidated net operating loss deduction attributable to that thrift is equal to that entire portion.

(ii) For purposes of paragraph (f)(1)(iv) of this section, a thrift’s allocable share of the portion of a consolidated net operating loss deduction attributable to functionally related activities of a nonthrift (determined under paragraph (h)(5) of this section) is determined under paragraph (h)(4) of this section as if that portion were a loss attributable to functionally related activities of the nonthrift and by computing tentative taxable income under such paragraph (h)(4) by taking into account paragraph (f)(1) (i), (ii), and (iii) of this section.

(iii) This subdivision (iii) prevents the ''double-counting'' of losses. The reduction to the tentative taxable income of a thrift is diminished to the extent the loss that gave rise to the reduction has previously been taken into account in reducing a thrift's tentative taxable income. Thus, any loss taken into account as a reduction to a thrift's separate taxable income under any subdivision of paragraph (f)(1) of this section shall be reduced (but not below zero) to the extent taken into account:

(A) In a prior consolidated return year under any subdivision of such paragraph (f)(1) or

(B) In the current consolidated return year under a previous subdivision of such paragraph (f)(1).

(4) *Allocation of loss attributable to functionally related activities of a nonthrift.* For purposes of paragraph (f)(1)(iii) of this section, a thrift's allocable share of a loss attributable to functionally related activities of a nonthrift is determined by multiplying the loss by a fraction. The numerator of the fraction is the tentative taxable income (if greater than zero) of the thrift (taking into account paragraph (f)(1) (i) and (ii) of this section) and the denominator is the aggregate of such tentative taxable income (so determined) of each thrift.

(5) *Portion of the consolidated net operating loss deduction attributable to functionally related activities of a particular nonthrift.* The portion of the consolidated net operating loss deduction attributable to functionally related activities of a particular nonthrift is the lesser of the following two amounts:

(i) The portion of the consolidated net operating loss deduction attributable to that nonthrift.

(ii) The aggregate of the losses attributable to functionally related activities of that nonthrift for the taxable years in which the consolidated net operating loss deduction arose.

(6) *Allocation of income attributable to functionally related activities of a nonthrift.* For purposes of paragraph (f)(2) of this section, a thrift institution's allocable share of the income attributable to functionally related activities of a nonthrift is determined by multiplying that income by a fraction. The numerator of the fraction is the amount of the cumulative reductions referred to in paragraph (f)(2)(ii) of this section (minus the cumulative increases under paragraph (f)(2) of this section) made on account of that nonthrift for the thrift and the denominator is the sum of such cumulative reductions (minus such cumulative increases) made on account of that nonthrift for all thrifts.

(7) *Proper accounting* The provisions of section 482 apply in determining a thrift institution's tentative taxable income, and in determining the gross income and deductions attributable to functionally related activities. For example, an expense such as the salary of an individual who performs services for both a thrift and a nonthrift must be allocated in a manner that fairly reflects the value of the services rendered to each.

(i) [Reserved]

(j) *Examples.* The provisions of this section may be illustrated by the following examples. In each example the letter ''T'' for a member denotes a thrift and the letters ''NT'' denote a nonthrift. Also, in each example, a thrift loss includes a bad debt deduction under section 593(b) (other than paragraph (2) thereof) for such year and a thrift with income would have such a bad debt deduction of zero.

Example (1). (a) In 1983, corporations T1, T2, NT1, and NT2 are formed. These corporations constitute an affiliated group that files a consolidated return on the basis of a calendar year. For 1983, 1984, and 1985, the tentative taxable income (or loss) of each member (before the application of paragraph (f) of this section) is as follows:

	1983	1984	1985
NT1	$(60)	$(140)	$15
T1	1,000	500	750
NT2	(90)	(220)	150
T2	(300)	400	250

In 1983, NT1, in addition to its other business activities, acted as a collection agency for T1. Deductions attributable to those activities exceeded gross income attributable to those activities by $70. NT1's other activities generated a $10 gain. In 1984 and 1985, NT1 acted as a collection agency for T1 as its sole activity.

(b) The tentative taxable incomes of T1 and T2 for 1983 (determined under paragraph (e) of this section) as of the close of that year are adjusted by paragraph (f) of this section as follows:

(i) T1's tentative taxable income:		
T1's tentative taxable income (before the application of paragraph (f) of this section	....	$1,000
Less:		
T2's tentative taxable loss	$300	....
NT1's functionally related loss (limited by NT1's overall loss)	60	360
T1's tentative taxable income for 1983	....	640

(ii) T2's tentative taxable income for 1983 is zero.

(c) The tentative taxable incomes of T1 and T2 for 1984 (determined under paragraph (e) of this section as of the close of that year) are adjusted by paragraph (f) of this section as follows:

(i) T1's tentative taxable income:

T1's tentative taxable income (before the application of paragraph (f) of this section)	$500
Less:	
T1's allocable portion of NT1's functionally related loss (140x500/(500+400))	78
T1's tentative taxable income for 1984	422

(ii) T2's tentative taxable income:	
T2's tentative taxable income (before the application of paragraph (f) of this section	400
Less:	
T2's allocable portion of NT1's functionally related loss (140x400/(500+400))	62
T2's tentative taxable income for 1984	338

(d) For 1985, the amount under paragraph (f) (2) of this section for both T1 and T2 is $15 (NT1's tentative taxable income from functionally related activities for 1985). For 1983 and 1984, T1's tentative taxable income was reduced by a total of $138 (*i.e.*, $60 + $78) due to NT1‘s losses from functionally related activities. For 1984, T2's tentative taxable income was reduced by $62 due to those losses. Accordingly, under paragraph (f)(2) of this section, T1's tentative taxable income for 1983 is increased by $10 (*i.e.*, $15x$138/($138+$62)) and T2's tentative taxable income is increased by $5 (*i.e.*, $15x$62/($138+$62)).

Example (2). (a) In 1983, corporations T, NT1, and NT2 are formed. these corporations constitute an affiliated group. NT2 provides computer services to T as its sole activity. For the calendar years 1983, 1984, and 1985, the group files a consolidated return. The tentative taxable income of each member (before the application of paragraph (f) of this section) is as follows:

	1983	1984	1985
T	$100	$0	$(200)
NT1	200	0	100
NT2	(20)	20	0

(b) Under paragraph (f)(1) of this section, T's tentative taxable income for 1983 (determined at the close of that year) is reduced to $80 (*i.e.*, $100 less NT2's $20 loss). For 1984, under paragraph (f)(2) of this section, T's tentative taxable income is increased by $20. For 1985, the consolidated net operating loss of $100 (all of which is attributable to T) is carried back to 1983. That $100 carryback is not limited by paragraph (f)(4)(iii) of this section, since consolidated taxable income for 1983 available for absorption after a bad debt deduction of $0 under section 593(b) (other than paragraph (2) thereof) for that year is $280. Accordingly, under paragraph (f)(1)(ii) of this section, T's tentative taxable income is reduced by the full $100, which is taken into account before the previous reduction of T's tentative taxable income under paragraph (f)(1)(iii) of this section. In addition, under paragraph (f)(3)(i) of this section, the group must file an amended return for 1984 to eliminate the increase to T's bad debt deduction for 1984 by reason of the consolidated net operating loss carryback to 1983.

Example (3) . (a) T and NT are formed in 1983 and are the only members of an affiliated group filing a consolidated return on a calendar year basis. NT provided computer services to T as its sole activity. For 1983, 1984, and 1985, the tentative taxable income of T and NT (before the application of paragraph (f) of this section) is as follows:

	1983	1984	1985
T	$100	$0	$0
NT	0	40	(40)

(b) At the close of 1983, T's tentative taxable income is $100. For 1985, however, the group has a consolidated net operating loss of $40, all of which is attributable to NT's functionally related activities and which is carried back to 1983. However, T's tentative taxable income for 1983 is not reduced under paragraph (f)(1)(iv) of this section, since, under paragraph (f)(4)(iv) of this section, NT's 1984 income attributable to functionally related activities of $40 is netted against that $40 carryback.

Example (4). (a) In 1983, corporations T1, T2, NT1, and NT2 are formed. For calendar years 1983, 1984, and 1985, the affiliated group consisting of T1, T2, NT1, and NT2 filed a consolidated return. NT1 provided computer services to T1 as its sole activity. The tentative taxable income of each member (before the application of paragraph (f) of this section) is as follows:

	1983	1984	1985
T1	(50)	100	30
T2	(50)	(80)	(25)
NT1	(50)	(40)	(99)

	1983	1984	1985
NT2	120	30	100

(b) For 1983, the group has a consolidated net operating loss of $30, apportioned $10 each to T1, T2, and NT1 under § 1.1502–79A(a)(3). For 1984, the only thrift with tentative taxable income greater than zero (before applying paragraph (f) of this section) is T1. That tentative taxable income of $100 is first reduced to $20 by T2's $80 1984 loss under paragraph (f)(1)(i) of this section. Next, T1's remaining tentative taxable income of $20 is reduced to $10 by the portions attributable to T1 and T2 of the 1983 consolidated net operating loss carryover to 1984 under paragraph (f)(1)(ii) of this section. The sum of those portions is limited to $10 (*i.e.*, $5 each) by paragraph (f)(4)(iii) of this section because 1984 consolidated taxable income available for absorption after a bad debt deduction under section 593(b) (other than paragraph (2) thereof) for each thrift member for that year is $10. For that reason, paragraph (f)(4)(iii) of this section also prevents any further portion of that carryover from being taken into account in 1984 as a reduction under paragraph (f)(1) of this section. T1's remaining tentative taxable income of $10 is reduced to zero, under paragraph (f)(1)(iii) of this section, by NT1's 1984 tentative taxable loss.

(c) For 1985, the only thrift with tentative taxable income greater than zero (before applying paragraph (f) of this section) is T1. T1's tentative taxable income for 1985 of $30 is reduced to $5 by T2's 1985 loss of $25 under paragraph (f)(1)(i) of this section. Next, the portions attributable to T1 and T2 of the consolidated net operating loss carryover from 1983 to 1985 for purposes of paragraph (f)(1)(ii) of this section must be determined. That determination is made without applying the rules for loss absorption in computing consolidated taxable income under § 1.1502–21A(b)(3). Those portions are instead determined in 3 steps under paragraph (f)(4)(i) of this section. The first of those steps is to determine each of T1's and T2's attributable portions of the 1983 consolidated net operating loss which under § 1.1502–79A (a)(3) is $10 or $20 for both thrifts. The second of those steps is to apply the anti-double counting rule under paragraph (h)(3)(iii) of this section to reduce that $20 amount by the $10 total of the two $5 portions attributable to T1 and T2 of the consolidated net operating loss carryover from 1983 to 1984 taken into account as reductions to T1's tentative taxable income for 1984 under paragraph (f)(1)(ii) of this section. That leaves a $10 total amount available to be taken into account as reductions to T1's remaining tentative taxable income of $5 for 1985 under paragraph (f)(1)(ii) of this section. Under the third of those steps that $10 amount, however, is limited, under the loss absorption limit of paragraph (f)(4)(iii) of this section, to the $6 of the 1983 consolidated net operating loss carryover to 1985 which is absorbed in computing consolidated taxable income for 1985 since 1985 consolidated taxable income available for absorption after a bad debt deduction under section 593(b) (other than paragraph (2) thereof) for that year is $6 (*i.e.*, $30+$100−$99−$25). Because separate taxable income cannot be reduced below zero under paragraph (f)(1) of this section, T1's remaining tentative taxable income of $5 is thus reduced to zero by the portions attributable to T1 and T2, respectively, of the consolidated net operating loss carryover from 1983 to 1985 under paragraph (f)(1)(ii) of this section.

(Sec. 1502, 7805, Internal Revenue Code of 1954 (68A Stat. 367 and 917; (26 U.S.C. 1502 and 7805))

[T.D. 7637, 44 FR 46841, Aug. 9, 1979, as amended by T.D. 7815, 47 FR 11516, Mar. 17, 1982; T.D. 7876, 48 FR 11258, Mar. 17, 1983; 48 FR 13165, Mar. 30, 1983; T.D. 8677, 61 FR 33324, June 27, 1996]

§ 1.1502–43 Consolidated accumulated earnings tax.

(a) *Group subject to tax*—(1) *General rule.* For a group filing a consolidated return for the taxable year, the accumulated earnings tax under section 531 is imposed on consolidated accumulated taxable income (as defined in paragraph (b) of this section). This tax applies to any group that is formed or availed of to avoid or prevent the imposition of the individual income tax on the shareholders of either any of its members or any other corporation by permitting earnings and profits to accumulate instead of dividing or distributing them. Section 531 and this section do not apply to a group that is treated as a ''personal holding company'' under section 542(a)(1) as a result of the application of section 542(b)(1). Special rules are provided in this section for other groups which include one or more personal holding companies.

(2) *Evidence of purpose to avoid income tax.* (i) Under section 533(a), the fact that the group's earnings and profits are permitted to accumulate beyond the reasonable needs of its business is determinative of the purpose to avoid

the income tax with respect to shareholders, unless the group by the preponderance of the evidence proves to the contrary.

(ii) The fact that a group is a mere holding or investment group is prima facie evidence of the group's purpose to avoid the income tax with respect to the shareholders. The activities of a member which is a personal holding company are not taken into account in determining if the group is a mere holding or investment group.

(3) *Earnings and profits.* For purposes of this paragraph (a) and paragraph (d) of this section, the following rules apply:

(i) If no member of the group is a personal holding company, the group's earnings and profits are the aggregate of the earnings and profits (or deficit) of each corporation that is a member at the close of the taxable year, determined in accordance with §1.1502–33.

(ii) Earnings and profits resulting from the application of §1.1502–33(b) are not taken into account.

(iii) Earnings and profits resulting from the disposition of a member's stock are determined without regard to the stock basis adjustments under §§1.1502–32 and 1.1502–33(c)(1).

(4) *Reasonable needs of the business.* The reasonable needs of the group's business include the reasonable needs of the business of any corporation (other than a personal holding company) that is a member at the close of the taxable year. Thus, the earnings and profits of one member may be accumulated with respect to the reasonable business needs of another member. If under §1.537–3(b) the business of a nonmember corporation is considered the business of a member, then the earnings and profits of any member may be accumulated with respect to such nonmember's reasonable business needs.

(5) *Burden of proof.* The notification described in section 534(b) and the statement described in section 534(c) are made to or by the common parent corporation in accordance with §1.1502–77.

(b) *Consolidated accumulated taxable income*—(1) *In general.* ‘‘Consolidated accumulated taxable income'' is the group's consolidated taxable income determined under §1.1502–11 adjusted in the manner provided in paragraph (b)(2) of this section, minus the sum of—

(i) The consolidated dividends paid deduction determined under paragraph (c) of this section and

(ii) The consolidated accumulated earnings credit determined under paragraph (d) of this section.

(2) *Adjustments to consolidated taxable income.* For purposes of paragraph (b)(1) of this section, consolidated taxable income is adjusted as follows:

(i) Under section 535(b)(1), the deduction for taxes is the excess of—

(A) The consolidated liability for tax determined without §1.1502–2 (b) through (d) and without the foreign tax credit provided by section 33, over

(B) The consolidated foreign tax credit determined pursuant to §1.1502–4. Foreign taxes deductible under §1.535–2(a)(2) are also allowed as a deduction under section 535(b)(1).

(ii) The consolidated charitable contributions deduction under §1.1502–24 does not apply. Under section 535(b)(2), there shall be allowed the aggregate charitable contributions of the members allowable under section 170, determined without section 170 (b)(2) and (d)(2).

(iii) Under section 535(b)(3), the deductions provided in §§1.1502–26 and 1.1502–27 are not allowed.

(iv) Under section 535(b)(4), the consolidated net operating loss deduction described in §§1.1502–21T(a) or 1.1502–21A(a), as appropriate is not allowed.

(v) Under section 535(b)(5), there is allowed as a deduction the consolidated net capital loss, determined under §§1.1502–22T(a) or 1.1502–22A(a), as appropriate .

(vi) Under section 535(b)(6), there is allowed as a deduction an amount equal to (A) the excess of the consolidated net long-term capital gain (determined under §§1.1502–22T(a) or 1.1502–41A, as appropriate over the consolidated net short-term capital loss (determined under §§1.1502–22T(a) or 1.1502–41A, as appropriate), minus (B) the taxes attributable to this excess. This consolidated net short-term capital loss is determined without the consolidated net capital loss carryovers or carrybacks to the taxable year.

(vii) Under section 535(b)(7), the consolidated net capital loss carryovers and carrybacks are not allowed. See §§ 1.1502–22T(b) or 1.1502–22A(b), as appropriate.

(viii) Sections 1.1502–15A (Limitations on built-in deductions not subject to § 1.1502–15T) and 1.1502–15T (SRLY limitation on built-in losses (temporary)) do not apply.

(3) *Personal holding company a member.* If a member is a personal holding company for the taxable year—

(i) [Reserved]

(ii) In applying paragraph (b)(2)(i) of this section, consolidated liability for tax (as determined under that paragraph (b)(2)(i)) is reduced by the portion thereof allocable to that member under section 1552(a) (1), (2), (3), or (4) (or § 1.1502–33(d)), whichever is applicable. The consolidated foreign tax credit is computed by excluding the taxable income and any foreign taxes paid or accrued by that member, and foreign taxes deductible under § 1.535–2(a)(2) do not include foreign taxes attributable to that member.

(c) *Consolidated dividends paid deduction*—(1) *General rule.* For purposes of this section, the consolidated dividends paid deduction is the aggregate of the members' deductions under section 561(a) (1) and (2). This deduction is determined by excluding deductions for dividends paid to other members.

(2) *Exception for certain personal holding companies.* [Reserved]

(3) *Dividends paid defined.* For purposes of this paragraph (c), ''dividends paid'' and ''dividend (or portion thereof) paid'' include amounts treated as dividends paid during the taxable year under sections 562(b)(1), 563, and 565 (relating respectively to liquidating distributions, dividends paid after year end, and consent dividends).

(4) *Examples.* This paragraph (c) can be illustrated by the following examples:

Example (1). Corporations P and S constitute an affiliated group which files a consolidated return on a calendar year basis for 1984 and 1985. P owns all of S's stock and two individuals own all of P's stock. Neither member of the group is a personal holding company for 1984. Assume that on December 15, 1984, S pays a dividend (as defined in section 316 (a)) of $2,000 to P, and P pays a dividend (as so defined) of $3,000 on January 15, 1985, to its individual shareholders. All dividends are paid in cash and are pro rata with no preference as to any shares or class of stock. For purposes of this paragraph (c), the consolidated dividends paid deduction for 1984 is $3,000, *i.e.*, the dividend paid on January 15, 1985, by P to its nonmember shareholders. See section 563 (a). The $2,000 dividend paid by S to P is not taken into account in computing the consolidated dividends paid deduction.

Example (2) [Reserved]

(d) *Consolidated accumulated earnings credit.* [Reserved]

[T.D. 7937, 49 FR 3462, Jan. 27, 1984, as amended by T.D. 8560, 59 FR 41674, Aug. 15, 1994; T.D. 8677, 61 FR 33324, June 27, 1996; T.D. 8560, 62 FR 12098, Mar. 14, 1997]

§ 1.1502–44 Percentage depletion for independent producers and royalty owners.

(a) *In general.* The sum of the percentage depletion deductions for the taxable year for all oil or gas property owned by all members, plus any carryovers under section 613A(d)(1) or paragraph (d) of this section from a prior taxable year, may not exceed 65 percent of the group's adjusted consolidated taxable income (under paragraph (b) of this section) for the consolidated return year.

(b) *Adjusted consolidated taxable income.* For purposes of this section, adjusted consolidated taxable income is an amount (not less than zero) equal to the group's consolidated taxable income determined without:

(1) Any depletion with respect to an oil or gas property (other than a gas property with respect to which the depletion allowance for all production is determined pursuant to section 613A(b)) for which percentage depletion would exceed cost depletion in the absence of the depletable quantity limitations contained in section 613A(c) (1) and (6) and the consolidated taxable income limitation contained in paragraph (a) of this section.

(2) Any consolidated net operating loss carryback to the consolidated return year under §§ 1.1502–21T or 1.1502-21A (as appropriate) and

(3) Any consolidated net capital loss carryback to the consolidated return year under §§ 1.1502–22T or 1.1502-22A (as appropriate).

(c) *Allocation to oil and gas properties.* The maximum amount allowable as a deduction under section 613A(c), after the application of paragraph (a) of this section, is allocated to properties held by members in accordance with the regulations under section 613A(d). Those regulations provide for an initial allocation and possible reallocation of the maximum allowable percentage depletion deduction among oil and gas properties. Thus, if, after the initial allocation, cost depletion exceeds the percentage depletion that would be allowable for a particular oil or gas property, cost depletion must be used for that property and the maximum amount of percentage depletion allowable as a deduction for the group is reallocated among only the remaining properties held by all members.

(d) *Carryover for disallowed amounts.* (1) If any amount is disallowed as a deduction for the taxable year by reason of section 613A(d)(1) or paragraph (a) of this section, the disallowed amount for each oil or gas property is treated as an amount allowed as a deduction under section 613A(c), for the following taxable year for the member that owned the property, in accordance with the regulations under section 613A and paragraphs (a) and (d)(2) of this section.

(2) Any amount that was disallowed as a deduction in a separate return limitation year of a member may be carried to a consolidated return year only to the extent that 65 percent of the excess determined under paragraph (d)(3) of this section exceeds the sum of the otherwise allowable percentage depletion deductions for the member's oil and gas properties for the year.

(3) The excess determined in this subparagraph (3) for a member is the excess, if any, of adjusted consolidated taxable income for the year under paragraph (b) of this section over that income recomputed by excluding the items of income and deductions of the member.

(e) *Effective date.* This section applies to taxable years for which the due date (without extensions) for filing returns is after September 30, 1980.

[T.D. 7725, 45 FR 65561, Oct. 3, 1980, as amended by T.D. 8677, 61 FR 33324, June 27, 1996]

§1.1502–47 Consolidated returns by life- nonlife groups.

(a) *Scope*—(1) *In general.* Under section 1504(b)(2), insurance companies that are taxed under section 802 or 821 (relating respectively to life insurance companies and to certain mutual insurance companies) are not treated as includible corporations for purposes of determining under section 1504(a) the existence of an affiliated group and the composition of its membership. Section 1504(c)(2) provides an election whereby certain life insurance companies and mutual insurance companies may be treated as includible corporations, and thus members, of a group composed of other includible corporations. This section provides regulations for the making of this election and for the determination of an electing group's composition and its consolidated tax liability.

(2) *General method of consolidation*—(i) *Subgroup method.* The regulations adopt a subgroup method to determine consolidated taxable income. One subgroup is the group's nonlife companies (including those taxable under section 821). The other subgroup is the group's life insurance companies. Initially, the nonlife subgroup computes nonlife consolidated taxable income and the life subgroup computes consolidated partial life insurance company taxable income. A subgroup's income may in effect be reduced by a loss of the other subgroup. The life subgroup losses consist of consolidated loss from operations and life consolidated net capital loss. The nonlife ubgroup losses consist of nonlife consolidated net operating loss and nonlife consolidated net capital loss. Consolidated taxable income is therefore defined in pertinent part as the sum of nonlife consolidated taxable income and consolidated partial life insurance company taxable income reduced by life subgroup losses or nonlife subgroup losses.

(ii) *Subgroup loss.* A subgroup loss does not actually affect the computation of nonlife consolidated taxable income or consolidated partial life insurance company taxable income. It merely constitutes a bottom-line adjustment in reaching consolidated taxable income. Furthermore, one subgroup's loss must first be carried back against income of the same subgroup before it may be used as a setoff against the second subgroup income in the taxable year the loss arose. (See section 1503(c)(1)). The carryback of the losses from one subgroup may not be used to offset income of the other subgroup in the year to which the loss is to be carried. This carryback of the first subgroup's loss may ''bump'' the second subgroup's loss that in effect previously reduced the income of the first subgroup. The second subgroup's loss that is bumped in appropriate cases may in effect reduce a succeeding year's income of the second or first subgroup. This approach gives the group the tax savings of the use of losses but the bumping rule assures that insofar as possible life deductions will be matched against life income and nonlife deductions against nonlife income.

(iii) *Carryover of subgroup loss.* A subgroup's loss may be used in a succeeding year, but in any particular succeeding year the loss must be used to reduce the income of the same subgroup before it may be used as a setoff against the other subgroup's income.

(3) *Authority.* This section is prescribed under the authority of sections 1502, 1503(c), 1504(c)(2), and 7805(b).

(4) *Other provisions.* The provisions of §§ 1.1502–1 through 1.1502–80 apply unless this section provides otherwise. Further, unless otherwise indicated in this section, a term used in this section has the same meaning as in sections 801–844.

(b) *Effective date.* This section is effective for taxable years for which the due date (without extensions) for filing returns is after March 14, 1983.

(c) *Cross references.* The following table provides cross references for some of the definitions and operating rules that are relevant in making the election and determining the group's composition and its tax liability:

Item and Paragraph

General definitions (d).

Eligible corporation (Five-year rules) (d)(12).

Election (e).

Consolidated taxable income (g).

Nonlife consolidated taxable income (h).

Consolidated partial life insurance company taxable income (j).

Nonlife subgroup losses (m).

Life subgroup losses (n).

Alternative tax (o).

(d) *Definitions.* For purposes of this section:

(1) *Life insurance company.* The term ''life company'' means a life insurance company as defined in section 801. Section 801 applies to each company separately.

(2) *Mutual insurance company.* The term ''mutual company'' means a mutual insurance company taxable under section 821(a)(1).

(3) *Life insurance company taxable income.* The term ''life insurance company taxable income'' is referred to as LICTI. The terms ''TII'', ''GO'', and ''LO'' refer, respectively, to taxable investment income (section 804), gain from operations (section 809), and loss from operations (section 812). The term ''consolidated partial LICTI'' refers to consolidated LICTI without section 802(b)(3).

(4) *Group.* The term ''group'' means an affiliated group of corporations (as defined in section 1504(a)). Unless otherwise indicated in this section, a group's composition is determined without section 1504(b)(2).

(5) *Member.* The term ''member'' means a corporation (including the common parent) that is an includible corporation in the group. A life company or mutual company is tentatively treated as a member for any taxable year for purposes of determining if it is an eligible corporation under paragraph (d)(12) of this section and therefore if it is an includible corporation under section 1504(c)(2). If such a company is eligible and includible (under section 1504(c)(2)), it will actually be treated as a member of the group.

(6) *Life member.* A life member is a member of the group that is a life company.

(7) *Nonlife member.* A nonlife member is a member of the group that is not a life company.

(8) *Life subgroup.* A life subgroup is composed of those members that are life members. If the group has only one life member, it constitutes a life subgroup.

(9) *Nonlife subgroup.* A nonlife subgroup is composed of those members that are nonlife members. If the group

has only one nonlife member, it constitutes a nonlife subgroup.

(10) *Separate return year.* The term ‘‘separate return year’’ means a taxable year of a corporation for which it files a separate return or for which it joins in the filing of a consolidated return by another group. For purposes of this subparagraph (10), the term ‘‘group’’ is defined with regard to section 1504(b)(2) for years in which an election under section 1504(c)(2) is not in effect. Thus, a separate return year includes a taxable year for which that election is not in effect.

(11) *Separate return limitation year.* Section 1.1502–1(f)(2) provides exceptions to the definition of the term ‘‘separate return limitation year’’. For purposes of applying those exceptions to this section, for taxable years ending after December 31, 1980, the term ‘‘group’’ is defined without regard to section 1504(b)(2) and the definition in this subparagraph (11) applies separately to the nonlife subgroup in determining nonlife consolidated taxable income under paragraph (h) of this section and to the life subgroup in determining consolidated partial LICTI under paragraph (j) of this section. Paragraph (m)(3)(ix) of this section defines the term ‘‘separate return limitation year’’ for purposes of determining whether the losses of one subgroup may be used against the income of the other subgroup.

(12) *Eligible corporations*—(i) *In general.* A corporation is an eligible corporation for a taxable year of a group only if, throughout every day of the base period the corporation:

(A) Was in existence and a member of the group determined without the exclusions in section 1504(b)(2) (see paragraphs (d)(12) (iii) through (vi) of this section),

(B) Was engaged in the active conduct of a trade or business (‘‘active business’’),

(C) Did not experience a change in tax character (see paragraph (d)(12)(vii) of this section), and

(D) Did not undergo disproportionate asset acquisitions (see paragraph (d)(12)(viii) of this section).

(ii) *Base period.* The base period consists of the common parent’s five taxable years immediately preceding the group’s taxable year for which the consolidated return and the determination of eligibility are made. Eligibility is determined for each consolidated return year beginning with the first year for which the election under section 1504(c)(2) is effective.

(iii) *In existence.* Except as provided in paragraphs (d)(12) (v) and (vi) of this section, a corporation organized after the base period begins is not eligible even though it is a member of the group immediately after its organization. For purposes of this subdivision (iii), a corporation that was a party to a reorganization described in section 368(a)(1)(F) shall be treated as the same entity both before and after the reorganization.

(iv) *Membership period.* Except as provided in paragraphs (d)(12) (v) and (vi) of this section, a corporation must have been a member of the group throughout the base period to be eligible. Thus, an ineligible corporation includes one whose stock was acquired from outside the group at any time during the base period or one which was a member of a different group (whether by application of reverse acquistion rules in §1.1502–75(d)(3) or otherwise) at any time during the base period. For purposes of this subdivision (iv), the common parent of a group is treated as constituting a group (and hence is a member) during any period when it was not a member of an affiliated group within the meaning of section 1504(a) (applied without section 1504(b)(2)).

(v) *Tacking rule.* The period during which an ‘‘old’’ corporation is in existence and a member of the group engaged in active business is included in (or ‘‘tacks’’ onto) the period for the ‘‘new’’ corporation if the following five conditions listed in this subdivision (v) are met. For purposes of this subparagraph (12), a ‘‘new’’ corporation is a corporation (whether or not newly organized) during the period its eligibility depends upon the tacking rule. The five conditions are as follows:

(A) The first condition is that, at any time, 80 percent or more of the new corporation’s assets it acquired (other than in the ordinary course of its trade or business) where acquired from the old corporation in one or more transactions described in section 351(a) or 381(a). This asset test is applied by using the fair market values of assets on the date they were acquired and without regard to liabilities. Assets acquired in the ordinary course of business will be excluded from total assets only if they were acquired after the new corporation became a member of the group (determined without section 1504(b)(2)). In addition, assets that the old corporation acquired from outside the group in transactions not conducted in the ordinary course of its trade or business are not included in the 80 percent (but are included in total assets) if the old corporation acquired those assets within five calendar years before the date of their transfer to the new corporation.

(B) The second condition is that at the end of the taxable year during which the first condition is first met, the old corporation and the new corporation must both have the same tax character. For purposes of this paragraph (d)(12), a corporation's tax character is the section under which it would be taxed (*i.e.,* sections 11, 802, 821, or 831) if it filed a separate return. If the old corporation is not in existence (or adopts a plan of complete liquidation) at the end of that taxable year, this subdivision (v)(B) will apply to the old corporation's taxable year immediately preceding the beginning of the taxable year during which the first condition is first met.

(C) The third condition is that, if the old and new corporation are life insurance companies, the transfer (or transfers) is not reasonably expected (at the time of the transfer) to result in the separation of profitable activities from loss activities.

(D) The fourth condition is that, at the end of the taxable year during which the first condition is first met, the new corporation does not undergo a disproportionate asset acquisition under paragraph (d)(12)(viii) of this section.

(E) The fifth condition is that, if there is more than one old corporation, the first three conditions apply to all of the corporations. Thus, the second condition (tax character) must be met by all of the old corporations transferring assets taken into account in meeting the test in paragraph (d)(12)(v)(A) of this section.

(vi) *Old group remaining in existence.* If the common parent of a group (or a new common parent) became the common parent in a transaction described in § 1.1502–75 (d)(2) or (d)(3) where a group remained in existence, then paragraph (d)(12) (ii) through (iv) of this section apply by treating that common parent as if it were also the previous common parent of the group that remains in existence. If this paragraph (d)(12)(vi) applies to a transaction, the tacking rule in paragraph (d)(12)(v) of this section does not apply to the transaction.

(vii) *Change in tax character.* A corporation must not experience during the base period a change in tax character (as defined in paragraph (d)(12)(v)(B) of this section) if the change is attributable to an acquisition of assets from outside the group in transactions not conducted in the ordinary course of its trade or business. However, if a new corporation relies on the tacking rules in paragraph (d)(12)(v) of this section, this paragraph (d)(12)(vii) shall apply during the base period and the current consolidated return year and even if the change in tax character is attributable to an asset acquisition from within the group.

(viii) *Disproportionate asset acquisition.* To be eligible, a corporation must not undergo during the base period disproportionate asset acquisitions which are attributable to an acquisition (or a series of acquisitions) of assets from outside the group in transactions not conducted in the ordinary course of its trade or business (special acquisition). Whether special acquisitions are disproportionate is determined at the end of each base period. Whether an acquisition results in a disproportionate asset acquisition depends on all of the facts and circumstances including the following factors and rules:

(A) One factor is the portion of the insurance reserves (*i.e.,* total reserves in section 801 (c)) of the acquiring company at the end of the base period which is attributable to special acquisitions.

(B) A second factor is the portion of the fair market value of the assets (without reduction for liabilities) of the acquiring company at the end of the base period that is attributable to special acquisitions.

(C) A third factor is the portion of the premiums generated during the last taxable year of the base period which are attributable to special acquisitions.

(D) A corporation will not experience a disproportionate asset acquisition unless 75 percent of one factor (whether or not listed in this subdivision (viii)) is attributable to special acquisitions.

(E) Money or other property contributed to a corporation by a shareholder that is not a member of the group (without section 1504(b)(2)) is not a special acquisition.

(F) If a new corporation relies on the tacking rules in paragraph (d)(12)(v) of this section, this subdivision (viii) applies to that corporation during a consolidated return year. Thus, if at any time during a consolidated return year, a new corporation undergoes a disproportionate asset acquisition, the corporation becomes ineligible at that time.

(13) *Ineligible corporation*. A corporation that is not an eligible corporation is ineligible. If a life company or mutual company is ineligible, it is not treated under section 1504(c)(2) as an includible corporation. Losses of a nonlife member arising in years when it is ineligible may not be used under section 1503(c)(2) and paragraph (m) of this section to set off the income of a life member. If a life or mutual company is ineligible and is the common parent of the group (without section 1504(b)(2)), the election under section 1504(c)(2) may not be made.

(14) *Illustrations.* The following examples illustrate this paragraph (d). In each example, L indicates a life company, another letter indicates a nonlife company, and each corporation uses the calendar year as its taxable year.

Example (1). P has owned all of the stock of S since 1913. On January 1, 1980, P purchased all of the stock of L_1 which owns all of the stock of L_2 and S_2. L_1 and L_2 are treated as members for purposes of determining if they are eligible for 1982. However, for 1982, L_1, L_2, and S_2 are ineligible because none of them has been a member of the group for P's five taxable years preceding 1982. For 1982, L_1 and L_2 may elect to file a consolidated return because they constitute an affiliated group under section 1504(c)(1), and P and S may file a consolidated return.

Example (2). Since 1974, P has been a mutual insurance company owning all the stock of L_1. In 1980, P transfers assets to S_1., a new stock casualty company subject to taxation under section 831(a). For 1982, only P and L_1 are eligible corporations. The tacking rule in paragraph (d)(12)(v) of this section does not apply in 1982 because the old corporation (P) and the new corporation (S_1) do not have the same tax character. The result would be the same if P were a life company.

Example (3). Since 1974, L has owned all the stock of L_1 which has owned all the stock of S_1, a stock casualty company. L_1 writes some accident and health insurance business. In 1980, L_1 transfers this business, and S_1 transfers some of its business, to a new stock casualty company, S_2., in a transaction described in section 351 (a). The property transferred to S_2. by L_1 had a fair market value of $50 million. The property transferred by S_1 had a fair market value of $40 million. S_2. is ineligible for 1982 because the tacking rule in paragraph (d)(12)(v) of this section does not apply. The old corporations (L_1 and S_1) and the new corporation (S_2.) do not all have the same tax character. See subparagraph (d)(12)(v)(B) and (E) of this section. The result would be the same if L_1 transferred other property (*e.g.*, stock and securities) with the same value, rather than accident and health insurance contracts, to S_2.

Example (4). Since 1974, P has owned all the stock of S and L_1. L_1 is a large life company engaged in active business since 1974. On January 1, 1982, L_1 transfers in a section 351 (a) transaction assets (not acquired from outside the group) to a new life company, L_2. For 1982, L_2 is eligible because under paragraph (d)(12)(v) of this section, L_2 is considered to have been in existence and a member of the group engaged in the active business since 1974 which is the period L_1, the old corporation, was in existence and a member of the group so engaged.

Example (5). The facts are the same as in example (4). Assume that the fair market value of the assets L_1 transferred to L_2 was $10 million on January 1, 1982 and that L_2 acquired no other assets prior to June 30, 1983. Assume further that on January 1, 1983, L_1 acquires (other than in the ordinary course of its trade or business) assets having a fair market value of $40 million from L_3, an unrelated life company. On June 30, 1983, L_1 transfers those assets to L_2. L_2 becomes ineligible on June 30, 1983. Since by fair market values, 80 percent (*i.e.*, 40/50) of L_2's assets are attributable to special acquisitions, L_2 has undergone a disproportionate asset acquisition at that time. See paragraph (d)(12)(viii)(B), (D), and (F) of this section.

Example (6). The facts are the same as in example (5) except that L_1 transfers assets (other than life insurance contracts) having a fair market value of $40 million to L_2 and L_2 purchases the assets of L_3 on June 30, 1983. the result of the 1983 acquisition is the same as in example (5).

Example (7). The facts are the same as in example (5) except the acquired assets acquired by L_2 in 1983 from L_1 have a fair market value of $20 million. In 1983, L_2 had $1 million of premiums on its pre-existing contracts but premiums generated by the acquired business for the entire year would have been $2 million. L_2 is eligible in 1983 because it did not experience a disproportionate asset acquisition on June 30, 1983.

Example (8). Since 1974, L, a State A corporation, has owned all of the stock of L_1 and S_1. On January 1, 1982, L merges into L_3, a smaller State B corporation, which owns the stock of S_2. The transaction is a reverse acquisition described in § 1.1502–75(d)(3) and the group of which L was the common parent remains in existence. Under paragraph (d)(12)(vi) of this section, L_3 is eligible for 1982. However, S_2 is ineligible in 1982 under paragraph (d)(12)(iv) of this section.

Example (9). The facts are the same as in example (8) except that L acquires the stock of L_3. L_3 and S_2 are both ineligible for 1982. On January 1, 1983, the fair market value of L_3's assets are $5 million (without liabilities) and on that date L transfers assets (not acquired from outside the group) having a fair market value of $95 million (without liabilities) to L_3. L and L_3 are life companies at the end of 1983. L_3 is eligible in 1983 under the tacking rule in paragraph (d)(12)(v) of this section. S_2 is ineligible in that year. The result would be the same if L_3 was not a life company prior to January 1, 1983. See paragraph (d)(12)(v)(B) of this section.

Example (10). Since 1974, P has owned all of the stock of S_1 and L_1. On January 1, 1982, L_1 incorporates L_2 and transfers cash and securities to L_2. L_2 begins writing a new line of specialty life insurance products and it qualifies as a life company for calendar year 1982. L_2 generates a loss from operations (section 812) attributable to its writing of new business. For 1982, L_2 is ineligible under paragraph (d)(12)(v)(C) of this section.

Example (11). The facts are the same as in example (10) except that L_1 transfers to L_2 a block of insurance contracts that generated losses for L_1 and continued to generate losses for L_2, producing a loss from operations. L_2 is ineligible in 1982 under paragraph (d)(12)(v)(C) of this section.

Example (12). Since 1974, X, a foreign corporation, has owned all the stock of S_2 and S_1, and S_1 has owned all of the stock of L_1. On January 1, 1982, X incorporates a new U.S. company P, and transfers the stock of S_1 and S_2 to P. Assume that under § 1.1502–75(d)(3) (relating to reverse acquisitions), the S_1–L_1 affiliated group remains in existence. Under paragraph (d)(12)(vi) of this section, P, S_1, and L_1 are eligible but S_2 is ineligible. The result would be the same if X were an individual.

Example (13). The facts are the same as in example (12) except that X owns all of the stock of S_1, L_1, and S_2. In addition, on January 1, 1982, X transfers the stock of S_1 and S_2 to L_1. L_1 is eligible in 1982 under paragraph (d)(12)(iv) of this section. L_1 would still be eligible even if it owned a subsidiary during the base period but sold the subsidiary prior to January 1, 1982. S_1 and S_2 are ineligible in 1982.

Example (14). Since 1974, S_1 has owned all of the stock of L_1. S_2, an unrelated company, has owned all of the stock of L_2 and S_3 for 10 years. S_1 and S_2 are active stock casualty companies and not holding companies. On January 1, 1982, S_1 and S_2 merge into a new casualty company, S, in a transaction described in § 1.1502–75(d)(3) so that the group of which S_1 was the common parent remains in existence. S and L_1 are eligible in 1982 under paragraph (d)(12)(vi) of this section. L_2 and S_3 are ineligible.

Example (15). The facts are the same as in example (14) except that S_2 (the first corporation in § 1.1502–75(d)(3)) acquires the stock of S_1 in exchange for the stock of S_2. The result is that only S_2, S_1, and L_1 are eligible in 1982.

Example (16). Since 1974, S had owned all of the stock of L_1. L_1 is a large life company. On January 1, 1982, L_1 incorporates L_2 and transfers $40 million in cash and securities to L_2 in a transaction described in section 351(a). On March 1, 1982, L_2 purchases the assets of L_3, an unrelated life company. The purchased assets have a fair market value (without liabilities) of $30 million on March 1, 1982. L_2 is ineligible for 1982 because the tacking rule in paragraph (d)(12)(v) of this section does not apply. L_2 experienced a disproportionate asset acquisition in 1982. See paragraph (d)(12)((v)(D) of this section.

(e) *Election*—(1) *In general.* The election under section 1504(c)(2) may not be made if the group's common parent is an ineligible life company or an ineligible mutual company. The election under section 1504(c)(2) may only be made by the common parent of the group (as defined in section 1504(c)(2) without the exclusions in section 1504(b)(2)). For example, assume that P owns all of the stock of L_1, an eligible life company, which owns the stock of S_1. Assume further that P also owns the stock of L_2, an ineligible life member, which (for more than five years) has owned the stock of a nonlife company, S_2. Only P may make the election and, if it does so, P, L_1, and S_1 may file a consolidated return under this section. L_2 may not make the election under section 1504(c)(2) and may not file a consolidated return with S_2.

(2) *How election is made*—(i) *General rule.* The election under section 1504(c)(2) is generally made by the group's common parent in the same manner (and it has the same effect) as the election to file a consolidated return is made under §1.1502–75 (a) and (b) for a group which did not file a consolidated return for the immediately preceding taxable year. The procedure for making the election under section 1504(c)(2) is the same whether or not a consolidated return was filed by the life members or the nonlife members for the immediately preceding taxable year.

(ii) *Special rule.* Notwithstanding the general rule, however, if the nonlife members in the group filed a consolidated return for the immediately preceding taxable year and had executed and filed a Form 1122 that is effective for the preceding year, then such members will be treated as if they filed a Form 1122 when they join in the filing of a consolidated return under section 1504(c)(2) and they will be deemed to consent to the regulations under this section. However, an affiliation schedule (Form 851) must be filed by the group and the life members must execute a Form 1122 in the manner prescribed in §1.1502–75(h)(2).

(3) *Irrevocability.* Except as provided in §1.1502–75(c) and paragraph (e)(4) of this section, the election under section 1504(c)(2) is irrevocable.

(4) *Permission to discontinue*—(i) *General rule.* A ''section 1504(c)(2) group'' with a common parent that has made the election to file a consolidated return under section 1504(c)(2) in a previous taxable year is granted permission to elect (under §1.1502–75(c)(2)(ii)) to discontinue filing such a consolidated return for that group's first taxable year for which the regulations under this section are effective. This election to discontinue shall be exercised in the time and manner prescribed in §1.1502–75(c)(3), except that the group's common parent shall exercise this election to discontinue (and the other members of the section 1504(c)(2) group must comply with this election) by filing appropriate returns. For purposes of this paragraph (e)(4), an appropriate return is either a separate return or a consolidated return that is filed by newly exercising the privilege under §1.1502–75(a)(1).

(ii) *Types of groups.* (A) A ''section 1504(c)(2) group'' is an affiliated group which files or filed a consolidated return pursuant to an election under section 1504(c)(2).

(B) A ''limited group'' is an affiliated group (determined without section 1504(c)(2)) having at least one member which was a member of a section 1504(c)(2) group on the date that the section 1504(c)(2) group elected to discontinue under paragraph (e)(4)(i) of this section.

(iii) *Effect on restoration rules.* If a group ceases to file a consolidated return or terminates or if a member leaves the group, certain items of income, gain, or loss on transactions between members are taken into account under §§1.1502–13, 1.1502–18, and 1.1502–19 (''restoration rules''). For purposes of applying these restoration rules solely by reason of an election under paragraph (e)(4)(i) or (e)(4)(v)(A) of this section to discontinue filing consolidated returns as a section 1504(c)(2) group, the following rules apply:

(A) The section 1504(c)(2) group shall not be considered to terminate and no member of that group shall be treated as ceasing to be a member.

(B) Members of that section 1504(c)(2) group that are included in the consolidated return of a limited group for the first taxable year for which the discontinuance is effective shall be considered to be filing a consolidated return as a continuation of the section 1504(c)(2) group. However, a corporation that is not a member of a particular limited group for that taxable year is considered to have a separate return year (and, for purposes of §1.1502–19(c), not to be a member of a group filing a consolidated return) with respect to that limited group's members.

(C) Section 1.1502–13 shall be applied without regard to paragraph (f)(1)(vii).

(iv) *Illustrations.* The following examples illustrate paragraph (e)(4)(i)–(iii) of this section. In these examples, L indicates a life company and another letter indicates a nonlife company. All corporations use the calendar year as the taxable year. For all taxable years involved, P owns all the stock of L_1 and of S, L_1 owns all the stock of L_2, L_2 owns all the stock of L_3, and S owns all the stock of L_4. For 1981, P makes the life-nonlife election of section 1504(c)(2) and L_4 is an eligible corporation. For 1982, P makes the election to discontinue filing consolidated returns under section 1504(c)(2) in accordance with the permission granted in this paragraph (e)(4).

Example (1). L_1, L_2, and L_3 were eligible members. For 1982, P and S may either file separate returns or may file, as a limited group, a consolidated return. Similarly, L_1, L_2, and L_3 may either file separate returns or may file a consolidated return as a limited group under section 1504(c)(1). L_4 must file a separate return.

Example (2). For 1981, L_1 was an ineligible member and L_1, L_2, and L_3 filed a consolidated return under section 1504(c)(1). For 1982, L_1, L_2, and L_3 must continue filing a consolidated return under section 1504(c)(1).

Example (3). For 1981, L_1 was an eligible member and L_2 and L_3 were ineligible members. For 1982, L_1, L_2, and L_3 either must each file a separate return or must file a consolidated return as a limited group under section 1504(c)(1) having L_1 as a common parent.

Example (4). The facts are the same as in example (3). Assume further that for 1981, L_2 and L_3 file a consolidated return. During 1981, intercompany transactions (see § 1.1502–13) occur in the life-nonlife group between P and L_1, between P and S, and between S and L_4 and occur in the ineligible life subgroup between L_2 and L_3. For 1982, the restoration rules of § 1.1502–13, as modified by paragraph (e)(4)(iii)(B) of this section, will be applicable as indicated in the following table:

Intercompany transactions between	§ 1.1502–13
P and L_1	Yes.
P and S, if they file:	
Separate returns	Yes.
A consolidated return	No.
S and L_4	Yes.
L_2 and L_3, if L_1, L_2, and L_3 file:	
Separate returns	Yes.
A consolidated return	No.

(v) *Additional rules.* (A) If a group with a taxable year ending in the month of December, 1982, had made the election under section 1504(c)(2) for a taxable year ending prior to December 1, 1982, and if that group meets the conditions of subdivision (vi) of this paragraph (e)(4), then the common parent may elect to discontinue filing a consolidated return for its taxable year ending in the month of December, 1982 (and other members of the section 1504(c)(2) group must comply with this election) by filing appropriate returns (see paragraph (e)(4)(i) of this section) before September 16, 1983.

(B) If a group made the election under section 1504(c)(2) for its taxable year ending in the month of December, 1982, and if that group meets the conditions of subdivision (vi) of this paragraph (e)(4), then the common parent may elect to withdraw the section 1504(c)(2) election (and all other members of the group determined without section 1504(b)(2) comply with the election) by filing before September 16, 1983, any returns for the appropriate taxable years that would have been filed had the section 1504(c)(2) election never been made.

(vi) A group referred to at subdivision (v)(A) or (B) of this (e)(4) meets the conditions of this subdivision (vi) if it—

(A) filed before March 16, 1983, a return for its taxable year ending in the month of December, 1982, and

(B) had not been granted an extension of time beyond March 15, 1983, for the filing of that return.

(vii) *Interest.* For purposes of section 6601(a), interest runs from the original due date (without extensions) for the filing of such returns as are filed pursuant to an election (to discontinue or withdraw as the case may be) under this paragraph (e)(4).

(5) *Consent to regulations.* If a group does not discontinue filing a consolidated return under paragraph (e)(4) of this section but continues to file a consolidated return for the group's first taxable year for which the regulations under this section are first effective, the members of the group will be deemed to have consented to the regulations under this section.

(6) *Cross reference.* If an election is made under section 1504(c)(2), see § 1.1502–75 (e) and (f) for rules that apply for not including (or including) a member or a nonmember in the consolidated return.

(f) *Effect of election.* If the common parent makes the election under section 1504(c)(2), the following rules apply:

(1) *Termination of group.* A mere election under section 1504(c)(2) will not cause the creation of a new group or the termination of an affiliated group that files a consolidated return in the immediately preceding taxable year.

(2) *Effect of eligibility.* If a life member is eligible after an election under section 1504(c)(2), it may not be included as a member of an affiliated group as defined in section 1504(c)(1).

(3) *Eligible and ineligible life companies.* If any life company was a member of an affiliated group of life companies (as defined in section 1504(c)(1)) but is ineligible for a taxable year for which the election under section 1504(c)(2) is effective, that year is not a separate return year merely by reason of the election under section 1504(c)(2) in applying §§1.1502–13, 1.1502–18, and 1.1502–19 to transactions occurring in prior consolidated return years of that affiliated group. In addition, if more than one ineligible life member of the group (as defined in section 1504(c)(1)) joined in the filing of a consolidated return in the taxable year immediately preceding the year for which the election under section 1504(c)(2) is effective and, solely as a result of the election, one of the ineligible life members becomes the common parent of such a group (section 1504(c)(1)), the group must continue to file a consolidated return. For example, assume that L_1 owns all of the stock of S_1 and all of the stock of L_2. L_2 owns the stock of L_3. L_1, L_2, and L_3 are life companies and S_1 is a nonlife company. Assume further that in 1981, L_1, L_2, and L_3 file a consolidated return but L_1 makes the election under section 1504(c)(2) for 1982 and L_2 and L_3 are ineligible. L_2 and L_3 must continue to file a consolidated return in 1982. Moreover, L_2 could elect in 1982 to file a consolidated return (section 1504(c)(1)) with L_3 even if they did not file a consolidated return in 1981 with L_1.

(4) *Inclusion of life company.* If a life company is ineligible in the consolidated return year for which the election is effective, it will be treated as an includible corporation for the common parent's first taxable year in which the company becomes eligible.

(5) *Dividends received deduction.* Section 243(b)(5) defines the term affiliated group for purposes of the election to deduct 100 percent of the qualifying dividends received by a member from another member of the group. Section 246(b)(6) limits certain multiple tax benefits and the deduction itself. Section 243(b) (5) and (6) do not apply to the mutual companies and life companies that are eligible corporations. See section 1504(c)(2)(B)(i). Thus, the common parent of the group may elect to deduct 100 percent of the qualifying dividends received from an ineligible life company.

(6) *Controlled group.* Sections 1563 (a)(4), (b)(2)(D), and (b)(3)(C) (insofar as it applies to corporations described in section 1563(b)(2)(D)) do not apply to any eligible or ineligible life company that is a member of the group for a taxable year during which the election is effective. See paragraph (d)(4) of this section for the definition of group.

(7) *Consolidated tax.* The tax liability of a group for a consolidated return year (before application of credits against that tax) is computed on a consolidated basis by adding together the following taxes:

(i) The tax imposed under section 11 on consolidated taxable income (as determined under paragraph (g) of this section). The taxes imposed under sections 802(a), 821(a), and 831(a) will each be treated as a tax imposed under section 11.

(ii) The tax imposed by section 1201 on consolidated net capital gain (as determined under paragraph (o) of this section) in lieu of the tax imposed under paragraph (f)(7)(i) of this section on that gain.

(iii) Any taxes described in §1.1502–2 (other than by paragraphs (a), (f), and (h) thereof).

(g) *Consolidated taxable income.* The consolidated taxable income is the sum of the following three amounts:

(1) *Nonlife consolidated taxable income.* The nonlife consolidated taxable income (as defined in paragraph (h) of this section) of the nonlife subgroup, as set off by the life subgroup losses as provided in paragraph (n) of this section. The amount in this paragraph (g)(1) may not be less than zero.

(2) *Consolidated partial LICTI.* The consolidated partial LICTI (as defined in paragraph (j) of this section) of the

life subgroup, as set off by the nonlife subgroup losses as provided in paragraph (m) of this section. The amount in this paragraph (g)(2) may not be less than zero.

(3) *Surplus accounts.* The sum of the amounts subtracted under section 815 from the policyholders' surplus accounts of the life members.

(h) *Nonlife consolidated taxable income*—(1) *In general.* Nonlife consolidated taxable income is the consolidated taxable income of the nonlife subgroup, computed under § 1.1502–11 as modified by this paragraph (h). For this purpose, separate taxable income of a member includes separate mutual insurance company taxable income (as defined in section 821(b)) and insurance company taxable income (as defined in section 832).

(2) *Nonlife consolidated net operating loss deduction*—(i) *In general.* In applying §§ 1.1502–21T or 1.1502-21A (as appropriate), the rules in this subparagraph (2) apply in determining for the nonlife subgroup the nonlife net operating loss and the portion of the nonlife net operating loss carryovers and carrybacks to the taxable year.

(ii) *Nonlife CNOL.* The nonlife consolidated net operating loss is determined under §§ 1.1502–21(A)(f) or 1.1502-21T(e) (as appropriate) by treating the nonlife subgroup as the group.

(iii) *Carryback.* The nonlife consolidated net operating loss for the nonlife subgroup is carried back under §§ 1.1502–21A or 1.1502-21T (as appropriate) to the appropriate years (whether consolidated or separate) before the loss may be used as a nonlife subgroup loss under paragraphs (g)(2) and (m) of this section to set off consolidated partial LICTI in the year the loss arose. The election under section 172(b)(3)(C) to relinquish the entire carryback period for the net operating loss of the nonlife subgroup may be made by the common parent of the group. Furthermore, the election may be made even though the election under section 812(b)(3) and paragraph (l)(3)(iii) of this section is not made.

(iv) *Subgroup rule.* In determining the portion of the nonlife consolidated net operating loss that is absorbed when the loss is carried back to a consolidated return year beginning after December 31, 1981, §§ 1.1502–21A or 1.1502-21T (as appropriate) is applied by treating the nonlife subgroup as the group. Therefore, the absorption is determined without taking into account any life subgroup losses that were previously reported on a consolidated return as setting off nonlife consolidated taxable income for the year to which the nonlife loss is carried back.

(v) *Carryover.* The portion of the nonlife consolidated net operating loss that is not absorbed in a prior year as a carryback, or as a nonlife subgroup loss that set off consolidated partial LICTI for the year the loss arose, constitutes a nonlife carryover under this subparagraph (2) to reduce nonlife consolidated taxable income before that portion may constitute a nonlife subgroup loss that sets off consolidated partial LICTI for a particular year.

(vi) *Transitional rules.* The nonlife consolidated net operating loss deduction is subject to a transitional rule limitation in paragraph (h)(3) of this section.

(vii) *Example.* The following example illustrates this paragraph (h)(2). In the example, L indicates a life company, another letter indicates a nonlife company, and each corporation uses the calendar year as its taxable year.

Example. P owns all of the stock of S and L_1. L_1 owns all of the stock of L_2. For 1982, the group first files a consolidated return for which the election under section 1504(c)(2) is effective. P and S filed consolidated returns for 1979 through 1981. In 1982, the P–S group sustains a nonlife consolidated net operating loss. The loss is carried back to the consolidated return years 1979, 1980, and 1981 of P and S by using the principles of §§ 1.1502–21A and 1.1502–79A and, because the election in 1982 under section 1504(c)(2) does not result under paragraph (f)(1) of this section in the creation of a new group or the termination of the P–S nonlife group, the loss is absorbed on the consolidated return in those years without regard to whether the loss in 1982 is attributable to P or S and without regard to their contribution to consolidated taxable income in 1979, 1980, or 1981. The portion of the loss not absorbed in 1979, 1980, and 1981 may serve as a nonlife subgroup loss in 1982 that may set off the consolidated partial LICTI of L_1 and L_2 under paragraphs (g)(2) and (m) of this section.

(3) *Transitional rule*—(i) *In general.* The portion of the nonlife consolidated

net operating loss deduction in a consolidated return year beginning after December 31, 1980 (referred to as ''post-1980 year'') attributable to net operating losses sustained in separate return years ending before January 1, 1981 (referred to as ''pre-1981 year''), is subject to the rules and limitations in this subparagraph (3).

(ii) *Separate nonlife groups.* To determine the limitation, first, identify for the post-1980 year one or more separate affiliated groups of nonlife companies (as defined in section 1504 without section 1504(c)(2)). For this purpose, a single nonlife company may constitute a separate affiliated group if (A) it is not otherwise a member of a separate group or (B) it has a net operating loss sustained in the pre-1981 year that may be carried over and that year is a separate return limitation year (determined under §1.1502–1(f) without paragraph (d)(11) of this section).

(iii) *Carryover.* Second, identify the pre-1981 year net operating losses that may be carried over and that are attributable to each separate affiliated group of nonlife companies. The separate return limitation year rules in §§1.1502–21A(c) or 1.1502-21T(c) (as appropriate) do not apply to any of these carryovers.

(iv) *Limitation.* Third, treat the last taxable year ending before January 1, 1981, as if in that year there was a consolidated return change of ownership of each such separate affiliated group of nonlife companies and apply the consolidated return change of ownership limitation in §1.1502–21A(d) to the losses of each group by treating the members of each separate group as old members.

(v) *Examples.* The following examples illustrate this paragraph (h)(3). In the examples L indicates a life company, another letter indicates a nonlife company, and each corporation uses the calendar year as its taxable year.

Example (1). Throughout all of 1982, P owns all of the stock of S and L_1 and L_1 owns all of the stock of L_2 which in turn owns all of the stock of S_1. Thus, for 1982, there are two nonlife subgroups under this subparagraph (3), P–S and S_1. For 1981, P and S did not file a consolidated return and for 1980 P has a net operating loss of $200,000. Assume that P had no income in 1981. For 1982, the group makes an election under section 1504(c)(2) to file a consolidated return and all corporations are eligible corporations. The consolidated taxable income for the nonlife subgroup for 1982 (determined without the consolidated net operating loss deduction) recomputed by including only items of income and deduction of P and S is $120,000. If $120,000 is the §1.1502–21(d)(2) amount for P and S, then the amount of P's net operating loss for 1980 that may be carried over to P and S for 1982 cannot exceed $120,000.

Example (2). (a) P owns all of the stock of S_1. On January 1, 1979, P purchased all of the stock of L_1 which owns all of the stock of L_2 and S_2. Prior to 1984, all of the corporations filed separate returns. For 1984, the group makes an election under section 1504(c)(2) to file a consolidated return.

(b) 1981, 1982, and 1983 are not treated under paragraph (d)(11) of this section as separate return limitation years of the P, S_1, and S_2 nonlife subgroup. However, P and S_1 will be treated as old members under paragraph (h)(3)(iv) of this section and under §1.1502–21A(d) with respect to their losses in 1979 and 1980 (whether a consolidated return was filed or separate returns were filed) so that the portion of nonlife consolidated taxable income attributable to S_2 may not absorb the losses of P or S_1. The rules that apply to the P–S_1 nonlife subgroup for 1979 and 1980 apply in an identical way to S_2 by treating S_2 as a subgroup separate from the P–S_1 nonlife subgroup. See section 1507(c)(2)(A) of the Tax Reform Act of 1976.

(c) Similarly, L_1 and L_2 are treated as old members under paragraphs (l)(3) and (h)(3)(iv) of this section for losses arising in 1979 and 1980. However, since the L_1—L_2 subgroup is also the life subgroup under paragraph (d)(8) of this section, the limitation in paragraph (h)(3)(iv) of this section does not affect the computation of consolidated partial LICTI for the life subgroup.

(4) *Nonlife consolidated capital gain net income or loss*—(i) *In general.* In applying §§1.1502–22T or 1.1502-22A (as appropriate),the rules in this subparagraph (4) apply in determining for the nonlife subgroup the nonlife consolidated capital gain net income or loss and the portion of the nonlife net capital loss carryovers and carrybacks to the taxable year. In particular, the nonlife consolidated capital gain net income and nonlife consolidated net capital loss are determined under the principles of §§1.1502–22T or 1.1502-22A(a) (as appropriate) by treating the nonlife subgroup as the group.

(ii) *Additional principles.* In applying §§1.1502–22A or 1.1502-22T to nonlife consolidated net capital loss carryovers and carrybacks, the principles set forth in paragraphs (h)(2) (iii) through (v) for applying §§ 1.1502–21T or 1.1502-21A (as appropriate) to nonlife consolidated net operating loss carryovers and carrybacks shall also apply. Further, the portion of nonlife consolidated net capital loss carryovers attributable to losses sustained in taxable years ending before January 1, 1981, is subject to the limitations in paragraph (h)(3) of this section applied by substituting ''net capital loss'' for the term ''net operating loss'' and ''§ 1.1502–22A(d)'' for ''§ 1.1502–21A(d)''.

(iii) *Special rules.* The nonlife consolidated net capital loss is reduced, for purposes of determining the carryovers and carrybacks under §§ 1.1502–22A(b)(1) or 1.1502-22T(b) by the lesser of:

(A) The aggregate of the additional capital loss deductions allowed under section 822(c)(6) or section 832(c)(5), or

(B) The nonlife consolidated taxable income computed without capital gains and losses.

(i) [Reserved]

(j) *Consolidated partial LICTI.* [Reserved]

(k) *Consolidated TII*—(1) *General rule.* [Reserved]

(2) *Separate TII.* [Reserved]

(3) *Company's share of investment yield.* [Reserved]

(4) *Life consolidated capital gain net income.* [Reserved]

(5) *Life consolidated net capital loss carryovers and carrybacks.* The life consolidated net capital loss carryovers and carrybacks for the life subgroup are determined by applying the principles of §§ 1.1502–22T or 1.1502–22A (as appropriate) as modified by the following rules in this subparagraph (5):

(i) Life consolidated net capital loss is first carried back (or apportioned to the life members for separate return years) to be absorbed by life consolidated capital gain net income without regard to any nonlife subgroup capital losses and before the life consolidated net capital loss may serve as a life subgroup capital loss that sets off nonlife consolidated capital gain net income in the year the life consolidated net capital loss arose.

(ii) If a life consolidated net capital loss is not carried back or is not a life subgroup loss that sets off nonlife consolidated capital gain net income in the year the life consolidated net capital loss arose, then it is carried over to the particular year under this paragraph (k)(5) first against life consolidated capital gain net income before it may serve as a life subgroup capital loss that sets off nonlife consolidated capital gain net income in that particular year.

(iii) *Section 818(f).* Capital losses may not be deducted more than once and capital gain will not be included more than once. See section 818(e) and also section 818(f).

(iv) Capital loss carryovers are subject to the transitional rule in paragraph (k)(6) of this section.

(6) *Transitional rule.* The portion of the life consolidated capital loss carryovers attributable to the net capital losses of the life members sustained in separate return years ending before January 1, 1981, is subject to the same limitations as the capital losses of nonlife members in paragraph (h)(4)(iii) of this section by applying the principles of paragraph (h)(3) of this section to each separate affiliated group of life companies.

(l) *Consolidated GO or LO*—(1) *General rule.* [Reserved]

(2) *Separate GO.* [Reserved]

(3) *Consolidated operations loss deduction*—(i) *General rule.* The consolidated operations loss deduction is an amount equal to the consolidated operations loss carryovers and carrybacks to the taxable year. The provisions of §§ 1.1502–21T or 1.1502–21A (as appropriate) and section 812 apply to the extent not inconsistent with this paragraph (l)(3).

(ii) *Consolidated offset.* For purposes of applying section 812 (b) and (d), the term ''consolidated offset'' means the increase in the consolidated operations loss deduction which reduces consolidated partial LICTI to zero. For setoff of consolidated LO against nonlife consolidated taxable income, see paragraph (n)(2) of this section.

(iii) *Carrybacks.* A consolidated LO is first carried back to be absorbed by GO of a life member under section 809(d)(4) or consolidated partial LICTI (as the case may be under section 818(f)(2)) for prior consolidated return years (or apportioned to the life members for prior separate return years) without regard to any nonlife subgroup losses that were set off against consolidated partial LICTI and before the consolidated LO may serve as a life subgroup loss to be set off against nonlife consolidated taxable income in the year the consolidated LO arose. The election to relinquish the entire carryback period for the consolidated LO of the life subgroup may be made by the common parent of the group. See section 812(b)(3). Furthermore, the election may be made even though the election under section 172(b)(3)(C) and paragraph (h)(2)(iii) of this section is not made.

(iv) *Carryovers.* If a consolidated LO is not carried back or is not applied as a life subgroup loss that set off nonlife consolidated taxable income in the year the consolidated LO arose, then it is carried over to a particular year under this paragraph (l)(3) first against the GO of a life member under section 809(d)(4) or consolidated partial LICTI (as the case may be under section 818(f)(2)) before it may serve as a life subgroup loss that may be set off against nonlife consolidated taxable income for that particular year.

(v) *Transitional rule.* The portion of a consolidated operations loss deduction that is attributable to LOs sustained in separate return years ending before January 1, 1981, is subject to the same rules and limitations that the nonlife consolidated net operating loss deduction is subject to in paragraph (h)(3) of this section as applied by identifying separate affiliated groups of life companies.

(4) *Life consolidated capital gain net income or loss.* Life consolidated capital gain net income or loss is determined in the same manner as under paragraph (k)(4) of this section. However, a life member's company share is determined under section 809 (a) and (b)(3).

(m) *Consolidated partial LICTI setoff by nonlife subgroup losses*—(1) *In general.* The nonlife subgroup losses consist of the nonlife consolidated net operating loss and the nonlife consolidated net capital loss. Under paragraph (g)(2) of this section, consolidated partial LICTI is set off by the amounts of these two consolidated losses specified in paragraph (m)(2) of this section. The setoff is subject to the rules and limitations in paragraph (m)(3) of this section.

(2) *Amount of setoff*—(i) *Current year.* Consolidated partial LICTI for the current taxable year is set off by the portion of the nonlife consolidated net operating loss and nonlife consolidated net capital loss arising in that year that cannot be carried back under paragraph (h) of this section to prior taxable years (whether consolidated or separate return years) of the nonlife subgroup.

(ii) *Carryovers.* The portion of the offsettable nonlife consolidated net operating loss or nonlife consolidated net capital loss that has not been used as a nonlife subgroup loss setoff against consolidated partial LICTI in the year it arose may be carried over to succeeding taxable years under the principles of §§1.1502–21T or 1.1502–21A (as appropriate) (relating to net operating loss deduction) or §§1.1502–22T or 1.1502–22A (as appropriate) (relating to net capital loss carryovers). However, in any particular succeeding year, the losses will be used under paragraph (h) of this section in computing nonlife consolidated taxable income before being used in that year as a nonlife subgroup loss that sets off consolidated partial LICTI.

(3) *Nonlife subgroup loss rules and limitations.* The nonlife subgroup losses are subject to the following operating rules and limitations:

(i) *Separate return years.* The carryovers in paragraph (m)(2)(ii) of this section may include net operating losses and net capital losses of the nonlife members arising in separate return years ending after December 31, 1980, that may be carried over to a succeeding year under the principles (including limitations) of §§1.1502–21T and 1.1502–22T (or §§1.1502–21A and 1.1502–22A, as appropriate). But see subdivision (ix) of this paragraph (m)(3).

(ii) *Capital loss.* Nonlife consolidated net capital loss sets off consolidated partial LICTI only to the extent of life consolidated capital gain net income (as determined under paragraph (l)(4) of this section) and this setoff applies before any nonlife consolidated net operating loss sets off consolidated partial LICTI.

(iii) *Capital gain.* Life consolidated capital gain net income is zero in any taxable year in which the life subgroup has a consolidated LO and, in any taxable year, it may not exceed consolidated partial LICTI.

(iv) *Ordering rule.* Consolidated partial LICTI for a consolidated return year is set off by nonlife subgroup losses for that year before being set off (under paragraph (m)(2)(ii) of this section) by a carryover of a nonlife subgroup loss to that year.

(v) *Setoff at bottom line.* The setoff of nonlife subgroup losses against consolidated partial LICTI does not affect life member deductions that depend in whole or in part on GO or TII. Thus, the setoff does not affect the amount of consolidated partial LICTI (as determined under paragraph (j) of this section) for any taxable year but it merely constitutes an adjustment in arriving at the group's consolidated taxable income under paragraph (g) of this section.

(vi) *Ineligible nonlife member.* (A) The offsetable nonlife consolidated net operating loss that arises in any consolidated return year (that may be set off against consolidated partial LICTI in the current taxable year or in a succeeding taxable year) is the amount computed under paragraph (h)(2)(ii) of this section reduced by the ineligible NOL. For purposes of this subparagraph (3), the ''ineligible NOL'' is in the year the loss arose the amount of the separate net operating loss (determined under §§ 1.1502–21T(b) or 1.1502–79A(a)(3) (as appropriate) of any nonlife member that is ineligible in that year (and not the portion of the nonlife consolidated net operating loss attributable under §§ 1.1502–21T(b) or 1.1502–79A(a)(3) (as appropriate) to such a member). (B) The carryovers of offsetable nonlife net operating losses under paragraph (m)(2)(ii) of this section do not include an ineligible NOL arising in a consolidated return year or a loss attributable to an ineligible member arising in a separate return year. See section 1503(c)(2). (C) For absorption within the nonlife subgroup of an ineligible NOL arising in a consolidated return year or a loss of an ineligible member arising in a separate return year which is not a separate return limitation year under paragraph (m)(3)(ix) of this section, see paragraph (m)(3)(vii) of this section.

(vii) *Absorption of ineligible NOL.* (A) If all or a portion of a nonlife member's ineligible NOL (determined under paragraph (m)(3)(vi)(A) of this section) may be carried back or carried over under paragraph (h)(2) of this section to a particular consolidated return year of the nonlife subgroup (absorption year), then notwithstanding § 1.1502–21A(b)(3)(ii), the amount carried to the absorption year will be absorbed by that member's contribution (to the extent thereof) to nonlife consolidated taxable income for that year.

(B) For purposes of (A) of this subdivision (vii), a member's contribution to nonlife consolidated taxable income for an absorption year is the amount of such income (computed without the portion of the nonlife consolidated net operating loss deduction attributable to taxable years subsequent to the year the loss arose), minus such consolidated taxable income recomputed by excluding both that member's items of income and deductions for the absorption year. The deductions of the member include the prior application of this paragraph (m)(3)(vii) to the absorption of the nonlife consolidated net operating loss deduction for losses arising in taxable years prior to the particular loss year.

(viii) *Election to relinquish carryback.* The offsetable nonlife consolidated net operating loss does not include the amount that could be carried back under paragraph (h) (2) of this section but for the common parent's election under section 172(b)(3)(C) to relinquish the carryback. See section 1503(c)(1).

(ix) *Separate return limitation year.* The offsetable nonlife consolidated net operating and capital loss carryovers do not include any losses attributable to a nonlife member that were sustained (A) in a separate return limitation year (determined without section 1504(b)(2)) of that member (or a predecessor), or (B) in a separate return year ending after December 31, 1980, in which an election was in effect under neither section 1504(c)(2) nor section

243(b)(2). For purposes of this paragraph (m), a separate return limitation year includes a taxable year ending before January 1, 1981. See section 1507(c)(2)(A) of the Tax Reform Act of 1976 and §§1.1502–15T and 1.1502–15A (including applicable exceptions thereto).

(x) *Percentage limitation.* The offsetable nonlife consolidated net operating losses that may be set off against consolidated partial LICTI in a particular year may not exceed a percentage limitation. This limitation is the applicable percentage in section 1503(c)(1) of the lesser of two amounts. The first amount is the sum of the offsetable nonlife consolidated net operating losses under paragraph (m)(2) of this section that may serve in the particular year (determined without this limitation) as a setoff against consolidated partial LICTI. The second amount is consolidated partial LICTI (as defined in paragraph (j) of this section) in the particular year reduced by any nonlife consolidated net capital loss that sets off consolidated partial LICTI in that year.

(xi) *Further limitation.* Any offsetable nonlife consolidated net operating loss remaining after applying the percentage limitation that is carried over to a succeeding taxable year may not be set off against the consolidated partial LICTI attributable to a life member that was not an eligible life member in the year the loss arose. See section 1503(c)(2).

(xii) *Restoration rule.* The carryback of a consolidated LO or life consolidated net capital loss under paragraph (l) of this section that reduces consolidated partial LICTI (or life consolidated capital gain net income) for a prior year may reduce the amount of nonlife subgroup losses that would offset consolidated partial LICTI in that prior year. Thus, that amount may be carried over under paragraph (h) (2) or (4) of this section from that prior year in determining nonlife consolidated taxable income in a succeeding year or serve as offsetable nonlife subgroup losses in a succeeding year.

(4) *Acquired groups.* [Reserved]

(5) *Illustrations.* The following examples illustrates this paragraph (m). In the examples, L indicates a life company, another letter indicates a nonlife company, and each corporation uses the calendar year as its taxable year.

Example (1). P owns all of the stock of L and S. S owns all of the stock of I, a nonlife member that is an ineligible corporation for 1982 under paragraph (d)(13) of this section. For 1982, the group elects under section 1504(c)(2) to file a consolidated return. For 1982, assume that any nonlife consolidated net operating loss may not be carried back to a prior taxable year. Other facts are summarized in the following table.

	Separate taxable income (loss)
P	$100
S	(100)
I	(100)
Nonlife consolidated net operating loss	(100)

Under paragraph (m)(3)(vi) of this section, P's separate income is considered to absorb the loss of S, an eligible member, first and the offsetable nonlife consolidated net operating loss is zero, *i.e.*, the consolidated net operating loss ($100) reduced by I's loss ($100). The consolidated net operating loss ($100) may be carried over, but since it is entirely attributable to I (an ineligible member) its use is subject to the restrictions in paragraph (m)(3)(vi) of this section. The result would be the same if the group contained two additional members, S_1, an eligible member, and I_1, an ineligible member, where S_1 had a loss of ($100) and I_1 had income of $100.

Example (2). The facts are the same as in example (1) except that for 1982 S's separate net operating loss is $200. Assume further that L's consolidated partial LICTI is $200. Under paragraph (m)(3)(vi) of this section, the offsetable nonlife consolidated net operating loss is $100, *i.e.*, the nonlife consolidated net operating loss computed under paragraph (h)(2)(ii) of this section ($200), reduced by the separate net operating loss of I ($100). The offsetable nonlife consolidated net operating loss that may be set off against consolidated partial LICTI in 1982 is $30, *i.e.*, 30 percent of the lesser of the offsetable $100 or consolidated partial LICTI of $200. See paragraph (m)(3)(x) of this section. The nonlife subgroup may carry $170 to 1983 under paragraph (h)(2) of this section against nonlife consolidated taxable income, *i.e.*, consolidated net operating loss ($200) less amount used in 1982 ($30). Under paragraph (m)(2)(ii) of this section, the offsetable nonlife consolidated net operating loss that may be carried to 1983 is $70, *i.e.*, $100 minus $30. The facts and results are summarized in the table below.

	(Dollars omitted)			
	Facts	Offsetable	Limit	Unused loss
	(a)	(b)	(c)	(d)
1. P	100			
2. S.	(200)	(100)		(70)
3. I	(100)			(100)
4. Nonlife subgroup	(200)	(100)	(100)	(170)
5. L	200		200	
6. 30% of lower of line 4(c) or 5(c)			30	
7. Unused offsetable loss				(70)

Accordingly, under paragrah (g) of this section (assuming no amount is withdrawn from L's surplus accounts), consolidated taxable income is $170, *i.e.*, line 5 (a) minus line 6(c)).

Example (3). The facts are the same as in example (2) with the following additions for 1983. The nonlife subgroup has nonlife consolidated taxable income of $50 (all of which is attributable to I) before the nonlife consolidated net operating loss deduction under paragraph (h)(2) of this section. Consolidated partial LICTI is $100. Under paragraph (h)(2) of this section, $50 of the nonlife consolidated net operating loss carryover ($170) is used in 1983 and, under paragraph (m)(3) (vi) and (vii) of this section, the portion used in 1982 is attributable to I, the ineligible nonlife member. Accordingly, the offsetable nonlife consolidated net operating loss from 1982 under paragraph (m)(3)(ii) of this section is $70, *i.e.*, the unused loss from 1982. The offsetable nonlife consolidated net operating loss in 1983 is $24.50, *i.e.*, 35 percent of the lesser of the offsetable loss of $70 or consolidated partial LICTI of $100. Accordingly, under paragraph (g) of this section (assuming no amount is withdrawn from L's surplus accounts), consolidated taxable income is $75.50, *i.e.*, consolidated partial LICTI of $100 minus the offsetable loss of $24.50.

Example (4). P owns all of the stock of S and L. For 1982, all corporations are eligible corporations, and the group elects under section 1504(c)(2) to file a consolidated return, the nonlife consolidated net operating loss is $100, and the nonlife consolidated net capital loss is $50. Assume that the losses may not be carried back and the capital losses are not attributable to built-in deductions under paragraph (m)(3)(ix) of this section or under § 1.1502–15A. Other facts and the results are set forth in the following table:

	P–S	L
1. Nonlife consolidated net operating loss	($100)	
2. Nonlife consolidated capital loss	(50)	
3. Consolidated partial LICTI		$100
4. Life consolidated capital gain net income included in line 3		50
5. Offsetable:		
(a) 30% of lower of line (1) or line (3)–(4)	(15)	
(b) Line 2	(50)	
(c) Total	(65)	
6. Unused losses available to be carried over:		
(a) From line 1 (line 1 minus line 5 (a))	(85)	
(b) From line 2 (line 2 minus line 5 (b))	0	

Accordingly, under paragraph (g) of this section consolidated taxable income is $35, *i.e.*, line 3 minus line 5(c).

Example (5). The facts are the same as in example (4). Assume further that for 1983 L has an LO that is carried back to 1982 and the LO is large enough to reduce consolidated partial LICTI for 1982 to zero as determined before any setoff for nonlife losses. Under paragraph (m)(3)(xii) of this section, the nonlife consolidated net operating loss of $15 and the nonlife consolidated net capital loss of $50 that were set off in 1982 respectively against consolidated partial LICTI and life consolidated capital gain net income are restored. These restored amounts may consititute part of the nonlife consolidated net operating loss carryover to 1983 under paragraph (h)(2) of this section or part of the nonlife net capital loss carryover to 1983 under paragraph (h)(4) of this section.

Example (6). The facts are the same as in example (5) except that L's LO for 1983 as carried back reduces consolidated partial LICTI in 1982 from $100 to $25. Since consolidated partial LICTI of $100 in 1982 (before the carryback) included life consolidated capital gain net income of $50, under paragraph (m)(3)(iii) of this section, the life consolidated capital gain net income is $25, *i.e.*, $50 but not more than $25. Therefore, under paragraph (m)(3)(ii) of this section, the offsetable nonlife capital loss in 1982 is $25 and, under paragraph (m) (3)(xii) of this section, $25 of the $50 nonlife consolidated net capital loss in 1982 may be carried under paragraph (h)(4) of this section to 1983. No nonlife consolidated net operating loss is used as a setoff against consolidated partial LICTI in 1982 under paragraph (m)(3)(xii) of this section by reason of the carryback of the consolidated LO from 1983 to 1982.

(n) *Nonlife consolidated taxable income set off by life subgroup losses*—(1) *In general.* The life subgroup losses consist of the consolidated LO and the life consolidated net capital loss (as determined under paragraph (l)(4) of this section). Under paragraph (g)(1) of this section, nonlife consolidated taxable income is set off by the amounts of these two consolidated losses specified in paragraph (n)(2) of this section.

(2) *Amount of setoff.* The portion of the consolidated LO or life consolidated net capital loss that may be set off against nonlife consolidated taxable income (determined under paragraph (h) of this section) is determined by applying the rules prescribed in paragraphs (m) (2) and (3) of this section in the following manner:

(i) Substitute the term ''life'' for ''nonlife'', and vice versa.

(ii) Substitute the term ''nonlife consolidated taxable income'' for ''consolidated partial LICTI'', and vice versa.

(iii) Substitute the term ''consolidated LO'' for ''non-life consolidated net operating loss'', ''paragraph (l)'' or ''paragraph (j)'' for ''paragraph (h)'', and ''section 812(b)(3)'' for ''section 172(b)(3)(C)''.

(iv) Paragraphs (m)(3)(vi), (vii), (x), and (xi) of this section do not apply to a consolidated LO.

(v) Capital losses may not be deducted more than once. See section 818(e) and also the requirements in section 818(f).

(vi) The setoff of life subgroup losses against nonlife consolidated taxable income does not affect nonlife member deductions that depend in whole or in part on taxable income.

(3) *Illustrations.* The following examples illustrate this paragraph (n). In the examples, L indicates a life company, another letter indicates a nonlife company, and each corporation uses the calendar year as its taxable year.

Example (1). P, S, L_1 and L_2 constitute a group that elects under section 1504(c)(2) to file a consolidated return for 1982. In 1982, the nonlife subgroup consolidated taxable income is $100 and there is $20 of nonlife consolidated net capital loss that cannot be carried back under paragraph (h) of this section to taxable years (whether consolidated or separate) preceding 1982. The nonlife subgroup has no carryover from years prior to 1982. Consolidated LO is $150 which under paragraph (l) of this section includes life consolidated capital gain net income of $25. The $150 LO is carried back under paragraph (l)(3) of this section to taxable years (whether consolidated or separate) preceding 1982 before it may offset in 1982 nonlife consolidated taxable income. Since life consolidated capital gain net income is zero for 1982, the nonlife capital loss offset is zero.

Example (2). The facts are the same as in example (1). Assume further that no part of the $150 consolidated LO for 1982 can be used by L_1 and L_2 in years prior to 1982. For 1982, $100 of consolidated LO sets off the $100 nonlife consolidated taxable income. The life subgroup carries under paragraph (l)(3) of this section to 1983 $50 of the consolidated LO ($150 minus $100). See paragraph (l)(3)(ii) of this section. The $50 carryover will be used in 1983 against life subgroup income before it may be used in 1983 to setoff nonlife consolidated taxable income.

Example (3). (a) The facts are the same as in example (1), except that for 1982 the nonlife consolidated taxable income is $150 and includes nonlife consolidated capital gain net income of $50, consolidated partial LICTI is $200, and a life consolidated net capital loss is $50. Assume that the $50 life consolidated net capital loss sets off the $50 nonlife consolidated capital gain net income. Consolidated taxable income under paragraph (g) of this section is $300, *i.e.*, nonlife consolidated taxable income ($150) minus the setoff of the life consolidated net capital loss ($50), plus consolidated partial LICTI ($200).

(b) Assume that for 1983 the nonlife consolidated net operating loss is $150. Under paragraph (h)(2) of this section, the loss may be carried back to 1982 against nonlife consolidated taxable income. If P, the common parent, does not elect to relinquish the carryback under section 172(b)(3)(C), the entire $150 must be carried back reducing 1982 nonlife consolidated taxable income to zero and nonlife consolidated capital gain net income to zero. Under paragraph (m)(3)(xii) of this section, the setoff in 1982 of the nonlife consolidated capital gain net income ($50) by the life consolidated net capital loss ($50) is restored. Accordingly, the 1982 life consolidated net capital loss may be carried over by the life subgroup to 1983. Under paragraph (g) of this section, after the carryback consolidated taxable income for 1982 is $200, *i.e.*, nonlife consolidated taxable income ($0) plus consolidated partial LICTI ($200).

Example (4). The facts are the same as in example (3), except that P elects under section 172 (b)(3)(C) to relinquish the carryback of $150 arising in 1983. The setoff in part (a) of example (3) is not restored. However, the offsetable nonlife consolidated net operating loss for 1983 (or that may be carried forward from 1983) is zero. See paragraph (m)(3)(viii) of this section. Nevertheless, the $150 nonlife consolidated net operating loss may be carried forward to be used by the nonlife group.

Example (5). P owns all of the stock of S_1 and of L_1. On January 1, 1978, L_1 purchases all of the stock of L_2. For 1982, the group elects under section 1504(c)(2) to file a consolidated return. For 1982, L_1 is an eligible corporation under paragraph (d)(12) of this section but L_2 is ineligible. Thus, L_1 but not L_2 is a member for 1982. For 1982, L_2 sustains an LO that cannot be carried back. For 1982, L_2 is treated under paragraph (f)(6) of this section as a member of a controlled group of corporations under section 1563 with P, S, and L_1. For 1983, L_2 is eligible and is included on the group's consolidated return. L_2's LO for 1982 that may be carried to 1983 is not treated under paragraph (d)(11) of this section as having been sustained in a separate return limitation year for purposes of computing consolidated partial LICTI of the L_1–L_2 life subgroup for 1983. Furthermore, the portion of L_2's LO not used under paragraph (l)(3) of this section against life subgroup income in 1983 may be included in offsetable consolidated operations loss under paragraph (n)(2) and (m)(3)(i) of this section that reduces in 1983 nonlife consolidated taxable income because L_2's loss in 1982 was not sustained in a separate return limitation year under paragraph (n)(2) and (m)(3)(ix)(A) of this section or in a separate return year (1982) when an election was in effect neither under section 1504(c)(2) nor section 243(b)(2).

(o) *Alternative tax*—(1) *In general.* For purposes of the alternative tax under paragraph (f)(7)(ii) of this section, consolidated net capital gain is the sum of the following two amounts:

(i) The nonlife consolidated net capital gain reduced by any setoff of a life consolidated net capital loss.

(ii) The life consolidated net capital gain reduced by any setoff of a nonlife consolidated net capital loss.

(2) *Net capital gain.* For purposes of this paragraph (o):

(i) Nonlife consolidated net capital gain is computed under §§ 1.1502–41A or 1.1502–22T (as appropriate) except that it may not exceed nonlife consolidated taxable income (computed under paragraph (h) of this section).

(ii) Life consolidated net capital gain is computed under §§ 1.1502–41A or 1.1502–22T (as appropriate), applied in a manner consistent with paragraph (l)(4) of this section, except that it may not exceed consolidated partial LICTI (as determined under paragraph (j) of this section).

(iii) *Setoffs.* Setoffs are determined under paragraphs (m) or (n) of this section (as the case may be).

(p) *Transitional rule for credit carryovers.* For limitations on credits arising in taxable years ending before January 1, 1981, that may be carried over to taxable years beginning on or after that date, section 1507(c)(2)(A) of the Tax Reform Act of 1976 and the principles in paragraph (h)(3) of this section (relating to limitations on loss carryovers) apply.

(q) *Preemption.* The rules in this section preempt any inconsistent rules in other sections (§ 1.1502–1 through 1.1502–80) of the consolidated return regulations. For example, the rules in paragraph (m)(3)(vi) apply notwithstanding §§ 1.1502–21A(b)(3) and 1.1502–79A(a)(3) (or § 1.1502–21T, as appropriate).

(r) *Other consolidation principles.* The fact that this section treats the life and nonlife members as separate groups in computing, respectively, consolidated partial LICTI (or LO) and nonlife consolidated taxable income (or loss) does not affect the usual rules in §§ 1.1502–0—1.1502–80 unless this section provides otherwise. Thus, the usual rules in § 1.1502–13 (relating to intercompany transactions) apply to both the life and nonlife members by treating them as members of one affiliated group.

(s) *Filing requirements.* Nonlife consolidated taxable income or loss under paragraph (h) of this section shall be determined on a separate Form 1120 or 1120 M and consolidated partial LICTI under paragraph (j) of this section shall be determined on a separate Form 1120 L. The consolidated return shall be made on a separate Form 1120, 1120 M, or 1120 L by the common parent (if the group includes a life company), which shows the set-offs under paragraphs (g), (m), and (n) of this section and clearly indicates by notation on the face of the return that it is a life-nonlife consolidated return (if the group includes a life company). See also §1.1502–75(j), relating to statements and schedules for subsidiaries.

(Secs. 1502 and 7805 of the Internal Revenue Code of 1954 (68A Stat. 637, 917; 26 U.S.C. 1502, 7805))

[T.D. 7877, 48 FR 11441, Mar. 18, 1983, as amended by T.D. 7912, 48 FR 40215, Sept. 6, 1983; T.D. 8560, 59 FR 41674, Aug. 15, 1994; T.D. 8597, 60 FR 36679–36680, July 18, 1995; T.D. 8677, 61 FR 33324, June 27, 1996]

§1.1502–55T Computation of alternative minimum tax of consolidated groups (temporary).

(a) through (h)(3) [Reserved].

(h)(4) *Separate return year minimum tax credit.*

(i) and (ii) [Reserved].

(iii)(A) *Limitation on portion of separate return year minimum tax credit arising in separate return limitation years.* The aggregate of a member's minimum tax credits arising in SRLYs that are included in the consolidated minimum tax credits for all consolidated return years of the group may not exceed—

(*1*) The aggregate for all consolidated return years of the member's contributions to the consolidated section 53(c) limitation for each consolidated return year; reduced by

(*2*) The aggregate of the member's minimum tax credits arising and absorbed in all consolidated return years (whether or not absorbed by the member).

(B) *Computational rules*—(*1*) *Member's contribution to the consolidated section 53(c) limitation.* Except as provided in the special rule of paragraph (h)(4)(iii)(B)(*2*) of this section, a member's contribution to the consolidated section 53(c) limitation for a consolidated return year equals the member's share of the consolidated net regular tax liability minus its share of consolidated tentative minimum tax. The group computes the member's shares by applying to the respective consolidated amounts the principles of section 1552 and the percentage method under §1.1502–33(d)(3), assuming a 100% allocation of any decreased tax liability. The group makes proper adjustments so that taxes and credits not taken into account in computing the limitation under section 53(c) are not taken into account in computing the member's share of the consolidated net regular tax, etc. (See, for example, the taxes described in section 26(b) that are disregarded in computing regular tax liability.)

(*2*) *Adjustment for year in which alternative minimum tax is paid.* For a consolidated return year for which consolidated tentative minimum tax is greater than consolidated regular tax liability, the group reduces the member's share of the consolidated tentative minimum tax by the member's share of the consolidated alternative minimum tax for the year. The group determines the member's share of consolidated alternative minimum tax for a year using the same method it uses to determine the member's share of the consolidated minimum tax credits for the year.

(*3*) *Years included in computation.* For purposes of computing the limitation under this paragraph (h)(4)(iii), the consolidated return years of the group include only those years, including the year to which a credit is carried, that the member has been continuously included in the group's consolidated return, but exclude any years after the year to which the credit is carried.

(*4*) *Subgroup principles.* The SRLY subgroup principles under §1.1502–21T(c)(2) apply for purposes of this paragraph (h)(4)(iii). The predecessor and successor principles under §1.1502–21T(f) also apply for purposes of this paragraph (h)(4)(iii).

(C) *Effective date.* This paragraph (h)(4)(iii) applies to consolidated return years for which the due date of the income tax return (without extensions) is after March 13, 1998. However, a group does not take into account a consolidated taxable year for which the due date of the income tax return (without extensions) is on or before March 13, 1998, in determining a member's (or subgroup's) contributions to the consolidated section 53(c) limitation under this paragraph (h)(4)(iii). See §1.1502–3T(c)(4) for an optional effective date rule (generally making this paragraph (h)(4)(iii) applicable to a consolidated return year beginning after December 31, 1996, if the due date of the income tax return (without extensions) for such year is on or before March 13, 1998).

[T.D. 8751, 63 FR 1745, Jan. 12, 1998, as amended by T.D. 8766, 63 FR 12643, Mar. 16, 1998]

ADMINISTRATIVE PROVISIONS AND OTHER RULES

§ 1.1502–75 Filing of consolidated returns.

(a) *Privilege of filing consolidated returns*—(1) *Exercise of privilege for first consolidated return year.* A group which did not file a consolidated return for the immediately preceding taxable year may file a consolidated return in lieu of separate returns for the taxable year, provided that each corporation which has been a member during any part of the taxable year for which the consolidated return is to be filed consents (in the manner provided in paragraph (b) of this section) to the regulations under section 1502. If a group wishes to exercise its privilege of filing a consolidated return, such consolidated return must be filed not later than the last day prescribed by law (including extensions of time) for the filing of the common parent's return. Such consolidated return may not be withdrawn after such last day (but the group may change the basis of its return at any time prior to such last day).

(2) *Continued filing requirement.* A group which filed (or was required to file) a consolidated return for the immediately preceding taxable year is required to file a consolidated return for the taxable year unless it has an election to discontinue filing consolidated returns under paragraph (c) of this section.

(b) *How consent for first consolidated year exercised*—(1) *General rule.* The consent of a corporation referred to in paragraph (a)(1) of this section shall be made by such corporation joining in the making of the consolidated return for such year. A corporation shall be deemed to have joined in the making of such return for such year if it files a Form 1122 in the manner specified in paragraph (h)(2) of this section.

(2) *Consent under facts and circumstances.* If a member of the group fails to file Form 1122, the Commissioner may under the facts and circumstances determine that such member has joined in the making of a consolidated return by such group. The following circumstances, among others, will be taken into account in making this determination:

(i) Whether or not the income and deductions of the member were included in the consolidated return;

(ii) Whether or not a separate return was filed by the member for that taxable year; and

(iii) Whether or not the member was included in the affiliations schedule, Form 851.

If the Commissioner determines that the member has joined in the making of the consolidated return, such member shall be treated as if it had filed a Form 1122 for such year for purposes of paragraph (h)(2) of this section.

(3) *Failure to consent due to mistake.* If any member has failed to join in the making of a consolidated return under either subparagraph (1) or (2) of this paragraph, then the tax liability of each member of the group shall be determined on the basis of separate returns unless the common parent corporation establishes to the satisfaction of the Commissioner that the failure of such member to join in the making of the consolidated return was due to a mistake of law or fact, or to inadvertence. In such case, such member shall be treated as if it had filed a Form 1122 for such year for purposes of paragraph (h)(2) of this section, and thus joined in the making of the consolidated return for such year.

(c) *Election to discontinue filing consolidated returns*—(1) *Good cause*—(i) *In general.* Notwithstanding that a consolidated return is required for a taxable year, the Commissioner, upon application by the common parent, may for good cause shown grant permission to a group to discontinue filing consolidated returns. Any such application shall be made to the Commissioner of Internal Revenue, Washington, DC 20224, and shall be made not later than the 90th day before the due date for the filing of the consolidated return (including extensions of time). In addition, if an amendment of the Code, or other law affecting the computation of tax liability, is enacted and the enactment is effective for a taxable year ending before or within 90 days after the date of enactment, then application for such a taxable year may be made not later than the 180th day after the date of enactment, and if the application is approved the permission to discontinue filing consolidated returns will apply to such taxable year notwithstanding that a consolidated return has already been filed for such year.

(ii) *Substantial adverse change in law affecting tax liability.* Ordinarily, the Commissioner will grant a group permission to discontinue filing consolidated returns if the net result of all amendments to the Code or regulations with effective dates commencing within the taxable year has a substantial adverse effect on the consolidated tax liability of the group for such year relative to what the aggregate tax liability would be if the members of the group filed separate returns for such year. Thus, for example, assume P and S filed a consolidated return for the calendar year 1966 and that the provisions of the Code have been amended by a bill which was enacted by Congress in 1966, but which is first effective for taxable years beginning on or after January 1, 1967. Assume further that P makes a timely application to discontinue filing consolidated returns. In order to determine whether the amendments have a substantial adverse effect on the consolidated tax liability for 1967, relative to what the aggregate tax liability would be if the members of the group filed separate returns for 1967, the difference between the tax liability of the group computed on a consolidated basis and taking into account the changes in the law effective for 1967 and the aggregate tax liability of the members of the group computed as if each such member filed separate returns for such year (also taking into account such changes) shall be compared with the difference between the tax liability of such group for 1967 computed on a consolidated basis without regard to the changes in the law effective in such year and the aggregate tax liability of the members of the group computed as if separate returns had been filed by such members for such year without regard to the changes in the law effective in such year.

(iii) *Other factors.* In addition, the Commissioner will take into account other factors in determining whether good cause exists for granting permission to discontinue filing consolidated returns beginning with the taxable year, including:

(a) Changes in law or circumstances, including changes which do not affect Federal income tax liability,

(b) Changes in law which are first effective in the taxable year and which result in a substantial reduction in the consolidated net operating loss (or consolidated unused investment credit) for such year relative to what the aggregate net operating losses (or investment credits) would be if the members of the group filed separate returns for such year, and

(c) Changes in the Code or regulations which are effective prior to the taxable year but which first have a substantial adverse effect on the filing of a consolidated return relative to the filing of separate returns by members of the group in such year.

(2) *Discretion of Commissioner to grant blanket permission*—(i) *Permission to all groups.* The Commissioner, in his discretion, may grant all groups permission to discontinue filing consolidated returns if any provision of the Code or regulations has been amended and such amendment is of the type which could have a substantial adverse effect on the filing of consolidated returns by substantially all groups, relative to the filing of separate returns. Ordinarily, the permission to discontinue shall apply with respect to the taxable year of each group which includes the effective date of such an amendment.

(ii) *Permission to a class of groups.* The Commissioner, in his discretion, may grant a particular class of groups permission to discontinue filing consolidated returns if any provision of the Code or regulations has been amended and such amendment is of the type which could have a substantial adverse effect on the filing of consolidated returns by substantially all such groups relative to the filing of separate returns. Ordinarily, the permission to discontinue shall apply with respect to the taxable year of each group within the class which includes the effective date of such an amendment.

(3) *Time and manner for exercising election.* If, under subparagraph (1) or (2) of this paragraph, a group has an election to discontinue filing consolidated returns for any taxable year and such group wishes to exercise such election, then the common parent must file a separate return for such year on or before the last day prescribed by law (including extensions of time) for the filing of the consolidated return for such year. See section 6081 (relating to extensions of time for filing returns).

(d) *When group remains in existence*—(1) *General rule.* A group remains in existence for a tax year if the common parent remains as the common parent and at least one subsidiary that was affiliated with it at the end of the prior year remains affiliated with it at the beginning of the year, whether or not one or more corporations have ceased to be subsidiaries at any time after the group was formed. Thus, for example, assume that individual A forms corporation P. P acquires 100 percent of the stock of corporation S on January 1, 1965, and P and S file a consolidated return for the calendar year 1965. On May 1, 1966, P acquires 100 percent of the stock of S–1, and on July 1, 1966, P sells the stock of S. The group (consisting originally of P and S) remains in existence in 1966 since P has remained as the common parent and at least one subsidiary (now S–1) remains affiliated with it.

(2) *Common parent no longer in existence*—(i) *Mere change in identity.* For purposes of this paragraph, the common parent corporation shall remain as the common parent irrespective of a mere change in identity, form, or place of organization of such common parent corporation (see section 368(a)(1)(F)).

(ii) *Transfer of assets to subsidiary.* The group shall be considered as remaining in existence notwithstanding that the common parent is no longer in existence if the members of the affiliated group succeed to and become the owners of substantially all of the assets of such former parent and there remains one or more chains of includible corporations connected through stock ownership with a common parent corporation which is an includible corporation and which was a member of the group prior to the date such former parent ceases to exist. For purposes of applying paragraph (f)(2)(i) of § 1.1502–1 to separate return years ending on or before the date on which the former parent ceases to exist, such former parent, and not the new common parent, shall be considered to be the corporation described in such paragraph.

(iii) *Taxable years.* If a transfer of assets described in subdivision (ii) of this subparagraph is an acquisition to which section 381(a) applies and if the group files a consolidated return for the taxable year in which the acquisition occurs, then for purposes of section 381:

(a) The former common parent shall not close its taxable year merely because of the acquisition, and all taxable years of such former parent ending on or before the date of acquisition shall be treated as taxable years of the acquiring corporation, and

(b) The corporation acquiring the assets shall close its taxable year as of the date of acquisition, and all taxable years of such corporation ending on or before the date of acquisition shall be treated as taxable years of the transferor corporation.

(iv) *Exception.* With respect to acquisitions occurring before January 1, 1971, subdivision (iii) of this subparagraph shall not apply if the group, in its income tax return, treats the taxable year of the former common parent as having closed as of the date of acquisition.

(3) *Reverse acquisitions*—(i) *In general.* If a corporation (hereinafter referred to as the ‘‘first corporation’’) or any member of a group of which the first corporation is the common parent acquires after October 1, 1965:

(a) Stock of another corporation (hereinafter referred to as the second corporation), and as a result the second corporation becomes (or would become but for the application of this subparagraph) a member of a group of which the first corporation is the common parent, or

(b) Substantially all the assets of the second corporation,

in exchange (in whole or in part) for stock of the first corporation, and the stockholders (immediately before the acquisition) of the second corporation, as a result of owning stock of the second corporation, own (immediately after the acquisition) more than 50 percent of the fair market value of the outstanding stock of the first corporation, then any group of which the first corporation was the common parent immediately before the acquisition shall cease to exist as of the date of acquisition, and any group of which the second corporation was the common parent immediately before the acquisition shall be treated as remaining in existence (with the first corporation becoming the common parent of the group). Thus, assume that corporations P and S comprised group PS (P being the common parent), that P was merged into corporation T (the common parent of a group composed of T and corporation U), and that the shareholders of P immediately before the merger, as a result of owning stock in P, own 90 percent of the fair market value of T's stock immediately after the merger. The group of which P was the common parent is treated as continuing in existence with T and U being added as members of the group, and T taking the place of P as the common parent.

For purposes of determining under *(a)* of this subdivision whether the second corporation becomes (or would become) a member of the group of which the first corporation is the common parent, and for purposes of determining whether the former stockholders of the second corporation own more than 50 percent of the outstanding stock of the first corporation, there shall be taken into account any acquisitions or redemptions of the stock of either corporation which are pursuant to a plan of acquisition described in *(a)* or *(b)* of this subdivision.

(ii) *Prior ownership of stock.* For purposes of subdivision (i) of this subparagraph, if the first corporation, and any members of a group of which the first corporation is the common parent, have continuously owned for a period of at least 5 years ending on the date of the acquisition an aggregate of at least 25 percent of the fair market value of the outstanding stock of the second corporation, then the first corporation (and any subsidiary which owns stock of the second corporation immediately before the acquisition) shall, as a result of owning such stock, be treated as owning (immediately after the acquisition) a percentage of the fair market value of the first corporation's outstanding stock which bears the same ratio to *(a)* the percentage of the fair market value of all the stock of the second corporation owned immediately before the acquisition by the first corporation and its subsidiaries as *(b)* the fair market value of the total outstanding stock of the second corporation immediately before the acquisition bears to *(c)* the sum of *(1)* the fair market value, immediately before the acquisition, of the total outstanding stock of the first corporation, and *(2)* the fair market value, immediately before the acquisition, of the total outstanding stock of the second corporation (other than any such stock owned by the first corporation and any of its subsidiaries). For example, assume that corporation P owns stock in corporation T having a fair market value of $100,000, that P acquires the remaining stock of T from individuals in exchange for stock of P, that immediately before the acquisition the total outstanding stock of T had a fair market value of $150,000, and that immediately before the acquisition the total outstanding stock of P had a fair market value of $200,000. Assuming P owned at least 25 percent of the fair market value of T's stock for 5 years, then for purposes of this subparagraph, P is treated as owning (immediately after the acquisition) 40 percent of the fair market value of its own outstanding stock, determined as follows:

[$150,000/($200,000+$50,000)]×662/3%=40%.

Thus, if the former individual stockholders of T own, immediately after the acquisition more than 10 percent of the fair market value of the outstanding stock of P as a result of owning stock of T, the group of which T was the common parent is treated as continuing in existence with P as the common parent, and the group of which P was the common parent before the acquisition ceases to exist.

(iii) *Election.* The provisions of subdivision (ii) of this subparagraph shall not apply to any acquisition occurring in a taxable year ending after October 7, 1969, unless the first corporation elects to have such subdivision apply. The election shall be made by means of a statement, signed by any officer who is duly authorized to act on behalf of the first corporation, stating that the corporation elects to have the provisions of §1.1502–75(d)(3)(ii) apply and identifying the acquisition to which such provisions will apply. The statement shall be filed, on or before the due date (including extensions of time) of the return for the group's first consolidated return year ending after the date of the acquisition, with the internal revenue officer with whom such return is required to be filed.

(iv) *Transfer of assets to subsidiary.* This subparagraph shall not apply to a transaction to which subparagraph (2)(ii) of this paragraph applies.

(v) *Taxable years.* If, in a transaction described in subdivision (i) of this subparagraph, the first corporation files a consolidated return for the first taxable year ending after the date of acquisition, then:

(a) The first corporation, and each corporation which, immediately before the acquisition, is a member of the group of which the first corporation is the common parent, shall close its taxable year as of the date of acquisition, and each such corporation shall, immediately after the acquisition, change to the taxable year of the second corporation, and

(b) If the acquisition is a transaction described in section 381(a)(2), then for purposes of section 381:

(1) All taxable years ending on or before the date of acquisition, of the first corporation and each corporation which, immediately before the acquisition, is a member of the group of which the first corporation is the common parent, shall be treated as taxable years of the transferor corporation, and

(2) The second corporation shall not close its taxable year merely because of such acquisition, and all taxable years ending on or before the date of acquisition, of the second corporation and each corporation which, immediately before the acquisition, is a member of any group of which the second corporation is the common parent, shall be treated as taxable years of the acquiring corporation.

(vi) *Exception.* With respect to acquisitions occurring before April 17, 1968, subdivision (v) of this subparagraph shall not apply if the parties to the transaction, in their income tax returns, treat subdivision (i) as not affecting the closing of taxable years or the operation of section 381.

(4) [Reserved]

(5) *Coordination with section 833*—(i) *Election to continue old group.* If, solely by reason of the enactment of section 833 (relating to certain Blue Cross or Blue Shield organizations and certain other health insurers), an organization to which section 833 applies (a ‘‘section 833 organization’’) became the new common parent of an old group on January 1, 1987, the old group may elect to continue in existence with that section 833 organization as its new common parent, provided all the old groups having the same section 833 organization as their new common parent elect to continue in existence. To revoke this election, see paragraph (d)(5)(x) of this section. To file as a new group, see paragraph (d)(5)(v) of this section.

(ii) *Old group.* For purposes of this paragraph (d)(5), an old group is a group which, for its last taxable year ending in 1986, either filed a consolidated return or was eligible to (but did not) file a consolidated return.

(iii) *Manner of electing to continue*—(A) *Deemed election.* If all the members of all the old groups having the same section 833 organization as their new common parent are included for the first taxable year beginning after December 31, 1986, on the same consolidated (or amended consolidated) return and a Form 1122 was not filed, the old groups are deemed to have elected under paragraph (d)(5)(i) of this section to continue in existence.

(B) *Delayed election.* If a deemed election to continue in existence was not made under paragraph (d)(5)(iii)(A) of this section, all the members of all the old groups having the same section 833 organization as their new common parent may make a delayed election under paragraph (d)(5)(i) of this section to continue in existence by:

(*1*) Filing an appropriate consolidated (or amended consolidated) return or returns for each taxable year beginning after December 31, 1986, (notwithstanding §1.1502–75(a)(1)) on or before January 3, 1991, and

(*2*) On the top of any such return prominently affixing a statement containing the following declaration: ‘‘THIS RETURN’’ (or, if applicable, ‘‘AMENDED RETURN’’) ‘‘REFLECTS A DELAYED ELECTION TO CONTINUE UNDER §1.1502–75T(d)(5)(iii)(B)’’. A delayed election to continue in existence automatically revokes a deemed election to file as a new group which was made under paragraph (d)(5)(vi) of this section.

(iv) *Effects of election to continue in existence.* If an old group or groups elect to continue in existence under paragraph (d)(5)(i) of this section, the following rules apply:

(A) *Taxable years.* Each member that filed returns other than on a calendar year basis shall close its taxable year on December 31, 1986, and change to a calendar year beginning on January 1, 1987. See section 843 and §1.1502–76(a)(1).

(B) *Carryovers from separate return limitation years.* For purposes of applying the separate return limitation year rules to carryovers from taxable years beginning before 1987 to taxable years beginning after 1986, the following rules apply:

(*1*) Any taxable year beginning before 1987 of a corporation that was not a member of an old group (including a section 833 organization) will be treated as a separate return limitation year;

(*2*) Any taxable year beginning before 1987 of a corporation that was a member of an old group that, without regard to this section and the enactment of section 833, was a separate return limitation year will continue to be treated as a separate return limitation year;

(*3*) Any taxable year beginning before 1987 of a member of an old group (other than a separate return limitation year described in paragraph (d)(5)(iv)(B)(*2*) of this section) will not be treated as a separate return limitation year with respect to any corporation that was a member of such group for each day of that taxable year; and

(*4*) Any taxable year beginning before 1987 of a member of an old group will be treated as a separate return limitation year with respect to any corporation that was not a member of such group for each day of that taxable year (*e.g.*, a corporation that was not a member of an old group, including a section 833 organization, or a corporation that was a member of another old group).

(C) *Five-year rules for life-nonlife groups.* Any life-nonlife election under section 1504(c)(2) in effect for an old group remains in effect. Any old group which was eligible to make a life-nonlife election will remain eligible to make the election. For purposes of section 1503(c), a nonlife member is treated as ineligible under §1.1502–47(d)(13) with respect to a life member, unless both were members of the same affiliated group (determined without regard to the exclusions in section 1504(b) (1) and (2)) for five taxable years immediately preceding the taxable year in which the loss arose. See paragraph (d)(5)(ix) of this section for a tacking rule.

(v) *Election to file as a new group.* If, solely by reason of the enactment of section 833, a section 833 organization became the new common parent of an old group on January 1, 1987, the application of the five-year prohibition on reconsolidation in section 1504(a)(3)(A) to the old group is waived and the old group together with the new section 833 organization common parent may elect to file as a new group provided that all includible corporations elect to file a consolidated (or amended consolidated) return as a new group for the first taxable year beginning after December 31, 1986. To revoke this election, see paragraph (d)(5)(x) of this section.

(vi) *Manner of electing to file as a new group*—(A) *Deemed election.* The old group or groups and the section 833 organization are deemed to have elected under paragraph (d)(5)(v) of this section to file as a new group by filing, for the first taxable year beginning after December 31, 1986, a Form 1122 and a consolidated (or amended consolidated) tax return.

