Example 2. Assume the same facts as in *Example (1)* except that for taxable year 1977, A and his wife file separate returns. Because A and his wife reside together, the commencement of work by both is considered a single commencement of work under subdivision (iv) of this subparagraph. A is permitted to deduct with respect to his commencement of work in Washington up to $1,500 of the expenses described in subparagraphs (C), (D), and (E) of section 217(b)(1) of which the expenses described in subparagraphs (C) and (D) cannot exceed $750. A is not permitted to deduct any of the expenses described in subparagraphs (C), (D), and (E) of section 217(b)(1) paid by his wife in connection with her commencement of work at a new principal place of work. A's wife is permitted to deduct with respect to her commencement of work in Baltimore up to $1,500 of the expenses described in subparagraphs (C), (D), and (E) of section 217(b)(1) that are paid by her of which the expenses described in subparagraphs (C) and (D) cannot exceed $750. A's wife is not permitted to deduct any of the expenses described in subparagraphs (C), (D), and (E) of section 217(b)(1) paid by A in connection with his commencement of work in Washington, DC.

Example 3. Assume the same facts as in *Example (1)* except that A and his wife take up separate residences in Washington and Baltimore, do not reside together during the entire taxable year, and have no specific plans to reside together. The commencement of work by A in Washington, DC, and by his wife in Baltimore are considered separate commencements of work since their principal places of work are not treated as being in the same general location. If A and his wife file a joint return for taxable year 1977, the moving expenses described in subparagraphs (C), (D), and (E) of section 217(b)(1) paid in connection with the commencement of work by A in Washington, DC, and his wife in Baltimore, MD, are subject to an overall limitation of $6,000 of which the expenses described in subparagrahs (C) and (D) cannot exceed $3,000. If A and his wife file separate returns for taxable year 1977, A may deduct up to $3,000 of the expenses described in subparagraphs (C), (D), and (E) of which the expenses described in subparagraphs (C) and (D) cannot exceed $1,500. A's wife may deduct up to $3,000 of the expenses described in subparagraphs (C), (D), and (E) of which the expenses described in subparagraphs (C) and (D) cannot exceed $1,500.

(10) *Individuals other than taxpayer.* (i) In addition to the expenses set forth in subparagraphs (A) through (D) of section 217(b)(1) attributable to the taxpayer alone, the same type of expenses attributable to certain individuals other than the taxpayer, if paid or incurred by the taxpayer, are deductible. These other individuals must be members of the taxpayer's household, and have both the taxpayer's former residence and his new residence as their principal place of abode. A member of the taxpayer's household includes any individual residing at the taxpayer's residence who is neither a tenant nor an employee of the taxpayer. Thus, for example, a member of the taxpayer's household may not be an individual such as a servant, governess, chauffeur, nurse, valet, or personal attendant. However, for purposes of this paragraph, a tenant or employee will be considered a member of the taxpayer's household where the tenant or employee is a dependent of the taxpayer as defined in section 152.

(ii) In addition to the expenses set forth in section 217(b)(2) paid or incurred by the taxpayer attributable to property sold, purchased, or leased by the taxpayer alone, the same type of expenses paid or incurred by the taxpayer attributable to property sold, purchased, or leased by the taxpayer's spouse or by the taxpayer and his spouse are deductible providing such property is used by the taxpayer as his principal place of residence.

(c) *Conditions for allowance*—(1) *In general.* Section 217(c) provides two conditions which must be satisfied in order for a deduction of moving expenses to be allowed under section 217(a). The first is a minimum distance condition prescribed by section 217(c)(1), and the second is a minimum period of employment condition prescribed by section 217(c)(2).

(2) *Minimum distance.* For purposes of applying the minimum distance condition of section 217(c)(1) all taxpayers are divided into one or the other of the following categories: Taxpayers having a former principal place of work, and taxpayers not having a former principal place of work. Included in this latter category are individuals who are seeking fulltime employment for the first time either as an employee or on a self- employed basis (for example, recent high school or college graduates), or individuals who are reentering the labor force after a substantial period of unemployment or part-time employment.

(i) In the case of a taxpayer having a former principal place of work, section 217(c)(1)(A) provides that no deduction is allowable unless the distance between the former residence and the new principal place of work exceeds by at least 35 miles (50 miles in the case of expenses paid or incurred in taxable years beginning before January 1, 1977) the distance between the former residence and the former principal place of work.

(ii) In the case of a taxpayer not having a former principal place of work, section 217(c)(1)(B) provides that no deduction is allowable unless the distance between the former residence and the new principal place of work is at least 35 miles (50 miles in the case of expenses paid or incurred in taxable years beginning before January 1, 1977).

(iii) For purposes of measuring distances under section 217(c)(1) the distance between two geographic points is measured by the shortest of the more commonly traveled routes between such points. The shortest of the more commonly traveled routes refers to the line of travel and the mode or modes of transportation commonly used to go between two geographic points comprising the shortest distance between such points irrespective of the route used by the taxpayer.

(3) *Principal place of work.* (i) A taxpayer's *principal place of work* usually is the place where he spends most of his working time. The principal place of work of a taxpayer who performs services as an employee is his employer's plant, office, shop, store, or other property. The principal place of work of a taxpayer who is self-employed is the plant, office, shop, store, or other

property which serves as the center of his business activities. However, a taxpayer may have a principal place of work even if there is no one place where he spends a substantial portion of his working time. In such case, the taxpayer's principal place of work is the place where his business activities are centered—for example, because he reports there for work, or is required either by his employer or the nature of his employment to ''base'' his employment there. Thus, while a member of a railroad crew may spend most of his working time aboard a train, his principal place of work is his home terminal, station, or other such central point where he reports in, checks out, or receives instructions. The principal place of work of a taxpayer who is employed by a number of employers on a relatively short-term basis, and secures employment by means of a union hall system (such as a construction or building trades worker) would be the union hall.

(ii) Where a taxpayer has more than one employment (i.e., the taxpayer is employed by more than one employer, or is self-employed in more than one trade or business, or is an employee and is self-employed at any particular time) his principal place of work is determined with reference to his principal employment. The location of a taxpayer's principal place of work is a question of fact determined on the basis of the particular circumstances in each case. The more important factors to be considered in making this determination are *(a)* the total time ordinarily spent by the taxpayer at each place, *(b)* the degree of the taxpayer's business activity at each place, and *(c)* the relative significance of the financial return to the taxpayer from each place.

(iii) Where a taxpayer maintains inconsistent positions by claiming a deduction for expenses of meals and lodging while away from home (incurred in the general location of the new principal place of work) under section 162 (relating to trade or business expenses) and by claiming a deduction under this section for moving expenses incurred in connection with the commencement of work at such place of work, it will be a question of facts and circumstances as to whether such new place of work will be considered a principal place of work, and accordingly, which category of deductions he will be allowed.

(4) *Minimum period of employment.* (i) Under section 217(c)(2) no deduction is allowed unless:

(a) Where a taxpayer is an employee, during the 12-month period immediately following his arrival in the general location of the new principal place of work, he is a full-time employee, in such general location, during at least 39 weeks, or

(b) Where a taxpayer is a self-employed individual (including a taxpayer who is also an employee, but is unable to satisfy the requirements of the 39-week test of (a) of this subdivision (i)), during the 24-month period immediately following his arrival in the general location of the new principal place of work, he is a full-time employee or performs services as a self-employed individual on a full-time basis, in such general location, during at least 78 weeks, of which not less than 39 weeks are during the 12-month period referred to above.

Where a taxpayer works as an employee and at the same time performs services as a self-employed individual his principal employment (determined according to subdivision (i) of subparagraph (3) of this paragraph) governs whether the 39-week or 78-week test is applicable.

(ii) The 12-month period and the 39-week period set forth in subparagraph (A) of section 217(c)(2) and the 12- and 24-month periods as well as 39- and 78-week periods set forth in subparagraph (B) of such section are measured from the date of the taxpayer's arrival in the general location of the new principal place of work. Generally, date of arrival is the date of the termination of the last trip preceding the taxpayer's commencement of work on a regular basis and is not the date the taxpayer's family or household goods and effects arrive.

(iii) The taxpayer need not remain in the employ of the same employer or remain self-employed in the same trade or business for the required number of weeks. However, he must be employed in the same general location of the new principal place of work during such period. The *general location* of the new principal place of work refers to a general commutation area and is usually the same area as the ‘‘new place of residence’’; see paragraph (b)(8) of this section.

(iv) Only those weeks during which the taxpayer is a full-time employee or during which he performs services as a self-employed individual on a full-time basis qualify as a week of work for purposes of the minimum period of employment condition of section 217(c)(2).

(a) Whether an employee is a full-time employee during any particular week depends upon the customary practices of the occupation in the geographic area in which the taxpayer works. Where employment is on a seasonal basis, weeks occurring in the off-season when no work is required or available may be counted as weeks of full-time employment only if the employee's contract or agreement of employment covers the off-season period and such period is less than 6 months. Thus, for example, a schoolteacher whose employment contract covers a 12-month period and who teaches on a full-time basis for more than 6 months is considered a full-time employee during the entire 12-month period. A taxpayer will be treated as a full-time employee during any week of involuntary temporary absence from work because of illness, strikes, shutouts, layoffs, natural disasters, etc. A taxpayer will, also, be treated as a full-time employee during any week in which he voluntarily absents himself from work for leave or vacation provided for in his contract or agreement of employment.

(b) Whether a taxpayer performs services as a self-employed individual on a full-time basis during any particular week depends on the practices of the trade or business in the geographic area in which the taxpayer works. For example, a self-employed dentist maintaining office hours 4 days a week is considered to perform services as a self-employed individual on a full-time basis providing it is not unusual for other self-employed dentists in the geographic area in which the taxpayer works to maintain office hours only 4 days a week. Where a trade or business is seasonal, weeks occurring during the off-season when no work is required or available may be counted as weeks of performance of services on a full-time basis only if the off-season is less than 6 months and the taxpayer performs services on a full-time basis both before and after the off-season. For example, a taxpayer who owns and operates a motel at a beach resort is considered to perform services as a self-employed individual on a full-time basis if the motel is closed for a period not exceeding 6 months during the off-season and if he performs services on a full-time basis as the operator of a motel both before and after the off-season. A taxpayer will be treated as performing services as a self-employed individual on a full-time basis during any week of involuntary temporary absence from work because of illness, strikes, natural disasters, etc.

(v) Where taxpayers file a joint return, either spouse may satisfy the minimum period of employment condition. However, weeks worked by one spouse may not be added to weeks worked by the other spouse in order to satisfy such condition. The taxpayer seeking to satisfy the minimum period of employment condition must satisfy the condition applicable to him. Thus, if a taxpayer is subject to the 39-week condition and his spouse is subject to the 78-week condition and the taxpayer satisfies the 39-week condition, his spouse need not satisfy the 78-week condition. On the other hand, if the taxpayer does not satisfy the 39-week condition, his spouse in such case must satisfy the 78-week condition.

(vi) The application of this subparagraph may be illustrated by the following examples:

Example 1. A is an electrician residing in New York City. He moves himself, his family, and his household goods and personal effects, at his own expense, to Denver where he commences employment with the M Aircraft Corporation. After working full-time for 30 weeks he voluntarily leaves his job, and he subsequently moves to and commences employment in Los Angeles, CA, which employment lasts for more than 39 weeks. Since A was not employed in the general location of his new principal place of employment in Denver for at least 39 weeks, no deduction is allowable for moving expenses paid or incurred between New York City and Denver. A will be allowed to deduct only those moving expenses attributable to his move from Denver to Los Angeles, assuming all other conditions of section 217 are met.

Example 2. Assume the same facts as in *Example (1)*, except that A's wife commences employment in Denver at the same time as A, and that she continues to work in Denver for at least 9 weeks after A's departure for Los Angeles. Since she has met the 39-week requirement in Denver, and assuming all other requirements of section 217 are met, the moving expenses paid by A attributable to the move from New York City to Denver will be allowed as a deduction, provided A and his wife file a joint return. If A and his wife file separate returns moving expenses paid by A's wife attributable to the move from New York City to Denver will be allowed as a deduction on A's wife's return.

Example 3. Assume the same facts as in *Example (1)*, except that A's wife commences employment in Denver on the same day that A departs for Los Angeles, and continues to work in Denver for 9 weeks thereafter. Since neither A (who has worked 30 weeks) nor his wife (who has worked 9 weeks) has independently satisfied the 39-week requirement, no deduction for moving expenses attributable to the move from New York City to Denver is allowable.

(d) *Rules for application of section 217(c)(2)*—(1) *Inapplicability of minimum period of employment condition in certain cases.* Section 217(d)(1) provides that the minimum period of employment condition of section 217(c)(2) does not apply in the case of a taxpayer who is unable to meet such condition by reason of:

(i) Death or disability, or

(ii) Involuntary separation (other than for willfull misconduct) from the service of an employer or separation by reason of transfer for the benefit of an employer after obtaining full-time employment in which the taxpayer could reasonably have been expected to satisfy such condition.

For purposes of subdivision (i) of this paragraph disability shall be determined according to the rules in section 72(m)(7) and §1.72–17(f). Subdivision (ii) of this subparagraph applies only where the taxpayer has obtained full-time employment in which he could reasonably have been expected to satisfy the minimum period of employment condition. A taxpayer could reasonably have been expected to satisfy the minimum period of employment condition if at the time he commences work at the new principal place of work he could have been expected, based upon the facts known to him at such time, to satisfy such condition. Thus, for example, if the taxpayer at the time of transfer was not advised by his employer that he planned to transfer him within 6 months to another principal place of work, the taxpayer could, in the absence of other factors, reasonably have been expected to satisfy the minimum employment period condition at the time of the first transfer. On the other hand, a taxpayer could not reasonably have been expected to satisfy the minimum employment condition if at the time of the commencement of the move he knew that his employer's retirement age policy would prevent his satisfying the minimum employment period condition.

(2) *Election of deduction before minimum period of employment condition is satisfied.* (i) Paragraph (2) of section 217(d) provides a rule which applies where a taxpayer paid or incurred, in a taxable year, moving expenses which would be deductible in that taxable year except that the minimum period of employment condition of section 217(c)(2) has not been satisfied before the time prescribed by law for filing the return for such taxable year. The rule provides that where a taxpayer has paid or incurred moving expenses and as of the date prescribed by section 6072 for filing his return for such taxable year (determined with regard to extensions of time for filing) there remains unexpired a sufficient portion of the 12-month or the 24-month period so that it is still possible for the taxpayer to satisfy the applicable period of employment condition, the taxpayer may elect to claim a deduction for such moving expenses on the return for such taxable year. The election is exercised by taking the deduction on the return.

(ii) Where a taxpayer does not elect to claim a deduction for moving expenses on the return for the taxable year in which such expenses were paid or incurred in accordance with subdivision (i) of this subparagraph and the applicable minimum period of employment condition of section 217(c)(2) (as well as all other requirements of section 217) is subsequently satisfied, the taxpayer may file an amended return or a claim for refund for the taxable year such moving expenses were paid or incurred on which he may claim a deduction under section 217.

(iii) The application of this subparagraph may be illustrated by the following examples:

Example 1. A is transferred by his employer from Boston, MA, to Cleveland, OH. He begins working there on November 1, 1970. Moving expenses are paid by A in 1970 in connection with this move. On April 15, 1971, when he files his income tax return for the year 1970, A has been a full-time employee in Cleveland for approximately 24 weeks. Although he has not satisfied the 39-week employment condition at this time, A may elect to claim his 1970 moving expenses on his 1970 income tax return as there is still sufficient time remaining before November 1, 1971, to satisfy such condition.

Example 2. Assume the same facts as in *Example (1)*, except that on April 15, 1971, A has voluntarily left his employer and is looking for other employment in Cleveland. A may not be sure he will be able to meet the 39-week employment condition by November 1, 1971. Thus, he may if he wishes wait until such condition is met and file an amended return claiming as a deduction the expenses paid in 1970. Instead of filing an amended return A may file a claim for refund based on a deduction for such expenses. If A fails to meet the 39-week employment condition on or before November 1, 1971, no deduction is allowable for such expenses.

Example 3. B is a self-employed accountant. He moves from Rochester, NY, to New York, NY, and begins to work there on December 1, 1970. Moving expenses are paid by B in 1970 and 1971 in connection with this move. On April 15, 1971, when he files his income tax return for the year 1970, B has been performing services as a self-employed individual on a full-time basis in New York City for approximately 20 weeks. Although he has not satisfied the 78-week employment condition at this time, A may elect to claim his 1970 moving expenses on his 1970 income tax return as there is still sufficient time remaining before December 1, 1972, to satisfy such condition. On April 15, 1972, when he files his income tax return for the year 1971, B has been performing services as a self-employed individual on a full-time basis in New York City for approximately 72 weeks. Although he has not met the 78-week employment condition at this time, B may elect to claim his 1971 moving expenses on his 1971 income tax return as there is still sufficient time remaining before December 1, 1972, to satisfy such requirement.

(3) *Recapture of deduction.* Paragraph (3) of section 217(d) provides a rule which applies where a taxpayer has deducted moving expenses under the election provided in section 217(d)(2) prior to satisfying the applicable minimum period of employment condition and such condition cannot be satisfied at the close of a subsequent taxable year. In such cases an amount equal to the expenses deducted must be included in the taxpayer's gross income for the taxable year in which the taxpayer is no longer able to satisfy such minimum period of employment condition. Where the taxpayer has deducted moving expenses under the election provided in section 217(d)(2) for the taxable year and subsequently files an amended return for such year on which he does not claim the deduction, such expenses are not treated as having been deducted for purposes of the recapture rule of the preceding sentence.

(e) *Denial of double benefit*—(1) *In general.* Section 217(e) provides a rule for computing the amount realized and the basis where qualified real estate expenses are allowed as a deduction under section 217(a).

(2) *Sale or exchange of residence.* Section 217(e) provides that the amount realized on the sale or exchange of a residence owned by the taxpayer, by the taxpayer's spouse, or by the taxpayer and his spouse and used by the taxpayer as his principal place of residence is not decreased by the amount of any expenses described in subparagraph (A) of section 217(b)(2) and deducted under section 217(a). For the purposes of section 217(e) and of this paragraph the term amount realized'' has the same meaning as under section 1001(b) and the regulations thereunder. Thus, for example, if the taxpayer sells a residence used as his principal place of residence and real estate commissions or similar expenses described in subparagraph (A) of section 217(b)(2) are deducted by him pursuant to section 217(a), the amount realized on the sale of the residence is not reduced by the amount of such real estate commissions or such similar expenses described in subparagraph (A) of section 217(b)(2).

(3) *Purchase of a residence.* Section 217(e) provides that the basis of a residence purchased or received in exchange for other property by the taxpayer, by the taxpayer's spouse, or by

the taxpayer and his spouse and used by the taxpayer as his principal place of residence is not increased by the amount of any expenses described in subparagraph (B) of section 217(b)(2) and deducted under section 217(a). For the purposes of section 217(e) and of this paragraph the term *basis* has the same meaning as under section 1011 and the regulations thereunder. Thus, for example, if a taxpayer purchases a residence to be used as his principal place of residence and attorneys' fees or similar expenses described in subparagraph (B) of section 217(b)(2) are deducted pursuant to section 217(a), the basis of such residence is not increased by the amount of such attorneys' fees or such similar expenses described in subparagraph (B) of section 217(b)(2).

(4) *Inapplicability of section 217(e).* (i) Section 217(e) and subparagraphs (1) through (3) of this paragraph do not apply to any expenses with respect to which an amount is included in gross income under section 217(d)(3). Thus, the amount of any expenses described in subparagraph (A) of section 217(b)(2) deducted in the year paid or incurred pursuant to the election under section 217(d)(2) and subsequently recaptured pursuant to section 217(d)(3) may be taken into account in computing the amount realized on the sale or exchange of the residence described in such subparagraph. Also, the amount of expenses described in subparagraph (B) of section 217(b)(2) deducted in the year paid or incurred pursuant to such election under section 217(d)(2) and subsequently recaptured pursuant to section 217(d)(3) may be taken into account as an adjustment to the basis of the residence described in such subparagraph.

(ii) The application of subdivision (i) of this subparagraph may be illustrated by the following examples:

Example 1. A was notified of his transfer effective December 15, 1972, from Seattle, WA, to Philadelphia, PA. In connection with the transfer A sold his house in Seattle on November 10, 1972. Expenses incident to the sale of the house of $2,500 were paid by A prior to or at the time of the closing of the contract of sale on December 10, 1972. The amount realized on the sale of the house was $47,500 and the adjusted basis of the house was $30,000. Pursuant to the election provided in section 217(d)(2), A deducted the expenses of moving from Seattle to Philadelphia including the expenses incident to the sale of his former residence in taxable year 1972. Dissatisfied with his position with his employer in Philadelphia, A took a position with an employer in Chicago, IL, on July 15, 1973. Since A was no longer able to satisfy the minimum period employment condition at the close of taxable year 1973 he included an amount equal to the amount deducted as moving expenses including the expenses incident to the sale of his former residence in gross income for taxable year 1973. A is permitted to decrease the amount realized on the sale of the house by the amount of the expenses incident to the sale of the house deducted from gross income and subsequently included in gross income. Thus, the amount realized on the sale of the house is decreased from $47,500 to $45,000 and thus, the gain on the sale of the house is reduced from $17,500 to $15,000. A is allowed to file an amended return or a claim for refund in order to reflect the recomputation of the amount realized.

Example 2. B, who is self-employed decided to move from Washington, DC, to Los Angeles, CA. In connection with the commencement of work in Los Angeles on March 1, 1973, B purchased a house in a suburb of Los Angeles for $65,000. Expenses incident to the purchase of the house in the amount of $1,500 were paid by B prior to or at the time of the closing of the contract of sale on September 15, 1973. Pursuant to the election provided in section 217(d)(2), B deducted the expenses of moving from Washington to Los Angeles including the expenses incident to the purchase of his new residence in taxable year 1973. Dissatisfied with his prospects in Los Angeles, B moved back to Washington on July 1, 1974. Since B was no longer able to satisfy the minimum period of employment condition at the close of taxable year 1974 he included an amount equal to the amount deducted as moving expenses incident to the purchase of the former residence in gross income for taxable year 1974. B is permitted to increase the basis of the house by the amount of the expenses incident to the purchase of the house deducted from gross income and subsequently included in gross income. Thus, the basis of the house is increased to $66,500.

(f) *Rules for self-employed individuals*—(1) *Definition.* Section 217(f)(1) defines the term *self-employed individual* for purposes of section 217 to mean an individual who performs personal services either as the owner of the entire interest in an unincorporated trade or business or as a partner in a partnership carrying on a trade or business. The term *self-employed individual* does not include the semiretired, part-time students, or other similarly situated taxpayers who work only a few hours each week. The application of this subparagraph may be illustrated by the following example:

Example. A is the owner of the entire interest in an unincorporated construction business. A hires a manager who performs all of the daily functions of the business including the negotiation of contracts with customers, the hiring and firing of employees, the purchasing of materials used on the projects, and other similar services. A and his manager discuss the operations of the business about once a week over the telephone. Otherwise A does not perform any managerial services for the business. For the purposes of section 217, A is not considered to be a self-employed individual.

(2) *Rule for application of subsection (b)(1) (C)* and *(D).* Section 217(f)(2) provides that for purposes of subparagraphs (C) *and* (D) of section 217(b)(1) an individual who commences work at a new principal place of work as a self-employed individual is treated as having obtained employment when he has made substantial arrangements to commence such work. Whether the taxpayer has made substantial arrangements to commence work at a new principal place of work is determined on the basis of all the facts and circumstances in each case. The factors to be considered in this determination depend upon the nature of the taxpayer's trade or business and include such considerations as whether the taxpayer has: (i) Leased or purchased a plant, office, shop, store, equipment, or other property to be used in the trade or business, (ii) made arrangements to purchase inventory or supplies to be used in connection with the operation of the trade or business, (iii) entered into commitments with individuals to be employed in the trade or business, and (iv) made arrangements to contact customers or clients in order to advertise the business in the general location of the new principal place of work. The application of this subparagraph may be illustrated by the following examples:

Example 1. A, a partner in a growing chain of drug stores decided to move from Houston, TX, to Dallas, TX, in order to open a drug store in Dallas. A made several trips to Dallas for the purpose of looking for a site for the drug store. After the signing of a lease on a building in a shopping plaza, suppliers were contacted, equipment was purchased, and employees were hired. Shortly before the opening of the store A and his wife moved from Houston to Dallas and took up temporary quarters in a motel until the time their apartment was available. By the time he and his wife took up temporary quarters in the motel A was considered to have made substantial arrangements to commence work at the new principal place of work.

Example 2. B, who is a partner in a securities brokerage firm in New York, NY, decided to move to Rochester, NY, to become the resident partner in the firm's new Rochester office. After a lease was signed on an office in downtown Rochester B moved to Rochester and took up temporary quarters in a motel until his apartment became available. Before the opening of the office B supervised the decoration of the office, the purchase of equipment and supplies necessary for the operation of the office, the hiring of personnel for the office, as well as other similar activities. By the time B took up temporary quarters in the motel he was considered to have made substantial arrangements to commence to work at the new principal place of work.

Example 3. C, who is about to complete his residency in ophthalmology at a hospital in Pittsburgh, PA, decided to fly to Philadelphia, PA, for the purpose of looking into opportunities for practicing in that city. Following his arrival in Philadelphia C decided to establish his practice in that city. He leased an office and an apartment. At the time he departed Pittsburgh for Philadelphia C was not considered to have made substantial arrangements to commence work at the new principal place of work, and, therefore, is not allowed to deduct expenses described in subparagraph (C) of section 217(b)(1) (relating to expenses of traveling (including meals and lodging), after obtaining employment, from the former residence to the general location of the new principal place of work and return, for the principal purpose of searching for a new residence).

(g) *Rules for members of the Armed Forces of the United States*—(1) *In general.* The rules in paragraphs (a)(1) and (2), (b), and (e) of this section apply to moving expenses paid or incurred by members of the Armed Forces of the United States on active duty who move pursuant to a military order and incident to a permament change of station, except as provided in this paragraph (g). However, if the moving expenses are not paid or incurred incident to a permanent change of station, this paragraph (g) does not apply, but all other paragraphs of this section do apply.

The provisions of this paragraph apply to taxable years beginning December 31, 1975.

(2) *Treatment of services or reimbursement provided by Government*—(i) *Services in kind.* The value of any moving or storage services furnished by the United States Government to members of the Armed Forces, their spouses, or their dependents in connection with a permanent change of station is not includible in gross income. The Secretary of Defense and (in cases involving members of the peacetime Coast Guard) the Secretary of Transportation are not required to report or withhold taxes with respect to those services. Services furnished by the Government include services rendered directly by the Government or rendered by a third party who is compensated directly by the Government for the services.

(ii) *Reimbursements.* The following rules apply to reimbursements or allowances by the Government to members of the Armed Forces, their spouses, or their dependents for moving or storage expenses paid or incurred by them in connection with a permanent change of station. If the reimbursement or allowance exceeds the actual expenses paid or incurred, the excess is includible in the gross income of the member, and the Secretary of Defense or Secretary of Transportation must report the excess as payment of wages and withhold income taxes under section 3402 and the employee taxes under section 3102 with respect to that excess. If the reimbursemet or allowance does not exceed the actual expenses, the reimbursement or allowance in not includible in gross income, and no reporting or withholding by the Secretary of Defense or Secretary of Transportation is required. If the actual expenses, as limited by paragraph (b)(9) of this section, exceed the reimbursement of allowance, the member may deduct the excess if the other requirements of this section, as modified by this paragraph, are met. The determination of the limitation on actual expenses under paragraph (b)(9) of this section is made without regard to any services in kind furnished by the Government.

(3) *Permanent change of station.* For purposes of this section, the term *permanent change of station* includes the following situations.

(i) A move from home to the first post of duty when appointed, reappointed, reinstated, or inducted.

(ii) A move from the last post of duty to home or a nearer point in the United States in connection with retirement, discharge, resignation, separation under honorable conditions, transfer, relief from active duty, temporary disability retirement, or transfer to a Fleet Reserve, if such move occurs within 1 year of such termination of active duty or within the period prescribed by the Joint Travel Regulations promulgated under the authority contained in sections 404 through 411 of Title 37 of the United States Code.

(iii) A move from one permanent post of duty to another permanent post of duty at a different duty station, even if the member separates from the Armed Forces immediately or shortly after the move.

The term *permanent, post of duty, duty station,* and *honorable* have the meanings given them in appropriate Department of Defense or Department of Transportation rules and regulations.

(4) *Storage expenses.* This paragraph applies to storage expenses as well as to moving expenses described in paragraph (b)(1) of this section. the term *storage expenses* means the cost of storing personal effects of members of the Armed Forces, their spouses, and their dependents.

(5) *Moves of spouses and dependents.* (i) The following special rule applies for purposes of paragraphs (b)(9) and (10) of this section, if the spouse or dependents of a member of the Armed Forces move to or from a different location than does the member. In this case, the spouse is considered to have commenced work as an employee at a new principal place of work that is within the same general location as the location to which the member moves.

(ii) The following special rule applies for purposes of this paragraph to moves by spouses or dependents of members of the Armed Forces who die, are imprisoned, or desert while on active duty. In these cases, a move to a member's place of enlistment or induction or the member's, spouse's, or dependent's home of record or nearer point in the

United States is considered incident to a permanent change of station.

(6) *Disallowance of deduction.* No deduction is allowed under this section for any moving or storage expense reimbursed by an allowance that is excluded from gross income.

(h) *Special rules for foreign moves*—(1) *Increase in limitations.* In the case of a foreign move (as defined in paragraph (h)(3) of this section), paragraph (b)(6) of this section shall be applied by substituting ''90 consecutive'' for ''30 consecutive'' each time it appears. Paragraph (b)(9) (ii), (iii) and (v) of this section shall be applied by substituting ''$6,000'' for ''$3,000'' each time it appears and by substituting ''$4,500'' for ''$1,500'' each time it appears. Paragraph (b)(9)(ii) of this section shall be applied by substituting ''$5,000'' for ''$2,000'' each time it appears and by substituting ''1979'' for ''1977'' and ''1980'' for ''1978'' each time they appear in the last sentence. Paragraph (b)(9)(v) of this section shall be applied by substituting ''$2,250'' for ''$750'' each time it appears. Paragraph (b)(9)(vi) of this section does not apply.

(2) *Allowance of certain storage fees.* In the case of a foreign move, for purposes of this section, the moving expenses described in paragraph (b)(3) of this section shall include the reasonable expenses of moving household goods and personal effects to and from storage, and of storing such goods and effects for part or all of the period during which the new place of work continues to be the taxpayer's principal place of work.

(3) *Foreign move.* For purposes of this paragraph, the term *foreign move* means a move in connection with the commencement of work by the taxpayer at a new principal place of work located outside the United States. Thus, a move from the United States to a foreign country or from one foreign country to another foreign country qualifies as a foreign move. A move within a foreign country also qualifies as a foreign move. A move from a foreign country to the United States does not qualify as a foreign move.

(4) *United States.* For purposes of this paragraph, the term *United States* includes the possessions of the United States.

(5) *Effective date.* The provisions of this paragraph apply to expenses paid or incurred in taxable years beginning after December 31, 1978. The paragraph also applies to the expenses paid or incurred in the taxable year beginning during 1978 of taxpayers who do not make an election pursuant to section 209(c) of the Foreign Earned Income Act of 1978 (Pub. L. 95–615, 92 Stat. 3109) to have section 911 under prior law apply to that taxable year.

(i) *Allowance of deductions in case of retirees or decedents who were working abroad*—(1) *In general.* In the case of any qualified retiree moving expenses or qualified survivor moving expenses, this section (other than paragraph (h)) shall be applied to such expenses as if they were incurred in connection with the commencement of work by the taxpayer as an employee at a new principal place of work located within the United States and the limitations of paragraph (c)(4) of this section (relating to the minimum period of employment) shall not apply.

(2) *Qualified retiree moving expenses.* For purposes of this paragraph, the term *qualified retiree moving expenses* means any moving expenses which are incurred by an individual whose former principal place of work and former residence were outside the United States and which are incurred for a move to a new residence in the United States in connection with the bona fide retirement of the individual. *Bona fide retirement* means the permanent withdrawal from gainful full-time employment and self-employment. An individual who at the time of withdrawal from gainful full-time employment or self-employment, intends the withdrawal to be permanent shall be considered to be a *bona fide retiree* even though the individual ultimately resumes gainful full-time employment or self-employment. An individual's intention may be evidenced by relevant facts and circumstances which include the age and health of the individual, the customary retirement age of employees engaged in similar work, whether the individual is receiving a retirement allowance under a pension annuity, retirement or similar fund or system, and the length of time before resuming full-time employment or self-employment.

(3) *Qualified survivor moving expenses.* (i) For purposes of this paragraph, the term *qualified survivor moving expenses* means any moving expenses:

(A) Which are paid or incurred by the spouse or any dependent (as defined in section 152) of any decedent who (as of the time of his death) had a principal place of work outside the United States, and

(B) Which are incurred for a move which begins within 6 months after the death of the decedent and which is to a residence in the United States from a former residence outside the United States which (as of the time of the decedent's death) was the residence of such decedent and the individual paying or incurring the expense.

(ii) For purposes of paragraph (i)(3)(i) (B) of this section, a move begins when:

(A) The taxpayer contracts for the moving of his or her household goods and personal effects to a residence in the United States but only if the move is completed within a reasonable time thereafter;

(B) The taxpayer's household goods and personal effects are packed and in transit to a residence in the United States; or

(C) The taxpayer leaves the former residence to travel to a new place of residence in the United States.

(4) *United States.* For purposes of this paragraph, the term *United States* includes the possessions of the United States.

(5) *Effective date.* The provisions of this paragraph apply to expenses paid or incurred in taxable years beginning after December 31, 1978. The paragraph also applies to the expenses paid or incurred in the taxable year beginning during 1978 of taxpayers who do not make an election pursuant to section 209(c) of the Foreign Earned Income Act of 1978 (Pub. L. 95–615, 92 Stat. 3109) to have section 911 under prior law apply to that taxable year.

(j) *Effective date*—(1) *In general.* This section, except as provided in subparagraphs (2) and (3) of this paragraph, is applicable to items paid or incurred in taxable years beginning after December 31, 1969.

(2) *Reimbursement not included in gross income.* This section does not apply to items to the extent that the taxpayer received or accrued in a taxable year beginning before January 1, 1970, a reimbursement or other expense allowance for such items which was not included in his gross income.

(3) *Election in cases of expenses paid or incurred before January 1, 1971, in connection with certain moves*—(i) *In general.* A taxpayer who was notified by his employer on or before December 19, 1969, of a transfer to a new principal place of work and who pays or incurs moving expenses after December 31, 1969, but before January 1, 1971, in connection with such transfer may elect to have the rules governing moving expenses in effect prior to the effective date of section 231 of the Tax Reform Act of 1969 (83 Stat. 577) govern such expenses. If such election is made, this section and section 82 and the regulations thereunder do not apply to such expenses. A taxpayer is considered to have been notified on or before December 19, 1969, by his employer of a transfer, for example, if before such date the employer has sent a notice to all employees or a reasonably defined group of employees, which includes such taxpayer, of a relocation of the operations of such employer from one plant or facility to another plant or facility. An employee who is transferred to a new principal place of work for the benefit of his employer and who makes an election under this paragraph is permitted to exclude amounts received or accrued, directly or indirectly, as payment for or reimbursement of expenses of moving household goods and personal effects from the former residence to the new residence and of traveling (including meals and lodging) from the former residence to the new place of residence. Such exclusion is limited to amounts received or accrued, directly or indirectly, as a payment for or reimbursement of the expenses described above. Amounts in excess of actual expenses paid or incurred must be included in gross income. No deduction is allowable under section 217 for expenses representing amounts excluded from gross income. Also, an employee who is transferred to a new principal place of work which is less than 50 miles but at least 20 miles farther from his former residence than was his

former principal place of work and who is not reimbursed, either directly or indirectly, for the expenses described above is permitted to deduct such expenses providing all of the requirements of section 217 and the regulations thereunder prior to the effective date of section 231 of the Tax Reform Act of 1969 (83 Stat. 577) are satisfied.

(ii) *Election made before the date of publication of this notice as a Treasury decision.* An election under this subparagraph made before the date of publication of this notice as a Treasury decision shall be made pursuant to the procedure prescribed in temporary income tax regulations relating to treatment of payments of expenses of moving from one residence to another residence (Part 13 of this chapter) T.D. 7032 (35 FR 4330), approved Mar. 11, 1970.

(iii) *Election made on or after the date of publication of this notice as a Treasury decision.* An election made under this subparagraph on or after the date of publication of this notice as a Treasury decision shall be made not later than the time, including extensions thereof, prescribed by law for filing the income tax return for the year in which the expenses were paid or 30 days after the date of publication of this notice as a Treasury decision, whichever occurs last. The election shall be made by a statement attached to the return (or the amended return) for the taxable year, setting forth the following information:

(a) The items to which the election relates;

(b) The amount of each item;

(c) The date each item was paid or incurred; and

(d) The date the taxpayer was informed by his employer of his transfer to the new principal place of work.

(iv) *Revocation of election.* An election made in accordance with this subparagraph is revocable upon the filing by the taxpayer of an amended return or a claim for refund with the district director, or the director of the Internal Revenue service center with whom the election was filed not later than the time prescribed by law, including extensions thereof, for the filing of a claim for refund with respect to the items to which the election relates.

[T.D. 7195, 37 FR 13535, July 11, 1972, 37 FR 14230, July 18, 1972 as amended by T.D. 7578 43 FR 59355, Dec. 20, 1978; T.D. 7605, 44 FR 18970, Mar. 30, 1979; T.D. 7689, 45 FR 20796, Mar. 31, 1980; T.D. 7810, 47 FR 6003, Feb. 10, 1982; T.D. 8607, 60 FR 40077, Aug. 7, 1995]

§ 1.218–0 Deduction for political and newsletter fund contributions.

See §§ 1.41–0A through 1.41–8A for regulations that apply to section 218.

(Secs. 41(b)(3), 218(b)(2) and (c), and 7805 of the Internal Revenue Code of 1954 (26 U.S.C. 41(b)(3), 218(b)(2), (c), 7805))

[T.D. 7603, 44 FR 18223, Mar. 27, 1979, as amended by T.D. 8251, 54 FR 21204, May 17, 1989]

§ 1.219–1 Deduction for retirement savings.

(a) *In general.* Subject to the limitations and restrictions of paragraph (b) and the special rules of paragraph (c)(3) of this section, there shall be allowed a deduction under section 62 from gross income of amounts paid for the taxable year of an individual on behalf of such individual to an individual retirement account described in section 408(a), for an individual retirement annuity described in section 408(b), or for a retirement bond described in section 409. The deduction described in the preceding sentence shall be allowed only to the individual on whose behalf such individual retirement account, individual retirement annuity, or retirement bond is maintained. The first sentence of this paragraph shall apply only in the case of a contribution of cash. A contribution of property other than cash is not allowable as a deduction under this section. In the case of a retirement bond, a deduction will not be allowed if the bond is redeemed within 12 months of its issue date.

(b) *Limitations and restrictions*—(1) *Maximum deduction.* The amount allowable as a deduction under section 219(a) to an individual for any taxable year cannot exceed an amount equal to 15 percent of the compensation includible in the gross income of the individual for such taxable year, or $1,500, whichever is less.

(2) *Restrictions*—(i) *Individuals covered by certain other plans.* No deduction is

allowable under section 219(a) to an individual for the taxable year if for any part of such year:

(A) He was an active participant in:

(*1*) A plan described in section 401(a) which includes a trust exempt from tax under section 501(a),

(*2*) An annuity plan described in section 403(a),

(*3*) A qualified bond purchase plan described in section 405(a), or

(*4*) A retirement plan established for its employees by the United States, by a State or political subdivision thereof, or by an agency or instrumentality of any of the foregoing, or

(B) Amounts were contributed by his employer for an annuity contract described in section 403(b) (whether or not the individual's rights in such contract are nonforfeitable).

(ii) *Contributions after age 70½.* No deduction is allowable under section 219 (a) to an individual for the taxable year of the individual, if he has attained the age of 70½ before the close of such taxable year.

(iii) *Rollover contributions.* No deduction is allowable under section 219 for any taxable year of an individual with respect to a rollover contribution described in section 402(a)(5), 402(a)(7), 403(a)(4), 403(b)(8), 408(d)(3), or 409(b)(3)(C).

(3) *Amounts contributed under endowment contracts.* (i) For any taxable year, no deduction is allowable under section 219(a) for amounts paid under an endowment contract described in §1.408–3(e) which is allocable under subdivision (ii) of this subparagraph to the cost of life insurance.

(ii) For any taxable year, the cost of current life insurance protection under an endowment contract described in paragraph (b)(3)(i) of this section is the product of the net premium cost, as determined by the Commissioner, and the excess, if any, of the death benefit payable under the contract during the policy year beginning in the taxable year over the cash value of the contract at the end of such policy year.

(iii) The provisions of this subparagraph may be illustrated by the following examples:

Example 1. A, an individual who is otherwise entitled to the maximum deduction allowed under section 219, purchases, at age 20, an endowment contract described in §1.408–3(e) which provides for the payment of an annuity of $100 per month, at age 65, with a minimum death benefit of $10,000, and an annual premium of $220. The cash value at the end of the first policy year is 0. The net premium cost, as determined by the Commissioner, for A's age is $1.61 per thousand dollars of life insurance protection. The cost of current life insurance protection is $16.10 ($1.61×10). A's maximum deduction under section 219 with respect to amounts paid under the endowment contract for the taxable year in which the first policy year begins is $203.90 ($220 − $16.10).

Example 2. Assume the same facts as in *Example (1),* except that the cash value at the end of the second policy year is $200 and the net premium cost is $1.67 per thousand for A's age. The cost of current life insurance protection is $16.37 ($1.67×9.8). A's maximum deduction under section 219 with respect to amounts paid under the endowment contract for the taxable year in which the second policy year begins is $203.63 ($220 − $16.37).

(c) *Definitions and special rules*—(1) *Compensation.* For purposes of this section, the term *compensation* means wages, salaries, professional fees, or other amounts derived from or received for personal service actually rendered (including, but not limited to, commissions paid salesmen, compensation for services on the basis of a percentage of profits, commissions on insurance premiums, tips, and bonuses) and includes earned income, as defined in section 401 (c) (2), but does not include amounts derived from or received as earnings or profits from property (including, but not limited to, interest and dividends) or amounts not includible in gross income.

(2) *Active participant.* For the definition of active participant, see §1.219–2.

(3) *Special rules.* (i) The maximum deduction allowable under section 219(b)(1) is computed separately for each individual. Thus, if a husband and wife each has compensation of $10,000 for the taxable year and they are each otherwise eligible to contribute to an individual retirement account and they file a joint return, then the maximum amount allowable as a deduction under section 219 is $3,000, the sum of the individual maximums of $1,500. However, if, for example, the husband has compensation of $20,000, the wife has no compensation, each is otherwise eligible to contribute to an individual retirement account for the taxable year,

and they file a joint return, the maximum amount allowable as a deduction under section 219 is $1,500.

(ii) Section 219 is to be applied without regard to any community property laws. Thus, if, for example, a husband and wife, who are otherwise eligible to contribute to an individual retirement account, live in a community property jurisdiction and the husband alone has compensation of $20,000 for the taxable year, then the maximum amount allowable as a deduction under section 219 is $1,500.

(4) *Employer contributions.* For purposes of this chapter, any amount paid by an employer to an individual retirement account or for an individual retirement annuity or retirement bond constitutes the payment of compensation to the employee (other than a self-employed individual who is an employee within the meaning of section 401(c)(1)) includible in his gross income, whether or not a deduction for such payment is allowable under section 219 to such employee after the application of section 219(b). Thus, an employer will be entitled to a deduction for compensation paid to an employee for amounts the employer contributes on the employee's behalf to an individual retirement account, for an individual retirement annuity, or for a retirement bond if such deduction is otherwise allowable under section 162.

[T.D. 7714, 45 FR 52788, Aug. 8, 1980]

§ 1.219–2 Definition of active participant.

(a) *In general.* This section defines the term *active participant* for individuals who participate in retirement plans described in section 219(b)(2). Any individual who is an active participant in such a plan is not allowed a deduction under section 219(a) for contributions to an individual retirement account.

(b) *Defined benefit plans*—(1) *In general.* Except as provided in subparagraphs (2), (3) and (4) of this paragraph, an individual is an active participant in a defined benefit plan if for any portion of the plan year ending with or within such individual's taxable year he is not excluded under the eligibility provisions of the plan. An individual is not an active participant in a particular taxable year merely because the individual meets the plan's eligibility requirements during a plan year beginning in that particular taxable year but ending in a later taxable year of the individual. However, for purposes of this section, an individual is deemed not to satisfy the eligibility provisions for a particular plan year if his compensation is less than the minimum amount of compensation needed under the plan to accrue a benefit. For example, assume a plan is integrated with Social Security and only those individuals whose compensation exceeds a certain amount accrue benefits under the plan. An individual whose compensation for the plan year ending with or within his taxable year is less than the amount necessary under the plan to accrue a benefit is not an active participant in such plan.

(2) *Rules for plans maintained by more than one employer.* In the case of a defined benefit plan described in section 413(a) and funded at least in part by service-related contributions, *e.g.,* so many cents-per-hour, an individual is an active participant if an employer is contributing or is required to contribute to the plan an amount based on that individual's service taken into account for the plan year ending with or within the individual's taxable year. The general rule in paragraph (b)(1) of this section applies in the case of plans described in section 413(a) and funded only on some non-service-related unit, *e.g.*, so many cents-per-ton of coal.

(3) *Plans in which accruals for all participants have ceased.* In the case of a defined benefit plan in which accruals for all participants have ceased, an individual in such a plan is not an active participant. However, any benefit that may vary with future compensation of an individual provides additional accruals. For example, a plan in which future benefit accruals have ceased, but the actual benefit depends upon final average compensation will not be considered as one in which accruals have ceased.

(4) *No accruals after specified age.* An individual in a defined benefit plan who accrues no additional benefits in a plan year ending with or within such individual's taxable year by reason of attaining a specified age is not an active

participant by reason of his participation in that plan.

(c) *Money purchase plan.* An individual is an active participant in a money purchase plan if under the terms of the plan employer contributions must be allocated to the individual's account with respect to the plan year ending with or within the individual's taxable year. This rule applies even if an individual is not employed at any time during the individual's taxable year.

(d) *Profit-sharing and stock-bonus plans*—(1) *In general.* This paragraph applies to profit-sharing and stock bonus plans. An individual is an active participant in such plans in a taxable year if a forfeiture is allocated to his account as of a date in such taxable year. An individual is also an active participant in a taxable year in such plans if an employer contribution is added to the participant's account in such taxable year. A contribution is added to a participant's account as of the later of the following two dates: the date the contribution is made or the date as of which it is allocated. Thus, if a contribution is made in an individual's taxable year 2 and allocated as of a date in individual's taxable year 1, the later of the relevant dates is the date the contribution is made. Consequently, the individual is an active participant in year 2 but not in year 1 as a result of that contribution.

(2) *Special rule.* An individual is not an active participant for a particular taxable year by reason of a contribution made in such year allocated to a previous year if such individual was an active participant in such previous year by reason of a prior contribution that was allocated as of a date in such previous year.

(e) *Employee contributions.* If an employee makes a voluntary or mandatory contribution to a plan described in paragraphs (b), (c), or (d) of this section, such employee is an active participant in the plan for the taxable year in which such contribution is made.

(f) *Certain individuals not active participants.* For purposes of this section, an individual is not an active participant under a plan for any taxable year of such individual for which such individual elects, pursuant to the plan, not to participate in such plan.

(g) *Retirement savings for married individuals.* The provisions of this section apply in determining whether an individual or his spouse is an active participant in a plan for purposes of section 220 (relating to retirement savings for certain married individuals).

(h) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. The X Corporation maintains a defined benefit plan which has the following rules on participation and accrual of benefits. Each employee who has attained the age of 25 or has completed one year of service is a participant in the plan. The plan further provides that each participant shall receive upon retirement $12 per month for each year of service in which the employee completes 1,000 hours of service. The plan year is the calendar year. B, a calendar-year taxpayer, enters the plan on January 2, 1980, when he is 27 years of age. Since B has attained the age of 25, he is a participant in the plan. However, B completes less than 1,000 hours of service in 1980 and 1981. Although B is not accruing any benefits under the plan in 1980 and 1981, he is an active participant under section 219(b)(2) because he is a participant in the plan. Thus, B cannot make deductible contributions to an individual retirement arrangement for his taxable years of 1980 and 1981.

Example 2. The Y Corporation maintains a profit-sharing plan for its employees. The plan year of the plan is the calendar year. C is a calendar-year taxpayer and a participant in the plan. On June 30, 1980, the employer makes a contribution for 1980 which as allocated on July 31, 1980. In 1981 the employer makes a second contribution for 1980, allocated as of December 31, 1980. Under the general rule stated in §1.219–2(d)(1), C is an active participant in 1980. Under the special rule stated in §1.219–2(d)(2), however, C is not an active participant in 1981 by reason of that contribution made in 1981.

(i) *Effective date.* The provisions set forth in this section are effective for taxable years beginning after December 31, 1978.

[T.D. 7714, 45 FR 52789, Aug. 8, 1980]

Special Deductions for Corporations

§1.241–1 Allowance of special deductions.

A corporation, in computing its taxable income, is allowed as deductions the items specified in Part VIII (section 242 and following), Subchapter B, Chapter 1 of the Code, in addition to the deductions provided in part VI (section 161 and following) Subchapter B, Chapter 1 of the Code.

§1.242–1 Deduction for partially tax-exempt interest.

A corporation is allowed a deduction under section 242(a) in an amount equal to certain interest received on obligations of the United States, or an obligation of corporations organized under Acts of Congress which are instrumentalities of the United States. The interest for which a deduction shall be allowed is interest which is included in gross income and which is exempt from normal tax under the act, as amended and supplemented, which authorized the issuance of the obligations. The deduction allowed by section 242(a) is allowed only for the purpose of computing normal tax, and therefore, no deduction is allowed for such interest in the computation of any surtax imposed by Subtitle A of the Internal Revenue Code of 1954.

[T.D. 7100, 36 FR 5333, Mar. 20, 1971]

§1.243–1 Deduction for dividends received by corporations.

(a)(1) A corporation is allowed a deduction under section 243 for dividends received from a domestic corporation which is subject to taxation under Chapter 1 of the Internal Revenue Code of 1954.

(2) Except as provided in section 243(c) and in section 246, the deduction is:

(i) For the taxable year, an amount equal to 85 percent of the dividends received from such domestic corporations during the taxable year (other than dividends to which subdivision (ii) or (iii) of this subparagraph applies).

(ii) For a taxable year beginning after September 2, 1958, an amount equal to 100 percent of the dividends received from such domestic corporations if at the time of receipt of such dividends the recipient corporation is a Federal licensee under the Small Business Investment Act of 1958 (15 U.S.C. ch. 14B). However, to claim the deduction provided by section 243(a)(2) the company must file with its return a statement that it was a Federal licensee under the Small Business Investment Act of 1958 at the time of the receipt of the dividends.

(iii) For a taxable year ending after December 31, 1963, an amount equal to 100 percent of the dividends received which are *qualifying dividends,* as defined in section 243(b) and §1.243–4.

(3) To determine the amount of the distribution to a recipient corporation and the amount of the dividend, see §§1.301–1 and 1.316–1.

(b) For limitation on the dividends received deduction, see section 246 and the regulations thereunder.

[T.D. 6992, 34 FR 817, Jan. 18, 1969]

§1.243–2 Special rules for certain distributions.

(a) *Dividends paid by mutual savings banks, etc.* In determining the deduction provided in section 243(a), any amount allowed as a deduction under section 591 (relating to deduction for dividends paid by mutual savings banks, cooperative banks, and domestic building and loan associations) shall not be considered as a dividend.

(b) *Dividends received from regulated investment companies.* In determining the deduction provided in section 243(a), dividends received from a regulated investment company shall be subject to the limitations provided in section 854.

(c) *Dividends received from real estate investment trusts.* See section 857(c) and paragraph (d) of §1.857–6 for special rules which deny a deduction under section 243 in the case of dividends received from a real estate investment trust with respect to a taxable year for which such trust is taxable under Part II, Subchapter M, Chapter 1 of the Code.

(d) *Dividends received on preferred stock of a public utility.* The deduction allowed by section 243(a) shall be determined without regard to any dividends described in section 244 (relating to dividends on the preferred stock of a public utility). That is, such deduction shall be determined without regard to any dividends received on the preferred stock of a public utility which is subject to taxation under Chapter 1 of the Code and with respect to which a deduction is allowed by section 247 (relating to dividends paid on certain preferred stock of public utilities). For a deduction with respect to such dividends received on the preferred stock of a public utility, see section 244. If a deduction for dividends paid is not allowable to the distributing corporation under section 247 with respect to the dividends on its preferred stock, such dividends received from a domestic public utility corporation subject to taxation under Chapter 1 of the Code are includible in determining the deduction allowed by section 243(a).

[T.D. 6598, 27 FR 4092, Apr. 28, 1962, as amended by T.D. 6992, 34 FR 817, Jan. 18, 1969; T.D. 7767, 46 FR 11264, Feb. 6, 1981]

§1.243–3 Certain dividends from foreign corporations.

(a) *In general.* (1) In determining the deduction provided in section 243(a), section 243(d) provides that a dividend received from a foreign corporation after December 31, 1959, shall be treated as a dividend from a domestic corporation which is subject to taxation under chapter 1 of the Code, but only to the extent that such dividend is out of earnings and profits accumulated by a domestic corporation during a period with respect to which such domestic corporation was subject to taxation under Chapter 1 of the Code (or corresponding provisions of prior law). Thus, for example, if a domestic corporation accumulates earnings and profits during a period or periods with respect to which it is subject to taxation under Chapter 1 of the Code (or corresponding provisions of prior law) and subsequently such domestic corporation reincorporates in a foreign country, any dividends paid out of such earnings and profits after such reincorporation are eligible for the deduction provided in section 243(a) (1) and (2).

(2) Section 243(d) and this section do not apply to dividends paid out of earnings and profits accumulated (i) by a corporation organized under the China Trade Act, 1922, (ii) by a domestic corporation during any period with respect to which such corporation was exempt from taxation under section 501 (relating to certain charitable, etc. organizations) or 521 (relating to farmers' cooperative associations), or (iii) by a domestic corporation during any period to which section 931 (relating to income from sources within possessions of the United States) applied.

(b) *Establishing separate earnings and profits accounts.* A foreign corporation shall, for purposes of section 243(d), maintain a separate account for earnings and profits to which it succeeds which were accumulated by a domestic corporation, and such foreign corporation shall treat such earnings and profits as having been accumulated during the accounting periods in which earned by such domestic corporation. Such foreign corporation shall also maintain such a separate account for the earnings and profits, or deficit in earnings and profits, accumulated by it or accumulated by any other corporations to the earnings and profits of which it succeeds.

(c) *Effect of dividends on earnings and profits accounts.* Dividends paid out of the accumulated earnings and profits (see section 316(a)(1) of such foreign corporation shall be treated as having been paid out of the most recently accumulated earnings and profits of such corporation. A deficit in an earnings and profits account for any accounting period shall reduce the most recently accumulated earnings and profits for a prior accounting period in such account. If there are no accumulated earnings and profits in an earnings and profits account because of a deficit incurred in a prior accounting period, such deficit must be restored before earnings and profits can be accumulated in a subsequent accounting period. If a dividend is paid out of earnings and profits of a foreign corporation which maintains two or more accounts (established under the provisions of paragraph (b) of this section) with respect to two or more accounting periods ending on the same day, then the portion of such dividend considered as paid out of each account shall be the same proportion of the total dividend as the amount of earnings and profits in that account bears to the sum of the earnings and profits in all such accounts.

(d) *Illustration.* The application of the principles of this section in the determination of the amount of the dividends received deduction may be illustrated by the following example:

Example. On December 31, 1960, corporation X, a calendar-year corporation organized in the United States on January 1, 1958, consolidated with corporation Y, a foreign corporation organized on January 1, 1958, which used an annual accounting period based on the calendar year, to form corporation Z, a foreign corporation not engaged in trade or business within the United States. Corporation Z is a wholly-owned subsidiary of corporation M, a domestic corporation. On January 1, 1961, corporation Z's accumulated earnings and profits of $31,000 are, under the provisions of paragraph (b) of this section, maintained in separate earnings and profits accounts containing the following amounts:

Earnings and profits accumulated for—	Domestic corp. X	Foreign corp. Y
1958	($1,000)	$11,000
1959	10,000	9,000
1960	5,000	(3,000)

Corporation Z had earnings and profits of $10,000 in each of the years 1961, 1962, and 1963 and makes distributions with respect to its stock to corporation M for such years in the following amounts:

1961	$14,000
1962	23,000
1963	16,000

(1) For 1961, a deduction of $3,400 is allowable to M with respect to the $14,000 distribution from Z, computed as follows:

(i) Dividend from current year earnings and profits (1961)	$10,000
(ii) Dividend from earnings and profits of corporation X accumulated for 1960	4,000
(iii) Deduction: 85 percent of $4,000 (the amount distributed from the accumulated earnings and profits of corporation X)	3,400

(2) For 1962, a deduction of $6,970 is allowable to corporation M with respect to the $23,000 distribution from corporation Z, computed as follows:

(i) Dividend from current year earnings and profits (1962)		$10,000
(ii) Dividend from earnings and profits of corporation X accumulated for:		
1960	$1,000	
1959: $9,000 (i.e., $10,000 − $1,000) divided by $15,000 (i.e., $9,000+$9,000 − $3,000) multiplied by $12,000 (i.e., $23,000 − $11,000)		7,200
Total	8,200	
(iii) Dividend from earnings and profits of corporation Y accumulated for:		
1959: $6,000/$15,000×$12,000		4,800
(iv) Deduction: 85 percent of $8,200 (the amount distributed from the accumulated earnings and profits of corporation X)		6,970

(3) For 1963, a deduction of $1,530 is allowable to M with respect to the $16,000 distribution from Z, computed as follows:

(i) Dividend from current year earnings and profits (1963)	$10,000
(ii) Dividend from earnings and profits of corporation X accumulated for 1959:	
Earnings and profits remaining after 1962 distribution (i.e., $9,000 − $7,200)	1,800
(iii) Dividend from earnings and profits of corporation Y accumulated for 1959:	
Earnings and profits remaining after 1962 distribution (i.e., $6,000 − $4,800)	1,200
1958	8,000
(iv) Deduction: 85 percent of $1,800 (the amount distributed from the accumulated earnings and profits of corporation X)	1,530

[T.D. 6830, 30 FR 8045, June 23, 1965]

§ 1.243–4 Qualifying dividends.

(a) *Definition of qualifying dividends*—(1) *General.* For purposes of section 243(a)(3), the term *qualifying dividends* means dividends received by a corporation if:

(i) At the close of the day the dividends are received, such corporation is a member of the same affiliated group of corporations (as defined in paragraph (b) of this section) as the corporation distributing the dividends,

(ii) An election by such affiilated group under section 243(b)(2) and paragraph (c) of this section is effective for the taxable years of its members which include such day, and

(iii) The dividends are distributed out of earnings and profits specified in subparagraph (2) of this paragraph.

(2) *Earnings and profits.* The earnings and profits specified in this subparagraph are earnings and profits of a taxable year of the distributing corporation (or a predecessor corporation) which satisfies each of the following conditions:

(i) Such year must end after December 31, 1963;

(ii) On each day of such year the distributing corporation (or the predecessor corporation) and the corporation receiving the dividends must have been members of the affiliated group of which the distributing corporation and the corporation receiving the dividends are members on the day the dividends are received; and

(iii) An election under section 1562 (relating to the election of multiple surtax exmptions) was never effective (or is no longer effective pursuant to section 1562(c)) for such year.

(3) *Special rule for insurance companies.* Notwithstanding the provisions of

subparagraph (2) of this paragraph, if an insurance company subject to taxation under section 802 or 821 distributes a dividend out of earnings and profits of a taxable year with respect to which the company would have been a component member of a controlled group of corporations within the meaning of section 1563 were it not for the application of section 1563(b)(2)(D), such dividend shall not be treated as a qualifying dividend unless an election under section 243(b)(2) is effective for such taxable year.

(4) *Predecessor corporations.* For purposes of this paragraph, a corporation shall be considered to be a predecessor corporation with respect to a distributing corporation if the distributing corporation succeeds to the earnings and profits of such corporation, for example, as the result of a transaction to which section 381(a) applies. A distributing corporation shall, for purposes of this section, maintain, in respect of each predecessor corporation, a separate account for earnings and profits to which it succeeds, and such earnings and profits shall be considered to be earnings and profits of the predecessor's taxable year in which the earnings and profits were accumulated.

(5) *Mere change in form.* (i) For purposes of subparagraph (2)(ii) of this paragraph, the affiliated group in existence during the taxable year out of the earnings and profits of which the dividend is distributed shall not be considered as a different group from that in existence on the day on which the dividend is received merely because:

(a) The common parent corporation has undergone a mere change in identity, form, or place of organization (within the meaning of section 368(a)(1)(F)), or

(b) A newly organized corporation (the ‘‘acquiring corporation’’) has acquired substantially all of the outstanding stock of the common parent corporation (the ‘‘acquired corporation’’) solely in exchange for stock of such acquiring corporation, and the stockholders (immediately before the acquisition) of the acquired corporation, as a result of owning stock of the acquired corporation, own (immediately after the acquisition) all of the outstanding stock of the acquiring corporation.

If a transaction described in the preceding sentence has occurred, the acquiring corporation shall be treated as having been a member of the affiliated group for the entire period during which the acquired corporation was a member of such group.

(ii) For purposes of subdivision (i) (b) of this subparagraph, if immediately before the acquisition:

(a) The stockholders of the acquired corporation also owned all of the outstanding stock of another corporation (the ‘‘second corporation’’), and

(b) Stock of the acquired corporation and of the second corporation could be acquired or transferred only as a unit (hereinafter referred to as the ‘‘limitation on transferability’’), then the second corporation shall be treated as an acquired corporation and such second corporation shall be treated as having been a member of the affiliated group for the entire period (while such group was in existence) during which the limitation on transferability was in existence, and if the second corporation is itself the common parent corporation of an affiliated group (the ‘‘second group’’) any other member of the second group shall be treated as having been a member of the affiliated group for the entire period during which it was a member of the second group while the limitation on transferability existed. For purposes of *(a)* of this subdivision and subdivision (i)*(b)* of this subparagraph, if the limitation on transferability of stock of the acquired corporation and the second corporation is achieved by using a voting trust, then the stock owned by the trust shall be considered as owned by the holders of the beneficial interests in the trust.

(6) *Source of distributions.* In determining from what year's earnings and profits a dividend is treated as having been distributed for purposes of this section, the principles of paragraph (a) of §1.316–2 shall apply. A dividend shall be considered to be distributed, first, out of the earnings and profits of the taxable year which includes the date the dividend is distributed, second, out of the earnings and profits accumulated for the immediately preceding taxable year, third, out of the earnings

and profits accumulated for the second preceding taxable year, etc. A deficit in an earnings and profits account for any taxable year shall reduce the most recently accumulated earnings and profits for a prior year in such account. If there are no accumulated earnings and profits in an earnings and profits account because of a deficit incurred in a prior year, such deficit must be restored before earnings and profits can be accumulated in a subsequent year. If a dividend is distributed out of separate earnings and profits accounts (established under the provisions of subparagraph (4) of this paragraph) for two or more taxable years ending on the same day, then the portion of such dividend considered as distributed out of each account shall be the same proportion of the total dividend as the amount of earnings and profits in that account bears to the sum of the earnings and profits in all such accounts.

(7) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. On March 1, 1965, corporation P, a publicly owned corporation, acquires all of the stock of corporation S and continues to hold the stock throughout the remainder of 1965 and all of 1966. P and S are domestic corporations which file separate returns on the basis of a calendar year. The affiliated group consisting of P and S makes an election under section 243(b)(2) which is effective for the 1966 taxable years of P and S. A multiple surtax exemption election under section 1562 is not effective for their 1965 taxable years. On February 1, 1966, S distributes $50,000 with respect to its stock which is received by P on the same date. S had earnings and profits of $40,000 for 1966 (computed without regard to distributions during 1966). S also had earnings and profits accumulated for 1965 of $70,000. Since $40,000 was distributed out of earnings and profits for 1966 and since each of the conditions prescribed in subparagraphs (1) and (2) of this paragraph is satisfied, P is entitled to a 100-percent dividends received deduction with respect to $40,000 of the $50,000 distribution. However, since $10,000 was distributed out of earnings and profits accumulated for 1965, and since on each day of 1965 S and P were not members of the affiliated group of which S and P were members on February 1, 1966, $10,000 of the $50,000 distribution does not satisfy the condition specified in subparagraph (2)(ii) of this paragraph and thus does not qualify for the 100-percent dividends received deduction.

Example 2. Assume the same facts as in *Example (1),* except that corporation P acquires all the stock of corporation S on January 1, 1965, and sells such stock on November 1, 1966. Since $10,000 is distributed out of earnings and profits for 1965, and since each of the conditions prescribed in subparagraphs (1) and (2) of this paragraph is satisfied, P is entitled to a 100-percent dividends received deduction with respect to $10,000 of the $50,000 distribution. However, since $40,000 of the $50,000 distribution was made out of earnings and profits of S for its 1966 taxable year, and on each day of such year S and P were not members of the affiliated group of which S and P were members on February 1, 1966, $40,000 of the distribution does not satisfy the condition specified in subparagraph (2)(ii) of this paragraph and thus does not qualify for the 100-percent dividends received deduction.

Example 3. Assume the same facts as in *Example (1),* except that corporation P acquires all the stock of corporation S on January 1, 1965, and that a multiple surtax exemption election under section 1562 is effective for P's and S's 1965 taxable years. Further assume that the section 1562 election is terminated effective with respect to their 1966 taxable years, and that an election under section 243(b) (2) is effective for such taxable years. Since $10,000 of the February 1, 1966, distribution was made out of earnings and profits of S for its 1965 taxable year and since a multiple surtax exemption election is effective for such year, $10,000 of the distribution does not satisfy the condition specified in subparagraph (2) (iii) of this paragraph and thus does not qualify for the 100-percent dividends received deduction. However, the portion of the distribution which was distributed out of earnings and profits of S's 1966 year ($40,000) qualifies for the 100-percent dividends received deduction.

Example 4. Assume the same facts as in *Example (1),* except that corporation P acquires all the stock of corporation S on January 1, 1965, and that S is a life insurance company subject to taxation under section 802. Accordingly, S would have been a member of a controlled group of corporations except for the application of section 1563(b)(2)(D). Since $10,000 of the distribution was made out of earnings and profits of S for its 1965 taxable year, and since with respect to such year an election under section 243(b)(2) was not effective, $10,000 of the distribution is not a qualifying dividend by reason of subparagraph (3) of this paragraph. On the other hand, the portion of the distribution which was distributed out of earnings and profits for S's 1966 year ($40,000) does qualify for the 100-percent dividends received deduction because the distribution was out of earnings and profits of a year for which an election under section 243(b) (2) is effective, and because the other conditions specified in subparagraphs (1) and (2) of this paragraph are satisfied. However, if P were also a life insurance company subject to taxation under section 802, then subparagraph (3) of this paragraph would not result in the disqualification of the portion of the distribution made out of S's 1965 earnings and profits because S would be a component member of an insurance group of corporations (as defined in section 1563(a)(4)), consisting of P and S, with respect to its 1965 year.

Example 5. Corporation X owns all the stock of corporation Y from January 1, 1965, through December 31, 1969. X and Y are domestic corporations which file separate returns on the basis of a calendar year. On June 30, 1965, Y acquired all the stock of domestic corporation Z, a calendar year taxpayer, and on December 31, 1967, Y acquired the assets of Z in a transaction to which section 381(a) applied. A multiple surtax exemption election under section 1562, was not effective for any taxable year of X, Y, or Z, and an election under section 243(b)(2) is effective for the 1968 and 1969 taxable years of X and Y. On January 1, 1968, Y's accumulated earnings and profits are, under the provisions of subparagraph (4) of this paragraph, maintained in separate earnings and profits accounts containing the following amounts:

Earnings and profits accumulated for	Corp	Corp
	Y	Z
1964	$60,000	$40,000
1965	30,000	15,000
1966	(5,000)	2,000
1967	12,000	6,000

Corporation Y had earnings and profits of $10,000 in each of the years 1968 and 1969, and made distributions during such years in the following amounts:

1968	$29,000
1969	31,000

(i) The source of the 1968 distribution, determined in accordance with the rules of subparagraph (6) of this paragraph, is as follows:

(a) Dividend from Y's current year's earnings and profits (1968)	$10,000
(b) Dividend from earnings and profits of Y accumulated for 1967	12,000
(c) Dividend from earnings and profits of Z accumulated for:.	
1967	6,000
1966	1,000
	29,000

Since the 1968 dividend is considered paid out of earnings and profits of Y's 1968 and 1967 years, and Z's 1967 and 1966 years, and since each of these years satisfies each of the conditions specified in subparagraph (2) of this paragraph, X is entitled to a 100-percent dividends received deduction with respect to the entire 1968 distribution of $29,000 from Y.

(ii) The source of the 1969 distribution of $31,000, determined in accordance with the rules of subparagraph (6) of this paragraph, is as follows:

(*a*) Dividend from Y's current year's earnings and profits (1969)	$10,000
(*b*) Dividend from earnings and profits of Z accumulated for 1966 (1966 earnings and profits remaining after 1968 distribution, i.e., $2,000 − $1,000	1,000
(*c*) Dividend from earnings and profits of Y and Z accumulated for 1965:	
Corporation Y: $25,000 (i.e., $30,000 − $5,000 deficit) divided by $40,000 (i.e., the sum of the 1965 earnings and profits of Y and Z) multiplied by $20,000 (the portion of the distribution from the 1965 earnings and profits of Y and Z)	12,500
Corporation Z: $15,000 divided by $40,000 multiplied by $20,000	7,500
	31,000

The sum of the dividends from Y's 1969 year ($10,000), Z's 1966 year ($1,000), and Y's 1965 year ($12,500), or $23,500, qualifies for the 100-percent dividends received deduction. However, the dividends paid out of Z's 1965 year ($7,500) do not qualify because on each day of 1965 Z and X were not members of the affiliated group of which Y (the distributing corporation) and X (the corporation receiving the dividends) were members on the day in 1969 when the dividends were received by X.

(b) *Definition of affiliated group.* For purposes of this section and §1.243–5, the term *affiliated group* shall have the meaning assigned to it by section 1504(a), except that insurance companies subject to taxation under section 802 or 821 shall be treated as includible corporations (notwithstanding section 1504(b)(2)), and the provisions of section 1504(c) shall not apply.

(c) *Election*—(1) *Manner and time of making election*—(i) *General.* The election provided by section 243(b)(2) shall be made for an affiliated group by the common parent corporation and shall be made for a particular taxable year of the common parent corporation. Such election may not be made for any taxable year of the common parent corporation for which a multiple surtax exemption election under section 1562 is effective. The election shall be made by means of a statement, signed by any person who is duly authorized to act on behalf of the common parent corporation, stating that the affiliated group elects under section 243(b)(2) for such taxable year. The statement shall be filed with the district director for the internal revenue district in which is located the principal place of business or principal office or agency of the common parent. The statement shall set forth the name, address, taxpayer account number, and taxable year of each corporation (including wholly-owned subsidiaries) that is a member of the affiliated group at the time the election is filed. The statement may be filed at any time, provided that, with respect to each corporation the tax liability of which for its matching taxable year of election (or for any subsequent taxable year) would be increased because of the election, at the time of filing there is at least 1 year remaining in the statutory period (including any extensions thereof) for the assessment of a deficiency against such corporation for such year. (If there is less than 1 year remaining with respect to any taxable year, the district director for the internal revenue district in which is located the principal place of business or principal office or agency of the corporation will ordinarily, upon request, enter into an agreement to extend such statutory period for assessment and collection of deficiencies.

(ii) *Information statement by common parent.* If a corporation becomes a member of the affiliated group after the date on which the election is filed and during its matching taxable year of election, then the common parent shall file, within 60 days after such corporation becomes a member of the affiliated group, an additional statement containing the name, address, taxpayer account number, and taxable year of such corporation. Such additional statement shall be filed with the internal revenue officer with whom the election was filed.

(iii) *Definition of matching taxable year of election.* For purposes of this paragraph and paragraphs (d) and (e) of this section, the term *matching taxable year of election* shall mean the taxable year of each member (including the common parent corporation) of the electing affiliated group which includes the last day of the taxable year of the common parent corporation for which an election by the affiiliated group is made under section 243(b)(2).

(2) *Consents by subsidiary corporations*—(i) *General.* Each corporation (other than the common parent corporation) which is a member of the electing affiliated group (including any member which joins in the filing of a consolidated return) at any time during its matching taxable year of election must consent to such election in the manner and time provided in subdivision (ii) or (iii) of this subparagraph, whichever is applicable.

(ii) *Wholly owned subsidiary.* If all of the stock of a corporation is owned by a member or members of the affiliated group on each day of such corporation's matching taxable year of election, then such corporation (referred to in this paragraph as a ''wholly owned subsidiary'') shall be deemed to consent to such election.

(iii) *Other members.* The consent of each member of the affiliated group (other than a wholly owned subsidiary) shall be made by means of a statement, signed by any person who is duly authorized to act on behalf of the consenting member, stating that such member consents to the election under section 243(b)(2). The statement shall set forth the name, address, taxpayer account number, and taxable year of the consenting member and of the common parent corporation, and in the case of a statement filed after December 31, 1968, the identity of the internal revenue district in which is located the principal place of business or principal office or agency of the common parent corporation. The consent of more than one such member may be incorporated in a single statement. The statement (or statements) shall be attached to the election filed by the common parent corporation. The consent of a corporation that, after the date the election was filed and during its matching taxable year of election, either *(a)* becomes a member, or *(b)* ceases to be a wholly owned subsidiary but continues to be a member, shall be filed with the internal revenue officer with whom the election was filed and shall be filed on or before the date prescribed by law (including extensions of time) for the filing of the consenting member's income tax return for such taxable year, or on or before June 10, 1964, whichever is later.

(iv) *Statement attached to return.* Each corporation that consents to an election by means of a statement described in subdivision (iii) of this subparagraph should attach a copy of the statement to its income tax return for its matching taxable year of election, or, if such return has already been filed, to its first income tax return filed on or after the date on which the statement is filed. However, if such return is filed on or before June 10, 1964, a copy of such statement should be filed on or before June 10, 1964, with the district director with whom such return is filed. Each wholly owned subsidiary should attach a statement to its income tax return for its matching taxable year of election, or, if such return has already been filed, to its first income tax return filed on or after the date on which the statement is filed stating that it is subject to an election under section 243(b)(2) and the taxable year to which the election applies, and setting forth the name, address, taxpayer account number, and taxable year of the common parent corporation, and in the case of a statement filed after December 31, 1968, the identity of the internal revenue district in which is located the principal place of business or principal office or agency of the common parent corporation. However, if the due date for such return (including extensions of time) is before June 10, 1964, such statement should be filed on or before June 10, 1964, with the district director with whom such return is filed.

(3) *Information statement by member.* If a corporation becomes a member of the affiliated group during a taxable year that begins after the last day of the common parent corporation's matching taxable year of election, then (unless such election has been terminated) such corporation should attach a statement to its income tax return for such taxable year stating that it is subject to an election under section 243(b)(2) for such taxable year and setting forth the name, address, taxpayer account number, and taxable year of the common parent corporation, and the identity of the internal revenue district in which is located the principal place of business or principal office or agency of the common parent corporation. In the case of an affiliated group that made an election under the rules provided in Treasury Decision 6721, approved April 8, 1964 (29 FR 4997, C.B. 1964–1 (Part 1), 625), such statement shall be filed, on or before March 15, 1969, with the district director for the internal revenue district in which is located such member's principal place of business or principal office or agency.

(4) *Years for which election effective*—(i) *General rule.* An election under section 243(b)(2) by an affiliated group shall be effective:

(a) In the case of each corporation which is a member of such group at any time during its matching taxable year of election, for such taxable year, and

(b) In the case of each corporation which is a member of such group at any time during a taxable year ending after the last day of the common parent's taxable year of election but which does not include such last day, for such taxable year, unless the election is terminated under section 243(b)(4) and paragraph (e) of this section. Thus, the election has a continuing effect and need not be renewed annually.

(ii) *Special rule for certain taxable years ending in 1964.* In the case of a taxable year of a member (other than the common parent corporation) of the affiliated group *(a)* which begins in 1963 and ends in 1964, and *(b)* for which an election is not effective under subdivision (i)*(a)* of this subparagraph, if an election under section 243(b)(2) is effective for the taxable year of the common parent corporation which includes the last day of such taxable year of such member, then such election shall be effective for such taxable year of such member if such member files a separate consent with respect to such taxable year. However, in order for a dividend distributed by such member during such taxable year to meet the requirements of section 243(b)(1), an election under section 243(b)(2) must be effective for the taxable year of each member of the affiliated group which includes the date such dividend is received. See section 243(b)(1)(A) and paragraph (a)(1) of this section. Accordingly, if the dividend is to qualify for the 100-percent dividends received deduction under section 243(a)(3), a consent must be filed under this subdivision by each member of the affiliated group with respect to its taxable year which includes the day the dividend is received (unless an election is effective for such taxable year under subdivision (i)*(a)* of this subparagraph). For purposes of this subdivision, a consent shall be made by means of a statement meeting the requirements of subparagraph (2)(iii) of this paragraph, and shall be attached to the election made by the common parent corporation for its taxable year which includes the last day of the taxable year of the member with respect to which the consent is made. A copy of the statement should be filed, within 60 days after such election is filed by the common parent corporation, with the district director with whom the consenting member filed its income tax return for such taxable year.

(iii) *Examples.* The provisions of subdivision (ii) of this subparagraph, relating to the special rule for certain taxable years ending in 1964, may be illustrated by the following examples:

Example 1. P Corporation owns all the stock of S–1 Corporation on each day of 1963, 1964, and 1965. P uses the calendar year as its taxable year and S–1 uses a fiscal year ending June 30 as its taxable year. P makes an election under section 243(b)(2) for 1964. Since S–1 is a wholly owned subsidiary for its taxable year ending June 30, 1965, it is deemed to consent to the election. However, in order for the election to be effective with respect to S–1's taxable year ending June 30, 1964, a statement specifying that S–1 consents to the election with respect to such taxable year and containing the information required in a statement of consent under subparagraph (2)(iii) of this paragraph must be attached to the election.

Example 2. Assume the same facts as in *Example (1),* except that P also owns all the stock of S–2 Corporation on each day of 1963, 1964, and 1965. S–2 uses a fiscal year ending May 31 as its taxable year. If S–1 distributes a dividend to P on January 15, 1964, the dividend may qualify under section 243(a)(3) only if S–1 and S–2 both consent to the election made by P for 1964 with respect to their taxable years ending in 1964.

Example 3. Assume the same facts as in *Example (1),* except that P uses a fiscal year ending on January 31 as its taxable year and makes an election under subparagraph (1) of this paragraph for its taxable year ending January 31, 1964. Since S–1's taxable year beginning in 1963 and ending in 1964 includes January 31, 1964, the last day of P's taxable year for which the election was made, the election is effective under subdivision (i)*(a)* of this subparagraph, for S–1's taxable year ending June 30, 1964. Accordingly, the special rule of subdivision (ii) of this subparagraph has no application.

(d) *Effect of election.* For restrictions and limitations applicable to corporations which are members of an electing affiliated group on each day of their taxable years, see § 1.243–5.

(e) *Termination of election*—(1) *In general.* An election under section 243(b)(2) by an affiliated group may be terminated with respect to any taxable year of the common parent corporation after the matching taxable year of election of the common parent corporation. The election is terminated as a result of one of the occurrences described in subparagraph (2) or (3) of this paragraph. For years affected by termination, see subparagraph (4) of this paragraph.

(2) *Consent of members*—(i) *General.* An election may be terminated for an affiliated group by its common parent corporation with respect to a taxable year of the common parent corporation provided each corporation (other than the common parent) that was a member of the affiliated group at any time during its taxable year that includes the last day of such year of the common parent (the ''matching taxable year of termination'') consents to such termination. The statement of termination may be filed by the common parent corporation at any time, provided that, with respect to each corporation the tax liability of which for its matching taxable year of termination (or for any subsequent taxable year) would be increased because of the termination, at the time of filing there is at least 1 year remaining in the statutory period (including any extensions thereof) for the assessment of a deficiency against such corporation for such year. (If there is less than 1 year remaining with respect to any taxable year, the district director for the internal revenue district in which is located the principal place of business or principal office or agency of the corporation will ordinarily, upon request, enter into agreement to extend such statutory period for assessment and collection of deficiencies.)

(ii) *Statements filed after December 31, 1968.* With respect to statements of termination filed after December 31, 1968:

(a) The statement shall be filed with the district director for the internal revenue district in which is located the principal place of business or principal office or agency of the common parent corporation;

(b) The statement shall be signed by any person who is duly authorized to act on behalf of the common parent corporation and shall state that the affiliated group terminates the election under section 243(b)(2) for such taxable year;

(c) The statement shall set forth the name, address, taxpayer account number, and taxable year of each corporation (including wholly owned subsidiaries) which is a member of the affiliated group at the time the termination is filed; and

(d) The consents to the termination shall be given in accordance with the rules prescribed in paragraph (c)(2) of this section, relating to manner and time for giving consents to an election under section 243(b)(2).

(3) *Refusal by new member to consent*—(i) *Manner of giving refusal.* If any corporation which is a new member of an affiliated group with respect to a taxable year of the common parent corporation (other than the matching taxable year of election of the common parent corporation) files a statement that it does not consent to an election under section 243(b)(2) with respect to such taxable year, then such election shall terminate with respect to such taxable year. Such statement shall be signed by any person who is duly authorized to act on behalf of the new member, and shall be filed with the timely filed income tax return of such new member for its taxable year within which falls the last day of such taxable year of the common parent corporation. In the event of a termination under this subparagraph, each corporation (other than such new member) that is a member of the affiliated group at any time during its taxable year which includes such last day should, within 30 days after such new member files the statement of refusal to consent, notify the district director of such termination. Such notification should be filed with the district director for the internal revenue district in which is located the principal place of business or principal office or agency of the corporation.

(ii) *Corporation considered as new member.* For purposes of subdivision (i) of this subparagraph, a corporation shall be considered to be a new member of an affiliated group of corporations with respect to a taxable year of the common parent corporation if such corporation:

(a) Is a member of the affiliated group at any time during such taxable year of the common parent corporation, and

(b) Was not a member of the affiliated group at any time during the common parent corporation's immediately preceding taxable year.

(4) *Effect of termination.* A termination under subparagraph (2) or (3) of this paragraph is effective with respect to (i) the common parent corporation's taxable year referred to in the particular subparagraph under which the termination occurs, and (ii) the taxable years of the other members of the affiliated group which include the last day of such taxable year of the common parent. An election, once terminated, is no longer effective. Accordingly, the termination is also effective with respect to the succeeding taxable years of the members of the group. However, the affiliated group may make a new election in accordance with the provisions of section 243(b)(2) and paragraph (c) of this section.

[T.D. 6992, 34 FR 817, Jan. 18, 1969]

§1.243–5 Effect of election.

(a) *General*—(1) *Corporations subject to restrictions and limitations.* If an election by an affiliated group under section 243(b)(2) is effective with respect to a taxable year of the common parent corporation, then each corporation (including the common parent corporation) which is a member of such group on each day of its matching taxable year shall be subject to the restrictions and limitations prescribed by paragraphs (b), (c), and (d) of this section for such taxable year. For purposes of this section, the term *matching taxable year* shall mean the taxable year of each member (including the common parent corporation) of an affiliated group which includes the last day of a particular taxable year of the common parent corporation for which an election by the affiliated group under section 243(b)(2) is effective. If a corporation is a member of an affiliated group on each day of a short taxable year which does not include the last day of a taxable year of the common parent corporation, and if an election under section 243(b)(2) is effective for such short year, see paragraph (g) of this section. In the case of taxable years beginning in 1963 and ending in 1964 for which an election under section 243(b)(2) is effective under paragraph (c)(4)(ii) of § 1.243–4, see paragraph (f)(9) of this section.

(2) *Members filing consolidated returns.* The restrictions and limitations prescribed by this section shall apply notwithstanding the fact that some of the corporations which are members of the electing affiliated group (within the meaning of section 243(b)(5)) join in the filing of a consolidated return. Thus, for example, if an electing affiliated group includes one or more corporations taxable under section 11 of the Code and two or more insurance companies taxable under section 802 of the Code, and if the insurance companies join in the filing of a consolidated return, the amount of such companies' exemptions from estimated tax (for purposes of sections 6016 and 6655) shall be the amounts determined under paragraph (d)(5) of this section and not the amounts determined pursuant to the regulations under section 1502.

(b) *Multiple surtax exemption election*—(1) *General rule.* If an election by an affiliated group under section 243(b)(2) is effective with respect to a taxable year of the common parent corporation, then no corporation which is a member of such affiliated group on each day of its matching taxable year may consent (or shall be deemed to consent) to an election under section 1562(a)(1), relating to election of multiple surtax exemptions, which would be effective for such matching taxable year. Thus, each corporation which is a component member of the controlled group of corporations with respect to its matching taxable year (determined by applying section 1563(b) without regard to paragraph (2)(D) thereof) shall determine its surtax exemption for such taxable year in accordance with section 1561 and the regulations thereunder.

(2) *Special rule for certain insurance companies.* Under section 243(b)(6)(A), if the provisions of subparagraph (1) of this paragraph apply with respect to the taxable year of an insurance company subject to taxation under section 802 or 821, then the surtax exemption of such insurance company for such taxable year shall be determined by applying part II (section 1561 and following), subchapter B, chapter 6 of the Code, with respect to such insurance company and the other corporations which are component members of the controlled group of corporations (as determined under section 1563 without regard to subsections (a)(4) and (b)(2)(D) thereof) of which such insurance company is a member, without regard to section 1563(a)(4) (relating to certain insurance companies treated as a separate controlled group) and section 1563(b)(2)(D) (relating to certain insurance companies treated as excluded members).

(3) *Example.* The provisions of this paragraph may be illustrated by the following example:

Example. Throughout 1965 corporation M owns all the stock of corporations L–1, L–2, S–1, and S–2. M is a domestic mutual insurance company subject to tax under section 821 of the Code, L–1 and L–2 are domestic life insurance companies subject to tax under section 802 of the Code, and S–1 and S–2 are domestic corporations subject to tax under section 11 of the Code. Each corporation uses the calendar year as its taxable year. M makes a valid election under section 243(b)(2) for the affiliated group consisting of M, L–1, L–2, S–1, and S–2. If part II, subchapter B, chapter 6 of the Code were applied with respect to the 1965 taxable years of the corporations without regard to section 243(b)(6)(A), the following would result: S–1 and S–2 would be treated as component members of a controlled group of corporations on such date; L–1 and L–2 would be treated as component members of a separate controlled group on such date; and M would be treated as an excluded member. However, since section 243(b)(6)(A) requires that part II of subchapter B be applied without regard to section 1563(a)(4) and (b)(2)(D), for purposes of determing the surtax exemptions of M, L–1, L–2, S–1, and S–2 for their 1965 taxable years, such corporations are treated for purposes of such part II as component members of a single controlled group of corporations on December 31, 1965. Moreover, by reason of having made the election under section 243(b)(2), M, L-1, L–2, S–1, and S–2 cannot consent to multiple surtax exemption elections under section 1562 which would be effective for their 1965 taxable years. Thus, such corporations are limited to a single $25,000 surtax exemption for such taxable years (to be apportioned among such corporations in accordance with section 1561 and the regulations thereunder).

(c) *Foreign tax credit*—(1) *General.* If an election by an affiliated group under section 243(b)(2) is effective with respect to a taxable year of the common parent corporation, then:

(i) The credit under section 901 for taxes paid or accrued to any foreign country or possession of the United States shall be allowed to a corporation which is a member of such affiliated group for each day of its matching taxable year only if each other corporation which pays or accrues such foreign taxes to any foreign country or possession, and which is a member of such group on each day of its matching taxable year, does not deduct such taxes in computing its tax liability for its matching taxable year, and

(ii) A corporation which is a member of such affiliated group on each day of its matching taxable year may use the overall limitation provided in section 904(a)(2) for such matching taxable year only if each other corporation which pays or accrues foreign taxes to any foreign country or possession, and which is a member of such group on each day of its matching taxable year, uses such limitation for its matching taxable year.

(2) *Consent of the Commissioner.* In the absence of unusual circumstances, a request by a corporation for the consent of the Commissioner to the revocation of an election of the overall limitation, or to a new election of the overall limitation, for the purpose of satisfying the requirements of subparagraph (1)(ii) of this paragraph will be given favorable consideration, notwithstanding the fact that there has been no change in the basic nature of the corporation's business or changes in conditions in a foreign country which substantially affect the corporation's business. See paragraph (d)(3) of § 1.904–1.

(d) *Other restrictions and limitations*—(1) *General rule.* If an election by an affilated group under section 243(b)(2) is effective with respect to a taxable year of the common parent corporation, then, except to the extent that an apportionment plan adopted under paragraph (f) of this section for such taxable year provides otherwise with respect to a restriction or limitation described in this paragraph, the rules provided in subparagraphs (2), (3), (4), and (5) of this paragraph shall apply to each corporation which is a member of such affiliated group on each day of its matching taxable year for the purpose of computing the amount of such restriction or limitation for its matching taxable year. For purposes of this paragraph, each corporation which is a member of an electing affiliated group (including any member which joins in filing a consolidated return) shall be treated as a separate corporation for purposes of determining the amount of such restrictions and limitations.

(2) *Accumulated earnings credit*—(i) *General.* Except as provided in subdivision (ii) of this subparagraph, in determining the minimum accumulated earnings credit under section 535(c)(2) (or the accumulated earnings credit of a mere holding or investment company under section 535(c)(3) for each corporation which is a member of the affiliated group on each day of its matching taxable year, in lieu of the $150,000 amount ($100,000 amount in the case of taxable years beginning before January 1, 1975) mentioned in such sections there shall be substituted an amount equal to (*a*) $150,000 ($100,000 in the case of taxable years beginning before January 1, 1975), divided by (*b*) the number of such members.

(ii) *Allocation of excess.* If, with respect to one or more members, the amount determined under subdivision (i) of this subparagraph exceeds the sum of *(a)* such member's accumulated earnings and profits as of the close of the preceding taxable year, plus *(b)* such member's earnings and profits for the taxable year which are retained (within the meaning of section 535(c)(1), then any such excess shall be subtracted from the amount determined under subdivision (i) of this subparagraph and shall be divided equally among those remaining members of the affiliated group that do not have such an excess (until no such excess remains to be divided among those remaining members that have not had such an excess). The excess so divided among such remaining members shall be added to the amount determined under subdivision (i) with respect to such members.

(iii) *Apportionment plan not allowed.* An affiliated group may not adopt an apportionment plan, as provided in paragraph (f) of this section, with respect to the amounts computed under the provisions of this subparagraph.

(iv) *Example.* The provisions of this subparagraph may be illustrated by the following example;

Example. An affiliated group is composed of four member corporations, W, X, Y, and Z. The sum of the accumulated earnings and profits (as of the close of the preceding taxable year ending December 31, 1975) plus the earnings and profits for the taxable year ending December 31, 1976 which are retained is $15,000, $75,000, $37,500, and $300,000 in the case of W, X, Y, and Z, respectively. The amounts determined under this subparagraph for W, X, Y, and Z are $15,000, $48,750, $37,500 and $48,750, respectively, computed as follows:

	Component members			
	W	X	Y	Z
Earnings and profits	$15,000	$75,000	$37,500	$300,000
Amount computed under subpar. (1)	37,500	37,500	37,500	37,500
Excess	22,500	0	0	0
Allocation of excess	....	7,500	7,500	7,500
New excess	....	....	7,500	
Reallocation of new excess	....	3,750	....	3,750
Amount to be used for purposes of sec. 535(c) (2) and (3)	15,000	48,750	37,500	48,750

(3) *Mine exploration expenditures*—(i) *Limitation under section 615(a).* If the aggregate of the expenditures to which section 615(a) applies, which are paid or incurred by corporations which are members of the affiliated group on each day of their matching taxable years (during such taxable years) exceeds $100,000, then the deduction (or amount deferrable) under section 615 for any such member for its matching taxable year shall be limited to an amount equal to the amount which bears the same ratio to $100,000 as the amount deductible or deferrable by such member under section 615 (computed without regard to this subdivision) bears to the aggregate of the amounts deductible or deferrable under section 615 (as so computed) by all such members.

(ii) *Limitation under section 615(c).* If the aggregate of the expenditures to which section 615(a) applies which are paid or incurred by the corporations which are members of such affiliated group on each day of their matching taxable years (during such taxable years) would, when added to the aggregate of the amounts deducted or deferred in prior taxable years which are taken into account by such corporations in applying the limitation of section 615(c), exceed $400,000, then section 615 shall not apply to any such expenditure so paid or incurred by any such member to the extent such expenditure would exceed the amount which bears the same ratio to *(a)* the amount, if any, by which $400,000 exceeds the amounts so deducted or deferred in prior years, as *(b)* such member's deduction (or amount deferrable) under section 615 (computed without regard to this subdivision) for such expenditures paid or incurred by such member during its matching taxable year, bears to *(c)* the aggregate of the amounts deductible or deferrable under section 615 (as so computed) by all such members during their matching taxable years.

(iii) *Treatment of corporations filing consolidated returns.* For purposes of making the computations under subdivisions (i) and (ii) of this subparagraph, a corporation which joins in the filing of a consolidated return shall be treated as if it filed a separate return.

(iv) *Estimate of exploration expenditures.* If, on the date a corporation (which is a member of an affiliated group on each day of its matching taxable year) files its income tax return for such taxable year, it cannot be determined whether or not the $100,000 limitation prescribed by subdivision (i) of this subparagraph, or the $400,000 limitation prescribed by subdivision (ii) of this subparagraph, will apply with respect to such taxable year, then such member shall, for purposes of such return, apply the provisions of such subdivisions (i) and (ii) with respect to such taxable year on the basis of an estimate of the aggregate of the exploration expenditures by all such members of the affiliated group for their matching taxable years. Such estimate shall be made on the basis of the facts and circumstances known at the time of such estimate. If an estimate is used by any such member of the affiliated group pursuant to this subdivision, and if the actual expenditures by all such members differ from the estimate, then each such member shall file as soon as possible an original or amended return reflecting an amended apportionment (either pursuant to an apportionment plan adopted under paragraph (f) of this section or pursuant to the application of the rule provided by subdivision (i) or (ii) of this subparagraph) based upon such actual expenditures.

(v) *Amount apportioned under apportionment plan.* If an electing affiliated group adopts an apportionment plan as provided in paragraph (f) of this section with respect to the limitation under section 615(a) or 615(c), then the amount apportioned under such plan to any corporation which is a member of such group may not exceed the amount which such member could have deducted (or deferred) under section 615 had such affiliated group not filed an election under section 243(b)(2).

(4) *Small business deductions of life insurance companies.* In the case of a life insurance company taxable under section 802 which is a member of such affiliated group on each day of its matching taxable year, the small business deduction under sections 804(a)(4) and 809(d)(10) shall not exceed an amount equal to $25,000 divided by the number of life insurance companies taxable under section 802 which are members of such group on each day of their matching taxable years.

(5) *Estimated tax*—(i) *Exemption from estimated tax.* Except as otherwise provided in subdivision (ii) of this subparagraph, the exemption from estimated tax (for purposes of estimated tax filing requirements under section 6016 and the addition to tax under section 6655 for failure to pay estimated tax) of each corporation which is a member of such affiliated group on each day of its matching taxable year shall be (in lieu of the $100,000 amount specified in section 6016(a) and (b)(2)(A) and in section 6655(d)(1) and (e)(2)(A) an amount equal to $100,000 divided by the number of such members.

(ii) *Nonapplication to certain taxable years beginning in 1963 and ending in 1964.* For purposes of this section, if a corporation has a taxable year beginning in 1963 and ending in 1964 the last day of the eighth month of which falls on or before April 10, 1964, then (notwithstanding the fact that an election under section 243(b)(2) is effective for such taxable year) subdivision (i) of this subparagraph shall not apply to such corporation for such taxable year. Thus, such corporation shall be entitled to a $100,000 exemption from estimated tax for such taxable year. Also, with respect to a taxable year described in the first sentence of this subdivision, any such corporation shall not be considered to be a member of the affiliated group for purposes of determining the number of members referred to in subdivision (i) of this subparagraph.

(iii) *Examples.* The provisions of subdivision (i) of this subparagraph may be illustrated by the following examples:

Example 1. Corporation P owns all the stock of corporation S–1 on each day of 1965. On March 1, 1965, P acquires all the stock of corporation S–2. Corporations P, S–1, and S–2 file separate returns on a calendar year basis. On March 31, 1965, the affiliated group consisting of P, S–1, and S–2 anticipates making an election under section 243(b)(2) for P's 1965 taxable year. If the affiliated group does make a valid election under section 243(b)(2) for P's 1965 year, under subdivision (i) of this subparagraph the exemption from estimated tax of P for 1965, and the exemption from estimated tax of S–1 for 1965, will be (assuming an apportionment plan is not filed pursuant to paragraph (f) of this section) an amount equal to $50,000 ($100,000÷2). (Since S–2 is not a member of the affiliated group on each day of 1965, S–2's exemption from estimated tax will be determined for the year 1965 without regard to subdivision (i) of this subparagraph, whether or not the affiliated group makes the election under section 243(b)(2).) P and S–1 file declarations of estimated tax on April 15, 1965, on such basis and make payments with respect to such declarations on such basis. Thus, if the affiliated group does make a valid election under section 243(b)(2) for P's 1965 year, P and S–1 will not incur (as a result of the application of subdivision (i) of this subparagraph to their 1965 years) additions to tax under section 6655 for failure to pay estimated tax.

Example 2. Assume the same facts as in *Example (1)*, except that, on March 31, 1965, S–1 anticipates that it will incur a loss for its 1965 year. Accordingly, in anticipation of making an election under section 243(b)(2) for P's 1965 year and adopting an apportionment plan under paragraph (f) of this section, P computes its estimated tax liability for 1965 on the basis of a $100,000 exemption, and S–1 computes its estimated tax liability for 1965 on the basis of a zero exemption. Assume S–1 incurs a loss for 1965 as anticipated. Thus, if P does make the election for 1965, and an apportionment plan is adopted apportioning $100,000 to P and zero to S–1 (for their 1965 years), P and S–1 will not incur (as a result of the application of subdivision (i) of this subparagraph to their 1965 years) additions to tax under section 6655 for failure to pay estimated tax.

Example 3. Assume the same facts as in *Example (1)*, except that P and S–1 file declarations of estimated tax on April 15, 1965, on the basis of separate $100,000 exemptions from estimated tax for their 1965 years, and make payments with respect to such declarations on such basis. Assume that the affiliated group makes an election under section 243(b)(2) for P's 1965 year. Under subdivision (i) of this subparagraph, P and S–1 are limited in the aggregate to a single $100,000 exemption from estimated tax for their 1965 years. The provisions of section 6655 will be applied to the 1965 year of P and the 1965 year of S–1 on the basis of a $50,000 exemption from estimated tax for each corporation, unless a different apportionment of the $100,000 amount is adopted under paragraph (f) of this section. Since the election was made under section 243(b)(2), regardless of whether or not the affiliated group anticipated making the election, P or S–1 (or both) may incur additions to tax under section 6655 for failure to pay estimated tax.

(e) *Effect of election for certain taxable years beginning in 1963 and ending in 1964.* If an election under section 243(b)(2) by an affiliated group is effective for a taxable year of a corporation under paragraph (c)(4)(ii) of § 1.243–4 (relating to election for certain taxable years beginning in 1963 and ending in 1964), and if such corporation is a member of such group on each day of such taxable year, then the restrictions and limitations prescribed by paragraphs (b), (c), and (d) of this section shall apply to all such members having such taxable years (for such taxable years). For purposes of this paragraph, such paragraphs shall be applied with respect to such taxable years as if such taxable years included the last day of a taxable year of the common parent corporation for which an election was effective under section 243(b)(2), *i.e.*, as if such taxable years were matching taxable years. For apportionment plans with respect to such taxable years, see paragraph (f) (9) of this section.

(f) *Apportionment plans*—(1) *In general.* In the case of corporations which are members of an affiliated group of corporations on each day of their matching taxable years:

(i) The $100,000 amount referred to in paragraph (d)(3)(i) of this section (relating to limitation under section 615(a)),

(ii) The amount determined under paragraph (d)(3)(ii)*(a)* of this section (relating to limitation under section 615(c)),

(iii) The $25,000 amount referred to in paragraph (d)(4) of this section (relating to small business deduction of life insurance companies), and

(iv) The $100,000 amount referred to in paragraph (d)(5)(i) of this section (relating to exemption from estimated tax), may be apportioned among such members (for such taxable years) if the common parent corporation files an apportionment plan with respect to such taxable years in the manner provided in subparagraph (4) of this paragraph, and if all other members consent to the plan, in the manner provided in subparagraph (5) or (6) of this paragraph (whichever is applicable). The plan may provide for the apportionment to one or more of such members, in fixed dollar amounts, of one or more of the amounts referred to in subdivisions (i), (ii), (iii), and (iv) of this subparagraph, but in no event shall the sum of the amounts so apportioned in respect to any such subdivision exceed the amount referred to in such subdivision. See also paragraph (d)(3)(v) of this section, relating to the maximum amount that may be apportioned to a corporation under this subparagraph with respect to exploration expenditures to which section 615 applies.

(2) *Time for adopting plan.* An affiliated group may adopt an apportionment plan with respect to the matching taxable years of its members only if, at the time such plan is sought to be adopted, there is at least 1 year remaining in the statutory period (including any extensions thereof) for the assessment of a deficiency against any corporation the tax liability of which for any taxable year would be increased by the adoption of such plan. (If there is less than 1 year remaining with respect to any taxable year, the district director for the internal revenue district in which is located the principal place of business or principal office or agency of the corporation will ordinarily, upon request, enter into an agreement to extend such statutory period for assessment and collection of deficiencies.)

(3) *Years for which effective.* A valid apportionment plan with respect to matching taxable years of members of an affiliated group shall be effective for such matching taxable years, and for all succeeding matching taxable years of such members, unless the plan is amended in accordance with subparagraph (8) of this paragraph or is terminated. Thus, the apportionment plan (including any amendments thereof) has a continuing effect and need not be renewed annually. An apportionment plan with respect to a particular taxable year of the common parent shall terminate with respect to the taxable years of the members of the affiliated group which include the last day of a succeeding taxable year of the common parent if:

(i) Any corporation which was a member of the affiliated group on each day of its matching taxable year which included the last day of the particular taxable year of the common parent is not a member of such group on each day of its taxable year which includes the last day of such succeeding taxable year of the common parent, or

(ii) Any corporation which was not a member of such group on each day of its taxable year which included the last day of the particular taxable year of the common parent is a member of such group on each day of its taxable year which includes the last day of such succeeding taxable year of the common parent.

An apportionment plan, once terminated, is no longer effective. Accordingly, unless a new apportionment plan is filed and consented to (or the section 243(b)(2) election is terminated) the amounts referred to in subparagraph (1) of this paragraph will be apportioned among the corporations which are members of the affiliated group on each day of their matching taxable years in accordance with the rules provided in paragraphs (d)(3)(i), (d)(3)(ii), (d)(4), and (d)(5)(i) of this section.

(4) *Filing of plan.* The apportionment plan shall be in the form of a statement filed by the common parent corporation with the district director for the internal revenue district in which is located the principal place of business or principal office or agency of such common parent. The statement shall be signed by any person who is duly authorized to act on behalf of the common parent corporation and shall set forth the name, address, internal revenue district, taxpayer account number, and taxable year of each member to whom the common parent could apportion an amount under subparagraph (1) of this paragraph (or, in the case of an apportionment plan referred to in subparagraph (9) of this paragraph, each member to whom the common parent could apportion an amount under such subparagraph) and the amount (or amounts) apportioned to each such member under the plan.

(5) *Consent of wholly owned subsidiaries.* If all the stock of a corporation which is a member of the affiliated group on each day of its matching taxable year is owned on each such day by another corporation (or corporations) which is a member of such group on each day of its matching taxable year, such corporation (hereinafter in this paragraph referred to as a ‘‘wholly owned subsidiary’’) shall be deemed to consent to the apportionment plan. Each wholly owned subsidiary should attach a copy of the plan filed by the common parent corporation to an income tax return, amended return, or

claim for refund for its matching taxable year.

(6) *Consent of other members.* The consent of each member (other than the common parent corporation and wholly owned subsidiaries) to an apportionment plan shall be in the form of a statement, signed by any person who is duly authorized to act on behalf of the member consenting to the plan, stating that such member consents to the plan. The consent of more than one such member may be incorporated in a single statement. The statement (or statements) shall be attached to the apportionment plan filed by the common parent corporation. The consent of any such member which, after the date the apportionment plan was filed and during its matching taxable year referred to in subparagraph (1) of this paragraph, ceases to be a wholly owned subsidiary but continues to be a member, shall be filled with the district director with whom the apportionment plan is filed (as soon as possible after it ceases to be a wholly owned subsidiary). Each consenting member should attach a copy of the apportionment plan filed by the common parent to an income tax return, amended return, or claim for refund for its matching taxable year which includes the last day of the taxable year of the common parent corporation for which the apportionment plan was filed.

(7) *Members of group filing consolidated return*—(i) *General rule.* Except as provided in subdivision (ii) of this subparagraph, if the members of an affiliated group of corporations include one or more corporations taxable under section 11 of the Code and one or more insurance companies taxable under section 802 or 821 of the Code and if the affiliated group includes corporations which join in the filing of a consolidated return, then, for purposes of determining the amount to be apportioned to a corporation under an apportionment plan adopted under this paragraph, the corporations filing the consolidated return shall be treated as a single member.

(ii) *Consenting to an apportionment plan.* For purposes of consenting to an apportionment plan under subparagraphs (5) and (6) of this paragraph, if the members of an affiliated group of corporations include corporations which join in the filing of a consolidated return, each corporation which joins in filing the consolidated return shall be treated as a separate member.

(8) *Amendment of plan.* An apportionment plan, which is effective for the matching taxable years of members of an affiliated group, may be amended if an amended plan is filed (and consented to) within the time and in accordance with the rules prescribed in this paragraph for the adoption of an original plan with respect to such taxable years.

(9) *Certain taxable years beginning in 1963 and ending in 1964.* In the case of corporations which are members of an affiliated group of corporations on each day of their taxable years referred to in paragraph (e) of this section:

(i) The $100,000 amount referred to in paragraph (d)(3)(i) of this section (relating to limitation under section 615(a)),

(ii) The amount determined under paragraph (d)(3)(ii)*(a)* of this section (relating to limitation under section 615(c)),

(iii) The $25,000 amount referred to in paragraph (d)(4) of this section (relating to small business deduction of life insurance companies), and

(iv) The $100,000 amount referred to in paragraph (d)(5)(i) of this section (relating to exemption from estimated tax), may be apportioned among such members (for such taxable years) if an apportionment plan is filed (and consented to) with respect to such taxable years in accordance with the rules provided in subparagraphs (2), (4), (5), (6), (7), and (8) of this paragraph. For purposes of this subparagraph, such subparagraphs shall be applied as if such taxable years included the last day of a taxable year of the common parent corporation, i.e., as if such taxable years were matching taxable years. An apportionment plan adopted under this subparagraph shall be effective only with respect to taxable years referred to in paragraph (e) of this section. The plan may provide for the apportionment to one or more of such members, in fixed dollar amounts, of one or more of the amounts referred to in subdivisions (i), (ii), (iii), and (iv) of this subparagraph, but in no event shall the sum of the amounts so apportioned in respect of any such subdivision exceed the amount referred to in such subdivision. See also paragraph (d)(3)(v) of this section, relating to the maximum amount that may be apportioned to a corporation under an apportionment plan described in this subparagraph with respect to exploration expenditures to which section 615 applies.

(g) *Short taxable years*—(1) *General.* If:

(i) The return of a corporation is for a short period (ending after December 31, 1963) on each day of which such corporation is a member of an affiliated group,

(ii) The last day of the common parent's taxable year does not end with or within such short period, and

(iii) An election under section 243(b)(2) by such group is effective under paragraph (c) (4) (i) of § 1.243–4 for the taxable year of the common parent within which falls such short period, then the restrictions and limitations prescribed by section 243(b)(3) shall be applied in the manner provided in subparagraph (2) of this paragraph.

(2) *Manner of applying restrictions.* In the case of a corporation described in subparagraph (1) of this paragraph having a short period described in such subparagraph:

(i) Such corporation may not consent to an election under section 1562, relating to election of multiple surtax exemptions, which would be effective for such short period;

(ii) The credit under section 901 shall be allowed to such corporation for such short period if, and only if, each corporation, which pays or accrues foreign taxes and which is a member of the affiliated group on each day of its taxable year which includes the last day of the common parent's taxable year within which falls such short period, does not deduct such taxes in computing its tax liability for its taxable year which includes such last day;

(iii) The overall limitation provided in section 904(a)(2) shall be allowed to such corporation for such short period if, and only if, each corporation, which pays or accrues foreign taxes and which is a member of the affiliated group on each day of its taxable year which includes the last day of the common parent's taxable year within which falls such short period, uses such limitation for its taxable year which includes such last day;

(iv) The minimum accumulated earnings credit provided by section 535(c)(2) (or in the case of a mere holding or investment company, the accumulated earnings credit provided by section 535(c)(3)) allowable for such short period shall be the amount computed by dividing (a) the amount (if any) by which $100,000 exceeds the aggregate of the accumulated earnings and profits of the corporations, which are members of the affiliated group on the last day of such short period, as of the close of their taxable years preceding the taxable year which includes the last day of such short period, by (b) the number of such members on the last day of such short period;

(v) The deduction allowable under section 615(a) for such short period shall be limited to an amount equal to $100,000 divided by the number of corporations which are members of the affiliated group on the last day of such short period;

(vi) If the expenditures to which section 615(a) applies which are paid or incurred by such corporation during such short period would, when added to the aggregate of the amounts deducted or deferred (in taxable years ending before the last day of such short period) which are taken into account in applying the limitation of section 615(c) by corporations which are members of the affiliated group on the last day of such short period exceed $400,000, then section 615 shall not apply to any such expenditure so paid or incurred by such corporation to the extent such expenditure would exceed an amount equal to *(a)* the amount (if any) by which $400,000 exceeds the aggregate of the amounts so deducted or deferred in such taxable years (computed as if each member filed a separate return), divided by *(b)* the number of corporations in the group which have taxable years ending on such last day;

(vii) If such corporation is a life insurance company taxable under section 802, the small business deduction under sections 804(a)(4) and 809(d)(10) shall not exceed an amount equal to *(a)* $25,000, divided by *(b)* the number of life insurance companies taxable under section 802 which are members of the affiliated group on the last day of such short period; and

(viii) The exemption from estimated tax (for purposes of estimated tax filing requirements under section 6016 and the addition to tax under section 6655 for failure to pay estimated tax) for such short period shall be an amount equal to $100,000 divided by the number of corporations which are members of the affiliated group on the last day of such short period.

[T.D. 6992, 34 FR 821, Jan. 18, 1969, as amended by T.D. 7376, 40 FR 42745, Sept. 16, 1975]

§ 1.244–1 Deduction for dividends received on certain preferred stock.

A corporation is allowed a deduction under section 244 for dividends received on certain preferred stock of certain public utility corporations subject to taxation under chapter 1 of the Code. The deduction is allowable only for dividends received on the preferred stock of a public utility with respect to which the deduction for dividends paid provided in section 247 (relating to dividends paid on certain preferred stock of public utilities) is allowable to the distributing corporation.

§ 1.244–2 Computation of deduction.

(a) *General rule.* Section 244(a) provides a formula for the computation of the deduction for dividends received on the preferred stock of a public utility. For purposes of this computation, the normal tax rate referred to in section 244(a)(2)(B) shall be determined without regard to any additional tax imposed by section 1562(b). See section 1562(b)(4). The deduction computed under section 244(a) is subject to the limitation provided in section 246.

(b) *Qualifying dividends.* Section 244(b) provides that in the case of dividends received on the preferred stock of a public utility in taxable years ending after December 31, 1963, which are ‘‘qualifying dividends’’(as defined in section 243(b)(1), but determined without regard to section 243(c)(4)), the computation of the deduction for dividends received shall be made by applying the formula provided by section 244(a) separately to such qualifying dividends. For such purposes, 100 percent shall be used in lieu of the 85 percent specified in section 244(a)(3).

(c) *Examples.* The computation of the deduction provided in section 244 may be illustrated by the following examples:

Example 1. Corporation X, which files its income tax returns on the calendar year basis, received in 1965 $100,000 as dividends on the preferred stock of corporation Y, a public utility corporation which is subject to taxation under chapter 1 of the Code. The deduction provided in section 247 is allowable to Y, the distributing corporation, with respect to these dividends and they are not ‘‘qualifying dividends’’(as defined in section 243(b)(1) but determined without regard to section 243(c)(4)). The corporation normal tax rate and the surtax rate for the calendar year 1965 are 22 percent and 26 percent, respectively. The deduction allowable to X under section 244(a) for the year 1965 with respect to these dividends is $60,208.33, computed as follows:

Dividends received on preferred stock of corporation Y	$100,000.00
Less: The fraction specified in section 244(a)(2): 14/48×$100,000	29,166.67
Amount subject to 85-percent deduction	70,833.33
Deduction—85 percent of $70,833.33	60,208.33

The result would be the same if X or Y(or both) were subject to the 6-percent additional tax imposed by section 1562(b) for 1965.

Example 2. Assume the same facts as in *Example (1)* and also assume that in 1965 corporation X received $200,000 as dividends on the preferred stock of Corporation Z, a public utility corporation which is subject to taxation under chapter 1 of the Code. Assume further that such dividends are ‘‘qualifying dividends’’ (as defined in section 243(b)(1) but determined without regard to section 243(c)(4)). The deduction provided in section 247 is allowable to Z, the distributing corporation, with respect to these dividends. The deduction allowable to X under section 244 for the year 1965 is $201,875, computed as follows:

Deduction allowable under section 244(a) with respect to the dividend received from Y (see *Example (1)*)	$60,208.33
Deduction allowable under section 244(b) with respect to the dividend received from Z: Qualifying dividends received on preferred stock of corporation Z	200,000.00
Less: The fraction specified in section 244(a)(2): 14/48×$200,000	58,333.33
Deduction	141,666.67
Deduction allowable under section 244 for 1965	201,875.00

[T.D. 6992, 34 FR 825, Jan. 18, 1969]

§1.245–1 Dividends received from certain foreign corporations.

(a) *General rule.* (1) A corporation is allowed a deduction under section 245(a) for dividends received from a foreign corporation (other than a foreign personal holding company as defined in section 552) which is subject to taxation under chapter 1 of the Code if, for an uninterrupted period of not less than 36 months ending with the close of the foreign corporation's taxable year in which the dividends are paid, (i) the foreign corporation is engaged in trade or business in the United States, and (ii) 50 percent or more of the foreign corporation's entire gross income is effectively connected with the conduct of a trade or business in the United States by that corporation. If the foreign corporation has been in existence less than 36 months as of the close of the taxable year in which the dividends are paid, then the applicable uninterrupted period to be taken into consideration in lieu of the uninterrupted period of 36 or more months is the entire period such corporation has been in existence as of the close of such taxable year. An uninterrupted period which satisfied the twofold requirement with respect to business activity and gross income may start at a date later than the date on which the foreign corporation first commenced an uninterrupted period of engaging in trade or business within the United States, but the applicable uninterrupted period is in any event the longest uninterrupted period which satisfies such twofold requirement. The deduction under section 245(a) is allowable to any corporation, whether foreign or domestic, receiving dividends from a distributing corporation which meets the requirements of that section.

(2) Any taxable year of a foreign corporation which falls within the uninterrupted period described in section 245(a)(2) shall not be taken into account in applying section 245(a)(2) and this paragraph if the 100 percent dividends received deduction would be allowable under paragraph (b) of this section, whether or not in fact allowed, with respect to any dividends payable, whether or not in fact paid, out of the earnings and profits of such foreign corporation for that taxable year. Thus, in such case the foreign corporation shall be treated as having no earnings and profits for that taxable year for purposes of determining the dividends received deduction allowable under section 245(a) and this paragraph. However, that taxable year may be taken into account for purposes of determining whether the foreign corporation meets the requirements of section 245(a) that, for the uninterrupted period specified therein, the foreign corporation is engaged in trade or business in the United States and meets the 50 percent gross income requirement.

(b) *Dividends from wholly owned foreign subsidiaries.* (1) A domestic corporation is allowed a deduction under section 245(b) for any taxable year beginning after December 31, 1966, for dividends received from a foreign corporation (other than a foreign personal holding company as defined in section 552) which is subject to taxation under Chapter 1 of the Code if:

(i) The domestic corporation owns either directly or indirectly all of the outstanding stock of the foreign corporation during the entire taxable year of the domestic corporation in which the dividends are received, and

(ii) The dividends are paid out of earnings and profits of a taxable year of the foreign corporation during which *(a)* the domestic corporation receiving the dividends owns directly or indirectly throughout such year all of the outstanding stock of the foreign corporation, and *(b)* all of the gross income of the foreign corporation from all sources is effectively connected for that year with the conduct of a trade or business in the United States by that corporation.

(2) The deduction allowed by section 245(b) does not apply if an election under section 1562, relating to the privilege of a controlled group of corporations to elect multiple surtax exemptions, is effective for either the taxable year of the domestic corporation in which the dividends are received or the taxable year of the foreign corporation out of the earnings and profits of which the dividends are paid.

(c) *Rules of application.* (1) Except as provided in section 246, the deduction provided by section 245 for any taxable year is the sum of the amounts computed under paragraphs (1) and (2) of section 245(a) plus, in the case of a domestic corporation for any taxable year beginning after December 31, 1966, the sum of the amounts computed under section 245(b)(2).

(2) To the extent that a dividend received from a foreign corporation is treated as a dividend from a domestic corporation in accordance with section 243(d) and § 1.243–3, it shall not be treated as a dividend received from a foreign corporation for purposes of this section.

(3) For purposes of section 245 (a) and (b), the amount of a distribution shall be determined under subparagraph (B) (without reference to subparagraph (C)) of section 301(b)(1).

(4) In determining from what year's earnings and profits a dividend is treated as having been distributed for purposes of this section, the principles of paragraph (a) of § 1.316–2 shall apply. A dividend shall be considered to be distributed, first, out of the earnings and profits of the taxable year which includes the date the dividend is distributed, second, out of the earnings and profits accumulated for the immediately preceding taxable year, third, out of the earnings and profits accumulated for the second preceding taxable year, etc. A deficit in an earnings and profits account for any taxable year shall reduce the most recently accumulated earnings and profits for a prior year in such account. If there are no accumulated earnings and profits in an earnings and profits account because of a deficit incurred in a prior year, such deficit must be restored before earnings and profits can be accumulated in a subsequent accounting year. See also paragraph (c) of § 1.243–3 and paragraph (a)(6) of § 1.243–4.

(5) For purposes of this section the gross income of a foreign corporation for any period before its first taxable year beginning after December 31, 1966, which is from sources within the United States shall be treated as gross income which is effectively connected for that period with the conduct of a trade or business in the United States by that corporation.

(6) For the determination of the source of income and the income which is effectively connected with the conduct of a trade or business in the United States, see sections 861 through 864, and the regulations thereunder.

(d) *Illustrations.* The application of this section may be illustrated by the following examples:

Example 1. Corporation A (a foreign corporation filing its income tax returns on a calendar year basis) whose stock is 100 percent owned by Corporation B (a domestic corporation filing its income tax returns on a calendar year basis) for the first time engaged in trade or business within the United States on January 1, 1943, and qualifies under section 245 for the entire period beginning on that date and ending on December 31, 1954. Corporation A had accumulated earnings and profits of $50,000 immediately prior to January 1, 1943, and had earnings and profits of $10,000 for each taxable year during the uninterrupted period from January 1, 1943, through December 31, 1954. It derived for the period from January 1, 1943, through December 31, 1953, 90 percent of its gross income from sources within the United States and in 1954 derived 95 percent of its gross income from sources within the United States. During the calendar years 1943, 1944, 1945, 1946, and 1947 Corporation A distributed in each year $15,000; during the calendar years 1948, 1949, 1950, 1951, 1952, and 1953 it distributed in each year $5,000; and during the year 1954, $50,000. An analysis of the accumulated earnings and profits under the above statement of facts discloses that at December 31, 1953, the accumulation amounted to $55,000, of which $25,000 was accumulated prior to the ‘‘uninterrupted period’’ and $30,000 was accumulated during the uninterrupted period. (See section 316(a) and paragraph (c) of this section.) For 1954 a deduction under section 245 of $31,025 ($8,075 on 1954 earnings of the foreign corporation, plus $22,950 from the $30,000 accumulation at December 31, 1953) for dividends received from a foreign corporation is allowable to Corporation B with respect to the $50,000 received from Corporation A, computed as follows:

(i) $8,075, which is $8,500 (85 percent— the percent specified in section 243 for the calendar year 1954—of the $10,000 of earnings and profits of the taxable year) multiplied by 95 percent (the portion of the gross income of Corporation A derived during the taxable year 1954 from sources within the United States), plus

(ii) $22,950, which is $25,500 (85 percent— the percent specified in section 243 for the calendar year 1954—of $30,000, the part of the earnings and profits accumulated after the beginning of the uninterrupted period) multiplied by 90 percent (the portion of the gross income of Corporation A derived from sources within the United States during that portion of the uninterrupted period ending at the beginning of the taxable year 1954).

Example 2. If in *Example (1),* Corporation A for the taxable year 1954 had incurred a deficit of $10,000 (shown to have been incurred before December 31) the amount of the earnings and profits accumulated after the beginning of the uninterrupted period would be $20,000. If Corporation A had distributed $50,000 on December 31, 1954, the deduction under section 245 for dividends received from a foreign corporation allowable to Corporation B for 1954 would be $15,300, computed by multiplying $17,000 (85 percent—the percent specified in section 243 for the calendar year 1954—of $20,000 earnings and profits accumulated after the beginning of the uninterrupted period) by 90 percent (the portion of the gross income of Corporation A derived from United States sources during that portion of the uninterrupted period ending at the beginning of the taxable year 1954).

Example 3. Corporation A (a foreign corporation filing its income tax returns on a calendar year basis) whose stock is 100 percent owned by corporation B (a domestic corporation filing its income tax returns on a calendar year basis) for the first time engaged in trade or business within the United States on January 1, 1960, and qualifies under section 245 for the entire period beginning on that date and ending on December 31, 1963. In 1963, A derived 75 percent of its gross income from sources within the United States. A's earnings and profits for 1963 (computed as of the close of the taxable year without diminution by reason of any distributions made during the taxable year) are $200,000. On December 31, 1963, corporation A distributes to corporation B 100 shares of corporation C stock which have an adjusted basis in A's hands of $40,000 and a fair market value of $100,000. For purposes of computing the deduction under section 245 for dividends received from a foreign corporation, the amount of the distribution is $40,000. B is allowed a deduction under section 245 of $25,500, i.e., $34,000 ($40,000 multiplied by 85 percent, the percent specified in section 243 for 1963), multiplied by 75 percent (the portion of the gross income of corporation A derived during 1963 from sources within the United States).

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6752, 29 FR 12701, Sept. 9, 1964, T.D. 6830; 30 FR 8046, June 23, 1965; T.D. 7293, 38 FR 32793, Nov. 28, 1973]

§1.246–1 Deductions not allowed for dividends from certain corporations.

The deductions provided in sections 243 (relating to dividends received by corporations), 244 (relating to dividends received on certain preferred stock), and 245 (relating to dividends received from certain foreign corporations), are not allowable with respect to any dividend received from:

(a) A corporation organized under the China Trade Act, 1922 (15 U.S.C. ch. 4) (see section 941); or

(b) A corporation which is exempt from tax under section 501 (relating to certain charitable, etc., organizations) or section 521 (relating to farmers' cooperative associations) for the taxable year of the corporation in which the distribution is made or for its next preceding taxable year; for

(c) A corporation to which section 931 (relating to income from sources within possessions of the United States) applies for the taxable year of the corporation in which the distribution is made or for its next preceding taxable year; or

(d) A real estate investment trust which, for its taxable year in which the distribution is made, is taxable under Part II, Subchapter M, Chapter 1 of the Code. See section 243(c)(3), paragraph (c) of §1.243–2, section 857(c), and paragraph (d) of §1.857–6.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6598, 27 FR 4092, Apr. 28, 1962; T.D. 7767, 46 FR 11264, Feb. 6, 1981]

§1.246–2 Limitation on aggregate amount of deductions.

(a) *General rule.* The sum of the deductions allowed by sections 243(a)(1) (relating to dividends received by corporations), 244(a) (relating to dividends received on certain preferred stock), and 245 (relating to dividends received from certain foreign corporations), except as provided in section 246(b)(2) and in paragraph (b) of this section, is limited to 85 percent of the taxable income of the corporation. The taxable income of the corporation for this purpose is computed without regard to the net operating loss deduction allowed by section 172, the deduction for dividends paid on certain preferred stock of public utilities allowed by section 247, any capital loss carryback under section 1212(a)(1), and the deductions provided in sections 243(a)(1), 244(a), and 245. For definition of the term *taxable income,* see section 63.

(b) *Effect of net operating loss.* If the shareholder corporation has a net operating loss (as determined under sec. 172) for a taxable year, the limitation provided in section 246(b)(1) and in paragraph (a) of this section is not applicable for such taxable year. In that event, the deductions provided in sections 243(a)(1), 244(a), and 245 shall be allowable for all tax purposes to the shareholder corporation for such taxable year without regard to such limitation. If the shareholder corporation does not have a net operating loss for the taxable year, however, the limitation will be applicable for all tax purposes for such taxable year. In determining whether the shareholder corporation has a net operating loss for a taxable year under section 172, the deductions allowed by sections 243(a)(1), 244(a), and 245 are to be computed without regard to the limitation provided in section 246(b)(1) and in paragraph (a) of this section.

[T.D. 6992, 34 FR 825, Jan. 18, 1969, as amended by T.D. 7301, 39 FR 963, Jan. 4, 1974]

§ 1.246–3 Exclusion of certain dividends.

(a) *In general.* Corporate taxpayers are denied, in certain cases, the dividends-received deduction provided by section 243 (dividends received by corporations), section 244 (dividends received on certain preferred stock), and section 245 (dividends received from certain foreign corporations). The above-mentioned dividends-received deductions are denied, under section 246(c)(1), to corporate shareholders:

(1) If the dividend is in respect of any share of stock which is sold or otherwise disposed of in any case where the taxpayer has held such share for 15 days or less; or

(2) If and to the extent that the taxpayer is under an obligation to make corresponding payments with respect to substantially identical stock or securities. It is immaterial whether the obligation has arisen pursuant to a short sale or otherwise.