(B) *Delayed election.* If a deemed election to file as a new group was not made pursuant to paragraph (d)(5)(vi)(A) of this section, the old group or groups and the section 833 organization may make a delayed election under paragraph (d)(5)(v) of this section to file as a new group by

(*1*) Filing an appropriate consolidated (or amended consolidated) return or returns for each taxable year beginning after December 31, 1986 (notwithstanding § 1.1502–75(a)(1)) on or before January 3, 1991, and

(*2*) On the top of any such return prominently affixing a statement containing the following declaration: ''THIS RETURN'' (or, if applicable, ''AMENDED RETURN'') ''REFLECTS A DELAYED ELECTION TO FILE AS A NEW GROUP UNDER § 1.1502–75T (d)(5)(vi)(B)''. A delayed election to file as a new group automatically revokes any deemed election to continue in existence which was made under paragraph (d)(5)(iii) of this section.

(vii) *Effects of election to file as a new group.* If an old group or groups elect to file as a new group under paragraph (d)(5)(v) of this section, the following rules apply:

(A) *Termination.* Each old group is treated as if it terminated on January 1, 1987, and the termination is not treated as resulting from the acquisition by a nonmember of all of the stock of the common parent.

(B) *Taxable years.* Each member that filed returns other than on a calendar year basis shall close its taxable year on December 31, 1986, and change to a calendar year beginning on January 1, 1987. See section 843 and § 1.1502–76(a)(1).

(C) *Separate return limitation year and life-nonlife groups.* For purposes of § 1.1502–1(f), sections 1503(c) and 1504(c), and § 1.1502–47, the group is treated as coming into existence as a new group on January 1, 1987. Thus, for example, paragraphs (d)(5)(iv) (B) and (C) of this section do not apply.

(viii) *Earnings and profits.* All distributions after January 1, 1987 by a corporation, whether or not such corporation was a member of an old group, to an existing Blue Cross or Blue Shield organization (as defined in section 833(c)(2)) out of earnings and profits accumulated before 1987 are deemed made out of earnings and profits accumulated in pre-affiliation years. See § 1.1502–32(h)(5).

(ix) *Five-year tacking rules for certain life-nonlife groups.* For purposes of applying § 1.1502–47(d) (5) and (12) to any taxable year ending after 1986 to a corporation, whether or not the corporation was a member of an old group,

(A) The determination of whether the corporation was in existence and a member or tentatively treated as a member of a group, for taxable years ending before 1987, is made without regard to the exclusions under section 1504(b) (1) and (2) of any section 833 organization or life insurance company (as the case may be) and

(B) A section 833 organization is not treated as having a change in tax character solely by reason of the loss of its tax-exempt status due to the enactment of section 833.

This paragraph (d)(5)(ix) does not apply if an election to file as a new group under paragraph (d)(5)(v) of this section is made.

(x) *Time to revoke elections made before September 5, 1990.* An election by an old group to continue in existence or to file as a new group that was made (or deemed made) before September 5, 1990, may be revoked by filing an appropriate return (or returns) on or before January 3, 1991. For purposes of this paragraph (d)(5)(x), appropriate returns include separate returns filed by each member of the group or consolidated returns filed in accordance with a delayed election either under paragraph (d)(5)(iii)(B) or (vi)(B) of this section.

(xi) *Examples.* The following examples illustrate this paragraph (d)(5). In these examples, each corporation uses the calendar year as its taxable year.

Example 1. B is a section 833 organization. For several years, B has owned all of the outstanding stock of X, Y, and Z. X has owned all the outstanding stock of X_1 throughout X_1's existence and Y has owned all of the outstanding stock of Y_1 throughout Y_1's existence. For 1986 X and X_1 filed a consolidated federal income tax return but Y and Y_1 filed separate returns. Under paragraph (d)(5)(ii) of this section, X and X_1 and Y and Y_1 each constitute an old group because they either filed a consolidated return or were eligible to file a consolidated return for 1986. The X and Y groups may elect under paragraph (d)(5)(i) of this section to continue in existence. If they elect to continue, under paragraph (d)(5)(iv)(B) of this section, the separate return limitation year rules apply as follows: any taxable year of B or Z beginning before 1987 is treated as a separate return limitation year with respect to each other and to all other members of the group; any taxable year of X or X_1 beginning before 1987 is treated as a separate return limitation year with respect to B, Z, Y and Y_1, but not with respect to each other; and any taxable year of Y or Y_1 beginning before 1987 is treated as a separate return limitation year with respect to B, Z, X and X_1, but not with respect to each other.

Example 2. The facts are the same as in Example 1 except that B is owned by C, another section 833 organization. If the X and Y groups elect to continue, the results are the same as in Example 1, except that, under paragraph (d)(5)(iv)(B)(*1*) of this section, for purposes of applying the separate return limitation year rules, any taxable year of C beginning before 1987 is also treated as a separate return limitation year with respect to all other members of the group.

Example 3. The facts are the same as in Example 1 except that Y purchased Y_1 on January 1, 1985. If the X and Y groups elect to continue, the results are the same as in Example 1, except that, under paragraph (d)(5)(iv)(B)(*2*) of this section, for purposes of applying the separate return limitation year rules, any taxable year of Y_1 beginning before 1985 is treated as a separate return limitation year with respect to Y as well as with respect to all other members of the group.

Example 4. B, a section 833 organization, has owned all the stock of X since November 1984. X has owned all the stock of L, a life insurance company, throughout L's existence. In 1986, X and L properly filed a life-nonlife consolidated return. Under paragraph (d)(5)(i) of this section, the X group elects to continue in existence. Under paragraph (d)(5)(iv)(C) of this section, the life-nonlife election will remain in effect. However, losses of B which arise before 1990 cannot be used to offset the income of L. See section 1503(c)(2) and §1.1502–47(d)(13) and paragraph (d)(5)(iv)(C) of this section. Under paragraph (d)(5)(iv)(B) of this section, the separate return limitation year rules apply as follows: any taxable year of B beginning before 1987 is treated as a separate return limitation year with respect to all other members of the group; and any taxable year of X or L beginning before 1987 is treated as a separate return limitation year with respect to B, but not with respect to each other.

Example 5. The facts are the same as Example 4 except that, on January 1, 1984, B formed L_1, a life insurance company. Under paragraph (d)(5)(ix) of this section and section 1504(c), the first year L_1 is eligible to join in B's life-nonlife election is 1989.

Example 6. The facts are the same as in Example 4 except that B and the X group elect under paragraph (d)(5)(v) of this section to file as a new group. The X group will be considered to have terminated under §1.1502–75(d)(1) on December 31, 1986. X and L are each separately subject to the separate return limitation year rules of §1.1502–1(f). The first year L and L_1 are eligible to join the new group in a life-nonlife election is 1992 (five years after the new group is formed). See section 1504(c)(2) and paragraphs (d)(5)(vii)(C) and (ix) of this section.

The provisions contained in this Treasury decision are needed to immediately amend the consolidated return regulations in response to changes made by section 1012 of the Tax Reform Act of 1986. It is therefore found impracticable and contrary to the public interest to issue this Treasury decision with notice and public procedure under section 553(b) of title 5 of the United States Code or subject to the effective date limitations of section 553(d) of title 5, United States Code.

(e) *Failure to include subsidiary.* If a consolidated return is required for the taxable year under the provisions of paragraph (a)(2) of this section, the tax liability of all members of the group for such year shall be computed on a consolidated basis even though:

(1) Separate returns are filed by one or more members of the group, or

(2) There has been a failure to include in the consolidated return the income of any member of the group.

If subparagraph (1) of this paragraph applies, the amounts assessed or paid upon the basis of separate returns shall be considered as having been assessed or paid upon the basis of a consolidated return.

(f) *Inclusion of one or more corporations not members of the group*—(1) *Method of determining tax liability.* If a consolidated return includes the income of a corporation which was not a member of the group at any time during the consolidated return year, the tax liability of such corporation will be determined upon the basis of a separate return (or a consolidated return of another group, if paragraph (a)(2) or (b)(3) of this section applies), and the consolidated return will be considered as including only the income of the corporations which were members of the group during that taxable year. If a consolidated return includes the income of two or more corporations which were not members of the group but which constitute another group, the tax liability of such corporations will be computed in the same manner as if separate returns had been made by such corporations unless the Commissioner upon application approves the making of a consolidated return for the other group or unless under paragraph (a)(2) of this section a consolidated return is required for the other group.

(2) *Allocation of tax liability.* In any case in which amounts have been assessed and paid upon the basis of a consolidated return and the tax liability of one or more of the corporations included in the consolidated return is to be computed in the manner described in subparagraph (1) of this paragraph, the amounts so paid shall be allocated between the group composed of the corporations properly included in the consolidated return and each of the corporations the tax liability of which is to be computed on a separate basis (or on the basis of a consolidated return of another group) in such manner as the corporations which were included in the consolidated return may, subject to the approval of the Commissioner, agree upon or in the absence of an agreement upon the method used in allocating the tax liability of the members of the group under the provisions of section 1552(a).

(g) *Computing periods of limitation*—(1) *Income incorrectly included in consolidated return.* If:

(i) A consolidated return is filed by a group for the taxable year, and

(ii) The tax liability of a corporation whose income is included in such return must be computed on the basis of a separate return (or on the basis of a consolidated return with another group), then for the purpose of computing any period of limitation with respect to such separate return (or such other consolidated return), the filing of such consolidated return by the group shall be considered as the making of a return by such corporation.

(2) *Income incorrectly included in separate returns.* If a consolidated return is required for the taxable year under the provisions of paragraph (a)(2) of this section, the filing of separate returns by the members of the group for such year shall not be considered as the making of a return for the purpose of computing any period of limitation with respect to such consolidated return unless there is attached to each such separate return a statement setting forth:

(i) The most recent taxable year of the member for which its income was included in a consolidated return, and

(ii) The reasons for the group's belief that a consolidated return is not required for the taxable year.

(h) *Method of filing return and forms*—(1) *Consolidated return made by common parent corporation.* The consolidated return shall be made on Form 1120 for the group by the common parent corporation. The consolidated return, with Form 851 (affiliations schedule) attached, shall be filed with the district director with whom the common parent would have filed a separate return.

(2) *Filing of Form 1122 for first year.* If, under the provisions of paragraph (a)(1) of this section, a group wishes to exercise its privilege of filing a consolidated return, then a Form 1122 must be executed by each subsidiary and must be attached to the consolidated return for such year. Form 1122 shall not be required for a taxable year if a consolidated return was filed (or was required to be filed) by the group for the immediately preceding taxable year.

(3) *Persons qualified to execute returns and forms.* Each return or form required to be made or prepared by a corporation must be executed by the person authorized under section 6062 to execute returns of separate corporations.

(i) [Reserved]

(j) *Statements and schedules for subsidiaries.* The statement of gross income and deductions and the schedules required by the instructions on the return shall be prepared and filed in columnar form so that the details of the items of gross income, deductions, and credits for each member may be readily audited. Such statements and schedules shall include in columnar form a reconciliation of surplus for each corporation, and a reconciliation of consolidated surplus. Consolidated balance sheets as of the beginning and close of the taxable year of the group, taken from the books of the members, shall accompany the consolidated return and shall be prepared in a form similar to that required for reconciliation of surplus.

(k) *Cross–reference.* See §1.338(h)(10)–1(e)(6) for special rules regarding filing consolidated returns when a section 338(h)(10) election is made for a target acquired from a selling consolidated group.

[T.D. 6894, 31 FR 11794, Sept. 8, 1966, as amended by T.D. 7016, 34 FR 15556, Oct. 7, 1969; T.D. 7024, 35 FR 2774, Feb. 10, 1970; T.D. 7244, 37 FR 28897, Dec. 30, 1972; T.D. 7246, 38 FR 766, Jan. 4, 1973; T.D. 8438, 57 FR 44333, Sept. 25, 1992; T.D. 8515, 59 FR 2984, Jan. 20, 1994; T.D. 8560, 59 FR 41675, 41700, Aug. 15, 1994]

§1.1502–76 Taxable year of members of group.

(a) *Taxable year of members of group*—(1) *Change to parent's taxable year.* The consolidated return of a group must be filed on the basis of the common parent's taxable year, and each subsidiary must adopt the common parent's annual accounting period for the first consolidated return year for which the subsidiary's income is includible in the consolidated return. If any member is on a 52–53-week taxable year, the rule of the preceding sentence shall, with the advance consent of the Commissioner, be deemed satisfied if the taxable years of all members of the group end within the same 7-day period. Any request for such consent shall be filed with the Commissioner of Internal Revenue, Washington, DC 20224, not later than the 30th day before the due date (not including extensions of time) for the filing of the consolidated return.

(2) *Includible insurance company as member of group.* If an includible insurance company required by section 843 to file its return on the basis of a calendar year is a member of the group and if the common parent of such group files its return on the basis of a fiscal year, then the first consolidated return which includes the income of such insurance company may be filed on the basis of the common parent's fiscal year, provided, however, that if such insurance company is a member of the group on the last day of the common parent's taxable year, all members other than such insurance company change to a calendar year or to a 52–53-week taxable year ending within a 7-day period which includes December 31, effective immediately after the close of the common parent's taxable year. If any member changes to a 52–53-week taxable year, the advance consent of the Commissioner shall be obtained in accordance with subparagraph (1) of this paragraph.

(b) *Items included in the consolidated return*—(1) *General rules*—(i) *In general.* A consolidated return must include the common parent's items of income, gain, deduction, loss, and credit for the entire consolidated return year, and each subsidiary's items for the portion of the year for which it is a member. If the consolidated return includes the items of a corporation for only a portion of its tax year determined without taking this section into account, items for the portion of the year not included in the consolidated return must be included in a separate return (including the consolidated return of another group). The rules of this paragraph (b) must be applied to prevent the duplication or elimination of the corporation's items.

(ii) *The day a corporation becomes or ceases to be a member*—(A) *End of the day rule.* If a corporation (S) becomes or ceases to be a member during a consolidated return year, it becomes or ceases to be a member at the end of the day on which its status as a member changes, and its tax year ends for all Federal income tax purposes at the end of that day. Appropriate adjustments must be made if another provision of the Internal Revenue Code or the regulations thereunder contemplates the event occurring before or after S's change in status. For example, S's items restored under §1.1502–13 immediately before it becomes a nonmember are taken into account in determining the basis of S's stock under §1.1502–32. On the other hand, if a section 338(g) election is made in connection with S becoming a member, the deemed asset sale under that section takes place before S becomes a member. See §1.338–1(e)(5) (deemed sale excluded from purchasing corporation's consolidated return.)

(B) *Next day rule.* If, on the day of S's change in status as a member, a transaction occurs that is properly allocable to the portion of S's day after the event resulting in the change, S and all persons related to S under section 267(b) immediately after the event must treat the transaction for all Federal income tax purposes as occurring at the beginning of the following day. A determination as to whether a transaction is properly allocable to the portion of S's day after the event will be respected if it is reasonable and consistently applied by all affected persons. In determining whether an allocation is reasonable, the following factors are among those to be considered—

(*1*) Whether income, gain, deduction, loss, and credit are allocated inconsistently (e.g., to maximize a seller's stock basis adjustments under § 1.1502–32);

(*2*) If the item is from a transaction with respect to S stock, whether it reflects ownership of the stock before or after the event (e.g., if a member transfers encumbered land to nonmember S in exchange for additional S stock in a transaction to which section 351 applies and the exchange results in S becoming a member of the consolidated group, the applicability of section 357(c) to the exchange must be determined under § 1.1502–80(d) by treating the exchange as occurring after the event; on the other hand, if S is a member but has a minority shareholder and becomes a nonmember as a result of its redemption of stock with appreciated property, S's gain under section 311 is treated as from a transaction occurring before the event);

(*3*) Whether the allocation is inconsistent with other requirements under the Internal Revenue Code (e.g., if a section 338(g) election is made in connection with a group's acquisition of S, the deemed asset sale must take place before S becomes a member and S's gain or loss with respect to its assets must be taken into account by S as a nonmember); and

(*4*) Whether other facts exist, such as a prearranged transaction or multiple changes in S's status, indicating that the transaction is not properly allocable to the portion of S's day after the event resulting in S's change.

(C) *Successor corporations.* For purposes of this paragraph (b)(1)(ii), any reference to a corporation includes a reference to a successor or predecessor as the context may require. A corporation is a successor if the basis of its assets is determined, directly or indirectly, in whole or in part, by reference to the basis of the assets of another corporation (the predecessor). For example, if a member forms S, S is treated as a member from the beginning of its existence.

(iii) *Group structure changes.* If the common parent ceases to be the common parent but the group remains in existence, adjustments must be made in accordance with the principles of § 1.1502–75(d)(2) and (3).

(2) *Determination of items included in separate and consolidated returns*—(i) *In general.* The returns for the years that end and begin with S becoming (or ceasing to be) a member are separate tax years for all Federal income tax purposes. The returns are subject to the rules of the Internal Revenue Code applicable to short periods, as if S ceased to exist on becoming a member (or first existed on becoming a nonmember). For example, cost recovery deductions under section 168 must be allocated for short periods. On the other hand, annualization under section 443 is not required of S solely because it has a short year as a result of becoming a member. (Similarly, section 443 applies with respect to a consolidated return only to the extent that the group's return is for a short period and section 443 applies without taking this paragraph (b) into account.)

(ii) *Ratable allocation of a year's items*—(A) *Application.* Although the periods ending and beginning with S's change in status are different tax years, items (other than extraordinary items) may be ratably allocated between the periods if—

(*1*) S is not required to change its annual accounting period or its method of accounting as a result of its change in status (e.g., because its stock is sold between consolidated groups that have the same annual accounting periods); and

(*2*) An irrevocable ratable allocation election is made under paragraph (b)(2)(ii)(D) of this section.

(B) *General rule*—(*1*) *Allocation within original year.* Under a ratable allocation election, paragraph (b)(2) of this section applies by allocating to each day of S's original year (S's tax year determined without taking this section into account) an equal portion of S's items taken into account in the original year, except that extraordinary items must be allocated to the day that they are taken into account. All persons affected by the election must take into account S's extraordinary items and the ratable allocation of S's remaining items in a manner consistent with the election.

(*2*) *Items to be allocated.* Under ratable allocation, the items to be allocated and their timing, location, character, and source are generally determined by treating the original year as a single tax year, and the items are not subject to the rules of the Internal Revenue Code applicable to short periods (unless the original year is a short period). However, the years ending and beginning with S's change in status are treated as different tax years (and as short periods) with respect to any item carried to or from these years (e.g., a net operating loss carried under section 172) and with respect to the application of section 481.

(*3*) *Multiple applications.* If this paragraph (b) applies more than once with respect to an original year, adjustments must be made in accordance with the principles of this paragraph (b). For example, if S becomes a member of two different consolidated groups during the same original year and ratable allocation is elected with respect to both groups, ratable allocation is generally determined for both groups by treating the original year as a single tax year; however, if ratable allocation is elected only with respect to the first group, the ratable allocation is determined by treating the original year as a short period that does not include the period that S is a member of the second group. Ratable allocation is not a method of accounting, and ratable allocation with respect to one application of this paragraph (b) to S does not require ratable allocation to be subsequently applied with respect to S.

(C) *Extraordinary items.* An extraordinary item is—

(*1*) Any item from the disposition or abandonment of a capital asset as defined in section 1221 (determined without the application of any other rules of law);

(*2*) Any item from the disposition or abandonment of property used in a trade or business as defined in section 1231(b) (determined without the application of any holding period requirement);

(*3*) Any item from the disposition or abandonment of an asset described in section 1221(1), (3), (4), or (5), if substantially all the assets in the same category from the same trade or business are disposed of or abandoned in one transaction (or series of related transactions);

(*4*) Any item from assets disposed of in an applicable asset acquisition under section 1060(c);

(*5*) Any item carried to or from any portion of the original year (e.g., a net operating loss carried under section 172), and any section 481(a) adjustment;

(*6*) The effects of any change in accounting method initiated by the filing of the appropriate form after S's change in status;

(*7*) Any item from the discharge or retirement of indebtedness (e.g., cancellation of indebtedness income or a deduction for retirement at a premium);

(*8*) Any item from the settlement of a tort or similar third-party liability;

(*9*) Any compensation-related deduction in connection with S's change in status (including, for example, deductions from bonus, severance, and option cancellation payments made in connection with S's change in status);

(*10*) Any dividend income from a nonmember that S controls within the meaning of section 304 at the time the dividend is taken into account;

(*11*) Any deemed income inclusion from a foreign corporation, or any deferred tax amount on an excess distribution from a passive foreign investment company under section 1291;

(*12*) Any interest expense allocable under section 172(h) to a corporate equity reduction transaction causing this paragraph (b) to apply;

(*13*) Any credit, to the extent it arises from activities or items that are not ratably allocated (e.g., the rehabilitation credit under section 47, which is based on placement in service); and

(*14*) Any item which, in the opinion of the Commissioner, would, if ratably allocated, result in a substantial distortion of income in any consolidated return or separate return in which the item is included.

(D) *Election.* The election to ratably allocate items under this paragraph (b)(2)(ii) must be made in a separate statement entitled ''THIS IS AN ELECTION UNDER § 1.1502–76(b)(2)(ii) TO RATABLY ALLOCATE THE YEAR'S ITEMS OF [insert name and employer identification number of the member].'' The statement must be signed by the member and by the common parent of each affected group, and must be filed with the returns including the items for the year's ending and beginning with S's change in status. If two or more members of the same consolidated group, as a consequence of the same plan or arrangement, cease to be members of that group and remain affiliated as members of another consolidated group, an election under this paragraph (b)(2)(ii)(D) may be made only if it is made by each such member. The statement must provide all of the following:

(*1*) Identify the extraordinary items, their amounts, and the separate or consolidated returns in which they are included.

(*2*) Identify the aggregate amount to be ratably allocated, and the portion of the amount included in the separate and consolidated returns.

(*3*) Include the name and employer identification number of the common parent (if any) of each group that must take the items into account.

(iii) *Ratable allocation of a month's items.* If ratable allocation under paragraph (b)(2)(ii) of this section is not elected (e.g., because S is required to change its annual accounting period), this paragraph (b)(2)(iii) may be applied to ratably allocate only S's items taken into account in the month of its change in status, but only if the allocation is consistently applied by all affected persons. The ratable allocation is made by applying the principles of paragraph (b)(2)(ii) of this section under any reasonable method. For example, S may close its books both at the end of the preceding month and at the end of the month of the change, and allocate only its items (other than extraordinary items) from the month of the change. See paragraph (b)(1)(ii)(B) of this section for factors to be considered in determining whether the method is reasonable.

(iv) *Taxes.* To the extent properly taken into account during the member's tax year (determined without the application of this paragraph (b)), Federal, state, local, and foreign taxes are allocated under paragraph (b)(2) of this section on the basis of the items or activities to which the taxes relate. Thus, income tax is allocated based on the inclusion of the income (determined under the principles of this paragraph (b)) to which the tax relates. For example, if a calendar-year domestic corporation has $100 of foreign source dividend income (determined in accordance with United States tax accounting principles but without taking this paragraph (b) into account) that is passive income for purposes of section 904, and $60 of the income is allocated under this paragraph (b) to the period of the calendar year after it becomes a member of a consolidated group, then 60% of the corporation's deemed paid foreign tax credit associated with its dividend income for the calendar year is taken into account in computing the group's passive basket consolidated foreign tax credit. Similarly, property taxes relate to the ownership of property and are allocated over the period that the property is owned. This paragraph (b)(2)(iv) applies without regard to any determination or allocation by another taxing jurisdiction.

(v) *Passthrough entities*—(A) *In general.* If S is a partner in a partnership or an owner of a similar interest with respect to which items of the entity are taken into account by S, S is treated, solely for purposes of determining the year to which the entity's items are allocated under paragraph (b)(2) of this section, as selling or exchanging its entire interest in the entity immediately before S's change in status.

(B) *Treatment as a conduit.* For purposes of this paragraph (b)(2), if a member (together with other members) would be treated under section 318(a)(2) as owning an aggregate of at least 50% of any stock owned by the passthrough entity, the method that is used to determine the inclusion of the entity's items in the consolidated or separate return must be the same method that is used to determine the inclusion of the member's items in the consolidated or separate return.

(C) *Exception for certain foreign entities.* This paragraph (b)(2)(v) does not apply to any foreign corporation generating the deemed inclusion of income, or to any passive foreign investment company generating a deferred tax amount on an excess distribution under section 1291.

(3) *Anti-avoidance rule.* If any person acts with a principal purpose contrary to the purposes of this paragraph (b), to substantially reduce the Federal income tax liability of any person, adjustments must be made as necessary to carry out the purposes of this section.

(4) *Examples.* For purposes of the examples in this paragraph (b), unless otherwise stated, P and X are common parents of calendar-year consolidated groups, P owns all of the only class of T's stock, T owns no stock of lower-tier members, all persons use the accrual method of accounting, the facts set forth the only corporate activity, all transactions are between unrelated persons, tax liabilities are disregarded, and any election required under paragraph (b)(2) of this section is properly made. The principles of this paragraph (b) are illustrated by the following examples.

Example 1. Items allocated between consolidated and separate returns. (a) *Facts.* P and S are the only members of the P group. P sells all of S's stock to individual A on June 30, and therefore S becomes a nonmember on July 1 of Year 2.

(b) *Analysis.* Under paragraph (b)(1) of this section, the P group's consolidated return for Year 2 includes P's income for the entire tax year and S's income for the period from January 1 to June 30, and S must file a separate return for the period from July 1 to December 31.

(c) *Acquisition of another subsidiary before end of tax year.* The facts are the same as in paragraph (a) of this *Example 1,* except that on July 31 P acquires all the stock of T (which filed a separate return for its year ending on November 30 of Year 1) and T therefore becomes a member on August 1 of Year 2. Under §1.1502–75(d) and paragraph (b)(1) of this section, the P group's consolidated return for Year 2 includes P's income for the entire year, S's income from January 1 to June 30, and T's income from August 1 to December 31. S must file a separate return that includes its income from July 1 to December 31, and T must file a separate return that includes its income from December 1 of Year 1 to July 31 of Year 2. (If P had acquired T after December 31, the P group that included S is a different group from the P group that includes T, and, for example, the P group that includes T must make a separate election under section 1501 and §1.1502–75 if consolidated returns are to be filed.)

Example 2. Group structure change. (a) *Facts.* P owns all of the stock of S and T. Shortly after the beginning of Year 1, P merges into T in a reorganization described in section 368(a)(1)(A) (and in section 368(a)(1)(D)), and P's shareholders receive T's stock in exchange for all of P's stock. The P group is treated under §1.1502–75(d)(2)(ii) as remaining in existence with T as its common parent.

(b) *Analysis.* Under paragraph (b)(1) of this section, the P group's return must include the common parent's items for the entire consolidated return year and, if the common parent ceases to be the common parent but the group remains in existence, appropriate adjustments must be made. Consequently, although P did not exist for all of Year 1, P's items for the portion of Year 1 ending with the merger are treated as the items of the common parent that must be included in the P group's return for Year 1.

(c) *Reverse acquisition.* Assume instead that X acquires all of P's assets in exchange for more than 50% of X's stock in a reorganization described in section 368(a)(1)(D). The reorganization constitutes a reverse acquisition under §1.1502–75(d)(3), with the X group terminating and the P group surviving with X as its common parent. Consequently, P's items for the portion of Year 1 ending with the acquisition are treated as the items of the common parent that must be included in the P group's return for Year 1, and X's items are treated for purposes of paragraph (b)(1) of this section as the items of a subsidiary included in the P group's return for the portion of Year 1 for which X is a member.

Example 3. Ratable allocation. (a) *Facts.* P sells all of T's stock to X, and T becomes a nonmember on July 1 of Year 1. T engages in the production and sale of merchandise throughout Year 1 and is required to use inventories. The sale is treated as causing T's tax year to end on June 30, and the periods beginning and ending with the sale are treated as two tax years for Federal income tax purposes.

(b) *Analysis.* If ratable allocation under paragraph (b)(2)(ii) of this section is not elected, T must perform an inventory valuation as of the acquisition and also as of the end of Year 1. If ratable allocation is elected, T must perform an inventory valuation only as of the close of Year 1, and T's income from inventory is ratably allocated, along with T's other items that are not extraordinary items, between the P and X consolidated returns.

(c) *Merger into nonmember.* Assume instead that T merges into a wholly owned subsidiary of X in a reorganization described in section 368(a)(2)(D), and P receives 10% of X's stock in exchange for all of T's stock. Under paragraph (b)(2)(ii)(B) of this section, because T's tax year ends on June 30 under section 381(b)(1), T's original year determined without taking paragraph (b) of this section into account also ends on June 30. Consequently, a ratable allocation under paragraph (b)(2)(ii) of this section is the same as an allocation based on closing the books.

Example 4. Net operating loss. P sells all of T's stock to X, T becomes a nonmember on June 30 of Year 1, and ratable allocation under paragraph (b)(2)(ii) of this section is elected. Under ratable allocation, the X group has a $100 consolidated net operating loss for Year 1, all of which is attributable to T. However, because of extraordinary items, T has $100 of income for the portion of Year 1 that T is a member of the P group. Under paragraph (b)(2)(ii)(B)(*2*) of this section, T's loss may be carried back from the X group to the portion of Year 1 that T was a member of the P group. See also section 172 and § 1.1502–21(b). Under paragraph (b)(2)(ii)(C)(*5*) of this section, any item carried to or from any portion of the original year is an extraordinary item, and the loss therefore is not taken into account again in determining the ratable allocation under paragraph (b)(2)(ii) of this section.

Example 5. Employee benefit plans. (a) *Facts.* P sells all of T's stock to X, and T becomes a nonmember on June 30 of Year 1. On March 15 of Year 2, T contributes $100 to its retirement plan, which is a qualified plan under section 401(a). T is not required to make quarterly contributions to the plan for Year 1 under section 412(m). The contribution is made on account of T's taxable period beginning on July 1 of Year 1, and is deemed in accordance with section 404(a)(6) to have been made on the last day of T's taxable period beginning on July 1 of Year 1. Ratable allocation under paragraph (b)(2)(ii) of this section is not elected.

(b) *Analysis.* Under paragraph (b) of this section, the sale is treated as causing T's tax year to end on June 30, and the period beginning on July 1 is treated as a separate annual accounting period for all Federal income tax purposes. T's income from January 1 to June 30 is included in the P group's Year 1 return, and T's income from July 1 to December 31 is included in the X group's Year 1 return. Thus, the $100 contribution is deductible by T for the period of Year 1 that it is a member of the X group, subject to the applicable limitations of section 404, if a contribution on the last day of that period would otherwise be deductible.

(c) The facts are the same as in paragraph (a) of this *Example 5,* except that, in accordance with section 404(a)(6), $40 of the $100 contribution is made on account of T's taxable period beginning on January 1 of Year 1 and is deemed to be made on the last day of T's taxable period beginning on January 1 of Year 1. The remaining $60 is made on account of T's taxable period beginning on July 1 of Year 1 and is deemed to be made on the last day of T's taxable period beginning on July 1 of Year 1. As in paragraph (b) of this *Example 5,* under paragraph (b) of this section, the sale is treated as causing T's tax year to end on June 30, and the period beginning on July 1 is treated as a separate annual accounting period for all Federal income tax purposes. The $40 portion of the contribution is deductible by T for the period of Year 1 that it is a member of the P group, subject to the applicable limitations of section 404 and provided that a $40 contribution on the last day of that period would otherwise be deductible for that period, and the $60 portion is deductible by T for the period of Year 1 that it is a member of the X group, subject to the same conditions.

(d) *Ratable allocation.* The facts are the same as in paragraph (a) of this *Example 5,* except that P, T, and X elect ratable allocation under paragraph (b)(2)(ii) of this section and T's deduction for the retirement plan contribution is not an extraordinary item. T's deduction may be ratably allocated, subject to the applicable limitations of section 404, and is allowable only if a contribution on the last day of Year 1 otherwise would be deductible for any period in the year. (The results would be the same if S were an unaffiliated corporation when acquired by X, and the due date of its last separate return (including extensions) were before the pension contribution was made on March 15 of Year 2.)

Example 6. Allocation of partnership items. (a) *Facts.* P sells all of T's stock to X, and T becomes a nonmember on June 30 of Year 1. T has a 10% interest in the capital and profits of a calendar-year partnership.

(b) *Analysis.* Under paragraph (b)(2)(v)(A) of this section, T is treated, solely for purposes of determining T's tax year in which the partnership's items are included, as selling or exchanging its entire interest in the partnership as of P's sale of T's stock. Thus, the deemed disposition is not taken into account under section 708, it does not result in gain or loss being recognized by T, and T's holding period is unaffected. However, under section 706(a), in determining T's income, T is required to include its distributive share of partnership items for the partnership's year ending within or with T's tax year. Under section 706(c)(2), the partnership's tax year is treated as closing with respect to T for this purpose as of P's sale of T's stock. The allocation of T's distributive share of partnership items must be made under §1.706–1(c)(2)(ii).

(c) *Controlled partnership.* The facts are the same as in paragraph (a) of this *Example 6,* except that T has a 75% interest in the capital and profits of the partnership. Under paragraph (b)(2)(v)(B) of this section, T's distributive share of the partnership's items is treated as T's items for purposes of paragraph (b)(2) of this section. Thus, if ratable allocation under paragraph (b)(2)(ii) of this section is not elected, T's distributive share of the partnership's items must be determined under §1.706–1(c)(2)(ii) by an interim closing of the partnership's books. Similarly, if ratable allocation is elected for T's items that are not extraordinary items, T's distributive share of the partnership's non-extraordinary items must also be ratably allocated under §1.706–1(c)(2)(ii).

(5) *Effective date*—(i) *General rule.* This paragraph (b) applies to corporations becoming or ceasing to be members of consolidated groups on or after January 1, 1995.

(ii) *Prior law.* For prior transactions, see prior regulations under section 1502 as in effect with respect to the transaction. See, e.g., §1.1502–76(b) and (d) as contained in the 26 CFR part 1 edition revised as of April 1, 1994. However, §1.1502–76(b)(5) and (6) as contained in the 26 CFR part 1 edition revised as of April 1, 1994 do not apply with respect to corporations becoming or ceasing to be members of consolidated groups on or after January 1, 1995. If both this paragraph (b) and prior law may apply to determine the inclusion of any amount in a return, appropriate adjustments must be made to prevent the omission or duplication of the amount.

(c) *Time for making separate returns for periods not included in consolidated return*—(1) *Consolidated return filed by due date for separate return.* If the group has filed a consolidated return on or before the due date for the filing of a subsidiary's separate return (including extensions of time and determined without regard to any change of its taxable year required under paragraph (a) of this section), then the separate return for any portion of the subsidiary's taxable year for which its income is not included in the consolidated return of the group must be filed no later than the due date of such consolidated return (including extensions of time).

(2) *Consolidated return not filed by due date for separate return.* If the group has not filed a consolidated return on or before the due date for the filing of a subsidiary corporation's separate return (including extensions of time and determined without regard to any change of its taxable year required under paragraph (a) of this section), then on or before such due date such subsidiary shall file a separate return either for the portion of its taxable year for which its income would not be included in a consolidated return if such a return were filed, or for its complete taxable year. However, if a separate return is filed for such portion of its taxable year and the group subsequently does not file a consolidated return, such subsidiary corporation shall file a substituted return for its complete taxable year not later than the due date (including extensions of time) prescribed for the filing of the common parent's return. On the other hand, if the return is filed for the subsidiary's complete taxable year and the group later files a consolidated return, such subsidiary must file an amended return not later than the due date (including extensions of time) for the filing of the consolidated return of the group. Such amended return shall be for that portion of such subsidiary's taxable year which is not included in the consolidated return. If, under this subparagraph, a substituted return must be filed, then the return previously filed shall not be considered a return within the meaning of section 6011. If, under this subparagraph, a substituted or amended return must be filed, then, for purposes of sections 6513(a) and 6601(a), the last date prescribed for payment of tax shall be the due date (not including extensions of time) for the filing of the subsidiary's separate return (determined without regard to this subparagraph and without regard to any change of its taxable year required under paragraph (a) of this section).

(3) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example (1). Corporation P, which filed a separate return for the calendar year 1966, acquires all of the stock of corporation S as of the close of December 31, 1966. Corporation S reports its income on the basis of a fiscal year ending March 31. On June 15, 1967, the due date for the filing of a separate return by S (assuming no extensions of time), a consolidated return has not been filed for the group (P and S). On such date S may either file a return for the period April 1, 1966, through December 31, 1966, or it may file a return for the complete fiscal year ending March 31, 1967. If S files a return for the short period ending December 31, 1966, and if the group elects not to file a consolidated return for the calendar year 1967, S, on or before March 15, 1968 (the due date of P's return, assuming no extensions of time), must file a substituted return for the complete fiscal year ending March 31, 1967, in lieu of the return previously filed for the short period. Interest is computed from June 15, 1967. If, however, S files a return for the complete fiscal year ending March 31, 1967, and the group elects to file a consolidated return for the calendar year 1967, then S must file an amended return covering the period from April 1, 1966, through December 31, 1966, in lieu of the return previously filed for the complete fiscal year. Interest is computed from June 15, 1967.

Example (2). Assume the same facts as in example (1) except that corporation P acquires all of the stock of corporation S at the close of September 30, 1967, and that P files a consolidated return for the group for 1967 on March 15, 1968 (not having obtained any extensions of time). Since a consolidated return has been filed on or before the due date (June 15, 1968) for the filing of the separate return for the taxable year ending March 31, 1968, the return of S for the short taxable year beginning April 1, 1967, and ending September 30, 1967, should be filed no later than March 15, 1968.

[T.D. 6894, 31 FR 11794, Sept. 8, 1966, as amended by T.D. 7244, 37 FR 28897, Dec. 30, 1972; T.D. 7246, 38 FR 766, Jan. 4, 1973; T.D. 8560, 59 FR 41700, Aug. 15, 1994; T.D. 8560, 62 FR 12098, Mar. 14, 1997]

§ 1.1502–77 Common parent agent for subsidiaries.

(a) *Scope of agency of common parent corporation.* The common parent, for all purposes (other than the making of the consent required by paragraph (a)(1) of § 1.1502–75, the making of an election under section 936(e), the making of an election to be treated as a DISC under § 1.992–2, and a change of the annual accounting period pursuant to paragraph (b)(3)(ii) of § 1.991–1) shall be the sole agent for each subsidiary in the group, duly authorized to act in its own name in all matters relating to the tax liability for the consolidated return year. Except as provided in the preceding sentence, no subsidiary shall have authority to act for or to represent itself in any such matter. For example, any election available to a subsidiary corporation in the computation of its seperate taxable income must be made by the common parent, as must any change in an election previously made by the subsidiary corporation; all correspondence will be carried on directly with the common parent; the common parent shall file for all extensions of time including extensions of time for payment of tax under section 6164; notices of deficiencies will be mailed only to the common parent, and the mailing to the common parent shall be considered as a mailing to each subsidiary in the group; notice and demand for payment of taxes will be given only to the common parent and such notice and demand will be considered as a notice and demand to each subsidiary; the common parent will file petitions and conduct proceedings before the Tax Court of the United States, and any such petition shall be considered as also having been filed by each such subsidiary. The common parent will file claims for refund or credit, and any refund will be made directly to and in the name of the common parent and will discharge any liability of the Government in respect thereof to any such subsidiary; and the common parent in its name will give waivers, give bonds, and execute closing agreements, offers in compromise, and all other documents, and any waiver or bond so given, or agreement, offer in compromise, or any other document so executed, shall be considered as having also been given or executed by each such subsidiary. Notwithstanding the provisions of this paragraph, any notice of deficiency, in respect of the tax for a consolidated return year, will name each corporation which was a member of the group during any part of such period (but a failure to include the name of any such member will not affect the validity of the notice of deficiency as to the other members); any notice and demand for payment will name each corporation which was a member of the group during any part of such period (but a failure to include the name of any such member will not affect the validity of the notice and demand as to the other members); and any levy, any notice of a lien, or any other proceeding to collect the amount of any assessment, after the assessment has been made, will name the corporation from which such collection is to be made. The provisions of this paragraph shall apply whether or not a consolidated return is made for any subsequent year, and whether or not one or more subsidiaries have become or have ceased to be members of the group at any time. Notwithstanding the provisions of this paragraph, the district director may, upon notifying the common parent, deal directly with any member of the group in respect of its liability, in which event such member shall have full authority to act for itself.

(b) *Notification of deficiency to corporation which has ceased to be a member of the group.* If a subsidiary has ceased to be a member of the group and if such subsidiary files written notice of such cessation with the district director with whom the consolidated return is filed, then such district director upon request of such subsidiary will furnish it with a copy of any notice of deficiency in respect of the tax for a consolidated return year for which it was a member and a copy of any notice and demand for payment of such deficiency. The filing of such written notification and request by a corporation shall not have the effect of limiting the scope of the agency of the common parent provided for in paragraph (a) of this section and a failure by such district director to comply with such written request shall not have the effect of limiting the tax liability of such corporation provided for in §1.1502–6.

(c) *Effect of waiver given by common parent.* Unless the district director agrees to the contrary, an agreement entered into by the common parent extending the time within which an assessment may be made or levy or proceeding in court begun in respect of the tax for a consolidated return year shall be applicable:

(1) To each corporation which was a member of the group during any part of such taxable year, and

(2) To each corporation the income of which was included in the consolidated return for such taxable year, notwithstanding that the tax liability of any such corporation is subsequently computed on the basis of a separate return under the provisions of §1.1502–75.

(d) *Effect of dissolution of common parent corporation.* If the common parent corporation contemplates dissolution, or is about to be dissolved, or if for any other reason its existence is about to terminate, it shall forthwith notify the district director with whom the consolidated return is filed of such fact and designate, subject to the approval of such district director, another member to act as agent in its place to the same extent and subject to the same conditions and limitations as are applicable to the common parent. If the notice thus required is not given by the common parent, or the designation is not approved by the district director, the remaining members may, subject to the approval of such district director, designate another member to act as such agent, and notice of such designation shall be given to such district director. Until a notice in writing designating a new agent has been approved by such district director, any notice of deficiency or other communication mailed to the common parent shall be considered as having been properly mailed to the agent of the group; or, if such district director has reason to believe that the existence of the common parent has terminated, he may, if he deems it advisable, deal directly with any member in respect of its liability.

(e) *Cross-references*—(1) *Alternative agents.* For rules relating to alternative agents of the group, see §1.1502–77.

(2) *Groups that include insolvent financial institutions.* For further rules applicable to groups that include insolvent financial institutions, see §301.6402–7 of this chapter.

[T.D. 6894, 31 FR 11794, Sept. 8, 1966, as amended by T.D. 7323, 39 FR 34409, Sept. 25, 1974; T.D. 7673, 45 FR 8588, Feb. 8, 1980; T.D. 8226, 53 FR 34733, Sept. 8, 1988; T.D. 8446, 57 FR 53034, Nov. 6, 1992]

§ 1.1502–77T Alternative agents of the group (temporary).

(a) *General rules*—(1) *Scope.* This section applies if the corporation that is the common parent of the group ceases to be the common parent, whether or not the group remains in existence under § 1.1502–75(d).

(2) *Notice of deficiency.* A notice of deficiency mailed to any one or more corporations referred to in paragraph (a)(4) of this section is deemed for purposes of § 1.1502–77 to be mailed to the agent of the group. If the group has designated an agent that has been approved by the district director under § 1.1502–77(d), a notice of deficiency shall be mailed to that designated agent in addition to any other corporation referred to in paragraph (a)(4) of this section. However, failure by the district director to mail a notice of deficiency to that designated agent shall not invalidate the notice of deficiency mailed to any other corporation referred to in paragraph (a)(4) of this section.

(3) *Waiver of statute of limitations.* A waiver of the statute of limitations with respect to the group given by any one or more corporations referred to in paragraph (a)(4) of this section is deemed to be given by the agent of the group.

(4) *Alternative agents.* The corporations referred to in paragraph (a) (2) and (3) of this section are—

(i) The common parent of the group for all or any part of the year to which the notice or waiver applies,

(ii) A successor to the former common parent in a transaction to which section 381(a) applies,

(iii) The agent designated by the group under § 1.1502–77(d), or

(iv) If the group remains in existence under § 1.1502–75(d) (2) or (3), the common parent of the group at the time the notice is mailed or the waiver given.

(b) *Effective date.* Paragraph (a) of this section applies to statutory notices and waivers of the statute of limitations for taxable years for which the due date (without extensions) of the consolidated return is after September 7, 1988.

[T.D. 8226, 53 FR 34733, Sept. 8, 1988]

§ 1.1502–78 Tentative carryback adjustments.

(a) *General rule.* If a group has a consolidated net operating loss, a consolidated net capital loss, or a consolidated unused investment credit for any taxable year, then any application under section 6411 for a tentative carryback adjustment of the taxes for a consolidated return year or years preceding such year shall be made by the common parent corporation to the extent such loss or unused investment credit is not apportioned to a corporation for a separate return year pursuant to §§ 1.1502–21T(b), 1.1502–22T(b), or 1.1502–79(c) (or §§ 1.1502–79A(a), 1.1502–79A(b), or 1.1502–79(c), as appropriate. In the case of the portion of a consolidated net operating loss or consolidated net capital loss or consolidated unused investment credit to which the preceding sentence does not apply, and in the case of a net capital or net operating loss or unused investment credit arising in a separate return year which may be carried back to a consolidated return year, the corporation or corporations to which any such loss or credit is attributable shall make any application under section 6411.

(b) *Special rules*—(1) *Payment of refund.* Any refund allowable under an application referred to in paragraph (a) of this section shall be made directly to and in the name of the corporation filing the application, except that in all cases where a loss is deducted from the consolidated taxable income or a credit is allowed in computing the consolidated tax liability for a consolidated return year, any refund shall be made directly to and in the name of the common parent corporation. The payment of any such refund shall discharge any liability of the Government with respect to such refund.

(2) *Several liability.* If a group filed a consolidated return for a taxable year for which there was an adjustment by reason of an application under section 6411, and if a deficiency is assessed against such group under section 6213(b)(2), then each member of such group shall be severally liable for such deficiency including any interest or penalty assessed in connection with such deficiency.

(3) *Groups that include insolvent financial institutions.* For further rules applicable to groups that include insolvent financial institutions, see §301.6402–7 of this chapter.

(c) *Examples.* The provisions of paragraphs (a) and (b) of this section may be illustrated by the following examples:

Example (1). Corporations P, S, and S–1 filed a consolidated return for the calendar year 1966. P, S, and S–1 also filed a consolidated return for the calendar year 1969. The group incurred a consolidated net operating loss in 1969 attributable to S–1 which may be carried back to 1966 as a consolidated net operating loss carryback. If a tentative carryback adjustment is desired, P, the common parent, must file an application under section 6411 and any refund will be made to P.

Example (2). Assume the same facts as in example (1) except that P, S, and S–1 filed separate returns for the calendar year 1969, even though they were members of the same group for such year. S–1 incurred a net operating loss in 1969 which may be carried back to 1966. If a tentative carryback adjustment is desired, S–1 must file an application under section 6411 and any refund from such application will be made to P.

Example (3). Corporations X, Y, and Z filed a consolidated return for the calendar year 1966. Z ceased to be a member of the group in 1967. Z filed a separate return for 1968 while X and Y filed a consolidated return for such year. The group incurred a consolidated net operating loss in 1968 attributable to Y, which may be carried back to 1966. Z also incurred a net operating loss for 1968 which may be carried back to 1966. If a tentative carryback adjustment is claimed with respect to the consolidated net operating loss, X, the common parent, must file an application under section 6411. If a tentative carryback adjustment is desired with respect to Z's loss, Z must file an application. Any refunds attributable to either application will be made to X. If an assessment is made under section 6213(b)(2) to recover an excessive tentative allowance made with respect to calendar year 1966, X, Y, and Z are severally liable for such assessment.

Example (4). Corporations L and M filed a consolidated return for the calendar year 1966. Corporation N filed a separate return for such year. Later, N became a member of the group and filed a consolidated return with the group for the calendar year 1968. The group incurred a consolidated net operating loss in 1968 attributable to N which may be carried back to N's separate return for 1966. If a tentative carryback adjustment is desired, N must file an application under section 6411 and any refund will be made directly to N.

(d) *Adjustments of overpayments of estimated income tax.* If a group paid its estimated income tax on a consolidated basis, then any application under section 6425 for an adjustment of overpayment of estimated income tax shall be made by the common parent corporation. If the members of a group paid estimated income taxes on a separate basis, then any application under section 6425 shall be made by the member of the group which claims an overpayment on a separate basis. Any refund allowable under an application under section 6425 shall be made directly to and in the name of the corporation filing the application.

[T.D. 6894, 31 FR 11794, Sept. 3, 1966, as amended by T.D. 7059, 35 FR 14546, Sept. 17, 1970; T.D. 7246, 38 FR 767, Jan. 4, 1973; T.D. 8387, 56 FR 67489, Dec. 31, 1991; T.D. 8446, 57 FR 53034, Nov. 6, 1992; T.D. 8677, 61 FR 33324, June 27, 1996]

§1.1502–79 Separate return years.

(a) *Carryover and carryback of consolidated net operating losses to separate return years.* For losses arising in consolidated return years beginning before January 1, 1997, see §1.1502–79A(a). For later years, see §1.1502–21T(b).

(b) *Carryover and carryback of consolidated net capital loss to separate return years.* For losses arising in consolidated return years beginning before January 1, 1997, see §1.1502–79A(b). For later years, see §1.1502–22T(b).

(c) *Carryover and carryback of consolidated unused investment credit to separate return years*—(1) *In general.* If a consolidated unused investment credit can be carried under the principles of section 46(b) and paragraph (b) of §1.1502–3 to a separate return year of a corporation (or could have been so carried if such corporation were in existence) which was a member of the group in the year in which such unused credit arose, then the portion of such consolidated unused credit attributable to such corporation (as determined under subparagraph (2) of this paragraph) shall be apportioned to such corporation (and any successor to such corporation in a transaction to which section 381(a) applies) under the principles of §1.1502–21T(b) (or §§1.1502–79A(a)(1) and (2), as appropriate) and shall be an investment credit carryover or carryback to such separate return year.

(2) *Portion of consolidated unused investment credit attributable to a member*—(i) *Investment credit carryback.* In the case of a consolidated unused credit which is an investment credit carryback, the portion of such consolidated unused credit attributable to a member of the group is an amount equal to such consolidated unused credit multiplied by a fraction, the numerator of which is the credit earned of such member for the consolidated unused credit year, and the denominator of which is the consolidated credit earned for such unused credit year.

(ii) *Investment credit carryover.* In the case of a consolidated unused credit which is an investment credit carryover, the portion of such consolidated unused credit attributable to a member of the group is an amount equal to such consolidated unused credit multiplied by a fraction, the numerator of which is the credit earned with respect to any section 38 property placed in service in the consolidated unused credit year and owned by such member (whether or not placed in service by such member) at the close of the last day as of which the taxable income of such member is included in a consolidated return filed by the group, and the denominator of which is the consolidated credit earned for such unused credit year.

(d) *Carryover and carryback of consolidated unused foreign tax*—(1) *In general.* If a consolidated unused foreign tax can be carried under the principles of section 904(d) and paragraph (e) of § 1.1502–4 to a separate return year of a corporation (or could have been so carried if such corporation were in existence) which was a member of the group in the year in which such unused foreign tax arose, then the portion of such consolidated unused foreign tax attributable to such corporation (as determined under subparagraph (2) of this paragraph) shall be apportioned to such corporation (and any successor to such corporation in a transaction to which section 381(a) applies) under the principles of § 1.1502–21T(b) (or §§ 1.1502–79A(a)(1) and (2), as appropriate) and shall be deemed paid or accrued in such separate return year to the extent provided in section 904(d).

(2) *Portion of consolidated unused foreign tax attributable to a member.* The portion of a consolidated unused foreign tax for any year attributable to a member of a group is an amount equal to such consolidated unused foreign tax multipled by a fraction, the numerator of which is the foreign taxes paid or accrued for such year (including those taxes deemed paid or accrued, other than by reason of section 904(d)) to each foreign country or possession (or to all foreign countries or possessions if the overall limitation is effective) by such member, and the denominator of which is the aggregate of all such taxes paid or accrued for such year (including those taxes deemed paid or accrued, other than by reason of section 904(d)) to each such foreign country or possession (or to all foreign countries or possessions if the overall limitation is effective) by all the members of the group.

(e) *Carryover of consolidated excess charitable contributions to separate return years*—(1) *In general.* If the consolidated excess charitable contributions for any taxable year can be carried under the principles of section 170(b)(2) and paragraph (b) of § 1.1502–24 to a separate return year of a corporation (or could have been so carried if such corporation were in existence) which was a member of the group in the year in which such excess contributions arose, then the portion of such consolidated excess charitable contributions attributable to such corporation (as determined under subparagraph (2) of this paragraph) shall be apportioned to such corporation (and any successor to such corporation in a transaction to which section 381(a) applies) under the principles of § 1.1502–21T(b) (or §§ 1.1502–79A(a)(1) and (2), as appropriate) and shall be a charitable contribution carryover to such separate return year.

(2) *Portion of consolidated excess charitable contributions attributable to a member.* The portion of the consolidated excess charitable contributions attributable to a member of a group is an amount equal to such consolidated excess contributions multiplied by a fraction, the numerator of which is the

charitable contributions paid by such member for the taxable year, and the denominator of which is the aggregate of all such charitable contributions paid for such year by all the members of the group.

[T.D. 6894, 31 FR 11794, Sept. 8, 1966, as amended by T.D. 7728, 45 FR 72650, Nov. 3, 1980; T.D. 8294, 55 FR 9438, Mar. 14, 1990; T.D. 8319, 55 FR 49038, Nov. 26, 1990; T.D. 8364, 56 FR 47402, Sept. 19, 1991; T.D. 8597, 60 FR 36710, July 18, 1995; T.D. 8677, 61 FR 33324, 33325, 33334, June 27, 1996]

§1.1502–80 Applicability of other provisions of law.

(a) *In general.* The Internal Revenue Code, or other law, shall be applicable to the group to the extent the regulations do not exclude its application. Thus, for example, in a transaction to which section 381(a) applies, the acquiring corporation will succeed to the tax attributes described in section 381(c). Furthermore, sections 269 and 482 apply for any consolidated year. Section 304 applies except as provided in paragraph (b) of this section.

(b) *Non-applicability of section 304.* Section 304 does not apply to any acquisition of stock of a corporation in an intercompany transaction or to any intercompany item from such transaction occurring on or after July 24, 1991.

(c) *Deferral of section 165.* For consolidated return years beginning on or after January 1, 1995, stock of a member is not treated as worthless under section 165 before the stock is treated as disposed of under the principles of §1.1502–19(c)(1)(iii). See §§1.1502–11(c) and 1.1502–20 for additional rules relating to stock loss.

(d) *Non-applicability of section 357(c)*—(1) *In general.* Section 357(c) does not apply to any transaction to which §1.1502–13, §1.1502–13T, §1.1502–14, or §1.1502–14T applies, if it occurs in a consolidated return year beginning on or after January 1, 1995. For example, P, S, and T are members of a consolidated group, P owns all of the stock of S and T with bases of $30 and $20, respectively, S has a $30 basis in its assets and $40 of liabilities, and S merges into T in a transaction described in section 368(a)(1)(A) (and in section 368(a)(1)(D)); section 357(c) does not apply to the merger, P's basis in T's stock increases to $50 ($30 plus $20), and T succeeds to S's $30 basis in the assets transferred subject to the $40 liability. Similarly, if S instead transferred its assets and liabilities to a newly formed subsidiary in a transaction to which section 351 applies, section 357(c) does not apply and S's basis in the subsidiary's stock is a $10 excess loss account. This paragraph (d) does not apply to a transaction if the transferor or transferee becomes a nonmember as part of the same plan or arrangement. The transferor (or transferee) is treated as becoming a nonmember once it is no longer a member of a consolidated group that includes the transferee (or transferor). For purposes of this paragraph (d), any reference to a transferor or transferee includes, as the context may require, a reference to a successor or predecessor.

(2) *Prior period transactions.* If, in a tax year beginning before January 1, 1995, a member's stock with an excess loss account is transferred in a transaction to which §1.1502–13, §1.1502–13T, §1.1502–14, or §1.1502–14T applies, paragraph (d)(1) of this section applies to the stock transfer to the extent that the income, gain, deduction, or loss (if any) is not taken into account in a tax year beginning before January 1, 1995. For example, if P, S, and T, are members of a consolidated group, T's stock has an excess loss account, and P transfers the T stock to S in 1993 in a transaction to which section 351 and §1.1502–13 apply, section 357(c) applies to the transfer only to the extent P's gain is taken into account in tax years beginning before January 1, 1995.

(e) *Non-applicability of section 163(e)(5).* Section 163(e)(5) does not apply to any intercompany obligation (within the meaning of §1.1502–13(g)) issued in a consolidated return year beginning on or after July 12, 1995.

(f) *Non-applicability of section 1031.* Section 1031 does not apply to any intercompany transaction occurring in consolidated return years beginning on or after July 12, 1995.

[T.D. 8402, 57 FR 9385, Mar. 18, 1992, as amended by T.D. 8560, 59 FR 41703, Aug. 15, 1994; T.D. 8597, 60 FR 36710, July 18, 1995; T.D. 8677, 61 FR 33325, June 27, 1996; T.D. 8597, 62 FR 12098, Mar. 14, 1997]

§ 1.1502–81T Alaska Native Corporations.

(a) *General Rule.* The application of section 60(b)(5) of the Tax Reform Act of 1984 and section 1804(e)(4) of the Tax Reform Act of 1986 (relating to Native Corporations established under the Alaska Native Claims Settlement Act (43 U.S.C. 1601 *et seq.*)) is limited to the use on a consolidated return of losses and credits of a Native Corporation, and of a corporation all of whose stock is owned directly by a Native Corporation, during any taxable year (beginning after the effective date of such sections and before 1992), or any part thereof, against the income and tax liability of a corporation affiliated with the Native Corporation. Thus, no other tax saving, tax benefit, or tax loss is intended to result from the application of section 60(b)(5) of the Tax Reform Act of 1984 and section 1804(e)(4) of the Tax Reform Act of 1986 to any person (whether or not such person is a member of an affiliated group of which a Native Corporation is the common parent). In particular, except as approved by the Secretary, no positive adjustment under § 1.1502–32(b) will be made with respect to the basis of stock of a corporation that is affiliated with a Native Corporation through application of section 60(b)(5) of the Tax Reform Act of 1984 and section 1804(e)(4) of the Tax Reform Act of 1986.

(b) *Effective Dates.* This section applies to taxable years beginning after December 31, 1984.

[T.D. 8130, 52 FR 8448, Mar. 18, 1987, as amended by T.D. 8560, 59 FR 41675, Aug. 15, 1994]

§ 1.1502–90T Table of contents (temporary).

The following table contains the major headings in §§ 1.1502–91T through 1.1502–99T.

§ 1.1502–91T Application of section 382 with respect to a consolidated group (temporary).

(a) Determination and effect of an ownership change.
(1) In general.
(2) Special rule for post-change year that includes the change date.
(3) Cross reference.
(b) Definitions and nomenclature.
(c) Loss group.
(1) Defined.
(2) Coordination with rule that ends separate tracking.
(3) Example.
(d) Loss subgroup.
(1) Net operating loss carryovers.
(2) Net unrealized built-in loss.
(3) Loss subgroup parent.
(4) Principal purpose of avoiding a limitation.
(5) Special rules.
(6) Examples.
(e) Pre-change consolidated attribute.
(1) Defined.
(2) Example.
(f) Pre-change subgroup attribute.
(1) Defined.
(2) Example.
(g) Net unrealized built-in gain and loss.
(1) In general.
(2) Members included.
(i) Consolidated group.
(ii) Loss subgroup.
(3) Acquisitions of built-in gain or loss assets.
(4) Indirect ownership.
(h) Recognized built-in gain or loss.
(1) In general. [Reserved]
(2) Disposition of stock or an intercompany obligation of a member.
(3) Deferred gain or loss.
(4) Exchanged basis property.
(i) [Reserved]
(j) Predecessor and successor corporations.

§ 1.1502–92T Ownership change of a loss group or a loss subgroup (temporary).

(a) Scope.
(b) Determination of an ownership change.
(1) Parent change method.
(i) Loss group.
(ii) Loss subgroup.
(2) Examples.
(3) Special adjustments.
(i) Common parent succeeded by a new common parent.
(ii) Newly created loss subgroup parent.
(iii) Examples.
(4) End of separate tracking of certain losses.
(c) Supplemental rules for determining ownership change.
(1) Scope.
(2) Cause for applying supplemental rule.
(3) Operating rules.
(4) Supplemental ownership change rules.
(i) Additional testing dates for the common parent (or loss subgroup parent).
(ii) Treatment of subsidiary stock as stock of the common parent (or loss subgroup parent).
(iii) 5-percent shareholder of the common parent (or loss subgroup parent).
(5) Examples.
(d) Testing period following ownership change under this section.
(e) Information statements.
(1) Common parent of a loss group.
(2) Abbreviated statement with respect to loss subgroups.

§1.1502–93T Consolidated section 382 limitation (or subgroup section 382 limitation) (temporary).

(a) Determination of the consolidated section 382 limitation (or subgroup section 382 limitation).
(1) In general.
(2) Coordination with apportionment rule.
(b) Value of the loss group (or loss subgroup).
(1) Stock value immediately before ownership change.
(2) Adjustment to value.
(3) Examples.
(c) Recognized built-in gain of a loss group or loss subgroup.
(d) Continuity of business.
(1) In general.
(2) Example.
(e) Limitations of losses under other rules.

§1.1502–94T Coordination with section 382 and the regulations thereunder when a corporation becomes a member of a consolidated group (temporary).

(a) Scope.
(1) In general.
(2) Successor corporation as new loss member.
(3) Coordination in the case of a loss subgroup.
(4) End of separate tracking of certain losses.
(5) Cross-reference.
(b) Application of section 382 to a new loss member.
(1) In general.
(2) Adjustment to value.
(3) Pre-change separate attribute defined.
(4) Examples.
(c) Built-in gains and losses.
(d) Information statements.

§1.1502–95T Rules on ceasing to be a member of a consolidated group (or loss subgroup) (temporary).

(a) In general.
(1) Consolidated group.
(2) Election by common parent.
(3) Coordination with §§1.1502–91T through 1.1502–93T.
(b) Separate application of section 382 when a member leaves a consolidated group.
(1) In general.
(2) Effect of a prior ownership change of the group.
(3) Application in the case of a loss subgroup.
(4) Examples.
(c) Apportionment of a consolidated section 382 limitation.
(1) In general.
(2) Amount of apportionment.
(3) Effect of apportionment on the consolidated section 382 limitation.
(4) Effect on corporations to which the consolidated section 382 limitation is apportioned.
(5) Deemed apportionment when loss group terminates.
(6) Appropriate adjustments when former member leaves during the year.
(7) Examples.
(d) Rules pertaining to ceasing to be a member of a loss subgroup.
(1) In general.
(2) Examples.
(e) Filing the election to apportion.
(1) Form of the election to apportion.
(2) Signing of the election.
(3) Filing of the election.
(4) Revocation of election.

§1.1502–96T Miscellaneous rules (temporary).

(a) End of separate tracking of losses.
(1) Application.
(2) Effect of end of separate tracking.
(3) Continuing effect of end of separate tracking.
(4) Special rule for testing period.
(5) Limits on effects of end of separate tracking.
(b) Ownership change of subsidiary.
(1) Ownership change of a subsidiary because of options or plan or arrangement.
(2) Effect of the ownership change.
(i) In general.
(ii) Pre-change losses.
(3) Coordination with §§1.1502–91T, 1.1502–92T, and 1.1502–94T.
(4) Example.
(c) Continuing effect of an ownership change.

§1.1502–97T Special rules under section 382 for members under the jurisdiction of a court in a title 11 or similar case (temporary). [Reserved]

§1.1502–98T Coordination with section 383 (temporary).

§1.1502–99T Effective dates (temporary).

(a) Effective date.
(b) Testing period may include a period beginning before January 1, 1997.
(c) Transition rules.
(1) Methods permitted.
(i) In general.
(ii) Adjustments to offset excess limitation.
(iii) Coordination with effective date.
(2) Permitted methods.
(d) Amended returns.
(e) Section 383.

[T.D. 8678, 61 FR 33336, June 27, 1996]

§1.1502–91T Application of section 382 with respect to a consolidated group (temporary).

(a) *Determination and effect of an ownership change*—(1) *In general.* This section and §§1.1502–92T and 1.1502–93T set forth the rules for determining an ownership change under section 382 for members of consolidated groups and the section 382 limitations with respect to attributes described in paragraphs (e) and (f) of this section. These rules generally provide that an ownership change and the section 382 limitation are determined with respect to these attributes for the group (or loss subgroup) on a single entity basis and not for its members separately. Following an ownership change of a loss group (or a loss subgroup) under § 1.1502–92T, the amount of consolidated taxable income for any post-change year which may be offset by pre-change consolidated attributes (or pre-change subgroup attributes) shall not exceed the consolidated section 382 limitation (or subgroup section 382 limitation) for such year as determined under § 1.1502–93T.

(2) *Special rule for post-change year that includes the change date.* If the post-change year includes the change date, section 382(b)(3)(A) is applied so that the consolidated section 382 limitation (or subgroup section 382 limitation) does not apply to the portion of consolidated taxable income that is allocable to the period in the year on or before the change date. See generally § 1.382–6 (relating to the allocation of income and loss). The allocation of consolidated taxable income for the post-change year that includes the change date must be made before taking into account any consolidated net operating loss deduction (as defined in § 1.1502–21T(a)).

(3) *Cross reference.* See §§ 1.1502–94T and 1.1502–95T for rules that apply section 382 to a corporation that becomes or ceases to be a member of a group or loss subgroup.

(b) *Definitions and nomenclature.* For purposes of this section and §§ 1.1502–92T through 1.1502–99T, unless otherwise stated:

(1) The definitions and nomenclature contained in section 382 and the regulations thereunder (including the nomenclature and assumptions relating to the examples in § 1.382–2T(b)) and this section and §§ 1.1502–92T through 1.1502–99T apply; and

(2) In all examples, all groups file consolidated returns, all corporations file their income tax returns on a calendar year basis, the only 5-percent shareholder of a corporation is a public group, the facts set forth the only owner shifts during the testing period, and each asset of a corporation has a value equal to its adjusted basis.

(c) *Loss group*—(1) *Defined.* A loss group is a consolidated group that:

(i) Is entitled to use a net operating loss carryover to the taxable year that did not arise (and is not treated under § 1.1502–21T(c) as arising) in a SRLY;

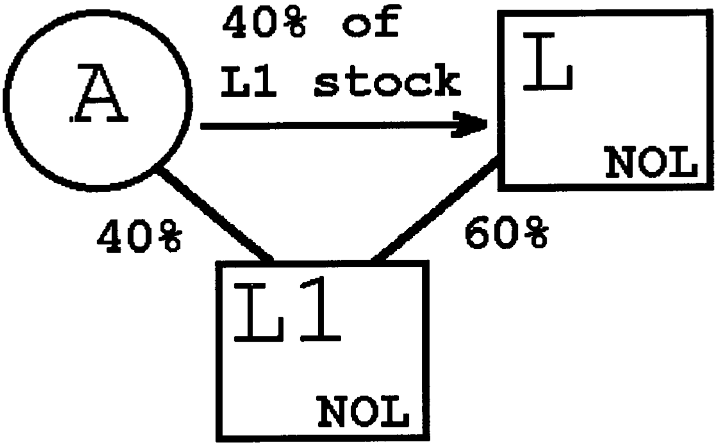
(ii) Has a consolidated net operating loss for the taxable year in which a testing date of the common parent occurs (determined by treating the common parent as a loss corporation); or

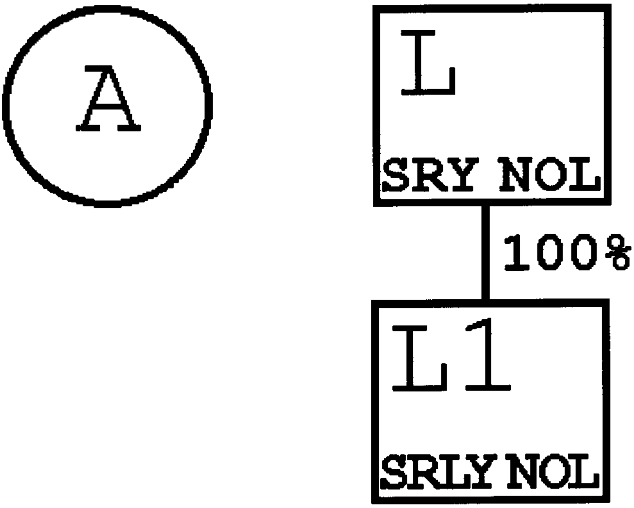
(iii) Has a net unrealized built-in loss (determined under paragraph (g) of this section by treating the date on which the determination is made as though it were a change date).

(2) *Coordination with rule that ends separate tracking.* A consolidated group may be a loss group because a member's losses that arose in (or are treated as arising in) a SRLY are treated as described in paragraph (c)(1)(i) of this section. See § 1.1502–96T(a).

(3) *Example.* The following example illustrates the principles of this paragraph (c).

Example. Loss group. (a) L and L1 file separate returns and each has a net operating loss carryover arising in Year 1 that is carried over to Year 2. A owns 40 shares and L owns 60 shares of the 100 outstanding shares of L1 stock. At the close of Year 1, L buys the 40 shares of L1 stock from A. For Year 2, L and L1 file a consolidated return. The following is a graphic illustration of these facts:





(b) L and L1 become a loss group at the beginning of Year 2 because the group is entitled to use the Year 1 net operating loss carryover of L, the common parent, which did not arise (and is not treated under §1.1502–21T(c) as arising) in a SRLY. See §1.1502–94T for rules relating to the application of section 382 with respect to L1's net operating loss carryover from Year 1 which did arise in a SRLY.

(d) *Loss subgroup*—(1) *Net operating loss carryovers.* Two or more corporations that become members of a consolidated group (the current group) compose a loss subgroup if:

(i) They were affiliated with each other in another group (the former group), whether or not the group was a consolidated group;

(ii) They bear the relationship described in section 1504(a)(1) to each other through a loss subgroup parent immediately after they become members of the current group; and

(iii) At least one of the members carries over a net operating loss that did not arise (and is not treated under § 1.1502–21T(c) as arising) in a SRLY with respect to the former group.

(2) *Net unrealized built-in loss.* Two or more corporations that become members of a consolidated group compose a loss subgroup if they:

(i) Have been continuously affiliated with each other for the 5 consecutive year period ending immediately before they become members of the group;

(ii) Bear the relationship described in section 1504(a)(1) to each other through a loss subgroup parent immediately after they become members of the current group; and

(iii) Have a net unrealized built-in loss (determined under paragraph (g) of this section on the day they become members of the group by treating that day as though it were a change date).

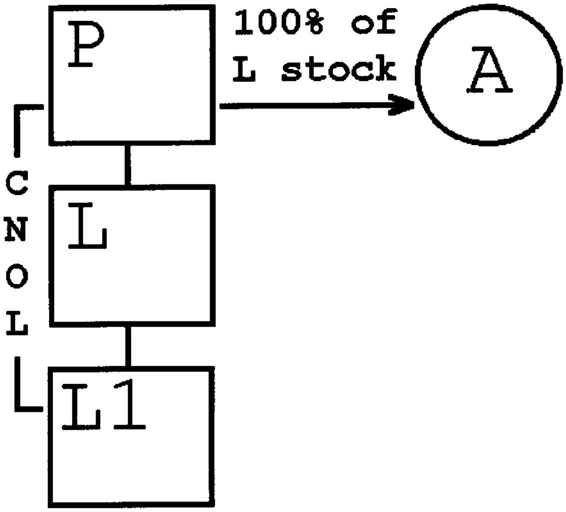
(3) *Loss subgroup parent.* A loss subgroup parent is the corporation that bears the same relationship to the other members of the loss subgroup as a common parent bears to the members of a group.

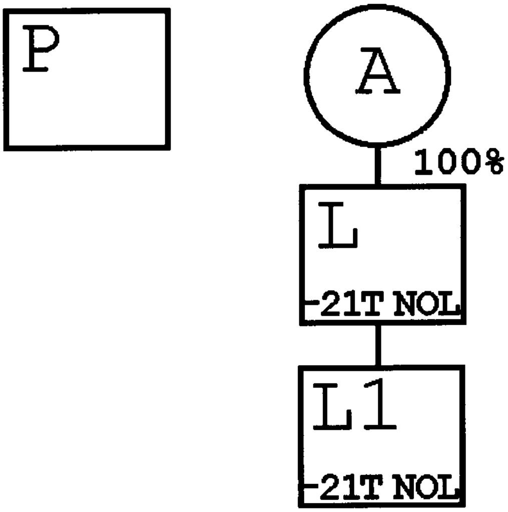
(4) *Principal purpose of avoiding a limitation.* The corporations described in paragraph (d)(1) or (2) of this section do not compose a loss subgroup if any one of them is formed, acquired, or availed of with a principal purpose of avoiding the application of, or increasing any limitation under, section 382. Instead, § 1.1502–94T applies with respect to the attributes of each such corporation. This paragraph (d)(4) does not apply solely because, in connection with becoming members of the group, the members of a group (or loss subgroup) are rearranged to bear a relationship to the other members described in section 1504(a)(1).

(5) *Special rules.* See § 1.1502–95T(d) for rules concerning when a corporation ceases to be a member of a loss subgroup. See also § 1.1502–96T(a) for a special rule regarding the end of separate tracking of SRLY losses of a member that has an ownership change or that has been a member of a group for at least 5 consecutive years.

(6) *Examples.* The following examples illustrate the principles of this paragraph (d).

Example 1. Loss subgroup. (a) P owns all the L stock and L owns all the L1 stock. The P group has a consolidated net operating loss arising in Year 1 that is carried to Year 2. On May 2, Year 2, P sells all the stock of L to A, and L and L1 thereafter file consolidated returns. A portion of the Year 1 consolidated net operating loss is apportioned under § 1.1502–21T(b) to each of L and L1, which they carry over to Year 2. The following is a graphic illustration of these facts:





(b) (1) L and L1 compose a loss subgroup within the meaning of paragraph (d)(1) of this section because—

(i) They were affiliated with each other in the P group (the former group);

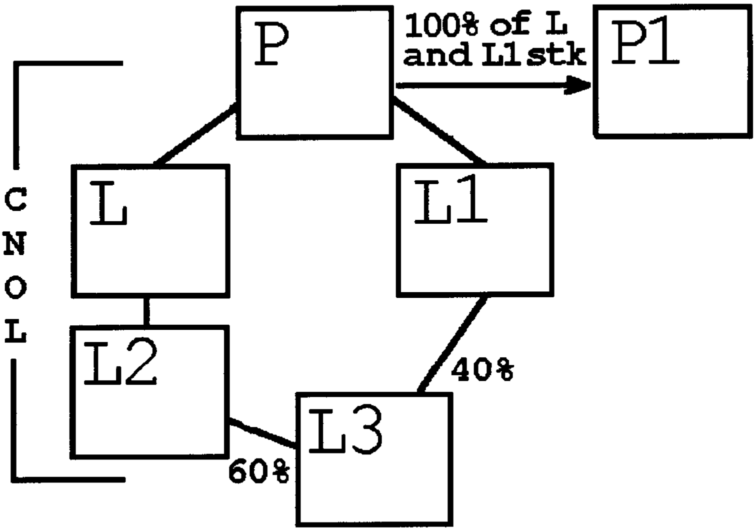
(ii) They bear a relationship described in section 1504(a)(1) to each other through a loss subgroup parent (L) immediately after they became members of the L group; and

(iii) At least one of the members (here, both L and L1) carries over a net operating loss to the L group (the current group) that did not arise in a SRLY with respect to the P group.

(2) Under paragraph (d)(3) of this section, L is the loss subgroup parent of the L loss subgroup.

Example 2. Loss subgroup—section 1504(a)(1) relationship. (a) P owns all the stock of L and

L1. L owns all the stock of L2. L1 and L2 own 40 percent and 60 percent of the stock of L3, respectively. The P group has a consolidated net operating loss arising in Year 1 that is carried over to Year 2. On May 22, Year 2, P sells all the stock of L and L1 to P1, the common parent of another consolidated group. The Year 1 consolidated net operating loss is apportioned under § 1.1502–21T(b), and each of L, L1, L2, and L3 carries over a portion of such loss to the first consolidated return year of the P1 group ending after the acquisition. The following is a graphic illustration of these facts:



P

L2
-21T NOL
40%
60%
L3
-21T NOL

(b) L and L2 compose a loss subgroup within the meaning of paragraph (d)(1) of this section. Neither L1 nor L3 is included in a loss subgroup because neither bears a relationship described in section 1504(a)(1) through a loss subgroup parent to any other member of the former group immediately after becoming members of the P1 group.

Example 3. Loss subgroup—section 1504(a)(1) relationship. The facts are the same as in *Example 2,* except that the stock of L1 is transferred to L in connection with the sale of the

L stock to P1. L, L1, L2, and L3 compose a loss subgroup within the meaning of paragraph (d)(1) of this section because—

(1) They were affiliated with each other in the P group (the former group);

(2) They bear a relationship described in section 1504(a)(1) to each other through a loss subgroup parent (L) immediately after they become members of the P1 group; and

(3) At least one of the members (here, each of L, L1, L2, and L3) carries over to the P1 group (the current group) a net operating loss that did not arise in a SRLY with respect to the P group (the former group).

(e) *Pre-change consolidated attribute*—(1) *Defined.* A pre-change consolidated attribute of a loss group is—

(i) Any loss described in paragraph (c)(1) (i) or (ii) of this section (relating to the definition of loss group) that is allocable to the period ending on or before the change date; and

(ii) Any recognized built-in loss of the loss group.

(2) *Example.* The following example illustrates the principle of this paragraph (e).

Example. Pre-change consolidated attribute. (a) The L group has a consolidated net operating loss arising in Year 1 that is carried over to Year 2. The L loss group has an ownership change at the beginning of Year 2.

(b) The net operating loss carryover of the L loss group from Year 1 is a pre-change consolidated attribute because the L group was entitled to use the loss in Year 2, the loss did not arise in a SRLY with respect to the L group, and therefore the loss was described in paragraph (c)(1)(i) of this section. Under paragraph (a) of this section, the amount of consolidated taxable income of the L group for Year 2 that may be offset by this loss carryover may not exceed the consolidated section 382 limitation of the L group for that year. See §1.1502–93T for rules relating to the computation of the consolidated section 382 limitation.

(f) *Pre-change subgroup attribute*—(1) *Defined.* A pre-change subgroup attribute of a loss subgroup is—

(i) Any net operating loss carryover described in paragraph (d)(1)(iii) of this section (relating to the definition of loss subgroup); and

(ii) Any recognized built-in loss of the loss subgroup.

(2) *Example.* The following example illustrates the principle of this paragraph (f).

Example. Pre-change subgroup attribute. (a) P is the common parent of a consolidated group. P owns all the stock of L, and L owns all the stock of L1. L2 is not a member of an affiliated group, and has a net operating loss arising in Year 1 that is carried over to Year 2. On December 11, Year 2, L1 acquires all the stock of L2, causing an ownership change of L2. During Year 2, the P group has a consolidated net operating loss that is carried over to Year 3. On November 2, Year 3, M acquires all the L stock from P. M, L, L1, and L2 thereafter file consolidated returns. All of the P group Year 2 consolidated net operating loss is apportioned under §1.1502–21T(b) to L and L2, which they carry over to the M group.

(b)(1) L, L1, and L2 compose a loss subgroup because—

(i) They were affiliated with each other in the P group (the former group);

(ii) They bore a relationship described in section 1504(a)(1) to each other through a loss subgroup parent (L) immediately after they became members of the L group; and

(iii) At least one of the members (here, both L and L2) carries over a net operating loss to the M group (the current group) that is described in paragraph (d)(1)(iii) of this section.

(2) For this purpose, L2's loss from Year 1 that was a SRLY loss with respect to the P group (the former group) is treated as described in paragraph (d)(1)(iii) of this section because of the application of the principles of §1.1502–96T(a). See paragraph (d)(5) of this section. M's acquisition results in an ownership change of L, and therefore the L loss subgroup under §1.1502–92T(a)(2). See §1.1502–93T for rules governing the computation of the subgroup section 382 limitation.

(c) In the M group, L2's Year 1 loss continues to be subject to a section 382 limitation resulting from the ownership change that occurred on December 11, Year 2. See §1.1502–96T(c).

(g) *Net unrealized built-in gain and loss*—(1) *In general.* The determination whether a consolidated group (or loss subgroup) has a net unrealized built-in gain or loss under section 382(h)(3) is based on the aggregate amount of the separately computed net unrealized built-in gains or losses of each member that is included in the group (or loss subgroup) under paragraph (g)(2) of this section, including items of built-in income and deduction described in section 382(h)(6). Thus, for example, amounts deferred under section 267, or under §1.1502–13 (other than amounts deferred with respect to the stock of a member (or an intercompany obligation) included in the group (or loss subgroup) under paragraph (g)(2) of this section) are built-in items. The threshold requirement under section 382(h)(3)(B) applies on an aggregate basis and not on a member-by-member basis. The separately computed amount of a member included in a group or loss subgroup does not include any unrealized built-in gain or loss on stock (including stock described in section 1504(a)(4) and §1.382–2T(f)(18)(ii) and (iii)) of another member included in the group or loss subgroup (or on an intercompany obligation). However, a member of a group or loss subgroup includes in its separately computed amount the unrealized built-in gain or loss on stock of another member (or on an intercompany obligation) not included in the group or loss subgroup. If a member is not included in a group (or loss subgroup) under paragraph (g)(2) of this section, the determination of whether the member has a net unrealized built-in gain or loss under section 382(h)(3) is made on a separate entity basis. See §1.1502–94(c) (relating to built-in gain or loss of a new loss member) and §1.1502–96(a) (relating to the end of separate tracking of certain losses).

(2) *Members included*—(i) *Consolidated group*. The members included in the determination whether a consolidated group has a net unrealized built-in gain or loss are all members of the group on the day that the determination is made other than—

(A) A new loss member with a net unrealized built-in loss described in §1.1502–94T(a)(1)(ii); and

(B) Members included in a loss subgroup described in §1.1502–91T(d)(2).

(ii) *Loss subgroup*. The members included in the determination whether a loss subgroup has a net unrealized built-in gain or loss are those members described in paragraphs (d)(2)(i) and (ii) of this section.

(3) *Acquisitions of built-in gain or loss assets*. A member of a consolidated group (or loss subgroup) may not, in determining its separately computed net unrealized built-in gain or loss, include any gain or loss with respect to assets acquired with a principal purpose to affect the amount of its net unrealized built-in gain or loss. A group (or loss subgroup) may not, in determining its net unrealized built-in gain or loss, include any gain or loss of a member acquired with a principal purpose to affect the amount of its net unrealized built-in gain or loss.

(4) *Indirect ownership*. A member's separately computed net unrealized built-in gain or loss is adjusted to the extent necessary to prevent any duplication of unrealized gain or loss attributable to the member's indirect ownership interest in another member through a nonmember if the member has a 5-percent or greater ownership interest in the nonmember.

(h) *Recognized built-in gain or loss*—(1) *In general*. [Reserved]

(2) *Disposition of stock or an intercompany obligation of a member*. Gain or loss recognized by a member on the disposition of stock (including stock described in section 1504(a)(4) and §1.382–2T(f)(18)(ii) and (iii)) of another member or an intercompany obligation is treated as a recognized built-in gain or loss under section 382(h)(2) (unless disallowed under §1.1502–20 or otherwise), even though gain or loss on such stock or obligation was not included in the determination of a net unrealized built-in gain or loss under paragraph (g)(1) of this section.

(3) *Deferred gain or loss*. Gain or loss that is deferred under provisions such as section 267 and §1.1502–13 is treated as recognized built-in gain or loss only to the extent taken into account by the group during the recognition period.

(4) *Exchanged basis property*. If the adjusted basis of any asset is determined, directly or indirectly, in whole or in part, by reference to the adjusted basis of another asset held by the member at the beginning of the recognition period, the asset is treated, with appropriate adjustments, as held by the member at the beginning of the recognition period.

(i) [Reserved]

(j) Predecessor and successor corporations. A reference in this section and §§1.1502–92T through 1.1502–99T to a corporation, member, common parent, loss subgroup parent, or subsidiary includes, as the context may require, a reference to a predecessor or successor corporation. For example, the determination whether a successor satisfies the continuous affiliation requirement of paragraph (d)(2)(i) of this section is made by reference to its predecessor.

[T.D. 8678, 61 FR 33337, June 27, 1996]

§ 1.1502–92T Ownership change of a loss group or a loss subgroup (temporary).

(a) *Scope.* This section provides rules for determining if there is an ownership change for purposes of section 382 with respect to a loss group or a loss subgroup. See § 1.1502–94T for special rules for determining if there is an ownership change with respect to a new loss member and § 1.1502–96T(b) for special rules for determining if there is an ownership change of a subsidiary.

(b) *Determination of an ownership change*—(1) *Parent change method*—(i) *Loss group.* A loss group has an ownership change if the loss group's common parent has an ownership change under section 382 and the regulations thereunder. Solely for purposes of determining whether the common parent has an ownership change—

(A) The losses described in § 1.1502–91T(c) are treated as net operating losses (or a net unrealized built-in loss) of the common parent; and

(B) The common parent determines the earliest day that its testing period can begin by reference to only the attributes that make the group a loss group under § 1.1502–91T(c).

(ii) *Loss subgroup.* A loss subgroup has an ownership change if the loss subgroup parent has an ownership change under section 382 and the regulations thereunder. The principles of § 1.1502–95T(b) (relating to ceasing to be a member of a consolidated group) apply in determining whether the loss subgroup parent has an ownership change. Solely for purposes of determining whether the loss subgroup parent has an ownership change—

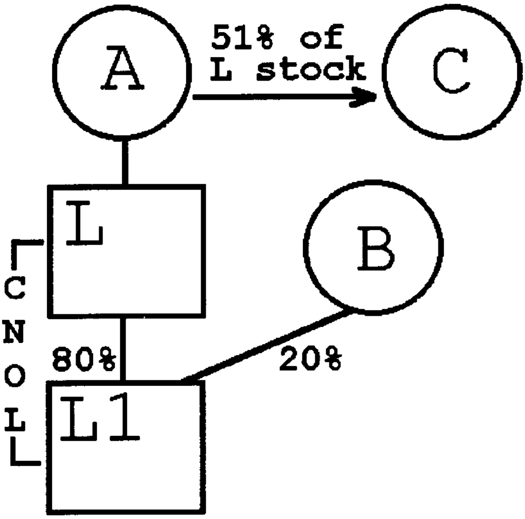
(A) The losses described in § 1.1502–91T(d) are treated as net operating losses (or a net unrealized built-in loss) of the loss subgroup parent;

(B) The day that the members of the loss subgroup become members of the group (or a loss subgroup) is treated as a testing date within the meaning of § 1.382–2(a)(4); and

(C) The loss subgroup parent determines the earliest day that its testing period can begin under § 1.382–2T(d)(3) by reference to only the attributes that make the members a loss subgroup under § 1.1502–91T(d).

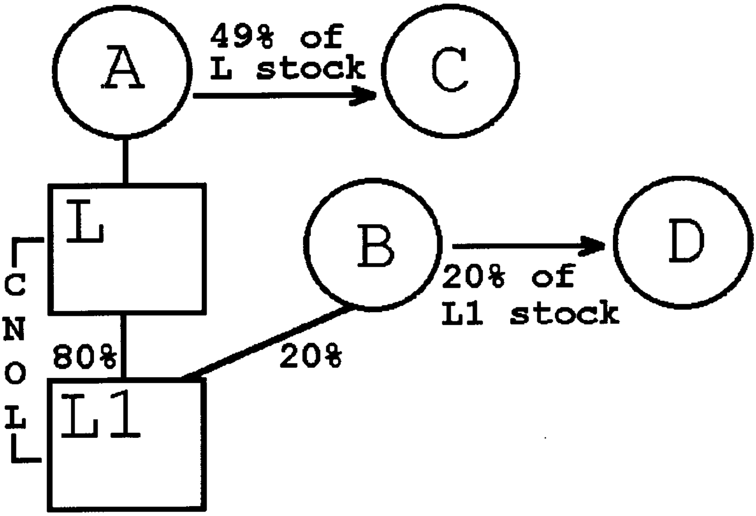
(2) *Examples.* The following examples illustrate the principles of this paragraph (b).

Example 1. Loss group—ownership change of the common parent. (a) A owns all the L stock. L owns 80 percent and B owns 20 percent of the L1 stock. For Year 1, the L group has a consolidated net operating loss that resulted from the operations of L1 and that is carried over to Year 2. The value of the L stock is $1000. The total value of the L1 stock is $600 and the value of the L1 stock held by B is $120. The L group is a loss group under § 1.1502–91T(c)(1) because it is entitled to use its net operating loss carryover from Year 1. On August 15, Year 2, A sells 51 percent of the L stock to C. The following is a graphic illustration of these facts:



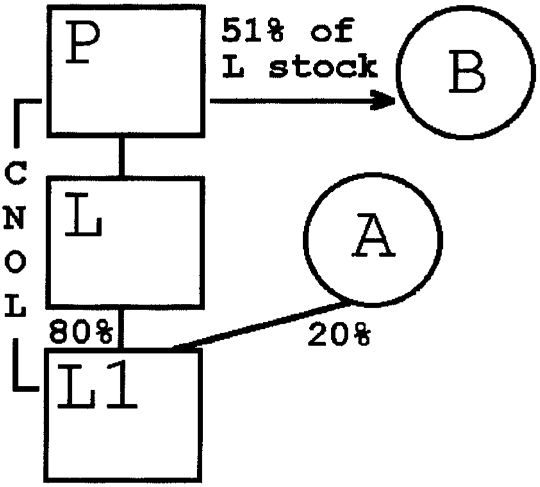
(b) Under paragraph (b)(1)(i) of this section, section 382 and the regulations thereunder are applied to L to determine whether it (and therefore the L loss group) has an ownership change with respect to its net operating loss carryover from Year 1 attributable to L1 on August 15, Year 2. The sale of the L stock to C causes an ownership change of L under §1.382–2T and of the L loss group under paragraph (b)(1)(i) of this section. The amount of consolidated taxable income of the L loss group for any post-change taxable year that may be offset by its pre-change consolidated attributes (that is, the net operating loss carryover from Year 1 attributable to L1) may not exceed the consolidated section 382 limitation for the L loss group for the taxable year.

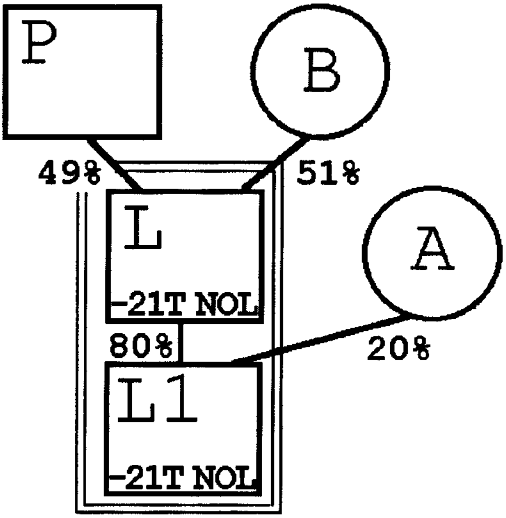
Example 2. Loss group—owner shifts of subsidiaries disregarded. (a) The facts are the same as in *Example 1,* except that on August 15, Year 2, A sells only 49 percent of the L stock to C and, on December 12, Year 3, in an unrelated transaction, B sells the 20 percent of the L1 stock to D. A's sale of the L stock to C does not cause an ownership change of L under §1.382–2T nor of the L loss group under paragraph (b)(1)(i) of this section. The following is a graphic illustration of these facts:



(b) B's subsequent sale of L1 stock is not taken into account for purposes of determining whether the L loss group has an ownership change under paragraph (b)(1)(i) of this section, and, accordingly, there is no ownership change of the L loss group. See paragraph (c) of this section, however, for a supplemental ownership change method that would apply to cause an ownership change if the purchases by C and D were pursuant to a plan or arrangement.

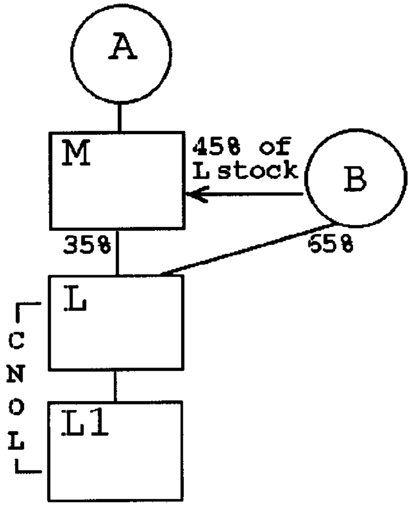
Example 3. Loss subgroup—ownership change of loss subgroup parent controls. (a) P owns all the L stock. L owns 80 percent and A owns 20 percent of the L1 stock. The P group has a consolidated net operating loss arising in Year 1 that is carried over to Year 2. On September 9, Year 2, P sells 51 percent of the L stock to B, and L1 is apportioned a portion of the Year 1 consolidated net operating loss under § 1.1502–21T(b), which it carries over to its next taxable year. L and L1 file a consolidated return for their first taxable year ending after the sale to B. The following is a graphic illustration of these facts:





(b) Under §1.1502–91T(d)(1), L and L1 compose a loss subgroup on September 9, Year 2, the day that they become members of the L group. Under paragraph (b)(1)(ii) of this section, section 382 and the regulations thereunder are applied to L to determine whether it (and therefore the L loss subgroup) has an ownership change with respect to the portion of the Year 1 consolidated net operating loss that is apportioned to L1 on September 9, Year 2. L has an ownership change resulting from P's sale of 51 percent of the L stock to A. Therefore, the L loss subgroup has an ownership change with respect to that loss.

Example 4. Loss group and loss subgroup—contemporaneous ownership changes. (a) A owns all the stock of corporation M, M owns 35 percent and B owns 65 percent of the L stock, and L owns all the L1 stock. The L group has a consolidated net operating loss arising in Year 1 that is carried over to Year 2. On May 19, Year 2, B sells 45 percent of the L stock to M for cash. M, L, and L1 thereafter file consolidated returns. L and L1 are each apportioned a portion of the Year 1 consolidated net operating loss, which they carry over to the M group's Year 2 and Year 3 consolidated return years. The M group has a consolidated net operating loss arising in Year 2 that is carried over to Year 3. On June 9, Year 3, A sells 70 percent of the M stock to C. The following is a graphic illustration of these facts:



A
M
45% of

C
M
B
80%
20%
L
-21T NOL
L1
-21T NOL
CNOL

(b) Under §1.1502–91T(d)(1), L and L1 compose a loss subgroup on May 19, Year 2, the day they become members of the M group. Under paragraph (b)(1)(ii) of this section, section 382 and the regulations thereunder are applied to L to determine whether L (and therefore the L loss subgroup) has an ownership change with respect to the loss carryovers from Year 1 on May 19, Year 2, a testing date because of B's sale of L stock to M. The sale of L stock to M results in only a 45 percentage point increase in A's ownership of L stock. Thus, there is no ownership change of L (or the L loss subgroup) with respect to those loss carryovers under paragraph (b)(1)(ii) of this section on that day.

(c) June 9, Year 3, is also a testing date with respect to the L loss subgroup because of A's sale of M stock to C. The sale results in a 56 percentage point increase in C's ownership of L stock, and L has an ownership change. Therefore, the L loss subgroup has an ownership change on that day with respect to the loss carryovers from Year 1.

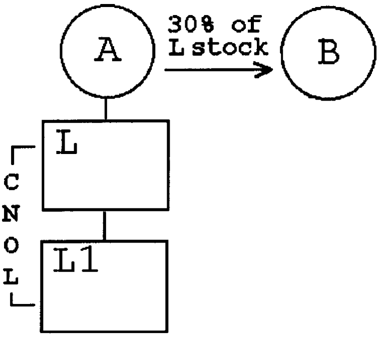
(d) Paragraph (b)(1)(i) of this section requires that section 382 and the regulations thereunder be applied to M to determine whether M (and therefore the M loss group) has an ownership change with respect to the net operating loss carryover from Year 2 on June 9, Year 3, a testing date because of A's sale of M stock to C. The sale results in a 70 percentage point increase in C's ownership of M stock, and M has an ownership change. Therefore, the M loss group has an ownership change on that day with respect to that loss carryover.

(3) *Special adjustments*—(i) *Common parent succeeded by a new common parent.* For purposes of determining if a loss group has an ownership change, if the common parent of a loss group is succeeded or acquired by a new common parent and the loss group remains in existence, the new common parent is treated as a continuation of the former common parent with appropriate adjustments to take into account shifts in ownership of the former common parent during the testing period (including shifts that occur incident to the common parent's becoming the former common parent).

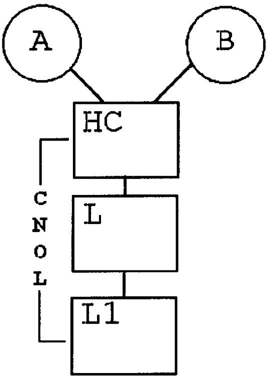
(ii) *Newly created loss subgroup parent.* For purposes of determining if a loss subgroup has an ownership change, if the member that is the loss subgroup parent has not been the loss subgroup parent for at least 3 years as of a testing date, appropriate adjustments must be made to take into account owner shifts of members of the loss subgroup so that the structure of the loss subgroup does not have the effect of avoiding an ownership change under section 382. (See paragraph (b)(3)(iii) *Example 3* of this section.)

(iii) *Examples.* The following examples illustrate the principles of this paragraph (b)(3).

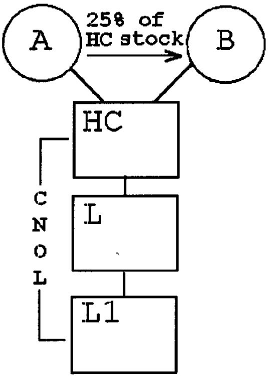
Example 1. New common parent acquires old common parent. (a) A, who owns all the L stock, sells 30 percent of the L stock to B on August 26, Year 1. L owns all the L1 stock. The L group has a consolidated net operating loss arising in Year 1 that is carried over to Year 3. On July 16, Year 2, A and B transfer their L stock to a newly created holding company, HC, in exchange for 70 percent and 30 percent, respectively, of the HC stock. HC, L, and L1 thereafter file consolidated returns. Under the principles of §1.1502–75(d), the L loss group is treated as remaining in existence, with HC taking the place of L as the new common parent of the loss group. The following is a graphic illustration of these facts:



A
30% of
L stock
B
L
L1
CNOL



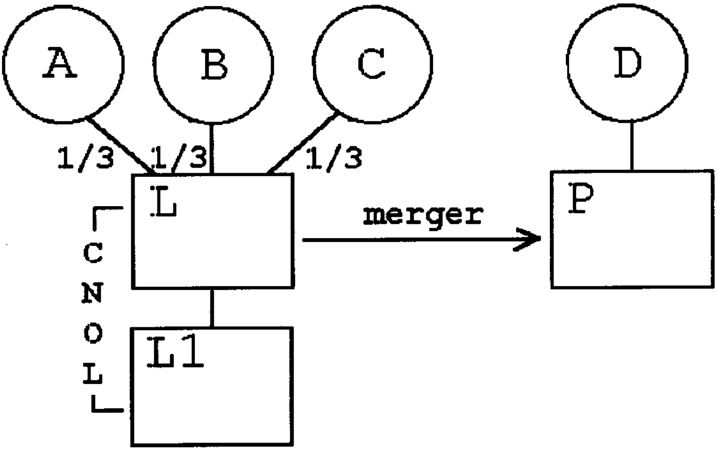
A
B
HC
L
L1
CNOL

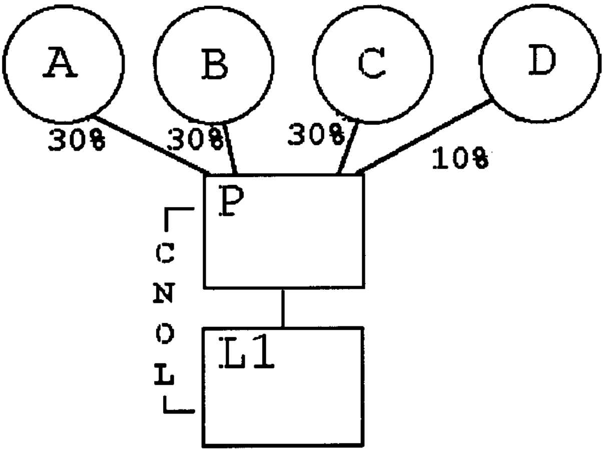


A
25% of
HC stock
B
HC
L
L1
CNOL

(b) On November 11, Year 3, A sells 25 percent of the HC stock to B. For purposes of determining if the L loss group has an ownership change under paragraph (b)(1)(i) of this section on November 11, Year 3, HC is treated as a continuation of L under paragraph (b)(3)(i) of this section because it acquired L and became the common parent without terminating the L loss group. Accordingly, HC's testing period commences on January 1, Year 1, the first day of the taxable year of the L loss group in which the consolidated net operating loss that is carried over to Year 3 arose (see §1.382–2T(d)(3)(i)). Immediately after the close of November 11, Year 3, B's percentage ownership interest in the common parent of the loss group (HC) has increased by 55 percentage points over its lowest percentage ownership during the testing period (zero percent). Accordingly, HC and the L loss group have an ownership change on that day.

Example 2. common parent in case in which common parent ceases to exist. (a) A, B, and C each own one-third of the L stock. L owns all the L1 stock. The L group has a consolidated net operating loss arising in Year 2 that is carried over to Year 3. On November 22, Year 3, L is merged into P, a corporation owned by D, and L1 thereafter files consolidated returns with P. A, B, and C, as a result of owning stock of L, own 90 percent of P's stock after the merger. D owns the remaining 10 percent of P's stock. The merger of L into P qualifies as a reverse acquisition of the L group under §1.1502–75(d)(3)(i), and the L loss group is treated as remaining in existence, with P taking the place of L as the new common parent of the L group. The following is a graphic illustration of these facts:



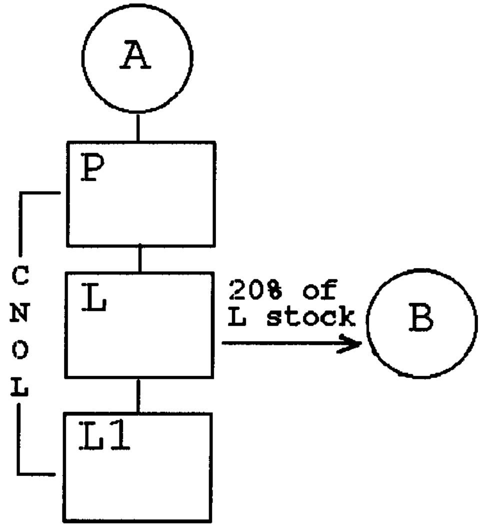


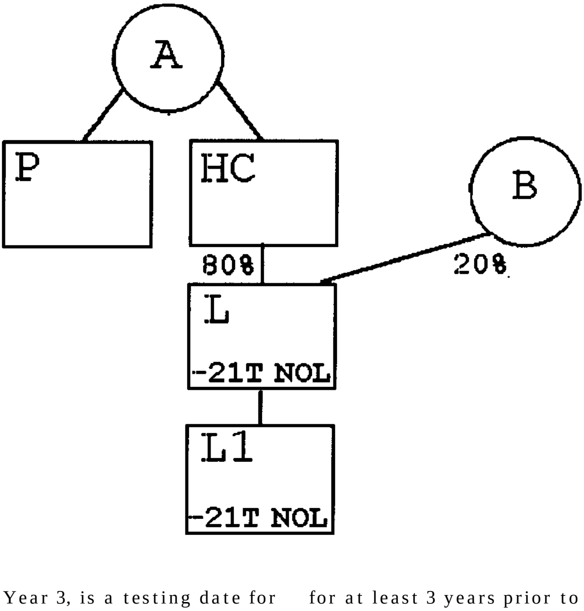
(b) For purposes of determining if the L loss group has an ownership change on November 22, Year 3, the day of the merger, P is treated as a continuation of L so that the testing period for P begins on January 1, Year 2, the first day of the taxable year of the L loss group in which the consolidated net operating loss that is carried over to Year 3 arose. Immediately after the close of November 22, Year 3, D is the only 5-percent shareholder that has increased his ownership interest in P during the testing period (from zero to 10 percentage points).

(c) The facts are the same as in paragraph (a) of this *Example 2*, except that A has held 23⅓ shares (23⅓ percent) of L's stock for five years, and A purchased an additional 10 shares of L stock from E two years before the merger. Immediately after the close of the day of the merger (a testing date), A's ownership interest in P, the common parent of the L loss group, has increased by 6⅔ percentage points over her lowest percentage ownership during the testing period (23⅓ percent to 30 percent).

(d) The facts are the same as in (a) of this *Example 2,* except that P has a net operating loss arising in Year 1 that is carried to the first consolidated return year ending after the day of the merger. Solely for purposes of determining whether the L loss group has an ownership change under paragraph (b)(1)(i) of this section, the testing period for P commences on January 1, Year 2. P does not determine the earliest day for its testing period by reference to its net operating loss carryover from Year 1, which §§1502–1(f)(3) and 1.1502–75(d)(3)(i) treat as arising in a SRLY. See §1.1502–94T to determine the application of section 382 with respect to P's net operating loss carryover.

Example 3. Newly acquired loss subgroup parent. (a) P owns all the L stock and L owns all the L1 stock. The P group has a consolidated net operating loss arising in Year 1 that is carried over to Year 3. On January 19, Year 2, L issues a 20 percent stock interest to B. On February 5, Year 3, P contributes its L stock to a newly formed subsidiary, HC, in exchange for all the HC stock, and distributes the HC stock to its sole shareholder A. HC, L, and L1 thereafter file consolidated returns. A portion of the P group's Year 1 consolidated net operating loss is apportioned to L and L1 under §1.1502–21T(b) and is carried over to the HC group's year ending after February 5, Year 3. HC, L, and L1 compose a loss subgroup within the meaning of §1.1502–91T(d) with respect to the net operating loss carryovers from Year 1. The following is a graphic illustration of these facts:





(b) February 5, Year 3, is a testing date for HC as the loss subgroup parent with respect to the net operating loss carryovers of L and L1 from Year 1. See paragraph (b)(1)(ii)(B) of this section. For purposes of determining whether HC has an ownership change on the testing date, appropriate adjustments must be made with respect to the changes in the percentage ownership of the stock of HC because HC was not the loss subgroup parent for at least 3 years prior to the day on which it became a member of the HC loss subgroup (a testing date). The appropriate adjustments include adjustments so that HC succeeds to the owner shifts of other members of the former group. Thus, HC succeeds to the owner shift of L that resulted from the sale of the 20 percent interest to B in determining whether the HC loss subgroup has an ownership change on February 5, Year 3, and on any subsequent testing date that includes January 19, Year 2.

(4) *End of separate tracking of certain losses.* If §1.1502–96T(a) (relating to the end of separate tracking of attributes) applies to a loss subgroup, then, while one or more members that were included in the loss subgroup remain members of the consolidated group, there is an ownership change with respect to their attributes described in §1.1502–96T(a)(2) only if the consolidated group is a loss group and has an ownership change under paragraph (b)(1)(i) of this section (or such a member has an ownership change under §1.1502–96T(b) (relating to ownership changes of subsidiaries)). If, however, the loss subgroup has had an ownership change before §1.1502–96T(a) applies, see §1.1502–96T(c) for the continuing application of the subgroup's section 382 limitation with respect to its prechange subgroup attributes.

(c) *Supplemental rules for determining ownership change*—(1) *Scope.* This paragraph (c) contains a supplemental rule for determining whether there is an ownership change of a loss group (or loss subgroup). It applies in addition to, and not instead of, the rules of paragraph (b) of this section. Thus, for example, if the common parent of the loss group has an ownership change under paragraph (b) of this section, the loss group has an ownership change even if, by applying this paragraph (c), the common parent would not have an ownership change.

(2) *Cause for applying supplemental rule.* This paragraph (c) applies to a loss group (or loss subgroup) if—

(i) Any 5-percent shareholder of the common parent (or loss subgroup parent) increases its percentage ownership interest in the stock of both—

(A) A subsidiary of the loss group (or loss subgroup) other than by a direct or indirect acquisition of stock of the common parent (or loss subgroup parent); and

(B) The common parent (or loss subgroup parent); and

(ii) Those increases occur within a 3 year period ending on any day of a consolidated return year or, if shorter, the period beginning on the first day following the most recent ownership change of the loss group (or loss subgroup).

(3) *Operating rules.* Solely for purposes of this paragraph (c)—

(i) A 5-percent shareholder of the common parent (or loss subgroup parent) is treated as increasing its percentage ownership interest in the common parent (or loss subgroup parent) or a subsidiary to the extent, if any, that any person acting pursuant to a plan or arrangement with the 5-percent shareholder increases its percentage ownership interest in the stock of that entity;

(ii) The rules in section 382(l)(3) and §§1.382–2T(h) and 1.382–4(d) (relating to constructive ownership) apply with respect to the stock of the subsidiary by treating such stock as stock of a loss corporation; and

(iii) In the case of a loss subgroup, a subsidiary includes any member of the loss subgroup other than the loss subgroup parent. (The loss subgroup parent is, however, a subsidiary of the loss group of which it is a member.)

(4) *Supplemental ownership change rules.* The determination whether the common parent (or loss subgroup parent) has an ownership change is made by applying paragraph (b)(1) of this section as modified by the following additional rules—

(i) *Additional testing dates for the common parent (or loss subgroup parent).* A testing date for the common parent (or loss subgroup parent) also includes—

(A) Each day on which there is an increase in the percentage ownership of stock of a subsidiary as described in paragraph (c)(2) of this section; and

(B) The first day of the first consolidated return year for which the group is a loss group (or the members compose a loss subgroup);

(ii) *Treatment of subsidiary stock as stock of the common parent (or loss subgroup parent).* The common parent (or loss subgroup parent) is treated as though it had issued to the person acquiring (or deemed to acquire) the subsidiary stock an amount of its own stock (by value) that equals the value of the subsidiary stock represented by the percentage increase in that person's ownership of the subsidiary (determined on a separate entity basis). A similar principle applies if the increase in percentage ownership interest is effected by a redemption or similar transaction; and

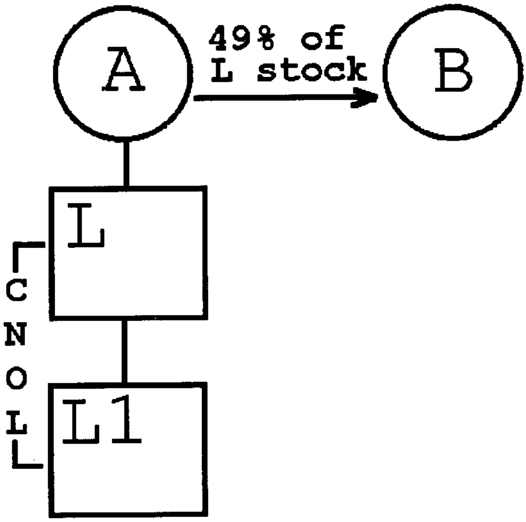
(iii) *5-percent shareholder of the common parent (or loss subgroup parent).* Any person described in paragraph (c)(3)(i) of this section who is acting pursuant to the plan or arrangement is treated as a 5-percent shareholder of the common parent (or loss subgroup parent).

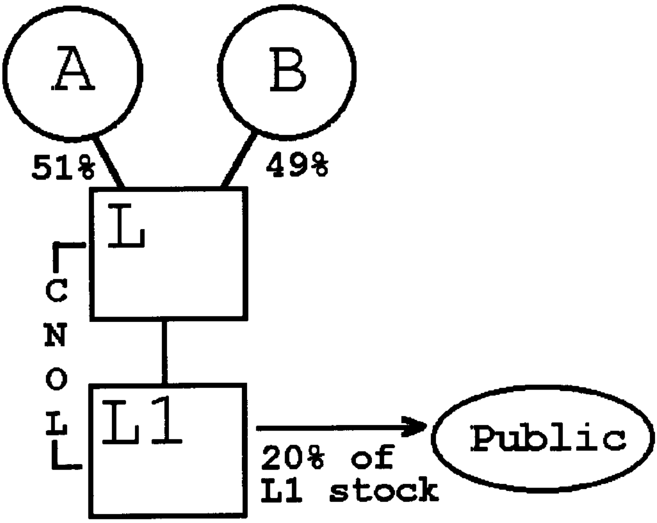
(5) *Examples.* The following examples illustrate the principles of this paragraph (c).

Example 1. Stock of the common parent under supplemental rules. (a) A owns all the L stock. L is not a member of an affiliated group and has a net operating loss carryover arising in Year 1 that is carried over to Year 6. On September 20, Year 6, L transfers all of its assets and liabilities to a newly created subsidiary, S, in exchange for S stock. L and S thereafter file consolidated returns. On November 23, Year 6, B contributes cash to L in exchange for a 45 percent ownership interest in L and contributes cash to S for a 20 percent ownership interest in S.

(b) B is a 5-percent shareholder of L who increases his percentage ownership interest in L and S during the 3 year period ending on November 23, Year 6. Under paragraph (c)(4)(ii) of this section, the determination whether L (the common parent of a loss group) has an ownership change on November 23, Year 6 (or on any testing date in the testing period which includes November 23, Year 6), is made by applying paragraph (b)(1)(i) of this section and by treating the value of B's 20 percent ownership interest in S as if it were L stock issued to B.

Example 2. Plan or arrangement—public offering of subsidiary stock. (a) A owns all the stock of L and L owns all the stock of L1. The L group has a consolidated net operating loss arising in Year 1 that resulted from the operations of L1 and that is carried over to Year 2. As part of a plan, A sells 49 percent of the L stock to B on October 7, Year 2, and L1 issues new stock representing a 20 percent ownership interest in L1 to the public on November 6, Year 2. The following is a graphic illustration of these facts:





(b) A's sale of the L stock to B does not cause an ownership change of the L loss group on October 7, Year 2, under the rules of §1.382–2T and paragraph (b)(1)(i) of this section.

(c) Because the issuance of L1 stock to the public occurs in connection with B's acquisition of L stock pursuant to a plan, paragraph (c)(4) of this section applies to determine whether the L loss group has an ownership change on November 6, Year 2 (or on any testing date for which the testing period includes November 6, Year 2).

(d) *Testing period following ownership change under this section.* If a loss group (or a loss subgroup) has had an ownership change under this section, the testing period for determining a subsequent ownership change with respect to pre-change consolidated attributes (or pre-change subgroup attributes) begins no earlier than the first day following the loss group's (or loss subgroup's) most recent change date.

(e) *Information statements.*—(1) *Common parent of a loss group.* The common parent of a loss group must file the information statement required by § 1.382–2T(a)(2)(ii) for a consolidated return year because of any owner shift, equity structure shift, or the issuance or transfer of an option—

(i) With respect to the common parent and with respect to any subsidiary stock subject to paragraph (c) of this section; and

(ii) With respect to an ownership change described in § 1.1502–96T(b) (relating to ownership changes of subsidiaries).

(2) *Abbreviated statement with respect to loss subgroups.* The common parent of a consolidated group that has a loss subgroup during a consolidated return year must file the information statement required by § 1.382–2T(a)(2)(ii) because of any owner shift, equity structure shift, or issuance or transfer of an option with respect to the loss subgroup parent and with respect to any subsidiary stock subject to paragraph (c) of this section. Instead of filing a separate statement for each loss subgroup parent, the common parent (which is treated as a loss corporation) may file the single statement described in paragraph (e)(1) of this section. In addition to the information concerning stock ownership of the common parent, the single statement must identify each loss subgroup parent and state which loss subgroups, if any, have had ownership changes during the consolidated return year. The loss subgroup parent is, however, still required to maintain the records necessary to determine if the loss subgroup has an ownership change. This paragraph (e)(2) applies with respect to the attributes of a loss subgroup until, under § 1.1502–96T(a), the attributes are no longer treated as described in § 1.1502–91T(d) (relating to the definition of loss subgroup). After that time, the information statement described in paragraph (e)(1) of this section must be filed with respect to those attributes.

[T.D. 8678, 61 FR 33341, June 27, 1996]

§ 1.1502–93T Consolidated section 382 limitation (or subgroup section 382 limitation) (temporary).

(a) *Determination of the consolidated section 382 limitation (or subgroup section 382 limitation)*—(1) *In general.* Following an ownership change, the consolidated section 382 limitation (or subgroup section 382 limitation) for any post-change year is an amount equal to the value of the loss group (or loss subgroup), as defined in paragraph (b) of this section, multiplied by the long-term tax-exempt rate that applies with respect to the ownership change, and adjusted as required by section 382 and the regulations thereunder. See, for example, section 382(b)(2) (relating to the carryforward of unused section 382 limitation), section 382(b)(3)(B) (relating to the section 382 limitation for the post-change year that includes the change date), section 382(m)(2) (relating to short taxable years), and section 382(h) (relating to recognized built-in gains and section 338 gains).

(2) *Coordination with apportionment rule.* For special rules relating to apportionment of a consolidated section 382 limitation (or a subgroup section 382 limitation) when one or more corporations cease to be members of a loss group (or a loss subgroup) and to aggregation of amounts so apportioned, see § 1.1502–95T(c).

(b) *Value of the loss group (or loss subgroup)*—(1) *Stock value immediately before ownership change.* Subject to any adjustment under paragraph (b)(2) of this section, the value of the loss group (or loss subgroup) is the value, immediately before the ownership change, of the stock of each member, other than stock that is owned directly or indirectly by another member. For this purpose—

(i) Ownership is determined under § 1.382–2T;

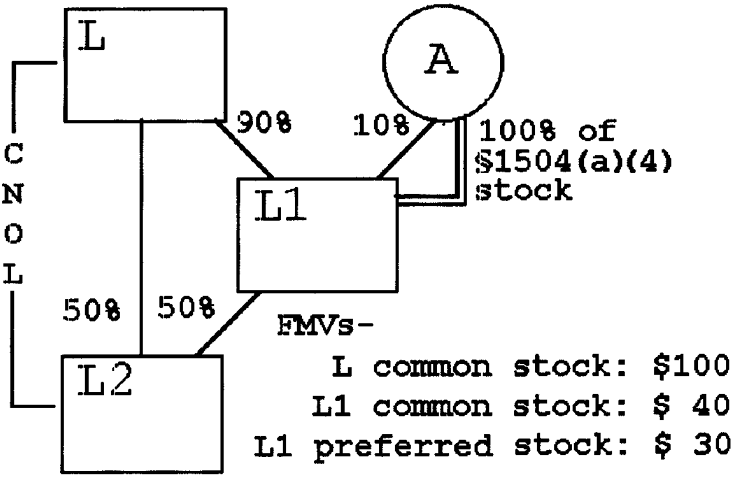
(ii) A member is considered to indirectly own stock of another member through a nonmember only if the member has a 5-percent or greater ownership interest in the nonmember; and

(iii) Stock includes stock described in section 1504(a)(4) and §1.382–2T(f)(18)(ii) and (iii).

(2) *Adjustment to value.* The value of the loss group (or loss subgroup), as determined under paragraph (b)(1) of this section, is adjusted under any rule in section 382 or the regulations thereunder requiring an adjustment to such value for purposes of computing the amount of the section 382 limitation. See, for example, section 382(e)(2) (redemptions and corporate contractions), section 382(l)(1) (certain capital contributions) and section 382(l)(4) (ownership of substantial nonbusiness assets). The value of the loss group (or loss subgroup) determined under this paragraph (b) is also adjusted to the extent necessary to prevent any duplication of the value of the stock of a member. For example, the principles of §1.382–8T (relating to controlled groups of corporations) apply in determining the value of a loss group (or loss subgroup) if, under §1.1502–91T(g)(2), members are not included in the determination whether the group (or loss subgroup) has a net unrealized built-in loss.

(3) *Examples.* The following examples illustrate the principles of this paragraph (b).

Example 1. Basic case. (a) L, L1, and L2 compose a loss group. L has outstanding common stock, the value of which is $100. L1 has outstanding common stock and preferred stock that is described in section 1504(a)(4). L owns 90 percent of the L1 common stock, and A owns the remaining 10 percent of the L1 common stock plus all the preferred stock. The value of the L1 common stock is $40, and the value of the L1 preferred stock is $30. L2 has outstanding common stock, 50 percent of which is owned by L and 50 percent by L1. The L group has an ownership change. The following is a graphic illustration of these facts:



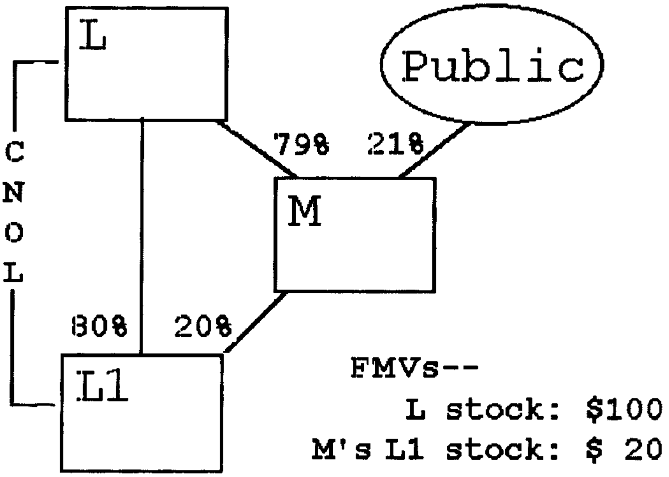
(b) Under paragraph (b)(1) of this section, the L group does not include the value of the stock of any member that is owned directly or indirectly by another member in computing its consolidated section 382 limitation. Accordingly, the value of the stock of the loss group is $134, the sum of the value of—

(1) The common stock of L ($100);

(2) the 10 percent of the L1 common stock ($4) owned by A; and

(3) The L1 preferred stock ($30) owned by A.

Example 2. Indirect ownership. (a) L and L1 compose a consolidated group. L's stock has a value of $100. L owns 80 shares (worth $80) and corporation M owns 20 shares (worth $20) of the L1 stock. L also owns 79 percent of the stock of corporation M. The L group has an ownership change. The following is a graphic illustration of these facts:



(b) Under paragraph (b)(1) of this section, because of L's more than 5 percent ownership interest in M, a nonmember, L is considered to indirectly own 15.8 shares of the L1 stock held by M (79% x 20 shares). The value of the L loss group is $104.20, the sum of the values of—

(1) The L stock ($100); and

(2) The L1 stock not owned directly or indirectly by L (21% x $20, or $4.20).

(c) *Recognized built-in gain of a loss group or loss subgroup.* If a loss group (or loss subgroup) has a net unrealized built-in gain, any recognized built-in gain of the loss group (or loss subgroup) is taken into account under section 382(h) in determining the consolidated section 382 limitation (or subgroup section 382 limitation).

(d) *Continuity of business*—(1) *In general.* A loss group (or a loss subgroup) is treated as a single entity for purposes of determining whether it satisfies the continuity of business enterprise requirement of section 382(c)(1).

(2) *Example.* The following example illustrates the principle of this paragraph (d).

Example. Continuity of business enterprise. L owns all the stock of two subsidiaries, L1 and L2. The L group has an ownership change. It has pre-change consolidated attributes attributable to L2. Each of the members has historically conducted a separate line of business. Each line of business is approximately equal in value. One year after the ownership change, L discontinues its separate business and the business of L2. The separate business of L1 is continued for the remainder of the 2 year period following the ownership change. The continuity of business enterprise requirement of section 382(c)(1) is met even though the separate businesses of L and L2 are discontinued.

(e) *Limitations of losses under other rules.* If a section 382 limitation for a post-change year exceeds the consolidated taxable income that may be offset by pre-change attributes for any reason, including the application of the limitation of § 1.1502–21T(c), the amount of the excess is carried forward under section 382(b)(2) (relating to the carryforward of unused section 382 limitation).

[T.D. 8678, 61 FR 33351, June 27, 1996]

§ 1.1502–94T Coordination with section 382 and the regulations thereunder when a corporation becomes a member of a consolidated group (temporary).

(a) *Scope*—(1) *In general.* This section applies section 382 and the regulations thereunder to a corporation that is a new loss member of a consolidated group. A corporation is a new loss member if it—

(i) Carries over a net operating loss that arose (or is treated under § 1.1502–21T(c) as arising) in a SRLY with respect to the current group, and that is not described in § 1.1502–91T(d)(1); or

(ii) Has a net unrealized built-in loss (determined under paragraph (c) of this section on the day it becomes a member of the current group by treating that day as a change date) that is not taken into account under §1.1502–91T(d)(2) in determining whether two or more corporations compose a loss subgroup.

(2) *Successor corporation as new loss member.* A new loss member also includes any successor to a corporation that has a net operating loss carryover arising in a SRLY and that is treated as remaining in existence under §1.382–2(a)(1)(ii) following a transaction described in section 381(a).

(3) *Coordination in the case of a loss subgroup.* For rules regarding the determination of whether there is an ownership change of a loss subgroup with respect to a net operating loss or a net unrealized built-in loss described in §1.1502–91T(d) (relating to the definition of loss subgroup) and the computation of a subgroup section 382 limitation following such an ownership change, see §§1.1502–92T and 1.1502–93T.

(4) *End of separate tracking of certain losses.* If §1.1502–96T(a) (relating to the end of separate tracking of attributes) applies to a new loss member, then, while that member remains a member of the consolidated group, there is an ownership change with respect to its attributes described in §1.1502–96T(a)(2) only if the consolidated group is a loss group and has an ownership change under §1.1502–92T(b)(1)(i) (or that member has an ownership change under §1.1502–96T(b) (relating to ownership changes of subsidiaries)). If, however, the new loss member has had an ownership change before §1.1502–96T(a) applies, see §1.1502–96T(c) for the continuing application of the section 382 limitation with respect to the member's pre-change losses.

(5) *Cross-reference.* See section 382(a) and §1.1502–96T(c) for the continuing effect of an ownership change after a corporation becomes or ceases to be a member.

(b) *Application of section 382 to a new loss member*—(1) *In general.* Section 382 and the regulations thereunder apply to a new loss member to determine, on a separate entity basis, whether and to what extent a section 382 limitation applies to limit the amount of consolidated taxable income that may be offset by the new loss member's pre-change separate attributes. For example, if an ownership change with respect to the new loss member occurs under section 382 and the regulations thereunder, the amount of consolidated taxable income for any post-change year that may be offset by the new loss member's pre-change separate attributes shall not exceed the section 382 limitation as determined separately under section 382(b) with respect to that member for such year. If the post-change year includes the change date, section 382(b)(3)(A) is applied so that the section 382 limitation of the new loss member does not apply to the portion of the taxable income for such year that is allocable to the period in such year on or before the change date. See generally §1.382–6 (relating to the allocation of income and loss).

(2) *Adjustment to value.* The value of the new loss member is adjusted to the extent necessary to prevent any duplication of the value of the stock of a member. For example, the principles of §1.382–8T (relating to controlled groups of corporations) apply in determining the value of a new loss member.

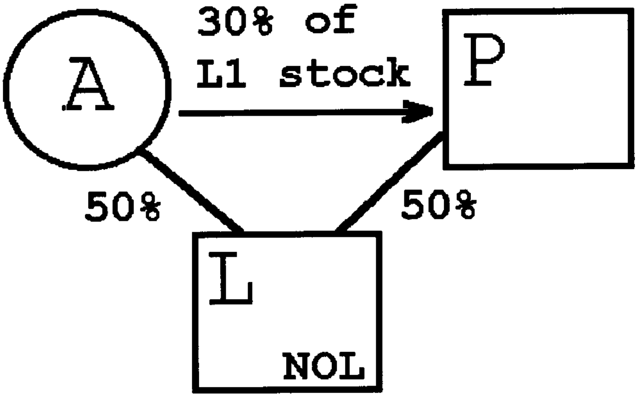
(3) *Pre-change separate attribute defined.* A pre-change separate attribute of a new loss member is—

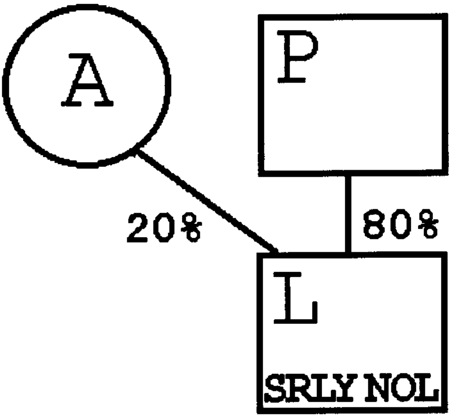
(i) Any net operating loss carryover of the new loss member described in paragraph (a)(1) of this section; and

(ii) Any recognized built-in loss of the new loss member.

(4) *Examples.* The following examples illustrate the principles of this paragraph (b).

Example 1. Basic case. (a) A and P each own 50 percent of the L stock. On December 19, Year 6, P purchases 30 percent of the L stock from A for cash. L has net operating losses arising in Year 1 and Year 2 that it carries over to Year 6 and Year 7. The following is a graphic illustration of these facts:

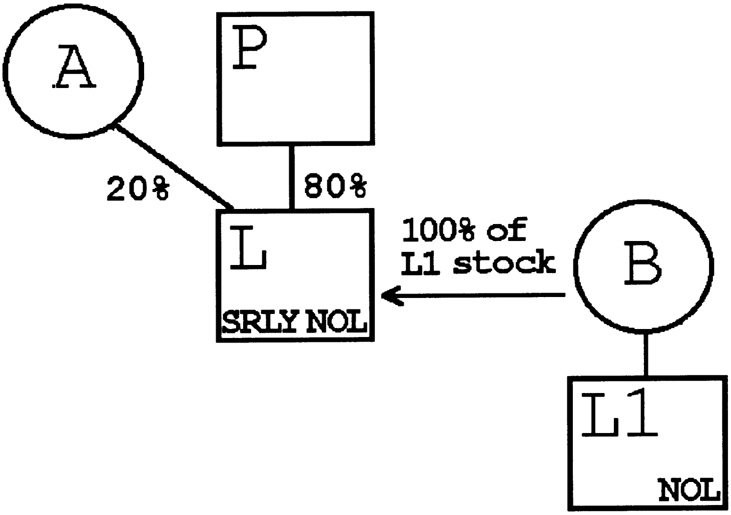


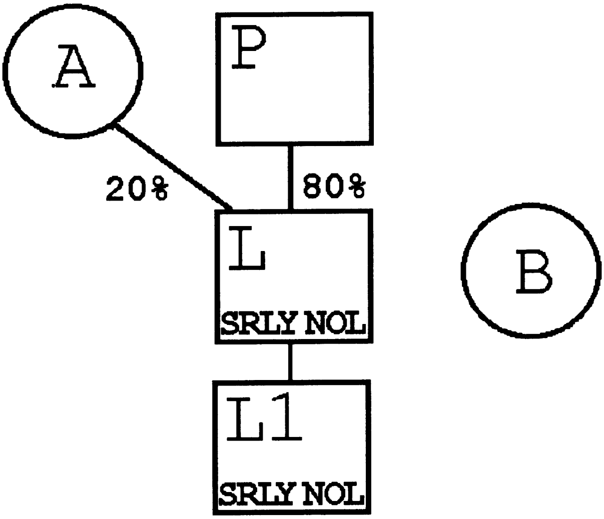


(b) L is a new loss member because it has net operating loss carryovers that arose in a SRLY with respect to the P group and L is not a member of a loss subgroup under § 1.1502–91T(d). Under section 382 and the regulations thereunder, L is a loss corporation on December 19, Year 6, that day is a testing date for L, and the testing period for L commences on December 20, Year 3. –

(c) P's purchase of L stock does not cause an ownership change of L on December 19, Year 6, with respect to the net operating loss carryovers from Year 1 and Year 2 under section 382 and § 1.382–2T. The use of the loss carryovers, however, is subject to limitation under § 1.1502–21T(c). –

Example 2. Multiple new loss members. (a) The facts are the same as in *Example 1*, and, on December 31, Year 6, L purchases all the stock of L1 from B for cash. L1 has a net operating loss of $40 arising in Year 3 that it carries over to Year 7. The following is a graphic illustration of these facts:





(b) L1 is a new loss member because it has a net operating loss carryover from Year 3 that arose in a SRLY with respect to the P group and L1 is not a member of a loss subgroup under §1.1502–91T(d)(1).

(c) L's purchase of all the stock of L1 causes an ownership change of L1 on December 31, Year 6, under section 382 and §1.382–2T. Accordingly, a section 382 limitation based on the value of the L1 stock immediately before the ownership change limits the amount of consolidated taxable income of the P group for any post-change year that may be offset by L1's loss from Year 3.

(d) L1's ownership change in connection with its becoming a member of the P group is an ownership change described in §1.1502–96T(a). Thus, starting on January 1, Year 7, the P group no longer separately tracks owner shifts of the stock of L1 with respect to L1's loss from Year 3. Instead, the P group is a loss group because of such loss under § 1.1502–91T(c).

Example 3. Ownership changes of new loss members. (a) The facts are the same as in *Example 2*, and, on April 30, Year 7, C purchases all the stock of P for cash.

(b) L is a new loss member on April 30, Year 7, because its Year 1 and Year 2 losses arose in SRLYs with respect to the P group and it is not a member of a loss subgroup under § 1.1502–91T(d)(1). The testing period for L commences on May 1, Year 4. C's purchase of all the P stock causes an ownership change of L on April 30, Year 7, under section 382 and § 1.382–2T with respect to its Year 1 and Year 2 losses. Accordingly, a section 382 limitation based on the value of the L stock immediately before the ownership change limits the amount of consolidated taxable income of the P group for any post-change year that may be offset by L's Year 1 and Year 2 losses. The use of those carryovers is also subject to limitation under § 1.1502–21T(c).

(c) The P group is a loss group on April 30, Year 7, because it is entitled to use L1's loss from Year 3, and such loss is no longer treated as a loss of a new loss member starting the day after L1's ownership change on December 31, Year 6. See §§ 1.1502–96T(a) and 1.1502–91T(c)(2). C's purchase of all the P stock causes an ownership change of P, and therefore the P loss group, on April 30, Year 7, with respect to L1's Year 3 loss. Accordingly, a consolidated section 382 limitation based on the value of the P stock immediately before the ownership change limits the amount of consolidated taxable income of the P group for any post-change year that may be offset by L1's Year 3 loss.

(c) *Built-in gains and losses.* As the context may require, the principles of §§ 1.1502–91T(g) and (h) and 1.1502–93T(c) (relating to built-in gains and losses) apply to a new loss member on a separate entity basis. See § 1.1502–91T(g)(3).

(d) *Information statements.* The common parent of a consolidated group that has a new loss member subject to paragraph (b)(1) of this section during a consolidated return year must file the information statement required by § 1.382–2T(a)(2)(ii) because of any owner shift, equity structure shift, or issuance or transfer of an option with respect to the new loss member. Instead of filing a separate statement for each new loss member the common parent may file a single statement described in § 1.382–2T(a)(2)(ii) with respect to the stock ownership of the common parent (which is treated as a loss corporation). In addition to the information concerning stock ownership of the common parent, the single statement must identify each new loss member and state which new loss members, if any, have had ownership changes during the consolidated return year. The new loss member is, however, required to maintain the records necessary to determine if it has an ownership change. This paragraph (d) applies with respect to the attributes of a new loss member until an event occurs which ends separate tracking under § 1.1502–96T(a). After that time, the information statement described in § 1.1502–92T(e)(1) must be filed with respect to these attributes.

[T.D. 8678, 61 FR 33352, June 27, 1996]

§ 1.1502–95T Rules on ceasing to be a member of a consolidated group (or loss subgroup) (temporary).

(a) *In general*—(1) *Consolidated group.* This section provides rules for applying section 382 on or after the day that a member ceases to be a member of a consolidated group (or loss subgroup). The rules concern how to determine whether an ownership change occurs with respect to losses of the member, and how a consolidated section 382 limitation (or subgroup section 382 limitation) is apportioned to the member. As the context requires, a reference in this section to a loss group, a member, or a corporation also includes a reference to a loss subgroup, and a reference to a consolidated section 382 limitation also includes a reference to a subgroup section 382 limitation.

(2) *Election by common parent.* Only the common parent (not the loss subgroup parent) may make the election under paragraph (c) of this section to apportion either a consolidated section 382 limitation or a subgroup section 382 limitation.

(3) *Coordination with §§ 1.1502–91T through 1.1502–93T.* For rules regarding the determination of whether there is an ownership change of a loss subgroup and the computation of a subgroup section 382 limitation following such an ownership change, see §§ 1.1502–91T through 1.1502–93T.

(b) *Separate application of section 382 when a member leaves a consolidated group*—(1) *In general.* Except as provided in §§ 1.1502–91T through 1.1502–93T (relating to rules applicable to loss groups and loss subgroups), section 382 and the regulations thereunder apply to a corporation on a separate entity basis after it ceases to be a member of a consolidated group (or loss subgroup). Solely for purposes of determining whether a corporation has an ownership change—

(i) Any portion of a consolidated net operating loss that is apportioned to the corporation under §1.1502–21T(b) is treated as a net operating loss of the corporation beginning on the first day of the taxable year in which the loss arose;

(ii) The testing period may include the period during which (or before which) the corporation was a member of the group (or loss subgroup); and

(iii) Except to the extent provided in §1.1502–20(g) (relating to reattributed losses), the day it ceases to be a member of a consolidated group is treated as a testing date of the corporation within the meaning of §1.382–2(a)(4).

(2) *Effect of a prior ownership change of the group.* If a loss group has had an ownership change under §1.1502–92T before a corporation ceases to be a member of a consolidated group (the former member)—

(i) Any pre-change consolidated attribute that is subject to a consolidated section 382 limitation continues to be treated as a pre-change loss with respect to the former member after the attribute is apportioned to the former member;

(ii) The former member's section 382 limitation with respect to such attribute is zero except to the extent the common parent apportions under paragraph (c) of this section all or a part of the consolidated section 382 limitation to the former member;

(iii) The testing period for determining a subsequent ownership change with respect to such attribute begins no earlier than the first day following the loss group's most recent change date; and

(iv) As generally provided under section 382, an ownership change of the former member that occurs on or after the day it ceases to be a member of a loss group may result in an additional, lesser limitation amount with respect to such loss.

(3) *Application in the case of a loss subgroup.* If two or more former members are included in the same loss subgroup immediately after they cease to be members of a consolidated group, the principles of paragraphs (b) and (c) of this section apply to the loss subgroup. Therefore, for example, an apportionment by the common parent under paragraph (c) of this section is made to the loss subgroup rather than separately to its members. –

(4) *Examples.* The following examples illustrate the principles of this paragraph (b).

Example 1. Treatment of departing member as a separate corporation throughout the testing period. (a) A owns all the L stock. L owns all the stock of L1 and L2. The L group has a consolidated net operating loss arising in Year 1 that is carried over to Year 3. On January 12, Year 2, A sells 30 percent of the L stock to B. On February 7, Year 3, L sells 40 percent of the L2 stock to C, and L2 ceases to be a member of the group. A portion of the Year 1 consolidated net operating loss is apportioned to L2 under §1.1502–21T(b) and is carried to L2's first separate return year, which ends December 31, Year 3. (b) Under paragraph (b)(1) of this section, L2 is a loss corporation on February 7, Year 3. Under paragraph (b)(1)(iii) of this section, February 7, Year 3, is a testing date. Under paragraph (b)(1)(ii) of this section, the testing period for L2 with respect to this testing date commences on January 1, Year 1, the first day of the taxable year in which the portion of the consolidated net operating loss apportioned to L2 arose. Therefore, in determining whether L2 has an ownership change on February 7, Year 3, B's purchase of 30 percent of the L stock and C's purchase of 40 percent of the L2 stock are each owner shifts. L2 has an ownership change under section 382(g) and §1.382–2T because B and C have increased their ownership interests in L2 by 18 and 40 percentage points, respectively, during the testing period.

Example 2. Effect of prior ownership change of loss group. (a) L owns all the L1 stock and L1 owns all the L2 stock. The L loss group had an ownership change under §1.1502–92T in Year 2 with respect to a consolidated net operating loss arising in Year 1 and carried over to Year 2 and Year 3. The consolidated section 382 limitation computed solely on the basis of the value of the stock of L is $100. On December 31, Year 2, L1 sells 25 percent of the stock of L2 to B. L2 is apportioned a portion of the Year 1 consolidated net operating loss which it carries over to its first separate return year ending after December 31, Year 2. L2's separate section 382 limitation with respect to this loss is zero unless L elects to apportion all or a part of the consolidated section 382 limitation to L2. (See paragraph (c) of this section for rules regarding the apportionment of a consolidated section 382 limitation.) L apportions $50 of the consolidated section 382 limitation to L2.

(b) On December 31, Year 3, L1 sells its remaining 75 percent stock interest in L2 to C, resulting in an ownership change of L2. L2's section 382 limitation computed on the change date with respect to the value of its stock is $30. Accordingly, L2's section 382 limitation for post-change years ending after December 31, Year 3, with respect to its prechange losses, including the consolidated net operating losses apportioned to it from the L group, is $30, adjusted as required by section 382 and the regulations thereunder.

(c) *Apportionment of a consolidated section 382 limitation*—(1) *In general.* The common parent may elect to apportion all or any part of a consolidated section 382 limitation to a former member (or loss subgroup). See paragraph (e) of this section for the time and manner of making the election to apportion.

(2) *Amount of apportionment.* The common parent may apportion all or part of each element of the consolidated section 382 limitation determined under §1.1502–93T. For this purpose, the consolidated section 382 limitation consists of two elements—

(i) The value element, which is the element of the limitation determined under section 382(b)(1) (relating to value multiplied by the long-term tax-exempt rate) without regard to such adjustments as those described in section 382(b)(2) (relating to the carryforward of unused section 382 limitation), section 382(b)(3)(B) (relating to the section 382 limitation for the post-change year that includes the change date), section 382(h) (relating to built-in gains and section 338 gains), and section 382(m)(2) (relating to short taxable years); and

(ii) The adjustment element, which is so much (if any) of the limitation for the taxable year during which the former member ceases to be a member of the consolidated group that is attributable to a carryover of unused limitation under section 382(b)(2) or to recognized built-in gains under 382(h).

(3) *Effect of apportionment on the consolidated section 382 limitation.* The value element of the consolidated section 382 limitation for any post-change year ending after the day that a former member (or loss subgroup) ceases to be a member(s) is reduced to the extent that it is apportioned under this paragraph (c). The consolidated section 382 limitation for the post-change year in which the former member (or loss subgroup) ceases to be a member(s) is also reduced to the extent that the adjustment element for that year is apportioned under this paragraph (c).

(4) *Effect on corporations to which the consolidated section 382 limitation is apportioned.* The amount of the value element that is apportioned to a former member (or loss subgroup) is treated as the amount determined under section 382(b)(1) for purposes of determining the amount of that corporation's (or loss subgroup's) section 382 limitation for any taxable year ending after the former member (or loss subgroup) ceases to be a member(s). Appropriate adjustments must be made to the limitation based on the value element so apportioned for a short taxable year, carryforward of unused limitation, or any other adjustment required under section 382. The adjustment element apportioned to a former member (or loss subgroup) is treated as an adjustment under section 382(b)(2) or section

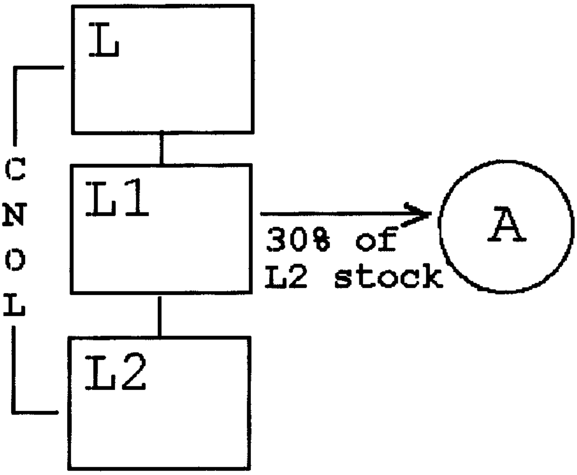
382(h), as appropriate, for the first taxable year after the member (or members) ceases to be a member (or members).

(5) *Deemed apportionment when loss group terminates.* If a loss group terminates, to the extent the consolidated section 382 limitation is not apportioned under paragraph (c)(1) of this section, the consolidated section 382 limitation is deemed to be apportioned to the loss subgroup that includes the common parent, or, if there is no loss subgroup that includes the common parent immediately after the loss group terminates, to the common parent. A loss group terminates on the first day of the first taxable year that is a separate return year with respect to each member of the former loss group.

(6) *Appropriate adjustments when former member leaves during the year.* Appropriate adjustments are made to the consolidated section 382 limitation for the consolidated return year during which the former member (or loss subgroup) ceases to be a member(s) to reflect the inclusion of the former member in the loss group for a portion of that year.

(7) *Examples.* The following examples illustrate the principles of this paragraph (c).

Example 1. Consequence of apportionment. (a) L owns all the L1 stock and L1 owns all the L2 stock. The L group has a $200 consolidated net operating loss arising in Year 1 that is carried over to Year 2. At the close of December 31, Year 1, the group has an ownership change under § 1.1502–92T. The ownership change results in a consolidated section 382 limitation of $10 based on the value of the stock of the group. On August 29, Year 2, L1 sells 30 percent of the stock of L2 to A. L2 is apportioned $90 of the group's $200 consolidated net operating loss under § 1.1502–21T(b). L, the common parent, elects to apportion $6 of the consolidated section 382 limitation to L2. The following is a graphic illustration of these facts:



(b) For its separate return years ending after August 29, Year 2 (other than the taxable year ending December 31, Year 2), L2's section 382 limitation with respect to the $90 of the group's net operating loss apportioned to it is $6, adjusted, as appropriate, for any short taxable year, unused section 382 limitation, or other adjustment. For its consolidated return years ending after August 29, Year 2, (other than the year ending December 31, Year 2) the L group's consolidated section 382 limitation with respect to the remaining $110 of pre-change consolidated attribute is $4 ($10 minus the $6 value element apportioned to L2), adjusted, as appropriate, for any short taxable year, unused section 382 limitation, or other adjustment.

(c) For the L group's consolidated return year ending December 31, Year 2, the value element of its consolidated section 382 limitation is increased by $4 (rounded to the nearest dollar), to account for the period during which L2 was a member of the L group ($6, the consolidated section 382 limitation apportioned to L2, times 241/365, the ratio of the number of days during Year 2 that L2 is a member of the group to the number of days in the group's consolidated return year). See paragraph (c)(6) of this section. Therefore, the value element of the consolidated section 382 limitation for Year 2 of the L group is $8 (rounded to the nearest dollar).

(d) The section 382 limitation for L2's short taxable year ending December 31, Year 2, is $2 (rounded to the nearest dollar), which is the amount that bears the same relationship to $6, the value element of the consolidated section 382 limitation apportioned to L2, as the number of days during that short taxable year, 124 days, bears to 365. See §1.382–4(c).

Example 2. Consequence of no apportionment. The facts are the same as in *Example 1,* except that L does not elect to apportion any portion of the consolidated section 382 limitation to L2. For its separate return years ending after August 29, Year 2, L2's section 382 limitation with respect to the $90 of the group's pre-change consolidated attribute apportioned to L2 is zero under paragraph (b)(2)(ii) of this section. Thus, the $90 consolidated net operating loss apportioned to L2 cannot offset L2's taxable income in any of its separate return years ending after August 29, Year 2. For its consolidated return years ending after August 29, Year 2, the L group's consolidated section 382 limitation with respect to the remaining $110 of pre-change consolidated attribute is $10, adjusted, as appropriate, for any short taxable year, unused section 382 limitation, or other adjustment.

Example 3. Apportionment of adjustment element. The facts are the same as in *Example 1,* except that L2 ceases to be a member of the L group on August 29, Year 3, and the L group has a $4 carryforward of an unused consolidated section 382 limitation (under section 382(b)(2)) to the 1993 consolidated return year.

The carryover of unused limitation increases the consolidated section 382 limitation for the Year 3 consolidated return year from $10 to $14. L may elect to apportion all or any portion of the $10 value element and all or any portion of the $4 adjustment element to L2.

(d) *Rules pertaining to ceasing to be a member of a loss subgroup*—(1) *In general.* A corporation ceases to be a member of a loss subgroup—

(i) On the first day of the first taxable year for which it files a separate return; or

(ii) The first day that it ceases to bear a relationship described in section 1504(a)(1) to the loss subgroup parent (treating for this purpose the loss subgroup parent as the common parent described in section 1504(a)(1)(A)).

(2) *Examples.* The principles of this paragraph (d) are illustrated by the following examples.

Example 1. Basic case. (a) P owns all the L stock, L owns all the L1 stock and L1 owns all the L2 stock. The P group has a consolidated net operating loss arising in Year 1 that is carried over to Year 2. On December 11, Year 2, P sells all the stock of L to corporation M. Each of L, L1, and L2 is apportioned a portion of the Year 1 consolidated net operating loss, and thereafter each joins with M in filing consolidated returns. Under §1.1502–92T, the L loss subgroup has an ownership change on December 11, Year 2. The L loss subgroup has a subgroup section 382 limitation of $100. The following is a graphic illustration of these facts:

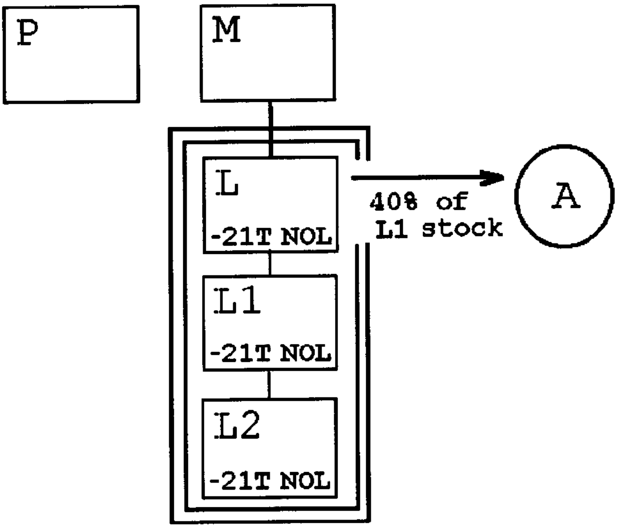
(b) On May 22, Year 3, L1 sells 40 percent of the L2 stock to A. L2 carries over a portion of the P group's net operating loss from Year 1 to its separate return year ending December 31, Year 3. Under paragraph (d)(1) of this section, L2 ceases to be a member of the L loss subgroup on May 22, Year 3, which is both (1) the first day of the first taxable year for which it files a separate return and (2) the day it ceases to bear a relationship described in section 1504(a)(1) to the loss subgroup parent, L. The net operating loss of L2 that is carried over from the P group is treated as a pre-change loss of L2 for its separate return years ending after May 22, Year 3. Under paragraphs (a)(2) and (b)(2) of this section, the separate section 382 limitation with respect to this loss is zero unless M elects to apportion all or a part of the subgroup section 382 limitation of the L loss subgroup to L2.

Example 2. Formation of a new loss subgroup. The facts are the same as in *Example 1*, except that A purchases 40 percent of the L1 stock from L rather than purchasing L2 stock from L1. L1 and L2 file a consolidated return for their first taxable year ending after May 22, Year 3, and each of L1 and L2 carries over a part of the net operating loss of the P group that arose in Year 1. Under paragraph (d)(1) of this section, L1 and L2 cease to be members of the L loss subgroup on May 22, Year 3. The net operating losses carried over from the P group are treated as pre-change subgroup attributes of the loss subgroup composed of L1 and L2. The subgroup section 382 limitation with respect to those losses is zero unless M elects to apportion all or part of the subgroup section 382 limitation of the L loss subgroup to the L1 loss subgroup. The following is a graphic illustration of these facts:



P

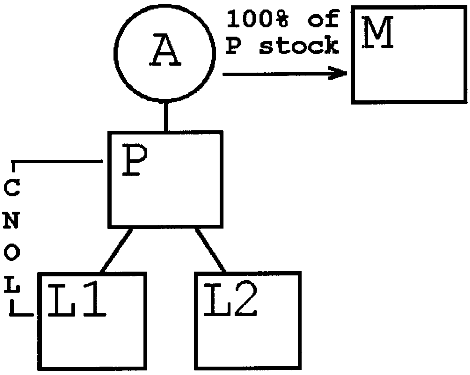
Example 3. Ceasing to bear a section 1504(a)(1) relationship to a loss subgroup parent. (a) A owns all the stock of P, and P owns all the stock of L1 and L2. The P group has a consolidated net operating loss arising in Year 1 that is carried over to Year 3 and Year 4. Corporation M acquires all the stock of P on November 11, Year 3, and P, L1, and L2 thereafter file consolidated returns with M. M's acquisition results in an ownership change of the P loss subgroup under § 1.1502–92T(b)(1)(ii). The following is a graphic illustration of these facts:



A

-21T NOL

A
M
P
L1
-21T NOL
L2
-21T NOL

(b) P distributes the L2 stock to M on October 7, Year 4. L2 ceases to be a member of the P loss subgroup on October 7, Year 4, the first day that it ceases to bear the relationship described in section 1504(a)(1) to P, the P loss subgroup parent. See paragraph (d)(1)(ii) of this section. Thus, the section 382 limitation with respect to the pre-change subgroup attributes attributable to L2 is zero except to the extent M elects to apportion all or a part of the subgroup section 382 limitation of the P loss subgroup to L2.

Example 4. Relationship through a successor. The facts are the same as in *Example 3*, except that, instead of P's distributing the stock of L2, L2 merges into L1 on October 7, Year 4. L1 (as successor to L2 in the merger within the meaning of § 1.382–2T(f)(4)) continues to bear a relationship described in section 1504(a)(1) to P, the loss subgroup parent. Thus, L2 does not cease to be a member of the P loss subgroup as a result of the merger.

(e) *Filing the election to apportion*—(1) *Form of the election to apportion.* An election under paragraph (c) of this section must be made by the common parent. The election must be made in the form of the following statement: "THIS IS AN ELECTION UNDER § 1.1502–95T OF THE INCOME TAX REGULATIONS TO APPORTION ALL OR PART OF THE [insert either CONSOLIDATED SECTION 382 LIMITATION or SUBGROUP SECTION 382 LIMITATION, as appropriate] TO [insert name and E.I.N. of the corporation (or the corporations that compose a new loss subgroup) to which allocation is made]. The declaration must also include the following information, as appropriate—

(i) The date of the ownership change that resulted in the consolidated section 382 limitation (or subgroup section 382 limitation);

(ii) The amount of the consolidated section 382 limitation (or subgroup section 382 limitation) for the taxable year during which the former member (or new loss subgroup) ceases to be a member of the consolidated group (determined without regard to any apportionment under this section;

(iii) The amount of the value element and adjustment element of the consolidated section 382 limitation (or subgroup section 382 limitation) that is apportioned to the former member (or new loss subgroup) pursuant to paragraph (c) of this section; and

(iv) The name and E.I.N. of the common parent making the apportionment.

(2) *Signing of the election.* The election statement must be signed by both the common parent and the former member (or, in the case of a loss subgroup, the common parent and the loss subgroup parent) by persons authorized to sign their respective income tax returns.

(3) *Filing of the election.* The election statement must be filed by the common parent of the group that is apportioning the consolidated section 382 limitation (or the subgroup section 382 limitation) with its income tax return for the taxable year in which the former member (or new loss subgroup) ceases to be a member. The common parent must also deliver a copy of the statement to the former member (or the members of the new loss subgroup) on or before the day the group files its income tax return for the consolidated return year that the former member (or new loss subgroup) ceases to be a member. A copy of the statement must be attached to the first return of the former member (or the first return in which the members of a new loss subgroup join) that is filed after the close of the consolidated return year of the group of which the former member (or the members of a new loss subgroup) ceases to be a member.

(4) *Revocation of election.* An election statement made under paragraph (c) of this section is revocable only with the consent of the Commissioner.

[T.D. 8678, 61 FR 33355, June 27, 1996]

§ 1.1502–96T Miscellaneous rules (temporary).

(a) *End of separate tracking of losses*—(1) *Application.* This paragraph (a) applies to a member (or a loss subgroup) with a net operating loss carryover that arose (or is treated under § 1.1502–21T(c) as arising) in a SRLY (or a net unrealized built-in gain or loss determined at the time that the member (or loss subgroup) becomes a member of the consolidated group if there is—

(i) An ownership change of the member (or loss subgroup in connection with, or after, becoming a member of the group; or

(ii) A period of 5 consecutive years following the day that the member (or loss subgroup) becomes a member of a group during which the member (or loss subgroup) has not had an ownership change.

(2) *Effect of end of separate tracking.* If this paragraph (a) applies with respect

to a member (or loss subgroup), then, starting on the day after the earlier of the change date (but not earlier than the day the member (or loss subgroup) becomes a member of the consolidated group) or the last day of the 5 consecutive year period described in paragraph (a)(1)(ii) of this section, the member's net operating loss carryover that arose (or is treated under §1.1502–21T(c) as arising) in a SRLY, is treated as described in §1.1502–91T(c)(1)(i). Also, the member's separately computed net unrealized built-in gain or loss is included in the determination whether the group has a net unrealized built-in gain or loss. The preceding sentences also apply for purposes of determining whether there is an ownership change with respect to such attributes following such change date (or earlier day) or 5 consecutive year period. Thus, for example, starting the day after the change date or the end of the 5 consecutive year period—

(i) The consolidated group which includes the new loss member or loss subgroup is no longer required to separately track owner shifts of the stock of the new loss member or loss subgroup parent to determine if an ownership change occurs with respect to the attributes of the new loss member or members included in the loss subgroup;

(ii) The group includes the member's attributes in determining whether it is a loss group under §1.1502–91T(c);

(iii) There is an ownership change with respect to such attributes only if the group is a loss group and has an ownership change; and

(iv) If the group has an ownership change, such attributes are pre-change consolidated attributes subject to the loss group's consolidated section 382 limitation.

(3) *Continuing effect of end of separate tracking.* As the context may require, a current group determines which of its members are included in a loss subgroup on any testing date by taking into account the application of this section in the former group. See the example in §1.1502–91T(f)(2).

(4) *Special rule for testing period.* For purposes of determining the beginning of the testing period for a loss group, the member's (or loss subgroup's) net operating loss carryovers (or net unrealized built-in gain or loss) described in paragraph (a)(2) of this section are considered to arise—

–(i) in a case described in paragraph (a)(1)(i) of this section, in a taxable year that begins not earlier than the later of the day following the change date or the day that the member becomes a member of the group; and –(ii) in a case described in paragraph (a)(1)(ii) of this section, in a taxable year that begins 3 years before the end of the 5 consecutive year period.

(5) *Limits on effects of end of separate tracking.* The rule contained in this paragraph (a) applies solely for purposes of §§1.1502–91T through 1.1502–95T and this section (other than paragraph (b)(2)(ii)(B) of this section (relating to the definition of pre-change attributes of a subsidiary)) and §1.1502–98T, and not for purposes of other provisions of the consolidated return regulations, including, for example, §§1.1502–15T and 1.1502–21T (relating to the consolidated net operating loss deduction). See also paragraph (c) of this section for the continuing effect of an ownership change with respect to pre-change attributes.

(b) *Ownership change of subsidiary*—(1) *Ownership change of a subsidiary because of options or plan or arrangement.* Notwithstanding §1.1502–92T, a subsidiary may have an ownership change for purposes of section 382 with respect to its attributes which a group or loss subgroup includes in making a determination under §1.1502–91T(c)(1) (relating to the definition of loss group) or §1.1502–91T(d) (relating to the definition of loss subgroup). The subsidiary has such an ownership change if it has an ownership change under the principles of §1.1502–95T(b) and section 382 and the regulations thereunder (determined on a separate entity basis by treating the subsidiary as not being a member of a consolidated group) in the event of—

(i) The deemed exercise under §1.382–4(d) of an option or options (other than an option with respect to stock of the common parent) held by a person (or persons acting pursuant to a plan or arrangement) to acquire more than 20 percent of the stock of the subsidiary; or

(ii) An increase by 1 or more 5-percent shareholders, acting pursuant to a plan or arrangement to avoid an ownership change of a subsidiary, in their percentage ownership interest in the subsidiary by more than 50 percentage points during the testing period of the subsidiary through the acquisition (or deemed acquisition pursuant to § 1.382–4(d)) of ownership interests in the subsidiary and in higher-tier members with respect to the subsidiary.

(2) *Effect of the ownership change*—(i) *In general.* If a subsidiary has an ownership change under paragraph (b)(1) of this section, the amount of consolidated taxable income for any post-change year that may be offset by the pre-change losses of the subsidiary shall not exceed the section 382 limitation for the subsidiary. For purposes of this limitation, the value of the subsidiary is determined solely by reference to the value of the subsidiary's stock.

(ii) *Pre-change losses.* The pre-change losses of a subsidiary are—

(A) Its allocable part of any consolidated net operating loss which is attributable to it under § 1.1502–21T(b) (determined on the last day of the consolidated return year that includes the change date) that is not carried back and absorbed in a taxable year prior to the year including the change date;

(B) Its net operating loss carryovers that arose (or are treated under § 1.1502–21T(c) as having arisen) in a SRLY; and

(C) Its recognized built-in loss with respect to its separately computed net unrealized built-in loss, if any, determined on the change date.

(3) *Coordination with §§ 1.1502–91T, 1.1502–92T, and 1.1502–94T.* If an increase in percentage ownership interest causes an ownership change with respect to an attribute under this paragraph (b) and under § 1.1502–92T on the same day, the ownership change is considered to occur only under § 1.1502–92T and not under this paragraph (b). See § 1.1502–94T for anti-duplication rules relating to value.

(4) *Example.* The following example illustrates paragraph (b)(1)(ii) of this section.

Example. Plan to avoid an ownership change of a subsidiary. (a) L owns all the stock of L1, L1 owns all the stock of L2, L2 owns all the stock of L3, and L3 owns all the stock of L4. The L group has a consolidated net operating loss arising in Year 1 that is carried over to Year 2. L has assets other than its L1 stock with a value of $900. L1, L2, and L3 own no assets other than their L2, L3, and L4 stock. L4 has assets with a value of $100. During Year 2, A, B, C, and D, acting pursuant to a plan to avoid an ownership change of L4, acquire the following ownership interests in the members of the L loss group: (A) on September 11, Year 2, A acquires 20 percent of the L1 stock from L and B acquires 20 percent of the L2 stock from L1; and (B) on September 20, Year 2, C acquires 20 percent of the stock of L3 from L2 and D acquires 20 percent of the stock of L4 from L3. The following is a graphic illustration of these facts:

L3: $0
L4: $100

(b) The acquisitions by A, B, C, and D pursuant to the plan have increased their respective percentage ownership interests in L4 by approximately 10, 13, 16, and 20 percentage points, for a total of approximately 59 percentage points during the testing period. This more than 50 percentage point increase in the percentage ownership interest in L4 causes an ownership change of L4 under paragraph (b)(2) of this section.

(c) *Continuing effect of an ownership change.* A loss corporation (or loss subgroup) that is subject to a limitation under section 382 with respect to its pre-change losses continues to be subject to the limitation regardless of whether it becomes a member or ceases to be a member of a consolidated group. See § 1.382–5T(d) (relating to successive ownership changes and absorption of a section 382 limitation).

[T.D. 8678, 61 FR 33362, June 27, 1996]

§ 1.1502–97T Special rules under section 382 for members under the jurisdiction of a court in a title 11 or similar case (temporary). [Reserved]

[T.D. 8678, 61 FR 33364, June 27, 1996]

§ 1.1502–98T Coordination with section 383 (temporary).

The rules contained in §§ 1.1502–91T through 1.1502–96T also apply for purposes of section 383, with appropriate adjustments to reflect that section 383 applies to credits and net capital losses. Similarly, in the case of net capital losses, general business credits, and excess foreign taxes that are pre-change attributes, § 1.383–1 applies the principles of §§ 1.1502–91T through 1.1502–96T. For example, if a loss group has an ownership change under § 1.1502–92T and has a carryover of unused general business credits from a pre-change consolidated return year to a post-change consolidated return year, the amount of the group's regular tax liability for the post-change year that can be offset by the carryover cannot exceed the consolidated section 383 credit limitation for that post-change year, determined by applying the principles of §§ 1.383–1(c)(6) and 1.1502–93T (relating to the computation of the consolidated section 382 limitation).

[T.D. 8678, 61 FR 33364, June 27, 1996]

§ 1.1502–99T Effective dates (temporary).

(a) *Effective date.* Sections 1.1502–91T through 1.1502–96T and 1.1502–98T apply to any testing date on or after January 1, 1997. Sections 1.1502–94T through 1.1502–96T also apply on any date on or after January 1, 1997, on which a corporation becomes a member of a group or on which a corporation ceases to be a member of a loss group (or a loss subgroup).

(b) *Testing period may include a period beginning before January 1, 1997.* A testing period for purposes of §§ 1.1502–91T through 1.1502–96T and 1.1502–98T may include a period beginning before January 1, 1997. Thus, for example, in applying § 1.1502–92T(b)(1)(i) (relating to the determination of an ownership change of a loss group), the determination of the lowest percentage ownership interest of any 5-percent shareholder of the common parent during a testing period ending on a testing date occurring on or after January 1, 1997, takes into account the period beginning before January 1, 1997, except to the extent that the period is more than 3 years before the testing date or is otherwise before the beginning of the testing period. See § 1.1502–92T(b)(1).

(c) *Transition rules*—(1) *Methods permitted*—(i) *In general.* For the period ending before January 1, 1997, a consolidated group is permitted to use any method described in paragraph (c)(2) of this section which is consistently applied to determine if an ownership change occurred with respect to a consolidated net operating loss, a net operating loss carryover (including net operating loss carryovers arising in SRLYs), or a net unrealized built-in loss. If an ownership change occurred during that period, the group is also permitted to use any method described in paragraph (c)(2) of this section which is consistently applied to compute the amount of the section 382 limitation that applies to limit the use of taxable income in any post-change year ending before, on, or after January 1, 1997. The preceding sentence does not preclude the imposition of an additional, lesser limitation due to a subsequent ownership change nor, except as provided in paragraph (c)(1)(iii) of this section, does it permit the beginning of a new testing period for the loss group.

(ii) *Adjustments to offset excess limitation.* If an ownership change occurred during the period ending before January 1, 1997, and a method described in paragraph (c)(2) of this section was not used for a post-change year, the members (or group) must reduce the section 382 limitation for post-change years for which an income tax return is filed after January 1, 1997, to offset, as quickly as possible, the effects of any section 382 limitation that members took into account in excess of the amount that would have been allowable under §§1.1502–91T through 1.1502–96T and 1.1502–98T.

(iii) *Coordination with effective date.* Notwithstanding that a group may have used a method described in paragraph (c)(2)(ii) or (iii) of this section for the period before January 1, 1997, §§1.1502–91T through 1.1502–96T and 1.1502–98T apply to any testing date occurring on or after January 1, 1997, for purposes of determining whether there is an ownership change with respect to any losses and, if so, the collateral consequences. Any ownership change of a member other than the common parent pursuant to a method described in paragraph (c)(2)(ii) or (iii) of this section does not cause a new testing period of the loss group to begin for purposes of applying §1.1502–92T on or after January 1, 1997.

(2) *Permitted methods.* The methods described in this paragraph (c)(2) are:

(i) A method that does not materially differ from the rules in §§1.1502–91T through 1.1502–96T and 1.1502–98T (other than those in §1.1502–95T(c) (relating to the apportionment of a section 382 limitation) as they would apply to a corporation that ceases to be a member of the group before January 1, 1997). As the context requires, the method must treat references to rules in current regulations as references to rules in regulations generally effective for taxable years before January 1, 1997. Thus, for example, the taxpayer must treat a reference to §1.382–4(d) (relating to options) as a reference to §1.382–2T(h)(4) for any testing date to which §1.382–2T(h)(4) applies. Similarly, a reference to §1.1502–21T(c) may be a reference to §1.1502–21A(c), as appropriate. Furthermore, the method must treat all corporations that were affiliated on January 1, 1987, and continuously thereafter as having met the 5 consecutive year requirement of §1.1502–91T(d)(2)(i) on any day before January 1, 1992, on which the determination of net unrealized built-in gain or loss of a loss subgroup is made;

(ii) A reasonable application of the rules in section 382 and the regulations thereunder applied to each member on a separate entity basis, treating each member's allocable part of a consolidated net operating loss which is attributable to it under §1.1502–21T(b) as a net operating loss of that member and applying rules similar to §1.382–8T to avoid duplication of value in computing the section 382 limitation for the member (see §1.382–8T(h) (relating to the effective date and transition rules regarding controlled groups)); or

(iii) A method approved by the Commissioner upon application by the common parent.

(d) *Amended returns.* A group may file an amended return in connection with an ownership change occurring before January 1, 1997, to modify the amount of a section 382 limitation with respect to a consolidated net operating loss, a net operating loss carryover (including net operating loss carryovers arising in SRLYs), or a recognized built-in loss (or gain) only if it files amended returns:

(1) For the earliest taxable year ending after December 31, 1986, in which it had an ownership change, if any, under §1.1502–92T;

(2) For all subsequent taxable years for which returns have already been filed as of the date of the amended return;

(3) The modification with respect to all members for all taxable years ending in 1987 and thereafter complies with §§1.1502–91T through 1.1502–96T and 1.1502–98T; and

(4) The amended return(s) permitted by the applicable statute of limitations is/are filed before March 26, 1997.

(e) *Section 383.* This section also applies for the purposes of section 383, with appropriate adjustments to reflect that section 383 applies to credits and net capital losses.

[T.D. 8678, 61 FR 33364, June 27, 1996]

§1.1502–100 Corporations exempt from tax.

(a) *In general*—(1) *Computation of tax liability.* The tax liability for a consolidated return year of a group of two or more corporations described in section 1504(e) which are exempt from taxation under section 501 (hereinafter referred to in this section as ‘‘exempt group’’) shall be determined on a consolidated basis by applying the provisions of subchapter F of chapter 1 of the code in the manner provided in this section. See section 1504(e) for tax-exempt corporations eligible to file a consolidated return.

(2) *Applicability of other consolidated return provisions.* The provisions of § 1.1502–1 through § 1.1502–80 shall be applicable to an exempt group to the extent they are not inconsistent with the provisions of this section or the provisions of subchapter F of chapter 1 of the Code. For purposes of applying the provisions of § 1.1502–1 through § 1.1502–80 to an exempt group, the following substitutions shall be made:

(i) The term ‘‘exempt group’’ shall be substituted for the term ‘‘group’’,

(ii) The terms ‘‘unrelated business taxable income’’, ‘‘separate unrelated business taxable income’’, and ‘‘consolidated unrelated business taxable income’’ shall be substituted for the terms ‘‘taxable income’’, ‘‘separate taxable income’’, and ‘‘consolidated taxable income’’, and

(iii) The term ‘‘consolidated liability for tax determined under § 1.1502–2’’ (or an equivalent term) shall mean the consolidated liability for tax of an exempt group determined under paragraph (b) of this section.

(b) *Consolidated liability for tax.* The tax liability for a consolidated return year of an exempt group is the tax imposed by section 511(a) or section 1201(a) on the consolidated unrelated business taxable income for the year (determined under paragraph (c) of this section), and by allowing the credits and surtax exemption provided in § 1.1502–2.

(c) *Consolidated unrelated business taxable income.* The consolidated unrelated business taxable income for a consolidated return year shall be determined by taking into account:

(1) The separate unrelated business taxable income of each member of the exempt group (determined under paragraph (d) of this section);

(2) Any consolidated net operating loss deduction (determined under §§ 1.1502–21A or 1.1502–21T (as appropriate) subject to the limitations provided in section 512(b)(6);

(3) Any consolidated charitable contribution deduction (determined under § 1.1502–24) subject to the limitations provided in section 512(b)(10); and

(4) Any consolidated net gain or net loss from the disposition of debt-financed property (as defined in section 514(b)) taken into account as provided by section 514(a), or from the cutting of timber to which section 631 applies.

(d) *Separate unrelated business taxable income.* The separate unrelated business taxable income of a member of an exempt group shall be computed in accordance with the provisions of section 512 covering the determination of unrelated business taxable income of separate corporations, except that:

(1) The provisions of paragraphs (a) through (k) and (o) of § 1.1502–12 shall apply; and

(2) No charitable contributions deduction shall be taken into account under section 512(b)(10).

See sections 511(c) and 512(a)(3)(C) for special rules applicable to organizations described in section 501(c)(2).

[T.D. 7595, 44 FR 10382, Feb. 20, 1979, as amended by T.D. 8677, 61 FR 33325, June 27, 1996]

§ 1.1503–1 Computation and payment of tax.

(a) *General rule.* In any case in which a consolidated return is filed or required to be filed, the tax shall be determined, computed, assessed, collected, and adjusted in accordance with the regulations prescribed under section 1502 promulgated prior to the last date prescribed by law for the filing of such return.

(b) *Limitation.* If the affiliated group includes one or more Western Hemisphere trade corporations (as defined in section 921) or one or more regulated public utilities (as defined in section 1503 (c)), the increase in tax described in section 1503 (a) shall be applied in a manner provided in the regulations under section 1502.

[T.D. 6500, 25 FR 12105, Nov. 26, 1960, as amended by T.D. 7244, 37 FR 28897, Dec. 30, 1972]

§ 1.1503–2 Dual consolidated loss.

(a) *Purpose and scope.* This section provides rules for the application of section 1503(d), concerning the determination and use of dual consolidated losses. Paragraph (b) of this section provides a general rule prohibiting a dual consolidated loss from offsetting the taxable income of a domestic affiliate. Paragraph (c) of this section provides definitions of the terms used in this section. Paragraph (d) of this section provides rules for calculating the amount of a dual consolidated loss and for adjusting the basis of stock of a dual resident corporation. Paragraph (e) of this section contains an anti-avoidance provision. Paragraph (f) of this section applies the rules of paragraph (d) of this section to the computation of foreign tax credit limitations. Paragraph (g) of this section provides certain exceptions to the limitation rule of paragraph (b) of this section. Finally, paragraph (h) of this section provides the effective date of the regulations and a provision for the retroactive application of the regulations to qualifying taxpayers.

(b) *In general*—(1) *Limitation on the use of a dual consolidated loss to offset income of a domestic affiliate.* Except as otherwise provided in this section, a dual consolidated loss of a dual resident corporation cannot offset the taxable income of any domestic affiliate in the taxable year in which the loss is recognized or in any other taxable year, regardless of whether the loss offsets income of another person under the income tax laws of a foreign country and regardless of whether the income that the loss may offset in the foreign country is, has been, or will be subject to tax in the United States. Pursuant to paragraph (c) (1) and (2) of this section, the same limitation shall apply to a dual consolidated loss of a separate unit of a domestic corporation as if the separate unit were a wholly owned subsidiary of such corporation.

(2) *Limitation on the use of a dual consolidated loss to offset income of a successor-in-interest.* A dual consolidated loss of a dual resident corporation also cannot be used to offset the taxable income of another corporation by means of a transaction in which the other corporation succeeds to the tax attributes of the dual resident corporation under section 381 of the Code. Similarly, a dual consolidated loss of a separate unit of a domestic corporation cannot be used to offset income of the domestic corporation following the termination, liquidation, sale, or other disposition of the separate unit. However, if a dual resident corporation transfers its assets to another corporation in a transaction subject to section 381, and the acquiring corporation is a dual resident corporation of the same foreign country of which the transferor dual resident corporation is a resident, or a domestic corporation that carries on the business activities of the transferor dual resident corporation as a separate unit, then income generated by the transferee dual resident corporation, or separate unit, may be offset by the carryover losses of the transferor dual resident corporation. In addition, if a domestic corporation transfers a separate unit to another domestic corporation in a transaction subject to section 381, the income generated by the separate unit following the transfer may be offset by the carryover losses of the separate unit.

(3) *Application of rules to multiple tiers of separate units.* If a separate unit of a domestic corporation is owned indirectly through another separate unit, the principles of paragraph (b) (1) and (2) of this section shall apply as if the upper-tier separate unit were a subsidiary of the domestic corporation and the lower-tier separate unit were a lower-tier subsidiary.

(4) *Examples.* The following examples illustrate the application of this paragraph (b).

EXAMPLE 1. P, a domestic corporation, owns all of the outstanding stock of DRC, a domestic corporation. P and DRC file a consolidated U.S. income tax return. DRC is managed and controlled in Country W, a country that determines the tax residence of corporations according to their place of management and control. Therefore, DRC is a dual resident corporation and any net operating loss it incurs is a dual consolidated loss. In Years 1 through 3, DRC incurs dual consolidated losses. Under this paragraph (b), the dual consolidated losses may not be used to offset P's income on the group's consolidated U.S. income tax return. At the end of Year 3, DRC sells all of its assets and discontinues its business operations. DRC is then liquidated into P, pursuant to the provisions of section 332. Normally, under section 381, P would succeed to, and be permitted to utilize, DRC's net operating loss carryovers. However, this paragraph (b) prohibits the dual consolidated losses of DRC from reducing P's income for U.S. tax purposes. Therefore, DRC's net operating loss carryovers will not be available to offset P's income.

EXAMPLE 2. The facts are the same as in *Example 1,* except that DRC does not sell its assets and, following the liquidation of DRC, P continues to operate DRC's business as a separate unit (*e.g.*, a branch). DRC's loss carryovers are available to offset P's income generated by the assets previously owned by DRC and now held by the separate unit.

(c) *Definitions.* The following definitions shall apply for purposes of this section.

(1) *Domestic corporation.* The term ''domestic corporation'' has the meaning assigned to it by section 7701(a) (3) and (4). The term also includes any corporation otherwise treated as a domestic corporation by the Code, including, but not limited to, sections 269B, 953(d), and 1504 (d). For purposes of this section, any separate unit of a domestic corporation, as defined in paragraph (c) (3) and (4) of this section, shall be treated as a separate domestic corporation.

(2) *Dual resident corporation.* A dual resident corporation is a domestic corporation that is subject to the income tax of a foreign country on its worldwide income or on a residence basis. A corporation is taxed on a residence basis if it is taxed as a resident under the laws of the foreign country. An S corporation, as defined in section 1361, is not a dual resident corporation. For purposes of this section, any separate unit of a domestic corporation, as defined in paragraph (c) (3) and (4) of this section, shall be treated as a dual resident corporation. Unless otherwise indicated, any reference in this section to a dual resident corporation refers also to a separate unit.

(3) *Separate unit*—(i) The term ''separate unit'' shall mean any of the following:

(A) A foreign branch, as defined in § 1.367(a)-6T(g) (or a successor regulation), that is owned either directly by a domestic corporation or indirectly by a domestic corporation through ownership of a partnership or trust interest (regardless of whether the partnership or trust is a United States person);

(B) an interest in a partnership; or

(C) an interest in a trust.

(ii) If two or more foreign branches located in the same foreign country are owned by a single domestic corporation and the losses of each branch are made available to offset the income of the other branches under the tax laws of the foreign country, within the meaning of paragraph (c)(15)(ii) of this section, then the branches shall be treated as one separate unit.

(4) *Hybrid entity separate unit.* The term ''separate unit'' includes an interest in an entity that is not taxable as an association for U.S. income tax purposes but is subject to income tax in a foreign country as a corporation (or otherwise at the entity level) either on its worldwide income or on a residence basis.

(5) *Dual consolidated loss*—(i) *In general.* The term ''dual consolidated loss'' means the net operating loss (as defined in section 172(c) and the regulations thereunder) of a domestic corporation incurred in a year in which the corporation is dual resident corporation. The dual consolidated loss shall be computed under paragraph (d)(1) of this section. The fact that a particular item taken into account in computing a dual resident corporation's net operating loss is not taken into account in computing income subject to a foreign country's income tax shall not cause such item to be excluded from the calculation of the dual consolidated loss.

(ii) *Exceptions.* A dual consolidated loss shall not include the following—

(A) A net operating loss incurred by a dual resident corporation in a foreign country whose income tax laws—

(*1*) Do not permit the dual resident corporation to use its losses, expenses or deductions to offset the income of any other person that is recognized in the same taxable year in which the losses, expenses or deductions are incurred; and

(*2*) Do not permit the losses, expenses or deductions of the dual resident corporation to be carried over or back to be used, by any means, to offset the income of any other person in other taxable years; or

(B) A net operating loss incurred during that portion of the taxable year prior to the date on which the domestic corporation becomes a dual resident corporation or subsequent to the date on which the domestic corporation ceases to be a dual resident corporation. For purposes of determining the amount of the net operating loss incurred in that portion of the taxable year prior to the date on which the domestic corporation becomes a dual resident corporation or subsequent to the date on which the domestic corporation ceases to be a dual resident corporation, in no event shall more than the aggregate of the equal daily portion of the net operating loss commensurate with the portion of the taxable year during which the domestic corporation was not a dual resident corporation be allocated to that portion of the taxable year in which the domestic corporation was not a dual resident corporation.

(iii) *Dual consolidated losses of separate units that are partnership interests, including interests in hybrid entities.* [Reserved]

(6) *Subject to tax.* For purposes of determining whether a domestic corporation is subject to the income tax of a foreign country on its income, the fact that the corporation has no actual income tax liability to the foreign country for a particular taxable year shall not be taken into account.

(7) *Foreign country.* For purposes of this section, possessions of the United States shall be considered foreign countries.

(8) *Consolidated group.* The term ‘‘consolidated group’’ means an affiliated group, as defined in section 1504(a), with which a dual resident corporation or domestic owner files a consolidated U.S. income tax return.

(9) *Domestic owner.* The term ‘‘domestic owner’’ means a domestic corporation that owns one or more separate units.

(10) *Affiliated dual resident corporation or affiliated domestic owner.* The term ‘‘affiliated dual resident corporation’’ or ‘‘affiliated domestic owner’’ means a dual resident corporation or domestic owner that is a member of a consolidated group.

(11) *Unaffiliated dual resident corporation or unaffiliated domestic owner.* The term ‘‘unaffiliated dual resident corporation’’ or ‘‘unaffiliated domestic owner’’ means a dual resident corporation or domestic owner that is an unaffiliated domestic corporation.

(12) *Successor-in-interest.* The term ‘‘successor-in-interest’’ means an acquiring corporation that succeeds to the tax attributes of an acquired corporation by means of a transaction subject to section 381.

(13) *Domestic affiliate.* The term ‘‘domestic affiliate’’ means any member of an affiliated group, without regard to the exceptions contained in section 1504(b) (other than section 1504(b)(3)) relating to includible corporations.

(14) *Unaffiliated domestic corporation.* The term ‘‘unaffiliated domestic corporation’’ means a domestic corporation that is not a member of an affiliated group.

(15) *Use of loss to offset income of a domestic affiliate or another person*—(i) A dual consolidated loss shall be deemed to offset income of a domestic affiliate in the year it is included in the computation of the consolidated taxable income of a consolidated group. The fact that no tax benefit results from the inclusion of the dual consolidated loss in the computation of the group’s consolidated taxable income in the taxable year shall not be taken into account.

(ii) Except as provided in paragraph (c)(15)(iii) of this section, a loss, expense, or deduction taken into account in computing a dual consolidated loss shall be deemed to offset income of another person under the income tax laws of a foreign country in the year it is made available for such offset. The fact that the other person does not have sufficient income in that year to benefit from such an offset shall not be taken into account. However, where the laws of a foreign country provide an election that would enable a dual resident corporation or separate unit to use its losses, expenses, or deductions to offset income of another person, the losses, expenses, or deductions shall be considered to offset such income only if the election is made.

(iii) The losses, expenses, or deductions taken into account in computing a dual resident corporation’s or separate unit’s dual consolidated loss shall not be deemed to offset income of another person under the income tax laws of a foreign country for purposes of this section, if under the laws of the foreign country the losses, expenses, or deductions of the dual resident corporation or separate unit are used to offset the income of another dual resident corporation or separate unit within the same consolidated group (or income of another separate unit that is owned by the unaffiliated domestic owner of the first separate unit). If the losses, expenses, or deductions of a dual resident corporation or separate unit are made available under the laws of a foreign country to offset the income of other dual resident corporations or separate units within the same consolidated group (or other separate units owned by the unaffiliated domestic owner of the first separate unit), as well as the income of another person, and the laws of the foreign country do not provide applicable rules for determining which person's income is offset by the losses, expenses, or deductions, then for purposes of this section, the losses, expenses or deductions shall be deemed to offset the income of the other dual resident corporations or separate units, to the extent of such income, before being considered to offset the income of the other person.

(iv) Except to the extent paragraph (g)(1) of this section applies, where the income tax laws of a foreign country deny the use of losses, expenses, or deductions of a dual resident corporation to offset the income of another person because the dual resident corporation is also subject to income taxation by another country on its worldwide income or on a residence basis, the dual resident corporation shall be treated as if it actually had offset its dual consolidated loss against the income of another person in such foreign country.

(16) *Examples.* The following examples illustrate this paragraph (c).

EXAMPLE 1. X, a member of a consolidated group, conducts business through a branch in Country Y. Under Country Y's income tax laws, the branch is taxed as a permanent establishment and its losses may be used under the Country Y form of consolidation to offset the income of Z, a Country Y affiliate of X. In Year 1, the branch of X incurs an overall loss that would be treated as a net operating loss if the branch were a separate domestic corporation. Under paragraph (c)(3) of this section, the branch of X is treated as a separate domestic corporation and a dual resident corporation. Thus, under paragraph (c)(5), its loss constitutes a dual consolidated loss. Unless X qualifies for an exception under paragraph (g) of this section, paragraph (b) of this section precludes the use of the branch's loss to offset any income of X not derived from the branch operations or any income of a domestic affiliate of X.

EXAMPLE 2. A and B are members of a consolidated group. FC is a Country X corporation that is wholly owned by B. A and B organize a partnership, P, under the laws of Country X. P conducts business in Country X and its business activity constitutes a foreign branch within the meaning of paragraph (c)(3)(i)(A) of this section. P also earns U.S. source income that is unconnected with the branch operations and, therefore, is not subject to tax by Country X. Under the laws of Country X, the branch can consolidate with FC. The interests in P held by A and B are each treated as a dual resident corporation. The branch is also treated as a separate dual resident corporation. Unless an exception under paragraph (g) of this section applies, any dual consolidated loss incurred by P's branch cannot offset the U.S. source income earned by P or any other income of A or B.

EXAMPLE 3. X is classified as a partnership for U.S. income tax purposes. A, B, and C are the sole partners of X. A and B are domestic corporations and C is a Country Y corporation. For U.S. income tax purposes, each partner has an equal interest in each item of partnership profit or loss. Under Country Y's law, X is classified as a corporation and its income and losses may be used under the Country Y form of consolidation to offset the income of companies that are affiliates of X. Under paragraph (c)(3) and (4) of this section, the partnership interests held by A and B are treated as separate domestic corporations and as dual resident corporations. Unless an exception under paragraph (g) of this section applies, losses allocated to A and B can only be used to offset profits of X allocated to A and B, respectively.

EXAMPLE 4. P, a domestic corporation, files a consolidated U.S. income tax return with its two wholly-owned domestic subsidiaries, DRC1 and DRC2. Each subsidiary is also treated as a Country Y resident for Country Y tax purposes. Thus, DRC1 and DRC2 are dual resident corporations. DRC1 owns FC, a Country Y corporation. Country Y's tax laws permit affiliated resident corporations to file a form of consolidated return. In Year 1, DRC1 incurs a $200 net operating loss for both U.S. and Country Y tax purposes, while DRC2 recognizes $200 of income under the tax laws of each country. FC also earns $200 of income for Country Y tax purposes. DRC1, DRC2, and FC file a Country Y consolidated return. However, Country Y has no applicable rules for determining which income is offset by DRC1's $200 loss. Under paragraph (c)(15)(iii) of this section, the loss shall be treated as offsetting DRC2's $200 of income. Because DRC1 and DRC2 are members of the same consolidated group, for purposes of this section, the offset of DRC1's loss against the income of DRC2 is not considered a use of the loss against the income of another person under the laws of a foreign country.

EXAMPLE 5. DRC, a domestic corporation, files a consolidated U.S. income tax return with its parent, P. DRC is also subject to tax in Country Y on its worldwide income. Therefore, DRC is a dual resident corporation and any net operating loss incurred by DRC is a dual consolidated loss. Country Y's tax laws permit corporations that are subject to tax on their worldwide income to use the Country Y form of consolidation, thus enabling eligible corporations to use their losses to offset income of affiliates. However, to prevent corporations like DRC from offsetting losses against income of affiliates in Country Y and then again offsetting the losses against income of foreign affiliates under the tax laws of another country, Country Y prevents a corporation that is also subject to the income tax of another country on its worldwide income or on a residence basis from using the Country Y form of consolidation. There is no agreement, as described in paragraph (g)(1) of this section, between the United States and Country Y. Because of Country Y's statute, DRC will be treated as having actually offset its losses against the income of affiliates in Country Y under paragraph (c)(15)(iv) of this section. Therefore, DRC will not be able to file an agreement described in paragraph (g)(2) of this section and offset its losses against the income of P or any other domestic affiliate.

(d) *Special rules for accounting for dual consolidated losses*—(1) *Determination of amount of dual consolidated loss*—(i) *Dual resident corporation that is a member of a consolidated group.* For purposes of determining whether a dual resident corporation that is a member of a consolidated group has a dual consolidated loss for the taxable year, the dual resident corporation shall compute its taxable income (or loss) in accordance with the rules set forth in the regulations under section 1502 governing the computation of consolidated taxable income, taking into account only the dual resident corporation's items of income, gain, deduction, and loss for the year. However, for purposes of this computation, the following items shall not be taken into account:

(A) Any net capital loss of the dual resident corporation; and

(B) Any carryover or carryback losses.

(ii) *Dual resident corporation that is a separate unit of a domestic corporation.* For purposes of determining whether a separate unit has a dual consolidated loss for the taxable year, the separate unit shall compute its taxable income (or loss) as if it were a separate domestic corporation and a dual resident corporation in accordance with the provisions of paragraph (d)(1)(i) of this section, using only those items of income, expense, deduction, and loss that are otherwise attributable to such separate unit.

(2) *Effect of a dual consolidated loss.* For any taxable year in which a dual resident corporation or separate unit has a dual consolidated loss to which paragraph (b) of this section applies, the following rules shall apply.

(i) If the dual resident corporation is a member of a consolidated group, the group shall compute its consolidated taxable income without taking into account the items of income, loss, or deduction taken into account in computing the dual consolidated loss. The dual consolidated loss may be carried over or back for use in other taxable years as a separate net operating loss carryover or carryback of the dual resident corporation arising in the year incurred. It shall be treated as a loss incurred by the dual resident corporation in a separate return limitation year and (without regard to whether the dual resident corporation is a common parent) shall be subject to all of the limitations of §§1.1502–21A(c) or 1.1502–21T(c), as appropriate (relating to limitations on net operating loss carryovers and carrybacks from separate return limitation years).

(ii) The unaffiliated domestic owner of a separate unit, or the consolidated group of an affiliated domestic owner, shall compute its taxable income without taking into account the items of income, loss or deduction taken into account in computing the separate unit's dual consolidated loss. The dual consolidated loss shall be treated as a loss incurred by a separate corporation and its use shall be subject to all of the limitations of §§1.1502–21A(c) or 1.1502–21T(c), as appropriate, as if the separate unit were filing a consolidated return with the unaffiliated domestic owner or with the consolidated group of the affiliated domestic owner.

(3) *Basis adjustments for dual consolidated losses*—(i) *Dual resident corporation that is a member of an affiliated*

group. When a dual resident corporation is a member of a consolidated group, each other member owning stock in the dual resident corporation shall adjust the basis of the stock in the following manner.

(A) *Positive adjustments.* Positive adjustments shall be made in accordance with the principles of § 1.1502–32(b)(1), except that there shall be no positive adjustment under § 1.1502–32(b)(1)(ii) for any amount of the dual consolidated loss that is not absorbed as a result of the application of paragraph (b) of this section. In addition, there shall be no positive adjustment for any amount included in income pursuant to paragraph (g)(2)(vii) of this section.

(B) *Negative adjustments.* Negative adjustments shall be made in accordance with the principles of § 1.1502–32(b)(2), except that there shall be no negative adjustment under § 1.1502–32(b)(2)(ii) for the amount of the dual consolidated loss subject to paragraph (b) of this section that is absorbed in a carryover year.

(ii) *Dual resident corporation that is a separate unit arising from an interest in a partnership.* Where a separate unit is an interest in a partnership, the domestic owner shall adjust its basis in the separate unit in accordance with section 705, except that no increase in basis shall be permitted for any amount included as income pursuant to paragraph (g)(2)(vii) of this section.

(4) *Examples.* The following examples illustrate this paragraph (d).

EXAMPLE 1. (i) P, S1, S2, and T are domestic corporations. P owns all of the stock of S1 and S2. S2 owns all of the stock of T. T is a resident of Country FC for Country FC income tax purposes. Therefore, T is a dual resident corporation. P, S1, S2, and T file a consolidated U.S. income tax return. X and Y are corporations that are not members of the consolidated group.

(ii) At the beginning of Year 1, P has a basis of $1000 in the stock of S2. S2 has a $500 basis in the stock of T.

(iii) In Year 1, T incurs interest expense in the amount of $100. In addition, T sells a noncapital asset, *u*, in which it has a basis of $10, to S1 for $50. T also sells a noncapital asset, *v*, in which it has a basis of $200, to S1 for $100. The sales of *u* and *v* are intercompany transactions described in § 1.1502–13. T also sells a capital asset, *z*, in which it has a basis of $180, to Y for $90. In Year 1, S1 earns $200 of separate taxable income, calculated in accordance with § 1.1502–12, as well as $90 of capital gain from a sale of an asset to X. P and S2 have no items of income, loss, or deduction for Year 1.

(iv) In Year 1, T has a dual consolidated loss of $100 (attributable to its interest expense). T's $90 capital loss is not included in the computation of the dual consolidated loss. Instead, T's capital loss is included in the computation of the consolidated group's capital gain net income under § 1.1502–22T(c) and is used to offset S1's $90 capital gain.

(v) No elective agreement, as described in paragraph (g)(1) of this section, exists between the United States and Country FC. For Country FC tax purposes, T's $100 loss is offset against the income of a Country FC affiliate. Therefore, T is not eligible for the exception provided in paragraph (g)(2) of this section.

(vi) Because T has a dual consolidated loss for the year, the consolidated taxable income of the consolidated group is calculated without regard to T's items of income, loss or deduction taken into account in computing the dual consolidated loss. Therefore, the consolidated taxable income of the consolidated group is $200 (the sum of $200 of separate taxable income earned by S1 plus $90 of capital gain earned by S1 minus $90 of capital loss incurred by T). The $40 gain recognized by T upon the sale of item *u* to S1 and the $100 loss recognized by T upon the sale of item *v* to S1 are deferred pursuant to § 1.1502–13(c)(1).

(vii) S2 may not make the positive adjustment provided for in § 1.1502–32(b)(1)(ii) to its basis in the stock of T for the $100 dual consolidated loss incurred by T. In addition, no positive adjustment in the basis of the stock is required for T's $90 capital loss because the loss has been absorbed by the consolidated group. S2, however, must make the negative adjustment provided for in § 1.1502–32(b)(2)(i) for its allocable part of T's deficit in earnings and profits for the taxable year attributable to both T's $100 dual consolidated loss and T's $90 capital loss. Thus, as provided in § 1.1502–32(e)(1), S2 must make a $190 net negative adjustment to its basis in the stock of T, reducing its basis to $310. As provided in § 1.1502–33(c)(4)(ii)(*a*), S2's earnings and profits for Year 1 will reflect S2's decrease in its basis in T stock for the taxable year. Since S2 has no other earnings and profits for the taxable year, S2 has a $190 deficit in earnings and profits for the year. As provided in § 1.1502–32(b)(2)(i), P must make a negative adjustment to its basis in the stock of S2 for its allocable part of S2's deficit in earnings and profits for the taxable year. Thus, P must make a $190 net negative adjustment to its basis in S2 stock, reducing its basis to $810.

EXAMPLE 2. (i) The facts are the same as in *Example 1,* except that in Year 2, S1 sells items *u* and *v* to X for no gain or loss. The disposition of items *u* and *v* outside of the consolidated group restores the deferred loss and gain to T. T also incurs $100 of interest expense in Year 2. In addition, T sells a non-capital asset, *r*, in which it has a basis of $100, to Y for $300. P and S2 have no items of income, loss, or deduction for Year 2.

(ii) T has $40 of separate taxable income in Year 2, computed as follows:

($100)	interest expense
($100)	sale of item *v* to S1
$ 40	sale of item *u* to S1
$200	sale of item *r* to Y
$ 40	

Thus, T has no dual consolidated loss for the year.

(iii) Since T does not have a dual consolidated loss for the taxable year, the group's consolidated taxable income is calculated in accordance with the general rule of §1.1502–11 and not in accordance with paragraph (d)(2) of this section. T is the only member of the consolidated group that has any income or loss for the taxable year. Thus, the consolidated taxable income of the group, computed without regard to T's dual consolidated loss carryover, is $40.

(iv) As provided by §1.1502–21A(c), the amount of the dual consolidated loss arising in Year 1 that is included in the group's consolidated net operating loss deduction for Year 2 is $40 (that is, the consolidated taxable income computed without regard to the consolidated net operating loss deduction minus such consolidated taxable income recomputed by excluding the items of income and deduction of T). Thus, the group has no consolidated taxable income for the year.

(v) S2 must make the positive adjustment provided for in §1.502–32(b)(1)(i) to its basis in T stock for its allocable part of T's undistributed earnings and profits for the taxable year. S2 cannot make the negative adjustment provided for in §1.1502–32(b)(2)(ii) for the dual consolidated loss of T incurred in Year 1 and absorbed in Year 2. Thus, as provided in §1.1502–32(e)(2), S2 must make a $40 net positive adjustment to its basis in T stock, increasing its basis to $350. As provided in §1.1502–33(c)(4)(ii)(*a*), S2's earnings and profits for Year 2 will reflect S2's increase in its basis in T stock for the taxable year. Since S2 has no other earnings and profits for the taxable year, S2 has $40 of earnings and profits for the year. As provided in §1.1502–32(b)(1)(i), P must make a positive adjustment to its basis in the stock of S2 for its allocable part of the undistributed earnings and profits of S2 for the taxable year. Thus, P must make a $40 net positive adjustment to its basis in S2 stock, increasing its basis to $850.

(e) *Special rule for use of dual consolidated loss to offset tainted income*—(1) *In general.* The dual consolidated loss of any dual resident corporation that ceases to be a dual resident corporation shall not be used to offset income of such corporation to the extent that such income is tainted income, as defined in paragraph (e)(2) of this section.

(2) *Tainted income defined.* Tainted income is any income derived from tainted assets, as defined in paragraph (e)(3) of this section, beginning on the date such assets are acquired by the dual resident corporation. In the absence of evidence establishing the actual amount of income that is attributable to the tainted assets, the portion of a corporation's income in a particular taxable year that is treated as tainted income shall be an amount equal to the corporation's taxable income for the year multiplied by a fraction, the numerator of which is the fair market value of the tainted asset at the end of the taxable year and the denominator of which is the fair market value of the total assets owned by the corporation at the end of the taxable year. Documentation submitted to establish the actual amount of income that is attributable to the tainted assets must be attached to the consolidated group's or unaffiliated dual resident corporation's timely filed tax return for the taxable year in which the income is recognized.

(3) *Tainted assets defined.* Tainted assets are any asset acquired by a dual resident corporation in a non-recognition transaction, as defined in section 7701(a)(45), or any assets otherwise transferred to the corporation as a contribution to capital, at any time during the three taxable years immediately preceding the taxable year in which the corporation ceases to be a dual resident corporation or at any time thereafter. Tainted assets shall not include assets that were acquired by such dual resident corporation on or before December 31, 1986.

(4) *Exceptions.* Income derived from assets acquired by a dual resident corporation shall not be subject to the limitation described in paragraph (e)(1) of this section, if—

(i) For the taxable year in which the assets were acquired, the corporation did not have a dual consolidated loss (or a carry forward of a dual consolidated loss to such year); or

(ii) The assets were acquired as replacement property in the ordinary course of business.

(f) *Computation of foreign tax credit limitations.* If a dual resident corporation or separate unit is subject to paragraph (d)(2) of this section, the consolidated group or unaffiliated domestic owner shall compute its foreign tax credit limitation by applying the limitations of paragraph (d)(2). Thus, the dual consolidated loss is not taken into account until the year in which it is absorbed.

(g) *Exception*—(1) *Elective agreement in place between the United States and a foreign country.* Paragraph (b) of this section shall not apply to a dual consolidated loss to the extent the dual resident corporation, or domestic owner of a separate unit, elects to deduct the loss in the United States pursuant to an agreement entered into between the United States and a foreign country that puts into place an elective procedure through which losses offset income in only one country.

(2) *Elective relief provision*—(i) *In general.* Paragraph (b) of this section shall not apply to a dual consolidated loss if the consolidated group, unaffiliated dual resident corporation, or unaffiliated domestic owner elects to be bound by the provisions of this paragraph (g)(2). In order to elect relief under this paragraph (g)(2), the consolidated group, unaffiliated dual resident corporation, or unaffiliated domestic owner must attach to its timely filed U.S. income tax return for the taxable year in which the dual consolidated loss is incurred an agreement described in this paragraph (g)(2)(i). The agreement must be signed under penalties of perjury by the person who signs the return and must include the following items, in paragraphs labeled to correspond with the items set forth below:

(A) A statement that the document submitted is an election and an agreement under the provisions of § 1.1503–2(g)(2) of the Income Tax Regulations;

(B) The name, address, identifying number, and place and date of incorporation of the dual resident corporation, and the country or countries that tax the dual resident corporation on its worldwide income or on a residence basis, or, in the case of a separate unit, identification of the separate unit, including the name under which it conducts business, its principal activity, and the country in which its principal place of business is located;

(C) An agreement by the consolidated group, unaffiliated dual resident corporation, or unaffiliated domestic owner to comply with all of the provisions of paragraphs (g)(2) (iii) through (vii) of § 1.1503–2;

(D) A statement of the amount of the dual consolidated loss covered by the agreement;

(E) A certification that no portion of the dual resident corporation’s or separate unit’s loss, expenses, or deductions taken into account in computing the dual consolidated loss has been, or will be, used to offset the income of any other person under the income tax laws of a foreign country; and

(F) A certification that arrangements have been made to ensure that no portion of the dual consolidated loss will be used to offset the income of another person under the laws of a foreign country and that the consolidated group, unaffiliated dual resident corporation, or unaffiliated domestic owner will be informed of any such foreign use of any portion of the dual consolidated loss.

(ii) *Consistency rule*—(A) If any loss, expense, or deduction taken into account in computing the dual consolidated loss of a dual resident corporation or separate unit is used under the laws of a foreign country to offset the income of another person, then the following other dual consolidated losses (if any) shall be treated as also having been used to offset income of another person under the laws of such foreign country, but only if the income tax laws of the foreign country permit any loss, expense, or deduction taken into account in computing the other dual consolidated loss to be used to offset the income of another person in the same taxable year;

(*1*) Any dual consolidated loss of a dual resident corporation that is a member of the same consolidated group of which the first dual resident corporation or domestic owner is a member, if any loss, expense, or deduction taken into account in computing such dual consolidated loss is recognized under the income tax laws of such country in the same taxable year; and

(*2*) Any dual consolidated loss of a separate unit that is owned by the same domestic owner that owns the first separate unit, or that is owned by any member of the same consolidated group of which the first dual resident corporation or domestic owner is a member, if any loss, expense, or deduction taken into account in computing such dual consolidated loss is recognized under the income tax laws of such country in the same taxable year.

(B) The following examples illustrate the application of this paragraph (g)(2)(ii).

EXAMPLE 1. P, a domestic corporation, owns A and B, which are domestic corporations, and C, a Country X corporation. A is subject to the income tax laws of Country X on a residence basis and, thus, is a dual resident corporation. B conducts business in Country X through a branch, which is a separate unit under paragraph (c)(3) of this section. The income tax laws of Country X permit branches of foreign corporations to elect to file consolidated returns with Country X affiliates. In Year 1, A incurs a dual consolidated loss, which is used to offset the income of C under the Country X form of consolidation. The branch of B also incurs a net operating loss. However, B elects not to use the loss on a Country X consolidated return to offset the income of foreign affiliates. The use of A's loss to offset the income of C in Country X will cause the separate unit of B to be treated as if it too had used its dual consolidated loss to offset the income of an affiliate in Country X. Therefore, an election and agreement under this paragraph (g)(2) cannot be made with respect to the separate unit's dual consolidated loss.

EXAMPLE 2. The facts are the same as in *Example 1*, except that the income tax laws of Country X do not permit branches of foreign corporations to file consolidated income tax returns with Country X affiliates. Therefore, an election and agreement described in this paragraph (g)(2) may be made for the dual consolidated loss incurred by the separate unit of B.

(iii) *Triggering events requiring the recapture of dual consolidated losses*—(A) The consolidated group, unaffiliated dual resident corporation, or unaffiliated domestic owner must agree that, if there is a triggering event described in this paragraph (g)(2)(iii), and no exception applies under paragraph (g)(2)(iv) of this section, the consolidated group, unaffiliated dual resident corporation, or unaffiliated domestic owner will recapture and report as income the amount of the dual consolidated loss provided in paragraph (g)(2)(vii) of this section on its tax return for the taxable year in which the triggering event occurs (or, when the triggering event is a use of the loss for foreign purposes, the taxable year that includes the last day of the foreign tax year during which such use occurs). In addition, the consolidated group, unaffiliated dual resident corporation, or unaffiliated domestic owner must pay any applicable interest charge required by paragraph (g)(2)(vii) of this section. For purposes of this section, any of the following events shall constitute a triggering event:

(*1*) In any taxable year up to and including the 15th taxable year following the year in which the dual consolidated loss that is the subject of the agreement filed under this paragraph (g)(2) was incurred, any portion of the losses, expenses, or deductions taken into account in computing the dual consolidated loss is used by any means to offset the income of any other person under the income tax laws of a foreign country;

(*2*) An affiliated dual resident corporation or affiliated domestic owner ceases to be a member of the consolidated group that filed the election. For purposes of this paragraph (g)(2)(iii)(A)(*2*), a dual resident corporation or domestic owner shall be considered to cease to be a member of the consolidated group if it is no longer a member of the group within the meaning of § 1.1502–1(b), or if the group ceases to exist because the common parent is no longer in existence or is no longer a common parent or the group no longer files on the basis of a consolidated return. Such disaffiliation, however, shall not constitute a triggering event if the taxpayer demonstrates, to the satisfaction of the Commissioner, that the dual resident corporation's or separate unit's losses, expenses, or deductions cannot be used to offset income of another person under the laws of a foreign country at any time after the affiliated dual resident corporation or affiliated domestic owner ceases to be a member of the consolidated group;

(*3*) An unaffiliated dual resident corporation or unaffiliated domestic owner becomes a member of a consolidated group. Such affiliation of the dual resident corporation or domestic owner, however, shall not constitute a triggering event if the taxpayer demonstrates, to the satisfaction of the Commissioner, that the losses, expenses, or deductions of the dual resident corporation or separate unit cannot be used to offset the income of another person under the laws of a foreign country at any time after the dual resident corporation or domestic owner becomes a member of the consolidated group.

(*4*) A dual resident corporation transfers assets in a transaction that results, under the laws of a foreign country, in a carryover of its losses, expenses, or deductions. For purposes of this paragraph (g)(2)(iii)(A)(*4*), a transfer, either in a single transaction or a series of transactions within a twelve-month period, of 50% or more of the dual resident corporation's assets (measured by the fair market value of the assets at the time of such transfer (or for multiple transactions, at the time of the first transfer)) shall be deemed a triggering event, unless the taxpayer demonstrates, to the satisfaction of the Commissioner, that the transfer of assets did not result in a carryover under foreign law of the dual resident corporation's losses, expenses, or deductions to the transferee of the assets;

(*5*) A domestic owner of a separate unit transfers assets of the separate unit in a transaction that results, under the laws of a foreign country, in a carryover of the separate unit's losses, expenses, or deductions. For purposes of this paragraph (g)(2)(iii)(A)(*5*), a transfer, either in a single transaction or a series of transactions over a twelve-month period, of 50% or more of the separate unit's assets (measured by the fair market value of the assets at the time of the transfer (or for multiple transfers, at the time of the first transfer)), shall be deemed a triggering event, unless the taxpayer demonstrates, to the satisfaction of the Commissioner, that the transfer of assets did not result in a carryover under foreign law of the separate unit's losses, expenses, or deductions to the transferee of the assets;

(*6*) An unaffiliated dual resident corporation or unaffiliated domestic owner becomes a foreign corporation by means of a transaction (*e.g.*, a reorganization) that, for foreign tax purposes, is not treated as involving a transfer of assets (and carryover of losses) to a new entity. Such a transaction, however, shall not constitute a triggering event if the taxpayer demonstrates, to the satisfaction of the Commissioner, that the dual resident corporation's or separate unit's losses, expenses, or deductions cannot be used to offset income of another person under the laws of the foreign country at any time after the unaffiliated dual resident corporation or unaffiliated domestic owner becomes a foreign corporation.

(*7*) A domestic owner of a separate unit, either in a single transaction or a series of transactions within a twelve-month period, sells, or otherwise disposes of, 50% or more of the interest in the separate unit (measured by voting power or value) owned by the domestic owner on the last day of the taxable year in which the dual consolidated loss was incurred. For purposes of this paragraph (g)(2)(iii)(A)(*7*), the domestic owner shall be deemed to have disposed of its entire interest in a hybrid entity separate unit if such hybrid entity becomes classified as a foreign corporation for U.S. tax purposes. The disposition of 50% or more of the interest in a separate unit, however, shall not constitute a triggering event if the taxpayer demonstrates, to the satisfaction of the Commissioner, that the losses, expenses, or deductions of the separate unit cannot be used to offset income of another person under the laws of the foreign country at any time after the disposition of the interest in the separate unit; or

(*8*) The consolidated group, unaffiliated dual resident corporation, or unaffiliated domestic owner fails to file a certification required under paragraph (g)(2)(vi)(B) of this section.

(B) A taxpayer wishing to rebut the presumption of a triggering event described in paragraphs (g)(2)(iii)(A)(*2*) through (*7*) of this section, by demonstrating that the losses, expenses, or deductions of the dual resident corporation or separate unit cannot be carried over or otherwise used under the laws of the foreign country, must attach documents demonstrating such facts to its timely filed U.S. income tax return for the year in which the presumed triggering event occurs.

(C) The following example illustrates this paragraph (g)(2)(iii).

EXAMPLE. DRC, a domestic corporation, is a member of CG, a consolidated group. DRC is a resident Country Y for Country Y income tax purposes. Therefore, DRC is a dual resident corporation. In Year 1, DRC incurs a dual consolidated loss of $100. CG files an agreement described in paragraph (g)(2) of this section and, thus, the $100 dual consolidated loss is included in the computation of CG's consolidated taxable income. In Year 6, all of the stock of DRC is sold to P, a domestic corporation that is a member of NG, another consolidated group. The sale of DRC to P is a triggering event under paragraph (g)(2)(iii)(A) of this section, requiring the recapture of the dual consolidated loss. However, the laws of Country Y provide for a five-year carryover period for losses. At the time of DRC's disaffiliation from CG, the losses, expenses and deductions that were included in the computation of the dual consolidated loss had expired for Country Y purposes. Therefore, upon adequate documentation that the losses, expenses, or deductions have expired for Country Y purposes, CG can rebut the presumption that a triggering event has occurred.

(iv) *Exceptions*—(A) *Acquisition by a member of the consolidated group.* The following events shall not constitute triggering events, requiring the recapture of the dual consolidated loss under paragraph (g)(2)(vii) of this section:

(*1*) An affiliated dual resident corporation or affiliated domestic owner ceases to be a member of a consolidated group solely by reason of a transaction in which a member of the same consolidated group succeeds to the tax attributes of the dual resident corporation or domestic owner under the provisions of section 381;

(*2*) Assets of an affiliated dual resident corporation or assets of a separate unit of an affiliated domestic owner are acquired by a member of its consolidated group in any other transaction; or

(*3*) An affiliated domestic owner of a separate unit transfers its interest in the separate unit to another member of its consolidated group.

(B) *Acquisition by an unaffiliated domestic corporation or a new consolidated group—(1)* If the requirements of paragraph (g)(2)(iv)(B)(*2*) of this section are met, the following events shall not constitute triggering events, requiring the recapture of the dual consolidated loss under paragraph (g)(2)(vii) of this section:

(*i*) An affiliated dual resident corporation or affiliated domestic owner becomes an unaffiliated domestic corporation or a member of a new consolidated group;

(*ii*) An unaffiliated dual resident corporation or unaffiliated domestic owner becomes a member of a consolidated group;

(*iii*) Assets of a dual resident corporation or a separate unit are acquired by an unaffiliated domestic corporation or a member of a new consolidated group; or

(*iv*) A domestic owner of a separate unit transfers its interest in the separate unit to an unaffiliated domestic corporation or to a member of a new consolidated group.

(*2*) If all of the following requirements are satisfied, the events listed in paragraph (g)(2)(iv)(B)(*1*) of this section shall not constitute triggering events requiring recapture under paragraph (g)(2)(vii) of this section.

(*i*) The consolidated group, unaffiliated dual resident corporation, or unaffiliated domestic owner that filed the agreement under this paragraph (g)(2) and the unaffiliated domestic corporation or new consolidated group must enter into a closing agreement with the Internal Revenue Service providing that the consolidated group, unaffiliated dual resident corporation, or unaffiliated domestic owner and the unaffiliated domestic corporation or new consolidated group will be jointly and severally liable for the total amount of the recapture of dual consolidated loss and interest charge required in paragraph (g)(2)(vii) of this section, if there is a triggering event described in paragraph (g)(2)(iii) of this section;

(*ii*) The unaffiliated domestic corporation or new consolidated group must agree to treat any potential recapture amount under paragraph (g)(2)(vii) of this section as unrealized built-in gain for purposes of section 384(a), subject to any applicable exceptions thereunder;

(*iii*) The unaffiliated domestic corporation or new consolidated group must file an agreement described in paragraph (g)(2)(i) of this section with its timely filed income tax return for the taxable year in which the event described in paragraph (g)(2)(iv)(B)(*1*) of this section occurs. The agreement must be signed under penalties of perjury by the person who signs the tax return of the unaffiliated domestic corporation or new consolidated group.

(C) *Subsequent triggering events.* Any triggering event described in paragraph (g)(2)(iii) of this section that occurs subsequent to one of the transactions described in paragraph (g)(2)(iv) (A) or (B) of this section and does not fall within the exceptions provided in paragraph (g)(2)(iv) (A) or (B) of this section shall require recapture under paragraph (g)(2)(vii) of this section.

(v) *Ordering rules for determining the foreign use of losses.* If the laws of a foreign country provide for the use of losses of a dual resident corporation to offset the income of another person but do not provide applicable rules for determining the order in which such losses are used to offset the income of another person in a taxable year, then for purposes of this section, the following rules shall govern:

(A) If under the laws of the foreign country the dual resident corporation has losses from different taxable years, the dual resident corporation shall be deemed to use first the losses from the earliest taxable year from which a loss may be carried forward or back for foreign law purposes.

(B) Any net loss, or income, that the dual resident corporation has in a taxable year shall first be used to offset net income, or loss, recognized by affiliates of the dual resident corporation in the same taxable year before any carryover of the dual resident corporation's losses is considered to be used to offset any income from the taxable year.

(C) Where different losses, expenses, or deductions (*e.g.,* capital losses and ordinary losses) of a dual resident corporation incurred in the same taxable year are available to offset the income of another person, the different losses shall be deemed to offset such income on a pro rata basis.

EXAMPLE. DRC, a domestic corporation, is taxed as a resident under the tax laws of Country Y. Therefore, DRC is a dual resident corporation. FA is a Country Y affiliate of DRC. Country Y's tax laws permit affiliated corporations to file a form of consolidated return. In Year 1, DRC incurs a capital loss of $80 which, for Country Y purposes, offsets completely $30 of capital gain recognized by FA. Neither corporation has any other taxable income or loss for the year. In Year 1 (and in other years), DRC recognizes the same amount of income for U.S. purposes as it does for Country Y purposes. Under paragraph (d)(1)(i) of this section, however, DRC's $80 capital loss is not a dual consolidated loss. In Year 2, DRC incurs a net operating loss of $100, while FA incurs a net operating loss of $50. DRC's $100 loss is a dual consolidated loss. Since the dual consolidated loss is not used to offset the income of another person under Country Y law, DRC is permitted to file an agreement described in this paragraph (g)(2). In Year 3, DRC has a net operating loss of $10 and FA has capital gains of $60. For Country Y purposes, DRC's $10 net operating loss is used to offset $10 of FA's $60 capital gain. DRC's $10 loss is a dual consolidated loss. Because the loss is used to offset FA's income, DRC will not be able to file an agreement under this paragraph (g)(2) with respect to the loss. Country Y permits FA's remaining $50 of Year 3 income to be offset by carryover losses. However, Country Y has no applicable rules for determining which carryover losses from Years 1 and 2 are used to offset such income. Under the ordering rules of paragraph (g)(2)(v)(A) of this section, none of DRC's $100 Year 2 loss will be deemed to offset FA's remaining $50 of Year 3 income. Instead, the $50 of capital loss carryover from Year 1 will be considered to offset the income.

(vi) *Reporting requirements*—(A) *In general.* The consolidated group, unaffiliated dual resident corporation, or unaffiliated domestic owner must answer the applicable questions regarding dual consolidated losses on its U.S. income tax return filed for the year in which the dual consolidated loss is incurred and for each of the following fifteen taxable years.

(B) *Annual certification.* Except as provided in paragraph (g)(2)(vi)(C) of this section, until and unless Form 1120 (or the Schedules thereto) contains questions pertaining to dual consolidated losses, the consolidated group, unaffiliated dual resident corporation, or unaffiliated domestic owner must file with its income tax return for each of the fifteen taxable years following the taxable year in which the dual consolidated loss is incurred a certification that the losses, expenses, or deductions that make up the dual consolidated loss have not been used to offset the income of another person under the tax laws of a foreign country. The annual certification must be signed under penalties of perjury by a person authorized to sign the agreement described in paragraph (g)(2)(i) of this section. The certification must identify the dual consolidated loss to which it pertains by setting forth the taxpayer's year in which the loss was incurred and the amount of such loss. In addition, the certification must warrant that arrangements have been made to ensure that the loss will not be used to offset the income of another person under the laws of a foreign country and that the taxpayer will be informed of any such foreign use of any portion of the loss. If dual consolidated losses of more than one taxable year are subject to the rules of this paragraph (g)(2)(vi)(B), the certifications for those years may be combined in a single document but each dual consolidated loss must be separately identified.

(C) *Exception.* A consolidated group or unaffiliated domestic owner is not required to file annual certifications under paragraph (g)(2)(vi)(B) of this section with respect to a dual consolidated loss of any separate unit other than a hybrid entity separate unit.

(vii) *Recapture of loss and interest charge*—(A) *Presumptive rule—(1) Amount of recapture.* Except as otherwise provided in this paragraph (g)(2)(vii), upon the occurrence of a triggering event described in paragraph (g)(2)(iii) of this section, the taxpayer shall recapture and report as gross income the total amount of the dual consolidated loss to which the triggering event applies on its income tax return for the taxable year in which the triggering event occurs (or, when the triggering event is a use of the loss for foreign tax purposes, the taxable year that includes the last day of the foreign tax year during which such use occurs).

(*2*) *Interest charge.* In connection with the recapture, the taxpayer shall pay an interest charge. Except as otherwise provided in this paragraph (g)(2)(vii), such interest shall be determined under the rules of section 6601(a) as if the additional tax owed as a result of the recapture had accrued and been due and owing for the taxable year in which the losses, expenses, or deductions taken into account in computing the dual consolidated loss gave rise to a tax benefit for U.S. income tax purposes. For purposes of this paragraph (g)(2)(vii)(A)(*2*), a tax benefit shall be considered to have arisen in a taxable year in which such losses, expenses or deductions reduced U.S. taxable income.

(B) *Rebuttal of presumptive rule*—(*1*) *Amount of recapture.* The amount of dual consolidated loss that must be recaptured under this paragraph (g)(2)(vii) may be reduced if the taxpayer demonstrates, to the satisfaction of the Commissioner, the offset permitted by this paragraph (g)(2)(vii)(B). The reduction in the amount of recapture is the amount by which the dual consolidated loss would have offset other taxable income reported on a timely filed U.S. income tax return for any taxable year up to and including the year of the triggering event if such loss had been subject to the restrictions of paragraph (b) of this section (and therefore had been subject to the separate return limitation year restrictions of §§1.1502–21A(c) or 1.1502–21T(c) (as appropriate) commencing in the taxable year in which the loss was incurred. A taxpayer utilizing this rebuttal rule must attach to its timely filed U.S. income tax return a separate accounting showing that the income for each year that offsets the dual resident corporation's or separate unit's recapture amount is attributable only to the dual resident corporation or separate unit.

(*2*) *Interest charge.* The interest charge imposed under this paragraph (g)(2)(vii) may be appropriately reduced if the taxpayer demonstrates, to the satisfaction of the Commissioner, that the net interest owed would have been less than that provided in paragraph (g)(2)(vii)(A)(*2*) of this section if the taxpayer had filed an amended return for the year in which the loss was incurred, and for any other affected years up to and including the year of recapture, treating the dual consolidated loss as a loss subject to the restrictions of paragraph (b) of this section (and therefore subject to the separate return limitation year restrictions of §§ 1.1502–21A(c) or 1.1502–21T(c) (as appropriate). A taxpayer utilizing this rebuttal rule must attach to its timely filed U.S. income tax return a computation demonstrating the reduction in the net interest owed as a result of treating the dual consolidated loss as a loss subject to the restrictions of paragraph (b) of this section.

(C) *Computation of taxable income in year of recapture—(1) Presumptive rule.* Except as otherwise provided in paragraph (g)(2)(vii)(C)(*2*) of this section, for purposes of computing the taxable income for the year of recapture, no current, carryover or carryback losses of the dual resident corporation or separate unit, of other members of the consolidated group, or of the domestic owner that are not attributable to the separate unit, may offset and absorb the recapture amount.

(*2*) *Rebuttal of presumptive rule.* The recapture amount included in gross income may be offset and absorbed by that portion of the taxpayer's (consolidated or separate) net operating loss carryover that is attributable to the dual consolidated loss being recaptured, if the taxpayer demonstrates, to the satisfaction of the Commissioner, the amount of such portion of the carryover. A taxpayer utilizing this rebuttal rule must attach to its timely filed U.S. income tax return a computation demonstrating the amount of net operating loss carryover that, under this paragraph (g)(2)(vii)(C)(*2*), may absorb the recapture amount included in gross income.

(D) *Character and source of recapture income.* The amount recaptured under this paragraph (g)(2)(vii) shall be treated as ordinary income in the year of recapture. The amount recaptured shall be treated as income having the same source and falling within the same separate category for purposes of section 904 as the dual consolidated loss being recaptured.

(E) *Reconstituted net operating loss.* Commencing in the taxable year immediately following the year in which the dual consolidated loss is recaptured, the dual resident corporation or separate unit shall be treated as having a net operating loss in an amount equal to the amount actually recaptured under paragraph (g)(2)(vii) (A) or (B) of this section. This reconstituted net operating loss shall be subject to the restrictions of paragraph (b) of this section (and therefore, the separate return limitation year restrictions of §§ 1.1502–21A(c) or 1.1502–21T(c) (as appropriate). The net operating loss shall be available only for carryover, under section 172(b), to taxable years following the taxable year of recapture. For purposes of determining the remaining carryover period, the loss shall be treated as if it had been recognized in the taxable year in which the dual consolidated loss that is the basis of the recapture amount was incurred.