(b) *Ninety-day rule for certain preference dividends.* In the case of any stock having a preference in dividends, a special rule is provided by section 246(c)(2) in lieu of the 15-day rule described in section 246(c)(1) and paragraph (a)(1) of this section. If the taxpayer receives dividends on such stock which are attributable to a period or periods aggregating in excess of 366 days, the holding period specified in section 246(c)(1)(A) shall be 90 days (in lieu of 15 days).

(c) *Definitions*—(1) *''Otherwise disposed of''.* As used in this section the term *otherwise disposed of* includes disposal by gift.

(2) *''Substantially identical stock or securities''.* The term *substantially identical stock or securities* is to be applied according to the facts and circumstances in each case. In general, the term has the same meaning as the corresponding terms in sections 1091 and 1233 and the regulations thereunder. See paragraph (d)(1) of § 1.1233–1.

(3) *Obligation to make corresponding payments.* (i) Section 246(c)(1)(B) of the Code denies the dividends-received deduction to a corporate taxpayer to the extent that such taxpayer is under an obligation, with respect to substantially identical stock or securities, to make payments corresponding to the dividend received. Thus, for example, where a corporate taxpayer is in both a ''long'' and ''short'' position with respect to the same stock on the date that such stock goes ex-dividend, the dividend received on the stock owned by the taxpayer will not be eligible for the dividends-received deduction to the extent that the taxpayer is obligated to make payments to cover the dividends with respect to its offsetting short position in the same stock. The dividends-received deduction is denied in such a case without regard to the length of time the taxpayer has held the stock on which such dividends are received.

(ii) The provisions of subdivision (i) of this subparagraph may be illustrated by the following example:

Example. Y Corporation owns 100 shares of the Z Corporation's common stock on January 1, 1959. Z Corporation on January 15, 1959, declares a dividend of $1.00 per share payable to shareholders of record on January 30, 1959. On January 21, 1959, Y Corporation sells short 25 shares of the Z Corporation's common stock and remains in the short position on January 31, 1959, the day that Z Corporation's common stock goes ex-dividend. Y Corporation is therefore obligated to make a payment to the lender of the 25 shares of Z

Corporation's common stock which were sold short, corresponding to the $1.00 a share dividend that the lender would have received on those 25 shares, or $25.00. Therefore, $25.00 of the $100.00 that the Y Corporation receives as dividends from the Z Corporation with respect to the 100 shares of common stock in which it has a long position is not eligible for the dividends-received deduction.

(d) *Determination of holding period*—(1) *In general.* Special rules are provided by paragraph (3) of section 246(c) for determining the period for which the taxpayer has held any share of stock for purposes of the restriction provided by such section. In computing the holding period the day of disposition but not the day of acquisition shall be taken into account. Also, there shall not be taken into account any day which is more than 15 days after the date on which the share of stock becomes ex-dividend. Thus, the holding period is automatically terminated at the end of such 15-day period without regard to how long the stock may be held after that date. In the case of stock qualifying under paragraph (2) of section 246(c) (as having preference in dividends) a 90-day period is substituted for the 15-day period prescribed in this subparagraph. Finally, section 1223(4), relating to holding periods in the case of wash sales, shall not apply. Therefore, tacking of the holding period of the stock disposed of to the holding period of the stock acquired where a wash sale occurs is not permitted for purposes of determining the holding period described in section 246(c).

(2) *Special rules.* Section 246(c) requires that the holding periods determined thereunder shall be appropriately reduced for any period that the taxpayer's stock holding is offset by a corresponding short position resulting from an option to sell, a contractual obligation to sell, or a short sale of, substantially identical stock or securities. The holding periods of stock held for a period of 15 days or less on the date such short position is created shall accordingly be reduced to the extent of such short position. Where the amount of stock acquired within such period exceeds the amount as to which the taxpayer establishes a short position, the stock the holding period of which must be reduced because of such short position shall be that most recently acquired within such period. If, on the date the short position is created, the amount of stock subject to the short position exceeds the amount, if any, of stock held by the taxpayer for 15 days or less, the excess shares of stock sold short shall, to the extent thereof, postpone until the termination of the short position the commencement of the holding periods of subsequently acquired stock. Stock having a preference in dividends is also subject to the rules prescribed in this subparagraph, except that the 90-day period provided by paragraph (b) of this section shall apply in lieu of the 15-day period otherwise applicable. The rules prescribed in this subparagraph may be illustrated by the following examples:

Example 1. L Company purchased 100 shares of Z Corporation's common stock during January 1959. On November 26, 1959, L Company purchased an additional 100 shares of the same stock. On December 1, 1959, Z Corporation declared a dividend payable on its common stock to shareholders of record on December 20, 1959. Also on December 1, L Company sold short 150 shares of Z Corporation's common stock. On December 16, 1959 (before the stock went ex-dividend), L Company closed its short sale with 150 shares purchased on that date. In determining, for purposes of section 246(c), whether L Company has held the 100 shares of stock acquired on November 26 for a period in excess of 15 days, the period of the short position (from December 2 through December 16) shall be excluded. Thus, if on or before December 26, 1959, L Company sold the 100 shares of Z Corporation stock which it purchased on November 26, 1959, it would not be entitled to a dividends-received deduction for the dividends received on such shares because it would have held such shares for 15 days or less on the date of the sale. Since L Company had held the 100 shares acquired during January 1959 for more than 15 days on December 2, 1959, and since it was under no obligation to make payments corresponding to the dividends received thereon, section 246(c) is inapplicable to the dividends received with respect to those shares.

Example 2. Assume the same facts as in *Example (1)* above except that the additional 100 shares of Z Corporation common stock were purchased by L Company on December 10, 1959, rather than November 26, 1959. In determining, for purposes of section 246(c), whether L Company has held such shares for a period in excess of 15 days, the period from December 11, 1959, until December 16, 1959 (the date the short sale made on December 1 was closed), shall be excluded.

(e) *Effective date.* The provisions of this section shall apply to stock acquired after December 31, 1957, or with respect to stock acquired before that date where the taxpayer has made a short sale of substantially identical stock or securities after that date.

§ 1.246–4 Dividends from a DISC or former DISC.

The deduction provided in section 243 (relating to dividends received by corporations) is not allowable with respect to any dividend (whether in the form of a deemed or actual distribution or an amount treated as a dividend pursuant to section 995(c)) from a corporation which is a DISC or former DISC (as defined in section 992(a)(1) or (3) as the case may be) to the extent such dividend is from the corporation's accumulated DISC income (as defined in section 996(f)(1)) or previously taxed income (as defined in section 996(f)(2)) or is a deemed distribution pursuant to section 995(b)(1) in a taxable year for which the corporation qualifies (or is treated) as a DISC. To the extent that a dividend is paid out of earnings and profits which are not made up of accumulated DISC income or previously taxed income, the corporate recipient is entitled to the deduction provided in section 243 in the same manner and to the same extent as a dividend from a domestic corporation which is not a DISC or former DISC.

[T.D. 7283, 38 FR 20824, Aug. 3, 1973]

§ 1.246–5 Reduction of holding periods in certain situations.

(a) *In general.* Under section 246(c)(4)(C), the holding period of stock for purposes of the dividends received deduction is appropriately reduced for any period in which a taxpayer has diminished its risk of loss by holding one or more other positions with respect to substantially similar or related property. This section provides rules for applying section 246(c)(4)(C).

(b) *Definitions*—(1) *Substantially similar or related property.* The term substantially similar or related property is applied according to the facts and circumstances in each case. In general, property is substantially similar or related to stock when—

(i) The fair market values of the stock and the property primarily reflect the performance of—

(A) A single firm or enterprise;

(B) The same industry or industries; or

(C) The same economic factor or factors such as (but not limited to) interest rates, commodity prices, or foreign-currency exchange rates; and

(ii) Changes in the fair market value of the stock are reasonably expected to approximate, directly or inversely, changes in the fair market value of the property, a fraction of the fair market value of the property, or a multiple of the fair market value of the property.

(2) *Diminished risk of loss.* A taxpayer has diminished its risk of loss on its stock by holding positions with respect to substantially similar or related property if changes in the fair market values of the stock and the positions are reasonably expected to vary inversely.

(3) *Position.* For purposes of this section, a position with respect to property is an interest (including a futures or forward contract or an option) in property or any contractual right to a payment, whether or not severable from stock or other property. A position does not include traditional equity rights to demand payment from the issuer, such as the rights traditionally provided by mandatorily redeemable preferred stock.

(4) *Reasonable expectations.* For purposes of paragraphs (b)(1)(i), (b)(2), or (c)(1)(vi) of this section, reasonable expectations are the expectations of a reasonable person, based on all the facts and circumstances at the later of the time the stock is acquired or the positions are entered into. Reasonable expectations include all explicit or implicit representations made with respect to the marketing or sale of the position.

(c) *Special rules*—(1) *Positions in more than one stock*—(i) *In general.* This paragraph (c)(1) provides rules for the treatment of positions that reflect the value of more than one stock. In general, positions that reflect the value of a portfolio of stocks are treated under the rules of paragraphs (c)(1) (ii) through (iv) of this section, and positions that reflect the value of more than one stock but less than a portfolio are treated under the rules of paragraph (c)(1)(v) of this section. A portfolio for this purpose is any group of stocks of 20 or more unrelated issuers. Paragraph (c)(1)(vi) of this section provides an anti-abuse rule.

(ii) *Portfolios.* Notwithstanding paragraph (b)(1) of this section, a position reflecting the value of a portfolio of stocks is substantially similar or related to the stocks held by the taxpayer only if the position and the taxpayer's holdings substantially overlap as of the most recent testing date. A position may be substantially similar or related to a taxpayer's entire stock holdings or a portion of a taxpayer's stock holdings.

(iii) *Determining substantial overlap.* This paragraph (c)(1)(iii) provides rules for determining whether a position and a taxpayer's stock holdings or a portion of a taxpayer's stock holdings substantially overlap. Paragraphs (c)(1)(iii) (A) through (C) of this section determine whether there is substantial overlap as of any testing date.

(A) *Step One.* Construct a subportfolio (the Subportfolio) that consists of stock in an amount equal to the lesser of the fair market value of each stock represented in the position and the fair market value of the stock in the taxpayer's stock holdings. (The Subportfolio may contain fewer than 20 stocks.)

(B) *Step Two.* If the fair market value of the Subportfolio is equal to or greater than 70 percent of the fair market value of the stocks represented in the position, the position and the Subportfolio substantially overlap.

(C) *Step Three.* If the position does not substantially overlap with the Subportfolio, repeat Steps One and Two (paragraphs (c)(1)(iii)(A) and (B) of this section) reducing the size of the position. The largest percentage of the position that results in a substantial overlap is substantially similar or related to the Subportfolio determined with respect to that percentage of the position.

(iv) *Testing date.* A testing date is any day on which the taxpayer purchases or sells any stock if the fair market value of the stock or the fair market value of substantially similar or related property is reflected in the position, any day on which the taxpayer changes the position, or any day on which the composition of the position changes.

(v) *Nonportfolio positions.* A position that reflects the fair market value of more than one stock but not of a portfolio of stocks is treated as a separate position with respect to each of the stocks the value of which the position reflects.

(vi) *Anti-abuse rule.* Notwithstanding paragraphs (c)(1)(i) through (v) of this section, a position that reflects the value of more than one stock is a position in substantially similar or related property to the appropriate portion of the taxpayer's stock holdings if—

(A) Changes in the value of the position or the stocks reflected in the position are reasonably expected to virtually track (directly or inversely) changes in the value of the taxpayer's stock holdings, or any portion of the taxpayer's stock holdings and other positions of the taxpayer; and

(B) The position is acquired or held as part of a plan a principal purpose of which is to obtain tax savings (including by deferring tax) the value of which is significantly in excess of the expected pre-tax economic profits from the plan.

(2) *Options*—(i) *Options that are significantly out of the money.* For purposes of paragraph (b)(2) of this section, an option to sell that is significantly out of the money does not diminish the taxpayer's risk of loss on its stock unless the option is held as part of a strategy to substantially offset changes in the fair market value of the stock.

(ii) *Conversion rights.* Notwithstanding paragraphs (b)(1) and (2) of this section, a taxpayer is treated as diminishing its risk of loss by holding substantially similar or related property if it engages in the following transactions or their substantial equivalents—

(A) A short sale of common stock while holding convertible preferred stock of the same issuer and the price changes of the convertible preferred stock and the common stock are related;

(B) A short sale of a convertible debenture while holding convertible preferred stock into which the debenture is convertible or common stock; or

(C) A short sale of convertible preferred stock while holding common stock.

(3) *Stacking rule.* If a taxpayer diminishes its risk of loss by holding a position in substantially similar or related property with respect to only a portion of the shares that the taxpayer holds in a particular stock, the holding period of those shares having the shortest holding period is reduced.

(4) *Guarantees, surety agreements, or similar arrangements.* A taxpayer has diminished its risk of loss on stock by holding a position in substantially similar or related property if the taxpayer is the beneficiary of a guarantee, surety agreement, or similar arrangement and the guarantee, surety agreement, or similar arrangement provides for payments that will substantially offset decreases in the fair market value of the stock.

(5) *Hedges counted only once.* A position established as a hedge of one outstanding position, transaction, or obligation of the taxpayer (other than stock) is not treated as diminishing the risk of loss with respect to any other position held by the taxpayer. In determining whether a position is established to hedge an outstanding position, transaction, or obligation of the taxpayer, substantial deference will be given to the relationships that are established in its books and records at the time the position is entered into.

(6) *Use of related persons or pass-through entities.* Positions held by a party related to the taxpayer within the meaning of sections 267(b) or 707(b)(1) are treated as positions held by the taxpayer if the positions are held with a view to avoiding the application of this section or § 1.1092(d)–2. In addition, a taxpayer is treated as diminishing its risk of loss by holding substantially similar or related property if the taxpayer holds an interest in, or is the beneficiary of, a pass-through entity, intermediary, or other arrangement with a view to avoiding the application of this section or § 1.1092(d)–2.

(7) *Notional principal contracts.* For purposes of this section, rights and obligations under notional principal contracts are considered separately even though payments with regard to those rights and obligations are generally netted for other purposes. Therefore, if a taxpayer is treated under the preceding sentence as receiving payments under a notional principal contract when the fair market value of the taxpayer's stock declines, the taxpayer has diminished its risk of loss by holding a position in substantially similar or related property regardless of the netting of the payments under the contract for any other purposes.

(d) *Examples.* The following examples illustrate the provisions of this section:

Example 1. General application to common stock. Corporation A and Corporation B are both automobile manufacturers. The fair market values of Corporation A and Corporation B common stock primarily reflect the value of the same industry. Because Corporation A and Corporation B common stock are affected not only by the general level of growth in the industry but also by individual corporate management decisions and corporate capital structures, changes in the fair market value of Corporation A common stock are not reasonably expected to approximate changes in the fair market value of the Corporation B common stock. Under paragraph (b)(1) of this section, Corporation A common stock is not substantially similar or related to Corporation B common stock.

Example 2. Common stock value primarily reflects commodity price. Corporation C and Corporation D both hold gold as their primary asset, and historically changes in the fair market value of Corporation C common stock approximated changes in the fair market value of Corporation D common stock. Corporation M purchased Corporation C common stock and sold short Corporation D common stock. Corporation C common stock is substantially similar or related to Corporation D common stock because their fair market values primarily reflect the performance of the same economic factor, the price of gold, and changes in the fair market value of Corporation C common stock are reasonably expected to approximate changes in the fair market value of Corporation D common stock. It was reasonably expected that changes in the fair market values of the Corporation C common stock and the short position in Corporation D common stock would vary inversely. Thus, Corporation M has diminished its risk of loss on its Corporation C common stock for purposes of section

246(c)(4)(C) and this section by holding a position in substantially similar or related property.

Example 3. Portfolios of stocks —(i) Corporation Z holds a portfolio of stocks and acquires a short position on a publicly traded index through a regulated futures contract (RFC) that reflects the value of a portfolio of stocks as defined in paragraph (c)(1)(i) of this section. The index reflects the fair market value of stocks A through T. The values of stocks reflected in the index and the values of the same stocks in Corporation Z's holdings are as follows:

Stock	Z's holdings	RFC	Subportfolio
A	$300	$300	$300
B	300	300	300
C	—	300	—
D	400	500	400
E	300	500	300
F	300	500	300
G	500	600	500
H	300	300	300
I	—	300	—
J	400	450	400
K	200	500	200
L	200	400	200
M	200	500	200
N	100	200	100
O	—	200	—
P	200	200	200
Q	100	300	100
R	200	100	100
S	100	100	100
T	100	200	100
Totals	$4,200	$6,750	$4,100

(ii) The position is substantially similar or related to Z's stock holdings only if they substantially overlap. To determine whether they substantially overlap, Corporation Z must construct a Subportfolio of stocks with the lesser of the value of the stock as reflected in the RFC and its holdings. The Subportfolio is given in the rightmost column above. The value of the Subportfolio is 60.74 percent of the value of the stocks represented in the position ($4100÷$6750), so the position and the Subportfolio do not substantially overlap.

(iii) To determine whether any portion of the position substantially overlaps with any portion of the Z's stock holdings, the values of the stocks in the RFC are reduced for purposes of the above steps. Eighty percent of the position and the corresponding subportfolio (consisting of stocks with a value of the lesser of the stocks represented in Z's holdings and in 80 percent of the RFC) substantially overlap, computed as follows:

Stock	Z's holdings	80% of RFC	Subportfolio
A	$300	$240	$240
B	300	240	240
C	—	240	—
D	400	400	400
E	300	400	300
F	300	400	300
G	500	480	480
H	300	240	240
I	—	240	—
J	400	360	360
K	200	400	200
L	200	320	200
M	200	400	200
N	100	160	100
O	—	160	—
P	200	160	160
Q	100	240	100
R	200	80	80
S	100	80	80
T	100	160	100
Totals	$4,200	$5,400	$3,780

(iv) Because $3,780 is 70 percent of $5,400, the Subportfolio substantially overlaps with 80 percent of the position. Under paragraph (c)(3) of this section, Z's stocks having the shortest holding period are treated as included in the Subportfolio. A larger portion of Z's stocks may be treated as substantially similar or related property under the anti-abuse rule of paragraph (c)(1)(vi) of this section.

Example 4. Hedges counted only once January 1, 1996, Corporation X owns a $100 million portfolio of stocks all of which would substantially overlap with a $100 million regulated futures contract (RFC) on a commonly used index (the Index). On January 15, Corporation X enters into a $100 million short position in an RFC on the Index with a March delivery date and enters into a $75 million long position in an RFC on the Index for June delivery. Also on January 15, 1996, Corporation X indicates in its books and records that the long and short RFC positions are intended to offset one another. Under paragraph (c)(5) of this section, $75 million of the short position in the RFC is not treated as diminishing the risk of loss on the stock portfolio and instead is treated as a straddle or a hedging transaction, as appropriate, with respect to the $75 million long position in the RFC, under section 1092. The remaining $25 million short position is treated as diminishing the risk of loss on the portfolio by holding a position in substantially similar or related property. The rules of paragraph (c)(1) determine how much of the portfolio is subject to this rule and the rules of paragraph (c)(3) determine which shares have their holding periods tolled.

(e) *Effective date*—(1) *In general.* The provisions of this section apply to dividends received on or after March 17, 1995, on stock acquired after July 18, 1984.

(2) *Special rule for dividends received on certain stock.* Notwithstanding paragraph (e)(1) of this section, this section applies to any dividends received by a taxpayer on stock acquired after July 18, 1984, if the taxpayer has diminished its risk of loss by holding substantially similar or related property involving the following types of transactions—

(i) The short sale of common stock when holding convertible preferred stock of the same issuer and the price changes of the two stocks are related, or the short sale of a convertible debenture while holding convertible preferred stock into which the debenture is convertible (or common stock), or a short sale of convertible preferred stock while holding common stock; or

(ii) The acquisition of a short position in a regulated futures contract on a stock index, or the acquisition of an option to sell the regulated futures contract or the stock index itself, or the grant of a deep-in-the-money option to buy the regulated futures contract or the stock index while holding the stock of an investment company whose principal holdings mimic the performance of the stocks included in the stock index; or alternatively, while holding a portfolio composed of stocks that mimic the performance of the stocks included in the stock index.

[T.D. 8590, 60 FR 14638, Mar. 20, 1995]

§ 1.247–1 Deduction for dividends paid on preferred stock of public utilities.

(a) *Amount of deduction.* (1) A deduction is provided in section 247 for dividends paid during the taxable year by certain public utility corporations (see paragraph (b) of this section) on certain preferred stock (see paragraph (c) of this section). This deduction is an amount equal to the product of a specified fraction times the lesser of (i) the amount of the dividends paid during the taxable year by a public utility on its preferred stock (as defined in paragraph (c) of this section), or (ii) the taxable income of the public utility for such taxable year (computed without regard to the deduction allowed by section 247). The specified fraction for any taxable year is the fraction the numerator of which is 14 and the denominator of which is the sum of the corporation normal tax rate and the surtax rate for such taxable year specified in section 11. Since section 11 provides that for the calendar year 1954 the corporation normal tax rate is 30 percent and the surtax rate is 22 percent, the sum of the two tax rates is 52 percent and the specified fraction for the calendar year 1954 is 14/52. If, for example, section 11 should specify that the corporation's normal tax rate is 25 percent and the surtax rate is 22 percent for the calendar year, the sum of the two tax rates will be 47 percent and the specified fraction for the calendar year will be 14/47. If Corporation A, a public utility which files its income tax return on the calendar year basis, pays $100,000 dividends on its preferred stock in the calendar year 1954 and if its taxable income for such year is greater than $100,000 the deduction allowable to Corporation A under section 247 for 1954 is $100,000 times 14/52, or $26,923.08. If in 1954 Corporation A's taxable income, computed without regard to the deduction provided in section 247, had been $90,000 (that is, less than the amount of the dividends which it paid on its preferred stock in that year), the deduction allowable under section 247 for 1954 would have been $90,000 times 14/52, or $24,230.77.

(2) For the purpose of determining the amount of the deduction provided in section 247(a) and in subparagraph (1) of this paragraph, the amount of dividends paid in a given taxable year shall not include any amount distributed in such year with respect to dividends unpaid and accumulated in any taxable year ending before October 1, 1942. If any distribution is made in the current taxable year with respect to dividends unpaid and accumulated for a prior taxable year, such distribution will be deemed to have been made with respect to the earliest year or years for which there are dividends unpaid and accumulated. Thus, if a public utility makes a distribution with respect to a prior taxable year, it shall be considered that such distribution was made with respect to the earliest year or years for which there are dividends unpaid and accumulated, whether or not the public utility states that the distribution was made with respect to

such year or years and even though the public utility stated that the distribution was made with respect to a later year. Even though it has dividends unpaid and accumulated with respect to a taxable year ending before October 1, 1942, a public utility may, however, include the dividends paid with respect to the current taxable year in computing the deduction under section 247. If there are no dividends unpaid and accumulated with respect to a taxable year ending before October 1, 1942, a public utility may include the dividends paid with respect to a prior taxable year which ended after October 1, 1942, in computing the deduction under section 247; such public utility in addition may include the dividends paid with respect to the current taxable year in computing the deduction under section 247. However, if local law or its own charter requires a public utility to pay all unpaid and accumulated dividends before any dividends can be paid with respect to the current taxable year, such public utility may not include any distribution in the current year in computing the deduction under section 247 to the extent that there are dividends unpaid and accumulated with respect to taxable years ending before October 1, 1942.

(3) If a corporation which is engaged in one or more of the four types of business activities (called utility activities in this section) enumerated in section 247(b)(1) (the furnishing of telephone service or the sale of electrical energy, gas, or water) is also engaged in some other business that does not fall within any of the enumerated categories, the deduction under section 247 is allowable only for such portion of the amount computed under section 247(a) as is allocable to the income from utility activities. For this purpose, the allocation may be made on the basis of the ratio which the total income from the utility activities bears to total income from all sources (total income being considered either gross income or gross receipts, whichever method results in the higher deduction). However, if such an allocation reaches an inequitable result and the books of the corporation are so kept that the taxable income attributable to the utility activities can be readily determined, particularly where the books of the corporation are required by governmental bodies to be so kept for rate making or other purposes, the allocation may be made upon the basis of taxable income. No such apportionment will be required if the income from sources other than utility activities is less than 20 percent of the total income of the corporation, irrespective of the method used in determining such total income.

(b) *Public utility.* As used in section 247 and this section, public utility means a corporation engaged in the furnishing of telephone service, or in the sale of electric energy, gas, or water if the rates charged by such corporation for such furnishing or sale, as the case may be, have been established or approved by a State or political subdivision thereof or by an agency or instrumentality of the United States or by a public utility or public service commission or other similar body of the District of Columbia or of any State or political subdivision thereof. If a schedule of rates has been filed with any of the above bodies having the power to disapprove such rates, then such rates shall be considered as established or approved rates even though such body has taken no action on the filed schedule. Rates fixed by contract between the corporation and the purchaser, except where the purchaser is the United States, a State, the District of Columbia, or an agency or political subdivision of the United States, a State, or the District of Columbia, shall not be considered as established or approved rates in those cases where they are not subject to direct control, or where no maximum rate for such contract rates has been established by the United States, a State, the District of Columbia, or by an agency or political subdivision thereof. The deduction provided in section 247 will not be denied solely because part of the gross income of the corporation consists of revenue derived from such furnishing or sale at rates which are not so regulated, provided the corporation establishes to the satisfaction of the Commissioner (1) that the revenue from regulated rates and the revenue from unregulated rates are derived from the operation of a single interconnected and coordinated system within a single area or region in one or more States, or from the operation of more than one such system and (2) that the regulation to which it is subject in part of its operating territory in one such system is effective to control rates within the unregulated territory of the same system so that the rates within the unregulated territory have been and are substantially as favorable to users and consumers as are the rates within the regulated territory.

(c) *Preferred stock.* (1) For the purposes of section 247 and this section, preferred stock means stock (i) which was issued before October 1, 1942, (ii) the dividends in respect of which (during the whole of the taxable year, or the part of the taxable year after the actual date of the issue of such stock) were cumulative, nonparticipating as to current distributions, and payable in preference to the payment of dividends on other stock, and (iii) the rate of return on which is fixed and cannot be changed by a vote of the board of directors or by some similar method. However, if there are several classes of preferred stock, all of which meet the above requirements, the deduction provided in section 247 shall not be denied in the case of a given class of preferred stock merely because there is another class of preferred stock whose dividends are to be paid before those of the given class of stock. Likewise, it is immaterial for the purposes of section 247 and this section whether the stock be voting or nonvoting stock.

(2) Preferred stock issued on or after October 1, 1942, under certain circumstances will be considered as having been issued before October 1, 1942, for purposes of the deduction provided in section 247. If the new stock is issued on or after October 1, 1942, to refund or replace bonds or debentures which were issued before October 1, 1942, or to refund or replace other stock which was preferred stock within the meaning of section 247(b)(2) (or the corresponding provision of the Internal Revenue Code of 1939), such new stock shall be considered as having been issued before October 1, 1942. If preferred stock is issued to refund or replace stock which was preferred stock within the meaning of section 247(b)(2) (or the corresponding provision of the Internal Revenue Code of 1939), it shall be immaterial whether the preferred stock so refunded or replaced was issued before, on, or after October 1, 1942. If stock issued on or after October 1, 1942, to refund or replace stock which was issued before October 1, 1942, and which was preferred stock within the meaning of section 247(b)(2) (or the corresponding provision of the Internal Revenue Code of 1939), is not itself preferred stock within the meaning of section 247(b)(2) (or the corresponding provision of the Internal Revenue Code of 1939), no stock issued to refund or replace such stock can be considered preferred stock for purposes of the deduction provided in section 247.

(3) In the case of any preferred stock issued on or after October 1, 1942, to refund or replace bonds or debentures issued before October 1, 1942, or to refund or replace other stock which was preferred stock within the meaning of section 247(b)(2) (or the corresponding provision of the Internal Revenue Code of 1939), only that portion of the stock issued on or after October 1, 1942, will be considered as having been issued before October 1, 1942, the par or stated value of which does not exceed the par, stated, or face value of such bonds, debentures, or other preferred stock which the new stock was issued to refund or replace. In such case no shares of the new stock issued on or after October 1, 1942, shall be earmarked in determining the deduction allowable under section 247, but the appropriate allocable portion of the total amount of dividends paid on such stock will be considered as having been paid on stock which was issued before October 1, 1942.

(4) The provisions of section 247(b)(2) may be illustrated by the following example:

Example. A public utility has outstanding 1,000 bonds which were issued before October 1, 1942, and each of which has a face value of $100. On or after October 1, 1942, each of such bonds is retired in exchange for 1 1/10 shares of preferred stock issued on or after October 1, 1942, and having a par value of $100 per share. Only 10/11 of the dividends paid on the preferred stock thus issued in exchange for the bonds will be considered as having been paid on stock which was issued before October 1, 1942. Likewise, if preferred stock which is issued on or after October 1, 1942, has no par value but a stated value of $50 per share and such stock is issued in a ratio of three shares to one share to refund or replace preferred stock having a par value of $100 per share, only two-thirds of the dividends paid on the new shares of stock will be considered as having been paid on stock which was issued before October 1, 1942.

(5) Whether or not preferred stock issued on or after October 1, 1942, was issued to refund or replace bonds or debentures issued before October 1, 1942, or to refund or replace other preferred stock, is in each case a question of fact. Among the factors to be considered is whether such stock is new in an economic sense to the corporation or whether it was issued merely to take the place, directly or indirectly, of bonds, debentures, or other preferred stock of such corporation. It is not necessary that the new preferred stock be issued in exchange for such bonds, debentures, or other preferred stock. The mere fact that the bonds, debentures, or other preferred stock remain in existence for a short period of time after the issuance of the new stock (or were retired before the issuance of the new stock) does not necessarily mean that such new stock was not issued to refund or replace such bonds, debentures, or other preferred stock. It is necessary to consider the entire transaction, including the issuance of the new preferred stock, the date of such issuance, the retirement of the old bonds, debentures, or preferred stock, and the date of such retirement, in order to determine whether such new stock really was issued to take the place of bonds, debentures, or other preferred stock of the corporation or whether it represents something essentially new in an economic sense in the corporation's financial structure. If, for example, a public utility, which has outstanding bonds issued before October 1, 1942, issues new preferred stock on October 1, 1954, in order to secure funds with which to retire such bonds and with the money paid in for such stock retires the bonds on November 1, 1954, such stock may be considered as having been issued to refund or replace bonds issued before October 1, 1942. Whether the money used to retire the bonds can be traced back and identified as the money paid in for the stock will have evidentiary value, but will not be conclusive, in determining whether the stock was issued to refund or replace the bonds. Similarly, whether the amount of money used to retire the bonds was smaller than, equal to, or greater than that paid in for the stock, or whether the entire issue of bonds is retired, will be important, but not decisive, in making such determination.

(6) Preferred stock issued on or after October 1, 1942, by a corporation to refund or replace bonds or debentures of a second corporation which were issued before October 1, 1942, or to refund or replace other preferred stock of such second corporation, may be considered as having been issued before October 1, 1942, if such new stock was issued (i) in a transaction which is a reorganization within the meaning of section 368(a) or the corresponding provisions of the Internal Revenue Code of 1939; or (ii) in a transaction to which section 371 (relating to insolvency reorganizations), or the corresponding provisions of the Internal Revenue Code of 1939, is applicable; or (iii) in a transaction which is subject to the provisions of Part VI, Subchapter O, Chapter 1 of the Code (relating to exchanges and distributions in obedience to orders of the Securities and Exchange Commission) or to the corresponding provisions of the Internal Revenue Code of 1939. Whether the stock actually was issued to refund or replace bonds or debentures of the second corporation issued before October 1, 1942, or to refund or replace preferred stock of such second corporation, shall be determined under the same principles as if only one corporation were involved. A corporation may issue stock to refund or replace its own bonds, debentures, or other preferred stock in a transaction which is a reorganization within the meaning of section 368(a) or the corresponding provisions of the Internal Revenue Code of 1939, in a transaction to which section 371 or the corresponding provisions of the Internal Revenue Code of 1939 is applicable, or in a transaction which is subject to the provisions of Part VI, Subchapter O, Chapter 1 of the Code, or to the corresponding provisions of the Internal Revenue Code of 1939. The provisions of this paragraph, in addition, are applicable in case a corporation

issues stock on or after October 1, 1942, to refund or replace its own bonds, debentures, or other preferred stock even though the issuance of such stock may not fall within one of the categories enumerated above.

(7) Even though stock issued on or after October 1, 1942, is considered as having been issued before October 1, 1942, by reason of having been issued to refund or replace bonds or debentures issued before October 1, 1942, or to refund or replace other preferred stock, such stock will not be deemed to be preferred stock within the meaning of section 247(b)(2), and no deduction will be allowable in respect of dividends paid on such stock, unless the stock fulfills all the other requirements of a preferred stock set forth in section 247(b)(2) and in this paragraph.

§ 1.248–1 Election to amortize organizational expenditures.

(a) *In general.* (1) Section 248(a) provides that a corporation may elect for any taxable year beginning after December 31, 1953, to treat its organizational expenditures, as defined in subsection (b) of section 248 and in paragraph (b) of this section, as deferred expenses. A corporation which exercises such election must, at the time it makes the election, select a period of not less than 60 months, beginning with the month in which it began business, over which it will amortize its organizational expenditures. The period selected by the corporation may be equal to or greater, but not less, than 60 months, but in any event it must begin with the month in which the corporation began business. The organizational expenditures of the corporation which are treated as deferred expenses under the provisions of section 248 and this section shall then be allowed as a deduction in computing taxable income ratably over the period selected by the taxpayer. The period selected by the taxpayer in making its election may not be subsequently changed but shall be adhered to in computing taxable income for the taxable year for which the election is made and all subsequent taxable years.

(2) If a corporation exercises the election provided in section 248(a), such election shall apply to all of its expenditures which are organizational expenditures within the meaning of subsection (b) of section 248 and paragraph (b) of this section. The election shall apply, however, only with respect to expenditures incurred before the end of the taxable year in which the corporation begins business (without regard to whether the corporation files its returns on the accrual or cash method of accounting or whether the expenditures are paid in the taxable year in which they are incurred), if such expenditures are paid or incurred on or after August 16, 1954 (the date of enactment of the Internal Revenue Code of 1954).

(3) The deduction allowed under section 248 must be spread over a period beginning with the month in which the corporation begins business. The determination of the date the corporation begins business presents a question of fact which must be determined in each case in light of all the circumstances of the particular case. The words *begins business,* however, do not have the same meaning as ‘‘in existence.’’ Ordinarily, a corporation begins business when it starts the business operations for which it was organized; a corporation comes into existence on the date of its incorporation. Mere organizational activities, such as the obtaining of the corporate charter, are not alone sufficient to show the beginning of business. If the activities of the corporation have advanced to the extent necessary to establish the nature of its business operations, however, it will be deemed to have begun business. For example, the acquisition of operating assets which are necessary to the type of business contemplated may constitute the beginning of business.

(b) *Organizational expenditures defined.* (1) Section 248(b) defines the term *organizational expenditures.* Such expenditures, for purposes of section 248 and this section, are those expenditures which are directly incident to the creation of the corporation. An expenditure, in order to qualify as an organizational expenditure, must be (i) incident to the creation of the corporation, (ii) chargeable to the capital account of the corporation, and (iii) of a character which, if expended incident to the creation of a corporation having a limited life, would be amortizable over such life. An expenditure which fails to meet each of these three tests may not be considered an organizational expenditure for purposes of section 248 and this section.

(2) The following are examples of organizational expenditures within the meaning of section 248 and this section: legal services incident to the organization of the corporation, such as drafting the corporate charter, by-laws, minutes of organizational meetings, terms of original stock certificates, and the like; necessary accounting services; expenses of temporary directors and of organizational meetings of directors or stockholders; and fees paid to the State of incorporation.

(3) The following expenditures are not organizational expenditures within the meaning of section 248 and this section:

(i) Expenditures connected with issuing or selling shares of stock or other securities, such as commissions, professional fees, and printing costs. This is so even where the particular issue of stock to which the expenditures relate is for a fixed term of years;

(ii) Expenditures connected with the transfer of assets to a corporation.

(4) Expenditures connected with the reorganization of a corporation, unless directly incident to the creation of a corporation, are not organizational expenditures within the meaning of section 248 and this section.

(c) *Time and manner of making election.* The election provided by section 248(a) and paragraph (a) of this section shall be made in a statement attached to the taxpayer's return for the taxable year in which it begins business. Such taxable year must be one which begins after December 31, 1953. The return and statement must be filed not later than the date prescribed by law for filing the return (including any extensions of time) for the taxable year in which the taxpayer begins business. The statement shall set forth the description and amount of the expenditures involved, the date such expenditures were incurred, the month in which the corporation began business, and the number of months (not less than 60 and beginning with the month in which the taxpayer began business) over which such expenditures are to be deducted ratably.

§1.249–1 Limitation on deduction of bond premium on repurchase.

(a) *Limitation*—(1) *General rule.* No deduction is allowed to the issuing corporation for any ''repurchase premium'' paid or incurred to repurchase a convertible obligation to the extent the repurchase premium exceeds a ''normal call premium.''

(2) *Exception.* Under paragraph (e) of this section, the preceding sentence shall not apply to the extent the corporation demonstrates that such excess is attributable to the cost of borrowing and not to the conversion feature.

(b) *Obligations*—(1) *Definition.* For purposes of this section, the term *obligation* means any bond, debenture, note, or certificate or other evidence of indebtedness.

(2) *Convertible obligation.* Section 249 applies to an obligation which is convertible into the stock of the issuing corporation or a corporation which, at the time the obligation is issued or repurchased, is in control of or controlled by the issuing corporation. For purposes of this subparagraph, the term *control* has the meaning assigned to such term by section 368(c).

(3) *Comparable nonconvertible obligation.* A nonconvertible obligation is comparable to a convertible obligation if both obligations are of the same grade and classification, with the same issue and maturity dates, and bearing the same rate of interest. The term *comparable nonconvertible obligation* does not include any obligation which is convertible into property.

(c) *Repurchase premium.* For purposes of this section, the term *repurchase premium* means the excess of the repurchase price paid or incurred to repurchase the obligation over its adjusted issue price (within the meaning of §1.1275–1(b)) as of the repurchase date. For the general rules applicable to the deductibility of repurchase premium, see §1.163–7(c). This paragraph (c) applies to convertible obligations repurchased on or after March 2, 1998.

(d) *Normal call premium*—(1) *In general.* Except as provided in subparagraph (2) of this paragraph, for purposes of this section, a *normal call premium* on a convertible obligation is an amount equal to a normal call premium on a nonconvertible obligation which is comparable to the convertible obligation. A normal call premium on a comparable nonconvertible obligation is a call premium specified in dollars under the terms of such obligation. Thus, if such a specified call premium is constant over the entire term of the obligation, the normal call premium is the amount specified. If, however, the specified call premium varies during the period the comparable nonconvertible obligation is callable or if such obligation is not callable over its entire term, the normal call premium is the amount specified for the period during the term of such comparable nonconvertible obligation which corresponds to the period during which the convertible obligation was repurchased.

(2) *One-year's interest rule.* For a convertible obligation repurchased on or after March 2, 1998, a call premium specified in dollars under the terms of the obligation is considered to be a normal call premium on a nonconvertible obligation if the call premium applicable when the obligation is repurchased does not exceed an amount equal to the interest (including original issue discount) that otherwise would be deductible for the taxable year of repurchase (determined as if the obligation were not repurchased). The provisions of this subparagraph shall not apply if the amount of interest payable for the corporation's taxable year is subject under the terms of the obligation to any contingency other than repurchase prior to the close of such taxable year.

(e) *Exception*—(1) *In general.* If a repurchase premium exceeds a normal call premium, the general rule of paragraph (a) (1) of this section does not apply to the extent that the corporation demonstrates to the satisfaction of the Commissioner or his delegate that such repurchase premium is attributable to the cost of borrowing and is not attributable to the conversion feature. For purposes of this paragraph, if a normal call premium cannot be established under paragraph (d) of this section, the amount thereof shall be considered to be zero.

(2) *Determination of the portion of a repurchase premium attributable to the cost of borrowing and not attributable to the conversion feature.* (i) For purposes of subparagraph (1) of this paragraph, the portion of a repurchase premium which is attributable to the cost of borrowing and which is not attributable to the conversion feature is the amount by which the selling price of the convertible obligation increased between the dates it was issued and repurchased by reason of a decline in yields on comparable nonconvertible obligations traded on an established securities market or, if such comparable traded obligations do not exist, by reason of a decline in yields generally on nonconvertible obligations which are as nearly comparable as possible.

(ii) In determining the amount under subdivision (i) of this subparagraph, appropriate consideration shall be given to all factors affecting the selling price or yields of comparable nonconvertible obligations. Such factors include general changes in prevailing yields of comparable obligations between the dates the convertible obligation was issued and repurchased and the amount (if any) by which the selling price of the nonconvertible obligation was affected by reason of any change in the issuing corporation's credit rating or the credit rating of the obligation during such period (determined on the basis of widely published ratings of recognized credit rating services or on the basis of other relevant facts and circumstances which reflect the relative credit ratings of the corporation or the comparable obligation).

(iii) The relationship between selling price and yields in subdivision (i) of this subparagraph shall ordinarily be determined by means of standard bond tables.

(f) *Effective date*—(1) *In general.* Under section 414(c) of the Tax Reform Act of 1969, the provisions of section 249 and this section shall apply to any repurchase of a convertible obligation occurring after April 22, 1969, other than a convertible obligation repurchased pursuant to a binding obligation incurred on or before April 22, 1969, to repurchase such convertible obligation at a specified call premium. A binding obligation on or before such date may arise if, for example, the issuer irrevocably obligates itself, on or before such date, to repurchase the convertible obligation at a specified price after such date, or if, for example, the issuer, without regard to the terms of the convertible obligation, negotiates a contract which, on or before such date, irrevocably obligates the issuer to repurchase the convertible obligation at a specified price after such date. A binding obligation on or before such date does not include a privilege in the convertible obligation permitting the issuer to call such convertible obligation after such date, which privilege was not exercised on or before such date.

(2) *Effect on transactions not subject to this section.* No inferences shall be drawn from the provisions of section 249 and this section as to the proper treatment of transactions not subject to such provisions because of the effective date limitations thereof. For provisions relating to repurchases of convertible bonds or other evidences of indebtedness to which section 249 and this section do not apply, see §§1.163–3(c) and 1.163–4(c).

(g) *Example.* The provisions of this section may be illustrated by the following example:

Example. On May 15, 1968, corporation A issues a callable 20-year convertible bond at face for $1,000 bearing interest at 10 percent per annum. The bond is convertible at any time into 2 shares of the common stock of corporation A. Under the terms of the bond, the applicable call price prior to May 15, 1975, is $1,100. On June 1, 1974, corporation A calls the bond for $1,100. Since the repurchase premium, $100 (i.e., $1,100 minus $1,000), was specified in dollars in the obligation and does not exceed 1 year's interest at the rate fixed in the obligation, the $100 is considered under paragraph (d) (2) of this section to be a normal call premium on a comparable nonconvertible obligation. Accordingly, A may deduct the $100 under §1.163–3(c).

[T.D. 7259, 38 FR 4254, Feb. 12, 1973, as amended by T.D. 8746, 62 FR 68182, Dec. 31, 1997]

ITEMS NOT DEDUCTIBLE

§1.261–1 General rule for disallowance of deductions.

In computing taxable income, no deduction shall be allowed, except as otherwise expressly provided in Chapter 1 of the Code, in respect of any of the items specified in Part IX (section 262 and following), Subchapter B, Chapter 1 of the Code, and the regulations thereunder.

§1.262–1 Personal, living, and family expenses.

(a) *In general.* In computing taxable income, no deduction shall be allowed, except as otherwise expressly provided in chapter 1 of the Code, for personal, living, and family expenses.

(b) *Examples of personal, living, and family expenses.* Personal, living, and family expenses are illustrated in the following examples:

(1) Premiums paid for life insurance by the insured are not deductible. See also section 264 and the regulations thereunder.

(2) The cost of insuring a dwelling owned and occupied by the taxpayer as a personal residence is not deductible.

(3) Expenses of maintaining a household, including amounts paid for rent, water, utilities, domestic service, and the like, are not deductible. A taxpayer who rents a property for residential purposes, but incidentally conducts business there (his place of business being elsewhere) shall not deduct any part of the rent. If, however, he uses part of the house as his place of business, such portion of the rent and other similar expenses as is properly attributable to such place of business is deductible as a business expense.

(4) Losses sustained by the taxpayer upon the sale or other disposition of property held for personal, living, and family purposes are not deductible. But see section 165 and the regulations thereunder for deduction of losses sustained to such property by reason of casualty, etc.

(5) Expenses incurred in traveling away from home (which include transportation expenses, meals, and lodging) and any other transportation expenses are not deductible unless they qualify as expenses deductible under section 162, §1.162–2, and paragraph (d) of §1.162–5 (relating to trade or business expenses), section 170 and paragraph (a)(2) of §1.170–2 or paragraph (g) of §1.170A–1 (relating to charitable contributions), section 212 and §1.212–1 (relating to expenses for production of income), section 213(e) and paragraph (e)

of § 1.213–1 (relating to medical expenses) or section 217(a) and paragraph (a) of § 1.217–1 (relating to moving expenses). The taxpayer's costs of commuting to his place of business or employment are personal expenses and do not qualify as deductible expenses. The costs of the taxpayer's lodging not incurred in traveling away from home are personal expenses and are not deductible unless they qualify as deductible expenses under section 217. Except as permitted under section 162, 212, or 217, the costs of the taxpayer's meals not incurred in traveling away from home are personal expenses.

(6) Amounts paid as damages for breach of promise to marry, and attorney's fees and other costs of suit to recover such damages, are not deductible.

(7) Generally, attorney's fees and other costs paid in connection with a divorce, separation, or decree for support are not deductible by either the husband or the wife. However, the part of an attorney's fee and the part of the other costs paid in connection with a divorce, legal separation, written separation agreement, or a decree for support, which are properly attributable to the production or collection of amounts includible in gross income under section 71 are deductible by the wife under section 212.

(8) The cost of equipment of a member of the armed services is deductible only to the extent that it exceeds nontaxable allowances received for such equipment and to the extent that such equipment is especially required by his profession and does not merely take the place of articles required in civilian life. For example, the cost of a sword is an allowable deduction in computing taxable income, but the cost of a uniform is not. However, amounts expended by a reservist for the purchase and maintenance of uniforms which may be worn only when on active duty for training for temporary periods, when attending service school courses, or when attending training assemblies are deductible except to the extent that nontaxable allowances are received for such amounts.

(9) Expenditures made by a taxpayer in obtaining an education or in furthering his education are not deductible unless they qualify under section 162 and § 1.162–5 (relating to trade or business expenses).

(c) *Cross references.* Certain items of a personal, living, or family nature are deductible to the extent expressly provided under the following sections, and the regulations under those sections:

(1) Section 163 (interest).

(2) Section 164 (taxes).

(3) Section 165 (losses).

(4) Section 166 (bad debts).

(5) Section 170 (charitable, etc., contributions and gifts).

(6) Section 213 (medical, dental, etc., expenses).

(7) Section 214 (expenses for care of certain dependents).

(8) Section 215 (alimony, etc., payments).

(9) Section 216 (amounts representing taxes and interest paid to cooperative housing corporation).

(10) Section 217 (moving expenses).

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6796, 30 FR 1041, Feb. 2, 1965; T.D. 6918, 32 FR 6681, May 2, 1967; T.D. 7207, 37 FR 20795, Oct. 4, 1972]

§ 1.263(a)–1 Capital expenditures; In general.

(a) Except as otherwise provided in chapter 1 of the Code, no deduction shall be allowed for:

(1) Any amount paid out for new buildings or for permanent improvements or betterments made to increase the value of any property or estate, or

(2) Any amount expended in restoring property or in making good the exhaustion thereof for which an allowance is or has been made in the form of a deduction for depreciation, amortization, or depletion.

(b) In general, the amounts referred to in paragraph (a) of this section include amounts paid or incurred (1) to add to the value, or substantially prolong the useful life, of property owned by the taxpayer, such as plant or equipment, or (2) to adapt property to a new or different use. Amounts paid or incurred for incidental repairs and maintenance of property are not capital expenditures within the meaning of subparagraphs (1) and (2) of this paragraph. See section 162 and § 1.162–4. See section 263A and the regulations thereunder for cost capitalization rules which apply to amounts referred to in paragraph (a) of this section with respect to the production of real and tangible personal property (as defined in §1.263A–1T (a)(5)(iii)), including films, sound recordings, video tapes, books, or similar properties. An amount referred to in paragraph (a) of this section is a capital expenditure that is taken into account through inclusion in inventory costs or a charge to capital accounts or basis no earlier than the taxable year during which the amount is incurred within the meaning of §1.446–1(c)(1)(ii). See section 263A and the regulations thereunder for cost capitalization rules that apply to amounts referred to in paragraph (a) of this section with respect to the production of real and tangible personal property (as defined in §1.263A–2(a)(2)), including films, sound recordings, video tapes, books, or similar properties.

(c) The provisions of paragraph (a) (1) of this section shall not apply to expenditures deductible under:

(1) Section 616 and §§1.616–1 through 1.616–3, relating to the development of mines or deposits,

(2) Section 174 and §§1.174–1 through 1.174–4, relating to research and experimentation,

(3) Section 175 and §§1.175–1 through 1.175–6, relating to soil and water conservation,

(4) Section 179 and §§1.179–1 through 1.179–5, relating to election to expense certain depreciable business assets,

(5) Section 180 and §§1.180–1 and 1.180–2, relating to expenditures by farmers for fertilizer, lime, etc., and

(6) Section 182 and §§1.182–1 through 1.182–6, relating to expenditures by farmers for clearing land.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6794, 30 FR 792, Jan. 26, 1965; T.D. 8121, 52 FR 414, Jan. 6, 1987; T.D. 8131, 52 FR 10084, Mar. 30, 1987; T.D. 8408, 57 FR 12419, Apr. 10, 1992; T.D. 8482, 58 FR 42207, Aug. 9, 1993]

§1.263(a)–2 Examples of capital expenditures.

The following paragraphs of this section include examples of capital expenditures:

(a) The cost of acquisition, construction, or erection of buildings, machinery and equipment, furniture and fixtures, and similar property having a useful life substantially beyond the taxable year.

(b) Amounts expended for securing a copyright and plates, which remain the property of the person making the payments. See section 263A and the regulations thereunder for capitalization rules which apply to amounts expended in securing and producing a copyright and plates in connection with the production of property, including films, sound recordings, video tapes, books, or similar properties.

(c) The cost of defending or perfecting title to property.

(d) The amount expended for architect's services.

(e) Commissions paid in purchasing securities. Commissions paid in selling securities are an offset against the selling price, except that in the case of dealers in securities such commissions may be treated as an ordinary and necessary business expense.

(f) Amounts assessed and paid under an agreement between bondholders or shareholders of a corporation to be used in a reorganization of the corporation or voluntary contributions by shareholders to the capital of the corporation for any corporate purpose. Such amounts are capital investments and are not deductible. See section 118 and §1.118–1.

(g) A holding company which guarantees dividends at a specified rate on the stock of a subsidiary corporation for the purpose of securing new capital for the subsidiary and increasing the value of its stockholdings in the subsidiary shall not deduct amounts paid in carrying out this guaranty in computing its taxable income, but such payments are capital expenditures to be added to the cost of its stock in the subsidiary.

(h) The cost of good will in connection with the acquisition of the assets of a going concern is a capital expenditure.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 8131, 52 FR 10084, Mar. 30, 1987]

§ 1.263(a)–3 Election to deduct or capitalize certain expenditures.

(a) Under certain provisions of the Code, taxpayers may elect to treat capital expenditures as deductible expenses or as deferred expenses, or to treat deductible expenses as capital expenditures.

(b) The sections referred to in paragraph (a) of this section include:

(1) Section 173 (circulation expenditures).

(2) Section 174 (research and experimental expenditures).

(3) Section 175 (soil and water conservation expenditures).

(4) Section 177 (trademark and trade name expenditures).

(5) Section 179 (election to expense certain depreciable business assets).

(6) Section 180 (expenditures by farmers for fertilizer, lime, etc.).

(7) Section 182 (expenditures by farmers for clearing land).

(8) Section 248 (organizational expenditures of a corporation).

(9) Section 266 (carrying charges).

(10) Section 615 (exploration expenditures).

(11) Section 616 (development expenditures).

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6794, 30 FR 792, Jan. 26, 1965; T.D. 8121, 52 FR 414, Jan. 6, 1987]

§ 1.263(b)–1 Expenditures for advertising or promotion of good will.

See § 1.162–14 for the rules applicable to a corporation which has elected to capitalize expenditures for advertising or the promotion of good will under the provisions of section 733 or section 451 of the Internal Revenue Code of 1939, in computing its excess profits tax credit under Subchapter E, Chapter 2, or Subchapter D, Chapter 1, of the Internal Revenue Code of 1939.

§ 1.263(c)–1 Intangible drilling and development costs in the case of oil and gas wells.

For rules relating to the option to deduct as expenses intangible drilling and development costs in the case of oil and gas wells, see § 1.612–4.

§ 1.263(e)–1 Expenditures in connection with certain railroad rolling stock.

(a) *Allowance of deduction*—(1) *Election.* Under section 263(e), for any taxable year beginning after December 31, 1969, a taxpayer may elect to treat certain expenditures paid or incurred during such taxable year as deductible repairs under section 162 or 212. This election applies only to expenditures described in paragraph (c) of this section in connection with the rehabilitation of a unit of railroad rolling stock (as defined in paragraph (b)(2) of this section) used by a domestic common carrier by railroad (as defined in paragraph (b) (3) and (4) of this section). However, an election under section 263(e) may not be made with respect to expenditures in connection with any unit of railroad rolling stock for which an election under section 263(f) and the regulations thereunder is in effect. An election made under section 263(e) is an annual election which may be made with respect to one or more of the units of railroad rolling stock owned by the taxpayer.

(2) *Special 20 percent rule.* Section 263(e) shall not apply if, under paragraph (d) of this section, expenditures paid or incurred during any period of 12 calendar months in connection with the rehabilitation of a unit exceed 20 percent of the basis (as defined in paragraph (b)(1) of this section) of such unit in the hands of the taxpayer. However, section 263(e) does not constitute a limit on the deduction of expenditures for repairs which are deductible without regard to such section. Accordingly, amounts otherwise deductible as repairs will continue to be deductible even though such amounts exceed 20 percent of the basis of the unit of railroad rolling stock in the hands of the taxpayer.

(3) *Time and manner of making election.* (i) An election by a taxpayer under section 263(e) shall be made by a statement to that effect attached to its income tax return or amended income tax return for the taxable year for which the election is made if such return or amended return is filed no later than the time prescribed by law (including extensions thereof) for filing

the return for the taxable year of election. An election under section 263(e) may be made with respect to one or more of the units of railroad rolling stock owned by the taxpayer. If an election is not made within the time and in the manner prescribed in this subparagraph, no election may be made (by the filing of an amended return or in any other manner) with respect to the taxable year.

(ii) If the taxpayer has filed a return on or before March 14, 1973, and has claimed a deduction under section 162 or 212 by reason of section 263(e), and if the taxpayer does not desire to make an election under section 263(e) for the taxable year with respect to which such return was filed, the taxpayer shall file an amended return for such taxable year on or before May 14, 1973, and shall pay any additional tax due for such year. The taxpayer shall also file an amended return for each taxable year which is affected by the filing of an amended return under the preceding sentence and shall pay any additional tax due for such year. Nothing in this subdivision shall be construed as extending the time specified in section 6511 within which a claim for credit or refund may be filed.

(iii) If an election under section 263(e) was not made at the time the return for a taxable year was filed, and it is subsequently determined that an expenditure was erroneously treated as an expenditure which was not in connection with rehabilitation (as determined under paragraph (c) of this section), an election under section 263(e) may be made with respect to the unit of railroad rolling stock for which such expenditure was made for such taxable year, notwithstanding any provision in this subparagraph (3) to the contrary. Nothing in this subdivision shall be construed as extending the time specified in section 6511 within which a claim for credit or refund may be filed.

(iv) The statement required by subdivision (i) of this subparagraph shall include the following information:

(a) The total number of units of railroad rolling stock with respect to which an election is being made under section 263(e).

(b) The aggregate basis (as defined in paragraph (b) (1) of this section) of the units described in (a) of this subdivision (iv), and

(c) The total deduction being claimed under section 263(e) for the taxable year.

(b) *Definitions*—(1) *Basis.* (i) In general, for purposes of section 263(e) the basis of a unit of railroad rolling stock shall be the adjusted basis of such unit determined without regard to the adjustments provided in paragraphs (1), (2), and (3) of section 1016(a) and section 1017. Thus, the basis of property would generally be its cost without regard to adjustments to basis such as for depreciation or for capital improvements. If the basis of a unit in the hands of a transferee is determined in whole or in part by reference to its basis in the hands of the transferor, for example, by reason of the application of section 362 (relating to basis to corporations), 374 (relating to gain or loss not recognized in certain railroad reorganizations), or 723 (relating to the basis of property contributed to a partnership), then the basis of such unit in the hands of the transferor for purposes of section 263(e) shall be its basis for purposes of section 263(e) in the hands of the transferee. Similarly, when the basis of a unit of railroad rolling stock in the hands of the taxpayer is determined in whole or in part by reference to the basis of another unit, for example, by reason of the application of the first sentence of section 1033(c) (relating to involuntary conversions), then the basis of the latter unit for purposes of section 263(e) shall be the basis for purposes of section 263(e) of the former unit. The question whether a capital expenditure in connection with a unit of railroad rolling stock results in the retirement of such unit and the creation of another unit of railroad rolling stock shall be determined without regard to rules under the uniform system of accounts prescribed by the Interstate Commerce Commission.

(ii) For example, if a unit of railroad rolling stock has a cost to M of $10,000 and because of depreciation adjustments of $4,000 and capital expenditures of $3,000, such unit has an adjusted basis in the hands of M of $9,000, the basis for purposes of section 263(e) of such unit in the hands of M is $10,000. Further, if M transfers such unit to N in a transaction in which no gain or loss is recognized such as, for example, a transaction to which section 351(a) (relating to a transfer to a corporation controlled by the transferor) applies, the basis of such unit for purposes of section 263(e) is $10,000 in the hands of N.

(2) *Railroad rolling stock.* For purposes of this section, the term *unit* or *unit of railroad rolling stock* means a unit of transportation equipment the expenditures for which are of a type chargeable (or in the case of property leased to a domestic common carrier by railroad, would be chargeable) to the equipment investment accounts in the uniform system of accounts for railroad companies prescribed by the Interstate Commerce Commission (49 CFR Part 1201), but only if (i) such unit exclusively moves on, moves under, or is guided by rail, and (ii) such unit is not a locomotive. Thus, for example, a unit of railroad rolling stock includes a box car, a gondola car, a passenger car, a car designed to carry truck trailers and containerized freight, a wreck crane, and a bunk car. However, such term does not include equipment which does not exclusively move on, move under, or is not exclusively guided by rail such as, for example, a barge, a tugboat, a container which is used on cars designed to carry containerized freight, a truck trailer, or an automobile. A locomotive is self-propelled equipment, the sole function of which is to push or pull railroad rolling stock. Thus, a self-propelled passenger or freight car is not a locomotive.

(3) *Domestic common carrier by railroad.* The term *domestic common carrier by railroad* means a railroad subject to regulation under Part I of the Interstate Commerce Act (49 U.S.C. 1 *et seq.*) or a railroad which would be subject to regulation under Part I of the Interstate Commerce Act if it were engaged in interstate commerce.

(4) *Use.* For purposes of this section, a unit of railroad rolling stock is not used by a domestic common carrier by railroad if it is owned by a person other than a domestic common carrier by railroad and (i) is exclusively used for transportation by the owner or (ii) is exclusively used for transportation by another person which is not a domestic common carrier by railroad. Thus, for example, a unit of railroad rolling stock which is owned by a person which is not a domestic common carrier by railroad and is leased to a manufacturing company by the owner is not a unit of railroad rolling stock used by a domestic common carrier by railroad.

(c) *Expenditures considered in connection with rehabilitation.* For purposes of section 263(e) and this section all expenditures which would be properly chargeable to capital account but for the application of section 263 (e) or (f) shall be considered to be expenditures in connection with the rehabilitation of a unit of railroad rolling stock. Expenditures which are paid or incurred in connection with incidental repairs or maintenance of a unit of railroad rolling stock and which are deductible without regard to section 263 (e) or (f) shall not be included in any determination or computation under section 263(e) and shall not be treated as paid or incurred in connection with the rehabilitation of a unit of railroad rolling stock for purposes of section 263(e). The determination of whether an item would be, but for section 263 (e) or (f), properly chargeable to capital account shall be made in a manner consistent with the principles for classification of expenditures as between capital and expenses under the Internal Revenue Code. See, for example, §§ 1.162–4, 1.263(a)–1, 1.263(a)–2, and paragraph (a)(4) (ii) and (iii) of § 1.446–1. An expenditure shall be classified as capital or as expense without regard to its classification under the uniform system of accounts prescribed by the Interstate Commerce Commission.

(d) *20-percent limitation*—(1) *In general.* No expenditures in connection with the rehabilitation of a unit of railroad rolling stock shall be treated as a deductible repair by reason of an election under section 263(e) if, during any period of 12 calendar months in which the month the expenditure is included falls, all such expenditures exceed an amount equal to 20 percent of the basis (as defined in paragraph (b)(1) of this section) of such unit in the hands of the taxpayer. All such expenditures shall be included in the computation of the 20-percent limitation even if such expenditures were deducted under section 263(f) in either the preceding or succeeding taxable year. Solely for purposes of the 20-percent limitation in this paragraph, such expenditures shall be deemed to be included in the month in which a rehabilitation of the unit of railroad rolling stock is completed. For the requirement that expenditures treated as repairs solely by reason of an election under section 263(e) be deducted in the taxable year paid or incurred, see paragraph (a) of this section.

(2) *12-month period.* For purposes of this section, any period of 12 calendar months shall consist of any 12 consecutive calendar months except that calendar months prior to the calendar month of January 1970 shall not be included in determining such period.

(3) *Period for certain corporate acquisitions.* If a unit of railroad rolling stock to which section 263(e) applies is sold, exchanged, or otherwise disposed of in a transaction in which its basis in the hands of the transferee is determined in whole or in part by reference to its basis in the hands of the transferor (see paragraph (b)(1) of this section), calendar months during which such unit is in the hands of the transferor and in the hands of such transferee shall both be included in the calendar months used by the transferor and the transferee to determine any period of 12 calendar months for purposes of section 263(e).

(4) *Deduction allowed in year paid or incurred.* If, based on the information available when the income tax return for a taxable year is filed, an expenditure paid or incurred in such taxable year would be deductible by reason of the application of section 263(e) but for the fact that it cannot be established whether the 20-percent limitation in subparagraph (1) of this paragraph will be exceeded, the expenditure shall be deducted for such taxable year. If by reason of the application of such 20-percent limitation it is subsequently determined that such expenditure is not deductible as a repair, an amended return shall be filed for the year in which such deduction was treated as a deductible repair and additional tax, if any, for such year shall be paid. Appropriate adjustment with respect to the taxpayer's tax liability for any other affected year shall be made. Nothing in this subparagraph shall be construed as extending the time specified in section 6511 within which a claim for credit or refund may be filed.

(e) *Recordkeeping requirements*—(1) *In general.* Such records as will enable the accurate determination of the expenditures which may be subject to the treatment provided in section 263(e) shall be maintained. No deduction shall be allowed under section 162 or 212 by reason of section 263(e) with respect to a unit unless the taxpayer substantiates by adequate records that expenditures in connection with such unit of railroad rolling stock meet the requirements and limitations of this section.

(2) *Separate records.* A separate section 263(e) record shall be maintained for each unit with respect to which an election under section 263(e) is made. Such record shall:

(i) Identify the unit,

(ii) State the basis (as defined in paragraph (b)(1) of this section) and the date of acquisition of the unit,

(iii) Enumerate for each unit the amount of all expenditures incurred in connection with rehabilitation of such unit which would, but for section 263 (e) or (f), be properly chargeable to capital account (including expenditures incurred by the taxpayer in connection with rehabilitation of such unit undertaken by a person other than the taxpayer) regardless of whether such expenditures during any 12-month period exceed 20 percent of the basis of such unit,

(iv) Describe the nature of the work in connection with each expenditure, and

(v) Specify the calendar month in which the rehabilitation is completed and the taxable year in which each expenditure is paid or incurred.

A section 263(e) record need only be prepared for a unit of railroad rolling stock for the period beginning on the first day of the eleventh calendar month immediately preceding the month in which the rehabilitation of such unit is completed and ending on the last day of the eleventh calendar month immediately succeeding such month. No section 263(e) record need be prepared for calendar months before January 1970.

(3) *Records for certain expenditures:* Expenditures determined to be incidental repairs and maintenance (referred to in paragraph (c) of this section) shall not be entered in the section 263(e) record. However, each taxpayer shall maintain records to reflect that such expenditures are properly deductible.

(4) *Convenience rule.* In general, expenditures and information maintained in compliance with subparagraphs (1) and (2) of this paragraph shall be recorded in the section 263(e) record of the specific unit with respect to which such expenditures are incurred. However, when a group of units of the same type are rehabilitated in a single project and the expenditure for each unit in the project will approximate the average expenditure per unit for the project, expenditures for the project may be aggregated without regard to the unit in the project with respect to which each expenditure is connected, and an amount equal to the aggregate expenditures for the project divided by the number of units in the project may be entered in the section 263(e) account of each unit in the project.

(f) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. M Corporation, a domestic common carrier by railroad, uses the calendar year as its taxable year. M owns and uses several gondola cars to which an election under section 263(e) applies for its taxable years 1970–1972. Gondola car No.1 has a basis (defined in paragraph (b)(1) of this section) of $10,000. No expenditures properly chargeable to the section 263(e) record are made on gondola car No. 1 in 1970 and 1971, except in January 1971. In January 1971, M at a cost of $1,500 performed rehabilitation work on gondola car No. 1. Such amount was properly entered in the section 263(e) record for gondola car No.1. Since the expenditures in such record do not exceed an amount equal to 20 percent of the basis of gondola car No. 1 ($2,000) during any period of 12 calendar months in which January 1971 falls, the expenditures during January 1971 shall be treated as a deductible expense regardless of what the treatment would have been if section 263(e) had not been enacted.

Example 2. Assume the same facts as in *Example (1).* Assume further that for 1970, 1971, and 1972, only the following expenditures in connection with rehabilitation which would, but for section 263(e), be properly chargeable to capital account were deemed included for gondola car No. 2:

(a) December 1970	$1,500
(b) November 1971	600
(c) December 1971	400
(d) January 1972	1,050

Assume further that gondola car No. 2 has a basis (as defined in paragraph (b) (1) of this section) equal to $10,000, that M files its tax return by September 15 following each taxable year, and that each rehabilitation was completed in the month in which expenditures in connection with it were incurred. Any expenditures in connection with each gondola car (No. 1 or No. 2) have no effect on the treatment of expenditures in connection with the other gondola car. With respect to gondola car No. 2, the expenditures of December 1970 are treated as deductible repairs at the time M's income tax return for 1970 is filed because, based on the information available when the income tax return for 1970 is filed, such expenditure would be deductible by reason of application of section 263(e) but for the fact that it cannot be established whether the 20-percent limitation in paragraph (d)(1) of this section will be exceeded. Nevertheless, because such expenditures during the period of 12 calendar months including calendar months December 1970 and November 1971 exceed $2,000, the December 1970 rehabilitation expenditures are not subject to the provisions of section 263(e). Because such rehabilitation expenditures during the period of 12 calendar months including calendar months February 1971 and January 1972 exceed $2,000, rehabilitation expenditures in 1971 are not subject to the provisions of section 263(e). Similarly, the 1972 rehabilitation expenditures are not subject to the provisions of section 263(e).

[T.D. 7257, 38 FR 4255, Feb. 12, 1973]

§ 1.263(f)–1 Reasonable repair allowance.

(a) For rules regarding the election of the repair allowance authorized by section 263(f), the definition of repair allowance property, and the conditions under which an election may be made, see paragraphs (d) (2) and (f) of § 1.167(a)–11. An election may be made under this section for a taxable year only if the taxpayer makes an election under § 1.167(a)–11 for such taxable year.

(Sec. 263(f), 85 Stat. 509 (26 U.S.C. 263))

[T.D. 7272, 38 FR 9986, Apr. 23, 1973; 38 FR 12919, May 17, 1973; as amended by T.D. 7593, 44 FR 5421, Jan. 26, 1979]

§1.263A–0 Outline of regulations under section 263A.

This section lists the paragraphs in §§1.263A–1 through 1.263A–3 and §1.263A–7 through 1.263A–15.

§1.263A–1 Uniform Capitalization of Costs.

(a) Introduction.
(1) In general.
(2) Effective dates.
(3) General scope.
(i) Property to which section 263A applies.
(ii) Property produced.
(iii) Property acquired for resale.
(iv) Inventories valued at market.
(v) Property produced in a farming business.
(vi) Creative property.
(vii) Property produced or property acquired for resale by foreign persons.
(b) Exceptions.
(1) Small resellers.
(2) Long-term contracts.
(3) Costs incurred in certain farming businesses.
(4) Costs incurred in raising, harvesting, or growing timber.
(5) Qualified creative expenses.
(6) Certain not-for-profit activities.
(7) Intangible drilling and development costs.
(8) Natural gas acquired for resale.
(i) Cushion gas.
(ii) Emergency gas.
(9) Research and experimental expenditures.
(10) Certain property that is substantially constructed.
(11) Certain property provided incident to services.
(i) In general.
(ii) Definition of services.
(iii) De minimis property provided incident to services.
(12) De minimis rule for certain producers with total indirect costs of $200,000 or less.
(13) Exception for the origination of loans.
(c) General operation of section 263A.
(1) Allocations.
(2) Otherwise deductible.
(3) Capitalize.
(4) Recovery of capitalized costs.
(d) Definitions.
(1) Self-constructed assets.
(2) Section 471 costs.
(i) In general.
(ii) New taxpayers.
(iii) Method changes.
(3) Additional section 263A costs.
(4) Section 263A costs.
(e) Types of costs subject to capitalization.
(1) In general.
(2) Direct costs.
(i) Producers.
(A) Direct material costs.
(B) Direct labor costs.
(ii) Resellers.
(3) Indirect costs.
(i) In general.
(ii) Examples of indirect costs required to be capitalized.
(A) Indirect labor costs.
(B) Officers' compensation.
(C) Pension and other related costs.
(D) Employee benefit expenses.
(E) Indirect material costs.
(F) Purchasing costs.
(G) Handling costs.
(H) Storage costs.
(I) Cost recovery.
(J) Depletion.
(K) Rent.
(L) Taxes.
(M) Insurance.
(N) Utilities.
(O) Repairs and maintenance.
(P) Engineering and design costs.
(Q) Spoilage.
(R) Tools and equipment.
(S) Quality control.
(T) Bidding costs.
(U) Licensing and franchise costs.
(V) Interest.
(W) Capitalizable service costs.
(iii) Indirect costs not capitalized.
(A) Selling and distribution costs.
(B) Research and experimental expenditures.
(C) Section 179 costs.
(D) Section 165 losses.
(E) Cost recovery allowances on temporarily idle equipment and facilities.
(*1*) In general.
(*2*) Examples.
(F) Taxes assessed on the basis of income.
(G) Strike expenses.
(H) Warranty and product liability costs.
(I) On-site storage costs.
(J) Unsuccessful bidding expenses.
(K) Deductible service costs.
(4) Service costs.
(i) Introduction.
(A) Definition of service costs.
(B) Definition of service departments.
(ii) Various service cost categories.
(A) Capitalizable service costs.
(B) Deductible service costs.
(C) Mixed service costs.
(iii) Examples of capitalizable service costs.
(iv) Examples of deductible service costs.
(f) Cost allocation methods.
(1) Introduction.
(2) Specific identification method.
(3) Burden rate and standard cost methods.
(i) Burden rate method.
(A) In general.
(B) Development of burden rates.
(C) Operation of the burden rate method.
(ii) Standard cost method.
(A) In general.
(B) Treatment of variances.

(4) Reasonable allocation methods.
(g) Allocating categories of costs.
(1) Direct materials.
(2) Direct labor.
(3) Indirect costs.
(4) Service costs.
(i) In general.
(ii) De minimis rule.
(iii) Methods for allocating mixed service costs.
(A) Direct reallocation method.
(B) Step-allocation method.
(C) Examples.
(iv) Illustrations of mixed service cost allocations using reasonable factors or relationships.
(A) Security services.
(B) Legal services.
(C) Centralized payroll services.
(D) Centralized data processing services.
(E) Engineering and design services.
(F) Safety engineering services.
(v) Accounting method change.
(h) Simplified service cost method.
(1) Introduction.
(2) Eligible property.
(i) In general.
(A) Inventory property.
(B) Non-inventory property held for sale.
(C) Certain self-constructed assets.
(D) Self-constructed assets produced on a repetitive basis.
(ii) Election to exclude self-constructed assets.
(3) General allocation formula.
(4) Labor-based allocation ratio.
(5) Production cost allocation ratio.
(6) Definition of total mixed service costs.
(7) Costs allocable to more than one business.
(8) De minimis rule.
(9) Separate election.
(i) [Reserved]
(j) Special rules.
(1) Costs provided by a related person.
(i) In general.
(ii) Exceptions.
(2) Optional capitalization of period costs.
(i) In general.
(ii) Period costs eligible for capitalization.
(3) Trade or business application.
(4) Transfers with a principal purpose of tax avoidance. [Reserved]

§ 1.263A–2 Rules Relating to Property Produced by the Taxpayer.

(a) In general.
(1) Produce.
(i) In general.
(ii) Ownership.
(A) General rule.
(B) Property produced for the taxpayer under a contract.
(*1*) In general.
(*2*) Definition of contract.
(C) Home construction contracts.
(2) Tangible personal property.
(i) General rule.
(ii) Intellectual or creative property.
(A) Intellectual or creative property that is tangible personal property.
(*1*) Books.
(*2*) Sound recordings.
(B) Intellectual or creative property that is not tangible personal property.
(*1*) Evidences of value.
(*2*) Property provided incident to services.
(3) Costs required to be capitalized by producers.
(i) In general.
(ii) Pre-production costs.
(iii) Post-production costs.
(4) Practical capacity concept.
(5) Taxpayers required to capitalize costs under this section.
(b) Simplified production method.
(1) Introduction.
(2) Eligible property.
(i) In general.
(A) Inventory property.
(B) Non-inventory property held for sale.
(C) Certain self-constructed assets.
(D) Self-constructed assets produced on a repetitive basis.
(ii) Election to exclude self-constructed assets.
(3) Simplified production method without historic absorption ratio election.
(i) General allocation formula.
(ii) Definitions.
(A) Absorption ratio.
(*1*) Additional section 263A costs incurred during the taxable year.
(*2*) Section 471 costs incurred during the taxable year.
(B) Section 471 costs remaining on hand at year end.
(iii) LIFO taxpayers electing the simplified production method.
(A) In general.
(B) LIFO increment.
(C) LIFO decrement.
(iv) De minimis rule for producers with total indirect costs of $200,000 or less.
(A) In general.
(B) Related party and aggregation rules.
(v) Examples.
(4) Simplified production method with historic absorption ratio election.
(i) In general.
(ii) Operating rules and definitions.
(A) Historic absorption ratio.
(B) Test period.
(*1*) In general.
(*2*) Updated test period.
(C) Qualifying period.
(*1*) In general.
(*2*) Extension of qualifying period.
(iii) Method of accounting.
(A) Adoption and use.
(B) Revocation of election.
(iv) Reporting and recordkeeping requirements.
(A) Reporting.

(B) Recordkeeping.
(v) Transition rules.
(vi) Example.
(c) Additional simplified methods for producers.
(d) Cross reference.

§1.263A–3 Rules Relating to Property Acquired for Resale

(a) Capitalization rules for property acquired for resale.
(1) In general.
(2) Resellers with production activities.
(i) In general.
(ii) Exception for small resellers.
(iii) De minimis production activities.
(A) In general.
(B) Example.
(3) Resellers with property produced under a contract.
(4) Use of the simplified resale method.
(i) In general.
(ii) Resellers with de minimis production activities.
(iii) Resellers with property produced under a contract.
(iv) Application of simplified resale method.
(b) Gross receipts exception for small resellers.
(1) In general.
(i) Test period for new taxpayers.
(ii) Treatment of short taxable year.
(2) Definition of gross receipts.
(i) In general.
(ii) Amounts excluded.
(3) Aggregation of gross receipts.
(i) In general.
(ii) Single employer defined.
(iii) Gross receipts of a single employer.
(iv) Examples.
(c) Purchasing, handling, and storage costs.
(1) In general.
(2) Costs attributable to purchasing, handling, and storage.
(3) Purchasing costs.
(i) In general.
(ii) Determination of whether personnel are engaged in purchasing activities.
(A) ⅓–⅔ rule for allocating labor costs.
(B) Example.
(4) Handling costs.
(i) In general.
(ii) Processing costs.
(iii) Assembling costs.
(iv) Repackaging costs.
(v) Transportation costs.
(vi) Costs not considered handling costs.
(A) Distribution costs.
(B) Delivery of custom-ordered items.
(C) Repackaging after sale occurs.
(5) Storage costs.
(i) In general.
(ii) Definitions.
(A) On-site storage facility.
(B) Retail sales facility.
(C) An integral part of a retail sales facility.
(D) On-site sales.
(E) Retail customer.
(*1*) In general.
(*2*) Certain non-retail customers treated as retail customers.
(F) Off-site storage facility.
(G) Dual-function storage facility.
(iii) Treatment of storage costs incurred at a dual-function storage facility.
(A) In general.
(B) Dual-function storage facility allocation ratio.
(*1*) In general.
(*2*) Illustration of ratio allocation.
(*3*) Appropriate adjustments for other uses of a dual-function storage facility.
(C) De minimis 90–10 rule for dual-function storage facilities.
(iv) Costs not attributable to an off-site storage facility.
(v) Examples.
(d) Simplified resale method.
(1) Introduction.
(2) Eligible property.
(3) Simplified resale method without historic absorption ratio election.
(i) General allocation formula.
(A) In general.
(B) Effect of allocation.
(C) Definitions.
(*1*) Combined absorption ratio.
(*2*) Section 471 costs remaining on hand at year end.
(D) Storage and handling costs absorption ratio.
(E) Purchasing costs absorption ratio.
(F) Allocable mixed service costs.
(ii) LIFO taxpayers electing simplified resale method.
(A) In general.
(B) LIFO increment.
(C) LIFO decrement.
(iii) Permissible variations of the simplified resale method.
(iv) Examples.
(4) Simplified resale method with historic absorption ratio election.
(i) In general.
(ii) Operating rules and definitions.
(A) Historic absorption ratio.
(B) Test period.
(*1*) In general.
(*2*) Updated test period.
(C) Qualifying period.
(*1*) In general.
(*2*) Extension of qualifying period.
(iii) Method of accounting.
(A) Adoption and use.
(B) Revocation of election.
(iv) Reporting and recordkeeping requirements.
(A) Reporting.
(B) Recordkeeping.
(v) Transition rules.
(vi) Example.

(5) Additional simplified methods for resellers.
(e) Cross reference.

§ 1.263A–7 Changing a method of accounting under section 263A.

(a) Introduction.
(1) Purpose.
(2) Taxpayers that adopt a method of accounting under section 263A.
(3) Taxpayers that change a method of accounting under section 263A.
(4) Effective date.
(5) Definition of change in method of accounting.
(b) Rules applicable to a change in method of accounting.
(1) General rules.
(2) Special rules.
(i) Ordering rules when multiple changes in method of accounting occur in the year of change.
(A) In general.
(B) Exceptions to the general ordering rule.
(*1*) Change from the LIFO inventory method.
(*2*) Change from the specific goods LIFO inventory method.
(*3*) Change in overall method of accounting.
(*4*) Change in method of accounting for depreciation.
(ii) Adjustment required by section 481(a).
(iii) Base year.
(A) Need for a new base year.
(*1*) Facts and circumstances revaluation method used.
(*2*) 3-year average method used.
(*i*) Simplified method not used.
(*ii*) Simplified method used.
(B) Computing a new base year.
(c) Inventory.
(1) Need for adjustments.
(2) Revaluing beginning inventory.
(i) In general.
(ii) Methods to revalue inventory.
(iii) Facts and circumstances revaluation method.
(A) In general.
(B) Exception.
(C) Estimates and procedures allowed.
(D) Use by dollar-value LIFO taxpayers.
(E) Examples.
(iv) Weighted average method.
(A) In general.
(B) Weighted average method for FIFO taxpayers.
(*1*) In general.
(*2*) Example.
(C) Weighted average method for specific goods LIFO taxpayers.
(*1*) In general.
(*2*) Example.
(D) Adjustments to inventory costs from prior years.
(v) 3-year average method.
(A) In general.
(B) Consecutive year requirement.
(C) Example.
(D) Short taxable years.
(E) Adjustments to inventory costs from prior years.
(*1*) General rule.
(*2*) Examples of costs eligible for restatement adjustment procedure.
(F) Restatement adjustment procedure.
(*1*) In general.
(*2*) Examples of restatement adjustment procedure.
(3) Intercompany items.
(i) Revaluing intercompany transactions.
(ii) Example.
(iii) Availability of revaluation methods.
(4) Anti-abuse rule.
(i) In general.
(ii) Deemed avoidance of this section.
(A) Scope.
(B) General rule.
(iii) Election to use transferor's LIFO layers.
(iv) Tax avoidance intent not required.
(v) Related corporation.
(d) Non-inventory property.
(1) Need for adjustments.
(2) Revaluing property.

§ 1.263A–8 Requirement to capitalize interest.

(a) In general.
(1) General rule.
(2) Treatment of interest required to be capitalized.
(3) Methods of accounting under section 263A(f).
(4) Special definitions.
(i) Related person.
(ii) Placed in service.
(b) Designated property.
(1) In general.
(2) Special rules.
(i) Application of thresholds.
(ii) Relevant activities and costs.
(iii) Production period and cost of production.
(3) Excluded property.
(4) De minimis rule.
(i) In general.
(ii) Determination of total production expenditures.
(c) Definition of real property.
(1) In general.
(2) Unsevered natural products of land.
(3) Inherently permanent structures.
(4) Machinery.
(i) Treatment.
(ii) Certain factors not determinative.
(d) Production.
(1) Definition of produce.
(2) Property produced under a contract.
(i) Customer.
(ii) Contractor.
(iii) Definition of a contract.
(iv) Determination of whether thresholds are satisfied.

(A) Customer.
(B) Contractor.
(v) Exclusion for property subject to long-term contract rules.
(3) Improvements to existing property.
(i) In general.
(ii) Real property.
(iii) Tangible personal property.

§1.263A–9 The avoided cost method.

(a) In general.
(1) Description.
(2) Overview.
(i) In general.
(ii) Rules that apply in determining amounts.
(3) Definitions of interest and incurred.
(4) Definition of eligible debt.
(b) Traced debt amount.
(1) General rule.
(2) Identification and definition of traced debt.
(3) Example.
(c) Excess expenditure amount.
(1) General rule.
(2) Interest required to be capitalized.
(3) Example.
(4) Treatment of interest subject to a deferral provision.
(5) Definitions.
(i) Nontraced debt.
(A) Defined.
(B) Example.
(ii) Average excess expenditures.
(A) General rule.
(B) Example.
(iii) Weighted average interest rate.
(A) Determination of rate.
(B) Interest incurred on nontraced debt.
(C) Average nontraced debt.
(D) Special rules if taxpayer has no nontraced debt or rate is contingent.
(6) Examples.
(7) Special rules where the excess expenditure amount exceeds incurred interest.
(i) Allocation of total incurred interest to units.
(ii) Application of related person rules to average excess expenditures.
(iii) Special rule for corporations.
(d) Election not to trace debt.
(1) General rule.
(2) Example.
(e) Election to use external rate.
(1) In general.
(2) Eligible taxpayer.
(f) Selection of computation period and measurement dates and application of averaging conventions.
(1) Computation period.
(i) In general.
(ii) Method of accounting.
(iii) Production period beginning or ending during the computation period.
(2) Measurement dates.
(i) In general.
(ii) Measurement period.
(iii) Measurement dates on which accumulated production expenditures must be taken into account.
(iv) More frequent measurement dates.
(3) Examples.
(g) Special rules.
(1) Ordering rules.
(i) Provisions preempted by section 263A(f).
(ii) Deferral provisions applied before this section.
(2) Application of section 263A(f) to deferred interest.
(i) In general.
(ii) Capitalization of deferral amount.
(iii) Deferred capitalization.
(iv) Substitute capitalization.
(A) General rule.
(B) Capitalization of amount carried forward.
(C) Method of accounting.
(v) Examples.
(3) Simplified inventory method.
(i) In general.
(ii) Segmentation of inventory.
(A) General rule.
(B) Example.
(iii) Aggregate interest capitalization amount.
(A) Computation period and weighted average interest rate.
(B) Computation of the tentative aggregate interest capitalization amount.
(C) Coordination with other interest capitalization computations.
(*1*) In general.
(*2*) Deferred interest.
(*3*) Other coordinating provisions.
(D) Treatment of increases or decreases in the aggregate interest capitalization amount.
(E) Example.
(iv) Method of accounting.
(4) Financial accounting method disregarded.
(5) Treatment of intercompany transactions.
(i) General rule.
(ii) Special rule for consolidated group with limited outside borrowing.
(iii) Example.
(6) Notional principal contracts and other derivatives. [Reserved]
(7) 15-day repayment rule.

§1.263A–10 Unit of property.

(a) In general.
(b) Units of real property.
(1) In general.
(2) Functional interdependence.
(3) Common features.
(4) Allocation of costs to unit.
(5) Treatment of costs when a common feature is included in a unit of real property.
(i) General rule.
(ii) Production activity not undertaken on benefitted property.

(A) Direct production activity not undertaken.
(*1*) In general.
(*2*) Land attributable to a benefitted property.
(B) Suspension of direct production activity after clearing and grading undertaken.
(*1*) General rule.
(*2*) Accumulated production expenditures.
(iii) Common feature placed in service before the end of production of a benefitted property.
(iv) Benefitted property sold before production completed on common feature.
(v) Benefitted property placed in service before production completed on common feature.
(6) Examples.
(c) Units of tangible personal property.
(d) Treatment of installations.

§ 1.263A–11 Accumulated production expenditures.

(a) General rule.
(b) When costs are first taken into account.
(1) In general.
(2) Dedication rule for materials and supplies.
(c) Property produced under a contract.
(1) Customer.
(2) Contractor.
(d) Property used to produce designated property.
(1) In general.
(2) Example.
(3) Excluded equipment and facilities.
(e) Improvements.
(1) General rule.
(2) De minimis rule.
(f) Mid-production purchases.
(g) Related person costs.
(h) Installation.

§ 1.263A–12 Production period.

(a) In general.
(b) Related person activities.
(c) Beginning of production period.
(1) In general.
(2) Real property.
(3) Tangible personal property.
(d) End of production period.
(1) In general.
(2) Special rules.
(3) Sequential production or delivery.
(4) Examples.
(e) Physical production activities.
(1) In general.
(2) Illustrations.
(f) Activities not considered physical production.
(1) Planning and design.
(2) Incidental repairs.
(g) Suspension of production period.
(1) In general.
(2) Special rule.
(3) Method of accounting.
(4) Example.

§ 1.263A–13 Oil and gas activities.

(a) In general.
(b) Generally applicable rules.
(1) Beginning of production period.
(i) Onshore activities.
(ii) Offshore activities.
(2) End of production period.
(3) Accumulated production expenditures.
(i) Costs included.
(ii) Improvement unit.
(c) Special rules when definite plan not established.
(1) In general.
(2) Oil and gas units.
(i) First productive well unit.
(ii) Subsequent units.
(3) Beginning of production period.
(i) First productive well unit.
(ii) Subsequent wells.
(4) End of production period.
(5) Accumulated production expenditures.
(i) First productive well unit.
(ii) Subsequent well unit.
(6) Allocation of interest capitalized with respect to first productive well unit.
(7) Examples.

1.263A–14 Rules for related persons.

§ 1.263A–15 Effective dates, transitional rules, and anti-abuse rule.

(a) Effective dates.
(b) Transitional rule for accumulated production expenditures.
(1) In general.
(2) Property used to produce designated property.
(c) Anti-abuse rule.

[T.D. 8482, 58 FR 42207, Aug. 9, 1993, as amended by T.D. 8584, 59 FR 67196, Dec. 29, 1994; 60 FR 16574, Mar. 31, 1995; T.D. 8728, 62 FR 42054, Aug. 5, 1997]

§ 1.263A–0T Outline of regulations under section 263A (temporary).

This section lists the paragraphs in § 1.263A–4T.

§ 1.263A–4T Rules for property produced in a farming business (temporary).

(a) Introduction.
(1) In general.
(2) Exception.
(i) In general.
(ii) Tax shelter.
(iii) Presumption.
(iv) Costs required to be capitalized or inventoried under another provision.
(v) Examples.
(3) Farming business.
(i) In general.
(A) Plant.

(B) Animal.
(ii) Incidental activities.
(A) In general.
(B) Activities that are not incidental.
(*1*) In general.
(*2*) Examples.
(b) Application of section 263A to property produced in a farming business.
(1) In general.
(i) Plants.
(ii) Animals.
(2) Preproductive period.
(i) Plant.
(A) In general.
(B) Applicability of section 263A.
(C) Actual preproductive period.
(*1*) Beginning of the preproductive period.
(*2*) End of the preproductive period.
(*i*) In general.
(*ii*) Marketable quantities.
(D) Examples.
(ii) Animal.
(A) Beginning of the preproductive period.
(B) End of the preproductive period.
(C) Allocation of costs between animal and first yield.
(c) Inventory methods.
(1) In general.
(2) Available for property used in a trade or business.
(3) Exclusion of property to which section 263A does not apply.
(d) Election not to have section 263A apply.
(1) Introduction.
(2) Availability of the election.
(3) Time and manner of making the election.
(4) Special rules.
(i) Section 1245 treatment.
(ii) Required use of alternative depreciation system.
(iii) Related person.
(A) In general.
(B) Members of family.
(5) Examples.
(e) Exception for certain costs resulting from casualty losses.
(1) In general.
(2) Ownership.
(3) Examples.
(4) Special rule for citrus and almond groves.
(i) In general.
(ii) Example.
(f) Effective date and transition rule.

[T.D. 8729, 62 FR 44546, Aug. 22, 1997]

§1.263A–1 Uniform capitalization of costs.

(a) *Introduction*—(1) *In general.* The regulations under §§1.263A–1 through 1.263A–6 provide guidance to taxpayers that are required to capitalize certain costs under section 263A. These regulations generally apply to all costs required to be capitalized under section 263A except for interest that must be capitalized under section 263A(f) and the regulations thereunder. Statutory or regulatory exceptions may provide that section 263A does not apply to certain activities or costs; however, those activities or costs may nevertheless be subject to capitalization requirements under other provisions of the Internal Revenue Code and regulations.

(2) *Effective dates.* (i) In general, this section and §§1.263A–2 and 1.263A–3 apply to costs incurred in taxable years beginning after December 31, 1993. In the case of property that is inventory in the hands of the taxpayer, however, these sections are effective for taxable years beginning after December 31, 1993. Changes in methods of accounting necessary as a result of the rules in this section and §§1.263A–2 and 1.263A–3 must be made under terms and conditions prescribed by the Commissioner. Under these terms and conditions, the principles of §1.263A–7 must be applied in revaluing inventory property.

(ii) For taxable years beginning before January 1, 1994, taxpayers must take reasonable positions on their federal income tax returns when applying section 263A. For purposes of this paragraph (a)(2)(iii), a reasonable position is a position consistent with the temporary regulations, revenue rulings, revenue procedures, notices, and announcements concerning section 263A applicable in taxable years beginning before January 1, 1994. See §601.601(d)(2)(ii)(*b*) of this chapter.

(3) *General scope*—(i) *Property to which section 263A applies.* Taxpayers subject to section 263A must capitalize all direct costs and certain indirect costs properly allocable to—

(A) Real property and tangible personal property produced by the taxpayer; and

(B) Real property and personal property described in section 1221(1), which is acquired by the taxpayer for resale.

(ii) *Property produced.* Taxpayers that produce real property and tangible personal property (producers) must capitalize all the direct costs of producing the property and the property's properly allocable share of indirect costs (described in paragraphs (e)(2)(i) and (3) of this section), regardless of whether the property is sold or used in the taxpayer's trade or business. See § 1.263A–2 for rules relating to producers.

(iii) *Property acquired for resale.* Retailers, wholesalers, and other taxpayers that acquire property described in section 1221(1) for resale (resellers) must capitalize the direct costs of acquiring the property and the property's properly allocable share of indirect costs (described in paragraphs (e)(2)(ii) and (3) of this section). See § 1.263A–3 for rules relating to resellers. See also section 263A(b)(2)(B), which excepts from section 263A personal property acquired for resale by a small reseller.

(iv) *Inventories valued at market.* Section 263A does not apply to inventories valued at market under either the market method or the lower of cost or market method if the market valuation used by the taxpayer generally equals the property's fair market value. For purposes of this paragraph (a)(3)(iv), the term fair market value means the price at which the taxpayer sells its inventory to its customers (e.g., as in the market value definition provided in § 1.471–4(b)) less, if applicable, the direct cost of disposing of the inventory. However, section 263A does apply in determining the market value of any inventory for which market is determined with reference to replacement cost or reproduction cost. See §§ 1.471–4 and 1.471–5.

(v) *Property produced in a farming business.* Section 263A generally requires taxpayers engaged in a farming business to capitalize certain costs. See section 263A(d) and § 1.263A–4T(c) for rules relating to taxpayers engaged in a farming business.

(vi) *Creative property.* Section 263A generally requires taxpayers engaged in the production and resale of creative property to capitalize certain costs.

(vii) *Property produced or property acquired for resale by foreign persons.* Section 263A generally applies to foreign persons.

(b) *Exceptions*—(1) *Small resellers.* See section 263A(b)(2)(B) for the $10,000,000 gross receipts exception for small resellers of personal property. See § 1.263A–3(b) for rules relating to this exception. See also the exception for small resellers with de minimis production activities in § 1.263A–3(a)(2)(ii) and the exception for small resellers that have property produced under contract in § 1.263A–3(a)(3).

(2) *Long-term contracts.* Except for certain home construction contracts described in section 460(e)(1), section 263A does not apply to any property produced by the taxpayer pursuant to a long-term contract as defined in section 460(f), regardless of whether the taxpayer uses an inventory method to account for such production.

(3) *Costs incurred in certain farming businesses.* See section 263A(d) for an exception for costs paid or incurred in certain farming businesses. See § 1.263A–4T for specific rules relating to taxpayers engaged in the trade or business of farming.

(4) *Costs incurred in raising, harvesting, or growing timber.* See section 263A(c)(5) for an exception for costs paid or incurred in raising, harvesting, or growing timber and certain ornamental trees. See § 1.263A–4T, however, for rules relating to taxpayers producing certain trees to which section 263A applies.

(5) *Qualified creative expenses.* See section 263A(h) for an exception for qualified creative expenses paid or incurred by certain free-lance authors, photographers, and artists.

(6) *Certain not-for-profit activities.* See section 263A(c)(1) for an exception for property produced by a taxpayer for use by the taxpayer other than in a trade or business or an activity conducted for profit. This exception does not apply, however, to property produced by an exempt organization in connection with its unrelated trade or business activities.

(7) *Intangible drilling and development costs.* See section 263A(c)(3) for an exception for intangible drilling and development costs. Additionally, section 263A does not apply to any amount allowable as a deduction under section 59(e) with respect to qualified expenditures under sections 263(c), 616(a), or 617(a).

(8) *Natural gas acquired for resale.* Under this paragraph (b)(8), section 263A does not apply to any costs incurred by a taxpayer relating to natural gas acquired for resale to the extent such costs would otherwise be allocable to cushion gas.

(i) *Cushion gas.* Cushion gas is the portion of gas stored in an underground storage facility or reservoir that is required to maintain the level of pressure necessary for operation of the facility. However, section 263A applies to costs incurred by a taxpayer relating to natural gas acquired for resale to the extent such costs are properly allocable to emergency gas.

(ii) *Emergency gas.* Emergency gas is natural gas stored in an underground storage facility or reservoir for use during periods of unusually heavy customer demand.

(9) *Research and experimental expenditures.* See section 263A(c)(2) for an exception for any research and experimental expenditure allowable as a deduction under section 174 or the regulations thereunder. Additionally, section 263A does not apply to any amount allowable as a deduction under section 59(e) with respect to qualified expenditures under section 174.

(10) *Certain property that is substantially constructed.* Section 263A does not apply to any property produced by a taxpayer for use in its trade or business if substantial construction occurred before March 1, 1986.

(i) For purposes of this section, substantial construction is deemed to have occurred if the lesser of—

(A) 10 percent of the total estimated costs of construction; or

(B) The greater of $10 million or 2 percent of the total estimated costs of construction, was incurred before March 1, 1986.

(ii) For purposes of the provision in paragraph (b)(10)(i) of this section, the total estimated costs of construction shall be determined by reference to a reasonable estimate, on or before March 1, 1986, of such amount. Assume, for example, that on March 1, 1986, the estimated costs of constructing a facility were $150 million. Assume that before March 1, 1986, $12 million of construction costs had been incurred. Based on the above facts, substantial construction would be deemed to have occurred before March 1, 1986, because $12 million (the costs of construction incurred before such date) is greater than $10 million (the lesser of $15 million; or the greater of $10 million or $3 million). For purposes of this provision, construction costs are defined as those costs incurred after construction has commenced at the site of the property being constructed (unless the property will not be located on land and, therefore, the initial construction of the property must begin at a location other than the intended site). For example, in the case of a building, construction commences when work begins on the building, such as the excavation of the site, the pouring of pads for the building, or the driving of foundation pilings into the ground. Preliminary activities such as project engineering and architectural design do not constitute the commencement of construction, nor are such costs considered construction costs, for purposes of this paragraph (b)(10).

(11) *Certain property provided incident to services*—(i) *In general.* Under this paragraph (b)(11), section 263A does not apply to property that is provided to a client (or customer) incident to the provision of services by the taxpayer if the property provided to the client is—

(A) De minimis in amount; and

(B) Not inventory in the hands of the service provider.

(ii) *Definition of services.* For purposes of this paragraph (b)(11), services is defined with reference to its ordinary and accepted meaning under federal income tax principles. In determining whether a taxpayer is a bona-fide service provider under this paragraph (b)(11), the nature of the taxpayer's trade or business and the facts and circumstances surrounding the taxpayer's trade or business activities must be considered. Examples of taxpayers qualifying as service providers under this paragraph include taxpayers performing services in the fields of health, law, engineering, architecture, accounting, actuarial science, performing arts, or consulting.

(iii) *De minimis property provided incident to services.* In determining whether property provided to a client by a service provider is de minimis in amount, all facts and circumstances, such as the nature of the taxpayer's trade or business and the volume of its service activities in the trade or business, must be considered. A significant factor in making this determination is the relationship between the acquisition or direct materials costs of the property that is provided to clients and the price that the taxpayer charges its clients for its services and the property. For purposes of this paragraph (b)(11), if the acquisition or direct materials cost of the property provided to a client incident to the services is less than or equal to five percent of the price charged to the client for the services and property, the property is de minimis. If the acquisition or direct materials cost of the property exceeds five percent of the price charged for the services and property, the property may be de minimis if additional facts and circumstances so indicate.

(12) *De minimis rule for certain producers with total indirect costs of $200,000 or less.* See §1.263A–2(b)(3)(iv) for a de minimis rule that treats producers with total indirect costs of $200,000 or less as having no additional section 263A costs (as defined in paragraph (d)(3) of this section) for purposes of the simplified production method.

(13) *Exception for the origination of loans.* For purposes of section 263A(b)(2)(A), the origination of loans is not considered the acquisition of intangible property for resale. (But section 263A(b)(2)(A) does include the acquisition by a taxpayer of pre-existing loans from other persons for resale.)

(c) *General operation of section 263A*—(1) *Allocations.* Under section 263A, taxpayers must capitalize their direct costs and a properly allocable share of their indirect costs to property produced or property acquired for resale. In order to determine these capitalizable costs, taxpayers must allocate or apportion costs to various activities, including production or resale activities. After section 263A costs are allocated to the appropriate production or resale activities, these costs are generally allocated to the items of property produced or property acquired for resale during the taxable year and capitalized to the items that remain on hand at the end of the taxable year. See however, the simplified production method and the simplified resale method in §§1.263A–2(b) and 1.263A–3(d).

(2) *Otherwise deductible.* (i) Any cost which (but for section 263A and the regulations thereunder) may not be taken into account in computing taxable income for any taxable year is not treated as a cost properly allocable to property produced or acquired for resale under section 263A and the regulations thereunder. Thus, for example, if a business meal deduction is limited by section 274(n) to 80 percent of the cost of the meal, the amount properly allocable to property produced or acquired for resale under section 263A is also limited to 80 percent of the cost of the meal.

(ii) The amount of any cost required to be capitalized under section 263A may not be included in inventory or charged to capital accounts or basis any earlier than the taxable year during which the amount is incurred within the meaning of §1.446–1(c)(1)(ii).

(3) *Capitalize.* Capitalize means, in the case of property that is inventory in the hands of a taxpayer, to include in inventory costs and, in the case of other property, to charge to a capital account or basis.

(4) *Recovery of capitalized costs.* Costs that are capitalized under section 263A are recovered through depreciation, amortization, cost of goods sold, or by an adjustment to basis at the time the property is used, sold, placed in service, or otherwise disposed of by the taxpayer. Cost recovery is determined by the applicable Internal Revenue Code and regulation provisions relating to the use, sale, or disposition of property.

(d) *Definitions*—(1) *Self-constructed assets.* Self-constructed assets are assets produced by a taxpayer for use by the taxpayer in its trade or business. Self-constructed assets are subject to section 263A.

(2) *Section 471 costs*—(i) *In general.* Except as otherwise provided in paragraphs (d)(2)(ii) and (iii) of this section, for purposes of the regulations under section 263A, a taxpayer's section 471 costs are the costs, other than interest, capitalized under its method of accounting immediately prior to the effective date of section 263A. Thus, although section 471 applies only to inventories, section 471 costs include any non-inventory costs, other than interest, capitalized or included in acquisition or production costs under the taxpayer's method of accounting immediately prior to the effective date of section 263A.

(ii) *New taxpayers.* In the case of a new taxpayer, section 471 costs are those acquisition or production costs, other than interest, that would have been required to be capitalized by the taxpayer if the taxpayer had been in existence immediately prior to the effective date of section 263A.

(iii) *Method changes.* If a taxpayer included a cost described in §1.471–11(c)(2)(iii) in its inventoriable costs immediately prior to the effective date of section 263A, that cost is included in the taxpayer's section 471 costs under paragraph (d)(2)(i) of this section. Except as provided in the following sentence, a change in the financial reporting practices of a taxpayer for costs described in §1.471–11(c)(2)(iii) subsequent to the effective date of section 263A does not affect the classification of these costs as section 471 costs. A taxpayer may change its established methods of accounting used in determining section 471 costs only with the consent of the Commissioner as required under section 446(e) and the regulations thereunder.

(3) *Additional section 263A costs.* Additional section 263A costs are defined as the costs, other than interest, that were not capitalized under the taxpayer's method of accounting immediately prior to the effective date of section 263A (adjusted as appropriate for any changes in methods of accounting for section 471 costs under paragraph (d)(2)(iii) of this section), but that are required to be capitalized under section 263A. For new taxpayers, additional section 263A costs are defined as the costs, other than interest, that the taxpayer must capitalize under section 263A, but which the taxpayer would not have been required to capitalize if the taxpayer had been in existence prior to the effective date of section 263A.

(4) *Section 263A costs.* Section 263A costs are defined as the costs that a taxpayer must capitalize under section 263A. Thus, section 263A costs are the sum of a taxpayer's section 471 costs, its additional section 263A costs, and interest capitalizable under section 263A(f).

(e) *Types of costs subject to capitalization*—(1) *In general.* Taxpayers subject to section 263A must capitalize all direct costs and certain indirect costs properly allocable to property produced or property acquired for resale. This paragraph (e) describes the types of costs subject to section 263A.

(2) *Direct costs*—(i) *Producers.* Producers must capitalize direct material costs and direct labor costs.

(A) *Direct material costs* include the costs of those materials that become an integral part of specific property produced and those materials that are consumed in the ordinary course of production and that can be identified or associated with particular units or groups of units of property produced.

(B) *Direct labor costs* include the costs of labor that can be identified or associated with particular units or groups of units of specific property produced. For this purpose, labor encompasses full-time and part-time employees, as well as contract employees and independent contractors. Direct labor costs include all elements of compensation other than employee benefit costs described in paragraph (e)(3)(ii)(D) of this section. Elements of direct labor costs include basic compensation, overtime pay, vacation pay, holiday pay, sick leave pay (other than payments pursuant to a wage continuation plan under section 105(d) as it existed prior to its repeal in 1983), shift differential, payroll taxes, and payments to a supplemental unemployment benefit plan.

(ii) *Resellers.* Resellers must capitalize the acquisition costs of property acquired for resale. In the case of inventory, the acquisition cost is the cost described in §1.471–3(b).

(3) *Indirect costs*—(i) *In general.* Indirect costs are defined as all costs other than direct material costs and direct labor costs (in the case of property produced) or acquisition costs (in the case of property acquired for resale). Taxpayers subject to section 263A must capitalize all indirect costs properly allocable to property produced or property acquired for resale. Indirect costs are properly allocable to property produced or property acquired for resale when the costs directly benefit or are incurred by reason of the performance of production or resale activities. Indirect costs may be allocable to both production and resale activities, as well as to other activities that are not subject

to section 263A. Taxpayers subject to section 263A must make a reasonable allocation of indirect costs between production, resale, and other activities.

(ii) *Examples of indirect costs required to be capitalized.* The following are examples of indirect costs that must be capitalized to the extent they are properly allocable to property produced or property acquired for resale:

(A) *Indirect labor costs.* Indirect labor costs include all labor costs (including the elements of labor costs set forth in paragraph (e)(2)(i) of this section) that cannot be directly identified or associated with particular units or groups of units of specific property produced or property acquired for resale (e.g., factory labor that is not direct labor). As in the case of direct labor, indirect labor encompasses full-time and part-time employees, as well as contract employees and independent contractors.

(B) *Officers' compensation.* Officers' compensation includes compensation paid to officers of the taxpayer.

(C) *Pension and other related costs.* Pension and other related costs include contributions paid to or made under any stock bonus, pension, profit-sharing or annuity plan, or other plan deferring the receipt of compensation, whether or not the plan qualifies under section 401(a). Contributions to employee plans representing past services must be capitalized in the same manner (and in the same proportion to property currently being acquired or produced) as amounts contributed for current service.

(D) *Employee benefit expenses.* Employee benefit expenses include all other employee benefit expenses (not described in paragraph (e)(3)(ii)(C) of this section) to the extent such expenses are otherwise allowable as deductions under chapter 1 of the Internal Revenue Code. These other employee benefit expenses include: worker's compensation; amounts otherwise deductible or allowable in reducing earnings and profits under section 404A; payments pursuant to a wage continuation plan under section 105(d) as it existed prior to its repeal in 1983; amounts includible in the gross income of employees under a method or arrangement of employer contributions or compensation that has the effect of a stock bonus, pension, profit-sharing or annuity plan, or other plan deferring receipt of compensation or providing deferred benefits; premiums on life and health insurance; and miscellaneous benefits provided for employees such as safety, medical treatment, recreational and eating facilities, membership dues, etc. Employee benefit expenses do not, however, include direct labor costs described in paragraph (e)(2)(i) of this section.

(E) *Indirect material costs.* Indirect material costs include the cost of materials that are not an integral part of specific property produced and the cost of materials that are consumed in the ordinary course of performing production or resale activities that cannot be identified or associated with particular units or groups of units of property. Thus, for example, a cost described in § 1.162–3, relating to the cost of a material or supply, is an indirect material cost.

(F) *Purchasing costs.* Purchasing costs include costs attributable to purchasing activities. See § 1.263A–3(c)(3) for a further discussion of purchasing costs.

(G) *Handling costs.* Handling costs include costs attributable to processing, assembling, repackaging and transporting goods, and other similar activities. See § 1.263A–3(c)(4) for a further discussion of handling costs.

(H) *Storage costs.* Storage costs include the costs of carrying, storing, or warehousing property. See § 1.263A–3(c)(5) for a further discussion of storage costs.

(I) *Cost recovery.* Cost recovery includes depreciation, amortization, and cost recovery allowances on equipment and facilities (including depreciation or amortization of self-constructed assets or other previously produced or acquired property to which section 263A or section 263 applies).

(J) *Depletion.* Depletion includes allowances for depletion, whether or not in excess of cost. Depletion is, however, only properly allocable to property that has been sold (i.e., for purposes of determining gain or loss on the sale of the property).

(K) *Rent.* Rent includes the cost of renting or leasing equipment, facilities, or land.

(L) *Taxes.* Taxes include those taxes (other than taxes described in paragraph (e)(3)(iii)(F) of this section) that are otherwise allowable as a deduction to the extent such taxes are attributable to labor, materials, supplies, equipment, land, or facilities used in production or resale activities.

(M) *Insurance.* Insurance includes the cost of insurance on plant or facility, machinery, equipment, materials, property produced, or property acquired for resale.

(N) *Utilities.* Utilities include the cost of electricity, gas, and water.

(O) *Repairs and maintenance.* Repairs and maintenance include the cost of repairing and maintaining equipment or facilities.

(P) *Engineering and design costs.* Engineering and design costs include preproduction costs, such as costs attributable to research, experimental, engineering, and design activities (to the extent that such amounts are not research and experimental expenditures as described in section 174 and the regulations thereunder).

(Q) *Spoilage.* Spoilage includes the costs of rework labor, scrap, and spoilage.

(R) *Tools and equipment.* Tools and equipment include the costs of tools and equipment which are not otherwise capitalized.

(S) *Quality control.* Quality control includes the costs of quality control and inspection.

(T) *Bidding costs.* Bidding costs are costs incurred in the solicitation of contracts (including contracts pertaining to property acquired for resale) ultimately awarded to the taxpayer. The taxpayer must defer all bidding costs paid or incurred in the solicitation of a particular contract until the contract is awarded. If the contract is awarded to the taxpayer, the bidding costs become part of the indirect costs allocated to the subject matter of the contract. If the contract is not awarded to the taxpayer, bidding costs are deductible in the taxable year that the contract is awarded to another party, or in the taxable year that the taxpayer is notified in writing that no contract will be awarded and that the contract (or a similar or related contract) will not be rebid, or in the taxable year that the taxpayer abandons its bid or proposal, whichever occurs first. Abandoning a bid does not include modifying, supplementing, or changing the original bid or proposal. If the taxpayer is awarded only part of the bid (for example, the taxpayer submitted one bid to build each of two different types of products, and the taxpayer was awarded a contract to build only one of the two types of products), the taxpayer shall deduct the portion of the bidding costs related to the portion of the bid not awarded to the taxpayer. In the case of a bid or proposal for a multi-unit contract, all bidding costs must be included in the costs allocated to the subject matter of the contract awarded to the taxpayer to produce or acquire for resale any of such units. For example, where the taxpayer submits one bid to produce three similar turbines and the taxpayer is awarded a contract to produce only two of the three turbines, all bidding costs must be included in the cost of the two turbines. For purposes of this paragraph (e)(3)(ii)(T), a contract means—

(*1*) In the case of a specific unit of property, any agreement under which the taxpayer would produce or sell property to another party if the agreement is entered into before the taxpayer produces or acquires the specific unit of property to be delivered to the party under the agreement; and

(*2*) In the case of fungible property, any agreement to the extent that, at the time the agreement is entered into, the taxpayer has on hand an insufficient quantity of completed fungible items of such property that may be used to satisfy the agreement (plus any other production or sales agreements of the taxpayer).

(U) *Licensing and franchise costs.* Licensing and franchise costs include fees incurred in securing the contractual right to use a trademark, corporate plan, manufacturing procedure, special recipe, or other similar right associated with property produced or property acquired for resale. These costs include the otherwise deductible portion (e.g., amortization) of the initial fees incurred to obtain the license or franchise and any minimum annual payments and royalties that are incurred by a licensee or a franchisee.

(V) *Interest.* Interest includes interest on debt incurred or continued during the production period to finance the production of real property or tangible personal property to which section 263A(f) applies.

(W) *Capitalizable service costs.* Service costs that are required to be capitalized include capitalizable service costs and capitalizable mixed service costs as defined in paragraph (e)(4) of this section.

(iii) *Indirect costs not capitalized.* The following indirect costs are not required to be capitalized under section 263A:

(A) *Selling and distribution costs.* These costs are marketing, selling, advertising, and distribution costs.

(B) *Research and experimental expenditures.* Research and experimental expenditures are expenditures described in section 174 and the regulations thereunder.

(C) *Section 179 costs.* Section 179 costs are expenses for certain depreciable assets deductible at the election of the taxpayer under section 179 and the regulations thereunder.

(D) *Section 165 losses.* Section 165 losses are losses under section 165 and the regulations thereunder.

(E) *Cost recovery allowances on temporarily idle equipment and facilities—(1) In general.* Cost recovery allowances on temporarily idle equipment and facilities include only depreciation, amortization, and cost recovery allowances on equipment and facilities that have been placed in service but are temporarily idle. Equipment and facilities are temporarily idle when a taxpayer takes them out of service for a finite period. However, equipment and facilities are not considered temporarily idle—

(*i*) During worker breaks, non-working hours, or on regularly scheduled non-working days (such as holidays or weekends);

(*ii*) During normal interruptions in the operation of the equipment or facilities;

(*iii*) When equipment is enroute to or located at a job site; or

(*iv*) When under normal operating conditions, the equipment is used or operated only during certain shifts.

(*2*) *Examples.* The provisions of this paragraph (e)(3)(iii)(E) are illustrated by the following examples:

Example 1. Equipment operated only during certain shifts. Taxpayer A manufactures widgets. Although A's manufacturing facility operates 24 hours each day in three shifts, A only operates its stamping machine during one shift each day. Because A only operates its stamping machine during certain shifts, A's stamping machine is not considered temporarily idle during the two shifts that it is not operated.

Example 2. Facility shut down for retooling. Taxpayer B owns and operates a manufacturing facility. B closes its manufacturing facility for two weeks to retool its assembly line. B's manufacturing facility is considered temporarily idle during this two-week period.

(F) *Taxes assessed on the basis of income.* Taxes assessed on the basis of income include only state, local, and foreign income taxes, and franchise taxes that are assessed on the taxpayer based on income.

(G) *Strike expenses.* Strike expenses include only costs associated with hiring employees to replace striking personnel (but not wages of replacement personnel), costs of security, and legal fees associated with settling strikes.

(H) *Warranty and product liability costs.* Warranty costs and product liability costs are costs incurred in fulfilling product warranty obligations for products that have been sold and costs incurred for product liability insurance.

(I) *On-site storage costs.* On-site storage costs are storage and warehousing costs incurred by a taxpayer at an on-site storage facility, as defined in § 1.263A–3(c)(5)(ii)(A), with respect to property produced or property acquired for resale.

(J) *Unsuccessful bidding expenses.* Unsuccessful bidding costs are bidding expenses incurred in the solicitation of contracts not awarded to the taxpayer.

(K) *Deductible service costs.* Service costs that are not required to be capitalized include deductible service costs and deductible mixed service costs as defined in paragraph (e)(4) of this section.

(4) *Service costs*—(i) *Introduction.* This paragraph (e)(4) provides definitions and categories of service costs. Paragraph (g)(4) of this section provides specific rules for determining the amount of service costs allocable to property produced or property acquired for resale. In addition, paragraph (h) of this section provides a simplified method for determining the amount of service costs that must be capitalized.

(A) *Definition of service costs.* Service costs are defined as a type of indirect costs (e.g., general and administrative costs) that can be identified specifically with a service department or function or that directly benefit or are incurred by reason of a service department or function.

(B) *Definition of service departments.* Service departments are defined as administrative, service, or support departments that incur service costs. The facts and circumstances of the taxpayer's activities and business organization control whether a department is a service department. For example, service departments include personnel, accounting, data processing, security, legal, and other similar departments.

(ii) *Various service cost categories*—(A) *Capitalizable service costs.* Capitalizable service costs are defined as service costs that directly benefit or are incurred by reason of the performance of the production or resale activities of the taxpayer. Therefore, these service costs are required to be capitalized under section 263A. Examples of service departments or functions that incur capitalizable service costs are provided in paragraph (e)(4)(iii) of this section.

(B) *Deductible service costs.* Deductible service costs are defined as service costs that do not directly benefit or are not incurred by reason of the performance of the production or resale activities of the taxpayer, and therefore, are not required to be capitalized under section 263A. Deductible service costs generally include costs incurred by reason of the taxpayer's overall management or policy guidance functions. In addition, deductible service costs include costs incurred by reason of the marketing, selling, advertising, and distribution activities of the taxpayer. Examples of service departments or functions that incur deductible service costs are provided in paragraph (e)(4)(iv) of this section.

(C) *Mixed service costs.* Mixed service costs are defined as service costs that are partially allocable to production or resale activities (capitalizable mixed service costs) and partially allocable to non-production or non-resale activities (deductible mixed service costs). For example, a personnel department may incur costs to recruit factory workers, the costs of which are allocable to production activities, and it may incur costs to develop wage, salary, and benefit policies, the costs of which are allocable to non-production activities.

(iii) *Examples of capitalizable service costs.* Costs incurred in the following departments or functions are generally allocated among production or resale activities:

(A) The administration and coordination of production or resale activities (wherever performed in the business organization of the taxpayer).

(B) Personnel operations, including the cost of recruiting, hiring, relocating, assigning, and maintaining personnel records or employees.

(C) Purchasing operations, including purchasing materials and equipment, scheduling and coordinating delivery of materials and equipment to or from factories or job sites, and expediting and follow-up.

(D) Materials handling and warehousing and storage operations.

(E) Accounting and data services operations, including, for example, cost accounting, accounts payable, disbursements, and payroll functions (but excluding accounts receivable and customer billing functions).

(F) Data processing.

(G) Security services.

(H) Legal services.

(iv) *Examples of deductible service costs.* Costs incurred in the following departments or functions are not generally allocated to production or resale activities:

(A) Departments or functions responsible for overall management of the taxpayer or for setting overall policy for all of the taxpayer's activities or trades or businesses, such as the board of directors (including their immediate staff), and the chief executive, financial, accounting, and legal officers (including their immediate staff) of the taxpayer, provided that no substantial part of the cost of such departments or functions benefits a particular production or resale activity.

(B) Strategic business planning.

(C) General financial accounting.

(D) General financial planning (including general budgeting) and financial management (including bank relations and cash management).

(E) Personnel policy (such as establishing and managing personnel policy in general; developing wage, salary, and benefit policies; developing employee training programs unrelated to particular production or resale activities; negotiating with labor unions; and maintaining relations with retired workers).

(F) Quality control policy.

(G) Safety engineering policy.

(H) Insurance or risk management policy (but not including bid or performance bonds or insurance related to activities associated with property produced or property acquired for resale).

(I) Environmental management policy (except to the extent that the costs of any system or procedure benefits a particular production or resale activity).

(J) General economic analysis and forecasting.

(K) Internal audit.

(L) Shareholder, public, and industrial relations.

(M) Tax services.

(N) Marketing, selling, or advertising.

(f) *Cost allocation methods*—(1) *Introduction.* This paragraph (f) sets forth various detailed or specific (facts-and-circumstances) cost allocation methods that taxpayers may use to allocate direct and indirect costs to property produced and property acquired for resale. Paragraph (g) of this section provides general rules for applying these allocation methods to various categories of costs (i.e., direct materials, direct labor, and indirect costs, including service costs). In addition, in lieu of a facts-and-circumstances allocation method, taxpayers may use the simplified methods provided in §§ 1.263A–2(b) and 1.263A–3(d) to allocate direct and indirect costs to eligible property produced or eligible property acquired for resale; see those sections for definitions of eligible property. Paragraph (h) of this section provides a simplified method for determining the amount of mixed service costs required to be capitalized to eligible property. The methodology set forth in paragraph (h) of this section for mixed service costs may be used in conjunction with either a facts-and-circumstances or a simplified method of allocating costs to eligible property produced or eligible property acquired for resale.

(2) *Specific identification method.* A specific identification method traces costs to a cost objective, such as a function, department, activity, or product, on the basis of a cause and effect or other reasonable relationship between the costs and the cost objective.

(3) *Burden rate and standard cost methods*—(i) *Burden rate method*—(A) *In general.* A burden rate method allocates an appropriate amount of indirect costs to property produced or property acquired for resale during a taxable year using predetermined rates that approximate the actual amount of indirect costs incurred by the taxpayer during the taxable year. Burden rates (such as ratios based on direct costs, hours, or similar items) may be developed by the taxpayer in accordance with acceptable accounting principles and applied in a reasonable manner. A taxpayer may allocate different indirect costs on the basis of different burden rates. Thus, for example, the taxpayer may use one burden rate for allocating the cost of rent and another burden rate for allocating the cost of utilities. Any periodic adjustment to a burden rate that merely reflects current operating conditions, such as increases in automation or changes in operation or prices, is not a change in method of accounting under section 446(e). A change, however, in the concept or base upon which such rates are developed, such as a change from basing the rates on direct labor hours to basing them on direct machine hours, is a change in method of accounting to which section 446(e) applies.

(B) *Development of burden rates.* The following factors, among others, may be used in developing burden rates:

(*1*) The selection of an appropriate level of activity and a period of time upon which to base the calculation of rates reflecting operating conditions for purposes of the unit costs being determined.

(*2*) The selection of an appropriate statistical base, such as direct labor hours, direct labor dollars, machine hours, or a combination thereof, upon which to apply the overhead rate.

(*3*) The appropriate budgeting, classification, and analysis of expenses (for example, the analysis of fixed versus variable costs).

(C) *Operation of the burden rate method.* The purpose of the burden rate method is to allocate an appropriate amount of indirect costs to production or resale activities through the use of predetermined rates intended to approximate the actual amount of indirect costs incurred. Accordingly, the proper use of the burden rate method under this section requires that any net negative or net positive difference between the total predetermined amount of costs allocated to property and the total amount of indirect costs actually incurred and required to be allocated to such property (i.e., the under or over-applied burden) must be treated as an adjustment to the taxpayer's ending inventory or capital account (as the case may be) in the taxable year in which such difference arises. However, if such adjustment is not significant in amount in relation to the taxpayer's total indirect costs incurred with respect to production or resale activities for the year, such adjustment need not be allocated to the property produced or property acquired for resale unless such allocation is made in the taxpayer's financial reports. The taxpayer must treat both positive and negative adjustments consistently.

(ii) *Standard cost method*—(A) *In general.* A standard cost method allocates an appropriate amount of direct and indirect costs to property produced by the taxpayer through the use of preestablished standard allowances, without reference to costs actually incurred during the taxable year. A taxpayer may use a standard cost method to allocate costs, provided variances are treated in accordance with the procedures prescribed in paragraph (f)(3)(ii)(B) of this section. Any periodic adjustment to standard costs that merely reflects current operating conditions, such as increases in automation or changes in operation or prices, is not a change in method of accounting under section 446(e). A change, however, in the concept or base upon which standard costs are developed is a change in method of accounting to which section 446(e) applies.

(B) *Treatment of variances.* For purposes of this section, net positive overhead variance means the excess of total standard indirect costs over total actual indirect costs and net negative overhead variance means the excess of total actual indirect costs over total standard indirect costs. The proper use of a standard cost method requires that a taxpayer must reallocate to property a pro rata portion of any net negative or net positive overhead variances and any net negative or net positive direct cost variances. The taxpayer must apportion such variances to or among the property to which the costs are allocable. However, if such variances are not significant in amount relative to the taxpayer's total indirect costs incurred with respect to production and resale activities for the year, such variances need not be allocated to property produced or property acquired for resale unless such allocation is made in the taxpayer's financial reports. A taxpayer must treat both positive and negative variances consistently.

(4) *Reasonable allocation methods.* A taxpayer may use the methods described in paragraph (f) (2) or (3) of this section if they are reasonable allocation methods within the meaning of this paragraph (f)(4). In addition, a taxpayer may use any other reasonable method to properly allocate direct and indirect costs among units of property produced or property acquired for resale during the taxable year. An allocation method is reasonable if, with respect to the taxpayer's production or resale activities taken as a whole—

(i) The total costs actually capitalized during the taxable year do not differ significantly from the aggregate costs that would be properly capitalized using another permissible method described in this section or in §§ 1.263A–2 and 1.263A–3, with appropriate consideration given to the volume and value of the taxpayer's production or resale activities, the availability of costing information, the time and cost of using various allocation methods, and the accuracy of the allocation method chosen as compared with other allocation methods;

(ii) The allocation method is applied consistently by the taxpayer; and

(iii) The allocation method is not used to circumvent the requirements of the simplified methods in this section or in § 1.263A–2, § 1.263A–3, or the principles of section 263A.

(g) *Allocating categories of costs*—(1) *Direct materials.* Direct material costs (as defined in paragraph (e)(2) of this section) incurred during the taxable year must be allocated to the property produced or property acquired for resale by the taxpayer using the taxpayer's d of accounting for materials (e.g., specific identification; first-in, first-out (FIFO); or last-in, first-out (LIFO)), or any other reasonable allocation method (as defined under the principles of paragraph (f)(4) of this section).

(2) *Direct labor.* Direct labor costs (as defined in paragraph (e)(2) of this section) incurred during the taxable year are generally allocated to property produced or property acquired for resale using a specific identification method, standard cost method, or any other reasonable allocation method (as defined under the principles of paragraph (f)(4) of this section). All elements of compensation, other than basic compensation, may be grouped together and then allocated in proportion to the charge for basic compensation. Further, a taxpayer is not treated as using an erroneous method of accounting if direct labor costs are treated as indirect costs under the taxpayer's allocation method, provided such costs are capitalized to the extent required by paragraph (g)(3) of this section.

(3) *Indirect costs.* Indirect costs (as defined in paragraph (e)(3) of this section) are generally allocated to intermediate cost objectives such as departments or activities prior to the allocation of such costs to property produced or property acquired for resale. Indirect costs are allocated using either a specific identification method, a standard cost method, a burden rate method, or any other reasonable allocation method (as defined under the principles of paragraph (f)(4) of this section).

(4) *Service costs*—(i) *In general.* Service costs are a type of indirect costs that may be allocated using the same allocation methods available for allocating other indirect costs described in paragraph (g)(3) of this section. Generally, taxpayers that use a specific identification method or another reasonable allocation method must allocate service costs to particular departments or activities based on a factor or relationship that reasonably relates the service costs to the benefits received from the service departments or activities. For example, a reasonable factor for allocating legal services to particular departments or activities is the number of hours of legal services attributable to each department or activity. See paragraph (g)(4)(iv) of this section for other illustrations. Using reasonable factors or relationships, a taxpayer must allocate mixed service costs under a direct reallocation method described in paragraph (g)(4)(iii)(A) of this section, a step-allocation method described in paragraph (g)(4)(iii)(B) of this section, or any other reasonable allocation method (as defined under the principles of paragraph (f)(4) of this section).

(ii) *De minimis rule.* For purposes of administrative convenience, if 90 percent or more of a mixed service department's costs are deductible service costs, a taxpayer may elect not to allocate any portion of the service department's costs to property produced or property acquired for resale. For example, if 90 percent of the costs of an electing taxpayer's industrial relations department benefit the taxpayer's overall policy-making activities, the taxpayer is not required to allocate any portion of these costs to a production activity. Under this election, however, if 90 percent or more of a mixed service department's costs are capitalizable service costs, a taxpayer must allocate 100 percent of the department's costs to the production or resale activity benefitted. For example, if 90 percent of the costs of an electing taxpayer's accounting department benefit the taxpayer's manufacturing activity, the taxpayer must allocate 100 percent of the costs of the accounting department to the manufacturing activity. An election under this paragraph (g)(4)(ii) applies to all of a taxpayer's mixed service departments and constitutes the adoption of a (or a change in) method of accounting under section 446 of the Internal Revenue Code.

(iii) *Methods for allocating mixed service costs*—(A) *Direct reallocation method.* Under the direct reallocation method, the total costs (direct and indirect) of all mixed service departments are allocated only to departments or cost centers engaged in production or resale activities and then from those departments to particular activities. This direct reallocation method ignores benefits provided by one mixed service department to other mixed service departments, and also excludes other mixed service departments from the base used to make the allocation.

(B) *Step-allocation method.* (*1*) Under a step-allocation method, a sequence of allocations is made by the taxpayer. First, the total costs of the mixed service departments that benefit the greatest number of other departments are allocated to—

(*i*) Other mixed service departments;

(*ii*) Departments that incur only deductible service costs; and

(*iii*) Departments that exclusively engage in production or resale activities.

(*2*) A taxpayer continues allocating mixed service costs in the manner described in paragraph (g)(4)(iii)(B)(*1*) of this section (i.e., from the service departments benefitting the greatest number of departments to the service departments benefitting the least number of departments) until all mixed service costs are allocated to the types of departments listed in this paragraph (g)(4)(iii). Thus, a step-allocation method recognizes the benefits provided by one mixed service department to another mixed service department and also includes mixed service departments that have not yet been allocated in the base used to make the allocation.

(C) *Examples.* The provisions of this paragraph (g)(4)(iii) are illustrated by the following examples:

Example 1. Direct reallocation method. (i) Taxpayer E has the following five departments: the Assembling Department, the Painting Department, and the Finishing Department (production departments), and the Personnel Department and the Data Processing Department (mixed service departments). E allocates the Personnel Department's costs on the basis of total payroll costs and the Data Processing Department's costs on the basis of data processing hours.

(ii) Under a direct reallocation method, E allocates the Personnel Department's costs directly to its Assembling, Painting, and Finishing Department, and not to its Data Processing department.

Department	Total dept. costs	Amount of payroll costs	Allocation ratio	Amount allocated
Personnel	$500,000	$50,000		<$500,000>
Data Proc'g	250,000	15,000		
Assembling	250,000	15,000	15,000/285,000	26,315
Painting	1,000,000	90,000	90,000/285,000	157,895
Finishing	2,000,000	180,000	180,000/285,000	315,790
Total	$4,000,000	$350,000		

(iii) After E allocates the Personnel Department's costs, E then allocates the costs of its Data Processing Department in the same manner.

Department	Total dept. cost after initial allocation	Total data proc. hours	Allocation ratio	Amount allocated	Total dept. cost after final allocation
Personnel	0	2,000			0
Data Proc'g	$250,000			<$250,000>	

Department	Total dept. cost after initial allocation	Total data proc. hours	Allocation ratio	Amount allocated	Total dept. cost after final allocation
Assembling	276,315	2,000	2,000/10,000	50,000	$326,315
Painting	1,157,895	0	0/10,000	0	1,157,895
Finishing	2,315,790	8,000	8,000/10,000	200,000	2,515,790
Total	$4,000,000	12,000			$4,000,000

Example 2. Step-allocation method. (i) Taxpayer F has the following five departments: the Manufacturing Department (a production department), the Marketing Department and the Finance Department (departments that incur only deductible service costs), the Personnel Department and the Data Processing Department (mixed service departments). F uses a step-allocation method and allocates the Personnel Department's costs on the basis of total payroll costs and the Data Processing Department's costs on the basis of data processing hours. F's Personnel Department benefits all four of F's other departments, while its Data Processing Department benefits only three departments. Because F's Personnel Department benefits the greatest number of other departments, F first allocates its Personnel Department's costs to its Manufacturing, Marketing, Finance and Data Processing departments, as follows:

Department	Total cost of dept.	Total payroll costs	Allocation ratio	Amount allocated
Personnel	$500,000	$50,000		<$500,000>
Data Proc'g	250,000	15,000	15,000/300,000	25,000
Finance	250,000	15,000	15,000/300,000	25,000
Marketing	1,000,000	90,000	90,000/300,000	150,000
Manufac'g	2,000,000	180,000	180,000/300,000	300,000
	4,000,000	350,000		

(ii) Under a step-allocation method, the denominator of F's allocation ratio includes the payroll costs of its Manufacturing, Marketing, Finance, and Data Processing departments.

(iii) Next, F allocates the costs of its Data Processing Department on the basis of data processing hours. Because the costs incurred by F's Personnel Department have already been allocated, no allocation is made to the Personnel Department.

Department	Total dept. cost after initial allocation	Total data proc. hours	Allocation		
ratio.					
Personnel	$0	2,000			$0
Data Proc'g	275,000			<$275,000>	0
Finance	275,000	2,000	2,000/10,000	55,000	330,000
Marketing	1,150,000	0	0/10,000	0	1,150,000
Manufac'g	2,300,000	8,000	8,000/10,000	220,000	2,520,000
	4,000,000	12,000			4,000,000

(iv) Under the second step of F's step-allocation method, the denominator of F's allocation ratio includes the data processing hours of its Manufacturing, Marketing, and Finance Departments, but does not include the data processing hours of its Personnel Department (the other mixed service department) because the costs of that department have previously been allocated.

(iv) *Illustrations of mixed service cost allocations using reasonable factors or relationships.* This paragraph (g)(4)(iv) illustrates various reasonable factors and relationships that may be used in allocating different types of mixed service costs. Taxpayers, however, are permitted to use other reasonable factors and relationships to allocate mixed service costs. In addition, the factors or relationships illustrated in this paragraph (g)(4)(iv) may be used to allocate other types of service costs not illustrated in this paragraph (g)(4)(iv).

(A) *Security services.* The costs of security or protection services must be allocated to each physical area that receives the services using any reasonable method applied consistently (e.g., the size of the physical area, the number of employees in the area, or the relative fair market value of assets located in the area).

(B) *Legal services.* The costs of legal services are generally allocable to a particular production or resale activity on the basis of the approximate number of hours of legal service performed in connection with the activity, including research, bidding, negotiating, drafting, reviewing a contract, obtaining necessary licenses and permits, and resolving disputes. Different hourly rates may be appropriate for different services. In determining the number of hours allocable to any activity, estimates are appropriate, detailed time records are not required to be kept, and insubstantial amounts of services provided to an activity by senior legal staff (such as administrators or reviewers) may be ignored. Legal costs may also be allocated to a particular production or resale activity based on the ratio of the total direct costs incurred for the activity to the total direct costs incurred with respect to all production or resale activities. The taxpayer must also allocate directly to an activity the cost incurred for any outside legal services. Legal costs relating to general corporate functions are not required to be allocated to a particular production or resale activity.

(C) *Centralized payroll services.* The costs of a centralized payroll department or activity are generally allocated to the departments or activities benefitted on the basis of the gross dollar amount of payroll processed.

(D) *Centralized data processing services.* The costs of a centralized data processing department are generally allocated to all departments or activities benefitted using any reasonable basis, such as total direct data processing costs or the number of data processing hours supplied. The costs of data processing systems or applications developed for a particular activity are directly allocated to that activity.

(E) *Engineering and design services.* The costs of an engineering or a design department are generally directly allocable to the departments or activities benefitted based on the ratio of the approximate number of hours of work performed with respect to the particular activity to the total number of hours of engineering or design work performed for all activities. Different services may be allocated at different hourly rates.

(F) *Safety engineering services.* The costs of a safety engineering departments or activities generally benefit all of the taxpayer's activities and, thus, should be allocated using a reasonable basis, such as: the approximate number of safety inspections made in connection with a particular activity as a fraction of total inspections, the number of employees assigned to an activity as a fraction of total employees, or the total labor hours worked in connection with an activity as a fraction of total hours. However, in determining the allocable costs of a safety engineering department, costs attributable to providing a safety program relating only to a particular activity must be directly assigned to such activity. Additionally, the cost of a safety engineering department only responsible for setting safety policy and establishing safety procedures to be used in all of the taxpayer's activities is not required to be allocated.

(v) *Accounting method change.* A change in the method or base used to allocate service costs (such as changing from an allocation base using direct labor costs to a base using direct labor hours), or a change in the taxpayer's determination of what functions or departments of the taxpayer are to be allocated, is a change in method of accounting to which section 446(e) and the regulations thereunder apply.

(h) *Simplified service cost method*—(1) *Introduction.* This paragraph (h) provides a simplified method for determining capitalizable mixed service costs incurred during the taxable year with respect to eligible property (i.e., the aggregate portion of mixed service costs that are properly allocable to the taxpayer's production or resale activities).

(2) *Eligible property*—(i) *In general.* Except as otherwise provided in paragraph (h)(2)(ii) of this section, the simplified service cost method, if elected for any trade or business of the taxpayer, must be used for all production and resale activities of the trade or business associated with any of the following categories of property that are subject to section 263A:

(A) *Inventory property.* Stock in trade or other property properly includible in the inventory of the taxpayer.

(B) *Non-inventory property held for sale.* Non-inventory property held by a taxpayer primarily for sale to customers in the ordinary course of the taxpayer's trade or business.

(C) *Certain self-constructed assets.* Self-constructed assets substantially identical in nature to, and produced in the same manner as, inventory property produced by the taxpayer or other property produced by the taxpayer and held primarily for sale to customers in the ordinary course of the taxpayer's trade or business.

(D) *Self-constructed assets produced on a repetitive basis.* Self-constructed assets produced by the taxpayer on a routine and repetitive basis in the ordinary course of the taxpayer's trade or business.

(ii) *Election to exclude self-constructed assets.* At the taxpayer's election, the simplified service cost method may be applied within a trade or business to only the categories of inventory property and non-inventory property held for sale described in paragraphs (h)(2)(i)(A) and(B) of this section. Taxpayers electing to exclude the self-constructed assets described in paragraphs (h)(2)(i)(C) and (D) of this section from application of the simplified service cost method must, however, allocate service costs to such property in accordance with paragraph (g)(4) of this section.

(3) *General allocation formula.* (i) Under the simplified service cost method, a taxpayer computes its capitalizable mixed service costs using the following formula:

$$\text{Allocation ratio} \times \text{total mixed service costs}$$

(ii) A producer may elect one of two allocation ratios, the labor-based allocation ratio or the production cost allocation ratio. A reseller that satisfies the requirements for using the simplified resale method of § 1.263A–3(d) (whether or not that method is elected) may elect the simplified service cost method, but must use a labor-based allocation ratio. (See § 1.263A–3(d) for labor-based allocation ratios to be used in conjunction with the simplified resale method.) The allocation ratio used by a trade or business of a taxpayer is a method of accounting which must be applied consistently within the trade or business.

(4) *Labor-based allocation ratio.* (i) The labor-based allocation ratio is computed as follows:

$$\frac{\text{Section 263A labor costs}}{\text{Total labor costs}}$$

(ii) Section 263A labor costs are defined as the total labor costs (excluding labor costs included in mixed service costs) allocable to property produced and property acquired for resale under section 263A that are incurred in the taxpayer's trade or business during the taxable year. Total labor costs are defined as the total labor costs (excluding labor costs included in mixed service costs) incurred in the taxpayer's trade or business during the taxable year. Total labor costs include labor costs incurred in all parts of the trade or business (i.e., if the taxpayer has both property produced and property acquired for resale, the taxpayer must include labor costs from resale activities as well as production activities). For example, taxpayer G incurs $1,000 of total mixed service costs during the taxable year. G's section 263A labor costs are $5,000 and its total labor costs are $10,000. Under the labor-based allocation ratio, G's capitalizable mixed service costs are $500 (i.e., $1,000 × ($5,000 divided by $10,000)).

(5) *Production cost allocation ratio.* (i) Producers may use the production cost allocation ratio, computed as follows:

$$\frac{\text{Section 263A production costs}}{\text{Total costs}}$$

(ii) Section 263A production costs are defined as the total costs (excluding mixed service costs and interest) allocable to property produced (and property acquired for resale if the producer is also engaged in resale activities) under section 263A that are incurred in the taxpayer's trade or business during the taxable year. Total costs are defined as all costs (excluding mixed service costs and interest) incurred in the taxpayer's trade or business during the taxable year. Total costs include all direct and indirect costs allocable to property produced (and property acquired for resale if the producer is also engaged in resale activities) as well as all other costs of the taxpayer's trade or business, including, but not limited to: salaries and other labor costs of all personnel; all depreciation taken for federal income tax purposes; research and experimental expenditures; and selling, marketing, and distribution costs. Such costs do not include, however, taxes described in paragraph (e)(3)(iii)(F) of this section. For example, taxpayer H, a producer, incurs $1,000 of total mixed service costs in the taxable year. H's section 263A production costs are $10,000 and its total costs are $20,000. Under the production cost allocation ratio, H's capitalizable mixed service costs are $500 (i.e., $1,000 X ($10,000 divided by $20,000)).

(6) *Definition of total mixed service costs.* Total mixed service costs are defined as the total costs incurred during the taxable year in all departments or functions of the taxpayer's trade or business that perform mixed service activities. See paragraph (e)(4)(ii)(C) of this section which defines mixed service costs. In determining the total mixed service costs of a trade or business, the taxpayer must include all costs incurred in its mixed service departments and cannot exclude any otherwise deductible service costs. For example, if the accounting department within a trade or business is a mixed service department, then in determining the total mixed service costs of the trade or business, the taxpayer cannot exclude the costs of personnel in the accounting department that perform services relating to non-production activities (e.g., accounts receivable or customer billing activities). Instead, the entire cost of the accounting department must be included in the total mixed service costs.

(7) *Costs allocable to more than one business.* To the extent mixed service costs, labor costs, or other costs are incurred in more than one trade or business, the taxpayer must determine the amounts allocable to the particular trade or business for which the simplified service cost method is being applied by using any reasonable allocation method consistent with the principles of paragraph (f)(4) of this section.

(8) *De minimis rule.* If the taxpayer elects to apply the de minimis rule of paragraph (g)(4)(ii) of this section to any mixed service department, the department is not considered a mixed service department for purposes of the simplified service cost method. Instead, the costs of such department are allocated exclusively to the particular activity satisfying the 90-percent test.

(9) *Separate election.* A taxpayer may elect the simplified service cost method in conjunction with any other allocation method used at the trade or business level, including the simplified methods described in §§1.263A–2(b) and 1.263A–3(d). However, the election of the simplified service cost method must be made independently of the election to use those other simplified methods.

(i) [Reserved]

(j) *Special rules*—(1) *Costs provided by a related person*—(i) *In general.* A taxpayer subject to section 263A must capitalize an arm's-length charge for any section 263A costs (e.g., costs of materials, labor, or services) incurred by a related person that are properly allocable to the property produced or property acquired for resale by the taxpayer. Both the taxpayer and the related person must account for the transaction as if an arm's-length charge had been incurred by the taxpayer with respect to its property produced or property acquired for resale.

For purposes of this paragraph (j)(1)(i), a taxpayer is considered related to another person if the taxpayer and such person are described in section 482. Further, for purposes of this paragraph (j)(1)(i), arm's-length charge means the arm's-length charge (or other appropriate charge where permitted and applicable) under the principles of section 482. Any correlative adjustments necessary because of the arm's-length charge requirement of this paragraph (j)(1)(i) shall be determined under the principles of section 482.

(ii) *Exceptions.* The provisions of paragraph (j)(1)(i) of this section do not apply if, and to the extent that—

(A) It would be inappropriate under the principles of section 482 for the Commissioner to adjust the income of the taxpayer or the related person with respect to the transaction at issue; or

(B) A transaction is accounted for under an alternative Internal Revenue Code section resulting in the capitalization (or deferral of the deduction) of the costs of the items provided by the related party and the related party does not deduct such costs earlier than the costs would have been deducted by the taxpayer if the costs were capitalized under section 263A. See § 1.1502–13.

(2) *Optional capitalization of period costs*—(i) *In general.* Taxpayers are not required to capitalize indirect costs that do not directly benefit or are not incurred by reason of the production of property or acquisition of property for resale (i.e., period costs). A taxpayer may, however, elect to capitalize certain period costs if: The method is consistently applied; is used in computing beginning inventories, ending inventories, and cost of goods sold; and does not result in a material distortion of the taxpayer's income. A material distortion relates to the source, character, amount, or timing of the cost capitalized or any other item affected by the capitalization of the cost. Thus, for example, a taxpayer may not capitalize a period cost under section 263A if capitalization would result in a material change in the computation of the foreign tax credit limitation under section 904. An election to capitalize a period cost is the adoption of (or a change in) a method of accounting under section 446 of the Internal Revenue Code.

(ii) *Period costs eligible for capitalization.* The types of period costs eligible for capitalization under this paragraph (j)(2) include only the types of period costs (e.g., under paragraph (e)(3)(iii) of this section) for which some portion of the costs incurred is properly allocable to property produced or property acquired for resale in the year of the election. Thus, for example, marketing or advertising costs, no portion of which are properly allocable to property produced or property acquired for resale, do not qualify for elective capitalization under this paragraph (j)(2).

(3) *Trade or business application.* Notwithstanding the references generally to taxpayer throughout this section and §§ 1.263A–2 and 1.263A–3, the methods of accounting provided under section 263A are to be elected and applied independently for each separate and distinct trade or business of the taxpayer in accordance with the provisions of section 446(d) and the regulations thereunder.

(4) *Transfers with a principal purpose of tax avoidance.* The District Director may require appropriate adjustments to valuations of inventory and other property subject to section 263A if a transfer of property is made to another person for a principal purpose of avoiding the application of section 263A. Thus, for example, the District Director may require a taxpayer using the simplified production method of § 1.263A–2(b) to apply that method to transferred inventories immediately prior to a transfer under section 351 if a principal purpose of the transfer is to avoid the application of section 263A.

[T.D. 8482, 58 FR 42209, Aug. 9, 1993, as amended by T.D. 8559, 59 FR 39961, Aug. 5, 1994; T.D. 8584, 59 FR 67197, Dec. 29, 1994; T.D. 8597, 60 FR 36680, July 18, 1995; T.D. 8728, 62 FR 42054, Aug. 5, 1997; T.D. 8729, 62 FR 44546, Aug. 22, 1997]

§ 1.263A–2 Rules relating to property produced by the taxpayer.

(a) *In general.* Section 263A applies to real property and tangible personal property produced by a taxpayer for use in its trade or business or for sale to its customers. In addition, section 263A applies to property produced for a taxpayer under a contract with another party. The principal terms related to the scope of section 263A with respect to producers are provided in this paragraph (a). See §1.263A–1(b)(11) for an exception in the case of certain de minimis property provided to customers incident to the provision of services.

(1) *Produce*—(i) *In general.* For purposes of section 263A, produce includes the following: construct, build, install, manufacture, develop, improve, create, raise, or grow.

(ii) *Ownership*—(A) *General rule.* Except as provided in paragraphs (a)(1)(ii)(B) and (C) of this section, a taxpayer is not considered to be producing property unless the taxpayer is considered an owner of the property produced under federal income tax principles. The determination as to whether a taxpayer is an owner is based on all of the facts and circumstances, including the various benefits and burdens of ownership vested with the taxpayer. A taxpayer may be considered an owner of property produced, even though the taxpayer does not have legal title to the property.

(B) *Property produced for the taxpayer under a contract*—(*1*) *In general.* Property produced for the taxpayer under a contract with another party is treated as property produced by the taxpayer to the extent the taxpayer makes payments or otherwise incurs costs with respect to the property. A taxpayer has made payment under this section if the transaction would be considered payment by a taxpayer using the cash receipts and disbursements method of accounting.

(*2*) *Definition of a contract*—(*i*) *General rule.* Except as provided under paragraph (a)(1)(ii)(B)(*2*)(*ii*) of this section, a contract is any agreement providing for the production of property if the agreement is entered into before the production of the property to be delivered under the contract is completed. Whether an agreement exists depends on all the facts and circumstances. Facts and circumstances indicating an agreement include, for example, the making of a prepayment, or an arrangement to make a prepayment, for property prior to the date of the completion of production of the property, or the incurring of significant expenditures for property of specialized design or specialized application that is not intended for self-use.

(*ii*) *Routine purchase order exception.* A routine purchase order for fungible property is not treated as a contract for purposes of this section. An agreement will not be treated as a routine purchase order for fungible property, however, if the contractor is required to make more than de minimis modifications to the property to tailor it to the customer's specific needs, or if at the time the agreement is entered into, the customer knows or has reason to know that the contractor cannot satisfy the agreement within 30 days out of existing stocks and normal production of finished goods.

(C) *Home construction contracts.* Section 460(e)(1) provides that section 263A applies to a home construction contract unless that contract will be completed within two years of the contract commencement date and the taxpayer's average annual gross receipts for the three preceding taxable years do not exceed $10,000,000. Section 263A applies to such a contract even if the contractor is not considered the owner of the property produced under the contract under federal income tax principles.

(2) *Tangible personal property*—(i) *General rule.* In general, section 263A applies to the costs of producing tangible personal property, and not to the costs of producing intangible property. For example, section 263A applies to the costs manufacturers incur to produce goods, but does not apply to the costs financial institutions incur to originate loans.

(ii) *Intellectual or creative property.* For purposes of determining whether a taxpayer producing intellectual or creative property is producing tangible personal property or intangible property, the term tangible personal property includes films, sound recordings, video tapes, books, and other similar property embodying words, ideas, concepts, images, or sounds by the creator thereof. Other similar property for this purpose generally means intellectual or creative property for which, as costs are incurred in producing the property, it is intended (or is reasonably likely) that any tangible medium in which the property is embodied will be mass distributed by the creator or any one or more third parties in a form that is not substantially altered. However, any intellectual or creative property that is embodied in a tangible medium that is mass distributed merely incident to the distribution of a principal product or good of the creator is not other similar property for these purposes.

(A) *Intellectual or creative property that is tangible personal property.* Section 263A applies to tangible personal property defined in this paragraph (a)(2) without regard to whether such property is treated as tangible or intangible property under other sections of the Internal Revenue Code. Thus, for example, section 263A applies to the costs of producing a motion picture or researching and writing a book even though these assets may be considered intangible for other purposes of the Internal Revenue Code. Tangible personal property includes, for example, the following:

(*1*) *Books.* The costs of producing and developing books (including teaching aids and other literary works) required to be capitalized under this section include costs incurred by an author in researching, preparing, and writing the book. (However, see section 263A(h), which provides an exemption from the capitalization requirements of section 263A in the case of certain free-lance authors.) In addition, the costs of producing and developing books include prepublication expenditures incurred by publishers, including payments made to authors (other than commissions for sales of books that have already taken place), as well as costs incurred by publishers in writing, editing, compiling, illustrating, designing, and developing the books. The costs of producing a book also include the costs of producing the underlying manuscript, copyright, or license. (These costs are distinguished from the separately capitalizable costs of printing and binding the tangible medium embodying the book (e.g., paper and ink).) See § 1.174–2(a)(1), which provides that the term research or experimental expenditures does not include expenditures incurred for research in connection with literary, historical, or similar projects.

(*2*) *Sound recordings.* A sound recording is a work that results from the fixation of a series of musical, spoken, or other sounds, regardless of the nature of the material objects, such as discs, tapes, or other phonorecordings, in which such sounds are embodied.

(B) *Intellectual or creative property that is not tangible personal property.* Items that are not considered tangible personal property within the meaning of section 263A(b) and paragraph (a)(2)(ii) of this section include:

(*1*) *Evidences of value.* Tangible personal property does not include property that is representative or evidence of value, such as stock, securities, debt instruments, mortgages, or loans.

(*2*) *Property provided incident to services.* Tangible personal property does not include de minimis property provided to a client or customer incident to the provision of services, such as wills prepared by attorneys, or blueprints prepared by architects. See § 1.263A–1(b)(11).

(3) *Costs required to be capitalized by producers*—(i) *In general.* Except as specifically provided in section 263A(f) with respect to interest costs, producers must capitalize direct and indirect costs properly allocable to property produced under section 263A, without regard to whether those costs are incurred before, during, or after the production period (as defined in section 263A(f)(4)(B)).

(ii) *Pre-production costs.* If property is held for future production, taxpayers must capitalize direct and indirect costs allocable to such property (e.g., purchasing, storage, handling, and other costs), even though production has not begun. If property is not held for production, indirect costs incurred prior to the beginning of the production period must be allocated to the property and capitalized if, at the time the costs are incurred, it is reasonably likely that production will occur at some future date. Thus, for example, a manufacturer must capitalize the costs of storing and handling raw materials before the raw materials are committed to production. In addition, a real estate developer must capitalize property taxes incurred with respect to property if, at the time the taxes are incurred, it is reasonably likely that the property will be subsequently developed.

(iii) *Post-production costs.* Generally, producers must capitalize all indirect costs incurred subsequent to completion of production that are properly allocable to the property produced. Thus, for example, storage and handling costs incurred while holding the property produced for sale after production must be capitalized to the property to the extent properly allocable to the property. However, see §1.263A–3(c) for exceptions.

(4) *Practical capacity concept.* Notwithstanding any provision to the contrary, the use, directly or indirectly, of the practical capacity concept is not permitted under section 263A. For purposes of section 263A, the term practical capacity concept means any concept, method, procedure, or formula (such as the practical capacity concept described in §1.471–11(d)(4)) whereunder fixed costs are not capitalized because of the relationship between the actual production at the taxpayer's production facility and the practical capacity of the facility. For purposes of this section, the practical capacity of a facility includes either the practical capacity or theoretical capacity of the facility, as defined in §1.471–11(d)(4), or any similar determination of productive or operating capacity. The practical capacity concept may not be used with respect to any activity to which section 263A applies (i.e., production or resale activities). A taxpayer shall not be considered to be using the practical capacity concept solely because the taxpayer properly does not capitalize costs described in §1.263A–1(e)(3)(iii)(E), relating to certain costs attributable to temporarily idle equipment.

(5) *Taxpayers required to capitalize costs under this section.* This section generally applies to taxpayers that produce property. If a taxpayer is engaged in both production activities and resale activities, the taxpayer applies the principles of this section as if it read production or resale activities, and by applying appropriate principles from §1.263A–3. If a taxpayer is engaged in both production and resale activities, the taxpayer may elect the simplified production method provided in this section, but generally may not elect the simplified resale method discussed in §1.263A–3(d). If elected, the simplified production method must be applied to all eligible property produced and all eligible property acquired for resale by the taxpayer.

(b) *Simplified production method*—(1) *Introduction.* This paragraph (b) provides a simplified method for determining the additional section 263A costs properly allocable to ending inventories of property produced and other eligible property on hand at the end of the taxable year.

(2) *Eligible property*—(i) *In general.* Except as otherwise provided in paragraph (b)(2)(ii) of this section, the simplified production method, if elected for any trade or business of a producer, must be used for all production and resale activities associated with any of the following categories of property to which section 263A applies:

(A) *Inventory property.* Stock in trade or other property properly includible in the inventory of the taxpayer.

(B) *Non-inventory property held for sale.* Non-inventory property held by a taxpayer primarily for sale to customers in the ordinary course of the taxpayer's trade or business.

(C) *Certain self-constructed assets.* Self-constructed assets substantially identical in nature to, and produced in the same manner as, inventory property produced by the taxpayer or other property produced by the taxpayer and held primarily for sale to customers in the ordinary course of the taxpayer's trade or business.

(D) *Self-constructed assets produced on a repetitive basis.* Self-constructed assets produced by the taxpayer on a routine and repetitive basis in the ordinary course of the taxpayer's trade or business.

(ii) *Election to exclude self-constructed assets.* At the taxpayer's election, the simplified production method may be applied within a trade or business to only the categories of inventory property and non-inventory property held for sale described in paragraphs (b)(2)(i) (A) and (B) of this section. Taxpayers electing to exclude the self- constructed assets, defined in paragraphs (b)(2)(i) (C) and (D) of this section, from application of the simplified production method must, however, allocate additional section 263A costs to such property in accordance with § 1.263A–1 (f).

(3) *Simplified production method without historic absorption ratio election*—(i) *General allocation formula*—(A) *In general.* Except as otherwise provided in paragraph (b)(3)(iv) of this section, the additional section 263A costs allocable to eligible property remaining on hand at the close of the taxable year under the simplified production method are computed as follows:

$$\text{Absorption ratio} \times \text{section 471 costs remaining on hand at year end}$$

(B) *Effect of allocation.* The absorption ratio generally is multiplied by the section 471 costs remaining in ending inventory or otherwise on hand at the end of each taxable year in which the simplified production method is applied. The resulting product is the additional section 263A costs that are added to the taxpayer's ending section 471 costs to determine the section 263A costs that are capitalized. See, however, paragraph (b)(3)(iii) of this section for special rules applicable to LIFO taxpayers. Except as otherwise provided in this section or in § 1.263A–1 or 1.263A–3, additional section 263A costs that are allocated to inventories on hand at the close of the taxable year under the simplified production method of this paragraph (b) are treated as inventory costs for all purposes of the Internal Revenue Code.

(ii) *Definitions*—(A) *Absorption ratio.* Under the simplified production method, the absorption ratio is determined as follows:

$$\frac{\text{Additional section 263A costs incurred during the taxable year}}{\text{Section 471 costs incurred during the taxable year}}$$

(*1*) *Additional section 263A costs incurred during the taxable year.* Additional section 263A costs incurred during the taxable year are defined as the additional section 263A costs described in § 1.263A–1(d)(3) that a taxpayer incurs during its current taxable year.

(*2*) *Section 471 costs incurred during the taxable year.* Section 471 costs incurred during the taxable year are defined as the section 471 costs described in § 1.263A–1(d)(2) that a taxpayer incurs during its current taxable year.

(B) *Section 471 costs remaining on hand at year end.* Section 471 costs remaining on hand at year end means the section 471 costs, as defined in § 1.263A–1(d)(2), that a taxpayer incurs during its current taxable year which remain in its ending inventory or are otherwise on hand at year end. For LIFO inventories of a taxpayer, the section 471 costs remaining on hand at year end means the increment, if any, for the current year stated in terms of section 471 costs. See paragraph (b)(3)(iii) of this section.

(iii) *LIFO taxpayers electing the simplified production method*—(A) *In general.* Under the simplified production method, a taxpayer using a LIFO method must calculate a particular year's index (e.g., under § 1.472–8(e)) without regard to its additional section 263A costs. Similarly, a taxpayer that adjusts current-year costs by applicable indexes to determine whether there has been an inventory increment or decrement in the current year for a particular LIFO pool must disregard the additional section 263A costs in making that determination.

(B) *LIFO increment.* If the taxpayer determines there has been an inventory increment, the taxpayer must state the amount of the increment in current-year dollars (stated in terms of section 471 costs). The taxpayer then multiplies this amount by the absorption ratio. The resulting product is the additional section 263A costs that must be added to the taxpayer's increment for the year stated in terms of section 471 costs.

(C) *LIFO decrement.* If the taxpayer determines there has been an inventory decrement, the taxpayer must state the amount of the decrement in dollars applicable to the particular year for which the LIFO layer has been invaded. The additional section 263A costs incurred in prior years that are applicable to the decrement are charged to cost of goods sold. The additional section 263A costs that are applicable to the decrement are determined by multiplying the additional section 263A costs allocated to the layer of the pool in which the decrement occurred by the ratio of the decrement (excluding additional section 263A costs) to the section 471 costs in the layer of that pool.

(iv) *De minimis rule for producers with total indirect costs of $200,000 or less*—(A) *In general.* If a producer using the simplified production method incurs $200,000 or less of total indirect costs in a taxable year, the additional section 263A costs allocable to eligible property remaining on hand at the close of the taxable year are deemed to be zero. Solely for purposes of this paragraph (b)(3)(iv), taxpayers are permitted to exclude any category of indirect costs (listed in § 1.263A–1(e)(3)(iii)) that is not required to be capitalized (e.g., selling and distribution costs) in determining total indirect costs.

(B) *Related party and aggregation rules.* In determining whether the producer incurs $200,000 or less of total indirect costs in a taxable year, the related party and aggregation rules of § 1.263A–3(b)(3) are applied by substituting total indirect costs for gross receipts wherever gross receipts appears.

(v) *Examples.* The provisions of this paragraph (b) are illustrated by the following examples.

Example 1—FIFO inventory method. (i) Taxpayer J uses the FIFO method of accounting for inventories. J's beginning inventory for 1994 (all of which is sold during 1994) is $2,500,000 (consisting of $2,000,000 of section 471 costs and $500,000 of additional section 263A costs). During 1994, J incurs $10,000,000 of section 471 costs and $1,000,000 of additional section 263A costs. J's additional section 263A costs include capitalizable mixed service costs computed under the simplified service cost method as well as other allocable costs. J's section 471 costs remaining in ending inventory at the end of 1994 are $3,000,000. J computes its absorption ratio for 1994, as follows:

$$\frac{\text{Additional section 263A costs incurred during 1994}}{\text{Section 471 costs incurred during 1994}} = \frac{\$1{,}000{,}000}{\$10{,}000{,}000} = 10\%$$

(ii) Under the simplified production method, J determines the additional section 263A costs allocable to its ending inventory by multiplying the absorption ratio by the section 471 costs remaining in its ending inventory:

$$\text{Additional section 263A costs} = 10\% \times \$3{,}000{,}000 = \$300{,}000$$

(iii) J adds this $300,000 to the $3,000,000 of section 471 costs remaining in its ending inventory to calculate its total ending inventory of $3,300,000. The balance of J's additional section 263A costs incurred during 1994, $700,000, ($1,000,000 less $300,000) is taken into account in 1994 as part of J's cost of goods sold.

Example 2—LIFO inventory method. (i) Taxpayer K uses a dollar-value LIFO inventory method. K's beginning inventory for 1994 is $2,500,000 (consisting of $2,000,000 of section 471 costs and $500,000 of additional section 263A costs). During 1994, K incurs $10,000,000 of section 471 costs and $1,000,000 of additional section 263A costs. K's 1994 LIFO increment is $1,000,000 ($3,000,000 of section 471 costs in ending inventory less $2,000,000 of section 471 costs in beginning inventory).

(ii) To determine the additional section 263A costs allocable to its ending inventory, K multiplies the 10% absorption ratio ($1,000,000 of additional section 263A costs divided by $10,000,000 of section 471 costs) by the $1,000,000 LIFO increment. Thus, K's additional section 263A costs allocable to its ending inventory are $100,000 ($1,000,000 multiplied by 10%). This $100,000 is added to the $1,000,000 to determine a total 1994 LIFO increment of $1,100,000. K's ending inventory is $3,600,000 (its beginning inventory of $2,500,000 plus the $1,100,000 increment). The balance of K's additional section 263A costs incurred during 1994, $900,000 ($1,000,000 less $100,000), is taken into account in 1994 as part of K's cost of goods sold.

(iii) In 1995, K sells one-half of the inventory in its 1994 LIFO increment. K must include in its cost of goods sold for 1995 the amount of additional section 263A costs relating to this inventory, $50,000 (one-half of the tional section 263A costs capitalized in 1994 ending inventory, or $100,000).

Example 3—LIFO pools. (i) Taxpayer U begins its business in 1994 and adopts the LIFO inventory method. During 1994, L incurs $10,000 of section 471 costs and $1,000 of additional section 263A costs. At the end of 1994, L's ending inventory includes $3,000 of section 471 costs contained in three LIFO pools (X, Y, and Z) as shown below. Under the simplified production method, L computes its absorption ratio and inventory for 1994 as follows:

$$\frac{\text{Additional section 263A costs incurred during 1994}}{\text{Section 471 costs incurred during 1994}} = \frac{\$1{,}000}{\$10{,}000} = 10\%$$

	Total	X	Y	Z
1994:				
Ending section 471 costs	$3,000	$1,600	$600	$800
Additional section 263A costs (10%)	300	160	60	80
1994 ending inventory	$3,300	$1,760	$660	$880

(ii) During 1995, L incurs $2,000 of section 471 costs as shown below and $400 of additional section 263A costs. Moreover, L sells goods from pools X, Y, and Z having a total cost of $1,000. L computes its absorption ratio and inventory for 1995:

$$\frac{\text{Additional section 263A costs incurred during 1995}}{\text{Section 471 costs incurred during 1995}} = \frac{\$400}{\$2{,}000} = 20\%$$

	Total	X	Y	Z
1995:				
Beginning section 471 costs	$3,000	$1,600	$600	$800
1995 section 471 costs	2,000	1,500	300	200
Section 471 cost of goods sold	(1,000)	(300)	(300)	(400)
1995 ending section 471 costs	$4,000	$2,800	$600	$600
Consisting of:				
1994 layer	$2,800	$1,600	$600	$600
1995 layer	1,200	1,200	....	....
	$4,000	$2,800	$600	$600
Additional section 263A costs:				
1994 (10%)	$280	$160	$60	$60
1995 (20%)	240	240	....	....
	$520	$400	$60	$60
1995 ending inventory	$4,520	$3,200	$660	$660

(iii) In 1995, L experiences a $200 decrement in pool Z. Thus, L must charge the additional section 263A costs incurred in prior years applicable to the decrement to 1995's cost of goods sold. To do so, L determines a ratio by dividing the decrement by the section 471 costs in the 1994 layer ($200 divided by $800, or 25%). L then multiplies this ratio (25%) by the additional section 263A costs in the 1994 layer ($80) to determine the additional section 263A costs applicable to the decrement ($20). Therefore, $20 is taken into account by L in 1995 as part of its cost of goods sold ($80 multiplied by 25%).

(4) *Simplified production method with historic absorption ratio election*—(i) *In general.* This paragraph (b)(4) generally permits producers using the simplified production method to elect a historic absorption ratio in determining additional section 263A costs allocable to eligible property remaining on hand at the close of their taxable years. Except as provided in paragraph (b)(4)(v) of this section, a taxpayer may only make a historic absorption ratio election if it has used the simplified production method for three or more consecutive taxable years immediately prior to the year of election and has capitalized additional section 263A costs using an actual absorption ratio (as defined under paragraph (b)(3)(ii) of this section) for its three most recent consecutive taxable years. This method is not available to a taxpayer that is deemed to have zero additional section 263A costs under paragraph (b)(3)(iv) of this section. The historic absorption ratio is used in lieu of an actual absorption ratio computed under paragraph (b)(3)(ii) of this section and is based on costs capitalized by a taxpayer during its test period. If elected, the historic absorption ratio must be used for each taxable year within the qualifying period described in paragraph (b)(4)(ii)(C) of this section.

(ii) *Operating rules and definitions*—(A) *Historic absorption ratio.* (*1*) The historic absorption ratio is equal to the following ratio:

$$\frac{\text{Additional section 263A costs incurred during the test period}}{\text{Section 471 costs incurred during the test period}}$$

(*2*) Additional section 263A costs incurred during the test period are defined as the additional section 263A costs described in §1.263A–1(d)(3) that the taxpayer incurs during the test period described in paragraph (b)(4)(ii)(B) of this section.

(*3*) Section 471 costs incurred during the test period mean the section 471 costs described in §1.263A–1(d)(2) that the taxpayer incurs during the test period described in paragraph (b)(4)(ii)(B) of this section.

(*B*) *Test period—(1) In general.* The test period is generally the three taxable-year period immediately prior to the taxable year that the historic absorption ratio is elected.

(*2*) *Updated test period.* The test period begins again with the beginning of the first taxable year after the close of a qualifying period. This new test period, the updated test period, is the three taxable-year period beginning with the first taxable year after the close of the qualifying period as defined in paragraph (b)(4)(ii)(C) of this section.

(C) *Qualifying period*—(*1*) *In general.* A qualifying period includes each of the first five taxable years beginning with the first taxable year after a test period (or an updated test period).

(*2*) *Extension of qualifying period.* In the first taxable year following the close of each qualifying period, (e.g., the sixth taxable year following the test period), the taxpayer must compute the actual absorption ratio under the simplified production method. If the actual absorption ratio computed for this taxable year (the recomputation year) is within one-half of one percentage point (plus or minus) of the historic absorption ratio used in determining capitalizable costs for the qualifying period (i.e., the previous five taxable years), the qualifying period is extended to include the recomputation year and the following five taxable years, and the taxpayer must continue to use the historic absorption ratio throughout the extended qualifying period. If, however, the actual absorption ratio computed for the recomputation year is not within one-half of one percentage point (plus or minus) of the historic absorption ratio, the taxpayer must use actual absorption ratios beginning with the recomputation year under the simplified production method and throughout the updated test period. The taxpayer must resume using the historic absorption ratio (determined with reference to the updated test period) in the third taxable year following the recomputation year.

(iii) *Method of accounting*—(A) *Adoption and use.* The election to use the historic absorption ratio is a method of accounting. A taxpayer using the simplified production method may elect the historic absorption ratio in any taxable year if permitted under this paragraph (b)(4), provided the taxpayer has not obtained the Commissioner's consent to revoke the historic absorption ratio election within its prior six taxable years. The election is to be effected on a cut-off basis, and thus, no adjustment under section 481(a) is required or permitted. The use of a historic absorption ratio has no effect on other methods of accounting adopted by the taxpayer and used in conjunction with the simplified production method in determining its section 263A costs. Accordingly, in computing its actual absorption ratios, the taxpayer must use the same methods of accounting used in computing its historic absorption ratio during its most recent test period unless the taxpayer obtains the consent of the Commissioner. Finally, for purposes of this paragraph (b)(4)(iii), the recomputation of the historic absorption ratio during an updated test period and the change from a historic absorption ratio to an actual absorption ratio by reason of the requirements of this paragraph (b)(4) are not considered changes in methods of accounting under section 446(e) and, thus, do not require the consent of the Commissioner or any adjustments under section 481(a).

(B) *Revocation of election.* A taxpayer may only revoke its election to use the historic absorption ratio with the consent of the Commissioner in a manner prescribed under section 446(e) and the regulations thereunder. Consent to the change for any taxable year that is included in the qualifying period (or an extended qualifying period) will be granted only upon a showing of unusual circumstances.

(iv) *Reporting and recordkeeping requirements*—(A) *Reporting.* A taxpayer making an election under this paragraph (b)(4) must attach a statement to its federal income tax return for the taxable year in which the election is made showing the actual absorption ratios determined under the simplified production method during its first test period. This statement must disclose the historic absorption ratio to be used by the taxpayer during its qualifying period. A similar statement must be attached to the federal income tax return for the first taxable year within any subsequent qualifying period (i.e., after an updated test period).

(B) *Recordkeeping.* A taxpayer must maintain all appropriate records and details supporting the historic absorption ratio until the expiration of the statute of limitations for the last year for which the taxpayer applied the particular historic absorption ratio in determining additional section 263A costs capitalized to eligible property.

(v) *Transition rules.* Taxpayers will be permitted to elect a historic absorption ratio in their first, second, or third taxable year beginning after December 31, 1993, under such terms and conditions as may be prescribed by the Commissioner. Taxpayers are eligible to make an election under these transition rules whether or not they previously used the simplified production method. A taxpayer making such an election must recompute (or compute) its additional section 263A costs, and thus, its historic absorption ratio for its first test period as if the rules prescribed in this section and §§ 1.263A–1 and 1.263A–3 had applied throughout the test period.

(vi) *Example.* The provisions of this paragraph (b)(4) are illustrated by the following example:

Example. (i) Taxpayer M uses the FIFO method of accounting for inventories and for 1994 elects to use the historic absorption ratio with the simplified production method. After recomputing its additional section

263A costs in accordance with the transition rules of paragraph (b)(4)(v) of this section, M identifies the following costs incurred during the test period:

1991:
Add'l section 263A costs—$100
Section 471 costs—$3,000
1992:
Add'l section 263A costs—$200
Section 471 costs—$4,000
1993:
Add'l section 263A costs—$300
Section 471 costs—$5,000

(ii) Therefore, M computes a 5% historic absorption ratio determined as follows:

$$\text{Historic absorption ratio} = \frac{\$100+200+300}{\$3{,}000+4{,}000+5{,}000} = \frac{\$600}{\$12{,}000} = 5\%$$

(iii) In 1994, M incurs $10,000 of section 471 costs of which $3,000 remain in inventory at the end of the year. Under the simplified production method using a historic absorption ratio, M determines the additional section 263A costs allocable to its ending inventory by multiplying its historic absorption ratio (5%) by the section 471 costs remaining in its ending inventory as follows:

$$\text{Additional section 263A costs} = 5\% \times \$3{,}000 = \$150$$

(iv) To determine its ending inventory under section 263A, M adds the additional section 263A costs allocable to ending inventory to its section 471 costs remaining in ending inventory ($3,150=$150+$3,000). The balance of M's additional section 263A costs incurred during 1994 is taken into account in 1994 as part of M's cost of goods sold.

(v) M's qualifying period ends with the close of its 1998 taxable year. Therefore, 1999 is a recomputation year in which M must compute its actual absorption ratio. M determines its actual absorption ratio for 1999 to be 5.25% and compares that ratio to its historic absorption ratio (5.0%). Therefore, M must continue to use its historic absorption ratio of 5.0% throughout an extended qualifying period, 1999 through 2004 (the recomputation year and the following five taxable years).

(vi) If, instead, M's actual absorption ratio for 1999 were not between 4.5% and 5.5%, M's qualifying period would end and M would be required to compute a new historic absorption ratio with reference to an updated test period of 1999, 2000, and 2001. Once M's historic absorption ratio is determined for the updated test period, it would be used for a new qualifying period beginning in 2002.

(c) *Additional simplified methods for producers.* The Commissioner may prescribe additional elective simplified methods by revenue ruling or revenue procedure.

(d) *Cross reference.* See §1.6001–1(a) regarding the duty of taxpayers to keep such records as are sufficient to establish the amount of gross income, deductions, etc.

[T.D. 8482, 58 FR 42219, Aug. 9, 1993, as amended by 59 FR 3318, 3319, Jan. 21, 1994; T.D. 8584, 59 FR 67197, Dec. 29, 1994]

§1.263A–3 Rules relating to property acquired for resale.

(a) *Capitalization rules for property acquired for resale*—(1) *In general.* Section 263A applies to real property and personal property described in section 1221(1) acquired for resale by a retailer, wholesaler, or other taxpayer (reseller). However, section 263A does not apply to personal property described in section 1221(1) acquired for resale by a reseller whose average annual gross receipts for the three previous taxable years do not exceed $10,000,000 (small reseller). For this purpose, personal property includes both tangible and intangible property. Property acquired for resale includes stock in trade of the taxpayer or other property which is includible in the taxpayer's inventory if on hand at the close of the taxable year, and property held by the taxpayer primarily for sale to customers in the ordinary course of the taxpayer's trade or business. See, however,

§1.263A–1(b)(11) for an exception for certain de minimis property provided to customers incident to the provision of services.

(2) *Resellers with production activities*—(i) *In general.* Generally, a taxpayer must capitalize all direct costs and certain indirect costs associated with real property and tangible personal property it produces. See §1.263A–2(a). Thus, except as provided in paragraphs (a)(2)(ii) and (3) of this section, a reseller, including a small reseller, that also produces property must capitalize the additional section 263A costs associated with any property it produces.

(ii) *Exception for small resellers.* Under this paragraph (a)(2)(ii), a small reseller is not required to capitalize additional section 263A costs associated with any personal property that is produced incident to its resale activities, provided the production activities are de minimis (within the meaning of paragraph (a)(2)(iii) of this section).

(iii) *De minimis production activities*—(A) *In general.* (*1*) In determining whether a taxpayer's production activities are de minimis, all facts and circumstances must be considered. For example, the taxpayer must consider the volume of the production activities in its trade or business. Production activities are presumed de minimis if—

(*i*) The gross receipts from the sale of the property produced by the reseller are less than 10 percent of the total gross receipts of the trade or business; and

(ii) The labor costs allocable to the trade or business' production activities are less than 10 percent of the reseller's total labor costs allocable to its trade or business.

(*2*) For purposes of this de minimis presumption, gross receipts has the same definition as provided in paragraph (b) of this section except that gross receipts are measured at the trade-or-business level rather than at the single-employer level.

(B) *Example.* The application of this paragraph (a)(2) may be illustrated by the following example:

Example—Small reseller with de minimis production activities. Taxpayer N is a small reseller in the retail grocery business whose average annual gross receipts for the three previous taxable years are less than $10,000,000. N's grocery stores typically contain bakeries where customers may purchase baked goods produced by N. N's gross receipts from its bakeries are 5% of the entire grocery business. N's labor costs from its bakeries are 3% of its total labor costs allocable to the entire grocery business. Because both ratios are less than 10%, N's production activities are de minimis. Further, because N's production activities are incident to its resale activities, N is not required to capitalize any additional section 263A costs associated with its produced property.

(3) *Resellers with property produced under contract.* Generally, property produced for a taxpayer under a contract (within the meaning of §1.263A–2(a)(1)(ii)(B)(*2*)) is treated as property produced by the taxpayer. See §1.263A–2(a)(1)(ii)(B). However, a small reseller is not required to capitalize additional section 263A costs to personal property produced for it under contract with an unrelated person if the contract is entered into incident to the resale activities of the small reseller and the property is sold to its customers. For purposes of this paragraph, persons are related if they are described in section 267(b) or 707(b).

(4) *Use of the simplified resale method*—(i) *In general.* Except as provided in paragraphs (a)(4)(ii) and (iii) of this section, a taxpayer may elect the simplified production method (as described in §1.263A–2(b)) but may not elect the simplified resale method (as described in paragraph (d) of this section) if the taxpayer is engaged in both production and resale activities with respect to the items of eligible property listed in §1.263A–2(b)(2).

(ii) *Resellers with de minimis production activities.* A reseller otherwise permitted to use the simplified resale method in paragraph (d) of this section may use the simplified resale method if its production activities with respect to the items of eligible property listed in §1.263A–2(b)(2) are de minimis (within the meaning of paragraph (a)(2)(iii) of this section) and incident to its resale of personal property described in section 1221(1).

(iii) *Resellers with property produced under a contract.* A reseller otherwise permitted to use the simplified resale method in paragraph (d) of this section may use the simplified resale method even though it has personal property produced for it (e.g., private label goods) under a contract with an unrelated person if the contract is entered into incident to its resale activities and the property is sold to its customers. For purposes of this paragraph (a)(4)(iii), persons are related if they are described in section 267(b) or 707(b).

(iv) *Application of simplified resale method.* A taxpayer that uses the simplified resale method and has de minimis production activities incident to its resale activities or property produced under contract must capitalize all costs allocable to eligible property produced using the simplified resale method.

(b) *Gross receipts exception for small resellers*—(1) *In general.* Section 263A does not apply to any personal property acquired for resale during any taxable year if the taxpayer's (or its predecessors') average annual gross receipts for the three previous taxable years (test period) do not exceed $10,000,000. However, taxpayers that acquire real property for resale are subject to section 263A with respect to real property regardless of their gross receipts. See section 263A(b)(2)(B).

(i) *Test period for new taxpayers.* For purposes of applying this exception, if a taxpayer has been in existence for less than three taxable years, the taxpayer determines its average annual gross receipts for the number of taxable years (including short taxable years) that the taxpayer (or its predecessor) has been in existence.

(ii) *Treatment of short taxable year.* In the case of a short taxable year, the taxpayer's gross receipts are annualized by—

(A) Multiplying the gross receipts of the short taxable year by 12; and

(B) Dividing the product determined in paragraph (b)(1)(ii)(A) of this section by the number of months in the short taxable year.

(2) *Definition of gross receipts*—(i) *In general.* Gross receipts are the total amount, as determined under the taxpayer's method of accounting, derived from all of the taxpayer's trades or businesses (e.g., revenues derived from the sale of inventory before reduction for cost of goods sold).

(ii) *Amounts excluded.* For purposes of this paragraph (b), gross receipts do not include amounts representing—

(A) Returns or allowances;

(B) Interest, dividends, rents, royalties, or annuities, not derived in the ordinary course of a trade or business;

(C) Receipts from the sale or exchange of capital assets, as defined in section 1221;

(D) Repayments of loans or similar instruments (e.g., a repayment of the principal amount of a loan held by a commercial lender);

(E) Receipts from a sale or exchange not in the ordinary course of business, such as the sale of an entire trade or business or the sale of property used in a trade or business as defined under section 1221(2); and

(F) Receipts from any activity other than a trade or business or an activity engaged in for profit.

(3) *Aggregation of gross receipts*—(i) *In general.* In determining gross receipts, all persons treated as a single employer under section 52(a) or (b), section 414(m), or any regulation prescribed under section 414 (or persons that would be treated as a single employer under any of these provisions if they had employees) shall be treated as one taxpayer. The gross receipts of a single employer (or the group) are determined by aggregating the gross receipts of all persons (or the members) of the group, excluding any gross receipts attributable to transactions occurring between group members.

(ii) *Single employer defined.* A controlled group, which is treated as a single employer under section 52(a), includes members of a controlled group within the meaning of section 1563(a), regardless of whether such members would be treated as component members of such group under section 1563(b). (See §1.52–1(c).) Thus, for example, the gross receipts of a franchised corporation that is treated as an excluded member for purposes of section 1563(b) are included in the single employer's gross receipts under this aggregation rule, if such corporation and the taxpayer were members of the same controlled group under section 1563(a).

(iii) *Gross receipts of a single employer.* The gross receipts of a single employer for the test period include the gross receipts of all group members (or their predecessors) that are members of the group as of the first day of the taxable year in issue, regardless of whether such persons were members of the group for any of the three preceding taxable years. The gross receipts of the single employer for the test period do not, however, include the gross receipts of any member that was a group member (including any predecessor) for any or all of the three preceding taxable years, and is no longer a group member as of the first day of the taxable year in issue. Any group member that has a taxable year of less than 12 months must annualize its gross receipts in accordance with paragraph (b)(1)(ii) of this section.

(iv) *Examples.* The provisions of this paragraph (b)(3) are illustrated by the following examples:

Example 1. Subsidiary acquired during the taxable year. A parent corporation, (P), has owned 100% of the stock of another corporation, (S1), continually since 1989. P and S1 are calendar year taxpayers. S1 acquires property for resale. On January 1, 1994, P acquires 100% of the stock of another calendar year corporation (S2). In determining whether S1's resale activities are subject to the provisions of section 263A for 1994, the gross receipts of P, S1, and S2 for 1991, 1992, and 1993 are aggregated, excluding the gross receipts, if any, attributable to transactions occurring between the three corporations.

Example 2. Subsidiary sold during the taxable year. Since 1989, a parent corporation, (P), has continually owned 100% of the stock of two other corporations, (S1) and (S2). The three corporations are calendar year taxpayers. S1 acquires property for resale. On December 31, 1993, P sells all of its stock in S2. In determining whether S1's resale activities are subject to the provisions of section 263A for 1994, only the gross receipts of P and S1 for 1991, 1992, and 1993 must be aggregated, excluding the gross receipts, if any, attributable to transactions occurring between the two corporations.

(c) *Purchasing, handling, and storage costs*—(1) *In general.* Generally, § 1.263A–1(e) describes the types of costs that must be capitalized by taxpayers. Resellers must capitalize the acquisition cost of property acquired for resale, as well as indirect costs described in § 1.263A–1(e)(3), which are properly allocable to property acquired for resale. The indirect costs most often incurred by resellers are purchasing, handling, and storage costs. This paragraph (c) provides additional guidance regarding each of these categories of costs. As provided in § 1.263A–1(e), this paragraph (c) also applies to producers incurring purchasing, handling, and storage costs.

(2) *Costs attributable to purchasing, handling, and storage.* The costs attributable to purchasing, handling, and storage activities generally consist of direct and indirect labor costs (including the costs of pension plans and other fringe benefits); occupancy expenses including rent, depreciation, insurance, security, taxes, utilities and maintenance; materials and supplies; rent, maintenance, depreciation, and insurance of vehicles and equipment; tools; telephone; travel; and the general and administrative costs that directly benefit or are incurred by reason of the taxpayer's activities.

(3) *Purchasing costs*—(i) *In general.* Purchasing costs are costs associated with operating a purchasing department or office within a trade or business, including personnel costs (e.g., of buyers, assistant buyers, and clerical workers), relating to—

(A) The selection of merchandise;

(B) The maintenance of stock assortment and volume;

(C) The placement of purchase orders;

(D) The establishment and maintenance of vendor contacts; and

(E) The comparison and testing of merchandise.

(ii) *Determination of whether personnel are engaged in purchasing activities.* The determination of whether a person is engaged in purchasing activities is based upon the activities performed by that person and not upon the person's title or job classification. Thus, for example, although an employee's job function may be described in such a way as to indicate activities outside the area of purchasing (e.g., a marketing representative), such activities must be analyzed on the basis of the activities performed by that employee. If a person performs both purchasing and non-purchasing activities, the taxpayer must reasonably allocate the person's labor costs between these activities. For example, a reasonable allocation is one based on the amount of time the person spends on each activity.

(A) *⅓–⅔ rule for allocating labor costs.* A taxpayer may elect the ⅓–⅔ rule for allocating labor costs of persons performing both purchasing and non-purchasing activities. If elected, the taxpayer must allocate the labor costs of all such persons using the ⅓–⅔ rule. Under this rule—

(*1*) If less than one-third of a person's activities are related to purchasing, none of that person's labor costs are allocated to purchasing;

(*2*) If more than two-thirds of a person's activities are related to purchasing, all of that person's labor costs are allocated to purchasing; and

(*3*) In all other cases, the taxpayer must reasonably allocate labor costs between purchasing and non-purchasing activities.

(B) *Example.* The application of paragraph (c)(3)(ii)(A) of this section may be illustrated by the following example:

Example. Taxpayer O is a reseller that employs three persons, A, B, and C, who perform both purchasing and non- purchasing activities. These persons spend the following time performing purchasing activities: A–25 %; B–70 %; and C–50 %. Under the ⅓–⅔ rule, Taxpayer O treats none of A's labor costs as purchasing costs, all of B's labor costs as purchasing costs, and Taxpayer O allocates 50 % of C's labor costs as purchasing costs.

(4) *Handling costs*—(i) *In general.* Handling costs include costs attributable to processing, assembling, repackaging, transporting, and other similar activities with respect to property acquired for resale, provided the activities do not come within the meaning of the term produce as defined in §1.263A–2(a)(1). Handling costs are generally required to be capitalized under section 263A. Under this paragraph (c)(4)(i), however, handling costs incurred at a retail sales facility (as defined in paragraph (c)(5)(ii)(B) of this section) with respect to property sold to retail customers at the facility are not required to be capitalized. Thus, for example, handling costs incurred at a retail sales facility to unload, unpack, mark, and tag goods sold to retail customers at the facility are not required to be capitalized. In addition, handling costs incurred at a dual-function storage facility (as defined in paragraph (c)(5)(ii)(G) of this section) with respect to property sold to customers from the facility are not required to be capitalized to the extent that the costs are incurred with respect to property sold in on-site sales. Handling costs attributable to property sold to customers from a dual-function storage facility in on-site sales are determined by applying the ratio in paragraph (c)(5)(iii)(B) of this section.

(ii) *Processing costs.* Processing costs are the costs a reseller incurs in making minor changes or alterations to the nature or form of a product acquired for resale. Minor changes to a product include, for example, monogramming a sweater, altering a pair of pants, and other similar activities.

(iii) *Assembling costs.* Generally, assembling costs are costs associated with incidental activities that are necessary in readying property for resale (e.g., attaching wheels and handlebars to a bicycle acquired for resale).

(iv) *Repackaging costs.* Repackaging costs are the costs a taxpayer incurs to package property for sale to its customers.

(v) *Transportation costs.* Generally, transportation costs are the costs a taxpayer incurs moving or shipping property acquired for resale. These costs include the cost of dispatching trucks; loading and unloading shipments; and sorting, tagging, and marking property. Transportation costs may consist of depreciation on trucks and equipment and the costs of fuel, insurance, labor, and similar costs. Generally, transportation costs required to be capitalized include costs incurred in transporting property—

(A) From the vendor to the taxpayer;

(B) From one of the taxpayer's storage facilities to another of its storage facilities;

(C) From the taxpayer's storage facility to its retail sales facility;

(D) From the taxpayer's retail sales facility to its storage facility; and

(E) From one of the taxpayer's retail sales facilities to another of its retail sales facilities.

(vi) *Costs not required to be capitalized as handling costs*—(A) *Distribution costs*—(*1*) *In general.* Distribution costs are not required to be capitalized. Distribution costs are any transportation costs incurred outside a storage facility in delivering goods to a customer. For this purpose, any costs incurred on a loading dock are treated as incurred outside a storage facility.

(*2*) *Costs incurred in transporting goods to a related person.* Distribution costs do not include costs incurred by a taxpayer in delivering goods to a related person. Thus, for example, when a taxpayer sells goods to a related person, the costs of transporting the goods are included in determining the basis of the goods that are sold, and hence in determining the resulting gain or loss from the sale, for all purposes of the Internal Revenue Code and the regulations thereunder. See, e.g., sections 267, 707, and 1502. For purposes of this provision, persons are related if they are described in section 267(b) or section 707(b).

(B) *Delivery of custom-ordered items.* Generally, costs incurred in transporting goods from a taxpayer's storage facility to its retail sales facility must be capitalized. However, costs incurred outside a storage facility in delivering custom-ordered items to a retail sales facility are not required to be capitalized. For this purpose, any costs incurred on a loading dock are treated as incurred outside a storage facility. Delivery of custom-ordered items occurs when a taxpayer can demonstrate that a delivery to the taxpayer's retail sales facility is made to fill an identifiable order of a particular customer (placed by the customer before the delivery of the goods occurs) for the particular goods in question. Factors that may demonstrate the existence of a specific, identifiable delivery include the following—

(*1*) The customer has paid for the item in advance of the delivery;

(*2*) The customer has submitted a written order for the item;

(*3*) The item is not normally available at the retail sales facility for onsite customer purchases; and

(*4*) The item will be returned to the storage facility (and not held for sale at the retail sales facility) if the customer cancels an order.

(C) *Pick and pack costs*—(*1*) *In general.* Generally, handling costs incurred inside a storage or warehousing facility must be capitalized. However, costs attributable to pick and pack activities inside a storage or warehousing facility are not required to be capitalized. Pick and pack activities are activities undertaken in preparation for imminent shipment to a particular customer after the customer has ordered the specific goods in question. Examples of pick and pack activities include:

(*i*) Moving specific goods from a storage location in preparation for shipment to the customer;

(*ii*) Packing or repacking those goods for shipment to the customer; and

(*iii*) Staging those goods for shipment to the customer.

(*2*) *Activities that are not pick and pack activities.* Pick and pack activities do not include:

(*i*) Unloading goods that are received for storage;

(*ii*) Checking the quantity and quality of goods received;

(*iii*) Comparing the quantity of goods received to the amounts ordered and preparing the receiving documents;

(*iv*) Moving the goods to their storage location, e.g., bins, racks, containers, etc.; and

(*v*) Storing the goods.

(*3*) *Costs not attributable to pick and pack activities.* Occupancy costs, such as rent, depreciation, insurance, security, taxes, utilities, and maintenance costs properly allocable to the storage or warehousing facility, are not costs attributable to pick and pack activities.

(5) *Storage costs*—(i) *In general.* Generally, storage costs are capitalized under section 263A to the extent they are attributable to the operation of an off-site storage or warehousing facility (an off-site storage facility). However, storage costs attributable to the operation of an on-site storage facility (as defined in paragraph (c)(5)(ii)(A) of this section) are not required to be capitalized under section 263A. Storage costs attributable to a dual-function storage facility (as defined in paragraph (c)(5)(ii)(G) of this section) must be capitalized to the extent that the facility's costs are allocable to off-site storage.

(ii) *Definitions*—(A) *On-site storage facility.* An on-site storage facility is defined as a storage or warehousing facility that is physically attached to, and an integral part of, a retail sales facility.

(B) *Retail sales facility.* (*1*) A retail sales facility is defined as a facility where a taxpayer sells merchandise exclusively to retail customers in on-site sales. For this purpose, a retail sales facility includes those portions of any specific retail site—

(*i*) Which are customarily associated with and are an integral part of the operations of that retail site;

(*ii*) Which are generally open each business day exclusively to retail customers;

(*iii*) On or in which retail customers normally and routinely shop to select specific items of merchandise; and

(*iv*) Which are adjacent to or in immediate proximity to other portions of the specific retail site.

(*2*) Thus, for example, two lots of an automobile dealership physically separated by an alley or an access road would generally be considered one retail sales facility, provided customers routinely shop on both of the lots to select the specific automobiles that they wish to acquire.

(C) *An integral part of a retail sales facility.* A storage facility is considered an integral part of a retail sales facility when the storage facility is an essential and indispensable part of the retail sales facility. For example, if the storage facility is used exclusively for filling orders or completing sales at the retail sales facility, the storage facility is an integral part of the retail sales facility.

(D) *On-site sales.* On-site sales are defined as sales made to retail customers physically present at a facility. For example, mail order and catalog sales are made to customers not physically present at the facility, and thus, are not on-site sales.

(E) *Retail customer*—(*1*) *In general.* A retail customer is defined as the final purchaser of the merchandise. A retail customer does not include a person who resells the merchandise to others, such as a contractor or manufacturer that incorporates the merchandise into another product for sale to customers.

(*2*) *Certain non-retail customers treated as retail customers.* For purposes of this section, a non-retail customer is treated as a retail customer with respect to a particular facility if the following requirements are satisfied—

(*i*) The non-retail customer purchases goods under the same terms and conditions as are available to retail customers (e.g., no special discounts);

(*ii*) The non-retail customer purchases goods in the same manner as a retail customer (e.g., the non-retail customer may not place orders in advance and must come to the facility to examine and select goods);

(*iii*) Retail customers shop at the facility on a routine basis (i.e., on most business days), and no special days or hours are reserved for non-retail customers; and

(*iv*) More than 50 percent of the gross sales of the facility are made to retail customers.

(F) *Off-site storage facility.* An off-site storage facility is defined as a storage facility that is not an on-site storage facility.

(G) *Dual-function storage facility.* A dual-function storage facility is defined as a storage facility that serves as both an off-site storage facility and an on-site storage facility. For example, a dual-function storage facility would include a regional warehouse that serves the taxpayer's separate retail sales outlets and also contains a sales outlet therein. A dual-function storage facility also includes any facility where sales are made to retail customers in on-site sales and to—

(*1*) Retail customers in sales that are not on-site sales; or

(*2*) Other customers.

(iii) *Treatment of storage costs incurred at a dual-function storage facility*—(A) *In general.* Storage costs associated with a dual-function storage facility must be allocated between the off-site storage function and the on-site storage function. To the extent that the dual-function storage facility's storage costs are allocable to the off-site storage function, they must be capitalized. To the extent that the dual-function storage facility's storage costs are allocable to the on-site storage function, they are not required to be capitalized.

(B) *Dual-function storage facility allocation ratio*—(*1*) *In general.* Storage costs associated with a dual-function storage facility must be allocated between the off-site storage function and the on-site storage function using the ratio of—

(*i*) Gross on-site sales of the facility (i.e., gross sales of the facility made to retail customers visiting the premises in person and purchasing merchandise stored therein); to

(*ii*) Total gross sales of the facility. For this purpose, the total gross sales of the facility include the value of items shipped to other facilities of the taxpayer.

(*2*) *Illustration of ratio allocation.* For example, if a dual-function storage facility's on-site sales are 40 percent of the total gross sales of the facility, then 40 percent of the facility's storage costs are allocable to the on-site storage function and are not required to be capitalized under section 263A.

(*3*) *Appropriate adjustments for other uses of a dual-function storage facility.* Prior to computing the allocation ratio in paragraph (c)(5)(iii)(B) of this section, a taxpayer must apply the principles of paragraph (c)(5)(iv) of this section in determining the portion of the facility that is a dual-function storage facility (and the costs attributable to such portion).

(C) *De minimis 90–10 rule for dual-function storage facilities.* If 90 percent or more of the costs of a facility are attributable to the on-site storage function, the entire storage facility is deemed to be an on-site storage facility. In contrast, if 10 percent or less of the costs of a storage facility are attributable to the on-site storage function, the entire storage facility is deemed to be an off-site storage facility.

(iv) *Costs not attributable to an off-site storage facility.* To the extent that costs incurred at an off-site storage facility are not properly allocable to the taxpayer's storage function, the costs are not accounted for as off-site storage costs. For example, if a taxpayer has an office attached to its off-site storage facility where work unrelated to the storage function is performed, such as a sales office, costs associated with this office are not off-site storage costs. However, if a taxpayer uses a portion of an off-site storage facility in a manner related to the storage function, for example, to store equipment or supplies that are not offered for sale to customers, costs associated with this portion of the facility are off-site storage costs.

(v) *Examples.* The provisions of this paragraph (c)(5) are illustrated by the following examples:

Example 1. Catalog or mail order center. Taxpayer P operates a mail order catalog business. As part of its business, P stores merchandise for shipment to customers who purchase the merchandise through orders placed by telephone or mail. P's storage facility is not an on-site storage facility because no on-site sales are made at the facility.

Example 2. Pooled-stock facility. Taxpayer Q maintains a pooled-stock facility, which functions as a back-up regional storage facility for Q's retail sales outlets in the nearby area. Q's pooled stock facility is an off-site storage facility because it is neither physically attached to nor an integral part of a retail sales facility.

Example 3. Wholesale warehouse. Taxpayer R operates a wholesale warehouse where wholesale sales are made to customers physically present at the facility. R's customers resell the goods they purchase from R to final retail customers. Because no retail sales are conducted at the facility, all storage costs attributable to R's wholesale warehouse must be capitalized.

(d) *Simplified resale method*—(1) *Introduction.* This paragraph (d) provides a simplified method for determining the additional section 263A costs properly allocable to property acquired for resale and other eligible property on hand at the end of the taxable year.

(2) *Eligible property.* Generally, the simplified resale method is only available to a trade or business exclusively engaged in resale activities. However, certain resellers with property produced as a result of de minimis production activities or property produced under contract may elect the simplified resale method, as described in paragraph (a)(4) of this section. Eligible property for purposes of the simplified resale method, therefore, includes any real or personal property described in section 1221(1) that is acquired for resale and any eligible property (within the meaning of § 1.263A–

2(b)(2)) that is described in paragraph (a)(4) of this section.

(3) *Simplified resale method without historic absorption ratio election*—(i) *General allocation formula*—(A) *In general.* Under the simplified resale method, the additional section 263A costs allocable to eligible property remaining on hand at the close of the taxable year are computed as follows:

$$\text{Combined absorption ratio} \times \text{section 471 costs remaining on hand at year end}$$

(B) *Effect of allocation.* The resulting product under the general allocation formula is the additional section 263A costs that are added to the taxpayer's ending section 471 costs to determine the section 263A costs that are capitalized.

(C) *Definitions*—(*1*) *Combined absorption ratio.* The combined absorption ratio is defined as the sum of the storage and handling costs absorption ratio as defined in paragraph (d)(3)(i)(D) of this section and the purchasing costs absorption ratio as defined in paragraph (d)(3)(i)(E) of this section.

(*2*) *Section 471 costs remaining on hand at year end.* Section 471 costs remaining on hand at year end mean the section 471 costs, as defined in §1.263A–1(d)(2), that the taxpayer incurs during its current taxable year, which remain in its ending inventory or are otherwise on hand at year end. For LIFO inventories of a taxpayer, the section 471 costs remaining on hand at year end means the increment, if any, for the current year stated in terms of section 471 costs. See paragraph (d)(3)(ii) of this section for special rules applicable to LIFO taxpayers. Except as otherwise provided in this section or in §1.263A–1 or 1.263A–2, additional section 263A costs that are allocated to inventories on hand at the close of the taxable year under the simplified resale method of this paragraph (d) are treated as inventory costs for all purposes of the Internal Revenue Code.

(D) *Storage and handling costs absorption ratio.*

(*1*) Under the simplified resale method, the storage and handling costs absorption ratio is determined as follows:

$$\frac{\text{Current year's storage and handling costs}}{\text{Beginning inventory plus current year's purchases}}$$

(*2*) Current year's storage and handling costs are defined as the total storage costs plus the total handling costs incurred during the taxable year that relate to the taxpayer's property acquired for resale and other eligible property. See paragraph (c) of this section, which discusses storage and handling costs. Storage and handling costs must include the amount of allocable mixed service costs as described in paragraph (d)(3)(i)(F) of this section. Beginning inventory in the denominator of the storage and handling costs absorption ratio refers to the section 471 costs of any property acquired for resale or other eligible property held by the taxpayer as of the beginning of the taxable year. Current year's purchases generally mean the taxpayer's section 471 costs incurred with respect to purchases of property acquired for resale during the current taxable year. In computing the denominator of the storage and handling costs absorption ratio, a taxpayer using a dollar-value LIFO method of accounting, must state beginning inventory amounts using the LIFO carrying value of the inventory and not current-year dollars.

(E) *Purchasing costs absorption ratio.* (*1*) Under the simplified resale method, the purchasing costs absorption ratio is determined as follows:

$$\frac{\text{Current year's purchasing costs}}{\text{Current year's purchases}}$$

(*2*) Current year's purchasing costs are defined as the total purchasing costs incurred during the taxable year that relate to the taxpayer's property acquired for resale and eligible property. See paragraph (c)(3) of this section, which discusses purchasing costs. Purchasing costs must include the amount of allocable mixed service costs determined in paragraph (d)(3)(i)(F) of this section. Current year's purchases generally mean the taxpayer's section 471 costs incurred with respect to purchases of property acquired for resale during the current taxable year.

(F) *Allocable mixed service costs.* (*1*) If a taxpayer allocates its mixed service costs to purchasing costs, storage costs, and handling costs using a method described in §1.263A–1(g)(4), the taxpayer is not required to determine its allocable mixed service costs under this paragraph (d)(3)(i)(F). However, if the taxpayer uses the simplified service cost method, the amount of mixed service costs allocated to and included in purchasing costs, storage costs, and handling costs in the absorption ratios in paragraphs (d)(3)(i) (D) and (E) of this section is determined as follows:

$$\frac{\text{Labor costs allocable to activity}}{\text{Total labor costs}} \times \text{Total mixed service costs}$$

(*2*) Labor costs allocable to activity are defined as the total labor costs allocable to each particular activity (i.e., purchasing, handling, and storage), excluding labor costs included in mixed service costs. Total labor costs are defined as the total labor costs (excluding labor costs included in mixed service costs) that are incurred in the taxpayer's trade or business during the taxable year. See §1.263A–1(h)(6) for the definition of total mixed service costs.

(ii) *LIFO taxpayers electing simplified resale method*—(A) *In general.* Under the simplified resale method, a taxpayer using a LIFO method must calculate a particular year's index (e.g., under §1.472–8(e)) without regard its additional section 263A costs. Similarly, a taxpayer that adjusts current-year costs by applicable indexes to determine whether there has been an inventory increment or decrement in the current year for a particular LIFO pool must disregard the additional section 263A costs in making that determination.

(B) *LIFO increment.* If the taxpayer determines there has been an inventory increment, the taxpayer must state the amount of the increment in current-year dollars (stated in terms of section 471 costs). The taxpayer then multiplies this amount by the combined absorption ratio. The resulting product is the additional section 263A costs that must be added to the taxpayer's increment for the year stated in terms of section 471 costs.

(C) *LIFO decrement.* If the taxpayer determines there has been an inventory decrement, the taxpayer must state the amount of the decrement in dollars applicable to the particular year for which the LIFO layer has been invaded. The additional section 263A costs incurred in prior years that are applicable to the decrement are charged to cost of goods sold. The additional section 263A costs that are applicable to the decrement are determined by multiplying the additional section 263A costs allocated to the layer of the pool in which the decrement occurred by the ratio of the decrement (excluding additional section 263A costs) to the section 471 costs in the layer of that pool.

(iii) *Permissible variations of the simplified resale method.* The following variations of the simplified resale method are permitted:

(A) The exclusion of beginning inventories from the denominator in the storage and handling costs absorption ratio formula in paragraph (d)(3)(i)(D) of this section; or

(B) Multiplication of the storage and handling costs absorption ratio in paragraph (d)(3)(i)(D) of this section by the total of section 471 costs included in a LIFO taxpayer's ending inventory (rather than just the increment, if any, experienced by the LIFO taxpayer during the taxable year) for purposes of determining capitalizable storage and handling costs.

(iv) *Examples.* The provisions of this paragraph (d)(3) are illustrated by the following examples:

Example 1. FIFO inventory method. (i) Taxpayer S uses the FIFO method of accounting for inventories. S's beginning inventory for 1994 (all of which was sold during 1994) was $2,100,000 (consisting of $2,000,000 of section 471 costs and $100,000 of additional section 263A costs). During 1994, S makes purchases of $10,000,000. In addition, S incurs purchasing costs of $460,000, storage costs of $110,000, and handling costs of $90,000. S's purchases (section 471 costs) remaining in ending inventory at the end of 1994 are $3,000,000.

(ii) In 1994, S incurs $400,000 of total mixed service costs and $1,000,000 of total labor costs (excluding labor costs included in mixed service costs). In addition, S incurs the following labor costs (excluding labor costs included in mixed service costs): purchasing—$100,000, storage—$200,000, and handling—$200,000. Accordingly, the following mixed service costs must be included in purchasing costs, storage costs, and handling costs as capitalizable mixed service costs: purchasing— $40,000 ([$100,000 divided by $1,000,000] multiplied by $400,000); storage—$80,000 ([$200,000 divided by $1,000,000] multiplied by $400,000); and handling— $80,000 ([$200,000 divided by $1,000,000] multiplied by $400,000).

(iii) S computes its purchasing costs absorption ratio for 1994 as follows:

$$\frac{\text{1994 purchasing costs}}{\text{1994 purchases}} = \frac{\$460{,}000 + \$40{,}000}{\$10{,}000{,}000}$$

$$= \frac{\$500{,}000}{\$10{,}000{,}000}$$

$$= 5.0\%$$

(iv) S computes its storage and handling costs absorption ratio for 1994 as follows:

$$\frac{\text{Storage and handling costs}}{\begin{array}{c}\text{Beginning inventory}\\ \text{plus 1994 purchases}\end{array}} = \frac{(\$110{,}000 + \$80{,}000) + (\$90{,}000 + \$80{,}000)}{\$2{,}000{,}000 + \$10{,}000{,}000}$$

$$= \frac{\$190{,}000 + \$170{,}000}{\$12{,}000{,}000}$$

$$= \frac{\$360{,}000}{\$12{,}000{,}000}$$

$$= 3.0\%$$

(v) S's combined absorption ratio is 8.0 %, or the sum of the purchasing costs absorption ratio (5.0 %) and the storage and handling costs absorption ratio (3.0 %). Under the simplified resale method, S determines the additional section 263A costs allocable to its ending inventory by multiplying the combined absorption ratio by its section 471 costs with respect to current year's purchases remaining in ending inventory:

$$\text{Additional section 263A costs} = 8.0\% \times \$3{,}000{,}000 = \$240{,}000$$

(vi) S adds this $240,000 to the $3,000,000 of purchases remaining in its ending inventory to determine its total ending FIFO inventory of $3,240,000.

Example 2. LIFO inventory method. (i) Taxpayer T uses a dollar-value LIFO inventory method. T's beginning inventory for 1994 is $2,100,000 (consisting of $2,000,000 of section 471 costs and $100,000 of additional section 263A costs). During 1994, T makes purchases of $10,000,000. In addition, T incurs purchasing costs of $460,000, storage costs of $110,000, and handling costs of $90,000. T's 1994 LIFO increment is $1,000,000 ($3,000,000 of section 471 costs in ending inventory less $2,000,000 of section 471 costs in beginning inventory).

(ii) In 1994, T incurs $400,000 of total mixed service costs and $1,000,000 of total labor costs (excluding labor costs included in mixed service costs). In addition, T incurs the following labor costs (excluding labor costs included in mixed service costs): purchasing—$100,000, storage—$200,000, and handling—$200,000. Accordingly, the following mixed service costs must be included in purchasing costs, storage costs, and handling costs as capitalizable mixed service costs: purchasing—$40,000 ([$100,000 divided by $1,000,000] multiplied by $400,000); storage—$80,000 ([$200,000 divided by $1,000,000] multiplied by $400,000); and handling— $80,000 ([$200,000 divided by $1,000,000] multiplied by $400,000).

(iii) Based on these facts, T determines that it has a combined absorption ratio of 8.0 %. To determine the additional section 263A costs allocable to its ending inventory, T multiplies its combined absorption ratio (8.0 %) by the $1,000,000 LIFO increment. Thus, T's additional section 263A costs allocable to its ending inventory are $80,000 ($1,000,000 multiplied by 8.0 %). This $80,000 is added to the $1,000,000 to determine a total 1994 LIFO increment of $1,080,000. T's ending inventory is $3,180,000 (its beginning inventory of $2,100,000 plus the $1,080,000 increment).

(iv) In 1995, T sells one-half of the inventory in its 1994 LIFO increment. T must include in its cost of goods sold for 1995 the amount of additional section 263A costs relating to this inventory, i.e., one-half of the $80,000 additional section 263A costs capitalized in 1994 ending inventory, or $40,000.

Example 3. LIFO Pools. (i) Taxpayer U begins its business in 1994, and adopts the LIFO inventory method. During 1994, U makes purchases of $10,000, and incurs $400 of purchasing costs, $350 of storage costs and $250 of handling costs. U's purchasing costs, storage costs, and handling costs include their proper allocable share of mixed service costs.

(ii) U computes its purchasing costs absorption ratio for 1994, as follows:

$$\frac{\text{1994 purchasing costs}}{\text{1994 purchases}} = \frac{\$400}{\$10{,}000}$$

$$= 4.0\%$$

(iii) U computes its storage and handling costs absorption ratio for 1994, as follows:

$$\frac{\text{1994 storage and handling costs}}{\text{Beginning inventory plus 1994 purchases}} = \frac{\$350 + \$250}{\$0 + \$10{,}000}$$

$$= \frac{\$600}{\$10{,}000}$$

$$= 6.0\%$$

(iv) U's combined absorption ratio is 10%, or the sum of the purchasing costs absorption ratio (4.0%) and the storage and handling costs absorption ratio (6.0%). At the end of 1994, U's ending inventory included $3,000 of current year purchases, contained in three LIFO pools (X, Y, and Z) as shown below. Under the simplified resale method, U computes its ending inventory for 1994 as follows:

1994	Total	X	Y	Z
Ending section 471 costs	$3,000	$1,600	$600	$800
Additional section 263A costs (10%)	300	160	60	80
1994 ending inventory	3,300	1,760	660	880

(v) During 1995, U makes purchases of $2,000 as shown below, and incurs $200 of purchasing costs, $325 of storage costs and $175 of handling costs. U's purchasing costs, storage costs, and handling costs include their proper share of mixed service costs. Moreover, U sold goods from pools X, Y, and Z having a total cost of $1,000. U computes its ending inventory for 1995 as follows.

(vi) U computes its purchasing costs absorption ratio for 1995:

$$\frac{\text{1995 purchasing costs}}{\text{1995 purchases}} = \frac{\$200}{\$2,000}$$
$$= 10.0\%$$

(vii) U computes its storage and handling costs absorption ratio for 1995:

$$\frac{\text{1995 storage and handling costs}}{\text{Beginning inventory plus 1995 purchases}} = \frac{\$325 + \$175}{\$3,000 + \$2,000}$$
$$= \frac{\$500}{\$5,000}$$
$$= 10.0\%$$

(viii) U's combined absorption ratio is 20.0%, or the sum of the purchasing costs absorption ratio (10.0%) and the storage and handling costs absorption ratio (10.0%).

1995	Total	X	Y	Z
Beginning section 471 costs	$3,000	$1,600	$600	$800
1995 section 471 costs	2,000	1,500	300	200
Section 471 cost of goods sold	(1,000)	(300)	(300)	(400)
1995 ending section 471 costs	4,000	2,800	600	600
Consisting of:				
1994 layer	2,800	1,600	600	600
1995 layer	1,200	1,200	....	....
	4,000	2,800	600	600
Additional section 263A costs:				
1994 (10%)	280	160	60	60
1995 (20%)	240	240	....	....
	520	400	60	60
1995 ending inventory	4,520	3,200	660	660

(ix) In 1995, U experiences a $200 decrement in Pool Z. Thus, U must charge the additional section 263A costs incurred in prior years applicable to the decrement to 1995's cost of goods sold. To do so, U determines a ratio by dividing the decrement by the section 471 costs in the 1994 layer ($200 divided by $800, or 25%). U then multiplies this ratio (25%) by the additional section 263A costs in the 1994 layer ($80) to determine the additional section 263A costs applicable to the decrement ($20). Therefore, $20 is taken into account by U in 1995 as part of its cost of goods sold ($80 multiplied by 25%).

(4) *Simplified resale method with historic absorption ratio election*—(i) *In general.* This paragraph (d)(4) permits resellers using the simplified resale method to elect a historic absorption ratio in determining additional section 263A costs allocable to eligible property remaining on hand at the close of their taxable years. Except as provided in paragraph (d)(4)(v) of this section, a taxpayer may only make a historic absorption ratio election if it has used the simplified resale method for three or more consecutive taxable years immediately prior to the year of election. The historic absorption ratio is used in lieu of an actual combined absorption ratio computed under paragraph (d)(3)(i)(C)(*1*) of this section and is based on costs capitalized by a taxpayer during its test period. If elected, the historic absorption ratio must be used for the qualifying period described in paragraph (d)(4)(ii)(C) of this section.

(ii) *Operating rules and definitions*—(A) *Historic absorption ratio.* (*1*) The historic absorption ratio is equal to the following ratio:

$$\frac{\text{Additional section 263A costs incurred during the test period}}{\text{Section 471 costs incurred during the test period}}$$

(*2*) Additional section 263A costs incurred during the test period are defined as the sum of the products of the combined absorption ratios (defined in paragraph (d)(3)(i)(C)(*1*) of this section) multiplied by a taxpayer's section 471 costs incurred with respect to purchases, for each taxable year of the test period.

(*3*) Section 471 costs incurred during the test period mean the section 471 costs described in § 1.263A–1(d)(2) that a taxpayer incurs generally with respect to its purchases during the test period described in paragraph (d)(4)(ii)(B) of this section.

(B) *Test period*—(*1*) *In general.* The test period is generally the three taxable-year period immediately prior to the taxable year that the historic absorption ratio is elected.

(*2*) *Updated test period.* The test period begins again with the beginning of the first taxable year after the close of a qualifying period (as defined in paragraph (d)(4)(ii)(C) of this section). This new test period, the updated test period, is the three taxable-year period beginning with the first taxable year after the close of the qualifying period.

(C) *Qualifying period*—(*1*) *In general.* A qualifying period includes each of the first five taxable years beginning with the first taxable year after a test period (or updated test period).

(*2*) *Extension of qualifying period.* In the first taxable year following the close of each qualifying period (e.g., the sixth taxable year following the test period), the taxpayer must compute the actual combined absorption ratio under the simplified resale method. If the actual combined absorption ratio computed for this taxable year (the recomputation year) is within one-half of one percentage point (plus or minus) of the historic absorption ratio used in determining capitalizable costs for the qualifying period (i.e., the previous five taxable years), the qualifying period must be extended to include the recomputation year and the following five taxable years, and the taxpayer must continue to use the historic absorption ratio throughout the extended qualifying period. If, however, the actual combined absorption ratio computed for the recomputation year is not within one-half of one percentage point (plus or minus) of the historic absorption ratio, the taxpayer must use actual combined absorption ratios beginning with the recomputation year under the simplified resale method and throughout the updated test period. The taxpayer must resume using the historic absorption ratio (determined with reference to the updated test period) in the third taxable year following the recomputation year.

(iii) *Method of accounting*—(A) *Adoption and use.* The election to use the historic absorption ratio is a method of accounting. A taxpayer using the simplified resale method may elect the historic absorption ratio in any taxable year if permitted under this paragraph (d)(4), provided the taxpayer has not obtained the Commissioner's consent to revoke the historic absorption ratio election within its prior six taxable years. The election is to be effected on a cut-off basis, and thus, no adjustment under section 481(a) is required or permitted. The use of a historic absorption ratio has no effect on other methods of accounting adopted by the taxpayer and used in conjunction with the simplified resale method in determining its section 263A costs. Accordingly, in computing its actual combined absorption ratios, the taxpayer must use the same methods of accounting used in computing its historic absorption ratio during its most recent test period unless the taxpayer obtains the consent of the Commissioner. Finally, for purposes of this paragraph (d)(4)(iii)(A), the recomputation of the historic absorption ratio during an updated test period and the change from a historic absorption ratio to an actual combined absorption ratio during an updated test period by reason of the requirements of this paragraph (d)(4) are not considered changes in methods of accounting under section 446(e) and, thus, do not require the consent of the Commissioner or any adjustments under section 481(a).

(B) *Revocation of election.* A taxpayer may only revoke its election to use the historic absorption ratio with the consent of the Commissioner in a manner prescribed under section 446(e) and the regulations thereunder. Consent to the change for any taxable year that is included in the qualifying period (or an extended qualifying period) will be granted only upon a showing of unusual circumstances.

(iv) *Reporting and recordkeeping requirements*—(A) *Reporting.* A taxpayer making an election under this paragraph (d)(4) must attach a statement to its federal income tax return for the taxable year in which the election is made showing the actual combined absorption ratios determined under the simplified resale method during its first test period. This statement must disclose the historic absorption ratio to be used by the taxpayer during its qualifying period. A similar statement must be attached to the federal income tax return for the first taxable year within any subsequent qualifying period (i.e., after an updated test period).

(B) *Recordkeeping.* A taxpayer must maintain all appropriate records and details supporting the historic absorption ratio until the expiration of the statute of limitations for the last year for which the taxpayer applied the particular historic absorption ratio in determining additional section 263A costs capitalized to eligible property.

(v) *Transition rules.* Taxpayers will be permitted to elect a historic absorption ratio in their first, second, or third taxable year beginning after December 31, 1993, under such terms and conditions as may be prescribed by the Commissioner. Taxpayers are eligible to make an election under these transition rules whether or not they previously used the simplified resale method. A taxpayer making such an election must recompute (or compute) its additional section 263A costs, and thus, its historic absorption ratio for its first test period as if the rules prescribed in this section and §§1.263A–1 and 1.263A–2 had applied throughout the test period.

(vi) *Example.* The provisions of this paragraph (d)(4) are illustrated by the following example:

Example. (i) Taxpayer V uses the FIFO method of accounting for inventories and in 1994 elects to use the historic absorption ratio with the simplified resale method. After recomputing its additional section 263A costs in accordance with the transition rules of paragraph (d)(4)(v) of this section, V identifies the following costs incurred during the test period:

1991:
Add'l section 263A costs—$100
Section 471 costs—$3,000
1992:
Add'l section 263A costs—$200
Section 471 costs—$4,000
1993:
Add'l section 263A costs—$300
Section 471 costs—$5,000

(ii) Therefore, V computes a 5% historic absorption ratio determined as follows:

$$\text{Historic absorption ratio} = \frac{\$100 + 200 + 300}{\$3000 + 4{,}000 + 5{,}000} = \frac{\$600}{\$12{,}000} = 5\%$$

(iii) In 1994, V incurs $10,000 of section 471 costs of which $3,000 remain in inventory at the end of the year. Under the simplified resale method using a historic absorption ratio, V determines the additional section 263A costs allocable to its ending inventory by multiplying its historic ratio (5%) by the section 471 costs remaining in its ending inventory:

$$\text{Additional section 263A costs} = 5\% \times \$3{,}000 = \$150$$

(iv) To determine its ending inventory under section 263A, V adds the additional section 263A costs allocable to ending inventory to its section 471 costs remaining in ending inventory ($3,150=$150+$3,000). The balance of V's additional section 263A costs incurred during 1994 is taken into account in 1994 as part of V's cost of goods sold.

(v) V's qualifying period ends as of the close of its 1998 taxable year. Therefore, 1999 is a recomputation year in which V must compute its actual combined absorption ratio. V determines its actual absorption ratio for 1999 to be 5.25% and compares that ratio to its historic absorption ratio (5.0%). Therefore, V must continue to use its historic absorption ratio of 5.0% throughout an extended qualifying period, 1999 through 2004 (the recomputation year and the following five taxable years).

(vi) If, instead, V's actual combined absorption ratio for 1999 were not between 4.5% and 5.5%, V's qualifying period would end and V would be required to compute a new historic absorption ratio with reference to an updated test period of 1999, 2000, and 2001. Once V's historic absorption ratio is determined for the updated test period, it would be used for a new qualifying period beginning in 2002.

(5) *Additional simplified methods for resellers.* The Commissioner may prescribe additional elective simplified methods by revenue ruling or revenue procedure.

(e) *Cross reference.* See § 1.6001–1(a) regarding the duty of taxpayers to keep such records as are sufficient to establish the amount of gross income, deductions, etc.

[T.D. 8482, 58 FR 42224, Aug. 9, 1993; 58 FR 47784, Sept. 10, 1993; 59 FR 3319, Jan. 21, 1994, as amended by T.D. 8559, 59 FR 39962, Aug. 5, 1994]

§ 1.263A–4 Rules for property produced in a farming trade or business. [Reserved]

§ 1.263A–4T Rules for property produced in a farming business (temporary).

(a) *Introduction*—(1) *In general.* The regulations under this section provide guidance with respect to the application of section 263A to property produced in a farming business as defined in paragraph (a)(3) of this section. Except as otherwise provided by the rules of this section, the general rules of §§ 1.263A–1 through 1.263A–3 and 1.263A–7 through 1.263A–15 apply to property produced in a farming business. A taxpayer that engages in the raising or growing of any agricultural or horticultural commodity, including both plants and animals, is engaged in the production of property. Section 263A generally requires the capitalization of the direct costs and an allocable portion of the indirect costs that benefit or are incurred by reason of the production of this property. Taxpayers that do not qualify for the exception described in paragraph (a)(2) of this section must capitalize these costs of producing all plants and animals unless the election described in paragraph (d) of this section is made.

(2) *Exception*—(i) *In general.* A taxpayer is not required to capitalize the preproductive period costs of producing plants with a preproductive period of 2 years or less or the costs of producing animals, if the taxpayer is not—

(A) A corporation or partnership required to use an accrual method of accounting (accrual method) under section 447 in computing its taxable income from farming; or

(B) A tax shelter required to use an accrual method under section 448(a)(3).

(ii) *Tax shelter.* A farming business is considered a tax shelter, and thus a taxpayer required to use an accrual method under section 448(a)(3), if the farming business is—

(A) A farming syndicate as defined in section 464(c); or

(B) A tax shelter, within the meaning of section 6662(d)(2)(C)(iii).

(iii) *Presumption.* Marketed arrangements in which persons carry on farming activities using the services of a common managerial or administrative service will be presumed to have the principal purpose of tax avoidance, within the meaning of section 6662(d)(2)(C)(iii), if such persons prepay a substantial portion of their farming expenses with borrowed funds.

(iv) *Costs required to be capitalized or inventoried under another provision.* The exception from capitalization provided in this paragraph (a)(2) does not apply to any cost that is required to be capitalized or inventoried under another Code or regulatory provision, such as section 263 or section 471.

(v) *Examples.* The following examples illustrate the provisions of this paragraph (a)(2):

Example 1. Farmer A grows trees that have a preproductive period in excess of 2 years, and that produce an annual crop. Farmer A is not required by section 447 or 448(a)(3) to use an accrual method. Accordingly, Farmer A qualifies for the exception described in this paragraph (a)(2). Since the trees have a preproductive period in excess of 2 years, Farmer A must capitalize the direct costs and an allocable portion of the indirect costs that benefit or are incurred by reason of the production of the trees. Since the annual crop has a preproductive period of 2 years or less, Farmer A is not required to capitalize the costs of the crops.

Example 2. Assume the same facts as *Example 1,* except that Farmer A is required by section 447 or 448(a)(3) to use an accrual method. Farmer A does not qualify for the exception described in this paragraph (a)(2). Farmer A is required to capitalize the direct costs and an allocable portion of the indirect costs that benefit or are incurred by reason of the production of the trees and crops, including all preproductive period costs.

(3) *Farming business*—(i) *In general.* A farming business means a trade or business involving the cultivation of land or the raising or harvesting of any agricultural or horticultural commodity. Examples include the trade or business of operating a nursery or sod farm; the raising or harvesting of trees bearing fruit, nuts, or other crops; the raising of ornamental trees (other than evergreen trees that are more than 6 years old at the time they are severed from their roots); and the raising, shearing, feeding, caring for, training, and management of animals. For purposes of this section, the term harvesting does not include contract harvesting of an agricultural or horticultural commodity grown or raised by another. Similarly, the trade or business of merely buying and reselling plants or animals grown or raised by another is not a farming business.

(A) *Plant.* A plant produced in a farming business includes, but is not limited to, a fruit, nut, or other crop bearing tree, an ornamental tree, a vine, a bush, sod, and the crop or yield of a plant that will have more than one crop or yield. Sea plants are produced in a farming business if they are tended and cultivated as opposed to merely harvested.

(B) *Animal.* An animal produced in a farming business includes, but is not limited to, any stock, poultry or other bird, and fish or other sea life raised by the taxpayer. Thus, for example, the term animal may include a cow, chicken, emu, or salmon raised by the taxpayer. Fish and other sea life are produced in a farming business if they are raised on a fish farm.

A fish farm is an area where fish or other sea life are grown or raised as opposed to merely caught or harvested.

(ii) *Incidental activities*—(A) *In general.* Farming business includes processing activities that are normally incident to the growing, raising, or harvesting of agricultural products. For example, a taxpayer in the trade or business of growing fruits and vegetables may harvest, wash, inspect, and package the fruits and vegetables for sale. Such activities are normally incident to the raising of these crops by farmers. The taxpayer will be considered to be in the trade or business of farming with respect to the growing of fruits and vegetables and the processing activities incident to their harvest.

(B) *Activities that are not incidental*—(*1*) *In general.* Farming business does not include the processing of commodities or products beyond those activities that are normally incident to the growing, raising, or harvesting of such products.

(*2*) *Examples.* The following examples illustrate the provisions of this paragraph (a)(3)(ii):

Example 1. Individual A is in the business of growing and harvesting wheat and other grains. Individual A also processes grain that Individual A has harvested in order to produce breads, cereals, and other similar food products, which Individual A then sells to customers in the course of its business. Although Individual A is in the farming business with respect to the growing and harvesting of grain, Individual A is not in the farming business with respect to the processing of such grain to produce the food products.

Example 2. Individual B is in the business of raising poultry and other livestock. Individual B also operates a meat processing operation in which the poultry and other livestock are slaughtered, processed, and packaged or canned. The packaged or canned meat is sold to Individual B's customers. Although Individual B is in the farming business with respect to the raising of poultry and other livestock, Individual B is not in the farming business with respect to the slaughtering, processing, packaging, and canning of such animals to produce the food products.

(b) *Application of section 263A to property produced in a farming business*—(1) *In general.* Unless otherwise provided in this section, section 263A requires the capitalization of the direct costs and an allocable portion of the indirect costs that benefit or are incurred by reason of the production of any property in a farming business (including animals and plants without regard to the length of their preproductive period).

(i) *Plants.* Costs typically required to be capitalized under section 263A include the acquisition costs of the seed, seedling, or plant, and the costs of planting, cultivating, maintaining, or developing such plant during the preproductive period. These costs include, but are not limited to, management, irrigation, pruning, fertilizing (including costs that the taxpayer has elected to deduct under section 180), soil and water conservation (including costs that the taxpayer has elected to deduct under section 175), frost protection, spraying, upkeep, electricity, tax depreciation and repairs on buildings and equipment used in raising the plants, farm overhead, taxes (except state and federal income taxes), and interest required to be capitalized under section 263A(f).

(ii) *Animals.* Costs typically required to be capitalized under section 263A include the acquisition cost of the animal, and the costs of raising or caring for such animal during the preproductive period. Preproductive period costs include, but are not limited to, the costs of management, feed (such as grain, silage, concentrates, supplements, haylage, hay, pasture and other forages), maintaining pasture or pen areas (including costs that the taxpayer has elected to deduct under sections 175 or 180), breeding, artificial insemination, veterinary services and medicine, livestock hauling, bedding, fuel, electricity, hired labor, tax depreciation and repairs on buildings and equipment used in raising the animals (for example, barns, trucks, and trailers), farm overhead, taxes (except state and federal income taxes), and interest required to be capitalized under section 263A(f).

(2) *Preproductive period*—(i) *Plant*—(A) *In general.* The preproductive period of property produced in a farming business means—

(*1*) In the case of a plant that will have more than one crop or yield, the period before the first marketable crop or yield from such plant;

(*2*) In the case of the crop or yield of a plant that will have more than one crop or yield, the period before such crop or yield is disposed of; or

(*3*) In the case of any other plant, the period before such plant is disposed of.

(B) *Applicability of section 263A.* For purposes of determining whether a plant has a preproductive period in excess of 2 years, the preproductive period of plants grown in commercial quantities in the United States is based on the nationwide weighted average preproductive period for such plant.

For all other plants, the taxpayer is required, at or before the time the seed or plant is acquired or planted, to reasonably estimate the preproductive period of the plant. If the taxpayer estimates a preproductive period in excess of 2 years, the taxpayer must capitalize preproductive period costs. If the estimate is reasonable, based on the facts in existence at the time it is made, the determination of whether section 263A applies is not modified at a later time even if the actual length of the preproductive period differs from the estimate. The actual length of the preproductive period will, however, be considered in evaluating the reasonableness of the taxpayer's future estimates. Thus, the nationwide weighted average preproductive period or the estimated preproductive period are only used for purposes of determining whether the preproductive period of a plant is greater than 2 years.

(C) *Actual preproductive period.* The plant's actual preproductive period is used for purposes of determining the period during which a taxpayer must capitalize preproductive period costs with respect to a particular plant.

(*1*) *Beginning of the preproductive period.* The actual preproductive period of a plant begins when the taxpayer first incurs costs that directly benefit or are incurred by reason of the plant. Generally, this occurs when the taxpayer plants the seed or plant. In the case of a taxpayer that acquires plants that have already been planted, or plants that are tended, by the taxpayer or another, prior to permanent planting, the actual preproductive period of the plant begins upon acquisition of the plant by the taxpayer. In the case of the crop or yield of a plant that will have more than one crop or yield and that has become productive in marketable quantities, the actual preproductive period begins when the crop or yield first appears, for example, in the form of a sprout, bloom, blossom, or bud.

(*2*) *End of the preproductive period*—(*i*) *In general.* In the case of a plant that will have more than one crop or yield, the actual preproductive period ends when the plant first becomes productive in marketable quantities. In the case of any other plant (including the crop or yield of a plant that will have more than one crop or yield), the actual preproductive period ends when the plant, crop, or yield is sold or otherwise disposed of.

(*ii*) *Marketable quantities.* A plant that will have more than one crop or yield becomes productive in marketable quantities when it is (or would be considered) placed in service for purposes of section 168 (without regard to the applicable convention).

(D) *Examples.* The following examples illustrate the provisions of this paragraph (b)(2)(i):

Example 1. (i) Farmer A, a taxpayer that qualifies for the exception in paragraph (a)(2) of this section, grows plants that will have more than one crop or yield. The plants are grown in commercial quantities in the United States. Farmer A acquires the plants by purchasing them from an unrelated party, Corporation B, and plants them immediately. The nationwide weighted average preproductive period of the plant is 4 years. The particular plants grown by Farmer A do not begin to produce in marketable quantities until 4 years and 6 months after they are planted by Farmer A.

(ii) Since the plants are deemed to have a preproductive period in excess of 2 years, Farmer A is required to capitalize the preproductive period costs of the plants. See paragraphs (a)(2) and (b)(2)(i)(B) of this section. In accordance with paragraph (b)(2)(i)(C)(*1*) of this section, Farmer A must begin to capitalize such costs when the plants are planted. In accordance with paragraph (b)(2)(i)(C)(*2*) of this section, Farmer A must continue to capitalize costs to the plants until the plants begin to produce in marketable quantities. Thus, Farmer A must capitalize the preproductive period costs of the plants for a period of 4 years and 6 months, notwithstanding the fact that the plants, in general, have a nationwide weighted average preproductive period of 4 years.

Example 2. (i) Farmer B, a taxpayer that qualifies for the exception in paragraph (a)(2) of this section, grows plants that will have more than one crop or yield. The plants are grown in commercial quantities in the United States. The nationwide weighted average preproductive period of the plant is 2 years and 5 months. Farmer B acquires the plants by purchasing them from an unrelated party, Corporation B. Farmer B enters into a contract with Corporation B under which Corporation B will retain and tend the plants for 7 months following the sale. At the end of 7 months, Farmer B takes possession of the plants and plants them in the permanent orchard. The plants become productive in marketable quantities 1 year and 11 months after they are planted by Farmer B.

(ii) Since the plants are deemed to have a preproductive period in excess of 2 years, Farmer B is required to capitalize the preproductive period costs of the plants. See paragraphs (a)(2) and (b)(2)(i)(B) of this section. In accordance with paragraph (b)(2)(i)(C)(*1*) of this section, Farmer B must begin to capitalize such costs when the purchase occurs. In accordance with paragraph (b)(2)(i)(C)(*2*) of this section, Farmer B must continue to capitalize costs to the plants until the plants begin to produce in marketable quantities. Thus, Farmer B must capitalize the preproductive period costs of the plants for a period of 2 years and 6 months (the 7 months the plants are tended by Corporation B and the 1 year and 11 months after the plants are planted by Farmer B), notwithstanding the fact that the plants, in general, have a nationwide weighted average preproductive period of 2 years and 5 months.

Example 3. Assume the same facts as in *Example 2,* except that Farmer B acquires the plants by purchasing them from Corporation B when the plants are 7 months old and that the plants are planted by Farmer B upon acquisition.

(ii) Since the plants are deemed to have a preproductive period in excess of 2 years, Farmer B is required to capitalize the preproductive period costs of the plants. See paragraphs (a)(2) and (b)(2)(i)(B) of this section. In accordance with paragraph (b)(2)(i)(C)(*1*) of this section, Farmer B must begin to capitalize such costs when the plants are planted. In accordance with paragraph (b)(2)(i)(C)(*2*) of this section, Farmer B must continue to capitalize costs to the plants until the plants begin to produce in marketable quantities. Thus, Farmer B must capitalize the preproductive period costs of the plants for a period of 1 year and 11 months.

Example 4. (i) Farmer C, a taxpayer that qualifies for the exception in paragraph (a)(2) of this section, grows plants that will have more than one crop or yield. The plants are grown in commercial quantities in the United States. Farmer C acquires the plants from an unrelated party and plants them immediately. The nationwide weighted average preproductive period of the plant is 2 years and 3 months. The particular plants grown by Farmer C begin to produce in marketable quantities 1 year and 10 months after they are planted by Farmer C.

(ii) Since the plants are deemed to have a nationwide weighted average preproductive period in excess of 2 years, Farmer C is required to capitalize the preproductive period costs of the plants, notwithstanding the fact that the particular plants grown by Farmer C become productive in less than 2 years. See paragraph (b)(2)(i)(B) of this section. In accordance with paragraph (b)(2)(i)(C)(*1*) of this section, Farmer C must begin to capitalize such costs when it plants the plants. In accordance with paragraph (b)(2)(i)(C)(*2*) of this section, Farmer C properly ceases capitalization of preproductive period costs when the plants become productive in marketable quantities (i.e., after 1 year and 10 months).

Example 5. (i) Farmer D, a taxpayer that qualifies for the exception in paragraph (a)(2) of this section, grows plants that will have more than one crop or yield. The plants are not grown in commercial quantities in the United States. At the time the plants are planted Farmer D reasonably estimates that the plants will have a preproductive period of 4 years. The actual plants grown by Farmer D do not begin to produce in marketable quantities until 4 years and 6 months after they are planted by Farmer D.

(ii) Since the plants have an estimated preproductive period in excess of 2 years, Farmer D is required to capitalize the preproductive period costs of the plants. See paragraph (b)(2)(i)(B) of this section. In accordance with paragraph (b)(2)(i)(C)(*1*) of this section, Farmer D must begin to capitalize such costs when it plants the plants. In accordance with paragraph (b)(2)(i)(C)(*2*) of this section, Farmer D must continue to capitalize costs until the plants begin to produce in marketable quantities. Thus, Farmer D must capitalize the preproductive period costs of the plants for a period of 4 years and 6 months, notwithstanding the fact that Farmer D estimated that the plants would become productive after 4 years.

Example 6. (i) Farmer E, a taxpayer that qualifies for the exception in paragraph (a)(2) of this section grows plants that are not grown in commercial quantities in the United States. The plants do not have more than 1 crop or yield. At the time the plants are planted Farmer E reasonably estimates that the plants will have a preproductive period of 1 year and 10 months. The actual plants grown by Farmer E are not ready for harvesting and disposal until 2 years and 2 months after the seeds are planted by Farmer E.

(ii) Because Farmer E's estimate of the preproductive period (which was 2 years or less) was reasonable at the time made based on the facts, Farmer E will not be required to capitalize the preproductive period costs of the plants notwithstanding the fact that the actual preproductive period of the plants exceeded 2 years. See paragraph (b)(2)(i)(B) of this section. However, Farmer E must take the actual preproductive period of the plants into consideration when making future estimates of the preproductive period of such plants.

Example 7. Farmer F, a calendar year taxpayer that does not qualify for the exception in paragraph (a)(2) of this section, grows trees that will have more than one crop. Farmer F acquires and plants the trees in April, 1998. On October 1, 2003, the trees are placed in service within the meaning of section 168. Under paragraph (b)(2)(i)(C)(*2*)(*ii*) of this section, the trees become productive in marketable quantities on October 1, 2003. The preproductive period costs incurred by Farmer F on or before October 1, 2003, are capitalized to the trees. Preproductive period costs incurred after October 1, 2003, are capitalized to a crop when incurred during the preproductive period of the crop and expensed when incurred between the disposal of one crop and the appearance of the next crop. *See* paragraphs (b)(2)(i)(A), (b)(2)(i)(C)(*1*) and (b)(2)(i)(C)(*2*) of this section.

(ii) *Animal.* An animal's actual preproductive period is used to determine the period that the taxpayer must capitalize preproductive period expenses with respect to a particular animal.

(A) *Beginning of the preproductive period.* The preproductive period of an animal begins at the time of acquisition, breeding, or embryo implantation.

(B) *End of the preproductive period.* In the case of an animal that will be used in the trade or business of farming (e.g., a dairy cow), the preproductive period generally ends when the animal is (or would be considered) placed in service for purposes of section 168 (without regard to the applicable convention). However, in the case of an animal that will have more than one yield (e.g., a breeding cow), the preproductive period ends when the animal produces (e.g., gives birth to) its first yield. In the case of any other animal, the preproductive period ends when the animal is sold or otherwise disposed of.

(C) *Allocation of costs between animal and first yield.* In the case of an animal that will have more than one yield, the costs incurred after the beginning of the preproductive period of the first yield but before the end of the preproductive period of the animal must be allocated between the animal and the yield on a reasonable basis. Any depreciation allowance on the animal may be allocated entirely to the yield. The allocation method used by a taxpayer is a method of accounting that must be used consistently and is subject to the rules of section 446 and the regulations thereunder.

(c) *Inventory methods*—(1) *In general.* Except as otherwise provided, the costs required to be allocated to any plant or animal under this section may be determined using reasonable inventory valuation methods such as the farm-price method or the unit-livestock-price method. See §1.471–6. Under the unit-livestock-price method, unit prices must include all costs required to be capitalized under section 263A. A taxpayer using the unit-livestock-price method may elect to use the cost allocation methods in §1.263A–1(f) or 1.263A–2(b) to allocate its direct and indirect costs to the property produced in the business of farming. In such a situation, section 471 costs are the costs taken into account by the taxpayer under the unit-livestock-price method using the taxpayer's standard unit price as modified by this paragraph (c)(1). The term additional section 263A costs includes all additional costs required to be capitalized under section 263A. Tax shelters, as defined in paragraph (a)(2)(ii) of this section, that use the unit-livestock-price method for inventories must include in inventory the annual standard unit price for all animals that are acquired during the taxable year, regardless of whether the purchases are made during the last 6 months of the taxable year. Taxpayers required by section 447 or 448(a)(3) to use an accrual method that use the unit-livestock-price method must modify the annual standard price in order to reasonably reflect the particular period in the taxable year in which purchases of livestock are made, if such modification is necessary in order to avoid significant distortions in income that would otherwise occur through operation of the unit livestock method.

(2) *Available for property used in a trade or business.* The farm price method or the unit livestock method may be used by any taxpayer to allocate costs to any plant or animal under this section, regardless of whether the plant or animal is held or treated as inventory property by the taxpayer. Thus, for example, a taxpayer may use the unit livestock method to account for the costs of raising livestock that will be used in the trade or business of farming

(e.g., a breeding animal or a dairy cow) even though the property in question is not inventory property.

(3) *Exclusion of property to which section 263A does not apply.* Notwithstanding a taxpayer's use of the farm price method with respect to farm property to which the provisions of section 263A apply, that taxpayer is not required, solely by such use, to use the farm price method with respect to farm property to which the provisions of section 263A do not apply. Thus, for example, assume Farmer A raises fruit trees that have a preproductive period in excess of 2 years and to which the provisions of section 263A, therefore, apply. Assume also that Farmer A raises cattle and is not required to use an accrual method by section 447 or 448(a)(3). Because Farmer A qualifies for the exception in paragraph (a)(2) of this section, Farmer A is not required to capitalize the costs of raising the cattle. Although Farmer A may use the farm price method with respect to the fruit trees, Farmer A is not required to use the farm price method with respect to the cattle. Instead, Farmer A's accounting for the cattle is determined under other provisions of the Code and regulations.

(d) *Election not to have section 263A apply*—(1) *Introduction.* This paragraph (d) permits certain taxpayers to make an election not to have the rules of this section apply to any plant produced in a farming business conducted by the electing taxpayer. The election is a method of accounting under section 446, and once an election is made, it is revocable only with the consent of the Commissioner.

(2) *Availability of the election.* The election described in this paragraph (d) is available to any taxpayer that produces plants in a farming business, except that no election may be made by a corporation, partnership, or tax shelter required to use the accrual method under section 447 or 448(a)(3). Moreover, the election does not apply to the costs of planting, cultivation, maintenance, or development of a citrus or almond grove (or any part thereof) incurred prior to the close of the fourth taxable year beginning with the taxable year in which the trees were planted in the permanent grove (including costs incurred prior to the permanent planting). If a citrus or almond grove is planted in more than one taxable year, the portion of the grove planted in any one taxable year is treated as a separate grove for purposes of determining the year of planting.

(3) *Time and manner of making the election.* A taxpayer makes the election under this paragraph (d) by not capitalizing the preproductive period costs of producing property in a farming business and by applying the special rules in paragraph (d)(4) of this section, on its timely filed original return (including extensions) for the first taxable year in which the taxpayer is otherwise required to capitalize preproductive period costs under section 263A. Thus, in order to be treated as having made the election under this paragraph (d), it is necessary to report both income and expenses in accordance with the rules of this paragraph (d) (e.g., it is necessary to use the alternative depreciation system as provided in paragraph (d)(4)(ii) of this section). Thus, for example, a farmer who deducts preproductive period costs that are otherwise required to be capitalized under section 263A but fails to use the alternative depreciation system under section 168(g)(2) for applicable property placed in service has not made an election under this paragraph (d) and is not in compliance with the provisions of section 263A. In the case of a partnership or S corporation, the election must be made by the partner, shareholder, or member.

(4) *Special rules.* If the election under this paragraph (d) is made, the taxpayer is subject to the special rules in this paragraph (d)(4).

(i) *Section 1245 treatment.* The plant produced by the taxpayer is treated as section 1245 property and any gain resulting from any disposition of the plant is recaptured (i.e., treated as ordinary income) to the extent of the total amount of the deductions that, but for the election, would have been required to be capitalized with respect to the plant. In calculating the amount of gain that is recaptured under this paragraph (d)(4)(i), a taxpayer may use the farm price method or another simplified method permitted under these regulations in determining the deductions that otherwise would have been capitalized with respect to the plant.

(ii) *Required use of alternative depreciation system.* If the taxpayer or a related person makes an election under this paragraph (d), the alternative depreciation system (as defined in section 168(g)(2)) must be applied to all property used predominantly in any farming business of the taxpayer or related person and placed in service in any taxable year during which the election is in effect. The requirement to use the alternative depreciation system by reason of an election under this paragraph (d) will not prevent a taxpayer from making an election under section 179 to deduct certain depreciable business assets.

(iii) *Related person*—(A) *In general.* For purposes of this paragraph (d)(4), related person means—

(*1*) The taxpayer and members of the taxpayer's family;

(*2*) Any corporation (including an S corporation) if 50 percent or more of the stock (in value) is owned directly or indirectly (through the application of section 318) by the taxpayer or members of the taxpayer's family;

(*3*) A corporation and any other corporation that is a member of the same controlled group (within the meaning of section 1563(a)(1)); and

(*4*) Any partnership if 50 percent or more (in value) of the interests in such partnership is owned directly or indirectly by the taxpayer or members of the taxpayer's family.

(B) *Members of family.* For purposes of this paragraph (d)(4)(iii), *members of the taxpayer's family,* and *members of family* (for purposes of applying section 318(a)(1)), means the spouse of the taxpayer (other than a spouse who is legally separated from the individual under a decree of divorce or separate maintenance) and any of the taxpayer's children (including legally adopted children) who have not reached the age of 18 as of the last day of the taxable year in question.

(5) *Examples.* The following examples illustrate the provisions of this paragraph (d):

Example 1. (i) Farmer A, an individual, is engaged in the trade or business of farming. Farmer A grows apple trees that have a preproductive period greater than 2 years. In addition, Farmer A grows and harvests wheat and other grains. Farmer A elects under this paragraph (d) not to have the rules of section 263A apply to the preproductive period costs of growing the apple trees.

(ii) In accordance with paragraph (d)(4) of this section, Farmer A is required to use the alternative depreciation system described in section 168(g)(2) with respect to all property used predominantly in any farming business in which Farmer A engages (including the growing and harvesting of wheat) if such property is placed in service during a year for which the election is in effect. Thus, for example, all assets and equipment (including trees and any equipment used to grow and harvest wheat) placed in service during a year for which the election is in effect must be depreciated as provided in section 168(g)(2).

Example 2. Assume the same facts as in *Example 1,* except that Farmer A and members of Farmer A's family (as defined in paragraph (d)(4)(iii)(B) of this section) also own 51 percent (in value) of the interests in Partnership P, which is engaged in the trade or business of growing and harvesting corn. Partnership P is a related person to Farmer A under the provisions of paragraph (d)(4)(iii) of this section. Thus, the requirements to use the alternative depreciation system under section 168(g)(2) also apply to any property used predominantly in a trade or business of farming which Partnership P places in service during a year for which an election made by Farmer A is in effect.

(e) *Exception for certain costs resulting from casualty losses*—(1) *In general.* Section 263A does not require the capitalization of costs that are attributable to the replanting, cultivating, maintaining, and developing of any plants bearing an edible crop for human consumption (including, but not limited to, plants that constitute a grove, orchard, or vineyard) that were lost or damaged while owned by the taxpayer by reason of freezing temperatures, disease, drought, pests, or other casualty (replanting costs). Such replanting costs may be incurred with respect to property other than the property on which the damage or loss occurred to the extent the acreage of the property with respect to which the replanting costs are incurred is not in excess of the acreage of the property on which the damage or loss occurred. This paragraph (e) applies only to the replanting of plants of the same type as those lost or damaged. This paragraph (e) applies to plants replanted on the property on which the damage or loss occurred or property of the same or lesser acreage in the United States irrespective of differences in density between the lost or damaged and replanted plants. Plants bearing crops for human consumption are those crops normally eaten or drunk by humans. Thus, for example, costs incurred with respect to replanting plants bearing jojoba beans do not qualify for the exception provided in this paragraph (e) because that crop is not normally eaten or drunk by humans.

(2) *Ownership.* Replanting costs described in paragraph (e)(1) of this section generally must be incurred by the taxpayer that owned the property at the time the plants were lost or damaged. Paragraph (e)(1) of this section will apply, however, to costs incurred by a person other than the taxpayer that owned the plants at the time of damage or loss if—

(i) The taxpayer that owned the plants at the time the damage or loss occurred owns an equity interest of more than 50 percent in such plants at all times during the taxable year in which the replanting costs are paid or incurred; and

(ii) Such other person owns any portion of the remaining equity interest and materially participates in the replanting, cultivating, maintaining, or developing of such plants during the taxable year in which the replanting costs are paid or incurred. A person will be treated as materially participating for purposes of this provision if such person would otherwise meet the requirements with respect to material participation within the meaning of section 2032A(e)(6).

(3) *Examples.* The following examples illustrate the provisions of this paragraph (e):

Example 1. (i) Farmer T grows cherry trees that have a preproductive period in excess of 2 years and produce an annual crop. These cherries are normally eaten by humans. Farmer T grows the trees on a 100 acre parcel of land (parcel 1) and the groves of trees cover the entire acreage of parcel 1. Farmer T also owns a 150 acre parcel of land (parcel 2) that Farmer T holds for future use. Both parcels are in the United States. In 1998, the trees and the irrigation and drainage systems that service the trees are destroyed in a casualty (within the meaning of paragraph (e)(1) of this section). Farmer T installs new irrigation and drainage systems on parcel 1, purchases young trees (seedlings), and plants the seedlings on parcel 1.

(ii) The costs of the irrigation and drainage systems and the seedlings must be capitalized under section 263A. In accordance with paragraph (e)(1) of this section, the costs of planting, cultivating, developing, and maintaining the seedlings during their preproductive period are not required to be capitalized by section 263A.

Example 2. (i) Assume the same facts as in *Example 1* except that Farmer T decides to replant the seedlings on parcel 2 rather than on parcel 1. Accordingly, Farmer T installs the new irrigation and drainage systems on 100 acres of parcel 2 and plants seedlings on those 100 acres.

(ii) The costs of the irrigation and drainage systems and the seedlings must be capitalized under section 263A. Because the acreage of the related portion of parcel 2 does not exceed the acreage of the destroyed orchard on parcel 1, the costs of planting, cultivating, developing, and maintaining the seedlings during their preproductive period are not required to be capitalized by section 263A. See paragraph (e)(1) of this section.

Example 3. (i) Assume the same facts as in *Example 1* except that Farmer T replants the seedlings on parcel 2 rather than on parcel 1, and Farmer T additionally decides to expand its operations by growing 125 rather than 100 acres of trees. Accordingly, Farmer T installs new irrigation and drainage systems on 125 acres of parcel 2 and plants seedlings on those 125 acres.

(ii) The costs of the irrigation and drainage systems and the seedlings must be capitalized under section 263A. The costs of planting, cultivating, developing, and maintaining 100 acres of the trees during their preproductive period are not required to be capitalized by section 263A. The costs of planting, cultivating, maintaining, and developing the additional 25 acres are, however, subject to capitalization. See paragraph (e)(1) of this section.

(4) *Special rule for citrus and almond groves*—(i) *In general.* The exception in this paragraph (e) is available with respect to a citrus or almond grove, notwithstanding the taxpayer's election not to have section 263A apply (described in paragraph (d) of this section).

(ii) *Example.* The following example illustrates the provisions of this paragraph (e)(4):

Example. (i) Farmer A, an individual, is engaged in the trade or business of farming. Farmer A grows citrus trees that have a preproductive period of 5 years. Farmer A elects, under paragraph (d) of this section, not to have section 263A apply to the preproductive period costs. This election, however, is unavailable with respect to the preproductive period costs of a citrus grove incurred within the first 4 years after the trees were planted. See paragraph (d)(2) of this section. After the citrus grove has become productive in marketable quantities, the citrus grove is destroyed by a casualty within the meaning of paragraph (e)(1) of this section.

(ii) Farmer A must capitalize the preproductive period costs incurred before the close of the fourth taxable year beginning with the year in which the trees were permanently planted. As a result of the election not to have section 263A apply to preproductive period costs, Farmer A may deduct the preproductive period costs incurred in the fifth year. The costs of replanting, cultivating, maintaining, and developing the trees destroyed by a casualty are exempted from capitalization under this paragraph (e).

(f) *Effective date and transition rule.* In the case of property that is not inventory in the hands of the taxpayer, this section is generally effective for costs incurred on or after August 22, 1997, in taxable years ending after such date. In the case of inventory property, this section is generally effective for taxable years beginning after August 22, 1997. However, taxpayers in compliance with §1.263A–4T in effect prior to August 22, 1997 (See 26 CFR part 1 edition revised as of April 1, 1997.), and other administrative guidance, that continue to comply with §1.263A–4T in effect prior to August 22, 1997 (See 26 CFR part 1 edition revised as of April 1, 1997.), and other administrative guidance, will not be required to apply these new temporary rules until final regulations are published in the FEDERAL REGISTER.

[T.D. 8729, 62 FR 44546, Aug. 22, 1997]

§1.263A–5 Exception for qualified creative expenses incurred by certain free-lance authors, photographers, and artists. [Reserved]

§1.263A–6 Rules for foreign persons. [Reserved]

§1.263A–7 Changing a method of accounting under section 263A.

(a) *Introduction*—(1) *Purpose.* These regulations provide guidance to taxpayers changing their methods of accounting for costs subject to section 263A. The principal purpose of these regulations is to provide guidance regarding how taxpayers are to revalue property on hand at the beginning of the taxable year in which they change their method of accounting for costs subject to section 263A. Paragraph (c) of this section provides guidance regarding how items or costs included in beginning inventory in the year of change must be revalued. Paragraph (d) of this section provides guidance regarding how non-inventory property should be revalued in the year of change.

(2) *Taxpayers that adopt a method of accounting under section 263A.* Taxpayers may adopt a method of accounting for costs subject to section 263A in the first taxable year in which they engage in resale or production activities. For purposes of this section, the adoption of a method of accounting has the same meaning as provided in §1.446–1(e)(1). Taxpayers are not subject to the provisions of these regulations to the extent they adopt, as opposed to change, a method of accounting.

(3) *Taxpayers that change a method of accounting under section 263A.* Taxpayers changing their method of accounting for costs subject to section 263A are subject to the revaluation and other provisions of this section. Taxpayers subject to these regulations include, but are not limited to—

(i) Resellers of personal property whose average annual gross receipts for the immediately preceding 3-year period (or lesser period if the taxpayer was not in existence for the three preceding taxable years) exceed $10,000,000 where the taxpayer was not subject to section 263A in the prior taxable year;

(ii) Resellers of real or personal property that are using a method that fails to comply with section 263A and desire to change to a method of accounting that complies with section 263A;

(iii) Producers of real or tangible personal property that are using a method that fails to comply with section 263A and desire to change to a method of accounting that complies with section 263A; and

(iv) Resellers and producers that desire to change from one permissible method of accounting for costs subject to section 263A to another permissible method.