(F) *Consequences of failing to comply with recapture provisions*—(*1*) *In general.* If the taxpayer fails to comply with the recapture provisions of this paragraph (g)(2)(vii) upon the occurrence of a triggering event, then the dual resident corporation or separate unit that incurred the dual consolidated loss (or a successor-in-interest) shall not be eligible for the relief provided in paragraph (g)(2) of this section with respect to any dual consolidated losses incurred in the five taxable years beginning with the taxable year in which recapture is required.

(*2*) *Exceptions.* In the case of a triggering event other than a use of the losses, expenses, or deductions taken into account in computing the dual consolidated loss to offset income of another person under the income tax laws of a foreign country, this rule shall not apply in the following circumstances:

(*i*) The failure to recapture is due to reasonable cause; or

(*ii*) A taxpayer seeking to rebut the presumption of a triggering event satisfies the filing requirements of paragraph (g)(2)(iii)(B) of this section.

(G) *Examples.* The following examples illustrate this paragraph (g)(2)(vii).

EXAMPLE 1. P, a domestic corporation, files a consolidated return with DRC, a dual resident corporation. In Year 1, DRC incurs a dual consolidated loss of $100 and P earns $100. P files an agreement under this paragraph (g)(2). Therefore, the consolidated group is permitted to offset P's $100 of income with DRC's $100 loss. In Year 2, DRC earns $30, which is completely offset by a $30 net operating loss incurred by P. In Year 3, DRC earns income of $25 while P recognizes no income or loss. In addition, there is a triggering event in Year 3. Therefore, under the presumptive rule of paragraph (g)(2)(vii)(A) of this section, DRC must recapture $100. However, the $100 recapture amount may be reduced by $25 (the amount by which the dual consolidated loss would have offset other taxable income if it had been subject to the separate return limitation year restrictions from Year 1) upon adequate documentation of such offset under paragraph (g)(2)(vii)(B)(*1*) of this section. Commencing in Year 4, the $100 (or $75) recapture amount is treated as a loss incurred by DRC in a separate return limitation year, subject to the restrictions of §§ 1.1502–21A(c) or 1.1502–21T(c), as appropriate. The carryover period of the loss, for purposes of section 172(b), will start from Year 1, when the dual consolidated loss was incurred.

EXAMPLE 2. The facts are the same as in EXAMPLE 1, except that in Year 2, DRC earns $75 and P earns $50. In Year 3, DRC earns $25 while P earns $30. A triggering event occurs in Year 3. The $100 presumptive amount of recapture can be reduced to zero by the $75 and $25 earned by DRC in Years 2 and 3, respectively, upon adequate documentation of such offset under paragraph (g)(2)(vii)(B)(*1*) of this section. Nevertheless, an interest charge will be owed. Under the presumptive rule of paragraph (g)(2)(vii)(A)(*2*) of this section, interest will be charged on the additional tax owed on the $100 of recapture income as if the tax had accrued in Year 1 (the year in which the dual consolidated loss reduced the income of P). However, the net interest will be reduced to the amount that would have been owed if the consolidated group had filed amended returns, treating the dual consolidated loss as a loss subject to the separate return limitation year restrictions of §§ 1.1502–21A(c) or 1.1502–21T(c), as appropriate, upon adequate documentation of such reduction of interest under paragraph (g)(2)(vii)(B)(*2*) of this section.

EXAMPLE 3. P, a domestic corporation, owns DRC, a domestic corporation that is subject to the income tax laws of Country Z on a residence basis. DRC owns FE, a Country Z corporation. In Year 1, DRC incurs a net operating loss for U.S. tax purposes. Under the tax laws of Country Z, the loss is not recognized until Year 3. The Year 1 net operating loss is a dual consolidated loss under paragraph (c)(5) of this section. The consolidated group elects relief under paragraph (g)(2) of this section by filing the appropriate agreement and uses the dual consolidated loss on its U.S. income tax return. In Year 3, the dual consolidated loss is used under the laws of Country Z to offset the income of FE, which is a triggering event under paragraph (g)(2)(iii) of this section. However, the consolidated group does not recapture the dual consolidated loss. The consolidated group's failure to comply with the recapture provisions of this paragraph (g)(2)(vii) prevents DRC from being eligible for the relief provided under paragraph (g)(2) of this section for any dual consolidated losses incurred in Years 3 through 7, inclusive.

(h) *Effective date*—(1) *In general.* These regulations are effective for taxable years beginning on or after October 1, 1992. Section 1.1503–2A is effective for taxable years beginning after December 31, 1986, and before October 1, 1992.

(2) *Taxpayers that have filed for relief under § 1.1503–2A*—(i) *In general.* Except as provided in paragraph (h)(ii)(b) of this section, taxpayers that have filed agreements described in § 1.1503–2A(c)(3) or certifications described in § 1.1503–2A(d)(3) shall continue to be subject to the provisions of such agreements or certifications, including the amended return or recapture requirements applicable in the event of a triggering event, for the remaining term of such agreements or certifications.

(ii) *Special transition rule.* A taxpayer that has filed an agreement described in § 1.1503–2A(c)(3) or a certification described in § 1.1503–2A(d)(3) and that is in compliance with the provisions of § 1.1503–2A may elect to replace such agreement or certification with an agreement described in paragraph (g)(2)(i) of this section. However, a taxpayer making this election must replace all agreements and certifications filed under § 1.1503–2A. If the taxpayer is a consolidated group, the election must be made with respect to all dual resident corporations or separate units within the group. Likewise, if the taxpayer is an unaffiliated domestic owner, the election must be made with respect to all separate units of the domestic owner. The taxpayer must file the replacement agreement with its timely filed income tax return for its first taxable year commencing on or after October 1, 1992, stating that such agreement is a replacement for the agreement filed under § 1.1503–2A(c)(3) or the certification filed under § 1.1503–2A(d)(3) and identifying the taxable year for which the original agreement or certification was filed. A single agreement described in paragraph (g)(2)(i) of this section may be filed to replace more than one agreement or certification filed under § 1.1503–2A; however, each dual consolidated loss must be separately identified. A taxpayer may also elect to apply § 1.1503–2 for all open years, with respect to agreements filed under § 1.1503–2A(c)(3) or certifications filed under § 1.1503–2A(d)(3), in cases where the agreement or certification is no longer in effect and the taxpayer has complied with the provisions of § 1.1503–2A. For example, a taxpayer may have had a triggering event under § 1.1503–2A that is not a triggering event under § 1.1503–2. If the taxpayer fully complied with the requirements of the agreement entered into under § 1.1503–2A(c)(3) and filed amended U.S. income tax returns within the time required under § 1.1503–2A(c)(3), the taxpayer may file amended U.S. income tax returns consistent with the position that the earlier triggering event is no longer a triggering event.

(3) *Taxpayers that are in compliance with § 1.1503–2A but have not filed for relief thereunder.* A taxpayer that is in compliance with the provisions of § 1.1503–2A but has not filed an agreement described in § 1.1503–2A(c)(3) or a certification described in § 1.1503–2A(d)(3) may elect to have the provisions of § 1.1503–2 apply for any open year. In particular, a taxpayer may elect to apply the provisions of § 1.1503–2 in a case where the dual consolidated loss has been subjected to the separate return limitation year restrictions of §§ 1.1502–21A(c) or 1.1502–21T(c) (as appropriate) but the losses, expenses, or deductions taken into account in computing the dual consolidated loss have not been used to offset the income of another person for foreign tax purposes. However, if a taxpayer is a consolidated group, the election must be made with respect to all dual resident corporations or separate units within the group. Likewise, if the taxpayer is an unaffiliated domestic owner, the election must be made with respect to all separate units of the domestic owner.

§1.1504–1 Definitions.

The privilege of filing consolidated returns is extended to all includible corporations constituting affiliated groups as defined in section 1504. See the regulations under §1.1502 for a description of an affiliated group and the corporations which may be considered as includible corporations.

[T.D. 6500, 25 FR 12106, Nov. 26, 1960]

§§1.1504–2—1.1504–3 [Reserved]

§1.1504–4 Treatment of warrants, options, convertible obligations, and other similar interests.

(a) *Introduction*—(1) *General rule.* This section provides regulations under section 1504(a)(5) (A) and (B) regarding the circumstances in which warrants, options, obligations convertible into stock, and other similar interests are treated as exercised for purposes of determining whether a corporation is a member of an affiliated group. The fact that an instrument may be treated as an option under these regulations does not prevent such instrument from being treated as stock under general principles of law. Except as provided in paragraph (a)(2) of this section, this section applies to all provisions under the Internal Revenue Code and the regulations to which affiliation within the meaning of section 1504(a) (with or without the exceptions in section 1504(b)) is relevant, including those provisions that refer to section 1504(a)(2) (with or without the exceptions in section 1504(b)) without referring to affiliation, provided that the 80 percent voting power and 80 percent value requirements of section 1504(a)(2) are not modified therein.

(2) *Exceptions.* This section does not apply to sections 163(j), 864(e), or 904(i) or to the regulations thereunder. This section also does not apply to any other provision specified by the Internal Revenue Service in regulations, a revenue ruling, or revenue procedure. See §601.601(d)(2)(ii)(*b*) of this chapter.

(b) *Options not treated as stock or as excerised*—(1) *General rule.* Except as provided in paragraph (b)(2) of this section, an option is not considered either as stock or as exercised. Thus, options are disregarded in determining whether a corporation is a member of an affiliated group unless they are described in paragraph (b)(2) of this section.

(2) *Options treated as exercised*—(i) *In general.* Solely for purposes of determining whether a corporation is a member of an affiliated group, an option is treated as exercised if, on a measurement date with respect to such option—

(A) It could reasonably be anticipated that, if not for this section, the issuance or transfer of the option in lieu of the issuance, redemption, or transfer of the underlying stock would result in the elimination of a substantial amount of federal income tax liability (as described in paragraphs (e) and (f) of this section); and

(B) It is reasonably certain that the option will be exercised (as described in paragraph (g) of this section).

(ii) *Aggregation of options.* All options with the same measurement date are aggregated in determining whether the issuance or transfer of an option in lieu of the issuance, redemption, or transfer of the underlying stock would result in the elimination of a substantial amount of federal income tax liability.

(iii) *Effect of treating option as exercised*—(A) *In general.* An option that is treated as exercised is treated as exercised for purposes of determining the percentage of the value of stock owned by the holder and other parties, but is not treated as exercised for purposes of determining the percentage of the voting power of stock owned by the holder and other parties.

(B) *Cash settlement options, phantom stock, stock appreciation rights, or similar interests.* If a cash settlement option, phantom stock, stock appreciation right, or similar interest is treated as exercised, the option is treated as having been converted into stock of the issuing corporation. If the amount to be received upon the exercise of such an option is determined by reference to a multiple of the increase in the value of a share of the issuing corporation's stock on the exercise date over the value of a share of the stock on the date the option is issued, the option is treated as converted into a corresponding number of shares of such stock. Appropriate adjustments must be made in any situation in which the amount to be received upon exercise of the option is determined in another manner.

(iv) *Valuation.* For purposes of section 1504(a)(2)(B) and this section, all shares of stock within a single class are considered to have the same value. Thus, control premiums and minority and blockage discounts within a single class are not taken into account.

(3) *Example.* The provisions of paragraph (b)(2) of this section may be illustrated by the following example:

Example. (i) Corporation P owns all 100 shares of the common stock of Corporation S, the only class of S stock outstanding. Each share of S stock has a fair market value of $10 and has one vote. On June 30, 1992, P issues to Corporation X an option to acquire 80 shares of the S stock from P.

(ii) If, under the provisions of this section, the option is treated as exercised, then, solely for purposes of determining affiliation, P is treated as owning only 20 percent of the value of the outstanding S stock and X is treated as owing the remaining 80 percent of the value of the S stock. P is still treated as owning all of the voting power of S. Accordingly, because P is treated as owning less than 80 percent of the value of the outstanding S stock, P and S are no longer affiliated. However, because X is not treated as owning any of the voting power of S, X and S are also not affiliated.

(c) *Definitions.* For purposes of this section—

(1) *Issuing corporation.* ''Issuing corporation'' means the corporation whose stock is subject to an option.

(2) *Related or sequential option.* ''Related or sequential option'' means an option that is one of a series of options issued to the same or related persons. For purposes of this section, any options issued to the same person or related persons within a two-year period are presumed to be part of a series of options. This presumption may be rebutted if the facts and circumstances clearly establish that the options are not part of a series of options. Any options issued to the same person or related persons more than two years apart are presumed not to be part of a series of options. This presumption may be rebutted if the facts and circumstances clearly establish that the options are part of a series of options.

(3) *Related persons.* Persons are related if they are related within the meaning of section 267(b) (without the application of sections 267(c) and 1563(e)(1)) or 707(b)(1), substituting ''10 percent'' for ''50 percent'' wherever it appears.

(4) *Measurement date*—(i) *General rule.* ''Measurement date'' means a date on which an option is issued or transferred or on which the terms of an existing option or the underlying stock are adjusted (including an adjustment pursuant to the terms of the option or the underlying stock).

(ii) *Issuances, transfers, or adjustments not treated as measurement dates.* A measurement date does not include a date on which—

(A) An option is issued or transferred by gift, at death, or between spouses or former spouses under section 1041;

(B) An option is issued or transferred—

(*1*) Between members of an affiliated group (determined with the exceptions in section 1504(b) and without the application of this section); or

(*2*) Between persons none of which is a member of the affiliated group (determined without the exceptions in section 1504(b) and without the application of this section), if any, of which the issuing corporation is a member, unless—

(*i*) Any such person is related to (or acting in concert with) the issuing corporation or any member of its affiliated group; and

(*ii*) The issuance or transfer is pursuant to a plan a principal purpose of which is to avoid the application of section 1504 and this section;

(C) An adjustment occurs in the terms or pursuant to the terms of an option or the underlying stock that does not materially increase the likelihood that the option will be exercised; or

(D) A change occurs in the exercise price of an option or in the number of shares that may be issued or transferred pursuant to the option as determined by a bona fide, reasonable, adjustment formula that has the effect of preventing dilution of the interests of the holders of the options.

(iii) *Transactions increasing likelihood of exercise.* If a change or alteration referred to in this paragraph (c)(4)(iii) is made for a principal purpose of increasing the likelihood that an option will be exercised, a measurement date also includes any date on which—

(A) The capital structure of the issuing corporation is changed; or

(B) The fair market value of the stock of the issuing corporation is altered through a transfer of assets to or from the issuing corporation (other than regular, ordinary dividends) or by any other means.

(iv) *Measurement date for options issued pursuant to a plan.* In the case of options issued pursuant to a plan, a measurement date for any of the options constitutes a measurement date for all options issued pursuant to the plan that are outstanding on the measurement date.

(v) *Measurement date for related or sequential options.* In the case of related or sequential options, a measurement date for any of the options constitutes a measurement date for all related or sequential options that are outstanding on the measurement date.

(vi) *Example.* The provisions of paragraph (c)(4)(v) of this section may be illustrated by the following example.

Example. (i) Corporation P owns all 80 shares of the common stock of Corporation S, the only class of S stock outstanding. On January 1, 1992, S issues a warrant, exercisable within 3 years, to U, an unrelated corporation, to acquire 10 newly issued shares of S common stock. On July 1, 1992, S issues a second warrant to U to acquire 10 additional newly issued shares of S common stock. On January 1, 1993, S issues a third warrant to T, a wholly owned subsidiary of U, to acquire 10 newly issued shares of S common stock. Assume that the facts and circumstances do not clearly establish that the options are not part of a series of options.

(ii) January 1, 1992, July 1, 1992, and January 1, 1993, constitute measurement dates for the first warrant, the second warrant, and the third warrant, respectively, because the warrants were issued on those dates.

(iii) Because the first and second warrants were issued within two years of each other, and both warrants were issued to U, the warrants constitute related or sequential options. Accordingly, July 1, 1992, constitutes a measurement date for the first warrant as well as for the second warrant.

(iv) Because the first, second, and third warrants were all issued within two years of each other, and were all issued to the same or related persons, the warrants constitute related or sequential options. Accordingly, January 1, 1993, constitutes a measurement date for the first and second warrants, as well as for the third warrant.

(5) *In-the-money.* ''In-the-money'' means the exercise price of the option is less than (or in the case of an option to sell stock, greater than) the fair market value of the underlying stock.

(d) *Options*—(1) *Instruments treated as options.* For purposes of this section, except to the extent otherwise provided in this paragraph (d), the following are treated as options:

(i) A call option, warrant, convertible obligation, put option, redemption agreement (including a right to cause the redemption of stock), or any other instrument that provides for the right to issue, redeem, or transfer stock (including an option on an option); and

(ii) A cash settlement option, phantom stock, stock appreciation right, or any other similar interest (except for stock).

(2) *Instruments generally not treated as options.* For purposes of this section,

the following will not be treated as options:

(i) *Options on section 1504(a)(4) stock.* Options on stock described in section 1504(a)(4);

(ii) *Certain publicly traded options*—(A) *General rule.* Options which on the measurement date are traded on (or subject to the rules of) a qualified board or exchange as defined in section 1256(g)(7), or on any other exchange, board of trade, or market specified by the Internal Revenue Service in regulations, a revenue ruling, or revenue procedure. See § 601.601(d)(2)(ii)(*b*) of this chapter;

(B) *Exception.* Paragraph (d)(2)(ii)(A) of this section does not apply to options issued, transferred, or listed with a principal purpose of avoiding the application of section 1504 and this section. For example, a principal purpose of avoiding the application of section 1504 and this section may exist if warrants, convertible or exchangeable debt instruments, or other similar instruments have an exercise price (or, in the case of convertible or exchangeable instruments, a conversion or exchange premium) that is materially less than, or a term that is materially longer than, those that are customary for publicly traded instruments of their type. A principal purpose may also exist if a large percentage of an issuance of an instrument is placed with one investor (or group of investors) and a very small percentage of the issuance is traded on a qualified board or exchange;

(iii) *Stock purchase agreements.* Stock purchase agreements or similar arrangements whose terms are commercially reasonable and in which the parties' obligations to complete the transaction are subject only to reasonable closing conditions;

(iv) *Escrow, pledge, or other security agreements.* Agreements for holding stock in escrow or under a pledge or other security agreement that are part of a typical commercial transaction and that are subject to customary commercial conditions;

(v) *Compensatory options*—(A) *General rule.* Stock appreciation rights, warrants, stock options, phantom stock, or other similar instruments provided to employees, directors, or independent contractors in connection with the performance of services for the corporation or a related corporation (and that is not excessive by reference to the services performed) and which—

(*1*) Are nontransferable within the meaning of § 1.83–3(d); and

(*2*) Do not have a readily ascertainable fair market value as defined in § 1.83–7(b) on the measurement date;

(B) *Exceptions.* (*1*) Paragraph (d)(2)(v)(A) of this section does not apply to options issued or transferred with a principal purpose of avoiding the application of section 1504 and this section; and

(*2*) Paragraph (d)(2)(v)(A) of this section ceases to apply to options that become transferable;

(vi) *Options granted in connection with a loan.* Options granted in connection with a loan if the lender is actively and regularly engaged in the business of lending and the options are issued in connection with a loan to the issuing corporation that is commercially reasonable. This paragraph (d)(2)(vi) continues to apply if the option is transferred with the loan (or if a portion of the option is transferred with a corresponding portion of the loan). However, if the option is transferred without a corresponding portion of the loan, this paragraph (d)(2)(vi) ceases to apply;

(vii) *Options created pursuant to a title 11 or similar case.* Options created by the solicitation or receipt of acceptances to a plan of reorganization in a title 11 or similar case (within the meaning of section 368(a)(3)(A)), the option created by the confirmation of the plan, and any option created under the plan prior to the time the plan becomes effective;

(viii) *Convertible preferred stock.* Convertible preferred stock, provided the terms of the conversion feature do not permit or require the tender of any consideration other than the stock being converted; and

(ix) *Other enumerated instruments.* Any other instruments specified by the Internal Revenue Service in regulations, a revenue ruling, or revenue procedure. See § 601.601(d)(2)(ii)(*b*) of this chapter.

(e) *Elimination of federal income tax liability.* For purposes of this section, the elimination of federal income tax liability includes the elimination or deferral of federal income tax liability. In determining whether there is an elimination of federal income tax liability, the tax consequences to all involved parties are considered. Examples of elimination of federal income tax liability include the use of a loss or deduction that would not otherwise be utilized, the acceleration of a loss or deduction to a year earlier than the year in which the loss or deduction would otherwise be utilized, the deferral of gain or income to a year later than the year in which the gain or income would otherwise be reported, and the acceleration of gain or income to a year earlier than the year in which the gain or income would otherwise be reported, if such gain or income is offset by a net operating loss or net capital loss that would otherwise expire unused. The elimination of federal income tax liability does not include the deferral of gain with respect to the stock subject to the option that would be recognized if such stock were sold on a measurement date.

(f) *Substantial amount of federal income tax liability.* The determination of what constitutes a substantial amount of federal income tax liability is based on all the facts and circumstances, including the absolute amount of the elimination, the amount of the elimination relative to overall tax liability, and the timing of items of income and deductions, taking into account present value concepts.

(g) *Reasonable certainty of exercise*—(1) *Generally.* The determination of whether, as of a measurement date, an option is reasonably certain to be exercised is based on all the facts and circumstances, including:

(i) *Purchase price.* The purchase price of the option in absolute terms and in relation to the fair market value of the stock or the exercise price of the option;

(ii) *In-the-money option.* Whether and to what extent the option is in-the-money on the measurement date;

(iii) *Not in-the-money option.* If the option is not in-the-money on the measurement date, the amount or percentage by which the exercise price of the option is greater than (or in the case of an option to sell stock, is less than) the fair market value of the underlying stock;

(iv) *Exercise price.* Whether the exercise price of the option is fixed or fluctuates depending on the earnings, value, or other indication of economic performance of the issuing corporation;

(v) *Time of exercise.* The time at which, or the period of time during which, the option can be exercised;

(vi) *Related or sequential options.* Whether the option is one in a series of related or sequential options;

(vii) *Stockholder rights.* The existence of an arrangement (either within the option agreement or in a related agreement) that, directly or indirectly, affords managerial or economic rights in the issuing corporation that ordinarily would be afforded to owners of the issuing corporation's stock (e.g., voting rights, dividend rights, or rights to proceeds on liquidation) to the person who would acquire the stock upon exercise of the option or a person related to such person. For this purpose, managerial or economic rights in the issuing corporation possessed because of actual stock ownership in the issuing corporation are not taken into account;

(viii) *Restrictive covenants.* The existence of restrictive covenants or similar arrangements (either within the option agreement or in a related agreement) that, directly or indirectly, prevent or limit the ability of the issuing corporation to undertake certain activities while the option is outstanding (e.g., covenants limiting the payment of dividends or borrowing of funds);

(ix) *Intention to alter value.* Whether it was intended that through a change in the capital structure of the issuing corporation or a transfer of assets to or from the issuing corporation (other than regular, ordinary dividends) or by any other means, the fair market value of the stock of the issuing corporation would be altered for a principal purpose of increasing the likelihood that the option would be exercised; and

(x) *Contingencies.* Any contingency (other than the mere passage of time) to which the exercise of the option is subject (e.g., a public offering of the issuing corporation's stock or reaching a certain level of earnings).

(2) *Cash settlement options, phantom stock, stock appreciation rights, or similar interests.* A cash settlement option, phantom stock, stock appreciation right, or similar interest is treated as reasonably certain to be exercised if it is reasonably certain that the option will have value at some time during the period in which the option may be exercised.

(3) *Safe harbors*—(i) *Options to acquire stock.* Except as provided in paragraph (g)(3)(iv) of this section, an option to acquire stock is not considered reasonably certain, as of a measurement date, to be exercised if—

(A) The option may be exercised no more than 24 months after the measurement date and the exercise price is equal to or greater than 90 percent of the fair market value of the underlying stock on the measurement date; or

(B) The terms of the option provide that the exercise price of the option is equal to or greater than the fair market value of the underlying stock on the exercise date.

(ii) *Options to sell stock.* Except as provided in paragraph (g)(3)(iv) of this section, an option to sell stock is not considered reasonably certain, as of a measurement date, to be exercised if—

(A) The option may be exercised no more than 24 months after the measurement date and the exercise price is equal to or less than 110 percent of the fair market value of the underlying stock on the measurement date; or

(B) The terms of the option provide that the exercise price of the option is equal to or less than the fair market value of the underlying stock on the exercise date.

(iii) *Options exercisable at fair market value.* For purposes of paragraphs (g)(3)(i)(B) and (g)(3)(ii)(B) of this section, an option whose exercise price is determined by a formula is considered to have an exercise price equal to the fair market value of the underlying stock on the exercise date if the formula is agreed upon by the parties when the option is issued in a bona fide attempt to arrive at fair market value on the exercise date and is to be applied based upon the facts in existence on the exercise date.

(iv) *Exceptions.* The safe harbors of this paragraph (g)(3) do not apply if—

(A) An arrangement exists that provides the holder or a related party with stockholder rights described in paragraph (g)(1)(vii) of this section (except for rights arising upon a default under the option or a related agreement);

(B) It is intended that through a change in the capital structure of the issuing corporation or a transfer of assets to or from the issuing corporation (other than regular, ordinary dividends) or by any other means, the fair market value of the stock of the issuing corporation will be altered for a principal purpose of increasing the likelihood that the option will be exercised; or

(C) The option is one in a series of related or sequential options, unless all such options satisfy paragraph (g)(3) (i) or (ii) of this section.

(v) *Failure to satisfy safe harbor.* Failure of an option to satisfy one of the safe harbors of this paragraph (g)(3) does not affect the determination of whether an option is treated as reasonably certain to be exercised.

(h) *Examples.* The provisions of this section may be illustrated by the following examples. These examples assume that the measurement dates set forth in the examples are the only measurement dates that have taken place or will take place.

Example 1. (i) P is the common parent of a consolidated group, consisting of P, S, and T. P owns all 100 shares of S's only class of stock, which is voting common stock. P also owns all the stock of T. On June 30, 1992, when the fair market value of the S stock is $40 per share, P sells to U, an unrelated corporation, an option to acquire 40 shares of the S stock that P owns at an exercise price of $30 per share, exercisable at any time within 3 years after the granting of the option. P and T have had substantial losses for 5 consecutive years while S has had substantial income during the same period. Because P, S, and T have been filing consolidated returns, P and T have been able to use all of their losses to offset S's income. It is anticipated that P, S, and T will continue their earnings histories for several more years. On July 31, 1992, S declares and pays a dividend of $1 per share to P.

(ii) If P, S, and T continue to file consolidated returns after June 30, 1992, it could reasonably be anticipated that P, S, and T would eliminate a substantial amount of federal income tax liability by using P's and T's future losses to offset S's income in consolidated returns. Furthermore, based on the difference between the exercise price of the option and the fair market value of the S stock, it is reasonably certain, on June 30, 1992, a measurement date, that the option will be exercised. Therefore, the option held by U is treated as exercised. As a result, for purposes of determining whether P and S are affiliated, P is treated as owning only 60 percent of the value of outstanding shares of S stock and U is treated as owning the remaining 40 percent. P is still treated as owning 100 percent of the voting power. Because members of the P group are no longer treated as owning stock possessing 80 percent of the total value of the S stock as of June 30, 1992, S is no longer a member of the P group. Additionally, P is not entitled to a 100 percent dividends received deduction under section 243(a)(3) because P and S are also treated as not affiliated for purposes of section 243. P is only entitled to an 80 percent dividends received deduction under section 243(c).

Example 2. (i) The facts are the same as in *Example 1* except that rather than P issuing an option to acquire 40 shares of S stock to U on June 30, 1992, P, pursuant to a plan, issues an option to U1 on July 1, 1992, to acquire 20 shares of S stock, and issues an option to U2 on July 2, 1992, to acquire 20 shares of S stock.

(ii) Because the options issued to U1 and U2 were issued pursuant to a plan, July 2, 1992, constitutes a measurement data for both options. Therefore, both options are aggregated in determining whether the issuance of the options, rather than the sale of the S stock, would result in the elimination of a substantial amount of federal income tax liability. Accordingly, as in *Example 1*, because the continued affiliation of P, S, and T could reasonably be anticipated to result in the elimination of a substantial amount of federal income tax liability and the options are reasonably certain to be exercised, the options are treated as exercised for purposes of determining whether P and S are affiliated, and P and S are no longer affiliated as of July 2, 1992.

Example 3. (i) The facts are the same as in *Example 1* except that the option gives U the right to acquire all 100 shares of the S stock, and U is the common parent of a consolidated group. The U group has had substantial losses for 5 consecutive years and it is anticipated that the U group will continue its earnings history for several more years.

(ii) If P sold the S stock, in lieu of the option, to U, S would become a member of the U group. Because the U group files consolidated returns, if P sold the S stock to U, U would be able to use its future losses to offset future income of S. When viewing the transaction from the effect on all parties, the sale of the option, in lieu of the underlying S stock, does not result in the elimination of federal income tax liability because S's income would be offset by the losses of members of either the P or U group. Accordingly, the option is disregarded and S remains a member of the P group.

Example 4. (i) P is the common parent of a consolidated group, consisting of P and S. P owns 90 of the 100 outstanding shares of S's only class of stock, which is voting common stock, and U, an unrelated corporation, owns the remaining 10 shares. On August 31, 1992, when the fair market value of the S stock is $100 per share, P sells a call option to U that entitles U to purchase 20 shares of S stock from P, at any time before August 31, 1993, at an exercise price of $115 per share. The call option does not provide U with any voting rights, dividend rights, or any other managerial or economic rights ordinarily afforded to owners of the S stock. There is no intention on August 31, 1992, to alter the value of S to increase the likelihood of the exercise of the call option.

(ii) Because the exercise price of the call option is equal to or greater than 90 percent of the fair market value of the S stock on August 31, 1992, a measurement date, the option may be exercised no more than 24 months after the measurement date, and none of the items described in paragraph (g)(3)(iv) of this section that preclude application of the safe harbor are present, the safe harbor of paragraph (g)(3)(i) of this section applies and the call option is treated as if it is not reasonably certain to be exercised. Therefore, regardless of whether the continued affiliation of P and S would result in the elimination of a substantial amount of federal income tax liability, the call option is disregarded in determining whether S remains a member of the P group.

Example 5. (i) The facts are the same as in *Example 4* except that the call option gives U the right to vote similar to that of a shareholder.

(ii) Under paragraph (g)(3)(iv) of this section, the safe harbor of paragraph (g)(3)(i) of this section does not apply because the call option entitles U to voting rights equivalent to that of a shareholder. Accordingly, all of the facts and circumstances surrounding the sale of the call option must be taken into consideration in determining whether it is reasonably certain that the call option will be exercised.

Example 6. (i) In 1992, two unrelated corporations, X and Y, decide to engage jointly in a new business venture. To accomplish this purpose, X organizes a new corporation, S, on September 30, 1992. X acquires 100 shares of the voting common stock of S, which are the only shares of S stock outstanding. Y acquires a debenture of S which is convertible, on September 30, 1995, into 100 shares of S common stock. If the conversion right is not exercised, X will have the right, on September 30, 1995, to put 50 shares of its S stock to Y in exchange for 50 percent of the debenture held by Y. The likelihood of the success of the venture is uncertain. It is anticipated that S will generate substantial losses in its early years of operation. X expects to have substantial taxable income during the three years following the organization of S.

(ii) Under the terms of this arrangement, it is reasonably certain on September 30, 1992, a measurement date, that on September 30, 1995, either through Y's exercise of its conversion right or X's right to put S stock to Y, that Y will own 50 percent of the S stock. Additionally, it could reasonably be anticipated, on September 30, 1992, a measurement date, that the affiliation of X and S would result in the elimination of a substantial amount of federal income tax liability. Accordingly, for purposes of determining whether X and S are affiliated, X is treated as owning only 50 percent of the value of the S stock as of September 30, 1992, a measurement date, and S is not a member of the X affiliated group.

Example 7. (i) The facts are the same as in *Example 6* except that rather than acquiring 100 percent of the S stock and the right to put S stock to Y, X acquires only 80 percent of the S stock, while S, rather than acquiring a convertible debenture, acquires 20 percent of the S stock, and an option to acquire an additional 30 percent of the S stock. The terms of the option are such that the option will only be exercised if the new business venture succeeds.

(ii) In contrast to *Example 6*, because of the true business risks involved in the start-up of S and whether the business venture will ultimately succeed, along with the fact that X does not have an option to put S stock to Y, it is not reasonably certain on September 30, 1992, a measurement date, that the option will be exercised and that X will only own 50 percent of the S stock on September 30, 1995. Accordingly, the option is disregarded in determining whether S is a member of the X group.

(i) *Effective date.* This section applies, generally, to options with a measurement date on or after February 28, 1992. This section does not apply to options issued prior to February 28, 1992, which have a measurement date on or after February 28, 1992, if the measurement date for the option occurs solely because of an adjustment in the terms of the option pursuant to the terms of the option as it existed on February 28, 1992. Paragraph (b)(2)(iv) of this section applies to stock outstanding on or after February 28, 1992.

[T.D. 8462, 57 FR 61801, Dec. 29, 1992; 58 FR 7041, Feb. 3, 1993]

REGULATIONS APPLICABLE TO TAXABLE YEARS BEFORE JANUARY 1, 1997

§ 1.1502–15A Limitations on the allowance of built-in deductions for consolidated return years beginning before January 1, 1997.

(a) *Limitation on built-in deductions*—(1) *General rule.* Built-in deductions (as defined in subparagraph (2) of this paragraph) for a taxable year shall be subject to the limitation of § 1.1502–21A(c) (determined without regard to such deductions and without regard to net operating loss carryovers to such year) and the limitation of § 1.1502–22A(c) (determined without regard to such deductions and without regard to capital loss carryovers to such year). If as a result of applying such limitations, built-in deductions are not allowable in such consolidated return year, such deductions shall be treated as a net operating loss or net capital loss (as the case may be) sustained in such year and shall be carried to those taxable years (consolidated or separate) to which a consolidated net operating loss or a consolidated net capital loss could be carried under §§ 1.1502–21A, 1.1502–22A and 1.1502–79A, (or §§ 1.1502-21T and 1.1502-22T, as appropriate) except that such losses shall be treated as losses subject to the limitations contained in §§ 1.1502–21T(c) or 1.1502-22T(c) (or §§ 1.1502-21A(c), 1.1502–22A(c), as appropriate), as the case may be. Thus, for example, if member X sells a capital asset during a consolidated return year at a $1,000 loss and such loss is treated as a built-in deduction, then such loss shall be subject to the limitation contained in § 1.1502–22(c), which, in general, would allow such loss to be offset only against X's own capital gain net income (net capital gain for taxable years beginning before January 1, 1977). Assuming X had no capital gain net income (net capital gain for taxable years beginning before January 1, 1977) reflected in such year (after taking into account its capital losses, other than capital loss carryovers and the built-in deduction), such $1,000 loss shall be treated as a net capital loss and shall be carried over for 5 years under § 1.1502–22, subject to the limitation contained in § 1.1502–22(c) for consolidated return years.

(2) *Built-in deductions.* (i) For purposes of this paragraph, the term ‘‘built-in deductions’’ for a consolidated return year means those deductions or losses of a corporation which are recognized in such year, or which are recognized in a separate return year and carried over in the form of a net operating or net capital loss to such year, but which are economically accrued in a separate return limitation year (as defined in §1.1502–1(f)). Such term does not include deductions or losses incurred in rehabilitating such corporation. Thus, for example, assume P is the common parent of a group filing consolidated returns on the basis of a calendar year and that P purchases all of the stock of S on December 31, 1966. Assume further that on December 31, 1966, S owns a capital asset with an adjusted basis of $100 and a fair market value of $50. If the group files a consolidated return for 1967, and S sells the asset for $30, $50 of the $70 loss is treated as a built-in deduction, since it was economically accrued in a separate return limitation year. If S sells the asset for $80 instead of $30, the $20 loss is treated as a built-in deduction. On the other hand, if such asset is a depreciable asset and is not sold by S, depreciation deductions attributable to the $50 difference between basis and fair market value are treated as built-in deductions.

(ii) In determining, for purposes of subdivision (i) of this subparagraph, whether a deduction or loss with respect to any asset is economically accrued in a separate return limitation year, the term ‘‘predecessor’’ as used in §1.1502–1(f)(1) shall include any transferor of such asset if the basis of the asset in the hands of the transferee is determined (in whole or in part) by reference to its basis in the hands of such transferor.

(3) *Transitional rule.* If the assets which produced the built-in deductions were acquired (either directly or by acquiring a new member) by the group on or before January 4, 1973, and the separate return limitation year in which such deductions were economically accrued ended before such date, then at the option of the taxpayer, the provisions of this paragraph before amendment by T.D. 7246 shall apply, and, in addition, if such assets were acquired on or before April 17, 1968, and the separate return limitation year in which the built-in deductions were economically accrued ended on or before such date, then at the option of the taxpayer, the provisions of §1.1502–31A(b)(9)(as contained in the 26 C.F.R. edition revised as of April 1, 1996) shall apply in lieu of this paragraph.

(4) *Exceptions.* (i) Subparagraphs (1), (2), and (3) of this paragraph shall not limit built-in deductions in a taxable year with respect to assets acquired (either directly or by acquiring a new member) by the group if:

(a) The group acquired the assets more than 10 years before the first day of such taxable year, or

(b) Immediately before the group acquired the assets, the aggregate of the adjusted basis of all assets (other than cash, marketable securities, and goodwill) acquired from the transferor or owned by the new member did not exceed the fair market value of all such assets by more than 15 percent.

(ii) For purposes of subdivision (i)*(b)* of this subparagraph, a security is not a marketable security if immediately before the group acquired the assets:

(a) The fair market value of the security is less than 95 percent of its adjusted basis, or

(b) The transferor or new member had held the security for at least 24 months, or

(c) The security is stock in a corporation at least 50 percent of the fair market value of the outstanding stock of which is owned by the transferor or new member.

(b) *Effective date.* This section applies to any consolidated return years to which §1.1502–21T does not apply. See §1.1502–21T(g) for effective dates of that section.

[T.D. 6894, 31 FR 11794, Sept. 8, 1966, as amended by T.D. 6909, 31 FR 16695, Dec. 30, 1966; T.D. 7246, 37 FR 761, Jan. 4, 1972; T.D. 7728, 45 FR 72650, Nov. 3, 1980; T.D. 8677, 61 FR 33323, June 27, 1996. Redesignated and amended by T.D. 8677, 61 FR 33326, June 27, 1996]

§ 1.1502–21A Consolidated net operating loss deduction generally applicable for consolidated return years beginning before January 1, 1997.

(a) *In general.* The consolidated net operating loss deduction shall be an amount equal to the aggregate of the consolidated net operating loss carryovers and carrybacks to the taxable year (as determined under paragraph (b) of this section).

(b) *Consolidated net operating loss carryovers and carrybacks*—(1) *In general.* The consolidated net operating loss carryovers and carrybacks to the taxable year shall consist of any consolidated net operating losses (as determined under paragraph (f) of this section) of the group, plus any net operating losses sustained by members of the group in separate return years, which may be carried over or back to the taxable year under the principles of section 172(b). However, such consolidated carryovers and carrybacks shall not include any consolidated net operating loss apportioned to a corporation for a separate return year pursuant to § 1.1502–79A(a), and shall be subject to the limitations contained in paragraphs (c), (d), and (e) of this section and to the limitation contained in § 1.1502–15A (or § 1.1502–11(c), as appropriate).

(2) *Rules for applying section 172(b)(1)*—(i) *Regulated transportation corporations.* For purposes of applying section 172(b)(1)(C) (relating to net operating losses sustained by regulated transportation corporations), in the case of a consolidated net operating loss sustained in a taxable year for which a member of the group was a regulated transportation corporation (as defined in section 172(j)(1)), the portion, if any, of such consolidated net operating loss which is attributable to such corporation (as determined under this paragraph shall be a carryover to the sixth taxable year following the loss year only if such corporation is a regulated transportation corporation for such sixth year, and shall be a carryover to the seventh taxable year following the loss year only if such corporation is a regulated transportation corporation for both such sixth and seventh years.

(ii) *Trade expansion losses.* In the case of a carryback of a consolidated net operating loss from a taxable year for which a member of the group has been issued a certification under section 317 of the Trade Expansion Act of 1962 and with respect to which the requirements of section 172(b)(3)(A) have been met, section 172(b)(1)(A)(ii) shall apply only to the portion of such consolidated net operating loss attributable to such member.

(iii) *Foreign expropriation losses.* An election under section 172(b)(3)(C) (relating to 10-year carryover of portion of net operating loss attributable to a foreign expropriation loss) may be made for a consolidated return year only if the sum of the foreign expropriation losses (as defined in section 172(k)) of the members of the group for such year equals or exceeds 50 percent of the consolidated net operating loss for such year. If such election is made, the amount which may be carried over under section 172(b)(1)(D) is the smaller of *(a)* the sum of such foreign expropriation losses, or *(b)* the consolidated net operating loss.

(3) *Absorption rules.* For purposes of determining the amount, if any, of a net operating loss (whether consolidated or separate) which can be carried to a taxable year (consolidated or separate), the amount of such net operating loss which is absorbed in a prior consolidated return year under section 172(b)(2) shall be determined by:

(i) Applying all net operating losses which can be carried to such prior year in the order of the taxable years in which such losses were sustained, beginning with the taxable year which ends earliest, and

(ii) Applying all such losses which can be carried to such prior year from taxable years ending on the same date on a pro rata basis, except that any portion of a net operating loss attributable to a foreign expropriation loss to which section 172(b)(1)(D) applies shall be applied last.

(c) *Limitation on net operating loss carryovers and carrybacks from separate return limitation years*—(1) *General rule.* In the case of a net operating loss of a member of the group arising in a separate return limitation year (as defined in paragraph (f) of § 1.1502–1) of such member (and in a separate return limitation year of any predecessor of such member), the amount which may be included under paragraph (b) of this section (computed without regard to the limitation contained in paragraph (d) of this section) in the consolidated net operating loss carryovers and carrybacks to a consolidated return year of the group shall not exceed the amount determined under subparagraph (2) of this paragraph.

(2) *Computation of limitation.* The amount referred to in subparagraph (1) of this paragraph with respect to a member of the group is the excess, if any, of:

(i) Consolidated taxable income (computed without regard to the consolidated net operating loss deduction), minus such consolidated taxable income recomputed by excluding the items of income and deduction of such member, over

(ii) The net operating losses attributable to such member which may be carried to the consolidated return year arising in taxable years ending prior to the particular separate return limitation year.

(3) *Examples.* The provisions of this paragraph and paragraphs (a) and (b) of this section may be illustrated by the following examples:

Example (1). (i) Corporation P formed corporations S and T on January 1, 1965. P, S, and T filed separate returns for the calendar year 1965, a year for which an election under section 1562 was effective. T's return for that year reflected a net operating loss of $10,000. The group filed a consolidated return for 1966 reflecting consolidated taxable income of $30,000 (computed without regard to the consolidated net operating loss deduction). Among the transactions occurring during 1966 were the following:

(a) P sold goods to T deriving deferred profits of $7,000 on such sales, $2,000 of which was restored to consolidated taxable income on the sale of such goods to outsiders;

(b) T sold a machine to S deriving a deferred profit of $5,000, $1,000 of which was restored to consolidated taxable income as a result of S's depreciation deductions;

(c) T distributed a $3,000 dividend to P; and

(d) In addition to the transactions described above, T had other taxable income of $6,000.

(ii) The carryover of T's 1965 net operating loss to 1966 is subject to the limitation contained in this paragraph, since 1965 was a separate return limitation year (an election under section 1562 was effective for such year). Thus, only $7,000 of T's $10,000 net operating loss is a consolidated net operating loss carryover to 1966, since such carryover is limited to consolidated taxable income (computed without regard to the consolidated net operating loss deduction), $30,000, minus such consolidated taxable income recomputed by excluding the items of income and deduction of T, $23,000 (*i.e.*, consolidated taxable income computed without regard to the $1,000 restoration of T's deferred gain and T's $6,000 of other income). In making such recomputation, no change is made in the effect on consolidated taxable income of P's sale to T, or of the dividend from T to P.

Example (2). (i) Corporation P was formed on January 1, 1966. P filed separate returns for the calendar years 1966 and 1967 reflecting net operating losses of $4,000 and $12,000, respectively. P purchased corporation S on March 15, 1967. S was formed on February 1, 1966, and filed a separate return for the taxable year ending January 31, 1967. S also filed a short period return for the period from February 1 to December 31, 1967, and joined with P in filing a consolidated return for 1968. S sustained net operating losses of $5,000 and $6,000 for its taxable years ending January 31, 1967, and December 31, 1967, respectively. An election under section 1562 was not effective for P and S during the period involved. Consolidated taxable income for 1968 (computed without regard to the consolidated net operating loss deduction) was $16,000; such consolidated taxable income recomputed by disregarding the items of income and deduction of S was $9,000.

(ii) In order of time, the following losses are absorbed in 1968:

(a) P's $4,000 net operating loss for the calendar year 1966 (such loss is not subject to the limitation contained in this paragraph since P is the common parent corporation for 1968);

(b) S's $5,000 net operating loss for the year ended January 31, 1967. Such loss is subject to the limitation contained in this paragraph, since S was not a member of the group on each day of such year. However, such loss can be carried over and absorbed in full since such limitation is $7,000 (consolidated taxable income computed without regard to the consolidated net operating loss deduction, $16,000, minus such consolidated taxable income recomputed, $9,000); and

(c) $6,000 of P's net operating loss and $1,000 of S's net operating loss for the taxable years ending December 31, 1967. This is determined by applying the losses from such year which can be carried to 1968 (P's $12,000 loss and $2,000 of S's $6,000 loss, since such $6,000 loss is limited under this paragraph) on a pro rata basis against the amount of such losses which can be absorbed in that year, $7,000 (consolidated taxable income of $16,000 less the $9,000 of losses absorbed from prior

years). The carryover of S's loss to 1968 is subject to the limitation contained in that paragraph, since S was not a member of the group on each day of its taxable year ending December 31, 1967. Such loss is limited to $2,000, the excess of $7,000 (as determined under (ii)*(b))* over $5,000 (S's carryover from the year ended January 31, 1967). If a consolidated return is filed in 1969, the consolidated net operating loss carryovers will consist of P's unabsorbed loss of $6,000 ($12,000 minus $6,000) from 1967 and, subject to the limitation contained in this paragraph, S's unabsorbed loss of $5,000 ($6,000 minus $1,000) from its year ended December 31, 1967.

(d) *Limitation on carryovers where there has been a consolidated return change of ownership*—(1) *General rule.* If a consolidated return change of ownership (as defined in paragraph (g) of §1.1502–1) occurs during the taxable year or an earlier taxable year, the amount which may be included under paragraph (b) of this section in the consolidated net operating loss carryovers to the taxable year with respect to the aggregate of the net operating losses attributable to old members of the group (as defined in paragraph (g)(3) of §1.1502–1) arising in taxable years (consolidated or separate) ending on the same day and before the taxable year in which the consolidated return change of ownership occurred shall not exceed the amount determined under subparagraph (2) of this paragraph.

(2) *Computation of limitation.* The amount referred to in subparagraph (1) of this paragraph shall be the excess of:

(i) The consolidated taxable income for the taxable year (determined without regard to the consolidated net operating loss deduction) recomputed by including only the items of income and deduction of the old members of the group, over

(ii) The sum of the net operating losses attributable to the old members of the group which may be carried to the taxable year arising in taxable years ending prior to the particular loss year or years.

(3) *Example.* The provisions of this paragraph may be illustrated by the following example:

Example. (i) Corporation P is formed on January 1, 1967, and on the same day it forms corporation S. P and S file a consolidated return for the calendar year 1967, reflecting a consolidated net operating loss of $500,000. On January 1, 1968, individual X purchases all of the outstanding stock of P. X subsequently contributes $1,000,000 to P and P purchases the stock of corporation T. P, S, and T file a consolidated return for 1968 reflecting consolidated taxable income of $600,000 (computed without regard to the consolidated net operating loss deduction). Such consolidated taxable income recomputed by including only the items of income and deduction of P and S is $350,000.

(ii) Since a consolidated return change of ownership took place in 1968 (there was more than a 50 percent change of ownership of P), the amount of the consolidated net operating loss from 1967 which can be carried over to 1968 is limited to $350,000, the excess of $350,000 (consolidated taxable income recomputed by including only the items of income and deduction of the old members of the group, P and S) over zero (the amount of the consolidated net operating loss carryovers attributable to the old members of the group arising in taxable years ending before 1967).

(4) *Cross-reference.* See §1.1502–21T(d)(1) for the rule that applies the principles of this paragraph (d) in consolidated return years beginning on or after January 1, 1997, with respect to a consolidated return change of ownership occurring before January 1, 1997.

(e) *Limitations on net operating loss carryovers under section 382*—(1) *Section 382(a).* (i) If at the end of a taxable year (consolidated or separate) there has been an increase in ownership of the stock of the common parent of a group (within the meaning of section 382(a)(1) (A) and (B)), and any member of the group has not continued to carry on a trade or business substantially the same as that conducted before any such increase (within the meaning of section 382(a)(1)(C)), then the portion of any consolidated net operating loss sustained in prior taxable years attributable to such member (as determined under this paragraph shall not be allowed as a carryover to such taxable year or to any subsequent taxable year.

(ii) If the provisions of section 382(a) disallow the deduction of a net operating loss carryover from a separate return year of a member of the group to a subsequent taxable year, no amount shall be included under paragraph (b) of this section as a consolidated net operating loss carryover to such a subsequent consolidated return year with respect to such separate return year of such member.

(iii) The provisions of this subparagraph may be illustrated by the following example:

Example. P, S, and T file a consolidated return for the calendar year 1969, reflecting a consolidated net operating loss attributable in part to each member. P owns 80 percent of S's stock and S owns 80 percent of T's stock. On January 1, 1970, A purchases 50 percent of P's stock. During 1970 T's business is discontinued. Since there has been a 50 percentage point increase in ownership of P, the common parent of the group, and since T has not continued to carry on the same trade or business after such increase, the portion of the 1969 consolidated net operating loss attributable to T shall not be included in any net operating loss deduction for 1970 or for any subsequent taxable years, whether consolidated or separate.

(2) *Section 382(b).* If a net operating loss carryover from a separate return year of a predecessor of a member of the group to the taxable year is reduced under the provisions of section 382(b), the amount included under paragraph (b) of this section with respect to such predecessor shall be so reduced.

(3) *Effective date.* This paragraph (e) disallows or reduces the net operating loss carryovers of a member as a result of a transaction to which old section 382 (as defined in §1.382–2T(f)(21)) applies. See §1.1502–21T(d)(2) for the rule that applies the principles of this paragraph (e) in consolidated return years beginning on or after January 1, 1997, with respect to such a transaction.

(f) *Consolidated net operating loss.* The consolidated net operating loss shall be determined by taking into account the following:

(1) The separate taxable income (as determined under §1.1502–12) of each member of the group, computed without regard to any deduction under section 242;

(2) Any consolidated capital gain net income (net capital gain for taxable years beginning before January 1, 1977);

(3) Any consolidated section 1231 net loss;

(4) Any consolidated charitable contributions deduction;

(5) Any consolidated dividends received deduction (determined under §1.1502–26 without regard to paragraph (a)(2) of that section); and

(6) Any consolidated section 247 deduction (determined under §1.1502–27 without regard to paragraph (a)(1)(ii) of that section).

(g) *Groups that include insolvent financial institutions.* For rules applicable to relinquishing the entire carryback period with respect to losses attributable to insolvent financial institutions, see §301.6402–7 of this chapter.

(h) *Effective date.* Except as provided in §1.1502–21T (d)(1), (d)(2), and (g)(3), this section applies to consolidated return years beginning before January 1, 1997.

[T.D. 6894, 31 FR 11794, Sept. 8, 1966, as amended by T.D. 7728, 45 FR 72650, Nov. 3, 1980; T.D. 8387, 56 FR 67489, Dec. 31, 1991; T.D. 8446, 57 FR 53034, Nov. 6, 1992; T.D. 8677, 61 FR 33323, June 27, 1996. Redesignated and amended by T.D. 8677, 61 FR 33328, June 27, 1996]

§1.1502–22A Consolidated net capital gain or loss generally applicable for consolidated return years beginning before January 1, 1997.

(a) *Computation*—(1) *Consolidated capital gain net income.* The consolidated capital gain net income (net capital gain for taxable years beginning before January 1, 1977) for the taxable year shall be determined by taking into account:

(i) The aggregate of the capital gains and losses (determined without regard to gains or losses to which section 1231 applies or net capital loss carryovers or carrybacks) of the members of the group for the consolidated return year,

(ii) The consolidated section 1231 net gain for such year (computed in accordance with §§1.1502–23A or 1.1502–23T), and

(iii) The consolidated net capital loss carryovers or carrybacks to such year (as determined under paragraph (b) of this section).

(2) *Consolidated net capital loss.* The consolidated net capital loss shall be determined under subparagraph (1) of this paragraph but without regard to subdivision (iii) thereof.

(3) *Special rules.* For purposes of this section, capital gains and losses on intercompany transactions and transactions with respect to stock, bonds, and other obligations of a member of the group shall be reflected as provided in §§1.1502–13, and 1.1502–19, and capital losses shall be limited as provided in §§1.1502–15A and 1.1502-11(c).

(4) [Reserved]

(5) *Example.* The provisions of this paragraph may be illustrated by the following example:

Example. (i) Corporations P, S, and T file consolidated returns on a calendar year basis for 1966 and 1967. The members had the following transactions involving capital assets during 1967: P sold an asset with a $10,000 basis to S for $17,000 and none of the circumstances of restoration described in § 1.1502–13 occurred by the end of the consolidated return year; S sold an asset to individual A for $7,000 which S had purchased during 1966 from P for $10,000, and with respect to which P had deferred a gain of $2,000; T sold an asset with a basis of $10,000 to individual B for $25,000. The group has a consolidated net capital loss carryover to the taxable year of $10,000.

(ii) The consolidated net capital gain of the group is $4,000, determined as follows: P's net capital gain of $2,000, representing the deferred gain on the sale to S during the taxable year 1966, restored into income during taxable year 1967 (the $7,000 gain on P's deferred intercompany transaction is not taken into account for the current year), plus T's net capital gain of $15,000, minus S's net capital loss of $3,000 and the consolidated net capital loss carryover of $10,000.

(b) *Consolidated net capital loss carryovers and carrybacks*—(1) *In general.* The consolidated net capital loss carryovers and carrybacks to the taxable year shall consist of any consolidated net capital losses of the group, plus any net capital losses of members of the group arising in separate return years of such members, which may be carried to the taxable year under the principles of section 1212(a). However, such consolidated carryovers and carrybacks shall not include any consolidated net capital loss apportioned to a corporation for a separate return year pursuant to § 1.1502–79A(b) (or § 1.1502–22T(b), as appropriate) and shall be subject to the limitations contained in paragraphs (c) and (d) of this section. For purposes of section 1212(a)(1), the portion of any consolidated net capital loss for any taxable year attributable to a foreign expropriation capital loss is the amount of the foreign expropriation capital losses of all the members for such year (but not in excess of the consolidated net capital loss for such year).

(2) *Absorption rules.* For purposes of determining the amount, if any, of a net capital loss (whether consolidated or separate) which can be carried to a taxable year (consolidated or separate), the amount of such net capital loss which is absorbed in a prior consolidated return year under section 1212(a)(1) shall be determined by:

(i) Applying all net capital losses which can be carried to such prior year in the order of the taxable years in which such losses were sustained, beginning with the taxable year which ends earliest, and

(ii) Applying all such losses which can be carried to such prior year from taxable years ending on the same date on a prorata basis, except that any portion of a net capital loss attributable to a foreign expropriation capital loss to which section 1212(a)(1)(B) applies shall be applied last.

(c) *Limitation on net capital loss carryovers and carrybacks from separate return limitation years*—(1) *General rule.* In the case of a net capital loss of a member of the group arising in a separate return limitation year (as defined in paragraph (f) of § 1.1502–1) of such member (and in a separate return limitation year of any predecessor of such member), the amount that may be included under paragraph (b) of this section (computed without regard to the limitation contained in paragraph (d) of this section) shall not exceed the amount determined under subparagraph (2) of this paragraph.

(2) *Computation of limitation.* The amount referred to in subparagraph (1) of this paragraph with respect to a member of the group is the excess, if any, of:

(i) The consolidated capital gain net income (net capital gain for taxable years beginning before January 1, 1977) for the taxable year (computed without regard to any net capital loss carryovers and carrybacks), minus such consolidated capital gain net income (net capital gain for taxable years beginning before January 1, 1977) for the taxable year recomputed by excluding the capital gains and losses and the gains and losses to which section 1231 applies of such member, over

(ii) The net capital losses attributable to such member which can be carried to the taxable year arising in taxable years ending prior to the particular separate return limitation year.

(d) *Limitation on capital loss carryovers where there has been a consolidated return change of ownership*—(1) *General rule.* If a consolidated return change of ownership (as defined in paragraph (g) of §1.1502–1) occurs during the taxable year or an earlier taxable year, the amount which may be included under paragraph (b) of this section in the consolidated net capital loss carryovers to the taxable year with respect to the aggregate of the net capital losses attributable to old members of the group (as defined in paragraph (g)(3) of §1.1502–1) arising in taxable years (consolidated or separate) ending on the same day and before the taxable year in which the consolidated return change of ownership occurred shall not exceed the amount determined under subparagraph (2) of this paragraph.

(2) *Computation of limitation.* The amount referred to in subparagraph (1) of this paragraph shall be the excess of:

(i) The consolidated capital gain net income (net capital gain for taxable years beginning before January 1, 1977) (determined without regard to any net capital loss carryovers for the taxable year) recomputed by including only capital gains and losses and gains and losses to which section 1231 applies of the old members of the group, over

(ii) The aggregate net capital losses attributable to the old members of the group which may be carried to the taxable year arising in taxable years ending prior to the particular loss year or years.

(3) *Cross-reference.* See §1.1502–22T(d) for the rule that applies the principles of this paragraph (d) in consolidated return years beginning on or after January 1, 1997, with respect to a consolidated return change of ownership occurring before January 1, 1997.

(e) *Effective date.* This section applies to any consolidated return years to which §1.1502–21T(g) does not apply. See §1.1502–21T(g) for effective dates of that section.

[T.D. 6894, 31 FR 11794, Sept. 8, 1966, as amended by T.D. 7728, 45 FR 72650, Nov. 3, 1980; T.D. 8597, 60 FR 36679, July 18, 1995; T.D. 8677, 33323, June 27, 1996. Redesignated and amended by T.D. 8677, 61 FR 33333, June 27, 1996]

§1.1502–23A Consolidated net section 1231 gain or loss generally applicable for consolidated return years beginning before January 1, 1997.

(a) The consolidated section 1231 net gain or loss for the taxable year shall be determined by taking into account the aggregate of the gains and losses to which section 1231 applies of the members of the group for the consolidated return year. Section 1231 gains and losses on intercompany transactions shall be reflected as provided in §1.1502–13. Section 1231 losses that are ‘‘built-in deductions’’ shall be subject to the limitations of §§1.1502–21A(c) and 1.1502–22A(c), as provided in §1.1502–15A(a) (or §§1.1502–21T(c) and 1.1502–22T(c), as provided in §1.1502–15T(a), as appropriate).

(b) *Effective date.* This section applies to any consolidated return years to which §1.1502–21T(g) does not apply. See §1.1502–21T(g) for effective dates of that section.

[T.D. 7246, 38 FR 763, Jan. 4, 1973, as amended by T.D. 8677, 33323, June 27, 1996. Redesignated and amended by T.D. 8677, 61 FR 33334, June 27, 1996]

§1.1502–41A Determination of consolidated net long-term capital gain and consolidated net short-term capital loss generally applicable for consolidated return years beginning before January 1, 1997.

(a) *Consolidated net long-term capital gain.* The consolidated net long-term capital gain shall be determined by taking into account (1) those gains and losses to which §1.1502–22A(a) applies which are treated as long term under section 1222, and (2) the consolidated section 1231 net gain (computed in accordance with §1.1502–23A).

(b) *Consolidated net short-term capital loss.* The consolidated net short-term capital loss shall be determined by taking into account (1) those gains and losses to which §1.1502–22A(a) applies which are treated as short term under section 1222, and (2) the consolidated net capital loss carryovers and carrybacks to the taxable year (as determined under §1.1502–22A(b)).

(c) *Effective date.* This section applies to any consolidated return years to which §1.1502–21T(g) does not apply.

See §1.1502–21T(g) for effective dates of that section.

[T.D, 6894, 31 FR 11794, Sept. 8, 1966, as amended by T.D. 8677, 61 FR 33323, June 27, 1996. Redesignated and amended by T.D. 8677, 61 FR 33334, June 27, 1996]

§1.1502–79A Separate return years generally applicable for consolidated return years beginning before January 1, 1997.

(a) *Carryover and carryback of consolidated net operating losses to separate return years*—(1) *In general.* (i) If a consolidated net operating loss can be carried under the principles of section 172(b) and paragraph (b) of §1.1502–21A to a separate return year of a corporation (or could have been so carried if such corporation were in existence) which was a member in the year in which such loss arose, then the portion of such consolidated net operating loss attributable to such corporation (as determined under subparagraph (3) of this paragraph) shall be apportioned to such corporation (and any successor to such corporation in a transaction to which section 381(a) applies) and shall be a net operating loss carryover or carryback to such separate return year; accordingly, such portion shall not be included in the consolidated net operating loss carryovers or carrybacks to the equivalent consolidated return year. Thus, for example, if a member filed a separate return for the third year preceding a consolidated return year in which a consolidated net operating loss was sustained and if any portion of such loss is apportioned to such member for such separate return year, such portion may not be carried back by the group to its third year preceding such consolidated return year.

(ii) If a corporation ceases to be a member during a consolidated return year, any consolidated net operating loss carryover from a prior taxable year must first be carried to such consolidated return year, notwithstanding that all or a portion of the consolidated net operating loss giving rise to the carryover is attributable to the corporation which ceases to be a member. To the extent not absorbed in such consolidated return year, the portion of the consolidated net operating loss attributable to the corporation ceasing to be a member shall then be carried to such corporation's first separate return year.

(iii) For rules permitting the reattribution of losses of a subsidiary to the common parent in the case of loss disallowance or basis reduction on the disposition or deconsolidation of stock of the subsidiary, see §1.1502–20.

(2) *Nonapportionment to certain members not in existence.* Notwithstanding subparagraph (1) of this paragraph, the portion of a consolidated net operating loss attributable to a member shall not be apportioned to a prior separate return year for which such member was not in existence and shall be included in the consolidated net operating loss carrybacks to the equivalent consolidated return year of the group (or, if such equivalent year is a separate return year, then to such separate return year), provided that such member was a member of the group immediately after its organization.

(3) *Portion of consolidated net operating loss attributable to a member.* The portion of a consolidated net operating loss attributable to a member of a group is an amount equal to the consolidated net operating loss multiplied by a fraction, the numerator of which is the separate net operating loss of such corporation, and the denominator of which is the sum of the separate net operating losses of all members of the group in such year having such losses. For purposes of this subparagraph, the separate net operating loss of a member of the group shall be determined under §1.1502–12 (except that no deduction shall be allowed under section 242), adjusted for the following items taken into account in the computation of the consolidated net operating loss:

(i) The portion of the consolidated dividends received deduction, the consolidated charitable contributions deductions, and the consolidated section 247 deduction, attributable to such member;

(ii) Such member's capital gain net income (net capital gain for taxable years beginning before January 1, 1977) (determined without regard to any net capital loss carryover attributable to such member);

(iii) Such member's net capital loss and section 1231 net loss, reduced by the portion of the consolidated net capital loss attributable to such member (as determined under paragraph (b)(2) of this section); and

(iv) The portion of any consolidated net capital loss carryover attributable to such member which is absorbed in the taxable year.

(4) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example (1). (i) Corporation P was formed on January 1, 1966. P filed a separate return for the calendar year 1966. On March 15, 1967, P formed corporation S. P and S filed a consolidated return for 1967. On January 1, 1968, P purchased all the stock of corporation T, which had been formed in 1967 and had filed a separate return for its taxable year ending December 31, 1967.

(ii) P, S, and T join in the filing of a consolidated return for 1968, which return reflects a consolidated net operating loss of $11,000. $2,000 of such consolidated net operating loss is attributable to P, $3,000 to S, and $6,000 to T. Such apportionment of the consolidated net operating loss was made on the basis of the separate net operating losses of each member as determined under subparagraph (3) of this paragraph.

(iii) $5,000 of the 1968 consolidated net operating loss can be carried back to P's separate return for 1966. Such amount is the portion of the consolidated net operating loss attributable to P and S. Even though S was not in existence in 1966, the portion attributable to S can be carried back to P's separate return year, since S (unlike T) was a member of the group immediately after its organization. The 1968 consolidated net operating loss can be carried back against the group's income in 1967 except to the extent (i.e., $6,000) that it is apportioned to T for its 1967 separate return year and to the extent that it was absorbed in P's 1966 separate return year. The portion of the 1968 consolidated net operating loss attributable to T ($6,000) is a net operating loss carryback to its 1967 separate return.

Example (2). (i) Assume the same facts as in example (1). Assume further that on June 15, 1969, P sells all the stock of T to an outsider, that P and S file a consolidated return for 1969 (which includes the income of T for the period January 1 through June 15), and that T files a separate return for the period June 16 through December 31, 1969.

(ii) The 1968 consolidated net operating loss, to the extent not absorbed in prior years, must first be carried to the consolidated return year 1969. Any portion of the $6,000 amount attributable to T which is not absorbed in T's 1967 separate return year or in the 1969 consolidated return year shall then be carried to T's separate return year ending December 31, 1969.

(b) *Carryover and carryback of consolidated net capital loss to separate return years*—(1) *In general.* If a consolidated net capital loss can be carried under the principles of section 1212(a) and paragraph (b) of §1.1502–22A to a separate return year of a corporation (or could have been so carried if such corporation were in existence) which was a member of the group in the year in which such consolidated net capital loss arose, then the portion of such consolidated net capital loss attributable to such corporation (as determined under subparagraph (2) of this paragraph) shall be apportioned to such corporation (and any successor to such corporation in a transaction to which section 381(a) applies) under the principles of paragraph (a) (1), (2) and (3) of this section and shall be a net capital loss carryback or carryover to such separate return year.

(2) *Portion of consolidated net capital loss attributable to a member.* The portion of a consolidated net capital loss attributable to a member of a group is an amount equal to such consolidated net capital loss multiplied by a fraction, the numerator of which is the net capital loss of such member, and the denominator of which is the sum of the net capital losses of those members of the group having net capital losses. For purposes of this subparagraph, the net capital loss of a member of the group shall be determined by taking into account the following:

(i) Such member's capital gain net income (net capital gain for taxable years beginning before January 1, 1977) or loss (determined without regard to any net capital loss carryover or carryback); and

(ii) Such member's section 1231 net loss, reduced by the portion of the consolidated section 1231 net loss attributable to such member.

(c) through (e) [Reserved]

(f) *Effective date.* Paragraphs (a) and (b) of this section apply to losses arising in consolidated return years to which §1.1502–21T(g) does not apply. For this purpose net operating loss deductions, carryovers, and carrybacks arise in the year from which they are carried. See § 1.1502–21T(g) for effective dates of that section.

[T.D. 8677, 61 FR 33334, June 27, 1996]

DUAL CONSOLIDATED LOSSES INCURRED IN TAXABLE YEARS BEGINNING BEFORE OCTOBER 1, 1992

§ 1.1503–2A Dual consolidated loss.

(a) *In general.* This section applies for purposes of determining whether and to what extent the net operating loss of a dual resident corporation incurred in tax years beginning after December 31, 1986, shall be allowed to reduce the taxable income of any other member of the affiliated group. Except as provided in paragraph (c) of this section, any dual consolidated loss of a domestic corporation incurred in taxable years beginning after December 31, 1986, cannot reduce the taxable income of any affiliate of such domestic corporation for that or any other taxable year, regardless of whether those losses offset income of another corporation under the income tax laws of the foreign country and regardless of whether any of the income of any corporation that the loss may reduce in the foreign country is, has been, or will be subject to tax in the United States. This rule shall also apply to preclude the use of a dual consolidated loss to offset any income of an affiliate (whether or not an election to file a consolidated return has been made) by means of a transaction subject to section 381 of the Code. For purposes of the preceding sentence, an ‘‘affiliate’’ means any member of the affiliated group as determined under section 1504(a) without regard to the exceptions contained in section 1504(b) (other than section 1504(b)(3)) relating to includible corporations. Further, this rule shall also apply to preclude the use of a dual consolidated loss of a separate unit by a domestic corporation upon or as a result of the termination, liquidation, or sale of the separate unit. The following example illustrates the application of this paragraph (a).

Example. P, a domestic corporation, owns all of the outstanding stock of DRC, a domestic corporation. DRC is managed and controlled in Country W, a country which determines the tax residence of corporations according to place of management and control. Therefore, the income of DRC is subject to tax in both the United States and in Country W. There are currently no other corporations in Country W which could use the losses of DRC to offset income under the income tax laws of Country W. P no longer wishes to operate DRC as a separate corporation. Therefore DRC will be liquidated into P under section 332 of the Code. Normally, P, under section 381, would succeed to and take into account DRC’s net operating loss carryovers. However, this paragraph (a) prohibits the net operating loss of DRC from reducing P’s income (including income of P generated by assets previously held by DRC) for U.S. tax purposes. Therefore, DRC’s net operating loss carryovers will not be available to offset P’s income unless one of the exceptions described in paragraph (c) of this section applies.

(b) *Definitions.* The following definitions apply for purposes of this section.

(1) *Domestic corporation.* For purposes of this section, the term ‘‘domestic corporation’’ has the meaning assigned to it by sections 7701 (a)(3) and (a)(4) and shall also include any corporation treated as a domestic corporation by the Internal Revenue Code, including, but not limited to, section 269B and section 1504(d). Subject to the rules of paragraph (d) of this section, any separate unit (as defined in paragraph (b)(4) of this section) of a domestic corporation will be treated as a separate domestic corporation (and as a dual resident corporation) for purposes of this section. The following example illustrates the application of this paragraph (b)(1).

Example. A is a domestic corporation with a branch operation in Country X. A is owned by FP, a Country X corporation. Country X allows the Country X branch income and losses of A to be used to offset FP’s losses or income. Under paragraph (d) of this section, the branch operations of A in Country X will be treated as a separate domestic corporation and as a dual resident corporation for purposes of this section. See paragraph (d) of this section for the treatment of any dual consolidated loss of the branch operations of A.

(2) *Dual consolidated loss.* The term ‘‘dual consolidated loss’’ means the net operating loss (as defined in section 172(c) and the regulations thereunder) of a domestic corporation incurred in a year in which the corporation is a dual resident corporation. The fact that a

particular item taken into account in computing such net operating loss deduction is not taken into account in computing income subject to income tax in a foreign country shall not cause such item to be excluded from the calculation of the dual consolidated loss. A dual consolidated loss shall arise even though no other person, corporation, or entity is permitted, under the income tax laws of the foreign country, to use by any means the losses, expenses or deductions of the dual resident corporation to offset income. A dual consolidated loss shall not include—

(i) The net operating loss incurred during that portion of the taxable year prior to the date on which the domestic corporation becomes a dual resident corporation or subsequent to the date on which the domestic corporation ceases to be a dual resident corporation. For purposes of determining the amount of the net operating loss incurred in that portion of the taxable year prior to the date on which the domestic corporation becomes a dual resident corporation or subsequent to the date on which the domestic corporation ceases to be a dual resident corporation, in no event shall more than a pro rata portion of the net operating loss commensurate with the portion of the taxable year during which the domestic corporation was not a dual resident corporation be allocated to that portion of the taxable year in which the domestic corporation was not a dual resident corporation; or

(ii) Losses incurred in taxable years beginning on or before December 31, 1986.

(3) *Dual resident corporation.* For purposes of this section, a domestic corporation shall be a dual resident corporation if the worldwide income of such corporation is subject to the income tax of a foreign country, or such corporation is subject to the income tax of a foreign country on a residence basis (and not on a source basis).

(4) *Separate unit.* Solely for purposes of this section, the term ''separate unit'' shall mean any of the following:

(i) A foreign branch as defined in §1.367 (a)–6T(g);

(ii) A partnership interest; or

(iii) A trust interest.

(5) *Subject to tax.* For purposes of determining whether a domestic corporation is subject to the income tax of a foreign country on its income, the fact that the corporation has no actual tax liability to the foreign country for a particular taxable year shall not be taken into consideration.

(c) *Exceptions*—(1) *No ability to use dual consolidated loss under foreign law*—(i) *In general.* Paragraph (a) of this section shall not apply to a dual consolidated loss if—

(A) At no time after December 31, 1986, has there been any other person, corporation, or entity which, under the income tax laws of the foreign country, is permitted to use by any means the losses, expenses, or deductions of the dual resident corporation to offset income; and

(B) Under the income tax laws of the foreign country, the losses, expenses, or deductions of the dual resident corporation incurred in taxable years beginning after December 31, 1986, cannot be carried over or back to be used, by any means, to offset the income of any other person, corporation, or entity in other years.

(ii) *Limitations.* For purposes of paragraph (c)(1)(i) of this section, none of the following circumstances shall constitute a satisfaction of paragraph (c)(1)(i)(A) of this section—

(A) The failure to make use of an election (including, but not limited to, the ability to surrender losses, expenses or deductions) that would enable another person, corporation, or entity to use the losses, expenses, or deductions of the dual resident corporation to offset income under the income tax laws of the foreign country;

(B) The fact that the income tax laws of the foreign country deny the use of losses, expenses, or deductions of its corporate residents that are also residents for tax purposes of another country to offset income of another person, corporation, or entity;

(C) The fact that the other person, corporation, or entity does not have sufficient income to benefit from an offset permitted under the income tax laws of the foreign country for a particular taxable year; or

(D) The fact that the dual resident corporation has no losses, expenses, or deductions during a particular taxable year.

(iii) *Examples.* The following examples illustrate this paragraph (c)(1).

Example (1). DRC, a domestic corporation, is also subject to tax in Country Y on its worldwide income. DRC has been filing a consolidated return for U.S. income tax purposes with DP, its domestic parent. DRC has also been able to use its losses to offset income of its affiliates in Country Y by using Country Y's form of consolidation. In order to prevent companies like DRC from taking losses against income of affiliates under Country Y law and then again using the losses of DRC to offset income of affiliates for U.S. tax purposes. Country Y law prevents a company which is also subject to tax on its worldwide income in another country, or is subject to tax on a residence basis in another country, from using the Country Y form of consolidation. DRC is a dual resident corporation as defined in paragraph (b)(3) of this section. DRC's losses are dual consolidated losses as defined in paragraph (b)(2) of this section which under paragraph (a) of this section may not be used to offset income of any other U.S. affiliate of DRC. The Country Y statute does not cause the exception provided by this paragraph (c)(1) to apply.

Example (2). P, a domestic corporation, owns DRC, a domestic corporation which is also subject to the income tax laws of Country Z on a residence basis, and FS, a Country Z corporation. Under Country Z laws, income or losses of DRC may not be consolidated with income or losses of P or FS. There is, however, a provision under Country Z's law by which DRC's unused losses could be carried forward, acquired, and used by FS if DRC is merged into FS. DRC's dual consolidated loss does not qualify for the exception from application of paragraph (a) provided by this paragraph (c)(1) because of the loss carryforward provisions under Country Z's income tax laws. However, DRC may qualify for an exemption from paragraph (a) of this section under the provisions of paragraph (c)(3) of this section.

Example (3). DRC is a dual resident corporation subject to tax on a residence basis in foreign country Y. Under the income tax laws of Y, DRC could elect to use its losses to offset the income of foreign entity FE on a Country Y consolidated income tax return for the taxable year ending December 31, 1987. Regardless of whether such election is made, DRC fails to satisfy the requirement of paragraph (c)(1)(i)(A) of this section.

Example (4). The same facts apply as in *Example* (3), except that Country Y changes its income tax law, effective as of January 1, 1987, to prevent the consolidation of losses by dual resident corporations. Under paragraph (c)(1)(ii)(B) of this section, the fact that this Country Y legislation prevents DRC from using its losses to offset the income of FE is disregarded and DRC fails to satisfy the requirement of paragraph (c)(1)(i)(A) of this section.

Example (5). The same facts apply as in *Example* (4), except that FE has no taxable income in taxable years 1987 through 1989. Moreover, DRC is profitable throughout this period and consequently has no losses which it could share with FE. Under paragraphs (c)(1)(ii) (C) and (D) of this section, the fact that FE would not receive a tax benefit from consolidation with DRC on a Country Y return is disregarded and DRC fails to satisfy the requirement of paragraph (c)(1)(i)(A) of this section. Because DRC does not have a net operating loss during 1987 through 1989, section 1503(d) does not affect the consolidation of DRC on a U.S. return for these years. However, DRC's failure to satisfy paragraph (c)(1)(i)(A) of this section at all times after December 31, 1986 will make it ineligible for the exception described in paragraph (c)(1) of this section with respect to any future taxable year in which it incurs a net operating loss.

Example (6). The same facts apply as in *Example* (5). In 1990, FE is transferred and is no longer eligible for consolidation on a Country Y return. There are no other entities with which DRC could consolidate under the income tax laws of Y. Nevertheless, since FE and DRC could have consolidated on a Country Y return during the period after December 31, 1986 and before the transfer of FE, DRC fails to satisfy the requirement of paragraph (c)(1)(i)(A) of this section in 1990 and in all future taxable years.

(2) *Elective agreement in place between United States and the foreign country.* Paragraph (a) of this section shall not apply to a dual consolidated loss to the extent such loss is subject to an election by the dual resident corporation to deduct the loss in the United States pursuant to an agreement entered into between the United States and the foreign country which puts into place an elective procedure through which losses would offset income in only one country.

(3) *Agreement to amend returns upon later use of losses, expenses, or deductions of a dual resident corporation*—(i) *In general.* Notwithstanding that, under the income tax laws of the foreign country, the losses, expenses, or deductions of the dual resident corporation can be carried over or back to offset, by some means, the income of any other person, corporation, or entity in other taxable years, paragraph (a) of this section shall not apply to a dual consolidated

loss of that dual resident corporation if the requirements described in this paragraph (c)(3)(i) are satisfied.

(A) At no time after December 31, 1986, has there been any other person, corporation, or entity which, under the income tax laws of the foreign country, is permitted to use by any means the losses, expenses, or deductions of the dual resident corporation to offset income. For purposes of the preceding sentence, none of the circumstances described in paragraphs (c)(1)(ii) (A) through (D) of this section shall constitute a satisfaction of this paragraph (c)(3)(i)(A).

(B) The affiliated group or, if there is no affiliated group filing a consolidated return, the dual resident corporation which incurs the loss, files with its U.S. tax return for the taxable year in which the dual consolidated loss arises a binding agreement described in paragraphs (c)(3) (ii) and (iii) of this section. The agreement must be filed under this paragraph (c)(3) even if the only effect of the dual consolidated loss is to increase a net operating loss for U.S. tax purposes.

(ii) *Description of agreement.* Except as otherwise provided in paragraph (c)(3)(viii) of this section, the agreement described in this paragraph (c)(3)(ii) must be attached to, and filed by the due date (including extensions) of, the tax return of the affiliated group or dual resident corporation for the taxable year in which the dual consolidated loss arises. The agreement must be signed under penalties of perjury by the person who signs the tax return of the group or dual resident corporation. The agreement must include the following items, in paragraphs labeled to correspond with the subdivisions set forth below:

(A) The name, address, identifying number, and place and date of incorporation of the dual resident corporation and the country or countries which tax the dual resident corporation on a residence basis or which tax the worldwide income of the dual resident corporation;

(B) A statement that the document submitted constitutes the agreement of the affiliated group or dual resident corporation in accordance with the requirements of §1.1503–2T(c)(3);

(C) A statement of the amount of the dual consolidated loss to be covered by the agreement and the year in which it arose;

(D) The agreement of the group or dual resident corporation to amend returns, as described in paragraph (c)(3)(iii) of this section;

(E) A waiver of the period of limitations, as described in paragraph (c)(3)(iv) of this section; and

(F) An agreement to file with the tax returns of the group or dual resident corporation for each of the fifteen years following the year the dual consolidated loss arose a waiver of the period of limitation, as described in paragrapah (c)(3)(iv) of this section, and a certification as described in paragraph (c)(3)(v) of this section.

(iii) *Terms of agreement.* The affiliated group or dual resident corporation must agree that if there is a ‘‘triggering event’’ described in this paragraph (c)(3)(iii), then, the affiliated group filing a consolidated return, or if there is no affiliated group filing a consolidated return, the dual resident corporation, shall, within 90 days after the date of occurrence of the triggering event, file an amended U.S. income tax return for the taxable year in which the dual consolidated loss arose reporting the dual consolidated loss on the amended return as a loss to which paragraph (a) of this section applies. An amended U.S. income tax return must also be filed for any other taxable year in which the tax liability increases as a result of such applications of paragraph (a) of this section. In addition, upon examination, the group or dual resident corporation must provide to the District Director a schedule of the amended carryforward and carryback losses and credits for each of the group's or dual resident corporation's taxable years for which no amended return is required to be filed pursuant to this paragraph (c)(3)(iii). For purposes of section 6601, the last date prescribed for payment of the additional amount of tax shown on an amended return filed pursuant to this paragraph (c)(3)(iii) shall be the same date as the date prescribed for the payment of tax for the taxable year with respect to which the amended return is filed. Any of the following events shall constitute a ‘‘triggering event’’ for purposes of this section—

(A) There is a failure for any taxable year to file the annual waiver or certification described in paragraphs (c)(3)(iv) and (v) of this section.

(B) Prior to the close of the fifteenth taxable year following the taxable year in which the dual consolidated loss arose, any of the following events—

(*1*) There is a failure to satisfy both the requirement of paragraph (c)(3)(i)(A) of this section and the requirements of paragraph (c)(4) of this section;

(*2*) Where the agreement is made by an affiliated group filing a consolidated return, the dual resident corporation (or its successor-in-interest) ceases to be a member of the affiliated group;

(*3*) Where the agreement is made by a dual resident corporation that is not a member of an affiliated group filing a consolidated return, the dual resident corporation is no longer in existence; or

(*4*) Where the dual resident corporation is a separate unit of a domestic corporation, the domestic corporation sells or transfers the dual resident corporation.

(iv) *Waiver of period of limitation.* The affiliated group or the dual resident corporation (or the successor-in-interest of such group or dual resident corporation) must file, with the agreement to amend returns and with the tax return for each of the fifteen taxable years following the taxable year in which the dual consolidated loss arose, a waiver of the limitation on assessment of any tax resulting from the amendment of any return as described in paragraph (c)(3)(iii) of this section. The waiver shall extend the period for assessment of such tax to a date not earlier than three years after the return is filed for the fifteenth taxable year following the taxable year in which the dual consolidated loss arose. The waiver shall also contain such other terms with respect to assessment as may be considered by the Commissioner to be necessary to insure the assessment and collection of the correct tax liability for each year for which the waiver is required. The waiver must be signed by a person authorized to sign the agreement described in paragraph (c)(3)(ii) of this section. A failure, at any time, to comply with the requirements of this paragraph (c)(3) or with the terms of any agreement filed pursuant to this paragraph (c)(3) shall extend the period of assessment of such tax until three years after the date on which the Internal Revenue Service receives actual notice of the use of or of the ability to use the losses, expenses, or deductions of the dual resident corporation to offset the income of another person, corporation, or entity under the income tax laws of the foreign country.

(v) *Annual certification.* The affiliated group or the dual resident corporation (or the successor-in-interest of such group or dual resident corporation) must file with its income tax return for each of the fifteen taxable years following the taxable year in which the dual consolidated loss arose a certification that the losses, expenses, or deductions of the dual resident corporation were not used or permitted to be used to offset the income of another person, corporation, or entity under the income tax laws of a foreign country. The annual certification pursuant to this paragraph (c)(3)(v) must be signed under penalties of perjury by a person authorized to sign the agreement described in paragraph (c)(3)(ii) of this section. The certification must identify the dual consolidated loss with respect to which it is given by setting forth the taxpayer’s year in which the loss arose and the amount of such loss and must warrant that arrangements have been made to insure that the group or dual resident corporation will be informed of any subsequent use of or ability to use the losses, expenses, or deductions of the dual resident corporation to offset the income of another person, corporation, or entity under the income tax laws of the foreign country. If dual consolidated losses of more than one taxable year are subject to the rules of this paragraph (c)(3), the certifications for those years may be combined in a single document, but each dual consolidated loss must be separately identified.

(vi) *Special rules for a succeeding group or a successor-in-interest*—(A) *Ceasing to be a member of the affiliated group.* For purposes of this paragraph (c)(3), and except as otherwise provided in this paragraph (c)(3)(vi), a dual resident corporation shall be deemed to have ceased to be a member of the affiliated group that filed the agreement described in paragraph (c)(3)(ii) of this section if it is no longer a member of that group, as defined in §1.1502–1(b), or if the group ceases to exist because the common parent is no longer in existence or is no longer a common parent or the group no longer files on the basis of a consolidated return. However, the obligation to file an amended return pursuant to the agreement described in paragraph (c)(3)(ii) of this section shall not apply and the dual resident corporation shall not be deemed to have ceased to be a member of the group for purposes of this paragraph (c)(3) where the dual resident corporation ceases to be a member of the group solely by reason of an acquisition of its assets by a member of the group in a transaction to which section 381(a) applies provided the successor-in-interest of the dual resident corporation continues to be a member of the group.

(B) *Special rules for a succeeding group.* The obligation to file an amended return pursuant to the agreement described in paragraph (c)(3)(ii) of this section shall not apply where the dual resident corporation becomes a member of a succeeding group as a result of an acquisition described in §1.1502–13(f)(2)(i) (*a*) or (*b*) (relating generally to the acquisition of assets of, by, or from a member of the affiliated group in a tax-free reorganization) and the succeeding group attaches to, and files with, its timely filed (including extensions) tax return for the taxable year in which the acquisition takes place a binding agreement—

(*1*) Which sets forth the same terms as are described in paragraph (c)(3)(ii) of this section,

(*2*) In which the group agrees to be bound by the terms of the agreement previously filed by the terminating group, and

(*3*) In which the group agrees to all the terms set forth in paragraph (c)(3)(iii) of this section.

The agreement must be signed under penalties of perjury by the person who signs the tax return of the succeeding group.

(C) *Special rules for a successor-in-interest.* In the case of a dual resident corporation that was not a member of an affiliated group filing a consolidated return in the taxable year in which the dual consolidated loss arose and that filed an agreement described in paragraph (c)(3)(ii) of this section, the assets of which are acquired in a transaction described in section 381(a), such corporation shall not be required to file an amended return pursuant to paragraph (c)(3)(iii)(B)(*3*) of this section provided its successor-in-interest attaches a binding agreement to its timely filed (including extensions) tax return for the taxable year in which the acquisition takes place. The agreement must be signed under penalties of perjury by the person who signs the tax return of the successor-in-interest. The agreement must:

(*1*) Set forth the same terms as are described in paragraph (c)(3)(ii) of this section,

(*2*) State the agreement of the successor-in-interest to be bound by the terms of the agreement previously filed by the dual resident corporation, and

(*3*) State the agreement of the successor-in-interest to all the terms set forth in paragraph (c)(3)(iii) of this section.

(vii) *Definitions.* For purposes of this section—

(A) The terms *succeeding group* and *terminating group* shall have the same meaning as in §1.1502.13(f)(2)(i); and

(B) The term *successor-in-interest* shall mean an acquiring corporation that succeeds to the tax attributes of an acquired corporation under the provisions of section 381 by reason of a transaction described in section 381(a).

(viii) *Transition rules.* An affiliated group or a dual resident corporation (or a succeeding group or a successor-in-interest of a dual resident corporation) that meets the eligibility requirements described in paragraph (c)(3)(ix) of this section will be permitted to apply the transition rules in this paragraph (c)(3)(viii) for taxable years ending before December 31, 1989.

(A) The agreement in satisfaction of paragraph (c)(3) (ii) or (vi) of this section may be attached to the timely filed (including extensions) tax return of the affiliated group or of the dual resident corporation (or the succeeding group or the successor-in-interest of such dual resident corporation) for the first taxable year which ends on or after December 31, 1989. The agreement required for each of the taxable years ending before December 31, 1989 and for the first taxable year ending on or after December 31, 1989 may be combined on a single document.

(B) The requirement of paragraphs (c)(3)(iv) and (c)(3)(v) of this section regarding the filing of an annual waiver of the period of limitation and certification shall be satisfied for the taxable years ending before December 31, 1989, and no failure to file shall be deemed to have occurred with respect to such taxable years for purposes of paragraph (c)(3)(iii)(A) of this section if the waivers and certifications required under paragraphs (c)(3)(iv) and (c)(3)(v) of this section are filed with the tax return for the first taxable year ending on or after December 31, 1989.

(ix) *Eligibility for transition rules.* The rules in paragraph (c)(3)(viii) of this section shall apply only if, as of the date of the agreement in satisfaction of paragraph (c)(3) (ii) or (vi) of this section and filed pursuant to paragraph (c)(3)(viii) of this section, none of the triggering events described in paragraph (c)(3)(iii)(B) of this section has occurred.

(4) *No ability to use dual consolidated loss under foreign law after restructuring*—(i) *In general.* Notwithstanding that a dual resident corporation fails to satisfy either paragraph (c)(1)(i)(A) or (c)(3)(i)(A) of this section, paragraph (a) of this section shall not apply to any dual consolidated loss (or portion of a dual consolidated loss) described in paragraph (c)(4)(iii) of this section provided the requirements of either paragraph (c)(1)(i)(B) or (c)(3)(i)(B) of this section are satisfied and a restructuring that meets the requirements of paragraph (c)(4)(ii) of this section has been completed.

(ii) *Qualified restructuring.* A restructuring meets the requirements of this paragraph (c)(4)(ii) if it is completed on or before December 31, 1989, in the foreign country so that at all times from the date of such restructuring to the close of the taxable year in which the dual consolidated loss arises, there is no other person, corporation, or entity which, under the income tax laws of the foreign country, is permitted to use by any means the losses, expenses, or deductions of the dual resident corporation to offset income. For purposes of the preceding sentence, none of the circumstances described in paragraphs (c)(1)(ii) (A) through (D) of this section shall constitute a satisfaction of this paragraph (c)(4)(ii).

(iii) *Qualified losses.* Losses to which paragraph (c)(4)(i) of this section applies are the dual consolidated losses of a dual resident corporation that arise in a taxable year beginning after the restructuring described in paragraph (c)(4)(ii) of this section (or the portion of any dual consolidated loss that arises during that portion of the taxable year following the restructuring described in paragraph (c)(4)(ii) of this section). For purposes of determining the amount of the dual consolidated loss which arises in that portion of the taxable year following the restructuring, in no event shall more than a pro rata portion of the dual consolidated loss commensurate with the portion of the taxable year beginning with the date of completion of the restructuring and ending on the last day of that same taxable year be allocated to that portion of the taxable year following the restructuring.

(d) *Special rule for separate units*—(1) *Separate units characterized as corporations under foreign law.* If a separate unit of a domestic corporation consists of an interest in an entity (including a foreign branch) that for U.S. tax purposes is not taxable as an association, but the entity is subject to income tax in a foreign jurisdiction as a corporation either on its worldwide income or on a residence basis (and not on a source basis), then for purposes of this section such separate unit of the domestic corporation will be treated as if it were a dual resident corporation and a wholly-owned domestic subsidiary of the domestic corporation. For purposes of paragraphs (c) (3) and (4) of this section, any agreement, waiver and certification required to be filed with respect to such dual resident corporation shall be filed with the federal income tax return of the domestic corporation owning the separate unit or by the affiliated group with which the domestic corporation files a consolidated return.

(2) *Other separate units.* Except as provided in paragraph (d)(3) of this section, if a separate unit of a domestic corporation (other than a separate unit described in paragraph (d)(1) of this section) is permitted under the income tax laws of a foreign country—

(i) To use its losses, expenses, or deductions to offset the income of any other person, corporation, or entity in the taxable year in which the dual consolidated loss arises; or

(ii) To carry over or back its losses, expenses, or deductions so that they may offset the income of any other person, corporation, or entity in other years, then such separate unit will be treated for purposes of this section as if it were a dual resident corporation and a wholly-owned domestic subsidiary of the domestic corporation. For purposes of the preceding sentence, none of the circumstances described in paragraphs (c)(1)(ii) (A) through (D) of this section shall preclude a separate unit from being treated as a dual resident corporation and a separate domestic corporation under this paragraph (d)(2). This paragraph (d)(2) applies regardless of whether the domestic corporation is a member of an affiliated group, and, if it is, regardless of whether the group files a consolidated return.

(3) *Certification.* Paragraph (d)(2) of this section shall not apply with respect to any taxable year for which the domestic corporation owning the separate unit (or the affiliated group of which the domestic corporation is a member) files a certification as described in this paragraph (d)(3). The certification must be attached to, and filed by the due date (including extensions) of, the federal income tax return of the domestic corporation owning the separate unit (or the affiliated group with which the domestic corporation files a consolidated return) for the taxable year to which it applies. With respect to returns filed without an attached certification for taxable years ending before December 31, 1989, the certification in satisfaction of this paragraph (d)(3) may be attached to the return for the first taxable year ending on or after December 31, 1989. The certification must be signed under penalties of perjury by the person who signs the return. The certification must include the following items, in paragraphs labeled to correspond with the subdivisions set forth below:

(i) A statement that the document submitted constitutes the certification required under the provisions of §1.1503–2T(d)(3);

(ii) Identification of the separate unit, including the name under which it conducts business and its principal activity;

(iii) Identification of the total losses, expenses, and deductions incurred by the separate unit and included on the tax return for the taxable year;

(iv) Certification that no portion of the separate unit's losses, expenses or deductions identified above has been or will be used to offset the income of any other person, corporation, or entity under the income tax laws of the foreign country; and

(v) An agreement to comply with the recapture and interest charge requirements of paragraph (d)(4) of this section.

If the domestic corporation has more than one separate unit, the certification described above may be made on a single document, but the total losses, expenses, and deductions must be separately identified for each separate unit to which the certification applies.

(4) *Recapture upon subsequent use.* If in any taxable year any portion of the losses, expenses, or deductions of a separate unit which were the subject of a certification filed under paragraph (d)(3) of this section are used by any means to offset the income of any other person, corporation, or entity under the income tax laws of a foreign country, then the total amount of the dual consolidated loss shall be recaptured and reported as income on the tax return of the domestic corporation (or the affiliated group with which the domestic corporation files a consolidated return) for the taxable year that includes the last day of the taxable year for foreign tax purposes during which such use occurred. In addition, the domestic corporation owning the separate unit (or the affiliated group

with which the domestic files a consolidated return) shall pay an interest charge on the amount of additional tax owed as a result of the recapture described in the preceding sentence. Such interest shall be determined under the rules of section 6601(a) as if the additional amount of tax had accrued and been due and owing for the taxable year in which the losses, expenses, or deductions giving rise to the recapture gave rise to a tax benefit for U.S. income tax purposes. For purposes of this paragraph (d)(4), a tax benefit will be considered to have arisen in a taxable year in which a loss that would have been considered a dual consolidated loss if paragraph (d)(3) of this section had not applied has reduced the U.S. income tax liability of the domestic corporation or of the affiliated group with which it files a consolidated return.

(5) *Treatment of separate units as separate entities*—(i) *In general.* A separate unit of a domestic corporation will be treated as a separate entity for purposes of determining under this section whether losses of one entity are permitted under the income tax laws of the foreign country to offset the income of another entity.

(ii) *Exception for separate units in same country.* If two or more separate units (not described in paragraph (d)(1) of this section) located in the same foreign country are owned by a single domestic corporation and the income and losses of such units are consolidated on an income tax return in that foreign country, then the separate units will be treated as one separate unit for purposes of paragraph (d)(2) of this section.

(6) *Examples.* The following examples illustrate this paragraph (d).

Example (1). X, a member of a U.S. affiliated group, has a foreign branch (as defined in § 1.367(a)–6T(g)) in Country Y. Under the Country Y income tax laws, the branch will be taxed as a permanent establishment and its income and losses may be used (on an elective basis) in the Country Y form of consolidation to offset the income of Z, an affiliate of X, under Country Y law. The branch of X incurs a net operating loss during the taxable year ending December 31, 1987. The foreign branch of X will be treated as a separate domestic corporation and a dual resident corporation under paragraph (d)(2) of this section, and its net operating loss will constitute a dual consolidated loss. Consequently, under paragraph (a) of this section, the branch's net operating loss may not be used to offset the income of any other U.S. affiliate or any income of X other than income derived from the branch operations. However, the branch will not be treated as a dual resident corporation if X (or the affiliated group of which X is a member) files a certification for the taxable year as described in paragraph (d)(3) of this section that its net operating loss was not in fact used by Z (or any other entity) to offset income under the Country Y income tax laws, and that such loss will be recaptured if it is so used in the future.

Example (2). X is classified as a partnership for U.S. tax purposes under Code section 7701 and applicable regulations. A, B and C are the sole partners of X. A and B are domestic corporations and C is a resident of foreign country Y. Under Country Y's law, X is classified as a corporation and its income and losses may be used in the Country Y form of consolidation to offset the income of the companies that are affiliates of X. X generates net operating losses. The partnership interests held by A and B are each treated as separate domestic corporations and dual resident corporations under paragraph (d)(1) of this section. A's and B's pro rata share of the losses of X are dual consolidated losses as defined in paragraph (b)(2) of this section. Under paragraph (a) of this section, the losses of X may not be used to offset the income of any other U.S. affiliate. A's pro rata share of losses of X may be used by A only to offset A's pro rata share of income of X. However, paragraph (a) of this section shall not apply to A's pro rata share of losses of X if A meets one of the exceptions described in paragraph (c) of this section. The same principles apply to limit the use of losses allocated to B.

Example (3). Domestic corporation W owns two unincorporated business operations in Country Y. The two businesses, A and B, constitute separate foreign branches (as defined in § 1.367(a)–6T(g)). Under the tax laws of Country Y, A is treated as a separate corporation and taxed on a residence basis. Thus, A is a separate unit described in paragraph (d)(1) of this section. B is not a separate unit described in paragraph (d)(1) of this section. W is a calendar year taxpayer for both United States and Country Y purposes. During the calendar year ending December 31, 1987, A operated at a loss and B was profitable. Country Y allows both of W's branches to report their combined operations on a single income tax return. Thus, the losses incurred by A may be used on the 1987 Country Y return to offset the income of B. A will be treated as a dual resident corporation under paragraph (d)(1) of this section. Because A is a separate unit described in paragraph (d)(1) of this section, paragraph (d)(5)(i) of this section treats A and B as separate entities for purposes of determining whether the losses, expenses, or deductions of A may be used to offset the income of another person, corporation, or entity and the exception in paragraph (d)(5)(ii) of this section does not apply. Since the loss incurred by A may be used to offset B's income under foreign tax laws, W will not qualify for the exceptions described in paragraph (c) of this section. Accordingly, W will report the income from B on its 1987 U.S. tax return, but will not be allowed to use the losses from A to offset that income or the income from any source other than from the operations of A.

(e) *Special rule for use of dual consolidated loss to offset tainted income*—(1) *In general.* The dual consolidated loss of any dual resident corporation that ceases to be a dual resident corporation shall not be used to offset income of such corporation to the extent that such income is tainted income as defined in paragraph (e)(2) of this section.

(2) *Tainted income defined.* Tainted income is any income derived from tainted assets (as defined in paragraph (e)(3) of this section), during the period beginning on the date of the transfer or acquisition of tainted assets and ending at the close of the fifteenth taxable year following the taxable year in which the dual resident corporation ceased to be a dual resident corporation.

(3) *Tainted assets defined.* Tainted assets are any assets transferred to or acquired by a dual resident corporation in a non-recognition transaction (as defined in section 7701(a)(45)) at any time during the three taxable years immediately preceding the taxable year in which such dual resident corporation ceased to be a dual resident corporation or at any time during the 15 taxable years immediately following the taxable year in which a dual resident corporation ceased to be a dual resident corporation. Tainted assets shall not include assets that were transferred to or acquired by such dual resident corporation on or before December 31, 1986.

(4) *Exception.* For assets transferred to or acquired by a dual resident corporation prior to the time it ceased to be a dual resident corporation, if it can be shown that, for the year in which assets were transferred to or acquired by such corporation, the corporation did not incur a dual consolidated loss (or carry forward a dual consolidated loss to such year) and that there was a valid business reason for the transfer or acquisition of such assets, the income derived from such assets shall not be subject to the limitation described in paragraph (e)(1) of this section.

(f) *Special rules for accounting for dual consolidated losses*—(1) *Determination of amount of dual consolidated loss*—(i) *Dual resident corporation that is a member of an affiliated group.* For purposes of determining whether a dual resident corporation that is a member of an affiliated group filing a consolidated return has a dual consolidated loss for the taxable year, the dual resident corporation shall compute its taxable income (or loss) in accordance with the provisions of §1.1502–12 (relating to computation of separate taxable income of a member of an affiliated group filing a consolidated return), determined by taking into account the adjustments provided in §1.1502–21T(b), that is:

(A) The portion of the consolidated dividends received deduction, the consolidated charitable contributions deductions, and the consolidated section 247 deduction, attributable to such member;

(B) Such member's capital gain net income (determined without regard to any net capital loss carryover attributable to such member);

(C) Such member's net capital loss and section 1231 net loss, reduced by the portion of the consolidated net capital loss attributable to such member (as determined under paragraph (b)(2) of §1.1502–22T(b); and

(D) The portion of any consolidated net capital loss carryover attributable to such member which is absorbed in the taxable year.

For purposes of this paragraph (f), any income, gain, or loss of a dual resident corporation shall not be deferred or eliminated under §1.1502–13 (b)(2) or (c), or §1.1502–14. Further, sections 267 and 163(e)(3) shall not apply.

(ii) *Dual resident corporation that is a separate unit of a domestic corporation.* For purposes of determining whether a dual resident corporation that is a separate unit of a domestic corporation has a dual consolidated loss for the taxable year, the dual resident corporation shall compute its taxable income (or loss) as if it were a separate domestic corporation and a dual resident corporation, using only those items of income, expenses, and deductions which are otherwise attributable to such separate unit.

(2) *Effect of dual consolidated loss.* For any taxable year in which a dual resident corporation has a dual consolidated loss to which paragraph (a) of this section applies, the following rules shall apply.

(i) If the dual resident corporation is a member of an affiliated group filing a consolidated return, then such affiliated group shall compute its taxable income without regard to the items of income, loss, or deduction of the dual resident corporation for the taxable year. The amount of taxable loss of the dual resident corporation for the taxable year shall be the amount of dual consolidated loss determined under paragraph (f)(1)(i) of this section. Such loss may be carried over or back for use in other taxable years as a net operating loss deduction by the dual resident corporation to the extent permitted under section 172. However, such loss shall be treated as a loss incurred by the dual resident corporation in a separate return limitation year, and, including in the case of a dual resident corporation that is a common parent, shall be subject to all of the limitations of §§ 1.1502–21A(c)(2) or 1.1502–21T(c) (as appropriate) (relating to limitations on net operating loss carryovers and carrybacks from separate return limitation years).

(ii) If the dual resident corporation is a separate unit of a domestic corporation, then such domestic corporation and the affiliated group with which it may file a consolidated return shall compute taxable income for the taxable year without regard to the items of income, loss, or deductions of the dual resident corporation for the current year. Further, the loss of the dual resident corporation (the separate unit of the domestic corporation) shall be treated as a loss incurred by a separate corporation and its use shall be subject to all of the limitations of §§ 1.1502–21A(c)(2) or 1.1502–21T(c) (as appropriate) (relating to limitations on net operating loss carryovers and carrybacks from separate return limitation years), as if such dual resident corporation were filing a consolidated return with the domestic corporation or with the affiliated group with which the domestic corporation files a consolidated return.

(3) *Basis adjustments for dual consolidated losses.* When a dual resident corporation is a member of an affiliated group filing a consolidated return, each member owning stock in the dual resident corporation shall adjust the basis of the stock in the manner described in subparagraphs (i) and (ii) of this paragraph (f)(3).

(i) *Positive adjustment.* Adjustments shall be made in accordance with the principles of § 1.1502–32(b)(1), except that there shall be no positive adjustment under § 1.1502–32(b)(1)(ii) for any amount of the dual consolidated loss which is not absorbed. There shall be no positive adjustment for any amount included in income upon the use of a dual consolidated loss in a foreign country under § 1.1503–2T(c)(3).

(ii) *Negative adjustments.* Adjustments shall be made in accordance with the principles of § 1.1502–32(b)(2), except that there shall be no negative adjustments under § 1.1502–32(b)(2)(ii) for the amount of the dual consolidated loss.

(4) *Examples.* The following examples illustrate this paragraph (f).

Example (1). (i) P, S1, S2, and T are domestic corporations. P owns all of the stock of S1 and S2. S2 owns all of the stock of T. T is a dual resident corporation. None of the exceptions described in paragraph (c) apply with respect to T. P, S1, S2, and T have filed and continue to file a consolidated federal income tax return. X, Y, and Bank are corporations which are not members of the affiliated group of which P is the common parent.

(ii) At the beginning of 1989, P had a basis in S2 of $1000. S2 had a basis in T of $500.

(iii) In 1989, T had an interest expense of $100 on a loan from Bank. T sold a noncapital item *u* in which it had a basis of $10 to S1 for $50. T sold noncapital item *v* in which it had a basis of $200 to S1 for $100. The sale of *u* and *v* are deferred intercompany transactions described in § 1.1502–13(a)(2). S1 had separate taxable income calculated in accordance with § 1.1502–12 of $200. In addition, S1 sold item *w* in which it had a basis of $50 to T for $100. The sale of item *w* is a deferred intercompany transaction described in §1.1502–13(a)(2). P and S2 had no items of income, loss, or deduction for 1989.

(iv) For purposes of determining whether T has a dual consolidated loss in 1989 and the amount of such dual consolidated loss, T's taxable income (loss) is calculated under paragraph (f)(1) as follows:

($100)	interest expense to Bank
($100)	sale of item *v* to S1
$40	sale of item *u* to S1
($160)	

T therefore has a dual consolidated loss of $160 for 1989.

(v) Because T has a dual consolidated loss for the year, the consolidated taxable income of the P affiliated group is calculated without regard to the items of income, loss, or deduction of T. However, T is still a member of the P affiliated group. Therefore, the consolidated taxable income of the P group is $200 (attributable solely to the income of S1). The $50 gain recognized by S1 upon the sale of item *w* to T is deferred pursuant to §1.1502–13(c)(1).

(vi) S2 may not make the positive adjustment provided for in §1.1502–32(b)(1)(ii) to its basis in T for the dual consolidated loss incurred by T. However, S2 must make the negative adjustment provided for in §1.1502–32(b)(2)(i) for the amount of its allocable part of the deficit in earnings and profits of T for the taxable year. Thus, as provided in §1.1502–32(e)(1), S2 shall make a net negative adjustment to its basis in T of $160 and S2's basis in T is now $340. As provided in §1.1502–33(b)(4)(ii)(a), S2's earnings and profits for 1989 must reflect S2's decrease in its basis in T stock for the taxable year. Since S2 has no other earnings and profits for the taxable year, S2 has a deficit in earnings and profits of $160 for the taxable year. As provided in §1.1502–32(b)(2)(i), P must make a negative adjustment for the amount of its allocable part of the deficit in earnings and profits of S2 for the taxable year. Thus, P must make a net negative adjustment to its basis in S2 of $160 and P's basis in S2 is now $840.

Example (2). (i) The facts are the same as in *Example (1),* except that in 1990, S1 sold items *u* and *v* to X for no gain or loss. T incurred an interest expense of $100 on a loan from Bank. T also sold item *q* in which it had a basis of $50 to S1 for $100. T also sold item *r* in which it had a basis of $100 to Y for $300. P and S2 had no items of income, loss, or deduction for 1990.

(ii) For purposes of determining whether T has a dual consolidated loss in 1990 and the amount of such dual consolidated loss, T's taxable income (loss) is:

($100)	interest expense to Bank
$50	sale of item *q* to S1
$200	sale of item *r* to Y
$150	

T therefore has no dual consolidated loss for 1990.

(iii) Since T does not have a dual consolidated loss for the taxable year, the group's consolidated taxable income is calculated in accordance with the general rule of §1.1502–11 and not in accordance with the rule of §1.1503–2T(f)(2). T has separate taxable income calculated in accordance with §1.1502–12 of $100. On the disposition of items *u* and *v* outside the P affiliated group, no gain or loss is restored to income to T in accordance with §1.1502–13(f)(1)(i) because the gain or loss on these items was not deferred, pursuant to §1.1503–2T(f)(3). The $50 gain on the sale of item *q* from T to S1 is an intercompany transaction on which the gain or loss recognized is deferred pursuant to §1.1502–13(c)(1). The consolidated taxable income of the P affiliated group computed without regard to the consolidated net operating loss deduction is $100.

(iv) As provided by §1.1502–21A(c)(2) of the regulations, the amount of the dual consolidated loss arising in 1989 which may be absorbed by the P affiliated group in 1990 is $100; that is, the consolidated taxable income computed without regard to the consolidated net operating loss deduction minus such consolidated taxable income recomputed by excluding the items of income and deduction of T. Section 1.1502–21A(c) allows $100 of the dual consolidated loss to be included in the consolidated net operating loss deduction for 1990. The consolidated taxable income of the P group for 1990 is $0.

(v) S2 must make the positive adjustment provided for in §1.1502–32(b)(1)(i) to its basis in T for the amount of its allocable part of the undistributed earnings and profits of T for the taxable year. S2 can not make the negative adjustment provided for in §1.1502–32(b)(2)(ii) for the dual consolidated loss of T incurred in 1989 and absorbed in 1990. Thus, as provided in §1.1502–32(e)(2), S2 shall make a net positive adjustment to its basis in T of $100 and S2's basis in T is now $440. As provided in §1.1502–33(b)(4)(ii)(a), S2's earnings and profits for 1989 must reflect S2's increase in its basis in T stock for the taxable year. Since S2 has no other earnings and profits for the taxable year, S2 has earnings and profits of $100 for the taxable year. As provided in §1.1502–32(b)(1)(i), P must make a positive adjustment for the amount of its allocable part of the undistributed earnings and profits of S2 for the taxable year. Thus, P must make a net positive adjustment to its basis in S2 of $100 and P's basis in S2 is now $940.

[T.D. 8261, 54 FR 37317, Sept. 8, 1989. Redesignated by T.D. 8434, 57 FR 41093, Sept. 9, 1992, as amended by T.D. 8677, 61 FR 33325, June 27, 1996]

RELATED RULES

§ 1.1551–1 Disallowance of surtax exemption and accumulated earnings credit.

(a) *In general.* If:

(1) Any corporation transfers, on or after January 1, 1951, and before June 13, 1963, all or part of its property (other than money) to a transferee corporation,

(2) Any corporation transfers, directly or indirectly, after June 12, 1963, all or part of its property (other than money) to a transferee corporation, or

(3) Five or fewer individuals are in control of a corporation and one or more of them transfer, directly or indirectly, after June 12, 1963, property (other than money) to a transferee corporation, and the transferee was created for the purpose of acquiring such property or was not actively engaged in business at the time of such acquisition, and if after such transfer the transferor or transferors are in control of the transferee during any part of the taxable year of the transferee, then for such taxable year of the transferee the Secretary or his delegate may disallow the surtax exemption defined in section 11(d) or the accumulated earnings credit of $150,000 ($100,000 in the case of taxable years beginning before January 1, 1975) provided in paragraph (2) or (3) of section 535(c), unless the transferee establishes by the clear preponderance of the evidence that the securing of such exemption or credit was not a major purpose of the transfer.