(4) *Effective date.* The provisions of this section are effective for taxable years beginning on or after August 5, 1997. For taxable years beginning before August 5, 1997, the rules of § 1.263A–7T contained in the 26 CFR part 1 edition revised as of April 1, 1997, as modified by other administrative guidance, will apply.

(5) *Definition of change in method of accounting.* For purposes of this section, a change in method of accounting has the same meaning as provided in § 1.446–1(e)(2)(ii). Changes in method of accounting for costs subject to section 263A include changes to methods required or permitted by section 263A and the regulations thereunder. Changes in method of accounting may be described in the preceding sentence irrespective of whether the taxpayer's previous method of accounting resulted in the capitalization of more (or fewer) costs than the costs required to be capitalized under section 263A and the regulations thereunder, and irrespective of whether the taxpayer's previous method of accounting was a permissible method under the law in effect when the method was being used. However, changes in method of accounting for costs subject to section 263A do not include changes relating to factors other than those described therein. For example, a change in method of accounting for costs subject to section 263A does not include a change from one inventory identification method to another inventory identification method, such as a change from the last-in, first-out (LIFO) method to the first-in, first-out (FIFO) method, or vice versa, or a change from one inventory valuation method to another inventory valuation method under section 471, such as a change from valuing inventory at cost to valuing the inventory at cost or market, whichever is lower, or vice versa. In addition, a change in method of accounting for costs subject to section 263A does not include a change within the LIFO inventory method, such as a change from the double extension method to the link-chain method, or a change in the method used for determining the number of pools. Further, a change from the modified resale method set forth in Notice 89–67 (1989–1 C.B. 723), see § 601.601(d)(2) of this chapter, to the simplified resale method set forth in § 1.263A–3(d) is not a change in method of accounting within the meaning of § 1.446–1(e)(2)(ii) and is therefore not subject to the provisions of this section. However, a change from the simplified resale method set forth in former § 1.263A–1T(d)(4) to the simplified resale method set forth in § 1.263A–3(d) is a change in method of accounting within the meaning of § 1.446–1(e)(2)(ii) and is subject to the provisions of this section.

(b) *Rules applicable to a change in method of accounting*—(1) *General rules.* All changes in method of accounting for costs subject to section 263A are subject to the rules and procedures provided by the Code, regulations, and administrative procedures applicable to such changes. The Internal Revenue Service has issued specific revenue procedures that govern certain accounting method changes for costs subject to section 263A. Where a specific revenue procedure is not applicable, changes in method of accounting for costs subject to section 263A are subject to the same rules and procedures that govern other accounting method changes. See Rev. Proc. 97–27 (1997–21 I.R.B. 10) and § 601.601(d)(2) of this chapter.

(2) *Special rules*—(i) *Ordering rules when multiple changes in method of accounting occur in the year of change*—(A) *In general.* A change in method of accounting for costs subject to section 263A is generally deemed to occur (including the computation of the adjustment under section 481(a)) before any other change in method of accounting is deemed to occur for that same taxable year.

(B) *Exceptions to the general ordering rule*—(*1*) *Change from the LIFO inventory method.* In the case of a taxpayer that is discontinuing its use of the LIFO inventory method in the same taxable year it is changing its method of accounting for costs subject to section 263A, the change from the LIFO method may be made before the change in method of accounting (and the computation of the corresponding adjustment under section 481 (a)) under section 263A is made.

(*2*) *Change from the specific goods LIFO inventory method.* In the case of a taxpayer that is changing from the specific goods LIFO inventory method to the dollar-value LIFO inventory method in the same taxable year it is changing its method of accounting for costs subject to section 263A, the change from the specific goods LIFO inventory method may be made before the change in method of accounting under section 263A is made.

(*3*) *Change in overall method of accounting.* In the case of a taxpayer that is changing its overall method of accounting from the cash receipts and disbursements method to an accrual method in the same taxable year it is changing its method of accounting for costs subject to section 263A, the taxpayer must change to an accrual method for capitalizable costs (see §1.263A–1(c)(2)(ii)) before the change in method of accounting (and the computation of the corresponding adjustment under section 481(a)) under section 263A is made.

(*4*) *Change in method of accounting for depreciation.* In the case of a taxpayer that is changing its method of accounting for depreciation in the same taxable year it is changing its method of accounting for costs subject to section 263A and any portion of the depreciation is subject to section 263A, the change in method of accounting for depreciation must be made before the change in method of accounting (and the computation of the corresponding adjustment under section 481(a)) under section 263A is made.

(ii) *Adjustment required by section 481(a).* In the case of any taxpayer required or permitted to change its method of accounting for any taxable year under section 263A and the regulations thereunder, the change will be treated as initiated by the taxpayer for purposes of the adjustment required by section 481(a). The adjustment required by section 481(a) is to be taken into account in computing taxable income over a period not to exceed 4 taxable years.

(iii) *Base year*—(A) *Need for a new base year.* Certain dollar-value LIFO taxpayers (whether using double extension or link-chain) must establish a new base year when they revalue their inventories under section 263A.

(*1*) *Facts and circumstances revaluation method used.* A dollar-value LIFO taxpayer that uses the facts and circumstances revaluation method is permitted, but not required, to establish a new base year.

(*2*) *3-year average method used*—(*i*) *Simplified method not used.* A dollar-value LIFO taxpayer using the 3-year average method but not the simplified production method or the simplified resale method to revalue its inventory is required to establish a new base year.

(*ii*) *Simplified method used.* A dollar-value LIFO taxpayer using the 3-year average method and either the simplified production method or the simplified resale method to revalue its inventory is permitted, but not required, to establish a new base year.

(B) *Computing a new base year.* For purposes of determining future indexes, the year of change becomes the new base year (that is, the index at the beginning of the year of change generally must be 1.00) and all costs are restated in new base year costs for purposes of extending such costs in future years. However, when a new base year is established, costs associated with old layers retain their separate identity within the base year, with such layers being restated in terms of the new base year index. For example, for purposes of determining whether a particular layer has been invaded, each layer must retain its separate identity. Thus, if a decrement in an inventory pool occurs, layers accumulated in more recent years must be viewed as invaded first, in order of priority.

(c) *Inventory*—(1) *Need for adjustments.* When a taxpayer changes its method of accounting for costs subject to section 263A, the taxpayer generally must, in computing its taxable income for the year of change, take into account the adjustments required by section 481(a). The adjustments required by section 481(a) relate to revaluations of inventory property, whether the taxpayer produces the inventory or acquires it for resale. See paragraph (d) of this section in regard to the adjustments required by section 481(a) that relate to non-inventory property.

(2) *Revaluing beginning inventory*—(i) *In general.* If a taxpayer changes its method of accounting for costs subject to section 263A, the taxpayer must revalue the items or costs included in its beginning inventory in the year of change as if the new method (that is, the method to which the taxpayer is changing) had been in effect during all prior years. In revaluing inventory costs under this procedure, all of the capitalization provisions of section 263A and the regulations thereunder apply to all inventory costs accumulated in prior years. The necessity to revalue beginning inventory as if these capitalization rules had been in effect for all prior years includes, for example, the revaluation of costs or layers incurred in taxable years preceding the transition period to the full absorption method of inventory costing as described in § 1.471–11(e), regardless of whether a taxpayer employed a cut-off method under those regulations. The difference between the inventory as originally valued using the former method (that is, the method from which the taxpayer is changing) and the inventory as revalued using the new method is equal to the amount of the adjustment required under section 481(a).

(ii) *Methods to revalue inventory.* There are three methods available to revalue inventory. The first method, the facts and circumstances revaluation method, may be used by all taxpayers. Under this method, a taxpayer determines the direct and indirect costs that must be assigned to each item of inventory based on all the facts and circumstances. This method is described in paragraph (c)(2)(iii) of this section. The second method, the weighted average method, is available only in certain situations to taxpayers using the FIFO inventory method or the specific goods LIFO inventory method. This method is described in paragraph (c)(2)(iv) of this section. The third method, the 3-year average method, is available to all taxpayers using the dollar-value LIFO inventory method of accounting. This method is described in paragraph (c)(2)(v) of this section. The weighted average method and the 3-year average method revalue inventory through processes of estimation and extrapolation, rather than based on the facts and circumstances of a particular year's data. All three methods are available regardless of whether the taxpayer elects to use a simplified method to capitalize costs under section 263A.

(iii) *Facts and circumstances revaluation method*—(A) *In general.* Under the facts and circumstances revaluation method, a taxpayer generally is required to revalue inventories by applying the capitalization rules of section 263A and the regulations thereunder to the production and resale activities of the taxpayer, with the same degree of specificity as required of inventory manufacturers under the law immediately prior to the effective date of the Tax Reform Act of 1986 (Pub. L. 99–514, 100 Stat. 2085, 1986–3 C.B. (Vol. 1)). Thus, for example, with respect to any prior year that is relevant in determining the total amount of the revalued balance as of the beginning of the year of change, the taxpayer must analyze the production and resale data for that particular year and apply the rules and principles of section 263A and the regulations thereunder to determine the appropriate revalued inventory costs. However, under the facts and circumstances revaluation method, a taxpayer may utilize reasonable estimates and procedures in valuing inventory costs if—

(*1*) The taxpayer lacks, and is not able to reconstruct from its books and records, actual financial and accounting data which is required to apply the capitalization rules of section 263A and the regulations thereunder to the relevant facts and circumstances surrounding a particular item of inventory or cost; and

(*2*) The total amounts of costs for which reasonable estimates and procedures are employed are not significant in comparison to the total restated value (including costs previously capitalized under the taxpayer's former method) of the items or costs for the period in question.

(B) *Exception.* A taxpayer that is not able to comply with the requirement of paragraph (c)(2)(iii)(A)(2) of this section because of the existence of a significant amount of costs that would require the use of estimates and procedures must revalue its inventories under the procedures provided in paragraph (c)(2) (iv) or (v) of this section.

(C) *Estimates and procedures allowed.* The estimates and procedures of this paragraph (c)(2)(iii) include—

(*1*) The use of available information from more recent years to estimate the amount and nature of inventory costs applicable to earlier years; and

(*2*) The use of available information with respect to comparable items of inventory produced or acquired during the same year in order to estimate the costs associated with other items of inventory.

(D) *Use by dollar-value LIFO taxpayers.* Generally, a dollar-value LIFO taxpayer must recompute its LIFO inventory for each taxable year that the LIFO inventory method was used.

(E) *Examples.* The provisions of this paragraph (c)(2)(iii) are illustrated by the following three examples. The principles set forth in these examples are applicable both to production and resale activities and the year of change in all three examples is 1997. The examples read as follows:

Example 1. Taxpayer X lacks information for the years 1993 and earlier, regarding the amount of costs incurred in transporting finished goods from X's factory to X's warehouse and in storing those goods at the warehouse until their sale to customers. X determines that, for 1994 and subsequent years, these transportation and storage costs constitute 4 percent of the total costs of comparable goods under X's method of accounting for such years. Under this paragraph (c)(2)(iii), X may assume that transportation and storage costs for the years 1993 and earlier constitute 4 percent of the total costs of such goods.

Example 2. Assume the same facts as in *Example 1,* except that for the year 1993 and earlier, X used a different method of accounting for inventory costs whereunder significantly fewer costs were capitalized than amounts capitalized in later years. Thus, the application of transportation and storage based on a percentage of costs for 1994 and later years would not constitute a reasonable estimate for use in earlier years. X may use the information from 1994 and later years, if appropriate adjustments are made to reflect the differences in inventory costs for the applicable years, including, for example—

(i) Increasing the percentage of costs that are intended to represent transportation and storage costs to reflect the aggregate differences in capitalized amounts under the two methods of accounting; or

(ii) Taking the absolute dollar amount of transportation and storage costs for comparable goods in inventory and applying that amount (adjusted for changes in general price levels, where appropriate) to goods associated with 1993 and prior periods.

Example 3. Taxpayer Z lacks information for certain years with respect to factory administrative costs, subject to capitalization under section 263A and the regulations thereunder, incurred in the production of inventory in factory A. Z does have sufficient information to determine factory administrative costs with respect to production of inventory in factory B, wherein inventory items were produced during the same years as factory A. Z may use the information from factory B to determine the appropriate amount of factory administrative costs to capitalize as inventory costs for comparable items produced in factory A during the same years.

(iv) *Weighted average method*—(A) *In general.* A taxpayer using the FIFO method or the specific goods LIFO method of accounting for inventories may use the weighted average method as provided in this paragraph (c)(2)(iv) to estimate the change in the amount of costs that must be allocated to inventories for prior years. The weighted average method under this paragraph (c)(2)(iv) is only available to a taxpayer that lacks sufficient data to revalue its inventory costs under the facts and circumstances revaluation method provided for in paragraph (c)(2)(iii) of this section. Moreover, a taxpayer that qualifies for the use of the weighted average method under this paragraph (c)(2)(iv) must utilize such method only with respect to items or costs for which it lacks sufficient information to revalue under the facts and circumstances revaluation method. Particular items or costs must be revalued under the facts and circumstances revaluation method if sufficient information exists to make such a revaluation. If a taxpayer lacks sufficient information to otherwise apply the weighted average method under this paragraph (c)(2)(iv) (for example, the taxpayer is unable to revalue the costs of any of its items in inventory due to a lack of information), then the taxpayer must use reasonable estimates and procedures, as described in the facts and circumstances revaluation method, to whatever extent is necessary to allow the taxpayer to apply the weighted average method.

(B) *Weighted average method for FIFO taxpayers*—(*1*) *In general.* This paragraph (c)(2)(iv)(B) sets forth the mechanics of the weighted average method as applicable to FIFO taxpayers. Under the weighted average method, an item in ending inventory for which sufficient data is not available for revaluation under section 263A and the regulations thereunder must be revalued by using the weighted average percentage increase or decrease with respect to such item for the earliest subsequent taxable year for which sufficient data is available. With respect to an item for which no subsequent data exists, such item must be revalued by using the weighted average percentage increase or decrease with respect to all reasonably comparable items in the taxpayer's inventory for the same year or the earliest subsequent taxable year for which sufficient data is available.

(*2*) *Example.* The provisions of this paragraph (c)(2)(iv)(B) are illustrated by the following example. The principles set forth in this example are applicable both to production and resale activities and the year of change in the example is 1997. The example reads as follows:

Example. Taxpayer A manufactures bolts and uses the FIFO method to identify inventories. Under A's former method, A did not capitalize all of the costs required to be capitalized under section 263A. A maintains inventories of bolts, two types of which it no longer produces. Bolt A was last produced in 1994. The revaluation of the costs of Bolt A under this section for bolts produced in 1994 results in a 20 percent increase of the costs of Bolt A. A portion of the inventory of Bolt A, however, is attributable to 1993. A does not have sufficient data for revaluation of the 1993 cost for Bolt A. With respect to Bolt A, A may apply the 20 percent increase determined for 1994 to the 1993 production as an acceptable estimate. Bolt B was last produced in 1992 and no data exists that would allow revaluation of the inventory cost of Bolt B. The inventories of all other bolts for which information is available are attributable to 1994 and 1995. Revaluation of the costs of these other bolts using available data results in an average increase in inventory costs of 15 percent for 1994 production. With respect to Bolt B, the overall 15 percent increase for A's inventory for 1994 may be used in revaluing the cost of Bolt B.

(C) *Weighted average method for specific goods LIFO taxpayers*—(*1*) *In general.* This paragraph (c)(2)(iv)(C) sets forth the mechanics of the weighted average method as applicable to LIFO taxpayers using the specific goods method of valuing inventories. Under the weighted average method, the inventory layers with respect to an item for which data is available are revalued under this section and the increase or decrease in amount for each layer is expressed as a percentage of change from the cost in the layer as originally valued. A weighted average of the percentage of change for all layers for each type of good is computed and applied to all earlier layers for each type of good that lack sufficient data to allow for revaluation. In the case of earlier layers for which sufficient data exists, such layers are to be revalued using actual data. In cases where sufficient data is not available to make a weighted average estimate with respect to a particular item of inventory, a weighted average increase or decrease is to be determined using all other inventory items revalued by the taxpayer in the same specific goods grouping. This percentage increase or decrease is then used to revalue the cost of the item for which data is lacking. If the taxpayer lacks sufficient data to revalue any of the inventory items contained in a specific goods grouping, then the weighted average increase or decrease of substantially similar items (as determined by principles similar to the rules applicable to dollar-value LIFO taxpayers in § 1.472–8(b)(3)) must be applied in the revaluation of the items in such grouping. If insufficient data exists with respect to all the items in a specific goods grouping and to all items that are substantially similar (or such items do not exist), then the weighted average for all revalued items in the taxpayer's inventory must be applied in revaluing items for which data is lacking.

(*2*) *Example.* The provisions of this paragraph (c)(2)(iv)(C) are illustrated by the following example. The principles set forth in this example are applicable both to production and resale activities and the year of change in the example is 1997. The example reads as follows:

Example. (i) Taxpayer M is a manufacturer that produces two different parts. Under M's former method, M did not capitalize all of the costs required to be capitalized under section 263A. Work-in-process inventory is recorded in terms of equivalent units of finished goods. M's records show the following at the end of 1996 under the specific goods LIFO inventory method:

LIFO Product and layer	Number	Cost	Carrying values
Product #1:			
1993	150	$5.00	$750
1994	100	6.00	600
1995	100	6.50	650
1996	50	7.00	350
			$2,350
Product #2:			
1993	200	$4.00	$800
1994	200	4.50	900
1995	100	5.00	500
1996	100	6.00	600
			2,800
Total carrying value of Products #1 and #2 under M's former method			5,150

(ii) M has sufficient data to revalue the unit costs of Product #1 using its new method for 1994, 1995 and 1996. These costs are: $7.00 in 1994, $7.75 in 1995, and $9.00 in 1996. This data for Product #1 results in a weighted average percentage change of 20.31 percent ((100×($7.00−$6.00))+(100×($7.75−$6.50))+(50×($9.00−$7.00)) divided by (100×$6.00)+(100×$6.50) + (50×$7.00)]. M has sufficient data to revalue the unit costs of Product #2 only in 1995 and 1996. These costs are: $6.00 in 1995 and $7.00 in 1996. This data for Product #2 results in a weighted average percentage change of 18.18 percent [(100×($6.00−$5.00))+(100×($7.00−$6.00)) divided by (100×$5.00)+(100×$6.00)].

(iii) M can estimate its revalued costs for Product #1 for 1993 by applying the weighted average increase computed for Product #1 (20.31 percent) to the unit costs originally carried on M's records for 1993 under M's former method. The estimated revalued unit cost of Product #1 would be $6.02 ($5.00×1.2031). M estimates its revalued costs for Product #2 for 1993 and 1994 in a similar fashion. M applies the weighted average increase determined for Product #2 (18.18 percent) to the unit costs of $4.00 and $4.50 for 1993 and 1994 respectively. The revalued unit costs of Product #2 are $4.73 for 1993 ($4.00×1.1818) and $5.32 for 1994 ($4.50×1.1818).

(iv) M's inventory would be revalued as follows:

LIFO product and layer	Number	Cost	Carrying values
Product #1:			
1993	150	$6.02	$903
1994	100	7.00	700
1995	100	7.75	775
1996	50	9.00	450
			$2,828
Product #2:			
1993	200	4.73	946
1994	200	5.32	1,064
1995	100	6.00	600
1996	100	7.00	700
			3,310
Total value of Products #1 and #2 as revalued under M's new method			6,138
Total amount of adjustment required under section 481(a) [$6,138 − $5,150]			988

(D) *Adjustments to inventory costs from prior years.* For special rules applicable when a revaluation using the weighted average method includes costs not incurred in prior years, see paragraph (c)(2)(v)(E) of this section.

(v) *3-year average method*—(A) *In general.* A taxpayer using the dollar-value LIFO method of accounting for inventories may revalue all existing LIFO layers of a trade or business based on the 3-year average method as provided in this paragraph (c)(2)(v). The 3-year average method is based on the average percentage change (the 3-year revaluation factor) in the current costs of inventory for each LIFO pool based on the three most recent taxable years for which the taxpayer has sufficient information (typically, the three most recent taxable years of such trade or business). The 3-year revaluation factor is applied to all layers for each pool in beginning inventory in the year of change. The 3-year average method is available to any dollar-value taxpayer that complies with the requirements of this paragraph (c)(2)(v) regardless of whether such taxpayer lacks sufficient data to revalue its inventory costs under the facts and circumstances revaluation method prescribed in paragraph (c)(2)(iii) of this section. The 3-year average method must be applied with respect to all inventory in a taxpayer's trade or business. A taxpayer is not permitted to apply the method for the revaluation of some, but not all, inventory costs on the basis of pools, business units, or other measures of inventory amounts that do not constitute a separate trade or business. Generally, a taxpayer revaluing its inventory using the 3-year average method must establish a new base year. See, paragraph (b)(2)(iii)(A)(*2*)(*i*) of this section. However, a dollar-value LIFO taxpayer using the 3-year average method and either the simplified production method or the simplified resale method to revalue its inventory is permitted, but not required, to establish a new base year. See, paragraph (b)(2)(iii)(A)(*2*)(*ii*) of this section. If a taxpayer lacks sufficient information to otherwise apply the 3-year average method under this paragraph (c)(2)(v) (for example, the taxpayer is unable to revalue the costs of any of its LIFO pools for three years due to a lack of information), then the taxpayer must use reasonable estimates and procedures, as described in the facts and circumstances revaluation method under paragraph (c)(2)(iii) of this section, to whatever extent is necessary to allow the taxpayer to apply the 3-year average method.

(B) *Consecutive year requirement.* Under the 3-year average method, if sufficient data is available to calculate the revaluation factor for more than three years, the taxpayer may use data from such additional years in determining the average percentage increase or decrease only if the additional years are consecutive to and prior to the year of change. The requirement under the preceding sentence to use consecutive years is applicable under this method regardless of whether any inventory costs in beginning inventory as of the year of change are viewed as incurred in, or attributable to, those consecutive years under the LIFO inventory method. Thus, the requirement to use data from consecutive years may result in using information from a year in which no LIFO increment occurred. For example, if a taxpayer is changing its method of accounting in 1997 and has sufficient data to revalue its inventory for the years 1991 through 1996, the taxpayer may calculate the revaluation factor using all six years. If, however, the taxpayer has sufficient data to revalue its inventory for the years 1990 through 1992, and 1994 through 1996, only the three years consecutive to the year of change, that is, 1994 through 1996, may be used in determining the revaluation factor. Similarly, for example, a taxpayer with LIFO increments in 1995, 1993, and 1992 may not calculate the revaluation factor based on the data from those years alone, but instead must use the data from consecutive years for which the taxpayer has information.

(C) *Example.* The provisions of this paragraph (c)(2)(v) are illustrated by the following example. The principles set forth in this example are applicable both to production and resale activities and the year of change in the example is 1997. The example reads as follows:

Example. (i) Taxpayer G, a calendar year taxpayer, is a reseller that is required to change its method of accounting under section 263A. G will not use either the simplified production method or the simplified resale method. G adopted the dollar-value LIFO inventory method in 1991, using a single pool and the double extension method. G's beginning LIFO inventory as of January 1, 1997, computed using its former method, for the year of change is as follows:

	Base year costs	Index	LIFO carrying value
Base layer	$14,000	1.00	$14,000
1991 layer	4,000	1.20	4,800
1992 layer	5,000	1.30	6,500
1993 layer	2,000	1.35	2,700
1994 layer	0	1.40	0
1995 layer	4,000	1.50	6,000
1996 layer	5,000	1.60	8,000
Total	34,000		42,000

(ii) G is able to recompute total inventoriable costs incurred under its new method for the three preceding taxable years as follows:

	Current cost as recorded (former method)	Current cost as adjusted (new method)	Percentage change
1994	$35,000	$45,150	.29
1995	43,500	54,375	.25
1996	54,400	70,720	.30
Total	132,900	170,245	.28

(iii) Applying the average revaluation factor of .28 to each layer, G's inventory is restated as follows:

	Restated base year costs	Index	Restated LIFO carrying value
Base layer	$17,920	1.00	$17,920
1991 layer	5,120	1.20	6,144
1992 layer	6,400	1.30	8,320
1993 layer	2,560	1.35	3,456
1994 layer	0	1.40	0
1995 layer	5,120	1.50	7,680
1996 layer	6,400	1.60	10,240
Total	43,520		53,760

(iv) The adjustment required by section 481(a) is $11,760. This amount may be computed by multiplying the average percentage of .28 by the LIFO carrying value of G's inventory valued using its former method ($42,000). Alternatively, the adjustment required by section 481(a) may be computed by the difference between—

(A) The revalued costs of the taxpayer's inventory under its new method ($53,760), and

(B) The costs of the taxpayer's inventory using its former method ($42,000).

(v) In addition, the inventory as of the first day of the year of change (January 1, 1997) becomes the new base year cost for purposes of determining the LIFO index in future years. See, paragraphs (b)(2)(iii)(A)(*2*)(*i*) and (b)(2)(iii)(B) of this section. This requires that layers in years prior to the base year be restated in terms of the new base year index. The current year cost of G's inventory, as adjusted, is $70,720. Such cost must be apportioned to each layer in proportion to the restated base year cost of that layer to total restated base year costs ($43,520), as follows:

	Restated base year costs	Restated index	Restated LIFO carrying value
Old base layer	$29,120	.615	$17,920
1991 layer	8,320	.738	6,144
1992 layer	10,400	.80	8,320
1993 layer	4,160	.831	3,456
1994 layer	0		0
1995 layer	8,320	.923	7,680
1996 layer	10,400	.985	10,240
Total	70,720		53,760

(D) *Short taxable years.* A short taxable year is treated as a full 12 months.

(E) *Adjustments to inventory costs from prior years*—(*1*) *General rule.* (*i*) The use of the revaluation factor, based on current costs, to estimate the revaluation of prior inventory layers under the 3-year average method, as described in paragraph (c)(2)(v) of this section, may result in an allocation of costs that include amounts attributable to costs not incurred during the year in which the layer arose. To the extent a taxpayer can demonstrate that costs that contributed to the determination of the revaluation factor could not have affected a prior year, the revaluation factor as applied to that year may be adjusted under the restatement adjustment procedure, as described in paragraph (c)(2)(v)(F) of this section. The determination that a cost could not have affected a prior year must be made by a taxpayer only upon showing that the type of cost incurred during the years used to calculate the revaluation factor (revaluation years) was not present during such prior year. An item of cost will not be eligible for the restatement adjustment procedure simply because the cost varies in amount from year to year or the same type of cost is described or referred to by a different name from year to year. Thus, the restatement adjustment procedure allowed under paragraph (c)(2)(v)(F) of this section is not available in a prior year with respect to a particular cost if the same type of cost was incurred both in the revaluation years and in such prior year, although the amount of such cost and the name or description thereof may vary.

(*ii*) The provisions of this paragraph (c)(2)(v)(E) are also applicable to taxpayers using the weighted average method in revaluing inventories under paragraph (c)(2)(iv) of this section. Thus, to the extent a taxpayer can demonstrate that costs that contributed to the determination of the restatement of a particular year or item could not have affected a prior year or item, the taxpayer may adjust the revaluation of that prior year or item accordingly under the weighted average method. All the requirements and definitions, however, applicable to the restatement adjustment procedure under this paragraph (c)(2)(v)(E) fully apply to a taxpayer using the weighted average method to revalue inventories.

(*2*) *Examples of costs eligible for restatement adjustment procedure.* The provisions of this paragraph (c)(2)(v)(E) are illustrated by the following four examples. The principles set forth in these examples are applicable both to production and resale activities and the year of change in the four examples is 1997. The examples read as follows:

Example 1. Taxpayer A is a reseller that introduced a defined benefit pension plan in 1994, and made the plan available to personnel whose labor costs were (directly or indirectly) properly allocable to resale activities. A determines the revaluation factor based on data available for the years 1994 through 1996, for which the pension plan was in existence. Based on these facts, the costs of the pension plan in the revaluation years are eligible for the restatement adjustment procedure for years prior to 1994.

Example 2. Assume the same facts as in *Example 1,* except that a defined contribution plan was available, during prior years, to personnel whose labor costs were properly allocable to resale activities. The defined contribution plan was terminated before the introduction of the defined benefit plan in 1994. Based on these facts, the costs of the defined benefit pension plan in the revaluation years are not eligible for the restatement adjustment procedure with respect to years for which the defined contribution plan existed.

Example 3. Taxpayer C is a manufacturer that established a security department in

1995 to patrol and safeguard its production and warehouse areas used in C's trade or business. Prior to 1995, C had not been required to utilize security personnel in its trade or business; C established the security department in 1995 in response to increasing vandalism and theft at its plant locations. Based on these facts, the costs of the security department are eligible for the restatement adjustment procedure for years prior to 1995.

Example 4. Taxpayer D is a reseller that established a payroll department in 1995 to process the company's weekly payroll. In the years 1991 through 1994, D engaged the services of an outside vendor to process the company's payroll. Prior to 1991, D's payroll processing was done by D's accounting department, which was responsible for payroll processing as well as for other accounting functions. Based on these facts, the costs of the payroll department are not eligible for the restatement adjustment procedure. D was incurring the same type of costs in earlier years as D was incurring in the payroll department in 1995 and subsequent years, although these costs were designated by a different name or description.

(F) *Restatement adjustment procedure*—(*1*) *In general.* (*i*) This paragraph (c)(2)(v)(F) provides a restatement adjustment procedure whereunder a taxpayer may adjust the restatement of inventory costs in prior taxable years in order to produce a different restated value than the value that would otherwise occur through application of the revaluation factor to such prior taxable years.

(*ii*) Under the restatement adjustment procedure as applied to a particular prior year, a taxpayer must determine the particular items of cost that are eligible for the restatement adjustment with respect to such prior year. The taxpayer must then recompute, using reasonable estimates and procedures, the total inventoriable costs that would have been incurred for each revaluation year under the taxpayer's former method and the taxpayer's new method by making appropriate adjustments in the data for such revaluation year to reflect the particular costs eligible for adjustment.

(*iii*) The taxpayer must then compute the total percentage change with respect to each revaluation year, using the revised estimates of total inventoriable costs for such year as described in paragraph (c)(2)(v)(F)(*1*)(*ii*) of this section. The percentage change must be determined by calculating the ratio of the revised total of the inventoriable costs for such revaluation year under the taxpayer's new method to the revised total of the inventoriable costs for such revaluation year under the taxpayer's former method.

(*iv*) An average of the resulting percentage change for all revaluation years is then calculated, and the resulting average is applied to the prior year in issue.

(*2*) *Examples of restatement adjustment procedure.* The provisions of this paragraph (c)(2)(v)(F) are illustrated by the following two examples. The principles set forth in these examples are applicable both to production and resale activities and the year of change in the two examples is 1997. The examples read as follows:

Example 1. Taxpayer A is a reseller that is eligible to make a restatement adjustment by reason of the costs of a defined benefit pension plan that was introduced in 1994, during the revaluation period. The revaluation factor, before adjustment of data to reflect the pension costs, is as provided in the example in paragraph (c)(2)(v)(C) of this section. Thus, for example, with respect to the year 1994, the total inventoriable costs under A's former method is $35,000, the total inventoriable costs under A's new method is $45,150, and the percentage change is .29. Under the method of accounting used by A during 1994 (the former method), none of the pension costs were included as inventoriable costs. Thus, under the restatement adjustment procedure, the total inventoriable cost under A's former method would remain at $35,000 if the pension plan had not been in existence. Similarly, A determines that the total inventoriable costs for 1994 under A's new method, if the pension plan had not been in existence, would have been $42,000. The restatement adjustment for 1994 determined under this paragraph (c)(2)(v)(F) would then be equal to .20 ([$42,000–$35,000]/$35,000). A would make similar calculations with respect to 1995 and 1996. The average of such amounts for each of the three years in the revaluation period would then be determined as in the example in paragraph (c)(2)(v)(C) of this section. Such average would be used to revalue cost layers for years for which the pension plan was not in existence. Such revalued layers would then be viewed as restated in compliance with the requirements of this paragraph. With respect to cost layers incurred during years for which the pension plan was in existence, no adjustment of the revaluation factor would occur.

Example 2. Assume the same facts as in *Example 1,* except that a portion of the pension costs were included as inventoriable costs under the method used by A during 1994 (the former method). Under the restatement adjustment procedure, A determines that the total inventoriable costs for 1994 under the former method, if the pension plan had not been in existence, would have been $34,000. Similarly, A determines that the total inventoriable costs for 1994 under A's new method, if the pension plan had not been in existence, would have been $42,000. The restatement adjustment for 1994 determined under this paragraph (c)(2)(v)(F) would then be equal to .24 ([$42,000–$34,000]/$34,000). A would make similar calculations with respect to 1995 and 1996. The average of such amounts for each of the three years in the revaluation period would then be determined as in the example in paragraph (c)(2)(v)(C) of this section. Such average would be used to revalue cost layers for years for which the pension plan was not in existence.

(3) *Intercompany items*—(i) *Revaluing intercompany transactions.* Pursuant to any change in method of accounting for costs subject to section 263A, taxpayers are required to revalue the amount of any intercompany item resulting from the sale or exchange of inventory property in an intercompany transaction to an amount equal to the intercompany item that would have resulted, had the cost of goods sold for that inventory property been determined under the taxpayer's new method. The requirement of the preceding sentence applies with respect to both inventory produced by a taxpayer and inventory acquired by the taxpayer for resale. In addition, the requirements of this paragraph (c)(3) apply only to any intercompany item of the taxpayer as of the beginning of the year of change in method of accounting. See § 1.1502–13(b)(2)(ii). A taxpayer must revalue the amount of any intercompany item only if the inventory property sold in the intercompany transaction is held as inventory by a buying member as of the date the taxpayer changes its method of accounting under section 263A. Corresponding changes to the adjustment required under section 481(a) must be made with respect to any adjustment of the intercompany item required under this paragraph (c)(3). Moreover, the requirements of this paragraph (c)(3) apply regardless of whether the taxpayer has any items in beginning inventory as of the year of change in method of accounting. See § 1.1502–13 for the definition of intercompany transaction.

(ii) *Example.* The provisions of this paragraph (c)(3) are illustrated by the following example. The principles set forth in this example are applicable both to production and resale activities and the year of change in the example is 1997. The example reads as follows:

Example. (i) Assume that S, a member of a consolidated group filing its federal income tax return on a calendar year, manufactures and sells inventory property to B, a member of the same consolidated group, in 1996. The sale between S and B is an intercompany transaction as defined under § 1.1502–13(b)(1). The gain from the intercompany transaction is an intercompany item to S under § 1.1502–13(b)(2). As of the beginning of the year of change in method of accounting (January 1, 1997), the inventory property is still held by B based on the particular inventory method of accounting used by B for federal income tax purposes (for example, the LIFO or FIFO inventory method). The property was sold by S to B in 1996 for $150; the cost of goods sold with respect to the property under the method in effect at the time the inventory was produced was $100, resulting in an intercompany item of $50 to S under § 1.1502–13. As of January 1, 1997, S still has an intercompany item of $50.

(ii) S is required to revalue the amount of its intercompany item to an amount equal to what the intercompany item would have been had the cost of goods sold for that inventory property been determined under S's new method. Assume that the cost of the inventory under this method would have been $110, had the method applied to S's manufacture of the property in 1996. Thus, S is required to revalue the amount of its intercompany item to $40 (that is, $150 less $110), necessitating a negative adjustment to the intercompany item of $10. Moreover, S is required to increase its adjustment under section 481(a) by $10 in order to prevent the omission of such amount by virtue of the decrease in the intercompany item.

(iii) *Availability of revaluation methods.* In revaluing the amount of any intercompany item resulting from the sale or exchange of inventory property in an intercompany transaction to an amount equal to the intercompany item that would have resulted had the cost of goods sold for that inventory property been determined under the taxpayer's new method, a taxpayer may use the other methods and procedures otherwise properly available to that particular taxpayer in revaluing inventory under section 263A and the regulations thereunder, including, if appropriate, the various simplified methods provided in section 263A and the regulations thereunder and the various procedures described in this paragraph (c).

(4) *Anti-abuse rule*—(i) *In general.* Section 263A(i)(1) provides that the Secretary shall prescribe such regulations as may be necessary or appropriate to carry out the purposes of section 263A, including regulations to prevent the use of related parties, pass-thru entities, or intermediaries to avoid the application of section 263A and the regulations thereunder. One way in which the application of section 263A and the regulations thereunder would be otherwise avoided is through the use of entities described in the preceding sentence in such a manner as to effectively avoid the necessity to restate beginning inventory balances under the change in method of accounting required or permitted under section 263A and the regulations thereunder.

(ii) *Deemed avoidance of this section*—(A) *Scope.* For purposes of this paragraph (c), the avoidance of the application of section 263A and the regulations thereunder will be deemed to occur if a taxpayer using the LIFO method of accounting for inventories, transfers inventory property to a related corporation in a transaction described in section 351, and such transfer occurs:

(*1*) On or before the beginning of the transferor's taxable year beginning in 1987; and

(*2*) After September 18, 1986.

(B) *General rule.* Any transaction described in paragraph (c)(4)(ii)(A) of this section will be treated in the following manner:

(*1*) Notwithstanding any provision to the contrary (for example, section 381), the transferee corporation is required to revalue the inventories acquired from the transferor under the provisions of this paragraph (c) relating to the change in method of accounting and the adjustment required by section 481(a), as if the inventories had never been transferred and were still in the hands of the transferor; and

(*2*) Absent an election as described in paragraph (c)(4)(iii) of this section, the transferee must account for the inventories acquired from the transferor by treating such inventories as if they were contained in the transferee's LIFO layer(s).

(iii) *Election to use transferor's LIFO layers.* If a transferee described in paragraph (c)(4)(ii) of this section so elects, the transferee may account for the inventories acquired from the transferor by allocating such inventories to LIFO layers corresponding to the layers to which such properties were properly allocated by the transferor, prior to their transfer. The transferee must account for such inventories for all subsequent periods with reference to such layers to which the LIFO costs were allocated. Any such election is to be made on a statement attached to the timely filed federal income tax return of the transferee for the first taxable year for which section 263A and the regulations thereunder applies to the transferee.

(iv) *Tax avoidance intent not required.* The provisions of paragraph (c)(4)(ii) of this section will apply to any transaction described therein, without regard to whether such transaction was consummated with an intention to avoid federal income taxes.

(v) *Related corporation.* For purposes of this paragraph (c)(4), a taxpayer is related to a corporation if—

(A) the relationship between such persons is described in section 267(b)(1), or

(B) such persons are engaged in trades or businesses under common control (within the meaning of paragraphs (a) and (b) of section 52).

(d) *Non-inventory property*—(1) *Need for adjustments.* A taxpayer that changes its method of accounting for costs subject to section 263A with respect to non-inventory property must revalue the non-inventory property on hand at the beginning of the year of change as set forth in paragraph (d)(2) of this section, and compute an adjustment under section 481(a). The adjustment under section 481(a) will equal the difference between the adjusted basis of the property as revalued using the taxpayer's new method and the adjusted basis of the property as originally valued using the taxpayer's former method.

(2) *Revaluing property.* A taxpayer must revalue its non-inventory property as of the beginning of the year of change in method of accounting. The facts and circumstances revaluation method of paragraph (c)(2)(iii) of this section must be used to revalue this property. In revaluing non-inventory property, however, the only additional section 263A costs that must be taken into account are those additional section 263A costs incurred after the later of December 31, 1986, or the date the taxpayer first becomes subject to section 263A, in taxable years ending after that date. See §1.263A–1(d)(3) for the definition of additional section 263A costs.

[T.D. 8728, 62 FR 42054, Aug. 5, 1997]

§1.263A–8 Requirement to capitalize interest.

(a) *In general*—(1) *General rule.* Capitalization of interest under the avoided cost method described in §1.263A–9 is required with respect to the production of designated property described in paragraph (b) of this section.

(2) *Treatment of interest required to be capitalized.* In general, interest that is capitalized under this section is treated as a cost of the designated property and is recovered in accordance with §1.263A–1(c)(4). Interest capitalized by reason of assets used to produce designated property (within the meaning of §1.263A–11(d)) is added to the basis of the designated property rather than the bases of the assets used to produce the designated property. Interest capitalized with respect to designated property that includes both components subject to an allowance for depreciation or depletion and components not subject to an allowance for depreciation or depletion is ratably allocated among, and is treated as a cost of, components that are subject to an allowance for depreciation or depletion.

(3) *Methods of accounting under section 263A(f).* Except as otherwise provided, methods of accounting and other computations under §§1.263A–8 through 1.263A–15 are applied on a taxpayer, as opposed to a separate and distinct trade or business, basis.

(4) *Special definitions*—(i) *Related person.* Except as otherwise provided, for purposes of §§1.263A–8 through 1.263A–15, a person is related to a taxpayer if their relationship is described in section 267(b) or 707(b).

(ii) *Placed in service.* For purposes of §§1.263A–8 through 1.263A–15, *placed in service* has the same meaning as set forth in §1.46–3(d).

(b) *Designated property*—(1) *In general.* Except as provided in paragraphs (b)(3) and (b)(4) of this section, *designated property* means any property that is produced and that is either:

(i) Real property; or

(ii) Tangible personal property (as defined in §1.263A–2(a)(2)) which meets any of the following criteria:

(A) Property with a class life of 20 years or more under section 168 (long-lived property), but only if the property is not property described in section 1221(l) in the hands of the taxpayer or a related person,

(B) Property with an estimated production period (as defined in §1.263A–12) exceeding 2 years (2-year property), or

(C) Property with an estimated production period exceeding 1 year and an estimated cost of production exceeding $1,000,000 (1-year property).

(2) *Special rules*—(i) *Application of thresholds.* The thresholds described in paragraphs (b)(l)(ii)(A), (B), and (C) of this section are applied separately for each unit of property (as defined in §1.263A–10).

(ii) *Relevant activities and costs.* For purposes of determining whether property is designated property, all activities and costs are taken into account if they are performed or incurred by, or for, the taxpayer or any related persons and they directly benefit or are incurred by reason of the production of the property.

(iii) *Production period and cost of production.* For purposes of applying the classification thresholds under paragraphs (b)(l)(ii) (B) and (C) of this section to a unit of property, the taxpayer is required, at the beginning of the production period, to reasonably estimate the production period and the total cost of production for the unit of property. The taxpayer must maintain contemporaneous written records supporting the estimates and classification. If the estimates are reasonable based on the facts in existence at the beginning of the production period, the taxpayer's classification of the property is not modified in subsequent periods, even if the actual length of the production period or the actual cost of production differs from the estimates. To be considered reasonable, estimates of the production period and the total cost of production must include anticipated expense and time for delay, rework, change orders, and technological, design or other problems. To the extent that several distinct activities related to the production of the property are expected to occur simultaneously, the period during which these distinct activities occur is not counted more than once. The bases of assets used to produce a unit of property (within the meaning of §1.263A–11(d)) and any interest that would be required to be capitalized if a unit of property were designated property are disregarded in making estimates of the total cost of production for purposes of this paragraph (b)(2)(iii).

(3) *Excluded property*. Designated property does not include:

(i) Timber and evergreen trees that are more than 6 years old when severed from the roots, or

(ii) Property produced by the taxpayer for use by the taxpayer other than in a trade or business or an activity conducted for profit.

(4) *De minimis rule*—(i) *In general.* Designated property does not include property for which—

(A) The production period does not exceed 90 days; and

(B) The total production expenditures do not exceed $1,000,000 divided by the number of days in the production period.

(ii) *Determination of total production expenditures.* For purposes of determining whether the condition of paragraph (b)(4)(i)(B) of this section is met with respect to property, the cost of land, the adjusted basis of property used to produce property, and interest that would be capitalized with respect to property if it were designated property are excluded from total production expenditures.

(c) *Definition of real property*—(1) *In general.* Real property includes land, unsevered natural products of land, buildings, and inherently permanent structures. Any interest in real property of a type described in this paragraph (c), including fee ownership, co-ownership, a leasehold, an option, or a similar interest is real property under this section. Real property includes the structural components of both buildings and inherently permanent structures, such as walls, partitions, doors, wiring, plumbing, central air conditioning and heating systems, pipes and ducts, elevators and escalators, and other similar property. Tenant improvements to a building that are inherently permanent or otherwise classified as real property within the meaning of this paragraph (c)(1) are real property under this section. However, property produced for sale that is not real property in the hands of the taxpayer or a related person, but that may be incorporated into real property by an unrelated buyer, is not treated as real property by the producing taxpayer (e.g., bricks, nails, paint, and windowpanes).

(2) *Unsevered natural products of land.* Unsevered natural products of land include growing crops and plants, mines, wells, and other natural deposits. Growing crops and plants, however, are real property only if the preproductive period of the crop or plant exceeds 2 years.

(3) *Inherently permanent structures.* Inherently permanent structures include property that is affixed to real property and that will ordinarily remain affixed for an indefinite period of time, such as swimming pools, roads, bridges, tunnels, paved parking areas and other pavements, special foundations, wharves and docks, fences, inherently permanent advertising displays, inherently permanent outdoor lighting facilities, railroad tracks and signals, telephone poles, power generation and transmission facilities, permanently installed telecommunications cables, broadcasting towers, oil and gas pipelines, derricks and storage equipment, grain storage bins and silos. For purposes of this section, affixation to real property may be accomplished by weight alone. Property may constitute an inherently permanent structure even though it is not classified as a building for purposes of former section

48(a)(1)(B) and § 1.48–1. Any property not othewise described in this paragraph (c)(3) that constitutes other tangible property under the principles of former section 48(a)(1)(B) and § 1.48–1(d) is treated for the purposes of this section as an inherently permanent structure.

(4) *Machinery*—(i) *Treatment.* A structure that is property in the nature of machinery or is essentially an item of machinery or equipment is not an inherently permanent structure and is not real property. In the case, however, of a building or inherently permanent structure that includes property in the nature of machinery as a structural component, the property in the nature of machinery is real property.

(ii) *Certain factors not determinative.* A structure may be an inherently permanent structure, and not property in the nature of machinery or essentially an item of machinery, even if the structure is necessary to operate or use, supports, or is otherwise associated with, machinery.

(d) *Production*—(1) *Definition of produce. Produce* is defined as provided in section 263A(g) and § 1.263A–2(a)(1)(i).

(2) *Property produced under a contract*—(i) *Customer.* A taxpayer is treated as producing any property that is produced for the taxpayer (the customer) by another party (the contractor) under a contract with the taxpayer or an intermediary. Property produced under a contract is designated property to the customer if it is real property or tangible personal property that satisfies the classification thresholds described in paragraph (b)(1)(ii) of this section. If property produced under a contract will become part of a unit of designated property produced by the customer in the customer's hands, the property produced under the contract is designated property to the customer.

(ii) *Contractor.* Property produced under a contract is designated property to the contractor if it is real property, 2-year property, or 1-year property and the property produced under the contract is not excluded by reason of paragraph (d)(2)(v) of this section.

(iii) *Definition of a contract.* For purposes of this paragraph (d)(2), *contract* has the same meaning as under § 1.263A–2(a)(1)(ii)(B)(*2*).

(iv) *Determination of whether thresholds are satisfied.* In the case of tangible personal property produced under a contract, the customer and the contractor each determine under this paragraph (d)(2), whether the property satisfies the classification thresholds described in paragraph (b)(1)(ii) of this section. Thus, tangible personal property may be designated property with respect to either, or both, the customer and the contractor. The provisions of paragraph (b)(2)(iii) of this section are modified as set forth in this paragraph (d)(2)(iv) for purposes of determining whether tangible personal property produced under a contract is 2-year property or 1-year property.

(A) *Customer.* In determining a customer's estimated cost of production, the customer takes into account costs and payments that are reasonably expected to be incurred by the customer, but does not take into account costs incurred (or to be incurred) by an unrelated contractor. In determining the customer's estimated length of the production period, the production period is treated as beginning on the earlier of the date the contract is executed or the date that the customer's accumulated production expenditures for the unit are at least 5 percent of the customer's total estimated production expenditures for the unit. The customer, however, may elect to treat the production period as beginning on the date the sum of the accumulated production expenditures of the contractor (or contractors if more than one contractor is producing components for the unit of property) and of the customer are at least 5 percent of the customer's estimated production expenditures for the unit.

(B) *Contractor.* In determining a contractor's estimated cost of production, the contractor takes into account only the costs that are reasonably expected to be incurred by the contractor, without any reduction for payments from the customer. In determining the contractor's estimated length of the production period, the production period is treated as beginning on the date the contractor's accumulated production expenditures (without any reduction for payments from the customer) are at least 5 percent of the contractor's total estimated accumulated production expenditures.

(v) *Exclusion for property subject to long-term contract rules.* Property described in paragraph (b) of this section is designated property with respect to a contractor only if—

(A) The contract is not a long-term contract (within the meaning of section 460(f)); or

(B) The contract is a home construction contract (within the meaning of section 460(e)(6)(A)) with respect to which the requirements of section 460(e)(1)(B) (i) and (ii) are not met.

(3) *Improvements to existing property*—(i) *In general.* Any improvement to property described in §1.263(a)–1(b) constitutes the production of property. Generally, any improvement to designated property constitutes the production of designated property. An improvement is not treated as the production of designated property, however, if the de minimis exception described in paragraph (b)(4) of this section applies to the improvement. In addition, paragraph (d)(3)(iii) of this section provides an exception for certain improvements to tangible personal property. Incidental maintenance and repairs are not treated as improvements under this paragraph (d)(3). See §1.162–4.

(ii) *Real property.* The rehabilitation or preservation of a standing building, the clearing of raw land prior to sale, and the drilling of an oil well are activities constituting improvements to real property and, therefore, the production of designated property. Similarly, the demolition of a standing building generally constitutes an activity that is an improvement to real property and, therefore, the production of designated property. See the exceptions, however, in paragraphs (b)(3) and (b)(4) of this section.

(iii) *Tangible personal property.* If the taxpayer has treated a unit of tangible personal property as designated property under this section, an improvement to such property constitutes the production of designated property regardless of the remaining useful life of the improved property (or the improvement) and, except as provided in paragraph (b)(4) of this section, regardless of the estimated length of the production period or the estimated cost of the improvement. If the taxpayer has not treated a unit of tangible personal property as designated property under this section, an improvement to such property constitutes the production of designated property only if the improvement independently meets the classification thresholds described in paragraph (b)(1)(ii) of this section.

[T.D. 8584, 59 FR 67198, Dec. 29, 1994; 60 FR 16574, Mar. 31, 1995]

§1.263A–9 The avoided cost method.

(a) *In general*—(1) *Description.* The avoided cost method described in this section must be used to calculate the amount of interest required to be capitalized under section 263A(f). Generally, any interest that the taxpayer theoretically would have avoided if accumulated production expenditures (as defined in §1.263A–11) had been used to repay or reduce the taxpayer's outstanding debt must be capitalized under the avoided cost method. The application of the avoided cost method does not depend on whether the taxpayer actually would have used the amounts expended for production to repay or reduce debt. Instead, the avoided cost method is based on the assumption that debt of the taxpayer would have been repaid or reduced without regard to the taxpayer's subjective intentions or to restrictions (including legal, regulatory, contractual, or other restrictions) against repayment or use of the debt proceeds.

(2) *Overview*—(i) *In general.* For each unit of designated property (within the meaning of §1.263A–8(b)), the avoided cost method requires the capitalization of—

(A) The traced debt amount under paragraph (b) of this section, and

(B) The excess expenditure amount under paragraph (c) of this section.

(ii) *Rules that apply in determining amounts.* The traced debt and excess expenditure amounts are determined for each taxable year or shorter computation period that includes the production period (as defined in §1.263A–12) of a unit of designated property. Paragraph (d) of this section provides an election not to trace debt to specific units of designated property. Paragraph (f) of this section provides rules for selecting the computation period, for calculating averages, and for determining measurement dates within the computation period. Special rules are in paragraph (g) of this section.

(3) *Definitions of interest and incurred.* Except as provided in the case of certain expenses that are treated as a substitute for interest under paragraphs (c)(2)(iii) and (g)(2)(iv) of this section, *interest* refers to all amounts that are characterized as interest expense under any provision of the Code, including, for example, sections 482, 483, 1272, 1274, and 7872. *Incurred* refers to the amount of interest that is properly accruable during the period of time in question determined by taking into account the loan agreement and any applicable provisions of the Internal Revenue laws and regulations such as section 163, § 1.446–2, and sections 1271 through 1275.

(4) *Definition of eligible debt.* Except as provided in this paragraph (a)(4), *eligible debt* includes all outstanding debt (as evidenced by a contract, bond, debenture, note, certificate, or other evidence of indebtedness). Eligible debt does not include—

(i) Debt (or the portion thereof) bearing interest that is disallowed under a provision described in § 1.163–8T(m)(7)(ii);

(ii) Debt, such as accounts payable and other accrued items, that bears no interest, except to the extent that such debt is traced debt (as defined in paragraph (b)(2) of this section);

(iii) Debt that is borrowed directly or indirectly from a person related to the taxpayer and that bears a rate of interest that is less than the applicable Federal rate in effect under section 1274(d) on the date of issuance;

(iv) Debt (or the portion thereof) bearing personal interest within the meaning of section 163(h)(2);

(v) Debt (or the portion thereof) bearing qualified residence interest within the meaning of section 163(h)(3);

(vi) Debt incurred by an organization that is exempt from Federal income tax under section 501(a), except to the extent interest on such debt is directly attributable to an unrelated trade or business of the organization within the meaning of section 512;

(vii) Reserves, deferred tax liabilities, and similar items that are not treated as debt for Federal income tax purposes, regardless of the extent to which the taxpayer's applicable financial accounting or other regulatory reporting principles require or support treating these items as debt; and

(viii) Federal, State, and local income tax liabilities, deferred tax liabilities under section 453A, and hypothetical tax liabilities under the look-back method of section 460(b) or similar provisions.

(b) *Traced debt amount*—(1) *General rule.* Interest must be capitalized with respect to a unit of designated property in an amount (the traced debt amount) equal to the total interest incurred on the traced debt during each measurement period (as defined in paragraph (f)(2)(ii) of this section) that ends on a measurement date described in paragraph (f)(2)(iii) of this section. See the example in paragraph (b)(3) of this section. If any interest incurred on the traced debt is not taken into account for the taxable year that includes the measurement period because of a deferral provision, see paragraph (g)(2) of this section for the time and manner for capitalizing and recovering that amount. This paragraph (b)(1) does not apply if the taxpayer elects under paragraph (d) of this section not to trace debt.

(2) *Identification and definition of traced debt.* On each measurement date described in paragraph (f)(2)(iii) of this section, the taxpayer must identify debt that is traced debt with respect to a unit of designated property. On each such date, traced debt with respect to a unit of designated property is the outstanding eligible debt (as defined in paragraph (a)(4) of this section) that is allocated, on that date, to accumulated production expenditures with respect to the unit of designated property under the rules of § 1.163–8T. Traced debt also includes unpaid interest that has been capitalized with respect to such unit under paragraph (b)(1) of this section and that is included in accumulated production expenditures on the measurement date.

(3) *Example.* The provisions of paragraphs (b)(1) and (b)(2) of this section

are illustrated by the following example.

Example. Corporation X, a calendar year taxpayer, is engaged in the production of a single unit of designated property during 1995 (unit A). Corporation X adopts a taxable year computation period and quarterly measurement dates. Production of unit A starts on January 14, 1995, and ends on June 16, 1995. On March 31, 1995 and on June 30, 1995, Corporation X has outstanding a $1,000,000 loan that is allocated under the rules of §1.163–8T to production expenditures with respect to unit A. During the period January 1, 1995, through June 30, 1995, Corporation X incurs $50,000 of interest related to the loan. Under paragraph (b)(1) of this section, the $50,000 of interest Corporation X incurs on the loan during the period January 1, 1995, through June 30, 1995, must be capitalized with respect to unit A.

(c) *Excess expenditure amount*—(1) *General rule.* If there are accumulated production expenditures in excess of traced debt with respect to a unit of designated property on any measurement date described in paragraph (f)(2)(iii) of this section, the taxpayer must, for the computation period that includes the measurement date, capitalize with respect to this unit the excess expenditure amount calculated under this paragraph (c)(1). However, if the sum of the excess expenditure amounts for all units of designated property of a taxpayer exceeds the total interest described in paragraph (c)(2) of this section, only a prorata amount (as determined under paragraph (c)(7) of this section) of such interest must be capitalized with respect to each unit. For each unit of designated property, the excess expenditure amount for a computation period equals the product of—

(i) The average excess expenditures (as determined under paragraph (c)(5)(ii) of this section) for the unit of designated property for that period, and

(ii) The weighted average interest rate (as determined under paragraph (c)(5)(iii) of this section) for that period.

(2) *Interest required to be capitalized.* With respect to an excess expenditure amount, interest incurred during the computation period is capitalized from the following sources and in the following sequence but not in excess of the excess expenditure amount for all units of designated property:

(i) Interest incurred on nontraced debt (as defined in paragraph (c)(5)(i) of this section);

(ii) Interest incurred on borrowings described in paragraph (a)(4)(iii) of this section (relating to certain borrowings from related persons); and

(iii) In the case of a partnership, guaranteed payments for the use of capital (within the meaning of section 707(c)) that would be deductible by the partnership if section 263A(f) did not apply.

(3) *Example.* The provisions of paragraph (c)(1) and (2) of this section are illustrated by the following example.

Example. (i) P, a partnership owned equally by Corporation A and Individual B, is engaged in the construction of an office building during 1995. Average excess expenditures for the office building for 1995 are $2,000,000. When P was formed, A and B agreed that A would be entitled to an annual guaranteed payment of $70,000 in exchange for A's capital contribution. The only borrowing of P, A, and B for 1995 is a loan to P from an unrelated lender of $1,000,000 (loan #1). The loan is nontraced debt and bears interest at an annual rate of 10 percent. Thus, P's weighted average interest rate (determined under paragraph (c)(5)(iii) of this section) is 10 percent and interest incurred during 1995 is $100,000.

(ii) In accordance with paragraph (c)(1) of this section, the excess expenditure amount is $200,000 ($2,000,000 × 10%). The interest capitalized under paragraph (c)(2) of this section is $170,000 ($100,000 of interest plus $70,000 of guaranteed payments).

(4) *Treatment of interest subject to a deferral provision.* If any interest described in paragraph (c)(2) of this section is not taken into account for the taxable year that includes the computation period because of a deferral provision described in paragraph (g)(1)(ii) of this section, paragraph (c)(2) of this section is first applied without regard to the amount of the deferred interest. After applying paragraph (c)(2) without regard to the deferred interest, if the amount of interest capitalized with respect to all units of designated property for the computation period is less than the amount that would have been capitalized if a deferral provision did not apply, see paragraph (g)(2) of this section for the time and manner for capitalizing and

recovering the difference (the shortfall amount).

(5) *Definitions*—(i) *Nontraced debt*—(A) *Defined. Nontraced debt* means all eligible debt on a measurement date other than any debt that is treated as traced debt with respect to any unit of designated property on that measurement date. For example, nontraced debt includes eligible debt that is allocated to expenditures that are not capitalized under section 263A(a) (*e.g.*, expenditures deductible under section 174(a) or 263(c)). Similarly, even if eligible debt is allocated to a production expenditure for a unit of designated property, the debt is included in nontraced debt on measurement dates before the first or after the last measurement date for that unit of designated property. Thus, nontraced debt may include debt that was previously treated as traced debt or that will be treated as traced debt on a future measurement date.

(B) *Example.* The provisions of paragraph (c)(5)(i)(A) of this section are illustrated by the following example.

Example. In 1995, Corporation X begins, but does not complete, the construction of two office buildings that are separate units of designated property as defined in § 1.263A–10 (Property D and Property E). At the beginning of 1995, X borrows $2,500,000 (the $2,500,000 loan), which will be used exclusively to finance production expenditures for Property D. Although interest is paid currently, the entire principal amount of the loan remains outstanding at the end of 1995. Corporation X also has outstanding during all of 1995 a long-term loan with a principal amount of $2,000,000 (the $2,000,000 loan). The proceeds of the $2,000,000 loan were used exclusively to finance the production of Property C, a unit of designated property that was completed in 1994. Under the rules of paragraph (b)(2) of this section, the portion of the $2,500,000 loan allocated to accumulated production expenditures for property D at each measurement date during 1995 is treated as traced debt for that measurement date. The excess, if any, of $2,500,000 over the amount treated as traced debt at each measurement date during 1995 is treated as nontraced debt for that measurement date, even though it is expected that the entire $2,500,000 will be treated as traced debt with respect to Property D on subsequent measurement dates as more of the proceeds of the loan are used to finance additional production expenditures. In addition, the entire principal amount of the $2,000,000 loan is treated as nontraced debt for 1995, even though it was treated as traced debt with respect to Property C in a previous period.

(ii) *Average excess expenditures*—(A) *General rule.* The average excess expenditures for a unit of designated property for a computation period are computed by—

(*1*) Determining the amount (if any) by which accumulated production expenditures exceed traced debt at each measurement date during the computation period; and

(*2*) Dividing the sum of these amounts by the number of measurement dates during the computation period.

(B) *Example.* The provisions of paragraph (c)(5)(ii)(A) of this section are illustrated by the following example.

Example. Corporation X, a calendar year taxpayer, is engaged in the production of a single unit of designated property during 1995 (unit A). Corporation X adopts the taxable year as the computation period and quarterly measurement dates. The production period for unit A begins on January 14, 1995, and ends on June 16, 1995. On March 31, 1995, and on June 30, 1995, Corporation X has outstanding $1,000,000 of traced debt with respect to unit A. Accumulated production expenditures for unit A on March 31, 1995, are $1,400,000 and on June 30, 1995, are $1,600,000. Accumulated production expenditures in excess of traced debt for unit A on March 31, 1995, are $400,000 and on June 30, 1995, are $600,000. Average excess expenditures for unit A during 1995 are therefore $250,000 ([$400,000 + $600,000 + $0 +$0] ÷ 4).

(iii) *Weighted average interest rate*—(A) *Determination of rate.* The weighted average interest rate for a computation period is determined by dividing interest incurred on nontraced debt during the period by average nontraced debt for the period.

(B) *Interest incurred on nontraced debt.* Interest incurred on nontraced debt during the computation period is equal to the total amount of interest incurred during the computation period on all eligible debt minus the amount of interest incurred during the computation period on traced debt. Thus, all interest incurred on nontraced debt during the computation period is included in the numerator of the weighted average interest rate, even if the underlying nontraced debt is repaid before the end of a measurement period and excluded from nontraced debt outstanding for measurement dates after repayment, in determining the denominator of the weighted average interest rate. However, see paragraph (g)(7) of this section for an election to treat eligible debt that is repaid within the 15-day period immediately preceding a quarterly measurement date as outstanding on that measurement date. See paragraph (a)(3) of this section for the definitions of interest and incurred.

(C) *Average nontraced debt.* The average nontraced debt for a computation period is computed by—

(*1*) Determining the amount of nontraced debt outstanding on each measurement date during the computation period; and

(*2*) Dividing the sum of these amounts by the number of measurement dates during the computation period.

(D) *Special rules if taxpayer has no nontraced debt or rate is contingent.* If the taxpayer does not have nontraced debt outstanding during the computation period, the weighted average interest rate for purposes of applying paragraphs (c)(1) and (c)(2) of this section is the highest applicable Federal rate in effect under section 1274(d) during the computation period. If interest is incurred at a rate that is contingent at the time the return for the year that includes the computation period is filed, the amount of interest is determined using the higher of the fixed rate of interest (if any) on the underlying debt or the applicable Federal rate in effect under section 1274(d) on the date of issuance.

(6) *Examples.* The following examples illustrate the principles of this paragraph (c):

Example 1. (i) W, a calendar year taxpayer, is engaged in the production of a unit of designated property during 1995. For purposes of applying the avoided cost method of this section, W uses the taxable year as the computation period. During 1995, W's only debt is a $1,000,000 loan bearing interest at a rate of 7 percent from Y, a person that is related to W. Assuming the applicable Federal rate in effect under section 1274(d) on the date of issuance of the loan is 10 percent, the loan is not eligible debt under paragraph (a)(4) of this section. However, even though W has no eligible debt, W incurs $70,000 ($1,000,000×7%) of interest during the computation period. This interest is described in paragraph (c)(2) of this section and must be capitalized under paragraph (c)(1) of this section to the extent it does not exceed W's excess expenditure amount for the unit of property.

(ii) W determines, under paragraph (c)(5)(ii) of this section, that average excess expenditures for the unit of property are $600,000. Assuming the highest applicable Federal rate in effect under section 1274(d) during the computation period is 10 percent, W uses 10 percent as the weighted average interest rate for purposes of determining the excess expenditure amount. See paragraph (c)(5)(iii)(D) of this section. In accordance with paragraph (c)(1) of this section, the excess expenditure amount is therefore $60,000. Because this amount does not exceed the total amount of interest described in paragraph (c)(2) of this section ($70,000), W is required to capitalize $60,000 of interest with respect to the unit of designated property for the 1995 computation period.

Example 2. (i) Corporation X, a calendar year taxpayer, is engaged in the production of a single unit of designated property during 1955 (unit A). Corporation X adopts the taxable year as the computation period and quarterly measurement dates. Production of unit A begins in 1994 and ends on June 30, 1995. On March 31, 1995, and on June 30, 1995, Corporation X has outstanding $1,000,000 of eligible debt (loan #1) that is allocated under the rules of §1.163–8T to production expenditures for unit A. During each of the first two quarters of 1995, $30,000 of interest is incurred on loan #1. The loan is repaid on July 1, 1995. Throughout 1995, Corporation X also has outstanding $2,000,000 of eligible debt (loan #2) which is not allocated under the rules of §1.163–8T to the production of unit A. During 1995, $200,000 of interest is incurred on this nontraced debt. Accumulated production expenditures on March 31, 1995, are $1,400,000 and on June 30, 1995, are $1,600,000. Accumulated production expenditures in excess of traced debt on March 31, 1995, are $400,000 and on June 30, 1995, are $600,000.

(ii) Under paragraph (b)(1) of this section, the amount of interest capitalized with respect to traced debt is $60,000 ($30,000 for the measurement period ending March 31, 1995, and $30,000 for the measurement period ending June 30, 1995). Under paragraph (c)(5)(ii) of this section, average excess expenditures for unit A are $250,000 ([($1,400,000 − $1,000,000) + ($1,600,000 − $1,000,000) + $0 + $0]÷4). Under paragraph (c)(5)(iii)(C) of this section, average nontraced debt is $2,000,000 ([$2,000,000 + $2,000,000 + $2,000,000 + $2,000,000]÷4). Under paragraph (c)(5)(iii)(B) of this section, interest incurred on nontraced debt is $200,000 ($260,000 of interest incurred on all eligible debt less $60,000 of interest incurred on traced debt). Under paragraph (c)(5)(iii)(A) of this section, the weighted average interest rate is 10 percent ($200,000÷$2,000,000). Under paragraph (c)(1) of this section, Corporation X capitalizes the excess expenditure amount of $25,000 ($250,000×10%), because it does not exceed the total amount of interest subject to capitalization under paragraph (c)(2) of this section ($200,000). Thus, the total interest capitalized with respect to unit A during 1995 is $85,000 ($60,000+$25,000).

(7) *Special rules where the excess expenditure amount exceeds incurred interest*—(i) *Allocation of total incurred interest to units.* For a computation period in which the sum of the excess expenditure amounts under paragraph (c)(1) of this section for all units of designated property exceeds the total amount of interest (including deferred interest) available for capitalization, as determined under paragraph (c)(2) of this section, the amount of interest that is allocated to a unit of designated property is equal to the product of—

(A) The total amount of interest (including deferred interest) available for capitalization, as determined under paragraph (c)(2) of this section; and

(B) A fraction, the numerator of which is the average excess expenditures for the unit of designated property and the denominator of which is the sum of the average excess expenditures for all units of designated property.

(ii) *Application of related person rules to average excess expenditure.* Certain excess expenditures must be taken into account by the persons (if any) required to capitalize interest with respect to production expenditures of the taxpayer under applicable related person rules. For each computation period, the amount of average excess expenditures that must be taken into account by such persons for each unit of the taxpayer's property is computed by—

(A) Determining, for the computation period, the amount (if any) by which the excess expenditure amount for the unit exceeds the amount of interest allocated to the unit under paragraph (c)(7)(i) of this section; and

(B) Dividing the excess by the weighted average interest rate for the period.

(iii) *Special rule for corporations.* If a corporation is related to another person for the purposes of the applicable related party rules, the District Director upon examination may require that the corporation apply this paragraph (c)(7) and other provisions of the regulations by excluding deferred interest from the total interest available for capitalization.

(d) *Election not to trace debt*—(1) *General rule.* Taxpayers may elect not to trace debt. If the election is made, the average excess expenditures and weighted average interest rate under paragraph (c)(5) of this section are determined by treating all eligible debt as nontraced debt. For this purpose, debt specified in paragraph (a)(4)(ii) of this section (e.g., accounts payable) may be included in eligible debt, provided it would be treated as traced debt but for an election under this paragraph (d). The election not to trace debt is a method of accounting that applies to the determination of capitalized interest for all designated property of the taxpayer. The making or revocation of the election is a change in method of accounting requiring the consent of the Commissioner under section 446(e) and § 1.446–1(e).

(2) *Example.* The provisions of paragraph (d)(1) of this section are illustrated by the following example.

Example. (i) Corporation X, a calendar year taxpayer, is engaged in the production of a single unit of designated property during 1995 (unit A). Corporation X adopts the taxable year as the computation period and quarterly measurement dates. At each measurement date (March 31, June 30, September 30, and December 31) Corporation X has the following outstanding indebtedness:

Noninterest-bearing accounts payable traced to unit A	$100,000
Noninterest-bearing accounts payable that are not traced to unit A	$300,000
Interest-bearing loans that are eligible debt within the meaning of paragraph (a)(4) of this section	$900,000

(ii) Corporation X elects under this paragraph (d) not to trace debt. Eligible debt at each measurement date for purposes of calculating the weighted average interest rate under paragraph (c)(5)(iii) of this section is $1,000,000 ($100,000 + $900,000).

(e) *Election to use external rate*—(1) *In general.* An eligible taxpayer may elect to use the highest applicable Federal rate (AFR) under section 1274(d) in effect during the computation period plus 3 percentage points (AFR plus 3) as a substitute for the weighted average interest rate determined under paragraph (c)(5)(iii) of this section. A taxpayer that makes this election may not trace debt. The use of the AFR plus 3 as provided under this paragraph (e)(1) constitutes a method of accounting. A taxpayer makes the election to use the AFR plus 3 method by using the AFR plus 3 as the taxpayer's weighted average interest rate, and any change to the AFR plus 3 method by a taxpayer that has never previously used the method does not require the consent of the Commissioner. Any other change to or from the use of the AFR plus 3 method under this paragraph (e)(1) (other than by reason of a taxpayer ceasing to be an eligible taxpayer) is a change in method of accounting requiring the consent of the Commissioner under section 446(e) and §1.446–1(e). All changes to or from the AFR plus 3 method are effected on a cut-off basis.

(2) *Eligible taxpayer.* A taxpayer is an eligible taxpayer for a taxable year for purposes of this paragraph (e) if the average annual gross receipts of the taxpayer for the three previous taxable years do not exceed $10,000,000 (the $10,000,000 gross receipts test) and the taxpayer has met the $10,000 gross receipts for all prior taxable years beginning after December 31, 1994. For purposes of this paragraph (e)(2), the principles of section 263A(b)(2)(B) and (C) and §1.263A–3(b) apply in determining whether a taxpayer is an eligible taxpayer for a taxable year.

(f) *Selection of computation period and measurement dates and application of averaging conventions*—(1) *Computation period*—(i) *In general.* A taxpayer may (but is not required to) make the avoided cost calculation on the basis of a full taxable year. If the taxpayer uses the taxable year as the computation period, a single avoided cost calculation is made for each unit of designated property for the entire taxable year. If the taxpayer uses a computation period that is shorter than the full taxable year, an avoided cost calculation is made for each unit of designated property for each shorter computation period within the taxable year. If the taxpayer uses a shorter computation period, the computation period may not include portions of more than one taxable year and, except as provided in the case of short taxable years, each computation period within a taxable year must be the same length. In the case of a short taxable year, a taxpayer may treat a period shorter than the taxpayer's regular computation period as the first or last computation period, or as the only computation period for the year if the year is shorter than the taxpayer's regular computation period. A taxpayer must use the same computation periods for all designated property produced during a single taxable year.

(ii) *Method of accounting.* The choice of a computation period is a method of accounting. Any change in the computation period is a change in method of accounting requiring the consent of the Commissioner under section 446(e) and §1.446–1(e).

(iii) *Production period beginning or ending during the computation period.* The avoided cost method applies to the production of a unit of designated property on the basis of a full computation period, regardless of whether the production period for the unit of designated property begins or ends during the computation period.

(2) *Measurement dates*—(i) *In general.* If a taxpayer uses the taxable year as the computation period, measurement dates must occur at quarterly or more frequent regular intervals. If the taxpayer uses computation periods that are shorter than the taxable year, measurement dates must occur at least twice during each computation period and at least four times during the taxable year (or consecutive 12-month period in the case of a short taxable year). The taxpayer must use the same measurement dates for all designated property produced during a computation period. Except in the case of a computation period that differs from the taxpayer's regular computation period by reason of a short taxable year (see paragraph (f)(1)(i) of this section), measurement dates must occur at equal intervals during each computation period that falls within a single taxable year. For any computation period that differs from the taxpayer's regular computation period by reason of a short taxable year, the measurement dates used by the taxpayer during that period must be consistent with the principles and purposes of section 263A(f). A taxpayer is permitted to

modify the frequency of measurement dates from year to year.

(ii) *Measurement period.* For purposes of this section, *measurement period* means the period that begins on the first day following the preceding measurement date and that ends on the measurement date.

(iii) *Measurement dates on which accumulated production expenditures must be taken into account.* The first measurement date on which accumulated production expenditures must be taken into account with respect to a unit of designated property is the first measurement date following the beginning of the production period for the unit of designated property. The final measurement date on which accumulated production expenditures with respect to a unit of designated property must be taken into account is the first measurement date following the end of the production period for the unit of designated property. Accumulated production expenditures with respect to a unit of designated property must also be taken into account on all intervening measurement dates. See §1.263A–12 to determine when the production period begins and ends.

(iv) *More frequent measurement dates.* When in the opinion of the District Director more frequent measurement dates are necessary to determine capitalized interest consistent with the principles and purposes of section 263A(f) for a particular computation period, the District Director may require the use of more frequent measurement dates. If a significant segment of the taxpayer's production activities (the first segment) requires more frequent measurement dates than another significant segment of the taxpayer's production activities, the taxpayer may request a ruling from the Internal Revenue Service permitting, for a taxable year and all subsequent taxable years, a segregation of the two segments and, notwithstanding paragraph (f)(2)(i) of this section, the use of the more frequent measurement dates for only the first segment. The request for a ruling must be made in accordance with any applicable rules relating to submissions of ruling requests. The request must be filed on or before the due date (including extensions) of the original Federal income tax return for the first taxable year to which it will apply.

(3) *Examples.* The following examples illustrate the principles of this paragraph (f):

Example 1. Corporation X, a calendar year taxpayer, is engaged in the production of designated property during 1995. Corporation X adopts the taxable year as the computation period and quarterly measurement dates. Corporation X must identify traced debt, accumulated production expenditures, and nontraced debt at each quarterly measurement date (March 31, June 30, September 30, and December 31). Under paragraph (c)(5)(ii) of this section, Corporation X must calculate average excess expenditures for each unit of designated property by determining the amount by which accumulated production expenditures exceed traced debt for each unit at the end of each quarter and dividing the sum of these amounts by four. Under paragraph (c)(5)(iii) (C) of this section, Corporation X must calculate average nontraced debt by determining the amount of nontraced debt outstanding at the end of each quarter and dividing the sum of these amounts by four.

Example 2. Corporation X, a calendar year taxpayer, is engaged in the production of designated property during 1995. Corporation X adopts a 6-month computation period with two measurement dates within each computation period. Corporation X must identify traced debt, accumulated production expenditures, and nontraced debt at each measurement date (March 31 and June 30 for the first computation period and September 30 and December 31 for the second computation period). Under paragraph (c)(5)(ii) of this section, Corporation X must, for each computation period, calculate average excess expenditures for each unit of designated property by determining the amount by which accumulated production expenditures exceed traced debt for each unit at each measurement date during the period and dividing the sum of these amounts by two. Under paragraph (c)(5)(iii)(C) of this section, Corporation X must calculate average nontraced debt for each computation period by determining the amount of nontraced debt outstanding at each measurement date during the period and dividing the sum of these amounts by two.

Example 3. (i) Corporation X, a calendar year taxpayer, is engaged in the production of two units of designated property during 1995. Production of Unit A starts in 1994 and ends on June 20, 1995. Production of Unit B starts on April 15, 1995, but does not end until 1996. Corporation X adopts the taxable year as its computation period and does not elect under paragraph (d) of this section not to trace debt. Corporation X uses quarterly measurement dates and pays all interest on eligible debt in the quarter in which the interest is incurred. During 1995, Corporation X has two items of eligible debt. The debt and the manner in which it is used are as follows:

No.	Principal	Annual rate (percent)	Period outstanding	Use of proceeds
1	$1,000,000	9	1/01–9/01	Unit A.
2	2,000,000	11	6/01–12/31	Nontraced.

(ii) Based on the annual 9 percent rate of interest, Corporation X incurs $7,500 of interest during each month that Loan #1 is outstanding.

(iii) Accumulated production expenditures at the end of each quarter during 1995 are as follows:

Measurement date	Unit A	Unit B
March 31	$1,200,000	$0
June 30	1,800,000	500,000
Sept. 30	0	1,000,000
Dec. 31	0	1,600,000

(iv) Corporation X must first determine the amount of interest incurred on traced debt and capitalize the interest incurred on this debt (the traced debt amount). Loan #1 is allocated to Unit A on the March 31 and June 30 measurement dates. Accordingly, Loan #1 is treated as traced debt with respect to unit A for the measurement periods beginning January 1 and ending June 30. The interest incurred on Loan #1 during the period that Loan #1 is treated as traced debt must be capitalized with respect to Unit A. Thus, $45,000 ($7,500 per month for 6 months) is capitalized with respect to Unit A.

(v) Second, Corporation X must determine average excess expenditures for Unit A and Unit B. For Unit A, this amount is $250,000 ([$200,000 + $800,000 + $0 +$0] ÷ 4). For Unit B, this amount is $775,000 ([$0 + $500,000 + $1,000,000 + $1,600,000]÷4).

(vi) Third, Corporation X must determine the weighted average interest rate and apply that rate to the average excess expenditures for Units A and B. The rate is equal to the total amount of interest incurred on nontraced debt (i.e., interest incurred on all eligible debt reduced by interest incurred on traced debt) divided by the average nontraced debt. The interest incurred on nontraced debt equals $143,333 ([$1,000,000 × 9% × 8⁄12] + [$2,000,000 × 11% × 7⁄12] − $45,000). The average nontraced debt equals $1,500,000 ([$0 + $2,000,000 + $2,000,000 + $2,000,000] ÷ 4). The weighted average interest rate of 9.56 percent ($143,333 ′ $1,500,000), is then applied to average excess expenditures for Units A and B. Accordingly, Corporation X capitalizes an additional $23,900 ($250,000 × 9.56%) with respect to Unit A and $74,090 ($775,000 × 9.56%) with respect to Unit B (the excess expenditure amounts).

(g) *Special rules*—(1) *Ordering rules*—(i) *Provisions preempted by section 263A(f).* Interest must be capitalized under section 263A(f) before the application of section 163(d) (regarding the investment interest limitation), section 163(j) (regarding the limitation on interest paid to a tax-exempt related person), section 266 (regarding the election to capitalize carrying charges), section 469 (regarding the limitation on passive losses), and section 861 (regarding the allocation of interest to United States sources). Any interest that is capitalized under section 263A(f) is not taken into account as interest under those sections. However, in applying section 263A(f) with respect to the excess expenditure amount, the taxpayer must capitalize all interest that is neither investment interest under section 163(d), exempt related person interest under section 163(j), nor passive interest under section 469 before capitalizing any interest that is either investment interest, exempt related person interest, or passive interest. Any interest that is not required to be capitalized after the application of section 263A(f) is then taken into account as interest subject to sections 163(d), 163(j), 266, 469, and 861. If, after the application of section 263A(f), interest is deferred under sections 163(d), 163(j), 266, or 469, that interest is not subject to capitalization under section 263A(f) in any subsequent taxable year.

(ii) *Deferral provisions applied before this section.* Interest (including contingent interest) that is subject to a deferral provision described in this paragraph (g)(1)(ii) is subject to capitalization under section 263A(f) only in the taxable year in which it would be deducted if section 263A(f) did not apply. Deferral provisions include sections 163(e)(3), 267, 446, and 461, and all other deferral or limitation provisions that are not described in paragraph (g)(1)(i) of this section. In contrast to the provisions of paragraph (g)(1)(i) of this section, deferral provisions are applied before the application of section 263A(f).

(2) *Application of section 263A(f) to deferred interest*—(i) *In general.* This paragraph (g)(2) describes the time and manner of capitalizing and recovering the deferral amount. The deferral amount for any computation period equals the sum of—

(A) The amount of interest that is incurred on traced debt that is deferred during the computation period and is not deductible for the taxable year that includes the computation period because of a deferral provision described in paragraph (g)(1)(ii) of this section, and

(B) The shortfall amount described in paragraph (c)(4) of this section.

(ii) *Capitalization of deferral amount.* The rules described in paragraph (g)(2)(iii) of this section apply to the deferral amount unless the taxpayer elects under paragraph (g)(2)(iv) of this section to capitalize substitute costs.

(iii) *Deferred capitalization.* If the taxpayer does not elect under paragraph (g)(2)(iv) of this section to capitalize substitute costs, deferred interest to which the deferral amount is attributable (determined under any reasonable method) is capitalized in the year or years in which the deferred interest would have been deductible but for the application of section 263A(f) (the capitalization year). For this purpose, any interest that is deferred from a prior computation period is taken into account in subsequent capitalization years in the same order in which the interest was deferred. If a unit of designated property to which previously deferred interest relates is sold before the capitalization year, the deferred interest applicable to that unit of property is taken into account in the capitalization year and treated as if recovered from the sale of the property. If the taxpayer continues to hold, throughout the capitalization year, a unit of depreciable property to which previously deferred interest relates, the adjusted basis and applicable recovery percentages for the unit of property are redetermined for the capitalization year and subsequent years so that the increase in basis is accounted for over the remaining recovery periods beginning with the capitalization year. See *Example 2* of paragraph (g)(2)(v) of this section.

(iv) *Substitute capitalization*—(A) *General rule.* In lieu of deferred capitalization under paragraph (g)(2)(iii) of this section, the taxpayer may elect the substitute capitalization method described in this paragraph (g)(2)(iv). Under this method, the taxpayer capitalizes for the computation period in which interest is incurred and deferred (the deferral period) costs that would be deducted but for this paragraph (g)(2)(iv) (substitute costs). The taxpayer must capitalize an amount of substitute costs equal to the deferral amount for each unit of designated property, or if less, a prorata amount (determined in accordance with the principles of paragraph (c)(7)(i) of this section) of the total substitute costs that would be deducted but for this paragraph (g)(2)(iv) during the deferral period. If the entire deferral amount is capitalized pursuant to this paragraph (g)(2)(iv) in the deferral period, any interest incurred and deferred in the deferral period is neither capitalized nor deducted during the deferral period and, unless subsequently capitalized as a substitute cost under this paragraph (g)(2)(iv), is deductible in the appropriate subsequent period without regard to section 263A(f).

(B) *Capitalization of amount carried forward.* If the taxpayer has an insufficient amount of substitute costs in the deferral period, the amount by which substitute costs are insufficient with respect to each unit of designated property is a deferral amount carryforward to succeeding computation periods beginning with the next computation period. In any carryforward year, the taxpayer must capitalize an amount of substitute costs equal to the deferral amount carryforward or, if less, a prorata amount (determined in accordance with the principles of paragraph (c)(7)(i) of this section) of the total substitute costs that would be deducted during the carryforward year or years (the carryforward capitalization year) but for this paragraph (g)(2)(iv) (after applying the substitute cost method of this paragraph (g)(2)(iv) to the production of designated property in the carryforward period). If a unit of designated property to which the deferral amount carryforward relates is sold prior to the carryforward capitalization year, substitute costs applicable to that unit of property are taken into account in the carryforward capitalization year and treated as if recovered from the sale of the property. If the taxpayer continues to hold, throughout the capitalization year, a unit of depreciable property to which a deferral amount carryforward relates, the adjusted basis and applicable recovery percentages for the unit of property are redetermined for the carryforward capitalization year and subsequent years so that the increase in basis is accounted for over the remaining recovery periods beginning with the carryforward capitalization year. See *Example 2* of paragraph (g)(2)(v) of this section.

(C) *Method of accounting.* The substitute capitalization method under this paragraph (g)(2)(iv) is a method of accounting that applies to all designated property of the taxpayer. A change to or from the substitute capitalization method is a change in method of accounting requiring the consent of the Commissioner under section 446(e) and §1.446–1(e).

(v) *Examples.* The following examples illustrate the application of the avoided cost method when interest is subject to a deferral provision:

Example 1. (i) Corporation X is a calendar year taxpayer and uses the taxable year as it computation period. During 1995, X is engaged in the construction of a warehouse which X will use in its storage business. The warehouse is completed and placed in service in December 1995. X's average excess expenditures for 1995 equal $1,000,000. Throughout 1995, X's only outstanding debt is nontraced debt of $900,000 and $1,200,000, bearing interest at 15 percent and 9 percent, respectively, per year. Of the $243,000 interest incurred during the year ([$900,000×15%] + [$1,200,000×9%] = [$135,000+$108,000]), $75,000 is deferred under section 267(a)(2).

(ii) X must first determine the amount of interest required to be capitalized under paragraph (c)(1) of this section for 1995 (the deferral period) without applying section 267(a)(2). The weighted average interest rate is 11.6 percent ([$135,000+$108,000]÷ $2,100,000), and the excess expenditure amount under paragraph (c)(1) of this section is $116,000 ($1,000,000×11.6%). Under paragraph (c)(4) of this section, X must then determine the amount of interest that would be capitalized by applying paragraph (c)(2) of this section without regard to the amount of deferred interest. Disregarding deferred interest, the amount of interest available for capitalization is $168,000 ([$900,000×15%] + [$1,200,000×9%]− $75,000). Thus, the full excess expenditure amount ($116,000) is capitalized from interest that is not deferred under section 267(a)(2) and there is no shortfall amount.

Example 2. (i) The facts are the same as in *Example 1,* except that $140,000 of interest is deferred under section 267 (a)(2) in 1995. The taxpayer does not elect to use the substitute capitalization method. This interest is also deferred in 1996 but would be deducted in 1997 if section 263A(f) did not apply. As in *Example 1,* the excess expenditure amount is $116,000. However, the amount of interest available for capitalization after excluding the amount of deferred interest is $103,000 ([$900,000×15%] + [$1,200,000×9%]− $140,000). Thus, only $103,000 of interest is capitalized with respect to the warehouse in 1995. Since $116,000 of interest would be capitalized if section 267(a)(2) did not apply, the deferral amount determined under paragraphs (c)(2) and (g)(2)(i) of this section is $13,000 ($116,000 −$103,000), and $13,000 of deferred interest must be capitalized in the year in which it would be deducted if section 263A(f) did not apply.

(ii) The $140,000 of interest deferred under section 267(a)(2) in 1995 would be deducted in 1997 if section 263A(f) did not apply. X is therefore required to capitalize an additional $13,000 of interest with respect to the warehouse in 1997 and must redetermine its basis and recovery percentage.

(3) *Simplified inventory method*—(i) *In general.* This paragraph (g)(3) provides a simplified method of capitalizing interest expense with respect to designated property that is inventory. Under this method, the taxpayer determines beginning and ending inventory and cost of goods sold applying all other capitalization provisions, including, for example, the simplified production method of §1.263A–2(b), but without regard to the capitalization of interest with respect to inventory. The taxpayer must establish a separate capital asset, however, in an amount equal to the aggregate interest capitalization amount (as defined in paragraph (g)(3)(iii)(C) of this section). Under the simplified inventory method, increases in the aggregate interest capitalization amount from one year to

the next generally are treated as reductions in interest expense, and decreases in the aggregate interest capitalization amount from one year to the next are treated as increases to cost of goods sold.

(ii) *Segmentation of inventory*—(A) *General rule.* Under the simplified inventory method, the taxpayer first separates its total ending inventory value into segments that are equal to the total ending inventory value divided by the inverse inventory turnover rate. Each inventory segment is then assigned an age starting with one year and increasing by one year for each additional segment. The inverse inventory turnover rate is determined by finding the average of beginning and ending inventory, dividing the average by the cost of goods sold for the year, and rounding the result to the nearest whole number. Beginning and ending inventory amounts are determined using total current cost of inventory for the year (rather than carrying value). Cost of goods sold, however, may be determined using either total current cost or the taxpayer's inventory method. In addition, for purposes of this paragraph (g)(3)(ii), current costs for a year (and, if applicable, the cost of goods sold for the year under the taxpayer's inventory method) are determined without regard to the capitalization of interest with respect to inventory.

(B) *Example.* The provisions of paragraph (g)(3)(ii)(A) of this section are illustrated by the following example.

Example. X, a taxpayer using the FIFO inventory method, determines that total cost of goods sold for 1995 equals $900, and the cost of both beginning and ending inventory equals $3,000. Thus, X's inverse inventory turnover rate equals 3 (3.33 rounded to the nearest whole number). Total ending inventory of $3,000 is divided into three segments of $1,000 each. One segment is treated as 3-year-old inventory, one segment is treated as 2-year-old inventory, and one segment is treated as 1-year-old inventory.

(iii) *Aggregate interest capitalization amount*—(A) *Computation period and weighted average interest rate.* If a taxpayer elects the simplified inventory method, the taxpayer must use the taxable year as its computation period and use the weighted average interest rate determined under this paragraph (g)(3)(iii)(A) in determining the aggregate interest capitalization amount defined in paragraph (g)(3)(iii)(C) of this section and in determining the amount of interest capitalized with respect to any designated property that is not inventory. Under the simplified inventory method, the taxpayer determines the weighted average interest rate in accordance with paragraph (c)(5)(iii) of this section, treating all eligible debt (other than debt traced to noninventory property in the case of a taxpayer tracing debt) as nontraced debt (i.e., without tracing debt to inventory). A taxpayer that has elected under paragraph (e) of this section to use an external rate as a substitute for the weighted average interest rate determined under paragraph (c)(5)(iii) of this section uses the rate described in paragraph (e)(1) as the weighted average interest rate.

(B) *Computation of the tentative aggregate interest capitalization amount.* The weighted average interest rate is compounded annually by the number of years assigned to a particular inventory segment to produce an interest factor (applicable interest factor) for that segment. The amounts determined by multiplying the value of each inventory segment by its applicable interest factor are then combined to produce a tentative aggregate interest capitalization amount.

(C) *Coordination with other interest capitalization computations*—(*1*) *In general.* If the tentative aggregate interest capitalization amount for a year exceeds the aggregate interest capitalization amount (defined in paragraph (g)(3)(iii)(D) of this section) as of the close of the preceding year, then, for purposes of applying the rules of paragraph (c)(7) of this section, the excess is treated as an excess expenditure amount and the inventory to which the simplified inventory method of this paragraph (g)(3) applies is treated as a single unit of designated property. If, after these modifications, no paragraph (c)(7) interest allocation is necessary (i.e., the excess expenditure amounts for all units of designated property do not exceed the total amount of interest (including deferred interest) available for capitalization), the aggregate interest capitalization amount generally equals the tentative aggregate interest capitalization amount. If, on the other hand, a paragraph (c)(7) allocation is necessary, the tentative aggregate interest capitalization amount is generally adjusted to reflect the results of that allocation (i.e., the increase in the aggregate interest capitalization amount is limited to the amount of interest allocated to inventory, reduced, however, by any substitute costs that are capitalized with respect to inventory under applicable related party rules).

(*2*) *Deferred interest.* In determining the aggregate interest capitalization amount, the tentative aggregate interest capitalization amount is adjusted (after the application of paragraph (c)(7) of this section) as appropriate to reflect the deferred interest rules of paragraph (g)(2) of this section. The tentative aggregate interest capitalization amount would be reduced, for example, by the amount of a taxpayer's deferred interest for a taxable year unless the taxpayer has elected the substitute capitalization method under paragraph (g)(2)(iv).

(*3*) *Other coordinating provisions.* The Commissioner may prescribe, by revenue ruling or revenue procedure, additional provisions to coordinate the election and use of the simplified inventory method with other interest capitalization requirements and methods. See §601.601(d)(2)(ii)(*b*) of this chapter.

(D) *Treatment of increases or decreases in the aggregate interest capitalization amount.* Except as otherwise provided in this paragraph (g)(3)(iii)(D), increases in the aggregate interest capitalization amount from one year to the next are treated as reductions in interest expense, and decreases in the aggregate interest capitalization amount from one year to the next are treated as increases to cost of goods sold. To the extent a taxpayer capitalizes substitute costs under either applicable related party rules or the deferred interest rules in paragraph (g)(2) of this section, increases in the aggregate interest capitalization amount are treated as reductions in applicable substitute costs, rather than interest expense.

(E) *Example.* The provisions of this paragraph (g)(3)(iii) are illustrated by the following example.

Example. The facts are the same as in the example in paragraph (g)(3)(ii)(B) of this section, and, in addition, X determines that its weighted average interest rate for 1995 is 10 percent. Additionally, assume that X has no deferred interest in 1995 or 1996 and no deferral amount carryforward to either 1995 or 1996. (See paragraph (g)(2) of this section.) Also assume that no allocation is necessary under paragraph (c)(7) of this section in either 1995 or 1996. Under the rules of paragraph (g)(3)(ii) of this section, X divides ending inventory into segments of $1,000 each. One segment is 1-year old inventory, one segment is 2-year old inventory, and one segment is 3-year old inventory. Under paragraph (g)(3)(iii)(B) of this section, X must compute the applicable interest factor for each segment. The applicable interest factor for the 1-year old inventory is not compounded. The applicable interest factor for the 2-year old inventory is compounded for 1 year. The applicable interest factor for the 3-year old inventory is compounded for 2 years. The interest factor applied to the 1-year old inventory segment is .1. The interest factor applied to the 2-year old inventory segment is .21 [(1.1×1.1)−1]. The interest factor applied to the 3-year old inventory is .331 [(1.1×1.1×1.1)−1]. Thus, the tentative aggregate interest capitalization amount for 1995 is $641 (1,000 × [.1 + .21 + .331]). Because X has no deferred interest in 1995, no deferral amount carryforward to 1995, and no required allocation under paragraph (c)(7) of this section in 1995, X's aggregate interest capitalization amount equals its $641 tentative aggregate interest capitalization amount. If, in 1996, X computes an aggregate interest capitalization amount of $750, the $109 increase in the amount from 1995 to 1996 would be treated as a reduction in interest expense for 1996.

(iv) *Method of accounting.* The simplified inventory method is a method of accounting that must be elected for and applied to all inventory within a single trade or business of the taxpayer (within the meaning of section 446(d) and §1.446–1(d)). This method may be elected only if the inventory in that trade or business consists only of designated property and only if the taxpayer's inverse inventory turnover rate for that trade or business (as defined in paragraph (g)(3)(ii)(A) of this section) is greater than or equal to one. A change from or to the simplified inventory method is a change in method of accounting requiring the consent of the

Commissioner under section 446(e) and §1.446–(1)(e).

(4) *Financial accounting method disregarded.* The avoided cost method is applied under this section without regard to any financial or regulatory accounting principles for the capitalization of interest. For example, this section determines the amount of interest that must be capitalized without regard to Financial Accounting Standards Board (FASB) Statement Nos. 34, 71, and 90, issued by the Financial Accounting Standards Board, Norwalk, CT 06856–5116. Similarly, taxpayers are not permitted to net interest income and interest expense in determining the amount of interest that must be capitalized under this section with respect to certain restricted tax-exempt borrowings even though netting is permitted under FASB Statement No. 62.

(5) *Treatment of intercompany transactions*—(i) *General rule.* If interest capitalized under section 263A(f) by a member of a consolidated group (within the meaning of §1.1502–1(h)) with respect to a unit of designated property is attributable to a loan from another member of the group (the lending member), the intercompany transaction provisions of the consolidated return regulations do not apply to the lending member's interest income with respect to that loan, except as provided in paragraph (g)(5)(ii) of this section. For this purpose, the capitalized interest expense that is attributable to a loan from another member is determined under any method that reasonably reflects the principles of the avoided cost method, including the traced and nontraced concepts. For purposes of this paragraph (g)(5)(i) and paragraph (g)(5)(ii) of this section, in order for a method to be considered reasonable it must be consistently applied.

(ii) *Special rule for consolidated group with limited outside borrowing.* If, for any year, the aggregate amount of interest income described in paragraph (g)(5)(i) of this section for all members of the group with respect to all units of designated property exceeds the total amount of interest that is deductible for that year by all members of the group with respect to debt of a member owed to nonmembers (group deductible interest) after applying section 263A(f), the intercompany transaction provisions of the consolidated return regulations are applied to the excess, and the amount of interest income that must be taken into account by the group under paragraph (g)(5)(i) of this section is limited to the amount of the group deductible interest. The amount to which the intercompany transaction provisions of the consolidated return regulations apply by reason of this paragraph (g)(5)(ii) is allocated among the lending members under any method that reasonably reflects each member's share of interest income described in paragraph (g)(5)(i) of this section. If a lending member has interest income that is attributable to more than one unit of designated property, the amount to which the intercompany transaction provisions of the consolidated return regulations apply by reason of this paragraph (g)(5)(ii) with respect to the member is allocated among the units in accordance with the principles of paragraph (c)(7)(i) of this section.

(iii) *Example.* The provisions of paragraph (g)(5)(ii) of this section are illustrated by the following example.

Example. (i) P and S1 are the members of a consolidated group. In 1995, S1 begins and completes the construction of a shopping center and is required to capitalize interest with respect to the construction. S1's average excess expenditures for 1995 are $5,000,000. Throughout 1995, S1's only borrowings include a $6,000,000 loan from P bearing interest at an annual rate of 10 percent ($600,000 per year). Under the avoided cost method, S1 is required to capitalize interest in the amount of $500,000 ([$600,000÷$6,000,000×5,000,000).

(ii) P's only borrowing from unrelated lenders is a $2,000,000 loan bearing interest at an annual rate of 10 percent ($200,000 per year). Under the principles of paragraph (g)(5)(ii) of this section, because the aggregate amount of interest described in paragraph (g)(5)(i) of this section ($500,000) exceeds the aggregate amount of currently deductible interest of the group ($200,000), the intercompany transaction provisions of the consolidated return regulations apply to the excess of $300,000 and the amount of P's interest income that is subject to current inclusion by reason of paragraph (g)(5)(i) of this section is limited to $200,000.

(6) *Notional principal contracts and other derivatives.* [Reserved]

(7) *15-day repayment rule.* A taxpayer may elect to treat any eligible debt that is repaid within the 15-day period immediately preceding a quarterly measurement date as outstanding as of that measurement date for purposes of determining traced debt, average nontraced debt, and the weighted average interest rate. This election may be made or discontinued for any computation period and is not a method of accounting.

[T.D. 8584, 59 FR 67200, Dec. 29, 1994; 60 FR 16574, Mar. 31, 1995, as amended by T.D. 8584, 60 FR 47053, Sept. 11, 1995]

§1.263A–10 Unit of property.

(a) *In general.* The unit of property as defined in this section is used as the basis to determine accumulated production expenditures under §1.263A–11 and the beginning and end of the production period under §1.263A–12. Whether property is 1-year or 2-year property under §1.263A–8(b)(1)(ii) is also determined separately with respect to each unit of property as defined in this section.

(b) *Units of real property*—(1) *In general.* A unit of real property includes any components of real property owned by the taxpayer or a related person that are functionally interdependent and an allocable share of any common feature owned by the taxpayer or a related person that is real property even though the common feature does not meet the functional interdependence test. When the production period begins with respect to any functionally interdependent component or any common feature of the unit of real property, the production period has begun for the entire unit of real property. See, however, paragraph (b)(5) of this section for rules under which the costs of a common feature or benefitted property are excluded from accumulated production expenditures for one or more measurement dates. The portion of land included in a unit of real property includes land on which real property (including a common feature) included in the unit is situated, land subject to setback restrictions with respect to such property, and any other contiguous portion of the tract of land other than land that the taxpayer holds for a purpose unrelated to the unit being produced (e.g., investment purposes, personal use purposes, or specified future development as a separate unit of real property).

(2) *Functional interdependence.* Components of real property produced by, or for, the taxpayer, for use by the taxpayer or a related person are functionally interdependent if the placing in service of one component is dependent on the placing in service of the other component by the taxpayer or a related person. In the case of property produced for sale, components of real property are functionally interdependent if they are customarily sold as a single unit. For example, the real property components of a single-family house (e.g., the land, foundation, and walls) are functionally interdependent. In contrast, components of real property that are expected to be separately placed in service or held for resale are not functionally interdependent. Thus, dwelling units within a multi-unit building that are separately placed in service or sold (within the meaning of §1.263A–12(d)(1)) are treated as functionally independent of any other units, even though the units are located in the same building.

(3) *Common features.* For purposes of this section, a common feature generally includes any real property (as defined in §1.263A–8(c)) that benefits real property produced by, or for, the taxpayer or a related person, and that is not separately held for the production of income. A common feature need not be physically contiguous to the real property that it benefits. Examples of common features include streets, sidewalks, playgrounds, clubhouses, tennis courts, sewer lines, and cables that are not held for the production of income separately from the units of real property that they benefit.

(4) *Allocation of costs to unit.* Except as provided in paragraph (b)(5) of this section, the accumulated production expenditures for a unit of real property include, in all cases, the costs that directly benefit, or are incurred by reason of the production of, the unit of real property. Accumulated production expenditures also include the adjusted basis of property used to produce the unit of real property. The accumulated

costs of a common feature or land that benefits more than one unit of real property, or that benefits designated property and property other than designated property, is apportioned among the units of designated property, or among the designated property and property other than designated property, in determining accumulated production expenditures. The apportionment of the accumulated costs of the common feature (allocable share) or land (attributable land costs) generally may be made using any method that is applied on a consistent basis and that reasonably reflects the benefits provided. For example, an apportionment based on relative costs to be incurred, relative space to be occupied, or relative fair market values may be reasonable.

(5) *Treatment of costs when a common feature is included in a unit of real property*—(i) *General rule.* Except as provided in this paragraph (b)(5), the accumulated production expenditures of a unit of real property include the costs of functionally interdependent components (benefitted property) and an allocable share of the cost of common features throughout the entire production period of the unit. See § 1.263A–12, relating to the production period of a unit of property.

(ii) *Production activity not undertaken on benefitted property*—(A) *Direct production activity not undertaken—(1) In general.* The costs of land attributable to a benefitted property may be treated as not included in accumulated production expenditures for a unit of real property for measurement dates prior to the first date a production activity (direct production activity), including the clearing and grading of land, has been undertaken with respect to the land attributable to the benefitted property. Thus, the costs of land attributable to a benefitted property (as opposed to land attributable to the common features) with respect to which no direct production activities have been undertaken may be treated as not included in the accumulated production expenditures of a unit of real property even though a production activity has begun on a common feature allocable to the unit.

(2) Land attributable to a benefitted property. For purposes of this paragraph (b)(5)(ii), land attributable to a benefitted property includes all land in the unit of real property that includes the benefitted property other than land for a common feature. (Thus, land attributable to a benefitted property does not include land attributable to a common feature.)

(B) *Suspension of direct production activity after clearing and grading undertaken—(1) General rule.* This paragraph (b)(5)(ii)(B) may be used to determine the accumulated production expenditures for a unit of real property, if the only production activity with respect to a benefitted property has been clearing and grading and no further direct production activity is undertaken with respect to the benefitted property for at least 120 consecutive days (i.e., direct production activity has ceased). Under this paragraph (b)(5)(ii)(B), the accumulated production expenditures attributable to a benefitted property qualifying under this paragraph (b)(5)(ii)(B) may be excluded from the accumulated production expenditures of the unit of real property even though production continues on a common feature allocable to the unit. For purposes of this paragraph (b)(5)(ii)(B), production activity is considered to occur during any time which would not qualify as a cessation of production activities under the suspension period rules of § 1.263A–12(g).

(2) Accumulated production expenditures. If this paragraph (b)(5)(ii)(B) applies, accumulated production expenditures attributable to the benefitted property of the unit of real property may be treated as not included in the accumulated production expenditures for the unit starting with the first measurement period beginning after the first day of the 120 consecutive day period, but must be included in the accumulated production expenditures for the unit beginning in the measurement period in which direct production activity has resumed on the benefitted property. Accumulated production expenditures with respect to common features allocable to the unit of real property may not be excluded under this paragraph (b)(5)(ii)(B).

(iii) *Common feature placed in service before the end of production of a benefitted property.* To the extent that a common feature with respect to which all production activities to be undertaken by, or for, a taxpayer or a related person are completed is placed in service before the end of the production period of a unit that includes an allocable share of the costs of the common feature, the costs of the common feature are not treated as included in accumulated production expenditures of the unit for measurement periods beginning after the date the common feature is placed in service.

(iv) *Benefitted property sold before production completed on common feature.* If a unit of real property is sold before common features included in the unit are completed, the production period of the unit ends on the date of sale. Thus, common feature costs actually incurred and properly allocable to the unit as of the date of sale are excluded from accumulated production expenditures for measurement periods beginning after the date of sale. Common feature costs properly allocable to the unit and actually incurred after the sale are not taken into account in determining accumulated production expenditures.

(v) *Benefitted property placed in service before production completed on common feature.* Where production activities remain to be undertaken on a common feature allocable to a unit of real property that includes benefitted property, the costs of the benefitted property are not treated as included in the accumulated production expenditures for the unit for measurement periods beginning after the date the benefitted property is placed in service and all production activities reasonably expected to be undertaken by, or for, the taxpayer or a related person with respect to the benefitted property are completed.

(6) *Examples.* The principles of paragraph (b) of this section are illustrated by the following examples:

Example 1. B, an individual, is in the trade or business of constructing custom-built houses for sale. B owns a 10-acre tract upon which B intends to build four houses on 2-acre lots. In addition, on the remaining 2 acres B plans to construct a perimeter road that benefits the four houses and is not held for the production of income separately from the sale of the houses. In 1995, B begins constructing the perimeter road and clears the land for one house. Under the principles of paragraph (b)(1) of this section, each planned house (including attributable land) is part of a separate unit of real property (house unit). Under the principles of paragraph (b)(3) of this section, the perimeter road (including attributable land) constitutes a common feature with respect to each planned house (i.e., benefitted property). In accordance with paragraph (b)(1), the production period for all four house units begins when production commences on the perimeter road in 1995. In addition, under the principles of paragraph (b)(4) of this section, the accumulated production expenditures for the four house units include the allocable costs of the road. In addition, for the house with respect to which B has cleared the land, the accumulated production expenditures for the house unit include the land costs attributable to the house. See paragraph (b)(5)(i) of this section. However, the accumulated production expenditures for each of the three house units that include a house for which B has not yet undertaken a direct production activity do not include the land costs attributable to the house. See paragraph (b)(5)(ii) of this section.

Example 2. Assume the same facts as *Example 1,* except that B undertakes no further direct production activity with respect to the house for which the land was cleared for a period of at least 120 days but continues constructing the perimeter road during this period. In accordance with paragraph (b)(5)(ii)(B) of this section, B may exclude the accumulated production expenditures attributable to the benefitted property from the accumulated production expenditures of the house unit starting with the first measurement period that begins after the first day of the 120 consecutive day period. B must include the accumulated production expenditures attributable to the benefitted property in the accumulated production expenditures for the house unit beginning with the measurement period in which direct production resumes on the benefitted property. The house unit will continue to include the accumulated production expenditures attributable to the perimeter road during the period in which direct production activity was suspended on the benefitted property.

Example 3. (i) D, a corporation, is in the trade or business of developing commercial real property. D owns a 20-acre tract upon which D intends to build a shopping center with 150 stores. D intends to lease the stores. D will also provide on the 20 acres a 1500-car parking lot, which is not held by D for the production of income separately from the stores in the shopping center. Additionally, D will not produce any other common features as part of the project. D intends to complete the shopping center in phases and expects that each store will be placed in service independently of any other store.

(ii) Under paragraphs (b)(1) and (b)(2) of this section, each store (including attributable land) is part of a separate unit of real property (store unit). The 1500-car parking lot is a common feature benefitting each store, and D must include an allocable share of the parking lots in each store unit. See paragraphs (b)(1) and (b)(3). In accordance with paragraph (b)(5)(i), D includes in the accumulated production expenditures for each store unit during each store unit's production period: the costs capitalized with respect to the store (including attributable land costs in accordance with paragraph (b)(5) of this section) and an allocable share of the parking lot costs (including attributable land costs in accordance with paragraph (b)(5) of this section). Under paragraph (b)(4), the portion of the parking lot costs that is included in the accumulated production expenditures of a store unit is determined using a reasonable method of allocation.

Example 4. X, a real estate developer, begins a project to construct a condominium building and a convenience store for the benefit of the condominium. X intends to separately lease the convenience store. Because the convenience store is held for the production of income separately from the condominium units that it benefits, the convenience store is not a common feature with respect to the condominium building. Instead, the convenience store is a separate unit of property with a separate production period and for which a separate determination of accumulated production expenditures must be made.

Example 5. (i) In 1995, X, a real estate developer, begins a project consisting of a condominium building and a common swimming pool that is not held for the production of income separately from the condominium sales. The condominium building consists of 10 stories, and each story is occupied by a single condominium. Production of the swimming pool begins in January. No direct production activity is undertaken on any condominium until September, when direct production activity commences on each condominium. On December 31, 1995, 1 condominium that was completed in December has been sold, 3 condominiums that were completed in December have not been sold, and 6 condominiums are only partially complete; additionally, the swimming pool is completed. X is a calendar year taxpayer that uses a full taxable year as the computation period, and quarterly measurement dates.

(ii) Under paragraphs (b)(1) and (b)(2) of this section, each condominium (including attributable land) is part of a separate unit of real property. Under the principles of paragraph (b)(3) of this section, the swimming pool is a common feature with respect to each condominium and under paragraph (b)(4) of this section the cost of the swimming pool is allocated equally among the condominiums.

(iii) Under paragraph (b)(1) of this section, the production period of each of the 10 condominium units begins in January when production of the swimming pool begins. On X's March 31, 1995, and June 30, 1995, measurement dates, the accumulated production expenditures for each condominium unit include the allocable costs of the swimming pool, but not the land costs attributable to the condominium because no direct production activity has been undertaken on the condominium. See paragraph (b)(5)(ii)(A) of this section. On X's September 30, 1995, and December 31, 1995, measurement dates, the accumulated production expenditures for each unit include the allocable costs of the swimming pool, and the costs of the condominium (including attributable land costs) because a direct production activity has commenced on the condominium. See paragraph (b)(5)(i) of this section.

(iv) The production period for the condominium unit that includes the condominium that is sold as of the end of 1995 ends on the date the condominium is sold. See paragraph (b)(5)(iv) of this section. The production period of each unit that is ready to be held for sale ends when all production activities have been completed on the unit, in this case on December 31, 1995, the date that the swimming pool included in the unit is completed. See § 1.263A–12(d). Accordingly, interest capitalization ceases for each such unit that is sold or ready to be held for sale as of the end of 1995 (including each unit's allocable share of the completed swimming pool).

(v) The production periods for the condominium units that include the condominiums that are only partially complete at the end of 1995 continue after 1995. The accumulated production expenditures for each partially completed condominium unit continue to include the costs of the condominium (including attributable land costs) in addition to the costs of an allocable share of the completed swimming pool (including attributable land costs).

Example 6. Assume the same facts as in *Example 5*, except that the swimming pool is only partially complete as of the end of 1995. Under these facts, X capitalizes no interest during 1996 for the 1 unit that includes the condominium sold during 1995 (including the costs of the allocable share of the swimming pool). See paragraph (b)(5)(iv) of this section. However, with respect to the 6 condominiums that are partially complete and the 3 condominiums that are completed but unsold, interest capitalization continues after the end of 1995. The accumulated production expenditures for each of these 9 units include the costs of an allocable share of the swimming pool. See paragraph (b)(5)(i) of this section. In determining the costs of an allocable share of the swimming pool included in the accumulated production expenditures for each of the 9 units, X includes all costs of the swimming pool properly allocable to each unit, including those cost incurred as of the date of the sale of unit 1 that may have been used under applicable administrative procedures (e.g., Rev. Proc. 92–29, 1992–1 C.B. 748) in determining the basis of unit 1 solely for purposes of computing gain or loss on the sale of unit 1. See §601.601(d)(2)(ii)(*b*) of this chapter.

Example 7. (i) Assume the same facts as in *Example 5*, except that X intends to lease rather than sell the condominiums and the completed swimming pool is placed in service for depreciation purposes on December 31, 1995. Additionally, assume that all 10 condominiums are partially completed at the end of 1995.

(ii) Under these facts, because the swimming pool is a common feature that is placed in service separately from the condominiums that it benefits, under paragraph (b)(5)(iii) of this section, the accumulated production expenditures of each of the condominium units do not include the costs of the allocable share of the swimming pool after 1995.

(c) *Units of tangible personal property*. Components of tangible personal property are a single unit of property if the components are functionally interdependent. Components of tangible personal property that are produced by, or for, the taxpayer, for use by the taxpayer or a related person, are functionally interdependent if the placing in service of one component is dependent on the placing in service of the other component by the taxpayer or a related person. In the case of tangible personal property produced for sale, components of tangible personal property are functionally interdependent if they are customarily sold as a single unit. For example, if an aircraft manufacturer customarily sells completely assembled aircraft, the unit of property includes all components of a completely assembled aircraft. If the manufacturer also customarily sells aircraft engines separately, any engines that are reasonably expected to be sold separately are treated as single units of property.

(d) *Treatment of installations*. If the taxpayer produces or is treated as producing any property that is installed on or in other property, the production activity and installation activity relating to each unit of property generally are not aggregated for purposes of this section. However, if the taxpayer is treated as producing and installing any property for use by the taxpayer or a related person or if the taxpayer enters into a contract requiring the taxpayer to install property for use by a customer, the production activity and installation activity are aggregated for purposes of this section.

[T.D. 8584, 59 FR 67207, Dec. 29, 1994; 60 FR 16574, 16575, Mar. 31, 1995]

§1.263A–11 Accumulated production expenditures.

(a) *General rule. Accumulated production expenditures* generally means the cumulative amount of direct and indirect costs described in section 263A(a) that are required to be capitalized with respect to the unit of property (as defined in §1.263A–10), including interest capitalized in prior computation periods, plus the adjusted bases of any assets described in paragraph (d) of this section that are used to produce the unit of property during the period of their use. Accumulated production expenditures may also include the basis of any property received by the taxpayer in a nontaxable transaction.

(b) *When costs are first taken into account*—(1) *In general*. Except as provided in paragraph (c)(1) of this section, costs are taken into account in the computation of accumulated production expenditures at the time and to the extent they would otherwise be taken into account under the taxpayer's method of accounting (e.g., after applying the requirements of section 461, including the economic performance requirement of section 461(h)). Costs that have been incurred and capitalized with respect to a unit of property prior to the beginning of the production period are taken into account as accumulated production expenditures beginning on the date on which the production period of the property begins (as defined in §1.263A–12(c)). Thus, for example, the cost of raw land acquired for development, the cost of a leasehold in mineral properties acquired for development, and the capitalized cost of planning and design activities are taken into account as accumulated production expenditures beginning on the first day of the production period. For purposes of determining accumulated production expenditures on any measurement date during a computation period, the interest required to be capitalized for the computation period is deemed to be capitalized on the day immediately following the end of the computation period. For any subsequent measurement dates and computation periods, that interest is included in accumulated production expenditures. If the cost of land or common features is allocated among planned units of property that are completed in phases, any portion of the cost properly allocated to completed units is not reallocated to any incomplete units of property.

(2) *Dedication rule for materials and supplies.* The costs of raw materials, supplies, or similar items are taken into account as accumulated production expenditures when they are incurred and dedicated to production of a unit of property. *Dedicated* means the first date on which the raw materials, supplies, or similar items are specifically associated with the production of any unit of property, including by record, assignment to the specific job site, or physical incorporation. In contrast, in the case of a component or subassembly that is reasonably expected to be become a part of (e.g., be incorporated into) any unit of property, costs incurred (including dedicated raw materials) for the component or subassembly are taken into account as accumulated production expenditures during the production of any portion of the component or subassembly and prior to its connection with (e.g., incorporation into) any specific unit of property. For purposes of the preceding sentence, components and subassemblies must be aggregated at each measurement date in a reasonable manner that is consistent with the purposes of section 263A(f).

(c) *Property produced under a contract*—(1) *Customer.* If a unit of property produced under a contract is designated property under § 1.263A–8(d)(2)(i) with respect to the customer, the customer's accumulated production expenditures include any payments under the contract that represent part of the purchase price of the unit of designated property or, to the extent costs are incurred earlier than payments are made (determined on a cumulative basis for each unit of designated property), any part of such price for which the requirements of section 461 have been satisfied. The customer has made a payment under this section if the transaction would be considered a payment by a taxpayer using the cash receipts and disbursements method of accounting. The customer's accumulated production expenditures also include any other costs incurred by the customer, such as interest, or any other direct or indirect costs that are required to be capitalized under section 263A(a) and the regulations thereunder with respect to the production of the unit of designated property.

(2) *Contractor.* If a unit of property produced under a contract is designated property under § 1.263A–8(d)(2)(ii) with respect to the contractor, the contractor must treat the cumulative amount of payments made by the customer under the contract attributable to the unit of property as a reduction in the contractor's accumulated production expenditures. The customer has made a payment under this section if the transaction would be considered a payment by a taxpayer using the cash receipts and disbursements method of accounting.

(d) *Property used to produce designated property*—(1) *In general.* Accumulated production expenditures include the adjusted bases (or portion thereof) of any equipment, facilities, or other similar assets, used in a reasonably proximate manner for the production of a unit of designated property during any measurement period in which the asset is so used. Examples of assets used in a reasonably proximate manner include machinery and equipment used directly or indirectly in the production process, such as assembly-line structures, cranes, bulldozers, and buildings. A taxpayer apportions the adjusted basis of an asset used in the production of more than one unit of designated property in a measurement period among such units of designated property using reasonable criteria corresponding to the use of the asset, such as machine hours, mileage, or units of production. If an asset used in a reasonably proximate manner for the production of a unit of designated property is temporarily idle (within the meaning of § 1.263A–1(e)(3)(iii)(E)) for an entire measurement period, the adjusted basis of the asset is excluded from the accumulated production expenditures for the unit during that measurement period. Notwithstanding this paragraph (d)(1), the portion of the depreciation allowance for equipment, facilities, or any other asset that is capitalized with respect to a unit of designated property in accordance with § 1.263A–1(e)(3)(ii)(I) is included in accumulated production expenditures without regard to the extent of use under this paragraph (d)(1) (i.e., without regard to whether the asset is used in a reasonably proximate manner for the production of the unit of designated property).

(2) *Example.* The following example illustrates how the basis of an asset is allocated on the basis of time:

Example. In 1995, X uses a bulldozer exclusively to clear the land on several adjacent real estate development projects, A, B, and C. A, B, and C are treated as separate units of property under the principles of § 1.263A–10. X decides to allocate the basis of the bulldozer among the three projects on the basis of time. At the end of the first quarter of 1995, the production period has commenced for all three projects. The bulldozer was operated for 30 hours on project A, 80 hours on project B, and 10 hours on project C, for a total of 120 hours for the entire period. For purposes of determining accumulated production expenditures as of the end of the first quarter, ¼ of the adjusted basis of the bulldozer is allocated to project A, ⅔ to project B, and 1⁄12 to project C. Nonworking hours, regularly scheduled nonworking days, or other periods in which the bulldozer is temporarily idle (within the meaning of § 1.263A–1(e)(3)(iii)(E)) during the measurement period are not taken into account in allocating the basis of the bulldozer.

(3) *Excluded equipment and facilities.* The adjusted bases of equipment, facilities, or other assets that are not used in a reasonably proximate manner to produce a unit of property are not included in the computation of accumulated production expenditures. For example, the adjusted bases of equipment and facilities, including buildings and other structures, used in service departments performing administrative, purchasing, personnel, legal, accounting, or similar functions, are excluded from the computation of accumulated production expenditures under this paragraph (d)(3).

(e) *Improvements*—(1) *General rule.* If an improvement constitutes the production of designated property under $1.263A–8(d)(3), accumulated production expenditures with respect to the improvement consist of—

(i) All direct and indirect costs required to be capitalized with respect to the improvement,

(ii) In the case of an improvement to a unit of real property—

(A) An allocable portion of the cost of land, and

(B) For any measurement period, the adjusted basis of any existing structure, common feature, or other property that is not placed in service or must be temporarily withdrawn from service to complete the improvement (associated property) during any part of the measurement period if the associated property directly benefits the property being improved, the associated property directly benefits from the improvement, or the improvement was incurred by reason of the associated property. See, however, the de minimis rule under paragraph (e)(2) of this section that applies in the case of associated property.

(iii) In the case of an improvement to a unit of tangible personal property, the adjusted basis of the asset being improved if that asset either is not placed in service or must be temporarily withdrawn from service to complete the improvement.

(2) *De minimis rule.* For purposes of paragraph (e)(1)(ii) of this section, the total costs of all associated property for an improvement unit (associated property costs) are excluded from the accumulated production expenditures for the improvement unit during its production period if, on the date the production period of the unit begins, the taxpayer reasonably expects that at no time during the production period of the unit will the accumulated production expenditures for the unit, determined without regard to the associated property costs, exceed 5 percent of the associated property costs.

(f) *Mid-production purchases.* If a taxpayer purchases a unit of property for further production, the taxpayer's accumulated production expenditures include the full purchase price of the property plus, in accordance with the principles of paragraph (e) of this section, additional direct and indirect costs incurred by the taxpayer.

(g) *Related person costs.* The activities of a related person are taken into account in applying the classification thresholds under § 1.263A–8(b)(1)(ii)(B) and (C), and in determining the production period of a unit of designated property under § 1.263A–12. However, only those costs incurred by the taxpayer are taken into account in the taxpayer's accumulated production expenditures under this section because the related person includes its own capitalized costs in the related person's accumulated production expenditures with respect to any unit of designated property upon which the parties engage in mutual production activities. For purposes of the preceding sentence, the accumulated production expenditures of any property transferred to a taxpayer in a nontaxable transaction are treated as accumulated production expenditures incurred by the taxpayer.

(h) *Installation.* If the taxpayer installs property that is purchased by the taxpayer, accumulated production expenditures include the cost of the property that is installed in addition to the direct and indirect costs of installation.

[T.D. 8584, 59 FR 67210, Dec. 29, 1994; 60 FR 16575, Mar. 31, 1995]

§ 1.263A–12 Production period.

(a) *In general.* Capitalization of interest is required under § 1.263A–9 for computation periods (within the meaning of § 1.263A–9(f)(1)) that include the production period of a unit of designated property. In contrast, section 263A(a) requires the capitalization of all other direct or indirect costs, such as insurance, taxes, and storage, that directly benefit or are incurred by reason of the production of property without regard to whether they are incurred during a period in which production activity occurs.

(b) *Related person activities.* Activities performed and costs incurred by a person related to the taxpayer that directly benefit or are incurred by reason of the taxpayer's production of designated property are taken into account in determining the taxpayer's production period (regardless of whether the related person is performing only a service or is producing a subassembly or component that the related person is required to treat as an item of designated property). These activities and the related person's costs are also taken into account in determining whether tangible personal property produced by the taxpayer is 1-year or 2-year property under § 1.263A–8(b)(1)(ii) (B) and (C).

(c) *Beginning of production period*—(1) *In general.* A separate production period is determined for each unit of property defined in § 1.263A–10. The production period begins on the date that production of the unit of property begins.

(2) *Real property.* The production period of a unit of real property begins on the first date that any physical production activity (as defined in paragraph (e) of this section) is performed with respect to a unit of real property. See § 1.263A–10(b)(1). The production period of a unit of real property produced under a contract begins for the contractor on the date the contractor begins physical production activity on the property. The production period of a unit of real property produced under a contract begins for the customer on the date either the customer or the contractor begins physical production activity on the property.

(3) *Tangible personal property.* The production period of a unit of tangible personal property begins on the first date by which the taxpayer's accumulated production expenditures, including planning and design expenditures, are at least 5 percent of the taxpayer's total estimated accumulated production expenditures for the property unit. Thus, the beginning of the production period is determined without regard to whether physical production activity has commenced. The production period of a unit of tangible personal property produced under a contract begins for the contractor when the contractor's accumulated production expenditures, without any reduction for payments

from the customer, are at least 5 percent of the contractor's total estimated accumulated production expenditures. The production period for a unit of tangible personal property produced under a contract begins for the customer when the customer's accumulated production expenditures are at least 5 percent of the customer's total estimated accumulated production expenditures.

(d) *End of production period*—(1) *In general.* The production period for a unit of property produced for self use ends on the date that the unit is placed in service and all production activities reasonably expected to be undertaken by, or for, the taxpayer or a related person are completed. The production period for a unit of property produced for sale ends on the date that the unit is ready to be held for sale and all production activities reasonably expected to be undertaken by, or for, the taxpayer or a related person are completed. See, however, §1.263A–10(b)(5)(iv) providing an exception for common features in the case of a benefitted property that is sold. In the case of a unit of property produced under a contract, the production period for the customer ends when the property is placed in service by the customer and all production activities reasonably expected to be undertaken are complete (i.e., generally, no earlier than when the customer takes delivery). In the case of property that is customarily aged (such as tobacco, wine, or whiskey) before it is sold, the production period includes the aging period.

(2) *Special rules.* The production period does not end for a unit of property prior to the completion of physical production activities by the taxpayer even though the property is held for sale or lease, since all production activities reasonably expected to be undertaken by the taxpayer with respect to such property have not in fact been completed. See, however, §1.263A–10(b)(5) regarding separation of certain common features.

(3) *Sequential production or delivery.* The production period ends with respect to each unit of property (as defined in §1.263A–10) and its associated accumulated production expenditures as the unit of property is completed within the meaning of paragraph (d)(1) of this section, without regard to the production activities or costs of any other units of property. Thus, for example, in the case of separate apartments in a multi-unit building, each of which is a separate unit of property within the meaning of §1.263A–10, the production period ends for each separate apartment when it is ready to be held for sale or placed in service within the meaning of paragraph (d)(1) of this section. In the case of a single unit of property that merely undergoes separate and distinct stages of production, the production period ends at the same time (i.e., when all separate stages of production are completed with respect to the entire amount of accumulated production expenditures for the property).