(b) *Purpose of section 1551.* The purpose of section 1551 is to prevent avoidance or evasion of the surtax imposed by section 11(c) or of the accumulated earnings tax imposed by section 531. It is not intended, however, that section 1551 be interpreted as delimiting or abrogating any principle of law established by judicial decision, or any existing provisions of the Code, such as sections 269 and 482, which have the effect of preventing the avoidance or evasion of income taxes. Such principles of law and such provisions of the Code, including section 1551, are not mutually exclusive, and in appropriate cases they may operate together or they may operate separately.

(c) *Application of section 269(b) to cases covered by section 1551.* The provisions of section 269(b) and the authority of the district director thereunder, to the extent not inconsistent with the provisions of section 1551, are applicable to cases covered by section 1551. Pursuant to the authority provided in section 269(b) the district director may allow to the transferee any part of a surtax exemption or accumulated earnings credit for a taxable year for which such exemption or credit would otherwise be disallowed under section 1551(a); or he may apportion such exemption or credit among the corporations involved. For example, corporation A transfers on January 1, 1955, all of its property to corporations B and C in exchange for all of the stock of such corporations. Immediately thereafter, corporation A is dissolved and its stockholders become the sole stockholders of corporations B and C. Assuming that corporations B and C are unable to establish by the clear preponderance of the evidence that the securing of the surtax exemption defined in section 11(d) or the accumulated earnings credit provided in section 535, or both, was not a major purpose of the transfer, the district director is authorized under sections 1551(c) and 269(b) to allow one such exemption and credit and to apportion such exemption and credit between corporations B and C.

(d) *Actively engaged in business.* For purposes of this section, a corporation maintaining an office for the purpose of preserving its corporate existence is not considered to be ‘‘actively engaged in business’’ even though such corporation may be deemed to be ‘‘doing business’’ for other purposes. Similarly, for purposes of this section, a corporation engaged in winding up its affairs, prior to an acquisition to which section 1551 is applicable, is not considered to be ‘‘actively engaged in business.’’

(e) *Meaning and application of the term ‘‘control’’*—(1) *In general.* For purposes of this section, the term ‘‘control’’ means:

(i) With respect to a transferee corporation described in paragraph (a) (1) or (2) of this section, the ownership by the transferor corporation, its shareholders, or both, of stock possessing either *(a)* at least 80 percent of the total combined voting power of all classes of stock entitled to vote, or *(b)* at least 80 percent of the total value of shares of all classes of stock.

(ii) With respect to each corporation described in paragraph (a)(3) of this section, the ownership by five or fewer individuals of stock possessing *(a)* at least 80 percent of the total combined voting power of all classes of stock entitled to vote or at least 80 percent of the total value of shares of all classes of the stock of each corporation, and *(b)* more than 50 percent of the total combined voting power of all classes of stock entitled to vote or more than 50 percent of the total value of shares of all classes of stock of each corporation, taking into account the stock ownership of each such individual only to the extent such stock ownership is identical with respect to each such corporation.

(2) *Special rules.* In determining for purposes of this section whether stock possessing at least 80 percent (or more than 50 percent in the case of subparagraph (1)(ii)*(b)* of this paragraph) of the total combined voting power of all classes of stock entitled to vote is owned, all classes of such stock shall be considered together; it is not necessary that at least 80 percent (or more than 50 percent) of each class of voting stock be owned. Likewise, in determining for purposes of this section whether stock possessing at least 80 percent (or more than 50 percent) of the total value of shares of all classes of stock is owned, all classes of stock of the corporation shall be considered together; it is not necessary that at least 80 percent (or more than 50 percent) of the value of shares of each class be owned. The fair market value of a share shall be considered as the value to be used for purposes of this computation. With respect to transfers described in paragraph (a) (2) or (3) of this section, the ownership of stock shall be determined in accordance with the provisions of section 1563(e) and the regulations thereunder. With respect to transfers described in paragraph (a)(1) of this section, the ownership of stock shall be determined in accordance with the provisions of section 544 and the regulations thereunder, except that constructive ownership under section 544(a)(2) shall be determined only with respect to the individual's spouse and minor children. In determining control, no stock shall be excluded because such stock was acquired before January 1, 1951 (the effective date of section 1551(a)(1)), or June 13, 1963 (the effective date of section 1551(a) (2) and (3)).

(3) *Example.* This paragraph may be illustrated by the following example:

Example. On January 1, 1964, individual A, who owns 50 percent of the voting stock of corporation X, and individual B, who owns 30 percent of such voting stock, transfer property (other than money) to corporation Y (newly created for the purpose of acquiring such property) in exchange for all of Y's voting stock. After the transfer, A and B own the voting stock of corporations X and Y in the following proportions:

Individual	Corp. X	Corp. Y	Identical ownership
A	50	30	30
B	30	50	30
Total	80	80	60

The transfer of property by A and B to corporation Y is a transfer described in paragraph (a)(3) of this section since (i) A and B own at least 80 percent of the voting stock of corporations X and Y, and (ii) taking into account each such individual's stock ownership only to the extent such ownership is identical with respect to each such corporation, A and B own more than 50 percent of the voting stock of corporations X and Y.

(f) *Taxable year of allowance or disallowance*—(1) *In general.* The district director's authority with respect to cases covered by section 1551 is not limited to the taxable year of the transferee corporation in which the transfer of property occurs. Such authority extends to the taxable year in which the transfer occurs or any subsequent taxable year of the transferee corporation if, during any part of such year, the transferor or transferors are in control of the transferee.

(2) *Examples.* This paragraph may be illustrated by the following examples:

Example (1). On January 1, 1955, corporation D transfers property (other than money) to corporation E, a corporation not actively engaged in business at the time of the acquisition of such property, in exchange for 60 percent of the voting stock of E. During a later taxable year of E, corporation D acquires an additional 20 percent of such voting stock. As a result of such additional acquisition, D owns 80 percent of the voting stock of E. Accordingly, section 1551(a)(1) is applicable for the taxable year in which the later acquisition of stock occurred and for each taxable year thereafter in which the requisite control continues.

Example (2). On June 20, 1963, individual A, who owns all of the stock of corporation X, transfers property (other than money) to corporation Y, a corporation not actively engaged in business at the time of the acquision of such property, in exchange for 60 percent of the voting stock of Y. During a later taxable year of Y, A acquires an additional 20 percent of such voting stock. After such acquisition A owns at least 80 percent of the voting stock of corporations X and Y. Accordingly, section 1551(a)(3) is applicable for the taxable year in which the later acquisition of stock occurred and for each taxable year thereafter in which the requisite control continues.

Example (3). Individuals A and B each owns 50 percent of the stock of corporation X. On January 15, 1964, A transfers property (other than money) to corporation Y (newly created by A for the purpose of acquiring such property) in exchange for all the stock of Y. In a subsequent taxable year of Y, individual B buys 50 percent of the stock which A owns in Y (or he transfers money to Y in exchange for its stock, as a result of which he owns 50 percent of Y's stock). Immediately thereafter the stock ownership of A and B in corporation Y is identical to their stock ownership in corporation X. Accordingly, section 1551(a)(3) is applicable for the taxable year in which B acquires stock in corporation Y (see paragraph (g)(3) of this section) and for each taxable year thereafter in which the requisite control continues. Moreover, if B's acquisition of stock in Y is pursuant to a preexisting agreement with A, A's transfer to Y and B's acquisition of Y's stock are considered a single transaction and section 1551(a)(3) also would be applicable for the taxable year in which A's transfer to Y took place and for each taxable year thereafter in which the requisite control continues.

(g) *Nature of transfer*—(1) *Corporate transfers before June 13, 1963.* A transfer made before June 13, 1963, by any corporation of all or part of its assets, whether or not such transfer qualifies as a reorganization under section 368, is within the scope of section 1551(a)(1), except that section 1551(a)(1) does not apply to a transfer of money only. For example, the transfer of cash for the purpose of expanding the business of the transferor corporation through the formation of a new corporation is not a transfer within the scope of section 1551(a)(1), irrespective of whether the new corporation uses the cash to purchase from the transferor corporation stock in trade or similar property.

(2) *Corporate transfers after June 12, 1963.* A direct or indirect transfer made after June 12, 1963, by any corporation of all or part of its assets to a transferee corporation, whether or not such transfer qualifies as a reorganization under section 368, is within the scope of section 1551(a)(2) except that section 1551(a)(2) does not apply to a transfer of money only. For example, if a transferor corporation transfers property to its shareholders or to a subsidiary, the transfer of that property by the shareholders or the subsidiary to a transferee corporation as part of the same transaction is a transfer of property by the transferor corporation to which section 1551(a)(2) applies. A transfer of property pursuant to a purchase by a transferee corporation from a transferor corporation controlling the transferee is within the scope of section 1551(a)(2), whether or not the purchase follows a transfer of cash from the controlling corporation.

(3) *Other transfers after June 12, 1963.* A direct or indirect transfer made after June 12, 1963, by five or fewer individuals to a transferee corporation, whether or not such transfer qualifies under one or more other provisions of the Code (for example, section 351), is within the scope of section 1551(a)(3) except that section 1551(a)(3) does not apply to a transfer of money only. Thus, if one of five or fewer individuals who are in control of a corporation transfers property (other than money) to a controlled transferee corporation, the transfer is within the scope of section 1551(a)(3) notwithstanding that the other individuals transfer nothing or transfer only money.

(4) *Examples.* This paragraph may be illustrated by the following examples:

Example (1). Individuals A and B each owns 50 percent of the voting stock of corporation X. On January 15, 1964, A and B each acquires property (other than money) from X and, as part of the same transaction, each transfers such property to his wholly owned corporation (newly created for the purpose of acquiring such property). A and B retain substantial continuing interests in corporation X. The transfers to the two newly created corporations are within the scope of section 1551(a)(2).

Example (2). Corporation W organizes corporation X, a wholly owned subsidiary, for the purpose of acquiring the properties of corporation Y. Pursuant to a reorganization qualifying under section 368(a)(1)(C), substantially all of the properties of corporation Y are transferred on June 15, 1963, to corporation X solely in exchange for voting stock of corporation W. There is a transfer of property from W to X within the meaning of section 1551(a)(2).

Example (3). Individuals A and B, each owning 50 percent of the voting stock of corporation X, organize corporation Y to which each transfers money only in exchange for 50 percent of the stock of Y. Subsequently, Y uses such money to acquire other property from A and B after June 12, 1963. Such acquisition is within the scope of section 1551(a)(3).

Example (4). Individual A owns 55 percent of the stock of corporation X. Another 25 percent of corporation X's stock is owned in the aggregate by individuals B, C, D, and E. On June 15, 1963, individual A transfers property to corporation Y (newly created for the purpose of acquiring such property) in exchange for 60 percent of the stock of Y, and B, C, and D acquire all of the remaining stock of Y. The transfer is within the scope of section 1551(a)(3).

(h) *Purpose of transfer.* In determining, for purposes of this section, whether the securing of the surtax exemption or accumulated earnings credit constituted ''a major purpose'' of the transfer, all circumstances relevant to the transfer shall be considered. ''A major purpose'' will not be inferred from the mere purchase of inventory by a subsidiary from a centralized warehouse maintained by its parent corporation or by another subsidiary of the parent corporation. For disallowance of the surtax exemption and accumulated earnings credit under section 1551, it is not necessary that the obtaining of either such credit or exemption, or both, have been the sole or principal purpose of the transfer of the property. It is sufficient if it appears, in the light of all the facts and circumstances, that the obtaining of such exemption or credit, or both, was one of the major considerations that prompted the transfer. Thus, the securing of the surtax exemption or the accumulated earnings credit may constitute ''a major purpose'' of the transfer, notwithstanding that such transfer was effected for a valid business purpose and qualified as a reorganization within the meaning of section 368. The taxpayer's burden of establishing by the clear preponderance of the evidence that the securing of either such exemption or credit or both was not ''a major purpose'' of the transfer may be met, for example, by showing that the obtaining of such exemption, or credit, or both, was not a major factor in relationship to the other consideration or considerations which prompted the transfer.

[T.D. 6911, 32 FR 3214, Feb. 24, 1967, as amended by T.D. 7376, 40 FR 42745, Sept. 16, 1975]

§1.1552–1 Earnings and profits.

(a) *General rule.* For the purpose of determining the earnings and profits of each member of an affiliated group which is required to be included in a consolidated return for such group filed for a taxable year beginning after December 31, 1953, and ending after August 16, 1954, the tax liability of the group shall be allocated among the members of the group in accordance with one of the following methods, pursuant to an election under paragraph (c) of this section:

(1)(i) The tax liability of the group shall be apportioned among the members of the group in accordance with the ratio which that portion of the consolidated taxable income attributable to each member of the group having taxable income bears to the consolidated taxable income.

(ii) For consolidated return years beginning after December 31, 1965, a member's portion of the tax liability of the group under the method of allocation provided by subdivision (i) of this subparagraph is an amount equal to the tax liability of the group multiplied by a fraction, the numerator of which is the taxable income of such member, and the denominator of which is the sum of the taxable incomes of all the members. For purposes of this subdivision the taxable income of a member shall be the separate taxable income determined under §1.1502–12, adjusted for the following items taken into account in the computation of consolidated taxable income:

(a) The portion of the consolidated net operating loss deduction, the consolidated charitable contributions deduction, the consolidated dividends received deduction, the consolidated section 247 deduction, the consolidated section 582(c) net loss, and the consolidated section 922 deduction, attributable to such member;

(b) Such member's capital gain net income (net capital gain for taxable years beginning before January 1, 1977) (determined without regard to any net capital loss carryover attributable to such member);

(c) Such member's net capital loss and section 1231 net loss, reduced by the portion of the consolidated net capital loss attributable to such member; and

(d) The portion of any consolidated net capital loss carryover attributable to such member which is absorbed in the taxable year.

If the computation of the taxable income of a member under this subdivision results in an excess of deductions over gross income, then for purposes of this subdivision such member's taxable income shall be zero.

(2)(i) The tax liability of the group shall be allocated to the several members of the group on the basis of the percentage of the total tax which the tax of such member if computed on a separate return would bear to the total amount of the taxes for all members of the group so computed.

(ii) For consolidated return years beginning after December 31, 1965, a member's portion of the tax liability of the group under the method of allocation provided by subdivision (i) of this subparagraph is an amount equal to the tax liability of the group multiplied by a fraction, the numerator of which is the separate return tax liability of such member, and the denominator of which is the sum of the separate return tax liabilities of all the members. For purposes of this subdivision the separate return tax liability of a member is its tax liability computed as if it has filed a separate return for the year except that:

(a) Gains and losses on intercompany transactions shall be taken into account as provided in § 1.1502–13 as if a consolidated return had been filed for the year;

(b) Gains and losses relating to inventory adjustments shall be taken into account as provided in § 1.1502–18 as if a consolidated return had been filed for the year;

(c) Transactions with respect to stock, bonds, or other obligations of members shall be reflected as provided in § 1.1502–13 (f) and (g) as if a consolidated return had been filed for the year;

(d) Excess losses shall be included in income as provided in § 1.1502–19 as if a consolidated return had been filed for the year;

(e) In the computation of the deduction under section 167, property shall not lose its character as new property as a result of a transfer from one member to another member during the year;

(f) A dividend distributed by one member to another member during the year shall not be taken into account in computing the deductions under section 243(a)(1), 244(a), 245, or 247 (relating to deductions with respect to dividends received and dividends paid);

(g) Basis shall be determined under §§ 1.1502–31 and 1.1502–32, and earnings and profits shall be determined under § 1.1502–33, as if a consolidated return had been filed for the year;

(h) Subparagraph (2) of § 1.1502–3(f) shall apply as if a consolidated return had been filed for the year; and

(i) For purposes of Subtitle A of the Code, the surtax exemption of the member shall be an amount equal to $25,000 ($50,000 in the case of a taxable year ending in 1975), divided by the number of members (or such portion of $25,000 or $50,000 which is apportioned to the member pursuant to a schedule attached to the consolidated return for the taxable year). (However, if for the taxable year some or all of the members are component members of a controlled group of corporations (within the meaning of section 1563) and if there are other such component members which do not join in filing the consolidated return for such year, the amount to be divided among the members filing the consolidated return shall be (in lieu of $25,000 or $50,000) the sum of the amounts apportioned to the

component members which join in filing the consolidated return (as determined for taxable years beginning after December 31, 1974 under §1.1561–2(a)(2) or §1.1561–3, whichever is applicable, and for taxable years beginning before January 1, 1975, under §1.561–2A(a)(2) or §1.1561–3A whichever is applicable).)

If the computation of the separate return tax liability of a member under this subdivision does not result in a positive tax liability, then for purposes of this subdivision such member's separate return tax liability shall be zero.

(3)(i) The tax liability of the group (excluding the tax increases arising from the consolidation) shall be allocated on the basis of the contribution of each member of the group to the consolidated taxable income of the group. Any tax increases arising from the consolidation shall be distributed to the several members in direct proportion to the reduction in tax liability resulting to such members from the filing of the consolidated return as measured by the difference between their tax liabilities determined on a separate return basis and their tax liabilities (determined without regard to the 2-percent increase provided by section 1503(a) and paragraph (a) of §1.1502–30A (as contained in the 26 CFR edition revised as of April 1, 1996) for taxable years beginning before January 1, 1964) based on their contributions to the consolidated taxable income.

(ii) For consolidated return years beginning after December 31, 1965, a member's portion of the tax liability of the group under the method of allocation provided by subdivision (i) of this subparagraph shall be determined by:

(a) Allocating the tax liability of the group in accordance with subparagraph (1)(ii) of this paragraph, but

(b) The amount of tax liability allocated to any member shall not exceed the separate return tax liability of such member, determined in accordance with subparagraph (2)(ii) of this paragraph, and

(c) The sum of the amounts which would be allocated to the members but for *(b)* of this subdivision (ii) shall be apportioned among the other members in direct proportion to, but limited to, the reduction in tax liability resulting to such other members. Such reduction for any member shall be the excess, if any, of *(1)* its separate this paragraph.

(4) The tax liability of the group shall be allocated in accordance with any other method selected by the group with the approval of the Commissioner. No method of allocation may be approved under this subparagraph which may result in the allocation of a positive tax liability for a taxable year, among the members who are allocated a positive tax liability for such year, in a total amount which is more or less than the tax liability of the group for such year. (However, see paragraph (d) of §1.1502–33.)

(b) *Application of rules*—(1) *Tax liability of the group.* For purposes of section 1552 and this section, the tax liability of the group for a taxable year shall consist of the Federal income tax liability of the group for such year determined in accordance with §1.1502–2 or §1.1502–30A (as contained in the 26 CFR edition revised as of April 1, 1996), which-ever is applicable. Thus, in the case of a carryback of a loss or credit to such year, although the earnings and profits of the members of the group may not be adjusted until the subsequent taxable year from which the loss or credit was carried back, the effect of the carryback, for purposes of this section, shall be determined by allocating the amount of the adjustment as a part of the tax liability of the group for the taxable year to which the loss or credit is carried. For example, if a consolidated net operating loss is carried back from 1969 to 1967, the allocation of the tax liability of the group for 1967 shall be recomputed in accordance with the method of allocation used for 1967, and the changes resulting from such recomputation shall, for accrual method taxpayers, be reflected in the earnings and profits of the appropriate members in 1969.

(2) *Effect of allocation.* The amount of tax liability allocated to a corporation as its share of the tax liability of the group, pursuant to this section, shall (i) result in a decrease in the earnings and profits of such corporation in such amount, and (ii) be treated as a liability of such corporation for such amount. If the full amount of such liability is not paid by such corporation, pursuant to an agreement among the

members of the group or otherwise, the amount which is not paid will generally be treated as a distribution with respect to stock, a contribution to capital, or a combination thereof, as the case may be.

(c) *Method of election.* (1) The election under paragraph (a) (1), (2), or (3) of this section shall be made not later than the time prescribed by law for filing the first consolidated return of the group for a taxable year beginning after December 31, 1953, and ending after August 16, 1954 (including extensions thereof). If the group elects to allocate its tax liability in accordance with the method prescribed in paragraph (a) (1), (2), or (3) of this section, a statement shall be attached to the return stating which method is elected. Such statement shall be made by the common parent corporation and shall be binding upon all members of the group. In the event that the group desires to allocate its tax liability in accordance with any other method pursuant to paragraph (a)(4) of this section, approval of such method by the Commissioner must be obtained within the time prescribed above. If such approval is not obtained in such time, the group shall allocate in accordance with the method prescribed in paragraph (a)(1) of this section. The request shall state fully the method which the group wishes to apply in apportioning the tax liability. Except as provided in subparagraph (2) of this paragraph, an election once made shall be irrevocable and shall be binding upon the group with respect to the year for which made and for all future years for which a consolidated return is filed or required to be filed unless the Commissioner authorizes a change to another method prior to the time prescribed by law for filing the return for the year in which such change is to be effective.

(2) Each group may make a new election to use any one of the methods prescribed in paragraph (a) (1), (2), or (3) of this section for its first consolidated return year beginning after December 31, 1965, or in conjunction with an election under paragraph (d) of § 1.1502–33, or may request the Commissioner's approval of a method under paragraph (a)(4) of this section for its first consolidated return year beginning after December 31, 1965, irrespective of its previous method of allocation under this section. If such new election is not made in conjunction with an election under paragraph (d) of § 1.1502–33, it shall be effective for the first consolidated return year beginning after December 31, 1965, and all succeeding years. (See § 1.1502–33 for the method of making such new election in conjunction with an election under paragraph (d) of § 1.1502–33.) Any other such new election (or request for the Commissioner's approval of a method under paragraph (a)(4) of this section) shall be made within the time prescribed by law for filing the consolidated return for the first taxable year beginning after December 31, 1965 (including extensions thereof), or within 60 days after July 3, 1968, whichever is later. Such new election shall be made by attaching a statement to the consolidated return for the first taxable year beginning after December 31, 1965, or if such election is made within the time prescribed above but after such return is filed, by filing a statement with the internal revenue officer with whom such return was filed.

(d) *Failure to elect.* If a group fails to make an election in its first consolidated return, or any other election, in accordance with paragraph (c) of this section, the method prescribed under paragraph (a)(1) of this section shall be applicable and shall be binding upon the group in the same manner as if an election had been made to so allocate.

(e) *Definitions.* Except as otherwise provided in this section, the terms used in this section shall have the same meaning as provided in the regulations under section 1502.

(f) *Example.* The provisions of this section may be illustrated by the following example:

Example. Corporation P is the common parent owning all of the stock of corporations S1 and S2, members of an affiliated group. A consolidated return is filed for the taxable year ending December 31, 1966, by P, S1, and S2. For 1966 such corporations had the following taxable incomes or losses computed in accordance with paragraph (a)(1)(ii) of this section:

P	0
S1	$2,000
S2	(1,000)

The group has not made an election under paragraph (c) of this section or paragraph (d) of §1.1502–33. Accordingly, the method of allocation provided by paragraph (a)(1) of this section is in effect for the group. Assuming that the consolidated taxable income is equal to the sum of the members taxable income and losses, or $1,000, the tax liability of the group for the year (assuming a 22-percent rate) is $220, all of which is allocated to S1. S1 accordingly reduces its earnings and profits in the amount of $220, irrespective of who actually pays the tax liability. If S1 pays the $220 tax liability there will be no further effect upon the income, earnings and profits, or the basis of stock of any member. If, however, P pays the $220 tax liability (and such payment is not in fact a loan from P to S1), then P shall be treated as having made a contribution to the capital of S1 in the amount of $220. On the other hand, if S2 pays the $220 tax liability (and such payment is not in fact a loan from S2), then S2 shall be treated as having made a distribution with respect to its stock to P in the amount of $220, and P shall be treated as having made a contribution to the capital of S1 in the amount of $220.

[T.D. 6962, 33 FR 9655, July 3, 1968, as amended by T.D. 7825, 42 FR 64694, Dec. 28, 1977; T.D. 7728, 45 FR 72650, Nov. 3, 1980; T.D. 8560, 59 FR 41675, Aug. 15, 1994; T.D. 8597, 60 FR 36680, July 18, 1995; T.D. 8677, 61 FR 33325, June 27, 1996]

CERTAIN CONTROLLED CORPORATIONS

§1.1561–0 Effective date.

(a) *Taxable years beginning after December 31, 1974.* The provisions of §§1.1561–1 through 1.1561–3 apply only to taxable years beginning after December 31, 1974.

(b) *Taxable years beginning before January 1, 1975.* The provisions of §§1.1561–1A through 1.1561–3A apply only to taxable years beginning before January 1, 1975.

[T.D. 7528, 42 FR 64694, Dec. 28, 1977]

§1.1561–1 Limitations on certain multiple tax benefits in the case of certain controlled corporations.

(a) *In general.* Part II (section 1561 and following), subchapter B, chapter 6 of the Code, provides rules relating to certain controlled corporations. In general, section 1561 provides that the component members of a controled group of corporations on a December 31, for their taxable years which include such December 31, shall be limited for purposes of subtitle A to:

(1) One surtax exemption under section 11(d),

(2) One $150,000 amount for purposes of computing the accumlated earnings credit under section 535(c) (2) and (3), and

(3) One $25,000 amount for purposes of computing the limitation on the small business deduction of life insurance companies under sections 804(a)(4) and 809 (d)(10).

For certain definitions (including the definition of a ‘‘controlled group of corporations’’ and a ‘‘component member’’) and special rules for purposes of part II of subchapter B, see section 1563 and the regulations thereunder.

(b) *Tax avoidance.* The provisions of part II, subchapter B, chapter 6 do not delimit or abrogate any principle of law established by judicial decision, or any existing provisions of the code, such as sections 269, 482, and 1551, which have the effect of preventing the avoidance or evasion of income taxes.

(c) *Special rules.* (1) For purposes of sections 1561 and 1563 and the regulations thereunder, the term ‘‘corporation’’ includes an electing small business corporation (as defined in section 1371 (b)). However, for the treatment of an electing small business corporation as an excluded member of a controlled group of corporations, see paragraph (b)(2)(ii) of §1.1563–1.

(2) In the case of corporations electing a 52–53-week taxable year under section 441(f)(1), the provisions of sections 1561 and 1563 and the regulations thereunder shall be applied in accordance with the special rule section 441(f)(2)(A). See paragraph (b)(1) of §1.441–2.

[T.D. 7528, 42 FR 64694, Dec. 28, 1977]

§1.1561–2 Determination of amount of tax benefits.

(a) *Surtax exemption.* (1) If a corporation is a component member of a controlled group of corporations on December 31, the surtax exemption under section 11(d) of such corporation for the taxable year which includes such December 31 shall be an amount equal to:

(i) $50,000 divided by the number of corporations which are component members of such group on such December 31, or

(ii) If an apportionment plan is adopted under § 1.1561–3 which is effective with respect to such taxable year such portion of $50,000 as is apportioned to such member in accordance with such plan.

(2) In the case of a controlled group of corporations which includes component members which join in the filing of a consolidated return and other component members which do not join in the filing of such a return, and where there is no apportionment plan effective under § 1.1561–3 apportioning the $50,000 amount among the component members filing the consolidated return and the other component members of the controlled group, each component member of the controlled group, (including each component member which joins in filing the consolidated return) shall be treated as a separate corporation for purposes of equally apportioning the $50,000 amount under subparagraph (1)(i) of this paragraph. In such case, the surtax exemption of the corporations filing the consolidated return shall be the sum of the amounts apportioned to each component member which joins in filing the consolidated return.

(3) The provisions of section 1561 may reduce the surtax exemption of any corporation which is a component member of a controlled group or corporations and which is subject to the tax imposed by section 11, or by any other provision of subtitle A of the Code if the tax under such other provisions is computed by reference to the amount of the surtax exemption provided by section 11. Such other provisions include, for example, sections 511(a)(1), 594, 802, 831, 852, 857, 882, 1201, and 1378.

(4) This paragraph (a) shall not apply with respect to any component member of a controlled group of corporations on a December 31 if one or more component members of such controlled group has a taxable year including such December 31 which ends after December 31, 1978. Rules pertaining to the apportionment of the surtax exemption with respect to component members of controlled groups of corporations to which this paragraph does not apply are reserved.

(5) The application of this paragraph may be illustrated by the following examples:

Example (1). Corporations W, X, Y, and Z are component members of a controlled group of corporations on December 31, 1975, and each corporation files its income tax return on the basis of a calendar year. For their taxable years ending on December 31, 1975, W and X each incurs a net operating loss; Y has $5,250 of taxable income; and Z has $30,000 of taxable income. If an apportionment plan is not effective for such taxable years, the surtax exemption under section 11(d) of each corporation determined under subparagraph (1)(i) of this paragraph is $12,500 ($50,000÷4). However, the four corporations may avoid a pro rata division of the $50,000 amount by filing an apportionment plan in accordance with the provisions of § 1.1561–3 allocating the $50,000 amount in any manner they deem proper.

Example (2). Corporation A files its income tax return on the basis of a calendar year; corporation B files its income tax return on the basis of a fiscal year ending March 31. On December 31, 1975, A and B are the only component members of a controlled group of corporations. Under subparagraph (1)(i) of this paragraph, the surtax exemption of A for 1975, and the surtax exemption of B for its fiscal year ending March 31, 1976, is $25,000 ($50,000÷2). However, if an apportionment plan is filed in accordance with the provisions of § 1.1561–3, the surtax exemption of each such corporation will be the amount apportioned to the corporation pursuant to the plan.

Example (3). Corporations R, P, and S are component members of a controlled group of corporations on December 31, 1975. P and S file a consolidated return for their fiscal years ending June 30, 1976. R files a separate return for its taxable year ending on December 31, 1975. No apportionment plan is effective with respect to R’s, P’s, and S’s taxable years which include December 31, 1975. Therefore R, P, and S are each apportioned $16,666.67 ($50,000÷3) as their surtax exemption under section 11(d) for their taxable years including such date. The surtax exemption of the affiliated group filing a consolidated return (P and S) for the year ending June 30, 1976, is $33,333.34 (i.e., the sum of the $16,666.67 amounts apportioned to P and S). However, if an apportionment plan is filed in accordance with the provisions of § 1.1561–3, the surtax exemption of the corporations which are members of the affiliated group filing a consolidated return and of each other corporation which is a component member of the controlled group of corporations will be the amount apportioned to such affiliated group and to each such other corporations pursuant to the plan.

(b) *Allocation of amounts of taxable income subject to normal tax.* (1) In the case of a taxable year of a corporation, if:

(i) The amount of normal tax under section 11(b) is equal to the sum of 20 percent of so much of the taxable income as does not exceed $25,000, plus 22 percent of so much of the taxable income as exceeds $25,000 for a taxable year, and

(ii) The amount of surtax exemption of the corporation is less than $50,000 under paragraph (a)(1) (i) or (ii) of this section,

then for purposes of applying section 11(b), the taxable income subject to taxation at the rate of 20 percent shall be (in lieu of the first $25,000 of taxable income) one-half of the amount of the surtax exemption allocated to such corporation under paragraph (a)(1) (i) or (ii) of this section. In addition, the amount of taxable income subject to taxation at the rate of 22 percent shall be (in lieu of the amount of taxable income in excess of $25,000) the taxable income that exceeds one-half of the amount of the surtax exemption allocated to such corporation under paragraph (a)(1) (i) or (ii) of this section for such year. In the case of an affiliated group of corporations filing a consolidated return for a taxable year, the preceding sentence shall be applied by substituting the term ‘‘affiliated group’’ for the term ‘‘corporation’’ each time it appears.

(2) The provisions of this paragraph may be illustrated by the following example:

Example. Corporations P and S are component members of a controlled group of corporations on December 31, 1975, and each corporation files a separate income tax return on the basis of a calendar year. For the taxable year ending on December 31, 1975, P incurs a net operating loss and S has $25,000 of taxable income. If an apportionment plan is not effective for that taxable year, the surtax exemption under section 11(d) of each corporation (determined under paragraph (a)(1)(i) of this section) is $25,000 ($50,000÷2). For purposes of applying section 11(b) to determine S’s liability for tax for 1975, the amount of taxable income subject to taxation at the rate of 20 percent is limited to $12,500 (i.e., one-half of the amount of the surtax exemption allocated to S under paragraph (a)(1)(i) of this section), and the amount of taxable income subject to taxation at the rate of 22 percent is $12,500 (i.e., the amount of taxable income in excess of one-half of the amount of the surtax exemption). If, on the other hand, an apportionment plan is adopted by P and S effective for such taxable years apportioning the entire $50,000 surtax exemption to S, then, for purposes of applying section 11(b) to determine S’s liability for tax for 1975, the amount of taxable income subject to taxation at the rate of 20 percent is $25,000.

(3) If an apportionment plan is adopted under §1.1561–3 for a December 31, and if paragraph (b)(1) of this section applies to any component member whose taxable year includes such December 31, then the plan shall specify:

(i) The amount subject to taxation at the rate of 20 percent, and

(ii) The amount subject to taxation at the rate of 22 percent,

as determined under paragraph (b)(1) of this section for each component member. The information required to be included in a plan by this subparagraph is in addition to the information required under §1.1561–3(a). Where an existing apportionment plan is effective under §1.1561–3(a)(3) for such December 31, the additional information required under this subparagraph may be provided in an amendment of the existing plan as provided in §1.1561–3(c).

(c) *Accumulated earnings credit.* (1) Except as provided in subparagraph (2) of this paragraph, if a corporation is a component member of a controlled group on a December 31, the amount for purposes of computing the accumlated earnings credit under section 535(c) (2) and (3) of such corporation shall be an amount equal to $150,000 divided by the number of corporations which are component members of such group on such December 31. In the case of a controlled group of corporations which includes component members which join in the filing of a consolidated return and other component members which do not join in the filing of such a return, each component member of the controlled group (including each component member which joins in filing the consolidated return) shall be treated as a separate corporation for purposes of equally apportioning the $150,000 amount under this subparagraph. In such case, the amount for purposes of computing the accumulated earnings credit for the component members filing the consolidated return shall be the sum of the amounts apportioned to each component member which joins in filing the consolidated return.

(2) If, with respect to any component member of the controlled group, the amount determined under subparagraph (1) of this paragraph exceeds the sum of (i) such member's accumlated earnings and profits as of the close of the preceding taxable year, plus (ii) such member's earnings and profits for the taxable year which are retained (within the meaning of section 535(c)(1)), then any such excess shall be subtracted from the amount determined under subparagraph (1) of this paragraph with respect to such member and shall be divided equally among those remaining component members of the controlled group that do not have such an excess (until no such excess remains to be divided among those remaining members that have not had such an excess). The excess so divided among such remaining members shall be added to the amount determined under subparagraph (1) with respect to such members. If a controlled group of corporations includes component members which join in the filing of a consolidated return and other component members which do not join in filing such return, the component members filing the consolidated return shall be treated as a single corporation for purposes of this subparagraph.

(3) A controlled group may not adopt an apportionment plan, as provided in § 1.1561–3, with respect to the amounts computed under the provisions of this paragraph.

(4) The provisions of this paragraph may be illustrated by the following example:

Example. A controlled group is composed of four component member corporations, W, X, Y, and Z. Each corporation files a separate income tax return on the basis of a calendar year. The sum of the earnings and profits for the taxable year ending December 31, 1975, which are retained plus the sum of the accumulated earnings and profits (as of the close of the preceding taxable year) is $15,000, $75,000, $37,500, and $300,000 for W, X, Y, and Z, respectively. The amounts determined under this paragraph for W, X, Y, and Z for 1975 are $15,000, $48,750, $37,500, and $48,750, respectively, computed as follows:

	Component members			
	W	X	Y	Z
Earnings and profits	$15,000	$75,000	$37,500	$300,000
Amount computed under subparagraph (1)	37,500	37,500	37,500	37,500
Excess	22,500	0	0	0
Allocation of excess	....	7,500	7,500	7,500
New excess	....	....	7,500	....
Reallocation of new excess	....	3,750	....	3,750
Amount to be used for purposes of section 535(c) (2) and (3)	15,000	48,750	37,500	48,750

(d) *Small business deduction of life insurance companies.* (1) Except as provided in subparagraph (2) of this paragraph, if two or more life insurance companies which are taxable under section 802 are component members of a controlled group of corporations on a December 31, the amount for purposes of computing the limitation on the small business deduction under sections 804(a)(4) and 809(d)(10) of such corporations for their taxable years which include such December 31 shall be an amount equal to $25,000 divided by the number of life insurance companies taxable under section 802 which are component members of such group on such December 31.

(2) If, with respect to any of the component members of the controlled group which are described in subparagraph (1) of this paragraph, the amount determined under such subparagraph exceeds 10 percent of such member's investment yield (as defined in section 304(c)), then any such excess shall be subtracted from the amount determined under subparagraph (1) of this paragraph with respect to such member and shall be divided equally among

those remaining life insurance company members of the controlled group that do not have such an excess (until no such excess remains to be divided among those remaining members that have not had such an excess). The excess so divided among such remaining members shall be added to the amount determined under subparagraph (1) with respect to such members.

(3) A controlled group may not adopt an apportionment plan, as provided in §1.1561–3, with respect to the amounts computed under the provisions of this paragraph.

(e) *Certain short taxable years.* (1) If the return of a corporation is for a short period which does not include a December 31, and such corporation is a component member of a controlled group of corporations with respect to such short period, then for purposes of subtitle A of the Code:

(i) The surtax exemption under section 11(d) of such corporation for such short period shall be an amount equal to $25,000 ($50,000 in the case of a taxable year ending in 1975), divided by the number of corporations which are component members of such controlled group on the last day of such short period;

(ii) The amount to be used in computing the accumulated earnings credit under section 535(c) (2) and (3) of such corporation for such short period shall be an amount equal to $150,000 divided by the number of corporations which are members of such controlled group on the last day of such short period; and

(iii) The amount to be used in computing the limitation on the small business deduction of life insurance companies under sections 804(a)(4) and 809(d)(10) of such corporation for such short period shall not exceed an amount equal to $25,000 divided by the number of life insurance companies taxable under section 802 which are component members of the controlled group on the last day of such short period.

For purposes of the preceding sentence, the term ‘‘short period’’ does not include any period if the income for such period is required to be included in a consolidated return under §1.1502–76. The determination of whether a corporation is a component member of a controlled group of corporations on the last day of a short period is made by applying the definition of ‘‘component member’’ contained in section 1563(b) and §1.1563–1 as if the last day of such short period were a December 31 occurring after December 31, 1974.

(2) The provisions of this paragraph may be illustrated by the following examples:

Example (1). On January 2, 1975, corporation X transfers cash to newly formed corporation Y (which begins business on that date) and receives all of the stock of Y in return. X also owns all of the stock of corporation Z on each day of 1974 and 1975. X uses the calendar year as its taxable year and Z uses a fiscal year ending on March 31. Y adopts a fiscal year ending on June 30 as its annual accounting period, and, therefore, files a return for the short taxable year beginning on January 2, 1975, and ending on June 30, 1975. On June 30, 1975, Y is a component member of a parent-subsidiary controlled group of corporations of which X, Y, and Z are component members. Accordingly, the surtax exemption of Y for the short taxable year ending on June 30, 1975, is $16,666.67 ($50,000÷3). On December 31, 1975, X, Y, and Z are component members of a parent-subsidiary controlled group of corporations. Accordingly, the surtax exemption of each such corporation for its taxable year including December 31, 1975 (i.e., X’s calendar year ending December 31, 1975, Z’s fiscal year ending March 31, 1976, and Y’s fiscal year ending June 30, 1976) is $16,666.67 ($50,000÷3), or, if an apportionment plan is filed under §1.1561–3, the amount apportioned pursuant to such plan.

Example (2). On January 1, 1975, corporation P owns all of the stock of corporations S–1, S–2, and S–3. P, S–1, S–2, and S–3 file separate returns on a calendar year basis. On July 31, 1975, S–1 is liquidated and therefore files a return for the short taxable year beginning on January 1, 1975, and ending on July 31, 1975. On August 31, 1975, S–2 is liquidated and therefore files a return for the short taxable year beginning on January 1, 1975, and ending on August 31, 1975. On July 31, 1975, S–1 is a component member of a parent-subsidiary controlled group of corporations of which P, S–1, S–2, and S–3 are component members. Accordingly, the surtax exemption under section 11(d) of S–1 for the short taxable year ending on July 31, 1975, is $12,500 ($50,000÷4). On August 31, 1975, S–2 is a component member of a parent-subsidiary controlled group of corporations of which P, S–2, and S–3 are component members. Accordingly, the surtax exemption of S–2 for the short taxable year ending on August 31, 1975, is $16,666.67 ($50,000÷3). On December 31, 1975, P and S–3 are component members of a parent-subsidiary controlled group of corporations. Accordingly, the surtax exemption of each such corporation for the calendar year 1975 is $25,000 ($50,000÷2), or, if an apportionment plan is filed under § 1.1561–3, the amount apportioned pursuant to such plan.

[T.D. 7528, 42 FR 64695, Dec. 28, 1977]

§ 1.1561–3 Apportionment of surtax exemption.

(a) *In general.* (1) In the case of corporations which are component members of a controlled group of corporations on a December 31, the single $50,000 surtax exemption under section 11(d) may be apportioned among such members (for the taxable year of each such member which includes such December 31) if all such members consent, in the manner provided in paragraph (b) of this section, to an apportionment plan with respect to such December 31. Such plan shall provide for the apportionment of a fixed dollar amount to one or more of such members, but in no event shall the sum of the amounts so apportioned exceed $50,000. An apportionment plan shall not be considered as adopted with respect to a particular December 31 until each component member which is required to consent to the plan under paragraph (b)(1) of this section filed the original of a statement described in such paragraph (or, the original of a statement incorporating its consent is filed on its behalf). In the case of a return filed before a plan is adopted, the surtax exemption for purposes of such return shall be equally apportioned in accordance with the rules provided in §1.1561–2(a)(1)(i). (If a valid apportionment plan is adopted after the return is filed and within the time prescribed by subparagraph (2) of this paragraph, such return should be amended (or a claim for refund should be made) to reflect the change from equal apportionment.)

(2) A controlled group may adopt an apportionment plan with respect to a particular December 31 only if, at the time such plan is sought to be adopted, there is at least one year remaining in the statutory period (including any extensions thereof) for the assessment of a deficiency against any corporation the tax liability of which would be increased by the adoption of such plan. If there is less than one year remaining with respect to any such corporation, the director of the service center with which such corporation files its income tax return will ordinarily, upon request, enter into an agreement to extend such statutory period for the limited purpose of assessing any deficiency against such corporation attributable to the adoption of such apportionment plan.

(3)(i) The amount apportioned to a component member of a controlled group of corporations in an apportionment plan adopted with respect to a particular December 31 shall constitute such member's surtax exemption for its taxable year including the particular December 31, and for all taxable years of such members including succeeding December 31's, unless the apportionment plan is amended in accordance with paragraph (c) of this section or is terminated under subdivision (ii) of this subparagraph. Thus, the apportionment plan (including any amendments thereof) has a continuing effect and need not be renewed annually.

(ii) If an apportionment plan is adopted with respect to a particular December 31, such plan shall terminate with respect to a succeeding December 31, if:

(*a*) The controlled group ceases to remain in existence during the calendar year ending on such succeeding December 31,

(b) Any corporation which was a component member of such group on the particular December 31 is not a component member of such group on such succeeding December 31, or

(c) Any corporation which was not a component member of such group on the particular December 31 is a component member of such group on such succeeding December 31.

An apportionment plan, once terminated with respect to a December 31, is no longer effective. Accordingly, unless a new apportionment plan is adopted, the surtax exemption of the component members of the controlled group for their taxable years which include such December 31 and all December 31's thereafter will be determined in accordance with the rules provided in paragraph (a)(1)(i) of § 1.1561–2.

(iii) For purposes of subdivision (ii) *(a)—(a)* A parent-subsidiary controlled group of corporations shall be considered as remaining in existence as long as its common parent corporation remains as a common parent.

(b) A brother-sister controlled group of corporations shall be considered as remaining in existence as long as the requirements of paragraph (a)(3)(i) of § 1.1563–1 continue to be satisfied with respect to at least two corporations, taking into account the stock ownership of only those five or fewer persons whose stock ownership was taken into account at the time the apportionment plan adopted by the component members of such group first became effective.

(*c*) A combined group of corporations shall be considered as remaining in existence as long as the brother-sister controlled group of corporations referred to in paragraph (a)(4)(i) of § 1.1563–1 in respect of such combined group remains in existence (within the meaning of (*b*) of this subdivision), and at least one such corporation is a common parent of a parent-subsidiary controlled group of corporations referred to in such paragraph (a)(4)(i).

(*d*) If, by reason of paragraph (a)(5)(i) of § 1.1563–1, two or more insurance companies subject to taxation under section 802 are treated as an insurance group separate from any corporations which are members of a controlled group described in paragraph (a) (2), (3), or (4) of § 1.1563–1, such insurance group shall be considered as remaining in existence as long as the controlled group described in paragraph (a) (2), (3), or (4) of such section, as the case may be, remains in existence (within the meaning of (*a*), (*b*), or (*c*) of this subdivision), and there are at least two insurance companies which satisfy the requirements of paragraph (a)(5)(i) of such section.

(iv) If an apportionment plan is terminated with respect to a particular December 31 by reason of an occurrence described in subdivision (ii) (*b*) or (*c*) of this subparagraph, each corporation which is a component member of the controlled group on such particular December 31 should, on or before the date it files its income tax return for the taxable year which includes such particular December 31, notify the service center with which it files such return of such termination. If an apportionment plan is terminated with respect to a particular December 31 by reason of an occurrence described in subdivision (ii)(*a*) of this subparagraph, each corporation which was a component member of the controlled group on the preceding December 31 should, on or before the date it files its income tax return for the taxable year which includes such particular December 31, notify the service center with which it files such return of such termination.

(b) *Consents to plan.* (1)(i) The consent of a component member (other than a wholly-owned subsidiary) to an apportionment plan with respect to a particular December 31 shall be made by means of a statement, signed by any person who is duly authorized to act on behalf of the consenting member, stating that such member consents to the apportionment plan with respect to such December 31. The statement shall set forth in the name, address, taxpayer account number, and taxable year of the consenting component member, the amount apportioned to such member under the plan, and the service center where the original of the statement is to be filed. The consent of more than one component member may be incorporated in a single statement. The original of a statement of consent shall be filed with the service center with which the component member of the group on such December 31 which has the taxable year ending first on or after such date filed its return for such taxable year. (If two or more component members have the same such taxable year, a statement of consent may be filed with the service center with which the return for any such taxable year is filed.) The original of a statement of consent shall have attached thereto information (referred to in this paragraph as ‘‘group identification’’) setting forth the name, address, taxpayer account number, and taxable year of each component member of the controlled group on such December 31 (including wholly-owned subsidiaries) and the amount apportioned to each such member under the plan. If more than one original statement is filed, a statement may incorporate the group identification by reference to the name, address, taxpayer account number, and taxable year of a component member of the group which has attached such group identification to the original of its statement.

(ii) Each component member of the group on such December 31 (other than wholly-owned subsidiaries) should attach a copy of its consent (or a copy of the statement incorporating its consent) to the income tax return, amended return, or claim for refund filed with its service center for the taxable year including such date. Such copy shall either have attached thereto information on group identification or shall incorporate such information by reference to the name, address, taxpayer account number, and taxable year of a component member of the group which has attached such information to its income tax return, amended return, or claim for refund filed with the same service center for the taxable year including such date.

(2)(i) Each component member of a controlled group which is a wholly-owned subsidiary of such group with respect to a December 31 shall be deemed to consent to an apportionment plan with respect to such December 31, provided each component member of the group which is not a wholly-owned subsidiary consents to the plan. For purposes of this section, a component member of a controlled group shall be considered to be a wholly-owned subsidiary of the group with respect to a December 31 if, on each day preceding such date during its taxable year which includes such date, all of its stock is owned directly by one or more corporations which are component members of the group on such December 31.

(ii) Each wholly-owned subsidiary of a controlled group with respect to a December 31 should attach a statement containing the information which is required to be set forth in a statement of consent to an apportionment plan with respect to such December 31 to the income tax return, amended return, or claim for refund filed with its service center for the taxable year which includes such date. Such statement should either have attached thereto information on group identification or incorporate such information by reference to the name, address, taxpayer account number, and taxable year of a component member of the group which has attached such information to its income tax return, amended return, or claim for refund filed with the same service center for the taxable year including such date.

(c) *Amendment of plan.* An apportionment plan adopted with respect to a December 31 by a controlled group of corporations may be amended with respect to such December 31, or with respect to any succeeding December 31 for which the plan is effective under paragraph (a)(3) of this section. An apportionment plan must be amended with respect to a particular December 31 and the amendments to the plan shall be effective only if adopted in accordance with the rules prescribed in this section for the adoption of an original plan with respect to such December 31.

(d) *Component members filing consolidated returns.* If the component members of a controlled group of corporations on a December 31 include corporations which join in the filing of a consolidated return, the corporations filing the consolidated return shall be treated as a single component member for purposes of this section. Thus, for example, only one consent, executed by the common parent, to an apportionment plan filed pursuant to this section is required on behalf of the component members filing the consolidated return.

[T.D. 7528, 42 FR 64697, Dec. 28, 1977; 43 FR 4603, Feb. 3, 1978]

§ 1.1562–0 Effective date.

The provisions of §§ 1.1562–1 through 1.1562–7 apply only to taxable years beginning before January 1, 1975.

(Secs. 1561(a), (83 Stat. 599; 26 U.S.C. 1561 (a)) and 7805 (68A Stat. 917; 26 U.S.C. 7805, of the Internal Revenue Code))

[T.D. 7528, 42 FR 64702, Dec. 28, 1977]

§ 1.1562–1 Privilege of controlled group to elect multiple surtax exemptions.

(a) *Election*—(1) *In general.* (i) Under section 1562(a)(1) a controlled group of corporations has the privilege of electing to have each of its component members make its returns without regard to section 1561 (relating to single surtax exemption in the case of a controlled group of corporations). The election shall be made with respect to a particular December 31 and shall be valid only if each corporation which is required to consent to the election under the provisions of paragraph (a)(1) of §1.1562–3 gives its consent in the manner and within the time prescribed in such section. An election shall not be considered as made with respect to a particular December 31 until each corporation which is required to consent to the election under paragraph (c)(1) of §1.1562–3 files the original of a statement described in such paragraph (or, the original of a statement incorporating its consent is filed on its behalf). Accordingly, for purposes of returns filed before an election is made, the surtax exemption of component members of a controlled group of corporations shall be determined in accordance with section 1561 and the regulations thereunder. (If a valid election is made after the return is filed and within the time prescribed in §1.1562–3, such return should be amended (or a claim for refund should be made) to reflect the change in the amount of the surtax exemption (and the imposition of the additional tax) resulting from the election.)

(ii) An election once made with respect to a particular December 31 may not thereafter be withdrawn unless such election is terminated with respect to such December 31 in accordance with the provisions of section 1562(c) and §1.1562–2.

(iii) An election under section 1562(a)(1) may be made by a controlled group of corporations with respect to any December 31 (after December 31, 1962), unless:

(a) A component member of such group on such December 31 joins, or is required to join, in the filing of a consolidated return for its taxable year which includes such date, or

(b) Such controlled group is not eligible to make an election with respect to such December 31 by reason of section 1562(d).

See also section 243(b)(3)(A), relating to effect of election of 100-percent dividends received deduction, which may prevent a controlled group from making an election under section 1562(a)(1) with respect to a particular December 31.

(2) *Years for which effective.* (i) A valid election under section 1562(a)(1) by a controlled group of corporations with respect to a particular December 31 is effective with respect to:

(a) The taxable year of each component member of such group on such December 31 which includes such December 31, and

(b) Any succeeding taxable year of any corporation which is a component member of such group (or a successor group) on a succeeding December 31 included within any such succeeding taxable year.

Under section 1562(c) and §1.1562–2, an election under section 1562(a)(1) may be terminated with respect to a December 31 referred to in either (a) or (b) of this subdivision. For years affected by termination, see paragraph (c) of §1.1562–2.

(ii) For the application of an election under section 1562(a)(1) to certain short taxable years not including a December 31, see section 1562(f)(2) and §1.1562–6.

(iii) The provisions of this subparagraph may be illustrated by the following example:

Example. Corporation P is the common parent of a parent-subsidiary controlled group of corporations of which corporations P, S–1, and S–2 are component members on December 31, 1964. On December 31, 1965, the controlled group of corporations consists of the same component members as on December 31, 1964, except that corporation S–3 is also a component member on December 31, 1965. On December 31, 1966, the controlled group of corporations consists of the same component members as on December 31, 1965, except that S–1 is no longer a component member on December 31, 1966. In January 1965, the controlled group makes a valid election under section 1562(a)(1) with respect to December 31, 1964. Under subdivision (i)*(a)* of this subparagraph, the election (unless terminated) is effective with respect to the taxable years of P, S–1, and S–2 which include December 31, 1964. Under subdivision (i)*(b)* of this subparagraph, the election (unless terminated) is also effective with respect to the taxable years of P, S–1, S–2, and S–3 which include December 31, 1965, and with respect to the taxable years of P, S–2, and S–3 which include December 31, 1966.

(b) *Effect of election*—(1) *General.* If an election under section 1562(a)(1) is effective with respect to a taxable year of a corporation, then:

(i) Section 1561 shall not apply to such corporation for such taxable year, but

(ii) The additional tax imposed by section 1562(b) shall apply to such corporation for such taxable year (except as otherwise provided in subparagraph (3) of this paragraph).

(2) *Additional tax.* The additional tax imposed by section 1562(b) is an amount equal to 6 percent of so much of a corporation's taxable income for the taxable year as does not exceed the amount of such corporation's surtax exemption for such taxable year. However, if a corporation computes its tax under section 1201 (relating to alternative tax) and is subject to the additional tax imposed by section 1562(b) for such taxable year, the additional tax applies only to an amount equal to the taxable income reduced by the excess of the net long-term capital gain over the net short-term capital loss for such taxable year (to the extent such amount does not exceed the amount of such corporation's surtax exemption for such taxable year).

(3) *Exceptions.* The additional tax imposed by section 1562(b) shall not apply to a corporation for any taxable year if:

(i) Such corporation is the only component member of a controlled group on the December 31 included within such taxable year which has taxable income for the taxable years including such date, or

(ii) Such corporation's surtax exemption is disallowed for such year under any provision of the Code. For purposes of this subdivision, if the component members of a controlled group of corporations on a December 31 are limited in the aggregate to a single $25,000 surtax exemption for their taxable years which include such date, then the surtax exemption of each such component member shall be considered to be disallowed for such taxable year regardless of how the $25,000 is allocated among such members. For example, if pursuant to the authority provided in section 269(b), the Commissioner allocates a single $25,000 surtax exemption equally between two corporations which are the only component members of an electing controlled group of corporations, the surtax exemption of each such corporation shall be considered to be disallowed.

The application of this subparagraph in respect of a taxable year of a component member of a controlled group of corporations does not constitute the termination of an election made under section 1562(a)(1). Accordingly, such election continues in effect for the subsequent taxable years of such corporation and the other corporations which are component members of the controlled group, unless the election is terminated under section 1562(c).

(4) *Taxable income defined.* For purposes of this paragraph, the term ''taxable income'' means:

(i) In the case of a corporation subject to tax under section 511(a) (relating to tax on unrelated business income of charitable, etc., organizations at corporation rates), its ''unrelated business taxable income'' (as defined in section 512),

(ii) In the case of a life insurance company, its ''life insurance company taxable income'' (as defined in section 802(b)),

(iii) In the case of a regulated investment company, its ''investment company taxable income'' (as defined in section 852(b)(2)),

(iv) In the case of a real estate investment trust, its ''real estate investment trust taxable income'' (as defined in section 857(b)(2)), and

(v) In the case of an electing small business corporation, its ''taxable income'' (as defined in section 1373(d)).

(5) *Tax treated as imposed by section 11, etc.* For purposes of applying other sections of the Code, if for a taxable year a corporation is subject to both the tax imposed by section 11 and to the additional tax imposed by section 1562(b), then the additional tax is treated as if it were imposed by section 11. If a corporation is subject to a tax imposed by any section of chapter 1 of the Code other than section 11 but such tax is computed by reference to section 11, the additional tax is treated for purposes of the Code as imposed by such other section. (For example, the tax imposed by section 831(a) is ''computed

as provided in section 11''; therefore if a corporation is subject to both the tax imposed by section 831(a) and the additional tax imposed by section 1562(b) for any taxable year, the additional tax is treated as imposed by section 831(a) for such taxable year.) Accordingly, the credits against the tax imposed by chapter 1 of the Code allowable, for example, under sections 38 (relating to credit against tax for investment in certain depreciable property) and 33 (relating to credit for taxes of foreign countries and possessions of the United States) may be applied against the additional tax.

(6) *Special rules.* For purposes of sections 244 (relating to dividends received on certain preferred stock), 247 (relating to dividends paid on certain preferred stock of public utilities), 804 (a)(3) (relating to deduction for partially tax-exempt interest in the case of a life insurance company), and 922 (relating to special deduction for Western Hemisphere trade corporations), the normal tax rate referred to in such sections shall be determined without regard to the additional tax imposed by section 1562(b). For example, in the case of a corporation subject to the additional tax imposed by section 1562(b) for its taxable year ending December 31, 1965, the percentage computed under section 244(a)(2)(B) for such taxable year would be 48 percent.

[T.D. 6845, 30 FR 9744, Aug. 5, 1965, as amended by T.D. 6960, 33 FR 9302, June 25, 1968; T.D. 7181, 37 FR 8067, Apr. 25, 1972]

§1.1562–2 Termination of election.

(a) *In general.* An election under section 1562(a)(1) is terminated by any one of the occurrences described in paragraph (b) of this section. For years affected by termination, see paragraph (c) of this section.

(b) *Methods of termination*—(1) *Consent of the members.* An election may be terminated with respect to a particular December 31 by consent of the component members of a controlled group of corporations. A termination by consent shall be made with respect to a particular December 31 and shall be valid only if each corporation which is required to consent to the termination under paragraph (a)(1) of §1.1562–3 gives its consent in the manner and within the time prescribed in such section. A termination by consent shall not be considered as made with respect to a particular December 31 until each corporation which is required to consent to the termination under paragraph (c)(1) of §1.1562–3 files the original of a statement described in such paragraph (or, the original of a statement incorporating its consent is filed on its behalf).

(2) *Refusal by new member to consent.* (i) If on a December 31 a controlled group of corporations which has made an election under section 1562(a)(1) includes a new member which files a statement that it does not consent to the election with respect to such December 31, then such election shall terminate with respect to such date. Such statement shall be signed by any person who is duly authorized to act on behalf of the new member, and shall be attached to the income tax return of such new member for its taxable year which includes such December 31, filed on or before the date prescribed by law (including extensions of time) for the filing of such return. The statement shall set forth the name, address, taxpayer account number, and taxable year of each corporation which was a component member of the controlled group on such December 31. In the event of a termination under this subparagraph, each component member of the controlled group on such December 31 (other than such new member) should, within 30 days after such new member files the statement of refusal to consent, file notification of the termination with the district director with whom it filed (or will file) an income tax return for its taxable year which includes such December 31.

(ii) For purposes of subdivision (i) of this subparagraph, a corporation shall be considered to be a new member of a controlled group of corporations on a December 31 if such corporation:

(a) Is a component member of such group on such December 31, and

(b) Was not a member of such group on the January 1 immediately preceding such December 31.

(3) *Consolidated returns.* (i) If any corporation which is a component member of a controlled group of corporations on a December 31 joins, or is required

to join, in the filing of a consolidated return for its taxable year which includes such date, then an election under section 1562(a)(1) which is effective with respect to preceding taxable years of component members of the group shall terminate with respect to such December 31. In the event of a termination under this subparagraph, each component member of the controlled group on such December 31 which does not join in the filing of a consolidated return for the taxable year which includes such date, should, within 30 days after such consolidated return is filed, file notification of the termination with the district director with whom it filed (or will file) an income tax return for its taxable year which includes such December 31.

(ii) The provisions of this subparagraph may be illustrated by the following example:

Example. On each day of 1964 and 1965, Brown, an individual, owns all the stock of corporations M and P. Corporation P, in turn, owns all the stock of corporation S. Each corporation files a separate return for its taxable year ending on December 31, 1964. On April 30, 1965, the controlled group of corporations consisting of M, P, and S makes an election under section 1562(a)(1) with respect to December 31, 1964. On March 15, 1966, P and S join in the filing of a consolidated return for their taxable years ending December 31, 1965, and M files a separate return for its taxable year ending on such date. Under this subparagraph, the election by the controlled group with respect to December 31, 1964, is terminated with respect to December 31, 1965. On or before April 14, 1966, M should file notification of the termination with the district director with whom it filed its income tax return for 1965.

(4) *Controlled group no longer in existence.* If a controlled group of corporations is considered as going out of existence with respect to a particular December 31 under paragraph (b) of § 1.1562–5, and if there is no successor group in respect of such controlled group under the rules provided in paragraph (c) of such section, then an election under section 1562(a)(1) with respect to such controlled group shall terminate with respect to such December 31.

(c) *Effect of termination.* A termination under subparagraph (1), (2), (3), or (4) of paragraph (b) of this section is effective with respect to the December 31 referred to in such subparagraph. An election, once terminated, is no longer effective. Thus, a termination is effective with respect to the taxable year of each component member of a controlled group of corporations which includes such December 31 and with respect to all succeeding taxable years of each corporation which is a component member of such group (or a successor group). Moreover, after a termination, the controlled group (and any successor group) may not make a new election except as provided in section 1562(d) and § 1.1562–4.

[T.D. 6845, 30 FR 9745, Aug. 5, 1965]

§ 1.1562–3 Consents to election and termination.

(a) *Consents required*—(1) *General.* An election under paragraph (a)(1) of § 1.1562–1, or a termination by consent under paragraph (b)(1) of § 1.1562–2, may be made by a controlled group of corporations with respect to a particular December 31 only if each corporation, which was a component member of such group (or a successor group) on any December 31 falling within the period beginning on the particular December 31 and ending on the most recently past December 31, consents to the election or termination within the time prescribed in paragraph (b) of this section and in the manner prescribed in paragraph (c) of this section. Such election or termination may be made with respect to a particular December 31 whether or not the electing or terminating group ceases to remain in existence under the principles of paragraph (a) of § 1.1562–5 before such election or termination is made. In the case of an election with respect to December 31, 1963, if each corporation which is required to consent to the election under the rules provided in Treasury Decision 6733, approved May 11, 1964 (29 FR 6320, C.B. 1964–1 (Part 1), 635) gives its consent in the manner provided in such Treasury Decision before December 31, 1964, then a valid election under section 1562(a)(1) shall be considered to have been made with respect to December 31, 1963.

(2) *Examples.* The provisions of subparagraph (1) of this paragraph may be illustrated by the following examples:

Example (1). P Corporation is the common parent of a parent-subsidiary controlled group of which corporations P, S–1, and S–2 are component members on December 31, 1965. On December 31, 1966, the controlled group consists of the same component members as on December 31, 1965, except that S–1 is no longer a component member on December 31, 1966. On December 31, 1967, the controlled group of corporations consists of the same component members as on December 31, 1966, except that corporation S–3 is also a component member on December 31, 1967. In January 1968, the controlled group desires to make an election under section 1562(a)(1) with respect to December 31, 1965. Such election may be made only if P, S–1 (even though S–1 was not a component member of the group on December 31, 1966, or December 31, 1967), S–2, and S–3 (even though S–3 was not a component member of the group on December 31, 1965, or December 31, 1966) consent to the election.

Example (2). Assume the same facts as in example (1) and further assume that in January 1968, the controlled group makes a valid election with respect to December 31, 1965. If, in July 1968, the controlled group desires to terminate the election with respect to December 31, 1966, P, S–2, and S–3 must consent to the termination.

(b) *Time for consents*—(1) *Consents to election.* The consent of each component member of a controlled group of corporations which is required with respect to an election for a particular December 31, shall be made at any time after such December 31 and before the expiration of 3 years after the date on which the income tax return, for the taxable year of the component member of the group on such December 31 which has the taxable year ending first on or after such date, is required to be filed (determined without regard to any extensions of time for the filing of such return). See section 1562(e)(1).

(2) *Consents to termination.* The consent of each component member of a controlled group of corporations which is required with respect to a termination for a particular December 31, shall be made at any time after such December 31 and before the expiration of 3 years after such date. See section 1562(e)(2).

(3) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example (1). The component members of a controlled group of corporations on December 31, 1965, consist of 2 calendar-year corporations, X and Y. The group desires to make an election under section 1562(a)(1) with respect to December 31, 1965. Under subparagraph (1) of this paragraph, the required consents to the election must be made after December 31, 1965, and on or before March 15, 1969. The result is the same whether or not X or Y (or both) ceases to be a component member of the group after December 31, 1965, and whether or not X or Y (or both) is granted an extension of time for the filing of its income tax return for 1965.

Example (2). Assume the same facts as in example (1) except that X files its income tax return on the basis of a fiscal year ending January 31, and Y files its income tax return on the basis of a fiscal year ending on June 30. Under subparagraph (1) of this paragraph, the last day on which the required consents may be made with respect to an election for December 31, 1965, is April 15, 1969.

Example (3). Assume the same facts as in example (1) or (2) except that an election under section 1562(a)(1) is effective for X's and Y's taxable years including December 31, 1965. Assume further that the group desires to terminate the election with respect to December 31, 1965. Under subparagraph (2) of this paragraph, the required consents to the termination must be made after December 31, 1965, and on or before December 31, 1968.

(c) *Manner of consenting*—(1) *General rule.* (i) The consent of a corporation to an election or termination with respect to a particular December 31 (other than a corporation which is a wholly-owned subsidiary in respect of such election or termination) shall be made by means of a statement, signed by any person who is duly authorized to act on behalf of the consenting corporation, stating that such corporation consents to an election or termination (as the case may be) with respect to such December 31. Such statement shall set forth the name, address, and taxpayer account number of the consenting member and the internal revenue district where the original of the statement is to be filed. The consent of more than one component member may be incorporated in a single statement. The original of a statement of consent shall be filed with the district director with whom the component member of the group on the particular December 31 which has the taxable year ending first on or after such date filed its return for such taxable year. (If two or more component members have the same such taxable year, a statement of consent may be filed with the district director with whom the return for any such taxable year is filed.) The original of a statement shall have attached thereto information (referred to in this paragraph as ‘‘group identification’’) setting forth the name, address, taxpayer account number, and taxable year of each component member of the controlled group on such December 31 (including wholly-owned subsidiaries). If the particular December 31 is a December 31 other than the December 31 immediately preceding the date on which such statement is filed then, as part of the ‘‘group identification’’, the original of the statement shall also set forth the information required in the preceding sentence with respect to each other corporation which was a component member of the group (or a successor group) on any December 31 occurring after the particular December 31 on which the consenting corporation was a component member of such group. If more than one original statement is filed, a statement may incorporate the group identification by reference to the name, address, taxpayer account number, and taxable year of a component member of the group which has attached such group identification to the original of its statement.

(ii) Each corporation which was a component member of the electing (or terminating) controlled group (or a successor group) on a December 31 falling within the period beginning on the particular December 31 and ending on the most recently past December 31 (other than a wholly-owned subsidiary in respect of such election or termination) should attach a copy of its consent (or a copy of the statement incorporating its consent) to each income tax return, amended return, or claim for refund filed with its district director for a taxable year which includes any such December 31. Such copy should either have attached thereto information on group identification or incorporate such information by reference to the name, address, taxpayer account number, and taxable year of a component member of the group which has attached such information to its income tax return, amended return, or claim for refund filed with the same district director for a taxable year which includes any such December 31.

(2) *Wholly-owned subsidiaries.* (i) Each corporation which is a wholly-owned subsidiary of a controlled group of corporations in respect of an election or termination with respect to a particular December 31 shall be deemed to consent to such election or termination (as the case may be). For purposes of this section, a corporation shall be considered to be a wholly-owned subsidiary of a controlled group in respect of an election or termination with respect to a particular December 31 if, on each day falling within the period beginning on the first day of such corporation’s taxable year which included such December 31 and ending on the day on which such election or termination is made (or, if such corporation was not in existence on each day of such period, on each day falling within such period during which the corporation was in existence), all the stock of such corporation is owned directly by one or more corporations which are component members of such group (or a successor group) on any December 31 falling within such period.

(ii) Each wholly-owned subsidiary should attach a statement to an income tax return, amended return, or claim for refund filed with its district director for each taxable year which contains a December 31 falling within the period described in the last sentence of subdivision (i) of this subparagraph, stating that an election or termination (as the case may be) is effective for such taxable year and containing the information which would be required to be set forth in a statement of consent to the election or termination filed pursuant to subparagraph (1)(i) of this paragraph. Information on group identification may either be attached to the statement or incorporated by reference to the name, address, taxpayer account number, and taxable year of a component member of the group which has attached such group identification to an income tax return, amended return, or claim for refund filed with the same district director for the taxable year including such date.

(d) *Effect of consent.* Under section 1562(e), any consent to an election under section 1562(a)(1) or a termination under section 1562(c)(1) is deemed to be a consent to the application of section 1562(g)(1) (relating to tolling of statute of limitations on assessment of deficiencies). See §1.1562–7.

[T.D. 6845, 30 FR 9746, Aug. 5, 1965]

§1.1562–4 Election after termination.

(a) *In general.* Under section 1562(d), if a controlled group of corporations has made a valid election under section 1562(a)(1), and such election is terminated by any one of the occurrences described in paragraph (b) of §1.1562–2, then such group (or any controlled group which is a successor to such group within the meaning of paragraph (c) of §1.1562–5) is not eligible to make an election under section 1562(a)(1) with respect to any December 31 before the sixth December 31 after the particular December 31 with respect to which such termination was effective. For the particular December 31 with respect to which a termination is effective, see paragraph (c) of §1.1562–2.

(b) *Example.* The provisions of this section may be illustrated by the following example:

Example. In 1965, a controlled group of corporations makes a valid election under section 1562(a)(1) with respect to December 31, 1964. In 1967, the election is terminated with respect to December 31, 1964, by consent pursuant to paragraph (b)(1) of §1.1562–2. The group (or any successor group) is not eligible to make another election with respect to any December 31 before December 31, 1970 (i.e., the sixth December 31 after December 31, 1964, the particular December 31 with respect to which such termination was effective). If in this example the election had been terminated with respect to December 31, 1965, instead of December 31, 1964, the group (or any successor group) would not be eligible to make another election with respect to any December 31 before December 31, 1971.

[T.D. 6845, 30 FR 9747, Aug. 5, 1965]

§1.1562–5 Continuing and successor controlled groups.

(a) *Controlled group continuing in existence.* For purposes of §§1.1561–3 and 1.1562–1 through 1.1562–4:

(1) *Parent-subsidiary group.* A parent-subsidiary controlled group of corporations shall be considered as remaining in existence as long as (i) such group is not considered, under paragraph (c)(3) of this section, to be a successor controlled group in respect of another controlled group, and (ii) its common parent corporation remains as a common parent and satisfies the requirements of paragraph (a)(2)(i)*(b)* of §1.1563–1 with respect to the ownership of stock of at least one corporation.

(2) *Brother-sister group.* A brother-sister controlled group of corporations shall be considered as remaining in existence as long as the requirements of paragraph (a)(3)(i) of §1.1563–1 continue to be satisfied with respect to at least two corporations, taking into account the stock ownership of only those five or fewer persons whose stock ownership was taken into account with respect to the election under section 1562(a)(1).

(3) *Combined group.* A combined group of corporations shall be considered as remaining in existence as long as (i) the brother-sister controlled group of corporations referred to in paragraph (a)(4)(i) of §1.1563–1 in respect of such combined group remains in existence (within the meaning of subparagraph (2) of this paragraph), and (ii) at least one such corporation is a common parent of a parent-subsidiary controlled group of corporations referred to in such paragraph (a)(4)(i).

(4) *Insurance group.* If, by reason of paragraph (a)(5)(i) of §1.1563–1, two or more insurance companies subject to taxation under section 802 are treated as an insurance group separate from any corporations which are members of a controlled group described in paragraph (a) (2), (3), or (4) of §1.1563–1, such insurance group shall be considered as remaining in existence as long as (i) the controlled group described in paragraph (a) (2), (3), or (4) of such section, as the case may be, remains in existence (within the meaning of subparagraph (1), (2), or (3) of this paragraph), and (ii) there are at least two insurance companies which satisfy the requirements of paragraph (a)(5)(i) of such section.

(b) *Controlled group no longer in existence*—(1) *General.* Except as provided in subparagraph (3) of this paragraph, a controlled group of corporations is considered as going out of existence with respect to a December 31 if such group ceases to remain in existence under the principles of paragraph (a) of this section during the calendar year ending on such date.

(2) *Examples.* The provisions of subparagraph (1) of this paragraph may be illustrated by the following examples, in which each corporation referred to uses the calendar year as its taxable year:

Example (1). Corporation P was organized on January 1, 1964, and acquired all the stock of corporation S–1 on February 1, 1964, and all the stock of corporation S–2 on March 1, 1965. On April 1, 1965, P sold all its S–1 stock to the public. Beginning on February 1, 1964, P is the common parent corporation of a parent-subsidiary controlled group of corporations. Under paragraph (a)(1) of this section, the controlled group remains in existence throughout the remainder of 1964 and throughout 1965 even though after April 1, 1965, P satisfies the stock ownership requirements of paragraph (a)(2)(i) *(b)* of § 1.1563–1 only with respect to the stock of S–2, a corporation which was not a member of the group at the time the group was formed, and even though S–1 ceased to be a member of the group after the group was formed. Accordingly, if the controlled group makes a valid election under section 1562(a)(1) with respect to December 31, 1964, such election will remain in effect with respect to December 31, 1965, unless terminated under section 1562(c) (1), (2), or (3). Moreover, if such election were made and subsequently terminated with respect to December 31, 1964, the group would not be eligible (by reason of section 1562(d)) to make an election under section 1562(a)(1) with respect to December 31, 1965.

Example (2). Assume the same facts as in example (1) except that corporation S–2 is a franchised corporation as defined in section 1563(f)(4) for its 1965 taxable year. On December 31, 1965, S–2 is treated as an excluded member of the parent-subsidiary controlled group of which P is the common parent. See section 1563(b)(2)(E). Nevertheless, such controlled group is considered as remaining in existence throughout 1965.

Example (3). Assume the same facts as in example (1) except that P sold its S–1 stock on February 28, 1965, instead of April 1, 1965. Under the principles of paragraph (a)(1) of this section, the parent-subsidiary controlled group ceases to remain in existence on February 28, 1965. Accordingly, under subparagraph (1) of this paragraph, such group is considered as going out of existence with respect to December 31, 1965. Thus, if the group makes a valid election under section 1562(a)(1) with respect to December 31, 1964, such election terminates with respect to December 31, 1965. Moreover, the new controlled group of corporations consisting of P and S–2 is not precluded (by reason of section 1562(d)) from making an election under section 1562(a)(1) with respect to December 31, 1965.

Example (4). Smith, an individual, owns 80 percent of the only class of stock of corporations W and X on each day of 1966 and 1967. W, in turn, owns 80 percent of the only class of stock of corporation Y on each day of 1966. On April 15, 1967, X purchases 80 percent of the only class of corporation Z and on April 30, 1967, W sells all its stock in Y. Under paragraph (a)(3) of this section, the combined group remains in existence throughout 1966 and 1967 since (i) the brother-sister controlled group of corporations referred to in paragraph (a)(4)(i) of § 1.1563–1 in respect of such combined group remains in existence, and (ii) at least one corporation is a common parent of a parent-subsidiary controlled group referred to in such paragraph.

Example (5). Assume the same facts as in example (4) except that Y and Z are life insurance companies subject to taxation under section 802 of the Code. Further assume that throughout 1966 and 1967 Y owns all the stock of corporation S, and Z owns all the stock of corporation T. S and T are life insurance companies subject to taxation under section 802. Before April 15, 1967, under paragraph (a)(5)(i) of § 1.1563–1, Y and S are treated as an insurance group of corporations. After April 30, 1967, under paragraph (a)(4) of this section, Z and T are treated as an insurance group which remains in existence throughout 1966 and 1967, since the combined group remains in existence within the meaning of paragraph (a)(3) of this section throughout 1966 and 1967, and there are at all times at least two insurance companies which satisfy the requirements of paragraph (a)(5)(i) of § 1.1563–1. (However, after April 30, 1967, Y and S cease to be members of the combined group and are considered to be a new controlled group of corporations.)

Example (6). Jones, an individual, owns all the stock of corporations M and N on each day of 1966. On February 1, 1967, he gives all the stock of M to his 18-year-old son who continues to hold the M stock throughout the remainder of 1967. Since Jones (or his son) owns, or is considered as owning under paragraph (b)(6)(i) of § 1.1563–3, all the stock of M and N on each day of 1967, under paragraph (a)(2) of this section the brother-sister controlled group consisting of M and N remains in existence throughout 1967.

(3) *Special rule.* If:

(i) Under subparagraph (1) of this paragraph, a controlled group of corporations would (without regard to this subparagraph) be considered as going out of existence with respect to a December 31 because two or more corporations cease to be members of such group during the calendar year ending on such date,

(ii) Under paragraph (c) of this section, there is no successor group in respect of such group, and

(iii) At least two of such corporations are considered to be component members of such group on such December 31 by reason of the additional member rule of paragraph (b)(3) of §1.1563–1,

then such group shall be considered as going out of existence with respect to the December 31 immediately succeeding such December 31. For example, assume that corporations P and S file their returns on the basis of the calendar year. P owns all the stock of S from January 1, 1965, through December 1, 1965. On December 2, 1965, P sells the stock of S to the public. Under subparagraph (1) of this paragraph the controlled group consisting of P and S would (without regard to this subparagraph) be considered as going out of existence with respect to December 31, 1965, because P and S ceased to be members of the group on December 2, 1965. However, since there is no successor group in respect of the controlled group, and P and S are considered to be component members of such group on December 31, 1965, by reason of the additional member rule of paragraph (b)(3) of §1.1563–1, under this subparagraph the group is considered as going out of existence with respect to December 31, 1966, and not December 31, 1965.

(c) *Successor groups*—(1) *Transactions involving a former owner or owners.* If, as a result of the transfer of stock of a corporation or corporations (whether by sale, exchange, distribution, contribution to capital, or otherwise), a controlled group (‘‘old group’’) goes out of existence, and a new controlled group (‘‘new group’’) comes into existence, then the new group shall be considered to be a successor to the old group, provided one of the following applies:

(i) A person or persons who own stock of the new group that meets the more-than-50-percent stock ownership requirement of section 1563(a)(2)(B) owned stock which met such stock ownership requirement with respect to the old group;

(ii) A person or persons who owned more than 50 percent of the fair market value of the stock of the common parent of the old group owns, with respect to the new group, stock that meets the more-than-50-percent stock ownership requirement of section 1563(a)(2)(B); or

(iii) A person or persons who owned stock that met the more-than-50-percent stock ownership requirement of section 1563(a)(2)(B) with respect to the old group owns more than 50 percent of the fair market value of the stock of the common parent of the new group.

For purposes of this paragraph, the term ‘‘owns’’ includes direct ownership and ownership with the application of the rules contained in paragraph (b) of §1.1563–3. For purposes of this subparagraph, if as a result of the transfer of stock, a parent-subsidiary controlled group or a brother-sister controlled group becomes a part of a combined group, then such parent-subsidiary or brother-sister group shall be considered as going out of existence as a result of such transfer. Also for purposes of this subparagraph, if as a result of the transfer of stock, a combined group goes out of existence and a parent-subsidiary or brother-sister group which was part of such combined group remains, then such parent-subsidiary or brother-sister group shall be considered to be a new controlled group which came into existence as a result of such transfer.

(2) *Examples.* The principles of subparagraph (1) of this paragraph may be illustrated by the following examples:

Example (1). On each day of 1971, unrelated individuals Grey, Black, and Green own the following amounts of the only class of outstanding stock of each of corporations R and T: Grey owns 40 percent, Black owns 40 percent, and Green owns 20 percent. On March 1, 1972, Grey sells all his stock in both corporations to unrelated individual Clay. As a result of the transfer, the brother-sister controlled group consisting of R and T goes out of existence. Since Black and Green, who owned stock which met the more-than-50-percent stock ownership requirement of section 1563(a)(2)(B) with respect to the old group, owns stock of the new group (consisting of R and T) that meets the more-than-50-percent stock ownership requirement of section 1563(a)(2)(B), the new group is considered to be the successor to the old group. If Green also sold all his stock in both corporations to unrelated individual Barnes, Black would be the only stockholder of the new group whose stock ownership was taken into account in meeting the more-than-50-percent stock ownership requirement of section 1563(a)(2)(B) with respect to the old group. Since Black would not own stock of the new group that meets the more-than-50-percent stock ownership requirement of section 1563(a)(2)(B), the new group would not be considered a successor to the controlled group which went out of existence.

Example (2). On each day of 1971, all the outstanding stock of corporation P is owned in the following manner: Smith owns 30 percent, Jones owns 30 percent, and White owns 40 percent. P owns all the stock of corporation S_1, S_2, W_1 and W_2. On December 31, 1971, P, S_1, S_2, W_1, and W_2 are component members of the same controlled group. If on March 1, 1972, P distributes all the stock of S_1 and S_2 equally to Smith and Jones and all the stock of W_1 and W_2 to White, the controlled group consisting of P, S_1, S_2, W_1, and W_2 goes out of existence. Since Smith and Jones, who together owned stock which met the more-than-50-percent stock ownership requirement of section 1563 (a)(2)(B) with respect to the old group, now together own stock of the new group (consisting of S_1 and S_2) that meets the more-than-50-percent stock ownership requirement of section 1563(a)(2)(B), such new group is considered the successor to the old group. On the other hand, since White, the sole shareholder of W_1 and W_2, did not own stock which met such stock ownership requirement with respect to the old group, the new group consisting of W_1 and W_2 is not considered a successor of the old group.

(3) *Transactions involving two common parents.* If, as a result of the transfer of stock of a corporation or corporations (whether by sale, exchange, distribution, contribution to capital, or otherwise):

(i) A parent-subsidiary controlled group of corporations goes out of existence because its common parent corporation ceases to be a common parent, and

(ii) The stockholders (immediately before the transfer) of such common parent corporation, as a result of owning stock in such common parent, own (immediately after the transfer) more than 50 percent of the fair market value of the stock of a corporation which is the common parent corporation of a controlled group of corporations immediately after the transfer,

the resulting controlled group shall be considered to be a successor group in respect of the controlled group which went out of existence as a result of the transfer.

(4) *Example.* The provisions of subparagraph (3) of this paragraph may be illustrated by the following example:

Example. Corporation Y, the common parent of a parent-subsidiary controlled group, acquires the assets of corporation X, the common parent of another controlled group, in a statutory merger. The stockholders of X exchange their X stock for 60 percent of the fair market value of all of the outstanding shares of Y. Since, as a result of the exchange, (i) the parent-subsidiary controlled group of which X was the common parent goes out of existence because X ceases to be a common parent, and (ii) the stockholders of X, as a result of owning stock in X, own immediately after the exchange more than 50 percent of the fair market value of the stock of Y (the common parent of a controlled group of corporations immediately after the exchange), the controlled group of which Y is the common parent after the merger is considered to be a successor group in respect of the controlled group of which X was the common parent, and the group of which Y was the common parent before the merger is considered, under paragraph (a)(1) of this section, as no longer in existence. Thus, for example, if before the merger the controlled group of which X was the common parent was not eligible, by reason of the application of section 1562(d), to make an election under section 1562(a)(1) with respect to a December 31 occurring before December 31, 1970, then the successor controlled group would also be ineligible to make an election with respect to a December 31 occurring before December 31, 1970, whether or not the controlled group of which Y was the common parent before the merger had an election in effect pursuant to section 1562(a)(1).

[T.D. 6845, 30 FR 9747, Aug. 5, 1965, as amended by T.D. 7181, 37 FR 8067, Apr. 25, 1972]

§ 1.1562–6 Election for short taxable years.

(a) *Application of election to short taxable years*—(1) *General.* If the return of a corporation is for a short period which does not include a December 31, and if such corporation is a component member of a controlled group of corporations with respect to such short period, then an election under section 1562(a)(1) by such group shall apply with respect to such short period if:

(i) Such election is in effect with respect to both the December 31, immediately preceding such short period (hereinafter in this section referred to as the ‘‘preceding December 31’’) and the December 31 immediately succeeding such short period (hereinafter in this section referred to as the ‘‘succeeding December 31’’), or

(ii) Such election is in effect with respect to either the preceding December 31 or the succeeding December 31, and each corporation which is a component member of such group with respect to a short period falling between such dates consents to the application of such election to such short period. See subparagraph (4) of this paragraph for rules relating to an election with respect to certain short taxable years ending during 1964.

(2) *Component members.* For purposes of this section, the determination of whether a corporation is a component member of a controlled group of corporations with respect to a short period shall be made by applying the definition of component member contained in section 1563(b) and paragraph (b) of §1.1563–1 as if the last day of such short period were a December 31 occurring after December 31, 1963.

(3) *Example.* The provisions of this paragraph may be illustrated by the following example:

Example. On December 31, 1964, corporations P, S–1, and S–2 are component members of a parent-subsidiary controlled group of corporations. P, S–1, and S–2 each uses the calendar year as its taxable year. On February 1, 1965, S–1 transfers property to newly formed corporation S–3 (which begins business on that date) and receives all the stock of S–3 in return. S–3 adopts a fiscal year ending on November 30 as its taxable year and, therefore, files a return for the short taxable year beginning on February 1, 1965, and ending on November 30, 1965. On December 5, 1965, S–2 is liquidated, and therefore files a return for the short taxable year beginning on January 1, 1965, and ending on December 5, 1965. S–2 and S–3 are component members of the controlled group of corporations with respect to their short taxable years falling between December 31, 1964, and December 31, 1965, within the meaning of subparagraph (2) of this paragraph. Assume that the controlled group has an election under section 1562(a)(1) in effect with respect to either December 31, 1964, or December 31, 1965, but not both such dates. Under subparagraph (1)(ii) of this paragraph, S–2 and S–3 must both file consents to the application of the section 1562(a)(1) election with respect to their short periods in order for the election to be effective with respect to either such short period.

(4) *Election for certain short taxable years ending during 1964.* If:

(i) A corporation is a component member of a controlled group of corporations with respect to a short taxable year beginning and ending in 1964,

(ii) Each corporation which was a component member of such group on December 31, 1963 (determined without regard to paragraph (b)(2)(iii) of §1.1563–1, relating to the treatment of a corporation which has a taxable year ending on December 31, 1963, as an excluded member of a controlled group on such date) filed its income tax return on the basis of the calendar year ending on such date, and

(iii) Such controlled group of corporations is considered as going out of existence with respect to December 31, 1964, pursuant to paragraph (b)(4) of §1.1562–2,

then, for purposes of paragraph (a)(1)(ii) of this section, an election by such controlled group under section 1562(a)(1) shall be deemed to have been in effect for the preceding December 31. Each corporation which is a component member of such group with respect to a short period falling between such preceding and succeeding December 31’s must, on or before November 3, 1965, consent to the application of such election to its short period falling between such December 31’s.

(b) *Status at time of filing return.* If, on the date a corporation files its income tax return for a short period falling between a preceding and succeeding December 31 (with respect to which period it is a component member of a controlled group of corporations):

(1) *Election not effective.* An election under section 1562(a)(1) is not effective with respect to either such preceding or succeeding December 31, then such member shall determine its surtax exemption for purposes of such return in accordance with section 1561(b).

(2) *Election effective for preceding December 31.* An election under section 1562(a)(1) is effective with respect to such preceding December 31, and if on the date the return is filed the election has not been terminated with respect to such succeeding December 31, then such member may compute its tax for purposes of such return on the assumption that the conditions of paragraph

(a)(1)(i) of this section are satisfied with respect to such short period.

(3) *Election effective for preceding or succeeding December 31.* An election under section 1562(a)(1) is effective with respect to either (but not both) such preceding or succeeding December 31, and the return is filed after such succeeding December 31, then the member's surtax exemption for purposes of such return shall be determined in accordance with section 1561(b) unless:

(i) It attaches to such return its consent to the application of such election to such short period, and

(ii) Each other corporation which is a component member of the group with respect to a short period falling between such December 31's files, within 30 days after such return is filed, a consent to the application of such election to its short period falling between such December 31's.

(c) *Election or termination after returns filed*—(1) *Election.* If, after each component member of a controlled group with respect to a short period falling between a preceding and succeeding December 31 files its return for such short period, the group makes an election under section 1562(a)(1) with respect to such succeeding December 31, then the election shall apply with respect to each such short period only if each such member files, within 30 days after such election is made, a consent to the application of such election to its short period.

(2) *Termination.* If, after each component member of a controlled group with respect to a short period falling between a preceding and succeeding December 31 files its return for such short period, an election under section 1562(a)(1) which is effective with respect to such group with respect to such preceding December 31 is terminated with respect to such succeeding December 31, then such election shall apply with respect to each such short period only if each such member files, within 30 days after the termination occurs, a consent to the application of such election to its short period. For purposes of the preceding sentence, (i) the termination of an election by consent under section 1562(c)(1) shall be considered to occur on the date the termination is made, and (ii) the termination of an election under section 1562(c) (2), (3), or (4) shall be considered to occur on the date the event causing termination occurs (for example, on the date a new member files a refusal to consent, or on the date a consolidated return is filed) unless the election is made after such date, in which case the termination shall be considered to occur on the date the election is made.

(d) *Manner of consenting.* A consent referred to in paragraph (b)(3) or (c) of this section shall be made by means of a statement, signed by any person who is duly authorized to act on behalf of the consenting corporation, stating that such corporation consents to the application of an election under section 1562(a)(1) with respect to its short period. Each such statement shall set forth the name, address, taxpayer account number, and taxable year of (1) each corporation which is a component member of the electing controlled group with respect to a short period falling between the preceding December 31 and the succeeding December 31, and (2) each corporation which is a component member of such group on either the preceding or succeeding December 31. Each consenting corporation shall file such statement with the district director with whom it files (or filed) its income tax return for the short period.

[T.D. 6845, 30 FR 9749, Aug. 5, 1965]

§ 1.1562–7 Extension of statutory periods of limitation.

(a)(1) Under section 1562(g)(1), the statutory period for assessment of any deficiency against a corporation which is a component member of a controlled group of corporations with respect to any taxable year, to the extent such deficiency is attributable to an election under section 1562(a)(1) or a termination by consent under section 1562(c)(1), shall not expire before the expiration of one year after the date such election or termination is made.

(2) Under section 1562(g)(2), the statutory period for allowing or making credit or refund of any overpayment of tax by a corporation which is a component member of a controlled group of

corporations with respect to any taxable year, to the extent such overpayment is attributable to an election under section 1562(a)(1) or a termination by consent under section 1562(c)(1), shall not expire before the expiration of one year after the date such election or termination is made.

(b) For purposes of this section, the deficiency or overpayment in tax attributable to an election under section 1562(a)(1) or a termination by consent under section 1562(c)(1) shall be that amount of the increase or decrease in tax over the amount previously determined (as defined in section 1314(a)) for any taxable year which results from the application or nonapplication of section 1562, as the case may be. In determining the amount of such increase or decrease, due regard shall be given to the effect of any change in the amount of the surtax exemption (or the application or nonapplication of the additional tax under section 1562(b)) on credits allowable for any taxable year. Thus, for example, as a result of such change it may be necessary to recompute the amount of the investment credit allowable under section 38 for a taxable year for which the election or termination is effective and for other taxable years affected, or treated as affected, by an investment credit carryback or carryover (as defined in section 46(b)) determined with reference to the taxable years with respect to which such election or termination is effective.

(c) The provisions of this section shall not be construed to:

(1) Shorten the period within which an assessment of a deficiency may otherwise be made or the credit or refund of an overpayment may otherwise be allowed or made, or

(2) Apply to a deficiency or overpayment for a taxable year if the tax liability for such taxable year has been compromised under section 7122, or is the subject of a closing agreement under section 7121.

[T.D. 6845, 30 FR 9750, Aug. 5, 1965]

§ 1.1563–1 Definition of controlled group of corporations and component members.

(a) *Controlled group of corporations*—(1) *In general.* For purposes of sections 1561 through 1563 and the regulations thereunder, the term ‘‘controlled group of corporations’’ means any group of corporations which is either a ‘‘parent-subsidiary controlled group’’ (as defined in subparagraph (2) of this paragraph), a ‘‘brother-sister controlled group’’ (as defined in subparagraph (3) of this paragraph), a ‘‘combined group’’ (as defined in subparagraph (4) of this paragraph), or an ‘‘insurance group’’ (as defined in subparagraph (5) of this paragraph). For the exclusion of certain stock for purposes of applying the definitions contained in this paragraph, see section 1563(c) and § 1.1563–2.

(2) *Parent-subsidiary controlled group.* (i) The term ‘‘parent-subsidiary controlled group’’ means one or more chains of corporations connected through stock ownership with a common parent corporation if:

(a) Stock possessing at least 80 percent of the total combined voting power of all classes of stock entitled to vote or at least 80 percent of the total value of shares of all classes of stock of each of the corporations, except the common parent corporation, is owned (directly and with the application of paragraph (b)(1) of § 1.1563–3, relating to options) by one or more of the other corporations; and

(b) The common parent corporation owns (directly and with the application of paragraph (b)(1) of § 1.1563–3, relating to options) stock possessing at least 80 percent of the total combined voting power of all classes of stock entitled to vote or at least 80 percent of the total value of shares of all classes of stock of at least one of the other corporations, excluding, in computing such voting power or value, stock owned directly by such other corporations.

(ii) The definition of a parent-subsidiary controlled group of corporations may be illustrated by the following examples:

Example (1). P Corporation owns stock possessing 80 percent of the total combined voting power of all classes of stock entitled to vote of S Corporation. P is the common parent of a parent-subsidiary controlled group consisting of member corporations P and S.

Example (2). Assume the same facts as in example (1). Assume further that S owns stock possessing 80 percent of the total value of shares of all classes of stock of T Corporation. P is the common parent of a parent-subsidiary controlled group consisting of member corporations P, S, and T. The result would be the same if P, rather than S, owned the T stock.

Example (3). L Corporation owns 80 percent of the only class of stock of M Corporation and M, in turn, owns 40 percent of the only class of stock of O Corporation. L also owns 80 percent of the only class of stock of N Corporation and N, in turn, owns 40 percent of the only class of stock of O. L is the common parent of a parent-subsidiary controlled group consisting of member corporations L, M, N, and O.

Example (4). X Corporation owns 75 percent of the only class of stock of Y and Z Corporations; Y owns all the remaining stock of Z; and Z owns all the remaining stock of Y. Since intercompany stockholdings are excluded (that is, are not treated as outstanding) for purposes of determining whether X owns stock possessing at least 80 percent of the voting power or value of at least one of the other corporations, X is treated as the owner of stock possessing 100 percent of the voting power and value of Y and of Z for purposes of subdivision (i)*(b)* of this subparagraph. Also, stock possessing 100 percent of the voting power and value of Y and Z is owned by the other corporations in the group within the meaning of subdivision (i)*(a)* of this subparagraph. (X and Y together own stock possessing 100 percent of the voting power and value of Z, and X and Z together own stock possessing 100 percent of the voting power and value of Y.) Therefore, X is the common parent of a parent-subsidiary controlled group of corporations consisting of member corporations X, Y, and Z.

(3) *Brother-sister controlled group.* (i) The term ''brother-sister controlled group'' means two or more corporations if the same five or fewer persons who are individuals, estates, or trusts own (directly and with the application of the rules contained in paragraph (b) of § 1.1563–3) stock possessing:

(a) At least 80 percent of the total combined voting power of all classes of stock entitled to vote or at least 80 percent of the total value of shares of all classes of the stock of each corporation; and

(b) More than 50 percent of the total combined voting power of all classes of stock entitled to vote or more than 50 percent of the total value of shares of all classes of stock of each corporation, taking into account the stock ownership of each such person only to the extent such stock ownership is identical with respect to each such corporation. The five or fewer persons whose stock ownership is considered for purposes of the 80 percent requirement must be the same persons whose stock ownership is considered for purposes of the more-than-50 percent requirement.

(ii) The principles of this subparagraph may be illustrated by the following examples:

Example (1). The outstanding stock of corporations P, Q, R, S, and T, which have only one class of stock outstanding is owned by the following unrelated individuals:

CORPORATIONS

Individuals	P	Q	R	S	T	Identical ownership
A	55%	51%	55%	55%	55%	51%.
B	45%	49%	....	....	....	(45% in P & Q).
C	....	....	45%	....	....	
D	....	....	....	45%	....	
E	....	....	....	....	45%	
Total	100%	100%	100%	100%	100%	

Corporations P and Q are members of a brother-sister controlled group of corporations. Although the more-than-50 percent identical ownership requirement is met for all 5 corporations, corporations R, S, and T are not members becasue at least 80 percent of the stock of each of those corporations is not owned by the same 5 or fewer persons whose stock ownership is considered for purposes of the more-than-50 percent identical ownership requirement.

Example (2). The outstanding stock of corporations U and V, which have only one class of stock outstanding, is owned by the following unrelated individuals:

Individuals	Corporations	
	U (percent)	V (percent)
A	12	12
B	12	12
C	12	12
D	12	12
E	13	13
F	13	13
G	13	13
H	13	13
Total	100	100

Any group of five of the shareholders will own more than 50 percent of the stock in each corporation, in identical holdings. However, U and V are not members of brother-sister controlled group because at least 80 percent of the stock of each corporation is not owned by the same five or fewer persons.

Example (3). Corporation X and Y each have two classes of stock outstanding, voting common and non-voting common. (None of this stock is excluded from the definition of stock under section 1563(c).) Unrelated individuals A and B owns the following percentages of the class of stock entitled to vote (voting) and of the total value of shares of all classes of stock (value) in each of corporations X and Y:

Individuals	Corporations	
	X	Y
A	100% voting, 60% value.	75% voting, 60% value.
B	0% voting, 10% value	25% voting, 10% value.

No other shareholder of X owns (or is considered to own) any stock in Y. X and Y are a brother-sister controlled group of corporations. The group meets the more-than-50 percent ownership requirements because A and B own more than 50 percent of the total value of shares of all classes of stock of X and Y in identical holdings. (The group also meets the more-than-50 percent ownership requirement because of A's voting stock ownership.) The group meets the 80 percent requirement because A and B own at least 80 percent of the total combined voting power of all classes of stock entitled to vote.

Example (4). Assume the same facts as in example (3) except that the value of the stock owned by A and B is not more than 50 percent of the total value of shares of all classes of stock of each corporation in identical holdings. X and Y are not a brother-sister controlled group of corporations. The group meets the more-than-50 percent ownership requirement because A owns more than 50 percent of the total combined voting power of the voting stock of each corporation. For purposes of the 80 percent requirement, B's voting stock in Y cannot be combined with A's voting stock in Y since B, who does not own any voting stock in X, is not a person whose ownership is considered for purposes of the more-than-50 percent requirement. Because no other shareholder owns stock in both X and Y, these other shareholders' stock ownership is not counted towards meeting either the more-than-50 percent ownership requirement or the 80-percent ownership requirement.

(iii) Paragraph (a)(3) of this section, as amended, by T.D. 8179 applies to taxable years ending on or after December 31, 1970. See, however, the transitional rule in paragraph (d) of this section.

(4) *Combined group.* (i) The term ''combined group'' means any group of three or more corporations, if:

(a) Each such corporation is a member of either a parent-subsidiary controlled group of corporations or a brother-sister controlled group of corporations, and

(b) At least one of such corporations is the common parent of a parent-subsidiary controlled group and also is a member of a brother-sister controlled group.

(ii) The definition of a combined group of corporations may be illustrated by the following examples:

Example (1). Smith, an individual, owns stock possessing 80 percent of the total combined voting power of all classes of the stock of corporations X and Y. Y, in turn, owns stock possessing 80 percent of the total combined voting power of all classes of the stock of corporation Z. Since:

(a) X, Y, and Z are each members of either a parent-subsidiary or brother-sister controlled group of corporations, and

(b) Y is the common parent of a parent-subsidiary controlled group of corporations consisting of Y and Z, and also is a member of a brother-sister controlled group of corporations consisting of X and Y,

X, Y, and Z are members of the same combined group.

Example (2). Assume the same facts as in example (1), and further assume that corporation X owns 80 percent of the total value of shares of all classes of stock of corporation T, X, Y, Z, and T are members of the same combined group.

(5) *Insurance group.* (i) The term ''insurance group'' means two or more insurance companies subject to taxation under section 802 each of which is a member of a controlled group of corporations described in subparagraph (2), (3), or (4) of this paragraph. Such insurance companies shall be treated as a controlled group of corporations separate from any other corporations which are members of the controlled group described in such subparagraph (2), (3), or (4). For purposes of this section and §1.1562–5, the common parent of the controlled group described in subparagraph (2) of this paragraph shall be referred to as the common parent of the insurance group.

(ii) The definition of an insurance group may be illustrated by the following example:

Example. Corporation P owns all the stock of corporation I which, in turn, owns all the stock of corporation X. P also owns all the stock of corporation Y which, in turn, owns all the stock of corporation J. I and J are life insurance companies subject to taxation under section 802 of the Code. Since I and J are members of a parent-subsidiary controlled group of corporations, such companies are treated as members of an insurance group separate from the parent-subsidiary controlled group consisting of P, X, and Y. For purposes of this section and § 1.1562–5, P is referred to as the common parent of the insurance group even though P is not a member of such group.

(6) *Voting power of stock.* For purposes of § 1.1562–5, this section, and §§ 1.1563–2 and 1.1563–3, in determining whether the stock owned by a person (or persons) possesses a certain percentage of the total combined voting power of all classes of stock entitled to vote of a corporation, consideration will be given to all the facts and circumstances of each case. A share of stock will generally be considered as possessing the voting power accorded to such share by the corporate charter, by-laws, or share certificate. On the other hand, if there is any agreement, whether express or implied, that a shareholder will not vote his stock in a corporation, the formal voting rights possessed by his stock may be disregarded in determining the percentage of the total combined voting power possessed by the stock owned by other shareholders in the corporation, if the result is that the corporation becomes a component member of a controlled group of corporations. Moreover, if a shareholder agrees to vote his stock in a corporation in the manner specified by another shareholder in the corporation, the voting rights possessed by the stock owned by the first shareholder may be considered to be possessed by the stock owned by such other shareholder if the result is that the corporation becomes a component member of a controlled group of corporations.

(b) *Component members*—(1) *In general.* For purposes of sections 1561 through 1563 and the regulations thereunder, a corporation is a component member of a controlled group of corporations on a December 31 (and with respect to the taxable year which includes such December 31) if such corporation:

(i) Is a member of such controlled group on such December 31 and is not treated as an excluded member under subparagraph (2) of this paragraph, or

(ii) Is not a member of such controlled group on such December 31 but is treated as an additional member under subparagraph (3) of this paragraph.

(2) *Excluded members.* (i) A corporation, which is a member of a controlled group of corporations on the December 31 included within its taxable year, but was a member of such group for less than one-half of the number of days in such taxable year which precede such December 31, shall be treated as an excluded member of such group on such December 31.

(ii) A corporation which is a member of a controlled group of corporations on any December 31 shall be treated as an excluded member of such group on such date if, for its taxable year including such date, such corporation is:

(a) Exempt from taxation under section 501(a) (except a corporation which has unrelated business taxable income for such taxable year which is subject to tax under section 511) or 521,

(b) A foreign corporation not subject to taxation under section 882(a) for the taxable year,

(c) An electing small business corporation (as defined in section 1371(b)) not subject to the tax imposed by section 1378,

(d) A franchised corporation (as defined in section 1563(f)(4) and § 1.1563–4), or

(e) An insurance company subject to taxation under section 802 or 821, except that an insurance company taxable under section 802 which (without regard to this subdivision) is a component member of an insurance group described in paragraph (a)(5) of this section shall not be treated as an excluded member of such insurance group.

(iii) A corporation which has a taxable year ending on December 31, 1963, shall be treated as an excluded member of a controlled group on such date.

(3) *Additional members.* A corporation which:

(i) Is not a member of a controlled group of corporations on the December 31 included within its taxable year, and

(ii) Is not described, with respect to such taxable year, in subparagraph (2)(ii) *(a), (b), (c), (d),* or *(e),* or (2)(iii) of this paragraph,

shall be treated as an additional member of such group on such December 31 if it was a member of such group for one-half (or more) of the number of days in such taxable year which precede such December 31.

(4) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example (1). Brown, an individual, owns all of the stock of corporations W and X on each day of 1964. W and X each uses the calendar year as its taxable year. On January 1, 1964, Brown also owns all the stock of corporation Y (a fiscal year corporation with a taxable year beginning on July 1, 1964, and ending on June 30, 1965), which stock he sells on October 15, 1964. On December 31, 1964, Brown purchases all the stock of corporation Z (a fiscal year corporation with a taxable year beginning on September 1, 1964, and ending on August 31, 1965). On December 31, 1964, W, X, and Z are members of the same controlled group. However, the component members of the group on such December 31 are W, X, and Y. Under subparagraph (2)(i) of this paragraph, Z is treated as an excluded member of the group on December 31, 1964, since Z was a member of the group for less than one-half of the number of days (29 out of 121 days) during the period beginning on September 1, 1964 (the first day of its taxable year) and ending on December 30, 1964. Under subparagraph (3) of this paragraph, Y is treated as an additional member of the group on December 31, 1964, since Y was a member of the group for at least one-half of the number of days (107 out of 183 days) during the period beginning on July 1, 1964 (the first day of its taxable year) and ending on December 30, 1964.

Example (2). On January 1, 1964, corporation P owns all the stock of corporation S, which in turn owns all the stock of corporation S–1. On November 1, 1964, P purchases all of the stock of corporation X from the public and sells all of the stock of S to the public. Corporation X owns all the stock of corporation Y during 1964. P, S, S–1, X, and Y file their returns on the basis of the calendar year. On December 31, 1964, P, X, and Y are members of a parent-subsidiary controlled group of corporations; also, corporations S and S–1 are members of a different parent-subsidiary controlled group on such date. However, since X and Y have been members of the parent-subsidiary controlled group of which P is the common parent for less than one-half the number of days during the period January 1 through December 30, 1964, they are not component members of such group on such date. On the other hand, X and Y have been members of a parent-subsidiary controlled group of which X is the common parent for at least one-half the number of days during the period January 1 through December 30, 1964, and therefore they are component members of such group on December 31, 1964. Also since S and S–1 were members of the parent-subsidiary controlled group of which P is the common parent for at least one-half the number of days in the taxable years of each such corporation during the period January 1 through December 30, 1964, P, S, and S–1 are component members of such group on December 31, 1964.

Example (3). Throughout 1964, corporation M owns all the stock of corporation F which, in turn, owns all the stock of corporations L–1, L–2, X, and Y. M is a domestic mutual insurance company subject to taxation under section 821, F is a foreign corporation not engaged in trade or business within the United States, L–1 and L–2 are domestic life insurance companies subject to taxation under section 802, and X and Y are domestic corporations subject to tax under section 11 of the Code. Each corporation uses the calendar year as its taxable year. On December 31, 1964, M, F, L-1, L-2, X, and Y are members of a parent-subsidiary controlled group of corporations. However, under subparagraph (2)(ii) of this paragraph, M, F, L–1, and L–2 are treated as excluded members of the group on December 31, 1964. Thus, on December 31, 1964, the component members of the parent-subsidiary controlled group of which M is the common parent include only X and Y. Furthermore, since subparagraph (2)(ii)*(e)* of this paragraph does not result in L–1 and L–2 being treated as excluded members of an insurance group, L–1 and L–2 are component members of an insurance group on December 31, 1964.

(5) *Application of constructive ownership rules.* For purposes of subparagraphs (2)(i) and (3) of this paragraph, it is necessary to determine whether a corporation was a member of a controlled group of corporations for one-half (or more) of the number of days in its taxable year which precede the December 31 falling within such taxable year. Therefore, the constructive ownership rules contained in paragraph (b) of §1.1563–3 (to the extent applicable in making such determination) must be applied on a day-by-day basis. For example, if P Corporation owns all the stock of X Corporation on each day of 1964, and on December 30, 1964, acquires an option to purchase all the stock of Y Corporation (a calendar-year taxpayer which has been in existence on each day of 1964), the application of

paragraph (b)(1) of § 1.1563–3 on a day-by-day basis results in Y being a member of the brother-sister controlled group on only one day of Y's 1964 year which precedes December 31, 1964. Accordingly, since Y is not a member of such group for one-half or more of the number of days in its 1964 year preceding December 31, 1964, Y is treated as an excluded member of such group on December 31, 1964.

(c) *Overlapping groups*—(1) *In general.* If on a December 31 a corporation is a component member of a controlled group of corporations by reason of ownership of stock possessing at least 80 percent of the total value of shares of all classes of stock of the corporation, and if on such December 31 such corporation is also a component member of another controlled group of corporations by reason of ownership of other stock (that is, stock not used to satisfy the at-least-80-percent total value test) possessing at least 80 percent of the total combined voting power of all classes of stock of the corporation entitled to vote, then such corporation shall be treated as a component member only of the controlled group of which it is a component member by reason of the ownership of at least 80 percent of the total value of its shares.

(2) *Brother-sister controlled groups.* (i) If on a December 31, a corporation would, without application of this subparagraph, be a component member of more than one brother-sister controlled group on such date, such corporation shall be treated as a component member of only one such group on such date. Such a corporation may select which group in which it is to be included by filing an election as provided in this subparagraph. The election shall be in the form of a statement designating the group in which the corporation is to be included. The statement shall provide all the information with respect to stock ownership which is reasonably necessary to satisfy the Internal Revenue officer with whom it is filed that the corporation would, but for the election, be a component member of more than one controlled group. Once filed, the election is irrevocable and effective until such time that a change in the stock ownership of the corporation results in termination of membership in the controlled group in which such corporation has been included.

(ii) Except as provided in subdivision (iii) of this subparagraph, the statement shall be signed by a person duly authorized to act on behalf of such corporation and shall be filed on or before the due date (including extension of time) for the filing of the income tax return of such corporation for the taxable year. However, in the case of an election with respect to December 31, 1970, the statement shall be considered as timely filed if filed on or before December 15, 1971. In the event no election is filed in accordance with the provisions of this subdivision, then the district director with audit jurisdiction of such corporation's return for the taxable year which includes such December 31 shall determine the group in which such corporation is to be included, and such determination shall be binding for all subsequent years unless the corporation files a valid election with respect to any such subsequent year.

(iii) If more than one corporation would, without application of this subparagraph, be a component member of more than one controlled group, a single statement shall be signed by persons duly authorized to act on behalf of each such corporation. Such statement shall designate the group in which each corporation is to be included. The statement shall be attached to the income tax return of the corporation that, among those corporations which would (without the application of this subparagraph) belong to more than one group, has the taxable year including such December 31 which ends on the earliest date. However, in the case of an election with respect to December 31, 1970, the statement may be filed by December 15, 1971, with the service center director with whom such corporation's return is filed for the taxable year which includes such December 31. In the event no election is filed in accordance with the provisions of this subdivision, then the district director with audit jurisdiction of such corporation's return for the taxable year that includes such December 31 shall determine the group in which each corporation is to be included, and such determination shall be binding for all subsequent years unless the corporations file a valid election with respect to any such subsequent year.

(iv) The provisions of this subparagraph may be illustrated by the following examples (in which it is assumed that all the individuals are unrelated):

Example (1). On each day of 1970 all the outstanding stock of corporations M, N, and P is held in the following manner:

Individuals	Corporations		
	M	N	P
A	55%	40%	5%
B	40%	20%	40%
C	5%	40%	55%

Since the more-than-50-percent stock ownership requirement of section 1563(a)(2)(B) is met with respect to corporations M and N and with respect to corporations N and P, but not with respect to corporations M, N, and P, corporation N would, without the application of this subparagraph, be a component member on December 31, 1970, of overlapping groups consisting of M and N and of N and P. If N does not file an election in accordance with subdivision (ii) of this subparagraph, the district director with audit jurisdiction of N's return will determine the group in which N is to be included.