(4) *Examples.* The provisions of paragraph (d) of this section are illustrated by the following examples:

Example 1. E is engaged in the original construction of a high-rise office building with two wings. At the end of 1995, Wing #1, but not Wing #2, is placed in service. Moreover, at the end of 1995, all production activities reasonably expected to be undertaken on Wing #1 are completed. In accordance with §1.263A–10(b)(1), Wing #1 and Wing #2 are separate units of designated property. E may stop capitalizing interest on Wing #1 but not on Wing #2.

Example 2. F is in the business of constructing finished houses. F generally paints and finishes the interior of the house, although this does not occur until a potential buyer is located. Because F reasonably expects to undertake production activity (painting and finishing), the production period of each house does not end until these activities are completed.

(e) *Physical production activities*—(1) *In general.* The term *physical production activities* includes any physical activity that constitutes production within the meaning of §1.263A–8(d)(1). The production period begins and interest must be capitalized with respect to real property if any physical production activities are undertaken, whether alone or in preparation for the construction of buildings or other structures, or with respect to the improvement of existing structures. For example, the clearing of raw land constitutes the production of designated property, even if only cleared prior to resale.

(2) *Illustrations.* The following is a partial list of activities any one of which constitutes a physical production activity with respect to the production of real property:

(i) Clearing, grading, or excavating of raw land;

(ii) Demolishing a building or gutting a standing building;

(iii) Engaging in the construction of infrastructure, such as roads, sewers, sidewalks, cables, and wiring;

(iv) Undertaking structural, mechanical, or electrical activities with respect to a building or other structure; or

(v) Engaging in landscaping activities.

(f) *Activities not considered physical production.* The activities described in paragraphs (f)(1) and (f)(2) of this section are not considered physical production activities:

(1) *Planning and design.* Soil testing, preparing architectural blueprints or models, or obtaining building permits.

(2) *Incidental repairs.* Physical activities of an incidental nature that may be treated as repairs under § 1.162–4.

(g) *Suspension of production period*—(1) *In general.* If production activities related to the production of a unit of designated property cease for at least 120 consecutive days (cessation period), a taxpayer may suspend the capitalization of interest with respect to the unit of designated property starting with the first measurement period that begins after the first day in which production ceases. The taxpayer must resume the capitalization of interest with respect to a unit beginning with the measurement period during which production activities resume. In addition, production activities are not considered to have ceased if they cease because of circumstances inherent in the production process, such as normal adverse weather conditions, scheduled plant shutdowns, or delays due to design or construction flaws, the obtaining of a permit or license, or the settlement of groundfill to construct property. Interest incurred on debt that is traced debt with respect to a unit of designated property during the suspension period is subject to capitalization with respect to the production of other units of designated property as interest on nontraced debt. See § 1.263A–9(c)(5)(i) of this section. For applications of the avoided cost method after the end of the suspension period, the accumulated production expenditures for the unit include the balance of accumulated production expenditures as of the beginning of the suspension period, plus any additional capitalized costs incurred during the suspension period. No further suspension of interest capitalization may occur unless the requirements for a new suspension period are satisfied.

(2) *Special rule.* If a cessation period spans more than one taxable year, the taxpayer may suspend the capitalization of interest with respect to a unit beginning with the first measurement period of the taxable year in which the 120-day period is satisfied.

(3) *Method of accounting.* An election to suspend interest capitalization under paragraph (g)(1) of this section is a method of accounting that must be consistently applied to all units that satisfy the requirements of paragraph (g)(1) of this section. However, the special rule in paragraph (g)(2) of this section is applied on an annual basis to all units of an electing taxpayer that satisfy the requirements of paragraph (g)(2) of this section.

(4) *Example.* The provisions of paragraph (g)(1) of this section are illustrated by the following example.

Example. (i) D, a calendar-year taxpayer, began production of a residential housing development on January 1, 1995. D, in applying the avoided cost method, chose a taxable year computation period and quarterly measurement dates. On April 10, 1995, all production activities ceased with respect to the units in the development until December 1, 1996. The cessation, which occurred for a period of at least 120 consecutive days, was not attributable to circumstances inherent in the production process. With respect to the units in the development, D incurred production expenditures of $2,000,000 from January 1, 1995 through April 10, 1995. D incurred interest of $100,000 on traced debt with respect to the units for the period beginning January 1, 1995, and ending June 30, 1995. D did not incur any production expenditures for the more than 20-month cessation beginning April 10, 1995, and ending December 1, 1996, but incurred $200,000 of production expenditures from December 1, 1996, through December 31, 1996.

(ii) D is required to capitalize the $100,000 interest on traced debt incurred during the two measurement periods beginning January 1, 1995, and ending June 30, 1995. Because D satisfied the 120-day rule under this paragraph (g), D is not required to capitalize interest with respect to the accumulated production expenditures for the units for the measurement period beginning July 1, 1995, and ending September 30, 1995, which is the first measurement period that begins after the date production activities cease. D is rquired to resume interest capitalization with respect to the $2,300,000 (2,000,000+100,000+200,000) of accumulated production expenditures for the units for the measurement period beginning October 1, 1996, and ending December 31, 1996 (the measurement period during which production activities resume). Accordingly, D may suspend the capitalization of interest with respect to the units from July 1, 1995, through September 30, 1996.

[T.D. 8584, 59 FR 67212, Dec. 29, 1994; 60 FR 16575, Mar. 31, 1995]

§1.263A–13 Oil and gas activities.

(a) *In general.* This section provides rules that are to be applied in tandem with §§1.263A–8 through 1.263A–12, 1.263A–14, and 1.263A–15 in capitalizing interest with respect to the development (within the meaning of section 263A(g)) of oil or gas property. For this purpose, oil or gas property consists of each separate operating mineral interest in oil or gas as defined in section 614(a), or, if a taxpayer makes an election under section 614(b), the aggregate of two or more separate operating mineral interests in oil or gas as described in section 614(b) (section 614 property). Thus, an oil or gas property is designated property unless the de minimis rule applies. A taxpayer must apply the rules in paragraph (c) of this section if the taxpayer cannot establish, at the beginning of the production period of the first well drilled on the property, a definite plan that identifies the number and location of other wells planned with respect to the property. If a taxpayer can establish such a plan at the beginning of the production period of the first well drilled on the property, the taxpayer may either apply the rules of paragraph (c) of this section or treat each of the planned wells as a separate unit and partition the leasehold acquisition costs and costs of common features based on the number of planned well units.

(b) *Generally applicable rules*—(1) *Beginning of production period*—(i) *Onshore activities.* In the case of onshore oil or gas development activities, the production period for a unit begins on the first date physical site preparation activities (such as building an access road, leveling a site for a drilling rig, or excavating a mud pit) are undertaken with respect to the unit.

(ii) *Offshore activities.* In the case of offshore development activities, the production period for a unit begins on the first date physical site preparation activities, other than activities undertaken with respect to expendable wells, are undertaken with respect to the unit. For purposes of the preceding sentence, the first physical site preparation activity undertaken with respect to a section 614 property is generally the first activity undertaken with respect to the anchoring of a platform (e.g., drilling to drive the piles). For purposes of this section, an expendable well is a well drilled solely to determine the location and delineation of offshore hydrocarbon deposits.

(2) *End of production period.* The production period ends for a productive well unit on the date the well is placed in service and all production activities reasonably expected to be undertaken by, or for, the taxpayer or a related person are completed. See §1.263A–12(d).

(3) *Accumulated production expenditures*—(i) *Costs included.* Accumulated production expenditures for a well unit include the following costs (to the extent they are not intangible drilling and development costs allowable as a deduction under section 263(c), 263(i), or 291(b)(2)): the costs of acquiring the section 614 leasehold and the costs of taxes and similar items that are required to be capitalized under section 263A(a) with respect to the section 614 leasehold; the cost of real property associated with developing the section 614 property (e.g., casing); the basis of real property that constitutes a common feature within the meaning of §1.263A–10(b)(3); and the adjusted basis of property used to produce property (such as a mobile rig, drilling ship, or an offshore drilling platform).

(ii) *Improvement unit.* To the extent section 614 costs are allocated to a well unit, the undepleted portion of those section 614 costs must also be included in the accumulated production expenditures for any improvement unit (within the meaning of § 1.263A–8(d)(3)) with respect to that well unit.

(c) *Special rules when definite plan not established*—(1) *In general.* The special rules of this paragraph (c) must be applied by a taxpayer that cannot establish, at the beginning of the production period of the first well drilled on the property, a definite plan that identifies the number and location of the wells planned with respect to the property. A taxpayer than can establish such a plan is permitted, but not required, to apply the rules of this paragraph (c), provided the rules of this paragraph (c) are consistently applied for all the taxpayer's oil or gas properties for which a definite plan can be established.

(2) *Oil and gas units*—(i) *First productive well unit.* Until the first productive well is placed in service and all production activities reasonably expected to be undertaken by, or for, the taxpayer or a related person are completed, a first productive well unit includes the section 614 property and all real property associated with the development of the section 614 property. Thus, for example, a first productive well unit includes the section 614 property and real property associated with any nonproductive well drilled on the section 614 property on or before the date the first productive well is placed in service and all production activities reasonably expected to be undertaken by, or for, the taxpayer or a related person are completed. For purposes of this section, a productive well is a well that produces in commercial quantities. See paragraph (c)(5) of this section, which provides a special rule whereby the costs of a section 614 property and common feature costs for a section 614 property generally are included only in the accumulated production expenditures for the first productive well unit.

(ii) *Subsequent units.* Generally, real property associated with each productive or nonproductive well with respect to which production activities begin after the date the first productive well is placed in service and all production activities reasonably expected to be undertaken by, or for, the taxpayer or a related person are completed, constitutes a unit of real property. Additionally, a productive or nonproductive well that is included in a first productive well unit and for which development continues after the date the first productive well is placed in service and all production activities reasonably expected to be undertaken by, or for, the taxpayer or a related person are completed, generally is treated as a separate unit of property after that date. See, however, paragraph (c)(5) of this section, which provides rules for the treatment of costs included in the accumulated production expenditures of a first productive well unit.

(3) *Beginning of production period*—(i) *First productive well unit.* The beginning of the production period of the first productive well unit is determined as provided in paragraph (b) of this section.

(ii) *Subsequent wells.* In applying paragraph (b) of this section to subsequent well units (as described in paragraph (c)(2)(ii) of this section), any activities occurring prior to the date the production period ends for the first productive well unit are not taken into account in determining the beginning of the production period for the subsequent well units.

(4) *End of production period.* The end of the production period for both the first productive well unit and subsequent productive well units is determined as provided in paragraph (b)(2) of this section. See § 1.263A–12(d). Nonproductive wells included in the first productive well unit need not be plugged and abandoned for the production period to end for a first productive well unit.

(5) *Accumulated production expenditures*—(i) *First productive well unit.* The accumulated production expenditures for a first productive well unit include all costs incurred with respect to the section 614 property and associated real property at any time through the end of the production period for the first productive well unit. Thus, the costs of acquiring the section 614 property, the costs of taxes and similar items that are required to be capitalized under section 263A(a) with respect to the section 614 property, and the costs of common features, that are incurred at any

time through the end of the production period of the first productive well unit (section 614 costs) are included in the accumulated production expenditures for the first productive well unit.

(ii) *Subsequent well unit.* The accumulated production expenditures for a subsequent well do not include any costs included in the accumulated production expenditures for a first productive well unit. In the event that section 614 costs or common feature costs with respect to a section 614 property are incurred subsequent to the end of the production period of the first productive well unit, those common feature costs and undepleted section 614 costs are allocated among the accumulated production expenditures of wells being drilled as of the date such costs are incurred.

(6) *Allocation of interest capitalized with respect to first productive well unit.* Interest attributable to any productive or nonproductive well included in the first productive well unit (within the meaning of paragraph (c)(2)(ii) of this section) is allocated among and capitalized to the basis of the property associated with the first productive well unit. See §1.263A–8(a)(2).

(7) *Example.* The provisions of this paragraph (c) are illustrated by the following example.

Example. (i) Corporation Z, an oil company, acquired a section 614 property in an onshore tract, Tract B, for development. In 1995, Corporation Z began site preparation activities on Tract B and also commenced drilling Well 1 on Tract B. Corporation Z was unable to establish, as provided in paragraph (a) of this section, a definite plan identifying the number and location of other wells planned on Tract B. In 1996, Corporation Z began drilling Well 2. On May 1, 1997, Well 2, a productive well, was placed in service and all production activities reasonably expected to be undertaken with respect to Well 2 were completed. By that date, also, Well 1 was abandoned.

(ii) Well 2 is a first productive well (within the meaning of paragraph (c)(2)(i) of this section). Well 1 is a nonproductive well drilled prior to a first productive well. Under paragraph (c) of this section, Corporation Z must treat both Well 1 and Well 2 as part of the first productive well unit on the section 614 property. In accordance with paragraphs (c)(3) and (c)(4) of this section, the production period of the first productive well unit begins on the date physical site preparation activities are undertaken with respect to Well 1 in 1995 and ends on May 1, 1997, the date that Well 2 is placed in service and all production activities reasonably expected to be undertaken are completed. In accordance with paragraph (c)(5) of this section, the accumulated production expenditures for the first productive well unit include, among other capitalized costs, the entire section 614 property costs capitalized with respect to Tract B and all common feature costs incurred with respect to the section 614 property through May 1, 1997.

(iii) Any well that Corporation Z begins after May 1, 1997, is a separate unit of property. See paragraph (c)(2)(ii) of this section. Under paragraph (c)(3)(ii) of this section, the production period for any such well unit begins on the first day after May 1, 1997, on which Corporation Z undertakes physical site preparation activities with respect to the well unit. Moreover, Corporation Z does not include any of the section 614 property costs in the accumulated production expenditures for any well unit begun after May 1, 1997.

[T.D. 8584, 59 FR 67213, Dec. 29, 1994; 60 FR 16575, Mar. 31, 1995]

§1.263A–14 Rules for related persons.

Taxpayers must account for average excess expenditures allocated to related persons under applicable administrative pronouncements interpreting section 263A(f). See §601.601(d)(2)(ii)(*b*) of this chapter.

[T.D. 8584, 59 FR 67215, Dec. 29, 1994]

§1.263A–15 Effective dates, transitional rules, and anti-abuse rule.

(a) *Effective dates*—(1) Sections 1.263A–8 through 1.263A–15 generally apply to interest incurred in taxable years beginning on or after January 1, 1995. In the case of property that is inventory in the hands of the taxpayer, however, these sections are effective for taxable years beginning on or after January 1, 1995. Changes in methods of accounting necessary as a result of the rules in §§1.263A–8 through 1.263A–15 must be made under the terms and conditions prescribed by the Commissioner. Under these terms and conditions, the principles of §1.263A–7 must be applied in revaluing inventory property.

(2) For taxable years beginning before January 1, 1995, taxpayers must take reasonable positions on their federal income tax returns when applying section 263A(f). For purposes of this paragraph (a)(2), a reasonable position

is a position consistent with the temporary regulations, revenue rulings, revenue procedures, notices, and announcements concerning section 263A applicable in taxable years beginning before January 1, 1995. See § 601.601(d)(2)(ii)(*b*) of this chapter. For this purpose, Notice 88–99, 1988–2 C.B. 422, applies to taxable years beginning after August 17, 1988, in the case of inventory, and to interest incurred in taxable years beginning after August 17, 1988, in all other cases. Finally, under administrative procedures issued by the Commissioner, taxpayers may elect early application of §§ 1.263A–8 through 1.263A–15 to taxable years beginning on or after January 1, 1994, in the case of inventory property, and to interest incurred in taxable years beginning on or after January 1, 1994, in the case of property that is not inventory in the hands of the taxpayer.

(b) *Transitional rule for accumulated production expenditures*—(1) *In general.* Except as provided in paragraph (b)(2) of this section, costs incurred before the effective date of section 263A are included in accumulated production expenditures (within the meaning of § 1.263A–11) with respect to noninventory property only to the extent those costs were required to be capitalized under section 263 when incurred and would have been taken into account in determining the amount of interest required to be capitalized under former section 189 (relating to the capitalization of real property interest and taxes) or pursuant to an election that was in effect under section 266 (relating to the election to capitalize certain carrying charges).

(2) *Property used to produce designated property.* The basis of property acquired prior to 1987 and used to produce designated noninventory property after December 31, 1986, is included in accumulated production expenditures in accordance with § 1.263A–11(d) without regard to whether the basis would have been taken into account under former section 189 or section 266.

(c) *Anti-abuse rule.* The interest capitalization rules contained in §§ 1.263A–8 through 1.263A–15 must be applied by the taxpayer in a manner that is consistent with and reasonably carries out the purposes of section 263A(f). For example, in applying § 1.263A–10, regarding the definition of a unit of property, taxpayers may not divide a single unit of property to avoid property classifying the property as designated property. Similarly, taxpayers may not use loans in lieu of advance payments, tax-exempt parties, loan restructurings at measurement dates, or obligations bearing an unreasonably low rate of interest (even if such rate equals or exceeds the applicable Federal rate under section 1274(d)) to avoid the purposes of section 263A(f). For purposes of this paragraph (c), the presence of back-to-back loans with different rates of interest, and other uses of related parties to facilitate an avoidance of interest capitalization, evidences abuse. In such cases, the District Director may, based upon all the facts and circumstances, determine the amount of interest that must be capitalized in a manner that is consistent with and reasonably carries out the purposes of section 263A(f).

[T.D. 8584, 59 FR 67215, Dec. 29, 1994, as amended by T.D. 8728, 62 FR 42062, Aug. 5, 1997]

§ 1.264–1 Premiums on life insurance taken out in a trade or business.

(a) *When premiums are not deductible.* Premiums paid by a taxpayer on a life insurance policy are not deductible from the taxpayer's gross income, even though they would otherwise be deductible as trade or business expenses, if they are paid on a life insurance policy covering the life of any officer or employee of the taxpayer, or any person (including the taxpayer) who is financially interested in any trade or business carried on by the taxpayer, when the taxpayer is directly or indirectly a beneficiary of the policy. For additional provisions relating to the nondeductibility of premiums paid on life insurance policies (whether under section 162 or any other section of the Code), see section 262, relating to personal, living, and family expenses, and section 265, relating to expenses allocable to tax-exempt income.

(b) *When taxpayer is a beneficiary.* If a taxpayer takes out a policy for the purpose of protecting himself from loss in the event of the death of the insured, the taxpayer is considered a beneficiary directly or indirectly under the policy. However, if the taxpayer is not a beneficiary under the policy, the premiums so paid will not be disallowed as deductions merely because the taxpayer may derive a benefit from the increased efficiency of the officer or employee insured. See section 162 and the regulations thereunder. A taxpayer is considered a beneficiary under a policy where, for example, he, as a principal member of a partnership, takes out an insurance policy on his own life irrevocably designating his partner as the sole beneficiary in order to induce his partner to retain his investment in the partnership. Whether or not the taxpayer is a beneficiary under a policy, the proceeds of the policy paid by reason of the death of the insured may be excluded from gross income whether the beneficiary is an individual or a corporation, except in the case of (1) certain transferees, as provided in section 101(a)(2); (2) portions of amounts of life insurance proceeds received at a date later than death under the provisions of section 101(d); and (3) life insurance policy proceeds which are includible in the gross income of a husband or wife under section 71 (relating to alimony) or section 682 (relating to income of an estate or trust in case of divorce, etc.). (See section 101(e).) For further reference, see, generally, section 101 and the regulations thereunder.

§1.264–2 Single premium life insurance, endowment, or annuity contracts.

Amounts paid or accrued on indebtedness incurred or continued, directly or indirectly, to purchase or to continue in effect a single premium life insurance or endowment contract, or to purchase or to continue in effect a single premium annuity contract purchased (whether from the insurer, annuitant, or any other person) after March 1, 1954, are not deductible under section 163 or any other provision of chapter 1 of the Code. This prohibition applies even though the insurance is not on the life of the taxpayer and regardless of whether or not the taxpayer is the annuitant or payee of such annuity contract. A contract is considered a single premium life insurance, endowment, or annuity contract, for the purposes of this section, if substantially all the premiums on the contract are paid within four years from the date on which the contract was purchased, or if an amount is deposited after March 1, 1954, with the insurer for payment of a substantial number of future premiums on the contract.

§1.264–3 Effective date; taxable years ending after March 1, 1954, subject to the Internal Revenue Code of 1939.

Pursuant to section 7851(a)(1)(C), the regulations prescribed in §1.264–2, to the extent that they relate to amounts paid or accrued on indebtedness incurred or continued to purchase or carry a single premium annuity contract purchased after March 1, 1954, and to the extent they consider a contract a single premium life insurance, endowment, or annuity contract if an amount is deposited after March 1, 1954, with the insurer for payment of a substantial number of future premiums on the contract, shall also apply to taxable years beginning before January 1, 1954, and ending after March 1, 1954, and to taxable years beginning after December 31, 1953, and ending after March 1, 1954, but before August 17, 1954, although such years are subject to the Internal Revenue Code of 1939.

§1.264–4 Other life insurance, endowment, or annuity contracts.

(a) *General rule.* Except as otherwise provided in paragraphs (d) and (e) of this section, no deduction shall be allowed under section 163 or any other provision of chapter 1 of the Code for any amount (determined under paragraph (b) of this section) paid or accrued during the taxable year on indebtedness incurred or continued to purchase or continue in effect a life insurance, endowment, or annuity contract (other than a single premium contract or a contract treated as a single premium contract) if such indebtedness is incurred pursuant to a plan of purchase which contemplates the systematic direct or indirect borrowing of part or all of the increases in the cash value of such contract (either from the insurer or otherwise). For the purposes of the preceding sentence, the term *of purchase* includes the payment of part or all of the premiums on a contract, and not merely payment of the premium due upon inital issuance of the contract. The rule of this paragraph applies whether or not the taxpayer is the insured, payee, or annuitant under the contract. the rule of this paragraph does not apply to contracts purchased by the taxpayer on or before August 6, 1963, even though there is a substantial increase in premiums after such date. The rule of this paragraph does not apply to any amount paid or accrued on indebtedness incurred or continued to purchase or carry a single premium life insurance, endowment, or annuity contract (including a contract treated as a single premium contract); the treatment of such amounts is governed by § 1.264–2.

(b) *Determination of amount not allowed.* The amount not allowed as a deduction under paragraph (a) of this section is determined with reference to the entire amount of borrowing to purchase or carry the contract, and is not limited with reference to the amount of borrowing of increases in the cash value. The rule of this paragraph may be illustrated by the following example:

Example. A, a calendar year taxpayer using the cash receipts and disbursements method of accounting, on January 1, 1964, purchases from a life insurance company a policy in the amount of $100,000 with an annual gross premium of $2,200. For the first policy year, A pays the annual premium by means other than by borrowing. For the second, third, fourth, and fifth policy years, A continues the policy in effect by incurring indebtedness pursuant to a plan referred to in paragraph (a) of this section. The years and amounts applicable to the policy are as follows:

Years	Cumulative cash value of contract	Total loan outstanding	Interest paid at 4.8 percent
1964	$370	0	0
1965	2,175	$2,200	$105.60
1966	4,000	4,400	211.20
1967	5,865	6,600	316.80
1968	7,745	8,800	422.40

On these facts (assuming that none of the exceptions contained in paragraph (d) of this section are applicable), no deduction is allowed for the interest paid during the year 1968. Moreover, the interest deduction will be disallowed for the taxable years 1965 through 1967 if such taxable years are not closed by reason of the statute of limitations or other rule of law.

(c) *Special rules.* For purposes of this section:

(1) *Determination of existence of a plan which contemplates systematic borrowing*—(i) *In general.* The determination of whether indebtedness is incurred or continued pursuant to a plan referred to in paragraph (a) of this section shall be made on the basis of all the facts and circumstances in each case. Unless the taxpayer shows otherwise, in the case of borrowing in connection with premiums for more than three years, the existence of a plan referred to in paragraph (a) of this section will be presumed. The mere fact that a taxpayer does not borrow to pay a premium in a particular year does not in and of itself preclude the existence of a plan referred to in paragraph (a) of this section. A plan referred to in paragraph (a) of this section need not exist at the time the contract is entered into, but may come into existence at any time during the 7-year period following the taxpayer's purchase of the contract or following a substantial increase (referred to in paragraph (d)(1) of this section) in premiums on the contract.

(ii) *Premium attributable to more than one year.* For purposes of subdivision (i) of this subparagraph, if the stated annual premiums due on a contract vary in amount, borrowing in connection with any premium, the amount of which exceeds the amount of any other premium, on such contract may be considered borrowing to pay premiums for more than one year. The preceding sentence shall not apply where the borrowing is in connection with a substantially increased premium within the meaning of paragraph (d)(1) of this section.

(2) *Direct or indirect.* A plan referred to in paragraph (a) of this section may contemplate direct or indirect borrowing of increases in cash value of the contract directly or indirectly to pay premiums and many contemplate borrowing either from an insurance carrier, from a bank, or from any other person. Thus, for example, if a taxpayer borrows $100,000 from a bank and uses the funds to purchase securities, later borrows $100,000 from a second

bank and uses the funds to repay the first bank, later sells the securities and uses the funds as a part of a plan referred to in paragraph (a) of this section to pay premiums on a contract of cash value life insurance, the deduction for interest paid in continuing the loan from the second bank shall not be allowed (assuming that none of the exceptions contained in paragraph (d) of this section are applicable). Moreover, a plan referred to in paragraph (a) of this section need not involve a pledge of the contract, but may contemplate unsecured borrowing or the use of other property.

(d) *Exceptions.* No deduction shall be denied under paragraph (a) of this section with respect to any amount paid or accrued during a taxable year on indebtedness incurred or continued as part of a plan referred to in paragraph (a) of this section if any of the following exceptions apply.

(1) *The 7-year exception*—(i) *In general.* No part of 4 of the annual premiums due during the 7-year period (beginning with the date the first premium on the contract to which such plan relates was paid) is paid under such plan by means of indebtedness. For purposes of this exception, in the event of a substantial increase in any annual premium on a contract, a new 7-year period begins on the date such increased premium is paid. If premiums on a contract are payable other than on an annual basis (for example, monthly), the annual premium is the aggregate of premiums due for the year. See paragraph (c)(1)(ii) of this section for cases where one premium on a contract paid by means of indebtedness may be considered as more than one annual premium.

(ii) *Application of borrowings.* For purposes of subdivision (i) of this subparagraph, if during a 7-year period referred to in such subdivision the taxpayer, directly or indirectly, borrows with respect to more than one annual premium on a contract, such borrowing shall be considered first attributable to the premium for the current policy year (within the meaning of subdivision (iii) of this subparagraph) and then attributable to premiums for prior policy years beginning with the most recent prior policy year (but not including any prior policy year to the extent that such taxpayer has indebtedness outstanding with respect to the premium for such prior policy year). If such borrowing exceeds the premiums paid for the current policy year and for prior policy years and the taxpayer has, with respect to the current policy year, deposited premiums in advance of the due date of such premiums, such excess borrowing shall be considered indebtedness incurred to carry the contract which is attributable to the premiums deposited for succeeding policy years beginning with the premium for the next succeeding policy year. The preceding sentence shall not apply to a single premium contract referred to in § 1.264–2.

(iii) *Current policy year.* For purposes of subdivision (ii) of this subparagraph, the term *current policy year* refers to the policy year which begins with or within the taxable year of the taxpayer.

(iv) *Illustrations.* The provisions of subdivision (ii) of this subparagraph may be illustrated by the following examples:

Example 1. A, a calendar year taxpayer using the cash receipts and disbursements method of accounting, on January 1, 1964, purchases from a life insurance company a policy in the amount of $100,000 with an annual gross premium of $2,200. For the first four policy years, A initially pays the annual premium by means other than borrowing. On January 1, 1968, pursuant to a plan referred to in paragraph (a) of this section, A borrows $10,000 with respect to the policy. Such borrowing is considered first attributable to paying the premium for the year 1968 and then attributable to paying the premiums for the years 1967, 1966, 1965, and 1964 (in part). No deduction is allowed for the interest paid by A on the $10,000 indebtedness during the year 1968.

Example 2. The facts are the same as in *Example (1),* except that on January 1, 1964, A pays the first annual premium and deposits an amount equal to the second and third annual premiums, all such amounts initially being paid or deposited by means other than borrowing. On January 1, 1965, A deposits an amount equal to the fourth, fifth, and sixth annual premiums, and borrows $4,400 pursuant to a plan referred to in paragraph (a) of this section. Such borrowing is considered attributable to the premiums paid for the policy years 1965 and 1964. On January 1, 1966, A deposits an amount equal to the seventh, eighth, and ninth annual premiums, and borrows $6,600 pursuant to such plan. Such borrowing is considered attributable to the premium paid for the policy year 1966 and deposited for the policy years 1967 and 1968. No deduction is allowed for interest paid by A on the $11,000 indebtedness during 1966. Moreover, the interest deduction will be disallowed for the taxable year 1965. However, if this contract is treated as a single premium contract under § 1.264–2 (by reason of deposit with the insurer of an amount for payment of a substantial number of future premiums), the deduction for interest on indebtedness incurred or continued to purchase or carry the contract would be denied without reference to this section.

(2) *The $100 exception.* The total amount paid or accrued during the taxable year by the taxpayer who has entered one or more plans referred to in paragraph (a) of this section for which (without regard to this subparagraph) no deduction would be allowable under paragraph (a) of this section does not exceed $100. Where the amount so paid or accrued during the taxable year exceeds $100, the entire amount shall be subject to the general rule of paragraph (a) of this section.

(3) *The unforeseen events exception.* The amount is paid or accrued by the taxpayer on indebtedness incurred because of an unforeseen substantial loss of such taxpayer's income or an unforeseen substantial increase in such taxpayer's financial obligations. A loss of income or increase in financial obligations is not unforeseen, within the meaning of this subparagraph, if at the time of the purchase of the contract such event was or could have been foreseen. College education expenses are foreseeable; however, if college expenses substantially increase, then to the extent that such increases are unforeseen, this exception will apply. This exception applies only if the plan referred to in paragraph (a) of this section arises because of the unforeseen event. Thus, for example, if a taxpayer or his family incur substantial unexpected medical expenses or the taxpayer is laid off from his job, and for that reason systematically borrows against the cash value of a previously purchased contract, the deduction for the interest paid on the loan will not be denied, whether or not the loan is used to pay a premium on the contract.

(4) *The trade or business exception.* The indebtedness is incurred by the taxpayer in connection with his trade or business. To be within this exception, the indebtedness must be incurred to finance business obligations rather than to finance cash value life insurance. Thus, if a taxpayer pledges a life insurance, endowment, or annuity contract as part of the collateral for a loan to finance the expansion of inventory or capital improvements for his business, no part of the deduction for interest on such loan will be denied under paragraph (a) of this section. Borrowing by a business taxpayer to finance business life insurance such as under so-called keyman, split dollar, or stock retirement plans is not considered to be incurred in connection with the taxpayer's trade or business within the meaning of this subparagraph. The determination of whether the indebtedness is incurred in connection with the taxpayer's trade or business, within the meaning of this exception, rather than to finance cash value life insurance shall be made on the basis of all the facts and circumstances. The provisions of this subparagraph may be illustrated by the following examples:

Example 1. Corporation M each year borrows substantial sums to carry on its business. Corporation M agrees to provide a retirement plan for its employees and purchases level premium life insurance to fund its obligation under the plan. The mere fact that M Corporation purchases a cash value life insurance policy will not cause its deduction for interest paid on its normal indebtedness to be denied even though the policy is later used as part of the collateral for its normal indebtedness.

Example 2. Corporation R has $200,000 of bonds outstanding and purchases cash value life insurance policies on several of its key employees. Such purchase by R Corporation will not, of itself, cause its deduction for interest on its bonded indebtedness to be denied. If, however, the premiums on the life insurance policies are $10,000 each year, the cash value increases by $8,000 each year, and R Corporation increases its indebtedness by $10,000 each year, its deduction for interest on such indebtedness will not be allowed under the rule of paragraph (a) of this section. On the other hand, the absence of such a directly parallel increase will not of itself establish that the deduction for interest is allowable.

(e) *Applicability of section.* The rules of this section apply with respect to taxable years beginning after December 31, 1963, but only with respect to contracts purchased after August 6, 1963. With respect to contracts entered into on or before August 6, 1963, but purchased or acquired whether from the insurer, insured, or any other person (other than by gift, bequest, or inheritance, or in a transaction to which section 381(a) of the Code applies) after such date, the rules of this section apply after such purchase or acquisition.

[T.D. 6773, 29 FR 15751, Nov. 24, 1964]

§1.265–1 Expenses relating to tax-exempt income.

(a) *Nondeductibility of expenses allocable to exempt income.* (1) No amount shall be allowed as a deduction under any provision of the Code for any expense or amount which is otherwise allowable as a deduction and which is allocable to a class or classes of exempt income other than a class or classes of exempt interest income.

(2) No amount shall be allowed as a deduction under section 212 (relating to expenses for production of income) for any expense or amount which is otherwise allowable as a deduction and which is allocable to a class or classes of exempt interest income.

(b) *Exempt income and nonexempt income.* (1) As used in this section, the term *class of exempt income* means any class of income (whether or not any amount of income of such class is received or accrued) wholly exempt from the taxes imposed by Subtitle A of the Code. For purposes of this section, a class of income which is considered as wholly exempt from the taxes imposed by subtitle A includes any class of income which is:

(i) Wholly excluded from gross income under any provision of Subtitle A, or

(ii) Wholly exempt from the taxes imposed by Subtitle A under the provisions of any other law.

(2) As used in this section the term *nonexempt income* means any income which is required to be included in gross income.

(c) *Allocation of expenses to a class or classes of exempt income.* Expenses and amounts otherwise allowable which are directly allocable to any class or classes of exempt income shall be allocated thereto; and expenses and amounts directly allocable to any class or classes of nonexempt income shall be allocated thereto. If an expense or amount otherwise allowable is indirectly allocable to both a class of nonexempt income and a class of exempt income, a reasonable proportion thereof determined in the light of all the facts and circumstances in each case shall be allocated to each.

(d) *Statement of classes of exempt income; records.* (1) A taxpayer receiving any class of exempt income or holding any property or engaging in any activity the income from which is exempt shall submit with his return as a part thereof an itemized statement, in detail, showing (i) the amount of each class of exempt income, and (ii) the amount of expenses and amounts otherwise allowable allocated to each such class (the amount allocated by apportionment being shown separately) as required by paragraph (c) of this section. If an item is apportioned between a class of exempt income and a class of nonexempt income, the statement shall show the basis of the apportionment. Such statement shall also recite that each deduction claimed in the return is not in any way attributable to a class of exempt income.

(2) The taxpayer shall keep such records as will enable him to make the allocations required by this section. See section 6001 and the regulations thereunder.

§1.265–2 Interest relating to tax exempt income.

(a) *In general.* No amount shall be allowed as a deduction for interest on any indebtedness incurred or continued to purchase or carry obligations, the interest on which is wholly exempt from tax under subtitle A of the Code, such as municipal bonds, Panama Canal loan 3-percent bonds, or obligations of the United States, the interest on which is wholly exempt from tax under Subtitle A, and which were issued after September 24, 1917, and not originally subscribed for by the taxpayer. Interest paid or accrued within the taxable year on indebtedness incurred or continued to purchase or carry (1) obligations of the United States issued after September 24, 1917, the interest on which is not wholly exempt from the taxes imposed under Subtitle A of the Code, or (2) obligations of the United States issued after September 24, 1917, and originally subscribed for by the taxpayer, the interest on which is wholly exempt from the taxes imposed by Subtitle A of the Code, is deductible. For rules as to the inclusion in gross income of interest on certain governmental obligations, see section 103 and the regulations thereunder.

(b) *Special rule for certain financial institutions.* (1) No deduction shall be disallowed, for taxable years ending after February 26, 1964, under section 265(2) for interest paid or accrued by a financial institution which is a face-amount certificate company registered under the Investment Company Act of 1940 (15 U.S.C. 80a–1 and following) and which is subject to the banking laws of the State in which it is incorporated, on face-amount certificates (as defined in section 2(a)(15) of the Investment Company Act of 1940) issued by such institution and on amounts received for the purchase of such certificates to be issued by the institution, if the average amount of obligations, the interest on which is wholly exempt from the taxes imposed by Subtitle A of the Code, held by such institution during the taxable year, does not exceed 15 percent of the average amount of the total assets of such institution during such year. See subparagraph (3) of this paragraph for treatment of interest paid or accrued on face-amount certificates where the figure is in excess of 15 percent. Interest expense other than that paid or accrued on face-amount certificates or on amounts received for the purchase of such certificates does not come within the rules of this paragraph.

(2) This subparagraph is prescribed under the authority granted the Secretary or his delegate under section 265(2) to prescribe regulations governing the determination of the average amount of tax-exempt obligations and of the total assets held during an institution's taxable year. The average amount of tax-exempt obligations held during an institution's taxable year shall be the average of the amounts of tax-exempt obligations held at the end of each month ending within such taxable year. The average amount of total assets for a taxable year shall be the average of the total assets determined at the beginning and end of the institution's taxable year. If the Commissioner, however, determines that any such amount is not fairly representative of the average amount of tax-exempt obligations or total assets, as the case may be, held by such institution during such taxable year, then the Commissioner shall determine the amount which is fairly representative of the average amount of tax-exempt obligations or total assets, as the case may be. The percentage which the average amount of tax-exempt obligations is of the average amount of total assets is determined by dividing the average amount of tax-exempt obligations by the average amount of total assets, and multiplying by 100. The amount of tax-exempt obligations means that portion of the total assets of the institution which consists of obligations the interest on which is wholly exempt from tax under Subtitle A of the Code, and valued at their adjusted basis, appropriately adjusted for amortization of premium or discount. Total assets means the sum of the money, plus the aggregate of the adjusted basis of the property other than money held by the taxpayer in good faith for the purpose of the business. Such adjusted basis for any asset is its adjusted basis for determining gain upon sale or exchange for Federal income tax purposes.

(3) If the percentage computation required by subparagraph (2) of this paragraph results in a figure in excess of 15 percent for the taxable year, there is interest that does not come within the special rule for certain financial institutions contained in section 265(2). The amount of such interest is obtained by multiplying the total interest paid or accrued for the taxable year on face-amount certificates and on amounts received for the purchase of such certificates by the percentage figure equal to the excess of the percentage figure computed under subparagraph (2) of this paragraph over 15 percent. See

paragraph (a) for the disallowance of interest on indebtedness incurred or continued to purchase or carry obligations the interest on which is wholly exempt from tax under Subtitle A of the Code.

(4) Every financial institution claiming the benefits of the special rule for certain financial institutions contained in section 265(2) shall file with its return for the taxable year:

(i) A statement showing that it is a face-amount certificate company registered under the Investment Company Act of 1940 (15 U.S.C. 80a–1 and following) and that it is subject to the banking laws of the State in which it is incorporated.

(ii) A detailed schedule showing the computation of the average amount of tax-exempt obligations, the average amount of total assets of such institutions, and the total amount of interest paid or accrued on face-amount certificates and on amounts received for the purchase of such certificates for the taxable year.

[T.D. 6927, 32 FR 13221, Sept. 19, 1967]

§1.265–3 Nondeductibility of interest relating to exempt-interest dividends.

(a) *In general.* No deduction is allowed to a shareholder of a regulated investment company for interest on indebtedness that relates to exempt-interest dividends distributed by the company to the shareholder during the shareholder's taxable year.

(b) *Interest relating to exempt-interest dividends.* (1) All or a portion of the interest on an indebtedness relates to exempt-interest dividends if the indebtedness is either incurred or continued to purchase or carry shares of stock of a regulated investment company that distributes exempt-interest dividends (as defined in section 852(b)(5) of the Code) to the holder of the shares during the shareholder's taxable year.

(2) To determine the amount of interest that relates to the exempt-interest dividends the total amount of interest paid or accrued on the indebtedness is multiplied by a fraction. The numerator of the fraction is the amount of exempt-interest dividends received by the shareholder. The denominator of the fraction is the sum of the exempt-interest dividends and taxable dividends received by the shareholder (excluding capital gain dividends received by the shareholder and capital gains required to be included in the shareholder's computation of long-term capital gains under section 852(b)(3)(D)).

[T.D. 7601, 44 FR 16013, Mar. 16, 1979]

§1.266–1 Taxes and carrying charges chargeable to capital account and treated as capital items.

(a)(1) *In general.* In accordance with section 266, items enumerated in paragraph (b)(1) of this section may be capitalized at the election of the taxpayer. Thus, taxes and carrying charges with respect to property of the type described in this section are chargeable to capital account at the election of the taxpayer, notwithstanding that they are otherwise expressly deductible under provisions of Subtitle A of the Code. No deduction is allowable for any items so treated.

(2) See §§1.263A–8 through 1.263A–15 for rules regarding the requirement to capitalize interest, that apply prior to the application of this section. After applying §§1.263A–8 through 1.263A–15, a taxpayer may elect to capitalize interest under section 266 with respect to designated property within the meaning of §1.263A–8(b), provided a computation under any provision of the Internal Revenue Code is not thereby materially distorted, including computations relating to the source of deductions.

(b) *Taxes and carrying charges.* (1) The taxpayer may elect, as provided in paragraph (c) of this section, to treat the items enumerated in this subparagraph which are otherwise expressly deductible under the provisions of Subtitle A of the Code as chargeable to capital account either as a component of original cost or other basis, for the purposes of section 1012, or as an adjustment to basis, for the purposes of section 1016(a)(1). The items thus chargeable to capital account are:

(i) In the case of unimproved and unproductive real property: Annual taxes, interest on a mortgage, and other carrying charges.

(ii) In the case of real property, whether improved or unimproved and whether productive or unproductive:

(a) Interest on a loan (but not theoretical interest of a taxpayer using his own funds),

(b) Taxes of the owner of such real property measured by compensation paid to his employees,

(c) Taxes of such owner imposed on the purchase of materials, or on the storage, use, or other consumption of materials, and

(d) Other necessary expenditures, paid or incurred for the development of the real property or for the construction of an improvement or additional improvement to such real property, up to the time the development or construction work has been completed. The development or construction work with respect to which such items are incurred may relate to unimproved and unproductive real estate whether the construction work will make the property productive of income subject to tax (as in the case of a factory) or not (as in the case of a personal residence), or may relate to property already improved or productive (as in the case of a plant addition or improvement, such as the construction of another floor on a factory or the installation of insulation therein).

(iii) In the case of personal property:

(a) Taxes of an employer measured by compensation for services rendered in transporting machinery or other fixed assets to the plant or installing them therein,

(b) Interest on a loan to purchase such property or to pay for transporting or installing the same, and

(c) Taxes of the owner thereof imposed on the purchase of such property or on the storage, use, or other consumption of such property, paid or incurred up to the date of installation or the date when such property is first put into use by the taxpayer, whichever date is later.

(iv) Any other taxes and carrying charges with respect to property, otherwise deductible, which in the opinion of the Commissioner are, under sound accounting principles, chargeable to capital account.

(2) The sole effect of section 266 is to permit the items enumerated in subparagraph (1) of this paragraph to be chargeable to capital account notwithstanding that such items are otherwise expressly deductible under the provisions of Subtitle A of the Code. An item not otherwise deductible may not be capitalized under section 266.

(3) In the absence of a provision in this section for treating a given item as a capital item, this section has no effect on the treatment otherwise accorded such item. Thus, items which are otherwise deductible are deductible notwithstanding the provisions of this section, and items which are otherwise treated as capital items are to be so treated. Similarly, an item not otherwise deductible is not made deductible by this section. Nor is the absence of a provision in this section for treating a given item as a capital item to be construed as withdrawing or modifying the right now given to the taxpayer under any other provisions of subtitle A of the Code, or of the regulations thereunder, to elect to capitalize or to deduct a given item.

(c) *Election to charge taxes and carrying charges to capital account.* (1) If for any taxable year there are two or more items of the type described in paragraph (b)(1) of this section, which relate to the same project to which the election is applicable, the taxpayer may elect to capitalize any one or more of such items even though he does not elect to capitalize the remaining items or to capitalize items of the same type relating to other projects. However, if expenditures for several items of the same type are incurred with respect to a single project, the election to capitalize must, if exercised, be exercised as to all items of that type. For purposes of this section, a *project* means, in the case of items described in paragraph (b)(1)(ii) of this section, a particular development of, or construction of an improvement to, real property, and in the case of items described in paragraph (b)(1)(iii) of this section, the transportation and installation of machinery or other fixed assets.

(2)(i) An election with respect to an item described in paragraph (b)(1)(i) of this section is effective only for the year for which it is made.

(ii) An election with respect to an item described in:

(a) Paragraph (b)(1)(ii) of this section is effective until the development or

construction work described in that subdivision has been completed;

(b) Paragraph (b)(1)(iii) of this section is effective until the later of either the date of installation of the property described in that subdivision, or the date when such property is first put into use by the taxpayer;

(*c*) Paragraph (b)(1)(iv) of this section is effective as determined by the Commissioner.

Thus, an item chargeable to capital account under this section must continue to be capitalized for the entire period described in this subdivision applicable to such election although such period may consist of more than one taxable year.

(3) If the taxpayer elects to capitalize an item or items under this section, such election shall be exercised by filing with the original return for the year for which the election is made a statement indicating the item or items (whether with respect to the same project or to different projects) which the taxpayer elects to treat as chargeable to capital account. Elections filed for taxable years beginning before January 1, 1954, and for taxable years ending before August 17, 1954, under section 24(a)(7) of the Internal Revenue Code of 1939, and the regulations thereunder, shall have the same effect as if they were filed under this section. See section 7807(b)(2).

(d) The following examples are illustrative of the application of the provisions of this section:

Example 1. In 1956 and 1957 A pays annual taxes and interest on a mortgage on a piece of real property. During 1956, the property is vacant and unproductive, but throughout 1957 A operates the property as a parking lot. A may capitalize the taxes and mortgage interest paid in 1956, but not the taxes and mortgage interest paid in 1957.

Example 2. In February 1957, B began the erection of an office building for himself. B in 1957, in connection with the erection of the building, paid $6,000 social security taxes, which in his 1957 return he elected to capitalize. B must continue to capitalize the social security taxes paid in connection with the erection of the building until its completion.

Example 3. Assume the same facts as in *Example (2)* except that in November 1957, B also begins to build a hotel. In 1957 B pays $3,000 social security taxes in connection with the erection of the hotel. B's election to capitalize the social security taxes paid in erecting the office building started in February 1957 does not bind him to capitalize the social security taxes paid in erecting the hotel; he may deduct the $3,000 social security taxes paid in erecting the hotel.

Example 4. In 1957, M Corporation began the erection of a building for itself, which will take three years to complete. M Corporation in 1957 paid $4,000 social security taxes and $8,000 interest on a building loan in connection with this building. M Corporation may elect to capitalize the social security taxes although it deducts the interest charges.

Example 5. C purchases machinery in 1957 for use in his factory. He pays social security taxes on the labor for transportation and installation of the machinery, as well as interest on a loan to obtain funds to pay for the machinery and for transportation and installation costs. C may capitalize either the social security taxes or the interest, or both, up to the date of installation or until the machinery is first put into use by him, whichever date is later.

(e) *Allocation.* If any tax or carrying charge with respect to property is in part a type of item described in paragraph (b) of this section and in part a type of item or items with respect to which no election to treat as a capital item is given, a reasonable proportion of such tax or carrying charge, determined in the light of all the facts and circumstances in each case, shall be allocated to each item. The rule of this paragraph may be illustrated by the following example:

Example. N Corporation, the owner of a factory in New York on which a new addition is under construction, in 1957 pays its general manager, B, a salary of $10,000 and also pays a New York State unemployment insurance tax of $81 on B's salary. B spends nine-tenths of his time in the general business of the firm and the remaining one-tenth in supervising the construction work. N Corporation treats as expenses $9,000 of B's salary, and charges the remaining $1,000 to capital account. N Corporation may elect to capitalize $8.10 of the $81 New York State unemployment insurance tax paid in 1957 since such tax is deductible under section 164.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 8584, 59 FR 67215, Dec. 29, 1994]

§ 1.267(a)–1 Deductions disallowed.

(a) *Losses.* Except in cases of distributions in corporate liquidations, no deduction shall be allowed for losses arising from direct or indirect sales or exchanges of property between persons who, on the date of the sale or exchange, are within any one of the relationships specified in section 267(b). See § 1.267(b)–1.

(b) *Unpaid expenses and interest.* (1) No deduction shall be allowed a taxpayer for trade or business expenses otherwise deductible under section 162, for expenses for production of income otherwise deductible under section 212, or for interest otherwise deductible under section 163:

(i) If, at the close of the taxpayer's taxable year within which such items are accrued by the taxpayer or at any time within 2 1/2 months thereafter, both the taxpayer and the payee are persons within any one of the relationships specified in section 267(b) (see § 1.267(b)–1); and

(ii) If the payeee is on the cash receipts and disbursements method of accounting with respect to such items of gross income for his taxable year in which or with which the taxable year of accrual by the debtor-taxpayer ends; and

(iii) If, within the taxpayer's taxable year within which such items are accrued by the taxpayer and 2 1/2 months after the close thereof, the amount of such items is not paid and the amount of such items is not otherwise (under the rules of constructive receipt) includible in the gross income of the payee.

(2) The provisions of section 267(a)(2) and this paragraph do not otherwise affect the general rules governing the allowance of deductions under an accrual method of accounting. For example, if the accrued expenses or interest are paid after the deduction has become disallowed under section 267(a)(2), no deduction would be allowable for the taxable year in which payment is made, since an accrual item is deductible only in the taxable year in which it is properly accruable.

(3) The expenses and interest specified in section 267(a)(2) and this paragraph shall be considered as paid for purposes of that section to the extent of the fair market value on the date of issue of notes or other instruments of similar effect received in payment of such expenses or interest if such notes or other instruments were issued in such payment by the taxpayer within his taxable year or within 2 1/2 months after the close thereof. The fair market value on the date of issue of such notes or other instruments of similar effect is includible in the gross income of the payee for the taxable year in which he receives the notes or other instruments.

(4) The provisions of this paragraph may be illustrated by the following example:

Example. A, an individual, is the holder and owner of an interest-bearing note of the M Corporation, all the stock of which was owned by him on December 31, 1956. A and the M Corporation make their income tax returns for a calendar year. The M Corporation uses an accrual method of accounting. A uses a combination of accounting methods permitted under section 446(c)(4) in which he uses the cash receipts and disbursements method in respect of items of gross income. The M Corporation does not pay any interest on the note to A during the calendar year 1956 or within 2 1/2 months after the close of that year, nor does it credit any interest to A's account in such a manner that it is subject to his unqualified demand and thus is constructively received by him. M Corporation claims a deduction for the year 1956 for the interest accruing on the note in that year. Since A is on the cash receipts and disbursements method in respect of items of gross income, the interest is not includible in his return for the year 1956. Under the provisions of section 267(a)(2) and this paragraph, no deduction for such interest is allowable in computing the taxable income of the M Corporation for the taxable year 1956 or for any other taxable year. However, if the interest had actually been paid to A on or before March 15, 1957, or if it had been made available to A before that time (and thus had been constructively received by him), the M Corporation would be allowed to deduct the amount of the payment in computing its taxable income for 1956.

(c) *Scope of section.* Section 267(a) requires that deductions for losses or unpaid expenses or interest described therein be disallowed even though the transaction in which such losses, expenses, or interest were incurred was a bona fide transaction. However, section 267 is not exclusive. No deduction for losses or unpaid expenses or interest arising in a transaction which is not bona fide will be allowed even though section 267 does not apply to the transaction.

§1.267(a)–2T Temporary regulations; questions and answers arising under the Tax Reform Act of 1984 (temporary).

(a) *Introduction*—(1) *Scope.* This section prescribes temporary question and answer regulations under section 267(a) and related provisions as amended by section 174 of the Tax Reform Act of 1984, Pub. L. No. 98–369.

(2) *Effective date.* Except as otherwise provided by *Answer 2* or *Answer 3* in paragraph (c) of this section, the effective date set forth in section 174(c) of the Tax Reform Act of 1984 applies to this section.

(b) *Questions applying section 267(a)(2) and (b) generally.* The following questions and answers deal with the application of section 267(a)(2) and (b) generally:

Question 1: Does section 267(a)(2) ever apply to defer the deduction of an otherwise deductible amount if the person to whom the payment is to be made properly uses the completed contract method of accounting with respect to such amount?

Answer 1: No. Section 267(a)(2) applies only if an otherwise deductible amount is owed to a related person under whose method of accounting such amount is not includible in income unless paid to such person. Regardless of when payment is made, an amount owed to a contractor using the completed contract method of accounting is includible in the income of the contractor in accordance with §1.451–3(d) in the year in which the contract is completed or in which certain disputes are resolved.

Question 2: Does section 267(a)(2) ever apply to defer the deduction of otherwise deductible original issue discount as defined in sections 163(e) and 1271 through 1275 (‘‘the OID rules’’)?

Answer 2. No. Regardless of when payment is made, an amount owed to a lender that constitutes original issue discount is included in the income of the lender periodically in accordance with the OID rules. Similarly, section 267(a)(2) does not apply to defer an otherwise deductible amount to the extent section 467 or section 7872 requires periodic inclusion of such amount in the income of the person to whom payment is to be made, even though payment has not been made.

Question 3: Does section 267(a)(2) ever apply to defer the deduction of otherwise deductible unstated interest determined to exist under section 483?

Answer 3: Yes. If section 483 recharacterizes any amount as unstated interest and the other requirements of section 267(a)(2) are met, a deduction for such unstated interest will be deferred under section 267.

Question 4: Does section 267(a)(2) ever apply to defer the deduction of otherwise deductible cost recovery, depreciation, or amortization?

Answer 4: Yes, in certain cases. In general, section 267(a)(2) does not apply to defer the deduction of otherwise deductible cost recovery, depreciation, or amortization. Notwithstanding this general rule, if the other requirements of section 267(a)(2) are met, section 267(a)(2) does apply to defer deductions for cost recovery, depreciation, or amortization of an amount owed to a related person for interest or rent or for the performance or nonperformance of services, which amount the taxpayer payor capitalized or treated as a deferred expense (unless the taxpayer payor elected to capitalize or defer the amount and section 267(a)(2) would not have deferred the deduction of such amount if the taxpayer payor had not so elected). Amounts owed for services that may be subject to this provision include, for example, amounts owed for acquisition, development, or organizational services or for covenants not to compete. In applying this rule, payments made between persons described in any of the paragraphs of section 267(b) (as modified by section 267(e)) will be closely scrutinized to determine whether they are made in respect of capitalized costs (or costs treated as deferred expenses) that are subject to deferral under section 267(a)(2), or in respect of other capitalized costs not so subject.

Question 5: If a deduction in respect of an otherwise deductible amount is deferred by section 267(a)(2) and, prior to the time the amount is includible in the gross income of the person to whom payment is to be made, such person and the payor taxpayer cease to be persons specified in any of the paragraphs of section 267(b) (as modified by section 267(e)), is the deduction allowable as of the day on which the relationship ceases?

Answer 5: No. The deduction is not allowable until the day as of which the amount is includible in the gross income of the person to whom payment of the amount is made, even though the relationship ceases to exist at an earlier time.

Question 6: Do references in other sections to persons described in section 267(b) incorporate changes made to section 267(b) by section 174 of the Tax Reform Act of 1984?

Answer 6: Yes. References in other sections to persons described in section 267(b) take into account changes made to section 267(b) by section 174 of the Tax Reform Act of 1984 (without modification by section 267(e)(1)). For example, a transfer after December 31, 1983 (the effective date of the new section 267(b)(3) relationship added by the Tax Reform Act of 1984) of section 1245 class property placed in service before January 1, 1981, from one corporation to another corporation, 11 percent of the stock of which is owned by the first corporation, will not constitute recovery property (as defined in section 168) in the hands of the second corporation by reason of section 168(e)(4) (A)(i) and (D).

(c) *Questions applying section 267(a) to partnerships.* The following questions and answers deal with the application of section 267(a) to partnerships:

Question 1: Does section 267(a) disallow losses and defer otherwise deductible amounts at the partnership (entity) level?

Answer 1: Yes. If a loss realized by a partnership from a sale or exchange of property is disallowed under section 267(a)(1), that loss shall not enter into the computation of the partnership's taxable income. If an amount that otherwise would be deductible by a partnership is deferred by section 267(a)(2), that amount shall not enter into the computation of the partnership's taxable income until the taxable year of the partnership in which falls the day on which the amount is includible in the gross income of the person to whom payment of the amount is made.

Question 2: Does section 267(a)(1) ever apply to disallow a loss if the sale or exchange giving rise to the loss is between two partnerships even though the two partnerships are not persons specified in any of the paragraphs of section 267(b)?

Answer 2: Yes. If the other requirements of section 267(a)(1) are met, section 267(a)(1) applies to such losses arising as a result of transactions entered into after December 31, 1984 between partnerships not described in any of the paragraphs of section 267(b) as follows, and § 1.267(b)–1(b) does not apply. If the two partnerships have one or more common partners (*i.e.,* if any person owns directly, indirectly, or constructively any capital or profits interest in each of such partnerships), or if any partner in either partnership and one or more partners in the other partnership are persons specified in any of the paragraphs of section 267(b) (without modification by section 267(e)), a portion of the selling partnership's loss will be disallowed under section 267(a)(1). The amount disallowed under this rule is the greater of: (1) The amount that would be disallowed if the transaction giving rise to the loss had occurred between the selling partnership and the separate partners of the purchasing partnership (in proportion to their respective interests in the purchasing partnership); or (2) the amount that would be disallowed if such transaction had occurred between the separate partners of the selling partnership (in proportion to their respective interests in the selling partnership) and the purchasing partnership. Notwithstanding the general rule of this paragraph (c) *Answer 2,* no disallowance shall occur if the amount that would be disallowed pursuant to the immediately preceding sentence is less than 5 percent of the loss arising from the sale or exchange.

Question 3: Does section 267(a)(2) ever apply to defer an otherwise deductible amount if the taxpayer payor is a partnership and the person to whom payment of such amount is to be made is a partnership even though the two partnerships are not persons specified in any of the paragraphs of section 267(b) (as modified by section 267(e))?

Answer 3: Yes. If the other requirements of section 267(a)(2) are met, section 267(a)(2) applies to such amounts arising as a result of transactions entered into after December 31, 1984 between partnerships not described in any of the paragraphs of section 267(b) (as modified by section 267(e)) as follows, and §1.267(b)–1(b) does not apply. If the two partnerships have one or more common partners (*i.e.*, if any person owns directly, indirectly, or constructively any capital or profits interest in each of such partnerships), or if any partner in either partnership and one or more partners in the other partnership are persons specified in any of the paragraphs of section 267(b) (without modification by section 267(e)), a portion of the payor partnership's otherwise allowable deduction will be deferred under section 267(a)(2). The amount deferred under this rule is the greater of: (1) The amount that would be deferred if the transaction giving rise to the otherwise allowable deduction had occurred between the payor partnership and the separate partners of the payee partnership (in proportion to their respective interests in the payee partnership); or (2) the amount that would be deferred if such transaction had occurred between the separate partners of the payor partnership (in proportion to their respective interests in the payor partnership) and the payee partnership. Notwithstanding the general rule of this paragraph (c) *Answer 3*, no deferral shall occur if the amount that would be deferred pursuant to the immediately preceding sentence is less than 5 percent of the otherwise allowable deduction.

Example. On May 1, 1985, partnership AB enters into a transaction whereby it accrues an otherwise deductible amount to partnership AC. AC is on the cash receipts and disbursements method of accounting. A holds a 5 percent capital and profits interest in AB and a 49 percent capital and profits interest in AC, and A's interest in each item of the income, gain, loss, deduction, and credit of each partnership is 5 percent and 49 percent, respectively. B and C are not related. Notwithstanding that AB and AC are not persons specified in section 267(b), 49 percent of the deduction in respect of such amount will be deferred under section 267(a)(2). The result would be the same if A held a 49 percent interest in AB and a 5 percent interest in AC. However, if A held more than 50 percent of the capital or profits interest of either AB or AC, the entire deduction in respect of such amount would be deferred under section 267(a)(2).

Question 4: What does the phrase *incurred at an annual rate not in excess of 12 percent* mean as used in section 267(e)(5)(C)(ii)?

Answer 4: The phrase refers to interest that accrues but is not includible in the income of the person to whom payment is to be made during the taxable year of the payor. Thus, in determining whether the requirements of section 267(e)(5) (providing an exception to certain provisions of section 267 for certain expenses and interest of partnerships owning low income housing) are met with respect to a transaction, the requirement of section 267(e)(5)(C)(ii) will be satisfied, even though the total interest (both stated and unstated) paid or accrued in any taxable year of the payor taxpayer exceeds 12 percent, if the interest in excess of 12 percent per annum, compounded semi-annually, on the outstanding loan balance (principal and accrued but unpaid interest) is includible in the income of the person to whom payment is to be made no later than the last day of such taxable year of the payor taxpayer.

[T.D. 7991, 49 FR 46995, Nov. 30, 1984]

§1.267(a)–3 Deduction of amounts owed to related foreign persons.

(a) *Purpose and scope.* This section provides rules under section 267(a) (2) and (3) governing when an amount owed to a related foreign person that is otherwise deductible under Chapter 1 may be deducted. Paragraph (b) of this section provides the general rules, and paragraph (c) of this section provides exceptions and special rules.

(b) *Deduction of amount owed to related foreign person*—(1) *In general.* Except as provided in paragraph (c) of this section, section 267(a)(3) requires a taxpayer to use the cash method of accounting with respect to the deduction of amounts owed to a related foreign person. An amount that is owed to a related foreign person and that is otherwise deductible under Chapter 1 thus may not be deducted by the taxpayer until such amount is paid to the related foreign person. For purposes of this section, a related foreign person is any person that is not a United States person within the meaning of section 7701(a)(30), and that is related (within the meaning of section 267(b)) to the taxpayer at the close of the taxable year in which the amount incurred by the taxpayer would otherwise be deductible. Section 267(f) defines *controlled group* for purposes of section 267(b) without regard to the limitations of section 1563(b). An amount is treated as paid for purposes of this section if the amount is considered paid for purposes of section 1441 or section 1442 (including an amount taken into account pursuant to section 884(f)).

(2) *Amounts covered.* This section applies to otherwise deductible amounts that are of a type described in section 871(a)(1) (A), (B) or (D), or in section 881(a) (1), (2) or (4). The rules of this section also apply to interest that is from sources outside the United States. Amounts other than interest that are from sources outside the United States, and that are not income of a related foreign person effectively connected with the conduct by such related foreign person of a trade or business within the United States, are not subject to the rules of section 267(a) (2) or (3) or this section. See paragraph (c) of this section for rules governing the treatment of amounts that are income of a related foreign person effectively connected with the conduct of a trade or business within the United States by such related foreign person.

(3) *Change in method of accounting.* A taxpayer that uses a method of accounting other than that required by the rules of this section must change its method of accounting to conform its method to the rules of this section. The taxpayer's change in method must be made pursuant to the rules of section 446(e), the regulations thereunder, and any applicable administrative procedures prescribed by the Commissioner. Because the rules of this section prescribe a method of accounting, these rules apply in the determination of taxpayer's earnings and profits pursuant to § 1.1312–6(a).

(4) *Examples.* The provisions of this paragraph (b) may be illustrated by the following examples:

Example 1. (i) FC, a corporation incorporated in Country X, owns 100 percent of the stock of C, a domestic corporation. C uses the accrual method of accounting in computing its income and deductions, and is a calendar year taxpayer. In Year 1, C accrues an amount owed to FC for interest. C makes an actual payment of the amount owed to FC in Year 2.

(ii) Regardless of its source, the interest owed to FC is an amount to which this section applies. Pursuant to the rules of this paragraph (b), the amount owed to FC by C will not be allowable as a deduction in Year 1. Section 267 does not preclude the deduction of this amount in Year 2.

Example 2. (i) RS, a domestic corporation, is the sole shareholder of FSC, a foreign sales corporation. Both RS and FSC use the accrual method of accounting. In Year 1, RS accrues $z owed to FSC for commissions earned by FSC in Year 1. Pursuant to the foreign sales company provisions, sections 921 through 927, a portion of this amount, $x, is treated as effectively connected income of FSC from sources outside the United States. Accordingly, the rules of section 267(a)(3) and paragraph (b) of this section do not apply. See paragraph (c) of this section for the rules governing the treatment of amounts that are effectively connected income of FSC.

(ii) The remaining amount of the commission, $y, is classified as exempt foreign trade income under section 923(a)(3) and is treated as income of FSC from sources outside the United States that is not effectively connected income. This amount is one to which the provisions of this section do not apply, since it is an amount other than interest from sources outside the United States and is not effectively connected income. Therefore, a deduction for $y is allowable to RS as of the day on which it accrues the otherwise deductible amount, without regard to section 267 (a)(2) and (a)(3) and the regulations thereunder.

(c) *Exceptions and special rules*—(1) *Effectively connected income subject to United States tax.* The provisions of section 267(a)(2) and the regulations thereunder, and not the provisions of paragraph (b) of this section, apply to an amount that is income of the related foreign person that is effectively connected with the conduct of a United States trade or business of such related foreign person. An amount described in this paragraph (c)(1) thus is allowable as a deduction as of the day on which the amount is includible in the gross income of the related foreign person as effectively connected income under sections 872(a)(2) or 882(b) (or, if later, as of the day on which the deduction would be so allowable but for section 267(a)(2)). However, this paragraph (c)(1) does not apply if the related foreign person is exempt from United States income tax on the amount owed, or is subject to a reduced rate of tax, pursuant to a treaty obligation of the United States (such as under an article relating to the taxation of business profits).

(2) *Items exempt from tax by treaty.* Except with respect to interest, neither paragraph (b) of this section nor section 267 (a)(2) or (a)(3) applies to any amount that is income of a related foreign person with respect to which the related foreign person is exempt from United States taxation on the amount owed pursuant to a treaty obligation of the United States (such as under an article relating to the taxation of business profits). Interest that is effectively connected income of the related foreign person under sections 872(a)(2) or 882(b) is an amount covered by paragraph (c)(1) of this section. Interest that is not effectively connected income of the related foreign person is an amount covered by paragraph (b) of this section, regardless of whether the related foreign person is exempt from United States taxation on the amount owed pursuant to a treaty obligation of the United States.

(3) *Items subject to reduced rate of tax by treaty.* Paragraph (b) of this section applies to amounts that are income of a related foreign person with respect to which the related foreign person claims a reduced rate of United States income tax on the amount owed pursuant to a treaty obligation of the United States (such as under an article relating to the taxation of royalties).

(4) *Amounts owed to a foreign personal holding company, controlled foreign corporation, or passive foreign investment company*—(i) *Foreign personal holding companies.* If an amount to which paragraph (b) of this section otherwise applies is owed to a related foreign person that is a foreign personal holding company within the meaning of section 552, then the amount is allowable as a deduction as of the day on which the amount is includible in the income of the foreign personal holding company. The day on which the amount is includible in income is determined with reference to the method of accounting under which the foreign personal holding company computes its taxable income and earnings and profits for purposes of sections 551 through 558. See section 551(c) and the regulations thereunder for the reporting requirements of the foreign personal holding company provisions (sections 551 through 558).

(ii) *Controlled foreign corporations.* If an amount to which paragraph (b) of this section otherwise applies is owed to a related foreign person that is a controlled foreign corporation within the meaning of section 957, then the amount is allowable as a deduction as of the day on which the amount is includible in the income of the controlled foreign corporation. The day on which the amount is includible in income is determined with reference to the method of accounting under which the controlled foreign corporation computes its taxable income and earnings and profits for purposes of sections 951 through 964. See section 6038 and the regulations thereunder for the reporting requirements of the controlled foreign corporation provisions (sections 951 through 964).

(iii) *Passive foreign investment companies.* If an amount to which paragraph (b) of this section otherwise applies is owed to a related foreign person that is a passive foreign investment company within the meaning of section 1296, then the amount is allowable as a deduction as of the day on which amount is includible in the income of the passive foreign investment company. The day on which the amount is includible in income is determined with reference to the method of accounting under which the earnings and profits of the passive foreign investment company are computed for purposes of sections 1291 through 1297. See sections 1291 through 1297 and the regulations thereunder for the reporting requirements of the passive foreign investment company provisions. This exception shall apply, however, only if the person that owes the amount at issue has made and has in effect an election pursuant to section 1295 with respect to the passive foreign investment company to which the amount at issue is owed.

(iv) *Examples.* The rules of this paragraph (c)(4) may be illustrated by the following examples. Application of the provisions of sections 951 through 964 are provided for illustration only, and do not provide substantive rules concerning the operation of those provisions. The principles of these examples apply equally to the provisions of paragraphs (c)(4) (i) through (iii) of this section.

Example 1. P, a domestic corporation, owns 100 percent of the total combined voting power and value of the stock of both FC1 and FC2. P is a calendar year taxpayer that uses the accrual method of accounting in computing its income and deductions. FC1 is incorporated in Country X, and FC2 is incorporated in Country Y. FC1 and FC2 are controlled foreign corporations within the meaning of section 957, and are both calendar year taxpayers. FC1 computes its taxable income and earnings and profits, for purposes of sections 951 through 964, using the accrual method of accounting, while FC2 uses the cash method. In Year 1 FC1 has gross income of $10,000 that is described in section 952 (a) (''subpart F income''), and which includes interest owed to FC1 by P that is described in paragraph (b) of this section and that is otherwise allowable as a deduction to P under chapter 1. The interest owed to FC1 is allowable as a deduction to P in Year 1.

Example 2. The facts are the same as in *Example 1,* except that in Year 1 FC1 reports no subpart F income because of the application of section 954 (b)(3)(A) (the subpart F de minimis rule). Because the amount owed to FC1 by P is includible in FC1's gross income in Year 1, the interest owed to FC1 is allowable as a deduction to P in Year 1.

Example 3. The facts are the same as in *Example 1.* In Year 1, FC1 accrues interest owed to FC2 that would be allowable as a deduction by FC1 under chapter 1 if FC1 were a domestic corporation. The interest owed to FC2 by FC1 is paid by FC1 in Year 2. Because FC2 uses the cash method of accounting in computing its taxable income for purposes of subpart F, the interest owed by FC1 is allowable as a deduction by FC1 in Year 2, and not in Year 1.

(d) *Effective date.* The rules of this section are effective with respect to interest that is allowable as a deduction under chapter 1 (without regard to the rules of this section) in taxable years beginning after December 31, 1983, but are not effective with respect to interest that is incurred with respect to indebtedness incurred on or before September 29, 1983, or incurred after that date pursuant to a contract that was binding on that date and at all times thereafter (unless the indebtedness or the contract was renegotiated, extended, renewed, or revised after that date). The regulations in this section issued under section 267 apply to all other deductible amounts that are incurred after July 31, 1989, but do not apply to amounts that are incurred pursuant to a contract that was binding on September 29, 1983, and at all times thereafter (unless the contract was renegotiated, extended, renewed, or revised after that date).

[T.D. 8465, 58 FR 237, Jan. 5, 1993]

§ 1.267(b)–1 Relationships.

(a) *In general.* (1) The persons referred to in section 267(a) and § 1.267 (a)–1 are specified in section 267(b).

(2) Under section 267(b)(3), it is not necessary that either of the two corporations be a personal holding company or a foreign personal holding company for the taxable year in which the sale or exchange occurs or in which the expenses or interest are properly accruable, but either one of them must be such a company for the taxable year next preceding the taxable year in which the sale or exchange occurs or in which the expenses or interest are accrued.

(3) Under section 267(b)(9), the control of certain educational and charitable organizations exempt from tax under section 501 includes any kind of control, direct or indirect, by means of which a person in fact controls such an organization, whether or not the control is legally enforceable and regardless of the method by which the control is exercised or exercisable. In the case of an individual, control possessed by the individual's family, as defined in section 267(c)(4) and paragraph (a)(4) of § 1.267 (c)–1, shall be taken into account.

(b) *Partnerships.* (1) Since section 267 does not include members of a partnership and the partnership as related persons, transactions between partners and partnerships do not come within the scope of section 267. Such transactions are governed by section 707 for the purposes of which the partnership is considered to be an entity separate from the partners. See section 707 and §1.707–1. Any transaction described in section 267(a) between a partnership and a person other than a partner shall be considered as occurring between the other person and the members of the partnership separately. Therefore, if the other person and a partner are within any one of the relationships specified in section 267(b), no deductions with respect to such transactions between the other person and the partnership shall be allowed:

(i) To the related partner to the extent of his distributive share of partnership deductions for losses or unpaid expenses or interest resulting from such transactions, and

(ii) To the other person to the extent the related partner acquires an interest in any property sold to or exchanged with the partnership by such other person at a loss, or to the extent of the related partner's distributive share of the unpaid expenses or interest payable to the partnership by the other person as a result of such transaction.

(2) The provisions of this paragraph may be illustrated by the following examples:

Example 1. A, an equal partner in the ABC partnership, personally owns all the stock of M Corporation. B and C are not related to A. The partnership and all the partners use an accrual method of accounting, and are on a calendar year. M Corporation uses the cash receipts and disbursements method of accounting and is also on a calendar year. During 1956 the partnership borrowed money from M Corporation and also sold property to M Corporation, sustaining a loss on the sale. On December 31, 1956, the partnership accrued its interest liability to the M Corporation and on April 1, 1957 (more than 2 1/2 months after the close of its taxable year), it paid the M Corporation the amount of such accrued interest. Applying the rules of this paragraph, the transactions are considered as occurring between M Corporation and the partners separately. The sale and interest transactions considered as occurring between A and the M Corporation fall within the scope of section 267 (a) and (b), but the transactions considered as occurring between partners B and C and the M Corporation do not. The latter two partners may, therefore, deduct their distributive shares of partnership deductions for the loss and the accrued interest. However, no deduction shall be allowed to A for his distributive shares of these partnership deductions. Furthermore, A's adjusted basis for his partnership interest must be decreased by the amount of his distributive share of such deductions. See section 705(a)(2).

Example 2. Assume the same facts as in *Example (1)* of this subparagraph except that the partnership and all the partners use the cash receipts and disbursements method of accounting, and that M Corporation uses an accrual method. Assume further, that during 1956 M Corporation borrowed money from the partnership and that on a sale of property to the partnership during that year M Corporation sustained a loss. On December 31, 1956, the M Corporation accrued its interest liability on the borrowed money and on April 1, 1957 (more than 2 1/2 months after the close of its taxable year) it paid the accrued interest to the partnership. The corporation's deduction for the accrued interest is not allowed to the extent of A's distributive share (one-third) of such interest income. M Corporation's deduction for the loss on the sale of the property to the partnership is not allowed to the extent of A's one-third interest in the purchased property.

§1.267(c)–1 Constructive ownership of stock.

(a) *In general.* (1) The determination of stock ownership for purposes of section 267(b) shall be in accordance with the rules in section 267(c).

(2) For an individual to be considered under section 267(c)(2) as constructively owning the stock of a corporation which is owned, directly or indirectly, by or for members of his family it is not necessary that he own stock in the corporation either directly or indirectly. On the other hand, for an individual to be considered under section 267(c)(3) as owning the stock of a corporation owned either actually, or constructively under section 267(c)(1), by or for his partner, such individual must himself actually own, or constructively own under section 267(c)(1), stock of such corporation.

(3) An individual's constructive ownership, under section 267(c) (2) or (3), of stock owned directly or indirectly by or for a member of his family, or by or for his partner, is not to be considered as actual ownership of such stock, and the individual's constructive ownership of the stock is not to be attributed to another member of his family or to another partner. However, an individual's

constructive ownership, under section 267(c)(1), of stock owned directly or indirectly by or for a corporation, partnership, estate, or trust shall be considered as actual ownership of the stock, and the individual's ownership may be attributed to a member of his family or to his partner.

(4) The family of an individual shall include only his brothers and sisters, spouse, ancestors, and lineal descendants. In determining whether any of these relationships exist, full effect shall be given to a legal adoption. The term *ancestors* includes parents and grandparents, and the term *lineal descendants* includes children and grandchildren.

(b) *Examples.* The application of section 267(c) may be illustrated by the following examples:

Example 1. On July 1, 1957, A owned 75 percent, and AW, his wife, owned 25 percent, of the outstanding stock of the M Corporation. The M Corporation in turn owned 80 percent of the outstanding stock of the O Corporation. Under section 267(c)(1), A and AW are each considered as owning an amount of the O Corporation stock actually owned by M Corporation in proportion to their respective ownership of M Corporation stock. Therefore, A constructively owns 60 percent (75 percent of 80 percent) of the O Corporation stock and AW constructively owns 20 percent (25 percent of 80 percent) of such stock. Under the family ownership rule of section 267(c)(2), an individual is considered as constructively owning the stock actually owned by his spouse. A and AW, therefore, are each considered as constructively owning the M Corporation stock actually owned by the other. For the purpose of applying this family ownership rule, A's and AW's constructive ownership of O Corporation stock is considered as actual ownership under section 267(c)(5). Thus, A constructively owns the 20 percent of the O Corporation stock constructively owned by AW, and AW constructively owns the 60 percent of the O Corporation stock constructively owned by A. In addition, the family ownership rule may be applied to make AWF, AW's father, the constructive owner of the 25 percent of the M Corporation stock actually owned by AW. As noted above, AW's constructive ownership of 20 percent of the O Corporation stock is considered as actual ownership for purposes of applying the family ownership rule, and AWF is thereby considered the constructive owner of this stock also. However, AW's constructive ownership of the stock constructively and actually owned by A may not be considered as actual ownership for the purpose of again applying the family ownership rule to make AWF the constructive owner of these shares. The ownership of the stock in the M and O Corporations may be tabulated as follows:

Person	Stock ownership in M Corporation		Total under Section 267 (Percent)	Stock ownsership in O Corporation		Total under Section 267 (Percent)
	Actual (Percent)	Constructive (Percent)		Actual (Percent)	Constructive (Percent)	
A	75	25	100	None	60 20	80
A W (A's wife)	25	75	100	None	20 60	80
A W F (AW's father)	None	25	25	None	20	20
M Corporation				80	None	80
O Corporation	None	None	None			

Assuming that the M Corporation and the O Corporation make their income tax returns for calendar years, and that there was no distribution in liquidation of the M or O Corporation, and further assuming that other corporation was a personal holding company under section 542 for the calendar year 1956, no deduction is allowable with respect to losses from sales or exchanges of property made on July 1, 1957, between the two corporations. Moreover, whether or not either corporation was a personal holding company, no loss would be allowable on a sale or exchange between A or AW and either corporation. A deduction would be allowed, however, for a loss sustained in an arm's length sale or exchange between A and AWF, and between AWF and the M or O Corporation.

Example 2. On June 15, 1957, all of the stock of the N Corporation was owned in equal proportions by A and his partner, AP. Except in the case of distributions in liquidation by the N Corporation, no deduction is allowable with respect to losses from sales or exchanges of property made on June 15, 1957, between A and the N Corporation or AP and the N Corporation since each partner is considered as owning the stock owned by the other; therefore, each is considered as owning more than 50 percent in value of the outstanding stock of the N Corporation.

Example 3. On June 7, 1957, A owned no stock in X Corporation, but his wife, AW, owned 20 percent in value of the outstanding stock of X, and A's partner, AP, owned 60 percent in value of the outstanding stock of X. The partnership firm of A and AP owned no stock in X Corporation. The ownership of AW's stock is attributed to A, but not that of AP since A does not own any X Corporation stock either actually, or constructively under section 267(c)(1). A's constructive ownership of AW's stock is not the ownership required for the attribution of AP's stock. Therefore, deductions for losses from sales or exchanges of property made on June 7, 1957, between X Corporation and A or AW are allowable since neither person owned more than 50 percent in value of the outstanding stock of X, but deductions for losses from sales or exchanges between X Corporation and AP would not be allowable by section 267(a) (except for distributions in liquidation of X Corporation).

§1.267(d)–1 Amount of gain where loss previously disallowed.

(a) *General rule.* (1) If a taxpayer acquires property by purchase or exchange from a transferor who, on the transaction, sustained a loss not allowable as a deduction by reason of section 267(a)(1) (or by reason of section 24(b) of the Internal Revenue Code of 1939), then any gain realized by the taxpayer on a sale or other disposition of the property after December 31, 1953, shall be recognized only to the extent that the gain exceeds the amount of such loss as is properly allocable to the property sold or otherwise disposed of by the taxpayer.

(2) The general rule is also applicable to a sale or other disposition of property by a taxpayer when the basis of such property in the taxpayer's hands is determined directly or indirectly by reference to other property acquired by the taxpayer from a transferor through a sale or exchange in which a loss sustained by the transferor was not allowable. Therefore, section 267(d) applies to a sale or other disposition of property after a series of transactions if the basis of the property acquired in each transaction is determined by reference to the basis of the property transferred, and if the original property was acquired in a transaction in which a loss to a transferor was not allowable by reason of section 267(a)(1) (or by reason of section 24(b) of the Internal Revenue Code of 1939).

(3) The benefit of the general rule is available only to the original transferee but does not apply to any original transferee (e.g., a donee) who acquired the property in any manner other than by purchase or exchange.

(4) The application of the provisions of this paragraph may be illustrated by the following examples:

Example 1. H sells to his wife, W, for $500, certain corporate stock with an adjusted basis for determining loss to him of $800. The loss of $300 is not allowable to H by reason of section 267(a)(1) and paragraph (a) of §1.267 (a)–1. W later sells this stock for $1,000. Although W's realized gain is $500 ($1,000 minus $500, her basis), her recognized gain under section 267(d) is only $200, the excess of the realized gain of $500 over the loss of $300 not allowable to H. In determining capital gain or loss W's holding period commences on the date of the sale from H to W.

Example 2. Assume the same facts as in *Example (1)* except that W later sells her stock for $300 instead of $1,000. Her recognized loss is $200 and not $500 since section 267(d) applies only to the nonrecognition of gain and does not affect basis.

Example 3. Assume the same facts as in *Example (1)* except that W transfers her stock as a gift to X. The basis of the stock in the hands of X for the purpose of determining gain, under the provisions of section 1015, is the same as W's, or $500. If X later sells the stock for $1,000 the entire $500 gain is taxed to him.

Example 4. H sells to his wife, W, for $5,500, farmland, with an adjusted basis for determining loss to him of $8,000. The loss of $2,500 is not allowable to H by reason of section 267(a)(1) and paragraph (a) of §1.267 (a)–1. W exchanges the farmland, held for investment purposes, with S, an unrelated individual, for two city lots, also held for investment purposes. The basis of the city lots in the hands of W ($5,500) is a substituted basis determined under section 1031(d) by reference to the basis of the farmland. Later W sells the city lots for $10,000. Although W's realized gain is $4,500 (10,000 minus $5,500), her recognized gain under section 267(d) is only $2,000, the excess of the realized gain of $4,500 over the loss of $2,500 not allowable to H.

(b) *Determination of basis and gain with respect to divisible property*—(1)

Taxpayer's basis. When the taxpayer acquires divisible property or property that consists of several items or classes of items by a purchase or exchange on which loss is not allowable to the transferor, the basis in the taxpayer's hands of a particular part, item, or class of such property shall be determined (if the taxpayer's basis for that part is not known) by allocating to the particular part, item, or class a portion of the taxpayer's basis for the entire property in the proportion that the fair market value of the particular part, item, or class bears to the fair market value of the entire property at the time of the taxpayer's acquisition of the property.

(2) *Taxpayer's recognized gain.* Gain realized by the taxpayer on sales or other dispositions after December 31, 1953, of a part, item, or class of the property shall be recognized only to the extent that such gain exceeds the amount of loss attributable to such part, item, or class of property not allowable to the taxpayer's transferor on the latter's sale or exchange of such property to the taxpayer.

(3) *Transferor's loss not allowable.* (i) The transferor's loss on the sale or exchange of a part, item, or class of the property to the taxpayer shall be the excess of the transferor's adjusted basis for determining loss on the part, item, or class of the property over the amount realized by the transferor on the sale or exchange of the part, item, or class. The amount realized by the transferor on the part, item, or class shall be determined (if such amount is not known) in the same manner that the taxpayer's basis for such part, item, or class is determined. See subparagraph (1) of this paragraph.

(ii) If the transferor's basis for determining loss on the part, item, or class cannot be determined, the transferor's loss on the particular part, item, or class transferred to the taxpayer shall be determined by allocating to the part, item, or class a portion of his loss on the entire property in the proportion that the fair market value of such part, item, or class bears to the fair market value of the entire property on the date of the taxpayer's acquisition of the entire property.

(4) *Examples.* The application of the provisions of this paragraph may be illustrated by the following examples:

Example 1. During 1953, H sold class A stock which had cost him $1,100, and common stock which had cost him $2,000, to his wife W for a lump sum of $1,500. Under section 24(b)(1)(A) of the 1939 Code, the loss of $1,600 on the transaction was not allowable to H. At the time the stocks were purchased by W, the fair market value of class A stock was $900 and the fair market value of common stock was $600. In 1954, W sold the class A stock for $2,500. W's recognized gain is determined as follows:

Amount realized by W on sale of class A stock		$2,500
Less: Basis allocated to class A stock—$900/ $1,500 × $1,500		900
Realized gain on transaction		1,600
Less: Loss sustained by H on sale of class A stock to W not allowable as a deduction:		
Basis to H of class A stock	$1,100	
Amount realized by H on class A stock—$900/ $1,500 × $1,500	900	
Unallowable loss to H on sale of class A stock		200
Recognized gain on sale of class A stock by W		1,400

Example 2. Assume the same facts as those stated in *Example (1)* of this subparagraph except that H originally purchased both classes of stock for a lump sum of $3,100. The unallowable loss to H on the sale of all the stock to W is $1,600 ($3,100 minus $1,500). An exact determination of the unallowable loss sustained by H on sale to W of class A stock cannot be made because H's basis for class A stock cannot be determined. Therefore, a determination of the unallowable loss is made by allocating to class A stock a portion of H's loss on the entire property transferred to W in the proportion that the fair market value of class A stock at the time acquired by W ($900) bears to the fair market value of both classes of stock at that time ($1,500). The allocated portion is $900/$1,500 × $1,600, or $960. W's recognized gain is, therefore, $640 (W's realized gain of $1,600 minus $960).

(c) *Special rules.* (1) Section 267(d) does not affect the basis of property for determining gain. Depreciation and other items which depend on such basis are also not affected.

(2) The provisions of section 267(d) shall not apply if the loss sustained by the transferor is not allowable to the transferor as a deduction by reason of section 1091, or section 118 of the Internal Revenue Code of 1939, which relate to losses from wash sales of stock or securities.

(3) In determining the holding period in the hands of the transferee of property received in an exchange with a transferor with respect to whom a loss on the exchange is not allowable by reason of section 267, section 1223(2) does not apply to include the period during which the property was held by the transferor. In determining such holding period, however, section 1223(1) may apply to include the period during which the transferee held the property which he exchanged where, for example, he exchanged a capital asset in a transaction which, as to him, was nontaxable under section 1031 and the property received in the exchange has the same basis as the property exchanged.

§1.267(d)–2 Effective date; taxable years subject to the Internal Revenue Code of 1939.

Pursuant to section 7851(a)(1)(C), the regulations prescribed in §1.267(d)–1, to the extent that they relate to determination of gain resulting from the sale or other disposition of property after December 31, 1953, with respect to which property a loss was not allowable to the transferor by reason of section 267(a)(1) (or by reason of section 24(b) of the Internal Revenue Code of 1939), shall also apply to taxable years beginning before January 1, 1954, and ending after December 31, 1953, and taxable years beginning after December 31, 1953, and ending before August 17, 1954, which years are subject to the Internal Revenue Code of 1939.

§1.267(f)–1 Controlled groups.

(a) *In general*—(1) *Purpose.* This section provides rules under section 267(f) to defer losses and deductions from certain transactions between members of a controlled group (intercompany sales). The purpose of this section is to prevent members of a controlled group from taking into account a loss or deduction solely as the result of a transfer of property between a selling member (S) and a buying member (B).

(2) *Application of consolidated return principles.* Under this section, S's loss or deduction from an intercompany sale is taken into account under the *timing* principles of §1.1502–13 (intercompany transactions between members of a consolidated group), treating the intercompany sale as an intercompany transaction. For this purpose:

(i) The matching and acceleration rules of §1.1502–13 (c) and (d), the definitions and operating rules of §1.1502–13 (b) and (j), and the simplifying rules of §1.1502–13(e)(1) apply with the adjustments in paragraphs (b) and (c) of this section to reflect that this section—

(A) Applies on a controlled group basis rather than consolidated group basis; and

(B) Generally affects only the *timing* of a loss or deduction, and not *it's attributes* (*e.g., its source* and *character*) or the holding period of property.

(ii) The special rules under §1.1502–13(f) (stock of members) and (g) (obligations of members) apply under this section only to the extent the transaction is also an intercompany transaction to which §1.1502–13 applies.

(iii) Any election under §1.1502–13 to take items into account on a separate entity basis does not apply under this section. See §1.1502–13(e)(3).

(3) *Other law.* The rules of this section apply in addition to other applicable law (including nonstatutory authorities). For example, to the extent a loss or deduction deferred under this section is from a transaction that is also an intercompany transaction under §1.1502–13(b)(1), attributes of the loss or deduction are also subject to recharacterization under §1.1502–13. See also, sections 269 (acquisitions to evade or avoid income tax) and 482 (allocations among commonly controlled taxpayers). Any loss or deduction taken into account under this section can be deferred, disallowed, or eliminated under other applicable law. See, for example, section 1091 (loss eliminated on wash sale).

(b) *Definitions and operating rules.* The definitions in §1.1502–13(b) and the operating rules of §1.1502–13(j) apply under this section with appropriate adjustments, including the following:

(1) *Intercompany sale.* An intercompany sale is a sale, exchange, or other transfer of property between members of a controlled group, if it would be an intercompany transaction under the principles of §1.1502–13, determined by

treating the references to a consolidated group as references to a controlled group and by disregarding whether any of the members join in filing consolidated returns.

(2) *S's losses or deductions.* Except to the extent the intercompany sale is also an intercompany transaction to which § 1.1502–13 applies, S's losses or deductions subject to this section are determined on a separate entity basis. For example, the principles of § 1.1502–13(b)(2)(iii) (treating certain amounts not yet recognized as items to be taken into account) do not apply. A loss or deduction is from an intercompany sale whether it is directly or indirectly from the intercompany sale.

(3) *Controlled group; member.* For purposes of this section, a controlled group is defined in section 267(f). Thus, a controlled group includes a FSC (as defined in section 922) and excluded members under section 1563(b)(2), but does not include a DISC (as defined in section 992). Corporations remain members of a controlled group as long as they remain in a controlled group relationship with each other. For example, corporations become nonmembers with respect to each other when they cease to be in a controlled group relationship with each other, rather than by having a separate return year (described in § 1.1502–13(j)(7)). Further, the principles of § 1.1502–13(j)(6) (former common parent treated as continuation of group) apply to any corporation if, immediately before it becomes a nonmember, it is both the selling member and the owner of property with respect to which a loss or deduction is deferred (whether or not it becomes a member of a different controlled group filing consolidated or separate returns). Thus, for example, if S and B merge together in a transaction described in section 368(a)(1)(A), the surviving corporation is treated as the successor to the other corporation, and the controlled group relationship is treated as continuing.

(4) *Consolidated taxable income.* References to consolidated taxable income (and consolidated tax liability) include references to the combined taxable income of the members (and their combined tax liability). For corporations filing separate returns, it ordinarily will not be necessary to actually combine their taxable incomes (and tax liabilities) because the taxable income (and tax liability) of one corporation does not affect the taxable income (or tax liability) of another corporation.

(c) *Matching and acceleration principles of § 1.1502–13*—(1) *Adjustments to the timing rules.* Under this section, S's losses and deductions are deferred until they are taken into account under the timing principles of the matching and acceleration rules of § 1.1502–13(c) and (d) with appropriate adjustments. For example, if S sells depreciable property to B at a loss, S's loss is deferred and taken into account under the principles of the matching rule of § 1.1502–13(c) to reflect the difference between B's depreciation taken into account with respect to the property and the depreciation that B would take into account if S and B were divisions of a single corporation; if S and B subsequently cease to be in a controlled group relationship with each other, S's remaining loss is taken into account under the principles of the acceleration rule of § 1.1502–13(d). For purposes of this section, the adjustments to § 1.1502–13 (c) and (d) include the following:

(i) *Application on controlled group basis.* The matching and acceleration rules apply on a controlled group basis, rather than a consolidated group basis. Thus if S and B are wholly-owned members of a consolidated group and 21% of the stock of S is sold to an unrelated person, S's loss continues to be deferred under this section because S and B continue to be members of a controlled group even though S is no longer a member of the consolidated group. Similarly, S's loss would continue to be deferred if S and B remain in a controlled group relationship after both corporations become nonmembers of their former consolidated group.

(ii) *Different taxable years.* If S and B have different taxable years, the taxable years that include a December 31 are treated as the same taxable years. If S or B has a short taxable year that does not include a December 31, the short year is treated as part of the succeeding taxable year that does include a December 31.

(iii) *Transfer to a section 267(b) or 707(b) related person.* To the extent S's loss or deduction from an intercompany sale of property is taken into account under this section as a result of B's transfer of the property to a nonmember that is a person related to any member, immediately after the transfer, under sections 267(b) or 707(b), or as a result of S or B becoming a nonmember that is related to any member under section 267(b), the loss or deduction is taken into account but allowed only to the extent of any income or gain taken into account as a result of the transfer. The balance not allowed is treated as a loss referred to in section 267(d) if it is from a sale or exchange by B (rather than from a distribution).

(iv) *B's item is excluded from gross income or noncapital and nondeductible.* To the extent S's loss would be redetermined to be a noncapital, nondeductible amount under the principles of §1.1502–13 but is not redetermined because of paragraph (c)(2) of this section, then, if paragraph (c)(1)(iii) of this section does not apply, S's loss continues to be deferred and is not taken into account until S and B are no longer in a controlled group relationship. For example, if S sells all of the stock of corporation T to B at a loss and T subsequently liquidates into B in a transaction qualifying under section 332, S's loss is deferred until S and B (including their successors) are no longer in a controlled group relationship. See §1.1502–13(c)(6)(ii).

(v) *Circularity of references.* References to deferral or elimination under the Internal Revenue Code or regulations do not include references to section 267(f) or this section. See, e.g., §1.1502–13(a)(4) (applicability of other law).

(2) *Attributes generally not affected.* The matching and acceleration rules are not applied under this section to affect the attributes of S's intercompany item, or cause it to be taken into account before it is taken into account under S's separate entity method of accounting. However, the attributes of S's intercompany item may be redetermined, or an item may be taken into account earlier than under S's separate entity method of accounting, to the extent the transaction is also an intercompany transaction to which §1.1502–13 applies. Similarly, except to the extent the transaction is also an intercompany transaction to which §1.1502–13 applies, the matching and acceleration rules do not apply to affect the timing or attributes of B's corresponding items.

(d) *Intercompany sales of inventory involving foreign persons*—(1) *General rule.* Section 267(a)(1) and this section do not apply to an intercompany sale of property that is inventory (within the meaning of section 1221(1)) in the hands of both S and B, if—

(i) The intercompany sale is in the ordinary course of S's trade or business;

(ii) S or B is a foreign corporation; and

(iii) Any income or loss realized on the intercompany sale by S or B is not income or loss that is recognized as effectively connected with the conduct of a trade or business within the United States within the meaning of section 864 (unless the income is exempt from taxation pursuant to a treaty obligation of the United States).

(2) *Intercompany sales involving related partnerships.* For purposes of paragraph (d)(1) of this section, a partnership and a foreign corporation described in section 267(b)(10) are treated as members, provided that the income or loss of the foreign corporation is described in paragraph (d)(1)(iii) of this section.

(3) *Intercompany sales in ordinary course.* For purposes of this paragraph (d), whether an intercompany sale is in the ordinary course of business is determined under all the facts and circumstances.

(e) *Treatment of a creditor with respect to a loan in nonfunctional currency.* Sections 267(a)(1) and this section do not apply to an exchange loss realized with respect to a loan of nonfunctional currency if—

(1) The loss is realized by a member with respect to nonfunctional currency loaned to another member;

(2) The loan is described in §1.988–1(a)(2)(i);

(3) The loan is not in a hyperinflationary currency as defined in §1.988–1(f); and

(4) The transaction does not have as a significant purpose the avoidance of Federal income tax.

(f) *Receivables.* If S acquires a receivable from the sale of goods or services to a nonmember at a gain, and S sells the receivable at fair market value to B, any loss or deduction of S from its sale to B is not deferred under this section to the extent it does not exceed S's income or gain from the sale to the nonmember that has been taken into account at the time the receivable is sold to B.

(g) *Earnings and profits.* A loss or deduction deferred under this section is not reflected in S's earnings and profits before it is taken into account under this section. See, e.g., §§ 1.312–6(a), 1.312–7, and 1.1502–33(c)(2).

(h) *Anti-avoidance rule.* If a transaction is engaged in or structured with a principal purpose to avoid the purposes of this section (including, for example, by avoiding treatment as an intercompany sale or by distorting the timing of losses or deductions), adjustments must be made to carry out the purposes of this section.

(i) [Reserved]

(j) *Examples.* For purposes of the examples in this paragraph (j), unless otherwise stated, corporation P owns 75% of the only class of stock of subsidiaries S and B, X is a person unrelated to any member of the P controlled group, the taxable year of all persons is the calendar year, all persons use the accrual method of accounting, tax liabilities are disregarded, the facts set forth the only activity, and no member has a special status. If a member acts as both a selling member and a buying member (e.g., with respect to different aspects of a single transaction, or with respect to related transactions), the member is referred as to M (rather than as S or B). This section is illustrated by the following examples.

Example 1. Matching and acceleration rules. (a) *Facts.* S holds land for investment with a basis of $130. On January 1 of Year 1, S sells the land to B for $100. On a separate entity basis, S's loss is long-term capital loss. B holds the land for sale to customers in the ordinary course of business. On July 1 of Year 3, B sells the land to X for $110.

(b) *Matching rule.* Under paragraph (b)(1) of this section, S's sale of land to B is an intercompany sale. Under paragraph (c)(1) of this section, S's $30 loss is taken into account under the timing principles of the matching rule of § 1.1502–13(c) to reflect the difference for the year between B's corresponding items taken into account and the recomputed corresponding items. If S and B were divisions of a single corporation and the intercompany sale were a transfer between the divisions, B would succeed to S's $130 basis in the land and would have a $20 loss from the sale to X in Year 3. Consequently, S takes no loss into account in Years 1 and 2, and takes the entire $30 loss into account in Year 3 to reflect the $30 difference in that year between the $10 gain B takes into account and its $20 recomputed loss. The attributes of S's intercompany items and B's corresponding items are determined on a separate entity basis. Thus, S's $30 loss is long-term capital loss and B's $10 gain is ordinary income.

(c) *Acceleration resulting from sale of B stock.* The facts are the same as in paragraph (a) of this *Example 1,* except that on July 1 of Year 3 P sells all of its B stock to X (rather than B's selling the land to X). Under paragraph (c)(1) of this section, S's $30 loss is taken into account under the timing principles of the acceleration rule of § 1.1502–13(d) immediately before the effect of treating S and B as divisions of a single corporation cannot be produced. Because the effect cannot be produced once B becomes a nonmember, S takes its $30 loss into account in Year 3 immediately before B becomes a nonmember. S's loss is long-term capital loss.

(d) *Subgroup principles applicable to sale of S and B stock.* The facts are the same as in paragraph (a) of this *Example 1,* except that on July 1 of Year 3 P sells all of its S and B stock to X (rather than B's selling the land to X). Under paragraph (b)(3) of this section, S and B are considered to remain members of a controlled group as long as they remain in a controlled group relationship with each other (whether or not in the original controlled group). P's sale of their stock does not affect the controlled group relationship of S and B with each other. Thus, S's loss is not taken into account as a result of P's sale of the stock. Instead, S's loss is taken into account based on subsequent events (e.g., B's sale of the land to a nonmember).

Example 2. Distribution of loss property. (a) *Facts.* S holds land with a basis of $130 and value of $100. On January 1 of Year 1, S distributes the land to P in a transaction to which section 311 applies. On July 1 of Year 3, P sells the land to X for $110.

(b) *No loss taken into account.* Under paragraph (b)(2) of this section, because P and S are not members of a consolidated group, § 1.1502–13(f)(2)(iii) does not apply to cause S to recognize a $30 loss under the principles of section 311(b). Thus, S has no loss to be taken into account under this section. (If P and S were members of a consolidated group,

§1.1502–13(f)(2)(iii) would apply to S's loss in addition to the rules of this section, and the loss would be taken into account in Year 3 as a result of P's sale to X.)

Example 3. Loss not yet taken into account under separate entity accounting method. (a) *Facts.* S holds land with a basis of $130. On January 1 of Year 1, S sells the land to B at a $30 loss but does not take into account the loss under its separate entity method of accounting until Year 4. On July 1 of Year 3, B sells the land to X for $110.

(b) *Timing.* Under paragraph (b)(2) of this section, S's loss is determined on a separate entity basis. Under paragraph (c)(1) of this section, S's loss is not taken into account before it is taken into account under S's separate entity method of accounting. Thus, although B takes its corresponding gain into account in Year 3, S has no loss to take into account until Year 4. Once S's loss is taken into account in Year 4, it is not deferred under this section because B's corresponding gain has already been taken into account. (If S and B were members of a consolidated group, S would be treated under §1.1502–13(b)(2)(iii) as taking the loss into account in Year 3.)

Example 4. Consolidated groups. (a) *Facts.* P owns all of the stock of S and B, and the P group is a consolidated group. S holds land for investment with a basis of $130. On January 1 of Year 1, S sells the land to B for $100. B holds the land for sale to customers in the ordinary course of business. On July 1 of Year 3, P sells 25% of B's stock to X. As a result of P's sale, B becomes a nonmember of the P consolidated group but S and B remain in a controlled group relationship with each other for purposes of section 267(f). Assume that if S and B were divisions of a single corporation, the items of S and B from the land would be ordinary by reason of B's activities.

(b) *Timing and attributes.* Under paragraph (a)(3) of this section, S's sale to B is subject to both §1.1502–13 and this section. Under §1.1502–13, S's loss is redetermined to be an ordinary loss by reason of B's activities. Under paragraph (b)(3) of this section, because S and B remain in a controlled group relationship with each other, the loss is not taken into account under the acceleration rule of §1.1502–13(d) as modified by paragraph (c) of this section. See §1.1502–13(a)(4). Nevertheless, S's loss is redetermined by §1.1502–13 to be an ordinary loss, and the character of the loss is not further redetermined under this section. Thus, the loss continues to be deferred under this section, and will be taken into account as ordinary loss based on subsequent events (e.g., B's sale of the land to a nonmember).

(c) *Resale to controlled group member.* The facts are the same as in paragraph (a) of this *Example 4*, except that P owns 75% of X's stock, and B resells the land to X (rather than P's selling any B stock). The results for S's loss are the same as in paragraph (b) of this *Example 4*. Under paragraph (b) of this section, X is also in a controlled group relationship, and B's sale to X is a second intercompany sale. Thus, S's loss continues to be deferred and is taken into account under this section as ordinary loss based on subsequent events (e.g., X's sale of the land to a nonmember).

Example 5. Intercompany sale followed by installment sale. (a) *Facts.* S holds land for investment with a basis of $130x. On January 1 of Year 1, S sells the land to B for $100x. B holds the land for investment. On July 1 of Year 3, B sells the land to X in exchange for X's $110x note. The note bears a market rate of interest in excess of the applicable Federal rate, and provides for principal payments of $55x in Year 4 and $55x in Year 5. Section 453A applies to X's note.

(b) *Timing and attributes.* Under paragraph (c) of this section, S's $30x loss is taken into account under the timing principles of the matching rule of §1.1502–13(c) to reflect the difference in each year between B's gain taken into account and its recomputed loss. Under section 453, B takes into account $5x of gain in Year 4 and in Year 5. Therefore, S takes $20x of its loss into account in Year 3 to reflect the $20x difference in that year between B's $0 loss taken into account and its $20x recomputed loss. In addition, S takes $5x of its loss into account in Year 4 and in Year 5 to reflect the $5x difference in each year between B's $5x gain taken into account and its $0 recomputed gain. Although S takes into account a loss and B takes into account a gain, the attributes of B's $10x gain are determined on a separate entity basis, and therefore the interest charge under section 453A(c) applies to B's $10x gain on the installment sale beginning in Year 3.

Example 6. Section 721 transfer to a related nonmember. (a) *Facts.* S owns land with a basis of $130. On January 1 of Year 1, S sells the land to B for $100. On July 1 of Year 3, B transfers the land to a partnership in exchange for a 40% interest in capital and profits in a transaction to which section 721 applies. P also owns a 25% interest in the capital and profits of the partnership.

(b) *Timing.* Under paragraph (c)(1)(iii) of this section, because the partnership is a nonmember that is a related person under sections 267(b) and 707(b), S's $30 loss is taken into account in Year 3, but only to the extent of any income or gain taken into account as a result of the transfer. Under section 721, no gain or loss is taken into account as a result of the transfer to the partnership, and thus none of S's loss is taken into account. Any subsequent gain recognized by the partnership with respect to the property is limited under section 267(d). (The results would be the same if the P group were a consolidated group, and S's sale to B were also subject to §1.1502–13.)

Example 7. Receivables. (a) *Controlled group.* S owns goods with a $60 basis. In Year 1, S sells the goods to X for X's $100 note. The note bears a market rate of interest in excess of the applicable Federal rate, and provides for payment of principal in Year 5. S takes into account $40 of income in Year 1 under its method of accounting. In Year 2, the fair market value of X's note falls to $90 due to an increase in prevailing market interest rates, and S sells the note to B for its $90 fair market value.

(b) *Loss not deferred.* Under paragraph (f) of this section, S takes its $10 loss into account in Year 2. (If the sale were not at fair market value, paragraph (f) of this section would not apply and none of S's $10 loss would be taken into account in Year 2.)

(c) *Consolidated group.* Assume instead that P owns all of the stock of S and B, and the P group is a consolidated group. In Year 1, S sells to X goods having a basis of $90 for X's $100 note (bearing a market rate of interest in excess of the applicable Federal rate, and providing for payment of principal in Year 5), and S takes into account $10 of income in Year 1. In Year 2, S sells the receivable to B for its $85 fair market value. In Year 3, P sells 25% of B's stock to X. Although paragraph (f) of this section provides that $10 of S's loss (i.e., the extent to which S's $15 loss does not exceed its $10 of income) is not deferred under this section, S's entire $15 loss is subject to § 1.1502–13 and none of the loss is taken into account in Year 2 under the matching rule of § 1.1502–13(c). See paragraph (a)(3) of this section (continued deferral under § 1.1502–13). P's sale of B stock results in B becoming a nonmember of the P consolidated group in Year 3. Thus, S's $15 loss is taken into account in Year 3 under the acceleration rule of § 1.1502–13(d). Nevertheless, B remains in a controlled group relationship with S and paragraph (f) of this section permits only $10 of S's loss to be taken into account in Year 3. See § 1.1502–13(a)(4) (continued deferral under section 267). The remaining $5 of S's loss continues to be deferred under this section and taken into account under this section based on subsequent events (e.g., B's collection of the note or P's sale of the remaining B stock to a nonmember).

Example 8. Selling member ceases to be a member. (a) *Facts.* P owns all of the stock of S and B, and the P group is a consolidated group. S has several historic assets, including land with a basis of $130 and value of $100. The land is not essential to the operation of S's business. On January 1 of Year 1, S sells the land to B for $100. On July 1 of Year 3, P transfers all of S's stock to newly formed X in exchange for a 20% interest in X stock as part of a transaction to which section 351 applies. Although X holds many other assets, a principal purpose for P's transfer is to accelerate taking S's $30 loss into account. P has no plan or intention to dispose of the X stock.

(b) *Timing.* Under paragraph (c) of this section, S's $30 loss ordinarily is taken into account immediately before P's transfer of the S stock, under the timing principles of the acceleration rule of § 1.1502–13(d). Although taking S's loss into account results in a $30 negative stock basis adjustment under § 1.1502–32, because P has no plan or intention to dispose of its X stock, the negative adjustment will not immediately affect taxable income. P's transfer accelerates a loss that otherwise would be deferred, and an adjustment under paragraph (h) of this section is required. Thus, S's loss is never taken into account, and S's stock basis and earnings and profits are reduced by $30 under §§ 1.1502–32 and 1.1502–33 immediately before P's transfer of the S stock.

(c) Nonhistoric assets. Assume instead that, with a principal purpose to accelerate taking into account any further loss that may accrue in the value of the land without disposing of the land outside of the controlled group, P forms M with a $100 contribution on January 1 of Year 1 and S sells the land to M for $100. On December 1 of Year 1, when the value of the land has decreased to $90, M sells the land to B for $90. On July 1 of Year 3, while B still owns the land, P sells all of M's stock to X and M becomes a nonmember. Under paragraph (c) of this section, M's $10 loss ordinarily is taken into account under the timing principles of the acceleration rule of § 1.1502–13(d) immediately before M becomes a nonmember. (S's $30 loss is not taken into account under the timing principles of § 1.1502–13(c) or § 1.1502–13(d) as a result of M becoming a nonmember, but is taken into account based on subsequent events such as B's sale of the land to a nonmember or P's sale of the stock of S or B to a nonmember.) The land is not an historic asset of M and, although taking M's loss into account reduces P's basis in the M stock under § 1.1502–32, the negative adjustment only eliminates the $10 duplicate stock loss. Under paragraph (h) of this section, M's loss is never taken into account. M's stock basis, and the earnings and profits of M and P, are reduced by $10 under §§ 1.1502–32 and 1.1502–33 immediately before P's sale of the M stock.

(k) *Cross-reference.* For additional rules applicable to the disposition or deconsolidation of the stock of members of consolidated groups, see §§ 1.337(d)–1, 1.337(d)–2, 1.1502–13(f)(6), and 1.1502–20.

(l) *Effective dates*—(1) *In general.* This section applies with respect to transactions occurring in S's years beginning on or after July 12, 1995. If both this section and prior law apply to a transaction, or neither applies, with the result that items are duplicated, omitted, or eliminated in determining taxable income (or tax liability), or items are treated inconsistently, prior law (and not this section) applies to the transaction.

(2) *Avoidance transactions.* This paragraph (l)(2) applies if a transaction is engaged in or structured on or after April 8, 1994, with a principal purpose to avoid the rules of this section (and instead to apply prior law). If this paragraph (l)(2) applies, appropriate adjustments must be made in years beginning on or after July 12, 1995, to prevent the avoidance, duplication, omission, or elimination of any item (or tax liability), or any other inconsistency with the rules of this section.

(3) *Prior law.* For transactions occurring in S's years beginning before July 12, 1995 see the applicable regulations issued under sections 267 and 1502. See, e.g., §§1.267(f)–1, 1.267(f)–1T, 1.267(f)–2T, 1.267(f)–3, 1.1502–13, 1.1502–13T, 1.1502–14, 1.1502–14T, and 1.1502–31 (as contained in the 26 CFR part 1 edition revised as of April 1, 1995).

[T.D. 8597, 60 FR 36680, July 18, 1995, as amended by T.D. 8660, 61 FR 10499, Mar. 14, 1996; 62 FR 12097, Mar. 14, 1997]

§1.268–1 Items attributable to an unharvested crop sold with the land.

In computing taxable income no deduction shall be allowed in respect of items attributable to the production of an unharvested crop which is sold, exchanged, or involuntarily converted with the land and which is considered as property used in the trade or business under section 1231(b)(4). Such items shall be so treated whether or not the taxable year involved is that of the sale, exchange, or conversion of such crop and whether they are for expenses, depreciation, or otherwise. If the taxable year involved is not that of the sale, exchange, or conversion of such crop, a recomputation of the tax liability for such year shall be made; such recomputation should be in the form of an ''amended return'' if necessary. For the adjustments to basis as a result of such disallowance, see section 1016(a)(11) and the regulations thereunder.

§1.269–1 Meaning and use of terms.

As used in section 269 and §§1.269–2 through 1.269–7:

(a) *Allowance.* The term *allowance* refers to anything in the internal revenue laws which has the effect of diminishing tax liability. The term includes, among other things, a deduction, a credit, an adjustment, an exemption, or an exclusion.

(b) *Evasion or avoidance.* The phrase *evasion or avoidance* is not limited to cases involving criminal penalties, or civil penalties for fraud.

(c) *Control.* The term *control* means the ownership of stock possessing at least 50 percent of the total combined voting power of all classes of stock entitled to vote, or at least 50 percent of the total value of shares of all classes of stock of the corporation. For control to be ''acquired on or after October 8, 1940'', it is not necessary that all of such stock be acquired on or after October 8, 1940. Thus, if A, on October 7, 1940, and at all times thereafter, owns 40 percent of the stock of X Corporation and acquires on October 8, 1940, an additional 10 percent of such stock, an acquisition within the meaning of such phrase is made by A on October 8, 1940. Similarly, if B, on October 7, 1940, owns certain assets and transfers on October 8, 1940, such assets to a newly organized Y Corporation in exchange for all the stock of Y Corporation, an acquisition within the meaning of such phrase is made by B on October 8, 1940. If, under the facts stated in the preceding sentence, B is a corporation, all of whose stock is owned by Z Corporation, then an acquisition within the meaning of such phrase is also made by Z Corporation on October 8, 1940, as well as by the shareholders of Z Corporation taken as a group on such date, and by any of such shareholders if such shareholders as a group own 50 percent of the stock of Z on such date.

(d) *Person.* The term *person* includes an individual, a trust, an estate, a partnership, an association, a company or a corporation.

[T.D. 6595, 27 FR 3596, Apr. 14, 1962, as amended by T.D. 8388, 57 FR 345, Jan. 6, 1992]

§1.269–2 Purpose and scope of section 269.

(a) *General.* Section 269 is designed to prevent in the instances specified therein the use of the sections of the Internal Revenue Code providing deductions, credits, or allowances in evading or avoiding Federal income tax. See §1.269–3.

(b) *Disallowance of deduction, credit, or other allowance.* Under the Code, an amount otherwise constituting a deduction, credit, or other allowance becomes unavailable as such under certain circumstances. Characteristic of such circumstances are those in which the effect of the deduction, credit, or other allowance would be to distort the liability of the particular taxpayer when the essential nature of the transaction or situation is examined in the light of the basic purpose or plan which the deduction, credit, or other allowance was designed by the Congress to effectuate. The distortion may be evidenced, for example, by the fact that the transaction was not undertaken for reasons germane to the conduct of the business of the taxpayer, by the unreal nature of the transaction such as its sham character, or by the unreal or unreasonable relation which the deduction, credit, or other allowance bears to the transaction. The principle of law making an amount unavailable as a deduction, credit, or other allowance in cases in which the effect of making an amount so available would be to distort the liability of the taxpayer, has been judicially recognized and applied in several cases. Included in these cases are Gregory v. Helvering (1935) (293 U.S. 465; Ct. D. 911, C.B. XIV–1, 193); Griffiths v. Helvering (1939) (308 U.S. 355; Ct. D. 1431, C.B. 1940–1, 136); Higgins v. Smith (1940) (308 U.S. 473; Ct. D. 1434, C.B. 1940–1, 127); and J. D. & A. B. Spreckles Co. v. Commissioner (1940) (41 B.T.A. 370). In order to give effect to such principle, but not in limitation thereof, several provisions of the Code, for example, section 267 and section 270, specify with some particularity instances in which disallowance of the deduction, credit, or other allowance is required. Section 269 is also included in such provisions of the Code. The principle of law and the particular sections of the Code are not mutually exclusive and in appropriate circumstances they may operate together or they may operate separately. See, for example, §1.269–6.

[T.D. 6595, 27 FR 3596, Apr. 14, 1962]

§1.269–3 Instances in which section 269(a) disallows a deduction, credit, or other allowance.

(a) *Instances of disallowance.* Section 269 specifies two instances in which a deduction, credit, or other allowance is to be disallowed. These instances, described in paragraphs (1) and (2) of section 269(a), are those in which:

(1) Any person or persons acquire, or acquired on or after October 8, 1940, directly or indirectly, control of a corporation, or

(2) Any corporation acquires, or acquired on or after October 8, 1940, directly or indirectly, property of another corporation (not controlled, directly or indirectly, immediately before such acquisition by such acquiring corporation or its stockholders), the basis of which property in the hands of the acquiring corporation is determined by reference to the basis in the hands of the transferor corporation.

In either instance the principal purpose for which the acquisition was made must have been the evasion or avoidance of Federal income tax by securing the benefit of a deduction, credit, or other allowance which such person, or persons, or corporation, would not otherwise enjoy. If this requirement is satisfied, it is immaterial by what method or by what conjunction of events the benefit was sought. Thus, an acquiring person or corporation can secure the benefit of a deduction, credit, or other allowance within the meaning of section 269 even though it is the acquired corporation that is entitled to such deduction, credit, or other allowance in the determination of its tax. If the purpose to evade or avoid Federal income tax exceeds in importance any other purpose, it is the principal purpose. This does not mean that only those acquisitions fall within the provisions of section 269 which would not have been made if the evasion or avoidance purpose was not present. The determination of the purpose for which an acquisition was made requires a scrutiny of the entire circumstances in which the transaction or course of conduct occurred, in connection with the tax result claimed to arise therefrom.

(b) *Acquisition of control; transactions indicative of purpose to evade or avoid tax.* If the requisite acquisition of control within the meaning of paragraph (1) of section 269(a) exists, the transactions set forth in the following subparagraphs are among those which, in the absence of additional evidence to the contrary, ordinarily are indicative that the principal purpose for acquiring control was evasion or avoidance of Federal income tax:

(1) A corporation or other business enterprise (or the interest controlling such corporation or enterprise) with large profits acquires control of a corporation with current, past, or prospective credits, deductions, net operating losses, or other allowances and the acquisition is followed by such transfers or other action as is necessary to bring the deduction, credit, or other allowance into conjunction with the income (see further § 1.269–6). This subparagraph may be illustrated by the following example:

Example. Individual A acquires all of the stock of L Corporation which has been engaged in the business of operating retail drug stores. At the time of the acquisition, L Corporation has net operating loss carryovers aggregating $100,000 and its net worth is $100,000. After the acquisition, L Corporation continues to engage in the business of operating retail drug stores but the profits attributable to such business after the acquisition are not sufficient to absorb any substantial portion of the net operating loss carryovers. Shortly after the acquisition, individual A causes to be transferred to L Corporation the assets of a hardware business previously controlled by A which business produces profits sufficient to absorb a substantial portion of L Corporation’s net operating loss carryovers. The transfer of the profitable business, which has the effect of using net operating loss carryovers to offset gains of a business unrelated to that which produced the losses, indicates that the principal purpose for which the acquisition of control was made is evasion or avoidance of Federal income tax.

(2) A person or persons organize two or more corporations instead of a single corporation in order to secure the benefit of multiple surtax exemptions (see section 11(c)) or multiple minimum accumulated earnings credits (see section 535(c)(2) and (3)).

(3) A person or persons with high earning assets transfer them to a newly organized controlled corporation retaining assets producing net operating losses which are utilized in an attempt to secure refunds.

(c) *Acquisition of property; transactions indicative of purpose to evade or avoid tax.* If the requisite acquisition of property within the meaning of paragraph (2) of section 269(a) exists, the transactions set forth in the following subparagraphs are among those which, in the absence of additional evidence to the contrary, ordinarily are indicative that the principal purpose for acquiring such property was evasion or avoidance of Federal income tax:

(1) A corporation acquires property having in its hands an aggregate carryover basis which is materially greater than its aggregate fair market value at the time of such acquisition and utilizes the property to create tax-reducing losses or deductions.

(2) A subsidiary corporation, which has sustained large net operating losses in the operation of business X and which has filed separate returns for the taxable years in which the losses were sustained, acquires high earning assets, comprising business Y, from its parent corporation. The acquisition occurs at a time when the parent would not succeed to the net operating loss carryovers of the subsidiary if the subsidiary were liquidated, and the profits of business Y are sufficient to offset a substantial portion of the net operating loss carryovers attributable to business X (see further *Example (3)* of § 1.269–6).

(d) *Ownership changes to which section 382(l)(5) applies; transactions indicative of purpose to evade or avoid tax*—(1) *In general.* Absent strong evidence to the contrary, a requisite acquisition of control or property in connection with an ownership change to which section 382(l)(5) applies is considered to be made for the principal purpose of evasion or avoidance of Federal income tax unless the corporation carries on more than an insignificant amount of an active trade or business during and subsequent to the title 11 or similar case (as defined in section 382(l)(5)(G)). The determination of whether the corporation carries on more than an insignificant amount of an active trade or business is made without regard to the continuity of business enterprise set forth in § 1.368–1(d). The determination is based on all the facts and circumstances, including, for example, the amount of business assets that continue to be used, or the number of employees in the work force who continue employment, in an active trade or business (although not necessarily the historic trade or business). Where the corporation continues to utilize a significant amount of its business assets or work force, the requirement of carrying on more than an insignificant amount of an active trade or business may be met even though all trade or business activities temporarily cease for a period of time in order to address business exigencies.

(2) *Effective date.* The presumption under paragraph (d) of this section applies to acquisitions of control or property effected pursuant to a plan of reorganization confirmed by a court in a title 11 or similar case (within the meaning of section 368(a)(3)(A)) after August 14, 1990.

(e) *Relationship of section 269 to 11 U.S.C. 1129(d).* In determining for purposes of section 269 of the Internal Revenue Code whether an acquisition pursuant to a plan of reorganization in a case under title 11 of the United States Code was made for the principal purpose of evasion or avoidance of Federal income tax, the fact that a governmental unit did not seek a determination under 11 U.S.C. 1129(d) is not taken into account and any determination by a court under 11 U.S.C. 1129(d) that the principal purpose of the plan is not avoidance of taxes is not controlling.

[T.D. 6595, 27 FR 3596, Apr. 14, 1962, as amended by T.D. 8388, 57 FR 345, Jan. 6, 1992]

§ 1.269–4 Power of district director to allocate deduction, credit, or allowance in part.

The district director is authorized by section 269(b) to allow a part of the amount disallowed by section 269(a), but he may allow such part only if and to the extent that he determines that the amount allowed will not result in the evasion or avoidance of Federal income tax for which the acquisition was made. The district director is also authorized to use other methods to give effect to part of the amount disallowed under section 269(a), but only to such extent as he determines will not result in the evasion or avoidance of Federal income tax for which the acquisition was made. Whenever appropriate to give proper effect to the deduction, credit, or other allowance, or such part of it which may be allowed, this authority includes the distribution, apportionment, or allocation of both the gross income and the deductions, credits, or other allowances the benefit of which was sought, between or among the corporations, or properties, or parts thereof, involved, and includes the disallowance of any such deduction, credit, or other allowance to any of the taxpayers involved.

[T.D. 6595, 27 FR 3597, Apr. 14, 1962]

§ 1.269–5 Time of acquisition of control.

(a) *In general.* For purposes of section 269, an acquisition of control occurs when one or more persons acquire beneficial ownership of stock possessing at least 50 percent of the total combined voting power of all classes of stock entitled to vote or at least 50 percent of the total value of share of all classes of stock of the corporation.

(b) *Application of general rule to certain creditor acquisitions.* (1) For purposes of section 269, creditors of an insolvent or bankrupt corporation (by themselves or in conjunction with other persons) acquire control of the corporation when they acquire beneficial ownership of the requisite amount of stock. Although insolvency or bankruptcy may cause the interests of creditors to predominate as a practical matter, creditor interests do not constitute beneficial ownership of the corporation's stock. Solely for purposes of section 269, creditors of a bankrupt corporation are treated as acquiring beneficial ownership of stock of the corporation no earlier than the time a bankruptcy court confirms a plan of reorganization.

(2) The provisions of this section are illustrated by the following example.

Example. Corporation *L* files a petition under chapter 11 of the Bankruptcy Code on January 5, 1987. A creditors' committee is formed. On February 22, 1987, and upon the request of the creditors, the bankruptcy court removes the debtor-in-possession from business management and operations and appoints a trustee. The trustee consults regularly with the creditors' committee in formulating both short-term and long-term management decisions. After three years, the creditors approve a plan of reorganization in which the outstanding stock of Corporation *L* is canceled and its creditors receive shares of stock constituting all of the outstanding shares. The bankruptcy court confirms the plan of reorganization on March 23, 1990, and the plan is put into effect on May 25, 1990. For purposes of section 269, the creditors acquired control of Corporation *L* than March 23, 1990. Similarly, the determination of whether the creditors acquired control of Corporation *L* no earlier with the principal purpose of evasion or avoidance of Federal income tax is made by reference to the creditors' purposes as of no earlier than March 23, 1990.

[T.D. 8388, 57 FR 346, Jan. 6, 1992]

§1.269–6 Relationship of section 269 to section 382 before the Tax Reform Act of 1986.

Section 269 and §§1.269–1 through 1.269–5 may be applied to disallow a net operating loss carryover even though such carryover is not disallowed (in whole or in part) under section 382 and the regulations thereunder. This section may be illustrated by the following examples:

Example 1. L Corporation has computed its taxable income on a calendar year basis and has sustained heavy net operating losses for a number of years. Assume that A purchases all of the stock of L Corporation on December 31, 1955, for the principal purpose of utilizing its net operating loss carryovers by changing its business to a profitable new business. Assume further that A makes no attempt to revitalize the business of L Corporation during the calendar year 1956 and that during January 1957 the business is changed to an entirely new and profitable business. The carryovers will be disallowed under the provisions of section 269(a) without regard to the application of section 382.

Example 2. L Corporation has sustained heavy net operating losses for a number of years. In a merger under State law, P Corporation acquires all of the assets of L Corporation for the principal purpose of utilizing the net operating loss carryovers of L Corporation against the profits of P Corporation's business. As a result of the merger, the former stockholders of L Corporation own, immediately after the merger, 12 percent of the fair market value of the outstanding stock of P Corporation. If the merger qualifies as a reorganization to which section 381(a) applies, the entire net operating loss carryovers will be disallowed under the provisions of section 269(a) without regard to the application of section 382.

Example 3. L Corporation has been sustaining net operating losses for a number of years. P Corporation, a profitable corporation, on December 31, 1955, acquires all the stock of L Corporation for the purpose of continuing and improving the operation of L Corporation's business. Under the provisions of sections 334(b)(2) and 381(a)(1), P Corporation would not succeed to L Corporation's net operating loss carryovers if L Corporation were liquidated pursuant to a plan of liquidation adopted within two years after the date of the acquisition. During 1956, P Corporation transfers a profitable business to L Corporation for the principal purpose of using the profits of such business to absorb the net operating loss carryovers of L Corporation. The transfer is such as to cause the basis of the transferred assets in the hands of L Corporation to be determined by reference to their basis in the hands of P Corporation. L Corporation's net operating loss carryovers will be disallowed under the provisions of section 269(a) without regard to the application of section 382.

[T.D. 6595, 27 FR 3597, Apr. 14, 1962, as amended by T.D. 8388, 57 FR 346, Jan. 6, 1992]

§1.269–7 Relationship of section 269 to sections 382 and 383 after the Tax Reform Act of 1986.