Example (2). On each day of 1970, all the outstanding stock of corporations S, T, W, X, and Z is held in the following manner:

Individuals	Corporations				
	S	T	W	X	Z
D	52%	52%	52%	52%	52%
E	40%	2%	2%	2%	2%
F	2%	40%	2%	2%	2%
G	2%	2%	40%	2%	2%
H	2%	2%	2%	40%	2%
I	2%	2%	2%	2%	40%

On December 31, 1970, the more-than-50-percent stock ownership requirement of section 1563(a)(2)(B) may be met with regard to any combination of the corporations but all five corporations cannot be included as component members of a single controlled group because the inclusion of all the corporations in a single group would be dependent upon taking into account the stock ownership of more than five persons. Therefore, if the corporations do not file a statement in accordance with subdivision (iii) of this subparagraph, the district director with audit jurisdiction of the return of the corporation whose taxable year ends on the earliest date will determine the group in which each corporation is to be included. The corporations or the district director, as the case may be, may designate that three corporations be included in one group and two corporations in another, or that any four corporations be included in one group and that the remaining corporation not be included in any group.

(d) *Transitional rules*—(1) *In general.* Treasury decision 8179 amended paragraph (a)(3) of this section to revise the definition of a brother-sister controlled group of corporations. In general, those amendments are effective for taxable years ending on or after December 31, 1970.

(2) *Limited nonretroactivity.* (i) Under the authority of section 7805(b), the Internal Revenue Service will treat an old group as a brother-sister controlled group corporations for purposes of applying sections 401, 404(a), 408(k), 409A, 410, 411, 412, 414, 415, and 4971 of the Code and sections 202, 203, 204, and 302 of the Employment Retirement Income Security Act of 1974 (ERISA) in a plan year or taxable year beginning before March 2, 1988. To the extent necessary to prevent an adverse effect on any old member (or any other corporation), or on any plan or other entity described in such sections (including plans, *etc.*, of corporations not part of such old group), that would result solely from the retroactive effect of the amendment to this section by T.D. 8179. An adverse effect includes the disqualification of a plan or the disallowance of a deduction or credit for a contribution to a plan. The Internal Revenue Service, however, will not treat an old member as a member of an old group to the extent that such treatment will have an adverse effect on that old member.

(ii) Section 7805(b) will not be applied pursuant to paragraph (d)(2)(i) of this section to treat an old member of an old group as a member of a brother-sister controlled group to prevent an adverse effect for a taxable year if, for that taxable year, that old member treats or has treated itself as not being a member of that old group for purposes of section 401, 404(a), 408(k), 409A, 410, 411, 412, 414, 415, and 4971 of the Code and sections 202, 203, 204, and 302 and title IV of ERISA for such taxable year (such as by filing, with respect to such taxable year, a return, amended return, or claim for credit or refund in which the amount of any deduction, credit, limitation, or tax due is determined by treating itself as not being a member of the old group for purposes of those sections). However, the fact that one or more (but not all) of the old members do not qualify for section 7805(b) treatment because of the preceding sentence will not preclude that old member (or members) from being treated as a member of the old group under paragraph (d)(2)(i) of this section in order to prevent the disallowance of a deduction or credit of another old member (or other corporation) or to prevent the disqualification of, or other adverse effect on, another old member's plan (or other entity) described in the sections of the Code and ERISA enumerated in such paragraph.

(3) *Election of general nonretroactivity.* In the case of a taxable year ending on or after December 31, 1970, and before March 2, 1988. An old group will be treated as a brother-sister controlled group of corporations for all purposes of the Code for such taxable year if—

(i) Each old member files a statement consenting to such treatment for such taxable year with the District Director having audit jurisdiction over its return within six months after March 2, 1988, and

(ii) No old member (A) files or has filed, with respect to such taxable year, a return, amended return, or claim for credit or refund in which the amount of any deduction, credit, limitation, or tax due is determined by treating any old member as not a member of the old group or (B) treats the employees of all members of the old group as not being employed by a single employer for purposes of sections 401, 404(a), 408(k), 409A, 410, 411, 412, 414, 415, and 4971 of the Code and sections 202, 203, 204, and 302 of ERISA for such taxable year.

(4) *Definitions.* For purposes of this paragraph (d) of this section—

(i) An ''old group'' is a brother-sister controlled group of corporations, determined by applying paragraph (a)(3) of this section as in effect before the amendments made by Treasury decision 8179, that is not a brother-sister controlled group of corporations, determined by applying paragraph (a)(3) of this section as amended by such Treasury decision, and

(ii) An ''old member'' is any corporation that is a member of an old group.

(5) *Election to choose between membership in more than one controlled group.* If—

(i) An old member has filed an election under paragraph (c)(2) of this section to be treated as a component member of an old group for a December 31 before March 2, 1988, and

(ii) That corporation would (without regard to such paragraph) be a component member of more than one brother-sister controlled group (not including an old group) on the December 31, that corporation may make an election under that paragraph by filing an amended return on or before September 2, 1988. This paragraph (d)(5) does not apply to a corporation that is treated as a member of an old group under paragraph (d)(3) of this section.

(6) *Refunds.* See section 6511(a) for period of limitation on filing claims for credit or refund.

[T.D. 6845, 30 FR 9751, Aug. 5, 1965, as amended by T.D. 6960, 33 FR 9302, June 25, 1968; T.D. 7181, 37 FR 8068, Apr. 25, 1972; T.D. 7293, 38 FR 32803, Nov. 28, 1973; T.D. 8179, 53 FR 6612, Mar. 2, 1988; 53 FR 8302, Mar. 14, 1988]

§ 1.1563–2 Excluded stock.

(a) *Certain stock excluded.* For purposes of sections 1561 through 1563 and the regulations thereunder, the term ''stock'' does not include:

(1) Nonvoting stock which is limited and preferred as to dividends, and

(2) Treasury stock.

(b) *Stock treated as excluded stock*—(1) *Parent-subsidiary controlled group.* If a corporation (hereinafter in this paragraph referred to as ''parent corporation'') owns 50 percent or more of the total combined voting power of all classes of stock entitled to vote or 50 percent or more of the total value of shares of all classes of stock in another corporation (hereinafter in this paragraph referred to as ''subsidiary corporation''), the provisions of subparagraph (2) of this paragraph shall apply. For purposes of this subparagraph, stock owned by a corporation means stock owned directly plus stock owned with the application of the constructive ownership rules of paragraph (b)

(1) and (4) of § 1.1563–3, relating to options and attribution from corporations. In determining whether the stock owned by a corporation possesses the requisite percentage of the total combined voting power of all classes of stock entitled to vote of another corporation, see paragraph (a)(6) of § 1.1563–1.

(2) *Stock treated as not outstanding.* If the provisions of this subparagraph apply, then for purposes of determining whether the parent corporation or the subsidiary corporation is a member of a parent-subsidiary controlled group of corporations within the meaning of paragraph (a)(2) of § 1.1563–1, the following stock of the subsidiary corporation shall, except as otherwise provided in paragraph (c) of this section, be treated as if it were not outstanding:

(i) *Plan of deferred compensation.* Stock in the subsidiary corporation held by a trust which is part of a plan of deferred compensation for the benefit of the employees of the parent corporation or the subsidiary corporation. The term ‘‘plan of deferred compensation’’ shall have the same meaning such term has in section 406(a)(3) and the regulations thereunder.

(ii) *Principal stockholders and officers.* Stock in the subsidiary corporation owned (directly and with the application of the rules contained in paragraph (b) of § 1.1563–3) by an individual who is a principal stockholder or officer of the parent corporation. A principal stockholder of the parent corporation is an individual who owns (directly and with the application of the rules contained in paragraph (b) of § 1.1563–3) 5 percent or more of the total combined voting power of all classes of stock entitled to vote or 5 percent or more of the total value of shares of all classes of stock of the parent corporation. An officer of the parent corporation includes the president, vice-presidents, general manager, treasurer, secretary, and comptroller of such corporation, and any other person who performs duties corresponding to those normally performed by persons occupying such positions.

(iii) *Employees.* Stock in the subsidiary corporation owned (directly and with the application of the rules contained in paragraph (b) of § 1.1563–3) by an employee of the subsidiary corporation if such stock is subject to conditions which substantially restrict or limit the employee’s right (or if the employee constructively owns such stock, the direct owner’s right) to dispose of such stock and which run in favor of the parent or subsidiary corporation. In general, any condition which extends, directly or indirectly, to the parent corporation or the subsidiary corporation preferential rights with respect to the acquisition of the employee’s (or direct owner’s) stock will be considered to be a condition described in the preceding sentence. It is not necessary, in order for a condition to be considered to be in favor of the parent corporation or the subsidiary corporation, that the parent or subsidiary be extended a discriminatory concession with respect to the price of the stock. For example, a condition whereby the parent corporation is given a right of first refusal with respect to any stock of the subsidiary corporation offered by an employee for sale is a condition which substantially restricts or limits the employee’s right to dispose of such stock and runs in favor of the parent corporation. Moreover, any legally enforceable condition which prohibits the employee from disposing of his stock without the consent of the parent (or a subsidiary of the parent) will be considered to be a substantial limitation running in favor of the parent corporation.

(iv) *Controlled exempt organization.* Stock in the subsidiary corporation owned (directly and with the application of the rules contained in paragraph (b) of § 1.1563–3) by an organization (other than the parent corporation):

(a) To which section 501 (relating to certain educational and charitable organizations which are exempt from tax) applies, and

(b) Which is controlled directly or indirectly by the parent corporation or subsidiary corporation, by an individual, estate, or trust that is a principal stockholder of the parent corporation, by an officer of the parent corporation, or by any combination thereof.

The terms ‘‘principal stockholder of the parent corporation’’ and ‘‘officer of the parent corporation'' shall have the same meanings in this subdivision as in subdivision (ii) of this subparagraph. The term ''control'' as used in this subdivision means control in fact and the determination of whether the control requirement of *(b)* of this subdivision is met will depend upon all the facts and circumstances of each case, without regard to whether such control is legally enforceable and irrespective of the method by which such control is exercised or exercisable.

(3) *Brother-sister controlled group.* If five or fewer persons (hereinafter referred to as common owners) who are individuals, estates, or trusts own (directly and with the application of the rules contained in paragraph (b) of § 1.1563–3) stock possessing 50 percent or more of the total combined voting power of all classes of stock entitled to vote or 50 percent or more of the total value of shares of all classes of stock in a corporation, the provisions of subparagraph (4) of this paragraph shall apply. In determining whether the stock owned by such person or persons possesses the requisite percentage of the total combined voting power of all classes of stock entitled to vote of a corporation, see paragraph (a)(6) of § 1.1563–1.

(4) *Stock treated as not outstanding.* If the provisions of this subparagraph apply, then for purposes of determining whether a corporation is a member of a brother-sister controlled group of corporations within the meaning of paragraph (a)(3) of § 1.1563–1, the following stock of such corporation shall, except as otherwise provided in paragraph (c) of this section, be treated as if it were not outstanding:

(i) *Exempt employees' trust.* Stock in such corporation held by an employees' trust described in section 401(a) which is exempt from tax under section 501(a), if such trust is for the benefit of the employees of such corporation.

(ii) *Employees.* Stock in such corporation owned (directly and with the application of the rules contained in paragraph (b) of § 1.1563–3) by an employee of such corporation if such stock is subject to conditions which run in favor of a common owner of such corporation (or in favor of such corporation) and which substantially restrict or limit the employee's right (or if the employee constructively owns such stock, the record owner's right) to dispose of such stock. The principles of subparagraph (2)(iii) of this paragraph shall apply in determining whether a condition satisfies the requirements of the preceding sentence. Thus, in general, a condition which extends, directly or indirectly, to a common owner or such corporation preferential rights with respect to the acquisition of the employee's (or record owner's) stock will be considered to be a condition which satisfies such requirements. For purposes of this subdivision, if a condition which restricts or limits an employee's right (or record owner's right) to dispose of his stock also applies to the stock in such corporation held by such common owner pursuant to a bona fide reciprocal stock purchase arrangement, such condition shall not be treated as one which restricts or limits the employee's (or record owner's) right to dispose of such stock. An example of a reciprocal stock purchase arrangement is an agreement whereby a common owner and the employee are given a right of first refusal with respect to stock of the employer corporation owned by the other party. If, however, the agreement also provides that the common owner has the right to purchase the stock of the employer corporation owned by the employee in the event that the corporation should discharge the employee for reasonable cause, the purchase arrangement would not be reciprocal within the meaning of this subdivision.

(iii) *Controlled exempt organization.* Stock in such corporation owned (directly and with the application of the rules contained in paragraph (b) of § 1.1563–3) by an organization:

(a) To which section 501(c)(3) (relating to certain educational and charitable organizations which are exempt from tax) applies, and

(b) Which is controlled directly or indirectly by such corporation, by an individual, estate, or trust that is a principal stockholder of such corporation, by an officer of such corporation, or by any combination thereof.

The terms ''principal stockholder'' and ''officer'' shall have the same meanings in this subdivision as in subparagraph

(2)(ii) of this paragraph. The term ‘‘control’’ as used in this subdivision means control in fact and the determination of whether the control requirement of *(b)* of this subdivision is met will depend upon all the facts and circumstances of each case, without regard to whether such control is legally enforceable and irrespective of the method by which such control is exercised or exercisable.

(5) *Other controlled groups.* The provisions of subparagraphs (1), (2), (3), and (4) of this paragraph shall apply in determining whether a corporation is a member of a combined group (within the meaning of paragraph (a)(4) of §1.1563–1) or an insurance group (within the meaning of paragraph (a)(5) of §1.1563–1). For example, under paragraph (a)(4) of §1.1563–1, in order for a corporation to be a member of a combined group such corporation must be a member of a parent-subsidiary group or a brother-sister group. Accordingly, the excluded stock rules provided by this paragraph are applicable in determining whether the corporation is a member of such group.

(6) *Meaning of employee.* For purposes of this section §§1.1563–3 and 1.1563–4, the term ‘‘employee’’ has the same meaning such term is given in section 3306(i) of the Code (relating to definitions for purposes of the Federal Unemployment Tax Act). Accordingly, the term employee as used in such sections includes an officer of a corporation.

(7) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example (1). Corporation P owns 70 of the 100 shares of the only class of stock of corporation S. The remaining shares of S are owned as follows: 4 shares by Jones (the general manager of P), and 26 shares by Smith (who also owns 5 percent of the total combined voting power of the stock of P). P satisfies the 50 percent stock ownership requirement of subparagraph (1) of this paragraph with respect to S. Since Jones is an officer of P and Smith is a principal stockholder of P, under subparagraph (2)(ii) of this paragraph the S stock owned by Jones and Smith is treated as not outstanding for purposes of determining whether P and S are members of a parent-subsidiary controlled group of corporations within the meaning of paragraph (a)(2) of §1.1563–1. Thus, P is considered to own stock possessing 100 percent (70÷70) of the total voting power and value of all the S stock. Accordingly, P and S are members of a parent-subsidiary controlled group of corporations.

Example (2). Assume the same facts as in example (1) and further assume that Jones owns 15 shares of the 100 shares of the only class of stock of corporation S–1, and corporation S owns 75 shares of such stock. P satisfies the 50 percent stock ownership requirement of subparagraph (1) of this paragraph with respect to S–1 since P is considered as owning 52.5 percent (70 percent× 75 percent) of the S–1 stock with the application of paragraph (b)(4) of §1.1563–3. Since Jones is an officer of P, under subparagraph (2)(ii) of this paragraph, the S–1 stock owned by Jones is treated as not outstanding for purposes of determining whether S–1 is a member of the parent-subsidiary controlled group of corporations. Thus, S is considered to own stock possessing 88.2 percent (75÷85) of the voting power and value of the S–1 stock. Accordingly, P, S, and S–1 are members of a parent-subsidiary controlled group of corporations.

Example (3). Corporation X owns 60 percent of the only class of stock of corporation Y. Davis, the president of Y, owns the remaining 40 percent of the stock of Y. Davis has agreed that if he offers his stock in Y for sale he will first offer the stock to X at a price equal to the fair market value of the stock on the first date the stock is offered for sale. Since Davis is an employee of Y within the meaning of section 3306(i) of the Code, and his stock in Y is subject to a condition which substantially restricts or limits his right to dispose of such stock and runs in favor of X, under subparagraph (2)(iii) of this paragraph such stock is treated as if it were not outstanding for purposes of determining whether X and Y are members of a parent-subsidiary controlled group of corporations. Thus, X is considered to own stock possessing 100 percent of the voting power and value of the stock of Y. Accordingly, X and Y are members of a parent-subsidiary controlled group of corporations. The result would be the same if Davis's wife, instead of Davis, owned directly the 40 percent stock interest in Y and such stock was subject to a right of first refusal running in favor of X.

(c) *Exception*—(1) *General.* If stock of a corporation is owned by a person directly or with the application of the rules contained in paragraph (b) of §1.1563–3 and such ownership results in the corporation being a component member of a controlled group of corporations on a December 31, then the stock shall not be treated as excluded stock under the provisions of paragraph (b) of this section if the result of applying such provisions is that such corporation is not a component member of a controlled group of corporations on such December 31.

(2) *Illustration.* The provisions of this paragraph may be illustrated by the following example:

Example. On each day of 1965, corporation P owns directly 50 of the 100 shares of the only class of stock of corporation S. Jones, an officer of P, owns directly 30 shares of S stock and P has an option to acquire such 30 shares from Jones. The remaining shares of S are owned by unrelated persons. If, pursuant to the provisions of paragraph (b)(2)(ii) of this section, the 30 shares of S stock owned directly by Jones is treated as not outstanding, the result is that P would be treated as owning stock possessing only 71 percent (50÷70) of the total voting power and value of S stock, and S would not be a component member of a controlled group of corporations on December 31, 1965. However, since P is considered as owning the 30 shares of S stock with the application of paragraph (b)(1) of this section, and such ownership plus the S stock directly owned by P (50 shares) results in S being a component member of a controlled group of corporations on December 31, 1965, the provisions of this paragraph apply. Therefore, the provisions of paragraph (b)(2)(ii) of this section do not apply with respect to the 30 shares of S stock, and on December 31, 1965, S is a component member of a controlled group of corporations consisting of P and S.

[T.D. 6845, 30 FR 9753, Aug. 5, 1965, as amended by T.D. 7181, 37 FR 8070, Apr. 4, 1972]

§ 1.1563–3 Rules for determining stock ownership.

(a) *In general.* In determining stock ownership for purposes of §§ 1.1562–5, 1.1563–1, 1.1563–2, and this section, the constructive ownership rules of paragraph (b) of this section apply to the extent such rules are referred to in such sections. The application of such rules shall be subject to the operating rules and special rules contained in paragraphs (c) and (d) of this section.

(b) *Constructive ownership*—(1) *Options.* If a person has an option to acquire any outstanding stock of a corporation, such stock shall be considered as owned by such person. For purposes of this subparagraph, an option to acquire such an option, and each one of a series of such options, shall be considered as an option to acquire such stock. For example, assume Smith owns an option to purchase 100 shares of the outstanding stock of M Corporation. Under this subparagraph, Smith is considered to own such 100 shares. The result would be the same if Smith owned an option to acquire the option (or one of a series of options) to purchase 100 shares of M stock.

(2) *Attribution from partnerships.* (i) Stock owned, directly or indirectly, by or for a partnership shall be considered as owned by any partner having an interest of 5 percent or more in either the capital or profits of the partnership in proportion to his interest in capital or profits, whichever such proportion is the greater.

(ii) The provisions of this subparagraph may be illustrated by the following example:

Example. Green, Jones, and White, unrelated individuals, are partners in the GJW partnership. The partners' interests in the capital and profits of the partnership are as follows:

Partner	Capital	Profits
	Percent	Percent
Green	36	25
Jones	60	71
White	4	4

The GJW partnership owns the entire outstanding stock (100 shares) of X Corporation. Under this subparagraph, Green is considered to own the X stock owned by the partnership in proportion to his interest in capital (36 percent) or profits (25 percent), whichever such proportion is the greater. Therefore, Green is considered to own 36 shares of the X stock. However, since Jones has a greater interest in the profits of the partnership, he is considered to own the X stock in proportion to his interest in such profits. Therefore, Jones is considered to own 71 shares of the X stock. Since White does not have an interest of 5 percent or more in either the capital or profits of the partnership, he is not considered to own any shares of the X stock.

(3) *Attribution from estates or trusts.* (i) Stock owned, directly or indirectly, by or for an estate or trust shall be considered as owned by any beneficiary who has an actuarial interest of 5 percent or more in such stock, to the extent of such actuarial interest. For purposes of this subparagraph, the actuarial interest of each beneficiary shall be determined by assuming the maximum exercise of discretion by the fiduciary in favor of such beneficiary and the maximum use of such stock to satisfy his rights as a beneficiary. A

beneficiary of an estate or trust who cannot under any circumstances receive any interest in stock held by the estate or trust, including the proceeds from the disposition thereof, or the income therefrom, does not have an actuarial interest in such stock. Thus, where stock owned by a decedent's estate has been specifically bequeathed to certain beneficiaries and the remainder of the estate is bequeathed to other beneficiaries, the stock is attributable only to the beneficiaries to whom it is specifically bequeathed. Similarly, a remainderman of a trust who cannot under any circumstances receive any interest in the stock of a corporation which is a part of the corpus of the trust (including any accumulated income therefrom or the proceeds from a disposition thereof) does not have an actuarial interest in such stock. However, an income beneficiary of a trust does have an actuarial interest in stock if he has any right to the income from such stock even though under the terms of the trust instrument such stock can never be distributed to him. The factors and methods prescribed in § 20.2031–7 of this chapter (Estate Tax Regulations) for use in ascertaining the value of an interest in property for estate tax purposes shall be used for purposes of this subdivision in determining a beneficiary's actuarial interest in stock owned directly or indirectly by or for a trust.

(ii) For the purposes of this subparagraph, property of a decedent shall be considered as owned by his estate if such property is subject to administration by the executor or administrator for the purposes of paying claims against the estate and expenses of administration notwithstanding that, under local law, legal title to such property vests in the decedent's heirs, legatees or devisees immediately upon death. With respect to an estate, the term "beneficiary" includes any person entitled to receive property of the decedent pursuant to a will or pursuant to laws of descent and distribution. A person shall no longer be considered a beneficiary of an estate when all the property to which he is entitled has been received by him, when he no longer has a claim against the estate arising out of having been a beneficiary, and when there is only a remote possibility that it will be necessary for the estate to seek the return of property or to seek payment from him by contribution or otherwise to satisfy claims against the estate or expenses of administration. When pursuant to the preceding sentence, a person ceases to be a beneficiary, stock owned by the estate shall not thereafter be considered owned by him.

(iii) Stock owned, directly or indirectly, by or for any portion of a trust of which a person is considered the owner under Subpart E, Part I, Subchapter J of the Code (relating to grantors and others treated as substantial owners) is considered as owned by such person.

(iv) This subparagraph does not apply to stock owned by any employees' trust described in section 401(a) which is exempt from tax under section 501(a).

(4) *Attribution from corporations.* (i) Stock owned, directly or indirectly, by or for a corporation shall be considered as owned by any person who owns (within the meaning of section 1563(d)) 5 percent or more in value or its stock in that proportion which the value of the stock which such person so owns bears to the value of all the stock in such corporation.

(ii) The provisions of this subparagraph may be illustrated by the following example:

Example. Brown, an individual, owns 60 shares of the 100 shares of the only class of outstanding stock of corporation P. Smith, an individual, owns 4 shares of the P stock, and corporation X owns 36 shares of the P stock. Corporation P owns, directly and indirectly, 50 shares of the stock of corporation S. Under this subparagraph, Brown is considered to own 30 shares of the S stock ($\frac{60}{100}\times 50$), and X is considered to own 18 shares of the S stock ($\frac{36}{100}\times 50$). Since Smith does not own 5 percent or more in value of the P stock, he is not considered as owning any of the S stock owned by P. If, in this example, Smith's wife had owned directly 1 share of the P stock, Smith (and his wife) would each own 5 shares of the P stock, and therefore Smith (and his wife) would be considered as owning 2.5 shares of the S stock ($\frac{5}{100}\times 50$).

(5) *Spouse.* (i) Except as provided in subdivision (ii) of this subparagraph, an individual shall be considered to

own the stock owned, directly or indirectly, by or for his spouse, other than a spouse who is legally separated from the individual under a decree of divorce, whether interlocutory or final, or a decree of separate maintenance.

(ii) An individual shall not be considered to own stock in a corporation owned, directly or indirectly, by or for his spouse on any day of a taxable year of such corporation, provided that each of the following conditions are satisfied with respect to such taxable year:

(a) Such individual does not, at any time during such taxable year, own directly any stock in such corporation.

(b) Such individual is not a member of the board of directors or an employee of such corporation and does not participate in the management of such corporation at any time during such taxable year.

(c) Not more than 50 percent of such corporation's gross income for such taxable year was derived from royalties, rents, dividends, interest, and annuities.

(d) Such stock in such corporation is not, at any time during such taxable year, subject to conditions which substantially restrict or limit the spouse's right to dispose of such stock and which run in favor of the individual or his children who have not attained the age of 21 years. The principles of paragraph (b)(2)(iii) of § 1.1563–2 shall apply in determining whether a condition is a condition described in the preceding sentence.

(iii) For purposes of subdivision (ii) (*c*) of this subparagraph, the gross income of a corporation for a taxable year shall be determined under section 61 and the regulations thereunder. The terms ''royalties'', ''rents'', ''dividends'', ''interest'', and ''annuities'' shall have the same meanings such terms are given for purposes of section 1244(c). See paragraph (e)(1)(ii), (iii), (iv), (v), and (vi) of § 1.1244(c)–1.

(6) *Children, grandchildren, parents, and grandparents.* (i) An individual shall be considered to own the stock owned, directly or indirectly, by or for his children who have not attained the age of 21 years, and, if the individual has not attained the age of 21 years, the stock owned, directly or indirectly, by or for his parents.

(ii) If an individual owns (directly, and with the application of the rules of this paragraph but without regard to this subdivision) stock possessing more than 50 percent of the total combined voting power of all classes of stock entitled to vote or more than 50 percent of the total value of shares of all classes of stock in a corporation, then such individual shall be considered to own the stock in such corporation owned, directly or indirectly, by or for his parents, grandparents, grandchildren, and children who have attained the age of 21 years. In determining whether the stock owned by an individual possesses the requisite percentage of the total combined voting power of all classes of stock entitled to vote of a corporation, see paragraph (a)(6) of § 1.1563–1.

(iii) For purposes of section 1563, and §§ 1.1563–1 through 1.1563–4, a legally adopted child of an individual shall be treated as a child of such individual by blood.

(iv) The provisions of this subparagraph may be illustrated by the following example:

Example (a) Facts. Individual F owns directly 40 shares of the 100 shares of the only class of stock of Z Corporation. His son, M (20 years of age), owns directly 30 shares of such stock, and his son, A (30 years of age), owns directly 20 shares of such stock. The remaining 10 shares of the Z stock are owned by an unrelated person.

(b) F's ownership. Individual F owns 40 shares of the Z stock directly and is considered to own the 30 shares of Z stock owned directly by M. Since, for purposes of the more-than-50-percent stock ownership test contained in subdivision (ii) of this subparagraph, F is treated as owning 70 shares or 70 percent of the total voting power and value of the Z stock, he is also considered as owning the 20 shares owned by his adult son, A. Accordingly, F is considered as owning a total of 90 shares of the Z stock.

(c) M's ownership. Minor son, M, owns 30 shares of the Z stock directly, and is considered to own the 40 shares of Z stock owned directly by his father, F. However, M is not considered to own the 20 shares of Z stock owned directly by his brother, A, and constructively by F, because stock constructively owned by F by reason of family attribution is not considered as owned by him for purposes of making another member of his family the constructive owner of such stock. See paragraph (c)(2) of this section. Accordingly, M owns and is considered as owning a total of 70 shares of the Z stock.

(d) A's ownership. Adult son, A, owns 20 shares of the Z stock directly. Since, for purposes of the more-than-50-percent stock ownership test contained in subdivision (ii) of this subparagraph, A is treated as owning only the Z stock which he owns directly, he does not satisfy the condition precedent for the attribution of Z stock from his father. Accordingly, A is treated as owning only the 20 shares of Z stock which he owns directly.

(c) *Operating rules and special rules*—(1) *In general.* Except as provided in subparagraph (2) of this paragraph, stock constructively owned by a person by reason of the application of subparagraph (1), (2), (3), (4), (5), or (6) of paragraph (b) of this section shall, for purposes of applying such subparagraphs, be treated as actually owned by such person.

(2) *Members of family.* Stock constructively owned by an individual by reason of the application of subparagraph (5) or (6) of paragraph (b) of this section shall not be treated as owned by him for purposes of again applying such subparagraphs in order to make another the constructive owner of such stock.

(3) *Precedence of option attribution.* For purposes of this section, if stock may be considered as owned by a person under subparagraph (1) of paragraph (b) of this section (relating to option attribution) and under any other subparagraph of such paragraph, such stock shall be considered as owned by such person under subparagraph (1) of such paragraph.

(4) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example (1). A, 30 years of age, has a 90 percent interest in the capital and profits of a partnership. The partnership owns all the outstanding stock of corporation X and X owns 60 shares of the 100 outstanding shares of corporation Y. Under subparagraph (1) of this paragraph, the 60 shares of Y constructively owned by the partnership by reason of subparagraph (4) of paragraph (b) of this section is treated as actually owned by the partnership for purposes of applying subparagraph (2) of paragraph (b) of this section. Therefore, A is considered as owning 54 shares of the Y stock (90 percent of 60 shares).

Example (2). Assume the same facts as in example (1). Assume further that B, who is 20 years of age and the brother of A, directly owns 40 shares of Y stock. Although the stock of Y owned by B is considered as owned by C (the father of A and B) under paragraph (b)(6)(i) of this section, under subparagraph (2) of this paragraph such stock may not be treated as owned by C for purposes of applying paragraph (b)(6)(ii) of this section in order to make A the constructive owner of such stock.

Example (3). Assume the same facts assumed for purposes of example (2), and further assume that C has an option to acquire the 40 shares of Y stock owned by his son, B. The rule contained in subparagraph (2) of this paragraph does not prevent the reattribution of such 40 shares to A because, under subparagraph (3) of this paragraph, C is considered as owning the 40 shares by reason of option attribution and not by reason of family attribution. Therefore, since A satisfies the more-than-50-percent stock ownership test contained in paragraph (b)(6)(ii) of this section with respect to Y, the 40 shares of Y stock constructively owned by C are reattributed to A, and A is considered as owning a total of 94 shares of Y stock.

(d) *Special rule of section 1563 (f)(3)(B)*—(1) *In general.* If the same stock of a corporation is owned (within the meaning of section 1563(d)) by two or more persons, then such stock shall be treated as owned by the person whose ownership of such stock results in the corporation being a component member of a controlled group on a December 31 which has at least one other component member on such date.

(2) *Component member of more than one group.* (i) If, by reason of subparagraph (1) of this paragraph, a corporation would (but for this subparagraph) become a component member of more than one controlled group on a December 31, such corporation shall be treated as a component member of only one such controlled group on such date. The determination as to which group such corporation is treated as a component member of shall be made in accordance with the rules contained in subdivisions (ii), (iii), and (iv) of this subparagraph.

(ii) In any case in which a corporation is a component member of a controlled group of corporations on a December 31 as a result of treating each share of its stock as owned only by the person who owns such share directly, then each such share shall be treated as owned by the person who owns such share directly.

(iii) If the application of subdivision (ii) of this subparagraph does not result in a corporation being treated as a component member of only one controlled group on a December 31, then the stock of such corporation described in subparagraph (1) of this paragraph shall be treated as owned by the one person described in such subparagraph who owns, directly and with the application of the rules contained in paragraph (b) (1), (2), (3), and (4) of this section, the stock possessing the greatest percentage of the total value of shares of all classes of stock of the corporation.

(iv) If the application of subdivision (ii) or (iii) of this subparagraph does not result in a corporation being treated as a component member of only one controlled group of corporations on a December 31, then the determination of that group of which such corporation is to be treated as a component member shall be made by the district director with audit jurisdiction of such corporation's return for the taxable year that includes such December 31 unless such corporation files an election as provided in this subdivision. The election shall be in the form of a statement, signed by a person authorized to act on behalf of such corporation, designating the group in which the corporation has elected to be included. The statement shall provide all the information with respect to stock ownership which is reasonably necessary to satisfy the district director that the corporation would, but for the election, be a component member of more than one controlled group. The statement shall be filed on or before the due date (including extensions of time) for the filing of the income tax return of such corporation for the taxable year. However, in the case of an election with respect to December 31, 1970, the statement shall be considered as timely filed if filed on or before December 15, 1971. Once filed, the election is irrevocable and effective until subdivision (ii) or (iii) of this subparagraph applies or until there is a substantial change in the stock ownership of such corporation.

(3) *Examples.* The provisions of this paragraph may be illustrated by the following examples, in which each corporation referred to uses the calendar year as its taxable year and the stated facts are assumed to exist on each day of 1970 (unless otherwise provided in the example):

Example (1). Jones owns all the stock of corporation X and has an option to purchase from Smith all the outstanding stock of corporation Y. Smith owns all the outstanding stock of corporation Z. Since the Y stock is considered as owned by two or more persons, under subparagraph (2)(ii) of this paragraph the Y stock is treated as owned only by Smith since he has direct ownership of such stock. Therefore, on December 31, 1970, Y and Z are component members of the same brother-sister controlled group. If, however, Smith had owned his stock in corporation Z for less than one-half of the number of days of Z's 1970 taxable year, then under subparagraph (1) of this paragraph the Y stock would be treated as owned only by Jones since his ownership results in Y being a component member of a controlled group on December 31, 1970.

Example (2). Individual H owns directly all the outstanding stock of corporation M. W (the wife of H) owns directly all the outstanding stock of corporation N. Neither spouse is considered as owning the stock directly owned by the other because each of the conditions prescribed in paragraph (b) (5)(ii) of this section is satisfied with respect to each corporation's 1970 taxable year. H owns directly 60 percent of the only class of stock of corporation P and W owns the remaining 40 percent of the P stock. Under subparagraph (2)(iii) of this paragraph, the stock of P is treated as owned only by H since H owns (directly and with the application of the rules contained in paragraph (b) (1), (2), (3), and (4) of this section) the stock possessing the greatest percentage of the total value of shares of all classes of stock of P. Accordingly, on December 31, 1970, P is treated as a component member of a brother-sister group consisting of M and P.

Example (3). Unrelated individuals A and B each own 49 percent of all the outstanding stock of corporation R, which in turn owns 70 percent of the only class of outstanding stock of corporation S. The remaining 30 percent of the stock of corporation S is owned by unrelated individual C. C also owns the remaining 2 percent of the stock of corporation R. Under the attribution rule of paragraph (b)(4) of this section A and B are each considered to own 34.3 percent of the stock of corporation S. Accordingly, since five or fewer persons own at least 80 percent of the stock of corporations R and S and also own more than 50 percent identically (A's and B's identical ownership each is 34.3 percent, C's identical ownership is 2 percent), on December 31, 1970, corporations R and S are treated as component members of the same brother-sister controlled group.

[T.D. 6845, 30 FR 9755, Aug. 5, 1965, as amended by T.D. 7181, 37 FR 8070, Apr. 25, 1972; T.D. 7779, 46 FR 29474, June 2, 1981; T.D. 8179, 53 FR 6613, Mar. 2, 1988]

§1.1563–4 Franchised corporations.

(a) *In general.* For purposes of paragraph (b)(2)(ii)*(d)* of §1.1563–1, a member of a controlled group of corporations shall be considered to be a franchised corporation for a taxable year if each of the following conditions is satisfied for one-half (or more) of the number of days preceding the December 31 included within such taxable year (or, if such taxable year does not include a December 31, for one-half or more of the number of days in such taxable year preceding the last day of such year):

(1) Such member is franchised to sell the products of another member, or the common owner, of such controlled group.

(2) More than 50 percent (determined on the basis of cost) of all the goods held by such member primarily for sale to its customers are acquired from members or the common owner of the controlled group, or both.

(3) The stock of such member is to be sold to an employee (or employees) of such member pursuant to a bona fide plan designed to eliminate the stock ownership of the parent corporation (as defined in paragraph (b)(1) of §1.1563–2) or of the common owner (as defined in paragraph (b)(3) of §1.1563–2) in such member.

(4) Such employee owns (or such employees in the aggregate own) directly more than 20 percent of the total value of shares of all classes of stock of such member. For purposes of this subparagraph, the determination of whether an employee (or employees) owns the requisite percentage of the total value of the stock of the member shall be made without regard to paragraph (b) of §1.1563–2, relating to certain stock treated as excluded stock. Furthermore, if the corporation has more than one class of stock outstanding, the relative voting rights as between each such class of stock shall be disregarded in making such determination.

(b) *Plan for elimination of stock ownership.* (1) A plan referred to in paragraph (a)(3) of this section must:

(i) Provide a reasonable selling price for the stock of the member, and

(ii) Require that a portion of the employee's compensation or dividends, or both, from such member be applied to the purchase of such stock (or to the purchase of notes, bonds, debentures, or similar evidences of indebtedness of such member held by the parent corporation or the common owner).

It is not necessary, in order to satisfy the requirements of subdivision (ii) of this subparagraph, that the plan require that a percentage of every dollar of the compensation and dividends be applied to the purchase of the stock (or the indebtedness). The requirements of such subdivision are satisfied if an otherwise qualified plan provides that under certain specified conditions (such as a requirement that the member earn a specified profit) no portion of the compensation and/or dividends need be applied to the purchase of the stock (or indebtedness), provided such conditions are reasonable.

(2) A plan for the elimination of the stock ownership of the parent corporation or of the common owner will satisfy the requirements of paragraph (a)(3) of this section and subparagraph (1) of this paragraph even though it does not require that the stock of the member be sold to an employee (or employees) if it provides for the redemption of the stock of the member held by the parent or common owner and under the plan the amount of such stock to be redeemed during any period is calculated by reference to the profits of such member during such period.

[T.D. 6845, 30 FR 9757, Aug. 5, 1965]

§1.1564–1 Limitations on additional benefits for members of controlled groups.

(a) *In general.* Section 1564(a)(1) provides that, with respect to any December 31 after 1969 and before 1975, only one component member of a controlled group of corporations (as defined in section 1563(a)) shall be allowed the full amount of:

(1) The $25,000 surtax exemption under section 1562 (relating to election of multiple surtax exemptions),

(2) The $100,000 amount under section 535(c) (2) and (3) (relating to the accumulated earnings credit), and

(3) The $25,000 limitation on the small business deduction of life insurance companies under sections 804(a)(4) and 809(d)(10).

The amounts otherwise allowed to the other component members of such controlled group for their taxable years which include such December 31 shall be reduced to the amounts set forth in the following schedule:

Taxable years including—	Surtax exemption	Amount under sec. 535(c) (2) and (3)	Small business deduction limitation
Dec. 31, 1970	$20,833	$83,333	$20,833
Dec. 31, 1971	16,667	66,667	16,667
Dec. 31, 1972	12,500	50,000	12,500
Dec. 31, 1973	8,333	33,333	8,333
Dec. 31, 1974	4,167	16,667	4,167

(b) *Election.* (1) Section 1564(a)(2) provides that, with respect to any December 31 after 1969 and before 1975, the component members of a controlled group of corporations shall elect which component member or members of such group shall be allowed for their taxable years which includes such December 31 the full amounts described in paragraph (a) (1), (2), and (3) of this section. In making such election, the members may allocate such full amounts among themselves in any manner they choose. For example, the group may select one of its members to receive the full amount of the $25,000 surtax exemption under section 1562 and another of its members to receive the full $100,000 amount under section 535(c)(2), or it may select one of its members to claim both, such full amounts.

(2) The election shall be made with respect to a particular December 31 and shall be valid only if each corporation which is a component member of the controlled group on such December 31 gives its consent. The consents shall be made by means of a statement, signed by persons duly authorized to act on behalf of each of the component members (other than wholly owned subsidiaries), stating which member has been selected to receive the amount which is not reduced under paragraph (a) of this section. The member so selected shall attach the statement to its income tax return for the taxable year including such December 31. The statement shall set forth the name, address, employer identification number, and taxable years of each of the other component members (including wholly owned subsidiaries) of the controlled group. Such other members shall attach a copy of the statement to their income tax returns for their taxable years including such December 31. An election plan adopted by a controlled group with respect to a particular December 31 shall be valid only for the taxable year of each member of the group which includes such December 31.

(3) Each component member of a controlled group which is a wholly owned subsidiary of such group with respect to a December 31 shall be deemed to consent to an election with respect to such December 31, provided each component member of the group which is not a wholly owned subsidiary consents to the election plan. A component member of a controlled group shall be considered to be a wholly owned subsidiary of the group with respect to a December 31 if, on each day preceding such date during its taxable year which includes such date, all of its stock is owned directly by one or more corporations which are component members of the group on such December 31.

Procedure and Administration

INFORMATION AND RETURNS

RETURNS AND RECORDS

SOURCE: Sections 1.6001–1 to 1.6091–4 contained in T.D. 6500, 25 FR 12108, Nov. 26, 1960, unless otherwise noted.

RECORDS, STATEMENTS, AND SPECIAL RETURNS

§ 1.6001–1 Records.

(a) *In general.* Except as provided in paragraph (b) of this section, any person subject to tax under subtitle A of the Code (including a qualified State individual income tax which is treated pursuant to section 6361(a) as if it were imposed by chapter 1 of subtitle A), or any person required to file a return of information with respect to income, shall keep such permanent books of account or records, including inventories, as are sufficient to establish the amount of gross income, deductions, credits, or other matters required to be shown by such person in any return of such tax or information.

(b) *Farmers and wage-earners.* Individuals deriving gross income from the business of farming, and individuals whose gross income includes salaries, wages, or similar compensation for personal services rendered, are required with respect to such income to keep such records as will enable the district director to determine the correct amount of income subject to the tax. It is not necessary, however, that with respect to such income individuals keep the books of account or records required by paragraph (a) of this section. For rules with respect to the records to be kept in substantiation of traveling and other business expenses of employees, see §1.162–17.

(c) *Exempt organizations.* In addition to such permanent books and records as are required by paragraph (a) of this section with respect to the tax imposed by section 511 on unrelated business income of certain exempt organizations, every organization exempt from tax under section 501(a) shall keep such permanent books of account or records, including inventories, as are sufficient to show specifically the items of gross income, receipts and disbursements. Such organizations shall also keep such books and records as are required to substantiate the information required by section 6033. See section 6033 and §§1.6033–1 through 1.6033–3.

(d) *Notice by district director requiring returns statements, or the keeping of records.* The district director may require any person, by notice served upon him, to make such returns, render such statements, or keep such specific records as will enable the district director to determine whether or not such person is liable for tax under subtitle A of the Code, including qualified State individual income taxes, which are treated pursuant to section 6361(a) as if they were imposed by chapter 1 of subtitle A.

(e) *Retention of records.* The books or records required by this section shall be kept at all times available for inspection by authorized internal revenue officers or employees, and shall be retained so long as the contents thereof may become material in the administration of any internal revenue law.

[T.D. 6500, 25 FR 12108, Nov. 26, 1960, as amended by T.D. 7122, 36 FR 11025, June 8, 1971; T.D. 7577, 43 FR 59357, Dec. 20, 1978; T.D. 8308, 55 FR 35593, Aug. 31, 1990]

§1.6001–2 Returns.

For rules relating to returns required to be made by every individual, estate, or trust which is liable for one or more qualified State individual income taxes, as defined in section 6362, for a taxable year, see paragraph (b) of §301.6361–1 of this chapter (Regulations on procedure and Administration).

[T.D. 7577, 43 FR 59357, Dec. 20, 1978]

TAX RETURNS OR STATEMENTS

§1.6011–1 General requirement of return, statement, or list.

(a) *General rule.* Every person subject to any tax, or required to collect any tax, under Subtitle A of the Code, shall make such returns or statements as are required by the regulations in this chapter. The return or statement shall include therein the information required by the applicable regulations or forms.

(b) *Use of prescribed forms.* Copies of the prescribed return forms will so far as possible be furnished taxpayers by district directors. A taxpayer will not be excused from making a return, however, by the fact that no return form has been furnished to him. Taxpayers not supplied with the proper forms should make application therefor to the district director in ample time to have their returns prepared, verified, and filed on or before the due date with the internal revenue office where such returns are required to be filed. Each taxpayer should carefully prepare his return and set forth fully and clearly the information required to be included therein. Returns which have not been so prepared will not be accepted as meeting the requirements of the Code. In the absence of a prescribed form, a statement made by a taxpayer disclosing his gross income and the deductions therefrom may be accepted as a tentative return, and, if filed within the prescribed time, the statement so made will relieve the taxpayer from liability for the addition to tax imposed for the delinquent filing of the return, provided that without unnecessary delay such a tentative return is supplemented by a return made on the proper form.

(c) *Tax withheld on nonresident aliens and foreign corporations.* For requirements respecting the return of the tax required to be withheld under chapter 3 of the Code on nonresident aliens and foreign corporations and tax-free covenant bonds, see § 1.1461–2.

[T.D. 6500, 25 FR 12108, Nov. 26, 1960, as amended by T.D. 6922, 32 FR 8713, June 17, 1967]

§ 1.6011–2 Returns, etc., of DISC's and former DISC's.

(a) *Records and information.* Every DISC and former DISC (as defined in section 992(a)) must comply with section 6001 and the regulations thereunder, relating to required records, statements, and special returns. Thus, for example, a DISC is required to maintain the books of account or records described in § 1.6001–1(a). In addition, every DISC must furnish to each of its shareholders on or before the last day of the second month following the close of the taxable year of the DISC a copy of Schedule K (Form 1120–DISC) disclosing the amounts of actual distributions and deemed distributions from the DISC to such shareholder for the taxable year of the DISC. In the case of a deficiency distribution to meet qualification requirements, see § 1.992–3(a)(4) for requirements that distribution be designated in the form of a communication sent to a shareholder and service center at the time of distribution.

(b) *Returns*—(1) *Requirement of return.* Every DISC (as defined in section 992(a)(1)) shall make a return of income. A former DISC (as defined in section 992(a)(3)) shall also make a return of income in addition to any other return required. The return required of a DISC or former DISC under this section shall be made on Form 1120–DISC. The provisions of § 1.6011–1 shall apply with respect to a DISC and former DISC. A former DISC should indicate clearly on Form 1120–DISC that it is making a return of income as a former DISC (for example, by labeling at the top of the Form 1120–DISC ''Former DISC''). In the case of a former DISC, those items on the form which pertain to the computation of taxable income shall not be completed, but Schedules J, K, L, and M must be completed. Except as otherwise specifically provided in the Code or regulations, the return of a DISC or former DISC is considered to be an income tax return.

(2) *Existence of DISC.* A corporation which is a DISC and which is in existence during any portion of a taxable year is required to make a return for that fractional part of its taxable year during which it was in existence.

[T.D. 7533, 43 FR 6603, Feb. 15, 1978]

§ 1.6011–3 Requirement of statement from payees of certain gambling winnings.

(a) *General rule.* Except as provided in paragraph (c) of this section, any person receiving a payment with respect to a wager in a sweepstakes, wagering pool, lottery, or other wagering transaction (including a parimutuel pool with respect to horse races, dog races, or jai alai) shall make a statement to the payer of such winnings upon the payer's demand. Such statements shall accompany the payer's return made with respect to the payment as required pursuant to section 3402(q) or 6041, as the case may be.

(b) *Contents of statement.* The statement referred to in paragraph (a) shall contain information (in addition to that required under section 6041(c)) as to the amount, if any, of winnings from identical wagers to which the recipient is entitled. If any person other than the recipient is entitled to all or a portion of the payment, the statement shall also include information as to the amount, if any, of winnings from identical wagers to which each such person is entitled. The statement shall be provided on Form W–2G or, if persons other than the recipient are entitled to all or a portion of such payment, on Form 5754.

(c) *Exception.* The requirement of paragraph (a) of this section does not apply with respect to any payment of winnings—

(1) From a slot machine play, or a bingo or keno game,

(2) Which is subject to withholding under section 3402(q) without regard to the existence of winnings from identical wagers, or

(3) For which no return of information under section 6041 is required of the payer.

(d) *Meaning of terms,* For purposes of this section, the terms ''sweepstakes'', ''wagering pool'', ''lottery'', ''other wagering transaction'' and ''identical wagers'' shall have the same meanings as ascribed to them under §31.3402(q)–1.

[T.D. 7919, 48 FR 46297, Oct. 12, 1983]

§1.6012–1 Individuals required to make returns of income.

(a) *Individual citizen or resident*—(1) *In general.* Except as provided in subparagraph (2) of this paragraph, an income tax return must be filed by every individual for each taxable year beginning before January 1, 1973, during which he receives $600 or more of gross income, and for each taxable year beginning after December 31, 1972, during which he receives $750 or more of gross income, if such individual is:

(i) A citizen of the United States, whether residing at home or abroad,

(ii) A resident of the United States even though not a citizen thereof, or

(iii) An alien bona fide resident of Puerto Rico during the entire taxable year.

(2) *Special rules.* (i) For taxable years beginning before January 1, 1970, an individual who is described in subparagraph (1) of this paragraph and who has attained the age of 65 before the close of his taxable year must file an income tax return only if he receives $1,200 or more of gross income during his taxable year.

(ii) For taxable years beginning after December 31, 1969, and before January 1, 1973, an individual described in subparagraph (1) of this paragraph (other than an individual referred to in section 142(b)):

(a) Who is not married (as determined by applying section 143(a) and the regulations thereunder) must file an income tax return only if he receives $1,700 or more of gross income during his taxable year, except that if such an individual has attained the age of 65 before the close of his taxable year an income tax return must be filed by such individual only if he receives $2,300 or more of gross income during his taxable year.

(b) Who is entitled to make a joint return under section 6013 and the regulations thereunder must file an income tax return only if his gross income received during his taxable year, when combined with the gross income of his spouse received during his taxable year, is $2,300 or more. However, if such individual or his spouse has attained the age of 65 before the close of the taxable year an income tax return must be filed by such individual only if their combined gross income is $2,900 or more. If both the individual and his spouse have attained the age of 65 before the close of the taxable year such return must be filed only if their combined gross income is $3,500 or more. However, this subdivision (ii)*(b)* shall not apply if the individual and his spouse did not have the same household as their home at the close of their taxable year, if such spouse files a separate return for a taxable year which includes any part of such individual's taxable year, or if any other taxpayer is entitled to an exemption for such individual or his spouse under section 151(e) for such other taxpayer's taxable year beginning in the calendar year in which such individual's taxable year begins. For example, a married student more than half of whose support is furnished by his father must file an income tax return if he receives $600 or more of gross income during his taxable year.

(iii) For taxable years beginning after December 31, 1972, an individual described in subparagraph (1) of this paragraph (other than an individual referred to in section 142(b)):

(a) Who is not married (as determined by applying section 143(a) and the regulations thereunder) must file an income tax return only if he receives $1,750 or more of gross income during his taxable year, except that if such an individual has attained the age of 65 before the close of his taxable year an income tax return must be filed by such individual only if he receives $2,500 or more of gross income during his taxable year.

(b) Who is entitled to make a joint return under section 6013 and the regulations thereunder must file an income tax return only if his gross income received during his taxable year, when combined with the gross income of his spouse received during his taxable year, is $2,500 or more. However, if such individual or his spouse has attained the age of 65 before the close of the taxable year an income tax return must be filed by such individual only if their combined gross income is $3,250 or more. If both the individual and his spouse attain the age of 65 before the close of the taxable year such return must be filed only if their combined gross income is $4,000 or more. However, this subdivision (iii)*(b)* shall not apply if the individual and his spouse did not have the same household as their home at the close of their taxable year, if such spouse files a separate return for a taxable year which includes any part of such individual's taxable year, or if any other taxpayer is entitled to an exemption for the taxpayer or his spouse under section 151(e) for such other taxpayer's taxable year beginning in the calendar year in which such individual's taxable year begins. For example, a married student more than half of whose support is furnished by his father must file an income tax return if he receives $750 or more of gross income during the taxable year.

(iv) For purposes of section 6012(a)(1)(A)(ii) and subdivisions (ii)*(b)* and (iii)*(b)* of this subparagraph, an individual and his spouse are considered to have the same household as their home at the close of a taxable year if the same household constituted the principal place of abode of both the individual and his spouse at the close of such taxable year (or on the date of death, if the individual or his spouse died within the taxable year). The individual and his spouse will be considered to have the same household as their home at the close of the taxable year notwithstanding a temporary absence from the household due to special circumstances, as, for example, in the case of a nonpermanent failure on the part of the individual and his spouse to have a common abode by reason of illness, education, business, vacation, or military service. For example, A, a calendar-year individual under 65 years of age, is married to B, also under 65 years of age, and is a member of the Armed Forces of the United States. During 1970 A is transferred to an overseas base. A and B give up their home, which they had jointly occupied until that time; B moves to the home of her parents for the duration of A's absence. They fully intend to set up a new joint household upon A's return. Neither A nor B must file a return for 1970 if their combined gross income for the year is less than $2,300 and if no other taxpayer is entitled to a dependency exemption for A or B under section 151(e).

(v) In the case of a short taxable year referred to in section 443(a)(1), an individual described in subparagraph (1) of this paragraph shall file an income tax return if his gross income received during such short taxable year equals or exceeds his own personal exemption allowed by section 151(b) (prorated as provided in section 443(c)) and, when applicable, his additional exemption for age 65 or more allowed by section 151(c)(1) (prorated as provided in section 443(c)).

(vi) For rules relating to returns required to be made by every individual who is liable for one or more qualified State individual income taxes, as defined in section 6362, for a taxable year, see paragraph (b) of § 301.6361–1 of this chapter (Regulations on Procedure and Administration).

(vii) For taxable years beginning after December 31, 1978, an individual who receives payments during the calendar year in which the taxable year begins under section 3507 (relating to advance payment of earned income credit) must file an income tax return.

(3) *Earned income from without the United States and gain from sale of residence.* For the purpose of determining whether an income tax return must be filed for any taxable year beginning after December 31, 1957, gross income shall be computed without regard to the exclusion provided for in section 911 (relating to earned income from sources without the United States). For the purpose of determining whether an income tax return must be filed for any taxable year ending after December 31, 1963, gross income shall be

computed without regard to the exclusion provided for in section 121 (relating to sale of residence by individual who has attained age 65). In the case of an individual claiming an exclusion under section 121, he shall attach Form 2119 to the return required under this paragraph and in the case of an individual claiming an exclusion under section 911, he shall attach Form 2555 to the return required under this paragraph.

(4) *Return of income of minor.* A minor is subject to the same requirements and elections for making returns of income as are other individuals. Thus, for example, for a taxable year beginning after December 31, 1972, a return must be made by or for a minor who has an aggregate of $1,750 of gross income from funds held in trust for him and from his personal services, regardless of the amount of his taxable income. The return of a minor must be made by the minor himself or must be made for him by his guardian or other person charged with the care of the minor's person or property. See paragraph (b)(3) of §1.6012–3. See §1.73–1 for inclusion in the minor's gross income of amounts received for his personal services. For the amount of tax which is considered to have been properly assessed against the parent, if not paid by the child, see section 6201(c) and paragraph (c) of §301.6201–1 of this chapter (Regulations on Procedure and Administration).

(5) *Returns made by agents.* The return of income may be made by an agent if, by reason of disease or injury, the person liable for the making of the return is unable to make it. The return may also be made by an agent if the taxpayer is unable to make the return by reason of continuous absence from the United States (including Puerto Rico as if a part of the United States) for a period of at least 60 days prior to the date prescribed by law for making the return. In addition, a return may be made by an agent if the taxpayer requests permission, in writing, of the district director for the internal revenue district in which is located the legal residence or principal place of business of the person liable for the making of the return, and such district director determines that good cause exists for permitting the return to be so made. However, assistance in the preparation of the return may be rendered under any circumstances. Whenever a return is made by an agent it must be accompanied by a power of attorney (or copy thereof) authorizing him to represent his principal in making, executing, or filing the return. A form 2848, when properly completed, is sufficient. In addition, where one spouse is physically unable by reason of disease or injury to sign a joint return, the other spouse may, with the oral consent of the one who is incapacitated, sign the incapacitated spouse's name in the proper place on the return followed by the words ''By __________________ Husband (or Wife),'' and by the signature of the signing spouse in his own right, provided that a dated statement signed by the spouse who is signing the return is attached to and made a part of the return stating:

(i) The name of the return being filed,

(ii) The taxable year,

(iii) The reason for the inability of the spouse who is incapacitated to sign the return, and

(iv) That the spouse who is incapacitated consented to the signing of the return.

The taxpayer and his agent, if any, are responsible for the return as made and incur liability for the penalties provided for erroneous, false, or fraudulent returns.

(6) *Form of return.* Form 1040 is prescribed for general use in making the return required under this paragraph. Form 1040A is an optional short form which, in accordance with paragraph (a)(7) of this section, may be used by certain taxpayers. A taxpayer otherwise entitled to use Form 1040A as his return for any taxable year may not make his return on such form if he elects not to take the standard deduction provided in section 141, and in such case he must make his return on Form 1040. For taxable years beginning before January 1, 1970, a taxpayer entitled under section 6014 and §1.6014–1 to elect not to show his tax on his return must, if he desires to exercise such election, make his return on Form 1040A. Form 1040W is an optional short

form which, in accordance with paragraph (a)(8) of this section, may be used only with respect to taxable years beginning after December 31, 1958, and ending before December 31, 1961.

(7)(i) *Use of Form 1040A.* Form 1040A may be filed only by those individuals entitled to use such form as provided by and in accordance with the instructions for such form.

(ii) *Computation and payment of tax.* Unless a taxpayer is entitled to elect under section 6014 and § 1.6014–1 not to show the tax on Form 1040A and does so elect, he shall compute and show on his return on Form 1040A the amount of the tax imposed by subtitle A of the Code and shall, without notice and demand therefor, pay any unpaid balance of such tax not later than the date fixed for filing the return.

(iii) *Change of election to use Form 1040A.* A taxpayer who has elected to make his return on Form 1040A may change such election. Such change of election shall be within the time and subject to the conditions prescribed in section 144(b) and § 1.144–2 relating to change of election to take, or not to take the standard deduction.

(8) *Use of Form 1040W for certain taxable years*—(i) *In general.* An individual may use Form 1040W as his return for any taxable year beginning after December 31, 1958, and ending before December 31, 1961, in which the gross income of the individual, regardless of the amount thereof:

(a) Consists entirely of remuneration for personal services performed as an employee (whether or not such remuneration constitutes wages as defined in section 3401(a)), dividends, or interest, and

(b) Does not include more than $200 from dividends and interest.

For purposes of determining whether gross income from dividends and interest exceeds $200, dividends from domestic corporations are taken into account to the extent that they are includible in gross income. For purposes of this subparagraph, any reference to Form 1040 in §§ 1.4–2, 1.142–1, and 1.144–1 and this section shall also be deemed a reference to Form 1040W.

(ii) *Change of election to use Form 1040W.* A taxpayer who has elected to make his return on Form 1040W may change such election. Such change of election shall be within the time and subject to the conditions prescribed in section 144(b) and § 1.144–2, relating to change of election to take, or not to take, the standard deduction.

(iii) *Joint return of husband and wife on Form 1040W.* A husband and wife, eligible under section 6013 and the regulations thereunder to file a joint return for the taxable year, may, subject to the provisions of this subparagraph, make a joint return on Form 1040W for any taxable year beginning after December 31, 1958, and ending before December 31, 1961, in which the aggregate gross income of the spouses (regardless of amount) consists entirely of remuneration for personal services performed as an employee (whether or not such remuneration constitutes wages as defined in section 3401(a)), dividends, or interest, and does not include more than $200 from dividends and interest. For purposes of determining whether gross income from sources to which the $200 limitation applies exceeds such amount in cases where both spouses receive dividends from domestic corporations, the amount of such dividends received by each spouse is taken into account to the extent that such dividends are includible in gross income. See section 116 and §§ 1.116–1 and 1.116–2. If a joint return is made by husband and wife on Form 1040W, the liability for the tax shall be joint and several.

(9) *Items of tax preference.* For a taxable year ending after December 31, 1969, an individual shall attach Form 4625 to the return required by this paragraph if during the year the individual:

(i) Has items of tax preference (described in section 57) in excess of its minimum tax exemption (determined under § 1.58–1) or

(ii) Uses a net operating loss carryover from a prior taxable year in which it deferred minimum tax under section 56(b).

(b) *Return of nonresident alien individual*—(1) *Requirement of return*—(i) *In general.* Except as otherwise provided in subparagraph (2) of this paragraph, every nonresident alien individual (other than one treated as a resident under section 6013 (g) or (h)) who is engaged in trade or business in the

United States at any time during the taxable year or who has income which is subject to taxation under subtitle A of the Code shall make a return on Form 1040NR. For this purpose it is immaterial that the gross income for the taxable year is less than the minimum amount specified in section 6012(a) for making a return. Thus, a nonresident alien individual who is engaged in a trade or business in the United States at any time during the taxable year is required to file a return on Form 1040 NR even though *(a)* he has no income which is effectively connected with the conduct of a trade or business in the United States, *(b)* he has no income from sources within the United States, or *(c)* his income is exempt from income tax by reason of an income tax convention or any section of the Code. However, if the nonresident alien individual has no gross income for the taxable year, he is not required to complete the return schedules but must attach a statement to the return indicating the nature of any exclusions claimed and the amount of such exclusions to the extent such amounts are readily determinable.

(ii) *Treaty income.* If the gross income of a nonresident alien individual includes treaty income, as defined in paragraph (b)(1) of §1.871–12, a statement shall be attached to the return on Form 1040NR showing with respect to that income:

(a) The amounts of tax withheld,

(b) The names and post office addresses of withholding agents, and

(c) Such other information as may be required by the return form, or by the instructions issued with respect to the form, to show the taxpayer's entitlement to the reduced rate of tax under the tax convention.

(2) *Exceptions*—(i) *Return not required when tax is fully paid at source.* A nonresident alien individual (other than one treated as a resident under section 6013 (g) or (h)) who at no time during the taxable year is engaged in a trade or business in the United States is not required to make a return for the taxable year if his tax liability for the taxable year is fully satisfied by the withholding of tax at source under chapter 3 of the Code. This subdivision does not apply to a nonresident alien individual who has income for the taxable year which is treated under section 871 (c) or (d) and §1.871–9 (relating to students or trainees) or §1.871–10 (relating to real property income) as income which is effectively connected for the taxable year with the conduct of a trade or business in the United States by that individual, or to a nonresident alien individual making a claim under §301.6402–3 of this chapter (Procedure and Administration Regulations) for the refund of an overpayment of tax for the taxable year. In addition, this subdivision does not apply to a nonresident alien individual who has income for the taxable year that is treated under section 871(b)(1) as effectively connected with the conduct of a trade or business within the United States by reason of the operation of section 897. For purposes of this subdivision, some of the items of income from sources within the United States upon which the tax liability will not have been fully satisfied by the withholding of tax at source under chapter 3 of the Code are:

(a) Interest upon so-called tax-free covenant bonds upon which, in accordance with section 1451 and §1.1451–1, a tax of only 2 percent is required to be withheld at the source,

(b) In the case of bonds or other evidences of indebtedness issued after September 28, 1965, amounts described in section 871(a)(1)(C),

(c) Capital gains described in section 871(a)(2) and paragraph (d) of §1.871– 7, and

(d) Accrued interest received in connection with the sale of bonds between interest dates, which, in accordance with paragraph (h) of §1.1441–4, is not subject to withholding of tax at the source.

(ii) *Return of individual for taxable year of change of U.S. citizenship or residence. (a)* If an alien individual becomes a citizen or resident of the United States during the taxable year and is a citizen or resident of the United States on the last day of such year, he must make a return on Form 1040 for the taxable year. However, a separate schedule is required to be attached to this return to show the income tax computation for the part of the taxable year during which the alien was neither a citizen nor resident of the United States, unless an election under section 6013 (g) or (h) is in effect for the alien. A Form 1040NR, clearly marked ''Statement'' across the top, may be used as such a separate schedule.

(b) If an individual abandons his U.S. citizenship or residence during the taxable year and is not a citizen or resident of the United States on the last day of such year, he must make a return on Form 1040NR for the taxable year, even if an election under section 6013(g) was in effect for the taxable year preceding the year of abandonment. However, a separate schedule is required to be attached to this return to show the income tax computation for the part of the taxable year during which the individual was a citizen or resident of the United States. A Form 1040, clearly marked ''Statement'' across the top, may be used as such a separate schedule.

(c) A return is required under this subdivision (ii) only if the individual is otherwise required to make a return for the taxable year.

(iii) *Beneficiaries of estates or trusts.* A nonresident alien individual who is a beneficiary of an estate or trust which is engaged in trade or business in the United States is not required to make a return for the taxable year merely because he is deemed to be engaged in trade or business within the United States under section 875(2). However, such nonresident alien beneficiary will be required to make a return if he otherwise satisfies the conditions of subparagraph (1)(i) of this paragraph for making a return.

(iv) *Certain alien residents of Puerto Rico.* This paragraph does not apply to a nonresident alien individual who is a bona fide resident of Puerto Rico during the taxable year. See section 876 and paragraph (a)(1)(iii) of this section.

(3) *Representative or agent for nonresident alien individual*—(i) *Cases where power of attorney is not required.* The responsible representative or agent within the United States of a nonresident alien individual shall make on behalf of his nonresident alien principal a return of, and shall pay the tax on, all income coming within his control as representative or agent which is subject to the income tax under subtitle A of the Code. The agency appointment will determine how completely the agent is substituted for the principal for tax purposes. Any person who collects interest or dividends on deposited securities of a nonresident alien individual, executes ownership certificates in connection therewith, or sells such securities under special instructions shall not be deemed merely by reason of such acts to be the responsible representative or agent of the nonresident alien individual. If the responsible representative or agent does not have a specific power of attorney from the nonresident alien individual to file a return in his behalf, the return shall be accompanied by a statement to the effect that the representative or agent does not possess specific power of attorney to file a return for such individual but that the return is being filed in accordance with the provisions of this subdivision.

(ii) *Cases where power of attorney is required.* Whenever a return of income of a nonresident alien individual is made by an agent acting under a duly authorized power of attorney for that purpose, the return shall be accompanied by the power of attorney in proper form, or a copy thereof, specifically authorizing him to represent his principal in making, executing, and filing the income tax return. Form 2848 may be used for this purpose. The agent, as well as the taxpayer, may incur liability for the penalties provided for erroneous, false, or fraudulent returns. For the requirements regarding signing of returns, see §1.6061–1. The rules of paragraph (e) of §601.504 of this chapter (Statement of Procedural Rules) shall apply under this subparagraph in determining whether a copy of a power of attorney must be certified.

(iii) *Limitation.* A return of income shall be required under this subparagraph only if the nonresident alien individual is otherwise required to make a return in accordance with this paragraph.

(4) *Disallowance of deductions and credits.* For provisions disallowing deductions and credits when a return of income has not been filed by or on behalf of a nonresident alien individual,

see section 874(a) and the regulations thereunder.

(5) *Effective date.* This paragraph shall apply for taxable years beginning after December 31, 1966, except that it shall not be applied to require (i) the filing of a return for any taxable year ending before January 1, 1974, which, pursuant to instructions applicable to the return, is not required to be filed or (ii) the amendment of a return for such a taxable year which, pursuant to such instructions, is required to be filed. For corresponding rules applicable to taxable years beginning before January 1, 1967, see 26 CFR 1.6012–1(b) (Revised as of January 1, 1967).

(c) *Cross reference.* For returns by fiduciaries for individuals, estates, and trusts, see §1.6012–3.

(Sec. 1445 (98 Stat. 655; 26 U.S.C. 1445), sec. 6012 (68A Stat. 732; 26 U.S.C. 6012), and 7805 (68A Stat. 917; 26 U.S.C. 7805) of the Internal Revenue Code of 1954)

[T.D. 6500, 25 FR 12108, Nov. 26, 1960]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting §1.6012–1, see the List of CFR Sections Affected in the Finding Aids section of this volume.

§1.6012–2 Corporations required to make returns of income.

(a) *In general*—(1) *Requirement of return.* Except as provided in paragraphs (e) and (g)(1) of this section with respect to charitable and other organizations having unrelated business income and to certain foreign corporations, respectively, every corporation, as defined in section 7701(a)(3), subject to taxation under subtitle A of the Code shall make a return of income regardless of whether it has taxable income or regardless of the amount of its gross income.

(2) *Existence of corporation.* A corporation in existence during any portion of a taxable year is required to make a return. If a corporation was not in existence throughout an annual accounting period (either calendar year or fiscal year), the corporation is required to make a return for that fractional part of a year during which it was in existence. A corporation is not in existence after it ceases business and dissolves, retaining no assets, whether or not under State law it may thereafter be treated as continuing as a corporation for certain limited purposes connected with winding up its affairs, such as for the purpose of suing and being sued. If the corporation has valuable claims for which it will bring suit during this period, it has retained assets and therefore continues in existence. A corporation does not go out of existence if it is turned over to receivers or trustees who continue to operate it. If a corporation has received a charter but has never perfected its organization and has transacted no business and has no income from any source, it may upon presentation of the facts to the district director be relieved from the necessity of making a return. In the absence of a proper showing of such facts to the district director, a corporation will be required to make a return.

(3) *Form of return.* The return required of a corporation under this section shall be made on Form 1120 unless the corporation is a type for which a special form is prescribed. The special forms of returns and schedules required of particular types of corporations are set forth in paragraphs (b) to (g), inclusive, of this section.

(b) *Personal holding companies.* A personal holding company, as defined in section 542, including a foreign corporation within the definition of such section, shall attach Schedule PH, Computation of U.S. Personal Holding Company Tax, to the return required by paragraph (a) or (g), as the case may be, of this section.

(c) *Insurance companies*—(1) *Life insurance companies.* A life insurance company subject to tax under section 802 or 811 shall make a return on Form 1120L. There shall be filed with the return (i) a copy of the annual statement, the form of which has been approved by the National Association of Insurance Commissioners, which is filed by the company for the year covered by such return with the insurance departments of States, Territories, and the District of Columbia, and which shows the reserves used by the company in computing the taxable income reported on its return, and (ii) copies of Schedule A (real estate) and Schedule D (bonds and stocks) of such annual statement.

(2) *Mutual insurance companies.* A mutual insurance company (other than a

life or marine insurance company and other than a fire insurance company subject to the tax imposed by section 831) or an interinsurer or reciprocal underwriter subject to tax under section 821 shall make a return on Form 1120M. See paragraph (a)(3) of § 1.821–1. There shall be filed with the return (i) a copy of the annual statement, the form of which has been approved by the National Association of Insurance Commissioners, which is filed by the company for the year covered by such return with the insurance departments of States, Territories, and the District of Columbia, and (ii) copies of Schedule A (real estate) and Schedule D (bonds and stocks) of such annual statement.

(3) *Other insurance companies.* Every insurance company (other than a life or mutual insurance company), every mutual marine insurance company, and every mutual fire insurance company, subject to tax under section 831, and every mutual savings bank conducting a life insurance business and subject to tax under section 594, shall make a return on Form 1120. See paragraph (c) of § 1.831–1. There shall be filed with the return a copy of the annual statement, the form of which has been approved by the National Association of Insurance Commissioners, which contains the underwriting and investment exhibit for the year covered by such return.

(4) *Foreign insurance companies.* The provisions of subparagraphs (1), (2), and (3) of this paragraph concerning the returns and statements of insurance companies subject to tax under section 802 or 811, section 821, and section 831, respectively, are applicable to foreign insurance companies subject to tax under such sections, except that the copy of the annual statement, the form of which has been approved by the National Association of Insurance Commissioners, required to be submitted with the return shall, in the case of a foreign insurance company, be a copy of the statement relating to the United States business of such company.

(d) *Affiliated groups.* For the forms to be used by affiliated corporations filing a consolidated return, see § 1.1502–75.

(e) *Charitable and other organizations with unrelated business income.* Every organization described in section 511(a)(2) which is subject to the tax imposed by section 511(a)(1) on its unrelated business taxable income shall make a return on Form 990–T for each taxable year if it has gross income, included in computing unrelated business taxable income for such taxable year, of $1,000 or more. The filing of a return of unrelated business income does not relieve the organization of the duty of filing other required returns.

(f) *Farmers' cooperatives.* Farmers' cooperative organizations described in section 521 are required to make a return of income whether or not such organizations are subject to the taxes imposed by sections 11 and 1201 as prescribed in section 522 or 1381. The return shall be made on Form 990–C.

(g) *Returns by foreign corporations.* (1) *Requirement of return*—(i) *In general.* Except as otherwise provided in subparagraph (2) of this paragraph, every foreign corporation which is engaged in trade or business in the United States at any time during the taxable year or which has income which is subject to taxation under subtitle A of the Code (relating to income taxes) shall make a return on Form 1120–F. Thus, for example, a foreign corporation which is engaged in trade or business in the United States at any time during the taxable year is required to file a return on Form 1120–F even though *(a)* it has no income which is effectively connected with the conduct of a trade or business in the United States, *(b)* it has no income from sources within the United States, or *(c)* its income is exempt from income tax by reason of an income tax convention or any section of the Code. However, if the foreign corporation has no gross income for the taxable year, it is not required to complete the return schedules but must attach a statement to the return indicating the nature of any exclusions claimed and the amount of such exclusions to the extent such amounts are readily determinable.

(ii) *Treaty income.* If the gross income of a foreign corporation includes treaty income, as defined in paragraph (b)(1) of § 1.871–12, a statement shall be attached to the return on Form 1120–F showing with respect to that income:

(a) The amounts of tax withheld,

(b) The names and post office addresses of withholding agents, and

(c) Such other information as may be required by the return form or by the instructions issued with respect to the form, to show the taxpayer's entitlement to the reduced rate of tax under the tax convention.

(iii) *Balance sheet and reconciliation of income.* At the election of the taxpayer, the balance sheets and reconciliation of income, as shown on Form 1120–F, may be limited to:

(a) The assets of the corporation located in the United States and to its other assets used in the trade or business conducted in the United States, and

(b) Its income effectively connected with the conduct of a trade or business in the United States and its other income from sources within the United States.

(2) *Exceptions*—(i) *Return not required when tax is fully paid at source—(a) In general.* A foreign corporation which at no time during the taxable year is engaged in a trade or business in the United States is not required to make a return for the taxable year if its tax liability for the taxable year is fully satisfied by the withholding of tax at source under chapter 3 of the Code. For purposes of this subdivision, some of the items of income from sources within the United States upon which the tax liability will not have been fully satisfied by the withholding of tax at source under chapter 3 of the Code are:

(1) Interest upon so-called tax-free covenant bonds upon which, in accordance with section 1451 and §1.1451–1, a tax of only 2 percent is required to be withheld at source,

(2) In the case of bonds or other evidence of indebtedness issued after September 25, 1965, amounts described in section 881(a)(3),

(3) Accrued interest received in connection with the sale of bonds between interest dates, which, in accordance with paragraph (h) of §1.1441–4, is not subject to withholding of tax at source.

(b) Corporations not included. This subdivision (i) shall not apply:

(1) To a foreign corporation which has income for the taxable year which is treated under section 882(d) or (e) and §1.882–2 as income which is effectively connected for the taxable year with the conduct of a trade or business in the United States by that corporation,

(2) To a foreign corporation making a claim under §301.6402–3 of this chapter (Procedure and Administration Regulations) for the refund of an overpayment of tax for the taxable year, or

(3) To a foreign corporation described in paragraph (c)(2)(i) of §1.532–1 whose accumulated taxable income for the taxable year is determined under paragraph (b)(2) of §1.535–1.

(ii) *Beneficiaries of estates or trusts.* A foreign corporation which is a beneficiary of an estate or trust which is engaged in trade or business in the United States is not required to make a return for the taxable year merely because it is deemed to be engaged in trade or business within the United States under section 875(2). However, such foreign corporation will be required to make a return if it otherwise satisfies the conditions of subparagraph (1)(i) of this paragraph for making a return.

(iii) *Special returns and schedules.* The provisions of paragraphs (b) through (f) of this section shall apply to a foreign corporation except that a foreign corporation which is an insurance company to which paragraph (c)(3) of this section applies shall make a return on Form 1120–F and not on Form 1120. If a foreign corporation which is an insurance company to which paragraph (c) (1) or (2) of this section applies has income for the taxable year from sources within the United States which is not effectively connected for that year with the conduct of a trade or business in the United States by that corporation, the corporation shall attach to its return on Form 1120L or 1120M, as the case may be, a separate schedule showing the nature and amount of the items of such income, the rate of tax applicable thereto, and the amount of tax withheld therefrom under chapter 3 of the Code.

(3) *Representative or agent for foreign corporation*—(i) *Cases where power of attorney is not required.* The responsible representative or agent within the United States of a foreign corporation shall make on behalf of his principal a return of, and shall pay the tax on, all

income coming within his control as representative or agent which is subject to the income tax under subtitle A of the Code. The agency appointment will determine how completely the agent is substituted for the principal for tax purposes. Any person who collects interest or dividends on deposited securities of a foreign corporation, executes ownership certificates in connection therewith, or sells such securities under special instructions shall not be deemed merely by reason of such acts to be the responsible representative or agent of the foreign corporation. If the responsible representative or agent does not have a specific power of attorney from the foreign corporation to file a return in its behalf, the return shall be accompanied by a statement to the effect that the representative or agent does not possess specific power of attorney to file a return for such corporation but that the return is being filed in accordance with the provisions of this subdivision.

(ii) *Cases where power of attorney is required.* Whenever a return of income of a foreign corporation is made by an agent acting under a duly authorized power of attorney for that purpose, the return shall be accompanied by the power of attorney in proper form, or a copy thereof specifically authorizing him to represent his principal in making, executing, and filing the income tax return. Form 2848 may be used for this purpose. The agent, as well as the taxpayer, may incur liability for the penalties provided for erroneous, false, or fraudulent returns. For the requirements regarding signing of returns, see § 1.6062–1. The rules of paragraph (e) of § 601.504 of this chapter (Statement of Procedural Rules) shall apply under this subparagraph in determining whether a copy of a power of attorney must be certified.

(iii) *Limitation.* A return of income shall be required under this subparagraph only if the foreign corporation is otherwise required to make a return in accordance with this paragraph.

(4) *Disallowance of deductions and credits.* For provisions disallowing deductions and credits when a return of income has not been filed by or on behalf of a foreign corporation, see section 882(c)(2) and the regulations thereunder, and paragraph (b) (2) and (3) of § 1.535–1.

(5) *Effective date.* This paragraph shall apply for taxable years beginning after December 31, 1966, except that it shall not be applied to require (i) the filing of a return for any taxable year ending before January 1, 1974, which, pursuant to instructions applicable to the return, is not required to be filed or (ii) the amendment of a return for such a taxable year which, pursuant to such instructions, is required to be filed. For corresponding rules applicable to taxable years beginning before January 1, 1967, see 26 CFR 1.6012–2(g) (Revised as of January 1, 1967).

(h) *Electing small business corporations.* An electing small business corporation, whether or not subject to the tax imposed by section 1378, shall make a return on Form 1120–S. See also section 6037 and the regulations thereunder.

(i) *Items of tax preference*—(1) *In general.* Every corporation required to make a return under this section, and having items of tax preference (described in section 57 and the regulation thereunder) in an amount specified by Form 4626, shall file such form as part of its return.

(2) *Organizations with unrelated business income and foreign corporations.* Regardless of the provisions of paragraphs (e) and (g) of this section, any organization described in either such paragraph having items of tax preference (described in section 57 and the regulations thereunder) in any amount entering into the computation or unrelated business income is required to make a return on form 990–T or form 120F, respectively, and to attach the required form as part of such return.

(j) *Other provisions.* For returns by fiduciaries for corporations, see § 1.6012–3. For information returns by corporations regarding payments of dividends, see §§ 1.6042–1 to 1.6042–3, inclusive; regarding corporate dissolutions or liquidations, see § 1.6043–1; regarding distributions in liquidation, see § 1.6043–2; regarding payments of patronage dividends, see §§ 1.6044–1 to 1.6044–4, inclusive; and regarding certain payments of interest, see §§ 1.6049–1 and 1.6049–2. For information returns of officers, directors, and shareholders of foreign personal holding companies, as defined in section 552, see §§1.6035–1 and 1.6035–2. For returns as to formation or reorganization of foreign corporations, see §§1.6046–1 to 1.6046–3, inclusive.

[T.D. 6500, 25 FR 12108, Nov. 26, 1960]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting §1.6012–2, see the List of CFR Sections Affecting in the Finding Aids section of this volume.

§1.6012–3 Returns by fiduciaries.

(a) *For estates and trusts*—(1) *In general.* Every fiduciary, or at least one of joint fiduciaries, must make a return of income on form 1041 (or by use of a composite return pursuant to §1.6012–5) and attach the required form if the estate or trust has items of tax preference (as defined in section 57 and the regulations thereunder) in any amount:

(i) For each estate for which he acts if the gross income of such estate for the taxable year is $600 or more;

(ii) For each trust for which he acts, except a trust exempt under section 501(a), if such trust has for the taxable year any taxable income, or has for the taxable year gross income of $600 or more regardless of the amount of taxable income; and

(iii) For each estate and each trust for which he acts, except a trust exempt under section 501(a), regardless of the amount of income for the taxable year, if any beneficiary of such estate or trust is a nonresident alien.

(2) *Wills and trust instruments.* At the request of the Internal Revenue Service, a copy of the will or trust instrument (including any amendments), accompanied by a written declaration of the fiduciary under the penalties of perjury that it is a true and complete copy, shall be filed together with a statement by the fiduciary indicating the provisions of the will or trust instrument (including any amendments) which, in the fiduciary's opinion, determine the extent to which the income of the estate or trust is taxable to the estate or trust, the beneficiaries, or the grantor, respectively.

(3) *Domiciliary and ancillary representatives.* In the case of an estate required to file a return under subparagraph (1) of this paragraph, having both domiciliary and ancillary representatives, the domiciliary and ancillary representatives must each file a return on Form 1041. The domiciliary representative is required to include in the return rendered by him as such domiciliary representative the entire income of the estate. The return of the ancillary representative shall be filed with the district director for his internal revenue district and shall show the name and address of the domiciliary representative, the amount of gross income received by the ancillary representative, and the deductions to be claimed against such income, including any amount of income properly paid or credited by the ancillary representative to any legatee, heir, or other beneficiary. If the ancillary representative for the estate of a nonresident alien is a citizen or resident of the United States, and the domiciliary representative is a nonresident alien, such ancillary representative is required to render the return otherwise required of the domiciliary representative.

(4) *Two or more trusts.* A trustee of two or more trusts must make a separate return for each trust, even though such trusts were created by the same grantor for the same beneficiary or beneficiaries.

(5) *Trusts with unrelated business income.* Every fiduciary for a trust described in section 511(b)(2) which is subject to the tax imposed on its unrelated business taxable income by section 511(b)(1) shall make a return on Form 990–T for each taxable year if the trust has gross income, included in computing unrelated business taxable income for such taxable year, of $1,000 or more. The filing of a return of unrelated business income does not relieve the fiduciary of such trust from the duty of filing other required returns.

(6) *Charitable remainder trusts.* Every fiduciary for a charitable remainder annuity trust (as defined in §1.664–2) or a charitable remainder unitrust (as defined in §1.664–3) shall make a return on Form 1041–B for each taxable year of the trust even though it is nonexempt because it has unrelated business taxable income. The return on Form 1041–B shall be made in accordance with the instructions for the form and shall be filed with the designated Internal Revenue office on or before the 15th day of the fourth month following the close of the taxable year of the trust. A copy of

the instrument governing the trust, accompanied by a written declaration of the fiduciary under the penalties of perjury that it is a true and complete copy, shall be attached to the return for the first taxable year of the trust.

(7) *Certain trusts described in section 4947(a)(1).* For taxable years beginning after December 31, 1980, in the case of a trust described in section 4947(a)(1) which has no taxable income for a taxable year, the filing requirements of section 6012 and this section shall be satisfied by the filing, pursuant to § 53.6011–1 of this chapter (Foundation Excise Tax Regulations) and § 1.6033–2(a), by the fiduciary of such trust of—

(i) Form 990–PF if such trust is treated as a private foundation, or

(ii) Form 990 if such trust is not treated as a private foundation.

When the provisions of this paragraph (a)(7) are met, the fiduciary shall not be required to file Form 1041.

(8) *Estate and trusts liable for qualified tax.* In the case of an estate or trust which is liable for one or more qualified State individual income taxes, as defined in section 6362, for a taxable year, see paragraph (b) of § 301.6361–1 of this chapter (Regulations on Procedure and Administration) for rules relating to returns required to be made.

(9) *A trust any portion of which is treated as owned by the grantor or another person pursuant to sections 671 through 678.* In the case of a trust any portion of which is treated as owned by the grantor or another person under the provisions of subpart E (section 671 and following) part I, subchapter J, chapter 1 of the Internal Revenue Code see § 1.671–4.

(b) *For other persons*—(1) *Decedents.* The executor or administrator of the estate of a decedent, or other person charged with the property of a decedent, shall make the return of income required in respect of such decedent. For the decedent's taxable year which ends with the date of his death, the return shall cover the period during which he was alive. For the filing of returns of income for citizens and alien residents of the United States, and alien residents of Puerto Rico, see paragraph (a) of § 1.6012–1. For the filing of a joint return after death of spouse, see paragraph (d) of § 1.6013–1.

(2) *Nonresident alien individuals*—(i) *In general.* A resident or domestic fiduciary or other person charged with the care of the person or property of a nonresident alien individual shall make a return for that individual and pay the tax unless:

(a) The nonresident alien individual makes a return of, and pays the tax on, his income for the taxable year,

(b) A responsible representative or agent in the United States of the nonresident alien individual makes a return of, and pays the tax on, the income of such alien individual for the taxable year, or

(c) The nonresident alien individual has appointed a person in the United States to act as his agent for the purpose of making a return of income and, if such fiduciary is required to file a Form 1041 for an estate or trust of which such alien individual is a beneficiary, such fiduciary attaches a copy of the agency appointment to his return on Form 1041.

(ii) *Income to be returned.* A return of income shall be required under this subparagraph only if the nonresident alien individual is otherwise required to make a return in accordance with paragraph (b) of § 1.6012–1. The provisions of that paragraph shall apply in determining the form of return to be used and the income to be returned.

(iii) *Disallowance of deductions and credits.* For provisions disallowing deductions and credits when a return of income has not been filed by or on behalf of a nonresident alien individual, see section 874 and the regulations thereunder.

(iv) *Alien resident of Puerto Rico.* This subparagraph shall not apply to the return of a nonresident alien individual who is a bona fide resident of Puerto Rico during the entire taxable year. See § 1.876–1.

(v) *Cross reference.* For requirements of withholding tax at source on nonresident alien individuals and of returns with respect to such withheld taxes, see §§ 1.1441–1 to 1.1465–1, inclusive.

(3) *Persons under a disability.* A fiduciary acting as the guardian of a minor, or as the guardian or committee of an insane person, must make the return of income required in respect of

such person unless, in the case of a minor, the minor himself makes the return or causes it to be made.

(4) *Corporations.* A receiver, trustee in dissolution, trustee in bankruptcy, or assignee, who, by order of a court of competent jurisdiction, by operation of law or otherwise, has possession of or holds title to all or substantially all the property or business of a corporation, shall make the return of income for such corporation in the same manner and form as corporations are required to make such returns. Such return shall be filed whether or not the receiver, trustee, or assignee is operating the property or business of the corporation. A receiver in charge of only a small part of the property of a corporation, such as a receiver in mortgage foreclosure proceedings involving merely a small portion of its property, need not make the return of income. See also §1.6041–1, relating to returns regarding information at source; §§1.6042–1 to 1.6042–3, inclusive, relating to returns regarding payments of dividends; §§1.6044–1 to 1.6044–4, inclusive, relating to returns regarding payments of patronage dividends; and §§1.6049–1 and 1.6049–2, relating to returns regarding certain payments of interest.

(5) *Individuals in receivership.* A receiver who stands in the place of an individual must make the return of income required in respect of such individual. A receiver of only part of the property of an individual need not file a return, and the individual must make his own return.

(c) *Joint fiduciaries.* In the case of joint fiduciaries, a return is required to be made by only one of such fiduciaries. A return made by one of joint fiduciaries shall contain a statement that the fiduciary has sufficient knowledge of the affairs of the person for whom the return is made to enable him to make the return, and that the return is, to the best of his knowledge and belief, true and correct.

(d) *Other provisions.* For the definition of the term ‘‘fiduciary’’, see section 7701(a)(6) and the regulations thereunder. For information returns required to be made by fiduciaries under section 6041, see §1.6041–1. As to further duties and liabilities of fiduciaries, see section 6903 and §301.6903–1 of this chapter (Regulations on Procedure and Administration).

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting §1.6012–3, see the List of CFR Sections Affecting in the Finding Aids section of this volume.

§1.6012–4 Miscellaneous returns.

For returns by regulated investment companies of tax on undistributed capital gain designated for special treatment under section 852(b)(3)(D), see §1.852–9. For returns with respect to tax withheld on nonresident aliens and foreign corporations and on tax-free covenant bonds, see §§1.1461–1 to 1.1465–1, inclusive. For returns of tax on transfers to avoid income tax, see §1.1494–1. For the requirement of an annual report by persons completing a Government contract, see 26 CFR (1939) 17.16 (Treasury Decision 4906, approved June 23, 1939), and 26 CFR (1939) 16.15 (Treasury Decision 4909, approved June 28, 1939) , as made applicable to section 1471 of the 1954 Code by Treasury Decision 6091, approved August 16, 1954 (19 FR 5167, C.B. 1954–2, 47). See also §1.1471–1.

[T.D. 7332, 39 FR 44231, Dec. 23, 1974]

EDITORIAL NOTE: For the convenience of the user §§16.15 and 17.16 of 26 CFR (1939) are set forth below:

§16.15 *Annual reports for income taxable years*—(a) *General requirements.* Every contracting party completing a contract or subcontract within the contracting party’s income-taxable year ending after April 3, 1939 shall file with the district director of internal revenue for the internal revenue district in which the contracting party’s Federal income tax returns are required to be filed an annual report on the prescribed form of the profit and excess profit on all contracts and subcontracts coming within the scope of the act and the regulations in this part and completed within the particular income-taxable year. There shall be included as a part of such a report a statement, preferably in columnar form, showing separately for each such contract or subcontract completed by the contracting party within the income-taxable year the total contract price, the cost of performing the contract or subcontract and the resulting profit or loss on each contract or subcontract together with a summary statement showing in detail the computation of the net profit or net loss upon all contracts and subcontracts completed within the income-taxable year and the amount of the excess profit, if any, for the income-taxable year covered by the report. A copy of the report made to the Secretary of the Army (see § 16.14) with respect to each contract or subcontract covered in the annual report, shall be filed as a part of such annual report. In case the income-taxable year of the contracting party is a period of less than twelve months (see § 16.1), the report required by this section shall be made for such period and not for a full year.

(b) *Time for filing annual reports.* Annual reports of contracts and subcontracts coming within the scope of the act and the regulations in this part completed by a contracting party within an income-taxable year must be filed on or before the 15th day of the ninth month following the close of the contracting party's income-taxable year. It is important that the contracting party render on or before the due date an annual report as nearly complete and final as it is possible for the contracting party to prepare. An extension of time granted the contracting party for filing its Federal income tax return does not serve to extend the time for filing the annual report required by this section. Authority consistent with authorizations for granting extensions of time for filing Federal income tax returns is hereby delegated to the various collectors of internal revenue for granting extensions of time for filing the reports required by this section. Application for extensions of time for filing such reports should be addressed to the district director of internal revenue for the district in which the contracting party files its Federal income tax returns and must contain a full recital of the causes for the delay.

§ 17.16 *Annual reports for income-taxable years*—(a) *General requirements.* Every contracting party completing a contract or subcontract within the contracting party's income-taxable year ending after April 3, 1939 shall file, with the district director of internal revenue for the internal revenue district in which the contracting party's Federal income tax return is required to be filed, annual reports on the prescribed forms of the profit and excess profit on all contracts and subcontracts coming within the scope of the act. If any contracts or subcontracts so completed by the contracting party were entered into for the construction or manufacture of any complete naval vessel or any portion thereof, the profit and excess profit on all such contracts and subcontracts completed within the income-taxable year ending after April 3, 1939 shall be computed in accordance with the provisions of § 17.6. If any contracts or subcontracts so completed by the contracting party were entered into for the construction or manufacture of any complete naval aircraft or any portion thereof, the profit and excess profit on all such contracts and subcontracts completed within the income-taxable year ending after April 3, 1939 shall be computed in accordance with the provisions of § 17.7. There shall be included as a part of the annual report a statement, preferably in columnar form, showing separately for each contract or subcontract completed by the contracting party within the income-taxable year and covered by the report, the total contract price, the cost of performing the contract or subcontract and resulting profit or loss on each contract or subcontract together with a summary statement showing in detail the computation of the net profit or net loss upon each group of contracts and subcontracts covered by the report and the amount of the excess profit, if any, with respect to each group of contracts and subcontracts covered by the report. A copy of the report made to the Secretary of the Navy (see § 17.15) with respect to each contract or subcontract covered in the annual report, shall be filed as a part of such annual report. In case the income-taxable year of the contracting party is a period of less than twelve months (see § 17.1), the reports required by this section shall be made for such period and not for a full year.

(b) *Time for filing annual reports.* Annual reports of contracts and subcontracts completed by a contracting party within an income-taxable year ending after April 3, 1939 shall be filed on or before the 15th day of the ninth month following the close of the contracting party's income-taxable year. It is important that the contracting party render on or before the due date annual reports as nearly complete and final as it is possible for the contracting party to prepare. An extension of time granted the contracting party for filing its Federal income tax return does not serve to extend the time for filing the annual reports required by this section. Authority consistent with authorizations for granting extensions of time for filing Federal income tax returns is hereby delegated to the various district directors of internal revenue for granting extensions of time for filing the reports required by this section. Application for extension of time for filing such reports should be addressed to the district director of internal revenue for the district in which the contracting party files its Federal income tax returns and must contain a full recital of the causes for the delay.

§ 1.6012–5 Composite return in lieu of specified form.

The Commissioner may authorize the use, at the option of a person required to make a return, of a composite return in lieu of any form specified in this part for use by such a person, subject to such conditions, limitations, and special rules governing the preparation, execution, filing, and correction thereof as the Commissioner may deem appropriate. Such composite return shall consist of a form prescribed by the Commissioner and an attachment or attachments of magnetic tape or other approved media. Notwithstanding any provisions in this part to the contrary, a single form and attachment may comprise the returns of more than one such person. To the extent that the use of a composite return has been authorized by the Commissioner, references in this part to a specific form for use by such a person shall be deemed to refer also to a composite return under this section.

[T.D. 7200, 37 FR 16544, Aug. 16, 1972]

§1.6012–6 Returns by political organizations.

(a) *Requirement of return*—(1) *In general.* For taxable years beginning after December 31, 1974, every political organization described in section 527(e)(1), and every fund described in section 527(f)(3) or section 527(g), and every organization described in section 501(c) and exempt from taxation under section 501(a) shall make a return of income within the time provided in section 6072(b), if a tax is imposed on such an organization or fund by section 527(b).

(2) *Taxable years beginning after December 31, 1971, and before January 1, 1975.* For taxable years beginning after December 31, 1971, and before January 1, 1975, any political organization which would be described in section 527(e)(1) if such section applied to such years shall not be required to make a return if such organization would not be required to make a return under paragraph (a)(1) of this section.

(b) *Form of return.* The return required by an organization or fund upon which a tax is imposed by section 527(b) shall be made on Form 1120–POL.

[T.D. 7516, 42 FR 57312, Nov. 2, 1977; 43 FR 2721, Jan. 19, 1978]

§1.6012–7T Telephone return filing using voice signature (temporary).

(a) *In general.* For all purposes of the Internal Revenue Code, a return completed by an eligible taxpayer under the TeleFile Voice Signature test in accordance with the instructions provided over the telephone is an individual Federal income tax return filed at the time the TeleFile system interactive voice computer states to the taxpayer that the filing is completed. For provisions relating to the signing and verification of the TeleFile Voice Signature test returns made under this section, see §§1.6061–2T and 1.6065–2T, respectively.

(b) *Manner of filing return by telephone.* An eligible taxpayer who chooses to participate in the TeleFile Voice Signature test must dial the telephone number provided by the Internal Revenue Service from a touch-tone telephone. When an eligible taxpayer dials this telephone number, the TeleFile system interactive voice computer will give the taxpayer filing instructions. The taxpayer must provide all the information and a voice signature at the time and in the manner required by those instructions.

(c) *Eligible taxpayer defined.* An eligible taxpayer is a single individual who lives in the Cincinnati District Office geographic area, who is eligible to file Form 1040EZ, Income Tax Return for Single and Joint Filers With No Dependents, and whose current name and address appear on the mailing label attached to the taxpayer's tax package for the calendar year for which the Form 1040EZ is to be filed.

(d) *Address to which refunds are sent.* If a taxpayer who files a TeleFile Voice Signature test return is entitled to a refund, the taxpayer's refund will be sent to the address on the mailing label attached to the taxpayer's tax package.

(e) *Effective dates.* (1) This section is effective for—

(i) 1992 calendar year returns filed by eligible taxpayers in the TeleFile Voice Signature test after January 13, 1993, and before April 16, 1993; and

(ii) 1993 calendar year returns filed by eligible taxpayers in the TeleFile Voice Signature test after January 12, 1994, and before April 16, 1994.

(2) No returns can be filed under the TeleFile Voice Signature tests between April 16, 1993, and January 12, 1994, or after April 15, 1994.

[T.D. 8510, 58 FR 68296, Dec. 27, 1993]

§ 1.6013–1 Joint returns.

(a) *In general.* (1) A husband and wife may elect to make a joint return under section 6013(a) even though one of the spouses has no gross income or deductions. For rules for determining whether individuals occupy the status of husband and wife for purposes of filing a joint return, see paragraph (a) of § 1.6013–4. For any taxable year with respect to which a joint return has been filed, separate returns shall not be made by the spouses after the time for filing the return of either has expired. See, however, paragraph (d)(5) of this section for the right of an executor to file a late separate return for a deceased spouse and thereby disaffirm a timely joint return made by the surviving spouse.

(2) A joint return of a husband and wife (if not made by an agent of one or both spouses) shall be signed by both spouses. The provisions of paragraph (a)(5) of § 1.6012–1, relating to returns made by agents, shall apply where one spouse signs a return as agent for the other, or where a third party signs a return as agent for one or both spouses.

(b) *Nonresident alien.* A joint return shall not be made if either the husband or wife at any time during the taxable year is a nonresident alien, unless an election is in effect for the taxable year under section 6013 (g) or (h) and the regulations thereunder.

(c) *Different taxable years.* Except as otherwise provided in this section, a husband and wife shall not file a joint return if they have different taxable years.

(d) *Joint return after death.* (1) Section 6013(a)(2) provides that a joint return may be made for the survivor and the deceased spouse or for both deceased spouses if the taxable years of such spouses begin on the same day and end on different days only because of the death of either or both. Thus, if a husband and wife make this return on a calendar year basis, and the wife dies on August 1, 1956, a joint return may be made with respect to the calendar year 1956 of the husband and the taxable year of the wife beginning on January 1, 1956, and ending with her death on August 1, 1956. Similarly, if husband and wife both make their returns on the basis of a fiscal year beginning on July 1 and the wife dies on October 1, 1956, a joint return may be made with respect to the fiscal year of the husband beginning on July 1, 1956, and ending on June 30, 1957, and with respect to the taxable year of the wife beginning on July 1, 1956, and ending with her death on October 1, 1956.

(2) The provision allowing a joint return to be made for the taxable year in which the death of either or both spouses occurs is subject to two limitations. The first limitation is that if the surviving spouse remarries before the close of his taxable year, he shall not make a joint return with the first spouse who died during the taxable year. In such a case, however, the surviving spouse may make a joint return with his new spouse provided the other requirements with respect to the filing of a joint return are met. The second limitation is that the surviving spouse shall not make a joint return with the deceased spouse if the taxable year of either spouse is a fractional part of a year under section 443(a)(1) resulting from a change of accounting period. For example, if a husband and wife make their returns on the calendar year basis and the wife dies on March 1, 1956, and thereafter the husband receives permission to change his annual accounting period to a fiscal year beginning July 1, 1956, no joint return shall be made for the short taxable year ending June 30, 1956. Similarly, if a husband and wife who make their returns on a calendar year basis receive permission to change to a fiscal year beginning July 1, 1956, and the wife dies on June 1, 1956, no joint return shall be made for the short taxable year ending June 30, 1956.

(3) Section 6013(a)(3) provides for the method of making a joint return in the case of the death of one spouse or both spouses. The general rule is that, in the case of the death of one spouse, or of both spouses, the joint return with respect to the decedent may be made only by his executor or administrator, as defined in paragraph (c) of § 1.6013–4. An exception is made to this general rule whereby, in the case of the death of one spouse, the joint return may be made by the surviving spouse with respect to both him and the decedent if all the following conditions exist:

(i) No return has been made by the decedent for the taxable year in respect of which the joint return is made;

(ii) No executor or administrator has been appointed at or before the time of making such joint return; and

(iii) No executor or administrator is appointed before the last day prescribed by law for filing the return of the surviving spouse.

These conditions are to be applied with respect to the return for each of the taxable years of the decedent for which a joint return may be made if more than one such taxable year is involved. Thus, in the case of husband and wife on the calendar year basis, if the wife dies in February 1957, a joint return for the husband and wife for 1956 may be made if the conditions set forth in this subparagraph are satisfied with respect to such return. A joint return also may be made by the survivor for both himself and the deceased spouse for the calendar year 1957 if it is separately determined that the conditions set forth in this subparagraph are satisfied with respect to the return for such year. If, however, the deceased spouse should, prior to her death, make a return for 1956, the surviving spouse may not thereafter make a joint return for himself and the deceased spouse for 1956.

(4) If an executor or administrator is appointed at or before the time of making the joint return or before the last day prescribed by law for filing the return of the surviving spouse, the surviving spouse cannot make a joint return for himself and the deceased spouse whether or not a separate return for the deceased spouse is made by such executor or administrator. In such a case, any return made solely by the surviving spouse shall be treated as his separate return. The joint return, if one is to be made, must be made by both the surviving spouse and the executor or administrator. In determining whether an executor or administrator is appointed before the last day prescribed by law for filing the return of the surviving spouse, an extension of time for making the return is included.

(5) If the surviving spouse makes the joint return provided for in subparagraph (3) of this paragraph and thereafter an executor or administrator of the decedent is appointed, the executor or administrator may disaffirm such joint return. This disaffirmance, in order to be effective, must be made within one year after the last day prescribed by law for filing the return of the surviving spouse (including any extension of time for filing such return) and must be made in the form of a separate return for the taxable year of the decedent with respect to which the joint return was made. In the event of such proper disaffirmance the return made by the survivor shall constitute his separate return, that is, the joint return made by him shall be treated as his return and the tax thereon shall be computed by excluding all items properly includible in the return of the deceased spouse. The separate return made by the executor or administrator shall constitute the return of the deceased spouse for the taxable year.

(6) The time allowed the executor or administrator to disaffirm the joint return by the making of a separate return does not establish a new due date for the return of the deceased spouse. Accordingly, the provisions of sections 6651 and 6601, relating to delinquent returns and delinquency in payment of tax, are applicable to such return made by the executor in disaffirmance of the joint return.

(e) *Return of surviving spouse treated as joint return.* For provisions relating to the treatment of the return of a surviving spouse as a joint return for each of the next two taxable years following the year of the death of the spouse, see section 2 and §1.2–2.

[T.D. 6500, 25 FR 12108, Nov. 26, 1960, as amended by T.D. 7274, 38 FR 11345, May 7, 1973; T.D. 7670, 45 FR 6929, Jan. 31, 1980]

§1.6013–2 Joint return after filing separate return.

(a) *In general.* (1) Where an individual has filed a separate return for a taxable year for which a joint return could have been made by him and his spouse under section 6013(a), and the time prescribed by law for filing the return for such taxable year has expired, such individual and his spouse may, under conditions hereinafter set forth, make a joint return for such taxable year. The joint return filed pursuant to section 6013(b) shall constitute the return of the husband and wife for such year, and all payments, credits, refunds, or other repayments, made or allowed with respect to the separate return of either spouse are to be taken into account in determining the extent to which the tax based on the joint return has been paid.

(2) If a joint return is made under section 6013(b), any election, other than the election to file a separate return, made by either spouse in his separate return for the taxable year with respect to the treatment of any income, deduction, or credit of such spouse shall not be changed in the making of the joint return where such election would have been irrevocable if the joint return had not been made. Thus, if one spouse has made an irrevocable election to adopt and use the last-in, first-out inventory method under section 472, this election may not be changed upon making the joint return under section 6013(b).

(3) A joint return made under section 6013(b) after the death of either spouse shall, with respect to the decedent, be made only by his executor or administrator. Thus, where no executor or administrator has been appointed, a joint return cannot be made under section 6013(b).

(4) A nonresidential alien treated as a resident under section 6013 (g) or (h) for any taxable year ending on or after December 31, 1975, and the alien's U.S. citizen or resident spouse may file a joint return for that taxable year, even though one or both of the spouses have previously filed separate returns for that taxable year. In this case, the rule in paragraph (a)(3) of this section does not apply.

(b) *Limitations with respect to making of election.* A joint return shall not be made under section 6013(b)(1) with respect to a taxable year:

(1) Beginning on or before July 30, 1996, unless there is paid in full at or before the time of the filing of the joint return the amount shown as tax upon such joint return; or

(2) After the expiration of three years from the last day prescribed by law for filing the return for such taxable year determined without regard to any extension of time granted to either spouse; or

(3) After there has been mailed to either spouse, with respect to such taxable year, a notice of deficiency under section 6212, if the spouse, as to such notice, files a petition with the Tax Court of the United States within the time prescribed in section 6213; or

(4) After either spouse has commenced a suit in any court for the recovery of any part of the tax for such taxable year; or

(5) After either spouse has entered into a closing agreement under section 7121 with respect to such taxable year, or after any civil or criminal case arising against either spouse with respect to such taxable year has been compromised under section 7122.

(c) *When return deemed filed; assessment and collection; credit or refund.* (1) For the purpose of section 6501, relating to the period of limitations upon assessment and collection, and section 6651, relating to delinquent returns, a joint return made under section 6013(b) shall be deemed to have been filed, giving due regard to any extension of time granted to either spouse, on the following date:

(i) Where both spouses filed separate returns, prior to making the joint return under section 6013(b), on the date the last separate return of either spouse was filed for the taxable year, but not earlier than the last date prescribed by law for the filing of the return of either spouse;

(ii) Where only one spouse was required and did file a return prior to the making of the joint return under section 6013(b), on the date of the filing of the separate return, but not earlier than the last day prescribed by law for the filing of such return; or

(iii) Where both spouses were required to file a return, but only one spouse did so file, on the date of the filing of the joint return under section 6013(b).

(2) For the purpose of section 6511, relating to refunds and credits, a joint return made under section 6013(b) shall be deemed to have been filed on the last date prescribed by law for filing the return for such taxable year, determined without regard to any extension of time granted to either spouse for filing the return or paying the tax.

(d) *Additional time for assessment.* In the case of a joint return made under section 6013(b), the period of limitations provided in sections 6501 and 6502 shall not be less than one year after the date of the actual filing of such joint return. The expiration of the one year is to be determined without regard to the rules provided in paragraph (c)(1) of this section, relating to the application of sections 6501 and 6651 with respect to a joint return made under section 6013(b).

(e) *Additions to the tax and penalties.* (1) Where the amount shown as the tax by the husband and wife on a joint return made under section 6013(b) exceeds the aggregate of the amounts shown as tax on the separate return of each spouse, and such excess is attributable to negligence, intentional disregard of rules and regulations, or fraud at the time of the making of such separate return, there shall be assessed, collected, and paid in the same manner as if it were a deficiency an additional amount as provided by the following:

(i) If any part of such excess is attributable to negligence, or intentional disregard of rules and regulations, at the time of the making of such separate return, but without any intent to defraud, this additional amount shall be 5 percent of the total amount of the excess.

(ii) If any part of such excess is attributable to fraud with intent to evade tax at the time of the making of such separate return, this additional amount shall be 50 percent of the total amount of the excess. The latter addition is in lieu of the 50 percent addition to the tax provided in section 6653(b).

(2) For purposes of section 7206 (1) and (2) and section 7207 (relating to criminal penalties in the case of fraudulent returns), the term ‘‘return’’ includes a separate return filed by a spouse with respect to a taxable year for which a joint return is made under section 6013(b) after the filing of a separate return.

[T.D. 6500, 25 FR 12108, Nov. 26, 1960, as amended by T.D. 7670, 45 FR 6929, Jan. 31, 1980; T.D. 8725, 62 FR 39117, July 22, 1997]

§1.6013–3 Treatment of joint return after death of either spouse.

For purposes of section 21 (relating to change in rates during a taxable year), section 443 (relating to returns for a period of less than 12 months), and section 7851(a)(1)(A) (relating to the applicability of certain provisions of the Internal Revenue Code of 1954 and the Internal Revenue Code of 1939), where the husband and wife have different taxable years because of death of either spouse, the joint return shall be treated as if the taxable years of both ended on the date of the closing of the surviving spouse’s taxable year. Thus, in cases where the Internal Revenue Code of 1939 otherwise would apply to the taxable year of the decedent spouse and the Internal Revenue Code of 1954 would apply to the taxable year of the surviving spouse, this provision makes the Internal Revenue Code of 1954 applicable to the taxable years of both spouses if a joint return is filed.

§1.6013–4 Applicable rules.

(a) *Status as husband and wife.* For the purpose of filing a joint return under section 6013, the status as husband and wife of two individuals having taxable years beginning on the same day shall be determined:

(1) If the taxable year of each individual is the same, as of the close of such year; and

(2) If the close of the taxable year is different by reason of the death of one spouse, as of the time of such death.

An individual legally separated from his spouse under a decree of divorce or of separate maintenance shall not be considered as married. However, the mere fact that spouses have not lived together during the course of the taxable year shall not prohibit them from making a joint return. A husband and wife who are separated under an interlocutory decree of divorce retain the relationship of husband and wife until the decree becomes final. The fact that the taxpayer and his spouse are divorced or legally separated at any time after the close of the taxable year shall not deprive them of their right to file a joint return for such taxable year under section 6013.

(b) *Computation of income, deductions, and tax.* If a joint return is made, the gross income and adjusted gross income of husband and wife on the joint return are computed in an aggregate amount and the deductions allowed and the taxable income are likewise computed on an aggregate basis. Deductions limited to a percentage of the adjusted gross income, such as the deduction for charitable, etc., contributions and gifts, under section 170, will be allowed with reference to such aggregate adjusted gross income. A similar rule is applied in the case of the limitation of section 1211(b) on the allowance of losses resulting from the sale or exchange of capital assets (see § 1.1211–1). Although there are two taxpayers on a joint return, there is only one taxable income. The tax on the joint return shall be computed on the aggregate income and the liability with respect to the tax shall be joint and several. For computation of tax in the case of a joint return, see § 1.2–1. For tax in the case of a joint return of husband and wife electing to pay the optional tax under section 3, see § 1.3–1. For the election not to show on a joint return the amount of tax due in connection therewith, see paragraph (c) of § 1.6014–1 and paragraph (d) of § 1.6014–2. For separate computations of the self-employment tax of each spouse on a joint return, see paragraph (b) of § 1.6017–1.