Section 269 and §§1.269–1 through 1.269–5 may be applied to disallow a deduction, credit, or other allowance notwithstanding that the utilization or amount of a deduction, credit, or other allowance is limited or reduced under section 382 or 383 and the regulations thereunder. However, the fact that the amount of taxable income or tax that may be offset by a deduction, credit, or other allowance is limited under section 382(a) or 383 and the regulations thereunder is relevant to the determination of whether the principal purpose of an acquisition is the evasion or avoidance of Federal income tax.

[T.D. 8388, 57 FR 346, Jan. 6, 1992]

§ 1.270–1 Limitation on deductions allowable to individuals in certain cases.

(a) *Recomputation of taxable income.* (1) Under certain circumstances, section 270 limits the deductions (other than certain deductions described in subsection (b) thereof) attributable to a trade or business carried on by an individual which are otherwise allowable to such individual under the provisions of chapter 1 of the Code or the corresponding provisions of prior revenue laws. If, in each of five consecutive taxable years (including at least one taxable year beginning after December 31, 1953, and ending after August 16, 1954), the deductions attributable to a trade or business carried on by an individual (other than the specially treated deductions described in paragraph (b) of this section) exceed the gross income derived from such trade or business by more than $50,000, the taxable income computed under section 63 (or the net income computed under the corresponding provisions of prior revenue laws) of such individual shall be recomputed for each of such taxable years.

(2) In recomputing the taxable income (or the net income, in the case of taxable years which are otherwise subject to the Internal Revenue Code of 1939) for each of the five taxable years, the deductions (other than the specially treated deductions described in paragraph (b) of this section with the exception of the net operating loss deduction) attributable to the trade or business carried on by the individual shall be allowed only to the extent of (i) the gross income derived from such trade or business, plus (ii) $50,000. The specially treated deductions described in paragraph (b) of this section (other than the net operating loss deduction) shall each be allowed in full. The net operating loss deduction, to the extent attributable to such trade or business, shall be disallowed in its entirety. Thus, a carryover or a carryback of a net operating loss so attributable, either from a year within the period of five consecutive taxable years or from a taxable year outside of such period, shall be ignored in making the recomputation of taxable income or net income, as the case may be.

(3) The limitations on deductions provided by section 270 are also applicable in determining under section 172, or the corresponding provisions of prior revenue laws, the amount of any net operating loss carryover or carryback from any year which falls within the provisions of section 270 to any year which does not fall within such provisions. Also, in determining under section 172, or the corresponding provisions of prior revenue laws, the amount of any net operating loss carryover from a year which falls within the provisions of section 270 to a year which does not fall within such provisions, the amount of net operating loss is to be reduced by the taxable income or net income, as the case may be (computed as provided in § 1.172–5, or 26 CFR (1939) 39.122–4(c) (Regulations 118), as the case may be and, in the case of any taxable year which falls within the provisions of section 270, determined after the application of section 270), of any taxable year preceding or succeeding the taxable year of the net operating loss to which such loss must first be carried back or carried over under the provisions of section 172(b), or the corresponding provisions of prior revenue laws, even though the net operating loss deduction is not an allowable deduction for such preceding or succeeding taxable year.

(4) If an individual carries on several trades or businesses, the deductions attributable to such trades or businesses and the gross income derived therefrom shall not be aggregated in determining whether the deductions (other than the specially treated deductions) exceed the gross income derived from such trades or businesses by more than $50,000 in any taxable year. For the purposes of section 270, each trade or business shall be considered separately. However, where a particular business of an individual is conducted in one or more forms such as a partnership, joint venture, or individual proprietorship, the individual's share of the profits and losses from each business unit must be aggregated to determine the applicability of section 270. See paragraphs (a)(8)(ii) and (b) of § 1.702–1, relating to applicability of section 270 to a partner. Where it is established that for tax

purposes a husband and wife are partners in the same trade or business or that each is participating independently of the other in the same trade or business with his and her own money, the husband's gross income and deductions from that trade or business shall be considered separately from the wife's gross income and deductions from that trade or business even though they file a joint return. Where a taxpayer is engaged in a trade or business in a community property State under circumstances such that the income therefrom is considered to be community income, the taxpayer and his spouse are treated for purposes of section 270 as two individuals engaged separately in the same trade or business and the gross income and deductions attributable to the trade or business are allocated one-half to the taxpayer and one-half to the spouse. Where several business activities emanate from a single commodity, such as oil or gas or a tract of land, it does not necessarily follow that such activities are one business for the purposes of section 270. However, in order to be treated separately, it must be established that such business activities are actually conducted separately and are not closely interrelated with each other. For the purposes of section 270, the trade or business carried on by an individual must be the same in each of the five consecutive years in which the deductions (other than the specially treated deductions) exceed the gross income derived from such trade or business by more than $50,000.

(5) For the purposes of section 270, a taxable year may be part of two or more periods of five consecutive taxable years. Thus, if the deductions (other than the specially treated deductions) attributable to a trade or business carried on by an individual exceed the gross income therefrom by more than $50,000 for each of six consecutive taxable years, the fifth year of such six consecutive taxable years shall be considered to be a part both of a five-year period beginning with the first and ending with the fifth taxable year and of a five-year period beginning with the second and ending with the sixth taxable year.

(6) For the purposes of section 270, a short taxable year required to effect a change in accounting period constitutes a taxable year. In determining the applicability of section 270 in the case of a short taxable year, items of income and deduction are not annualized.

(b) *Specially treated deductions.* (1) For the purposes of section 270 and paragraph (a) of this section, the specially treated deductions are:

(i) Taxes,

(ii) Interest,

(iii) Casualty and abandonment losses connected with a trade or business deductible under section 165(c)(1) or the corresponding provisions of prior revenue laws,

(iv) Losses and expenses of the trade or business of farming which are directly attributable to drought,

(v) The net operating loss deduction allowed by section 172, or the corresponding provisions of prior revenue laws, and

(vi) Expenditures as to which a taxpayer is given the option, under law or regulations, either *(a)* to deduct as expenses when incurred, or *(b)* to defer or capitalize.

(2) For the purpose of subparagraph (1)(iv) of this paragraph, an individual is engaged in the ''trade or business of farming'' if he cultivates, operates, or manages a farm for gain or profit, either as owner or tenant. An individual who receives a rental (either in cash or in kind) which is based upon farm production is engaged in the trade or business of farming. However, an individual who receives a fixed rental (without reference to production) is engaged in the trade or business of farming only if he participates to a material extent in the operation or management of the farm. An individual engaged in forestry or the growing of timber is not thereby engaged in the trade or business of farming. An individual cultivating or operating a farm for recreation or pleasure rather than a profit is not engaged in the trade or business of farming. The term *farm* is used in its ordinarily accepted sense and includes stock, dairy, poultry, fruit, crop, and truck farms, and also plantations,

ranches, ranges, and orchards. An individual is engaged in the trade or business of farming if he is a member of a partnership engaged in the trade or business of farming.

(3) In order for losses and expenses of the trade or business of farming to qualify as specially treated deductions under subparagraph (1)(iv) of this paragraph such losses and expenses must be directly attributable to drought conditions and not to other causes such as faulty management or unfavorable market conditions. In general, the following are the types of losses and expenses which, if otherwise deductible, may qualify as specially treated deductions under subparagraph (1)(iv) of this paragraph:

(i) Losses for damages to or destruction of property as a result of drought conditions, if such property is used in the trade or business of farming or is purchased for resale in the trade or business of farming;

(ii) Expenses directly related to raising crops or livestock which are destroyed or damaged by drought. Included in this category are, for example, payments for labor, fertilizer, and feed used in raising such crops or livestock. If such crops or livestock to which the expenditures relate are only partially destroyed or damaged by drought then only a proportionate part of the expenditures is regarded as specially treated deductions; and

(iii) Expenses which would not have been incurred in the absence of drought conditions, such as expenses for procuring pasture or additional supplies of water or feed.

(4) The expenditures referred to in subparagraph (1)(vi) of this paragraph include, but are not limited to, intangible drilling and development costs in the case of oil and gas wells as provided in section 263(c) and the regulations thereunder, and expenditures for the development of a mine or other natural deposit (other than an oil or gas well) as provided in section 616 and the regulations thereunder.

(5) The provisions of section 270(b) do not operate to make an expenditure a deductible item if it is not otherwise deductible under the law applicable to the particular year in which it was incurred. Thus, for example, if it is necessary, pursuant to the provisions of section 270, to recompute the taxable or net income of an individual for the taxable years 1950 through 1954, the individual in making the recomputation may not deduct expenditures paid or incurred in the years 1950 through 1953 which must be capitalized under the law applicable to those years, even though the expenditures are deductible under the Code.

(c) *Applicability to taxable years otherwise subject to the Internal Revenue Code of 1939.* The net income of a taxable year otherwise subject to the Internal Revenue Code of 1939 shall be recomputed pursuant to section 270 if (i) such taxable year is included in a period of five consecutive taxable years which includes at least one taxable year beginning after December 31, 1953, and ending after August 16, 1954, and (ii) the deductions (other than the specially treated deductions specified in section 270(b)) for each taxable year in such five-year period exceed the $50,000 limitation specified in section 270. As described in paragraph (a)(5) of this section, a taxable year may be part of two or more periods of five consecutive taxable years, one meeting the requirements for recomputation pursuant to section 130 of the Internal Revenue Code of 1939 and the other meeting the requirements for recomputation pursuant to section 270 of the Internal Revenue Code of 1954, then the recomputation for such taxable year shall be made pursuant to section 270. For example, if a calendar year taxpayer sustains a loss from a trade or business for each of the years 1949 through 1954, the years 1950, 1951, 1952, and 1953 may be a part of two such periods of five consecutive taxable years. If, however, a taxable year is part of a period of five consecutive taxable years which meets the requirements for recomputation pursuant to section 130 of the Internal Revenue Code of 1939, but is not part of a period which meets the requirements for recomputation, pursuant to section 270, then a recomputation of net income for such taxable year must be made pursuant to section 130.

(d) *Redetermination of tax.* The tax imposed by Chapter 1 of the Code, or by the corresponding provisions of prior revenue laws, for each of the five consecutive taxable years specified in paragraph (a) of this section shall be redetermined upon the basis of the taxable income or net income of the individual, as the case may be, recomputed in the manner described in paragraph (a) of this section. If the assessment of a deficiency is prevented (except for the provisions of Part II (section 1311 and following), Subchapter Q, Chapter 1 of the Code, relating to the effect of limitations and other provisions in income tax cases) by the operation of any provision of law (e.g., sections 6501 and 6502, or the corresponding provisions of prior revenue laws, relating to the period of limitations upon assessment and collection) except section 7122, or the corresponding provisions of prior revenue laws, relating to compromises, or by any rule of law (e.g., res judicata), then the excess of the tax for such year as recomputed over the tax previously determined for such year shall be considered a deficiency for the purposes of section 270. The term *tax previously determined* shall have the same meaning as that assigned to such term by section 1314(a). See §1.1314 (a)–1.

(e) *Assessment of tax.* Any amount determined as a deficiency in the manner described in paragraph (d) of this section in respect of any taxable year of the five consecutive taxable years specified in paragraph (a) of this section may be assessed and collected as if on the date of the expiration of the period of limitation for the assessment of a deficiency for the fifth taxable year of such five consecutive taxable years, one year remained before the expiration of the period of limitation upon assessment for the taxable year in respect of which the deficiency is determined. If the taxable year is one in respect of which an assessment could be made without regard to section 270, the amount of the actual deficiency as defined in section 6211(a) (whether it is greater than, equal to, or less than the deficiency determined under section 270(c)) shall be assessed and collected. However, if the assessment of a deficiency for such taxable year would be prevented by any provision of law (e.g., the period of limitation upon the assessment of tax) except section 7122, or the corresponding provision of prior revenue laws, relating to compromises, or by the operation of any rule of law (e.g., res judicata), then the excess of the tax recomputed as described in paragraph (d) of this section over the tax previously determined may be assessed and collected even though in fact there is no actual deficiency, as defined in section 6211(a), in respect of the given taxable year.

(f) *Effective date; cross reference.* The provisions of section 270 and this section apply to taxable years beginning before January 1, 1970. Thus, for instance, if the taxpayer had a profit of $2,000 attributable to a trade or business in 1965, section 270 and this section would not apply to the taxable years 1966 through 1970, even though he had losses of more than $50,000 in each of the 5 years ending with 1970. For provisions relating to activities not engaged in for profit applicable to taxable years beginning after December 31, 1969, see section 183 and the regulations thereunder.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 7198, 37 FR 13685, July 13, 1972]

§1.271–1 Debts owed by political parties.

(a) *General rule.* In the case of a taxpayer other than a bank (as defined in section 581 and the regulations thereunder), no deduction shall be allowed under section 166 (relating to bad debts) or section 165(g) (relating to worthlessness of securities) by reason of the worthlessness of any debt, regardless of how it arose, owed by a political party. For example, it is immaterial that the debt may have arisen as a result of services rendered or goods sold or that the taxpayer included the amount of the debt in income. In the case of a bank, no deduction shall be allowed unless, under the facts and circumstances, it appears that the bad debt was incurred to or purchased by, or the worthless security was acquired by, the taxpayer in accordance with its usual commercial practices. Thus, if a bank makes a loan to a political party not in accordance with its usual commercial practices but solely because the president of the bank has been active in the party no bad debt deduction will be allowed with respect to the loan.

(b) *Definitions*—(1) *Political party.* For purposes of this section and § 1.276–1, the term *political party* means a political party (as commonly understood), a National, State, or local committee thereof, or any committee, association, or organization, whether incorporated or not, which accepts contributions (as defined in subparagraph (2) of this paragraph) or makes expenditures (as defined in subparagraph (3) of this paragraph) for the purpose of influencing or attempting to influence the election of presidential or vice-presidential electors, or the selection, nomination, or election of any individual to any Federal, State, or local elective public office, whether or not such individual or electors are selected, nominated, or elected. Accordingly, a political party includes a committee or other group which accepts contributions or makes expenditures for the purpose of promoting the nomination of an individual for an elective public office in a primary election, or in any convention, meeting, or caucus of a political party. It is immaterial whether the contributions or expenditures are accepted or made directly or indirectly. Thus, for example, a committee or other group, is considered to be a political party, if, although it does not expend any funds, it turns funds over to another organization, which does expend funds for the purpose of attempting to influence the nomination of an individual for an elective public office. An organization which engages in activities which are truly nonpartisan in nature will not be considered a political party merely because it conducts activities with respect to an election campaign if, under all the facts and circumstances, it is clear that its efforts are not directed to the election of the candidates of any particular party or parties or to the selection, nomination or election of any particular candidate. For example, a committee or group will not be treated as a political party if it is organized merely to inform the electorate as to the identity and experience of all candidates involved, to present on a nonpreferential basis the issues or views of the parties or candidates as described by the parties or candidates, or to provide a forum in which the candidates are freely invited on a nonpreferential basis to discuss or debate the issues.

(2) *Contributions.* For purposes of this section and § 1.276–1, the term *contributions* includes a gift, subscription, loan, advance, or deposit, of money or anything of value, and includes a contract, promise, or agreement to make a contribution, whether or not legally enforceable.

(3) *Expenditures.* For purposes of this section and § 1.276–1, the term *expenditures* includes a payment, distribution, loan, advance, deposit, or gift, of money or anything of value, and includes a contract, promise, or agreement to make an expenditure, whether or not legally enforceable.

[T.D. 6996, 34 FR 832, Jan. 18, 1969]

§ 1.272–1 Expenditures relating to disposal of coal or domestic iron ore.

(a) *Introduction.* Section 272 provides special treatment for certain expenditures paid or incurred by a taxpayer in connection with a contract (hereafter sometimes referred to as a ‘‘coal royalty contract’’ or ‘‘iron ore royalty contract’’) for the disposal of coal or iron ore the gain or loss from which is treated under section 631(c) as a section 1231 gain or loss on the sale of coal or iron ore. See paragraph (e) of § 1.631–3 for special rules relating to iron ore. The expenditures covered by section 272 are those which are attributable to the making and administering of such a contract or to the preservation of the economic interest retained under the contract. For examples of such expenditures, see paragraph (d) of this section. For a taxable year in which gross royalty income is realized under the contract of disposal, such expenditures shall not be allowed as a deduction. Instead, they are to be added to the adjusted depletion basis of the coal or iron ore disposed of in the taxable year in computing gain or loss under section 631(c). However, where no gross royalty income is realized under the contract of disposal in a particular taxable year, such expenditure shall be treated without regard to section 272.

(b) *In general.* (1) Where the disposal of coal or iron ore is covered by section 631(c), the provisions of section 272 and this section shall be applicable for a taxable year in which there is income under the contract of disposal. (For purposes of section 272 and this section, the term *income* means gross amounts received or accrued which are royalties or bonuses in connection with a contract to which section 631(c) applies.) All expenditures paid or incurred by the taxpayer during the taxable year which are attributable to the making and administering of the contract disposing of the coal or iron ore and all expenditures paid or incurred during the taxable year in order to preserve the owner's economic interest retained under the contract shall be disallowed as deductions in computing taxable income for the taxable year. The sum of such expenditures and the adjusted depletion basis of the coal or iron ore disposed of in the taxable year shall be used in determining the amount of gain or loss with respect to the disposal. See §1.631–3. For special rule in case of loss, see paragraph (c) of this section. Section 272 and this section do not apply to capital expenditures, and such expenditures are not taken into account in computing gain or loss under section 631(c) except to the extent they are properly part of the depletable basis of the coal or iron ore.

(2) The expenditures covered under section 272 and this section are disallowed as a deduction only with respect to a taxable year in which income is realized under the coal royalty contract (or iron ore royalty contract) to which such expenditures are attributable. Where no income is realized under the contract in a taxable year, these expenditures shall be deducted as expenses for the production of income, or as a business expense, or they may be treated under section 266 (relating to taxes and carrying charges) if applicable.

(3) The provisions of section 272 and this section apply to a taxable year in which income from the disposal by the owner of coal or iron ore held by him for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977) is subject to the provisions of section 631(c) even though the actual mining of coal or iron ore under the coal royalty contract (or iron ore royalty contract) does not take place during the taxable year. Where the right under the contract to mine coal or iron ore for which advance payment has been made expires, terminates, or is abandoned before the coal or iron ore is mined, and paragraph (c) of §1.631–3 requires the owner to recompute his tax with respect to such payment, the recomputation must be made without applying the provisions of section 272 and this section.

(c) *Losses.* If, in any taxable year, the expenditures referred to in section 272 and this section plus the adjusted depletion basis (as defined in paragraph (b)(2) of §1.631–3) of the coal or iron ore disposed of during the taxable year exceed the amount realized under the contract which is subject to section 631(c) during the taxable year, such excess shall be considered under section 1231 as a loss from the sale of property used in the trade or business and, to the extent not availed of as a reduction of gain under that section, shall be a loss deductible under section 165(a) (relating to the deduction of losses generally).

(d) *Examples of expenditures.* (1) The expenditures referred to in section 272 include, but are not limited to, the following items, if such items are attributable to the making or administering of the contract or preserving the economic interest therein: Ad valorem taxes imposed by State or local authorities, costs of fire protection, costs of insurance (other than liability insurance), costs incurred in administering the contract (including costs of bookkeeping and technical supervision), interest on loans, expenses of flood control, legal and technical expenses, and expenses of measuring and checking quantities of coal or iron ore disposed of under the contract. Whether the interest on loans is attributable to the making or administering of the contract or preserving the economic interest therein will depend upon the use to which the borrowed monies are put.

(2) Any expenditure referred to in this section which is applicable to more than one coal royalty contract or iron ore royalty contract shall be reasonably apportioned to each of such contracts. Furthermore, if an expenditure applies only in part to the making

or administering of the contract or the preservation of the economic interest, then only such part shall be treated under section 272. The apportionment of the expenditure shall be made on a reasonable basis. For example, where a taxpayer has other income (such as income from oil or gas royalties, rentals, right of way fees, interest, or dividends) as well as income under section 631(c), and where the salaries of some of its employees or other expenses relate to both classes of income, such expenses shall be allocated reasonably between the income subject to section 631(c) and the other income. Where a taxpayer has more than one coal royalty contract or iron ore royalty contract, expenditures under this section relating to a contract from which no income has been received in the taxable year may not be allocated to income from another contract from which income has been received in the taxable year.

(3) The taxpayer may have expenses which are not attributable even partly to making and administering a coal royalty contract or iron ore royalty contract or to the preservation of the economic interest retained under the contract and, accordingly, are not included in the expenditures described in section 272. These include such items as ad valorem taxes imposed by State or local authorities on property not covered by the contract, salaries, wages, or other expenses entirely incident to the ownership and protection of such property and depreciation of improvements thereon, fire insurance on such property, charitable contributions, and similar expenses unrelated to the making or to the administering of coal royalty contracts or iron ore royalty contracts or preserving the taxpayer's economic interest retained therein.

(e) *Nonapplication of section.* For purposes of section 543, the provisions of section 272 shall have no application. For example, the taxpayer may, for the purposes of section 543(a)(3)(C) or the corresponding provisions of prior income tax laws, include in the sum of the deductions which are allowable under section 162 an amount paid to an attorney as compensation for legal services rendered in connection with the making of a coal royalty contract or iron ore royalty contract (assuming the expenditure otherwise qualifies under section 162 as an ordinary and necessary expense incurred in the taxpayer's trade or business), even though such expenditure is disallowed as a deduction under section 272.

[T.D. 6841, 30 FR 9304, July 27, 1965, as amended by T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§1.273–1 Life or terminable interests.

Amounts paid as income to the holder of a life or a terminable interest acquired by gift, bequest, or inheritance shall not be subject to any deduction for shrinkage (whether called by depreciation or any other name) in the value of such interest due to the lapse of time. In other words, the holder of such an interest so acquired may not set up the value of the expected future payments as corpus or principal and claim deduction for shrinkage or exhaustion thereof due to the passage of time. For the treatment generally of distributions to beneficiaries of an estate or trust, see Subparts A, B, C, and D (section 641 and following), Subchapter J, Chapter 1 of the Code, and the regulations thereunder. For basis of property acquired from a decedent and by gifts and transfers in trust, see sections 1014 and 1015, and the regulations thereunder.

§1.274–1 Disallowance of certain entertainment, gift and travel expenses.

Section 274 disallows in whole, or in part, certain expenditures for entertainment, gifts and travel which would otherwise be allowable under Chapter 1 of the Code. The requirements imposed by section 274 are in addition to the requirements for deductibility imposed by other provisions of the Code. If a deduction is claimed for an expenditure for entertainment, gifts, or travel, the taxpayer must first establish that it is otherwise allowable as a deduction under Chapter 1 of the Code before the provisions of section 274 become applicable. An expenditure for entertainment, to the extent it is lavish or extravagant, shall not be allowable as a deduction. The taxpayer should then substantiate such an expenditure in accordance with the rules under section

274(d). See §1.274–5. Section 274 is a disallowance provision exclusively, and does not make deductible any expense which is disallowed under any other provision of the Code. Similarly, section 274 does not affect the includability of an item in, or the excludability of an item from, the gross income of any taxpayer. For specific provisions with respect to the deductibility of expenditures: for an activity of a type generally considered to constitute entertainment, amusement, or recreation, and for a facility used in connection with such an activity, as well as certain travel expenses of a spouse, etc., see §1.274–2; for expenses for gifts, see §1.274–3; for expenses for foreign travel, see §1.274–4; for expenditures deductible without regard to business activity, see §1.274–6; and for treatment of personal portion of entertainment facility, see §1.274–7.

[T.D. 6659, 28 FR 6499, June 25, 1963, as amended by T.D. 8666, 61 FR 27006, May 30, 1996]

§1.274–2 Disallowance of deductions for certain expenses for entertainment, amusement, recreation, or travel.

(a) *General rules*—(1) *Entertainment activity.* Except as provided in this section, no deduction otherwise allowable under Chapter 1 of the Code shall be allowed for any expenditure with respect to entertainment unless the taxpayer establishes:

(i) That the expenditure was directly related to the active conduct of the taxpayer's trade or business, or

(ii) In the case of an expenditure directly preceding or following a substantial and bona fide business discussion (including business meetings at a convention or otherwise), that the expenditure was associated with the active conduct of the taxpayer's trade or business.

Such deduction shall not exceed the portion of the expenditure directly related to (or in the case of an expenditure described in subdivision (ii) of this subparagraph, the portion of the expenditure associated with) the active conduct of the taxpayer's trade or business.

(2) *Entertainment facilities*—(i) *Expenditures paid or incurred after December 31, 1978, and not with respect to a club.* Except as provided in this section with respect to a club, no deduction otherwise allowable under chapter 1 of the Code shall be allowed for any expenditure paid or incurred after December 31, 1978, with respect to a facility used in connection with entertainment.

(ii) *Expenditures paid or incurred before January 1, 1979, with respect to entertainment facilities, or paid or incurred before January 1, 1994, with respect to clubs*—(*a*) *Requirements for deduction.* Except as provided in this section, no deduction otherwise allowable under chapter 1 of the Internal Revenue Code shall be allowed for any expenditure paid or incurred before January 1, 1979, with respect to a facility used in connection with entertainment, or for any expenditure paid or incurred before January 1, 1994, with respect to a club used in connection with entertainment, unless the taxpayer establishes—

(*1*) That the facility or club was used primarily for the furtherance of the taxpayer's trade or business; and

(*2*) That the expenditure was directly related to the active conduct of that trade or business.

(*b*) *Amount of deduction.* The deduction allowable under paragraph (a)(2)(ii)(*a*) of this section shall not exceed the portion of the expenditure directly related to the active conduct of the taxpayer's trade or business.

(iii) *Expenditures paid or incurred after December 31, 1993, with respect to a club*—(*a*) *In general.* No deduction otherwise allowable under chapter 1 of the Internal Revenue Code shall be allowed for amounts paid or incurred after December 31, 1993, for membership in any club organized for business, pleasure, recreation, or other social purpose. The purposes and activities of a club, and not its name, determine whether it is organized for business, pleasure, recreation, or other social purpose. Clubs organized for business, pleasure, recreation, or other social purpose include any membership organization if a principal purpose of the organization is to conduct entertainment activities for members of the organization or their guests or to provide members or their guests with access to entertainment facilities within the meaning of paragraph (e)(2) of this section. Clubs organized for business, pleasure, recreation, or other social purpose include, but are not limited to, country clubs, golf and athletic clubs, airline clubs, hotel clubs, and clubs operated to provide meals under circumstances generally considered to be conducive to business discussion.

(*b*) *Exceptions.* Unless a principal purpose of the organization is to conduct entertainment activities for members or their guests or to provide members or their guests with access to entertainment facilities, business leagues, trade associations, chambers of commerce, boards of trade, real estate boards, professional organizations (such as bar associations and medical associations), and civic or public service organizations will not be treated as clubs organized for business, pleasure, recreation, or other social purpose.

(3) *Cross references.* For definition of the term *entertainment*, see paragraph (b)(1) of this section. For the disallowance of deductions for the cost of admission to a dinner or program any part of the proceeds of which inures to the use of a political party or political candidate, and cost of admission to an inaugural event or similar event identified with any political party or political candidate, see § 1.276–1. For rules and definitions with respect to:

(i) ‘‘Directly related entertainment’’, see paragraph (c) of this section,

(ii) ‘‘Associated entertainment’’, see paragraph (d) of this section,

(iii) ‘‘Expenditures paid or incurred before January 1, 1979, with respect to entertainment facilities or before January 1, 1994, with respect to clubs’’, see paragraph (e) of this section, and

(iv) ‘‘Specific exceptions’’ to the disallowance rules of this section, see paragraph (f) of this section.

(b) *Definitions*—(1) *Entertainment defined*—(i) *In general.* For purposes of this section, the term *entertainment* means any activity which is of a type generally considered to constitute entertainment, amusement, or recreation, such as entertaining at night clubs, cocktail lounges, theaters, country clubs, golf and athletic clubs, sporting events, and on hunting, fishing, vacation and similar trips, including such activity relating solely to the taxpayer or the taxpayer's family. The term *entertainment* may include an activity, the cost of which is claimed as a business expense by the taxpayer, which satisfies the personal, living, or family needs of any individual, such as providing food and beverages, a hotel suite, or an automobile to a business customer or his family. The term *entertainment* does not include activities which, although satisfying personal, living, or family needs of an individual, are clearly not regarded as constituting entertainment, such as *(a)* supper money provided by an employer to his employee working overtime, *(b)* a hotel room maintained by an employer for lodging of his employees while in business travel status, or *(c)* an automobile used in the active conduct of trade or business even though used for routine personal purposes such as commuting to and from work. On the other hand, the providing of a hotel room or an automobile by an employer to his employee who is on vacation would constitute entertainment of the employee.

(ii) *Objective test.* An objective test shall be used to determine whether an activity is of a type generally considered to constitute entertainment. Thus, if an activity is generally considered to be entertainment, it will constitute entertainment for purposes of this section and section 274(a) regardless of whether the expenditure can also be described otherwise, and even though the expenditure relates to the taxpayer alone. This objective test precludes arguments such as that *entertainment* means only entertainment of others or that an expenditure for entertainment should be characterized as an expenditure for advertising or public relations. However, in applying this test the taxpayer's trade or business shall be considered. Thus, although attending a theatrical performance would generally be considered entertainment, it would not be so considered in the case of a professional theater critic, attending in his professional capacity. Similarly, if a manufacturer of dresses conducts a fashion show to introduce his products to a group of store buyers, the show would not be generally considered to constitute entertainment. However, if an appliance distributor conducts a fashion show for the wives of his retailers, the fashion show would be generally considered to constitute entertainment.

(iii) *Special definitional rules—(a) In general.* Except as otherwise provided in *(b)* or *(c)* of this subdivision, any expenditure which might generally be considered either for a gift or entertainment, or considered either for travel or entertainment, shall be considered an expenditure for entertainment rather than for a gift or travel.

(*b*) *Expenditures deemed gifts.* An expenditure described in *(a)* of this subdivision shall be deemed for a gift to which this section does not apply if it is:

(*1*) An expenditure for packaged food or beverages transferred directly or indirectly to another person intended for consumption at a later time.

(*2*) An expenditure for tickets of admission to a place of entertainment transferred to another person if the taxpayer does not accompany the recipient to the entertainment unless the taxpayer treats the expenditure as entertainment. The taxpayer may change his treatment of such an expenditure as either a gift or entertainment at any time within the period prescribed for assessment of tax as provided in section 6501 of the Code and the regulations thereunder.

(*3*) Such other specific classes of expenditure generally considered to be for a gift as the Commissioner, in his discretion, may prescribe.

(*c*) *Expenditures deemed travel.* An expenditure described in *(a)* of this subdivision shall be deemed for travel to which this section does not apply if it is:

(*1*) With respect to a transportation type facility (such as an automobile or an airplane), even though used on other occasions in connection with an activity of a type generally considered to constitute entertainment, to the extent the facility is used in pursuit of a trade or business for purposes of transportation not in connection with entertainment. See also paragraph (e)(3)(iii)*(b)* of this section for provisions covering nonentertainment expenditures with respect to such facilities.

(*2*) Such other specific classes of expenditure generally considered to be for travel as the Commissioner, in his discretion, may prescribe.

(2) *Other definitions*—(i) *Expenditure.* The term *expenditure* as used in this section shall include expenses paid or incurred for goods, services, facilities, and items (including items such as losses and depreciation).

(ii) *Expenses for production of income.* For purposes of this section, any reference to *trade or business* shall include any activity described in section 212.

(iii) *Business associate.* The term *business associate* as used in this section means a person with whom the taxpayer could reasonably expect to engage or deal in the active conduct of the taxpayer's trade or business such as the taxpayer's customer, client, supplier, employee, agent, partner, or professional adviser, whether established or prospective.

(c) *Directly related entertainment*—(1) *In general.* Except as otherwise provided in paragraph (d) of this section (relating to associated entertainment) or under paragraph (f) of this section (relating to business meals and other specific exceptions), no deduction shall be allowed for any expenditure for entertainment unless the taxpayer establishes that the expenditure was directly related to the active conduct of his trade or business within the meaning of this paragraph.

(2) *Directly related entertainment defined.* Any expenditure for entertainment, if it is otherwise allowable as a deduction under chapter 1 of the Code, shall be considered directly related to the active conduct of the taxpayer's trade or business if it meets the requirements of any one of subparagraphs (3), (4), (5), or (6) of this paragraph.

(3) *Directly related in general.* Except as provided in subparagraph (7) of this paragraph, an expenditure for entertainment shall be considered directly related to the active conduct of the taxpayer's trade or business if it is established that it meets all of the requirements of subdivisions (i), (ii), (iii) and (iv) of this subparagraph.

(i) At the time the taxpayer made the entertainment expenditure (or committed himself to make the expenditure), the taxpayer had more than a general expectation of deriving some income or other specific trade or business benefit (other than the goodwill of the person or persons entertained) at some indefinite future time from the making of the expenditure. A taxpayer, however, shall not be required to show that income or other business benefit actually resulted from each and every expenditure for which a deduction is claimed.

(ii) During the entertainment period to which the expenditure related, the taxpayer actively engaged in a business meeting, negotiation, discussion, or other bona fide business transaction, other than entertainment, for the purpose of obtaining such income or other specific trade or business benefit (or, at the time the taxpayer made the expenditure or committed himself to the expenditure, it was reasonable for the taxpayer to expect that he would have done so, although such was not the case solely for reasons beyond the taxpayer's control).

(iii) In light of all the facts and circumstances of the case, the principal character or aspect of the combined business and entertainment to which the expenditure related was the active conduct of the taxpayer's trade or business (or at the time the taxpayer made the expenditure or committed himself to the expenditure, it was reasonable for the taxpayer to expect that the active conduct of trade or business would have been the principal character or aspect of the entertainment, although such was not the case solely for reasons beyond the taxpayer's control). It is not necessary that more time be devoted to business than to entertainment to meet this requirement. The active conduct of trade or business is considered not to be the principal character or aspect of combined business and entertainment activity on hunting or fishing trips or on yachts and other pleasure boats unless the taxpayer clearly establishes to the contrary.

(iv) The expenditure was allocable to the taxpayer and a person or persons with whom the taxpayer engaged in the active conduct of trade or business during the entertainment or with whom the taxpayer establishes he would have engaged in such active conduct of trade or business if it were not for circumstances beyond the taxpayer's control. For expenditures closely connected with directly related entertainment, see paragraph (d)(4) of this section.

(4) *Expenditures in clear business setting.* An expenditure for entertainment shall be considered directly related to the active conduct of the taxpayer's trade or business if it is established that the expenditure was for entertainment occurring in a clear business setting directly in furtherance of the taxpayer's trade or business. Generally, entertainment shall not be considered to have occurred in a clear business setting unless the taxpayer clearly establishes that any recipient of the entertainment would have reasonably known that the taxpayer had no significant motive, in incurring the expenditure, other than directly furthering his trade or business. Objective rather than subjective standards will be determinative. Thus, entertainment which occurred under any circumstances described in subparagraph (7)(ii) of this paragraph ordinarily will not be considered as occurring in a clear business setting. Such entertainment will generally be considered to be socially rather than commercially motivated. Expenditures made for the furtherance of a taxpayer's trade or business in providing a ‘‘hospitality room’’ at a convention (described in paragraph (d)(3)(i)*(b)* of this section) at which goodwill is created through display or discussion of the taxpayer's products, will, however, be treated as directly related. In addition, entertainment of a clear business nature which occurred under circumstances where there was no meaningful personal or social relationship between the taxpayer and the recipients of the entertainment may be considered to have occurred in a clear business setting. For example, entertainment of business representatives and civic leaders at the opening of a new hotel or theatrical production, where the clear purpose of the taxpayer is to obtain business publicity rather than to create or maintain the goodwill of the recipients of the entertainment, would generally be considered to be in a clear business setting. Also, entertainment which has the principal effect of a price rebate in connection

with the sale of the taxpayer's products generally will be considered to have occurred in a clear business setting. Such would be the case, for example, if a taxpayer owning a hotel were to provide occasional free dinners at the hotel for a customer who patronized the hotel.

(5) *Expenditures for services performed.* An expenditure shall be considered directly related to the active conduct of the taxpayer's trade or business if it is established that the expenditure was made directly or indirectly by the taxpayer for the benefit of an individual (other than an employee), and if such expenditure was in the nature of compensation for services rendered or was paid as a prize or award which is required to be included in gross income under section 74 and the regulations thereunder. For example, if a manufacturer of products provides a vacation trip for retailers of his products who exceed sales quotas as a prize or award which is includible in gross income, the expenditure will be considered directly related to the active conduct of the taxpayer's trade or business.

(6) *Club dues, etc., allocable to business meals.* An expenditure shall be considered directly related to the active conduct of the taxpayer's trade or business if it is established that the expenditure was with respect to a facility (as described in paragraph (e) of this section) used by the taxpayer for the furnishing of food or beverages under circumstances described in paragraph (f)(2)(i) of this section (relating to business meals and similar expenditures), to the extent allocable to the furnishing of such food or beverages. This paragraph (c)(6) applies to club dues paid or incurred before January 1, 1987.

(7) *Expenditures generally considered not directly related.* Expenditures for entertainment, even if connected with the taxpayer's trade or business, will generally be considered not directly related to the active conduct of the taxpayer's trade or business, if the entertainment occurred under circumstances where there was little or no possibility of engaging in the active conduct of trade or business. The following circumstances will generally be considered circumstances where there was little or no possibility of engaging in the active conduct of a trade or business:

(i) The taxpayer was not present;

(ii) The distractions were substantial, such as:

(*a*) A meeting or discussion at night clubs, theaters, and sporting events, or during essentially social gatherings such as cocktail parties, or

(*b*) A meeting or discussion, if the taxpayer meets with a group which includes persons other than business associates, at places such as cocktail lounges, country clubs, golf and athletic clubs, or at vacation resorts.

An expenditure for entertainment in any such case is considered not to be directly related to the active conduct of the taxpayer's trade or business unless the taxpayer clearly establishes to the contrary.

(d) *Associated entertainment*—(1) *In general.* Except as provided in paragraph (f) of this section (relating to business meals and other specific exceptions) and subparagraph (4) of this paragraph (relating to expenditures closely connected with directly related entertainment), any expenditure for entertainment which is not directly related to the active conduct of the taxpayer's trade or business will not be allowable as a deduction unless:

(i) It was associated with the active conduct of trade or business as defined in subparagraph (2) of this paragraph, and

(ii) The entertainment directly preceded or followed a substantial and bona fide business discussion as defined in subparagraph (3) of this paragraph.

(2) *Associated entertainment defined.* Generally, any expenditure for entertainment, if it is otherwise allowable under Chapter 1 of the Code, shall be considered associated with the active conduct of the taxpayer's trade or business if the taxpayer establishes that he had a clear business purpose in making the expenditure, such as to obtain new business or to encourage the continuation of an existing business relationship. However, any portion of an expenditure allocable to a person who was not closely connected with a person who engaged in the substantial and bona fide business discussion (as defined in subparagraph (3)(i) of this

paragraph) shall not be considered associated with the active conduct of the taxpayer's trade or business. The portion of an expenditure allocable to the spouse of a person who engaged in the discussion will, if it is otherwise allowable under chapter 1 of the Code, be considered associated with the active conduct of the taxpayer's trade or business.

(3) *Directly preceding or following a substantial and bona fide business discussion defined*—(i) *Substantial and bona fide business discussion*—(*a*) *In general.* Whether any meeting, negotiation or discussion constitutes a ''substantial and bona fide business discussion'' within the meaning of this section depends upon the facts and circumstances of each case. It must be established, however, that the taxpayer actively engaged in a business meeting, negotiation, discussion, or other bona fide business transaction, other than entertainment, for the purpose of obtaining income or other specific trade or business benefit. In addition, it must be established that such a business meeting, negotiation, discussion, or transaction was substantial in relation to the entertainment. This requirement will be satisfied if the principal character or aspect of the combined entertainment and business activity was the active conduct of business. However, it is not necessary that more time be devoted to business than to entertainment to meet this requirement.

(*b*) *Meetings at conventions, etc.* Any meeting officially scheduled in connection with a program at a convention or similar general assembly, or at a bona fide trade or business meeting sponsored and conducted by business or professional organizations, shall be considered to constitute a substantial and bona fide business discussion within the meaning of this section provided:

(*1*) *Expenses necessary to taxpayer's attendance.* The expenses necessary to the attendance of the taxpayer at the convention, general assembly, or trade or business meeting, were ordinary and necessary within the meaning of section 162 or 212;

(*2*) *Convention program.* The organization which sponsored the convention, or trade or business meeting had scheduled a program of business activities (including committee meetings or presentation of lectures, panel discussions, display of products, or other similar activities), and that such program was the principal activity of the convention, general assembly, or trade or business meeting.

(ii) *Directly preceding or following.* Entertainment which occurs on the same day as a substantial and bona fide business discussion (as defined in subdivision (i) of this subparagraph) will be considered to directly precede or follow such discussion. If the entertainment and the business discussion do not occur on the same day, the facts and circumstances of each case are to be considered, including the place, date and duration of the business discussion, whether the taxpayer or his business associates are from out of town, and, if so, the date of arrival and departure, and the reasons the entertainment did not take place on the day of the business discussion. For example, if a group of business associates comes from out of town to the taxpayer's place of business to hold a substantial business discussion, the entertainment of such business guests and their wives on the evening prior to, or on the evening of the day following, the business discussion would generally be regarded as directly preceding or following such discussion.

(4) *Expenses closely connected with directly related entertainment.* If any portion of an expenditure meets the requirements of paragraph (c)(3) of this section (relating to directly related entertainment in general), the remaining portion of the expenditure, if it is otherwise allowable under Chapter 1 of the Code, shall be considered associated with the active conduct of the taxpayer's trade or business to the extent allocable to a person or persons closely connected with a person referred to in paragraph (c)(3)(iv) of this section. The spouse of a person referred to in paragraph(c)(3)(iv) of this section will be considered closely connected to such a person for purposes of this subparagraph. Thus, if a taxpayer and his wife entertain a business customer and the customer's wife under circumstances where the entertainment of the customer is considered directly related to the active conduct of the taxpayer's

trade or business (within the meaning of paragraph (c)(3) of this section) the portion of the expenditure allocable to both wives will be considered associated with the active conduct of the taxpayer's trade or business under this subparagraph.

(e) *Expenditures paid or incurred before January 1, 1979, with respect to entertainment facilities or before January 1, 1994, with respect to clubs*—(1) *In general.* Any expenditure paid or incurred before January 1, 1979, with respect to a facility, or paid or incurred before January 1, 1994, with respect to a club, used in connection with entertainment shall not be allowed as a deduction except to the extent it meets the requirements of paragraph (a)(2)(ii) of this section.

(2) *Facilities used in connection with entertainment*—(i) *In general.* Any item of personal or real property owned, rented, or used by a taxpayer shall (unless otherwise provided under the rules of subdivision (ii) of this subparagraph) be considered to constitute a facility used in connection with entertainment if it is used during the taxable year for, or in connection with, entertainment (as defined in paragraph (b)(1) of this section). Examples of facilities which might be used for, or in connection with, entertainment include yachts, hunting lodges, fishing camps, swimming pools, tennis courts, bowling alleys, automobiles, airplanes, apartments, hotel suites, and homes in vacation resorts.

(ii) *Facilities used incidentally for entertainment.* A facility used only incidentally during a taxable year in connection with entertainment, if such use is insubstantial, will not be considered a ''facility used in connection with entertainment'' for purposes of this section or for purposes of the recordkeeping requirements of section 274(d). See §1.274–5(c)(6)(iii).

(3) *Expenditures with respect to a facility used in connection with entertainment*—(i) *In general.* The phrase *expenditures with respect to a facility used in connection with entertainment* includes depreciation and operating costs, such as rent and utility charges (for example, water or electricity), expenses for the maintenance, preservation or protection of a facility (for example, repairs, painting, insurance charges), and salaries or expenses for subsistence paid to caretakers or watchmen. In addition, the phrase includes losses realized on the sale or other disposition of a facility.

(ii) *Club dues*—(*a*) *Club dues paid or incurred before January 1, 1994.* Dues or fees paid before January 1, 1994, to any social, athletic, or sporting club or organization are considered expenditures with respect to a facility used in connection with entertainment. The purposes and activities of a club or organization, and not its name, determine its character. Generally, the phrase *social, athletic, or sporting club or organization* has the same meaning for purposes of this section as that phrase had in section 4241 and the regulations thereunder, relating to the excise tax on club dues, prior to the repeal of section 4241 by section 301 of Public Law 89–44. However, for purposes of this section only, clubs operated solely to provide lunches under circumstances of a type generally considered to be conducive to business discussion, within the meaning of paragraph (f)(2)(i) of this section, will not be considered social clubs.

(*b*) *Club dues paid or incurred after December 31, 1993.* See paragraph (a)(2)(iii) of this section with reference to the disallowance of deductions for club dues paid or incurred after December 31, 1993.

(iii) *Expenditures not with respect to a facility.* The following expenditures shall not be considered to constitute expenditures with respect to a facility used in connection with entertainment:

(*a*) *Out of pocket expenditures.* Expenses (exclusive of operating costs and other expenses referred to in subdivision (i) of this subparagraph) incurred at the time of an entertainment activity, even though in connection with the use of facility for entertainment purposes, such as expenses for food and beverages, or expenses for catering, or expenses for gasoline and fishing bait consumed on a fishing trip;

(*b*) *Non-entertainment expenditures.* Expenses or items attributable to the use of a facility for other than entertainment purposes such as expenses for an automobile when not used for entertainment; and

(*c*) *Expenditures otherwise deductible.* Expenses allowable as a deduction without regard to their connection with a taxpayer's trade or business such as taxes, interest, and casualty losses. The provisions of this subdivision shall be applied in the case of a taxpayer which is not an individual as if it were an individual. See also § 1.274–6.

(iv) *Cross reference.* For other rules with respect to treatment of certain expenditures for entertainment-type facilities, see § 1.274–7.

(4) *Determination of primary use*—(i) *In general.* A facility used in connection with entertainment shall be considered as used primarily for the furtherance of the taxpayer's trade or business only if it is established that the primary use of the facility during the taxable year was for purposes considered ordinary and necessary within the meaning of sections 162 and 212 and the regulations thereunder. All of the facts and circumstances of each case shall be considered in determining the primary use of a facility. Generally, it is the actual use of the facility which establishes the deductibility of expenditures with respect to the facility; not its availability for use and not the taxpayer's principal purpose in acquiring the facility. Objective rather than subjective standards will be determinative. If membership entitles the member's entire family to use of a facility, such as a country club, their use will be considered in determining whether business use of the facility exceeds personal use. The factors to be considered include the nature of each use, the frequency and duration of use for business purposes as compared with other purposes, and the amount of expenditures incurred during use for business compared with amount of expenditures incurred during use for other purposes. No single standard of comparison, or quantitative measurement, as to the significance of any such factor, however, is necessarily appropriate for all classes or types of facilities. For example, an appropriate standard for determining the primary use of a country club during a taxable year will not necessarily be appropriate for determining the primary use of an airplane. However, a taxpayer shall be deemed to have established that a facility was used primarily for the furtherance of his trade or business if he establishes such primary use in accordance with subdivision (ii) or (iii) of this subparagraph. Subdivisions (ii) and (iii) of this subparagraph shall not preclude a taxpayer from otherwise establishing the primary use of a facility under the general provisions of this subdivision.

(ii) *Certain transportation facilities.* A taxpayer shall be deemed to have established that a facility of a type described in this subdivision was used primarily for the furtherance of his trade or business if:

(*a*) *Automobiles.* In the case of an automobile, the taxpayer establishes that more than 50 percent of mileage driven during the taxable year was in connection with travel considered to be ordinary and necessary within the meaning of section 162 or 212 and the regulations thereunder.

(*b*) *Airplanes.* In the case of an airplane, the taxpayer establishes that more than 50 percent of hours flown during the taxable year was in connection with travel considered to be ordinary and necessary within the meaning of section 162 or 212 and the regulations thereunder.

(iii) *Entertainment facilities in general.* A taxpayer shall be deemed to have established that:

(*a*) A facility used in connection with entertainment, such as a yacht or other pleasure boat, hunting lodge, fishing camp, summer home or vacation cottage, hotel suite, country club, golf club or similar social, athletic, or sporting club or organization, bowling alley, tennis court, or swimming pool, or,

(*b*) A facility for employees not falling within the scope of section 274(e) (2) or (5) was used primarily for the furtherance of his trade or business if he establishes that more than 50 percent of the total calendar days of use of the facility by, or under authority of, the taxpayer during the taxable year were days of business use. Any use of a facility (of a type described in this subdivision) during one calendar day shall be considered to constitute a ''day of business use'' if the primary use of the facility on such day was ordinary and necessary within the meaning of section 162 or 212 and the regulations thereunder. For the purposes of this subdivision, a facility shall be deemed to have been primarily used for such pruposes on any one calendar day if the facility was used for the conduct of a substantial and bona fide business discussion (as defined in paragraph (d)(3)(i) of this section) notwithstanding that the facility may also have been used on the same day for personal or family use by the taxpayer or any member of the taxpayer's family not involving entertainment of others by, or under the authority of, the taxpayer.

(f) *Specific exceptions to application of this section*—(1) *In general.* The provisions of paragraphs (a) through (e) of this section (imposing limitations on deductions for entertainment expenses) are not applicable in the case of expenditures set forth in subparagraph (2) of this paragraph. Such expenditures are deductible to the extent allowable under chapter 1 of the Code. This paragraph shall not be construed to affect the allowability or nonallowability of a deduction under section 162 or 212 and the regulations thereunder. The fact that an expenditure is not covered by a specific exception provided for in this paragraph shall not be determinative of the allowability or nonallowability of the expenditure under paragraphs (a) through (e) of this section. Expenditures described in subparagraph (2) of this paragraph are subject to the substantiation requirements of section 274(d) to the extent provided in §1.274–5.

(2) *Exceptions.* The expenditures referred to in subparagraph (1) of this paragraph are set forth in subdivisions (i) through (ix) of this subparagraph.

(i) *Business meals and similar expenditures paid or incurred before January 1, 1987*—(*a*) *In general.* Any expenditure for food or beverages furnished to an individual under circumstances of a type generally considered conducive to business discussion (taking into account the surroundings in which furnished, the taxpayer's trade, business, or income-producing activity, and the relationship to such trade, business or activity of the persons to whom the food or beverages are furnished) is not subject to the limitations on allowability of deductions provided for in paragraphs (a) through (e) of this section. There is no requirement that business actually be discussed for this exception to apply.

(*b*) *Surroundings.* The surroundings in which the food or beverages are furnished must be such as would provide an atmosphere where there are no substantial distractions to discussion. This exception applies primarily to expenditures for meals and beverages served during the course of a breakfast, lunch or dinner meeting of the taxpayer and his business associates at a restaurant, hotel dining room, eating club or similar place not involving distracting influences such as a floor show. This exception also applies to expenditures for beverages served apart from meals if the expenditure is incurred in surroundings similarly conducive to business discussion, such as an expenditure for beverages served during the meeting of the taxpayer and his business associates at a cocktail lounge or hotel bar not involving distracting influences such as a floor show. This exception may also apply to expenditures for meals or beverages served in the taxpayer's residence on a clear showing that the expenditure was commercially rather than socially motivated. However, this exception, generally, is not applicable to any expenditure for meals or beverages furnished in circumstances where there are major distractions not conducive to business discussion, such as at night clubs, sporting events, large cocktail parties, sizeable social gatherings, or other major distracting influences.

(*c*) *Taxpayer's trade or business and relationship of persons entertained.* The taxpayer's trade, business, or income-producing activity and the relationship of the persons to whom the food or beverages are served to such trade, business or activity must be such as will reasonably indicate that the food or beverages were furnished for the primary purpose of furthering the taxpayer's trade or business and did not primarily serve a social or personal purpose. Such a business purpose would be indicated, for example, if a salesman employed by a manufacturing supply company meets for lunch during a normal business day with a purchasing agent for a manufacturer which is a prospective customer. Such a purpose would also be indicated if a life insurance agent meets for lunch during a normal business day with a client.

(*d*) *Business programs.* Expenditures for business luncheons or dinners which are part of a business program, or banquets officially sponsored by business or professional associations, will be regarded as expenditures to which the exception of this subdivision (i) applies. In the case of such a business luncheon or dinner it is not always necessary that the taxpayer attend the luncheon or dinner himself. For example, if a dental equipment supplier purchased a table at a dental association banquet for dentists who are actual or prospective customers for his equipment, the cost of the table would not be disallowed under this section. See also paragraph (c)(4) of this section relating to expenditures made in a clear business setting.

(ii) *Food and beverages for employees.* Any expenditure by a taxpayer for food and beverages (or for use of a facility in connection therewith) furnished on the taxpayer's business premises primarily for his employees is not subject to the limitations on allowability of deductions provided for in paragraphs (a) through (e) of this section. This exception applies not only to expenditures for food or beverages furnished in a typical company cafeteria or an executive dining room, but also to expenditures with respect to the operation of such facilities. This exception applies even though guests are occasionally served in the cafeteria or dining room.

(iii) *Certain entertainment and travel expenses treated as compensation*—(A) *In general.* Any expenditure by a taxpayer for entertainment (or for use of a facility in connection therewith) or for travel described in section 274(m)(3), if an employee is the recipient of the entertainment or travel, is not subject to the limitations on allowability of deductions provided for in paragraphs (a) through (e) of this section to the extent that the expenditure is treated by the taxpayer—

(*1*) On the taxpayer's income tax return as originally filed, as compensation paid to the employee; and

(*2*) As wages to the employee for purposes of withholding under chapter 24 (relating to collection of income tax at source on wages).

(B) *Expenses includible in income of persons who are not employees.* Any expenditure by a taxpayer for entertainment (or for use of a facility in connection therewith), or for travel described in section 274(m)(3), is not subject to the limitations on allowability of deductions provided for in paragraphs (a) through (e) of this section to the extent the expenditure is includible in gross income as compensation for services rendered, or as a prize or award under section 74, by a recipient of the expenditure who is not an employee of the taxpayer. The preceding sentence shall not apply to any amount paid or incurred by the taxpayer if such amount is required to be included (or would be so required except that the amount is less that $600) in any information return filed by such taxpayer under part III of subchapter A of chapter 61 and is not so included. See section 274(e)(9).

(C) *Example.* The following example illustrates the provisions this paragraph (f):

Example. If an employer rewards the employee (and the employee's spouse) with an expense paid vacation trip, the expense is deductible by the employer (if otherwise allowable under section 162 and the regulations thereunder) to the extent the employer treats the expenses as compensation and as wages. On the other hand, if a taxpayer owns a yacht which the taxpayer uses for the entertainment of business customers, the portion of salary paid to employee members of the crew which is allocable to use of the yacht for entertainment purposes (even though treated on the taxpayer's tax return as compensation and treated as wages for withholding tax purposes) would not come within this exception since the members of the crew were not recipients of the entertainment. If an expenditure of a type described in this subdivision properly constitutes a dividend paid to a shareholder or if it constitutes unreasonable compensation paid to an employee, nothing in this exception prevents disallowance of the expenditure to the taxpayer under other provisions of the Internal Revenue Code.

(iv) *Reimbursed entertainment expenses—(a) Introductory.* In the case of any expenditure for entertainment paid or incurred by one person in connection with the performance by him of services for another person (whether or not such other person is an employer) under a reimbursement or other expense allowance arrangement, the limitations on allowability of deductions provided for in paragraphs (a) through (e) of this section shall be applied only once, either *(1)* to the person who makes the expenditure or *(2)* to the person who actually bears the expense, but not to both. For purposes of this subdivision (iv), the term *reimbursement or other expense allowance arrangement* has the same meaning as it has in section 62(2)(A), but without regard to whether the taxpayer is the employee of a person for whom services are performed. If an expenditure of a type described in this subdivision properly constitutes a dividend paid to a shareholder, unreasonable compensation paid to an employee, or a personal, living or family expense, nothing in this exception prevents disallowance of the expenditure to the taxpayer under other provisions of the Code.

(*b*) *Reimbursement arrangements between employee and employer.* In the case of an expenditure for entertainment paid or incurred by an employee under a reimbursement or other expense allowance arrangement with his employer, the limitations on deductions provided for in paragraphs (a) through (e) of this section shall not apply:

(*1*) *Employees.* To the employee except to the extent his employer has treated the expenditure on the employer's income tax return as originally filed as compensation paid to the employee and as wages to such employee for purposes of withholding under Chapter 24 (relating to collection of income tax at source on wages).

(*2*) *Employers.* To the employer to the extent he has treated the expenditure as compensation and wages paid to an employee in the manner provided in *(b)(1)* of this subdivision.

(*c*) *Reimbursement arrangements between independent contractors and clients or customers.* In the case of an expenditure for entertainment paid or incurred by one person (hereinafter termed ‘‘independent contractor’’) under a reimbursement or other expense allowance arrangement with another person other than an employer (hereinafter termed ‘‘client or customer’’), the limitations on deductions provided for in paragraphs (a) through (e) of this section shall not apply:

(*1*) *Independent contractors.* To the independent contractor to the extent he accounts to his client or customer within the meaning of section 274(d) and the regulations thereunder. See §1.274–5.

(*2*) *Clients or customers.* To the client or customer if the expenditure is disallowed to the independent contractor under paragraphs (a) through (e) of this section.

(v) *Recreational expenses for employees generally.* Any expenditure by a taxpayer for a recreational, social, or similar activity (or for use of a facility in connection therewith), primarily for the benefit of his employees generally, is not subject to the limitations on allowability of deductions provided for in paragraphs (a) through (e) of this section. This exception applies only to expenditures made primarily for the benefit of employees of the taxpayer other than employees who are officers, shareholders on other owners who own a 10-percent or greater interest in the business, or other highly compensated employees. For purposes of the preceding sentence, an employee shall be treated as owning any interest owned by a member of his family (within the meaning of section 267(c)(4) and the regulations thereunder). Ordinarily, this exception applies to usual employee benefit programs such as expenses of a taxpayer *(a)* in holding Christmas parties, annual picnics, or summer outings, for his employees generally, or *(b)* of maintaining a swimming pool, baseball diamond, bowling alley, or golf course available to his employees generally. Any expenditure for an activity which is made under circumstances which discriminate in favor of employees who are officers, shareholders or other owners, or highly compensated employees shall not be considered made primarily for the benefit of employees generally. On the other hand, an expenditure for an activity will not be considered outside of this exception merely because, due to the large number of employees involved, the activity is intended to benefit only a limited number of such employees at one time, provided the activity does not discriminate in favor of officers, shareholders, other owners, or highly compensated employees.

(vi) *Employee, stockholder, etc., business meetings.* Any expenditure by a taxpayer for entertainment which is directly related to bona fide business meetings of the taxpayer's employees, stockholders, agents, or directors held principally for discussion of trade or business is not subject to the limitations on allowability of deductions provided for in paragraphs (a) through (e) of this section. For purposes of this exception, a partnership is to be considered a taxpayer and a member of a partnership is to be considered an agent. For example, an expenditure by a taxpayer to furnish refreshments to his employees at a bona fide meeting, sponsored by the taxpayer for the principal purpose of instructing them with respect to a new procedure for conducting his business, would be within the provisions of this exception. A similar expenditure made at a bona fide meeting of stockholders of the taxpayer for the election of directors and discussion of corporate affairs would also be within the provisions of this exception. While this exception will apply to bona fide business meetings even though some social activities are provided, it will not apply to meetings which are primarily for social or nonbusiness purposes rather than for the transaction of the taxpayer's business. A meeting under circumstances where there was little or no possibility of engaging in the active conduct of trade or business (as described in paragraph (c)(7) of this section) generally will not be considered a business meeting for purposes of this subdivision. This exception will not apply to a meeting or convention of employees or agents, or similar meeting for directors, partners or others for the principal purpose of rewarding them for their services to the taxpayer. However, such a meeting or convention of employees might come within the scope of subdivisions (iii) or (v) of this subparagraph.

(vii) *Meetings of business leagues, etc.* Any expenditure for entertainment directly related and necessary to attendance at bona fide business meetings or conventions of organizations exempt from taxation under section 501(c)(6) of the Code, such as business leagues, chambers of commerce, real estate boards, boards of trade, and certain professional associations, is not subject to the limitations on allowability of deductions provided in paragraphs (a) through (e) of this section.

(viii) *Items available to the public.* Any expenditure by a taxpayer for entertainment (or for a facility in connection therewith) to the extent the entertainment is made available to the general public is not subject to the limitations on allowability of deductions provided for in paragraphs (a) through (e) of this section. Expenditures for entertainment of the general public by means of television, radio, newspapers and the like, will come within this exception, as will expenditures for distributing samples to the general public. Similarly, expenditures for maintaining private parks, golf courses and similar facilities, to the extent that they are available for public use, will come within this exception. For example, if a corporation maintains a swimming pool which it makes available for a period of time each week to children participating in a local public recreational program, the portion of the expense relating to such public use of the pool will come within this exception.

(ix) *Entertainment sold to customers.* Any expenditure by a taxpayer for entertainment (or for use of a facility in connection therewith) to the extent the entertainment is sold to customers in a bona fide transaction for an adequate and full consideration in money or money's worth is not subject to the limitations on allowability of deductions provided for in paragraphs (a) through (e) of this section. Thus, the cost of producing night club entertainment (such as salaries paid to employees of night clubs and amounts paid to performers) for sale to customers or the cost of operating a pleasure cruise ship as a business will come within this exception.

(g) *Additional provisions of section 274—travel of spouse, dependent or others.*

Section 274(m)(3) provides that no deduction shall be allowed under this chapter (except section 217) for travel expenses paid or incurred with respect to a spouse, dependent, or other individual accompanying the taxpayer (or an officer or employee of the taxpayer) on business travel, unless certain conditions are met. As provided in section 274(m)(3), the term *other individual* does not include a business associate (as defined in paragraph (b)(2)(iii) of this section) who otherwise meets the requirements of sections 274(m)(3)(B) and (C).

[T.D. 6659, 28 FR 6499, June 25, 1963, as amended by T.D. 6996, 34 FR 835, Jan. 18, 1969; T.D. 8051, 50 FR 36576, Sept. 9, 1985; T.D. 8601, 60 FR 36994, July 19, 1995; T.D. 8666, 61 FR 27006, May 30, 1996]

§1.274–3 Disallowance of deduction for gifts.

(a) *In general.* No deduction shall be allowed under section 162 or 212 for any expense for a gift made directly or indirectly by a taxpayer to any individual to the extent that such expense, when added to prior expenses of the taxpayer for gifts made to such individual during the taxpayer's taxable year, exceeds $25.

(b) *Gift defined*—(1) *In general.* Except as provided in subparagraph (2) of this paragraph the term *gift*, for purposes of this section, means any item excludable from the gross income of the recipient under section 102 which is not excludable from his gross income under any other provision of chapter 1 of the Code. Thus, a payment by an employer to a deceased employee's widow is not a gift, for purposes of this section, to the extent the payment constitutes an employee's death benefit excludable by the recipient under section 101(b). Similarly, a scholarship which is excludable from a recipient's gross income under section 117, and a prize or award which is excludable from a recipient's gross income under section 74(b), are not subject to the provisions of this section.

(2) *Items not treated as gifts.* The term *gift*, for purposes of this section, does not include the following:

(i) An item having a cost to the taxpayer not in excess of $4.00 on which the name of the taxpayer is clearly and permanently imprinted and which is one of a number of identical items distributed generally by such a taxpayer.

(ii) A sign, display rack, or other promotional material to be used on the business premises of the recipient, or

(iii) In the case of a taxable year of a taxpayer ending on or after August 13, 1981, an item of tangible personal property which is awarded before January 1, 1987, to an employee of the taxpayer by reason of the employee's length of service (including an award upon retirement), productivity, or safety achievement, but only to the extent that—

(A) The cost of the item to the taxpayer does not exceed $400; or

(B) The item is a qualified plan award (as defined in paragraph (d) of this section); or

(iv) In the case of a taxable year of a taxpayer ending before August 13, 1981, an item of tangible personal property having a cost to the taxpayer not in excess of $100 which is awarded to an employee of the taxpayer by reason of the employee's length of service (including an award upon retirement) or safety achievement.

For purposes of paragraphs (b)(2) (iii) and (iv) of this section, the term *tangible personal property* does not include cash or any gift certificate other than a nonnegotiable gift certificate conferring only the right to receive tangible personal property. Thus, for example, if a nonnegotiable gift certificate entitles an employee to choose between selecting an item of merchandise or receiving cash or reducing the balance due on his account with the issuer of the gift certificate, the gift certificate is not tangible personal property for purposes of this section. To the extent that an item is not treated as a gift for purposes of this section, the deductibility of the expense of the item is not governed by this section, and the taxpayer need not take such item into account in determining whether the $25 limitation on gifts to any individual has been exceeded. For example, if an employee receives by reason of his length of service a gift of an item of tangible personal property that costs the employer $450, the deductibility of only $50 ($450 minus $400) is governed by this section, and the employer takes the $50 into account for purposes of the $25 limitation on gifts to that employee. The fact that an item is wholly or partially excepted from the applicability of this section has no effect in determining whether the value of the item is includible in the gross income of the recipient. For rules relating to the taxability to the recipient of any item described in this subparagraph, see sections 61, 74, and 102 and the regulations thereunder. For rules relating to the deductibility of employee achievement awards awarded after December 31, 1986, see section 274 (j).

(c) *Expense for a gift.* For purposes of this section, the term *expense for a gift* means the cost of the gift to the taxpayer, other than incidental costs such as for customary engraving on jewelry, or for packaging, insurance, and mailing or other delivery. A related cost will be considered ‘‘incidental’’ only if it does not add substantial value to the gift. Although the cost of customary gift wrapping will be considered an incidental cost, the purchase of an ornamental basket for packaging fruit will not be considered an incidental cost of packaging if the basket has a value which is substantial in relation to the value of the fruit.

(d) *Qualified plan award*—(1) *In general.* Except as provided in subparagraph (2) of this paragraph the term *qualified plan award,* for purposes of this section, means an item of tangible personal property that is awarded to an employee by reason of the employee’s length of service (including retirement), productivity, or safety achievement, and that is awarded pursuant to a permanent, written award plan or program of the taxpayer that does not discriminate as to eligibility or benefits in favor of employees who are officers, shareholders, or highly compensated employees. The ‘‘permanency’’ of an award plan shall be determined from all the facts and circumstances of the particular case, including the taxpayer’s ability to continue to make the awards as required by the award plan. Although the taxpayer may reserve the right to change or to terminate an award plan, the actual termination of the award plan for any reason other than business necessity within a few years after it has taken effect may be evidence that the award plan from its inception was not a ‘‘permanent’’ award plan. Whether or not an award plan is discriminatory shall be determined from all the facts and circumstances of the particular case. An award plan may fail to qualify because it is discriminatory in its actual operation even though the written provisions of the award plan are not discriminatory.

(2) *Items not treated as qualified plan awards.* The term *qualified plan award,* for purposes of this section, does not include an item qualifying under paragraph (d)(1) of this section to the extent that the cost of the item exceeds $1,600. In addition, that term does not include any items qualifying under paragraph (d)(1) of this section if the average cost of all items (whether or not tangible personal property) awarded during the taxable year by the taxpayer under any plan described in paragraph (d)(1) of this section exceeds $400. The average cost of those items shall be computed by dividing (i) the sum of the costs for those items (including amounts in excess of the $1,600 limitation) by (ii) the total number of those items.

(e) *Gifts made indirectly to an individual*—(1) *Gift to spouse or member of family.* If a taxpayer makes a gift to the wife of a man who has a business connection with the taxpayer, the gift generally will be considered as made indirectly to the husband. However, if the wife has a bona fide business connection with the taxpayer independently of her relationship to her husband, a gift to her generally will not be considered as made indirectly to her husband unless the gift is intended for his eventual use or benefit. Thus, if a taxpayer makes a gift to a wife who is engaged with her husband in the active conduct of a partnership business, the gift to the wife will not be considered an indirect gift to her husband unless it is intended for his eventual use or benefit. The same rules apply to gifts to any other member of the family of an individual who has a business connection with the taxpayer.

(2) *Gift to corporation or other business entity.* If a taxpayer makes a gift to a corporation or other business entity intended for the eventual personal use or

benefit of an individual who is an employee, stockholder, or other owner of the corporation or business entity, the gift generally will be considered as made indirectly to such individual. Thus, if a taxpayer provides theater tickets to a closely held corporation for eventual use by any one of the stockholders of the corporation, and if such tickets are gifts, the gifts will be considered as made indirectly to the individual who eventually uses such ticket. On the other hand, a gift to a business organization of property to be used in connection with the business of the organization (for example, a technical manual) will not be considered as a gift to an individual, even though, in practice, the book will be used principally by a readily identifiable individual employee. A gift for the eventual personal use or benefit of some undesignated member of a large group of individuals generally will not be considered as made indirectly to the individual who eventually uses, or benefits from, such gifts unless, under the circumstances of the case, it is reasonably practicable for the taxpayer to ascertain the ultimate recipient of the gift. Thus, if a taxpayer provides several baseball tickets to a corporation for the eventual use by any one of a large number of employees or customers of the corporation, and if such tickets are gifts, the gifts generally will not be treated as made indirectly to the individuals who use such tickets.

(f) *Special rules*—(1) *Partnership.* In the case of a gift by a partnership, the $25 annual limitation contained in paragraph (a) of this section shall apply to the partnership as well as to each member of the partnership. Thus, in the case of a gift made by a partner with respect to the business of the partnership, the $25 limitation will be applied at the partnership level as well as at the level of the individual partner. Consequently, deductions for gifts made with respect to partnership business will not exceed $25 annually for each recipient, regardless of the number of partners.

(2) *Husband and wife.* For purposes of applying the $25 annual limitation contained in paragraph (a) of this section, a husband and wife shall be treated as one taxpayer. Thus, in the case of gifts to an individual by a husband and wife, the spouses will be treated as one donor; and they are limited to a deduction of $25 annually for each recipient. This rule applies regardless of whether the husband and wife file a joint return or whether the husband and wife make separate gifts to an individual with respect to separate businesses. Since the term *taxpayer* in paragraph (a) of this section refers only to the donor of a gift, this special rule does not apply to treat a husband and wife as one individual where each is a recipient of a gift. See paragraph (e)(1) of this section.

(g) *Cross reference.* For rules with respect to whether this section or §1.274–2 applies, see §1.274–2(b)(1) (iii).

[T.D. 6659, 28 FR 6505, June 25, 1963, as amended by T.D. 8230, 53 FR 36451, Sept. 20, 1988]

§1.274–4 Disallowance of certain foreign travel expenses.

(a) *Introductory.* Section 274(c) and this section impose certain restrictions on the deductibility of travel expenses incurred in the case of an individual who, while traveling outside the United States away from home in the pursuit of trade or business (hereinafter termed ‘‘business activity’’), engages in substantial personal activity not attributable to such trade or business (hereinafter termed ‘‘nonbusiness activity’’). Section 274(c) and this section are limited in their application to individuals (whether or not an employee or other person traveling under a reimbursement or other expense allowance arrangement) who engage in nonbusiness activity while traveling outside the United States away from home, and do not impose restrictions on the deductibility of travel expenses incurred by an employer or client under an advance, reimbursement, or other arrangement with the individual who engages in nonbusiness activity. For purposes of this section, the term *United States* includes only the States and the District of Columbia, and any reference to ‘‘trade or business’’ or ‘‘business activity’’ includes any activity described in section 212. For rules governing the determination of travel outside the United States away from home, see paragraph (e) of this section.

For rules governing the disallowance of travel expense to which this section applies, see paragraph (f) of this section.

(b) *Limitations on application of section.* The restrictions on deductibility of travel expenses contained in paragraph (f) of this section are applicable only if:

(1) The travel expense is otherwise deductible under section 162 or 212 and the regulations thereunder,

(2) The travel expense is for travel outside the United States away from home which exceeds 1 week (as determined under paragraph (c) of this section), and

(3) The time outside the United States away from home attributable to nonbusiness activity (as determined under paragraph (d) of this section) constitutes 25 percent or more of the total time on such travel.

(c) *Travel in excess of 1 week.* This section does not apply to an expense of travel unless the expense is for travel outside the United States away from home which exceeds 1 week. For purposes of this section, 1 week means 7 consecutive days. The day in which travel outside the United States away from home begins shall not be considered, but the day in which such travel ends shall be considered, in determining whether a taxpayer is outside the United States away from home for more than 7 consecutive days. For example, if a taxpayer departs on travel outside the United States away from home on a Wednesday morning and ends such travel the following Wednesday evening, he shall be considered as being outside the United States away from home only 7 consecutive days. In such a case, this section would not apply because the taxpayer was not outside the United States away from home for more than 7 consecutive days. However, if the taxpayer travels outside the United States away from home for more than 7 consecutive days, both the day such travel begins and the day such travel ends shall be considered a ‘‘business day’’ or a ‘‘nonbusiness day’’, as the case may be, for purposes of determining whether nonbusiness activity constituted 25 percent or more of travel time under paragraph (d) of this section and for purposes of allocating expenses under paragraph (f) of this section. For purposes of determining whether travel is outside the United States away from home, see paragraph (e) of this section.

(d) *Nonbusiness activity constituting 25 percent or more of travel time*—(1) *In general.* This section does not apply to any expense of travel outside the United States away from home unless the portion of time outside the United States away from home attributable to nonbusiness activity constitutes 25 percent or more of the total time on such travel.

(2) *Allocation on per day basis.* The total time traveling outside the United States away from home will be allocated on a day-by-day basis to (i) days of business activity or (ii) days of nonbusiness activity (hereinafter termed ‘‘business days’’ or ‘‘nonbusiness days’’ respectively) unless the taxpayer establishes that a different method of allocation more clearly reflects the portion of time outside the United States away from home which is attributable to nonbusiness activity. For purposes of this section, a day spent outside the United States away from home shall be deemed entirely a business day even though spent only in part on business activity if the taxpayer establishes:

(i) *Transportation days.* That on such day the taxpayer was traveling to or returning from a destination outside the United States away from home in the pursuit of trade or business. However, if for purposes of engaging in nonbusiness activity, the taxpayer while traveling outside the United States away from home does not travel by a reasonably direct route, only that number of days shall be considered business days as would be required for the taxpayer, using the same mode of transportation, to travel to or return from the same destination by a reasonably direct route. Also, if, while so traveling, the taxpayer interrupts the normal course of travel by engaging in substantial diversions for nonbusiness reasons of his own choosing, only that number of days shall be considered business days as equals the number of days required for the taxpayer, using the same mode of transportation, to travel to or return from the same destination without engaging in such diversion. For example, if a taxpayer residing in New York departs on an evening on a direct flight to Quebec for a business meeting to be held in Quebec the next morning, for purposes of determining whether nonbusiness activity constituted 25 percent or more of his travel time, the entire day of his departure shall be considered a business day. On the other hand, if a taxpayer travels by automobile from New York to Quebec to attend a business meeting and while en route spends 2 days in Ottawa and 1 day in Montreal on nonbusiness activities of his personal choice, only that number of days outside the United States shall be considered business days as would have been required for the taxpayer to drive by a reasonably direct route to Quebec, taking into account normal periods for rest and meals.

(ii) *Presence required.* That on such day his presence outside the United States away from home was required at a particular place for a specific and bona fide business purpose. For example, if a taxpayer is instructed by his employer to attend a specific business meeting, the day of the meeting shall be considered a business day even though, because of the scheduled length of the meeting, the taxpayer spends more time during normal working hours of the day on nonbusiness activity than on business activity.

(iii) *Days primarily business.* That during hours normally considered to be appropriate for business activity, his principal activity on such day was the pursuit of trade or business.

(iv) *Circumstances beyond control.* That on such day he was prevented from engaging in the conduct of trade or business as his principal activity due to circumstances beyond his control.

(v) *Weekends, holidays, etc.* That such day was a Saturday, Sunday, legal holiday, or other reasonably necessary standby day which intervened during that course of the taxpayer's trade or business while outside the United States away from home which the taxpayer endeavored to conduct with reasonable dispatch. For example, if a taxpayer travels from New York to London to take part in business negotiations beginning on a Wednesday and concluding on the following Tuesday, the intervening Saturday and Sunday shall be considered business days whether or not business is conducted on either of such days. Similarly, if in the above case the meetings which concluded on Tuesday evening were followed by business meetings with another business group in London on the immediately succeeding Thursday and Friday, the intervening Wednesday will be deemed a business day. However, if at the conclusion of the business meetings on Friday, the taxpayer stays in London for an additional week for personal purposes, the Saturday and Sunday following the conclusion of the business meeting will not be considered business days.

(e) *Domestic travel excluded*—(1) *In general.* For purposes of this section, travel outside the United States away from home does not include any travel from one point in the United States to another point in the United States. However, travel which is not from one point in the United States to another point in the United States shall be considered travel outside the United States. If a taxpayer travels from a place within the United States to a place outside the United States, the portion, if any, of such travel which is from one point in the United States to another point in the United States is to be disregarded for purposes of determining:

(i) Whether the taxpayer's travel outside the United States away from home exceeds 1 week (see paragraph (c) of this section),

(ii) Whether the time outside the United States away from home attributable to nonbusiness activity constitutes 25 percent or more of the total time on such travel (see paragraph (d) of this section), or

(iii) The amount of travel expense subject to the allocation rules of this section (see paragraph (f) of this section).

(2) *Determination of travel from one point in the United States to another point in the United States.* In the case of the following means of transportation, travel from one point in the United

States to another point in the United States shall be determined as follows:

(i) *Travel by public transportation.* In the case of travel by public transportation, any place in the United States at which the vehicle makes a scheduled stop for the purpose of adding or discharging passengers shall be considered a point in the United States.

(ii) *Travel by private automobile.* In the case of travel by private automobile, any such travel which is within the United States shall be considered travel from one point in the United States to another point in the United States.

(iii) *Travel by private airplane.* In the case of travel by private airplane, any flight, whether or not constituting the entire trip, where both the takeoff and the landing are within the United States shall be considered travel from one point in the United States to another point in the United States.

(3) *Examples.* The provisions of subparagraph (2) may be illustrated by the following examples:

Example 1. Taxpayer A flies from Los Angeles to Puerto Rico with a brief scheduled stopover in Miami for the purpose of adding and discharging passengers and A returns by airplane nonstop to Los Angeles. The travel from Los Angeles to Miami is considered travel from one point in the United States to another point in the United States. The travel from Miami to Puerto Rico and from Puerto Rico to Los Angeles is not considered travel from one point in the United States to another point in the United States and, thus, is considered to be travel outside the United States away from home.

Example 2. Taxpayer B travels by train from New York to Montreal. The travel from New York to the last place in the United States where the train is stopped for the purpose of adding or discharging passengers is considered to be travel from one point in the United States to another point in the United States.

Example 3. Taxpayer C travels by automobile from Tulsa to Mexico City and back. All travel in the United States is considered to be travel from one point in the United States to another point in the United States.

Example 4. Taxpayer D flies nonstop from Seattle to Juneau. Although the flight passes over Canada, the trip is considered to be travel from one point in the United States to another point in the United States.

Example 5. If in *Example (4)* above, the airplane makes a scheduled landing in Vancouver, the time spent in traveling from Seattle to Juneau is considered to be travel outside the United States away from home. However, the time spent in Juneau is not considered to be travel outside the United States away from home.

(f) *Application of disallowance rules*—(1) *In general.* In the case of expense for travel outside the United States away from home by an individual to which this section applies, except as otherwise provided in subparagraph (4) or (5) of this paragraph, no deduction shall be allowed for that amount of travel expense specified in subparagraph (2) or (3) of this paragraph (whichever is applicable) which is obtained by multiplying the total of such travel expense by a fraction:

(i) The numerator of which is the number of nonbusiness days during such travel, and

(ii) The denominator of which is the total number of business days and nonbusiness days during such travel.

For determination of ‘‘business days’’ and ‘‘nonbusiness days’’, see paragraph (d)(2) of this section.

(2) *Nonbusiness activity at, near, or beyond business destination.* If the place at which the individual engages in nonbusiness activity (hereinafter termed ‘‘nonbusiness destination’’) is at, near, or beyond the place to which he travels in the pursuit of a trade or business (hereinafter termed ‘‘business destination’’), the amount of travel expense referred to in subparagraph (1) of this paragraph shall be the amount of travel expense, otherwise allowable as a deduction under section 162 or section 212, which would have been incurred in traveling from the place where travel outside the United States away from home begins to the business destination, and returning. Thus, if the individual travels from New York to London on business, and then takes a vacation in Paris before returning to New York, the amount of the travel expense subject to allocation is the expense which would have been incurred in traveling from New York to London and returning.

(3) *Nonbusiness activity on the route to or from business destination.* If the nonbusiness destination is on the route to or from the business destination, the amount of the travel expense referred

to in subparagraph (1) of this paragraph shall be the amount of travel expense, otherwise allowable as a deduction under section 162 or 212, which would have been incurred in traveling from the place where travel outside the United States away from home begins to the nonbusiness destination and returning. Thus, if the individual travels on business from Chicago to Rio de Janeiro, Brazil with a scheduled stop in New York for the purpose of adding and discharging passengers, and while en route stops in Caracas, Venezuela for a vacation and returns to Chicago from Rio de Janeiro with another scheduled stop in New York for the purpose of adding and discharging passengers, the amount of travel expense subject to allocation is the expense which would have been incurred in traveling from New York to Caracas and returning.

(4) *Other allocation method.* If a taxpayer establishes that a method other than allocation on a day-by-day basis (as determined under paragraph (d)(2) of this section) more clearly reflects the portion of time outside the United States away from home which is attributable to nonbusiness activity, the amount of travel expense for which no deduction shall be allowed shall be determined by such other method.

(5) *Travel expense deemed entirely allocable to business activity.* Expenses of travel shall be considered allocable in full to business activity, and no portion of such expense shall be subject to disallowance under this section, if incurred under circumstances provided for in subdivision (i) or (ii) of this subparagraph.

(i) *Lack of control over travel.* Expenses of travel otherwise deductible under section 162 or 212 shall be considered fully allocable to business activity if, considering all the facts and circumstances, the individual incurring such expenses did not have substantial control over the arranging of the business trip. A person who is required to travel to a business destination will not be considered to have substantial control over the arranging of the business trip merely because he has control over the timing of the trip. Any individual who travels on behalf of his employer under a reimbursement or other expense allowance arrangement shall be considered not to have had substantial control over the arranging of his business trip, provided the employee is not:

(*a*) A managing executive of the employer for whom he is traveling (and for this purpose the term *managing executive* includes only an employee who, by reason of his authority and responsibility, is authorized, without effective veto procedures, to decide upon the necessity for his business trip), or

(*b*) Related to his employer within the meaning of section 267(b) but for this purpose the percentage referred to in section 267(b)(2) shall be 10 percent.

(ii) *Lack of major consideration to obtain a vacation.* Any expense of travel, which qualifies for deduction under section 162 or 212, shall be considered fully allocable to business activity if the individual incurring such expenses can establish that, considering all the facts and circumstances, he did not have a major consideration, in determining to make the trip, of obtaining a personal vacation or holiday. If such a major consideration were present, the provisions of subparagraphs (1) through (4) of this paragraph shall apply. However, if the trip were primarily personal in nature, the traveling expenses to and from the destination are not deductible even though the taxpayer engages in business activities while at such destination. See paragraph (b) of §1.162–2.

(g) *Examples.* The application of this section may be illustrated by the following examples:

Example 1. Individual A flew from New York to Paris where he conducted business for 1 day. He spent the next 2 days sightseeing in Paris and then flew back to New York. The entire trip, including 2 days for travel en route, took 5 days. Since the time outside the United States away from home during the trip did not exceed 1 week, the disallowance rules of this section do not apply.

Example 2. Individual B flew from Tampa to Honolulu (from one point in the United States to another point in the United States) for a business meeting which lasted 3 days and for personal matters which took 10 days. He then flew to Melbourne, Australia where he conducted business for 2 days and went sightseeing for 1 day. Immediately thereafter he flew back to Tampa, with a scheduled landing in Honolulu for the purpose of adding and discharging passengers. Although the trip exceeded 1 week, the time spent outside the United States away from home, including 2 days for traveling from Honolulu to Melbourne and return, was 5 days. Since the time outside the United States away from home during the trip did not exceed 1 week, the disallowance rules of this section do not apply.

Example 3. Individual C flew from Los Angeles to New York where he spent 5 days. He then flew to Brussels where he spent 14 days on business and 5 days on personal matters. He then flew back to Los Angeles by way of New York. The entire trip, including 4 days for travel en route, took 28 days. However, the 2 days spent traveling from Los Angeles to New York and return, and the 5 days spent in New York are not considered travel outside the United States away from home and, thus, are disregarded for purposes of this section. Although the time spent outside the United States away from home exceeded 1 week, the time outside the United States away from home attributable to nonbusiness activities (5 days out of 21) was less than 25 percent of the total time outside the United States away from home during the trip. Therefore, the disallowance rules of this section do not apply.

Example 4. D, an employee of Y Company, who is neither a managing executive of, nor related to, Y Company within the meaning of paragraph (f)(5)(i) of this section, traveled outside the United States away from home on behalf of his employer and was reimbursed by Y for his traveling expense to and from the business destination. The trip took more than a week and D took advantage of the opportunity to enjoy a personal vacation which exceeded 25 percent of the total time on the trip. Since D, traveling under a reimbursement arrangement, is not a managing executive of, or related to, Y Company, he is not considered to have substantial control over the arranging of the business trip, and the travel expenses shall be considered fully allocable to business activity.

Example 5. E, a managing executive and principal shareholder of X Company, travels from New York to Stockholm, Sweden, to attend a series of business meetings. At the conclusion of the series of meetings, which last 1 week, E spends 1 week on a personal vacation in Stockholm. If E establishes either that he did not have substantial control over the arranging of the trip or that a major consideration in his determining to make the trip was not to provide an opportunity for taking a personal vacation, the entire travel expense to and from Stockholm shall be considered fully allocable to business activity.

Example 6. F, a self-employed professional man, flew from New York to Copenhagen, Denmark, to attend a convention sponsored by a professional society. The trip lasted 3 weeks, of which 2 weeks were spent on vacation in Europe. F generally would be regarded as having substantial control over arranging this business trip. Unless F can establish that obtaining a vacation was not a major consideration in determining to make the trip, the disallowance rules of this section apply.

Example 7. Taxpayer G flew from Chicago to New York where he spent 6 days on business. He then flew to London where he conducted business for 2 days. G then flew to Paris for a 5 day vacation after which he flew back to Chicago, with a scheduled landing in New York for the purpose of adding and discharging passengers. G would not have made the trip except for the business he had to conduct in London. The travel outside the United States away from home, including 2 days for travel en route, exceeded a week and the time devoted to nonbusiness activities was not less than 25 percent of the total time on such travel. The 2 days spent traveling from Chicago to New York and return, and the 6 days spent in New York are disregarded for purposes of determining whether the travel outside the United States away from home exceeded a week and whether the time devoted to nonbusiness activities was less than 25 percent of the total time outside the United States away from home. If G is unable to establish either that he did not have substantial control over the arranging of the business trip or that an opportunity for taking a personal vacation was not a major consideration in his determining to make the trip, 5/9ths (5 days devoted to nonbusiness activities out of a total 9 days outside the United States away from home on the trip) of the expenses attributable to transportation and food from New York to London and from London to New York will be disallowed (unless G establishes that a different method of allocation more clearly reflects the portion of time outside the United States away from home which is attributable to nonbusiness activity).

(h) *Cross reference.* For rules with respect to whether an expense is travel or entertainment, see paragraph (b)(1)(iii) of § 1.274–2.

[T.D. 6758, 29 FR 12768, Sept. 10, 1964]

§ 1.274–5T Substantiation requirements (temporary).

(a) *In general.* For taxable years beginning on or after January 1, 1986, no deduction or credit shall be allowed with respect to—

(1) Traveling away from home (including meals and lodging),

(2) Any activity which is of a type generally considered to constitute entertainment, amusement, or recreation, or with respect to a facility used in connection with such an activity, including the items specified in section 274(e),

(3) Gifts defined in section 274(b), or

(4) Any listed property (as defined in section 280F(d)(4) and §1.280F–6T(b)), unless the taxpayer substantiates each element of the expenditure or use (as described in paragraph (b) of this section) in the manner provided in paragraph (c) of this section. This limitation supersedes the doctrine found in *Cohan v. Commissioner*, 39 F. 2d 540 (2d Cir. 1930). The decision held that, where the evidence indicated a taxpayer incurred deductible travel or entertainment expenses but the exact amount could not be determined, the court should make a close approximation and not disallow the deduction entirely. Section 274(d) contemplates that no deduction or credit shall be allowed a taxpayer on the basis of such approximations or unsupported testimony of the taxpayer. For purposes of this section, the term *entertainment* means entertainment, amusement, or recreation, and use of a facility therefor; and the term *expenditure* includes expenses and items (including items such as losses and depreciation).

(b) *Elements of an expenditure or use*—(1) *In general.* Section 274(d) and this section contemplate that no deduction or credit shall be allowed for travel, entertainment, a gift, or with respect to listed property unless the taxpayer substantiates the requisite elements of each expenditure or use as set forth in this paragraph (b).

(2) *Travel away from home.* The elements to be provided with respect to an expenditure for travel away from home are—

(i) *Amount.* Amount of each separate expenditure for traveling away from home, such as cost of transportation or lodging, except that the daily cost of the traveler's own breakfast, lunch, and dinner and of expenditures incidental to such travel may be aggregated, if set forth in reasonable categories, such as for meals, for gasoline and oil, and for taxi fares;

(ii) *Time.* Dates of departure and return for each trip away from home, and number of days away from home spent on business;

(iii) *Place.* Destinations or locality of travel, described by name of city or town or other similar designation; and

(iv) *Business purpose.* Business reason for travel or nature of the business benefit derived or expected to be derived as a result of travel.

(3) *Entertainment in general.* The elements to be proved with respect to an expenditure for entertainment are—

(i) *Amount.* Amount of each separate expenditure for entertainment, except that such incidental items as taxi fares or telephone calls may be aggregated on a daily basis;

(ii) *Time.* Date of entertainment;

(iii) *Place.* Name, if any, address or location, and destination of type of entertainment, such as dinner or theater, if such information is not apparent from the designation of the place;

(iv) *Business purpose.* Business reason for the entertainment or nature of business benefit derived or expected to be derived as a result of the entertainment and, except in the case of business meals described in section 274(e)(1), the nature of any business discussion or activity;

(v) *Business relationship.* Occupation or other information relating to the person or persons entertained, including name, title, or other designation, sufficient to establish business relationship to the taxpayer.

(4) *Entertainment directly preceding or following a substantial and bona fide business discussion.* If a taxpayer claims a deduction for entertainment directly preceding or following a substantial and bona fide business discussion on the ground that such entertainment was associated with the active conduct of the taxpayer's trade or business, the elements to be proved with respect to such expenditure, in addition to those enumerated in paragraph (b)(3) (i), (ii), (iii), and (v) of this section are—

(i) *Time.* Date and duration of business discussion;

(ii) *Place.* Place of business discussion;

(iii) *Business purpose.* Nature of business discussion, and business reason for the entertainment or nature of business benefit derived or expected to be derived as the result of the entertainment.

(iv) *Business relationship.* Identification of those persons entertained who participated in the business discussion.

(5) *Gifts.* The elements to be proved with respect to an expenditure for a gift are—

(i) *Amount.* Cost of the gift to the taxpayer;

(ii) *Time.* Date of the gift;

(iii) *Description.* Description of the gift;

(iv) *Business purpose.* Business reason for the gift or nature of business benefit derived or expected to be derived as a result of the gift; and

(v) *Business relationship.* Occupation or other information relating to the recipient of the gift, including name, title, or other designation, sufficient to establish business relationship to the taxpayer.

(6) *Listed property.* The elements to be proved with respect to any listed property are—

(i) *Amount*—(A) *Expenditures.* The amount of each separate expenditure with respect to an item of listed property, such as the cost of acquisition, the cost of capital improvements, lease payments, the cost of maintenance and repairs, or other expenditures, and

(B) *Uses.* The amount of each business/investment use (as defined in § 1.280F–6T (d)(3) and (e)), based on the appropriate measure (i.e., mileage for automobiles and other means of transportation and time for other listed property, unless the Commissioner approves an alternative method), and the total use of the listed property for the taxable period.

(ii) *Time.* Date of the expenditure or use with respect to listed property, and

(iii) *Business or investment purpose.* The business purpose for an expenditure or use with respect to any listed property (see § 1.274–5T(c)(6)(i) (B) and (C) for special rules for the aggregation of expenditures and business use and § 1.280F–6T(d)(2) for the distinction between qualified business use and business/investment use).

See also § 1.274–5T(e) relating to the substantiation of business use of employer-provided listed property and § 1.274–6T for special rules for substantiating the business/investment use of certain types of listed property.

(c) *Rules of substantiation*—(1) *In general.* Except as otherwise provided in this section and § 1.274–6T, a taxpayer must substantiate each element of an expenditure or use (described in paragraph (b) of this section) by adequate records or by sufficient evidence corroborating his own statement. Section 274(d) contemplates that a taxpayer will maintain and produce such substantiation as will constitute proof of each expenditure or use referred to in section 274. Written evidence has considerably more probative value than oral evidence alone. In addition, the probative value of written evidence is greater the closer in time it relates to the expenditure or use. A contemporaneous log is not required, but a record of the elements of an expenditure or of a business use of listed property made at or near the time of the expenditure or use, supported by sufficient documentary evidence, has a high degree of credibility not present with respect to a statement prepared subsequent thereto when generally there is a lack of accurate recall. Thus, the corroborative evidence required to support a statement not make at or near the time of the expenditure or use must have a high degree of probative value to elevate such statement and evidence to the level of credibility reflected by a record made at or near the time of the expenditure or use supported by sufficient documentary evidence. The substantiation requirements of section 274(d) are designed to encourage taxpayers to maintain the records, together with documentary evidence, as provided in paragraph (c)(2) of this section.

(2) *Substantiation by adequate records*—(i) *In general.* To meet the ‘‘adequate records’’ requirements of section 274(d), a taxpayer shall maintain an account book, diary, log, statement of expense, trip sheets, or similar record (as provided in paragraph (c)(2)(ii) of this section), and documentary evidence (as provided in paragraph (c)(2)(iii) of this section) which, in combination, are sufficient to establish each element of an expenditure or use

specified in paragraph (b) of this section. It is not necessary to record information in an account book, diary, log, statement of expense, trip sheet, or similar record which duplicates information reflected on a receipt so long as the account book, etc. and receipt complement each other in an orderly manner.

(ii) *Account book, diary, etc.* An account book, diary, log, statement of expense, trip sheet, or similar record must be prepared or maintained in such manner that each recording of an element of an expenditure or use is made at or near the time of the expenditure or use.

(A) *Made at or near the time of the expenditure or use.* For purposes of this section, the phrase *made at or near the time of the expenditure or use* means the element of an expenditure or use are recorded at a time when, in relation to the use or making of an expenditure, the taxpayer has full present knowledge of each element of the expenditure or use, such as the amount, time, place, and business purpose of the expenditure and business relationship. An expense account statement which is a transcription of an account book, diary, log, or similar record prepared or maintained in accordance with the provisions of this paragraph (c)(2)(ii) shall be considered a record prepared or maintained in the manner prescribed in the preceding sentence if such expense account statement is submitted by an employee to his employer or by an independent contractor to his client or customer in the regular course of good business practice. For example, a log maintained on a weekly basis, which accounts for use during the week, shall be considered a record made at or near the time of such use.

(B) *Substantiation of business purpose.* In order to constitute an adequate record of business purpose within the meaning of section 274(d) and this paragraph (c)(2), a written statement of business purpose generally is required. However, the degree of substantiation necessary to establish business purpose will vary depending upon the facts and circumstances of each case. Where the business purpose is evident from the surrounding facts and circumstances, a written explanation of such business purpose will not be required. For example, in the case of a salesman calling on customers on an established sales route, a written explanation of the business purpose of such travel ordinarily will not be required. Similarly, in the case of a business meal described in section 274(e)(1), if the business purpose of such meal is evident from the business relationship to the taxpayer of the persons entertained and other surrounding circumstances, a written explanation of such business purpose will not be required.

(C) *Substantiation of business use of listed property*—(*1*) *Degree of substantiation.* In order to constitute an adequate record (within the meaning of section 274(d) and this paragraph (c)(2)(ii)), which substantiates business/investment use of listed property (as defined in §1.280F–6T(d)(3)), the record must contain sufficient information as to each element of every business/investment use. However, the level of detail required in an adequate record to substantiate business/investment use may vary depending upon the facts and circumstances. For example, a taxpayer who uses a truck for both business and personal purposes and whose only business use of a truck is to make deliveries to customers on an established route may satisfy the adequate record requirement by recording the total number miles driven during the taxable year, the length of the delivery route once, and the date of each trip at or near the time of the trips. Alternatively, the taxpayer may establish the date of each trip with a receipt, record of delivery, or other documentary evidence.

(*2*) *Written record.* Generally, an adequate record must be written. However, a record of the business use of listed property, such as a computer or automobile, prepared in a computer memory device with the aid of a logging program will constitute an adequate record.

(D) *Confidential information.* If any information relating to the elements of an expenditure or use, such as place, business purpose, or business relationship, is of a confidential nature, such information need not be set forth in the account book, diary, log, statement of expense, trip sheet, or similar record, provided such information is recorded at or near the time of the expenditure or use and is elsewhere available to the district director to substantiate such element of the expenditure or use.

(iii) *Documentary evidence.* Documentary evidence, such as receipts, paid bills, or similar evidence sufficient to support an expenditure shall be required for—

(A) Any expenditure for lodging while traveling away from home, and

(B) Any other expenditure of $75 or more ($25 or more for expenditures incurred before October 1, 1995) except, for transportation charges, documentary evidence will not be required if not readily available, provided, however, that the Commissioner, in his discretion, may prescribe rules waiving such requirements in circumstances where he determines it is impracticable for such documentary evidence to be required. Ordinarily, documentary evidence will be considered adequate to support an expenditure if it includes sufficient information to establish the amount, date, place, and the essential character of the expenditure. For example, a hotel receipt is sufficient to support expenditures for business travel if it contains the following: name, location, date, and separate amounts for charges such as for lodging, meals, and telephone. Similarly, a restaurant receipt is sufficient to support an expenditure for a business meal if it contains the following: name and location of the restaurant, the date and amount of the expenditure, the number of people served, and, if a charge is made for an item other than meals and beverages, an indication that such is the case. A document may be indicative of only one (or part of one) element of an expenditure. Thus, a cancelled check together with a bill from the payee, ordinarily would establish the element of cost. In contrast, a cancelled check drawn payable to a named payee would not by itself support a business expenditure without other evidence showing that the check was used for a certain business purpose.

(iv) *Retention of written evidence.* The Commissioner may, in his discretion, prescribe rules under which an employer may dispose of the adequate records and documentary evidence submitted to him by employees who are required to, and do, make an adequate accounting to the employer (within the meaning of paragraph (f)(4) of this section) if the employer maintains adequate accounting procedures with respect to such employees (within the meaning of paragraph (f)(5) of this section.

(v) *Substantial compliance.* If a taxpayer has not fully substantiated a particular element of an expenditure or use, but the taxpayer establishes to the satisfaction of the district director that he has substantially complied with the ‘‘adequate records’’ requirements of this paragraph (c)(2) with respect to the expenditure or use, the taxpayer may be permitted to establish such element by evidence which the district director shall deem adequate.

(3) *Substantiation by other sufficient evidence*—(i) *In general.* If a taxpayer fails to establish to the satisfaction of the district director that he has substantially complied with the ‘‘adequate records’’ requirements of paragraph (c)(2) of this section with respect to an element of an expenditure or use, then, except as otherwise provided in this paragraph, the taxpayer must establish such element—

(A) By his own statement, whether written or oral, containing specific information in detail as to such element; and

(B) By other corrobative evidence sufficient to establish such element.

If such element is the description of a gift, or the cost or amount, time, place, or date of an expenditure or use, the corrobative evidence shall be direct evidence, such as a statement in writing or the oral testimony of persons entertained or other witnesses setting forth detailed information about such element, or the documentary evidence described in paragraph (c)(2) of this section. If such element is either the business relationship to the taxpayer of persons entertained, or the business purpose of an expenditure, the corrobative evidence may be circumstantial evidence.

(ii) *Sampling*—(A) *In general.* Except as provided in paragraph (c)(3)(ii)(B) of this section, a taxpayer may maintain an adequate record for portions of a taxable year and use that record to substantiate the business/investment use of listed property for all or a portion of the taxable year if the taxpayer can demonstrate by other evidence that the periods for which an adequate record is maintained are representative of the use for the taxable year or a portion thereof.

(B) *Exception for pooled vehicles.* The sampling method of paragraph (c)(3)(ii)(A) of this section may not be used to substantiate the business/investment use of an automobile or other vehicle of an employer that is made available for use by more than one employee for all or a portion of a taxable year.

(C) *Examples.* The following examples illustrate this paragraph (c)(3)(ii).

Example 1. A, a sole proprietor and calendar year taxpayer, operates an interior decorating business out of her home. A uses an automobile for local business travel to visit the homes or offices of clients, to meet with suppliers and other subcontractors, and to pick up and deliver certain items to clients when feasible. There is no other business use of the automobile but A and other members of her family also use the automobile for personal purposes. A maintains adequate records for the first three months of 1986 that indicate that 75 percent of the use of the automobile was in A's business. Invoices from subcontractors and paid bills indicate that A's business continued at approximately the same rate for the remainder of 1986. If other circumstances do not change (e.g., A does not obtain a second car for exclusive use in her business), the determination that the business/investment use of the automobile for the taxable year is 75 percent is based on sufficient corroborative evidence.

Example 2. The facts are the same as in *Example (1),* except that A maintains adequate records during the first week of every month, which indicate that 75 percent of the use of the automobile is in A's business. The invoices from A's business indicate that A's business continued at the same rate during the subsequent weeks of each month so that A's weekly records are representative of each month's business use of the automobile. Thus, the determination that the business/investment use of the automobile for the taxable year is 75 percent is based on sufficient corroborative evidence.

Example 3. B, a sole proprietor and calendar year taxpayer, is a salesman in a large metropolitan area for a company that manufactures household products. For the first three weeks of each month, B uses his own automobile occasionally to travel within the metropolitan area on business. During these three weeks, B's use of the automobile for business purposes does not follow a consistent pattern from day to day or week to week. During the fourth week of each month, B delivers to his customers all the orders taken during the previous month. B's use of his automobile for business purposes, as substantiated by adequate records, is 70 percent of the total use during that fourth week. In this example, a determination based on the records maintained during that fourth week that the business/investment use of the automobile for the taxable year is 70 percent is not based on sufficient corroborative evidence because use during this week is not representative of use during other periods.

(iii) *Special rules.* See §1.274–6T for special rules for substantiation by sufficient corroborating evidence with respect to certain listed property.

(4) *Substantiation in exceptional circumstances.* If a taxpayer establishes that, by reason of the inherent nature of the situation—

(i) He was unable to obtain evidence with respect to an element of the expenditure or use which conforms fully to the ''adequate records'' requirements of paragraph (c)(2) of this section,

(ii) He is unable to obtain evidence with respect to such element which conforms fully to the ''other sufficient evidence'' requirements of paragraph (c)(3) of this section, and

(iii) He has presented other evidence, with respect to such element, which possesses the highest degree of probative value possible under the circumstances, such other evidence shall be considered to satisfy the substantiation requirements of section 274(d) and this paragraph.

(5) *Loss of records due to circumstances beyond control of the taxpayer.* Where the taxpayer establishes that the failure to produce adequate records is due to the loss of such records through circumstances beyond the taxpayer's control, such as destruction by fire, flood, earthquake, or other casualty, the taxpayer shall have a right to substantiate a deduction by reasonable reconstruction of his expenditures or use.

(6) *Special rules*—(i) *Separate expenditure or use*—(A) *In general.* For the purposes of this section, each separate payment or use by the taxpayer shall ordinarily be considered to constitute a separate expenditure. However, concurrent or repetitious expenses or uses

may be substantiated as a single item. To illustrate the above rules, where a taxpayer entertains a business guest at dinner and thereafter at the theater, the payment for dinner shall be considered to constitute one expenditure and the payment for the tickets for the theater shall be considered to constitute a separate expenditure. Similarly, if during a day of business travel a taxpayer makes separate payments for breakfast, lunch, and dinner, he shall be considered to have made three separate expenditures. However, if during entertainment at a cocktail lounge the taxpayer pays separately for each serving of refreshments, the total amount expended for the refreshments will be treated as a single expenditure. A tip may be treated as a separate expenditure.

(B) *Aggregation of expenditures.* Except as otherwise provided in this section, the account book, diary, log, statement of expense, trip sheet, or similar record required by paragraph (c)(2)(ii) of this section shall be maintained with respect to each separate expenditure and not with respect to aggregate amounts for two or more expenditures. Thus, each expenditure for such items as lodging and air or rail travel shall be recorded as a separate item and not aggregated. However, at the option of the taxpayer, amounts expended for breakfast, lunch, or dinner, may be aggregated. A tip or gratuity which is related to an underlying expense may be aggregated with such expense. In addition, amounts expended in connection with the use of listed property during a taxable year, such as for gasoline or repairs for an automobile, may be aggregated. If these expenses are aggregated, the taxpayer must establish the date and amount, but need not prove the business purpose of each expenditure. Instead, the taxpayer may prorate the expenses based on the total business use of the listed property. For other provisions permitting recording of aggregate amounts in an account book, diary, log, statement of expense, trip sheet, or similar record, see paragraphs (b)(2)(i) and (b)(3) of this section (relating to incidental costs of travel and entertainment).

(C) *Aggregation of business use.* Uses which may be considered part of a single use, for example, a round trip or uninterrupted business use, may be accounted for by a single record. For example, use of a truck to make deliveries at several different locations which begins and ends at the business premises and which may include a stop at the business premises in between two deliveries may be accounted for by a single record of miles driven. In addition, use of a passenger automobile by a salesman for a business trip away from home over a period of time may be accounted for by a single record of miles traveled. De minimis personal use (such as a stop for lunch on the way between two business stops) is not an interruption of business use.

(ii) *Allocation of expenditure.* For purposes of this section, if a taxpayer has established the amount of an expenditure, but is unable to establish the portion of such amount which is attributable to each person participating in the event giving rise to the expenditure, such amount shall ordinarily be allocated to each participant on a pro rata basis, if such determination is material. Accordingly, the total number of persons for whom a travel or entertainment expenditure is incurred must be established in order to compute the portion of the expenditure allocable to such person.

(iii) *Primary use of a facility.* Section 274(a) (1)(B) and (2)(C) deny a deduction for any expenditure paid or incurred before January 1, 1979, with respect to a facility, or paid or incurred before January 1, 1994, with respect to a club, used in connection with an entertainment activity unless the taxpayer establishes that the facility (including a club) was used primarily for the furtherance of the taxpayer's trade or business. A determination whether a facility before January 1, 1979, or a club before January 1, 1994, was used primarily for the furtherance of the taxpayer's trade or business will depend upon the facts and circumstances of each case. In order to establish that a facility was used primarily for the furtherance of his trade or business, the taxpayer shall maintain records of the use of the facility, the cost of using the facility, mileage or its equivalent (if appropriate), and such other information as shall tend to establish such primary use. Such records of use shall contain—

(A) For each use of the facility claimed to be in furtherance of the taxpayer's trade or business, the elements of an expenditure specified in paragraph (b)(3) of this section, and

(B) For each use of the facility not in furtherance of the taxpayer's trade or business, an appropriate description of such use, including cost, date, number of persons entertained, nature of entertainment and, if applicable, information such as mileage or its equivalent. A notation such as ''personal use'' or ''family use'' would, in the case of such use, be sufficient to describe the nature of entertainment.

If a taxpayer fails to maintain adequate records concerning a facility which is likely to serve the personal purposes of the taxpayer, it shall be presumed that the use of such facility was primarily personal.

(iv) *Additional information.* In a case where it is necessary to obtain additional information, either—

(A) To clarify information contained in records, statements, testimony, or documentary evidence submitted by a taxpayer under the provisions of paragraph (c)(2) or (c)(3) of this section, or

(B) To establish the reliability or accuracy of such records, statements, testimony, or documentary evidence, the district director may, notwithstanding any other provision of this section, obtain such additional information by personal interview or otherwise as he determines necessary to implement properly the provisions of section 274 and the regulations thereunder.

(7) *Specific exceptions.* Except as otherwise prescribed by the Commissioner, substantiation otherwise required by this paragraph is not required for—

(i) Expenses described in section 274(e)(2) relating to food and beverages for employees, section 274(e)(3) relating to expenses treated as compensation, section 274(e)(8) relating to items available to the public, and section 274(e)(9) relating to entertainment sold to customers, and

(ii) Expenses described in section 274(e)(5) relating to recreational, etc., expenses for employees, except that a taxpayer shall keep such records or other evidence as shall establish that such expenses were for activities (or facilities used in connection therewith) primarily for the benefit of employees other than employees who are officers, shareholders or other owners (as defined in section 274(e)(5)), or highly compensated employees.

(d) *Disclosure on returns*—(1) *In general.* The Commissioner may, in his discretion, prescribe rules under which any taxpayer claiming a deduction or credit for entertainment, gifts, travel, or with respect to listed property, or any other person receiving advances, reimbursements, or allowances for such items, shall make disclosure on his tax return with respect to such items. The provisions of this paragraph shall apply notwithstanding the provisions of paragraph (f) of this section.

(2) *Business use of passenger automobiles and other vehicles.* (i) On returns for taxable years beginning after December 31, 1984, taxpayers that claim a deduction or credit with respect to any vehicle are required to answer certain questions providing information about the use of the vehicle. The information required on the tax return relates to mileage (total, business, commuting, and other personal mileage), percentage of business use, date placed in service, use of other vehicles, after-work use, whether the taxpayer has evidence to support the business use claimed on the return, and whether or not the evidence is written.

(ii) Any employer that provides the use of a vehicle to an employee must obtain information from the employee sufficient to complete the employer's tax return. Any employer that provides more than five vehicles to its employees need not include any information on its return. The employer, instead, must obtain the information from its employees, indicate on its return that it has obtained the information, and retain the information received. Any employer—

(A) That can satisfy the requirements of §1.274–6T(a)(2), relating to vehicles not used for personal purposes,

(B) That can satisfy the requirements of §1.274–6T(a)(3), relating to vehicles not used for personal purposes other than commuting, or

(C) That treats all use of vehicles by employees as personal use need not obtain information with respect to those vechicles, but instead must indicate on its return that it has vehicles exempt from the requirements of this paragraph (d)(2).

(3) *Business use of other listed property.* On returns for taxable years beginning after December 31, 1984, taxpayers that claim a deduction or credit with respect to any listed property other than a vehicle (for example, a yacht, airplane, or certain computers) are required to provide the following information:

(i) The date that the property was placed in service,

(ii) The percentage of business use,

(iii) Whether evidence is available to support the percentage of business use claimed on the return, and

(iv) Whether the evidence is written.

(e) *Substantiation of the business use of listed property made available by an employer for use by an employee*—(1) *Employee*—(i) *In general.* An employee may not exclude from gross income as a working condition fringe any amount of the value of the availability of listed property provided by an employer to the employee, unless the employee substantiates for the period of availability the amount of the exclusion in accordance with the requirements of section 274(d) and either this section or § 1.274–6T.

(ii) *Vehicles treated as used entirely for personal purposes.* If an employer includes the value of the availability of a vehicle (as defined in § 1.61–21(e)(2)) in an employee's gross income without taking into account any exclusion for a working condition fringe allowable under section 132 and the regulations thereunder with respect to the vehicle, the employee must substantiate any deduction claimed under §§ 1.162–25 and 1.162–25T for the business/investment use of the vehicle in accordance with the requirements of section 274(d) and either this section or § 1.274–6T.

(2) *Employer*—(i) *In general.* An employer substantiates its business/investment use of listed property by showing either—

(A) That, based on evidence that satisfies the requirements of section 274(d) or statements submitted by employees that summarize such evidence, all or a portion of the use of the listed property is by employees in the employer's trade or business and, if any employee used the property for personal purposes, the employer included an appropriate amount in the employee's income, or

(B) In the case of a vehicle, the employer treats all use by employees as personal use and includes an appropriate amount in the employees' income.

(ii) *Reliance on employee records.* For purposes of substantiating the business/investment use of listed property that an employer provides to an employee and for purposes of the information required by paragraph (d)(2) and (3) of this section, the employer may rely on adequate records maintained by the employee or on the employee's own statement if corroborated by other sufficient evidence unless the employer knows or has reason to know that the statement, records, or other evidence are not accurate. The employer must retain a copy of the adequate records maintained by the employee or the other sufficient evidence, if available. Alternatively, the employer may rely on a statement submitted by the employee that provides sufficient information to allow the employer to determine the business/investment use of the property unless the employer knows or has reason to know that the statement is not based on adequate records or on the employee's own statement corroborated by other sufficient evidence. If the employer relies on the employee's statement, the employer must retain only a copy of the statement. The employee must retain a copy of the adequate records or other evidence.

(f) *Reporting and substantiation of expenses of certain employees for travel, entertainment, gifts, and with respect to listed property*—(1) *In general.* The purpose of this paragraph is to provide rules for reporting and substantiation of certain expenses paid or incurred by employees in connection with the performance of services as employees. For purposes of this paragraph, the term *business expenses* means ordinary and necessary expenses for travel, entertainment, gifts, or with respect to listed property which are deductible under section 162, and the regulations thereunder, to the extent not disallowed by section 262, 274(c), and 280F. Thus, the term *business expenses* does not include personal, living, or family expenses disallowed by section 262, travel expenses disallowed by section 274(c), or cost recovery deductions and credits with respect to listed property disallowed by section 280F(d)(3) because the use of such property is not for the convenience of the employer and required as a condition of employment. Except as provided in paragraph (f)(2), advances, reimbursements, or allowances for such expenditures must be reported as income by the employee.

(2) *Reporting of expenses for which the employee is required to make an adequate accounting to his employer*—(i) *Reimbursements equal to expenses.* For purposes of computing tax liability, an employee need not report on his tax return business expenses for travel, transportation, entertainment, gifts, or with respect to listed property, paid or incurred by him solely for the benefit of his employer for which he is required to, and does, make an adequate accounting to his employer (as defined in paragraph (f)(4) of this section) and which are charged directly or indirectly to the employer (for example, through credit cards) or for which the employee is paid through advances, reimbursements, or otherwise, provided that the total amount of such advances, reimbursements, and charges is equal to such expenses.

(ii) *Reimbursements in excess of expenses.* In case the total of the amounts charged directly or indirectly to the employer or received from the employer as advances, reimbursements, or otherwise, exceeds the business expenses paid or incurred by the employee and the employee is required to, and does, make an adequate accounting to his employer for such expenses, the employee must include such excess (including amounts received for expenditures not deductible by him) in income.

(iii) *Expenses in excess of reimbursements.* If an employee incurs deductible business expenses on behalf of his employer which exceed the total of the amounts charged directly or indirectly to the employer and received from the employer as advances, reimbursements, or otherwise, and the employee makes an adequate accounting to his employer, the employee must be able to substantiate any deduction for such excess with such records and supporting evidence as will substantiate each element of an expenditure (described in paragraph (b) of this section) in accordance with paragraph (c) of this section.

(3) *Reporting of expenses for which the employee is not required to make an adequate accounting to his employer.* If the employee is not required to make an adequate accounting to his employer for his business expenses or, though required, fails to make an adequate accounting for such expenses, he must submit, as a part of his tax return, the appropriate form issued by the Internal Revenue Service for claiming deductions for employee business expenses (e.g., Form 2106, Employee Business Expenses, for 1985) and provide the information requested on that form, including the information required by paragraph (d)(2) and (3) of this section if the employee's business expenses are with respect to the use of listed property. In addition, the employee must maintain such records and supporting evidence as will substantiate each element of an expenditure or use (described in paragraph (b) of this section) in accordance with paragraph (c) of this section.

(4) *Definition of an ''adequate accounting'' to the employer*—(i) *In general.* For purposes of this paragraph an adequate accounting means the submission to the employer of an account book, diary, log, statement of expense, trip sheet, or similar record maintained by the employee in which the information as to each element of an expenditure or use (described in paragraph (b) of this section) is recorded at or near the time of the expenditure or use, together with supporting documentary evidence, in a manner which conforms to all the ''adequate records'' requirements of paragraph (c)(2) of this section. An adequate accounting requires that the employee account for all amounts received from his employer during the

taxable year as advances, reimbursements, or allowances (including those charged directly or indirectly to the employer through credit cards or otherwise) for travel, entertainment, gifts, and the use of listed property. The methods of substantiation allowed under paragraph (c)(4) or (c)(5) of this section also will be considered to be an adequate accounting if the employer accepts an employee's substantiation and establishes that such substantiation meets the requirements of such paragraph (c)(4) or (c)(5). For purposes of an adequate accounting, the method of substantiation allowed under paragraph (c)(3) of this section will not be permitted.

(ii) *Procedures for adequate accounting without documentary evidence.* The Commissioner may, in his discretion, prescribe rules under which an employee may make an adequate accounting to his employer by submitting an account book, log, diary, etc., alone, without submitting documentary evidence.

(iii) *Employer.* For purposes of this section, the term *employer* includes an agent of the employer or a third party payor who pays amounts to an employee under a reimbursement or other expense allowance arrangement.

(5) *Substantiation of expenditures by certain employees.* An employee who makes an adequate accounting to his employer within the meaning of this paragraph will not again be required to substantiate such expense account information except in the following cases:

(i) An employee whose business expenses exceed the total of amounts charged to his employer and amounts received through advances, reimbursements or otherwise and who claims a deduction on his return for such excess,

(ii) An employee who is related to his employer within the meaning of section 267(b), but for this purpose the percentage referred to in section 267(b)(2) shall be 10 percent, and

(iii) Employees in cases where it is determined that the accounting procedures used by the employer for the reporting and substantiation of expenses by such employees are not adequate, or where it cannot be determined that such procedures are adequate. The district director will determine whether the employer's accounting procedures are adequate by considering the facts and circumstances of each case, including the use of proper internal controls. For example, an employer should require that an expense account be verified and approved by a reasonable person other than the person incurring such expenses. Accounting procedures will be considered inadequate to the extent that the employer does not require an adequate accounting from his employees as defined in paragraph (f)(4) of this section, or does not maintain such substantiation. To the extent an employer fails to maintain adequate accounting procedures he will thereby obligate his employees to substantiate separately their expense account information.

(g) Substantiation by reimbursement arrangements or per diem, mileage, and other traveling allowances. For guidance, see § 1.274(d)–1.

(h) *Reporting and substantiation of certain reimbursements of persons other than employees*—(1) *In general.* The purpose of this paragraph is to provide rules for the reporting and substantiation of certain expenses for travel, entertainment, gifts, or with respect to listed property paid or incurred by one person (hereinafter termed "independent contractor") in connection with services performed for another person other than an employer (hereinafter termed "client or customer") under a reimbursement or other expense allowance arrangement with such client or customer. For purposes of this paragraph, the term *business expenses* means ordinary and necessary expenses for travel, entertainment, gifts, or with respect to listed property which are deductible under section 162, and the regulations thereunder, to the extent not disallowed by sections 262 and 274(c). Thus, the term *business expenses* does not include personal, living, or family expenses disallowed by section 262 or travel expenses disallowed by section 274(c), and reimbursements for such expenditures must be reported as income by the independent contractor. For purposes of this paragraph, the term *reimbursements* means advances, allowances, or reimbursements received by an independent contractor for travel, entertainment, gifts, or with respect to listed property in connection with the performance by him of services for his client or customer, under a reimbursement or other expense allowance arrangement with his client or customer, and includes amounts charged directly or indirectly to the client or customer through credit card systems or otherwise. See paragraph (j) of this section relating to the substantiation of meal expenses while traveling away from home.

(2) *Substantiation by independent contractors.* An independent contractor shall substantiate, with respect to his reimbursements, each element of an expenditure (described in paragraph (b) of this section) in accordance with the requirements of paragraph (c) of this section; and, to the extent he does not so substantiate, he shall include such reimbursements in income. An independent contractor shall so substantiate a reimbursement for entertainment regardless of whether he accounts (within the meaning of paragraph (h)(3) of this section) for such entertainment.

(3) *Accounting to a client or customer under section 274(e)(4)(B).* Section 274(e)(4)(B) provides that section 274(a) (relating to disallowance of expenses for entertainment) shall not apply to expenditures for entertainment for which an independent contractor has been reimbursed if the independent contractor accounts to his client or customer, to the extent provided by section 274(d). For purposes of section 274(e)(4)(B), an independent contractor shall be considered to account to his client or customer for an expense paid or incurred under a reimbursement or other expense allowance arrangement with his client or customer if, with respect to such expense for entertainment, he submits to his client or customer adequate records or other sufficient evidence conforming to the requirements of paragraph (c) of this section.

(4) *Substantiation by client or customer.* A client or customer shall not be required to substantiate, in accordance with the requirements of paragraph (c) of this section, reimbursements to an independent contractor for travel and gifts, or for entertainment unless the independent contractor has accounted to him (within the meaning of section 274(e)(4)(B) and paragraph (h)(3) of this section) for such entertainment. If an independent contractor has so accounted to a client or customer for entertainment, the client or customer shall substantiate each element of the expenditure (as described in paragraph (b) of this section) in accordance with the requirements of paragraph (c) of this section.

(i) [Reserved]

(j) *Authority for an optional method of computing meal expenses while traveling away from home.* The Commissioner may establish a method under which a taxpayer may elect to use a specified amount or amounts for meals while traveling away from home in lieu of substantiating the actual cost of meals. The taxpayer would not be relieved of substantiating the actual cost of other travel expenses as well as the time, place, and business purpose of the travel. See paragraphs (b)(2) and (c) of this section.

(k) *Exceptions for qualified nonpersonal use vehicles*—(1) *In general.* The substantiation requirements of section 274(d) and this section do not apply to any qualified nonpersonal use vehicle (as defined in paragraph (k)(2) of this section).

(2) *Qualified nonpersonal use vehicle*—(i) *In general.* For purposes of section 274(d) and this section, the term *qualified nonpersonal use vehicle* means any vehicle which, by reason of its nature (i.e., design), is not likely to be used more than a de minimis amount for personal purposes.

(ii) *List of vehicles.* Vehicles which are qualified nonpersonal use vehicles include the following—

(A) Clearly marked police and fire vehicles (as defined and to the extent provided in paragraph (k)(3) of this section),

(B) Ambulances used as such or hearses used as such,

(C) Any vehicle designed to carry cargo with a loaded gross vehicle weight over 14,000 pounds,

(D) Bucket trucks (‘‘cherry pickers’’),

(E) Cement mixers,

(F) Combines,

(G) Cranes and derricks,

(H) Delivery trucks with seating only for the driver, or only for the driver plus a folding jump seat,

(I) Dump trucks (including garbage trucks),

(J) Flatbed trucks,

(K) Forklifts,

(L) Passenger buses used as such with a capacity of at least 20 passengers,

(M) Qualified moving vans (as defined in paragraph (k)(4) of this section),

(N) Qualified specialized utility repair trucks (as defined in paragraph (k)(5) of this section),

(O) Refrigerated trucks,

(P) School buses (as defined in section 4221(d)(7)(C)),

(Q) Tractors and other special purpose farm vehicles,

(R) Unmarked vehicles used by law enforcement officers (as defined in paragraph (k)(6) of this section) if the use is officially authorized, and

(S) Such other vehicles as the Commissioner may designate.

(3) *Clearly marked police or fire vehicles.* A police or fire vehicle is a vehicle, owned or leased by a governmental unit, or any agency or instrumentality thereof, that is required to be used for commuting by a police officer or fire fighter who, when not on a regular shift, is on call at all times, provided that any personal use (other than commuting) of the vehicle outside the limit of the police officer's arrest powers or the fire fighter's obligation to respond to an emergency is prohibited by such governmental unit. A police or fire vehicle is clearly marked if, through painted insignia or words, it is readily apparent that the vehicle is a police or fire vehicle. A marking on a license plate is not a clear marking for purposes of this paragraph (k).

(4) *Qualified moving van.* The term *qualified moving van* means any truck or van used by a professional moving company in the trade or business of moving household or business goods if—

(i) No personal use of the van is allowed other than for travel to and from a move site (or for de minimis personal use, such as a stop for lunch on the way between two move sites),

(ii) Personal use for travel to and from a move site is an irregular practice (i.e., not more than five times a month on average), and

(iii) Personal use is limited to situations in which it is more convenient to the employer, because of the location of the employee's residence in relation to the location of the move site, for the van not to be returned to the employer's business location.

(5) *Qualified specialized utility repair truck.* The term *qualified specialized utility repair truck* means any truck (not including a van or pickup truck) specifically designed and used to carry heavy tools, testing equipment, or parts if—

(i) The shelves, racks, or other permanent interior construction which has been installed to carry and store such heavy items is such that it is unlikely that the truck will be used more than a de minimis amount for personal purposes, and

(ii) The employer requires the employee to drive the truck home in order to be able to respond in emergency situations for purposes of restoring or maintaining electricity, gas, telephone, water, sewer, or steam utility services.

(6) *Unmarked law enforcement vehicles*—(i) *In general.* The substantiation requirements of section 274(d) and this section do not apply to officially authorized uses of an unmarked vehicle by a "law enforcement officer". To qualify for this exception, any personal use must be authorized by the Federal, State, county, or local governmental agency or department that owns or leases the vehicle and employs the officer, and must be incident to law-enforcement functions, such as being able to report directly from home to a stakeout or surveillance site, or to an emergency situation. Use of an unmarked vehicle for vacation or recreation trips cannot qualify as an authorized use.

(ii) *Law enforcement officer.* The term *law enforcement officer* means an individual who is employed on a full-time basis by a governmental unit that is responsible for the prevention or investigation of crime involving injury to persons or property (including apprehension or detention of persons for such crimes), who is authorized by law to carry firearms, execute search warrants, and to make arrests (other than merely a citizen's arrest), and who regularly carries firearms (except when it is not possible to do so because of the requirements of undercover work). The term *law enforcement officer* may include an arson investigator if the investigator otherwise meets the requirements of this paragraph (k)(6)(ii), but does not include Internal Revenue Service special agents.

(7) *Trucks and vans.* The substantiation requirements of section 274(d) and this section apply generally to any pickup truck or van, unless the truck or van has been specially modified with the result that it is not likely to be used more than a de minimis amount for personal purposes. For example, a van that has only a front bench for seating, in which permanent shelving that fills most of the cargo area has been installed, that constantly carries merchandise or equipment, and that has been specially painted with advertising or the company's name, is a vehicle not likely to be used more than a de minimis amount for personal purposes.

(8) *Examples.* The following examples illustrate the provisions of paragraph (k)(3) and (6) of this section:

Example 1. Detective C, who is a ''law enforcement officer'' employed by a state police department, headquartered in city M, is provided with an unmarked vehicle (equipped with radio communication) for use during off-duty hours because C must be able to communicate with headquarters and be available for duty at any time (for example, to report to a surveillance or crime site). The police department generally has officially authorized personal use of the vehicle by C but has prohibited use of the vehicle for recreational purposes or for personal purposes outside the state. Thus, C's use of the vehicle for commuting between headquarters or a surveillance site and home and for personal errands is authorized personal use as described in paragraph (k)(6)(i) of this section. With respect to these authorized uses, the vehicle is not subject to the substantiation requirements of section 274(d) and the value of these uses is not included in C's gross income.