(c) *Definition of executor or administrator.* For purposes of section 6013 the term ‘‘executor or administrator’’ means the person who is actually appointed to such office and not a person who is merely in charge of the property of the decedent.

[T.D. 6500, 25 FR 12108, Nov. 26, 1960, as amended by T.D. 7102, 36 FR 5497, Mar. 24, 1971]

§ 1.6013–5 Spouse relieved of liability in certain cases.

(a) *In general.* A person shall be relieved from liability for any tax, penalties, additions to tax, interest, or other amounts, to the extent that such liability is attributable to an omission from gross income in a taxable year, and:

(1) He filed a joint return with a spouse in such taxable year,

(2) An amount of income which exceeds 25 percent of the amount of gross income which is stated in the return (as determined in a manner provided by section 6501(e)(1)(A) of the Code) and which is attributable to such person’s spouse was omitted from the return, and should have been, under chapter 1 of the Code, included in the return,

(3) He establishes that he did not know of, and had no reason to know of such omission, and

(4) It is inequitable to hold the taxpayer liable for the deficiency in tax for such taxable year attributable to such omission.

(b) *Inequitable defined.* Whether it is inequitable to hold a person liable for the deficiency in tax, within the meaning of paragraph (a)(4) of this section, is to be determined on the basis of all the facts and circumstances. In making such a determination a factor to be considered is whether the person seeking relief significantly benefited, directly or indirectly, from the items omitted from gross income. However, normal support is not a significant ‘‘benefit’’ for purposes of this determination. Evidence of direct or indirect benefit may consist of transfers of property, including transfers which may be received several years after the year in which the omitted item of income should have been included in gross income. Thus, for example, if a person seeking relief receives from his spouse an inheritance of property or life insurance proceeds which are traceable to items omitted from gross income by his spouse, that person will be considered to have benefited from those items. Other factors which may also be taken into account, if the situation warrants, include the fact that the person seeking relief has been deserted by his spouse or the fact that he has been divorced or separated from such spouse.

(c) *Community property laws.* The determination of the spouse to whom items of gross income (other than gross income from property) are attributable shall be made without regard to any applicable community property laws.

(d) *Omission of income.* Section 6013(e) of the Code shall apply only to income which is properly includible as gross income under chapter 1 of the Code, which was, in fact, omitted from a joint return. Section 6013(e) shall not apply to a tax deficiency resulting from erroneous or fraudulent deductions, claims, or other evasions or avoidances of tax.

(e) *Scope of section.* This section does not apply to any taxable year for which a claim for credit or refund is barred by operation of any law or rule of law.

[T.D. 7320, 39 FR 28279, Aug. 6, 1974]

§1.6013–6 Election to treat nonresident alien individual as resident of the United States.

(a) *Election for special treatment*—(1) *In general.* Two individuals who are husband and wife at the close of a taxable year ending on or after December 31, 1975, may make an election under this section for that taxable year if, at the close of that year, one spouse is a citizen or resident of the United States and the other spouse is a nonresident alien. The effect of the election is that each spouse is treated as a resident of the United States for purposes of chapters 1, 5, and 24 and sections 6012, 6013, 6072, and 6091 of the Code for the entire taxable year. An election made under this section is in effect for the taxable year for which made and for all subsequent years of the husband and wife, except:

(i) Any taxable year for which the election is suspended, as described in paragraph (a)(3) of this section, and

(ii) Any taxable year for which the election is terminated in accordance with paragraph (b) of this section and all subsequent taxable years.

A husband and wife may not make an election if an election previously made under this section by either spouse has been terminated under paragraph (b) of this section.

(2) *Particular rules.* (i) As used in paragraph (a)(3) of this section, the term ''U.S. spouse'' means any married individual who is a citizen or resident of the United States at any time during a taxable year.

(ii) An individual's residence is determined by application of the principles of §§301.7701(b)–1 through 301.7701(b)–9 of this chapter relating to what constitutes residence in the United States by an alien individual.

(iii) Whether two individuals are married at the close of a taxable year is determined by application of the rules in §1.6013–4(a).

(iv) The provisions of section 879 and the regulations thereunder shall not apply for any taxable year for which an election under this section is in effect.

(v) An individual who makes an election under this section may not, for United States income tax purposes, claim under any United States income tax treaty not to be a U.S. resident. The relationship of U.S. income tax treaties and the election under this section is illustrated by the following example.

Example. H, a U.S. citizen, is married to W, a nonresident alien of the United States and a domiciliary of country X. H and W maintain their only permanent home in country X. W receives both U.S. source and country X source interest during the taxable year. The interest is not effectively connected with a permanent establishment or a fixed base in any country. H and W make the section 6013 (g) election. Under article ii (1) of the United States—country X Income Tax Convention interest derived and beneficially owned by a resident of one contracting state is exempt from tax in the other contracting state. Article 4 (1) of the treaty provides that an individual is a resident of a contracting state if subject to tax in that country by reason of the individual's domicile, residence, or citizenship. Under article 4 (1) of the treaty, W is a resident of country X by virtue of her domocile in country X and also of the United States by virtue of the section 6013 (g) election. Article 4 (2) of the treaty provides that if an individual is a resident of both the United States and country X by reason of article 4 (1), the individual shall be deemed to be a resident of the contracting state in which he or she has a permanent home available. Because W's sole permanent home is in country X, under article 4 (2) of the treaty W is treated as a resident of country X for purposes of the treaty. Because W has elected under section 6013(g) to be treated as a U.S. resident (and thus to be taxed on worldwide income), W may not, for U.S. income tax purposes, claim under the treaty not to be a U.S. resident. W, therefore, is subject to U.S. income tax on the interest. For purposes of country X income tax, W is considered a resident of country X under the treaty.

(3) *Suspension of election.* (i) An election made under this section is suspended and is not in effect for a taxable year subsequent to the first taxable year for which made if neither spouse is a U.S. spouse during that subsequent

taxable year. Thus, for example, the election is in suspense if both spouses are nonresident aliens for the entire taxable year.

(ii) If either spouse dies during any taxable year for which the election under this section is in effect, other than the first taxable year for which the election is to be in effect, the taxable year shall include, solely for purposes of this paragraph (a)(3), only those days during the taxable year on which both spouses are alive. Thus, for example, if the U.S. spouse dies during the taxable year, the election is not suspended for that year even if the surviving nonresident alien spouse never acquires U.S. citizenship or residency. Similarly, if the nonresident alien spouse dies during the taxable year, the election is not suspended for that year even if the surviving U.S. spouse subsequently abandons U.S. citizenship or residency. However, if neither spouse was a U.S. spouse at any time during the period of the taxable year when both spouses were alive, the election is suspended for that year even if the surviving spouse subsequently acquires U.S. citizenship or residency.

For the effect of the death of either spouse on the status of the election in subsequent taxable years, see paragraph (b)(2) of this section.

(4) *Time and manner of making an election.* (i) A husband and wife shall make the election under this section by attaching a statement to a joint return for the first taxable year for which the election is to be in effect. The election must be made before the expiration of the period prescribed by section 6511(a) (or section 6511(c) if the period is extended by agreement) for making a claim for credit or refund. If either or both spouses die after the close of the taxable year but before the joint return is filed, the election may be made by the executor, administrator, or other person charged with the property of the deceased spouse. If the election is made with a joint amended return, the amended return should be made on Form 1040 or 1040A, the word ‘‘Amended’’ should be written clearly on the front of the return, and an amended return also must be filed for each subsequent taxable year as to which a return previously has been filed by either spouse.

(ii) The statement must contain a declaration that the election is being made and that the requirements of paragraph (a)(1) of this section are met for the taxable year. The statement must also contain the name, address, and taxpayer identifying number of each spouse. If the election is being made on behalf of a deceased spouse, the statement must contain the name and address of the executor, administrator, or other person making the election on behalf of the decreased spouse. The statement must be signed by both persons making the election.

(b) *Termination of election*—(1) *Revocation.* (i) An election under this section shall terminate if either spouse revokes the election. An election that is revoked terminates as of the first taxable year for which the last day prescribed by section 6072(a) and 6081(a) for filing the return of tax has not yet occurred.

(ii) Revocation of the election is made by filing a statement of revocation in the following manner. If the spouse revoking the election is required to file a return under section 6012, the statement is filed by attaching it to the return for the first taxable year to which the revocation applies. If the spouse revoking the election is not required to file a return under section 6012, but files a claim for refund under section 6511, the statement is filed by attaching it to the claim for refund. If the spouse revoking the election is not required to file a return and does not file a claim for refund, the statement is filed by submitting it to the service center director with whom was filed the most recent joint return of the spouses. The revocation may, if the revoking spouse dies after the close of the first taxable year to which the revocation applies but before the return, claim for refund, or statement of revocation is filed, be made by the executor, administrator or other person charged with the property of the deceased spouse.

(iii) A revocation of the election is effective as of a particular taxable year if it is filed on or before the last day prescribed by section 6072(a) and 6081(a) for filing the return of tax for that taxable year. However, the revocation is not final until that last day.

(iv) The statement of revocation must contain a declaration that the election under this section is being revoked. The statement must also contain the name, address, and taxpayer identifying number of each spouse. If the revocation is being made on behalf of a deceased spouse, the statement must contain the name and address of the executor, administrator, or other person revoking the election on behalf of the deceased spouse. The statement must also include a list of the States, foreign countries, and possessions of the United States which have community property laws and in which:

(A) Each spouse is domiciled, or

(B) real property is located from which either of the spouses receives income.

The statement must be signed by the person revoking the election.

(2) *Death.* An election under this section shall terminate if either spouse dies. An election that terminates on account of death terminates as of the first taxable year of the surviving spouse following the taxable year in which the death occurred. However, if the surviving spouse is a citizen or resident of the United States who is entitled to the benefits of section 2, the election terminates as of the first taxable year following the last taxable year for which the surviving spouse is entitled to the benefits of section 2. If both spouses die within the same taxable year, the election terminates as of the first day after the close of the taxable year in which the deaths occurred.

(3) *Legal separation.* An election under this section terminates if the spouses legally separate under a degree of divorce or of separate maintenance. An election that terminates on account of legal separation terminates as of the close of the taxable year preceding the taxable year in which the separation occurs. The rules in §1.6013–4(a) are relevant in determining whether two spouses are legally separated.

(4) *Inadequate records.* An election under this section may be terminated by the Commissioner if it is determined that either spouse has failed to keep adequate records. An election that is terminated on account of inadequate records terminates as of the close of the taxable year preceding the taxable year for which the Commissioner determines that the election should be terminated. Adequate records are the books, records, and other information resonably necessary to ascertain the amount of liability for taxes under chapters 1, 5, and 24 of the code of either spouse for the taxable year. Adequate records also includes the granting of access to the books and records.

(c) *Illustrations.* The application of this section is illustrated by the following examples. In each case the individual's taxable year is the calendar year and the spouses are not legally separated.

Example (1). W, a U.S. citizen for the entire taxable year 1979, is married to H, a nonresident alien individual. W and H may make the section 6013(g) election for 1979 by filing the statement of election with a joint return. If W and H make the election, income from sources within and without the United States received by W and H in 1979 and subsequent years must be included in gross income for each taxable year unless the election later is terminated or suspended. While W and H must file a joint return for 1979, joint or separate returns may be filed for subsequent years.

Example (2). H and W are husband and wife and are both nonresident alien individuals. In June 1980 H becomes a U.S. resident and remains a resident for the balance of the year. H and W may make the section 6013(g) election for 1980. If H and W make the election, income from sources within and without the United States received by H and W for the entire taxable year 1980 and subsequent years must be included in gross income for each taxable year, unless the election later is terminated or suspended.

Example (3) . W, a U.S. resident on December 31, 1981, is married to H, a nonresident alien. W and H make the section 6013(g) election and file joint returns for 1981 and succeeding years. On January 10, 1987, W becomes a nonresident alien. H has remained a nonresident alien. W and H may file a joint return or separate returns for 1987. As neither W or H is a U.S. resident at any time during 1988, their election is suspended for 1988. If W and H have U.S. source or foreign source income effectively connected with the conduct of a U.S. trade or business in 1988, they must file separate returns as nonresident aliens. W becomes a U.S. resident again on January 5, 1990. Their election no longer is in suspense. Income from sources within and without the United States received by W or H in the years their election is not suspended must be included in gross income for each taxable year.

Example (4). H, a U.S. citizen for the entire taxable year 1979, is married to W, who is not a U.S. citizen. While W believes that she is a U.S. resident, H and W make the section 6013(g) election for 1979 to cover the possibility that later it would be determined that she is a nonresident alien during 1979. The election for 1979 will not be considered evidence that W was a nonresident alien in prior years. Income from sources within and without the United States received by H amd W in 1979 and subsequent years must be included in gross income for each taxable year, unless the election later is terminated or suspended.

[T.D. 7670, 45 FR 6929, Jan. 31, 1980, as amended by T.D. 7842, 47 FR 49842, Nov. 3, 1982; T.D. 8411, 57 FR 15241, Apr. 27, 1992]

§ 1.6013–7 Joint return for year in which nonresident alien becomes resident of the United States.

(a) *Election for special treatment*—(1) *In general.* Two individuals who are husband and wife at the close of a taxable year ending on or after December 31, 1975, may make an election under this section for that taxable year if one spouse is a citizen or resident of the United States on the last day of that taxable year and the other spouse is a nonresident alien at the beginning of that taxable year and a citizen or resident of the United States at the close of that taxable year. Two married individuals who are nonresident aliens at the beginning of a taxable year and who are U.S. citizens or residents on the last day of that taxable year qualify for the election. The effect of the election is that each spouse is treated as a resident of the United States for purposes of chapters 1, 5, and 24 and sections 6012, 6013, 6072, and 6091 of the code for all of that taxable year. A husband and wife may not make an election if an election has previously been made under this section by either spouse.

(2) *Particular rules.* The rules in subdivisions (ii) through (v) of § 1.6013–6(a)(2) are applicable to this section.

(3) *Time and manner of making an election.* A husband and wife shall make the election under this section in accordance with the rules in § 1.6013–6(a)(4).

(b) *Section 6013(g) election in effect.* If an election under section 6013(g) is in effect for a year subsequent to the first taxable year for which made and during that subsequent year the husband and wife meet the requirements of section 6013(h) and paragraph (a)(1) of this section, then the election under section 6013(g) shall apply to that subsequent taxable year. A separate election under section 6013(h) is not required for that subsequent taxable year.

[T.D. 7670, 45 FR 6931, Jan. 31, 1980]

§ 1.6014–1 Tax not computed by taxpayer for taxable years beginning before January 1, 1970.

(a) *In general.* If an individual is entitled under paragraph (a)(7) of § 1.6012–1 to use as his return Form 1040A, he may elect not to show thereon the amount of the tax due in connection with such return if his gross income is less than $5,000.

(b) *Computation and payment of tax.* A taxpayer who, in accordance with paragraph (a) of this section, elects not to show the tax on Form 1040A is not required to pay the unpaid balance of such tax at the time he files the return. In such case, the tax will be computed for the taxpayer by the Internal Revenue Service, and a notice will be mailed to the taxpayer stating the amount of tax due. Where it is determined that a refund of tax is due, the Internal Revenue Service will send such refund to the taxpayer. See paragraph (c) of § 301.6402–3 of this chapter (Regulations on Procedure and Administration).

(c) *Joint return.* (1) A husband and wife who, pursuant to paragraph (a)(7) of § 1.6012–1, file a joint return on Form 1040A may elect not to show the tax on such return if their aggregate gross income for the taxable year is less than $5,000.

(2) The tax computed for the taxpayer who files Form 1040A and elects not to show thereon the tax due shall be the lesser of the following amounts:

(i) A tax computed as though the return on Form 1040A constituted the separate returns of the spouses, or

(ii) A tax computed as though the return on Form 1040A constituted a joint return.

(d) *Married individuals filing separate returns.* In the case of a married individual who files a separate return and who elects under this section not to show his tax on Form 1040A his tax shall be computed with reference to the 10-percent standard deduction rather than the minimum standard deduction.

(e) This section shall apply to taxable years beginning before January 1, 1970.

[T.D. 6500, 25 FR 12108, Nov. 26, 1960, as amended by T.D. 6581, 26 FR 11678, Dec. 6, 1961; T.D. 6792, 30 FR 531, Jan. 15, 1965; T.D. 7102, 36 FR 5497, Mar. 24, 1971]

§1.6014–2 Tax not computed by taxpayer for taxable years beginning after December 31, 1969.

(a) *In general.* An individual subject to the tax imposed by section 1 of the Code may, in accordance with the instructions applicable to the income tax return to be filed, elect, for any taxable year beginning after December 31, 1969, not to show on his income tax return for such year the amount of tax due in connection with such return.

(b) *Restriction on making an election.* The election pursuant to this section shall not be made by an individual who does not file his return (or amended return) making such election on or before the date prescribed in section 6072(a) for the filing of the original return (determined without regard to any extension of time).

(c) *Effects of election.* (1) A taxpayer who, in accordance with the provisions of this section, elects not to show the tax on his income tax return is not required to pay the unpaid balance of such tax at the time he files the return. In such case, the tax will be computed for the taxpayer by the Internal Revenue Service, and a notice will be mailed to the taxpayer stating the amount of tax due. Where it is determined that a refund of tax is due, the Internal Revenue Service will send such refund to the taxpayer. See paragraph (c) of §301.6402–3 of this chapter (Regulations on Procedure and Administration). The computation of tax by the Internal Revenue Service shall be treated for purposes of this chapter as if made by the taxpayer, and such computation or the issuance of a notice or refund pursuant thereto shall not relieve the taxpayer of liability for any deficiency (although the deficiency is based upon an amount of tax different from that computed for the taxpayer by the Internal Revenue Service) or affect the rights of the Internal Revenue Service with respect to any subsequent audit or other review of the taxpayer's return.

(2) Where the election provided for in this section is made by a taxpayer who takes the standard deduction and who has adjusted gross income of less than $10,000, such election constitutes an election to pay the tax imposed by section 3.

(3) A taxpayer who makes an election under section 6014 shall not be precluded from claiming:

(i) Status as a head of household or a surviving spouse;

(ii) The credit under section 31 (relating to tax withheld on wages);

(iii) The credit under section 37 (relating to retirement income);

(iv) The credit under section 38 (relating to investment in certain depreciable property);

(v) The credit under section 39 (relating to certain uses of gasoline and lubricating oil);

(vi) The credit under section 41 (relating to contributions to candidates for public office);

(vii) The credit under section 42 (relating to personal exemptions);

(viii) The credit under section 43 (relating to earned income);

(ix) The credit under section 44 (relating to purchase of new principal residence); or

(x) The credit under section 45 (relating to overpayments of tax).

(d) *Joint returns.* (1) A husband and wife who file a joint return may elect not to show the tax on such return in accordance with the rules prescribed in paragraphs (a) and (b) of this section.

(2) The tax computed for a husband and wife who elect pursuant to this section not to show their tax on their joint income tax return shall be the lesser of the following amounts:

(i) A tax computed as though the return of income constituted a joint return, or

(ii) If sufficient information is provided for the taxable income of each spouse to be determined, a tax computed as though the return of income constituted the separate returns of the spouses.

(e) *Married individuals filing separate returns.* This section shall apply to married individuals filing separate returns unless otherwise provided in the instructions accompanying a return. The instructions may require the taxpayer to attach to his return a statement to the effect that his tax and the tax of his spouse were determined in accordance with the rules of sections 141(d) and 142(a).

(f) *Revocation of election.* An election pursuant to this section may be revoked on an amended return (whether such return is filed before or after the date prescribed in section 6072(a) for filing the original return).

[T.D. 7102, 36 FR 5497, Mar. 24, 1971, as amended by T.D. 7298, 38 FR 35234, Dec. 26, 1973; T.D. 7391, 40 FR 55856, Dec. 2, 1975]

§ 1.6015(a)–1 Declaration of estimated income tax by individuals.

(a) *Requirement*—(1) *Taxable years beginning after December 31, 1971.* With respect to taxable years beginning after December 31, 1971, a declaration of estimated income tax by an individual is not required if the estimated tax (as defined in section 6015(c)) can reasonably be expected to be less than $100. In all other cases a declaration of estimated income tax shall be made by every individual if the following conditions are met and if such individual is not a nonresident alien individual who is excepted under section 6015(i) and § 1.6015(i)–1 from the requirements of making a declaration:

(i) The gross income for the taxable year can reasonably be expected to exceed:

(a) $20,000, in the case of:

(1) A single individual including a head of a household (as defined in section 2(b)) or a surviving spouse (as defined in section 2(a)); or

(2) A married individual entitled under section 6015(b) to file a joint declaration with his spouse, if his spouse has not received wages (as defined in section 3401(a)) for the taxable year; or

(b) $10,000, in the case of a married individual entitled under section 6015(b) to file a joint declaration with his spouse, if both he and his spouse have received wages (as defined in section 3401(a)) for the taxable year; or

(c) $5,000, in the case of a married individual not entitled under section 6015(b) to file a joint declaration with his spouse; or

(ii) The gross income can reasonably be expected to include more than $500 from sources other than wages (as defined in section 3401(a)).

(2) *Taxable years beginning after December 31, 1966, and before January 1, 1972.* With respect to taxable years beginning after December 31, 1966, and before January 1, 1972, a declaration of estimated income tax by an individual is not required if the estimated tax (as defined in section 6015(c)) can reasonably be expected to be less than $40. In all other cases a declaration of estimated income tax shall be made by every individual if the following conditions are met and if such individual is not a nonresident alien individual who is excepted under section 6015(i) and § 1.6015(i)–1 from the requirement of making a declaration:

(i) The gross income for the taxable year can reasonably be expected to exceed:

(a) $5,000, in the case of:

(1) A single individual other than a head of a household (as defined in section 1(b)(2) for taxable years ending before January 1, 1971, or as defined in section 2(b) of the Code as amended by the Tax Reform Act of 1969 for taxable years beginning after December 31, 1970) or a surviving spouse (as defined in section 2(b) for taxable years ending before January 1, 1971, or as defined in section 2(a) of the Code as amended by the Tax Reform Act of 1969 for taxable years beginning after December 31, 1970);

(2) A married individual not entitled under section 6015(b) to file a joint declaration with his spouse; or

(3) A married individual entitled under section 6015(b) to file a joint declaration with his spouse, but only if the aggregate gross income of such individual and his spouse for the taxable year can reasonably be expected to exceed $10,000; or

(b) $10,000, in the case of:

(1) A head of household (as defined in section 1(b)(2) for taxable years ending before January 1, 1971, or as defined in

section 2(b) of the Code as amended by the Tax Reform Act of 1969 for taxable years beginning after December 31, 1970); or

(2) A surviving spouse (as defined in section 2(b) for taxable years ending before January 1, 1971, or as defined in section 2(a) of the Code as amended by the Tax Reform Act of 1969 for taxable years beginning after December 31, 1970); or

(ii) The gross income can reasonably be expected to include more than $200 from sources other than wages (as defined in section 3401(a)).

(3) *Taxable years beginning before January 1, 1967.* With respect to taxable years beginning before January 1, 1967, and after December 31, 1960, a declaration of estimated income tax by an individual is not required if the estimated tax (as defined in section 6015(c)) can reasonably be expected to be less than $40. In all other cases a declaration shall be made by every citizen of the United States, whether residing at home or abroad, every individual residing in the United States though not a citizen thereof, every nonresident alien who is a resident of Canada, Mexico, or Puerto Rico and who has wages subject to withholding at the source under section 3402, and every nonresident alien who has been, or expects to be, a resident of Puerto Rico during the entire taxable year, if:

(i) The gross income for the taxable year can reasonably be expected to exceed:

(a) $5,000, in the case of:

(1) A single individual other than a head of a household (as defined in section 1(b)(2)); or

(2) A married individual not entitled under section 6015(b) to file a joint declaration with his spouse; or

(3) A married individual entitled under section 6015(b) to file a joint declaration with his spouse, but only if the aggregate gross income of such individual and his spouse for the taxable year can reasonably be expected to exceed $10,000; or

(b) $10,000, in the case of:

(1) A head of a household (as defined in section 1(b)(2)); or

(2) A surviving spouse (as defined in section 2(b)); or

(ii) The gross income can reasonably be expected to include more than $200 from sources other than wages (as defined in section 3401(a)).

(b) *Income of child.* In estimating his gross income for the taxable year a parent should not take into account the income of his minor child. Such income is not includible in the gross income of the parent. See section 73 and §1.73–1.

(c) *Exemption of spouse.* For the purpose of determining whether a declaration of estimated tax is required under the provisions of paragraph (a)(3) of this section, a married person filing a separate declaration may not take into account the exemption of his spouse, if his spouse has, or is reasonably expected to have, gross income, or is reasonably expected to be the dependent of another taxpayer for the taxable year.

(d) *Nonresident alien individuals.* For the rules exempting certain nonresident alien individuals from the requirement of making a declaration of estimated income tax, see §1.6015(i)–1.

(e) *Examples.* The application of the provisions of this section may be illustrated by the following examples:

Example (1). H maintains as his home a household which is the principal place of abode of himself and his two dependent children. H's wife died in 1970 and he has not remarried. H and his wife filed a joint return for 1970. H's salary from January 1, to June 30, 1972, is at the annual rate of $18,000. However, effective July 1, 1972, his annual salary is increased to $24,000, and under the facts then existing it is reasonable to assume that his salary for the remaining portion of 1972 will remain unchanged and that his total salary for the year will, therefore, be $21,000. Since H is a surviving spouse (as defined in section 2(a)) and his gross income can reasonably be expected to exceed $20,000, he is required to file a declaration of estimated tax for 1972. Since it was not reasonable to assume that H's gross income for 1972 would exceed $20,000 until July 1972 (after June 1 and before September 2), H is not required to file a declaration until September 15, 1972. However, if H's estimated tax (as defined in section 6015(c)) can reasonably be expected to be less than $100, he is not required to file a declaration of estimated tax. See section 6073 and §§1.6073–1 to 1.6073–4, inclusive, for rules as to when a declaration must be filed.

Example (2). H, a taxpayer making his return on the calendar year basis, has an annual salary of $12,000 in 1972. W, H's wife, received wages (as defined in section 3401(a)) in December 1972. W did not receive wages prior to December. Assuming that H and W are entitled to file a joint declaration of estimated tax under section 6015(b), H would not be required to file a declaration for 1972 until January 15, 1973, since prior to December 1972 W had not received wages. Since W received wages after September 1, 1972, H must file a declaration on or before January 15, 1973, because, under the rule contained in paragraph (a)(1)(i)*(b)* of this section, H's gross income could reasonably be expected to exceed $10,000 for 1972. However, no declaration would be required if H's estimated tax (as defined in section 6015(c)) could reasonably be expected to be less than $100. No declaration is required prior to January 15, 1973, because, under the rule contained in paragraph (a)(1)(i)*(a)*(2) of this section, H's gross income for 1972 could not reasonably be expected to exceed $20,000.

Example (3). P is a taxpayer making his return on the calendar year basis. P is engaged in the practice of his profession on his own account and has gross income of $2,000 from such profession for the 2 months of January and February 1972. He reasonably expects that his gross income from his profession will continue to average $1,000 each month throughout the year and that he will have no income from any other source during 1972. Since P has gross income which does not constitute wages subject to withholding, he is required to file a declaration of estimated tax for that year since he has income of more than $500 from sources other than wages, unless he reasonably expects his estimated tax to be less than $100.

Example (4). S, a married taxpayer, has been regularly employed for many years. As of January 1, 1972, his weekly wages are $305. For many years, S has also owned stock in a corporation which has regularly paid him annual dividends ranging from $575 to $600. Because his gross income can reasonably be expected to include more than $500 from sources other than wages, S is required to make a declaration of estimated tax for 1972, unless he reasonably expects his estimated tax to be less than $100.

(f) *Declarations made by agents.* The declaration of income may be made by an agent if, by reason of disease or injury, the person liable for the making of the declaration is unable to make it. The declaration may also be made by an agent if the taxpayer is unable to make the declaration by reason of continuous absence from the United States (including Puerto Rico as if a part of the United States) for a period of at least 60 days prior to the date prescribed by law for making the declaration. In addition, a declaration may be made by an agent if the taxpayer requests permission, in writing, of the district director for the internal revenue district in which is located the legal residence or principal place of business of the person liable for the making of the declaration, and such district director determines that good cause exists for permitting the declaration to be so made. However, assistance in the preparation of the declaration may be rendered under any circumstances. Whenever a declaration is made by an agent it must be accompanied by a power of attorney (or copy thereof) authorizing him to represent his principal in making, executing, or filing the declaration. A form 2848, when properly completed, is sufficient. In addition, where one spouse is physically unable by reason of disease or injury to sign a joint declaration, the other spouse may, with the oral consent of the one who is incapacitated, sign the incapacitated spouse's name in the proper place in the declaration followed by the words ''By ___________, Husband (or Wife)'', and by the signature of the signing spouse in his own right, provided that a dated statement signed by the spouse who is signing the declaration is attached to and made a part of the declaration stating:

(1) The name of the declaration being filed,

(2) The taxable year,

(3) The reason for the inability of the spouse who is incapacitated to sign the declaration, and

(4) That the spouse who is incapacitated consented to the signing of the declaration.

The taxpayer and his agent, if any, are responsible for the declaration as made and incur liability for the penalties provided for erroneous, false, or fraudulent declarations.

[T.D. 6500, 25 FR 12108, Nov. 26, 1960, as amended by T.D. 6817, 30 FR 4537, Apr. 8, 1965; T.D. 7117, 36 FR 9422, May 25, 1971; T.D. 7274, 38 FR 11345, May 7, 1973; T.D. 7282, 38 FR 19027, July 17, 1973; T.D. 7332, 39 FR 44232, Dec. 23, 1974]

§1.6015(b)–1 Joint declaration by husband and wife.

(a) *In general.* A husband and wife may make a joint declaration of estimated tax even though they are not living together. However, a joint declaration may not be made if they are separated under a decree of divorce or of separate maintenance. A joint declaration may not be made if the taxpayer's spouse is a nonresident alien (including a nonresident alien who is a bona fide resident of Puerto Rico during the entire taxable year) or if his spouse has a different taxable year. If the gross income of each spouse meets the requirements of section 6015(a), either a joint declaration must be made or a separate declaration must be made by each. If a joint declaration is made, the amount estimated as the income tax imposed by chapter 1 (other than by section 56) must be computed on the aggregate estimated taxable income of the spouses (see section 6013(d)(3) and §1.2–1), while (for taxable years beginning after December 31, 1966) the amount estimated as the self-employment tax imposed by chapter 2 must be computed on the separate estimated self-employment income of each spouse. See sections 1401 and 1402 and §1.6017–1(b)(1). The liability with respect to the estimated tax, in the case of a joint declaration, shall be joint and several.

(b) *Application to separate returns.* The fact that a joint declaration of estimated tax is made by them will not preclude a husband and his wife from filing separate returns. In case a joint declaration is made but a joint return is not made for the same taxable year, the payments made on account of the estimated tax for such year may be treated as payments on account of the tax liability of either the husband or wife for the taxable year or may be divided between them in such manner as they may agree. In the event the husband and wife fail to agree to a division, such payments shall be allocated between them in accordance with the following rule. The portion of such payments to be allocated to a spouse shall be that portion of the aggregate of all such payments as the amount of tax imposed by chapter 1 (other than by section 56) shown on the separate return of the taxpayer (plus, for taxable years beginning after December 31, 1966, the amount of tax imposed by chapter 2 shown on the return of the taxpayer) bears to the sum of the taxes imposed by chapter 1 (other than by section 56) shown on the separate returns of the taxpayer and his spouse (plus, for taxable years beginning after December 31, 1966, the sum of the taxes imposed by chapter 2 shown on the returns of the taxpayer and his spouse). For example, assume that for calendar yedar 1972 H and his Spouse W make a joint declaration of estimated tax and, pursuant thereto, pay a total of $19,500 of estimated tax. H and W subsequenty file separate returns for 1972 showing tax imposed by chapter 1 (other than by section 56) in the amount of $11,500 and $8,000, respectively. In addition, H's return shows a tax imposed by chapter 2 in the amount of $500. H and W fail to agree to a division of the estimated tax paid. The amount of the aggregate estimated tax payments allocated to H is computed as follows:

(1) Amount of tax, imposed by chapter 1 (other than by section 56) shown on H's return	$11,500
(2) Plus: Amount of tax imposed by chapter 2 shown on H's return	500
(3) Total taxes imposed by chapter 1 (other than by section 56) and by chapter 2 shown on H's return	12,000
(4) Amount of tax imposed by chapter 1 (other than by section 56) shown on W's return	$8,000
(5) Total taxes imposed by chapter 1 (other than by section 56) and by chapter 2 shown on both H's and W's returns	20,000
(6) Proportion of such taxes shown on H's return to total amount of such taxes shown on both H's and W's returns ($12,000÷20,000)	60%
(7) Amount of estimated tax payments allocated to H (60% of $10,500)	$11,700

Accordingly, H's return would show remaining tax liability in the amount of $300 ($12,000 taxes shown less $11,700 estimated tax allocated).

(c) *Death of spouse.* (1) A joint declaration may not be made after the death of either the husband or wife. However, if it is reasonable for a surviving spouse to assume that there will be filed a joint return for himself and the deceased spouse for his taxable year and the last taxable year of the deceased spouse he may, in making a separate declaration for his taxable year which includes the period comprising such last taxable year of his spouse, estimate the amount of the tax imposed by chapter 1 (other than by section 56) on his and his spouse's taxable income on an aggregate basis and compute his estimated tax with respect to such chapter 1 tax in the same manner as though a joint declaration had been filed.

(2) If a joint declaration is made by husband and wife and thereafter one spouse dies, no further payments of estimated tax on account of such joint declaration are required from the estate of the decedent. The surviving spouse, however, shall be liable for the payment of any subsequent installments of the joint estimated tax unless an amended declaration setting forth the separate estimated tax for the taxable year is made by such spouse. Such separate estimated tax shall be paid at the times and in the amounts determined under the rules prescribed in section 6153. For the purpose of (i) the making of such amended declaration by the surviving spouse, and (ii) the allocation of payments made pursuant to a joint declaration between the surviving spouse and the legal representative of the decedent in the event a joint return is not filed, the payments made pursuant to the joint declaration may be divided between the decedent and the surviving spouse in such proportion as the surviving spouse and the legal representative of the decedent may agree. In the event the surviving spouse and the legal representative of the decedent fail to agree to a division, such payments shall be allocated in accordance with the following rule. The portion of such payments to be allocated to the surviving spouse shall be that portion of the aggregate amount of such payments as the amount of tax imposed by chapter 1 (other than by section 56) shown on the separate return of the surviving spouse (plus, for taxable years beginning after December 31, 1966, the amount of tax imposed by chapter 2 shown on the return of the surviving spouse) bears to the sum imposed by chapter 1 (other than by section 56) shown on the separate returns of the surviving spouse and of the decedent (plus, for taxable years beginning after December 31, 1966, the sum of the taxes imposed by chapter 2 shown on the returns of the surviving spouse and of the decedent); and the balance of such payments shall be allocated to the decedent. This rule may be illustrated by analogizing the surviving spouse described in this rule to H in the example contained in paragraph (b) of this section and the decedent in this rule to W in that example.

(d) *Signing of declaration.* A joint declaration of a husband and wife (if not made by an agent of one or both spouses) shall be signed by both spouses. The provisions of paragraph (f) of § 1.6015(a)–1, relating to returns made by agents, shall apply where one spouse signs a declaration as agent for the other, or where a third party signs a declaration as agent for one or both spouses.

[T.D. 6500, 25 FR 12108, Nov. 26, 1960, as amended by T. D. 7274, 38 FR 11345, May 7, 1973; T.D. 7427, 41 FR 34027, Aug. 12, 1976]

§ 1.6015(c)–1 Definition of estimated tax.

(a) *In general.* In the case of an individual, the term ''estimated tax'' means:

(1) The amount which the individual estimates as the amount of the income tax imposed by chapter 1 (other than the tax imposed by section 56 or for taxable years ending before September 30, 1968, the tax surcharge imposed by section 51) for the taxable year (and including the amount which he estimates as the amount of any qualified State individual income taxes which are treated pursuant to section 6361(a) as if they were imposed by chapter 1 for the taxable year), plus

(2) For taxable years beginning after December 31, 1966, the amount which the individual estimates as the amount of the self-employment tax imposed by chapter 2 for the taxable year, minus

(3) The amount which the individual estimates as the sum of any credits against tax provided by part IV of subchapter A of chapter 1. These credits are those provided by section 31 (relating to tax withheld on wages), section 32 (relating to tax withheld at source on nonresident aliens and foreign corporations and on tax-free covenant bonds), section 33 (relating to foreign taxes), section 34 (relating to the credit for dividends received on or before December 31, 1964), section 35 (relating to

partially tax-exempt interest), section 37 (relating to the elderly), section 38 (relating to the investment credit), section 39 (relating to certain uses of gasoline, special fuels, and lubricating oil), section 40 (relating to expenses of work incentive programs), section 41 (relating to contributions to candidates), section 42 (relating to general tax credit), section 43 (relating to earned income), section 44 (relating to purchase of new principal residence), section 44A (relating to expenses for household and dependent care services necessary for gainful employment), section 44B (relating to credit for employment of certain new employees), and section 45 (relating to overpayments of tax), minus,

(4) In the case of an individual who is subject to one or more qualified State individual income taxes, the amount which he estimates as the sum of the credits allowed against such taxes pursuant to section 6362(b)(2) (B) or (C) or section 6362(c)(4) and paragraph (c) of §301.6362–4 of this chapter (Regulations on Procedure and Administration) (relating to the credit for income taxes of other States or political subdivisions thereof) and paragraph (c)(2) of §301.6361–1 (relating to the credit for tax withheld from wages on account of qualified State individual income taxes), and minus

(5) For taxable years ending after February 29, 1980, the amount which the individual estimates will be the amount of such individual's overpayment of windfall profit tax imposed by section 4986 of the Code for the taxable year. For this purpose, the amount of such overpayment is the amount by which such individual's aggregate windfall profit tax liability for the taxable year as a producer of crude oil is reasonably expected to be exceeded by withholding of windfall profit tax for the taxable year.

(b) *Example.* A, a self-employed individual not subject to any qualified State individual income tax, estimates that his liabilities for income tax and self-employment tax for 1973 will be $1,600 and $400, respectively. A is required to declare and pay an estimated tax of $2,000 for that year.

(Secs. 6015, 6154, 6654, 6655, and 7805, Internal Revenue Code of 1954 (96 Stat. 2395 and 2396, 68A Stat. 917; 26 U.S.C. 6015, 6154, 6654, 6655, and 7805))

[T.D. 7577, 43 FR 59358, Dec. 20, 1978, as amended by T.D. 8016, 50 FR 11854, Mar. 26, 1985]

§1.6015(d)–1 Contents of declaration of estimated tax.

(a) *In general.* (1) The declaration of estimated tax by an individual shall be made on Form 1040–ES. For the purpose of making the declaration, the amount of gross income which the taxpayer can reasonably be expected to receive or accrue, depending upon the method of accounting upon which taxable income is computed, and the amount of the estimated allowable deductions and credits to be taken into account in computing the amount of estimated tax shall be determined upon the basis of the facts and circumstances existing as at the time prescribed for the filing of the declaration as well as those reasonably to be anticipated for the taxable year. If, therefore, the taxpayer is employed at the date prescribed for filing his declaration at a given wage or salary, it should, in the absence of circumstances indicating the contrary, be presumed by him for the purpose of the declaration that such employment will continue to the end of the taxable year at the wage or salary received by him as of such date. In the case of income other than wages and salary the regularity in the payment of income, such as dividends, interest, rents, royalties, and income arising from estates and trusts is a factor to be taken into consideration. Thus, if the taxpayer owns shares of stock in a corporation and dividends have been paid regularly for several years upon such stock, the taxpayer in the preparation of his declaration should, in the absence of information indicating a change in the dividend policy, include the prospective dividends from the corporation for the taxable year as well as those actually received in such year prior to the filing of the declaration. In the case of a taxpayer engaged in business on his own account, there shall be made an estimate of gross income and deductions and credits in the light of the best available information affecting the trade, business, or profession.

(2) In the case of any individual who can, at the time of the preparation of his declaration, reasonably anticipate that his gross income will be of such amount and character as to enable him to elect upon his return for such year to compute the tax under section 3 (relating to optional tax), in lieu of the tax imposed by section 1, the declaration of estimated tax may be made upon the basis set forth in section 3 and § 1.3–1. The filing of a declaration computed upon the basis of section 3 shall not constitute the making of an election under section 4 (relating to rules for optional tax) nor will it permit the filing of a return on the basis of the optional tax under section 3 unless the taxpayer otherwise comes within the provisions of sections 3 and 4. For the purpose of computing the tax liability in the case of married persons, if the taxable income of one spouse is determined without regard to the standard deduction, the standard deduction is not allowed to either. (See, however, paragraph (c) of § 1.142–1 for exceptions where spouses are legally separated under a decree of divorce or separate maintenance.) Hence, where separate declarations are filed, one spouse should not use section 3 in computing the estimated tax unless the other spouse also uses section 3 or employs the standard deduction in computing the estimated tax.

(b) *Computation of estimated tax.* In computing the estimated tax the taxpayer should take into account the following:

(1) The amount estimated as the income tax imposed by chapter 1 (other than by section 56) for the taxable year after the application of any allowable amounts estimated as the credit for foreign taxes, the dividends received credit (for dividends received on or before December 31, 1964), the credit for partially tax-exempt interest, the retirement income credit, the investment credit, the credit for expenses of work incentive programs, the credit for contributions to candidates, the credit for overpayments of tax, but without regard to the credit under section 31 for tax withheld on wages or to the credit under section 39 for certain uses of gasoline, special fuels, and lubricating oils;

(2) For taxable years beginning after December 31, 1966 (and, if the taxpayer so desires, for an earlier taxable year), the amount estimated as the tax on self-employment income imposed by chapter 2;

(3) The amounts estimated by the taxpayer as the credits under section 31 for tax withheld on wages and under section 39 for certain uses of gasoline, special fuels, and lubricating oils;

(4) For taxable years ending after February 29, 1980, the amount which the taxpayer estimates will be the amount of such taxpayer's overpayment of windfall profit tax imposed by section 4986 of the Code for the taxable year. For this purpose, the amount of such overpayment is the amount by which such individual's aggregate windfall profit tax liability for the taxable year as a producer of crude oil is reasonably expected to be exceeded by withholding of windfall profit tax for the taxable year.

(5) The excess, if any, of the sum of the amounts shown under subparagraphs (b) (1) and (2) of this paragraph over the sum of the amounts shown under subparagraphs (b)(3) and (4) of this paragraph shall be the estimated tax for the taxable year.

(c) *Use of prescribed form.* Copies of Form 1040–ES will so far as possible be furnished taxpayers by district directors. A taxpayer will not be excused from making a declaration, however, by the fact that no form has been furnished to him. Taxpayers not supplied with the proper form should make application therefor to the district director in ample time to have their declarations prepared, verified, and filed with the district director on or before the date prescribed for filing the declaration. If the prescribed form is not available, a statement disclosing the amount estimated as the tax, the estimated credits, and the estimated tax after deducting such credits should be filed as a tentative declaration within the prescribed time, accompanied by the payment of the required installment. Such tentative declaration should be supplemented, without unnecessary delay, by a declaration made on the proper form.

(Secs. 6015, 6154, 6654, 6655, and 7805, Internal Revenue Code of 1954 (96 Stat. 2395 and 2396, 68A Stat. 917; 26 U.S.C. 6015, 6154, 6654, 6655, and 7805))

[T.D. 6500, 25 FR 12108, Nov. 26, 1960, as amended by T.D. 7427, 41 FR 34028, Aug. 12, 1976; T.D. 8016, 50 FR 11854, Mar. 26, 1985]

§1.6015(e)–1 Amendment of declaration.

In the making of a declaration of estimated tax, the taxpayer is required to take into account the then existing facts and circumstances as well as those reasonably to be anticipated relating to prospective gross income, allowable deductions, and estimated credits for the taxable year. Amended or revised declarations may be made in any case in which the taxpayer estimates that his gross income, deductions, or credits will differ from the gross income, deductions, or credits reflected in the previous declaration. An amended declaration may also be made based upon a change in the number of exemptions to which the taxpayer may be entitled for the then current taxable year. However, only one amended declaration may be filed during any interval between installment dates. See paragraph (d) of §1.6073–1. An amended declaration may be filed jointly by husband and wife even though separate declarations have previously been filed. An amended declaration may be made on either Form 1040–ES (marked ‘‘Amended’’). See, however, paragraph (c) of §1.6015(d)–1 for procedure to be followed if the prescribed form is not available.

[T.D. 7427, 41 FR 34028, Aug. 12, 1976]

§1.6015(f)–1 Return as declaration or amendment.

(a) *Time for filing return.* (1)(i) If a taxpayer pays in full the amount computed on the return as payable, and

(a) If a taxpayer (other than a taxpayer referred to in *(b)* of this subdivision):

(1) On the calendar year basis, files his return on or before January 31 of the succeeding calendar year, or

(2) On a fiscal year basis, files his return on or before the last day of the first month immediately succeeding the close of such fiscal year, or

(b) If an individual referred to in section 6073(b), relating to income from farming, or, with respect to taxable years beginning after December 31, 1962, from fishing:

(1) On the calendar year basis, for taxable years beginning before January 1, 1969, files his return on or before February 15, or

(2) On a fiscal year basis, for taxable years beginning before January 1, 1969, files his return on or before the 15th day of the second month after the close of his fiscal year, or

(3) On the calendar year basis, for taxable years beginning after December 31, 1968, files his return on or before March 1, or

(4) On a fiscal year basis, for taxable years beginning after December 31, 1968, files his return on or before the first day of the third month after the close of his fiscal year, then:

(ii)*(a)* If the declaration is not required to be filed during the taxable year, but is required to be filed on or before January 15 of the succeeding year (or the date corresponding thereto in the case of a fiscal year), such return shall be considered as such declaration; or

(b) If a declaration was filed during the taxable year, such return shall be considered as the amendment of the declaration permitted by section 6015(e) to be filed on or before January 15 of the succeeding year (or the date corresponding thereto in the case of a fiscal year).

Hence, for example, an individual taxpayer on the calendar year basis who, subsequent to September 1, 1963, first meets the requirements of section 6015(a) which necessitate the filing of a declaration for 1963, may satisfy the requirements as to the filing of such declaration by filing his return for 1963 on or before January 31, 1964 (February 15, 1964, in the case of a farmer or fisherman), and paying in full at the time of such filing the tax shown thereon to be payable. Likewise, if a taxpayer files on or before September 15, 1963, a timely declaration for such year and subsequent thereto and on or before January 31, 1964, files his return for 1963, and pays at the time of such filing the tax shown by the return to be payable, such return shall be treated as an amended declaration timely filed.

(2) For the purpose of section 6015(f) a taxpayer may file his return on or before the last day of the first month following the close of the taxable year even though he has not been furnished Form W–2 by his employer. In such case the taxpayer shall compute, as accurately as possible, his wages for such year and the tax withheld for which he is entitled to a credit, reporting such wages and tax on his return, together with all other pertinent information necessary to the determination of his tax liability for such year.

(b) *Effect on addition to the tax.* Compliance with the provisions of section 6015(f) will enable a taxpayer to avoid the addition to the tax imposed by section 6654 with respect to an underpayment of the installment not required to be paid until January 15 of the succeeding calendar year (or the corresponding date in the case of a fiscal year). With respect to an underpayment of any earlier installment, compliance with section 6015(f) will not relieve the taxpayer from the addition to the tax imposed by section 6654. However, the period of the underpayment under section 6654(c), with respect to any earlier installment, will terminate on January 15 of the succeeding calendar year (or the corresponding date in the case of a fiscal year). For example, a taxpayer discovers on January 14, 1956, that he has underpaid his estimated tax for the calendar year 1955. He may, in lieu of filing an amended declaration on January 15, 1956, and paying the balance of the estimated tax determined thereon, file his final return on January 31, 1956, and pay in full the amount computed thereon as payable. By so doing, he will avoid the addition to the tax with respect to the underpayment of the installment required to be paid by January 15, 1956. The periods of underpayment, under section 6654(c), as to the installments required to be paid on April 15, 1955, June 15, 1955, and September 15, 1955, also terminate on January 15, 1956.

[T.D. 6500, 25 FR 12108, Nov. 26, 1960, as amended by T.D. 7028, 35 FR 3806, Feb. 27, 1970; 35 FR 4293, Mar. 10, 1970]

§ 1.6015(g)–1 Short taxable years of individuals.

(a) *Requirement of declaration.* No declaration may be made for a period of more than 12 months. For purposes of this section a taxable year of 52 or 53 weeks, in the case of a taxpayer who computes his taxable income in accordance with the election permitted by section 441(f) shall be deemed a period of 12 months. For special rules affecting the time for filing declarations and paying estimated tax by such a taxpayer, see paragraph (b) of § 1.441–2. A separate declaration for a fractional part of a year is required where, for example, there is a change, with the approval of the Commissioner, in the basis of computing taxable income from one taxable year to another taxable year. The periods to be covered by such separate declarations in the several cases are those set forth in section 443. No declaration is required if the short taxable year is:

(1) A period of less than four months.

(2) A period of at least four months but less than six months and the requirements of section 6015(a) are first met after the 1st day of the fourth month.

(3) A period of at least six months but less than nine months and the requirements of section 6015(a) are first met after the 1st day of the sixth month, or

(4) A period of nine months or more and the requirements of section 6015(a) are first met after the 1st day of the ninth month.

In the case of a decedent, no declaration need be filed subsequent to the date of death. As to the requirement for an amended declaration if death of one spouse occurs after filing a joint declaration, see paragraph (c) of § 1.6015(b)–1.

(b) *Income and income tax placed on annual basis.* For the purpose of determining whether the anticipated income and tax for a short taxable year resulting from a change of annual accounting period, necessitates the filing of a declaration, income and income tax imposed by chapter 1 (other than by section 56) shall be placed on an annual basis in the manner prescribed in section 443(b)(1). Thus, for example, an unmarried taxpayer who changes from a fiscal year basis to a calendar year basis beginning January 1, 1973, will have a short taxable year beginning July 1, 1972, and ending December 31, 1972. If his anticipated gross income for such short taxable year consists solely of wages (as defined in section 3401(a)) in the amount of $11,000, his total gross income and his gross income from such wages for the purpose of determining whether a declaration is required is $22,000, the amount obtained by placing anticipated income of $11,000 upon an annual basis. Since the taxpayer's anticipated gross income from wages when placed upon an annual basis is in excess of $20,000, he is required to file a declaration of estimated tax for the short taxable year unless the estimated tax can reasonably be expected to be less than $100. However, for taxable years beginning after December 31, 1966, the amount which the individual estimates as the amount of self-employment tax imposed by chapter 2 shall be computed on the actual self-employment income for the short period.

[T.D. 6500, 25 FR 12108, Nov. 26, 1960, as amended by T.D. 7427, 41 FR 34028, Aug. 12, 1976]

§1.6015(h)–1 Estates and trusts.

An estate or trust, though generally taxed as an individual, is not required to file a declaration.

§1.6015(i)–1 Nonresident alien individuals.

(a) *Exception from requirement of making a declaration.* No declaration of estimated income tax is required to be made under section 6015(a) and §1.6015(a)–1 by a nonresident alien individual unless:

(1) Such individual has wages, as defined in section 3401(a), and the regulations thereunder, upon which tax is required to be withheld under section 3402,

(2) Such individual has income (other than compensation for personal services upon which tax is required to be withheld at source under section 1441) which is effectively connected for the taxable year with the conduct of a trade or business in the United States by such individual, or

(3) Such individual has been, or expects to be, a resident of Puerto Rico during the entire taxable year.

(b) *Rules applicable to nonresident alien individuals required to make a declaration*—(1) *Tests to be applied.* A nonresident alien individual who is not excepted by paragraph (a) of this section from the requirement of making a declaration of income tax is required to file a declaration if his gross income meets the requirements of section 6015(a) and §1.6015(a)–1. In making the determination under section 6015(a)(1) as to whether the amount of the gross income of a nonresident alien individual is such as to require making a declaration of estimated income tax, only the tests relating to a single individual (other than a head of household) or to a married individual not entitled to file a joint declaration with his spouse shall apply, since a nonresident alien individual may not make a joint declaration by reason of section 6015(b) and is not a head of household. Only in a rare case would a nonresident alien individual be a surviving spouse.

(2) *Determination of gross income.* To determine the gross income of a nonresident alien individual who is not, or does not expect to be, a resident of Puerto Rico during the entire taxable year, see section 872 and §§1.872–1 and 1.872–2. To determine the gross income of a nonresident alien individual who is, or expects to be, a resident of Puerto Rico during the entire taxable year, see section 876 and §1.876–1. For purposes of applying paragraph (a)(2) of this section, income which is effectively connected for the taxable year with the conduct of a trade or business in the United States includes all income which is treated under section 871 (c) or (d) and §1.871–9 (relating to students and trainees) or §1.871–10 (relating to real property income) as income which is effectively connected for such year with the conduct of a trade or business in the United States.

(c) *Effective date.* This section shall apply for taxable years beginning after

December 31, 1966. For corresponding rules applicable to taxable years beginning before January 1, 1967, see 26 CFR 1.6015(a)–1(d) (Rev. as of Jan. 1, 1971).

[T.D. 7332, 39 FR 44232, Dec. 23, 1974]

§ 1.6015(j)–1 Applicability.

Section 6015 is applicable only with respect to taxable years beginning after December 31, 1954. Sections 58, 59, and 60 of the Internal Revenue Code of 1939 and the regulations thereunder, shall continue in force with respect to taxable years beginning before January 1, 1955.

[T.D. 6500, 25 FR 12108, Nov. 26, 1960. Redesignated by T.D. 7332, 39 FR 44232, Dec. 23, 1974]

§ 1.6016–1 Declarations of estimated income tax by corporations.

(a) *Requirement.* For taxable years ending on or after December 31, 1955, a declaration of estimated tax shall be made by every corporation (including unincorporated business enterprises electing to be taxed as domestic corporations under section 1361), which is subject to taxation under section 11 or 1201(a), or subchapter L, chapter 1 of the Code (relating to insurance companies), if its income tax under such sections or such subchapter L for the taxable year can reasonably be expected to exceed the sum of $100,000 plus the amount of any estimated credits allowable under section 32 (relating to tax withheld at source on nonresident aliens and foreign corporations and on tax-free covenant bonds), section 33 (relating to taxes of foreign countries and possessions of the United States), and section 38 (relating to investment in certain depreciable property).

(b) *Definition of estimated tax.* The term ‘‘estimated tax’’, in the case of a corporation, means the excess of the amount which such corporation estimates as its income tax liability for the taxable year under section 11 or 1201(a), or subchapter L, chapter 1 of the Code, over the sum of $100,000 and any estimated credits under sections 32, 33, and 38. However, for the rule with respect to the limitation upon the $100,000 exemption for members of certain electing affiliated groups, see section 243(b)(3)(C)(v) and the regulations thereunder.

(c) *Examples.* The application of this section may be illustrated by the following examples:

Example (1). M, a corporation subject to tax under section 11, reasonably anticipates that it will have taxable income of $224,000 for the calendar year 1964. The normal tax and surtax result in an expected liability of $105,000. M determines that it will not have any allowable credits under sections 32, 33, and 38 for 1964. Since M’s expected tax ($105,000) exceeds the exemption ($100,000), a declaration of estimated tax is required to be filed, reporting an estimated tax of $5,000 ($105,000 − $100,000) for the calendar year 1964.

Example (2). Under the facts stated in example (1), except that M estimates it will have an allowable foreign tax credit under section 33 in the amount of $4,000 and an allowable investment credit under section 38 in the amount of $3,000, no declaration is required, since M’s expected tax ($105,000) does not exceed the $100,000 plus the allowable credits totaling $7,000.

[T.D. 6768, 29 FR 14921, Nov. 4, 1964]

§ 1.6016–2 Contents of declaration of estimated tax.

(a) *In general.* The declaration of estimated tax by a corporation shall be made on Form 1120–ES. For the purpose of making the declaration, the estimated tax should be based upon the amount of gross income which the taxpayer can reasonably be expected to receive or accrue as the case may be, depending upon the method of accounting upon the basis of which the taxable income is computed, and the amount of the estimated allowable deductions and credits to be taken into account. Such amounts of gross income, deductions, and credits should be determined upon the basis of facts and circumstances existing as at the time prescribed for the filing of the declaration as well as those reasonably to be anticipated for the taxable year.

(b) *Use of prescribed form.* Copies of Form 1120–ES will so far as possible be furnished taxpayers by district directors. A taxpayer will not be excused from making a declaration, however, by the fact that no form has been furnished. Taxpayers not supplied with the proper form should make application therefor to the district director in ample time to have their declarations prepared, verified, and filed with the district director on or before the date prescribed for filing the declaration. If the prescribed form is not available a statement disclosing the estimated income tax after the exemption and the credits, if any, should be filed as a tentative declaration within the prescribed time, accompanied by the payment of the required installment. Such tentative declaration should be supplemented, without unnecessary delay, by a declaration made on the proper form.

§1.6016–3 Amendment of declaration.

In the making of a declaration of estimated tax the corporation is required to take into account the then existing facts and circumstances as well as those reasonably to be anticipated relating to prospective gross income, allowable deductions, and estimated credits for the taxable year. Amended or revised declarations may be made in any case in which the corporation estimates that its gross income, deductions, or credits will materially change the estimated tax reported in the previous declaration. However, for the rule with respect to the number of amended declarations which may be filed for taxable years beginning after December 31, 1963, see paragraph (d)(2) of §1.6074–1. Such amended declaration may be made on either Form 1120–ES (marked ''Amended'') or on the reverse side of the installment notice furnished the corporation by the district director. See, however, paragraph (b) of §1.6016–2 for procedure to be followed if the prescribed form is not available.

[T.D. 6768, 29 FR 14922, Nov. 4, 1964]

§1.6016–4 Short taxable year.

(a) *Requirement of declaration.* No declaration may be made for a period of more than 12 months. For purposes of this section a taxable year of 52 or 53 weeks, in the case of a corporation which computes its taxable income in accordance with the election permitted by section 441(f), shall be deemed a period of 12 months. For special rules affecting the time for filing declarations and paying estimated tax by such corporation, see paragraph (b) of §1.441–2. A separate declaration is required where a corporation is required to submit an income tax return for a period of less than 12 months, but only if such short period ends on or after December 31, 1955. However, no declaration is required if the short taxable year:

(1) Begins on or before December 31, 1963, and is:

(i) A period of less than 9 months, or

(ii) A period of 9 or more months but less than 12 months and the requirements of section 6016(a) are not met before the 1st day of the last month in the short taxable year, or

(2) Begins after December 31, 1963, and is:

(i) A period of less than 4 months, or

(ii) A period of 4 or more months but less than 12 months and the requirements of section 6016(a) are not met before the 1st day of the last month in the short taxable year.

(b) *Income placed on an annual basis.* In cases where the short taxable year results from a change of annual accounting period, for the purpose of determining whether the anticipated income for a short taxable year will result in an estimated tax liability requiring the filing of a declaration, such income shall be placed on an annual basis in the manner prescribed in section 443(b)(1). If a tax computed on such annualized income exceeds the sum of $100,000 and any credits under part IV, of subchapter A, chapter 1 of the Code, the estimated tax shall be the same part of the excess so computed as the number of months in the short period is of 12 months. Thus, for example, a corporation which changes from a calendar year basis to a fiscal year basis beginning October 1, 1956, will have a short taxable year beginning January 1, 1956, and ending September 30, 1956. If on or before August 31, 1956, the taxpayer anticipates that it will have income of $264,000 for the 9-month taxable year the estimated tax is computed as follows:

(1) Anticipated taxable income for 9 months	$264,000
(2) Annualized income ($264,000×12÷9)	352,000
(3) Tax liability on item (2)	177,540
(4) Item (3) reduced by $100,000 (there are no credits under part IV, subchapter A, chapter 1 of the Code)	77,540
(5) Estimated tax for 9-month period ($77,540×9÷12)	58,155

Since the tax liability on the annualized income is in excess of $100,000, a declaration is required to be filed, reporting an estimated tax of $58,155 for the 9-month taxable period. This paragraph has no application where the short taxable year does not result from a change in the taxpayer's annual accounting period.

[T.D. 6500, 25 FR 12108, Nov. 26, 1960, as amended by T.D. 6768, 29 FR 14922, Nov. 4, 1964]

§ 1.6017–1 Self-employment tax returns.

(a) *In general.* (1) Every individual, other than a nonresident alien, having net earnings from self-employment, as defined in section 1402, of $400 or more for the taxable year shall make a return of such earnings. For purposes of this section, an individual who is a resident of the Virgin Islands, Puerto Rico, or (for any taxable year beginning after 1960) Guam or American Samoa is not to be considered a nonresident alien individual. See paragraph (d) of § 1.1402(b)–1. A return is required under this section if an individual has self-employment income, as defined in section 1402(b), even though he may not be required to make a return under section 6012 for purposes of the tax imposed by section 1 or 3. Provisions applicable to returns under section 6012(a) shall be applicable to returns under this section.

(2) Except as otherwise provided in this subparagraph, the return required by this section shall be made on Form 1040. The form to be used by residents of the Virgin Islands, Guam, or American Samoa is From 1040SS. In the case of a resident of Puerto Rico who is not required to make a return of income under section 6012(a), the form to be used is Form 1040SS, except that Form 1040PR shall be used if it is furnished by the Internal Revenue Service to such resident for use in lieu of Form 1040SS.

(b) *Joint returns.* (1) In the case of a husband and wife filing a joint return under section 6013, the tax on self-employment income is computed on the separate self-employment income of each spouse, and not on the aggregate of the two amounts. The requirement of section 6013(d)(3) that in the case of a joint return the tax is computed on the aggregate income of the spouses is not applicable with respect to the tax on self-employment income. Where the husband and wife each has net earnings from self-employment of $400 or more, it will be necessary for each to complete separate schedules of the computation of self-employment tax with respect to the net earnings of each spouse, despite the fact that a joint return is filed. If the net earnings from self-employment of either the husband or the wife are less than $400, such net earnings are not subject to the tax on self-employment income, even though they must be shown on the joint return for purposes of the tax imposed by section 1 or 3.

(2) Except as otherwise expressly provided, section 6013 is applicable to the return of the tax on self-employment income; therefore, the liability with respect to such tax in the case of a joint return is joint and several.

(c) *Social security account numbers.* (1) Every individual making a return of net earnings from self-employment for any period commencing before January 1, 1962, is required to show thereon his social security account number, or, if he has no such account number, to make application therefor on Form SS–5 before filing such return. However, the failure to apply for or receive a social security account number will not excuse the individual from the requirement that he file such return on or before the due date thereof. Form SS–5 may be obtained from any district office of the Social Security Administration or from any district director. The application shall be filed with a district office of the Social Security Administration or, in the case of an individual not in the United States, with the district office of the Social Security Administration at Baltimore, Md. An individual who has previously secured a social security account number as an employee shall use that account number on his return of net earnings from self-employment.

(2) For provisions applicable to the securing of identifying numbers and the reporting thereof on returns and schedules for periods commencing after December 31, 1961, see § 1.6109–1.

(d) *Declaration of estimated tax with respect to taxable years beginning after December 31, 1966.* For taxable years beginning after December 31, 1966, section 6015 provides that the term ''estimated tax'' includes the amount which an individual estimates as the amount of self-employment tax imposed by chapter 2 for the taxable year. Thus, individuals upon whom self-employment tax is imposed by section 1401 must make a declaration of estimated tax if they meet the requirements of section 6015(a); except as otherwise provided under section 6015(i).

[T.D. 6500, 25 FR 12108, Nov. 26, 1960, as amended by T.D. 6691, 28 FR 12816, Dec. 3, 1963; T.D. 7427, 41 FR 34028, Aug. 12, 1976]

INFORMATION RETURNS

§1.6031–1 Return of partnership income.

(a) *In general*—(1) *General rule.* Except as provided in paragraphs (b) and (d) of this section with respect to certain organizations excluded from the application of subchapter K, chapter 1 of the Code, and certain partnerships having no U.S. business, an unincorporated organization defined as a partnership in section 761(a), through or by means of which any business, financial operation, or venture is carried on, shall make a return for each taxable year on form 1065. For purposes of filing a partnership return, an unincorporated organization will not be considered, within the meaning of section 761(a), to carry on a business, financial operation, or venture as a partnership before the first taxable year in which such organization receives income or incurs any expenditures treated as deductions for Federal income tax purposes. Such return shall state specifically the items of partnership gross income and the deductions allowable by subtitle A of the Code and shall include the names and addresses of all the partners and the amount of the distributive shares of income, gains, loss, deduction, or credit (including any items which enter into the determination of the tax imposed by section 56) allocated to each partner. Such return shall be made for the taxable year of the partnership, irrespective of the taxable years of the partners. For taxable years of a partnership and of a partner, see section 706 and §1.706–1. For signing of a partnership return, see §1.6063–1.

(2) *Special rule.* Except in the case of an unincorporated organization deemed to be excluded from the application of subchapter K in the manner described in paragraph (b)(2)(ii) of §1.761–2 for the first year of its existence, an unincorporated organization described in paragraph (a) of §1.761–2 shall file a partnership return for the first taxable year in which the participants by a formal agreement undertake to engage in joint operations, or in the absence of a formal agreement for the first taxable year in which the participants with respect to the joint use of property jointly have income, or make or incur any expenditures treated as deductions for Federal income tax purposes. Additionally, if an organization described in paragraph (a) of §1.761–2 does not elect under section 761 and the regulations thereunder to be excluded from the application of subchapter K or chapter I of the Code, it is required to file a return for each taxable year subsequent to its first taxable year in accordance with the requirements of this section until an election is made in accordance with paragraph (b)(2)(i) of §1.761–2. Where no annual accounting period has been adopted by an organization described in paragraph (a) of §1.761–2, its taxable year shall be the calendar year in accordance with section 441(g). For special rules in the case of an organization making the election for exclusion under section 761, see paragraphs (b)(2)(i) and (c) of §1.761–2 and paragraph (b) of this section.

(b) *Unincorporated organizations excluded from the application of Subchapter K*—(1) *Wholly excluded.* (i) Any unincorporated organization with respect to which under section 761(a) an election to be excluded from all the provisions of subchapter K of chapter 1 of the Code has been made in the manner described in paragraph (b)(2)(i) of §1.761–2 shall file Form 1065 for the first year with respect to which such an election has been made and such return shall, in lieu of the information therein required, contain or be accompanied by the information required by such paragraph.

(ii) Except as otherwise provided in subdivision (i) of this subparagraph, an unincorporated organization which is wholly excluded from the application of subchapter K need not file a partnership return.

(2) *Partially excluded.* Any unincorporated organization excluded from the

application of part of subchapter K of chapter 1 of the Code shall file a return on Form 1065 containing such information as the Commissioner may require. See section 761 and paragraph (c) of § 1.761–2.

(c) *Partnerships having business or source of income within the United States.* Every partnership engaged in trade or business, or having income from sources, within the United States shall file a partnership return in accordance with this section, whether or not its principal place of business is outside of the United States, and whether or not all its members are nonresident aliens.

(d) *Partnerships having no United States business*—(1) *No return required from partnership.* A partnership carrying on no business in the United States and deriving no income from sources within the United States need not file a partnership return.

(2) *Returns of information with respect to partnership required of citizen or resident partners.* Where a U.S. citizen or resident is a partner in a partnership described in subparagraph (1) of this paragraph which is not required to file a partnership return, the district director or director of the service center may require such person to render such statements or provide such information as is necessary to show whether or not such person is liable for tax on income derived from such partnership. In addition, if an election in accordance with the provisions of section 703 (relating to elections affecting the computation of taxable income derived from a partnership) or section 761 (relating to the election to be excluded from the application of all or part of subchapter K, chapter 1 of the Code) is to be made by or for the partnership, a return on Form 1065 shall be filed for such partnership. See section 6063 and § 1.6063–1, relating to the authority of a partner to sign a partnership return. The filing of one such return for a taxable year of the partnership by a citizen or resident partner shall constitute a filing for the partnership of such partnership return.

(e) *Place and time for filing returns*—(1) *Place for filing*—(i) *Returns filed with district director or Director of International Operations.* The returns of partnerships doing business, or having income from sources, within the United States shall be filed with the district director for the internal revenue district in which the partnership has its principal office or principal place of business within the United States. If a partnership has no office, place of business, or agency within the United States, the return shall be filed with the Director of International Operations, Internal Revenue Service, Washington, DC 20225. A partnership return filed under the authority of paragraph (d)(2) of this section shall be filed with the internal revenue officer with whom the citizen or resident partner files his separate income tax return.

(ii) *Returns filed with service centers.* Notwithstanding subdivision (i) of this subparagraph, unless a return is filed by hand carrying, whenever instructions applicable to partnership returns provide that the return be filed with a service center, the return must be so filed in accordance with the instructions. Returns which are filed by hand carrying shall be filed with the district director (or with any person assigned the administrative supervision of an area, zone or local office constituting a permanent post of duty within the internal revenue district of such director) in accordance with paragraph (e)(1)(i) of this section).

(2) *Time for filing.* The return of a partnership shall be filed on or before the fifteenth day of the fourth month following the close of the taxable year of the partnership, except that the return of a partnership consisting entirely of nonresident aliens shall be filed on or before the fifteenth day of the sixth month following the close of the taxable year of the partnership.

[T.D. 6500, 25 FR 12108, Nov. 26, 1960, as amended by T.D. 7012, 34 FR 7690, May 15, 1969; T.D. 7280, 37 FR 20688, Oct. 3, 1972; T.D. 7495, 42 FR 33726, July 1, 1977; T.D. 7564, 43 FR 40497, Sept. 12, 1978]

§ 1.6031(b)–1T Statements to partners (temporary).

(a) *Statement required to be furnished to partners*—(1) *In general.* Except as provided in this paragraph (a)(1) and paragraph (a)(2)(ii) of this section, any partnership required under section 6031(a) and the regulations thereunder to file a partnership return for a taxable year shall furnish to every person who was a partner (within the meaning of section 7701(a)(2)) at any time during the taxable year a written statement containing the information described in paragraph (a)(3) of this section. This section shall not apply to a real estate mortgage investment conduit (REMIC) treated as a partnership under subtitle F of the Code by reason of section 860F(e). For the reporting requirements applicable to REMICs see §1.6031(b)–2T.

(2) *Special rules applicable to partnership interests held by nominees*—(i) *Statements furnished to nominees.* For any partnership taxable year beginning after October 22, 1986, a partnership shall provide a person that holds (directly or indirectly) an interest in such partnership as a nominee on behalf of another person at any time during such year with a statement under paragraph (a)(1) of this section with respect to such interest if—

(A) Such nominee has not furnished the statement required under §1.6031(c)–1T(a)(1)(i) to the partnership with respect to such other person;

(B) Such nominee either holds legal title to such partnership interest in its own name or is identified in a statement provided to the partnership pursuant to §1.6031(c)–1T(a)(1)(i) by another nominee as the person on whose behalf such other nominee holds such interest; and

(C) Such nominee is not a person described in §1.6031(c)–1T(a)(2) (relating to the special rule for clearing agencies).

In such case, the partnership shall assume, for purposes of this section, that the nominee is the beneficial owner of the partnership interest.

(ii) *Statements not required to be furnished to partners holding partnership interests through nominees.* A partnership shall not be required to furnish a statement under paragraph (a)(1) of this section to a partner with respect to any portion of such partner's interest in the partnership that is owned through a nominee if—

(A) Such nominee has not furnished (or is not required to furnish under §1.6031(c)–1T(a)(2)), a statement to the partnership under §1.6031(c)–1T(a)(1)(i) with respect to such partner; and

(B) Such partner has not furnished (or is not required to furnish) a statement to the partnership under §1.6031(c)–1T(a)(3), with respect to such interest in the partnership.

(3) *Contents of statement.* The statement required under paragraph (a)(1) of this section shall include the following information:

(i) The partner's distributive share of partnership income, gain, loss, deduction, or credit required to be shown on the partnership return (or, for taxable years beginning before January 1, 1987, the partner's distributive share of partnership income, gain, loss, deduction, or credit shown on the partnership return); and

(ii) To the extent provided by form or the accompanying instructions, any additional information that may be required to apply particular provisions of subtitle A of the Code to the partner with respect to items related to the partnership.

(b) *Time for furnishing statement.* The statement required to be furnished by the partnership under paragraph (a)(1) of this section shall be furnished on or before the day on which the partnership return for that taxable year is required to be filed (determined with regard to extensions). For partnership returns the due date for which (determined without regard to extensions) is before January 1, 1987, the statement required to be furnished by the partnership under paragraph (a)(1) of this section shall be furnished on or before the day on which the partnership return is filed.

(c) *Statement may be provided to agent.* If a partner designates another person, such as an attorney or an investment advisor, as the partner's (or nominee's) agent in dealing with the partnership, the partnership may provide the statement required under paragraph (a)(1) of this section with respect to such partner to such other person instead of the partner.

(d) *Penalties.* For penalties for failure to comply with the requirements of section 6031(b) and paragraph (a) of this section, see section 6722(a).

(e) *Effective date.* Except as otherwise provided in this section, the provisions of this section apply to partnership taxable years beginning after September 3, 1982.

[T.D. 8225, 53 FR 34490, Sept. 7, 1988]

§ 1.6031(b)–2T REMIC reporting requirements (temporary). [Reserved]

§ 1.6031(c)–1T Nominee reporting of partnership information (temporary).

(a) *Statements required to be furnished to partnership*—(1) *Statement from nominee*—(i) *In general.* Except as otherwise provided in this section, any person who holds, directly or indirectly, an interest in a partnership (required under section 6031(a) and the regulations thereunder to file a partnership return for a taxable year) as a nominee on behalf of another person at any time during the partnership taxable year shall furnish to the partnership a written statement (or statements) for that taxable year with respect to such other person containing the information described in paragraph(a)(1)(ii) of this section.

(ii) *Contents of statement.* The statement required under paragraph (a)(1)(i) of this section shall, except as otherwise provided in paragraph (a)(4) of this section, include the following information:

(A) The name, address, and taxpayer identification number of the nominee;

(B) The name, address, and taxpayer identification number of such other person;

(C) Whether such other person is—

(*1*) A person that is not a United States person;

(*2*) A foreign government, an international organization, or any wholly-owned agency or instrumentality of either of the foregoing; or

(*3*) A tax-exempt entity (within the meaning of section 168(h)(2));

(D) A description of any interest in the partnership held by the nominee on behalf of such other person at the beginning of the partnership taxable year;

(E) A description of any interest in the partnership that the nominee acquires (within the meaning of paragraph (g)(1) of this section) on behalf of such other person during the partnership taxable year, the method of acquisition (e.g., purchase, exchange, acquisition at death, gift, or commencement of nominee relationship) and acquisition cost (within the meaning of paragraph (g)(2) of this section) of such interest, and the date of the acquisition of such interest; and

(F) A description of any interest in the partnership that the nominee transfers (within the meaning of paragraph (g)(5) of this section) on behalf of such other person during the partnership taxable year, the net proceeds from the transfer (within the meaning of paragraph (g)(6) of this section) of such interest, and the date of the transfer of such interest.

A description of a partnership interest must include sufficient detail to enable the partnership to furnish to such other person the statement required under § 1.6031(b)–1T (a).

(2) *Special rule for clearing agencies.* A clearing agency registered pursuant to the provisions of section 17A of the Securities Exchange Act of 1934 (or its nominee) that holds an interest in a partnership as a nominee on behalf of another person shall not be required to furnish any statement described in paragraph (a)(1)(i) of this section with respect to such interest.

(3) *Special rule for brokers and financial institutions*—(i) *Additional statement required.* Any broker (within the meaning of paragraph (g)(3) of this section) or financial institution (within the meaning of paragraph (g)(4) of this section) that holds an interest in a partnership indirectly through a nominee described in paragraph (a)(2) of this section at any time during a partnership taxable year shall furnish (in addition to any statement (or statements) required under paragraph (a)(1)(i) of this section) to the partnership a written statement (or statements) containing the information described in paragraph (a)(3)(ii) of this section with respect to any interest in such partnership that it holds (directly or indirectly) for its own account at any time during such partnership taxable year.

(ii) *Contents of statement.* The statement required under paragraph (a)(3)(i) of this section shall, except as otherwise provided in paragraph (a)(4) of this section, include the following information:

(A) The name, address, and taxpayer identification number of the broker or financial institution;

(B) Whether such broker of financial institution is a person that is not a United States person;

(C) A description of any interest in the partnership held by the broker or financial institution for its own account at the beginning of the partnership taxable year;

(D) A description of any interest in the partnership that the broker or financial institution acquires for its own account during the partnership taxable year, the method of acquisition and acquisition cost of such interest, and the date of the acquisition of such interest; and

(E) A description of any interest in the partnership that the broker or financial institution transfers for its own account during the partnership taxable year, the net proceeds from the transfer of such interest, and the date of the transfer of such interest.

A description of a partnership interest held by a broker or financial institution for its own account must include sufficient detail to enable the partnership to furnish to the broker or financial institution the statement required under §1.6031(b)–1T (a).

(4) *Exception*—(i) *In general.* Except as otherwise provided in this paragraph (a)(4), any statement required under paragraph (a) (1)(i) or (3)(i) of this section for a taxable year is not required to include—

(A) That part of the information described in paragraph (a) (1)(ii)(E) and (3)(ii)(D) of this section regarding the method of acquisition and acquisition cost; or

(B) That part of the information described in paragraph (a)(1)(ii)(F) and (3)(ii)(E) of this section regarding the net proceeds from the transfer;

to the extent that, prior to the beginning of the partnership taxable year, the partnership has provided the nominee with a written statement that the nominee need not provide such information to the partnership, and the partnership has not modified or revoked such statement. For purposes of the preceding sentence, the modification or revocation of a statement furnished to a nominee is effective for a partnership taxable year if and only if the partnership notifies the nominee of such modification or revocation by a written statement more than 60 days before the beginning of the partnership taxable year. The nominee shall retain a copy of any statement that is furnished to it by the partnership under this paragraph (a)(4) in the nominee's records so long as the contents thereof may become material in the administration of any internal revenue law.

(ii) *Effect of election under section 754.* Paragraph (a)(4)(i)(A) of this section shall not apply to a partnership taxable year if—

(A) The partnership has an election in effect under section 754 (relating to optional adjustment to basis of partnership property) for such taxable year; and

(B) The nominee knows or has reason to know of such election more than 60 days before the beginning of such taxable year.

(5) *Examples.* The following examples illustrate the application of this paragraph (a):

Example (1). B, a broker, holds 50 units of interest in Partnership P, a calendar year partnership, in street name for customer A, the beneficial owner. B holds the units on behalf of A at all times during 1989. B must furnish a statement to P for calendar year 1989 under paragraph (a)(1)(i) of this section that includes the information required under paragraph (a)(1)(ii) (A) through (D) of this section. The description of the partnership interest held by B on A's behalf on January 1, 1989, must identify the number of units of P held by B on A's behalf at that time (50), and the class of the partnership interest (including the Committee on Uniform Security Identification Procedures (CUSIP) number of the partnership interest, if known).

Example (2). The facts are the same as in example (1), except that pursuant to A's instructions, B sells 25 of A's units of interest in P on August 1, 1989, receiving net proceeds from the transfer of $500. In addition to the information described in example (1), the statement that B must furnish to P must include the class of the partnership interest transferred (including the CUSIP number of the partnerhsip interest, if known), the number of units transferred (25), the net proceeds from the transfer ($500), and the date of the transfer (August 1, 1989.)

Example (3). The facts are the same as in example (1), except that A is not the beneficial owner, but rather holds the units as a nominee on behalf of C, the beneficial owner, at all times during 1989. In addition to the statement that B must furnish to P (as described in Example (1) of this paragraph (a)(5)), A must furnish a statement to P for calendar year 1989 under paragraph (a)(1)(i) of this section that includes the information required under paragraph (a)(1)(ii) (A) through (D) of this section. If both A and B provide P with the statement required under paragraph (a)(1)(i) of this section, P must provide C with the statement required under § 1.6031(b)–1T (a)(1).

(b) *Time for furnishing statements.* A nominee may furnish to the partnership any statement required under paragraph (a) of this section annually, quarterly, monthly, or on any other basis, provided that all statements required to be furnished under paragraph (a) of this section for a partnership taxable year shall be furnished on or before the last day of the first month following the close of such partnership taxable year.

(c) *Use of magnetic media.* A nominee required to furnish a written statement under paragraph (a) of this section, may, in lieu of furnishing such written statement, furnish the required information on magnetic tape or by other media if the partnership and the nominee so agree.

(d) *Use of single document.* Any person who holds interests in a partnership as a nominee on behalf of more than one other person during the partnership taxable year, may, in lieu of furnishing to the partnership a separate statement for each such other person, furnish to the partnership a single document which includes, for each such other person, the information described in paragraph (a)(1)(ii) of this section. To the extent that a single document is used, references in this section to the statement required under paragraph (a)(1)(i) of this section shall be deemed to refer also to the information included in a single document under this paragraph (d).

(e) *Retention of information.* The nominee shall retain a copy of any statement that is furnished to the partnership under this section in the nominee's records so long as the contents thereof may become material in the administration of any internal revenue law.

(f) *Use of agent.* If a partnership has designated another person, such as a clearing organization, as the partnership's agent for purposes of receiving the statements required under paragraph (a) of this section, such statements may be furnished to that other person instead of the partnership. If a nominee has designated another person as its agent for purposes of furnishing to the partnership (or its agent) the statements required under paragraph (a) of this section, that other person may furnish such statements to the partnership (or its agent) on behalf of the nominee.

(g) *Meaning of terms.* For purposes of this section, the following terms have the meanings set forth below:

(1) The term *acquires* means—

(i) A purchase or other acquisition of a partnership interest; or

(ii) The commencement of a nominee relationship, including the substitution of one nominee for another.

(2) The term *acquisition cost* means the sum of any money paid and the fair market value of any property (other than money) transferred to acquire a partnership interest increased by any expenses paid or incurred with respect to the acquisition (such as broker's fees or commissions).

(3) The term *broker* shall have the meaning set forth in paragraph (a)(1) of § 1.6045ca–1.

(4) The term *financial institution* means a financial institution such as a bank, mutual savings bank, savings and loan association, building and loan association, cooperative bank, homestead association, credit union, industrial loan association or bank or other similar organization.

(5) The term *transfer* means—

(i) A sale, exchange, or other disposition of a partnership interest; or

(ii) The termination of a nominee relationship, including the substitution of one nominee for another.

(6) The term *net proceeds from the transfer* means the sum of any money and the fair market value of any property (other than money) received in connection with a transfer of a partnership interest reduced by any expenses paid or incurred with respect to the transfer (such as broker's fees or commissions).

(7) The term *person* includes the United States, a State, the District of

Columbia, a foreign government, a political subdivision of a State or foreign government, or an international organization.

(h) *Statement required by nominees that do not comply with §1.6031(c)–1T (a)*—(1) *In general.* Any person that—

(i) Holds an interest in a partnership as a nominee (other than a nominee described in paragraph (a)(3) of this section) on behalf of another person at any time during the partnership taxable year;

(ii) Does not furnish to such partnership the statement required under paragraph (a)(1)(i) of this section for such other person with respect to such interest in the partnership; and

(iii) Receives from such partnership the statement described in paragraph (a)(1) of §1.6031(b)–1T with respect to such interest in the partnership;

shall furnish to such other person a written statement containing the information described in paragraph (h)(2) of this section with respect to such interest in the partnership.

(2) *Contents of statement.* The statement required under paragraph (h)(1) of this section shall contain the following information:

(i) The distributive share of partnership income, gain, loss, deduction or credit required to be shown on the partnership return that is allocable to such interest in the partnership; and

(ii) Any additional information that may be required to apply particular provisions of subtitle A of the Code to the beneficial owner of such interest in the partnership in connection with items related to the partnership.

(3) *Time for furnishing statements.* A nominee shall furnish the statement required under paragraph (h)(1) of this section within 30 days after receiving the statement described in paragraph (a) of §1.6031(b)–1T.

(i) *REMICs.* This section shall not apply with respect to any interest in a real estate mortgage investment conduit (REMIC) treated as a partnership under subtitle F of the Code by reason of section 860F(e). For the nominee reporting requirements with respect to REMICs see §1.6031(c)–2T.

(j) *Penalties.* [Reserved]

(k) *Effective date*—(1) *In general.* Except as otherwise provided in paragraph (k)(2) of this section, the provisions of this section shall apply to partnership taxable years beginning after October 22, 1986.

(2) *Transitional rule for taxable years beginning before January 1, 1989.* For partnership taxable years beginning before January 1, 1989, —

(i) Any statement that a nominee is required to furnish to a partnership under paragraph (a)(1) of this section shall not be required to include the following information:

(A) The information described in paragraph (a)(1)(ii)(C) of this section;

(B) That part of the information described in paragraph (a)(1)(ii)(E) of this section regarding the method of acquisition and acquisition cost of a partnership interest; or

(C) That part of the information described in paragraph (a)(1)(ii)(F) of this section regarding the net proceeds from the transfer of a partnership interest.

(ii) A broker or financial institution shall not be required to furnish the additional statement described in paragraph (a)(3)(i) of this section.

[T.D. 8225, 53 FR 34491, Sept. 7, 1988]

§1.6031(c)–2T Nominee reporting of REMIC information (temporary). [Reserved]

§1.6032–1 Returns of banks with respect to common trust funds.

Every bank (as defined in section 581) maintaining a common trust fund shall make a return of income of the common trust fund, regardless of the amount of its taxable income. Member banks of an affiliated group that serve as co-trustees with respect to a common trust fund must act jointly in making a return for the fund. If a bank maintains more than one common trust fund, a separate return shall be made for each. No particular fund is prescribed for making the return under this section, but form 1065 may be used if it is designated by the bank as the return of a common trust fund. The return shall be made for the taxable year of the common trust fund and shall be filed on or before the 15th day of the fourth month following the close of such taxable year with the district director for the district in which the income tax return of the bank is filed. Such return shall state specifically with respect to the fund the items of gross income and the deductions allowed by subtitle A of the Code, shall include each participant's name and address, the participant's proportionate share of taxable income or net loss (exclusive of gains and losses from sales or exchanges of capital assets), the participant's proportionate share of gains and losses from sales or exchanges of capital assets, and the participant's share of items which enter into the determination of the tax imposed by section 56. See § 1.584–2 and § 1.58–5. If the common trust fund is maintained by two or more banks that are members of the same affiliated group, the return must also identify the member bank in the group that has contributed each participant's property or money to the fund. A copy of the plan of the common trust fund must be filed with the return. If, however, a copy of such plan has once been filed with a return, it need not again be filed if the return contains a statement showing when and where it was filed. If the plan is amended in any way after such copy has been filed, a copy of the amendment must be filed with the return for the taxable year in which the amendment was made. For the signing of a return of a bank with respect to common trust funds, see § 1.6062–1, relating to the manner prescribed for the signing of a return of a corporation.

[T.D. 7564, 43 FR 40497, Sept. 12, 1978, as amended by T.D. 7935, 49 FR 1695, Jan. 13, 1984]

§ 1.6033–1 Returns by exempt organizations; taxable years beginning before January 1, 1970.

(a) *In general.* (1) Except as provided in section 6033(a) and paragraph (g) of this section, every organization exempt from taxation under section 501(a) shall file an annual return of information specifically stating its items of gross income, receipts and disbursements, and such other information as may be prescribed in the instructions issued with respect to the return. Such information return shall be filed annually regardless of the amount or source of the income or receipts of the organization. Except as provided in paragraph (d) of this section, such return shall be filed annually regardless of whether such organization is chartered by, or affiliated or associated with, any central, parent, or other organization.

(2)(i) Except as otherwise provided in this subparagraph, every organization exempt from taxation under section 501 (a), and required to file a return under section 6033 and this section, other than an organization described in section 401 (a), 501(c) (3), or 501(d), shall file its annual return on Form 990. However, such an exempt organization, instead of filing Form 990, may file its annual return on Form 990 (SF), a short form, if its gross receipts for the taxable year do not exceed $10,000 and its total assets on the last day of its taxable year do not exceed $10,000.

(ii) For purposes of this subparagraph and subparagraph (4) of this paragraph, ''gross receipts'' means the gross amount received by the organization during its annual accounting period from all sources without reduction for any costs or expenses including, for example, cost of goods or assets sold, cost of operations, or expenses of earning, raising, or collecting such amounts. Thus, ''gross receipts'' includes, but is not limited to, *(a)* the gross amount received as contributions, gifts, grants, and similar amounts without reduction for the expenses of raising and collecting such amounts, *(b)* the gross amount received as dues or assessments from members or affiliated organizations without reduction for expenses attributable to the receipt of such amounts, *(c)* gross sales or receipts from business activities (including business activities unrelated to the purpose for which the organization received an exemption, the net income or loss from which may be required to be reported on Form 990–T), *(d)* the gross amount received from the sale of assets without reduction for cost or other basis and expenses of sale, and *(e)* the gross amount received as investment income such as interest, dividends, rents, and royalties.

(3) Every employees' trust described in section 401 (a) which is exempt from taxation under section 501 (a) shall file an annual return on Form 990–P. The

return shall include the information required by paragraph (b)(5) (ii) of § 1.401–1. In addition, the trust must file the information required to be filed by the employer pursuant to the provisions of § 1.404(a)–2, unless the employer has notified the trustee in writing that he has or will timely file such information. If the trustee has received such notification from the employer, then such notification, or a copy thereof, shall be retained by the trust as a part of its records.

(4) Except as otherwise provided in this subparagraph, every organization described in section 501(c) (3), which is required to file a return under section 6033 and this section, shall file its annual return on Form 990–A. However, such an exempt organization, instead of filing Form 990–A, may file its annual return on Form 990–A (SF), a short form, if its gross receipts for the taxable year do not exceed $10,000 and its total assets on the last day of its taxable year do not exceed $10,000. For purposes of this subparagraph, ‘‘gross receipts’’ shall be defined in the manner prescribed in subparagraph (2) (ii) of this paragraph. The forms prescribed by this subparagraph shall be as follows:

(i) Form 990–A shall consist of parts I and II. Part I shall contain, in addition to information required in part II, such information as may be prescribed in the return and instructions which is required to be furnished by section 6033(a) or which is necessary to show whether or not such organization is exempt from tax under section 501(a). Part II, which shall be open to public inspection pursuant to section 6104 and other applicable sections and the regulations thereunder, shall contain principally the information required by section 6033(b) and the regulations thereunder. The information contained in part II, to be furnished by the organization in duplicate in the manner prescribed by the instructions issued with respect to the return, is as follows:

(a) Its gross income for the year. For this purpose, gross income includes tax-exempt income, but does not include contributions, gifts, grants, and similar amounts received. Whether or not an item constitutes a contribution, gift, grant, or similar amount, depends upon all the surrounding facts and circumstances.

(b) Its expenses attributable to such income and incurred within the year.

(c) Its disbursements out of income (including prior years’ accumulations) made within the year for the purposes for which it is exempt. Information shall be included as to the class of activity with a separate total for each activity as well as the name, address, and amount received by each individual or organization receiving cash, other property, or services within the taxable year. If the donee is related by blood, marriage, adoption, or employment (including children of employees) to any person or corporation having an interest in the exempt organization, such as a creator, donor, director, trustee, or officer, the relationship of the donee shall be stated. Activities shall be classified according to purpose in greater detail than merely charitable, educational, religious, or scientific. For example, payments for nursing service, for laboratory construction, for fellowships, or for assistance to indigent families shall be so identified. Where the fair market value of the property at the time of disbursement is used as the measure of the disbursement, the book value of such property (and a statement of how book value was determined) shall also be furnished, and any difference between the fair market value at the time of disbursement and the book value should be reflected in the books of account. The expenses allocable to making the disbursements shall be set forth in such detail as is prescribed by the form or instructions.

(d) Its accumulation of income within the year. The amount of such accumulation is obtained by subtracting from the amount in *(a)* of this subdivision the sum of the amounts determined in *(b)* and *(c)* of this subdivision and the expenses allocable to carrying out the purposes for which it is exempt.

(e) Its aggregate accumulation of income at the beginning and end of the year. The aggregate accumulation of income shall be divided between that which is attributable to the gain or

loss on the sale of assets (excluding inventory items) and that which is attributable to all other income. For this purpose expenses and disbursements shall be allocated on the basis of accounting records, the governing instrument, or applicable local law.

(f) Its disbursements out of principal in the current and prior years for the purposes for which it is exempt. In addition, the same type of information shall be required with respect to disbursements out of principal made in the current year as is prescribed by *(c)* of this subdivision with respect to disbursements out of income.

(g) A balance sheet showing its assets, liabilities, and net worth as of the beginning and end of such year. Detailed information on the assets, liabilities, and net worth shall be furnished on the schedule provided for this purpose on the Form 990–A. Such schedule shall be supplemented by attachments where appropriate.

(h) The total of the contributions and gifts received by it during the year. A statement shall be included showing the gross amount of contributions and gifts collected by the organization, the expenses incurred by the organization in collecting such amount, and the net proceeds.

(i) In addition to the information required in *(a)* through *(h)* of this subdivision, the organization shall furnish such specific information and answer such specific questions as are required by the form or instructions.

(ii) Form 990–A (SF) is a short form consisting of a single part which contains such information as may be prescribed in the return and instructions which is required to be furnished by section 6033(a) or which is necessary to show whether or not such organization is exempt from tax under section 501(a). In addition, Form 990–A (SF) shall contain the information required by section 6033(b) which must be furnished in the manner prescribed in the instructions issued with respect to the return. Form 990–A (SF) shall be open to public inspection pursuant to section 6104 and other applicable sections and the regulations thereunder.

(5)(i) Every religious or apostolic association or corporation described in section 501 (d) which is exempt from taxation under section 501(a) shall file a return on Form 1065 for each taxable year, stating specifically the items of gross income and deductions, and its taxable income. There shall be attached to the return as a part thereof a statement showing the name and address of each member of the association or corporation and the amount of his distributive share of the taxable income of the association or corporation for such year.

(ii) If the taxable year of any member is different from the taxable year of the association or corporation, the distributive share of the taxable income of the association or corporation to be included in the gross income of the member for his taxable year shall be based upon the taxable income of the association or corporation for its taxable year ending with or within the taxable year of the member.

(b) *Accounting period for filing return.* A return on Form 990, 990–A, 990 (SF), 990–A (SF), or 990–P shall be on the basis of the established annual accounting period of the organization. If the organization has no such established accounting period, such return shall be on the basis of the calendar year.

(c) *Returns when exempt status not established.* An information return on Form 990, 990–A, 990 (SF), or 990–A (SF) is not required to be filed by an organization claiming an exempt status under section 501(a) prior to the establishment by the organization of such exempt status under section 501 and § 1.501(a)–1. If the date for filing an income tax return and paying the tax occurs before the tax-exempt status of the organization has been established, the organization is required to file the income tax return and pay the tax. However, see sections 6081 and 6161 and the regulations thereunder for extensions of time for filing the return and paying the tax. Upon establishment of its exempt status, the organization may file a claim for a refund of income taxes paid for the period for which its exempt status is established.

(d) *Group returns.* (1) A central, parent, or like organization (referred to in this paragraph as ‘‘central organization’’), exempt under section 501(a) and described in section 501(c), although required to file a separate annual return for itself under section 6033 and paragraph (a) of this section, may file annually, in addition to such separate annual return, a group return on Form 990 or 990–A, 990 (SF), or 990–A (SF), as may be appropriate. Form 990 (SF) or 990–A (SF) may be used where each local organization qualifies under paragraph (a) of this section. Such group return may be filed for two or more of the local organizations, chapters, or the like (referred to in this paragraph as ''local organizations'') which are (i) affiliated with such central organization at the close of its annual accounting period, (ii) subject to the general supervision or control of the central organization, and (iii) exempt from taxation under the same paragraph of section 501(c) of the Code, although the local organizations are not necessarily exempt under the paragraph under which the central organization is exempt.

(2)(i) The filing of the group return shall be in lieu of the filing of a separate return by each of the local organizations included in the group return. The group return shall include only those local organizations which in writing have authorized the central organization to include them in the group return, and which have made and filed, with the central organization, their statements, specifically stating their items of gross income, receipts, and disbursements, and such other information relating to them as is required to be stated in the group return. Such an authorization by a local organization shall be made annually, under the penalties of perjury, and shall be signed by a duly authorized officer of the local organization in his official capacity and shall contain the following statement, or a statement of like import: ''I hereby declare under the penalties of perjury that this authorization (including any accompanying schedules and statements) has been examined by me and to the best of my knowledge and belief is true, correct and complete and made in good faith for the taxable year stated.'' Such authorizations and statements shall be permanently retained by the central organization.

(ii) There shall be attached to the group return and made a part thereof a schedule showing the name and address of each of the local organizations and the total number thereof included in such return, and a schedule showing the name and address of each of the local organizations and the total number thereof not included in the group return.

(3) The group return shall be on the basis of the established annual accounting period of the central organization. Where such central organization has no established annual accounting period, such return shall be on the basis of the calendar year. The same income, receipts, and disbursements of a local organization shall not be included in more than one group return.

(4) The group return shall be filed in accordance with these regulations and the instructions issued with respect to Form 990, 990–A, 990 (SF), or 990–A (SF), whichever is appropriate, and shall be considered the return of each local organization included therein. The tax-exempt status of a local organization must be established under a group exemption letter issued to the central organization before a group return including the local organization will be considered as the return of the local organization. See §1.501(a)–1 for requirements for establishing a tax-exempt status.

(e) *Time and place for filing.* The annual return of information on Form 990, 990–A, 990 (SF), 990–A (SF), or 990–P shall be filed on or before the 15th day of the fifth calendar month following the close of the period for which the return is required to be filed. The annual return on Form 1065 required to be filed by a religious or apostolic association or corporation shall be filed on or before the 15th day of the fourth month following the close of the taxable year for which the return is required to be filed. Each such return shall be filed in accordance with the instructions applicable thereto.

(f) *Penalties.* For criminal penalties for failure to file a return and filing a false or fraudulent return, see sections 7203, 7206, and 7207.

(g) *Organizations not required to file annual returns.* (1) (i) Annual returns on

Form 990–A or Form 990–A (SF) are not required to be filed by an organization described in section 501 (c) (3) which has established its right to exemption from taxation under section 501 (a) and which is:

(a) Organized and operated exclusively for religious purposes;

(b) Operated, supervised, or controlled by or in connection with an organization which is organized and operated exclusively for religious purposes;

(c) An educational organization which normally maintains a regular faculty and curriculum and normally has a regularly organized body of pupils or students in attendance at the place where its educational activities are regularly carried on; or

(d) A charitable organization, or an organization for the prevention of cruelty to children or animals, which is supported, in whole or in part, by funds contributed by the United States or any State or political subdivision thereof, or which is primarily supported by contributions of the general public.

(ii) An educational organization which normally maintains and has a regular faculty, curriculum, and student body and meets the conditions of subdivision (i)*(c)* of this subparagraph, which relieves it from the requirement of filing annual returns, shall not be considered as having thereafter failed to continue meeting such conditions if it is temporarily compelled to curtail or discontinue its normal and regular activities during the existence of abnormal circumstances and conditions.

(iii) An organization organized and operated exclusively for charitable purposes or for the prevention of cruelty to children or animals is ‘‘primarily supported by contributions of the general public’’ for any accounting period if more than 50 percent of its income and receipts for such period is actually derived from voluntary contributions and gifts made by the general public, as distinguished from a few contributors or donors or from related or associated persons. For purposes of this subdivision, the words ‘‘related or associated persons’’ refer to persons of a particular group who are connected with or are interested in the activities of the organization, such as founders, incorporators, shareholders, members, fiduciaries, officers, employees, or the like, or who are connected with such persons by family or business relationships. An organization claiming an exception from the filing of an information return under this subdivision must maintain adequate records in order to substantiate such claim. Furthermore, if it is doubtful to an organization that it falls within this exception for filing annual information returns, it must file the return on Form 990–A or Form 990–A (SF).

(2) The annual return on Form 990 or Form 990 (SF) need not be filed by:

(i) A fraternal beneficiary society, order, or association, described in section 501(c)(8), or

(ii) An organization described in section 501(c)(1) if it is a corporation wholly owned by the United States or any agency or instrumentality thereof, or is a wholly owned subsidiary of such a corporation,

which has established its exemption from tax under section 501(a).

(3) The provisions of section 6033(a) relieving certain specified types of organizations exempt from tax under section 501(a) from filing annual returns do not abridge or impair in any way the powers and authority of district directors or directors of service centers provided for in other provisions of the Code and in the regulations thereunder to require the filing of such returns by such organizations. See section 6001 and § 1.6001–1.

(h) *Records, statements, and other returns of tax-exempt organizations.* (1) An organization which has established its right to exemption from tax under section 501(a) and has also established that it is not required to file annually the return of information on Form 990, 990–A, 990 (SF), or 990–A (SF) shall immediately notify in writing the district director for the internal revenue district in which its principal office is located of any changes in its character, operations, or purpose for which it was originally created.

(2) Every organization which has established its right to exemption from tax, whether or not it is required to file an annual return of information, shall submit such additional information as

may be required by the district director for the purpose of enabling him to inquire further into its exempt status and to administer the provisions of subchapter F (section 501 and following), chapter 1 of the Code, and of section 6033. See section 6001 and §1.6001–1 with respect to the authority of the district director or directors of service centers to require such additional information and with respect to the permanent books of account or records to be kept by such organizations.

(3) An organization which has established its right to exemption from tax under section 501(a), including an organization which is relieved under section 6033 and this section from filing annual returns of information, is not, however, relieved from the duty of filing other returns of information. See, for example, sections 6041 and 6051 and the regulations thereunder.

(i) *Unrelated business tax returns.* In addition to the foregoing requirements of this section, certain organizations otherwise exempt from tax under section 501(a) and described in section 501(c) (2), (3), (5), (6), or (17) or section 401(a) which are subject to tax on unrelated business taxable income are also required to file returns on Form 990–T. See paragraph (e) of §1.6012–2 and paragraph (a)(5) of §1.6012–3 for requirements with respect to such returns.

(j) *Effective date.* The provisions of this section shall apply with respect to returns filed for taxable years beginning before January 1, 1970.

[T.D. 6500, 25 FR 12108, Nov. 26, 1960, as amended by T.D. 6722, 29 FR 5075, Apr. 14, 1964; T.D. 6972, 33 FR 12907, Sept. 12, 1968; T.D. 6980, 33 FR 16446, Nov. 9, 1968; T.D. 7122, 36 FR 11026, June 8, 1971]

§1.6033–2 Returns by exempt organizations (taxable years beginning after December 31, 1969) and returns by certain nonexempt organizations (taxable years beginning after December 31, 1980).

(a) *In general.* (1) Except as provided in section 6033(a)(2) and paragraph (g) of this section, every organization exempt from taxation under section 501(a) shall file an annual information return specifically setting forth its items of gross income, gross receipts and disbursements, and such other information as may be prescribed in the instructions issued with respect to the return. Except as provided in paragraph (d) of this section, such return shall be filed annually regardless of whether such organization is chartered by, or affiliated or associated with, any central, parent, or other organization.

(2)(i) Except as otherwise provided in this paragraph and paragraph (g) of this section, every organization exempt from taxation under section 501(a), and required to file a return under section 6033 and this section (including, for taxable years ending before December 31, 1972, private foundations, as defined in section 509(a)), other than an organization described in section 401(a) or 501(d), shall file its annual return on Form 990. For taxable years ending on or after December 31, 1972, every private foundation shall file Form 990–PF as its annual information return. For taxable years beginning after December 31, 1977, every section 501(c)(21) black lung trust shall file an annual information return on Form 990–BL or any other form prescribed by the Internal Revenue Service for that purpose.

(ii) The information generally required to be furnished by an organization exempt under section 501(a) is:

(a) Its gross income for the year. For this purpose, gross income includes tax-exempt income, but does not include contributions, gifts, grants, and similar amounts received. Whether an item constitutes a contribution, gift, grant, or similar amount depends upon all the surrounding facts and circumstances. The computation of gross income shall be made by subtracting the cost of goods sold from all receipts other than gross contributions, gifts, grants, and similar amounts received and nonincludible dues and assessments from members and affiliates.

(b) To the extent not included in gross income, its dues and assessments from members and affiliates for the year.

(c) Its expenses incurred within the year attributable to gross income.

(d) Its disbursements (including prior years' accumulations) made within the year for the purposes for which it is exempt.

(e) A balance sheet showing its assets, liabilities, and net worth as of the

beginning and end of such year. Detailed information relating to the assets, liabilities, and net worth shall be furnished on the schedule provided for this purpose on the return required by this section. Such schedule shall be supplemented by attachments where appropriate.

(f) The total of the contributions, gifts, grants and similar amounts received by it during the taxable year, and the names and addresses of all persons who contributed, bequeathed, or devised $5,000 or more (in money or other property) during the taxable year. In the case of a private foundation (as defined in section 509(a)), the names and addresses of all persons who became substantial contributors (as defined in section 507(d)(2)) during the taxable year shall be furnished. In addition, for its first taxable year beginning after December 31, 1969, each private foundation shall furnish the names and addresses of all persons who became substantial contributors before such taxable year. For special rules with respect to contributors and donors, see subdivision (iii) of this subparagraph.

(g) The names and addresses of all officers, directors, or trustees (or any person having responsibilities or powers similar to those of officers, directors, or trustees) of the organization, and, in the case of a private foundation, all persons who are foundation managers, within the meaning of section 4946(b)(1). Organizations described in section 501(c)(3) must also attach a schedule showing the names and addresses of the five employees (if any) who received the greatest amount of annual compensation in excess of $30,000; the total number of other employees who received annual compensation in excess of $30,000; the names and addresses of the five independent contractors (if any) who performed personal services of a professional nature for the organization (such as attorneys, accountants, and doctors, whether such services are performed by such persons in their individual capacity or as employees of a professional service corporation) and who received the greatest amount of compensation in excess of $30,000 from the organization for the year for the performance of such services; and the total number of other such independent contractors who received in excess of $30,000 for the year for the performance of such services.

(h) A schedule showing the compensation and other payments made during the organization's annual accounting period (or during the calendar year ending within such period) which are includible in the gross income of each individual whose name is required to be listed in *(g)* of this subdivision.

(i) For any taxable year ending on or after December 31, 1971, such information as is required by Forms 4848 and 4849 and, only with respect to any such taxable year ending before December 31, 1972, such information as is required by Form 2950. Such forms are required by this section to be filed by an organization exempt from tax under section 501(a) which is an employer who maintains a funded pension or annuity plan for its employees. See paragraph (g) of this section for exceptions from filing. Form 4849 need not be filed by the organization if the fiduciary for the plan has given written notification to the organization that such form will be filed as an attachment to Form 990–P filed by the fiduciary. Form 4848 (and Form 4849 if required to be filed by the organization) shall be filed as a separate return on or before the due date for Form 990. For rules relating to the extension of time for filing, see section 6081 and the regulations thereunder and the instructions for Form 4848. A central organization which files Form 990 as a group return under paragraph (d) of this section may also file Form 4848 as a group return. The rules provided by paragraph (d) of this section with respect to a group return filed on Form 990 shall apply to a group return filed on Form 4848. Unless otherwise expressly provided therein, an authorization to include a local organization in a group for purposes of filing Form 990 as a group return shall be treated as an authorization to include such local organization in a group for purposes of filing Form 4848 as a group return. A group return on Form 4848 shall be filed in accordance with this section and the instructions to Form 4848 and shall be considered the return of each local organization included therein. In addition to the information required to

be furnished by Forms 4848 and 4849, the district director may require any further information that he considers necessary to determine qualification of the plan under section 401 or the taxability under section 403(b) of a beneficiary under an annuity purchased by a section 501(c)(3) organization.

(*j*) In the case of a private foundation liable for tax imposed under chapter 42, such information as is required by Form 4720.

(*k*) Its lobbying expenditures, grass roots expenditures, exempt purpose expenditures, lobbying nontaxable amount, and grass roots nontaxable amount for the taxable year and for prior taxable years that are base years (within the meaning of § 1.501(h)–3(c)(7)), if the organization has an election under section 501(h) in effect for the taxable year. An organization that is a member of an affiliated group of organizations (as defined in § 56.4911–7(e)) but that is not a member of a limited affiliated group (as defined in § 56.4911–10(b)) shall report this information based on the expenditures of all members of the group during the taxable year of the group that ends with or within the member's taxable year and for prior taxable years of the group that are base years (within the meaning of § 56.4911–9(b)). For additional information required to be furnished by members of an affiliated group of organizations, and by controlling members in a limited affiliated group, see §§ 56.4911–9(d) and 56.4911–10(f)(1), respectively.

(iii) *Special rules.* In providing the names and addresses of contributors and donors under subdivision (ii)*(f)* of this subparagraph:

(a) An organization described in section 501(c)(3) which meets the 33⅓ percent-of-support test of the regulations under section 170(b)(1)(A)(vi) (without regard to whether such organization otherwise qualifies as an organization described in section 170(b)(1)(A)) is required to provide the name and address of a person who contributed, bequeathed, or devised $5,000 or more during the year only if his amount is in excess of 2 percent of the total contributions, bequests and devises received by the organization during the year.

(b) An organization other than a private foundation is required to report only the names and addresses of contributors of whom it has actual knowledge. For instance, an organization need not require an employer who withholds contributions from the compensation of employees and pays over to the organization periodically the total amounts withheld, to specify the amounts paid over with respect to a particular employee. In such case, unless the organization has actual knowledge that a particular employee gave more than $5,000 (and in excess of 2 percent if *(a)* of this subdivision is applicable), the organization need report only the name and address of the employer, and the total amount paid over by him.

(c) Separate and independent gifts made by one person in a particular year need be aggregated to determine if his contributions and bequests exceed $5,000 (and in excess of 2 percent if *(a)* of this subdivision is applicable), only if such gifts are of $1,000 or more.

(d)(1) Organizations described in section 501(c) (8) or (10) (and, for taxable years beginning after December 31, 1970, organizations described in section 501(c)(7)) that receive contributions or bequests to be used exclusively for purposes described in section 170(c)(4), 2055(a)(3), or 2522(a)(3), must attach a schedule with respect to all gifts which aggregate more than $1,000 from any one person showing the name of the donor, the amount of the contribution or bequest, the specific purpose for which such amount was received, and the specific use to which such amount was put. In the case of an amount set aside for such purposes, the organization shall indicate the manner in which such amount is held (for instance, whether such amount is commingled with amounts held for other purposes). If the contribution or bequest was transferred to another organization, the schedule must include the name of the transferee organization, a description of the nature of such organization, and a description of the relationship between the transferee and transferor organizations.

(2) For taxable years beginning after December 31, 1970, such organizations must also attach a statement showing

the total dollar amount of contributions and bequests received for such purposes which are $1,000 or less.

(iv) *Listing of States.* A private foundation is required to attach to its return required by this section a list of all States:

(a) To which the organization reports in any fashion concerning its organization, assets, or activities, or

(b) With which the organization has registered (or which it has otherwise notified in any manner) that it intends to be, or is, a charitable organization or a holder of property devoted to a charitable purpose.

(3)(i) For taxable years beginning after December 31, 1969, and ending before December 31, 1971, every employee's trust described in section 401(a) which is exempt from taxation under section 501(a) shall file an annual return on Form 990–P. The return shall include the information required by paragraph (b)(5)(ii) of § 1.401–1. For such years, in addition, the trust must file the information required to be filed by the employer pursuant to the provisions of § 1.404(a)–2, unless the employer has notified the trustee in writing that he has filed or will timely file such information. If the trustee has received such notification from the employer, then such notification, or a copy thereof, shall be retained by the trust as a part of its records.