Example 2. Detective T is a ''law enforcement officer'' employed by city M. T is authorized to make arrests only within M's city limits. T, along with all other officers on the force, is ordinarily on duty for eight hours each work day and on call during the other sixteen hours. T is provided with the use of a clearly marked police vehicle in which T is required to commute to his home in city M. The police department's official policy regarding marked police vehicles prohibits personal use (other than commuting) of the vehicles outside the city limits. When not using the vehicle on the job, T uses the vehicle only for commuting, personal errands on the way between work and home, and personal errands within city M. All use of the vehicle by T conforms to the requirements of paragraph (k)(3) of this section. Therefore, the value of that use is excluded from T's gross income as a working condition fringe and the vehicle is not subject to the substantiation requirements of section 274(d).

(l) *Definitions.* For purposes of section 274(d) and this section, the terms *automobile* and *vehicle* have the same meanings as prescribed in §1.61–21(d)(1)(ii) and §1.61–21(e)(2), respectively. Also, for purposes of section 274(d) and this section, the terms *employer, ''employee,* and *personal use* have the same meanings as prescribed in §1.274–6T(e).

(m) *Effective date.* Section 274(d), as amended by the Tax Reform Act of 1984 and Public Law 99–44, and this section (except as provided in paragraph (d)(2) and (3) of this section) apply with respect to taxable years beginning after December 31, 1985. Section 274(d) and this section apply to any deduction or credit claimed in a taxable year beginning after December 31, 1985, with respect to any listed property, regardless of the taxable year in which the property was placed in service. However, except as provided in §1.132–5(h) with respect to qualified nonpersonal use vehicles, the substantiation requirements of section 274(d) and this section do not apply to the determination of an employee's working condition fringe exclusion or to the determination under §1.162–25(b) of an employee's deduction before the date that those requirements apply, under this paragraph (m), to the employer, if the employer is taxable.

[T.D. 8061, 50 FR 46014, Nov. 6, 1985; as amended by T.D. 8063, 50 FR 52312, Dec. 23, 1985; T.D. 8276, 54 FR 51027, Dec. 12, 1989; T.D. 8451, 57 FR 57669, Dec. 7, 1992; T.D. 8601, 60 FR 36995, July 19, 1995; T.D. 8715, 62 FR 13990, Mar. 25, 1997]

§1.274–6 Expenditures deductible without regard to trade or business or other income producing activity.

The provisions of §§1.274–1 through 1.274–5, inclusive, do not apply to any deduction allowable to the taxpayer without regard to its connection with the taxpayer's trade or business or other income producing activity. Examples of such items are interest, taxes such as real property taxes, and casualty losses. Thus, if a taxpayer owned a fishing camp, the taxpayer could still deduct mortgage interest and real property taxes in full even if deductions for its use are not allowable under section 274(a) and § 1.274–2. In the case of a taxpayer which is not an individual, the provisions of this section shall be applied as if it were an individual. Thus, if a corporation sustains a casualty loss on an entertainment facility used in its trade or business, it could deduct the loss even though deductions for the use of the facility are not allowable.

[T.D. 8051, 50 FR 36576, Sept. 9, 1985]

§ 1.274–6T Substantiation with respect to certain types of listed property for taxable years beginning after 1985 (temporary).

(a) *Written policy statements as to vehicles*—(1) *In general.* Two types of written policy statements satisfying the conditions described in paragraph (a)(2) and (3) of this section, if initiated and kept by an employer to implement a policy of no personal use, or no personal use except for commuting, of a vehicle provided by the employer, qualify as sufficient evidence corroborating the taxpayer's own statement and therefore will satisfy the employer's substantiation requirements under section 274(d). Therefore, the employee need not keep a separate set of records for purposes of the employer's substantiation requirements under section 274(d) with respect to use of a vehicle satisfying these written policy statement rules. A written policy statement adopted by a governmental unit as to employee use of its vehicles is eligible for these exceptions to the section 274(d) substantiation rules. Thus, a resolution of a city council or a provision of state law or a state constitution would qualify as a written policy statement, as long as the conditions described in paragraph (a)(2) and (3) of this section are met.

(2) *Vehicles not used for personal purposes*—(i) *Employers.* A policy statement that prohibits personal use by an employee satisfies an employer's substantiation requirements under section 274(d) if all the following conditions are met—

(A) The vehicle is owned or leased by the employer and is provided to one or more employees for use in connection with the employer's trade or business,

(B) When the vehicle is not used in the employer's trade or business, it is kept on the employer's business premises, unless it is temporarily located elsewhere, for example, for maintenance or because of a mechanical failure,

(C) No employee using the vehicle lives at the employer's business premises,

(D) Under a written policy of the employer, neither an employee, nor any individual whose use would be taxable to the employee, may use the vehicle for personal purposes, except for de minimis personal use (such as a stop for lunch between two business deliveries), and

(E) The employer reasonably believes that, except for de minimis use, neither the employee, nor any individual whose use would be taxable to the employee, uses the vehicle for any personal purpose.

There must also be evidence that would enable the Commissioner to determine whether the use of the vehicle meets the preceding five conditions.

(ii) *Employees.* An employee, in lieu of substantiating the business/investment use of an employer-provided vehicle under § 1.274–5T, may treat all use of the vehicle as business/investment use if the following conditions are met—

(A) The vehicle is owned or leased by the employer and is provided to one or more employees for use in connection with the employer's trade or business,

(B) When the vehicle is not used in the employer's trade or business, it is kept on the employer's business premises, unless it is temporarily located elsewhere, for example, for maintenance or because of a mechanical failure,

(C) No employee using the vehicle lives at the employer's business premises,

(D) Under a written policy of the employer, neither the employee, nor any individual whose use would be taxable to the employee, may use the vehicle for personal purposes, except for de minimis personal use (such as a stop for lunch between two business deliveries), and

(E) Except for de minimis personal use, neither the employee, nor any individual whose use would be taxable to the employee, uses the vehicle for any personal purpose.

There must also be evidence that would enable the Commissioner to determine whether the use of the vehicle meets the preceding five conditions.

(3) *Vehicles not used for personal purposes other than commuting*—(i) *Employers.* A policy statement that prohibits personal use by an employee, other than commuting, satisfies an employer's substantiation requirements under section 274(d) if all the following conditions are met—

(A) The vehicle is owned or leased by the employer and is provided to one or more employees for use in connection with the employer's trade or business and is used in the employer's trade or business,

(B) For bona fide noncompensatory business reasons, the employer requires the employee to commute to and/or from work in the vehicle,

(C) The employer has established a written policy under which neither the employee, nor any individual whose use would be taxable to the employee, may use the vehicle for personal purposes, other than for commuting or de minimis personal use (such as a stop for a personal errand on the way between a business delivery and the employee's home),

(D) The employer reasonably believes that, except for de minimis personal use, neither the employee, nor any individual whose use would be taxable to the employee, uses the vehicle for any personal purpose other than commuting,

(E) The employee required to use the vehicle for commuting is not a control employee (as defined in §1.61–2T(f) (5) and (6)) required to use an automobile (as defined in §1.61–2T(d)(1)(ii)), and

(F) The employer accounts for the commuting use by including in the employee's gross income the commuting value provided in §1.61–2T(f)(3) (to the extent not reimbursed by the employee).

There must be evidence that would enable the Commissioner to determine whether the use of the vehicle met the preceding six conditions.

(ii) *Employees.* An employee, in lieu of substantiating the business/investment use of an employer-provided vehicle under §1.274–5T, may substantiate any exclusion allowed under section 132 for a working condition fringe by including in income the commuting value of the vehicle (determined by the employer pursuant to §1.61–2T(f)(3)) if all the following conditions are met:

(A) The vehicle is owned or leased by the employer and is provided to one or more employees for use in connection with the employer's trade or business and is used in the employer's trade or business,

(B) For bona fide noncompensatory business reasons, the employer requires the employee to commute to and/or from work in the vehicle,

(C) Under a written policy of the employer, neither the employee, nor any individual whose use would be taxable to the employee, may use the vehicle for personal purposes, other than for commuting or de minimis personal use (such as a stop for a personal errand on the way between a business delivery and the employee's home),

(D) Except for de minimis personal use, neither the employee, nor any individual whose use would be taxable to the employee, uses the vehicle for any personal purpose other than commuting,

(E) The employee required to use the vehicle for commuting is not a control employee (as defined in §1.61–2T(f) (5) and (6) required to use an automobile (as defined in §1.61–2T(d)(1)(ii)), and

(F) The employee includes in gross income the commuting value determined by the employer as provided in §1.61–2T(f)(3) (to the extent that the employee does not reimburse the employer for the commuting use).

There must also be evidence that would enable the Commissioner to determine whether the use of the vehicle met the preceding six conditions.

(b) *Vehicles used in connection with the business of farming*—(1) *In general.* If, during a taxable year or shorter period, a vehicle, not otherwise described in section 274(i), § 1.274–5T(k), or paragraph (a) (2) or (3) of this section, is owned or leased by an employer and used during most of a normal business day directly in connection with the business of farming (as defined in paragraph (b)(2) of this section), the employer, in lieu of substantiating the use of the vehicle as prescribed in § 1.274–5T(b)(6)(i)(B), may determine any deduction or credit with respect to the vehicle as if the business/investment use (as defined in § 1.280F–6T(d)(3)(i)) and the qualified business use (as defined in § 1.280F–6T(d)(2)) of the vehicle in the business of farming for the taxable year or shorter period were 75 percent plus that percentage, if any, attributable to an amount included in an employee's gross income. If the vehicle is also available for personal use by employees, the employer must include the value of that personal use in the gross income of the employees, allocated among them in the manner prescribed in § 1.132–5T(g).

(2) *Directly in connection with the business of farming.* The phrase *directly in connection with the business of farming* means that the vehicle must be used directly in connection with the business of operating a farm (i.e., cultivating land or raising or harvesting any agricultural or horticultural commodity, or the raising, shearing, feeding, caring for, training, and management of animals) or incidental thereto (for example, trips to the feed and supply store).

(3) *Substantiation by employees.* If an employee is provided with the use of a vehicle to which this paragraph (b) applies, the employee may, in lieu of substantiating the business/investment use of the vehicle in the manner prescribed in § 1.274–5T, substantiate any exclusion allowed under section 132 for a working condition fringe as if the business/investment use of the vehicle were 75 percent, plus that percentage, if any, determined by the employer to be attributable to the use of the vehicle by individuals other than the employee, provided that the employee includes in gross income the amount determined by the employer as includible in the employee's gross income. *See* § 1.132–5T(g)(3) for examples illustrating the allocation of use of a vehicle among employees.

(c) *Vehicles treated as used entirely for personal purposes.* An employer may satisfy the substantiation requirements under section 274(d) for a taxable year or shorter period with respect to the business use of a vehicle that is provided to an employee by including the value of the availability of the vehicle during the relevant period in the employee's gross income without any exclusion for a working condition fringe with respect to the vehicle and, if required, by withholding any taxes. Under these circumstances, the employer's business/investment use of the vehicle during the relevant period is 100 percent. The employer's qualified business use of the vehicle is dependent upon the relationship of the employee to the employer (*see* § 1.280F–6T(d)(2)).

(d) *Limitation.* If a taxpayer chooses to satisfy the substantiation requirements of section 274(d) and § 1.274–5T by using one of the methods prescribed in paragraphs (a) (2) or (3), (b), or (c) of this section and files a return with the Internal Revenue Service for a taxable year consistent with such choice, the taxpayer may not later use another of these methods. Similarly, if a taxpayer chooses to satisfy the substantiation requirements of section 274(d) in the manner prescribed in § 1.274–5T and files a return with the Internal Revenue Service for a taxable year consistent with such choice, the taxpayer may not later use a method prescribed in paragraph (a) (2) or (3), (b), or (c) of this section. This rule applies to an employee for purposes of substantiating any working condition fringe exclusion as well as to an employer. For example, if an employee excludes on his federal income tax return for a taxable year 90 percent of the value of the availability of an employer-provided automobile on the basis of records that allegedly satisfy the ''adequate records'' requirement of § 1.274–5T(c)(2), and that requirement is not satisfied, then the employee may not satisfy the substantiation requirements of section 274(d) for the taxable year by any method prescribed in this section, but may present other corroborative evidence as prescribed in § 1.274–5T(c)(3).

(e) *Definitions*—(1) *In general.* The definitions provided in this paragraph (e) apply for purposes of section 274(d), §1.274–5T, and this section.

(2) *Employer and employee.* The terms *employer* and *employee* include the following:

(i) A sole proprietor shall be treated as both an employer and employee,

(ii) A partnership shall be treated as an employer of its partners, and

(iii) A partner shall be treated as an employee of the partnership.

(3) *Automobile.* The term *automobile* has the same meaning as prescribed in §1.61–2T(d)(1)(ii).

(4) *Vehicle.* The term *vehicle* has the same meaning as prescribed in §1.61–2T(e)(2).

(5) *Personal use. Personal use* by an employee of an employer-provided vehicle includes use in any trade or business other than the trade or business of being the employee of the employer providing the vehicle.

(f) *Effective date.* This section is effective for taxable years beginning after December 31, 1985.

[T.D. 8061, 50 FR 46037, Nov. 6, 1985; as amended by T.D. 8063, 50 FR 52312, Dec. 23, 1985]

§1.274–7 Treatment of certain expenditures with respect to entertainment-type facilities.

If deductions are disallowed under §1.274–2 with respect to any portion of a facility, such portion shall be treated as an asset which is used for personal, living, and family purposes (and not as an asset used in a trade or business). Thus, the basis of such a facility will be adjusted for purposes of computing depreciation deductions and determining gain or loss on the sale of such facility in the same manner as other property (for example, a residence) which is regarded as used partly for business and partly for personal purposes.

[T.D. 6659, 28 FR 6507, June 25, 1963]

§1.274–8 Effective date.

Except as provided in §1.274–2 (a) and (e), §§1.274–1 through 1.274–7 apply with respect to taxable years ending after December 31, 1962, but only in respect of periods after such date.

[T.D. 8051, 50 FR 36576, Sept. 9, 1985]

§1.274(d)–1 Substantiation requirements.

(a) *Substantiation by reimbursement arrangements or per diem, mileage, and other traveling allowances*—(1) *In general.* The Commissioner may, in his discretion, prescribe rules in pronouncements of general applicability under which allowances for expenses described in paragraph (a)(2) of this section will, if in accordance with reasonable business practice, be regarded as equivalent to substantiation by adequate records or other sufficient evidence for purposes of §1.274–5T(c) of the amount of such expenses and as satisfying, with respect to the amount of such expenses, the requirements of an adequate accounting to the employer for purposes of §1.274–5T(f)(4). If the total allowance received exceeds the deductible expenses paid or incurred by the employee, such excess must be reported as income on the employee's return. See §1.274–5T(j) relating to the substantiation of meal expenses while traveling away from home.

(2) *Allowances for expenses described.* An allowance for expenses is described in this paragraph (a)(2) if it is a—

(i) Reimbursement arrangement covering ordinary and necessary expenses of traveling away from home (exclusive of transportation expenses to and from destination);

(ii) Per diem allowance providing for ordinary and necessary expenses of traveling away from home (exclusive of transportation costs to and from destination); or

(iii) Mileage allowance providing for ordinary and necessary expenses of local travel and transportation while traveling away from home.

(3) *Limitation.* A mileage allowance described in paragraph (a)(2)(iii) of this section is available only to the owner of a vehicle.

(b) *Effective date.* This section applies to allowances described in paragraph (a)(2) of this section for expenses paid or incurred on or before December 31, 1997. For allowances for expenses paid or incurred after December 31, 1997, see §1.274(d)–1T.

[T.D. 8451, 57 FR 57669, Dec. 7, 1992, as amended by T.D. 8784, 63 FR 52601, Oct. 1, 1998]

§ 1.274(d)–1T Substantiation requirements (temporary).

(a) (1) and (2) [Reserved]. For further guidance, see § 1.274(d)–1(a)(1) and (2).

(a)(3) [Reserved].

(b) *Effective date.* This section applies to allowances described in § 1.274(d)–1(a)(2) for expenses paid or incurred after December 31, 1997. For allowances for expenses paid or incurred on or before December 31, 1997, see § 1.274(d)–1(a).

[T.D. 8784, 63 FR 52601, Oct. 1, 1998; 63 FR 64187, Nov. 19, 1998]

§ 1.275–1 Deduction denied in case of certain taxes.

For description of the taxes for which a deduction is denied under section 275, see paragraphs (a), (b), (c), (e), and (h) of § 1.164–2.

[T.D. 6780, 29 FR 18148, Dec. 22, 1964, as amended by T.D. 7767, 46 FR 11264, Feb. 6, 1981]

§ 1.276–1 Disallowance of deductions for certain indirect contributions to political parties.

(a) *In general.* Notwithstanding any other provision of law, no deduction shall be allowed for income tax purposes in respect of any amount paid or incurred after March 15, 1966, in a taxable year of the taxpayer beginning after December 31, 1965, for any expenditure to which paragraph (b)(1), (c), (d), or (e) of this section is applicable. Section 276 is a disallowance provision exclusively and does not make deductible any expenses which are not otherwise allowed under the Code. For certain other rules in respect of deductions for expenditures for political purposes, see §§ 1.162–15(b), 1.162–20, and 1.271–1.

(b) *Advertising in convention program*—(1) *General rule.* (i) Except as provided in subparagraph (2) of this paragraph, no deduction shall be allowed for an expenditure for advertising in a convention program of a political party. For purposes of this subparagraph it is immaterial who publishes the convention program or to whose use the proceeds of the program inure (or are intended to inure). A convention program is any written publication (as defined in paragraph (c) of this section) which is distributed or displayed in connection with or at a political convention, conclave, or meeting. Under certain conditions payments to a committee organized for the purpose of bringing a political convention to an area are deductible under paragraph (b) of § 1.162–15. This rule is not affected by the provisions of this section. For example, such payments may be deductible notwithstanding the fact that the committee purchases from a political party the right to publish a pamphlet in connection with a convention and that the deduction of costs of advertising in the pamphlet is prohibited under this section.

(ii) The application of the provisions of this subparagraph may be illustrated by the following example:

Example. M Corporation publishes the convention program of the Y political party for a convention not described in subparagraph (2) of this paragraph. The corporation makes no payment of any kind to or on behalf of the party or any of its candidates and no part of the proceeds of the publication and sale of the program inures directly or indirectly to the benefit of any political party or candidate. P Corporation purchases an advertisement in the program. P Corporation may not deduct the cost of such advertisement.

(2) *Amounts paid or incurred on or after January 1, 1968, for advertising in programs of certain national political conventions.* (i) Subject to the limitations in subdivision (ii) of this subparagraph, a deduction may be allowed for any amount paid or incurred on or after January 1, 1968, for advertising in a convention program of a political party distributed in connection with a convention held for the purpose of nominating candidates for the offices of President and Vice President of the United States, if the proceeds from the program are actually used solely to defray the costs of conducting the convention (or are set aside for such use at the next convention of the party held for such purpose) and if the amount paid or incurred for the advertising is reasonable. If such amount is not reasonable or if any part of the proceeds is used for a purpose other than that of defraying such convention costs, no part of the amount is deductible. Whether or not an amount is reasonable shall be determined in light of the business the taxpayer may expect to

receive either directly as a result of the advertising or as a result of the convention being held in an area in which the taxpayer has a principal place of business. For these purposes, an amount paid or incurred for advertising will not be considered as reasonable if it is greater than the amount which would be paid for comparable advertising in a comparable convention program of a nonpolitical organization. Institutional advertising (e.g., advertising of a type not designed to sell specific goods or services to persons attending the convention) is not advertising which may be expected to result directly in business for the taxpayer sufficient to make the expenditures reasonable. Accordingly, an amount spent for institutional advertising in a convention program may be deductible only if the taxpayer has a principal place of business in the area where the convention is held. An official statement made by a political party after a convention as to the use made of the proceeds from its convention program shall constitute prima facie evidence of such use.

(ii) No deduction may be taken for any amount described in this subparagraph which is not otherwise allowable as a deduction under section 162, relating to trade or business expenses. Therefore, in order for any such amount to be deductible, it must first satisfy the requirements of section 162, and, in addition, it must also satisfy the more restrictive requirements of this subparagraph.

(c) *Advertising in publication other than convention program.* No deduction shall be allowed for an expenditure for advertising in any publication other than a convention program if any part of the proceeds of such publication directly or indirectly inures (or is intended to inure) to or for the use of a political party or a political candidate. For purposes of this paragraph, a publication includes a book, magazine, pamphlet, brochure, flier, almanac, newspaper, newsletter, handbill, billboard, menu, sign, scorecard, program, announcement, radio or television program or announcement, or any similar means of communication. For the definition of inurement of proceeds to a political party or a political candidate, see paragraph (f)(3) of this section.

(d) *Admission to dinner or program.* No deduction shall be allowed for an expenditure for admission to any dinner or program, if any part of the proceeds of such event directly or indirectly inures (or is intended to inure) to or for the use of a political party or a political candidate. For purposes of this paragraph, a dinner or program includes a gala, dance, ball, theatrical or film presentation, cocktail or other party, picnic, barbecue, sporting event, brunch, tea, supper, auction, bazaar, reading, speech, forum, lecture, fashion show, concert, opening, meeting, gathering, or any similar event. For the definition of inurement of proceeds to a political party or a political candidate and of admission to a dinner or program, see paragraph (f) of this section.

(e) *Admission to inaugural event.* (1) No deduction shall be allowed for an expenditure for admission to an inaugural ball, inaugural gala, inaugural parade, or inaugural concert, or to any similar event (such as a dinner or program, as defined in paragraph (d) of this section), in connection with the inauguration or installation in office of any official, or any equivalent event for an unsuccessful candidate, if the event is identified with a political party or a political candidate. For purposes of this paragraph, the sponsorship of the event and the use to which the proceeds of the event are or may be put are irrelevant, except insofar as they may tend to identify the event with a political party or a political candidate. For the definition of admission to an inaugural event, see paragraph (f)(4) of this section.

(2) The application of the provisions of this paragraph may be illustrated by the following example:

Example. An inaugural reception for A, a prominent member of Y party who has been recently elected judge of the municipal court of F city, is held with the proceeds going to the city treasury. The price of admission to such affair is not deductible.

(f) *Definitions*—(1) *Political party.* For purposes of this section the term *political party* has the same meaning as that provided for in paragraph (b)(1) of §1.271–1.

(2) *Political candidate.* For purposes of this section, the term *political candidate* is to be construed in accordance with the purpose of section 276 to deny tax deductions for certain expenditures which may be used directly or indirectly to finance political campaigns. The term includes a person who, at the time of the event or publication with respect to which the deduction is being sought, has been selected or nominated by a political party for any elective office. It also includes an individual who is generally believed, under the facts and circumstances at the time of the event or publication, by the persons making expenditures in connection therewith to be an individual who is or who in the reasonably foreseeable future will be seeking selection, nomination, or election to any public office. For purposes of the preceding sentence, the facts and circumstances to be considered include, but are not limited to, the purpose of the event or publication and the disposition to be made of the proceeds. In the absence of evidence to the contrary it shall be presumed that persons making expenditures in connection with an event or publication generally believe that an incumbent of an elective public office will run for reelection to his office or for election to some other public office.

(3) *Inurement of proceeds to political party or political candidate*—(i) *In general.* Subject to the special rules presented in subdivision (iii) of this subparagraph (relating to a political candidate), proceeds directly or indirectly inure to or for the use of a political party or a political candidate *(a)* if the party or candidate may order the disposition of any part of such proceeds, regardless of what use is actually made thereof, or *(b)* if any part of such proceeds is utilized by any person for the benefit of the party or candidate. These conditions are equally applicable in determining whether the proceeds are intended to inure. Accordingly, it is immaterial whether the event or publication operates at a loss if, had there been a profit, any part of the proceeds would have inured to or for the use of a political party or a political candidate. Moreover, it shall be presumed that where a dinner, program, or publication is sponsored by or identified with a political party or political candidate, the proceeds of such dinner, program, or publication directly or indirectly inure (or are intended to inure) to or for the use of the party or candidate. On the other hand, proceeds are not considered to directly or indirectly inure to the benefit of a political party or political candidate if the benefit derived is so remote as to be negligible or merely a coincidence of the relationship of a political candidate to a trade or business profiting from an expenditure of funds. For example, the proceeds of expenditures made by a taxpayer in the ordinary course of his trade or business for advertising in a publication, such as a newspaper or magazine, are not considered as inuring to the benefit of a political party or political candidate merely because the publication endorses a particular political candidate or candidates of a particular political party, the publisher independently contributes to the support of a political party or candidate out of his own personal funds, or the principal stockholder of the publishing firm is a candidate for public office.

(ii) *Proceeds to political party.* If a political party may order the disposition of any part of the proceeds of a publication or event described in paragraph (c) or (d) of this section, such proceeds inure to the use of the party regardless of what the proceeds are to be used for or that their use is restricted to a particular purpose unrelated to the election of specific candidates for public office. Accordingly, where a political party holds a dinner for the purpose of raising funds to be used in a voter registration drive, voter education program, or nonprofit political research program, partisan or nonpartisan, the proceeds are considered to directly or indirectly inure to or for the use of the political party. Proceeds may inure to or for the use of a political party even though they are to be used for purposes which may not be directly related to any particular election (such as to pay office rent for its permanent quarters, salaries to permanent employees, or utilities charges, or to pay the cost of an event such as a dinner or program as defined in paragraph (d) of this section).

(iii) *Proceeds to political candidate.* Proceeds directly or indirectly inure (or are intended to inure) to or for the use of a political candidate if, in addition to meeting the conditions described in subdivision (i) of this subparagraph, *(a)* some part of the proceeds is or may be used directly or indirectly for the purpose of furthering his candidacy for selection, nomination, or election to any elective public office, and *(b)* they are not received by him in the ordinary course of a trade or business (other than the trade or business of holding public office). Proceeds may so inure whether or not the expenditure sought to be deducted was paid or incurred before the commencement of political activities with respect to the selection, nomination, or election referred to in *(a)* of this subdivision, or after such selection, nomination, or election has been made or has taken place. For example, proceeds of an event which may be used by an individual who, under the facts and circumstances at the time of the event, the persons making expenditures in connection therewith generally believe will in the reasonably foreseeable future run for a public office, and which may be used in furtherance of such individual's candidacy, generally will be deemed to inure (or to be intended to inure) to or for the use of a political candidate for the purpose of furthering such individual's candidacy. Or, as another example, proceeds of an event occurring after an election, which may be used by a candidate in that election to repay loans incurred in directly or indirectly furthering his candidacy, or in reimbursement of expenses incurred in directly or indirectly furthering his candidacy, will be deemed to directly or indirectly inure (or to be intended to inure) to or for the use of a political candidate for the purpose of furthering his candidacy. For purposes of this subdivision, if the proceeds received by a candidate exceed substantially the fair market value of the goods furnished or services rendered by him, the proceeds are not received by the candidate in the ordinary course of his trade or business.

(iv) The application of the provisions of this subparagraph may be illustrated by the following examples:

Example 1. Corporation O pays the Y political party $100,000 per annum for the right to publish the Y News, and retains the entire proceeds from the sale of the publication. Amounts paid or incurred for advertising in the Y News are not deductible because a part of the proceeds thereof indirectly inures to or for the use of a political party.

Example 2. The X political party holds a highly publicized ball honoring one of its active party members and admission tickets are offered to all. The guest of honor is a prominent national figure and a former incumbent of a high public office. The price of admission is designed to cover merely the cost of entertainment, food, and the ballroom, and all proceeds are paid to the hotel where the function is held, with the political party bearing the cost of any deficit. No deduction may be taken for the price of admission to the ball since the proceeds thereof inure to or for the use of a political party.

Example 3. Taxpayer A, engaged in a trade or business, purchases a number of tickets for admission to a fundraising affair held on behalf of political candidate B. The funds raised by this affair can be used by B for the purpose of furthering his candidacy. These expenditures are not deductible by A notwithstanding that B donates the proceeds of the affair to a charitable organization.

Example 4. A, an individual taxpayer who publishes a newspaper, is a candidate for elective public office. X Corporation advertises its products in A's newspaper, paying substantially more than the normal rate for such advertising. X Corporation may not deduct any portion of the cost of that advertising.

(4) *Admission to dinners, programs, inaugural events.* For purposes of this section, the cost of admission to a dinner, program, or inaugural event includes all charges, whether direct or indirect, for attendance and participation at such function. Thus, for example, amounts spent to be eligible for door prizes, for the privilege of sitting at the head table, or for transportation furnished as part of such an event, or any separate charges for food or drink, are amounts paid for admission.

[T.D. 6996, 34 FR 833, Jan. 18, 1969, as amended by T.D. 7010, 34 FR 7145, May 1, 1969]

§1.278–1 Capital expenditures incurred in planting and developing citrus and almond groves.

(a) *General rule.* (1)(i) Except as provided in subparagraph (2)(iii) of this paragraph and paragraph (b) of this section, there shall be charged to capital account any amount (allowable as a deduction without regard to section 278 or this section) which is attributable to the planting, cultivation, maintenance, or development of any citrus or almond grove (or part thereof), and which is incurred before the close of the fourth taxable year beginning with the taxable year in which the trees were planted. For purposes of section 278 and this section, such an amount shall be considered as ''incurred'' in accordance with the taxpayer's regular tax accounting method used in reporting income and expenses connected with the citrus or almond grove operation. For purposes of this paragraph, the portion of a citrus or almond grove planted in 1 taxable year shall be treated separately from the portion of such grove planted in another taxable year. The provisions of section 278 and this section apply to taxable years beginning after December 31, 1969, in the case of a citrus grove, and to taxable years beginning after January 12, 1971, in the case of an almond grove.

(ii) The provisions of this subparagraph may be illustrated by the following examples:

Example 1. T, a fiscal year taxpayer plants a citrus grove 5 weeks before the close of his taxable year ending in 1971. T is required to capitalize any amount (allowable as a deduction without regard to section 278 or this section) attributable to the planting, cultivation, maintenance, or development of such grove until the close of his taxable year ending in 1974.

Example 2. Assume the same facts as in *Example (1),* except that T plants one portion of such grove 5 weeks before the close of his taxable year ending in 1971 and another portion of such grove at the beginning of his taxable year ending in 1972. The required capitalization period for expenses attributable to the first portion of such grove shall run until the close of T's taxable year ending in 1974. The required capitalization period for expenses attributable to the second portion of such grove shall run until the close of T's taxable year ending in 1975.

(2)(i) For purposes of section 278 and this section a *citrus grove* is defined as one or more trees of the rue family, often thorny and bearing large fruit with hard, usually thick peel and pulpy flesh, such as the orange, grapefruit, lemon, lime, citron, tangelo, and tangerine.

(ii) For purposes of section 278 and this section, an *almond grove* is defined as one or more trees of the species *Prunus amygdalus.*

(iii) An amount attributable to the cultivation, maintenance, or development of a citrus or almond grove (or part thereof) shall include, but shall not be limited to, the following developmental or cultural practices expenditures: Irrigation, cultivation, pruning, fertilizing, management fees, frost protection, spraying, and upkeep of the citrus or almond grove. The provisions of section 278(a) and this paragraph shall apply to expenditures for fertilizer and related materials notwithstanding the provisions of section 180, but shall not apply to expenditures attributable to real estate taxes or interest, to soil and water conservation expenditures allowable as a deduction under section 175, or to expenditures for clearing land allowable as a deduction under section 182. Further, the provisions of section 278(a) and this paragraph apply only to expenditures allowable as deductions without regard to section 278 and have no application to expenditures otherwise chargeable to capital account, such as the cost of the land and preparatory expenditures incurred in connection with the citrus or almond grove.

(iv) For purposes of section 278 and this section, a citrus or almond tree shall be considered to be ''planted'' on the date on which the tree is placed in the permanent grove from which production is expected.

(3)(i) The period during which expenditures described in section 278(a) and this paragraph are required to be capitalized shall, once determined, be unaffected by a sale or other disposition of the citrus or almond grove. Such period shall, in all cases, be computed by reference to the taxable years of the owner of the grove at the time that the citrus or almond trees were planted. Therefore, if a citrus or almond grove subject to the provisions of section 278 or this paragraph is sold or otherwise transferred by the original owner of the grove before the close of his fourth taxable year beginning with the taxable year in which the trees were planted, expenditures described in section 278(a) or this paragraph made by the purchaser or other transferee of the citrus or almond grove from the date of his acquisition until the close of the original holder's fourth such taxable year are required to be capitalized.

(ii) The provisions of this subparagraph may be illustrated by the following example:

Example. T, a fiscal year taxpayer, plants a citrus grove at the beginning of his taxable year ending in 1971. At the beginning of his taxable year ending in 1972, T sells the grove to X. The required period during which expenditures described in section 278 (a) are required to be capitalized runs from the date on which T planted the grove until the end of T's taxable year ending in 1974. Therefore, X must capitalize any such expenditures incurred by him from the time he purchased the grove from T until the end of T's taxable year ending in 1974.

(b) *Exceptions.* (1) Paragraph (a) of this section shall not apply to amounts allowable as deductions (without regard to section 278 or this section) and attributable to a citrus or almond grove (or part thereof) which is replanted by a taxpayer after having been lost or damaged (while in the hands of such taxpayer) by reason of freeze, disease, drought, pests, or casualty.

(2)(i) Paragraph (a) of this section shall not apply to amounts allowable as deductions (without regard to section 278 or this section), and attributable to a citrus grove (or part thereof) which was planted or replanted prior to December 30, 1969, or to an almond grove (or part thereof) which was planted or replanted prior to December 30, 1970.

(ii) The provisions of this subparagraph may be illustrated by the following examples:

Example 1. T, a fiscal year taxpayer with a taxable year of July 1, 1969, through v June 30, 1970, plants a citrus grove on August 1, 1969. Since the grove was planted prior to December 30, 1969, no expenses incurred with respect to the grove shall be subject to the provisions of paragraph (a).

Example 2. Assume the same facts as in *Example (1)*, except that T plants the grove on March 1, 1970. Since the grove was planted after December 30, 1969, all amounts allowable as deductions (without regard to section 278 or this section) and attributable to the grove shall be subject to the provisions of paragraph (a). However, since paragraph (a) applies only to taxable years beginning after December 31, 1969, T must capitalize only those amounts incurred during his taxable years ending in 1971, 1972, and 1973.

[T.D. 7098, 36 FR 5214, Mar. 18, 1971, as amended by T.D. 7136, 36 FR 14731, Aug. 11, 1971]

§1.279–1 General rule; purpose.

An obligation issued to provide a consideration directly or indirectly for a corporate acquisition, although constituting a debt under section 385, may have characteristics which make it more appropriate that the participation in the corporation which the obligation represents be treated for purposes of the deduction of interest as if it were a stockholder interest rather than a creditors interest. To deal with such cases, section 279 imposes certain limitations on the deductibility of interest paid or incurred on obligations which have certain equity characteristics and are classified as corporate acquisition indebtedness. Generally, section 279 provides that no deduction will be allowed for any interest paid or incurred by a corporation during the taxable year with respect to its corporate acquisition indebtedness to the extent such interest exceeds $5 million. However, the $5 million limitation is reduced by the amount of interest paid or incurred on obligations issued under the circumstances described in section 279(a)(2) but which are not corporate acquisition indebtedness. Section 279(b) provides that an obligation will be corporate acquisition indebtedness if it was issued under certain circumstances and meets the four tests enumerated therein. Although an obligation may satisfy the conditions referred to in the preceding sentence, it may still escape classification as corporate acquisition indebtedness if the conditions as described in sections 279(d) (3), (4), and (5), 279(f), or 279(i) are present. However, no inference should be drawn from the rules of section 279 as to whether a particular instrument labeled a bond, debenture, note, or other evidence of indebtedness is in fact a debt. Before the determination as to whether the deduction for payments pursuant to an obligation as described in this section is to be disallowed, the obligation must first qualify as debt in accordance with section 385. If the obligation is not debt under section 385, it will be unnecessary to apply section 279 to any payments pursuant to such obligation.

[T.D. 7262, 38 FR 5844, Mar. 5, 1973]

§ 1.279–2 Amount of disallowance of interest on corporate acquisition indebtedness.

(a) *In general.* Under section 279(a), no deduction is allowed for any interest paid or incurred by a corporation during the taxable year with respect to its corporate acquisition indebtedness to the extent that such interest exceeds:

(1) $5 million, reduced by

(2) The amount of interest paid or incurred by such corporation during such year on any obligation issued after December 31, 1967, to provide consideration directly or indirectly for an acquisition described in section 279(b)(1) but which is not corporate acquisition indebtedness. Such an obligation is not corporate acquisition indebtedness if it:

(i) Was issued prior to October 10, 1969, or

(ii) Was issued after October 9, 1969, but does not meet any one or more of the tests of section 279(b) (2), (3), or (4), or

(iii) Was originally deemed to be corporate acquisition indebtedness but is no longer so treated by virtue of the application of paragraphs (3) or (4) of section 279(d) or

(iv) Is specifically excluded from treatment as corporate acquisition indebtedness by virtue of sections 279(d)(5), (f), or (i).

The computation of the amount by which the $5 million limitation described in this paragraph is to be reduced with respect to any taxable year is to be made as of the last day of the taxable year in which an acquisition described in section 279(b)(1) occurs. In no case shall the $5 million limitation be reduced below zero.

(b) *Certain terms defined.* When used in section 279 and the regulations thereunder:

(1) The term *issued* includes the giving of a note or other evidence of indebtedness to a bank or other lender as well as an issuance of a bond or debenture. In the case of obligations which are registered with the Securities and Exchange Commission, the date of issue is the date on which the issue is first offered to the public. In the case of obligations which are not so registered, the date of issue is the date on which the obligation is sold to the first purchaser.

(2) The term *interest* includes both stated interest and unstated interest (such as original issue discount as defined in paragraph (a)(1) of § 1.163–4 and amounts treated as interest under section 483).

(3) The term *money* means cash and its equivalent.

(4) The term *control* shall have the meaning assigned to such term by section 368(c).

(5) The term *affiliated group* shall have the meaning assigned to such term by section 1504(a), except that all corporations other than the acquired corporation shall be treated as includible corporations (without any exclusion under section 1504(b)) and the acquired corporation shall not be treated as an includible corporation. This definition shall apply whether or not some or all of the members of the affiliated group file a consolidated return.

(c) *Examples.* The provisions of paragraph (a) of this section may be illustrated by the following examples:

Example 1. On March 4, 1973, X Corporation, a calendar year taxpayer, issues an obligation which satisfies the test of section 279(b)(1) but fails to satisfy either of the tests of section 279(b) (2) or (3). Since at least one of the tests of section 279(b) is not satisfied the obligation is not corporate acquisition indebtedness. However, since the test of section 279(b)(1) is satisfied, the interest on the obligation will reduce the $5 million limitation provided by section 279 (a)(1).

Example 2. On January 1, 1969, X Corporation, a calendar year taxpayer, issues an obligation, which satisfies all the tests of section 279(b), requiring it to pay $3.5 million of interest each year. Since the obligation was issued before October 10, 1969, the obligation cannot be corporate acquisition indebtedness, and a deduction for the $3.5 million of interest attributable to such obligation is not subject to disallowance under section 279(a). However, since the obligation was issued after December 31, 1967, in an acquisition described in section 279(b)(1), under section 279(a)(2) the $3.5 million of interest attributable to such obligation reduces the $5 million limitation provided by section 279(a)(1) to $1.5 million.

Example 3. Assume the same facts as in *Example (2)*. Assume further that on January 1, 1970, X Corporation issues more obligations which are classified as corporate acquisition indebtedness and which require X Corporation to pay $4 million of interest each year. For 1970 the amount of interest paid or accrued on corporate acquisition indebtedness, which may be deducted is $1.5 million ($5 million maximum provided by section 279(a)(1) less $3.5 million, the reduction required under section 279(a)(2)). Thus, $2.5 million of the $4 million interest incurred on a corporate acquisition indebtedness is subject to disallowance under section 279(a) for the taxable year 1970.

Example 4. Assume the same facts as in *Example (3)*. Assume further that on the last day of each of the taxable years 1971, 1972, and 1973 of X Corporation neither of the conditions described in section 279(b)(4) was present.

Under these circumstances, such obligations for all taxable years after 1973 are not corporate acquisition indebtedness under section 279(d)(4). Therefore, the $2.5 million of interest previously not deductible is not deductible for all taxable years after 1973. Although such obligations are no longer treated as corporate acquisition indebtedness, the interest attributable thereto must be applied in further reduction of the $5 million limitation. The $5 million limitation of section 279(a)(1) is therefore reduced to zero. While the limitation is at the zero level any interest paid or incurred on corporate acquisition indebtedness will be disallowed.

[T.D. 7262, 38 FR 5844, Mar. 5, 1973]

§1.279–3 Corporate acquisition indebtedness.

(a) *Corporate acquisition indebtedness.* For purposes of section 279, the term *corporate acquisition indebtedness* means any obligation evidenced by a bond, debenture, note, or certificate or other evidence of indebtedness issued after October 9, 1969, by a corporation (referred to in section 279 and the regulations thereunder as ‘‘issuing corporation’’) if the obligation is issued to provide consideration directly or indirectly for the acquisition of stock in, or certain assets of, another corporation (as described in paragraph (b) of this §1.279–3), is ‘‘subordinated’’ (as described in paragraph (c) of this §1.279–3), is ‘‘convertible’’ (as described in paragraph (d) of this §1.279–3), and satisfies either the ratio of debt to equity test (as described in paragraph (f) of §1.279–5) or the projected earnings test (as described in paragraph (d) of §1.279–5).

(b) *Acquisition of stock or assets.* (1) Section 279(b)(1) describes one of the tests to be satisfied if an obligation is to be classified as corporate acquisition indebtedness. Under section 279(b)(1), the obligation must be issued to provide consideration directly or indirectly for the acquisition of:

(i) Stock (whether voting or nonvoting) in another corporation (referred to in section 279 and the regulations thereunder as ‘‘acquired corporation’’), or

(ii) Assets of another corporation (referred to in section 279 and the regulations thereunder as ‘‘acquired corporation’’) pursuant to a plan under which at least two-thirds (in value) of all the assets (excluding money) used in trades or businesses carried on by such corporation are acquired.

The fact that the corporation that issues the obligation is not the same corporation that acquires the acquired corporation does not prevent the application of section 279. For example, if X Corporation acquires all the stock of Y Corporation through the utilization of an obligation of Z Corporation, a wholly owned subsidiary of X Corporation, this section will apply.

(2) *Direct or indirect consideration.* Obligations are issued to provide direct consideration for an acquisition within the meaning of section 279(b)(1) where the obligations are issued to the shareholders of an acquired corporation in exchange for stock in such acquired corporation or where the obligations are issued to the acquired corporation in exchange for its assets. The application of the provisions of this subsection relating to indirect consideration for an acquisition of stock or assets depends upon the facts and circumstances surrounding the acquisition and the issuance of the obligations. Obligations are issued to provide indirect consideration for an acquisition of stock or assets within the meaning of section 279(b)(1) where (i) at the time of the issuance of the obligations the issuing corporation anticipated the acquisition of such stock or assets and the obligations would not have been issued if the issuing corporation had not so anticipated such acquisition, or where (ii) at

the time of the acquisition the issuing corporation foresaw or reasonably should have foreseen that it would be required to issue obligations, which it would not have otherwise been required to issue if the acquisition had not occurred, in order to meet its future economic needs.

(3) *Stock acquisition.* (i) For purposes of section 279, an acquisition in which the issuing corporation issues an obligation to provide consideration directly or indirectly for the acquisition of stock in the acquired corporation shall be treated as a stock acquisition within the meaning of section 279(b)(1)(A). Where the stock of one corporation is acquired from another corporation and such stock constitutes at least two-thirds (in value) of all the assets (excluding money) of the latter corporation, such acquisition shall be deemed an asset acquisition as described in section 279(b)(1)(B) and subparagraph (4) of this section. If the issuing corporation acquires less than two-thirds (in value) of all the assets (excluding money) used in trades or businesses carried on by the acquired corporation within the meaning of section 279(b)(1)(B) and subparagraph (4) of this paragraph and such assets include stock of another corporation, the acquisition of such stock is a stock acquisition within the meaning of section 279(b)(1)(A) and of this subparagraph. In such a case the amount of the obligation which is characterized as corporate acquisition indebtedness shall bear the same relationship to the total amount of the obligation issued as the fair market value of the stock acquired bears to the total of the fair market value of the assets acquired and stock acquired, as of the date of acquisition. For rules with respect to acquisitions of stock, where the total amount of stock of the acquired corporation held by the issuing corporation never exceeded 5 percent of the total combined voting power of all classes of stock of the acquired corporation entitled to vote, see § 1.279–4(b)(1).

(ii) If the issuing corporation acquired stock of an acquired corporation in an acquisition described in section 279(b)(1)(A), and liquidated the acquired corporation under section 334(b)(2) and the regulations thereunder before the last day of the taxable year in which such stock acquisition is made, such obligation issued to provide consideration directly or indirectly to acquire such stock of the acquired corporation shall be considered as issued in an acquisition described in section 279(b)(1)(B).

(4) *Asset acquisition.* (i) For purposes of section 279, an acquisition in which the issuing corporation issues an obligation to provide consideration directly or indirectly for the acquisition of assets of an acquired corporation pursuant to a plan under which at least two-thirds of the gross value of all the assets (excluding money) used in trades and businesses carried on by such acquired corporation are acquired shall be treated as an asset acquisition within the meaning of section 279(b)(1)(B). For purposes of section 279(b)(1)(B), the gross value of any acquired asset shall be its fair market value as of the day of its acquisition. In determining the fair market value of an asset, no reduction shall be made for any liabilities, mortgages, liens, or other encumbrances to which the asset or any part thereof may be subjected. For purposes of this subparagraph, an asset which has been actually used in the trades and businesses of a corporation but which is temporarily not being used in such trades and businesses shall be treated as if it is being used in such manner. For purposes of this paragraph, the day of acquisition will be determined by reference to the facts and circumstances surrounding the transaction.

(ii) For purposes of the two-thirds test described in section 279(b)(1)(B), the stock of any corporation which is controlled by the acquired corporation shall be considered as an asset used in the trades and businesses of such acquired corporation.

(5) *Certain nontaxable transactions.* (i) Under section 279(e), an acquisition of stock of a corporation of which the issuing corporation is in control in a transaction in which gain or loss is not recognized shall be deemed an acquisition described in section 279(b)(1)(A) only if immediately before such transaction the acquired corporation was in existence, and the issuing corporation was not in control of such corporation.

If the issuing corporation is a member of an affiliated group, then in accordance with section 279(g), the affiliated group shall be treated as the issuing corporation. Thus, any stock of the acquired corporation, owned by members of the affiliated group, shall be aggregated in determining whether the issuing corporation was in control of the acquired corporation.

(ii) The $5 million limitation provided by section 279(a)(1) is not reduced by the interest on an obligation issued in a transaction which, under section 279 (e), is deemed not to be an acquisition described in section 279(b)(1).

(iii) The provisions of this subparagraph may be illustrated by the following examples:

Example 1. On January 1, 1973, W Corporation, a calendar year taxpayer, issues to the public 10,000 10 year convertible bonds each with a principal of $1,000 for $9 million. On June 6, 1973, W Corporation transfers the $9 million proceeds of such bond issue to X Corporation in exchange for X Corporation's common stock in a transaction that satisfies the provisions of section 351(a). On December 31, 1973, W Corporation's ratio of debt to equity is 1 1/2 to 1 and its project earnings exceed three times the annual interest to be paid or incurred. Immediately prior to the transaction between the two corporations W Corporation owned no stock in X Corporation which had been in existence for several years. However, immediately after this transaction W Corporation is in control of X Corporation. Since X Corporation, the acquired corporation, was in existence and W Corporation, the issuing corporation, was not in control of X Corporation immediately before the section 351 transaction (a transaction in which gain or loss is not recognized) and since W Corporation is now in control of X Corporation, the acquisition of X Corporation's common stock by W Corporation is not protected from treatment as an acquisition described in section 279(b)(1)(A). However, the obligation will not be deemed to be corporate acquisition indebtedness since the test of section 279(b)(4) is not met. The interest on the obligation will reduce the $5 million limitation of section 279(a).

Example 2. Assume the facts are the same as described in *Example (1)*, except that X Corporation was not in existence prior to June 6, 1973, but rather is newly created by W Corporation on such date. Since X Corporation, the acquired corporation, was not in existence before June 6, 1973, the date on which W Corporation, the issuing corporation, acquired control of X Corporation in a transaction on which gain or loss is not recognized, the acquisition is not deemed to be an acquisition described in section 279(b)(1)(A). Thus, under the provisions of subdivision (ii) of this subparagraph, the $5 million limitation provided by section 279(a)(1) will not be reduced by the yearly interest incurred on the convertible bonds issued by W Corporation.

Example 3. Assume that the facts are the same as described in *Example (1)*, except that W Corporation was in control of X Corporation immediately before the transaction. Since W Corporation was in control of X Corporation immediately before the section 351(a) transaction and is in control of X Corporation after such transaction, the result will be the same as in *Example (2)*.

(c) *Subordinated obligation*—(1) *In general.* An obligation which is issued to provide consideration for an acquisition described in section 279(b)(1) is subordinated within the meaning of section 279(b)(2) if it is either:

(i) Subordinated to the claims of trade creditors of the issuing corporation generally, or

(ii) Expressly subordinated in right of payment to the payment of any substantial amount of unsecured indebtedness, whether outstanding or subsequently issued, of the issuing corporation, irrespective of whether such subordination relates to payment of interest, or principal, or both. In applying section 279 (b)(2) and this paragraph in any case where the issuing corporation is a member of an affiliated group of corporations, the affiliated group shall be treated as the issuing corporation.

(2) *Expressly subordinated obligation.* In applying subparagraph (1)(ii) of this paragraph, an obligation is considered expressly subordinated whether the terms of the subordination are provided in the evidence of indebtedness itself, or in another agreement between the parties to such obligation. An obligation shall be considered to be expressly subordinated within the meaning of subparagraph (1)(ii) of this paragraph if such obligation by its terms can become subordinated in right of payment to the payment of any substantial amount of unsecured indebtedness which is outstanding or which may be issued subsequently. However, an obligation shall not be considered expressly subordinated if such subordination occurs solely by operation of law, such as in the case of bankruptcy laws. For purposes of this paragraph,

the term *substantial amount of unsecured indebtedness* means an amount of unsecured indebtedness equal to 5 percent or more of the face amount of the obligations issued within the meaning of section 279(b)(1).

(d) *Convertible obligation.* An obligation which is issued to provide consideration directly or indirectly for an acquisition described in section 279 (b)(1) is convertible within the meaning of section 279(b)(3) if it is either— (1) Convertible directly or indirectly into stock of the issuing corporation, or (2) Part of an investment unit or other arrangement which includes, in addition to such bond or other evidence of indebtedness, an option to acquire directly or indirectly stock in the issuing corporation. Stock warrants or convertible preferred stock included as part of an investment unit constitute options within the meaning of the preceding sentence. Indebtedness is indirectly convertible if the conversion feature gives the holder the right to convert into another bond of the issuing corporation which is then convertible into the stock of the issuing corporation. In any case where the corporation which in fact issues an obligation to provide consideration for an acquisition described in section 279(b)(1) is a member of an affiliated group, the provisions of section 279(b)(3) and this paragraph are deemed satisfied if the stock into which either the obligation or option which is part of an investment unit or other arrangement is convertible, directly or indirectly, is stock of any member of the affiliated group.

(e) *Ratio of debt to equity and projected earnings test.* For rules with respect to the application of section 279(b)(4) (relating to the ratio of debt to equity and the ratio of projected earnings to annual interest to be paid or incurred), see paragraphs (d), (e), and (f) of § 1.279–5.

(f) *Certain obligations issued after October 9, 1969*—(1) *In general.* Under section 279(i), an obligation shall not be corporate acquisition indebtedness if such obligation is issued after October 9, 1969, to provide consideration for the acquisition of:

(i) Stock or assets pursuant to a binding written contract which was in effect on October 9, 1969, and at all times thereafter before such acquisition, or

(ii) Stock in any corporation where the issuing corporation, on October 9, 1969, and at all times thereafter before such acquisition, owned at least 50 percent of the total combined voting power of all classes of stock entitled to vote of the acquired corporation.

Subdivision (ii) of this subparagraph shall cease to apply when (at any time on or after October 9, 1969) the issuing corporation has acquired control of the acquired corporation. The interest attributable to any obligation which satisfies the conditions stated in the first sentence of this subparagraph shall reduce the $5 million limitation of section 279(a)(1).

(2) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. On September 5, 1969, M Corporation, a calendar year taxpayer, entered into a binding written contract with N Corporation to purchase 20 percent of the voting stock of N Corporation. The contract was in effect on October 9, 1969, and at all times thereafter before the acquisition of the stock on January 1, 1970. Pursuant to such contract M Corporation issued on January 1, 1970, to N Corporation an obligation which satisfies the tests of section 279(b) requiring it to pay $1 million of interest each year. However, under the provisions of subparagraph (1)(i) of this paragraph, such obligation is not corporate acquisition indebtedness since it was issued to provide consideration for the acquisition of stock pursuant to a binding written contract which was in effect on October 9, 1969, and at all times thereafter before such acquisition. The $1 million of yearly interest on the obligation reduces the $5 million limitation provided for in section 279(a)(1) to $4 million since such interest is attributable to an obligation which was issued to provide consideration for the acquisition of stock in an acquired corporation.

Example 2. On October 9, 1969, O Corporation, a calendar year taxpayer, owned 50 percent of the total combined voting power of all classes of stock entitled to vote of P Corporation. P Corporation has no other class of stock. On January 1, 1970, while still owning such voting stock O Corporation issued to the shareholders of P Corporation to provide consideration for an additional 40 percent of P Corporation's voting stock an obligation which satisfied the tests of section 279(b) requiring it to pay $4 million of interest each year. Hence, O Corporation acquired control of P Corporation, and the provisions of subparagraph (1)(ii) of this paragraph ceased to apply to O Corporation. Thus, 75 percent of the obligation issued by O Corporation to provide consideration for the stock of P Corporation is not corporate acquisition indebtedness (that is, of the 40 percent of the voting stock of P Corporation which was acquired, only 30 percent was needed to give O Corporation control). Since 25 percent of the obligation is corporate acquisition indebtedness, $1 million of interest attributable to such obligation is subject to disallowance under section 279(a) for the taxable year 1970. The remaining $3 million of interest attributable to the obligation will reduce the $5 million limitation provided by in section 279(a)(1).

(g) *Exemptions for certain acquisitions of foreign corporations*—(1) *In general.* Under section 279(f), the term *corporate acquisition indebtedness* does not include any indebtedness issued to any person to provide consideration directly or indirectly for the acquisition of stock in, or assets of, any foreign corporation substantially all the income of which, for the 3-year period ending with the date of such acquisition or for such part of such period as the foreign corporation was in existence, is from sources without the United States. The interest attributable to any obligation excluded from treatment as corporate acquisition indebtedness by reason of this paragraph shall reduce the $5 million limitation of 279(a)(1).

(2) *Foreign corporation.* For purposes of this paragraph, the term *foreign corporation* shall have the same meaning as in section 7701(a)(5).

(3) *Income from sources without the United States.* For purposes of this paragraph, the term *income from sources without the United States* shall be determined in accordance with sections 862 and 863. If more than 80 percent of a foreign corporation's gross income is derived from sources without the United States, such corporation shall be considered to be deriving substantially all of its income from sources without the United States.

[T.D. 7262, 38 FR 5845, Mar. 5, 1973]

§1.279–4 Special rules.

(a) *Special 3-year rule.* Under section 279(d)(4), if an obligation which has been deemed to be corporate acquisition indebtedness for any taxable year would not be such indebtedness for each of any 3 consecutive taxable years thereafter if the ratio of debt to equity and the ratio of projected earnings to annual interest to be paid or incurred of section 279 (b)(4) were applied as of the close of each of such 3 years, then such obligation shall not be corporate acquisition indebtedness for any taxable years after such 3 consecutive taxable years. The test prescribed by section 279(b)(4) shall be applied as of the close of any taxable year whether or not the issuing corporation issues any obligation to provide consideration for an acquisition described in section 279(b)(1) in such taxable year. Thus, for example, if a corporation, reporting income on a calendar year basis, has an obligation outstanding as of December 31, 1975, which was classified as a corporate acquisition indebtedness as of the close of 1972 and such obligation would not have been classified as corporate acquisition indebtedness as of the close of 1973, 1974, and 1975 because neither of the conditions of section 279(b)(4) were present as of such dates, then such obligation shall not be corporate acquisition indebtedness for 1976 and all taxable years thereafter. Such obligation shall not be reclassified as corporate acquisition indebtedness in any taxable year following 1975, even if the issuing corporation issues more obligations (whether or not found to be corporate acquisition indebtedness) in such later years to provide consideration for the acquisition of additional stock in, or assets of, the same acquired corporation with respect to which the original obligation was issued. The interest attributable to such obligation shall reduce the $5 million limitation provided by section 279(a)(1) for 1976 and all taxable years thereafter.

(b) *Five percent stock rule*—(1) *In general.* Under section 279(d)(5), if an obligation issued to provide consideration for an acquisition of stock in another corporation meets the tests of section 279(b), such obligation shall be corporate acquisition indebtedness for a taxable year only if at sometime after October 9, 1969, and before the close of such year the issuing corporation owns or has owned 5 percent or more of the total combined voting power of all classes of stock entitled to vote in the acquired corporation. If the issuing corporation is a member of an affiliated group, then in accordance with section 279(g) the affiliated group shall be treated as the issuing corporation. Thus, any stock of the acquired corporation owned by members of the affiliated group shall be aggregated to determine if the percentage limitation provided by this subparagraph is exceeded. Once an obligation is deemed to be corporate acquisition indebtedness such obligation will continue to be deemed corporate acquisition indebtedness for all taxable years thereafter unless the provisions of section 279(d) (3) or (4) apply, notwithstanding the fact that the issuing corporation owns less than 5 percent of the combined voting power of all classes of stock entitled to vote of the acquired corporation in any or all taxable years thereafter.

(2) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. Corporation Y uses the calendar year as its taxable year and has only one class of stock outstanding. On June 1, 1972, X Corporation which is also a calendar year taxpayer and which has never been a shareholder of Y Corporation acquires from the shareholders of Y Corporation 4 percent of the stock of Y Corporation in exchange for obligations which satisfy the conditions of section 279(b). At no time during 1972 does X Corporation own 5 percent or more of the stock of Y Corporation. Accordingly, under the provisions of subparagraph (1) of this paragraph, for 1972 the obligations issued by X Corporation to provide consideration for the acquisition of Y Corporation's stock do not constitute corporate acquisition indebtedness.

Example 2. Assume the same facts as in *Example (1).* Assume further that on February 24, 1973, X Corporation acquires from the shareholders of Y Corporation an additional 7 percent of the stock of Y Corporation in exchange for obligations which satisfy all of the tests of section 279(b). On December 28, 1973, X Corporation sells all of its stock in Y Corporation. For 1973, the obligations issued by X Corporation in 1972 and in 1973 constitute corporate acquisition indebtedness since X Corporation at some time after October 9, 1969, and before the close of 1973 owned 5 percent or more of the voting stock of Y Corporation. Furthermore, such obligations shall be corporate acquisition indebtedness for all taxable years thereafter unless the special provisions of section 279(d) (3) or (4) could apply.

(c) *Changes in obligation*—(1) *In general.* Under section 279(h), for purposes of section 279:

(i) Any extension, renewal, or refinancing of an obligation evidencing a preexisting indebtedness shall not be deemed to be the issuance of a new obligation, and

(ii) Any obligation which is corporate acquisition indebtedness of the issuing corporation is also corporate acquisition indebtedness of any corporation which in any transaction or by operation of law assumes liability for such obligation or becomes liable for such obligation as guarantor, endorser, or indemnitor.

(2) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. On January 1, 1971, X Corporation, which files its return on the basis of a calendar year, issues an obligation, which satisfies the tests of section 279(b), and is deemed to be corporate acquisition indebtedness. On January 1, 1973, an agreement is concluded between X Corporation and the holder of the obligation whereby the maturity date of such obligation is extended until December 31, 1979. Under the provisions of subparagraph (1)(i) of this paragraph such extended obligation is not deemed to be a new obligation, and still constitutes corporate acquisition indebtedness.

Example 2. On June 12, 1971, X Corporation, a calendar year taxpayer, issued convertible and subordinated obligations to acquire the stock of Z Corporation. The obligations were deemed corporate acquisition indebtedness on December 31, 1971. On March 4, 1973, X Corporation and Y Corporation consolidated to form XY Corporation in accordance with State law. Corporation XY is liable for the obligations issued by X Corporation by operation of law and the obligations continue to be corporate acquisition indebtedness. In 1975 XY Corporation exchanges its own nonconvertible obligations for the obligations X Corporation issued. The obligations of XY Corporation issued in exchange for those of X Corporation will be deemed to be corporate acquisition indebtedness.

[T.D. 7262, 38 FR 5847, Mar. 5, 1973; 38 FR 6893, Mar. 14, 1973]

§ 1.279–5 Rules for application of section 279(b).

(a) *Taxable years to which applicable*—(1) *First year of disallowance.* Under section 279(d)(1), the deduction of interest on any obligation shall not be disallowed under section 279(a) before the first taxable year of the issuing corporation as of the last day of which the application of either section 279(b)(4) (A) or (B) results in such obligation being classified as corporate acquisition indebtedness. See section 279(c)(1) and paragraph (b)(2) of this section for the time when an obligation is subjected to the test of section 279(b)(4).

(2) *General rule for succeeding years.* Under section 279(d)(2), except as provided in paragraphs (3), (4), and (5) of section 279(d), if an obligation is determined to be corporate acquisition indebtedness as of the last day of any taxable year of the issuing corporation, such obligation shall be corporate acquisition indebtedness for such taxable year and all subsequent taxable years.

(b) *Time of determination*—(1) *In general.* The determination of whether an obligation meets the conditions of section 279(b) (1), (2), and (3) shall be made as of the day on which the obligation is issued.

(2) *Ratio of debt to equity, projected earnings, and annual interest to be paid or incurred.* (i) Under section 279(c)(1), the determination of whether an obligation meets the conditions of section 279(b)(4) is first to be made as of the last day of the taxable year of the issuing corporation in which it issues the obligation to provide consideration directly or indirectly for an acquisition described in section 279(b)(1) of stock in, or assets of, the acquired corporation. An obligation which is not corporate acquisition indebtedness only because it does not satisfy the test of section 279(b)(4) in the taxable year of the issuing corporation in which the obligation is issued for stock in, or assets of, the acquired corporation may be subjected to the test of section 279(b)(4) again. A retesting will occur in any subsequent taxable year of the issuing corporation in which the issuing corporation issues any obligation to provide consideration directly or indirectly for an acquisition described in section 279(b)(1) with respect to the same acquired corporation, irrespective of whether such subsequent obligation is itself classified as corporate acquisition indebtedness. If the issuing corporation is a member of an affiliated group, then in accordance with section 279(g) the affiliated group shall be treated as the issuing corporation. Thus, if any member of the affiliated group issues an obligation to acquire additional stock in, or assets of, the acquired corporation, this paragraph shall apply.

(ii) For purposes of section 279(b)(4) and this paragraph, in any case where the issuing corporation is a member of an affiliated group (see section 279(g) and §1.279–6 for rules regarding application of section 279 to certain affiliated groups) which does not file a consolidated return and all the members of which do not have the same taxable year, determinations with respect to the ratio of debt to equity of, and projected earnings of, and annual interest to be paid or incurred by, any member of the affiliated group shall be made as of the last day of the taxable year of the corporation which in fact issues the obligation to provide consideration for an acquisition described in section 279(b)(1).

(3) *Redetermination where control or substantially all the properties have been acquired.* Under section 279(d)(3), if an obligation is determined to be corporate acquisition indebtedness as of the close of a taxable year of the issuing corporation in which section 279(c)(3)(A)(i) (relating to the projected earnings of the issuing corporation only) applied, but would not be corporate acquisition indebtedness if the determination were made as of the close of the first taxable year of such corporation thereafter in which section 279(c)(3)(A)(ii) (relating to the projected earnings of both the issuing corporation and the acquired corporation) could apply, such obligation shall be considered not to be corporate acquisition indebtedness for such later taxable year and all taxable years thereafter. Where an obligation ceases to be corporate acquisition indebtedness as a result of the application of this paragraph, the interest on such obligation shall not be disallowed under section 279(a) as a deduction for the taxable year in which the obligation ceases to be corporate acquisition indebtedness and all taxable years thereafter. However, under section 279(a)(2) the interest paid or incurred on such obligation

which is allowed as a deduction will reduce the $5 million limitation provided by section 279(a)(1).

(4) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. In 1971, X Corporation, which files its Federal income tax return on the basis of a calendar year, issues its obligations to provide consideration for the acquisition of 15 percent of the voting stock of both Y Corporation and Z Corporation. Y Corporation and Z Corporation each have only one class of stock. When issued, such obligations satisfied the tests prescribed in section 279(b) (1), (2), and (3) and would have constituted corporate acquisition indebtedness but for the test prescribed in section 279(b)(4). On December 31, 1971, the application of section 279(b)(4) results in X Corporation's obligations issued in 1971 not being treated as corporate acquisition indebtedness for that year.

Example 2. Assume the same facts as in *Example (1),* except that in 1972, X Corporation issues more obligations which come within the tests of section 279(b) (1), (2), and (3) to acquire an additional 10 percent of the voting stock of Y Corporation. No stock of Z Corporation is acquired after 1971. The application of section 279(b)(4)(B) (relating to the projected earnings of X Corporation) as of the end of 1972 results in the obligations issued in 1972 to provide consideration for the acquisition of the stock of Y Corporation being treated as corporate acquisition indebtedness. Since X Corporation during 1972 did issue obligations to acquire more stock of Y Corporation, under the provisions of section 279(c)(1) and subparagraph (2) of this paragraph the obligations issued by X Corporation in 1971 to acquire stock in Y Corporation are again tested to determine whether the test of section 279(b)(4) with respect to such obligations is satisfied for 1972. Thus, since such obligations issued by X Corporation to acquire Y Corporation's stock in 1971 previously came within the provisions of section 279(b) (1), (2), and (3) and the projected earnings test of section 279(b)(4)(B) is satisfied for 1972, all of such obligations are to be deemed to constitute corporate acquisition indebtedness for 1972 and subsequent taxable years. The obligations issued in 1971 to acquire stock in Z Corporation continue not to constitute corporate acquisition indebtedness.

Example 3. Assume the same facts as in *Examples (1)* and *(2).* In 1973, X Corporation issues more obligations which come within the tests of section 279(b) (1), (2), and (3) to acquire more stock (but not control) in Y Corporation. On December 31, 1973, it is determined with respect to X Corporation that neither of the conditions described in section 279(b)(4) are present. Thus, the obligations issued in 1973 do not constitute corporate acquisition indebtedness. However, the obligations issued in 1971 and 1972 by X Corporation to acquire stock in Y Corporation continue to be treated as corporate acquisition indebtedness.

Example 4. Assume the same facts as in *Example (3),* except that X Corporation acquires control of Y Corporation in 1973. Since X Corporation has acquired control of Y Corporation, the average annual earnings (as defined in section 279(c)(3)(B) and the annual interest to be paid or incurred (as provided by section 279(c)(4)) of both X Corporation and Y Corporation under section 279(c)(3)(A)(ii) are taken into account in computing for 1973 the ratio of projected earnings to annual interest to be paid or incurred described in section 279(b)(4)(B). Assume further that after applying section 279(b)(4)(B) the obligations issued in 1973 escape treatment as corporate acquisition indebtedness for 1973. Under section 279(d)(3), all of the obligations issued by X Corporation to acquire stock in Y Corporation in 1971 and 1972 are removed from classification as corporate acquisition indebtedness for 1973 and all subsequent taxable years.

Example 5. In 1975, M Corporation, which files its Federal income tax return on the basis of a calendar year, issues its obligations to acquire 30 percent of the voting stock of N Corporation. N Corporation has only one class of stock. Such obligations satisfy the tests prescribed in section 279(b) (1), (2), and (3). Additionally, as of the close of 1975, M Corporation's ratio of debt to equity exceeds the ratio of 2 to 1 and its projected earnings do not exceed three times the annual interest to be paid or incurred. The obligations issued by M Corporation are corporate acquisition indebtedness for 1975 since all the provisions of section 279(b) are satisfied. In 1976 M Corporation issues its obligations to acquire from the shareholders of N Corporation an additional 60 percent of the voting stock of N Corporation, thereby acquiring control of N Corporation. However, with respect to the obligations issued by M Corporation in 1975, there is no redetermination under section 279(d)(3) and subparagraph (3) of this paragraph as to whether such obligations may escape classification as corporate acquisition indebtedness because in 1975 it was the ratio of debt to equity test which caused such obligations to be corporate acquisition indebtedness. If in 1975, M Corporation met the conditions of section 279(b)(4) solely because of the ratio of projected earnings to annual interest to be paid or incurred described in section 279(b)(4)(B), its obligation issued in 1975 could be retested in 1976.

(c) *Acquisition of stock or assets of several corporations.* An issuing corporation which acquires stock in, or assets of, more than one corporation during any taxable year must apply the tests described in section 279(b) (1), (2), and (3) separately with respect to each obligation issued to provide consideration for the acquisition of the stock in, or assets of, each such acquired corporation. Thus, if an acquisition is made with obligations of the issuing corporation that satisfy the tests described in section 279(b) (2) and (3) and obligations that fail to satisfy such tests, only those obligations satisfying such tests need be further considered to determine whether they constitute corporate acquisition indebtedness. Those obligations which meet the test of section 279(b)(1) but which are not deemed corporate acquisition indebtedness shall be taken into account for purposes of determining the reduction in the $5 million limitation of section 279(a)(1).

(d) *Ratio of debt to equity and projected earnings*—(1) *In general.* One of the four tests to determine whether an obligation constitutes corporate acquisition indebtedness is contained in section 279(b)(4). An obligation will meet the test of section 279(b)(4) if, as of a day determined under section 279(c)(1) and paragraph (b)(2) of this section, either:

(i) The ratio of debt to equity (as defined in paragraph (f) of this section) of the issuing corporation exceeds 2 to 1, or

(ii) The projected earnings (as defined in subparagraph (2) of this paragraph) of the issuing corporation, or of both the issuing corporation and acquired corporation in any case where subparagraph (2)(ii) of this paragraph is applicable, do not exceed three times the annual interest to be paid or incurred (as defined in paragraph (e) of this section) by such issuing corporation, or, where applicable, by such issuing corporation and acquired corporation. Where paragraphs (d)(2)(ii) and (e)(1)(ii) of this section are applicable in computing projected earnings and annual interest to be paid or incurred, 100 percent of the acquired corporation's projected earnings and annual interest to be paid or incurred shall be included in such computation, even though less than all of the stock or assets of the acquired corporation have been acquired.

(2) *Projected earnings.* The term *projected earnings* means the ‘‘average annual earnings’’ (as defined in subparagraph (3) of this paragraph) of:

(i) The issuing corporation only, if subdivision (ii) of this subparagraph, does not apply, or

(ii) Both the issuing corporation and the acquired corporation, in any case where the issuing corporation as of the close of its taxable year has acquired control, or has acquired substantially all of the properties, of the acquired corporation.

For purposes of subdivision (ii) of this subparagraph, an acquisition of ‘‘substantially all of the properties’’ of the acquired corporation means the acquisition of assets representing at least 90 percent of the fair market value of the net assets and at least 70 percent of the fair market value of the gross assets held by the acquired corporation immediately prior to the acquisition.

(3) *Average annual earnings.* (i) The term *average annual earnings* referred to in subparagraph (2) of this paragraph is, for any corporation, the amount of its earnings and profits for any 3-year period ending with the last day of a taxable year of the issuing corporation in which it issues any obligation to provide consideration for an acquisition described in section 279(b)(1), computed without reduction for:

(*a*) Interest paid or incurred,

(*b*) Depreciation or amortization allowed under Chapter 1 of the Code,

(*c*) Liability for tax under Chapter 1 of the Code, and

(*d*) Distributions to which section 301(c)(1) apply (other than such distributions from the acquired corporation to the issuing corporation), and reduced to an annual average for such 3-year period. For the rules to determine the amount of earnings and profits of any corporation, see section 312 and the regulations thereunder.

(ii) Except as provided for in subdivision (iii) of this subparagraph, for purposes of subdivision (i) of this subparagraph in the case of any corporation, the earnings and profits for such 3-year period shall be reduced to an annual average by dividing such earnings and profits by 36 and multiplying the quotient by 12. If a corporation was not in existence during the entire 36-month period as of the close of the taxable year referred to in subdivision (i) of this subparagraph, its average annual earnings shall be determined by dividing its earnings and profits for the period of its existence by the number of whole calendar months in such period and multiplying the quotient by 12.

(iii) Where the issuing corporation acquires substantially all of the properties of an acquired corporation, the computation of earnings and profits of such acquired corporation shall be made for the period of such corporation beginning with the first day of the 3-year period of the issuing corporation and ending with the last day prior to the date on which substantially all of the properties were acquired. In determining the number of whole calendar months for such acquired corporation where the period for determining its earnings and profits includes 2 months which are not whole calendar months and the total number of days in such 2 fractional months exceeds 30 days, the number of whole calendar months for such period shall be increased by one. Where the number of days in the 2 fractional months total 30 days or less such fractional months shall be disregarded. After the number of whole calendar months is determined, the calculation for average annual earnings shall be made in the same manner as described in the last sentence of subdivision (ii) of this subparagraph.

(e) *Annual interest to be paid or incurred*—(1) *In general.* For purposes of section 279(b)(4)(B), the term *annual interest to be paid or incurred* means:

(i) If subdivision (ii) of this subparagraph does not apply, the annual interest to be paid or incurred by the issuing corporation only, for the taxable year beginning immediately after the day described in section 279(c)(1), determined by reference to its total indebtedness outstanding as of such day, or

(ii) If projected earnings are determined under paragraph (d)(2)(ii) of this section, the annual interest to be paid or incurred by both the issuing corporation and the acquired corporation for 1 year beginning immediately after the day described in section 279(c)(1), determined by reference to their combined total indebtedness outstanding as of such day. However, where the issuing corporation acquires substantially all of the properties of the acquired corporation, the annual interest to be paid or incurred will be determined by reference to the total indebtedness outstanding of the issuing corporation only (including any indebtedness it assumed in the acquisition) as of the day described in section 279(c)(1).

The term *annual interest to be paid or incurred* refers to both actual interest and unstated interest. Such unstated interest includes original issue discount as defined in paragraph (a)(1) of § 1.163–4 and amounts treated as interest under section 483. For purposes of this paragraph and paragraph (f) of this section (relating to the ratio of debt to equity), the indebtedness of any corporation shall be determined in accordance with generally accepted accounting principles. Thus, for example, the indebtedness of a corporation includes short-term liabilities, such as accounts payable to suppliers, as well as long-term indebtedness. Contingent liabilities, such as those arising out of discounted notes, the assignment of accounts receivable, or the guarantee of the liability of another, shall be included in the determination of the indebtedness of a corporation if the contingency is likely to become a reality. In addition, the indebtedness of a corporation includes obligations issued by the corporation, secured only by property of the corporation, and with respect to which the corporation is not personally liable. See section 279(g) and § 1.279–6 for rules with respect to the computation of annual interest to be paid or incurred in regard to members of an affiliated group of corporations.

(2) *Examples.* The provisions of these paragraphs may be illustrated by the following examples:

Example 1. Corporation X's earnings and profits calculated in accordance with section 279(c)(3)(B) for 1972, 1971, and 1970 respectively were $29 million, $23 million, and $20 million. The interest to be paid or incurred during the calendar year of 1973 as determined by reference to the issuing corporation's total outstanding indebtedness as of December 31, 1972, was $10 million. By dividing the sum of the earnings and profits for the 3 years by 36 (the number of whole calendar months in the 3-year period) and multiplying the quotient by 12, the average annual earnings for X Corporation is $24 million. Since the projected earnings of X Corporation do not exceed by three times the annual interest to be paid or incurred (they exceed by only 2.4 times), one of the circumstances described in section 279(b)(4) is present.

Example 2. On March 1, 1972, W Corporation acquires substantially all of the properties of Z Corporation in exchange for W Corporation's bonds which satisfy the tests of section 279(b) (2) and (3). W Corporation files its income tax returns on the basis of fiscal years ending June 30. Z Corporation, which was formed on September 1, 1969, is a calendar year taxpayer. The earnings and profits of W Corporation for the last 3 fiscal years ending June 30, 1972, calculated in accordance with the provisions of section 279(c)(3)(B) were $300 million, $400 million, and $380 million, respectively. The average annual earnings of W Corporation is $360 million ($1,080 million ÷ 36×12). The earnings and profits of Z Corporation calculated in accordance with the provisions of section 279(c)(3)(B) were $4 million for the period of September 1, 1969 to December 31, 1969, $10 million and $14 million for the calendar years of 1970 and 1971, respectively, and $2 million for the period of January 1, 1972, through February 29, 1972, or a total of $30 million. To arrive at the average annual earnings, the sum of the earnings and profits, $30 million, must be divided by 30 (the number of whole calendar months that Z Corporation was in existence during W Corporation's 3-year period ending with the day prior to the date substantially all the assets were acquired) and the quotient is multiplied by 12, which results in an average annual earnings of $12 million ($30 million÷30×12) for Z Corporation. The combined average annual earnings of W Corporation and Z Corporation is $372 million. The interest for the fiscal year ending June 30, 1973, to be paid or incurred by W Corporation on its outstanding indebtedness as of June 30, 1972, is $110 million. Since the projected earnings exceed the annual interest to be paid or incurred by more than three times, the obligation will not be corporate acquisition indebtedness, unless the issuing corporation's debt to equity ratio exceeds 2 to 1.

(f) *Ratio of debt to equity*—(1) *In general.* The condition described in section 279(b)(4)(A) is present if the ratio of debt to equity of the issuing corporation exceeds 2 to 1. Under section 279(c)(2), the term *ratio of debt to equity* means the ratio which the total indebtedness of the issuing corporation bears to the sum of its money and all its other assets (in an amount equal to adjusted basis for determining gain) less such total indebtedness. For the meaning of the term *indebtedness,* see paragraph (e)(1) of this section. See section 279(g) and §1.279–6 for rules with respect to the computation of the ratio of debt to equity in regard to an affiliated group of corporations.

(2) *Examples.* The provisions of section 279(b)(4)(A) and this paragraph may be illustrated by the following example:

[$5 million interest to be paid or incurred × $80 million owed to X Bank by its customers/ $100 million total indebtedness]

Example 1. On June 1, 1971, X Corporation, which files its federal income tax returns on a calendar year basis, issues an obligation for $45 million to the shareholders of Y Corporation to provide consideration for the acquisition of all of the stock of Y Corporation. Such obligation has the characteristics of corporate acquisition indebtedness described in section 279(b) (2) and (3). The projected earnings of X Corporation and Y Corporation exceed 3 times the annual interest to be paid or incurred by those corporations and, accordingly, the condition described in section 279(b)(4)(B) is not present. Also, on December 31, 1971, X Corporation has total assets with an adjusted basis of $150 million (including the newly acquired stock of Y Corporation having a basis of $45 million) and total indebtedness of $90 million. Hence, X Corporation's equity is $60 million computed by subtracting its $90 million of total indebtedness from its $150 million of total assets. Since X Corporation's ratio of debt to equity of 1.5 to 1 ($90 million of total indebtedness over $60 million equity) does not exceed 2 to 1, the condition described in section 279(b)(4)(A) is not present. Therefore, X Corporation's obligation for $45 million is not corporate acquisition indebtedness because on December 31, 1971, neither of the conditions specified in section 279(b)(4) existed.

(g) *Special rules for banks and lending or finance companies*—(1) *Debt to equity and projected earnings.* Under section 279(c)(5), with respect to any corporation which is a bank (as defined in section 581) or is primarily engaged in a lending or finance business, the following rules are to be applied:

(i) In determining under paragraph (f) of this section the ratio of debt to equity of such corporation (or of the affiliated group of which such corporation is a member), the total indebtedness of such corporation (and the assets of such corporation) shall be reduced by an amount equal to the total indebtedness owed to such corporation which arises out of the banking business of such corporation, or out of the lending or finance business of such corporation, as the case may be;

(ii) In determining under paragraph (e) of this section the annual interest to be paid or incurred by such corporation (or by the issuing corporation and acquired corporation referred to in section 279(c)(4)(B) or by the affiliated group of corporations of which such corporation is a member), the amount of such interest (determined without regard to this subparagraph) shall be reduced by an amount which bears the same ratio to the amount of such interest as the amount of the reduction for the taxable year under subdivision (i) of this subparagraph bears to the total indebtedness of such corporation; and

(iii) In determining under section 279(c)(3)(B) the average annual earnings, the amount of the earnings and profits for the 3-year period shall be reduced by the sum of the reductions under subdivision (ii) of this subparagraph for such period.

For purposes of this paragraph, the term *lending or finance business* means a business of making loans or purchasing or discounting accounts receivable, notes, or installment obligations. Additionally, the rules stated in this paragraph regarding the application of the ratio of debt to equity, the determination of the annual interest to be paid or incurred, and the determination of the average annual earnings also apply if the bank or lending or finance company is a member of an affiliated group of corporations. However, the rules are to be applied only for purposes of determining the debt, equity, projected earnings and annual interest of the bank or lending or finance company which then are taken into account in determining the debt to equity ratio and ratio of projected earnings to annual interest to be paid or incurred by the affiliated group as a whole. Thus, these rules are to be applied to reduce the bank's or lending or finance corporation's indebtedness, annual interest to be paid or incurred, and average annual earnings which are taken into account with respect to the group, but are not to reduce the indebtedness of, annual interest to be paid or incurred by, and average annual earnings of, any corporation in the affiliated group which is not a bank or a lending or finance company. In determining whether any corporation which is a member of an affiliated group is primarily engaged in a lending or finance business, only the activities of such corporation, and not those of the whole group, are to be taken into account. See § 1.279–6 for the application of section 279 to certain affiliated groups of corporations.

(2) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. As of the close of the taxable year, X Bank has a total indebtedness of $100 million, total assets of $115 million, and $80 million is owed to X Bank by its customers. Bank X's indebtedness is $20 million ($100 million total indebtedness less $80 million owed to the X Bank by its customers) and its assets are $35 million ($115 million total assets less $80 million owed to the bank by its customers). If its annual interest to be paid or incurred is $5 million, such amount is reduced by $4 million. Thus, X Bank's annual interest to be paid or incurred is $1 million.

Example 2. Assume the same facts as in *Example (1).* X Bank has earnings and profits of $23 million for the 3-year period used to determine projected earnings. In computing the average annual earnings, the $23 million amount will be reduced by $12 million (three times the $4 million reduction of interest in *Example (1),* assuming that the reduction was the same for each year). Thus X Bank's earnings and profits for such 3-year period are $11 million ($23 million total earnings and profits less $12 million reduction).

(h) *Statement to be attached to return.* In any case where any corporation claims a deduction in excess of $5 million for interest paid or incurred during the taxable year on obligations issued to provide consideration for acquisitions described in section 279(b)(1) of stock in, or assets of, an acquired corporation, the corporation shall attach to its return for such taxable year a statement which includes the particular provisions of section 279 and, in sufficient detail, the facts establishing that such obligations were not corporate acquisition indebtedness, or that the amount of the deduction for interest on its corporate acquisition indebtedness did not exceed the amount of interest which may be deducted on such obligations under section 279(a).

[T.D. 7262, 38 FR 5847, Mar. 7, 1973]

§1.279–6 Application of section 279 to certain affiliated groups.

(a) *In general.* Under section 279(g), in any case in which the issuing corporation is a member of an affiliated group, the application of section 279 shall be determined by treating all of the members of the affiliated group in the aggregate as the issuing corporation, except that the ratio of debt to equity of, projected earnings of, and the annual interest to be paid or incurred by any corporation (other than the issuing corporation determined without regard to this paragraph) shall be included in the determinations required under section 279(b)(4) as of any day only if such corporation is a member of the affiliated group on such day, and, in determining projected earnings of such corporation under section 279(c)(3), there shall be taken into account only the earnings and profits of such corporation for the period during which it was a member of the affiliated group. The total amount of an affiliated member's assets, indebtedness, projected earnings, and interest to be paid or incurred will enter into the computation required by this section, irrespective of any minority ownership in such member.

(b) *Aggregate money and other assets.* In determining the aggregate money and all the other assets of the affiliated group, the money and all the other assets of each member of such group shall be separately computed and such separately computed amounts shall be added together, except that adjustments shall be made, as follows:

(1) There shall be eliminated from the aggregate money and all the other assets of the affiliated group intercompany receivables as of the date described in section 279(c)(1);

(2) There shall be eliminated from the total assets of the affiliated group any amount which represents stock ownership in any member of such group;

(3) In any case where gain or loss is not recognized on transactions between members of an affiliated group under paragraph (d)(3) of this section, the basis of any asset involved in such transaction shall be the transferor's basis;

(4) The basis of property in a transaction to which §1.1502–13 applies is the basis of the property determined under that section; and

(5) There shall be eliminated from the money and all the other assets of the affiliated group any other amount which, if included, would result in a duplication of amounts in the aggregate money and all the other assets of the affiliated group.

(c) *Aggregate indebtedness.* For purposes of applying section 279(c), in determining the aggregate indebtedness of an affiliated group of corporations the total indebtedness of each member of such group shall be separately determined, and such separately determined amounts shall be added together, except that there shall be eliminated from such total indebtedness as of the date described in section 279(c)(1):

(1) The amount of intercompany accounts payable,

(2) The amount of intercompany bonds or other evidences of indebtedness, and

(3) The amount of any other indebtedness which, if included, would result in a duplication of amounts in the aggregate indebtedness of such affiliated group.

(d) *Aggregate projected earnings.* In the case of an affiliated group of corporations (whether or not such group files a consolidated return under section 1501), the aggregate projected earnings of such group shall be computed by separately determining the projected earnings of each member of such group under paragraph (d) of §1.279–5, and then adding together such separately determined amounts, except that:

(1) A dividend (a distribution which is described in section 301(c)(1) other than a distribution described in section 243(c)(1)) distributed by one member to another member shall be eliminated, and

(2) In determining the earnings and profits of any member of an affiliated group, there shall be eliminated any amount of interest income received or accrued, and of interest expense paid or incurred, which is attributable to intercompany indebtedness,

(3) No gain or loss shall be recognized in any transaction between members of the affiliated group, and

(4) Members of an affiliated group who file a consolidated return shall not apply the provisions of § 1.1502–18 dealing with inventory adjustments in determining earnings and profits for purposes of this section.

(e) *Aggregate interest to be paid or incurred.* For purposes of section 279(c)(4), in determining the aggregate annual interest to be paid or incurred by an affiliated group of corporations, the annual interest to be paid or incurred by each member of such affiliated group shall be separately calculated under paragraph (e) of § 1.279–5, and such separately calculated amounts shall be added together, except that any amount of annual interest to be paid or incurred on any intercompany indebtedness shall be eliminated from such aggregate interest.

[T.D. 7262, 38 FR 5850, Mar. 5, 1973, as amended by T.D. 8560, 59 FR 41675, Aug. 15, 1994; T.D. 8597, 60 FR 36679, July 18, 1995]

§ 1.279–7 Effect on other provisions.

Under section 279(j), no inference is to be drawn from any provision in section 279 and the regulations thereunder that any instrument designated as a bond, debenture, note, or certificate or other evidence of indebtedness by its issuer represents an obligation or indebtedness of such issuer in applying any other provision of this title. Thus, for example, an instrument, the interest on which is not subject to disallowance under section 279 could, under section 385 and the regulations thereunder, be found to constitute a stock interest, so that any amounts paid or payable thereon would not be deductible.

[T.D. 7262, 38 FR 5851, Mar. 5, 1973]

§ 1.280B–1 Demolition of structures.

(a) *In general.* Section 280B provides that, in the case of the demolition of any structure, no deduction otherwise allowable under chapter 1 of subtitle A shall be allowed to the owner or lessee of such structure for any amount expended for the demolition or any loss sustained on account of the demolition, and that the expenditure or loss shall be treated as properly chargeable to the capital account with respect to the land on which the demolished structure was located.

(b) *Definition of structure.* For purposes of section 280B, the term *structure* means a building, as defined in § 1.48–1(e)(1), including the structural components of that building, as defined in § 1.48–1(e)(2).

(c) *Effective date.* This section is effective for demolitions commencing on or after December 30, 1997.

[T.D. 8745, 62 FR 67726, Dec. 30, 1997]

§ 1.280C–1 Disallowance of certain deductions for wage or salary expenses.

If an employer elects to claim the targeted jobs credit under section 44B (as amended by the Revenue Act of 1978), or elects to claim the new jobs credit under section 44B (as in effect prior to enactment of the Revenue Act of 1978), the employer must reduce its deduction for wage or salary expenses paid or incurred in the year the credit is earned by the amount allowable as credit (determined without regard to the provisions of section 53). In the case in which wages and salaries are capitalized the amount subject to depreciation must be reduced by an amount equal to the amount of the credit (determined without regard to the provisions of section 53) in determining the depreciation deduction. In the case of an employer who uses the full absorption method of inventory costing under § 1.471–11, the portion of the basis of the inventory attributable to the wage or salary expenses giving rise to the credit and paid or incurred in the year the credit is earned must be reduced by the amount of the credit allowable (determined without regard to the provisions of section 53). If the employer is an organization that is under common control (as described in § 1.52–1), it must reduce its deduction for wage or salary expenses by the amount of the credit apportioned to it under

§1.52–1 (a) or (b). The deduction for wage and salary expenses must be reduced in the year the credit is earned, even if the employer is unable to use the credit in that year because of the limitations imposed by section 53.

(Secs. 44B, 381, and 7805 of the Internal Revenue Code of 1954, 92 Stat. 2834 (28 U.S.C. 44B); 91 Stat. 148 (26 U.S.C. 381(c)(26)); 68A Stat. 917 (28 U.S.C. 7805))

[T.D. 7921, 48 FR 52908, Nov. 23, 1983]

§1.280C–3 Disallowance of certain deductions for qualified clinical testing expenses when section 28 credit is allowable.

(a) *In general.* If a taxpayer is entitled to a credit under section 28 for qualified clinical testing expenses (as defined in section 28(b)), it must reduce the amount of any deduction for qualified clinical testing expenses paid or incurred in the year the credit is earned by the amount allowable as credit for such expenses (determined without regard to section 28(d)(2)).

(b) *Capitalization of qualified clinical testing expenses.* In a case in which qualified clinical testing expenses are capitalized, the amount chargeable to the capital account for a taxable year must be reduced by the excess of the amount of the credit allowable for the taxable year under section 28 (determined without regard to section 28(d)(2)) over the amount allowable as a deduction for qualified clinical testing expenses (determined without regard to paragraph (a) of this section) for the taxable year. See section 174 and the regulations thereunder.

(c) *Controlled group of corporations; organizations under common control.* In the case of a taxpayer described in paragraph (d)(5) of §1.28–1 of this chapter (relating to controlled groups of corporations and organizations under common control), paragraphs (a) and (b) of this section shall be applied in accordance with the rules prescribed for aggregation of expenditures under that paragraph.

(d) *Example.* The following example illustrates the application of paragraphs (a) and (b) of this section:

Example. A incurs $1,000 in clinical testing expenses for which a $500 credit is allowable under section 28. A also elects under section 174 of the Code to amortize these expenses over a 5-year period beginning in the year the credit is claimed. Under paragraph (a), the current year amortization deduction of $200 ($1,000÷5) is disallowed. Moreover, the amount which would otherwise be capitalized, $800, is reduced by the excess of the amount of the section 28 credit claimed for the taxable year over the amount of the allowable section 174 amortization deduction for the taxable year, or $300 ($500–$200). Thus, the amount chargeable to the capital account for the taxable year is $500 ($800–$300). A is entitled to amortize $500 over the remaining amortization period resulting in a deduction of $125 for each of the remaining four years.

[T.D. 8232, 53 FR 38715, Oct. 3, 1988]

§1.280C–4 Credit for increasing research activities.

(a) *In general.* The election under section 280C(c)(3) to have the provisions of section 280C(c) (1) and (2) not apply shall be made by claiming the reduced credit under section 41(a) determined by the method provided in section 280C(c)(3)(B) on an original return for the taxable year, filed at any time on or before the due date (including extensions) for filing the income tax return for such year. An election, once made for any taxable year, shall be irrevocable for that taxable year.

(b) *Transition rule*—(1) *In general.* In the case of a taxable year beginning after December 31, 1988, for which the due date (including extensions) for filing the return is on or before March 4, 1990, the election under section 280C(c)(3) shall be made by claiming the reduced credit under section 41(a) determined by the method provided in section 280C(c)(3)(B) on an original or amended return for such taxable year filed on or before March 3, 1990.

(2) *Taxpayers who made an election under former section 41(h).* If a taxpayer—

(i) Prior to December 19, 1989, made an election for a taxable year described in paragraph (b)(1) of this section under section 41(h) (as it existed before it was repealed by section 7814(e) of the Revenue Reconciliation Act of 1989) by not claiming any credit allowable under section 41(a), and

(ii) Has not filed an amended return on or before March 3, 1990 claiming the full credit allowable under section 41(a), the taxpayer will be treated as having made an election under section 280C(c)(3). Therefore, the provisions of section 280C(c) (1) and (2) shall not apply in such taxable year. However, in order to obtain the benefit of the reduced credit under section 41(a) determined by the method provided in section 280C(c)(3)(B), such a taxpayer must claim the reduced credit on an amended return filed before the expiration of the period prescribed in section 6511 for filing a claim for credit or refund of the tax imposed by chapter 1 of the Code.

(c) *Effective date.* The provisions of this section are effective for taxable years beginning after December 31, 1988.

[T.D. 8282, 55 FR 2376, Jan. 24, 1990; 55 FR 4049, Feb. 6, 1990]

§ 1.280F–1T Limitations on investment tax credit and recovery deductions under section 168 for passenger automobiles and certain other listed property; overview of regulations (temporary).

(a) *In general.* Section 280F(a) limits the amount of investment tax credit determined under section 46(a) and recovery deductions under section 168 for passenger automobiles. Section 280F(b) denies the investment tax credit and requires use of the straight line method of recovery for listed property that is not predominantly used in a qualified business use. In certain circumstances, section 280F(b) requires the recapture of an amount of cost recovery deductions previously claimed by the taxpayer. Section 280F(c) provides that lessees are to be subject to restrictions substantially equivalent to those imposed on owners of such property under section 280F (a) and (b). Section 280F(d) provides definitions and special rules; note that section 280F(d) (2) and (3) apply with respect to all listed property, even if the other provisions of section 280F do not affect the treatment of the property.

(b) *Key to Code provisions.* The following table identifies the provisions of section 280F under which regulations are provided, and lists each provision below with its corresponding regulation section:

Section 1.280F–2T	Section 1.280F–3T	Section 1.280F–4T	Sections 1.280F–5T and 1.280F–7	Section 1.280F–6T
(a) (d)(1) (d)(8) (d)(10)	(b) (d)(1)	(d)(2)	(c)	(d)(3) (d)(4) (d)(5) (d)(6)

Sections 1.280F–2T(f) and 1.280F–4T(b) also provide special rules for improvements to passenger automobiles and other listed property that qualify as capital expenditures.

(c) *Effective dates*—(1) *In general.* This section and §§ 1.280F–2T through 1.280F–6T apply to property placed in service or leased after June 18, 1984, in taxable years ending after that date. Section 1.280F–7 applies to property leased after December 31, 1986, in taxable years ending after that date.

(2) *Exception.* This section and §§ 1.280F–2T through 1.280F–6T shall not apply to any property:

(i) Acquired pursuant to a binding contract in effect on June 18, 1984, and at all times thereafter, or under construction by the taxpayer on that date, but only if the property is placed in service before January 1, 1985 (January 1, 1987, in the case of 15-year real property), or

(ii) Leased pursuant to a binding contract in effect on June 18, 1984, and at all times thereafter, but only if the lessee first uses such property under the lease before January 1, 1985 (January 1, 1987, in the case of 15-year real property).

(3) *Leased passenger automobiles.* Section 1.280F–5T(e) generally applies to passenger automobiles leased after April 2, 1985, and before January 1, 1987, in taxable years ending after April 2, 1985. Section 1.280F–5T(e) generally applies to passenger automobiles leased after April 2, 1985, in taxable years ending after that date. Section 1.280F–5T(e) does not apply to any passenger automobile that is leased pursuant to a binding contract, which is entered into no later than April 2, 1985, and which is

in effect at all times thereafter, but only if the automobile is used under the lease before August 1, 1985. If §1.280F–5T(e) does not apply to a passenger automobile, *see* paragraph (c) (1) and (2) of this section. Section 1.280F–7(a) applies to passenger automobiles leased after December 31, 1986, in taxable years ending after that date.

[T.D. 7986, 49 FR 42704, Oct. 24, 1984; as amended by T.D. 8061, 50 FR 46038, Nov. 6, 1985; T.D. 8218, 53 FR 29881, Aug. 9, 1988; T.D. 8473, 58 FR 19060, Apr. 12, 1993]

§1.280F–2T Limitations on recovery deductions and the investment tax credit for certain passenger automobiles (temporary).

(a) *Limitation on amount of investment tax credit*—(1) *General rule.* The amount of the investment tax credit determined under section 46(a) for any passenger automobile shall not exceed $1,000. For a passenger automobile placed in service after December 31, 1984, the $1,000 amount shall be increased by the automobile price inflation adjustment (as defined in section 280F(d)(7)) for the calendar year in which the automobile is placed in service.

(2) *Election of reduced investment tax credit.* If the taxpayer elects under section 48(q)(4) to reduce the amount of the investment tax credit in lieu of adjusting the basis of the passenger automobile under section 48(q)(1), the amount of the investment tax credit for any passenger automobile shall not exceed two-thirds of the amount determined under paragraph (a)(1) of this section.

(b) *Limitations on allowable recovery deductions*—(1) *Recovery deduction for year passenger automobile is placed in service.* For the taxable year that a taxpayer places a passenger automobile in service, the allowable recovery deduction under section 168(a) shall not exceed $4,000. See paragraph (b)(3) of this section for the adjustment to this limitation.

(2) *Recovery deduction for remaining taxable years during the recovery period.* For any taxable year during the recovery period remaining after the year that the property is placed in service, the allowable recovery deduction under section 168(a) shall not exceed $6,000. See paragraph (b)(3) of this section for the adjustment to this limitation.

(3) *Adjustment to limitation by reason of automobile price inflation adjustment.* The limitations on the allowable recovery deductions prescribed in paragraph (b) (1) and (2) of this section are increased by the automobile price inflation adjustment (as defined in section 280F(d)(7)) for the calendar year in which the automobile is placed in service.

(4) *Coordination with section 179.* For purposes of section 280F(a) and this section, any deduction allowable under section 179 (relating to the election to expense certain depreciable trade or business assets) is treated as if that deduction were a recovery deduction under section 168. Thus, the amount of the section 179 deduction is subject to the limitations described in paragraph (b) (1) and (2) of this section.

(c) *Disallowed recovery deductions allowed for years subsequent to the recovery period*—(1) *In general.* (i) Except as otherwise provided in this paragraph (c), the ‘‘unrecovered basis’’ (as defined in paragraph (c)(1)(ii) of this section) of any passenger automobile is treated as a deductible expense in the first taxable year succeeding the end of the recovery period.

(ii) The term *unrecovered basis* means the excess (if any) of:

(A) The unadjusted basis (as defined in section 168(d)(1)(A), except that there is no reduction by reason of an election to expense a portion of the basis under section 179) of the passenger automobile, over

(B) The amount of the recovery deductions (including any section 179 deduction elected by the taxpayer) which would have been allowable for taxable years in the recovery period (determined after the application of section 280F (a) and paragraph (b) of this section and as if all use during the recovery period were used described in section 168(c)(1)).

(2) *Special rule when taxpayer elects to use the section 168(b)(3) optional recovery percentages.* If the taxpayer elects to use the optional recovery percentages under section 168(b)(3) or must use the straight line method over the earnings and profits life (as defined and described in §1.280F–3T(f)), the second

succeeding taxable year after the end of the recovery period is treated as the first succeeding taxable year after the end of the recovery period for purposes of this paragraph (c) because of the half-year convention. For example, assume a calendar-year taxpayer places in service on July 1, 1984, a passenger automobile (*i.e.*, 3-year recovery property) and elects under section 168(b)(3) to recover its cost over 5 years using the straight line optional percentages. Based on these facts, calendar year 1990 is treated as the first succeeding taxable year after the end of the recovery period.

(3) *Deduction limited to $6,000 for any taxable year.* The amount that may be treated as a deductible expense under this paragraph (c) in the first taxable year succeeding the recovery period shall not exceed $6,000. Any excess shall be treated as an expense for the succeeding taxable years. However, in no event may any deduction in a succeeding taxable year exceed $6,000. The limitation on amounts deductible as an expense under this paragraph (c) with respect to any passenger automobile is increased by the automobile price inflation adjustment (as defined in section 280F(d)(7)) for the calendar year in which such automobile is placed in service.

(4) *Deduction treated as a section 168 recovery deduction.* Any amount allowable as an expense in a taxable year after the recovery period by reason of this paragraph (c) shall be treated as a recovery deduction allowable under section 168. However, a deduction is allowable by reason of this paragraph (c) with respect to any passenger automobile for a taxable year only to the extent that a deduction under section 168 would be allowable with respect to the automobile for that year. For example, no recovery deduction is allowable for a year during which a passenger automobile is disposed of or is used exclusively for personal purposes.

(d) *Additional reduction in limitations by reason of personal use of passenger automobile or by reason of a short taxable year.* See paragraph (i) of this section for rules regarding the additional reduction in the limitations prescribed by paragraphs (a) through (c) of this section by reason of the personal use of a passenger automobile or by reason of a short taxable year.

(e) *Examples.* The provisions of paragraphs (a) through (c) of this section may be illustrated by the following examples. For purposes of these examples, assume that all taxpayers use the calendar year and that no short taxable years are involved.

Example 1. (i) On July 1, 1984, B purchases for $45,000 and places in service a passenger automobile which is 3-year recovery property under section 168. In 1984, B does not elect under section 179 to expense a portion of the cost of the automobile. The automobile is used exclusively in B's business during taxable years 1984 through 1990.

(ii) The maximum amount of B's investment tax credit is $1,000 (*i.e.*, the lesser of $1,000 or .06×$45,000). B's unadjusted basis for purposes of section 168 is $44,500 (*i.e.*, $45,000 reduced under section 48(q)(1) by $500). B selects the use of the accelerated recovery percentages under section 168(b)(1).

(iii) The maximum amount of B's recovery deduction for 1984 is $4,000 (*i.e,* the lesser of $4,000 or .25×$44,500); for 1985, $6,000 (*i.e.*, the lesser of $6,000 or .38×$44,500); and for 1986, $6,000 (*i.e.*, the lesser of $6,000 or .37×$44,500).

(iv) At the beginning of taxable year 1987, B's unrecovered basis in the automobile is $28,500 (*i.e.*, $44,500−$16,000). Under paragraph (c) of this section, B may expense $6,000 of the unrecovered basis in the automobile in 1987. This expense is treated as a recovery deduction under section 168. For taxable years 1988 through 1990, B may deduct $6,000 of the unrecovered basis per year. At the beginning of 1991, B's unrecovered basis in the automobile is $4,500. During that year, B disposes of the automobile. B is not allowed a deduction for 1991 because no deduction would be allowable under section 168 based on these facts.

Example 2. (i) On July 1, 1984, C purchases for $50,000 and places in service a passenger automobile which is 3-year recovery property under section 168. The automobile is used exclusively in C's business during taxable years 1984 through 1992. In 1984, C does not elect under section 179 to expense a portion of the automobile's cost. C elects under section 48(q)(4) to take a reduced investment tax credit in lieu of the section 48(q)(1) basis adjustment.

(ii) The maximum amount of C's investment tax credit is $666.67 (*i.e.*, the lesser of ⅔ of $1,000 or .04×$50,000). C's unadjusted basis for purposes of section 168 is $50,000. C elects to use the optional recovery percentages under section 168(b)(3) based on a 5-year recovery period.

(iii) The maximum amount of C's recovery deduction for 1984 is $4,000 (*i.e.*, the lesser of $4,000 or .10×$50,000); for taxable years 1985 through 1988, $6,000 per year (*i.e.,* the lesser of $6,000 or .20 of $50,000). C's recovery deduction for 1989 is $5,000 (*i.e.,* the lesser of .10×$50,000 or $6,000).

(iv) At the beginning of taxable year 1990, C's unrecovered basis in the automobile is $17,000. Under paragraph (c) of this section, C may expense $6,000 of the unrecovered basis in the automobile in 1990. this expense is treated as a recovery deduction under section 168. For taxable years 1991 and 1992, C may deduct $6,000, and $5,000, respectively of the unrecovered basis per year.

Example 3. Assume the same facts as in *Example (2),* except that C disposes of the passenger automobile on July 1, 1990. Under paragraph (c) of this section, C is not allowed a deduction for 1990 or for any succeeding taxable year because no deduction would be allowable under section 168 based on these facts.

Example 4. (i) On July 1, 1984, G purchases for $15,000 and places in service a passenger automobile which is 3-year recovery property under section 168. The automobile is used exclusively in G's business during taxable years 1984 through 1987. In 1984, G elects under section 179 to expense $5,000 of the cost of the property.

(ii) The maximum amount of G's investment tax credit is $600 (*i.e.,* the lesser of .06×$10,000 or $1,000).

(iii) G's unadjusted basis for purposes of section 168 is $9,700 (*i.e.,* $15,000 minus the sum of $5,000 (the amount of the expense elected under section 179) and $300 (one-half of the investment tax credit under section 48(q)(1))). Under paragraph (b)(4) of this section, the allowable deduction under section 179 is treated as a recovery deduction under section 168 for purposes of this section. Thus, the maximum amount of G's section 179 deduction is $4,000 (*i.e.,* the lesser of $4,000 or $5,000+.25×$9,700). G is entitled to no further recovery deduction under section 168 for 1984. The amount of G's 1985 and 1986 recovery deductions are $3,686 (*i.e.,* the lesser of .38×$9,700 or $6,000) and $3,589 (*i.e.,* the lesser of .37×$9,700 or $6,000), respectively. At the beginning of 1987, G's unrecovered basis in the automobile is $3,425 (*i.e.,* $14,700 − $11,275). Under paragraph (c) of this section, G may expense the remaining $3,425 in 1987.

Example 5. (i) On July 1, 1984, D purchases for $55,000 and places in service a passenger automobile which is 3-year recovery property under section 168. The automobile is used exclususvely in D's business during taxable years 1984 through 1993. In 1984, D elects under section 179 to expense $5,000 of the cost of the property.

(ii) The maximum amount of D's investment tax credit is $1,000 (*i.e.,* the lesser of $1,000 or .06×$50,000).

(iii) D's unadjusted basis for purposes of section 168 is $49,500 (*i.e.,* $55,000 minus the sum of $5,000 (the amount of the expense elected under section 179) and $500 (one-half of the investment tax credit under section 48 (q)(1))). Under paragraph (b)(4) of this section, the allowable deduction under section 179 is treated as a recovery deduction under section 168 for purposes of this section. Thus, the maximum amount of D's section 179 deduction is $4,000 (*i.e.,* the lesser of $4,000 or $5,000+.25×$49,500). D is entitled to no further recovery deduction under section 168 for 1984. The maximum amount of D's 1985 recovery deduction is $6,000 (*i.e.,* the lesser of $6,000 or .38×$49,500); and for 1986, $6,000 (*i.e.,* the lesser of $6,000 or .37 of $49,500).

(iv) At the beginning of 1987, D's unrecovered basis is $38,500. D may expense the remaining unrecovered basis at the rate of $6,000 per year through 1992 and $2,500 in 1993.

Example 6. Assume the same facts as in *Example (5),* except that in 1993, D uses the automobile only 60 percent in his business. Under paragraph (c)(4) of this section for 1993, D may expense $1,500 (*i.e.,* .60×$2,500). D is entitled to no further deductions with respect to the automobile in any later year.

Example 7. (i) On July 1, 1984, F purchases for $44,500 and places in service a passenger automobile which is 3-year recovery property under section 168. The automobile is used exclusively in F's business during taxable years 1984 through 1992. In 1984, F elects under section 179 to expense $5,000 of the cost of the property.

(ii) F elects under section 48(q)(4) to take a reduced investment tax credit in lieu of the section 48(q)(1) basis adjustment. The maximum amount of F's investment tax credit is $666.67 (*i.e.,* the lesser of ⅔ of $1,000 or .04×$39,500).

(iii) F's unadjusted basis for purposes of section 168 is $39,500 (*i.e.,* $44,500–$5,000 (the amount of the expense elected under section 179)). F elects to use the optional recovery percentage under section 168(b)(3) based on a 5-year recovery period. Under paragraph (b)(4) of this section, the allowable section 179 deduction is treated as a recovery deduction under section 168 for purposes of this section. Thus, the maximum amount of F's section 179 deduction is $4,000 (*i.e.,* the lesser of $4,000 or $5,000+.10×$39,500). F is entitled to no further recovery deduction under section 168 for 1984. The maximum amounts of F's recovery deductions for 1985 through 1988 are $6,000 per year (*i.e.,* the lesser of $6,000 or .20×$39,500). F's recovery deduction for 1989 (the first taxable year after the 5-year recovery period but the sixth recovery year for purposes of section 168) is $3,950 (*i.e.,* the lesser of .10×$39,500 or $6,000).

(iv) Under paragraph (c), taxable year 1990 is considered to be the first taxable year succeeding the end of the recovery period. At the beginning of taxable year 1990, F's unrecovered basis in the automobile is $12,550 (*i.e.,* $44,500 − $31,950). Under paragraph (c), F may expense $6,000 of his unrecovered basis in the automobile in 1990 and in 1991. This expense is treated as a recovery deduction under section 168. For taxable year 1992, F may expense the remaining $550 of his unrecovered basis in the automobile.

(f) *Treatment of improvements that qualify as capital expenditures.* An improvement to a passenger automobile that qualifies as a capital expenditure under section 263 is treated as a new item of recovery property placed in service in the year the improvement is made. However, the limitations in paragraph (b) of this section on the amount of recovery deductions allowable are determined by taking into account as a whole both the improvement and the property of which the improvement is a part. If that improvement also qualifies as an investment in new section 38 property under section 48(b) and § 1.48–2(b)(2), the limitation in paragraph (a)(1) of this section on the amount of the investment tax credit for that improvement is determined by taking into account any investment tax credit previously allowed for the passenger automobile (including any prior improvement considered part of the passenger automobile). Thus, the maximum credit allowable for the automobile (including the improvement) will be $1,000 (or ⅔ of $1,000, in the case of an election to take a reduced credit under section 48(q)(4)) (adjusted under section 280F(d)(7) to reflect the automobile price inflation adjustment for the year the property of which the improvement is a part is placed in service).

(g) *Treatment of section 1031 or section 1033 transactions*—(1) *Treatment of exchanged passenger automobile.* For a taxable year in which a transaction described in section 1031 or section 1033 occurs, the unadjusted basis of an exchanged or converted passenger automobile shall cease to be taken into account in determining any recovery deductions allowable under section 168 as of the beginning of the taxable year in which the exchange or conversion occurs. Thus, no recovery deduction is allowable for the exchanged or converted automobile in the year of the exchange or conversion.

(2) *Treatment of acquired passenger automobile*—(i) *In general.* The acquired automobile is treated as new property placed in service in the year of the exchange (or in the replacement year) and that year is its first recovery year.

(ii) *Limitations on recovery deductions.* If the exchanged (or converted) automobile was acquired after the effective date of section 280F (as set out in § 1.280F–1(c)), the basis of that automobile as determined under section 1031(d) or section 1033(b) (whichever is applicable) must be reduced for purposes of computing recovery deductions with respect to the acquired automobile (but not for purposes of determining the amount of the investment tax credit and gain or loss on the sale or other disposition of the property) by the excess (if any) of:

(A) The sum of the amounts that would have been allowable as recovery deductions with respect to the exchanged (or converted) automobile during taxable years preceding the year of the exchange (or conversion) if all of the use of the automobile during those years was use described in section 168(c), over

(B) The sum of the amounts allowable as recovery deductions during those years.

(3) *Examples.* The provisions of this paragraph (g) may be illustrated by the following examples:

Example 1. (i) In 1982, F purchases and places in service a passenger automobile which is 3-year recovery property under section 168. The automobile is used exclusively in F's business.

(ii) On July 1, 1984, F exchanges the passenger automobile and $1,000 cash for a new passenger automobile (“like kind” property). Under paragraph (g)(1) of this section, no recovery deduction is allowed in 1984 for the exchanged automobile. Any investment tax credit claimed with respect to that automobile is subject to recapture under section 47.

(iii) F's basis in the acquired property (as determined under section 1031(d) and F's qualified investment are $20,000. Under the provisions of paragraph (g)(2)(i) of this section, the acquired property is treated as new recovery property placed in service in 1984 to the extent of the full $20,000 of basis. The maximum amount of F's investment tax credit is limited to $1,000 (*i.e.*, the lesser of $1,000 or .06×$20,000). Cost recovery deductions are computed pursuant to paragraph (b) of this section.

Example 2. (i) On July 1, 1984, E purchases for $30,000 and places in service a passenger automobile which is 3-year recovery property under section 168. In 1984, E's business use percentage is 80 percent and such use constitutes his total business/investment use.

(ii) E elects under section 48(q)(4) to take a reduced investment tax credit in lieu of the section 48 (q)(1) basis adjustment. The maximum amount of E's investment tax credit is $533.33 (*i.e.,* the lesser of ⅔ of $1,000×.80 or .80×.04×$30,000).

(iii) E's unadjusted basis for purposes of section 168 is $30,000. E selects the use of the accelerated recovery percentages under section 168(b)(1). The maximum amount of E's recovery deduction for 1984 is $3,200 (*i.e.,* the lesser of .80×$4,000 or .80×.25×$30,000).

(iv) On June 10, 1985, E exchanges the passenger automobile and $1,000 cash for a new passenger automobile (''like kind'' property). Under paragraph (g)(1) of this section, no recovery deduction is allowable in 1985 for the exchanged automobile. The investment tax credit claimed is subject to recapture under section 47. Under paragraph (g)(2)(ii) of this section, E's basis in the acquired property for purposes of computing recovery deductions under section 280F is $27,000 (*i.e.,* $27,800 (section 1031(d) basis)—$800). The acquired automobile is used exclusively in F's business during taxable years 1985 through 1988. Under paragraph (g)(2) of this section, the acquired property is treated as new recovery property placed in service in 1985. Assume that the automobile price inflation adjustment (as described under section 280F(d)(7)) is zero. E's qualified investment in the property, as determined under §1.46–3(c)(1), is $27,800. The maximum amount of E's investment tax credit is $1,000 (*i.e.,* the lesser of $1,000 or .06×$27,800). E's unadjusted basis for purposes of section 168 is $26,500 (*i.e.,* $27,000 reduced under section 48(q)(1) by $500). Cost recovery deductions are computed pursuant to paragraph (b) of this section.

(h) *Other nonrecognition transactions.* [Reserved]

(i) *Limitation under this section applies before other limitations*—(1) *Personal use.* The limitations imposed upon the maximum amount of the allowable investment tax credit and the allowable recovery deductions (as described in paragraphs (a) through (c) of this section) must be adjusted during any taxable year in which a taxpayer makes any use of a passenger automobile other than for business/investment use (as defined in §1.280F–6T(d)(3)). The limitations on the amount of the allowable investment tax credit (as described in paragraph (a) of this section) and the allowable cost recovery deductions (as described in paragraphs (b) and (c) of this section) are redetermined by multiplying the limitations by the percentage of business/investment use (determined on an annual basis) during the taxable year.

(2) *Short taxable year.* The limitations imposed upon the maximum amount of the allowable recovery deductions (as described in paragraphs (a) through (c) of this section) must be adjusted during any taxable year in which a taxpayer has a short taxable year. In this case, the limitation is adjusted by multiplying the limitation that would have been applied if the taxable year were not a short taxable year by a fraction, the numerator of which is the number of months and part-months in the short taxable year and the denominator of which is 12.

(3) *Examples.* The provisions of this paragraph (i) may be illustrated by the following examples:

Example 1. On July 1, 1984, A purchases and places in service a passenger automobile and uses it 80 percent for business/investment use during 1984. Under paragraph (i)(1) of this section, the maximum amount of the investment tax credit that A may claim for the automobile is $800 (*i.e.,* .80×$1,000).

Example 2. Assume the same facts as in *Example (1),* except that A elects under section 48(q)(4) to take a reduced investment tax credit in lieu of the section 48(q)(1) basis adjustment. Under paragraph (i)(1) of this section, the maximum amount of the investment tax credit that A may claim for the automobile is $533.33 (*i.e.,* .80×⅔×$1,000).

Example 3. On July 1, 1984, B purchases and places in service a passenger automobile and uses it 60 percent for business/investment use during 1984. Under paragraph (i)(1) of this section, the maximum amount of the investment tax credit that B may claim for the automobile is $600 (*i.e.,* .60×$1,000). B uses the car 70 percent for business/investment use during 1985 and 80 percent during 1986. Under paragraph (i)(1) of this section, the maximum amount of recovery deductions that B may claim for 1984, 1985, and 1986 are $2,400 (*i.e.,* .60×$4,000), $4,200 (*i.e.,* .70×$6,000), and $4,800 (*i.e.,* .80×$6,000), respectively.

Example 4. Assume the same facts as in *Example (3)* with the added facts that B's unrecovered basis at the beginning of 1987 is $6,000 and that B uses the automobile 85 percent for business/investment use during 1987. Under paragraph (i)(1) of this section, the maximum amount that B may claim as an expense for 1987 is $5,000 (*i.e.,* .85×$6,000).

Example 5. On August 1, 1984, C purchases and places in service a passenger automobile and uses it exclusively for business. Taxable year 1984 for C is a short taxable year which consists of 6 months. Under paragraph (i)(2) of this section, the maximum amount that C may claim as a recovery deduction for 1984 is $2,000 (*i.e.,* 6⁄12×$4,000).

Example 6. Assume the same facts as in *Example (5),* except that C uses the passenger automobile 70 percent for business/investment use during 1984. Under paragraph (i) (1) and (2) of this section, the maximum amount that C may claim as a recovery deduction for 1984 is $1,400 (*i.e.,* .70×6⁄12×$4,000).

(98 Stat. 494, 26 U.S.C. 280F; 68A Stat. 917, 26 U.S.C. 7805)

[T.D. 7986, 49 FR 42704, Oct. 24, 1984]

§ 1.280F–3T Limitations on recovery deductions and the investment tax credit when the business use percentage of listed property is not greater than 50 percent (temporary).

(a) *In general.* Section 280F(b), generally, imposes limitations with respect to the amount allowable as an investment tax credit under section 46(a) and the amount allowable as a recovery deduction under section 168 in the case of listed property (as defined in § 1.280F–6T(b)) if certain business use of the property (referred to as ‘‘qualified business use’’) does not exceed 50 percent during a taxable year. *Qualified business use* generally means use in a trade or business, rather than use in an investment or other activity conducted for the production of income within the meaning of section 212. See § 1.280F–6T(d) for the distinction between ‘‘business/ investment use’’ and ‘‘qualified business use.’’

(b) *Limitation on the amount of investment tax credit*—(1) *Denial of investment tax credit when business use percentage not greater than 50 percent.* Listed property is not treated as section 38 property to any extent unless the business use percentage (as defined in section 280F(d)(6) and § 1.280F–6T(d)(1)) is greater than 50 percent. For example, if a taxpayer uses listed property in a trade or business in the taxable year in which it is placed in service, but the business use percentage is not greater than 50 percent, no investment tax credit is allowed for that listed property. If, in the taxable year in which listed property is placed in service, the only business/investment use (as defined in § 1.280F–6T(d)(3)) of that property is qualified business use (as defined in § 1.280F–6T(d)(2)(i)), and the business use percentage is 55 percent, the investment tax credit is allowed for the 55 percent of the listed property that is treated as section 38 property. The credit allowed is unaffected by any increase in the business use percentage in a subsequent taxable year.

(2) *Recapture of investment tax credit.* Listed property ceases to be section 38 property to the extent that the business/investment use (as defined in § 1.280F–6T(d)(3)) for any taxable year is less than the business/investment use for the taxable year in which the property is placed in service. *See* § 1.47–2(c). If the business use percentage (as defined in § 1.280F–6T(d)(1)) of listed property is greater than 50 percent for the taxable year in which the property is placed in service, and less than or equal to 50 percent for any subsequent taxable year, that property ceases to be section 38 property in its entirety in that subsequent taxable year. Under § 1.47–1(c)(1)(ii)(*b*), the property (or a portion thereof) is treated as ceasing to be section 38 property on the first day of the taxable year in which the cessation occurs.

(c) *Limitation on the method of cost recovery under section 168 when business use of property not greater than 50 percent*—(1) *Year of acquisition.* If any listed property (as defined in § 1.280F–6T(b)) is not predominantly used in a qualified business use (as defined in § 1.280F–6T(d)(4)) in the year it is acquired, the recovery deductions allowed under section 168 for the property for that taxable year and for succeeding taxable years are to be determined using the straight line method over its earnings and profits life (as defined in paragraph (f) of this section). Additionally, the taxpayer is not entitled to make any election under section 179 with respect to the property for that year.

(2) *Subsequent years.* If any listed property is not subject to paragraph (c)(1) of this section because such property is predominantly used in a qualified business use (as defined in § 1.280F–6T(d)(4)) during the year it is acquired but is not predominantly used in a qualified business use during a subsequent taxable year, the rules of this

paragraph (c)(2) apply. In such a case, the taxpayer must determine the recovery deductions allowed under section 168 for the taxable year that the listed property is not predominantly used in a qualified business use and for any subsequent taxable year as if such property was not predominantly used in a qualified business use in the year in which it was acquired and there had been no section 179 election with respect to the property. Thus, the recovery deductions allowable under section 168 for the remaining taxable years are computed by determining the applicable recovery percentage that would apply if the taxpayer had used the straight line method over the property's earnings and profits life beginning with the year the property was placed in service.

(3) *Effect of rule on recovery property that is not listed property.* The mandatory use of the straight line method over the property's earnings and profits life under paragraphs (d) (1) and (2) of this section does not have any effect on the proper method of cost recovery for other recovery property of that same class placed in service in the same taxable year by the taxpayer and does not constitute an election to use an optional recovery period under section 168(b)(3).

(d) *Recapture of excess recovery deductions claimed*—(1) *In general.* If paragraph (c)(2) of this section is applicable, any excess depreciation (as defined in paragraph (d)(2) of this section) must be included in the taxpayer's gross income and added to the property's adjusted basis for the first taxable year in which the property is not predominantly used in a qualified business use (as defined in § 1.280F–6T(d)(4)).

(2) *Definition of excess depreciation.* For purposes of this section, the term *excess depreciation* means the excess (if any) of:

(i) The amount of the recovery deductions allowable with respect to the property for taxable years before the first taxable year in which the property was not predominantly used in a qualified business use, over

(ii) The amount of the recovery deductions which would have been allowable for those years if the property had not been predominantly used in a qualified business use for the year it was acquired and there had been no section 179 election with respect to the property.

For purposes of paragraph (d)(2)(i), any deduction allowable under section 179 (relating to the election to expense certain depreciable trade or business assets) is treated as if that deduction was a recovery deduction under section 168.

(3) *Recordkeeping requirement.* A taxpayer must be able to substantiate the use of any listed property, as prescribed in section 274(d)(4) and § 1.274–5T or § 1.274–6T, for any taxable year for which recapture under section 280F(b)(3) and paragraph (d) (1) and (2) of this section may occur even if the taxpayer has fully depreciated (or expensed) the listed property in a prior year. For example, in the case of 3-year recovery property, the taxpayer shall maintain a log, journal, etc. for six years even though the taxpayer fully depreciated the property in the first three years.

(e) *Earnings and profits life*—(1) *Definition.* The earnings and profits life with respect to any listed property is generally the following:

In the case of—	The applicable recovery period is—
3-year property	5 years.
5-year property	12 years.
10-year property	25 years.
18-year real property and low-income housing	40 years.
15-year public utility property	35 years.

However, if the recovery period applicable to any recovery property under section 168 is longer than the above assigned recovery period, such longer recovery period shall be used. For example, generally, the recovery period for recovery property used predominantly outside the United States is the property's present class life (as defined in section 168(g)(2)). In many cases, a property's present class life is longer than the recovery period assigned to the property under the above table. Pursuant to this paragraph (e)(1), the property's recovery period is its present class life.

(2) *Applicable recovery percentages.* If the applicable recovery period is determined pursuant to the table prescribed

in paragraph (e)(1) of this section, the applicable recovery percentage is:

(i) For property other than 18-year real property or low-income housing:

If the recovery year is—	And the recovery period is—			
	5	12	25	35
1	10	4	2	1
2	20	9	4	3
3	20	9	4	3
4	20	9	4	3

36	....	....	....	1

(ii) For 18-year real property: [Reserved]

(iii) For low-income housing: [Reserved]

(f) *Examples.* The provisions of this section may be illustrated by the following examples. For purposes of these examples, assume that all taxpayers use the calendar year and that no short taxable years are involved.

Example 1. On July 1, 1984, B purchases for $50,000 and places in service an item of listed property (other than a passenger automobile) which is 3-year recovery property under section 168. For the first taxable year that the property is in service, B used the property 40 percent in a trade or business, 40 percent for the production of income, and 20 percent for personal purposes. Although B's total business/investment use is greater than 50 percent, the business use percentage for that taxable year is only 40 percent. Under paragraph (b)(1) of this section, no investment tax credit is allowed for the property.

Example 2. (i) On January 1, 1985, C purchases for $40,000 and places in service an item of listed property (other than a passenger automobile) that is 3-year recovery property under section 168. Seventy percent of the use of the property is in C's trade or business and 30 percent of the use is for personal purposes. C does not elect a reduced investment tax credit under section 48(q)(4). The amount of C's investment tax credit is $1,680 (*i.e.*, $40,000 × .60 × .10 × .70).

(ii) In addition, in 1986, only 55 percent of the use of the property is in C's trade or business and 45 percent of the use is for personal purposes. Under paragraph (b)(2) of this section, the property ceases to be section 38 property to the extent that the use in a trade or business decreased below 70 percent. As a result, a portion of the investment tax credit must be recaptured as an increase in tax liability for 1986 under the rules of section 47 (relating to the recapture of investment tax credit). *See* section 47(a)(5) and § 1.47–2(e) for rules relating to the computation of the recapture amount.