(ii) For taxable years ending on or after December 31, 1971, and before December 31, 1975, every employee's trust described in section 401(a) which is exempt from taxation under section 501(a) shall file an annual return on Form 990–P. The trust shall furnish such information as is required by such form and the instructions issued with respect thereto.

(4) For taxable years beginning after December 31, 1980, trusts described in section 4947(a)(1) and nonexempt private foundations shall comply with the requirements of section 6033 and this section in the same manner as organizations described in section 501(c)(3) which are exempt from tax under section 501(a). This section shall be applied for taxable years beginning after December 31, 1980 as if trusts described in section 4947(a)(1) and nonexempt private foundations were described in section 501(c)(3). Therefore, for purposes of this section, all references to exempt organizations shall include section 4947(a)(1) trusts and nonexempt private foundations and all references to private foundations shall include section 4947(a)(1) trusts that would be private foundations if they were described in section 501(c)(3) and all nonexempt private foundations. Similarly, for purposes of paragraph (a)(2)(ii)(d), the purposes for which a section 4947(a)(1) trust or a nonexempt private foundation is organized shall be treated as the purposes for which it is exempt. For purposes of this section, the term ''nonexempt private foundation'' means a taxable organization (other than a section 4947(a)(1) trust) that is a private foundation. See section 509(b) and § 1.509(b)–1. See also section 642(c)(6) and § 1.642(c)–4.

(b) *Accounting period for filing return.* A return required by this section shall be on the basis of the established annual accounting period of the organization. If the organization has no such established accounting period, such return shall be on the basis of the calendar year.

(c) *Returns when exempt status not established.* An organization claiming an exempt status under section 501(a) prior to the establishment of such exempt status under section 501 and § 1.501(a)–1, shall file a return required by this section in accordance with the instructions applicable thereto. In such case the organization must indicate on such return that it is being filed in the belief that the organization is exempt under section 501(a), but that the Internal Revenue Service has not yet recognized such exemption.

(d) *Group returns.* (1) A central, parent, or like organization (referred to in this paragraph as ''central organization''), exempt under section 501(a) and described in section 501(c) (other than a private foundation), although required to file a separate annual return for itself under section 6033 and paragraph (a) of this section, may file annually, in addition to such separate annual return, a group return on Form 990. Such group return may be filed for two or more of the local organizations, chapters, or the like (referred to in this paragraph as ''local organizations'') which are (i) affiliated with such central organization at the close of its annual accounting period, (ii) subject to the general supervision or control of the central organization, and (iii) exempt from taxation under the same paragraph of section 501(c) of the Code, although the local organizations are not necessarily exempt under the paragraph under which the central organization is exempt. Such group return may not be filed for a local organization which is a private foundation.

(2)(i) The filing of the group return shall be in lieu of the filing of a separate return by each of the local organizations included in the group return. The group return shall include only those local organizations which in writing have authorized the central organization to include them in the group return, and which have made and filed, with the central organization, their statements, specifically stating their items of gross income, receipts, and disbursements, and such other information relating to them as is required to be stated in the group return. Such an authorization and statement by a local organization shall be made under the penalties of perjury, shall be signed by a duly authorized officer of the local organization in his official capacity, and shall contain the following statement, or a statement of like import: ‘‘I hereby declare under the penalties of perjury that this authorization (including any accompanying schedules and statements) has been examined by me and to the best of my knowledge and belief is true, correct and complete and made in good faith.’’ Such authorization and statement with respect to a local organization shall be retained by the central organization until the expiration of 6 years after the last taxable year for which a group return filed by such central organization includes such local organization.

(ii) There shall be attached to the group return and made a part thereof a schedule showing the name, address, and employer identification number of each of the local organizations and the total number thereof included in such return, and a schedule showing the name, address, and employer identification number of each of the local organizations and the total number thereof not included in the group return.

(3) The group return shall be on the basis of the established annual accounting period of the central organization. Where such central organization has no established annual accounting period, such return shall be on the basis of the calendar year. The same income, receipts, and disbursements of a local organization shall not be included in more than one group return.

(4) The group return shall be filed in accordance with these regulations and the instructions issued with respect to Form 990, and shall be considered the return of each local organization included therein. The tax exempt status of a local organization must be established under a group exemption letter issued to the central organization before a group return including the local organization will be considered as the return of the local organization. See § 1.501(a)–1 for requirements for establishing a tax-exempt status.

(5) In providing the information required by paragraph (a)(2)(ii) *(f), (g),* and *(h)* of this section, such information may be provided:

(i) With respect to the central or parent organization on its Form 990, and with respect to the local organizations on separate schedules attached to the group return for the year, or

(ii) On a consolidated basis for all the local organizations and the central or parent organization on the group return.

Such information need be provided only with respect to those local organizations which are not excepted from filing under the provisions of paragraph (g) of this section. A central or parent organization shall indicate whether it has provided such information in the manner described in subdivision (i) or in subdivision (ii) of this subparagraph, and may not change the manner in which it provides such information without the consent of the Commissioner.

(e) *Time and place for filing.* The annual return required by this section shall be filed on or before the 15th day of the fifth calendar month following the close of the period for which the return is required to be filed. The annual return on Form 1065 required to be filed by a religious or apostolic association or corporation shall be filed on or before the 15th day of the fourth month following the close of the taxable year for which the return is required to be filed. Each such return shall be filed in accordance with the instructions applicable thereto.

(f) *Penalties and additions to tax.* For penalties and additions to tax for failure to file a return and filing a false or fraudulent return, see sections 6652, 7203, 7206, and 7207.

(g) *Organizations not required to file annual returns.* (1) Annual returns required by this section are not required to be filed by an organization exempt from taxation under section 501(a) which is:

(i) A church, an interchurch organization of local units of a church, a convention or association of churches, or an integrated auxiliary of a church (as defined in paragraph (h) of this section);

(ii) An exclusively religious activity of any religious order;

(iii) An organization (other than a private foundation) the gross receipts of which in each taxable year are normally not more than $5,000 (as described in subparagraph (3) of this paragraph);

(iv) A mission society sponsored by or affiliated with one or more churches or church denominations, more than one-half of the activities of which society are conducted in, or directed at persons in foreign countries;

(v) A State institution, the income of which is excluded from gross income under section 115(a);

(vi) An organization described in section 501(c)(1); or

(vii) An educational organization (below college level) that is described in section 170(b)(1)(A)(ii), that has a program of a general academic nature, and that is affiliated (within the meaning of paragraph (h)(2) of this section) with a church or operated by a religious order.

(2) The provisions of section 6033(a) relieving certain specified types of organizations exempt from taxation under section 501(a) from filing annual returns do not abridge or impair in any way the powers and authority of district directors or directors of service centers provided for in other provisions of the Code and in regulations thereunder to require the filing of returns or notices by such organizations. See section 6001 and § 1.6001–1.

(3) For purposes of subparagraph (1)(iii) of this paragraph, the gross receipts (as defined in subparagraph (4) of this paragraph) of an organization are normally not more than $5,000 if:

(i) In the case of an organization which has been in existence for 1 year or less, the organization has received, or donors have pledged to give, gross receipts of $7,500 or less during the first taxable year of the organization,

(ii) In the case of an organization which has been in existence for more than one but less than 3 years, the average of the gross receipts received by the organization in its first 2 taxable years is $6,000 or less, and

(iii) In the case of an organization which has been in existence for 3 years or more, the average of the gross receipts received by the organization in the immediately preceding 3 taxable years, including the year for which the return would be required to be filed, is $5,000 or less.

(4) For purposes of this paragraph and paragraph (a)(2) of this section, ‘‘gross receipts’’ means the gross amount received by the organization during its annual accounting period from all sources without reduction for any costs or expenses including, for example, cost of goods or assets sold, cost of operations, or expenses of earning, raising, or collecting such amounts. Thus ‘‘gross receipts’’ includes, but is not limited to (i) the gross amount received as contributions, gifts, grants, and similar amounts without reduction for the expenses of raising and collecting such amounts, (ii) the gross amount received as dues or assessments from members or affiliated organizations without reduction for expenses attributable to the receipt of such amounts, (iii) gross sales or receipts from business activities (including business activities unrelated to the purpose for which the organization qualifies for exemption, the net income or loss from which may be required to be reported on Form 990–T), (iv) the gross amount received from the sale of

assets without reduction for cost or other basis and expenses of sale, and (v) the gross amount received as investment income, such as interest, dividends, rents, and royalties.

(5) [Reserved]

(6) The Commissioner may relieve any organization or class of organizations from filing, in whole or in part, the annual return required by this section where he determines that such returns are not necessary for the efficient administration of the internal revenue laws.

(h) *Integrated auxiliary*—(1) *In general.* For purposes of this title, the *term integrated auxiliary of a church* means an organization that is—

(i) Described both in sections 501(c)(3) and 509(a) (1), (2), or (3);

(ii) Affiliated with a church or a convention or association of churches; and

(iii) Internally supported.

(2) *Affiliation.* An organization is affiliated with a church or a convention or association of churches, for purposes of paragraph (h)(1)(ii) of this section, if—

(i) The organization is covered by a group exemption letter issued under applicable administrative procedures, (such as Rev. Proc. 80–27 (1980–1 C.B. 677); See §601.601(a)(2)(ii)(*b*)), to a church or a convention or association of churches;

(ii) The organization is operated, supervised, or controlled by or in connection with (as defined in §1.509(a)–4) a church or a convention or association of churches; or

(iii) Relevant facts and circumstances show that it is so affiliated.

(3) *Facts and circumstances.* For purposes of paragraph (h)(2)(iii) of this section, relevant facts and circumstances that indicate an organization is affiliated with a church or a convention or association of churches include the following factors. However, the absence of one or more of the following factors does not necessarily preclude classification of an organization as being affiliated with a church or a convention or association of churches—

(i) The organization's enabling instrument (corporate charter, trust instrument, articles of association, constitution or similar document) or bylaws affirm that the organization shares common religious doctrines, principles, disciplines, or practices with a church or a convention or association of churches;

(ii) A church or a convention or association of churches has the authority to appoint or remove, or to control the appointment or removal of, at least one of the organization's officers or directors;

(iii) The corporate name of the organization indicates an institutional relationship with a church or a convention or association of churches;

(iv) The organization reports at least annually on its financial and general operations to a church or a convention or association of churches;

(v) An institutional relationship between the organization and a church or a convention or association of churches is affirmed by the church, or convention or association of churches, or a designee thereof; and

(vi) In the event of dissolution, the organization's assets are required to be distributed to a church or a convention or association of churches, or to an affiliate thereof within the meaning of this paragraph (h).

(4) *Internal support.* An organization is internally supported, for purposes of paragraph (h)(1)(iii) of this section, unless it both—

(i) Offers admissions, goods, services or facilities for sale, other than on an incidental basis, to the general public (except goods, services, or facilities sold at a nominal charge or for an insubstantial portion of the cost); and

(ii) Normally receives more than 50 percent of its support from a combination of governmental sources, public solicitation of contributions, and receipts from the sale of admissions, goods, performance of services, or furnishing of facilities in activities that are not unrelated trades or businesses.

(5) *Special rule.* Men's and women's organizations, seminaries, mission societies, and youth groups that satisfy paragraphs (h)(1) (i) and (ii) of this section are integrated auxiliaries of a church regardless of whether such an organization meets the internal support requirement under paragraph (h)(1)(iii) of this section.

(6) *Effective date.* This paragraph (h) applies for returns filed for taxable years beginning after December 31, 1969. For returns filed for taxable years beginning after December 31, 1969 but beginning before December 20, 1995, the definition for the term *integrated auxiliary of a church* set forth in § 1.6033–2(g)(5) (as contained in the 26 CFR edition revised as of April 1, 1995) may be used as an alternative definition to such term set forth in this paragraph (h).

(7) *Examples of internal support.* The internal support test of this paragraph (h) is illustrated by the following examples, in each of which it is assumed that the organization's provision of goods and services does not constitute an unrelated trade or business:

Example 1. Organization A is described in sections 501(c)(3) and 509(a)(2) and is affiliated (within the meaning of this paragraph (h)) with a church. Organization A publishes a weekly newspaper as its only activity. On an incidental basis, some copies of Organization A's publication are sold to nonmembers of the church with which it is affiliated. Organization A advertises for subscriptions at places of worship of the church. Organization A is internally supported, regardless of its sources of financial support, because it does not offer admissions, goods, services, or facilities for sale, other than on an incidental basis, to the general public. Organization A is an integrated auxiliary.

Example 2. Organization B is a retirement home described in sections 501(c)(3) and 509(a)(2). Organization B is affiliated (within the meaning of this paragraph (h)) with a church. Admission to Organization B is open to all members of the community for a fee. Organization B advertises in publications of general distribution appealing to the elderly and maintains its name on non-denominational listings of available retirement homes. Therefore, Organization B offers its services for sale to the general public on more than an incidental basis. Organization B receives a cash contribution of $50,000 annually from the church. Fees received by Organization B from its residents total $100,000 annually. Organization B does not receive any government support or contributions from the general public. Total support is $150,000 ($100,000 + $50,000), and $100,000 of that total is from receipts from the performance of services (66⅔% of total support). Therefore, Organization B receives more than 50 percent of its support from receipts from the performance of services. Organization B is not internally supported and is not an integrated auxiliary.

Example 3. Organization C is a hospital that is described in sections 501(c)(3) and 509(a)(1). Organization C is affiliated (within the meaning of this paragraph (h)) with a church. Organization C is open to all persons in need of hospital care in the community, although most of Organization C's patients are members of the same denomination as the church with which Organization C is affiliated. Organization C maintains its name on hospital listings used by the general public, and participating doctors are allowed to admit all patients. Therefore, Organization C offers its services for sale to the general public on more than an incidental basis. Organization C annually receives $250,000 in support from the church, $1,000,000 in payments from patients and third party payors (including Medicare, Medicaid and other insurers) for patient care, $100,000 in contributions from the public, $100,000 in grants from the federal government (other than Medicare and Medicaid payments) and $50,000 in investment income. Total support is $1,500,000 ($250,000 + $1,000,000 + $100,000 + $100,000 + $50,000), and $1,200,000 ($1,000,000 + $100,000 + $100,000) of that total is support from receipts from the performance of services, government sources, and public contributions (80% of total support). Therefore, Organization C receives more than 50 percent of its support from receipts from the performance of services, government sources, and public contributions. Organization C is not internally supported and is not an integrated auxiliary.

(i) *Records, statements, and other returns of tax-exempt organizations.* (1) An organization which is exempt from taxation under section 501(a) and is not required to file annually an information return required by this section shall immediately notify in writing the district director for the internal revenue district in which its principal office is located of any changes in its character, operations, or purpose for which it was originally created.

(2) Every organization which is exempt from tax, whether or not it is required to file an annual information return, shall submit such additional information as may be required by the Internal Revenue Service for the purpose of inquiring into its exempt status and administering the provisions of subchapter F (section 501 and following), chapter 1 of subtitle A of the Code, section 6033, and chapter 42 of subtitle D of the Code. See section 6001 and § 1.6001–1 with respect to the authority of the district directors or directors of service centers to require such additional information and with

respect to the books of account or records to be kept by such organizations.

(3) An organization which has established its exemption from taxation under section 501(a), including an organization which is relieved under section 6033 and this section from filing annual returns of information, is not relieved of the duty of filing other returns of information. See, for example, sections 6041, 6043, 6051, 6057, and 6058 and the regulations thereunder.

(j) *Unrelated business tax returns.* In addition to the foregoing requirements of this section, certain organizations otherwise exempt from tax under section 501(a) which are subject to tax on unrelated business taxable income are also required to file returns on Form 990–T. See paragraph (e) of § 1.6012–2 and paragraph (a)(5) of § 1.6012–3 for requirements with respect to such returns.

(k) *Effective date.* The provisions of this section shall apply with respect to returns filed for taxable years beginning after December 31, 1969.

[T.D. 7122, 36 FR 11026, June 8, 1971; 36 FR 11730, June 18, 1971]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting § 1.6033–2, see the List of Sections Affected in the Finding Aids section of this volume.

§ 1.6033–3 Additional provisions relating to private foundations.

(a) *In general.* The foundation managers (as defined in section 4946(b)) of every organization (including a trust described in section 4947(a)(1)) which is (or is treated as) a private foundation (as defined in section 509) the assets of which are at least $5,000 at any time during a taxable year shall include the following information on its annual return in addition to that information required under § 1.6033–2(a):

(1) An itemized statement of its securities and all other assets at the close of the year, showing both book and market value,

(2) An itemized list of all grants and contributions made or approved for future payment during the year, showing the amount of each such grant or contribution, the name and address of the recipient (other than a recipient who is not a disqualified person and who receives, from the foundation, grants to indigent or needy persons that, in the aggregate, do not exceed $1,000 during the year), any relationship between any individual recipient and the foundation's managers or substantial contributors, and a concise statement of the purpose of each such grant or contribution,

(3) The address of the principal office of the foundation and (if different) of the place where its books and records are maintained,

(4) The names and addresses of its foundation managers (within the meaning of section 4946(b)), that are substantial contributors (within the meaning of section 507(d)(2)) or that own 10 percent or more of the stock of any corporation of which the foundation owns 10 percent or more of the stock, or corresponding interests in partnerships or other entities, in which the foundation has a 10 percent or greater interest.

For purposes of subparagraph (2) of this paragraph, the business address of an individual grant recipient or foundation manager may be used by the foundation in its annual return in lieu of the home address of such recipient or manager, and the term ''relationship'' shall include, but is not limited to, any case in which an individual recipient of a grant or contribution by a private foundation is (i) a member of the family (as defined in section 4946(d)) of a substantial contributor or foundation manager of such foundation, (ii) a partner of such substantial contributor or foundation manager, or (iii) an employee of such substantial contributor or foundation manager or of an organization which is effectively controlled (within the meaning of section 4946(a)(1)(H)(i) and the regulations thereunder), directly or indirectly, by one or more such substantial contributors or foundation managers.

(b) *Notice to public of availability of annual return.* A copy of the notice required by section 6104(d) (relating to public inspection of private foundations' annual returns), and proof of publication thereof, shall be filed with the annual return required by § 1.6033–2(a). A copy of such notice as published, and a statement signed by a foundation manager stating that such notice was published, setting forth the date of publication and the publication in which it appeared, shall be sufficient proof of publication for purposes of this paragraph.

(c) *Special rules*—(1) *Furnishing of copies to State officers.* The foundation managers of a private foundation shall furnish a copy of the annual return required by section 6033 and § 1.6033–2 to the Attorney General of:

(i) Each State which the foundation is required to list on its return pursuant to § 1.6033–2(a)(2)(iv),

(ii) The State in which is located the principal office of the foundation, and

(iii) The State in which the foundation was incorporated or created.

The annual return shall be sent to each Attorney General described in paragraphs (c)(1) (i), (ii), or (iii) of this section at the same time as it is sent to the Internal Revenue Service. Upon request the foundation managers shall also furnish a copy of the annual return to the Attorney General or other appropriate State officer (within the meaning of section 6104 (c)(2)) of any State. The foundation managers shall attach to each copy of the annual return sent to State officers under this subparagraph a copy of the Form 4720, if any, filed by the foundation for the year.

(2) *Cross-reference.* For additional rules with respect to private foundations' returns and the public inspection of such returns, see section 6104(d) and the regulations thereunder.

(d) *Special rules for certain foreign organizations.* The provisions of paragraphs (b) and (c) of this section shall not apply with respect to an organization described in section 4948(b). The foundation managers of such organizations are not required to publish notice of availability of the annual return for inspection, to make the annual return available at the principal office of the foundation for public inspection under section 6104(d), or to send copies of the annual return to State officers.

(e) *Effective date.* The provisions of this section shall apply with respect to returns filed for taxable years beginning after December 31, 1980.

[T.D. 8026, 50 FR 20756, May 20, 1985]

§ 1.6034–1 Information returns required of trusts described in section 4947(a)(2) or claiming charitable or other deductions under section 642(c).

(a) *In general.* Every trust (other than a trust described in paragraph (b) of this section) claiming a charitable or other deduction under section 642(c) for the taxable year shall file, with respect to such taxable year, a return of information on form 1041–A. In addition, for taxable years beginning after December 31, 1969, every trust (other than a trust described in paragraph (b) of this section) described in section 4947 (a) (2) (including trusts described in section 664) shall file such return for each taxable year, unless all transfers in trust occurred before May 27, 1969. The return shall set forth the name and address of the trust and the following information concerning the trust in such detail as is prescribed by the form or in the instructions issued with respect to such form:

(1) The amount of the charitable or other deduction taken under section 642(c) for the taxable year (and, for taxable years beginning prior to January 1, 1970, showing separately for each class of activity for which disbursements were made (or amounts were permanently set aside) the amounts which, during such year, were paid out (or which were permanently set aside) for charitable or other purposes under section 642(c));

(2) The amount paid out during the taxable year which represents amounts permanently set aside in prior years for which charitable or other deductions have been taken under section 642(c), and separately listing for each class of activity, for which disbursements were made, the total amount paid out;

(3) The amount for which charitable or other deductions have been taken in prior years under section 642(c) and which had not been paid out at the beginning of the taxable year;

(4)(i) The amount paid out of principal in the taxable year for charitable, etc., purposes, and separately listing for each such class of activity, for which disbursements were made, the total amount paid out;

(ii) The total amount paid out of principal in prior years for charitable, etc., purposes;

(5) The gross income of the trust for the taxable year and the expenses attributable thereto, in sufficient detail to show the different categories of income and of expense; and

(6) A balance sheet showing the assets, liabilities, and net worth of the trust as of the beginning of the taxable year.

(b) *Exceptions*—(1) *In general.* A trust is not required to file a Form 1041–A for any taxable year with respect to which the trustee is required by the terms of the governing instrument and applicable local law to distribute currently all of the income of the trust. For this purpose, the income of the trust shall be determined in accordance with section 643(b) and §§1.643(b)–1 and 1.643(b)–2.

(2) *Trusts described in section 4947(a)(1).* For taxable years beginning after December 31, 1980, a trust described in section 4947(a)(1) is not required to file a Form 1041–A.

(c) *Time and place for filing return.* The return on form 1041–A shall be filed on or before the 15th day of the 4th month following the close of the taxable year of the trust, with the internal revenue officer designated by the instructions applicable to such form. For extensions of time for filing returns under this section, see §1.6081–1.

(d) *Other provisions.* For publicity of information on Form 1041–A, see section 6104 and the regulations thereunder in part 301 of this chapter. For provisions relating to penalties for failure to file a return required by this section, see section 6652(d). For the criminal penalties for a willful failure to file a return and filing a false or fraudulent return, see sections 7203, 7206, and 7207.

[T.D. 6500, 25 FR 12108, Nov. 26, 1960, as amended by T.D. 7563, 43 FR 40221, Sept. 11, 1978; T.D. 8026, 50 FR 20757, May 20, 1985]

§1.6035–1 Returns of U.S. officers, directors and 10-percent shareholders of foreign personal holding companies for taxable years beginning after September 3, 1982.

(a) *Requirement of returns*—(1) *In general.* For taxable years of a foreign personal holding company beginning after September 3, 1982, each United States citizen or resident who is an officer, director, or 10-percent shareholder of the foreign personal holding company (as defined in section 552) shall file with his income tax return, on or before the date that return is due, Form 5471 and the applicable schedules to be completed in accordance with the instructions setting forth corporate, shareholder, and income information for the foreign personal holding company's annual accounting period that ends with or within the officer's, director's, or shareholder's taxable year. In the case of a foreign personal holding company which is a specified foreign corporation (as defined in section 898), the taxable year of such corporation shall be treated as its annual accounting period.

(2) *General corporate information.* The general foreign personal holding company information required by this section with respect to each taxable year is as follows:

(i) The name and address and employer identification number (if any) of the corporation;

(ii) The kind of business in which the corporation is engaged;

(iii) The date of its incorporation;

(iv) The country under the laws of which the corporation is incorporated;

(v) A description of each class of stock issued and outstanding by the corporation for the beginning and end of the annual accounting period;

(vi) The number of shares and par value of common stock of the corporation issued and outstanding as of the beginning and end of the taxable year;

(vii) The number of shares and par value of preferred stock of the corporation issued and outstanding as of the beginning and end of the taxable year, the rate of dividend on such stock and whether such dividend is cumulative or noncumulative; and

(viii) Any other information required by the appropriate form and its instructions.

For purposes of this paragraph, the term ''share'' includes any security convertible into a share in the corporation and any option granted by the corporation with respect to any share in the corporation.

(3) *Shareholder information.* The shareholder information required by this section is as follows:

(i) The name, address and taxpayer identification number (if any) of each person, whether foreign or U.S., who was a shareholder during the taxable year and the class and number of shares held by each, together with an explanation of any changes in stock holdings during the taxable year,

(ii) The name and address of each holder during the taxable year of securities convertible into stock of the corporation and the class, number, and face value of the securities held by each, together with and explanation of any changes in the holdings of such securities during the taxable year,

(iii) The name and address of each holder during the taxable year of any option granted by the corporation with respect to any share in the corporation, and a full description of the options held by each, together with an explanation of any changes in the holdings of such options during the taxable year, and

(iv) Any other information required by the appropriate form and its instructions.

(4) *Income information.* The income information required by this section is the gross income, deductions and credits, taxable income, foreign personal holding company income, and undistributed foreign personal holding company income for the taxable year and other information required by the appropriate form and its instructions.

(b) *Persons required to file return*—(1) *In general.* The determination of whether a United States citizen or resident is person who is an officer, director, or 10-percent shareholder required to file a return with respect to any foreign corporation is made as of the date that Form 5471 is required to be filed. If there is no such person required to file on that date (because, for example, the corporation has been dissolved), then filing is required of the persons who were officers, directors or 10-percent shareholders on the last day of the most recent taxable year of the corporation for which there was such a person who was a United States citizen or resident.

(2) *10-percent shareholder.* (i) The term ‘‘10-percent shareholder’’ means any individual who owns directly or indirectly (within the meaning of section 544) 10 percent or more in value of the outstanding stock of a foreign corporation.

(ii) An individual who does not own 10 percent or more in value of the outstanding stock directly but is required to file solely by attribution of another United States person’s stock ownership is excused from filing if the direct owner that is an individual furnishes all the information required.

(3) *Two or more persons required to submit the same information.* If two or more persons are required to furnish the information for the same foreign personal holding company for the same period, one person may make one return on Form 5471. The single Form 5471 may be filed with the income tax return of any one of the persons and shall disclose the name, address, and identifying number of each other person or persons on whose behalf the return is filed. Each person on whose behalf the return is filed remains liable for any penalties imposed under sections 6679, 7203, 7206, and 7207.

(4) *Statement required.* Any United States citizen or resident required to furnish information under this section with his return who does not do so by reason of the provisions of subparagraph (2)(ii) or (3) of this paragraph shall file a statement with his income tax return indicating that such requirement has been or will be satisfied and identifying the return with which the information was or will be filed and the place of filing.

(c) *Separate returns for each corporation.* If a person is required to file returns under section 6035 and this section with respect to more than one foreign personal holding company, separate returns must be filed with respect to each company.

(d) *Corrective filing.* If an information return with respect to a taxable year of a foreign personal holding company beginning after September 3, 1982, is filed before [date which is 30 days after the date of publication of a Treasury decision in the FEDERAL REGISTER] and that return does not contain all of the information required by this section, then the filer of the return shall file an amended information return containing all of such information within 90 days after June 4, 1985.

(e) *Penalties*—(1) *Criminal penalties.* For criminal penalties for failure to file a return and filing a false or fraudulent return, see sections 7203, 7206, and 7207.

(2) *Civil penalties.* For civil penalties for failure to file a proper foreign personal holding company information return, see section 6679 and the regulations thereunder.

[T.D. 8028, 50 FR 23408, June 4, 1985; 50 FR 26359, June 26, 1985, as amended by T.D. 8573, 59 FR 64301, Dec. 14, 1994]

§1.6035–2 Returns of U.S. officers and directors of foreign personal holding companies for taxable years beginning before September 4, 1982.

For rules relating to information returns required to be filed by officers and directors of foreign personal holding companies for taxable years beginning before September 4, 1982, see section 6035(a) (as in effect before the enactment of the Tax Equity and Fiscal Responsibility Act of 1982) and 26 CFR 1.6035–1 (Revised as of April 1, 1981).

[T.D. 8028, 50 FR 23409, June 4, 1985]

§1.6035–3 Returns of 50-percent U.S. shareholders of foreign personal holding companies for taxable years beginning before September 4, 1982.

For rules relating to information returns required to be filed by shareholders of foreign personal holding companies for taxable years beginning before September 4, 1982, see section 6035(b) (as in effect before the enactment of the Tax Equity and Fiscal Responsibility Act of 1982) and 26 CFR 1.6035–2 (Revised as of April 1, 1961).

[T.D. 8028, 50 FR 23409, June 4, 1985]

§1.6036–1 Notice of qualification as executor or receiver.

For provisions relating to the notice required of fiduciaries, see the regulations under section 6036 contained in part 301 of this chapter (Regulations on Procedure and Administration).

§1.6037–1 Return of electing small business corporation.

(a) *In general.* Every small business corporation (as defined in section 1371(a)) which has made an election under section 1372(a) not to be subject to the tax imposed by chapter 1 of the Code shall file, with respect to each taxable year for which the election is in effect, a return of income on Form 1120–S. The return shall set forth the items of gross income and the deductions allowable in computing taxable income as required by the return form or in the instructions issued with respect thereto and shall be signed in accordance with section 6062 by the person authorized to sign a return. The return shall also set forth the following information concerning the electing small business corporation:

(1) The names and addresses of all persons owning stock in the corporation at any time during the taxable year;

(2) The number of shares of stock owned by each shareholder at all times during the taxable year;

(3) The amount of money and other property distributed by the corporation during the taxable year to each shareholder;

(4) The date of each distribution of money and other property; and

(5) Such other information as is required by the form or by the instructions issued with respect to such form.

(b) *Time and place for filing return.* The return shall be filed on or before the 15th day of the third month following the close of the taxable year with the internal revenue officer designated in the instructions applicable to Form 1120–S. (See section 6072.)

(c) *Other provisions.* The return on Form 1120–S will be treated as a return filed by the corporation under section 6012, relating to persons required to make returns of income, for purposes of the provisions of chapter 66 of the Code, relating to limitations. Thus, for example, the period of limitation on assessment and collection of any corporate tax found to be due upon a subsequent determination that the corporation was not entitled to the benefits of subchapter S, chapter 1 of the Code, will run from the date of filing the return under section 6037, or from the date prescribed for filing such return, whichever is the later.

(d) *Penalties.* For criminal penalties for failure to file a return, supply information, or pay tax, and for filing a false or fraudulent return, statement, or other document, see sections 7203, 7206, and 7207.

[T.D. 6500, 25 FR 12108, Nov. 26, 1960, as amended by T.D. 7012, 34 FR 7690, May 15, 1969]

§ 1.6038–1 Information returns required of domestic corporations with respect to annual accounting periods of certain foreign corporations beginning before January 1, 1963.

(a) *Requirement of return.* For taxable years beginning after December 31, 1960, every domestic corporation shall make a separate annual information return on Form 2952, in duplicate, with respect to each foreign corporation which it controls, as defined in paragraph (b) of this section, and with respect to each foreign subsidiary, as defined in paragraph (c) of this section, for each annual accounting period (described in paragraph (d) of this section) of each such controlled foreign corporation or foreign subsidiary beginning after December 31, 1960, and before January 1, 1963. Such information shall not be required to be furnished, however, with respect to a corporation defined in section 1504(d) of the Code which makes a consolidated return for the taxable year. For annual accounting periods beginning after December 31, 1962, see § 1.6038–2.

(b) *Control.* A domestic corporation shall be deemed to be in control of a foreign corporation if at any time during its taxable year it owns more than 50 percent of the voting stock of such foreign corporation.

(c) *Foreign subsidiary.* A foreign corporation more than 50 percent of the voting stock of which is owned by a controlled foreign corporation at any time during the annual accounting period of such controlled foreign corporation shall be considered a foreign subsidiary.

(d) *Period covered by return*—(1) *Controlled foreign corporation.* The information with respect to a controlled foreign corporation shall be furnished for its annual accounting period ending with or within the domestic corporation's taxable year.

(2) *Foreign subsidiary.* The information with respect to a foreign subsidiary shall be furnished for such subsidiary's annual accounting period ending with or within the controlled foreign corporation's annual accounting period.

(3) *Annual accounting period defined.* For purposes of this section, the annual accounting period of a controlled foreign corporation or of a foreign subsidiary is the annual period on the basis of which the controlled foreign corporation or foreign subsidiary regularly computes its income in keeping its books. The term ''annual accounting period'' may refer to a period of less than 1 year, where for example the foreign income, war profits, and excess profits taxes are determined on the basis of an accounting period of less than 1 year as described in section 902(c)(2).

(e) *Contents of return.* The return on Form 2952 shall contain the following information with respect to each controlled corporation and each foreign subsidiary:

(1) The name and address of the corporation;

(2) The principal place of business of the corporation;

(3) The date of incorporation and the country under whose laws incorporated;

(4) The nature of the corporation's business;

(5) As regards the outstanding stock of the corporation:

(i) A description of each class of the corporation's stock, and

(ii) The number of shares of each class outstanding at the beginning and the end of the annual accounting period;

(6) A list showing the name and address of, and the number of shares of each class of the corporation's stock held by, each citizen or resident of the United States, and each domestic corporation, who is a shareholder of record owning at any time during the annual accounting period 5 percent or more in value of any class of the corporation's outstanding stock;

(7) The amount of the corporation's gross receipts, net profits before taxes and provision for foreign income taxes, for the annual accounting period, as reflected on the financial statements required under paragraph (f) of this section to be filed with the return; and

(8) A summary showing the total amount of each of the following types of transactions of the corporation, which took place during the annual accounting period, with the domestic corporation or any shareholder of the domestic corporation owning at the time of the transaction 10 percent or more of the value of any class of stock outstanding of the domestic corporation:

(i) Sales and purchases of stock in trade;

(ii) Purchases of property of a character which is subject to the allowance for depreciation;

(iii) Compensation paid and compensation received for the rendition of technical, managerial, engineering, construction, scientific, or like services;

(iv) Commissions paid and commissions received;

(v) Rents and royalties paid and rents and royalties received;

(vi) Amounts loaned and amounts borrowed (other than open accounts which arise and are collected in the ordinary course of business);

(vii) Dividends paid and dividends received;

(viii) Interest paid and interest received; and

(ix) Premiums received for insurance or reinsurance.

If the domestic corporation is a bank, as defined in section 581, or is controlled within the meaning of section 368(c) by a bank, the term ‘‘transactions'' shall not, as to a corporation with respect to which a return is filed, include banking transactions entered into on behalf of customers; in any event, however, deposits in accounts between a controlled foreign corporation or a foreign subsidiary and the domestic corporation or a 10-percent shareholder described in this subparagraph and withdrawals from such accounts shall be summarized by reporting end-of-month balances.

(f) *Financial statements.* The following information with respect to each controlled foreign corporation and each foreign subsidiary shall be attached to and filed as part of the return required by this section:

(1) A statement of the corporation's profit and loss for the annual accounting period;

(2) A balance sheet as of the end of the annual accounting period of the corporation showing:

(i) The corporation's assets,

(ii) The corporation's liabilities, and

(iii) The corporation's net worth; and

(3) An analysis of changes in the corporation's surplus accounts during the annual accounting period including both opening and closing balances.

The statements listed in subparagraphs (1), (2), and (3) of this paragraph shall be prepared in conformity with generally accepted accounting principles, and in such form and detail as is customary for the corporation's accounting records.

(g) *Method of reporting.* All amounts furnished under paragraphs (e) and (f) of this section shall be expressed in United States currency with a statement of the exchange rates used.

(h) *Time and place for filing return.* Returns on Form 2952 required under paragraph (a) of this section shall be filed with the domestic corporation's income tax return on or before the fifteenth day of the third month following the close of such corporation's taxable year.

(i) *Extensions of time for filing.* District directors are authorized to grant reasonable extensions of time for filing returns on Form 2952 in accordance with the applicable provisions of §1.6081–1. An application by a domestic corporation for an extension of time for filing a return of income shall also be considered as an application for an extension of time for filing returns on Form 2952.

(j) *Failure to furnish information*—(1) *Effect on foreign tax credit.* (i) Failure by a domestic corporation to furnish, in accordance with the provisions of this section, any return or any information in any return, required to be filed for a taxable year under authority of section 6038 on or before the date prescribed in paragraph (h) of this section (determined with regard to any extension of time for such filing) shall affect the application of section 902 as provided in subparagraph (2) of this paragraph. Such failure shall affect the application of section 902 to such domestic corporation or to any person who acquires from any person any portion (but only to the extent of such portion) of the interest of such domestic corporation in any controlled foreign corporation or foreign subsidiary.

(ii) Where the domestic corporation, having filed the return required by this section except for an omission of, or error with respect to, some of the information referred to in paragraphs (e) and (f) of this section, establishes to the satisfaction of the Commissioner that such omission or error was inadvertent or for reasonable cause and that such domestic corporation has substantially complied with this section, such omission or error shall not constitute a failure under this section.

(2) *Reduction of foreign taxes.* In the application of section 902 to the domestic corporation or person referred to in subparagraph (1)(i) of this paragraph for any taxable year, the amount of taxes paid or deemed paid by each controlled foreign corporation and each foreign subsidiary for the accounting period or periods for which the domestic corporation was required for the taxable year of the failure to furnish information under this section shall be reduced by 10 percent. The 10 percent reduction is not limited to the taxes paid or deemed paid by the controlled foreign corporation or foreign subsidiary with respect to which there is a failure to file information but shall apply to the taxes paid or deemed paid by all controlled foreign corporations and foreign subsidiaries.

(3) *Reduction for continued failure.* (i) If the failure, referred to in subparagraph (1)(i) of this paragraph, continues for 90 days or more after date of written notice by the district director to the domestic corporation, then the amount of the reduction referred to in subparagraph (2) of this paragraph shall be 10 percent plus an additional 5 percent for each 3-month period, or fraction thereof, during which such failure continues after the expiration of such 90-day period.

(ii) Taxes paid by a foreign subsidiary when once reduced for a failure shall not be reduced again for the same failure in their status as taxes deemed paid by a controlled foreign corporation. Where a failure continues, each additional periodic 5 percent reduction, referred to in subdivision (i) of this subparagraph, shall be considered as part of the one reduction.

(4) *Reasonable cause.* (i) For purposes of subsection (b) of section 6038 and this section the time prescribed for furnishing information under this paragraph, and the beginning of the 90-day period after notice by the district director, shall be treated as being not earlier than the last day on which (as shown to the satisfaction of the district director) reasonable cause existed for failure to furnish such information.

(ii) A domestic corporation, which wishes to avoid a reduction in foreign tax credit as provided in subparagraphs (2) and (3) of this paragraph for failure to furnish information in accordance with this section, must make an affirmative showing of all facts alleged as a reasonable cause for such failure in the form of a written statement containing a declaration that it is made under the penalties of perjury.

(5) *Penalties.* The information required by section 6038 of the Code must be furnished even though there are no foreign taxes which would be reduced under the provisions of subparagraph (2) of this paragraph. For criminal penalties for failure to file a return and filing a false or fraudulent return, see sections 7203, 7206, and 7207 of the Code.

[T.D. 6506, 25 FR 12241, Nov. 30, 1960, as amended by T.D. 6621, 27 FR 11878, Dec. 1, 1962]

§ 1.6038–2 Information returns required of United States persons with respect to annual accounting periods of certain foreign corporations beginning after December 31, 1962.

(a) *Requirement of return.* Every U.S. person shall make a separate annual information return with respect to each annual accounting period (described in paragraph (e) of this section) beginning after December 31, 1962, of each foreign corporation which that person controls (as defined in paragraph (b) of this section) for an uninterrupted period of 30 days or more during such annual accounting period. Such information shall not be required to be furnished, however, with respect to a corporation defined in section 1504(d) of the Code which makes a consolidated return for the taxable year. The return shall be made, with respect to annual accounting periods ending with or within the United States person's taxable year, on—

(1) Form 2952 if such taxable year ends before December 31, 1982,

(2) Form 5471 if such taxable year ends on or after December 31, 1983, or

(3) Either Form 5471 or Form 2952 if such taxable year ends on or after December 31, 1982 and before December 31, 1963.

(b) *Control.* A person shall be deemed to be in control of a foreign corporation if at any time during that person's taxable year it owns stock possessing more than 50 percent of the total combined voting power of all classes of stock entitled to vote, or more than 50 percent of the total value of shares of all classes of stock of the foreign corporation. A person in control of a corporation which, in turn, owns more than 50 percent of the combined voting power, or of the value, of all classes of stock of another corporation is also treated as being in control of such other corporation. The provisions of this paragraph may be illustrated by the following example:

Example. Corporation A owns 51 percent of the voting stock in Corporation B. Corporation B owns 51 percent of the voting stock in Corporation C. Corporation C in turn owns 51 percent of the voting stock in Corporation D. Corporation D is controlled by Corporation A.

(c) *Attribution rules.* For the purpose of determining control of domestic or foreign corporations the constructive ownership rules of section 318(a) shall apply except that:

(1) Stock owned by or for a partner or a beneficiary of an estate or trust shall not be considered owned by the partnership, estate, or trust when the effect is to consider a United States person as owning stock owned by a person who is not a United States person;

(2) A corporation will not be considered as owning stock owned by or for a 50 percent or more shareholder when the effect is to consider a United States person as owning stock owned by a person who is not a United States person; and

(3) If 10 percent or more in value of the stock in a corporation is owned, directly or indirectly, by or for any person, section 318(a)(2)(C) shall apply.

The constructive ownership rules of section 318(a) apply only for purposes of determining control as defined in paragraph (b) of this section.

(d) *U.S. person.* For purposes of section 6038 and this section, the term ''United States person'' has the meaning assigned to it by section 7701(a)(30) of the Code, except that—

(1) With respect to a corporation organized under the laws of the Commonwealth of Puerto Rico, such term does not include an individual who is a bona fide resident of Puerto Rico, if a dividened received by such individual during the taxable year from such corporation would be excluded from gross income under section 933(1),

(2) With respect to a corporation organized under the laws of the Virgin Islands, such term does not include an individual who is a bona fide resident of the Virgin Islands and whose income tax obligation under Subtitle A (relating to income taxes) of the Code for the taxable year is satisfied pursuant to section 28(a) of the Revised Organic Act of the Virgin Islands, approved July 22, 1954 (48 U.S.C. 1642), by paying tax on income derived from all sources both within and outside the Virgin Islands into the treasury of the Virgin Islands,

(3) With respect to a corporation organized under the laws of Guam or the Northern Mariana Islands, such term does not include an individual who is a bona fide resident of Guam or the Northern Mariana Islands, respectively, and who is relieved of liability for income tax to the United States under section 935(c)(3) of the Code or section 601 of the Covenant to Establish a Commonwealth of the Northern Mariana Islands in Political Union with the United States of America (Pub. L. 94–241), respectively, for such

individual's taxable year referred to in paragraph (e) of this section, and

(4) With respect to a corporation organized under the laws of any possession of the United States (other than Guam, the Northern Mariana Islands, Puerto Rico, or the Virgin Islands), such term does not include an individual who is a bona fide resident of such possession for the entire taxable year and whose income derived from sources within any possession of the United States is not, by reason of section 931(a), includible in gross income under subtitle A (relating to income taxes) of the Code for the taxable year.

(5) For taxable years ending after December 31, 1987, with respect to a corporation organized under the laws of American Samoa, the term does not include an individual who is a bona fide resident of American Samoa, provided—

(i) 80 percent or more of the gross income of the corporation for the 3-year period ending at the close of the taxable year (or for such part of such period as such corporation or any predecessor has been in existence) was derived from sources within American Samoa or was effectively connected with the conduct of a trade or business in American Samoa; and

(ii) 50 percent or more of the gross income of such corporation for such period (or part) was derived from the conduct of an active trade or business within American Samoa.

An individual for whom an election under section 6013 (g) or (h) is in effect shall, subject to the exceptions contained in this paragraph (d), be considered a United States person for purposes of section 6038 and this section.

(e) *Period covered by return.* The information required under paragraphs (f) and (g) of this section with respect to a foreign corporation shall be furnished for the annual accounting period of the foreign corporation ending with or within the United States person's taxable year. For purposes of this section, the annual accounting period of a foreign corporation is the annual period on the basis of which that corporation regularly computes its income in keeping its books. In the case of a specified foreign corporation (as defined in section 898), the taxable year of such corporation shall be treated as its annual accounting period. The term *annual accounting period* may refer to a period of less than one year, where, for example, the foreign income, war profits, and excess profits taxes are determined on the basis of an accounting period of less than one year as described in section 902(c)(5). If more than one annual accounting period ends with or within the United States person's taxable year, separate annual information returns shall be submitted for each annual accounting period.

(f) *Contents of return.* The return on Form 2952 or Form 5471 shall contain so much of the following information, and in such form or manner, as the form shall prescribe with respect to each foreign corporation:

(1) The name, address, and employer identification number, if any, of the corporation;

(2) The principal place of business of the corporation;

(3) The date of incorporation and the country under whose laws incorporated;

(4) The name and address of the foreign corporation's statutory or resident agent in the country of incorporation;

(5) The name, address, and identifying number of any branch office or agent of the foreign corporation located in the United States;

(6) The name and address of the person (or persons) having custody of the books of account and records of the foreign corporation, and the location of such books and records if different from such address;

(7) The nature of the corporation's business and the principal places where conducted;

(8) As regards the outstanding stock of the corporation—

(i) A description of each class of the corporation's stock, and

(ii) The number of shares of each class outstanding at the beginning and end of the annual accounting period;

(9) A list showing the name, address, and identifying number of, and the number of shares of each class of the corporation's stock held by, each United States person who is a shareholder owning at any time during the annual accounting period 5 percent or

more in value of any class of the corporation's outstanding stock;

(10) For the annual accounting period, the amount of the corporation's:

(i) Current earnings and profits;

(ii) Foreign income, war profits, and excess profits taxes paid or accrued;

(iii) Distributions out of current earnings and profits for the period;

(iv) Distributions other than those described in paragraph (f)(10)(iii) of this section and the source thereof; and

(v) For Forms 5471 filed for taxable years ending after December 15, 1990, such earnings and profits information as the form shall prescribe, including post-1986 undistributed earnings described in section 902(c)(1), pre-1987 amounts, total earnings and profits, and previously taxed earnings and profits described in section 959(c); and

(11) A summary showing the total amount of each of the following types of transactions of the corporation, which took place during the annual accounting period, with the person required to file this return, any other corporation controlled by that person, or any United States person owning at the time of the transaction 10 percent or more in value of any class of stock outstanding of the foreign corporation, or of any corporation controlling that foreign corporation:

(i) Sales and purchases of stock in trade;

(ii) Purchases of tangible property other than stock in trade;

(iii) Sales and purchases of patents, inventions, models, or designs (whether or not patented), copyrights, trademarks, secret formulas or processes, or any other similar property rights;

(iv) Compensation paid and compensation received for the rendition of technical, managerial, engineering, construction, scientific, or like services;

(v) Commission paid and commissions received;

(vi) Rents and royalties paid and rents and royalties received;

(vii) Amount loaned and amounts borrowed (except open accounts resulting from sales and purchases reported under other items listed in this paragraph (f)(11) that arise and are collected in full in the ordinary course of business);

(viii) Dividends paid and dividends received;

(ix) Interest paid and interest received; and

(x) Premiums received for insurance or reinsurance.

For purposes of this paragraph (f)(11), if the United States person is a bank, as defined in section 581, or is controlled within the meaning of section 368(c) by a bank, the term ''transactions'' shall not, as to a corporation with respect to which a return is filed, include banking transactions entered into on behalf of customers; in any event, however, deposits in accounts between a foreign corporation, controlled (within the meaning of paragraph (b) of this section) by a United States person, and a person described in this paragraph (f)(11) and withdrawals from such accounts shall be summarized by reporting end-of-month balances.

(g) *Financial statements.* The following information with respect to the foreign corporation shall be attached to and filed as part of the return required by this section. Forms 5471 filed after September 30, 1991, shall contain this information in such form or manner as the form shall prescribe with respect to each foreign corporation:

(1) A statement of the corporation's profit and loss for the annual accounting period;

(2) A balance sheet as of the end of the annual accounting period of the corporation showing—

(i) The corporation's asset;

(ii) The corporation's liabilities; and

(iii) The corporation's net worth; and

(3) An analysis of changes in the corporation's surplus accounts during the annual accounting period including both opening and closing balances.

The information listed in this paragraph (g) shall be prepared in conformity with generally accepted accounting principles, and in such detail as is customary for the corporation's accounting records.

(h) *Method of reporting.* Except as provided in this paragraph (h), all amounts furnished under paragraphs (f) and (g) of this section shall be expressed in United States dollars with a statement of the exchange rates used. The following rules shall apply for taxable years ending after December 31, 1994, with respect to returns filed after December 31, 1995. All amounts furnished under paragraph (g) of this section shall be expressed in United States dollars computed and translated in conformity with United States generally accepted accounting principles. Amounts furnished under paragraph (g)(1) of this section shall also be furnished in the foreign corporation's functional currency as required on the form. Earnings and profits amounts furnished under paragraphs (f)(10) (i), (iii), (iv), and (v) of this section shall be expressed in the foreign corporation's functional currency except to the extent the form requires specific items to be translated into United States dollars. Tax amounts furnished under paragraph (f)(10)(ii) of this section shall be furnished in the foreign currency in which the taxes are payable and in United States dollars translated in accordance with section 986(a). All amounts furnished under paragraph (f)(11) of this section shall be expressed in U.S. dollars translated from functional currency at the weighted average exchange rate for the year as defined in § 1.989(b)–1. The foreign corporation's functional currency is determined under section 985. All statements submitted on or with the return required under this section shall be rendered in the English language.

(i) *Time and place for filing return.* Returns on Form 2952 or Form 5471 required under paragraph (a) of this section shall be filed with the United States person's income tax return on or before the date required by law for the filing of that person's income tax return. District directors and directors of service centers are authorized to grant reasonable extensions of time for filing returns on Form 2952 or Form 5471 in accordance with the applicable provisions of § 1.6081–1 of this chapter. An application for an extension of time for filing a return of income shall also be considered as an application for an extension of time for filing returns on Form 2952 or Form 5471.

(j) *Two or more persons required to submit the same information*—(1) *Return jointly made.* If two or more persons are required to furnish information with respect to the same foreign corporation for the same period, such persons may, in lieu of making separate returns, jointly make one return. Such joint return shall be filed with the income tax return of any one of the persons making such joint return.

(2) *Persons excepted from furnishing information*—(i) *Conditions.* Any person required to furnish information under this section with respect to a foreign corporation need not furnish that information provided all of the following conditions are met:

(A) Such person does not directly own an interest in the foreign corporation;

(B) Such person is required to furnish the information solely by reason of attribution of stock ownership from a United States person under paragraph (c) of this section; and

(C) The person from whom the stock ownership is attributed furnishes all of the information required under this section of the person to whom the stock ownership is attributed.

(ii) If an individual who is a United States person required to furnish information with respect to a foreign corporation under section 6038 is entitled under a treaty to be treated as a nonresident of the United States, and if the individual claims this treaty benefit, and if there are no other United States persons that are required to furnish information under section 6038 with respect to the foreign corporation, then the individual may satisfy the requirements of paragraphs (f)(10), (f)(11), (g), and (h) of this section by filing the audited foreign financial statements of the foreign corporation with the individual's return required under section 6038.

(iii) *Illustrations.* The rule of this paragraph (j)(2) is illustrated by the following examples:

Example (1). A, a U.S. person owns 100 percent of the stock of M, a domestic corporation. A also owns 100 percent of the stock of N, a foreign corporation organized under the laws of foreign country Y. A, in filing the information return required by this section with respect to N Corporation, in fact furnishes all of the information required of M Corporation with respect to N Corporation. M Corporation need not file the information.

Example (2). X, a domestic corporation owns 100 percent of the stock of Y, a domestic corporation, Y Corporation owns 100 percent of the stock of Z, a foreign corporation.

X Corporation is not excused by this paragraph (j)(2) from filing information with respect to Z Corporation because X Corporation is deemed to control Z Corporation under the provisions of paragraph (b) of this section without recourse to the attribution rules in paragraph (c) of this section.

(3) *Statement required.* Any United States person required to furnish information under this section with his return who does not do so by reason of the provisions of paragraph (j)(1) or (2) of this section shall file a statement with his income tax return indicating that such liability has been (or, in the case of a joint return made under paragraph (j)(1) of this section, will be) satisfied and identifying the return with which the information was or will be filed and the place of filing.

(k) *Failure to furnish information*—(1) *Dollar amount penalty*—(i) *In general.* If any person required to file Form 2952 or Form 5471 under section 6038 and this section fails to furnish any information described in paragraphs (f) and (g) of this section within the time prescribed by paragraph (i) of this section, such person shall pay a penalty of $1,000 for each annual accounting period of each foreign corporation with respect to which such failure occurs.

(ii) *Increase in penalty for continued failure after notification.* If a failure described in paragraph (k)(1)(i) of this section continues for more than 90 days after the date on which the district director mails notice of such failure to the person required to file Form 2952 or Form 5471, such person shall pay a penalty of $1,000, in addition to the penalty imposed by section 6038(b)(1) and paragraph (k)(1)(i) of this section, for each 30-day period (or fraction thereof) during which such failure continues after such 90-day period has expired. The additional penalty imposed by section 6038(b)(2) and this paragraph (k)(1)(ii) shall be limited to a maximum of $24,000 for each failure.

(iii) *Effective date.* The penalty imposed by section 6038(b) and this paragraph (k)(1) shall apply with respect to information for annual accounting periods ending after September 3, 1982.

(2) *Penalty of reducing foreign tax credit*—(i) *Effect on foreign tax credit.* Failure of a United States person to furnish, in accordance with the provisions of this section, any return or any information in any return, required to be filed for a taxable year under authority of section 6038 on or before the date prescribed in paragraph (i) of this section may affect the application of section 901 as provided in paragraph (k)(2)(ii) of this section and may affect the application of sections 902 and 960 as provided in paragraph (k)(2)(iii) of this section. Such failure may affect the application of sections 902 and 960 to any such United States person which is a corporation or to any person who acquires from any other person any portion (but only to the extent of such portion) of the interest of such other person in any such foreign corporation.

(ii) *Application of section 901.* In the application of section 901 to a United States person referred to in paragraph (k)(2)(i) of this section, the amount of taxes paid or deemed paid by such person for any taxable year, with or within which the annual accounting peroid of a foreign corporation for which such person failed to furnish information required under this section ended, may be reduced by 10 percent. However, no tax reduced under paragraph (k)(2)(iii) of this section or deemed paid under section 904(c) shall be reduced under the provisions of this paragraph (k)(2)(ii).

(iii) *Application of sections 902 and 960.* In the application of sections 902 and 960 to a United States person referred to in paragraph (k)(2)(i) of this section for any taxable year, the amount of taxes paid or deemed paid by each foreign corporation for the accounting period or periods for which such person was required for the taxable year of the failure to furnish information under this section may be reduced by 10 percent. The 10-percent reduction is not limited to the taxes paid or deemed paid by the foreign corporation with respect to which there is a failure to file information but may apply to the taxes paid or deemed paid by all foreign corporations controlled by that person. In applying subsections (a) and (b) of section 902, and in applying subsection (a) of section 960, the reduction provided by this paragraph (k)(2) shall not apply for purposes of determining the amount of accumulated profits in excess of income, war profits, and excess profits taxes.

(iv) *Reduction for continued failure after notice.* (A) If the failure referred to in paragraph (k)(2)(i) of this section continues for more than 90 days after the date on which the district director mails notice of such failure to such United States person, then the amount of the reduction referred to in paragraphs (k)(2) (ii) and (iii) of this section may be 10 percent plus an additional 5 percent for each 3-month period, or fraction thereof, during which such failure continues after the expiration of such 90-day period.

(B) No taxes shall be reduced under this paragraph (k)(2) more than once for the same failure. Taxes paid by a foreign corporation when once reduced for a failure shall not be reduced again for the same failure in their status as taxes deemed paid by a corporate shareholder. Where a failure continues, each additional periodic 5-percent reduction, referred to in paragraph (k)(2)(iv)(A) of this section, shall be considered as part of the one reduction.

(v) *Limitation on reduction of foreign tax credit.* The amount of the reduction under this paragraph (k)(2) for each failure to furnish information with respect to a foreign corporation as required under this section shall not exceed the greater of:

(A) $10,000, or

(B) The income of the foreign corporation for its annual accounting period with respect to which the failure occurs. For purposes of this section if a person is required to furnish information with respect to more than one foreign corporation, controlled (within the meaning of paragraph (b) of this section) by that person, each failure to submit information for each such corporation constitutes a separate failure.

(vi) *Offset for dollar amount penalty imposed.* The total amount of the reduction or reductions which, but for this paragraph (k)(2)(vi), may be made under this paragraph (k)(2) with respect to any separate failure, shall not exceed the maximum amount of such reductions which may be imposed, reduced (but not below zero) by the amount of the dollar amount penalty imposed by paragraph (k)(1) of this section with respect to such separate failure.

(3) *Reasonable cause.* (i) For purposes of section 6038 (b) and (c) and this section, the time prescribed for furnishing information under paragraph (i) of this section, and the beginning of the 90-day period after mailing of notice by the district director under paragraphs (k)(1)(ii) and (2)(iv)(A) of this section, shall be treated as being not earlier than the last day on which reasonable cause existed for failure to furnish the information.

(ii) To show that reasonable cause existed for failure to furnish information as required by section 6038 and this section, the person required to report such information must make an affirmative showing of all facts alleged as reasonable cause for such failure in a written statement containing a declaration that it is made under the penalties of prejury. The statement must be filed with the district director for the district or the director of the service center where the return is required to be filed. The district director or the director of the service center shall determine whether the failure to furnish information was due to reasonable cause, and if so, the period of time for which such reasonable cause existed. In the case of a return that has been filed as required by this section except for an omission of, or error with respect to, some of the information required, if the person who filed the return establishes to the satisfaction of the district director or the director of the service center that the person has substantially complied with this section, then the omission or error shall not constitute a failure under this section.

(4) *Other penalties.* The information required by section 6038 and this section must be furnished even though there are no foreign taxes which would be reduced under the provisions of this section, and even though the information required may not affect the amount of any tax due under the Internal Revenue Code. For criminal penalties for failure to file a return and filing a false or fraudulent return, see sections 7203, 7206, and 7207 of the Code.

(5) *Illustrations.* The provisions of this paragraph may be illustrated by the following examples.

Example (1). M, a domestic corporation owns 100 percent of the stock of N, a foreign corporation. Both M and N use the calendar year as a taxable year and annual accounting period, and all of the following events occur in or with respect to the 1980 taxable year. The dividend from N is the only dividend from a foreign corporation received by M during the taxable year, and the foreign taxes listed are the only foreign taxes paid or deemed paid by M and N for the taxable year. On March 15, 1981, M filed its income tax return and paid its income tax, but M did not file Form 2952 with respect to N's 1980 annual accounting period. On June 1, 1961, the district director mailed notice to M of M's failure to file Form 2952 with respect to N. On November 30, 1981, M filed a complete Form 2952 with respect to N's 1980 annual accounting period.

(a) Gains, profits, and income of N	$100,000
(b) Foreign tax paid by N with respect to such gains, profits, and income	40,000
(c) Reduction of foreign tax paid by N (for purposes of M's section 902 deemed paid credit) resulting from M's failure to file information with respect to N as required under section 6038(a) and this section: failure to file within the time prescribed in paragraph (i) of this section, 10-percent reduction; continued failure for one additional 3-month period after 90-day period after notice mailed, 5-percent reduction; total reduction, 15 percent ($40,000 times 15 percent)	6,000
(d) Foreign tax paid by N after section 6038(c)(1)(B) reduction	34,000
(e) Dividend paid by N to M	45,000
(f) Accumulated profits of N as defined in section 902(c)(1) (determined without regard to the section 6038(c)(1)(B) reduction)	100,000
(g) Accumulated profits of N as described in section 902(a) (determined without regard to the section 6038(c)(1)(B) reduction)	60,000
(h) For purposes of the section 902 credit, M is deemed to have paid the same proportion of foreign taxes paid (reduced as provided under section 6038(c)) with respect to the accumulated profits described in section 902(a) (determined without regard to the reduction provided under section 6038(c)) as the amount of the dividend (determined without regard to section 78) bears to such amount of accumulated profits	25,500

(45,000÷60,000)×34,000=25,500 ....

M must include $25,500 in gross income as a dividend under the provisions of section 78 of the Code. This example illustrates that the reductions in foreign taxes paid by the foreign corporation provided under section 8038(c) are taken into account in determining the amount included in gross income of the domestic corporation under section 78 of the Code as foreign taxes deemed paid, but such reductions are not taken into account in computing accumulated profits for purposes of determining the portion of foreign taxes deemed paid with respect to a particular dividend. The dollar amount penalty imposed by section 8038 (b) and paragraph (k)(1) of this section does not apply with respect to information for annual accounting periods ending before September 4, 1982, and therefore does not apply to M with respect to M's failure to file Form 2952 in this example.

Example (2). The facts are the same as in example (1) except that all of the events occur in or with respect to the 1982 taxable year. On March 15, 1983. M filed its income tax return and paid its income tax, but M did not file Form 2952 or Form 5471 with respect to N's 1982 annual accounting period. On June 1, 1983, the district director mailed notice to M of M's failure to file Form 2952 or Form 5471 with respect to N. On November 30, 1983, M filed a complete Form 5471 with respect to N's 1982 annual accounting period. Under paragraph (k)(1)(i) of this section, M is subject to a penalty of $1,000. Under paragraph (k)(1)(ii) of this section, that penalty is increased by $4,000 because the failure continued for 92 days (three full 30-day periods and a fraction of a fourth 30-day period) after the end of the 90-day period following mailing of the notice by the district director, bringing M's dollar amount penalty under paragraph (k)(1) of this section to $5,000. For purpose of determining the foreign tax credit available to M, there may be imposed a reduction of foreign tax paid by N of $6,000, which would be the total of reductions under paragraph (k)(2) of this section with respect to M's failure to file under section 6038 for N's 1982 annual accounting period, before application of paragraph (k)(2)(vi) of this section. Under said paragraph (k)(2)(vi), the amount of the foreign tax reduction imposed is reduced by the amount of the dollar amount penalty, leaving a foreign tax reduction penalty of $1,000 which may be imposed in addition to the $5,000 dollar amount penalty. If imposed, the $1,000 tax reduction would then be applied in the calculation of taxes deemed paid by M under section 902 as in example (1), items (c), (d), and (h).

[T.D. 8040, 50 FR 30163, July 24, 1985, as amended by T.D. 8573, 59 FR 64302, Dec. 14, 1994; T.D. 8733, 62 FR 53385, Oct. 14, 1997]

§ 1.6038A–0 Table of contents.

This section lists the captions that appear in the regulations under section 6038A.

§ 1.6038A–1 General requirements and definitions

(a) Purpose and scope.
(b) In general.
(c) Reporting corporation.
(1) In general.
(2) 25-percent foreign-owned.
(3) 25-percent foreign shareholder.
(i) In general.
(ii) Total voting power and value.
(iii) Direct 25-percent foreign shareholder.
(iv) Indirect 25-percent foreign shareholder.
(4) Application to prior open years.
(5) Exceptions.
(i) Treaty country residents having no permanent establishment.
(ii) Qualified exempt shipping income.
(iii) Status as a foreign related party.
(d) Related party.
(e) Attribution rules.
(1) Attribution under section 318.
(2) Attribution of transactions with related parties engaged in by a partnership.
(f) Foreign person.
(g) Foreign related party.
(h) Small corporation exception.
(i) Safe harbor for reporting corporations with related party transactions of *de minimis* value.
(1) In general.
(2) Aggregate value of gross payments made or received.
(j) Related reporting corporations.
(k) Consolidated return groups.
(1) Required information.
(2) Maintenance of records and authorization of agent.
(3) Monetary penalties.
(l) District Director.
(m) Examples.
(n) Effective dates.
(1) Section 1.6038A–1.
(2) Section 1.6038A–2.
(3) Section 1.6038A–3.
(4) Section 1.6038A–4.
(5) Section 1.6038A–5.
(6) Section 1.6038A–6.
(7) Section 1.6038A–7.

§ 1.6038A–2 Requirement of return

(a) Form 5472 required.
(1) In general.
(2) Reportable transaction.
(b) Contents of return.
(1) Reporting corporation.
(2) Related party.
(3) Foreign related party transactions for which only monetary consideration is paid or received by the reporting corporation.
(4) Foreign related party transactions involving nonmonetary consideration or less than full consideration.
(5) Additional information.
(6) Reasonable estimate.
(i) Estimate within 25 percent of actual amount.
(ii) Other estimates.
(7) Small amounts.
(8) Accrued payments and receipts.
(c) Method of reporting.
(d) Time and place for filing returns.
(e) Untimely filed return.
(f) Exceptions.
(1) No reportable transactions.
(2) Transactions solely with a domestic reporting corporation.
(3) Transactions with a corporation subject to reporting under section 6038.
(4) Transactions with a foreign sales corporation.
(g) Filing Form 5472 when transactions with related parties engaged in by a partnership are attributed to a reporting corporation.
(h) Effective dates for certain reporting corporations.

§ 1.6038A–3 Record maintenance

(a) General maintenance requirements.
(1) Section 6001 and section 6038A.
(2) Safe harbor.
(3) Examples.
(b) Other maintenance requirements.
(1) Indirectly related records.
(2) Foreign related party or third-party maintenance.
(3) Translation of records.
(4) Exception for foreign governments.
(c) Specific records to be maintained for safe harbor.
(1) In general.
(2) Descriptions of categories of documents to be maintained.
(i) Original entry books and transaction records.
(ii) Profit and loss statements.
(iii) Pricing documents.
(iv) Foreign country and third party filings.
(v) Ownership and capital structure records.
(vi) Records of loans, services, and other non-sales transactions.
(3) Material profit and loss statements.
(4) Existing records test.
(5) Significant industry segment test.
(i) In general.
(ii) Form of the statements.
(iii) Special rule for component sales.
(iv) Level of specificity required.
(v) Examples.
(6) High profit test.
(i) In general.
(ii) Return on assets test.
(iii) Additional rules.
(7) Definitions.
(i) U.S.-connected products or services.
(ii) Industry segment.

(iii) Gross revenue of an industry segment.
(iv) Identifiable assets of an industry segment.
(v) Operating profit of an industry segment.
(vi) Product.
(vii) Related products or services.
(viii) Model.
(ix) Product line.
(8) Example.
(i) Facts.
(ii) Existing records test.
(iii) Signficant industry segments.
(iv) High profit test.
(v) Material profit and loss statements.
(d) Liability for certain partnership record maintenance.
(e) Agreements with the District Director or the Assistant Commissioner (International).
(1) In general.
(2) Content of agreement.
(i) In general.
(ii) Significant industry segment test.
(iii) Example.
(3) Circumstances of agreement.
(4) Agreement as part of APA process.
(f) U.S. maintenance.
(1) General rule.
(2) Non-U.S. maintenance requirements.
(3) Prior taxable years.
(4) Scheduled production for high volume or other reasons.
(5) Required U.S. maintenance.
(g) Period of retention.
(h) Application of record maintenance rules to banks and other financial institutions. [Reserved]
(i) Effective dates.

§1.6038A–4 Monetary penalty

(a) Imposition of monetary penalty.
(1) In general.
(2) Liability for certain partnership transactions.
(3) Calculation of monetary penalty.
(b) Reasonable cause.
(1) In general.
(2) Affirmative showing required.
(i) In general.
(ii) Small corporations.
(iii) Facts and circumstances taken into account.
(c) Failure to maintain records or to cause another to maintain records.
(d) Increase in penalty where failure continues after notification.
(1) In general.
(2) Additional penalty for another failure.
(3) Cessation of accrual.
(4) Continued failures.
(e) Other penalties.
(f) Examples.
Example (1)—Failure to file Form 5472.
Example (2)—Failure to maintain records.
(g) Effective dates.

§1.6038A–5 Authorization of agent

(a) Failure to authorize.
(b) Authorization by related party.
(1) In general.
(2) Authorization for prior years.
(c) Foreign affiliated groups.
(1) In general.
(2) Application of noncompliance penalty adjustment.
(d) Legal effect of authorization of agent.
(1) Agent for purposes of commencing judicial proceedings.
(2) Foreign related party found where reporting corporation found.
(e) Successors in interest.
(f) Deemed compliance.
(1) In general.
(2) Reason to know.
(3) Effect of deemed compliance.
(g) Effective dates.

§1.6038A–6 Failure to furnish information

(a) In general.
(b) Coordination with treaties.
(c) Enforcement proceeding not required.
(d) *De minimis* failure.
(e) Suspension of statute of limitations.
(f) Effective dates.

§1.6038A–7 Noncompliance

(a) In general.
(b) Determination of the amount.
(c) Separate application.
(d) Effective dates.

[T.D. 8353, 56 FR 28060, June 19, 1991]

§1.6038A–1 General requirements and definitions.

(a) *Purpose and scope.* This section and §§1.6038A–2 through 1.6038A–7 provide rules for certain foreign-owned U.S. corporations and foreign corporations engaged in trade or business within the United States (reporting corporations) relating to information that must be furnished, records that must be maintained, and the authorization of the reporting corporation to act as agent for related foreign persons for purposes of sections 7602, 7603, and 7604 that must be executed. Section 6038A(a) and this section require that a reporting corporation furnish certain information annually and maintain certain records relating to transactions between the reporting corporation and certain related parties. This section also provides definitions of terms used in section 6038A. Section 1.6038A–2 provides guidance concerning the information to be submitted and the filing of the required return. Section 1.6038A–3 provides guidance concerning the maintenance of records. Section 1.6038A–4 provides guidance concerning the application of the monetary penalty for the failure either to furnish information or to maintain records. Section 1.6038A–5 provides guidance concerning the authorization of an agent for purposes of sections 7602, 7603, and 7604. Section 1.6038A–6 provides guidance concerning the failure to furnish information requested by a summons. Finally, § 1.6038A–7 provides guidance concerning the application of the noncompliance penalty for failure by the related party to authorize an agent or by the reporting corporation to substantially comply with a summons.

(b) *In general.* A reporting corporation must furnish the information described in § 1.6038A–2 by filing an annual information return (Form 5472 or any successor), and must maintain records as described in § 1.6038A–3.

(c) *Reporting corporation*—(1) *In general.* For purposes of section 6038A, a reporting corporation is either a domestic corporation that is 25-percent foreign-owned as defined in paragraph (c)(2) of this section, or a foreign corporation that is 25-percent foreign-owned and engaged in trade or business within the United States. After November 4, 1990, a foreign corporation engaged in a trade or business within the United States at any time during a taxable year is a reporting corporation. See section 6038C.

(2) *25-percent foreign-owned.* A corporation is 25-percent foreign-owned if it has at least one direct or indirect 25-percent foreign shareholder at any time during the taxable year.

(3) *25-percent foreign shareholder*—(i) *In general.* A foreign person is a 25-percent foreign shareholder of a corporation if the person owns at least 25 percent of—

(A) The total voting power of all classes of stock of the corporation entitled to vote, or

(B) The total value of all classes of stock of the corporation.

(ii) *Total voting power and value.* In determining whether one foreign person owns 25 percent of the total voting power of all classes of stock of a corporation entitled to vote or 25 percent of the total value of all classes of stock of a corporation, consideration will be given to all the facts and circumstances of each case, under principles similar to § 1.957–1(b)(2) (consideration of arrangements to shift formal voting power away from a foreign person).

(iii) *Direct 25-percent foreiqn shareholder.* A foreign person is a direct 25-percent foreign shareholder if it owns directly at least 25 percent of the stock of the reporting corporation, either by vote or by value.

(iv) *Indirect 25-percent foreign shareholder.* A foreign person is an indirect 25-percent foreign shareholder if it owns indirectly (or under the attribution rules of section 318 is considered to own indirectly) at least 25 percent of the stock of the reporting corporation, either by vote or by value.

(4) *Application to prior open years.* For taxable years beginning before July 11, 1989, the definition of a reporting corporation under this paragraph applies in determining whether a foreign-owned corporation is a reporting corporation. An examination may be reopened if the statute of limitations period for that taxable year has not expired. A taxable year may not be reopened under section 6038A for examination purposes if the taxable year is open under section 6511 only for purposes of the carryback of net operating losses or net capital losses.

(5) *Exceptions*—(i) *Treaty country residents having no permanent establishment.* A foreign corporation that has no permanent establishment in the United States under an applicable income tax convention is not a reporting corporation for purposes of section 6038A and this section. Accordingly, such a foreign corporation is not subject to §§ 1.6038A–2, 1.6038A–3, and 1.6038A–5. It must timely and fully provide the required notice to the Commissioner under section 6114. See section 6114 and the regulations thereunder for the notice that such a corporation must file and the applicable penalties for failure to file such notice.

(ii) *Qualified exempt shipping income.* A foreign corporation whose gross income is exempt from U.S. taxation under section 883 is not a reporting corporation provided that it timely and fully complies with the reporting requirements required to claim such exemption. In the event that such a corporation does not timely and fully comply with the reporting requirements under sections 887 and 883, it will be a reporting corporation subject to section 6038A, including the application of the monetary penalty for failure to file required information.

(iii) *Status as foreign related party.* Nothing in this paragraph affects the determination of whether a person is a foreign related party as defined in paragraph (g) of this section.

(d) *Related party.* The term ''related party'' means—

(1) Any direct or indirect 25-percent foreign shareholder of the reporting corporation,

(2) Any person who is related within the meaning of sections 267(b) or 707(b)(1) to the reporting corporation or to a 25-percent foreign shareholder of the reporting corporation, or

(3) Any other person who is related to the reporting corporation within the meaning of section 482 and the regulations thereunder. However, the term ''related party'' does not include any corporation filing a consolidated federal income tax return with the reporting corporation.

(e) *Attribution rules*—(1) *Attribution under section 318.* For purposes of determining whether a corporation is 25-percent foreign-owned and whether a person is a related party under section 6038A, the constructive ownership rules of section 318 shall apply, and the attribution rules of section 267(c) also shall apply to the extent they attribute ownership to persons to whom section 318 does not attribute ownership. However, ''10 percent'' shall be substituted for ''50 percent'' in section 318(a)(2)(C), and section 318(a)(3) (A), (B), and (C) shall not be applied so as to consider a U.S. person as owning stock that is owned by a person who is not a U.S. person. Additionally, section 318(a)(3)(C) and §1.318–1(b) shall not be applied so as to consider a U.S. corporation as being a reporting corporation if, but for the application of such sections, the U.S. corporation would not be 25-percent foreign owned.

(2) *Attribution of transactions with related parties engaged in by a partnership.* The transactions in which a domestic or foreign partnership engages shall be attributed to any reporting corporation whose interest in the capital or profits of the partnership, either directly or indirectly, combined with the interests of all related parties of the reporting corporation partner, equals 25 percent or more of the total partnership interests. Attribution of such transactions shall be made only to the extent of the partnership interest held by that reporting corporation partner. See sections 875 and 702(a) and the regulations thereunder. (Attribution shall not be made however, of transactions directly between the partnership and a reporting corporation.) Accordingly, a reporting corporation partner that is deemed to engage in transactions with related parties under this rule is subject to the information reporting requirements of §1.6038A–2, to the record maintenance requirements of §1.6038A–3, to the monetary penalty under §1.6038A–4, to the requirement of authorization of agent under §1.6038A–5, to the rules of §1.6038A–6 relating to the requirement to produce records, and to the noncompliance penalty adjustment under §1.6038A–7.

(f) *Foreign person.* For purposes of section 6038A, a foreign person is—

(1) Any individual who is not a citizen or resident of the United States, but not including any individual for whom an election under section 6013 (g) or (h) (relating to an election to file a joint return) is in effect;

(2) Any individual who is a citizen of any possession of the United States and who is not otherwise a citizen or resident of the United States;

(3) Any partnership, association, company, or corporation that is not created or organized in the United States or under the law of the United States or any State thereof;

(4) Any foreign trust or foreign estate, as defined in section 7701(a)(31); or

(5) Any foreign government (or agency or instrumentality thereof). To the extent that a foreign government is engaged in the conduct of commercial activity as defined under section 892 and the regulations thereunder, it will be treated as a foreign person under section 6038A and this section only for purposes of the information reporting

requirements of § 1.6038A–2. A foreign government will not be treated as a foreign related party for purposes of §§ 1.6038A–3 and 1.6038A–5.

For purposes of section 6038A, a possession of the United States shall be considered to be a foreign country.

(g) *Foreign related party.* A foreign related party is a foreign person as defined under paragraph (f) of this section that is also a related party as defined under paragraph (d) of this section.

(h) *Small corporation exception.* A reporting corporation that has less than $10,000,000 in U.S. gross receipts for a taxable year is not subject to §§ 1.6038A–3 and 1.6038A–5 for that taxable year. Such a corporation, however, remains subject to the information reporting requirements of § 1.6038A–2 and the general record maintenance requirements of section 6001. For purposes of this paragraph, U.S. gross receipts includes all amounts received or accrued to the extent that such amounts are taken into account for the determination and computation of the gross income of the corporation. For purposes of this test, the U.S. gross receipts of all related reporting corporations shall be aggregated.

(i) *Safe harbor for reporting corporations with related party transactions of de minimis value*—(1) *In general.* A reporting corporation is not subject to §§ 1.6038A–3 and 1.6038A–5 for any taxable year in which the aggregate value of all gross payments it makes to and receives from foreign related parties with respect to related party transactions (including monetary consideration, nonmonetary consideration, and the value of transactions involving less than full consideration), is not more than $5,000,000 and is less than 10 percent of its U.S. gross income. Such a corporation, however, remains subject to the information reporting requirements of § 1.6038A–2 and the general record maintenance requirements of section 6001. For purposes of this paragraph, U.S. gross income means the gross income reportable by the reporting corporation (or the aggregate gross income reportable by all related reporting corporations) for U.S. income tax purposes. Gross payments made to or received from foreign related parties cannot be netted; rather, the gross payments made to and received from foreign related parties are to be aggregated. Thus, for example, if a reporting corporation receives $4,700,000 of gross payments from a related party and makes $500,000 of gross payments to the same related party, it has aggregate gross payments of $5,200,000, and, therefore, does not qualify for the safe harbor under this paragraph.

(2) *Aggregate value of gross payments made or received.* The aggregate value of gross payments made to (or received from) a foreign related party with respect to foreign related party transactions is determined by totaling the dollar amounts of foreign related party transactions as described in § 1.6038A–2(b) (3) and (4) on all Forms 5472 filed by the reporting corporation or related reporting corporations.

(j) *Related reporting corporations.* A reporting corporation is related to another reporting corporation if it is related to that other reporting corporation under the principles described in paragraphs (d) and (e) of this section.

(k) *Consolidated return groups*—(1) *Required information.* If a reporting corporation is a member of an affiliated group for which a U.S. consolidated income tax return is filed, the return requirement of § 1.6038A–2 may be satisfied by filing a consolidated Form 5472. The common parent, as identified on Form 851, must attach a schedule to the consolidated Form 5472 stating which members of the U.S. affiliated group are reporting corporations under section 6038A, and which of those are joining in the consolidated Form 5472. The schedule must provide the name, address, and taxpayer identification number of each member whose transactions are included on the consolidated Form 5472. A member is not required to join in filing a consolidated Form 5472 merely because other members of the group choose to file one or more Forms 5472 on a consolidated basis.

(2) *Maintenance of records and authorization of agent.* Either the common parent or the principal operating company of an affiliated group filing a consolidated income tax return may be authorized under § 1.6038A–5 to act as the

agent for foreign related persons engaged in transactions with members of the group solely for purposes of section 7602, 7603, and 7604 under section 6038A(e)(1) and § 1.6038A–5. Each member of the group, however, must maintain the records required under section 6038A (a) and § 1.6038A–3 relating to its related party transactions.

(3) *Monetary penalties.* The common parent (or principal operating company) and all reporting corporations that join in the filing of a consolidated Form 5472 are liable jointly and severally for penalties for failure to file Form 5472 and for failure to mantain records under section 6038A(d) and § 1.6038A–4(e). See § 1.1502–77(a) regarding the scope of agency of the common parent corporation.

(l) *District Director.* For purposes of the regulations under section 6038A, the term ''District Director'' means any District Director, or the Assistant Commissioner (International) when performing duties similar to those of a District Director with respect to any person over which the Assistant Commissioner (International) has appropriate jurisdiction.

(m) *Examples.* The following examples illustrate the rules of this section.

Example 1. P, a U.S. partnership that is engaged in a U.S. trade or business, is 75 percent owned by FC1, a foreign corporation that, in turn, is wholly owned by another foreign corporation, FC2. The remaining 25 percent of P is owned by Corp, a domestic corporation, that is wholly owned by FC3. P engages in transactions solely with FC2 and FC3. These transactions are attributed to FC1 and Corp. Under section 875, FC1 is considered as being engaged in a U.S. trade or business. For purposes of section 6038A and this section, FC1 and Corp are reporting corporations and must report their pro rata shares of the value of the transactions with FC2 and FC3. Thus, Corp must report 25 percent of P's transactions with FC3 and FC1 must report 75 percent of P's transactions with FC2.

Example 2. FC2 and FC3 are both foreign corporations that are wholly owned by FC1, also a foreign corporation. FC2 engages in a trade or business in the United States through a branch. The branch engages in related party transactions with FC1. FC2 is a reporting corporation. FC3 is a foreign related party. FC1 is a direct 25-percent foreign shareholder of both FC2 and FC3. Neither FC1 nor FC3 is a reporting corporation.

Example 3. FC1 owns 25 percent of total voting power in each of FC2 and FC3. FC2 and FC3 each own 20 percent of the total voting power of Corp, a domestic corporation. The remaining stock of Corp is owned by an unrelated domestic corporation. Neither FC2 nor FC3 is engaged in a U.S. trade or business. Under section 318(a)(2)(C) and paragraph (e) of this section, FC1 constructively owns its proportionate share of the stock of Corp owned directly by FC2 and FC3. Thus, FCl is treated as constructively owning five percent of Corp through each of FC2 and FC3 or a total of 10 percent of the Corp stock. Consequently, Corp is not a reporting corporation because no 25 percent shareholder exists.

Example 4. FP owns 100 percent of FCl which, in turn, owns 100 percent of FC2. FC2 owns 100 percent of FC3 which owns 100 percent of RC. FP, FC1, and FC2 are indirect 25-percent foreign shareholders of RC, and FC3 is a direct 25-percent foreign shareholder.

Example 5. FP owns 100 percent of USS, a U.S. corporation, and 25 percent of FS, a foreign corporation. The remaining 75 percent of FS is publicly owned by numerous small shareholders. Sales transactions occur between USS and FS. Applying the rules of this section, USS is a reporting corporation. It is determined that USS and FS are each controlled by FP under section 482 and the regulations thereunder. Therefore, FS is related to USS within the meaning of section 482 and is a related party to USS. Accordingly, the sales transactions between USS and FS are subject to section 6038A.

Example 6. The facts are the same as in *Example 5,* except that the remaining 75 percent of FS is owned by one shareholder that is unrelated to the FP group and it is determined that FS is not controlled by FP for purposes of section 482. Under these facts, FS is not a related party of either FP or USS. Accordingly, section 6038A does not apply to the sales transactions between FS and USS.

Example 7. P, a U.S. multinational, is a holding company that wholly owns X, a U.S. operating company, which in turn wholly owns FS, a controlled foreign corporation. Applying the rule of section 318(a)(3)(C), FS is deemed to own the stock of X that is actually held by P. However, under the rules of paragraph (e) of this section, X will not be a reporting corporation by reason of section 318.

(n) *Effective dates*—(1) *Section 1.6038A–1.* Paragraphs (c) (relating to the definition of a reporting corporation), (d) (relating to the definition of a related party), (e)(1) (relating to the application of section 318), and (f) (relating to the definition of a foreign person) of this section are effective for taxable Years beginning after July 10, 1989. The remaining paragraphs of this section are effective December 10, 1990, without regard to when the taxable year began.

(2) *Section 1.6038A–2.* Section 1.6038A–2 (relating to the requirement to file Form 5472) is generally effective for taxable years beginning after July 10, 1989. However, § 1.6038A–2 as it applies to reporting corporations whose sole trade or business in the United States is a banking, financing, or similar business as defined in § 1.864–4(c)(5)(i) is effective for taxable years beginning after December 10, 1990.

(3) *Section 1.6038A–3.* Section 1.6038A–3 (relating to the record maintenance requirement) is generally effective December 10, 1990. However, records described in § 1.6038A–3 in existence on or after March 20, 1990, must be maintained, without regard to when the taxable year to which the records relate began.

(4) *Section 1.6038A–4.* Section 1.6038A–4 (relating to the monetary penalty) is generally effective for taxable years beginning after July 10, 1989, for the failure to file Form 5472. For the failure to maintain records or the failure to produce documents under § 1.6038A–4(f)(2), the section is effective December 10, 1990, without regard to when the taxable year to which the records relate began.

(5) *Section 1.6038A–5.* Section 1.6038A–5 (relating to the authorization of agent requirement) is effective December 10, 1990, without regard to when the taxable year to which the records relate began.

(6) *Section 1.6038A–6.* Section 1.6038A–6 (relating to the failure to furnish information under a summons) is effective November 6, 1990, without regard to when the taxable year to which the summons relates began.

(7) *Section 1.6038A–7.* Section 1.6038A–7 (relating to the noncompliance penalty adjustment) is effective December 10, 1990, without regard to when the taxable year began.

[T.D. 8353, 56 FR 28061, June 19, 1991; T.D. 8353, 56 FR 41792, Aug. 23, 1991]

§ 1.6038A–2 Requirement of return.

(a) *Form 5472 required*—(1) *In general.* Each reporting corporation as defined in § 1.6038A–1(c) (or members of an affiliated group filing together as described in § 1.6038A–1(k)) shall make a separate annual information return on Form 5472 with respect to each related party as defined in § 1.6038A–1(d) with which the reporting corporation (or any group member joining in a consolidated Form 5472) has had any reportable transaction during the taxable year. The information required by section 6038A and this section must be furnished even though it may not affect the amount of any tax due under the Code.

(2) *Reportable transaction.* A reportable transaction is any transaction of the types listed in paragraphs (b) (3) and (4) of this section. However, if neither party to the transaction is a United States person as defined in section 7701(a)(30) and the transaction—

(i) Will not generate in any taxable year gross income from sources within the United States or income effectively connected, or treated as effectively connected, with the conduct of a trade or business within the United States, and

(ii) Will not generate in any taxable year any expense, loss, or other deduction that is allocable or apportionable to such income, the transaction is not a reportable transaction.

(b) *Contents of return*—(1) *Reporting corporation.* Form 5472 must provide the following information in the manner the form prescribes with respect to each reporting corporation:

(i) Its name, address (including mailing code), and U.S. taxpayer identification number; each country in which the reporting corporation files an income tax return as a resident under the tax laws of that country; its country or countries of organization, and incorporation; its total assets for U.S. reporting corporation; the places where it conducts its business; and its principal business activity.

(ii) The name, address, and U.S. taxpayer identification number, if applicable, of all its direct and indirect 25-percent foreign shareholders (for an indirect 25-percent foreign shareholder, explain the attribution of ownership); each country in which each 25-percent foreign shareholder files an income tax return as a resident under the tax laws of that country; the places where each 25-percent shareholder conducts its business; and the country or countries of organization, citizenship, and incorporation of each 25-percent foreign shareholder.

(iii) The number of Forms 5472 filed for the taxable year and the aggregate value in U.S. dollars of gross payments as defined in §1.6038A–1(h)(2) made with respect to all foreign related party transactions reported on all Forms 5472.

(2) *Related party.* The reporting corporation must provide information on Form 5472, set forth in the manner the form prescribes, about each related party, whether foreign or domestic, with which the reporting corporation had a transaction of the types described in paragraphs (b) (3) and (4) of this section during its taxable year, including the following information:

(i) The name, U.S. taxpayer identification number, if applicable, and address of the related party.

(ii) The nature of the reated party's business and the principal place or places where it conducts its business.

(iii) Each country in which the related party files an income tax return as a resident under the tax laws of that country.

(iv) The relationship of the reporting corporation to the related party.

(3) *Foreign related party transactions for which only monetary consideration is paid or received by the reporting corporation.* If the related party is a foreign person, the reporting corporation must set forth on Form 5472 the dollar amounts of all reportable transactions for which monetary consideration (including U.S. and foreign currency) was the sole consideration paid or received during the taxable year of the reporting corporation. The total amount of such transactions, as well as the separate amounts for each type of transaction described below, must be reported on Form 5472, in the manner the form prescribes. Where actual amounts are not determinable, a reasonable estimate (as described in paragraph (b)(6) of this section) is permitted. The types of transactions described in this paragraph are:

(i) Sales and purchases of stock in trade (inventory);

(ii) Sales and purchases of tangible property other than stock in trade;

(iii) Rents and royalties paid and received (other than amounts reported under paragraph (b)(3)(iv) of this section);

(iv) Sales, purchases, and amounts paid and received as consideration for the use of all intangible property, including (but not limited to) copyrights, designs, formulas, inventions, models, patents, processes, trademarks, and other similar intangible property rights;

(v) Consideration paid and received for technical, managerial, engineering, construction, scientific, or other services;

(vi) Commissions paid and received;

(vii) Amounts loaned and borrowed (except open accounts resulting from sales and purchases reported under other items listed in this paragraph (b)(3) that arise and are collected in full in the ordinary course of business);

(viii) Interest paid and received;

(ix) Premiums paid and received for insurance and reinsurance; and

(x) Other amounts paid or received not specifically identified in this paragraph (b)(3) to the extent that such amounts are taken into account for the determination and computation of the taxable income of the reporting corporation.

Amounts required to be reported under paragraph (b)(3)(vii) of this section shall be reported as monthly averages or outstanding balances at the beginning and end of the taxable year, as the form shall prescribe.

(4) *Foreign related party transactions involving nonmonetary consideration or less than full consideration.* If the related party is a foreign person, the reporting corporation must provide on Form 5472 a description of any reportable transaction, or group of reportable transactions, listed in paragraph (b)(3) of this section, for which any part of the consideration paid or received was not monetary consideration, or for which less than full consideration was paid or received. A description required under paragraph (b)(4) of this section shall include sufficient information from which to determine the nature and approximate monetary value of the transaction or group of transactions, and shall include:

(i) A description of all property (including monetary consideration), rights, or obligations transferred from the reporting corporation to the foreign related party and from the foreign related party to the reporting corporation;

(ii) A description of all services performed by the reporting corporation for the foreign related party and by the foreign related party for the reporting corporation; and

(iii) A reasonable estimate of the fair market value of all properties and services exchanged, if possible, or some other reasonable indicator of value.

If, for any transaction, the entire consideration received includes both tangible and intangible property and the consideration paid is solely monetary consideration, the transaction should be reported under paragraph (b)(3) of this section if the intangible property was related and incidental to the transfer of the tangible property (for example, a right to warranty services.)

(5) *Additional information.* In addition to the information required under paragraphs (b) (3) and (4) of this section, a reporting corporation must provide on Form 5472, in the manner the form prescribes, the following information:

(i) If the reporting corporation imports goods from a foreign related party, whether the costs taken into account in computing the basis or inventory cost of such goods are greater than the costs taken into account in computing the valuation of the goods for customs purposes, adjusted pursuant to section 1059A and the regulations thereunder, and if so, the reasons for the difference.

(ii) If the costs taken into account in computing the basis or inventory cost of such goods are greater than the costs taken into account in computing the valuation of the goods for customs purposes, whether the documents supporting the reporting corporation's treatment of the items set forth in paragraph (b)(5)(i) of this section are in existence and available in the United States at the time Form 5472 is filed.

(6) *Reasonable estimate*—(i) *Estimate within 25 percent of actual amount.* Any amount reported under this section is considered to be a reasonable estimate if it is at least 75 percent and not more than 125 percent of the actual amount.

(ii) *Other estimates.* If any amount reported under this paragraph (b) of this section fails to meet the reasonable estimate test of paragraph (b)(6)(i) of this section, the reporting corporation nevertheless may show that such amount is a reasonable estimate by making an affirmative showing of relevant facts and circumstances in a written statement containing a declaration that it is made under the penalties of perjury. The District Director shall determine whether the amount reported was a reasonable estimate.

(7) *Small amounts.* If any actual amount required under this section does not exceed $50,000, the amount may be reported as ''$50,000 or less.''

(8) *Accrued payments and receipts.* For purposes of this section, in the case of an accrual basis taxpayer, the terms ''paid'' and ''received'' shall include accrued payments and receipts, respectively.

(c) *Method of reporting.* All statements required on or with the Form 5472 under this section and § 1.6038A–5 shall be in the English language. All amounts required to be reported under paragraph (b) of this section shall be expressed in United States currency, with a statement of the exchange rates used.

(d) *Time and place for filing returns.* A Form 5472 required under this section shall be filed with the reporting corporation's income tax return for the taxable year by the due date (including extensions) of that return. A duplicate Form 5472 (including any attachments and schedules) shall be filed at the same time with the Internal Revenue Service Center, Philadelphia, PA 19255.

(e) *Untimely filed return.* If the reporting corporation's income tax return is untimely filed, Form 5472 (with a duplicate to Philadelphia) nonetheless shall be timely filed at the service center where the return is due. When the income tax return is ultimately filed, a copy of Form 5472 must be attached.

(f) *Exceptions*—(1) *No reportable transactions.* A reporting corporation is not required to file Form 5472 if it has no transactions of the types listed in paragraphs (b) (3) and (4) of this section during the taxable year with any related party.

(2) *Transactions solely with a domestic reporting corporation.* If all of a foreign reporting corporation's reportable transactions are with one or more related domestic reporting corporations that are not members of the same affiliated group, the foreign reporting corporation shall furnish on Form 5472 only the information required under paragraphs (b) (1) and (2) of this section, if the domestic reporting corporations provide the information required under paragraphs (b) (3) through (5) of this section. Such a foreign reporting corporation nonetheless is subject to the record maintenance requirements of §1.6038A–3 and the requirements of §§1.6038A–5 and 1.6038A–6. The name, address, and taxpayer identification number of each domestic reporting corporation that provided such information must be indicated on Form 5472 in the space provided for the information under paragraphs (b) (1) and (2) of this section.

(3) *Transactions with a corporation subject to reporting under section 6038.* A reporting corporation is not required to make a return of information on Form 5472 with respect to a related foreign corporation for a taxable year for which a U.S. person that controls the foreign related corporation makes a return of information on Form 5471 that is required under section 6038 and this section, if that return contains information required under §1.6038–2(f)(11) with respect to the reportable transactions between the reporting corporation and the related corporation for that taxable year. Such a reporting corporation also is not subject to §§1.6038A–3 and 1.6038A–5. It remains subject to the general record maintenance requirements of section 6001.

(4) *Transactions with a foreign sales corporation.* A reporting corporation is not required to make a return of information on Form 5472 with respect to a related corporation that qualifies as a foreign sales corporation for a taxable year for which the foreign sales corporation files Form 1120–FSC.

(g) *Filing Form 5472 when transactions with related parties engaged in by a partnership are attributed to a reporting corporation.* If transactions engaged in by a partnership are attributed under §1.6038A–1(e)(2) to a reporting corporation, the reporting corporation need report on Form 5472 only the percentage of the value of the transaction or transactions equal to the percentage of its partnership interest. Thus, for example, if a partnership buys $1000 of widgets from the foreign parent of a reporting corporation whose partnership interest in the partnership equals 50 percent of the partnership interests (and the remaining 50 percent is held by unrelated parties), the reporting corporation must report $500 of purchases from a foreign related party on Form 5472.

(h) *Effective dates for certain reporting corporations.* For effective dates for this section, see §1.6038A–1(n).

[T.D. 8353, 56 FR 28063, June 19, 1991]

§1.6038A–3 Record maintenance.

(a) *General maintenance requirements*—(1) Section 6001 and section 6038A. A reporting corporation must keep the permanent books of account or records as required by section 6001 that are sufficient to establish the correctness of the federal income tax return of the corporation, including information, documents, or records (''records'') to the extent they may be relevant to determine the correct U.S. tax treatment of transactions with related parties. Under section 6001, the District Director may require any person to make such returns, render such statements, or keep such specific records as will enable the District Director to determine whether or not that person is liable for any of the taxes to which the regulations under part I have application. See section 6001 and the regulations thereunder. Such records must be permanent, accurate, and complete, and must clearly establish income, deductions, and credits. Additionally, in appropriate cases, such records include sufficient relevant cost data from which a profit and loss statement may be prepared for products or services transferred between a reporting corporation and its foreign related parties. This requirement includes records of the reporting corporation itself, as well as to records of any foreign related party that may be relevant to determine the correct U.S. tax treatment of transactions between the reporting corporation and foreign related parties. The relevance of such records with respect to related party transactions shall be determined upon the basis of all the facts and circumstances. Section 6038A and this section provide detailed guidance regarding the required maintenance of records with respect to such transactions and specify penalties for noncompliance. Banks and other financial institutions shall follow the specific record maintenance rules described in paragraph (h) of this section.

(2) *Safe harbor.* A safe harbor for record maintenance is provided under paragraph (c) of this section, which sets forth detailed guidance concerning the types of records to be maintained with respect to related party transactions. The safe harbor consists of an all-inclusive list of record types that could be relevant to different taxpayers under a variety of facts and circumstances. It does not constitute a checklist of records that every reporting corporation must maintain or that generally should be requested by the Service. A specific reporting corporation is required to maintain, and the Service will request, only those records enumerated in the safe harbor (including material profit and loss statements) that may be relevant to its business or industry and to the correct U.S. tax treatment of its transactions with its foreign related parties. Accordingly, not every item listed in the safe harbor must be maintained by every reporting corporation. A corporation that maintains or causes another person to maintain the records listed in paragraph (c)(2) of this section that may be relevant to its foreign related party transactions and to its business or industry will be deemed to have met the record maintenance requirements of section 6038A.

(3) *Examples.* The following examples illustrate the rules of this paragraph.

Example 1. RC, a U.S. reporting corporation, is owned by two shareholders, F and P. F is a foreign corporation that owns 30 percent of the stock of RC. P is a domestic corporation that owns the remaining 70 percent. RC purchases tangible property from F; however, the only potential audit issue with respect to these transactions is their treatment under section 482. It is determined that F does not in fact control RC and the two corporations do not constitute a group of ‘‘controlled taxpayers’’ for purposes of section 482 and the regulations thereunder. There are no other reportable transactions between RC and F. Under § 1.6038A–1(g), F is a foreign related party with respect to RC. Accordingly, RC is required to report its purchases of property from F under the reporting requirements of § 1.6038A–2. Nevertheless, because section 482 is not applicable to the transactions between RC and F, the records created by F with respect to its sales to RC are not relevant for purposes of determining the correct tax treatment of these transactions. RC is required to maintain its own records of these transactions under the requirements of section 6001, but the transactions are not subject to the record maintenance requirements of this section. If, however, on audit it is determined that F does control RC, all records relevant to determining the arm’s length consideration for the tangible property under section 482 will be subject to these requirements.

Example 2. FP, a foreign person, owns 30 percent of the stock of RC, a reporting corporation. The remaining 70 percent of RC stock is held by persons that are not 25-percent foreign shareholders. It is determined that FP is related to RC within the meaning of section 482 and the regulations thereunder. The only transactions between FP and RC are FP’s capital contributions, dividends paid from RC to FP, and loans from FP to RC. Under section 6001, RC is required to maintain all documentation necessary to establish the U.S. tax treatment of the capital contributions, dividends, and loans. RC is not required to maintain records in other categories listed in paragraph (c)(3) of this section because they are not relevant to the transactions between FP and RC. Records of FP not related to these transactions are not subject to the record maintenance requirements under section 6038A(a) and this section.

Example 3. G, a foreign multinational group, creates Sub, a wholly-owned U.S. subsidiary, in order to purchase tangible property from unrelated parties in the United States and resell such property to G. The property purchased by Sub is either used in G’s business or resold to other unrelated parties by G. Sub’s sole function is to act as a buyer for G and these purchases are the only transactions that G has with any U.S. affiliates. Under all the facts and circumstances of this case, it is determined that an analysis of the group’s worldwide profit attributable to the property it purchases from Sub is not relevant for purposes of determining the tax treatment of the sales from Sub to G. Therefore, the records with respect to the profitability of G are not subject to the record maintenance requirements of this section.

However, all records related to the appropriate method under section 482 for determining an arm's-length consideration for the property sold by Sub to G are subject to the record maintenance requirements of this section.

Example 4. S, a U.S. reporting corporation, is the purchasing agent for its multinational parent group. It arranges for the purchase and export of miscellaneous tangible property to X, Y, and Z, each of which is a foreign related party. The miscellaneous tangible property is purchased from unrelated third parties for resale to X, Y, and Z. These resales of miscellaneous tangible property constitute the sole transactions between S and X, Y, and Z. The purchasing agent activity of S is not an integral part of the business activity of S or of any beneficiary of the purchasing agent services provided by S as defined in §1.482–2(b)(7). Under §1.482–2(b)(7), the arm's-length charge is deemed to be equal to the costs or deductions incurred with respect to the provision of the purchasing agent services. S is required to maintain records to permit verification upon audit of such costs or deductions. The records of X, Y, and Z are not relevant to the costs or deductions incurred by S with respect to its purchasing agent activities. Therefore, under section 6038A and this section, only the records maintained by S that permit verification of the costs and deductions of the purchasing agent services are relevant. Accordingly, solely with respect to these transactions, records of X, Y, and Z need not be maintained under section 6038A or this section. If, however, upon audit, it is determined that S is not merely engaging in services not integral to its business as defined in §1.482–2(b)(7), the record maintenance requirements under section 6038A(a) and this section will be applicable to the records of S, X, Y and Z to the extent that such records are relevant for determining the correct tax treatment of transactions engaged in by X, Y, or Z with S. If S has other transactions with X, S must maintain or cause to be maintained records that may be relevant with respect to those transactions.

(b) *Other maintenance requirements*—(1) *Indirectly related records.* This section applies to records that are directly or indirectly related to transactions between the reporting corporation and any foreign related parties. An example of records that are indirectly related to such transactions is records possessed by a foreign subsidiary of a foreign related party that document the raw material or component costs of a product that is manufactured or assembled by the subsdiary and sold as a finished product by the foreign related party to the reporting corporation.

(2) *Foreign related party or third-party maintenance.* If records that are required to be maintained under this section are in the control of a foreign related party, the records may be obtained or compiled (if not already in the possession of the foreign related party or already compiled) under the direction of the reporting corporation and then maintained by the reporting corporation, the foreign related party, or a third party. Thus, for example, a foreign related party may either itself maintain such records outside the United States or permit a third party to maintain such records outside the United States, provided that the conditions described in paragraph (f) of this section are met. Upon a request for such records by the Service, a foreign related party or third party may make arrangements with the District Director to furnish the records directly, rather than through the reporting corporation.

(3) *Translation of records.* When records are provided to the Service under a request for production, any portion of such records must be translated into the English language within 30 days of a request for translation of that portion by the District Director. To the extent that any requested documents are identical to documents that have already been translated, an explanation of how such documents are identical instead may be provided. An extension of this time period may be requested under paragraph (f)(4) of this section. Appropriate extensions will be liberally granted for translation requests where circumstances warrant. If a good faith effort is made to translate accurately the requested documents within the specified time period, the reporting corporation will not be subject to the penalties in §§1.6038A–4 and 1.6038A–7.

(4) *Exception for foreign governments.* A foreign government is not subject to the obligation to maintain records under this section.

(5) *Records relating to conduit financing arrangements.* See §1.881–4 relating to conduit financing arrangements.

(c) *Specific records to be maintained for safe harbor*—(1) *In general.* A reporting corporation that maintains or causes another person to maintain the records specified in this paragraph (c) that are relevant to its business or industry and to the correct U.S. tax treatment of its transactions with its foreign related parties will deemed to have met the record maintenance requirements of this section. This paragraph provides general descriptions of the categories of records to be maintained; the particular title or label applied by a reporting corporation or related party does not control. Functional equivalents of the specified documents are acceptable. Record maintenance in accordance with this safe harbor, however, requires only the maintenance of types of documents described in paragraph (c)(2) of this section that are directly or indirectly related to transactions between the reporting corporation and any foreign related party. Additionally, to the extent the reporting corporation establishes that records in a particular category are not applicable to the industry or business of the reporting corporation and any foreign related party, maintenance of such records is not required under this paragraph. Record maintenance in accordance with this paragraph (c) generally does not require the original creation of records that are ordinarily not created by the reporting corporation or its related parties. (If, however, a document that is actually created is described in this paragraph (c), it is to be maintained even if the document is not of the type ordinarily created by the reporting corporation or its related parties.) There are two exceptions to the rule. First, basic accounting records that are sufficient to document the U.S. tax effects of transactions between related parties must be created and retained, if they do not otherwise exist. Second, records sufficient to produce material profit and loss statements as described in paragraphs (c)(2)(ii) and (3) of this section that are relevant for determining the U.S. tax treatment of transactions between the reporting corporation and foreign related parties must be created if such records are not ordinarily maintained. All internal records storage and retrieval systems used for each taxable year must be retained.

(2) *Descriptions of categories of documents to be maintained.* The following records must be maintained in order to satisfy this paragraph (c) to the extent they may be relevant to determine the correct U.S. tax treatment of transactions between the reporting corporation and any foreign related party.

(i) *Original entry books and transaction records.* This category includes books and records of original entry or their functional equivalents, however designated or labelled, that are relevant to transactions between any foreign related party and the reporting corporation. Examples include, but are not limited to, general ledgers, sales journals, purchase order books, cash receipts books, cash disbursement books, canceled checks and bank statements, workpapers, sales contracts, and purchase invoices. Descriptive material to explicate entries in the foregoing types of records, such as a chart of accounts or an accounting policy manual, is included in this category.

(ii) *Profit and loss statements.* This category includes records from which the reporting corporation can compile and supply, within a reasonable time, material profit and loss statements of the reporting corporation and all related parties as defined in § 1.6038A–1(d) (the ‘‘related party group’’) that reflect profit or loss of the related party group attributable to U.S.-connected products or services as defined in paragraph (c)(7)(i) of this section. The determination of whether a profit and loss statement is material is made under the rules provided in paragraph (c)(3) of this section. The material profit and loss statements described in this paragraph (c)(2)(ii) must reflect the consolidated revenue and expenses of all members of the related party group. Thus, records in this category include the documentation of the cost of raw materials used by a related party to manufacture finished goods that are then sold by another related party to the reporting corporation. The records should be kept under U.S. generally accepted accounting principles if they are ordinarily maintained in such manner; if not, an explanation of the material differences between the accounting principles used and U.S. generally accepted accounting principles must be made available. The statements need not reflect tracing of the actual costs borne by the group with respect to its U.S.-connected products or services; rather, any reasonable method may be used to allocate the group's worldwide costs to the revenues generated by the sales of those products or services. An explanation of the methods used to allocate specific items to a particular profit and loss statement must be made available. The explanation of material differences between accounting principles and the explanation of allocation methods must be sufficient to permit a comparison of the profitability of the group to that of the reporting corporation attributable to the provision of U.S.-connected products or services.

(iii) *Pricing documents.* This category includes all documents relevant to establishing the appropriate price or rate for transactions between the reporting corporation and any foreign related party. Examples include, but are not limited to, documents related to transactions involving the same or similar products or services entered into by the reporting corporation or a foreign related party with related and unrelated parties; shipping and export documents; commission agreements; documents relating to production or assembly facilities; third-party and intercompany purchase invoices; manuals, specifications, and similar documents relating to or describing the performance of functions conducted at particular locations; intercompany correspondence discussing any instructions or assistance relating to such transactions provided to the reporting corporations by the related foreign person (or vice versa); intercompany and intracompany correspondence concerning the price or the negotiation of the price used in such transactions; documents related to the value and ownership of intangibles used or developed by the reporting corporation or the foreign related party; documents related to cost of goods sold and other expenses; and documents related to direct and indirect selling, and general and administrative expenses (for example, relating to advertising, sales promotions, or warranties).

(iv) *Foreign country and third party filings.* This category includes financial and other documents relevant to transactions between a reporting corporation and any foreign related party filed with or prepared for any foreign government entity, any independent commission, or any financial institution.

(v) *Ownership and capital structure records.* This category includes records or charts showing the relationship between the reporting corporation and the foreign related party; the location, ownership, and status (for example, joint venture, partnership, branch, or division) of all entities and offices directly or indirectly involved in the transactions between the reporting corporation and any foreign related party; a worldwide organization chart; records showing the management structure of all foreign affiliates; and loan documents, agreements, and other documents relating to any transfer of the stock of the reporting corporation that results in the change of the status of a foreign person as a foreign related party.

(vi) *Records of loans, services, and other non-sales transactions.* This category includes relevant documents relating to loans (including all deposits by one foreign related party or reporting corporation with an unrelated party and a subsequent loan by that unrelated party to a foreign related party or reporting corporation that is in substance a direct loan between a reporting corporation and a foreign related party); guarantees of a foreign related party of debts of the reporting corporation, and vice versa; hedging arrangements or other risk shifting or currency risk shifting arrangements involving the reporting corporation and any foreign related party; security agreements between the reporting corporation and any foreign related party; research and development expense allocations between any foreign related party and the reporting corporation; service transactions between any foreign related party and the reporting corporation, including, for example, a description of the allocation of charges for management services, time or travel records, or allocation studies; import and export transactions between a reporting corporation and any foreign related party; the registration of patents and copyrights with respect to transactions between the reporting corporation and any foreign related party: and documents regarding lawsuits in foreign countries that relate to such transactions between a reporting corporation and any foreign related party (for example, product liability suits for U.S. products).

(vii) *Records relating to conduit financing arrangements.* See § 1.881–4 relating to conduit financing arrangements.

(3) *Material profit and loss statements.* For purposes of paragraph (c)(2)(ii) of this section, the determination of whether a profit and loss statement is material will be made according to the following rules. An agreement between the reporting corporation and the District Director as described in paragraph (e) of this section may identify material profit and loss statements of the related party group and describe the items to be included in any profit and loss statements for which records are to be maintained to satisfy the requirements of paragraph (c)(2)(ii) of this section. In the absence of such an agreement, a profit and loss statement will be material if it meets any of the following tests: the existing records test described in paragraph (c)(4) of this section, the significant industry segment test described in paragraph (c)(5) of this section, or the high profit test described in paragraph (c)(6) of this section.

(4) *Existing records test.* A profit and loss statement is material under the existing records test described in this paragraph (c)(4) if any member of the related party group creates or compiles such statement in the course of its business operations and the statement reflects the profit or loss of the related party group attributable to the provision of U.S.-connected products or services (regardless of whether the profit and loss attributable to U.S.-connected products or services is shown separately or included within the calculation of aggregate figures on the statement). For example, a profit and loss statement is described in this paragraph if it was produced for internal accounting or management purposes, or for disclosure to shareholders, financial institutions, government agencies, or any other persons. Such existing statements and the records from which they were complied (to the extent such records relate to profit and loss attributable to U.S.-connected products or services) are subject to the record maintenance requirements described in paragraph (c)(2)(ii) of this section.

(5) *Significant industry segment test*—(i) *In general.* A profit and loss statement is material under the significant industry segment test described in this paragraph (c)(5) if—

(A) The statement reflects the profit or loss of the related party group attributable to the group's provision of U.S.-connected products or services within a single industry segment (as defined in paragraph (c)(7)(ii) of this section);

(B) The worldwide gross revenue attributable to such industry segment is 10 percent or more of the worldwide gross revenue attributable to the group's combined industry segments; and

(C) The amount of gross revenue earned by the group from the provision of U.S.-connected products or services within such industry segment is $25 million or more in the taxable year.