Example 3. On July 1, 1984, B purchases and places in service an item of listed property (other than a passenger automobile) that is 3-year recovery property. B elects to take a reduced investment tax credit under section 48(q)(4). In 1984, B uses the property exclusively in his business. Assume that B's 1984 allowable recovery deduction is $12,500. In 1985 and 1986, the property is not predominantly used in a qualified business use. The investment tax credit claimed is subject to recapture in full under section 47 in 1985 since the property ceases to be section 38 property in its entirety on January 1, 1985. Under paragraph (c)(2) of this section, B must treat the property for 1985 and subsequent taxable years as if he recovered its cost over a 5-year recovery period (*i.e.*, its earnings and profits life) using the straight line method (with the half-year convention) from the time it was placed in service. Therefore, taxable year 1985 is treated as the property's second recovery year (of its 5-year recovery period) and the applicable recovery deduction using the straight line method must be used to determine the recovery deduction. Under paragraph (d) of this section, B must recapture any excess depreciation claimed for taxable year 1984. If B had used the straight line method over a 5-year recovery period his recovery deduction for 1984 would have been $5,000. Under paragraph (d)(2) of this section, B's excess depreciation is $7,500 (*i.e.*, $12,500 − $5,000) and that amount must be included in B's 1985 gross income and added to the property's basis. The taxable years 1986 through 1989 are the property's second through sixth recovery years, respectively, of such property's 5-year recovery period.

Example 4. Assume the same facts as in *Example (3)*, except that in 1986 B used the property exclusively in his business. B is entitled to no investment tax credit with respect to the property in 1986 and must continue to recover the property's cost over a 5-year recovery period using the straight line method.

Example 5. On July 1, 1984, H purchases and places in service listed property (other than a passenger automobile) which is 3-year recovery property under section 168. H selects the use of the accelerated recovery percentages under section 168. In 1984 through 1986, H uses the property exclusively for business. In 1987, the property is not predominantly used in a qualified business use. Under paragraph (c)(2) of this section, H must compute his 1987 and subsequent taxable year's recovery deductions using the straight line method over a 5-year recovery period with 1987 treated as the fourth recovery year. Under paragraph (d) of this section, H must recapture any excess depreciation claimed for taxable years 1984 through 1986 even though by 1987 the full cost of the property had already been recovered.

Example 6. Assume the same facts as in *Example (5)*, except that H uses the property exclusively for personal purposes in 1987. Under paragraph (d) of this section, H must recapture any excess depreciation claimed for taxable years 1984 through 1986. H is entitled to no cost recovery deduction under the 5-year straight line method for 1987. Assume further that in 1988 H uses the property 70 percent in his business. Thus, H's business use percentage for that year is 70 percent. Under paragraph (c)(2) of this section, H must compute his 1988 cost recovery deduction using the straight line method over a 5-year recovery period with 1988 treated as the fifth recovery year.

Example 7. (i) On July 1, 1984, F purchases for $70,000 and places in service listed property (other than a passenger automobile) which is 3-year recovery property under section 168. F's business use percentage for 1984 through 1986 is 60 percent. F elects under section 179 to expense $5,000 of the cost of the property.

(ii) F elects a reduced investment tax credit under section 48(q)(4). The maximum amount of F's investment tax credit is $1,560 (*i.e.*, $65,000×.04×.60).

(iii) F's unadjusted basis for purposes of section 168 is $65,000 (*i.e.*, $70,000 reduced by the $5,000 section 179 expense). F selects the use of the accelerated recovery percentages under section 168(b)(1). F's recovery deduction for 1984 is $9,750 (*i.e.*, $65,000×.25×.60).

(iv) In 1985, the property is not predominantly used in a qualified business use. The investment tax credit claimed is subject to recapture in full under section 47 in 1985 since the property ceases to be section 38 property in its entirety on January 1, 1985. Under paragraph (c)(2) of this section, F must treat the property for 1985 and subsequent taxable years as if he recovered its cost over a 5-year recovery period (*i.e.*, its earnings and profits life) using the straight line method (with the half year convention) from the time it was placed in service. Under paragraph (d) of this section, F must recapture any excess depreciation claimed for taxable year 1984. F's excess depreciation is $10,550 [*i.e.*, ($65,000×.25×.60+$5,000)−($70,000×.10×.60)]. This amount must be included in F's 1985 gross income and added to the property's adjusted basis.

Example 8. (i) On July 1, 1984, G purchases for $60,000 and places in service a passenger automobile which is 3-year recovery property under section 168.

(ii) In 1984, G's business use percentage is 80 percent and such use constitutes his total business/investment use. G elects under section 48(q)(4) to take a reduced investment tax credit in lieu of the basis adjustment under section 48(q)(1). The maximum amount of G's investment tax credit is $533.33 (*i.e.*, the lesser of .80×⅔×$1,000 or $60,000×.80×.04).

(iii) In 1984, G does not elect under section 179 to expense a portion of the automobile's cost. G selects the use of the accelerated recovery percentages under section 168. G's unadjusted basis for purposes of section 168 is $60,000. The maximum amount of G's 1984 recovery deduction is $3,200 (*i.e.*, the lesser of .80×$4,000 or .80×.25×$60,000).

(iv) In 1985, G's business use percentage is 80 percent and such use constitutes his total business/investment use. The maximum amount of G's 1985 recovery deduction is $4,800 (*i.e.*, the lesser of .80×$6,000 or .80×.38×$60,000).

(v) In 1986, G's business use percentage is 45 percent and such use constitutes his total business/investment use. Under paragraph (b)(2) of this section, as a result of the decline in the business use percentage to 50 percent or less, the automobile ceases to be section 38 property in its entirety and G must recapture (pursuant to §§ 1.47–1(c) and 1.47–2(e)) the investment tax credit previously claimed. Since G's business use percentage in 1986 is not greater than 50 percent, under the provisions of paragraph (d) of this section, G must recompute (for recapture purposes) his recovery deductions for 1984 and 1985 using the straight line method over a 5-year recovery period (*i.e.*, earnings and profits life for 3-year recovery property using the half-year convention) to determine if any excess depreciation must be included in his 1986 taxable income. G's recomputed recovery deductions for 1984 and 1985 are $3,200 (*i.e.*, the lesser of .80×$4,000 or .80×.10×$60,000), and $4,800 (*i.e.*, the lesser of .80×$6,000 or .80×.20×$60,000), respectively. G does not have to recapture any excess depreciation since his recovery deductions for 1984 and 1985 computed using the straight line method over a 5-year recovery period are the same as the amounts actually claimed during those years.

(vi) Under paragraph (c)(2) of this section, for 1986 and succeeding taxable years G must compute his remaining recovery deductions using the straight line method over a 5-year recovery period beginning with the third recovery year. The maximum amount of G's 1986 recovery deduction is $2,700 (*i.e.*, the lesser of .45×$6,000 or .45×.20×$60,000). For taxable years 1987 through 1993, G's business use percentage is 55 percent and such use constitutes his total business/investment use. G's 1987 and 1988 recovery deductions are $3,300 per year (*i.e.*, the lesser of .55×$6,000 or .55×.20×$60,000). For taxable year 1989 (the last recovery year), G's recovery deduction is $3,300 (*i.e.*, .55×.10×$60,000 or .55×$6,000).

(vii) As of the beginning of 1990, G will have claimed a total of $20,600 of recovery deductions. Under § 1.280F–2T(c), G may expense his remaining unrecovered basis (up to a certain amount per year) in the first succeeding taxable year after the end of the recovery period and in taxable years thereafter. If G had used his automobile for 100 percent business use in taxable years 1984 through 1989, G could have claimed a recovery deduction of $4,000 in 1984 and a recovery deduction of $6,000 in each of those remaining years. At the beginning of 1990, therefore, G's unrecovered basis (as defined in section 280F(d)(8)) is $26,000 (*i.e.*, $60,000 − $34,000). The maximum amount of G's 1990 recovery deduction is $3,300 (*i.e.*, .55×$6,000). At the beginning of 1991, G's unrecovered basis is $20,000 (*i.e.*, $26,000 adjusted under section 280F(d)(2) and § 1.280F–4T(a) to account for the amount that would have been claimed in 1990 for 100 percent business/investment use during that year). The maximum amount of G's 1991 recovery deduction is $3,300 (*i.e.*, .55×$6,000) and his unrecovered basis as of the beginning of 1992 is $14,000 (*i.e.*, $20,000 − $6,000). In 1992, G disposes of the automobile. G is not allowed a recovery deduction for 1992.

(98 Stat. 494, 26 U.S.C. 280F; 68A Stat. 917, 26 U.S.C. 7805)

[T.D. 7986, 49 FR 42707, Oct. 24, 1984; as amended by T.D. 8061, 50 FR 46038, Nov. 6, 1985]

§ 1.280F–4T Special rules for listed property (temporary).

(a) *Limitations on allowable recovery deductions in subsequent taxable years*—(1) *Subsequent taxable years affected by reason of personal use in prior years.* For purposes of computing the amount of the recovery deduction for ''listed property'' for a subsequent taxable year, the amount that would have been allowable as a recovery deduction during an earlier taxable year if all of the use of the property was use described in section 168(c) is treated as the amount of the recovery deduction allowable during that earlier taxable year. The preceding sentence applies with respect to all earlier taxable years, beginning with the first taxable year in which some or all use of the ''listed property'' is use described in section 168(c). For example, on July 1, 1984, B purchases and places in service listed property (other than a passenger automobile) which is 5-year recovery property under section 168. B selects the use of the accelerated percentages under section 168. B's business/investment use of the property (all of which is qualified business use as defined in section 280F(d)(6)(B) and § 1.280F–6T(d)(2)) in 1984 through 1988 is 80 percent, 70 percent, 60 percent, and 55 percent, respectively, and B claims recovery deductions for those years based on those percentages. B's qualified business use for the property for 1989 and taxable years thereafter increases to 100 percent. Pursuant to this rule, B may not claim a recovery deduction in 1989 (or for any subsequent taxable year) for the increase in business use because there is no adjusted basis remaining to be recovered for cost recovery purposes after 1988.

(2) *Special rule for passenger automobiles.* In the case of a passenger automobile that is subject to the limitations of § 1.280F–2T, the amount treated as the amount that would have been allowable as a recovery deduction if all of the use of the automobile was use described in section 168(c) shall not exceed $4,000 for the year the passenger automobile is placed in service and $6,000 for each succeeding taxable year (adjusted to account for the automobile price inflation adjustment, if any, under section 280F(d)(7) and for short taxable year under § 1.280F–2T(i)(2)). *See.* § 1.280F–3T(g). *Example 8.*

(b) *Treatment of improvements that qualify as capital expenditures*—(1) *In general.* In the case of any improvement that qualifies as a capital expenditure under section 263 made to any listed property other than a passenger automobile, the rules of this paragraph (b) apply. See § 1.280F–2T(f) for the treatment of an improvement made to a passenger automobile.

(2) *Investment tax credit allowed for the improvement.* If the improvement qualifies as an investment in new section 38 property under section 48(b) and § 1.48–2(b), the investment tax credit for that improvement is limited by paragraph (b)(1) of § 1.280F–3T, as applied to the item of listed property as a whole.

(3) *Cost recovery of the improvement.* The improvement is treated as a new item of recovery property. The method of cost recovery with respect to that improvement is limited by § 1.280F–3T(c), as applied to the item of listed property as a whole.

(98 Stat. 494, 26 U.S.C. 280F; 68A Stat. 917, 26 U.S.C. 7805)

[T.D. 7986, 49 FR 42710, Oct. 24, 1984]

§ 1.280F–5T Leased property (temporary).

(a) *In general.* Except as otherwise provided in this section, the limitation on cost recovery deductions and the investment tax credit provided in section 280F (a) and (b) and §§ 1.280F–2T and 1.280F–3T do not apply to any listed property leased or held for leasing by any person regularly engaged in the business of leasing listed property. If a person is not regularly engaged in the business of leasing listed property, the limitations on cost recovery deductions and the investment tax credit provided in section 280F and §§ 1.280F–2T and 1.280F–3T apply to such property leased or held for leasing by such person. The special rules for lessees set out in this section apply with respect to all lessees of listed property, even those whose lessors are not regularly engaged in the business of leasing listed property. For rules on determining inclusion amounts with respect to passenger automobiles, see paragraphs (d), (e) and (g) of this section, and see § 1.280F–7(a). For rules on determining inclusion amounts with respect to other listed property, see paragraphs (f) and (g) of this section, and see § 1.280F–7(b).

(b) *Section 48(d) election.* If a lessor elects under section 48(d) with respect to any listed property to treat the lessee as having acquired such property, the amount of the investment tax credit allowed to the lessee is subject to the limitation prescribed in § 1.280F–3T(b) (1) and (2). If a lessor elects under section 48(d) with respect to any passenger automobile to treat the lessee as having acquired such automobile, the amount of the investment tax credit allowed to the lessee is also subject to the limitations prescribed in § 1.280F–2T (a) and (i).

(c) *Regularly engaged in the business of leasing.* For purposes of paragraph (a) of this section, a person shall be considered regularly engaged in the business of leasing listed property only if contracts to lease such property are entered into with some frequency over a continuous period of time. The determination shall be made on the basis of the facts and circumstances in each case, taking into account the nature of the person's business in its entirety. Occasional or incidental leasing activity is insufficient. For example, a person leasing only one passenger automobile during a taxable year is not regularly engaged in the business of leasing automobiles. In addition, an employer that allows an employee to use the employer's property for personal purposes and charges such employee for the use of the property is not regularly engaged in the business of leasing with respect to the property used by the employee.

(d) *Inclusions in income of lessees of passenger automobiles leased after June 18, 1984, and before April 3, 1985*—(1) *In general.* If a taxpayer leases a passenger automobile after June 18, 1984, but before April 3, 1985, for each taxable year (except the last taxable year) during which the taxpayer leases the automobile, the taxpayer must include in gross income an inclusion amount (prorated for the number of days of the lease term included in that taxable year), determined under this paragraph (d)(1), and multiplied by the business/investment use (as defined in § 1.280F–6T(d)(3)(i)) for the particular taxable year. The inclusion amount:

(i) Is 7.5 percent of the excess (if any) of the automobile's fair market value over $16,500 for each of the first three taxable years during which a passenger automobile is leased.

(ii) Is 6 percent of the excess (if any) of the automobile's fair market value over $22,500 for the fourth taxable year during which a passenger automobile is leased.

(iii) Is 6 percent of the excess (if any) of the automobile's fair market value over $28,500 for the fifth taxable year during which a passenger automobile is leased.

(iv) Is 6 percent of the excess (if any) of the automobile's fair market value over $34,500 for the sixth taxable year during which a passenger automobile is leased.

For the seventh and subsequent taxable years during which a passenger automobile is leased, the inclusion amount is 6 percent of the excess (if any) of the automobile's fair market value over the sum of (A) $16,500 and (B) $6,000 multiplied by the number of such taxable years in excess of three years. *See* paragraph (g)(2) of this section for the definition of fair market value.

(2) *Additional inclusion amount when less than predominant use in a qualified business use.* (i) If a passenger automobile, which is leased after June 18, 1984, and before April 3, 1985, is not used predominantly in a qualified business use during a taxable year, the lessee must add to gross income in the first taxable year that the automobile is not so used (and only in that year) an inclusion amount determined under this paragraph (d)(2). This inclusion amount is in addition to the amount required to be included in gross income under paragraph (d)(1) of this section.

(ii) If the fair market value (as defined in paragraph (h)(2) of this section) of the automobile is greater than $16,500, the inclusion amount is determined by multiplying the average of the business/investment use (as defined in paragraph (h)(3) of this section) by the appropriate dollar amount from the table in paragraph (d)(2)(iii) of this section. If the fair market value (as defined in paragraph (h)(2) of this section) of the automobile is $16,500 or less, the inclusion amount is the product of the fair market value of the automobile, the average business/investment use, and the applicable percentage from the table in paragraph (d)(2)(iv) of this section.

(iii) The dollar amount is determined under the following table:

If a passenger automobile is not predominantly used in a qualified business use during—	The dollar amount:			
	Lease term (years)			
	1	2	3	4 or more
The first taxable year of the lease term	$350	$700	$1,350	$1,850
The second taxable year of the lease term	....	....	650	1,250
The third taxable year of the lease term	....	....	....	650

(iv) The applicable percentage is determined under the following table:

If a passenger automobile is not predominantly used in a qualified business use during—	The applicable percentage:			
	Lease term (years)			
	1	2	3	4 or more
The first taxable year of the lease term	3.0	6.0	10.2	13.2
The second taxable year of the lease term	....	1.25	6.2	10.4
The third taxable year of the lease term	....	....	2.25	6.5
The fourth taxable year of the lease term	....	....	....	1.7
The fifth taxable year of the lease term	....	....	....	0.5

(e) *Inclusions in income of lessees of passenger automobiles leased after April 2, 1985, and before January 1, 1987*—(1) *In general.* For any passenger automobile that is leased after April 2, 1985, and before January 1, 1987, for each taxable year (except the last taxable year) during which the taxpayer leases the automobile, the taxpayer must include in gross income an inclusion amount determined under subparagraphs (2) through (5) of this paragraph (e). Additional inclusion amounts when a passenger automobile is not used predominantly in a qualified business use during a taxable year are determined under paragraph (e)(6) of this section. *See* paragraph (h)(2) of this section for the definition of fair market value.

(2) *Fair market value not greater than $50,000: years one through three.* For any passenger automobile that has a fair market value not greater than $50,000,

the inclusion amount for each of the first three taxable years during which the automobile is leased is determined as follows:

(i) For the appropriate range of fair market values in the table in paragraph (e)(2)(iv) of this section, select the dollar amount from the column for the quarter of the taxable year in which the automobile is first used under the lease,

(ii) Prorate the dollar amount for the number of days of the lease term included in the taxable year, and

(iii) Multiply the prorated dollar amount by the business/investment use for the taxable year.

(iv) *Dollar amounts: Years 1–3:*

DOLLAR AMOUNTS: YEARS 1–3

Fair market value		Taxable year quarter			
Greater than—	But not greater than—	4th	3d	2d	1st
$11,250	$11,500	$8	$7	$6	$6
11,500	11,750	24	21	19	17

49,000	50,000	4,201	3,726	3,344	3,037

(3) *Fair market value not greater than $50,000: years four through six.* For any passenger automobile that has a fair market value greater than $18,000, but not greater than $50,000, the inclusion amount for the fourth, fifth, and sixth taxable years during which the automobile is leased is determined as follows:

(i) For the appropriate range of fair market values in the table in paragraph (e)(3)(iv) of this section, select the dollar amount from the column for the taxable year in which the automobile is used under the lease,

(ii) Prorate the dollar amount for the number of days of the lease term included in the taxable year, and

(iii) Multiply this dollar amount by the business/investment use for the taxable year.

(iv) Dollar Amounts: Years 4–6:

DOLLAR AMOUNTS: YEARS 4–6

Fair market value		Year		
Greater than—	But not greater than—	4	5	6
$18,000	$18,500	$15	....	....
18,500	19,000	45	....	....

44,000	45,000	1,590	1,302	1,014
45,000	46,000	1,650	1,362	1,074
46,000	47,000	1,710	1,422	1,134
47,000	48,000	1,770	1,482	1,194
48,000	49,000	1,830	1,542	1,254
49,000	50,000	11,890	1,602	1,314

(4) *Fair market value greater than $50,000: years one through six.* (i) For any passenger automobile that has a fair market value greater than $50,000, the inclusion amount for the first six taxable years during which the automobile is leased is determined as follows:

(A) Determine the dollar amount by using the appropriate formula in paragraph (e)(4)(ii) of this section,

(B) Prorate the dollar amount for the number of days of the lease term included in the taxable year, and

(C) Multiply this dollar amount by the business/investment use for the taxable year.

(ii) The dollar amount is computed as follows:

(A) If the automobile is first used under the lease in the fourth quarter of a taxable year, the dollar amount for each of the first three taxable years during which the automobile is leased is the sum of—

(*1*) $124, and

(*2*) 11 percent of the excess of the automobile's fair market value over $13,200.

(B) If the automobile is first used under the lease in the third quarter of a taxable year, the dollar amount for each of the first three taxable years during which the automobile is leased is the sum of—

(*1*) $110, and

(*2*) 10 percent of the excess of the automobile's fair market value over $13,200.

(C) If the automobile is first used under the lease in the second quarter of a taxable year, the dollar amount for each of the first three taxable years during which the automobile is leased is the sum of—

(*1*) $100, and

(*2*) 9 percent of the excess of the automobile's fair market value over $13,200.

(D) If the automobile is first used under the lease in the first quarter of a taxable year, the dollar amount for each of the first three taxable years during which the automobile is leased is the sum of—

(*1*) $90, and

(*2*) 8 percent of the excess of the automobile's fair market value over $13,200.

(E) For the fourth taxable year during which the automobile is leased, the dollar amount is 6 percent of the excess of the automobile's fair market value over $18,000.

(F) For the fifth taxable year during which the automobile is leased, the dollar amount is 6 percent of the excess of the automobile's fair market value over $22,800.

(G) For the sixth taxable year during which the automobile is leased, the dollar amount is 6 percent of the excess of the automobile's fair market value over $27,600.

(5) *Seventh and subsequent taxable years.* (i) For any passenger automobile that has a fair market value less than or equal to $32,400, the inclusion amount for the seventh and subsequent taxable years during which the automobile is leased is zero.

(ii) For any passenger automobile that has a fair market value greater than $32,400, the inclusion amount for the seventh and subsequent taxable years during which the automobile is leased is 6 percent of—

(A) The excess (if any) of the automobile's fair market value, over

(B) The sum of—

(*1*) $13,200 and

(*2*) $4,800 multiplied by the number of taxable years in excess of three years.

(6) *Additional inclusion amount when less than predominant use in a qualified business use.* (i) If a passenger automobile, which is leased after April 2,

1985, and before January 1, 1987, is not predominantly used in a qualified business use during a taxable year, the lessee must add to gross income in the first taxable year that the automobile is not so used (and only in that year) an inclusion amount determined under this paragraph (e)(6). This inclusion amount is in addition to the amount required to be included in gross income under paragraph (e) (2), (3), (4), and (5) of this section.

(ii) If the fair market value (as defined in paragraph (h)(2) of this section) of the automobile is greater than $11,250, the inclusion amount is determined by multiplying the average of the business/investment use (as defined in paragraph (h)(3) of this section) by the appropriate dollar amount from the table in paragraph (e)(6)(iii) of this section. If the fair market value of the automobile is $11,250 or less, the inclusion amount is the product of the fair market value of the automobile, the average business/investment use, and the applicable percentage from the table in paragraph (e)(6)(iv) of this section.

(iii) The dollar amount is determined under the following table:

If a passenger automobile is not predominantly used in a qualified business use during—	The dollar amount is:			
	Lease term (years)—			
	1	2	3	4 or more
The first taxable year of the lease term	$350	$700	$1,150	$1,500
The second taxable year of the lease term	....	150	700	1,200
The third taxable year of the lease term	....	....	250	750

(iv) The applicable percentage is determined under the following table:

If a passenger automobile is not predominantly used in a qualified business use during—	The applicable percentage:			
	Lease term (years)—			
	1	2	3	4 or more
The first taxable year of the lease term	3.0	6.0	10.2	13.2
The second taxable year of the lease term	....	1.25	6.2	10.4
The third taxable year of the lease term	....	....	2.25	6.5
The fourth taxable year of the lease term	....	....	....	1.7
The fifth taxable year of the lease term	....	....	....	0.5

(f) *Inclusions in income of lessees of listed property other than passenger automobiles*—(1) *In general.* If listed property other than a passenger automobile is not used predominantly in a qualified business use in any taxable year in which such property is leased, the lessee must add an inclusion amount to gross income in the first taxable year in which such property is not so predominantly used (and only in that year). This inclusion amount is determined under paragraph (f)(2) of this section for property leased after June 18, 1984, and before January 1, 1987. The inclusion amount is determined under §1.280F–7(b) for property leased after December 31, 1986.

(2) *Inclusion amount for property leased after June 18, 1984, and before January 1, 1987.* The inclusion amount for property leased after June 18, 1984, and before January 1, 1987, is the product of the following amounts:

(i) The fair market value (as defined in paragraph (h)(2) of this section) of the property,

(ii) The average business/investment use (as defined in paragraph (h)(3) of this section), and

(iii) The applicable percentage (as determined under paragraph (f)(3) of this section).

(3) *Applicable percentages.* The applicable percentages for 3-, 5-, and 10-year recovery property are determined according to the following tables:

(i) In the case of 3-year recovery property:

Taxable year during lease term	For the first taxable year in which the business use percentage is 50 percent or less, the applicable percentage for such taxable year is—					
	1	2	3	4	5	6 and later
For a lease term of:						
1 year	3.0	....	....	....	....	....
2 years	6.0	1.25	....	....	....	....
3 years	10.2	6.2	2.25	....	....	....
4 or more years	13.2	10.4	6.5	1.7	0.5	0

(ii) In the case of 5-year recovery property:

Taxable year during lease term	For the first taxable year in which the business use percentage is 50 percent or less, the applicable percentage for such taxable year is—											
	1	2	3	4	5	6	7	8	9	10	11	12
For a lease term of:												
1 year	2.7	....	....	....	....	....	....	....	....	....	....	....
2 years	5.3	1.2	....	....	....	....	....	....	....	....	....	....
3 years	9.9	6.1	1.6	....	....	....	....	....	....	....	....	....
4 years	14.4	11.1	7.3	2.3	....	....	....	....	....	....	....	....
5 years	18.4	15.7	12.4	8.2	3.0	....	....	....	....	....	....	....
6 or more years	21.8	19.6	16.7	13.5	9.6	5.25	4.4	3.6	2.8	1.8	1.0	0

(iii) In the case of 10-year recovery property:

Taxable year during lease term	For the first taxable year in which the business use percentage is 50 pct or less, the applicable percentage for such taxable year is—														
	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
For a lease term of:															
1 year	2.5	....	....	....	....	....	....	....	....	....	....	....	....	....	....
2 years	5.1	.6	....	....	....	....	....	....	....	....	....	....	....	....	....
3 years	9.8	5.6	1.0	....	....	....	....	....	....	....	....	....	....	....	....
4 years	14.0	10.3	6.2	1.4	....	....	....	....	....	....	....	....	....	....	....
5 years	17.9	14.5	10.9	6.7	1.8	....	....	....	....	....	....	....	....	....	....
6 years	21.3	18.3	15.1	11.4	7.1	2.1	....	....	....	....	....	....	....	....	....
7 years	21.9	19.0	15.9	12.4	8.4	3.9	2.4	....	....	....	....	....	....	....	....
8 years	22.4	19.6	16.7	13.4	9.7	5.5	4.5	2.7	....	....	....	....	....	....	....
9 years	22.9	20.2	17.4	14.3	10.9	7.0	6.4	5.1	3.0	....	....	....	....	....	....
10 years	23.5	20.9	18.2	15.2	11.9	8.3	8.1	7.2	5.7	3.3	....	....	....	....	....
11 years	23.9	21.4	18.8	16.0	12.8	9.3	9.4	8.9	7.7	5.9	3.1	....	....	....	....
12 years	24.3	21.9	19.3	16.5	13.4	10.1	10.3	10.0	9.3	7.8	5.5	2.9	....	....	....
13 years	24.7	22.2	19.7	16.9	14.0	10.7	11.1	11.0	10.4	9.2	7.4	5.2	2.7	....	....

15 or more years	25.3	22.8	20.3	17.5	14.7	11.5	12.0	12.2	11.9	11.1	9.8	8.2	6.5	4.5	2.3

(g) *Special rules applicable to inclusions in income of lessees.* This paragraph (g) applies to the inclusions in gross income of lessees prescribed under paragraphs (d)(2), (e)(6), or (f) of this section, or prescribed under § 1.280F–7(b).

(1) *Lease term commences within 9 months of the end of lessee's taxable year.* If:

(i) The lease term commences within 9 months before the close of the lessee's taxable year,

(ii) The property is not predominantly used in a qualified business use during that portion of the taxable year, and

(iii) The lease term continues into the lessee's subsequent taxable year, then the inclusion amount is added to gross income in the lessee's subsequent taxable year and the amount is determined by taking into account the average of the business/investment use for both taxable years and the applicable percentage for the taxable year in which the lease term begins (or, in the case of a passenger automobile with a fair market value greater than $16,500, the appropriate dollar amount for the taxable year in which the lease term begins).

(2) *Lease term less than one year.* If the lease term is less than one year, the amount which must be added to gross income is an amount that bears the same ratio to the inclusion amount determined before the application of this paragraph (g)(2) as the number of days in the lease term bears to 365.

(3) *Maximum inclusion amount.* The inclusion amount shall not exceed the sum of all deductible amounts in connection with the use of the listed property properly allocable to the lessee's taxable year in which the inclusion amount must be added to gross income.

(h) *Definitions*—(1) *Lease term.* In determining the term of any lease for purposes of this section, the rules of section 168(i)(3)(A) shall apply.

(2) *Fair market value.* For purposes of this section, the fair market value of listed property is such value on the first day of the lease term. If the capitalized cost of listed property is specified in the lease agreement, the lessee shall treat such amount as the fair market value of the property.

(3) *Average business/investment use.* For purposes of this section, the average business/investment use of any listed property is the average of the business/investment use for the first taxable year in which the business use percentage is 50 percent or less and all preceding taxable years in which such property is leased. See paragraph (g)(1) of this section for special rule when lease term commences within 9 months before the end of the lessee's taxable year.

(i) *Examples.* This section may be illustrated by the following examples.

Example 1. On January 1, 1985, A, a calendar year taxpayer, leases and places in service a passenger automobile with a fair market value of $55,000. The lease is to be for a period of four years. During taxable years 1985 and 1986, A uses the automobile exclusively in a trade or business. Under paragraph (d)(1) of this section, A must include in gross income in both 1985 and 1986, $2,887.50 (*i.e.*, ($55,000−$16,500)×7.5%).

Example 2. The facts are the same as in *Example (1)*, and in addition, A uses the automobile only 45 percent in a trade or business during 1987. Under paragraph (d)(1) of this section for 1987, A must include in gross income $1,299.38 (*i.e.*, ($55,000−$16,500)×7.5%×45%). In addition, under paragraph (d)(2) of this section, A must also include in gross income in 1987, $530.85 (*i.e.*, $650×81.67%, average business/investment use).

Example 3. On August 1, 1985, B, a calendar year taxpayer, leases and places in service an item of listed property which is 5-year recovery property, with a fair market value of $10,000. The lease is to be for a period of 5 years. B's qualified business use of the property is 40 percent in 1985, 100 percent in 1986, and 90 percent in 1987. Under paragraphs (f)(1) and (g)(1) of this section, before the application of paragraph (g)(3) of this section, B must include in gross income in 1986, $1,288.00 (*i.e.*, $10,000×70%×18.4%, the product of the fair market value, the average business use for both taxable years, and the applicable percentage for year one from the table in paragraph (f)(3)(iii) of this section).

Example 4. On October 1, 1985, C, a calendar year taxpayer, leases and places in service an item of listed property which is 3-year recovery property with a fair market value of $15,000. The lease term is 6 months (ending March 31, 1986) during which C uses the property 45 percent in a trade or business, the only business/investment use. Under paragraphs (f)(1) and (g) (1) and (2) of this section, before the application of paragraph (g)(3) of this section, C must include in gross income in 1986, $100.97 (*i.e.*, $15,000×45%×3%×182/365, the product of the fair market value, the average business use for both taxable years, and the applicable percentage for year one from the table in paragraph (f)(3)(i) of this section, prorated for the length of the lease term).

Example 5. On July 15, 1985, A, a calendar year taxpayer, leases and places in service a passenger automobile with a fair market value of $45,300. The lease is for a period of 5 years, during which A uses the automobile exclusively in a trade or business. Under paragraph (e) (2) and (3) of this section, for taxable years 1985 through 1989, A must include the following amounts in gross income:

Taxable year	Dollar amount	Proration	Business use (percent)	Inclusion
1985	$3,327	170/365	100	$1,550
1986	3,327	365/365	100	3,327
1987	3,327	365/365	100	3,327
1988	1,650	366/366	100	1,650
1989	1,362	365/365	100	1,362

Example 6. The facts are the same as in *Example (1)*, except that A uses the automobile only 45 percent in a trade or business during 1987 through 1990. Under §1.280F–5T(e)(6), A must include in gross income for taxable year 1987, the first taxable year in which the automobile is not used predominantly in a trade or business, an additional amount based on the average business/investment

use for taxable years 1985 through 1987. For taxable years 1985 through 1989, A must include the following amounts in gross income:

Taxable year	Dollar amount	Proration	Business use (percent)	Inclusion
1985	$3,327	170/365	100	$1,550
1986	3,327	365/365	100	3,327
1987	3,327	365/365	45	1,497
	750	....	81.67	612
1988	1,650	366/366	45	743
1989	1,362	365/365	45	613

(98 Stat. 494, 26 U.S.C. 280F; 68A Stat. 917, 26 U.S.C. 7805)

[T.D. 7986, 49 FR 42710, Oct. 24, 1984; as amended by T.D. 8061, 50 FR 46038, Nov. 6, 1985; T.D. 8218, 53 FR 29881, Aug. 9, 1988; T.D. 8473, 58 FR 19060, Apr. 12, 1993]

§ 1.280F–6T Special rules and definitions (temporary).

(a) *Deductions of employee*—(1) *In general.* Employee use of listed property shall not be treated as business/investment use (as defined in paragraph (d)(3) of this section) for purposes of determining the amount of any credit allowable under section 38 to the employee or the amount of any recovery deduction allowable (including any deduction under section 179) to the employee unless that use is for the convenience of the employer and required as a condition of employment.

(2) *''Convenience of the employer'' and ''condition of employment'' requirements*—(i) *In general.* The terms *convenience of the employer* and *condition of employment* generally have the same meaning for purposes of section 280F as they have for purposes of section 119 (relating to the exclusion from gross income for meals or lodging furnished for the convenience of the employer).

(ii) *''Condition of employment.''* In order to satisfy the ''condition of employment'' requirement, the use of the property must be required in order for the employee to perform the duties of his or her employment properly. Whether the use of the property is so required depends on all the facts and circumstances. Thus, the employer need not explicitly require the employee to use the property. Similarly, a mere statement by the employer that the use of the property is a condition of employment is not sufficient.

(iii) *''Convenience of employer''.* [Reserved]

(3) *Employee use.* For purposes of this section, the term *employee use* means any use in connection with the performance of services by the employee as an employee.

(4) *Examples.* The principles of this paragraph are illustrated in the following examples:

Example 1. A is employed as a courier with W, which provides local courier services. A owns and uses a motorcycle to deliver packages to downtown offices for W. W does not provide delivery vehicles and explicitly requires all of its couriers to own a car or motorcycle for use in their employment with the company. A's use of the motorcycle for delivery purposes is for the convenience of W and is required as a condition of employment.

Example 2. B is an inspector for X, a construction company with many construction sites in the local area. B is required to travel to the various construction sites on a regular basis; B uses her automobile to make these trips. Although X does not furnish B an automobile, X does not explicitly require B to use here own automobile. However, X reimburses B for any costs she incurs in traveling to the various job sites. B's use of here automobile in here employment is for the convenience of X and is required as a condition of employment.

Example 3. Assume the same facts as in *Example (2),* except that X makes an automobile available to B who chooses to use her own automobile and receive reimbursement. B's use of her own automobile is not for the convenience of X and is not required as a condition of employment.

Example 4. C is a pilot for Y, a small charter airline. Y requires its pilots to obtain x hours of flight time annually in addition to the number of hours of flight time spent with the airline. Pilots can usually obtain these hours by flying with a military reserve unit or by flying part-time with another airline. C owns his own airplane. C's use of his airplane to obtain the required flight hours is not for the convenience of the employer and is not required as a condition of employment.

Example 5. D is employed as an engineer with Z, an engineering contracting firm. D occasionally takes work home at night rather than working late in the office. D owns and uses a computer which is virtually identical to the one she uses at the office to complete her work at home. D's use of the computer is not for the convenience of here employer and is not required as a condition of employment.

(b) *Listed property*—(1) *In general.* Except as otherwise provided in paragraph (b)(5) of this section, the term *listed property* means:

(i) Any passenger automobile (as defined in paragraph (c) of this section),

(ii) Any other property used as a means of transportation (as defined in paragraph (b)(2) of this section),

(iii) Any property of a type generally used for purposes of entertainment, recreation, or amusement, and

(iv) Any computer or peripheral equipment (as defined in section 168(j)(5)(D)), and

(v) Any other property specified in paragraph (b)(4) of this section.

(2) *Means of transportation*—(i) *In general.* Except as otherwise provided in paragraph (b)(2)(ii) of this section, property used as a *means of transportation* includes trucks, buses, trains, boats, airplanes, motorcycles, and any other vehicles for transporting persons or goods.

(ii) *Exception.* The term *listed property* does not include any vehicle that is a qualified nonpersonal use vehicle as defined in section 274(i) and § 1.274–5T(k).

(3) *Property used for entertainment, etc.*—(i) *In general.* Property of a type generally used for purposes of entertainment, recreation, or amusement includes property such as photographic, phonographic, communication, and video recording equipment.

(ii) *Exception.* The term *listed property* does not include any photographic, phonographic, communication, or video recording equipment of a taxpayer if the equipment is use either exclusively at the taxpayer's regular business establishment or in connection with the taxpayer's principal trade or business.

(iii) *Regular business establishment.* The regular business establishment of an employee is the regular business establishment of the employer of the employee. For purposes of this paragraph (b)(3), a portion of a dwelling unit is treated as a regular business establishment if the requirements of section 280A(c)(1) are met with respect to that portion.

(4) *Other property.* [Reserved]

(5) *Exception for computers.* The term *listed property* shall not include any computer (including peripheral equipment) used exclusively at a regular business establishment. For purposes of the preceding sentence, a portion of a dwelling unit shall be treated as a regular business establishment if (and only if) the requirements of section 280A(c)(1) are met with respect to that portion.

(c) *Passenger automobile*—(1) *In general.* Except as provided in paragraph (c)(3) of this section, the term *passenger automobile* means any 4-wheeled vehicle which is:

(i) Manufactured primarily for use on public streets, roads, and highways, and

(ii) Rated at 6,000 pounds gross vehicle weight or less.

(2) *Parts, etc. of automobile.* The term *passenger automobile* includes any part, component, or other item that is physically attached to the automobile or is traditionally included in the purchase price of an automobile. The term does not include repairs that are not capital expenditures within the meaning of section 263.

(3) *Exception for certain vehicles.* The term *passenger automobile* shall not include any:

(i) Ambulance, hearse, or combination ambulance-hearse used by the taxpayer directly in a trade or business,

(ii) Vehicle used by the taxpayer directly in the trade or business of transporting persons or property for compensation or hire, or

(iii) Commuter highway vehicle as defined in section 46(c)(6)(B).

(d) *Business use percentage*—(1) *In general.* The term *business use percentage* means the percentage of the use of any listed property which is qualified business use as described in paragraph (d)(2) of this section.

(2) *Qualified business use*—(i) *In general.* Except as provided in paragraph (d)(2)(ii) of this section, the term *qualified business use* means any use in a trade or business of the taxpayer. The term *qualified business use* does not include use for which a deduction is allowable under section 212. Whether the amount of qualified business use exceeds 50 percent is determinative of whether the investment tax credit and

the accelerated percentages under section 168 are available for listed property (or must be recaptured). *See* § 1.280F–3T.

(ii) *Exception for certain use by 5-percent owners and related persons*)—(A) *In general.* The term *qualified business use* shall not include:

(*1*) Leasing property to any 5-percent owner or related person,

(*2*) Use of property provided as compensation for the performance of services by a 5-percent owner or related person, or

(*3*) Use of property provided as compensation for the performance of services by any person not described in paragraph (d)(2)(ii)(A)(*2*) of this section unless an amount is properly reported by the taxpayer as income to such person and, where required, there was withholding under chapter 24.

Paragraph (d)(2)(ii)(A)(*1*) of this section shall apply only to the extent that the use of the listed property is by an individual who is a related party or a 5-percent owner with respect to the owner or lessee of the property.

(B) *Special rule for aircraft.* Paragraph (d)(2)(ii)(A) of this section shall not apply with respect to any aircraft if at least 25 percent of the total use of the aircraft during the taxable year consists of qualified business use not described in paragraph (d)(2)(ii)(A).

(C) *Definitions.* For purposes of this paragraph:

(*1*) *5-percent owner.* The term *5-percent owner* means any person who is a 5-percent owner with respect to the taxpayer (as defined in section 416 (i)(1)(B)(i)).

(*2*) *Related person.* The term *related person* means any person related to the taxpayer (within the meaning of section 267(b)).

(3) *Business/investment use*—(i) *In general.* The term *business/investment use* means the total business or investment use of listed property that may be taken into account for purposes of computing (without regard to section 280F(b)) the percentage of investment tax credit or cost recovery deduction for a passenger automobile or other listed property for the taxable year. Whether the investment tax credit and the accelerated percentages under section 168 (as opposed to use of the straight line method of cost recovery) are available with respect to listed property or must be recaptured is determined, however, by reference to qualified business use (as defined in paragraph (d)(2) of this section) rather than by reference to business/investment use. Whether a particular use of property is a business or investment use shall generally be determined under the rules of section 162 or 212.

(ii) *Entertainment use.* The use of listed property for entertainment, recreation, or amusement purposes shall be treated as business use to the extent that expenses (other than interest and property tax expenses) attributable to that use are deductible after application of section 274.

(iii) *Employee use.* See paragraph (a) of this section for requirements to be satisfied for employee use of listed property to be considered business/investment use of the property.

(iv) *Use of taxpayer's automobile by another person.* Any use of the taxpayer's automobile by another person shall not be treated, for purposes of section 280F, as use in a trade or business under section 162 unless that use:

(A) Is directly connected with the business of the taxpayer,

(B) Is properly reported by the taxpayer as income to the other person and, where required, there was withholding under chapter 24, or

(C) Results in a payment of fair market rent.

For purposes of this paragraph (d)(4)(iv)(C), payment to the owner of the automobile in connection with such use is treated as the payment of rent.

(4) *Predominantly used in qualified business use*—(i) *Definition.* Property is predominantly used in a qualified business use for any taxable year if the business use percentage (as defined in paragraph (d)(1) of this section) is greater than 50 percent.

(ii) *Special rule for transfers at death.* Property does not cease to be used predominantly in a qualified business use by reason of a transfer at death.

(iii) *Other dispositions of property.* [Reserved]

(5) *Examples.* The following examples illustrate the principles set forth in this paragraph.

Example 1. E uses a home computer 50 percent of the time to manage her investments. The computer is listed property within the meaning of section 280F(d)(4). E also uses the computer 40 percent of the time in her part-time consumer research business. Because E's business use percentage for the computer does not exceed 50 percent, the computer is not predominantly used in a qualified business use for the taxable year. Her aggregate business/investment use for purposes of determining the percent of the total allowable straight line depreciation that she can claim is 90 percent.

Example 2. Assume that E in *Example (1)* uses the computer 30 percent of the time to manage her investments and 60 percent of the time in her consumer research business. E's business use percentage exceeds 50 percent. Her aggregrate business/investment use for purposes of determining her allowable investment tax credit and cost recovery deductions is 90 percent.

Example 3. F is the proprietor of a plumbing contracting business. F's brother is employed with F's company. As part of his compensation, F's brother is allowed to use one of the company automobiles for personal use. The use of the company automobiles by F's brother is not a qualified business use because F and F's brother are related parties within the meaning of section 267(b).

Example 4. F, in *Example (3),* allows employees unrelated to him to use company automobiles as part of their compensation. F, however, does not include the value of these automobiles in the employees' gross income and F does not withhold with respect to the use of these automobiles. The use of the company automobiles by the employees in this case is not business/investment use.

Example 5. X Corporation owns several automobiles which its employees use for business purposes. The employees are also allowed to take the automobiles home at night. However, the fair market value of the use of the automobile for any personal purpose, *e.g.,* commuting to work, is reported by X as income to the employee and is withheld upon by X. The use of the automobile by the employee, even for personal purposes, is a qualified business use the respect to X.

(e) *Method of allocating use of property*—(1) *In general.* For purposes of section 280F, the taxpayer shall allocate the use of any listed property that is used for more than one purpose during the taxable year to the various uses in the manner prescribed in paragraph (e) (2) and (3) of this section.

(2) *Passenger automobiles and other means of transportation.* In the case of a passenger automobile or any other means of transportation, the taxpayer shall allocate the use of the property on the basis of mileage. Thus, the percentage of use in a trade or business for the year shall be determined by dividing the number of miles the vehicle is driven for purposes of that trade or business during the year by the total number of miles the vehicle is driven during the year for any purpose.

(3) *Other listed property.* In the case of other listed property, the taxpayer shall allocate the use of that property on the basis of the most appropriate unit of time the property is actually used (rather than merely being available for use). For example, the percentage of use of a computer in a trade or business for a taxable year is determined by dividing the number of hours the computer is used for business purposes during the year by the total number of hours the computer is used for any purpose during the year.

(98 Stat. 494, 26 U.S.C. 280F; 68A Stat. 917, 26 U.S.C. 7805)

[T.D. 7986, 49 FR 42713, Oct. 24, 1984, as amended by T.D. 8061, 50 FR 46041, Nov. 6, 1985]

§1.280F–7 Property leased after December 31, 1986.

(a) *Inclusions in income of lessees of passenger automobiles leased after December 31, 1986*—(1) *In general.* If a taxpayer leases a passenger automobile after December 31, 1986, the taxpayer must include in gross income an inclusion amount determined under this paragraph (a), for each taxable year during which the taxpayer leases the automobile. This paragraph (a) applies only to passenger automobiles for which the taxpayer's lease term begins after December 31, 1986. See §§1.280F–5T(d) and 1.280F–5T(e) for rules on determining inclusion amounts for passenger automobiles for which the taxpayer's lease term begins before January 1, 1987. See §1.280F–5T(h)(2) for the definition of fair market value.

(2) *Inclusion Amount.* For any passenger automobile leased after December 31, 1986, the inclusion amount for each taxable year during which the automobile is leased is determined as follows:

(i) For the appropriate range of fair market values in the applicable table, select the dollar amount from the column for the taxable year in which the automobile is used under the lease (but for the last taxable year during any lease that does not begin and end in the same taxable year, use the dollar amount for the preceding taxable year).

(ii) Prorate the dollar amount for the number of days of the lease term included in the taxable year.

(iii) Multiply the prorated dollar amount by the business/investment use (as defined in §1.280F–6T(d)(3)(i)) for the taxable year.

(iv) The following table is the applicable table in the case of a passenger automobile leased after December 31, 1986, and before January 1, 1989:

DOLLAR AMOUNTS FOR AUTOMOBILES WITH A LEASE TERM BEGINNING IN CALENDAR YEAR 1987 OR 1988

Fair market value of automobile	Taxable year during lease					
	1st	2nd	3rd	4th	5 and later	
Over	Not over					
$12,800	$13,100	$2	$5	$7	$8	$9
13,100	13,400	6	14	20	24	28

(v) The applicable table in the case of a passenger automobile first leased after December 31, 1988, will be contained in a revenue ruling or revenue procedure published in the Internal Revenue Bulletin.

(3) *Example.* The following example illustrates the application of this paragraph (a):

Example. On April 1, 1987, A, a calendar year taxpayer, leases and places in service a passenger automobile with a fair market value of $31,500. The lease is to be for a period of three years. During taxable years 1987 and 1988, A uses the automobile exclusively in a trade or business. During 1989 and 1990, A's business/investment use is 45 percent. The appropriate dollar amounts from the table in paragraph (a)(2)(iv) of this section are $260 for 1987 (first taxable year during the lease), $568 for 1988 (second taxable year during the lease), $842 for 1989 (third taxable year during the lease), and $842 for 1990. Since 1990 is the last taxable year during the lease, the dollar amount for the preceding year (the third year) is used, rather than the dollar amount for the fourth year. For taxable years 1987 through 1990, A's inclusion amounts are determined as follows:

Tax year	Dollar amount	Proration	Business use (percent)	Inclusion amount
1987	$260	275/365	100	$196
1988	568	366/366	100	568
1989	842	365/365	45	379
1990	842	90/365	45	93

(b) *Inclusions in income of lessees of listed property (other than passenger automobiles) leased after December 31, 1986*—(1) *In general.* If listed property other than a passenger automobile is not used predominantly in a qualified business use in any taxable year in which such property is leased, the lessee must add an inclusion amount to gross income in the first taxable year in which such property is not so predominantly used (and only in that year). This year is the first taxable year in which the business use percentage (as defined in §1.280F–6T(d)(1)) of the property is 50 percent or less. This inclusion amount is determined under this paragraph (b) for property for which the taxpayer's lease term begins after December 31, 1986 (and under §1.280F–5T(f) for property for which the taxpayer's lease term begins before January 1, 1987). See also §1.280F–5T(g).

(2) *Inclusion amount.* The inclusion amount for any listed property (other than a passenger automobile) leased after December 31, 1986, is the sum of the amounts determined under subdivisions (i) and (ii) of this subparagraph (2).

(i) The amount determined under this subdivision (i) is the product of the following amounts:

(A) The fair market value (as defined in §1.280F–5T(h)(2)) of the property,

(B) The business/investment use (as defined in §1.280F–6T(d)(3)(i)) for the first taxable year in which the business use percentage (as defined in §1.280F–6T(d)(1)) is 50 percent or less, and

(C) The applicable percentage from the following table:

Type of property	First taxable year during lease in which business use percentage is 50% or less											
	1	2	3	4	5	6	7	8	9	10	11	12 and Later
Property with a recovery period of less than 7 years under the alternative depreciation system (such as computers, trucks and airplanes)	2.1	−7.2	−19.8	−20.1	−12.4	−12.4	−12.4	−12.4	−12.4	−12.4	−12.4	−12.4
Property with a 7- to 10-year recovery period under the alternative depreciation system (such as recreation property)	3.9	−3.8	−17.7	−25.1	−27.8	−27.2	−27.1	−27.6	−23.7	−14.7	−14.7	−14.7
Property with a recovery period of more than 10 years under the alternative depreciation system (such as certain property with no class life)	6.6	−1.6	−16.9	−25.6	−29.9	−31.1	−32.8	−35.1	−33.3	−26.7	−19.7	−12.2

(ii) The amount determined under this subdivision (ii) is the product of the following amounts:

(A) The fair market value of the property,

(B) The average of the business/investment use for all taxable years (in which such property is leased) that precede the first taxable year in which the business use percentage is 50 percent or less, and

(C) The applicable percentage from the following table:

Type of property	First taxable year during lease in which business use percentage is 50% or less											
	1	2	3	4	5	6	7	8	9	10	11	12 and Later
Property with a recovery period of less than 7 years under the alternative depreciation system (Such as computers, trucks and airplanes)	0.0	10.0	22.0	21.2	12.7	12.7	12.7	12.7	12.7	12.7	12.7	12.7
Property with a 7- to 10-year recovery period under the alternative depreciation system (such as recreation property)	0.0	9.3	23.8	31.3	33.8	32.7	31.6	30.5	25.0	15.0	15.0	15.0
Property with a recovery period of more than 10 years under the alternative depreciation system (such as certain property with no class life)	0.0	10.1	26.3	35.4	39.6	40.2	40.8	41.4	37.5	29.2	20.8	12.5

(3) *Example.* The following example illustrates the application of this paragraph (b):

Example. On February 1, 1987, B, a calendar year taxpayer, leases and places in service a computer with a fair market value of $3,000. The lease is to be for a period of two years. B's qualified business use of the property, which is the only business/investment use, is 80 percent in taxable year 1987, 40 percent in taxable year 1988, and 35 percent in taxable year 1989. B must add an inclusion amount to gross income for taxable year 1988, the first taxable year in which B does not use the computer predominantly for business (*i.e.*, the first taxable year in which B's business use percentage is 50 percent or less). Since 1988 is the second taxable year during the lease, and since the computer has a 5-year recovery period under the General and Alternative Depreciation Systems, the applicable percentage from the table in subdivision (i) of paragraph (b)(2) is −7.2%, and the applicable percentage from the table in subdivision (ii) is 10%. B's inclusion amount is $154, which is the sum of the amounts determined under subdivisions (i) and (ii) of subparagraph (b)(2) of this paragraph. The amount determined under subdivision (i) is −$86 [$3,000 × 40% × (−7.2%)], and the amount determined under subdivision (ii) is $240 [$3,000 × 80% × 10%].

[T.D. 8205, 53 FR 19711, May 27, 1988]

§1.280H–1T Limitation on certain amounts paid to employee-owners by personal service corporations electing alternative taxable years (temporary).

(a) *Introduction.* This section applies to any taxable year that a personal service corporation has a section 444 election in effect (an ‘‘applicable election year’’). For purposes of this section, the term *personal service corporation* has the same meaning given such term in §1.441–4T(d).

(b) *Limitation on certain deductions of personal service corporations*—(1) *In general.* If, for any applicable election year, a personal service corporation does not satisfy the minimum distribution requirement in paragraph (c) of this section, the deduction otherwise allowable under chapter 1 of the Internal Revenue Code of 1986 (the Code) for applicable amounts, as defined in paragraph (b)(4) of this section, shall not exceed the maximum deductible amount, as defined in paragraph (d) of this section.

(2) *Carryover of nondeductible amounts.* Any amount not allowed as a deduction in an applicable election year under paragraph (b)(1) of this section shall be allowed as a deduction in the succeeding taxable year.

(3) *Disallowance inapplicable for certain purposes.* The disallowance of deductions under paragraph (b)(1) of this section shall not apply for purposes of subchapter G of chapter 1 of the Code (relating to corporations used to avoid income tax on shareholders) nor for determining whether the compensation of employee-owners is reasonable. Thus, for example, in determining whether a personal service corporation is subject to the accumulated earnings tax imposed by section 531, deductions disallowed under paragraph (b)(1) of this section are treated as allowed in computing accumulated taxable income.

(4) *Definition of applicable amount*—(i) *In general.* For purposes of section 280H and the regulations thereunder, the term *applicable amount* means, with respect to a taxable year, any amount that is otherwise deductible by a personal service corporation in such year and includable at any time, directly or indirectly, in the gross income of a taxpayer that during such year is an employee-owner. Thus, an amount includable in the gross income of an employee-owner will be considered an applicable amount even though such employee owns no stock of the corporation on the date the employee includes the amount in income. See *Example (1)* in paragraph (b)(4)(iii) of this section.

(ii) *Special rule for certain indirect payments.* For purposes of paragraph (b)(4)(i) of this section, amounts are indirectly includable in the gross income of an employee-owner of a personal service corporation that has made a section 444 election (an electing personal service corporation) if the amount is includable in the gross income of—

(A) The spouse (other than a spouse who is legally separated from the partner or shareholder under a decree of divorce or separate maintenance) or child (under age 14) of such employee-owner, or

(B) A corporation more than 50 percent (measured by fair market value) of which is owned in the aggregate by employee-owners (and individuals related under paragraph (b)(4)(ii)(A) of this section to such employee-owners), of the electing personal service corporation, or

(C) A partnership more than 50 percent of the profits and capital of which is owned by employee-owners (and individuals related under paragraph (b)(4)(ii)(A) of this section to such employee-owners) of the electing personal service corporation, or

(D) A trust more than 50 percent of the beneficial ownership of which is owned in the aggregate by employee-owners (and individuals related under paragraph (b)(4)(ii)(A) of this section to any such employee-owners), of the electing personal service corporation.

For purposes of this paragraph (b)(4)(ii), ownership by any person described in this paragraph (b)(4)(ii) shall be treated as ownership by the employee-owners of the electing personal service corporation. Paragraph (b)(4)(ii)(B) of this section will not apply if the corporation has made a section 444 election to use the same taxable year as that of the electing personal service corporation. Similarly, paragraph (b)(4)(ii)(C) of this section will not apply if the partnership has made a section 444 election to use the same taxable year as that of the electing personal service corporation. Notwithstanding the general effective date provision of paragraph (f) of this section, this paragraph (b)(4)(ii) is effective for amounts deductible on or after June 1, 1988.

(iii) *Example.* The provisions of paragraph (b)(4) of this section may be illustrated by the following examples.

Example 1. A is an employee of P, an accrual basis personal service corporation with a taxable year ending September 30. P makes a section 444 election for its taxable year beginning October 1, 1987. On October 1, 1987, A owns no stock of P; However, on March 31, 1988, A acquires 10 of the 200 outstanding shares of P stock. During the period October 1, 1987 to March 31, 1988, A earned $40,000 of compensation as an employee of P. During the period April 1, 1988 to September 30 1988, A earned $60,000 of compensation as an employee-owner of P. If paragraph (b) of this section does not apply, P would deduct for its taxable year ended September 30, 1988 the $100,000 earned by A during such year. Based upon these facts, the $100,000 otherwise deductable amount is considered an applicable amount under this section.

Example 2. I1 and I2, calendar year individuals, are employees of PSC1, a personal service corporation that has historically used a taxable year ending January 31. I1 and I2 also own all the stock, and are employees, of PSC2, a calendar year personal service corporation. For its taxable years beginning February 1, 1987, 1988, and 1989, PSC1 has a section 444 election in effect to use a January 31 taxable year. During its taxable years beginning February 1, 1986, 1987, and 1988, PSC1 deducted $10,000, $11,000, and $12,000, respectively, that was included in PSC2's gross income. Furthermore, of the $12,000 deducted by PSC1 for its taxable year beginning February 1, 1988, $7,000 was deducted during the period June 1, 1988 to January 31, 1989. Pursuant to paragraph (b)(4)(ii)(B) of this section, the $7,000 deducted by PSC1 on or after June 1, 1988, and included in PSC2's gross income is considered an applicable amount for PSC1's taxable year beginning February 1, 1988. Amounts deducted by PSC1 prior to June 1, 1988, are not subject to paragraph (b)(4)(ii)(B) of this section.

Example 3. The facts are the same as in *Example (2),* except that for its taxable years beginning February 1, 1987, 1988, and 1989, PSC2 has a section 444 election in effect to use a January 31 taxable year. Since both PSC1 and PSC2 have the same taxable year and both have section 444 elections in effect, paragraph (b)(4)(ii)(B) of this section does not apply to the $7,000 deducted by PSC1 for its taxable year beginning February 1, 1988.

(c) *Minimum distribution requirement*—(1) *Determination of whether requirement satisfied*—(i) *In general.* A personal service corporation meets the minimum distribution requirement of this paragraph (c) for an applicable election year if, during the deferral period of such taxable year, the applicable amounts (determined without regard to paragraph (b)(2) of this section) for all employee-owners in the aggregate equal or exceed the lesser of—

(A) The amount determined under the ''preceding year test'' (see paragraph (c)(2) of this section), or

(B) The amount determined under the ''3-year average test'' (see paragraph (c)(3) of this section).

The following example illustrates the application of this paragraph (c)(1)(i).

Example. Q, an accrual-basis personal service corporation, makes a section 444 election to retain a year ending January 31 for its taxable year beginning February 1, 1987. Q has 4 employee-owners, B, C, D, and E. For Q's applicable election year beginning February 1, 1987 and ending January 31, 1988, B earns $6,000 a month plus a $45,000 bonus on January 15, 1988; C earns $5,000 a month plus a $40,000 bonus on January 15, 1988; D and E each earn $4,500 a month plus a $4,000 bonus on January 15, 1988. Q meets the minimum distribution requirement for such applicable election year if the applicable amounts during the deferral period (*i.e.*, $220,000) equal or exceed the amount determined under the preceding year test or the 3-year average test.

(ii) *Employee-owner defined.* For purposes of section 280H and the regulations thereunder, a person is an employee-owner of a corporation for a taxable year if—

(A) On any day of the corporation's taxable year, the person is an employee of the corporation or performs personal services for or on behalf of the corporation, even if the legal form of that person's relationship to the corporation is that of an independent contractor, and

(B) On any day of the corporation's taxable year, the person owns any outstanding stock of the corporation.

(2) *Preceding year test*—(i) *In general.* The amount determined under the preceding year test is the product of—

(A) The applicable amounts during the taxable year preceding the applicable election year (the ''preceding taxable year''), divided by the number of months (but not less than one) in the preceding taxable year, multiplied by

(B) The number of months in the deferral period of the applicable election year.

(ii) *Example.* The provisions of paragraph (c)(2) of this section may be illustrated by the following example.

Example. R, a personal service corporation, has historically used a taxable year ending January 31. For its taxable year beginning February 1, 1987, R makes a section 444 election to retain its January 31 taxable year. R is an accrual basis taxpayer and has one employee-owner, F. For R's taxable year ending January 31, 1987, F earns $5,000 a month plus a $40,000 bonus on January 15, 1987. The amount determined under the preceding year test for R's applicable election year beginning February 1, 1987 is $91,667 ($100,000, the applicable amounts during R's taxable year ending January 31, 1987, divided by 12, the number of months in R's taxable year ending January 31, 1987, multiplied by 11, the number of months in R's deferral period for such year).

(3) *3-year average test*—(i) *In general.* The amount determined under the 3-year average test is the applicable percentage multiplied by the adjusted taxable income for the deferral period of the applicable election year.

(ii) *Applicable percentage.* The term *applicable percentage* means the percentage (not in excess of 95 percent) determined by dividing—

(A) The applicable amounts during the 3 taxable years of the corporation (or, if fewer, the taxable years the corporation has been in existence) immediately preceding the applicable election year, by

(B) The adjusted taxable income of such corporation for such 3 taxable years (or, if fewer, the taxable years of existence).

(iii) *Adjusted taxable income*—(A) *In general.* The term *adjusted taxable income* means taxable income determined without regard to applicable amounts.

(B) *Determination of adjusted taxable income for the deferral period of the applicable election year.* Adjusted taxable income for the deferral period of the applicable election year equals the adjusted taxable income that would result if the personal service corporation filed an income tax return for the deferral period of the applicable election year under its normal method of accounting. However, a personal service corporation may make a reasonable estimate of such amount.

(C) *NOL carryovers.* For purposes of determining adjusted taxable income for any period, any NOL carryover shall be reduced by the amount of such carryover that is attributable to the deduction of applicable amounts. The portion of the NOL carryover attributable to the deduction of applicable amounts is the difference between the NOL carryover computed with the deduction of such amounts and the NOL carryover computed without the deduction of such amounts. For purposes of determining the adjusted taxable income for the deferral period, an NOL carryover to the applicable election year, reduced as provided in this paragraph (c)(3)(iii)(C), shall be allowed first against the income of the deferral period.

(D) *Examples.* The provisons of this paragraph (c)(3)(iii) may be illustrated by the following examples.

Example 1. S is a personal service corporation that has historically used a taxable year ending January 31. For its taxable year beginning February 1, 1987, S makes a section 444 election to retain its taxable year ending January 31. S does not satisfy the minimum distribution requirement for its first applicable election year, and the applicable amounts for that year exceed the maximum deductible amount by $54,000. Under paragraph (b)(2) of this section, the $54,000 excess is carried over to S's taxable year beginning February 1, 1988. Furthermore, if S continues its section 444 election for its taxable year beginning February 1, 1988, and desires to use the 3-year average test provided in this paragraph for such year, pursuant to paragraph (c)(3)(iii)(A) of this section the $54,000 will not be allowed to reduce adjusted taxable income for such year. See also section 280H(e) regarding the disallowance of net operating loss carrybacks to (or from) any taxable year of a corporation personal service election under section 444 applies.

Example 2. T, a personal service corporation with a section 444 election in effect, is determining whether it satisfies the 3-year average test for its second applicable election year. T had a net operating loss (NOL) for its first applicable election year of $45,000. The NOL resulted from $150,000 of gross income less the sum of $96,000 of salary, $45,000 of other expenses, and $54,000 of deductible applicable amounts. Pursuant to paragraph (c)(3)(iii)(C) of this section, the entire amount of the $45,000 NOL is attributable to applicable amounts since the applicable amounts deducted in arriving at the NOL (*i.e.*, $54,000) were greater than the NOL (*i.e.*, $45,000). Thus, for purposes of computing the adjusted taxable income for the deferral period of T's second applicable election year, the NOL carryover to that year is $0 ($45,000 NOL less $45,000 amount of NOL attributable to applicable amounts).

(d) *Maximum deductible amount*—(1) *In general.* For purposes of this section, the term *maximum deductible amount* means the sum of—

(i) The applicable amounts during the deferral period of the applicable election year, plus

(ii) An amount equal to the product of—

(A) The amount determined under paragraph (d)(1)(i) of this section divided by the number of months in the deferral period of the applicable election year, multiplied by

(B) The number of months in the nondeferral period of the applicable election year. For purposes of the preceding sentence, the term *nondeferral period* means the portion of the applicable election year that occurs after the portion of such year constituting the deferral period.

(2) *Example.* The provisions of paragraph (d)(1) of this section may be illustrated by the following example.

Example. U, an accrual basis personal service corporation with a taxable year ending January 31, makes a section 444 election to retain a year ending January 31 for its taxable year beginning February 1, 1987. For its applicable election year beginning February 1, 1987, U does not satisfy the minimum distribution requirement in paragraph (c) of this section. Furthermore, U has 3 employee-owners, G, H, and I. G and H have been employee-owners of U for 10 years. Although I has been an employee of U for 4 years, I did not become an employee-owner until December 1, 1987, when I acquired 5 of the 20 outstanding shares of U stock. For U's applicable election year beginning February 1, 1987, G earns $5,000 a month plus a $40,000 bonus on January 15, 1988, and H and I each earn $4,000 a month plus a $32,000 bonus on January 15, 1988. Thus, the total of the applicable amounts during the deferral period of the applicable election year beginning February 1, 1987 is $143,000. Based on these facts, U's deduction for applicable amounts is limited to $156,000, determined as follows—$143,000 (applicable amounts during the deferral period) plus $13,000 (applicable amounts during the deferral period, divided by the number of months in the deferral period, multiplied by the number of months in the nondeferral period).

(e) *Special rules and definition*—(1) *Newly organized personal service corporations.* A personal service corporation is deemed to satisfy the preceding year test and the 3-year average test for the first year of the corporation's existence.

(2) *Existing corporations that become personal service corporations.* If an existing corporation becomes a personal service corporation and makes a section 444 election, the determination of whether the corporation satisfies the preceding year test and the 3-year average test is made by treating the corporation as though it were a personal service corporation for each of the 3 years preceding the applicable election year.

(3) *Disallowance of NOL carryback.* No net operating loss carryback shall be allowed to (or from) any applicable election year of a personal service corporation.

(4) *Deferral period.* For purposes of section 280H and the regulations thereunder, the term *deferral period* has the same meaning as under § 1.444–1T(b)(4).

(5) *Examples.* The provisions of this paragraph (e) may be illustrated by the following examples.

Example 1. V is a personal service corporation with a taxable year ending September

30. V makes a section 444 election for its taxable year beginning October 1, 1987, and incurs a net operating loss (NOL) for such year. Because an NOL is not allowed to be carried back from an applicable election year, V may not carry back the NOL from its first applicable election year to reduce its 1985, 1986, or 1987 taxable income.

Example 2. W, a personal service corporation, commences operations on July 1, 1990. Furthermore, for its taxable year beginning July 1, 1990, W makes a section 444 election to use a year ending September 30. Pursuant to paragraph (e)(1) of this section, W satisfies the preceding year test and the 3-year average test for its first year in existence. Thus, W may deduct, without limitation under this section, any applicable amounts for its taxable year beginning July 1, 1990.

Example 3. The facts are the same as in *Example (2)*. For its taxable year beginning October 1, 1990, W incurs an NOL and is not a personal service corporation. Furthermore, W desires to carry back the NOL to its preceding taxable year (a year that was an applicable election year). Pursuant to paragraph (e)(3) of this section, W may not carry back an NOL ‘‘to’’ its taxable year beginning July 1, and ending September 30, 1990, because such year was an applicable election year.

(f) *Effective date.* The provisions of this section are effective for taxable years beginning after December 31, 1986.

[T.D. 8205, 53 FR 19711, May 27, 1988]

TAXABLE YEARS BEGINNING PRIOR TO JANUARY 1, 1986

§1.274–5A Substantiation requirements.

(a) *In general.* No deduction shall be allowed for any expenditure with respect to:

(1) Traveling away from home (including meals and lodging) deductible under section 162 or 212,

(2) Any activity which is of a type generally considered to constitute entertainment, amusement, or recreation, or with respect to a facility used in connection with such an activity, including the items specified in section 274(e), or

(3) Gifts defined in section 274, unless the taxpayer substantiates such expenditure as provided in paragraph (c) of this section. This limitation supersedes with respect to any such expenditure the doctrine of Cohan v. Commissioner (C.C.A. 2d 1930) 39 F. 2d 540. The decision held that, where the evidence indicated a taxpayer incurred deductible travel or entertainment expense but the exact amount could not be determined, the court should make a close approximation and not disallow the deduction entirely. Section 274(d) contemplates that no deduction shall be allowed a taxpayer for such expenditures on the basis of such approximations or unsupported testimony of the taxpayer. For purposes of this section, the term *entertainment* means entertainment, amusement, or recreation, and use of a facility therefore; and the term *expenditure* includes expenses and items (including items such as losses and depreciation).

(b) *Elements of an expenditure*—(1) *In general.* Section 274(d) and this section contemplate that no deduction shall be allowed for any expenditure for travel, entertainment, or a gift unless the taxpayer substantiates the following elements for each such expenditure:

(i) Amount;

(ii) Time and place of travel or entertainment (or use of a facility with respect to entertainment), or date and description of a gift;

(iii) Business purpose; and

(iv) Business relationship to the taxpayer of each person entertained, using an entertainment facility or receiving a gift.

(2) *Travel.* The elements to be proved with respect to an expenditure for travel are:

(i) *Amount.* Amount of each separate expenditure for traveling away from home, such as cost of transportation or lodging, except that the daily cost of the traveler's own breakfast, lunch, and dinner and of expenditures incidental to such travel may be aggregated, if set forth in reasonable categories, such as for meals, for gasoline and oil, and for taxi fares;

(ii) *Time.* Dates of departure and return for each trip away from home, and number of days away from home spent on business;

(iii) *Place.* Destinations or locality of travel, described by name of city or town or other similar designation; and

(iv) *Business purpose.* Business reason for travel or nature of the business benefit derived or expected to be derived as a result of travel.

(3) *Entertainment in general.* Elements to be proved with respect to an expenditure for entertainment are:

(i) *Amount.* Amount of each separate expenditure for entertainment, except that such incidental items as taxi fares or telephone calls may be aggregated on a daily basis;

(ii) *Time.* Date of entertainment;

(iii) *Place.* Name, if any, address or location, and designation of type of entertainment, such as dinner or theater, if such information is not apparent from the designation of the place;

(iv) *Business purpose.* Business reason for the entertainment or nature of business benefit derived or expected to be derived as a result of the entertainment and, except in the case of business meals described in section 274(e)(1), the nature of any business discussion or activity;

(v) *Business relationship.* Occupation or other information relating to the person or persons entertained, including name, title, or other designation, sufficient to establish business relationship to the taxpayer.

(4) *Entertainment directly preceding or following a substantial and bona fide business discussion.* If a taxpayer claims a deduction for entertainment directly preceding or following a substantial and bona fide business discussion on the ground that such entertainment was associated with the active conduct of the taxpayer's trade or business, the elements to be proved with respect to such expenditure, in addition to those enumerated in subparagraph (3)(i), (ii), (iii), and (v) of this paragraph, are:

(i) *Time.* Date and duration of business discussion;

(ii) *Place.* Place of business discussion;

(iii) *Business purpose.* Nature of business discussion, and business reason for the entertainment or nature of business benefit derived or expected to be derived as the result of the entertainment;

(iv) *Business relationship.* Identification of those persons entertained who participated in the business discussion.

(5) *Gifts.* Elements to be proved with respect to an expenditure for a gift are:

(i) *Amount.* Cost of the gift to the taxpayer;

(ii) *Time.* Date of the gift;

(iii) *Description.* Description of the gift;

(iv) *Business purpose.* Business reason for the gift or nature of business benefit derived or expected to be derived as a result of the gift; and

(v) *Business relationship.* Occupation or other information relating to the recipient of the gift, including name, title, or other designation, sufficient to establish business relationship to the taxpayer.

(c) *Rules for substantiation*—(1) *In general.* A taxpayer must substantiate each element of an expenditure (described in paragraph (b) of this section) by adequate records or by sufficient evidence corroborating his own statement except as otherwise provided in this section. Section 274(d) contemplates that a taxpayer will maintain and produce such substantiation as will constitute clear proof of an expenditure for travel, entertainment, or gifts referred to in section 274. A record of the elements of an expenditure made at or near the time of the expenditure, supported by sufficient documentary evidence, has a high degree of credibility not present with respect to a statement prepared subsequent thereto when generally there is a lack of accurate recall. Thus, the corroborative evidence required to support a statement not made at or near the time of the expenditure must have a high degree of probative value to elevate such statement and evidence to the level of credibility reflected by a record made at or near the time of the expenditure supported by sufficient documentary evidence. The substantiation requirements of section 274(d) are designed to encourage taxpayers to maintain the records, together with documentary evidence, as provided in subparagraph (2) of this paragraph. To obtain a deduction for an expenditure for travel, entertainment, or gifts, a taxpayer must substantiate, in accordance with the provisions of this paragraph, each element of such an expenditure.

(2) *Substantiation by adequate records*—(i) *In general.* To meet the ''adequate records'' requirements of section 274(d), a taxpayer shall maintain an account book, diary, statement

of expense or similar record (as provided in subdivision (ii) of this subparagraph) and documentary evidence (as provided in subdivision (iii) of this subparagraph) which, in combination, are sufficient to establish each element of an expenditure specified in paragraph (b) of this section. It is not necessary to record information in an account book, diary, statement of expense or similar record which duplicates information reflected on a receipt so long as such account book and receipt complement each other in an orderly manner.

(ii) *Account book, diary, etc.* An account book, diary, statement of expense or similar record must be prepared or maintained in such manner that each recording of an element of an expenditure is made at or near the time of the expenditure.

(*a*) *Made at or near the time of the expenditure.* For purposes of this section, the phrase *made at or near the time of the expenditure* means the elements of an expenditure are recorded at a time when, in relation to the making of an expenditure, the taxpayer has full present knowledge of each element of the expenditure, such as the amount, time, place and business purpose of the expenditure and business relationship to the taxpayer of any person entertained. An expense account statement which is a transcription of an account book, diary, or similar record prepared or maintained in accordance with the provisions of this subdivision shall be considered a record prepared or maintained in the manner prescribed in the preceding sentence if such expense account statement is submitted by an employee to his employer or by an independent contractor to his client or customer in the regular course of good business practice.

(*b*) *Substantiation of business purpose.* In order to constitute an adequate record of business purpose within the meaning of section 274(d) and this subparagraph, a written statement of business purpose generally is required. However, the degree of substantiation necessary to establish business purpose will vary depending upon the facts and circumstances of each case. Where the business purpose of an expenditure is evident from the surrounding facts and circumstances, a written explanation of such business purpose will not be required. For example, in the case of a salesman calling on customers on an established sales route, a written explanation of the business purpose of such travel ordinarily will not be required. Similarly, in the case of a business meal described in section 274(e)(1), if the business purpose of such meal is evident from the business relationship to the taxpayer of the persons entertained and other surrounding circumstances, a written explanation of such business purpose will not be required.

(*c*) *Confidential information.* If any information relating to the elements of an expenditure, such as place, business purpose or business relationship, is of a confidential nature, such information need not be set forth in the account book, diary, statement of expense or similar record, provided such information is recorded at or near the time of the expenditure and is elsewhere available to the district director to substantiate such element of the expenditure.

(iii) *Documentary evidence.* Documentary evidence, such as receipts, paid bills, or similar evidence sufficient to support an expenditure shall be required for:

(*a*) Any expenditure for lodging while traveling away from home, and

(*b*) Any other expenditure of $25 or more, except, for transportation charges, documentary evidence will not be required if not readily available.

Provided, however, that the Commissioner, in his discretion, may prescribe rules waiving such requirements in circumstances where he determines it is impracticable for such documentary evidence to be required. Ordinarily, documentary evidence will be considered adequate to support an expenditure if it includes sufficient information to establish the amount, date, place, and the essential character of the expenditure. For example, a hotel receipt is sufficient to support expenditures for business travel if it contains the following: name, location, date, and separate amounts for charges such as for lodging, meals, and telephone. Similarly, a restaurant receipt is sufficient to support an expenditure for a business meal if it contains the following: name and location of the restaurant, the date and amount of the expenditure, and, if a charge is made for an item other than meals and beverages, an indication that such is the case. A document may be indicative of only one (or part of one) element of an expenditure. Thus, a cancelled check, together with a bill from the payee, ordinarily would establish the element of cost. In contrast, a cancelled check drawn payable to a named payee would not by itself support a business expenditure without other evidence showing that the check was used for a certain business purpose.

(iv) *Retention of documentary evidence.* The Commissioner may, in his discretion, prescribe rules under which an employer may dispose of documentary evidence submitted to him by employees who are required to, and do, make an adequate accounting to the employer (within the meaning of paragraph (e)(4) of this section) if the employer maintains adequate accounting procedures with respect to such employees (within the meaning of paragraph (e)(5) of this section).

(v) *Substantial compliance.* If a taxpayer has not fully substantiated a particular element of an expenditure, but the taxpayer establishes to the satisfaction of the district director that he has substantially complied with the *adequate records* requirements of this subparagraph with respect to the expenditure, the taxpayer may be permitted to establish such element by evidence which the district director shall deem adequate.

(3) *Substantiation by other sufficient evidence.* If a taxpayer fails to establish to the satisfaction of the district director that he has substantially complied with the ‘‘adequate records’’ requirements of subparagraph (2) of this paragraph with respect to an element of an expenditure, then, except as otherwise provided in this paragraph, the taxpayer must establish such element:

(i) By his own statement, whether written or oral, containing specific information in detail as to such element; and

(ii) By other corroborative evidence sufficient to establish such element. If such element is the description of a gift, or the cost, time, place, or date of an expenditure, the corroborative evidence shall be direct evidence, such as a statement in writing or the oral testimony of persons entertained or other witness setting forth detailed information about such element, or the documentary evidence described in subparagraph (2) of this paragraph. If such element is either the business relationship to the taxpayer of persons entertained or the business purpose of an expenditure, the corroborative evidence may be circumstantial evidence.

(4) *Substantiation in exceptional circumstances.* If a taxpayer establishes that, by reason of the inherent nature of the situation in which an expenditure was made:

(i) He was unable to obtain evidence with respect to an element of the expenditure which conforms fully to the ‘‘adequate records’’ requirements of subparagraph (2) of this paragraph,

(ii) He is unable to obtain evidence with respect to such element which conforms fully to the ‘‘other sufficient evidence’’ requirements of subparagraph (3) of this paragraph, and

(iii) He has presented other evidence, with respect to such element, which possesses the highest degree of probative value possible under the circumstances, such other evidence shall be considered to satisfy the substantiation requirements of section 274(d) and this paragraph.

(5) *Loss of records due to circumstances beyond control of taxpayer.* Where the taxpayer establishes that the failure to produce adequate records is due to the loss of such records through circumstances beyond the taxpayer’s control, such as destruction by fire, flood, earthquake, or other casualty, the taxpayer shall have a right to substantiate a deduction by reasonable reconstruction of his expenditures.

(6) *Special rules*—(i) *Separate expenditure*—(*a*) *In general.* For the purposes of this section, each separate payment by the taxpayer shall ordinarily be considered to constitute a separate expenditure. However, concurrent or repetitious expenses of a similar nature occurring during the course of a single event shall be considered a single expenditure. To illustrate the above

rules, where a taxpayer entertains a business guest at dinner and thereafter at the theater, the payment for dinner shall be considered to constitute one expenditure and the payment for the tickets for the theater shall be considered to constitute a separate expenditure. Similarly, if during a day of business travel a taxpayer makes separate payments for breakfast, lunch, and dinner, he shall be considered to have made three separate expenditures. However, if during entertainment at a cocktail lounge the taxpayer pays separately for each serving of refreshments, the total amount expended for the refreshments will be treated as a single expenditure. A tip may be treated as a separate expenditure.

(*b*) *Aggregation.* Except as otherwise provided in this section, the account book, diary, statement of expense, or similar record required by subparagraph (2)(ii) of this paragraph shall be maintained with respect to each separate expenditure and not with respect to aggregate amounts for two or more expenditures. Thus, each expenditure for such items as lodging and air or rail travel shall be recorded as a separate item and not aggregated. However, at the option of the taxpayer, amounts expended for breakfast, lunch, or dinner, may be aggregated. A tip or gratuity which is related to an underlying expense may be aggregated with such expense. For other provisions permitting recording of aggregate amounts in an account book, diary, statement of expense or similar record see paragraph (b)(2)(i) and (b)(3) of this section (relating to incidental costs of travel and entertainment).

(ii) *Allocation of expenditure.* For purposes of this section, if a taxpayer has established the amount of an expenditure, but is unable to establish the portion of such amount which is attributable to each person participating in the event giving rise to the expenditure, such amount shall ordinarily be allocated to each participant on a pro rata basis, if such determination is material. Accordingly, the total number of persons for whom a travel or entertainment expenditure is incurred must be established in order to compute the portion of the expenditure allocable to each such person.

(iii) *Primary use of a facility.* Section 274(a) (1)(B) and (2)(C) denies a deduction for any expenditure paid or incurred before January 1, 1979, with respect to a facility, or paid or incurred at any time with respect to a club, used in connection with an entertainment activity unless the taxpayer establishes that the facility (including a club) was used primarily for the furtherance of his trade or business. A determination whether a facility before January 1, 1979, or a club at any time was used primarily for the futherance of the taxpayer's trade or business will depend upon the facts and circumstances of each case. In order to establish that a facility was used primarily for the furtherance of his trade or business, the taxpayer shall maintain records of the use of the facility, the cost of using the facility, mileage or its equivalent (if appropriate), and such other information as shall tend to establish such primary use. Such records of use shall contain:

(*a*) For each use of the facility claimed to be in furtherance of the taxpayer's trade or business, the elements of an expenditure specified in paragraph (b) of this section, and

(*b*) For each use of the facility not in furtherance of the taxpayer's trade or business, an appropriate description of such use, including cost, date, number of persons entertained, nature of entertainment and, if applicable, information such as mileage or its equivalent. A notation such as ''personal use'' or ''family use'' would, in the case of such use, be sufficient to describe the nature of entertainment.

If a taxpayer fails to maintain adequate records concerning a facility which is likely to serve the personal purposes of the taxpayer, it shall be presumed that the use of such facility was primarily personal.

(iv) *Additional information.* In a case where it is necessary to obtain additional information, either:

(*a*) To clarify information contained in records, statements, testimony, or documentary evidence submitted by a taxpayer under the provisions of paragraph (c)(2) or (c)(3) of this section, or

(*b*) To establish the reliability or accuracy of such records, statements, testimony, or documentary evidence, the district director may, notwithstanding any other provision of this section, obtain such additional information as he determines necessary to properly implement the provisions of section 274 and the regulations thereunder by personal interview or otherwise.

(7) *Specific exceptions.* Except as otherwise prescribed by the Commissioner, substantiation otherwise required by this paragraph is not required for:

(i) Expenses described in section 274 (e)(2) relating to food and beverages for employees, section 274(e)(3) relating to expenses treated as compensation, section 274(e)(8) relating to items available to the public, and section 274(e)(9) relating to entertainment sold to customers, and

(ii) Expenses described in section 274(e)(5) relating to recreational, etc., expenses for employees, except that a taxpayer shall keep such records or other evidence as shall establish that such expenses were for activities (or facilities used in connection therewith) primarily for the benefit of employees other than employees who are officers, shareholders or other owners (as defined in section 274(e)(5)), or highly compensated employees.

(d) *Disclosure on returns.* The Commissioner may, in his discretion, prescribe rules under which any taxpayer claiming a deduction for entertainment, gifts, or travel or any other person receiving advances, reimbursements, or allowances for such items, shall make disclosure on his tax return with respect to such items. The provisions of this paragraph shall apply notwithstanding the provisions of paragraph (e) of this section.

(e) *Reporting and substantiation of expenses of certain employees for travel, entertainment, and gifts*—(1) *In general.* The purpose of this paragraph is to provide rules for reporting and substantiation of certain expenses paid or incurred by taxpayers in connection with the performance of services as employees. For purposes of this paragraph, the term *business expenses* means ordinary and necessary expenses for travel, entertainment, or gifts which are deductible under section 162, and the regulations thereunder, to the extent not disallowed by section 274(c). Thus, the term *business expenses* does not include personal, living or family expenses disallowed by section 262 or travel expenses disallowed by section 274(c), and advances, reimbursements, or allowances for such expenditures must be reported as income by the employee.

(2) *Reporting of expenses for which the employee is required to make an adequate accounting to his employer*—(i) *Reimbursements equal to expenses.* For purposes of computing tax liability, an employee need not report on his tax return business expenses for travel, transportation, entertainment, gifts, and similar purposes, paid or incurred by him solely for the benefit of his employer for which he is required to, and does, make an adequate accounting to his employer (as defined in subparagraph (4) of this paragraph) and which are charged directly or indirectly to the employer (for example, through credit cards) or for which the employee is paid through advances, reimbursements, or otherwise, provided that the total amount of such advances, reimbursements, and charges is equal to such expenses.

(ii) *Reimbursements in excess of expenses.* In case the total of the amounts charged directly or indirectly to the employer or received from the employer as advances, reimbursements, or otherwise, exceeds the business expenses paid or incurred by the employee and the employee is required to, and does, make an adequate accounting to his employer for such expenses, the employee must include such excess (including amounts received for expenditures not deductible by him) in income.

(iii) *Expense in excess of reimbursements.* If an employee incurs deductible business expenses on behalf of his employer which exceed the total of the amounts charged directly or indirectly to the employer and received from the employer as advances, reimbursements, or otherwise, and the employee wishes to claim a deduction for such excess, he must:

(*a*) Submit a statement as part of his tax return showing all of the information required by subparagraph (3) of this paragraph, and,

(*b*) Maintain such records and supporting evidence as will substantiate each element of an expenditure (described in paragraph (b) of this section) in accordance with paragraph (c) of this section.

(3) *Reporting of expenses for which the employee is not required to make an adequate accounting to his employer.* If the employee is not required to make an adequate accounting to his employer for his business expenses or, though required, fails to make an adequate accounting for such expenses, he must submit, as a part of his tax return, a statement showing the following information:

(i) The total of all amounts received as advances or reimbursements from his employer, including amounts charged directly or indirectly to the employer through credit cards or otherwise; and

(ii) The nature of his occupation, the number of days away from home on business, and the total amount of business expenses paid or incurred by him (including those charged directly or indirectly to the employer through credit cards or otherwise) broken down into such categories as transportation, meals and lodging while away from home overnight, entertainment, gifts, and other business expenses.

In addition, he must maintain such records and supporting evidence as will substantiate each element of an expenditure (described in paragraph (b) of this section) in accordance with paragraph (c) of this section.

(4) *Definition of an ''adequate accounting'' to the employer.* For purposes of this paragraph an adequate accounting means the submission to the employer of an account book, diary, statement of expense, or similar record maintained by the employee in which the information as to each element of an expenditure (described in paragraph (b) of this section) is recorded at or near the time of the expenditure, together with supporting documentary evidence, in a manner which conforms to all the ''adequate records'' requirements of paragraph (c)(2) of this section. An adequate accounting requires that the employee account for all amounts received from his employer during the taxable year as advances, reimbursements, or allowances (including those charged directly or indirectly to the employer through credit cards or otherwise) for travel, entertainment, and gifts. The methods of substantiation allowed under paragraph (c)(4) or (c)(5) of this section also will be considered to be an adequate accounting if the employer accepts an employee's substantiation and establishes that such substantiation meets the requirements of such paragraph (c)(4) or (c)(5). For purposes of an adequate accounting the method of substantiation allowed under paragraph (c)(3) of this section will not be permitted.

(5) *Substantiation of expenditures by certain employees.* An employee who makes an adequate accounting to his employer within the meaning of this paragraph will not again be required to substantiate such expense account information except in the following cases:

(i) An employee whose business expenses exceed the total of amounts charged to his employer and amounts received through advances, reimbursements or otherwise and who claims a deduction on his return for such excess;

(ii) An employee who is related to his employer within the meaning of section 267(b) but for this purpose the percentage referred to in section 267(b)(2) shall be 10 percent; and

(iii) Employees in cases where it is determined that the accounting procedures used by the employer for the reporting and substantiation of expenses by such employees are not adequate, or where it cannot be determined that such procedures are adequate. The district director will determine whether the employer's accounting procedures are adequate by considering the facts and circumstances of each case, including the use of proper internal controls. For example, an employer should require that an expense account must be verified and approved by a responsible person other than the person incurring such expenses. Accounting procedures will be considered inadequate to the extent that the employer does not require an adequate accounting from his employees as defined in subparagraph (4) of this paragraph, or does not maintain such substantiation. To the extent an employer fails to maintain adequate accounting procedures he will thereby obligate his employees to separately substantiate their expense account information.

(f) *Substantiation by reimbursement arrangements or per diem, mileage, and other traveling allowances.* The Commissioner may, in his discretion, prescribe rules under which:

(1) Reimbursement arrangements covering ordinary and necessary expenses of traveling away from home (exclusive of transportation expenses to and from destination),

(2) Per diem allowances providing for ordinary and necessary expenses of traveling away from home (exclusive of transportation costs to and from destination), and

(3) Mileage allowances providing for ordinary and necessary expenses of transportation while traveling away from home, will, if in accordance with reasonable business practice, be regarded as equivalent to substantiation by adequate records or other sufficient evidence for purposes of paragraph (c) of this section of the amount of such traveling expenses and as satisfying, with respect to the amount of such traveling expenses, the requirements of an adequate accounting to the employer for purposes of paragraph (e)(4) of this section. If the total travel allowance received exceeds the deductible traveling expenses paid or incurred by the employee, such excess must be reported as income on the employee's return. See paragraph (h) of this section relating to the substantiation of meal expenses while traveling.

(g) *Reporting and substantiation of certain reimbursements of persons other than employees*—(1) *In general.* The purpose of this paragraph is to provide rules for the reporting and substantiation of certain expenses for travel, entertainment, and gifts paid or incurred by one person (hereinafter termed ‘‘independent contractor’’) in connection with services performed for another person other than an employer (hereinafter termed ‘‘client or customer’’) under a reimbursement or other expense allowance arrangement with such client or customer. For purposes of this paragraph, the term *business expenses* means ordinary and necessary expenses for travel, entertainment, or gifts which are deductible under section 162, and the regulations thereunder, to the extent not disallowed by section 274(c). Thus, the term *business expenses* does not include personal, living or family expenses disallowed by section 262 or travel expenses disallowed by section 274(c), and reimbursements for such expenditures must be reported as income by the independent contractor. For purposes of this paragraph, the term *reimbursements* means advances, allowances, or reimbursements received by an independent contractor for travel, entertainment, or gifts, in connection with the performance by him of services for his client or customer, under a reimbursement or other expense allowance arrangement with his client or customer, and includes amounts charged directly or indirectly to the client or customer through credit card systems or otherwise. See paragraph (h) of this section relating to the substantiation of meal expenses while traveling.

(2) *Substantiation by independent contractors.* An independent contractor shall substantiate, with respect to his reimbursements, each element of an expenditure (described in paragraph (b) of this section) in accordance with the requirements of paragraph (c) of this section; and, to the extent he does not so substantiate, he shall include such reimbursements in income. An independent contractor shall so substantiate a reimbursement for entertainment regardless of whether he accounts (within the meaning of subparagraph (3) of this paragraph) for such entertainment.

(3) *Accounting to a client or customer under section 274(e)(4)(B).* Section 274(e)(4)(B) provides that section 274(a) (relating to disallowance of expenses for entertainment) shall not apply to expenditures for entertainment for which an independent contractor has been reimbursed if the independent contractor accounts to his client or customer to the extent provided by section 274(d). For purposes of section 274(e)(4)(B), an independent contractor shall be considered to account to his client or customer for an expense paid or incurred under a reimbursement or other expense allowance arrangement

with his client or customer if, with respect to such expense for entertainment, he submits to his client or customer adequate records or other sufficient evidence conforming to the requirements of paragraph (c) of this section.

(4) *Substantiation by client or customer.* A client or customer shall not be required to substantiate, in accordance with the requirements of paragraph (c) of this section, reimbursements to an independent contractor for travel and gifts, or for entertainment unless the independent contractor has accounted to him (within the meaning of section 274(e)(4)(B) and subparagraph (3) of this paragraph) for such entertainment. If an independent contractor has so accounted to a client or customer for entertainment, the client or customer shall substantiate each element of the expenditure (as described in paragraph (b) of this section) in accordance with the requirements of paragraph (c) of this section.

(h) *Authority for an optional method of computing meal expenses while traveling.* The Commissioner may establish a method under which a taxpayer may elect to use a specified amount or amounts for meals while traveling in lieu of substantiating the actual cost of meals. The taxpayer would not be relieved of substantiating the actual cost of other travel expenses as well as the time, place, and business purpose of the travel. See paragraph (b)(2) and (c) of this section.

(i) *Effective date*—(1) *In general.* Section 274(d) and this section apply with respect to taxable years ending after December 31, 1962, but only with respect to period after that date.

(2) *Certain meal expenses.* Paragraph (h) of this section is effective for expenses paid or incurred after December 31, 1982.

[T.D. 6630, 27 FR 12931, Dec. 29, 1972, as amended by T.D. 7226, 37 FR 26711, Dec. 15, 1972; T.D. 7909, 48 FR 40370, Sept. 7, 1983; 48 FR 41017, Sept. 13, 1983; T.D. 8051, 50 FR 36576, Sept. 9, 1985. Redesignated by T.D. 8715, 62 FR 13990, Mar. 25, 1997]

Terminal Railroad Corporations and Their Shareholders

§1.281–1 In general.

Section 281 provides special rules for the computation of the taxable incomes of a terminal railroad corporation and its shareholders when the terminal railroad corporation, as a result of taking related terminal income into account, reduces a charge which was made or which would be made for related terminal services furnished to a railroad corporation. Section 281 and paragraphs (a) and (b) of §1.281–2 provide that the ‘‘reduced amount’’ described in paragraph (c) of §1.281–2 is not includable in gross income of the terminal railroad corporation, is not treated as a dividend or other distribution to its railroad shareholders, and is not treated as an amount paid -or incurred by the railroad shareholders to the terminal railroad corporation. Section 281 and paragraph (a)(2) of §1.281–2 provide that no deduction otherwise allowable to a terminal railroad corporation shall be disallowed as a result of the ‘‘reduced amount’’ described in paragraph (c) of §1.281–2. Section 1.281–3 defines the terms *terminal railroad corporation, related terminal income, related terminal services, agreement,* and *railroad corporation.* Section 1.281–4 describes the effective dates and special rules for application of section 281 to taxable years ending before October 23, 1962.

[T.D. 7356, 40 FR 23732, June 2, 1975]

§1.281–2 Effect of section 281 upon the computation of taxable income.

(a) *Computation of taxable income of terminal railroad corporations*—(1) *Income not considered received or accrued.* A terminal railroad corporation (as defined in paragraph (a) of §1.281–3) shall not be considered to have received or accrued the ‘‘reduced amount’’ described in paragraph (c) of this section in the computation of its taxable income. Thus, income is not to be considered accrued or actually or constructively received by a terminal railroad corporation where, in the manner described in paragraph (c) of this section, (i) a charge which would be made to any railroad corporation for related terminal services is not made, or (ii) a portion of any liability payable by any railroad corporation with respect to related terminal services is discharged.

(2) *Deduction not disallowed.* In the computation of the taxable income of a terminal railroad corporation, a deduction relating to a ''reduced amount'', described in paragraph (c) of this section, which is otherwise allowable to it under chapter 1 of the Code (without regard to sec. 277) shall not be disallowed by reason of section 281. Thus, deductions for expenses attributable to services rendered to a shareholder are not to be disallowed to a terminal railroad corporation merely because, in the manner described in paragraph (c) of this section, (i) a charge which would be made to any railroad corporation for related terminal services is not made, or (ii) a portion of any liability payable by any railroad corporation with respect to related terminal services is discharged. To the extent that section 281 applies to a deduction relating to a ''reduced amount'', such deduction shall not be disallowed under section 277.

(b) *Computation of taxable income of shareholders*—(1) *Income not considered received or accrued.* A shareholder of a terminal railroad corporation shall not be considered to have received or accrued any ''reduced amount'' (described in paragraph (c) of this section) in the computation of the shareholder's taxable income. Thus a dividend is not to be considered actually or constructively received by a shareholder of a terminal railroad corporation merely because, in the manner described in paragraph (c) of this section, (i) a charge which would be made to the shareholder or any other railroad corporation for related terminal services is not made, or (ii) a portion of any liability payable by it or any other railroad corporation with respect to related terminal services is discharged.

(2) *Expenses not considered paid or incurred.* In the computation of the taxable income of a shareholder of a terminal railroad corporation, the shareholder shall not be considered to have paid or incurred any ''reduced amount'' (described in paragraph (c) of this section). Thus, a shareholder of the terminal railroad corporation may not deduct as an expense for related terminal services (as defined in paragraph (c) of § 1.281–3) an amount in excess of the net cost to it of such services.

(c) *Amounts to which section 281 applies*—(1) *Reduced amount.* For purposes of this section, the term *reduced amount* means, subject to the limitation of paragraph (c)(4) of this section, the amount by which:

(i) A charge which would be made by a terminal railroad corporation for its taxable year for related terminal services provided to a railroad corporation; or

(ii) A liability of a railroad corporation, resulting from a charge made by a terminal railroad corporation for its taxable year, with respect to related terminal services provided by the terminal railroad corporation, is reduced by reason of the terminal railroad corporation's taking into account, pursuant to an agreement (as defined in paragraph (d) of § 1.281–3), related terminal income (as defined in paragraph (b) of § 1.281–3) received or accrued (without regard to section 281) during such taxable year.

(2) *Charge which would be made.* For purposes of this section, a ''charge which would be made'' by a terminal railroad corporation is the amount that would be charged to any railroad corporation for related terminal services provided if the terminal railroad corporation made the charge without taking related terminal income into account.

(3) *Reduction resulting from related terminal income.* For purposes of subparagraph (1) of this section, a charge or a liability is reduced by taking related terminal income into account to the extent that:

(i) Related terminal income is received or accrued (without regard to section 281) by the terminal railroad corporation for its taxable year in which the charge or liability is reduced; and

(ii) The charge or liability in question would have been larger than it is had such income not been received or accrued (without regard to section 281).

The reduction must be made (directly or indirectly) on the books of the terminal railroad corporation, and in fact, for the same taxable year for which the charge would be made or for which the liability is incurred. The reduction of the charge or liability must be taken into account by the terminal railroad corporation in ascertaining the income, profit, or loss for such taxable year for the purpose of reports to shareholders and the Interstate Commerce Commission, and for credit purposes.

(4) *Limitation.* To the extent that a reduced amount (as described in paragraph (c)(1) of this section but without regard to the limitation under this subparagraph) would operate either to create or to increase a net operating loss for the terminal railroad corporation, this section shall not apply. Therefore, if a portion of a liability is discharged (in the manner described in this paragraph) and the discharged portion of the liability exceeds an amount equal to the terminal railroad corporation's gross income minus the deductions allowed by chapter 1 of the Code (computed with regard to the modifications specified in section 172(d) but without regard to section 281 and this section), then section 281 and this section shall not apply to such excess. The limitation described in this subparagraph shall apply only to taxable years of terminal railroad corporations ending after October 23, 1962.

(d) *Examples.* The provisions of this section may be illustrated by the following examples. In these examples, references to ''before the application of section 281'', ''after the application of section 281'', ''taxable income'', and ''allowable deductions'' take no account of section 277, which may apply to deductions to which section 281 does not apply.

Example 1 (i) *Facts.* The T Company is a terminal railroad corporation which charges its three equal shareholders, the X, Y, and Z railroad corporations, a rental calculated monthly on a wheelage or user basis for the use of its services and facilities. The T Company and each of its shareholders report income on the calendar year basis. A written lease agreement to which all of the shareholders were parties was entered into in 1947. The agreement provides that at the end of each year the liabilities of each of the shareholders resulting from charges for rental obligations with respect to related terminal services shall be reduced by the shareholder's one-third share of the net income from each source of revenue that produced income (computed before reduction for Federal income taxes). For the calendar year 1973, the T Company's charges to its shareholders include the following charges for related terminal services: $35,000 to the X Company, $25,000 to the Y Company, and $20,000 to the Z Company. Thus, prior to reduction, total shareholder liabilities to the T Company for related terminal services are $80,000 at the end of 1973. The T Company's net income from all sources (before reduction of liabilities pursuant to the 1947 agreement and before reduction for Federal income taxes) and its taxable income, before the application of section 281, for 1973 are $36,000 determined as follows:

Source	Gross income	Allowable deductions	Income (or loss)
Related terminal services performed:			
For shareholders	$80,000	$65,000	$15,000
For nonshareholders	46,000	37,000	9,000
Related terminal income	126,000	102,000	24,000
Nonrelated terminal income	30,000	18,000	12,000
Total	156,000	120,000	36,000

The liability of each shareholder is, pursuant to the agreement, discharged in part by the T Company crediting $12,000 against the rental due from each shareholder for a total discharge of liabilities of $36,000 (the net income from all sources), resulting in net shareholder liabilities owing to the T Company at the end of 1973 of $44,000 ($80,000 less $36,000): $23,000 from the X Company, $13,000 from the Y Company, and $8,000 from the Z Company.

(ii) *Effect on terminal railroad corporation.* The reduced amount to which this section applies is $24,000 (related terminal income of $9,000 from nonshareholders and $15,000 from shareholders). Thus, to the extent of $24,000, the T Company is not considered to have received or accrued income from the discharged liabilities of $36,000. Similarly, to the extent of the same $24,000, the T Company is not disallowed deductions for expenses merely by reason of the discharge. The T Company's taxable income for 1973 after application of section 281 is $12,000, computed as follows:

Gross income ($156,000 less $24,000)	$132,000
Less allowable deductions	120,000
Taxable income	12,000

(iii) *Effect on shareholders*—The reduced amount of $24,000 shall not be deemed to constitute either a dividend to the shareholders of the T Company or an expense paid or incurred by them. Thus, under the facts described, neither the X Company, the Y Company, nor the Z Company shall be considered to have received or accrued a dividend of $8,000, or to have paid or incurred an expense of $8,000. Assuming the X Company's taxable income for 1973 before the application of section 281 would have been $43,200, computed in the following manner, its taxable income for 1973 after the application of section 281 is $50,000, determined as follows:

	Before the application of sec. 281	After the application of sec. 281
Gross income:		
From sources other than T Co ..	$146,000	$146,000
Dividend considered received because of T Co.'s discharge of liabilities of $12,000	12,000	4,000
Total	158,000	150,000
Less allowable deductions:		
From sources other than T Co ..	69,600	69,600
85 percent dividend received deduction under sec. 243 attributable to dividend considered received because of T Co.'s discharge of liabilities	10,200	3,400
Expenses for accrued charges for related terminal services performed by T Co	35,000	27,000
	114,800	100,000
Taxable income	43,200	50,000

Example 2. Assume the same facts as in *Example (1)*, except that the charges to each of the shareholders for related terminal services for 1973 were as follows: $35,000 to the X Company, $40,000 to the Y Company, and $5,000 to the Z Company. Assume further that the Z Company, prior to the reduction in liabilities at the end of 1973, owed the T Company an additional $4,000 resulting from charges for 1972 for related terminal services and $6,000 resulting from the purchase of equipment. Since only $21,000 (X Company $8,000, Y Company $8,000, Z Company $5,000) of the liabilities which were discharged resulted from charges made for 1973 for related terminal services, the reduced amount to which this section applies is $21,000 (instead of $24,000 as in *Example (1)*). Thus, the T Company's taxable income for 1973 would be $15,000 ($36,000 less $21,000 reduced amount) and the amount which shall be considered not to have been received or accrued as a dividend nor paid or incurred as an expense of each shareholder is $8,000 for the X Company, $8,000 for the Y Company, and $5,000 for the Z Company.

Example 3. Assume the same facts as in *Example (1)*, except that the allowable deductions with respect to nonrelated terminal activities were $39,000 instead of $18,000. The T Company's net income from all sources (before reduction for Federal income taxes) and its taxable income, before the application of section 281, is therefore $15,000, determined as follows:

Source	Gross income	Allowable deductions	Income (or loss)
Related terminal income	$126,000	$102,000	$24,000
Nonrelated terminal income	30,000	39,000	(9,000)
Total	156,000	141,000	15,000

The liability of each shareholder is nevertheless discharged in part, pursuant to the agreement, by the T Company crediting $8,000 against the rental due from each shareholder for a total discharge of liabilities of $24,000 (the net income from each source of revenue that produced income). Assume further that none of the modifications specified in section 172(d) apply. If the limitation under paragraph (c)(4) of this section were not applied, the reduced amount for the purposes of this section would be $24,000, and the operation of this section would result in a net operating loss of $9,000, since the allowable deductions of $141,000 would exceed the gross income of $132,000 ($156,000 less discharged liabilities of $24,000) by that amount. Because of the limitation under paragraph (c)(4) of this section, however, $9,000 is not included in the reduced amount to which this section applies. Accordingly, the reduced amount is $15,000 (instead of $24,000 as in *Example (1)*). Thus, the T Company's taxable income for 1973 would be zero ($15,000 less the $15,000 reduced amount), and the amount which each shareholder shall be considered not to have received or accrued as a dividend nor paid or incurred as an expense is $5,000.

Example 4. Assume the same facts as in *Example (1)*, except that under the agreement income from the terminal parking lot would not reduce the shareholders' liabilities. Assume further that such income amounted to $3,000 of the total related terminal income of $24,000 for the taxable year 1973. The liability of each shareholder therefore is discharged by crediting $11,000 against its rental due for a total discharge of liabilities of $33,000. The reduced amount to which this section applies is $21,000 ($24,000 less $3,000) since only to the extent of $21,000 would there have been no such reduction under the agreement if there were no related terminal income.

Example 5. Assume the same facts as in *Example (1)*, except that, pursuant to the agreement, the A Company, a nonshareholder railroad corporation, is to have its liabilities resulting from charges for rental obligations reduced equally with each of the shareholders. Assume further that the T Company's charges to the A Company for the calendar year 1973 included $15,000 for related terminal services and that the liability of each shareholder and the A Company is discharged in part pursuant to the agreement by the T Company crediting $9,000 against the rental due from each. The reduced amount to which this section applies is $24,000. Thus, the T Company's taxable income for 1973 is $12,000, and each shareholder shall not be considered to have received or accrued as a dividend nor paid or incurred as an expense $6,000 ($24,000/ $36,000 × $9,000) merely because of the discharge of its own liability. Similarly, each shareholder shall not be considered to have received or accrued as a dividend nor paid or incurred as an expense $2,000 (1/3 × ($24,000/$36,000 × $9,000)) merely because of the discharge of the liability of the A Company. Section 281 does not apply to the determination of the tax consequences of the transaction to the A Company. Similarly, the section does not apply to the determination of the tax consequences to the shareholders resulting from that portion of the discharge of the liability of the A Company which is attributable to the application of income which is not related terminal income ($3,000). Hence, such consequences shall be determined under the sections of the Internal Revenue Code which govern in the absence of section 281.

Example 6. (i) Facts. The TR Company is a terminal railroad corporation with three equal shareholders, the M, N, and O Railroad Corporations. The TR Company and each of its shareholders report income on the calendar year basis. Pursuant to a written agreement entered into in 1947 to which all shareholders were parties, the TR Company makes one annual charge to each of the three shareholders at the end of each year for the difference between the cost of operations, allocated on a wheelage or user basis for the use of its services and facilities provided to the shareholder during the year, and one-third of its net income from all other sources (computed before reduction for Federal income taxes). The TR Company's taxable income, before the application of section 281, for 1973 is $21,000 determined as follows:

Source	Gross income	Allowable deductions	Income (or loss)
Related terminal services performed:			
For shareholders ..	$65,000	$65,000	0
For nonshareholders	46,000	37,000	$9,000
Related terminal income	111,000	102,000	9,000
Nonrelated terminal income from nonshareholders	30,000	18,000	12,000
Total	141,000	120,000	21,000

For the calendar year 1973, the TR company's charges to its shareholders are $23,000 ($30,000 less $7,000) to the M company, $13,000 ($20,000 less $7,000) to the N company, and $8,000 ($15,000 less $7,000) to the O company for a total of $44,000 for related terminal services.

(ii) *Effect on terminal railroad corporation.* The reduced amount to which this section applies is $9,000. The TR company is not considered to have received or accrued income of $9,000 (related terminal income) merely because the charge of $21,000 (net income from all sources other than shareholders) was not made. Similarly, to the extent of $9,000, the TR company is not disallowed deductions for expenses merely because the full cost of services was not charged. The TR company's taxable income for 1973 after application of section 281, is $12,000, computed as follows:

Gross income ($141,000 less $9,000 charges not made)	$132,000
Less allowable deductions	120,000
Taxable income	12,000

(iii) *Effect on shareholders.* Neither the M company, the N company, nor the O company shall be considered to have received or accrued a dividend of $3,000 nor to have paid or incurred an expense of $3,000 merely by reason of the reduced charges. Thus, assuming the M company's taxable income for 1973 before the application of section 281 would have been $47,450, computed in the following manner, its taxable income for 1973 after the application of section 281 is $50,000, determined as follows:

	Before the application of sec. 281	After the application of sec. 281
Gross income:		
From sources other than TR Co	$146,000	$146,000
Dividend considered received because of TR Co.'s reduction of charges	7,000	4,000
Total	153,000	150,000
Less allowable deductions:		
From sources other than TR Co	69,600	69,600
85 percent dividend received deduction under sec. 243 attributable to dividend considered received because of TR Co.'s reduction of charges	5,950	3,400

	Before the application of sec. 281	After the application of sec. 281
Expenses for accrued charges for related terminal services performed by TR Co	30,000	27,000
	105,550	100,000
Taxable income	47,450	50,000

[T.D. 7356, 40 FR 23733, June 2, 1975]

§ 1.281–3 Definitions.

(a) *Terminal railroad corporation.* The term *terminal railroad corporation* means a corporation which, in the taxable year, meets all of the following conditions:

(1) The corporation and each of its shareholders must be domestic corporations. Thus, all of the shareholders of the corporation, as well as the corporation itself, must be corporations which were organized or created in the United States, including only the States and the District of Columbia, or under the law of the United States or of any State or territory.

(2) All of the shareholders must be railroad corporations which are subject to Part I of the Interstate Commerce Act. Thus, if any shareholder of the corporation, regardless of the class or percentage of stock owned, is not subject to the jurisdiction of the Interstate Commerce Commission under part I of that Act, the corporation cannot qualify as a terminal railroad corporation.

(3) The corporation must not be a member of an affiliated group of corporations (as defined in section 1504), other than as a common parent corporation. For this purpose it is immaterial whether or not the affiliated group has ever made a consolidated income tax return. Thus, if the X railroad corporation owns 80 percent of all of the outstanding stock of the Y railroad corporation, the X railroad corporation may qualify, but the Y railroad corporation cannot qualify, as a terminal railroad corporation.

(4) The primary business of the corporation must be that of providing to domestic railroad corporations subject to Part I of the Interstate Commerce Act and to the shippers and passengers of such railroad corporations one or more of the following facilities or services: (i) Railroad terminal facilities, (ii) railroad switching facilities, (iii) railroad terminal services, or (iv) railroad switching services. The designated facilities and services include the furnishing of terminal trackage, the operation of stockyards or a union passenger or freight station, and the operation of railroad bridges and ferries. The providing of the designated facilities includes the leasing of those facilities. A corporation shall be considered as having established that its primary business is that of providing the designated facilities and services if more than 50 percent of its gross income (computed without regard to section 281, and excluding dividends and gains and losses from the disposition of capital assets or property described in section 1231(b)) for the taxable year is derived from those sources. The fact that income from a service or facility is included within the definition of related terminal income is immaterial for purposes of determining whether that service or facility is one which is designated in this subparagraph. Thus, although income from the operation of a commuter railroad line may be related terminal income, a corporation whose primary business is the operation of that facility is not a terminal railroad corporation, since its primary business is not the providing of the designated facilities or services.

(5) A substantial part of the services rendered by the corporation for the taxable year must be rendered to one or more of its shareholders. For purposes of this requirement, providing the use of facilities shall be considered the rendering of services.

(6) Each shareholder of the corporation must compute its taxable income on the basis of a taxable year which either begins or ends on the same day as the taxable year of the corporation.

(b) *Related terminal income*—(1) *In general.* Related terminal income is, generally, the type of income normally earned from the operation of a railroad terminal. The term *related terminal income* means the taxable income (computed without regard to sections 172, 277, or 281) which the terminal railroad corporation derives for the taxable year from the sources enumerated in paragraph (b)(2) of this section. Related terminal income must be derived from direct provision of the specified facilities or services by the terminal corporation itself. Thus, income consisting of rent from a lease of a terminal facility by a terminal corporation to a railroad user would qualify; but dividends from a corporation in which the terminal corporation owned stock and which provided such facilities or services to others would not qualify. The term does not include gain or loss derived from the sale, exchange, or other disposition of capital assets or section 1231 assets, whether or not section 1245 or section 1250 applies to part or all of that gain. For example, the term does not apply to gain from the sale of a terminal building or terminal equipment. All direct and indirect expenses and other deductible items attributable to related terminal services or facilities shall be deducted in determining related terminal income. Attribution shall be determined in accordance with customary railroad accounting practices accepted by the Interstate Commerce Commission, except that interest paid with respect to the indebtedness of a terminal railroad corporation shall be deducted from related terminal income to the extent that the proceeds from the indebtedness were directly or indirectly applied to facilities or activities producing such income. The district director may either accept the use of the taxpayer's method of determining the application of the proceeds of all indebtedness of such corporation or prescribe the use of another method which, under all the facts and circumstances, appears to reflect more accurately the probable application of such proceeds.

(2) *Sources of related terminal income.* The term *related terminal income* includes only income derived from one or more of the following sources:

(i) From services or facilities of a character ordinarily and regularly provided by terminal railroad corporations for railroad corporations or for the employees, passengers, or shippers of railroad corporations. Whether the services or facilities are of a character ordinarily and regularly provided by terminal railroad corporations is to be determined by accepted industry practice. The fact that nonterminal businesses may also provide such services or facilities is immaterial. However, there must be a direct relationship between the service or facility provided and the operation of the terminal, including the operation of its trackage and switching facilities. Thus, the term *related terminal income* includes income derived from operating or leasing switching facilities and terminal facilities, such as income from charges to railroad corporations for the use of a union passenger or freight station. Also included for this purpose is income derived from charges to railroad shippers, including express companies and freight forwarders, for the use of sheds or warehouses, even though not directly intended for railroad use. The term includes income derived from leasing or operating restaurants, drugstores, barbershops, newsstands, ticket agencies, banking facilities, car rental facilities, or other similar facilities for passengers, in waiting rooms or along passenger concourses. Similarly, the term includes income derived from operating or leasing passenger parking facilities, and from renting taxicab space, located on or adjacent to the terminal premises. Although the term does include income derived from the operation of a small hotel operated primarily for and usually occupied primarily by the employees of the railroad corporations, it does not include income derived from the operation of a hotel for passengers or other persons.

(ii) From any railroad corporation for services or facilities provided by the terminal railroad corporation in connection with railroad operations. A service or a facility is provided in connection with railroad operations if it is of a character ordinarily and regularly availed of by railroad corporations. For purposes of this subdivision, the income must be derived from railroad corporations. Thus, in addition to the income derived from sources described in paragraph (b)(2)(i) of this section, the term *related terminal income* includes income derived from switching facilities or leasing to any railroad corporation, or operating for the benefit of such corporation, a beltline or bypass railroad leading to or from the terminal premises. Also included are income derived from the rental of office space (whether or not services are provided to the occupants) in the terminal building to any railroad corporation for that corporation's administrative or operating divisions, and income derived from tolls charged to any railroad corporation for the use of a railroad bridge or ferry.

(iii) From the use by persons other than railroad corporations of a portion of a facility, or of a service, which is used primarily for railroad purposes. A facility or service is used primarily for railroad purposes if the predominant reason for its continued operation or provision is the furnishing of facilities or services described in either subdivision (i) or (ii) of this subparagraph. The determination required by this subdivision is to be made independently for each separate facility or service. Two substantial portions of a single structure may be considered separate facilities, depending upon the respective uses made of each. Moreover, any substantial addition, constructed after October 23, 1962, to a facility shall be considered a separate facility.

The term *related terminal income* includes income produced by operating a commuter service or by renting tracks and facilities for a commuter service to an independent operator. The term also includes the sale or rental of advertising space at a terminal facility. If the conditions described in this subdivision are satisfied, the term *related terminal income* may include income which has no connection with the operation of the terminal. Thus, if a terminal railroad corporation operates a railroad bridge primarily to provide railroad corporations a means of crossing a river and the lower level of the bridge contains a roadway for similar use by automobiles, the term includes income derived from the tolls charged to the automobiles for the use of the bridge roadway. However, upon the discontinuance of operations of the railroad level of the bridge, the term would cease to include the automobile tolls. If excess steam from a steam plant operated primarily to supply steam to the terminal is sold to another business in the neighborhood, the term would include the income derived from such sale. However, because an oil or gas well or a mine constitutes a separate facility, the term *related terminal income* does not include income derived in any form from a deposit of oil, natural gas, or any other mineral located on property owned or leased by the terminal railroad corporation.

Similarly, while the term includes income derived from the rental of a small number of offices located in the terminal building (whether or not the lessees are railroad corporations), it does not include income derived from the leasing or operation, for the use of the general public, of a large number of offices or a large number of rooms for lodging, whether or not the space is physically part of the same structure as the terminal. Moreover, the term does not include income derived from the rental of offices to the general public in an addition to the terminal building constructed after October 23, 1962, unless the addition is primarily used for railroad purposes and the offices rented to the general public do not constitute a separate facility in the addition. Whether or not income from the addition is determined to be related terminal income, the income from the small number of offices which were included in the terminal building before the addition was constructed shall continue to be related terminal income.

(iv) From the United States in payment for facilities or services in connection with mail handling. The income must be derived directly from the U.S. Government, or any agency thereof (including for this purpose the U.S. Postal Service), through the receipt of payments for mail-handling facilities or services. Thus, the term would include income derived from the rental of space for a post office for use by the general public on the terminal premises or from the sorting of mail in a railroad box car.

(3) *Illustration*. The provisions of this paragraph may be illustrated by the following example:

Example. For its calendar year 1973, the R Company, a terminal railroad corporation, has taxable income of $36,000, before the application of section 281 and taking no account of section 277, determined as follows:

Gross income:	
Switching charges	$50,000
Express companies	2,000
Commuter line	4,000
U.S. mail handling	4,000
Railroad bridge tolls:.	
From railroads	2,000
From automobiles	1,000
Total	3,000
Station and train charges	47,000
Terminal parking lot	4,000
Rent from terminal building:	
Passenger facilities (ground level)	8,000
Offices leased to railroads (2d floor)	3,000
Offices leased to others (2d floor)	1,000
Hotel open to public (3d through 6th floors)	14,000
Total	26,000
Interest received from bond investments	1,500
Dividends received from wholly owned subsidiary	10,000
Amount realized from sale of equipment	6,000
Less:	
Adjusted basis	1,000
Expenses of sale	500
	1,500
	4,500
	156,000
Allowable deductions:	
Dividend received deduction	8,500
Interest paid:	
On loan for hotel furnishings	1,500
On loan for rolling stock	2,000
	3,500
Maintenance, depreciation, management and other expenses:	
Attributable to hotel	3,000
Attributable to parking lot	1,000
Attributable to U.S. mail handling	1,000
All other	98,000
	103,000
Loss from sale of securities	3,000
Charitable contribution	500
Net operating loss deduction	1,500
	120,000
Taxable income before the application of sec. 281	36,000

The R Co.'s related terminal income for 1973 is $24,000, computed as follows:

Taxable income (before the application of sec. 281)	36,000
Less:	
Dividend received	10,000
Minus dividend received deduction	8,500
	1,500
Interest received	1,500
Amount realized from sale of equipment	6,000
Less:	
Adjusted basis	1,000
Expense of sale	500
	1,500
	4,500
Hotel income	14,000
Less:	
Interest paid on loan for hotel	1,500
Other hotel expenses	3,000
	4,500
	9,500
	17,000
	19,000
Add:	
Loss from sale of securities	3,000
Charitable contribution	500
Net operating loss deduction	1,500
	5,000
Related terminal income	24,000

(c) *Related terminal services.* The term *related terminal services* means only the services or the use of facilities, provided by the terminal railroad corporation, which are taken into account in computing related terminal income. Thus, the term includes the providing of terminal and switching services, the furnishing of terminal and switching facilities including the furnishing of terminal trackage, and the operation of bridges and ferries for railroad purposes. For example, upon the facts of the example in the preceding paragraph, the charges for related terminal services are $126,000, determined as follows:

Switching charges	$50,000
Express companies	2,000
Commuter line	4,000
U.S. mail handling	4,000
Railroad bridge tolls	3,000
Station and train charges	47,000
Terminal parking lot	4,000
Rent from:	
Passenger facilities	8,000
Offices	4,000
Total	126,000

(d) *Agreement.* As used in section 281 and §1.281–2 the term *agreement* means a written contract, entered into before the beginning of the terminal railroad corporation's taxable year in question, to which all shareholders of the terminal railroad corporation are parties. The fact that other railroad corporations or persons are also parties will not disqualify an agreement. Section 281 applies only if, and to the extent that, the reduction of the liability or charge that would be made, as described in paragraph (c) of §1.281–2, results from the agreement. Thus, where the other conditions of the statute are met, section 281 applies if a written agreement, to which all of the shareholders were parties and which was entered into prior to the beginning of the terminal railroad corporation's taxable year, provides that the net revenues of the terminal railroad corporation are to be applied as a reduction of what would otherwise be the charge for the taxable year for related terminal services provided to the shareholders. Similarly, section 281 applies, where its other requirements are fulfilled, if the agreement provides that the net revenues are to be credited against rental obligations resulting from related terminal services furnished to shareholders. However, section 281 does not apply where the agreement provides that the net revenues are to be divided among the shareholders and distributed to them in cash or held subject to their unconditional right of withdrawal instead of being applied to the computation of charges, or in reduction of liabilities incurred, for related terminal services.

(e) *Railroad corporation.* For purposes of section 281, § 1.281–2, and this section, the term *railroad corporation* means any corporation (regardless of whether it is a shareholder of the terminal railroad corporation) that is engaged as a common carrier in the furnishing or sale of transportation by railroad, or is a lessor of railroad equipment or facilities. For purposes of the preceding sentence, a corporation is a lessor of railroad equipment or facilities only if (1) it is subject to part I of the Interstate Commerce Act, (2) substantially all of its railroad properties have been leased to a railroad corporation or corporations, (3) each lease is for a term of more than 20 years, and (4) 80 percent or more of its gross income for the taxable year is derived for such leases.

[T.D. 7356, 40 FR 23735, June 2, 1975]

§ 1.281–4 Taxable years affected.

(a) *In general.* Except as provided in paragraph (b) of this section, the provisions of section 281 and §§ 1.281–2 and 1.281–3 shall apply to all taxable years to which either the Internal Revenue Code of 1954 or the Internal Revenue Code of 1939 apply.

(b) *Taxable years ending before October 23, 1962.* (1)(i) In the case of a taxable year of a terminal railroad corporation ending before October 23, 1962, section 281 (a) shall apply only to the extent that the terminal railroad corporation *(a)* computed its taxable income on its return for such taxable year as if the ''reduced amount'', described in paragraph (c) of § 1.281–2, were not received or accrued, and *(b)* did not decrease its otherwise allowable deductions for such taxable year on account of that ''reduced amount''. Similarly, in the case of a taxable year of a shareholder of a terminal railroad corporation ending before October 23, 1962, section 281(b) shall apply only to the extent that such shareholder computed its taxable income on its return for such taxable year as if the shareholder had neither received or accrued as a dividend nor paid or incurred as an expense the ''reduced amount'' described in paragraph (c) of § 1.281–2. Such return must have been filed on or before the due date (including the period of any extension of time) for filing the return for the applicable taxable year. The fact that an amended return or claim for refund or credit of overpayment was subsequently filed, or a deficiency subsequently assessed, based upon a computation of taxable income which is inconsistent with the manner in which the taxable income was computed on the timely filed return, is immaterial.

(ii) The provisions of this paragraph may be illustrated by the following examples:

Example 1. The G Company is a terminal railroad corporation which in 1960 reduced the liabilities resulting from charges to its shareholders, pursuant to a 1947 written agreement, by its income from nonshareholder sources. For the calendar year 1960, the G Company's related terminal income was $24,000, of which $3,000 is attributable to income from the United States in payment for facilities and services in connection with mail handling. Although the shareholders' liabilities were reduced by $24,000 as a result of taking related terminal income earned during the taxable year into account, on its timely filed 1960 income tax return the G Company treated the $3,000 of liabilities which were reduced on account of income from mail handling as gross income received or accrued during the year. Assuming that the provisions of § 1.281–2 otherwise apply, their application to the determination of the 1960 tax liability of the G Company shall not extend to the entire ''reduced amount'' of

$24,000, but shall be limited to $21,000 of that amount.

Example 2. Assume the same facts as in *Example (1),* and the following additional facts. The G Company had three shareholders in 1960, and an equal discharge of liability of $8,000 resulted for each of them on account of related terminal income. Each shareholder treated, on its timely filed 1960 income tax return, $1,000 of its liabilities, which were so reduced and were attributable to income from the United States in payment for facilities and services in connection with mail handling, as if it had received $1,000 from the G Company as a dividend and paid that $1,000 to the G Company for services. Each shareholder treated the remaining $7,000 of its liabilities which were so reduced as if the liabilities which were reduced had never been incurred. Assuming that the provisions of §1.281–2 otherwise apply, each shareholder shall not be considered to have received or accrued as a dividend, nor to have paid or incurred as an expense $7,000 (instead of $8,000).

(2) For any taxable year of a terminal railroad corporation ending before October 23, 1962, a claim for refund or credit of overpayment of income tax based upon section 281 may be filed, even though such refund or credit of overpayment was otherwise barred by operation of any law or rule of law on October 23, 1962, subject to the conditions set forth in paragraph (b)(2)(i) through (v) of this section.

(i) The claim for refund or credit of overpayment must not have been barred by a closing agreement (under either section 3760 of the Internal Revenue Code of 1939 or section 7121 of the Internal Revenue Code of 1954), or by a compromise (under section 3761 of the Internal Revenue Code of 1939 or section 7122 of the Internal Revenue Code of 1954);

(ii) The claim for refund or credit of overpayment shall be allowed only to the extent that the overpayment of income tax results from the recomputation of the terminal railroad corporation's taxable income in the manner described in paragraph (a) of §1.281–2;

(iii) The claim for refund or credit of the overpayment must have been filed prior to October 23, 1963;

(iv) The claim for refund or credit of overpayment shall be allowed only to the extent that the manner in which the terminal railroad corporation's taxable income is recomputed is the manner in which the terminal railroad corporation's taxable income was computed on its timely filed income tax return for such taxable year; and

(v) Each railroad corporation which was a shareholder of the terminal railroad corporation during such taxable year must consent in writing to the assessment, within such period as may be agreed upon with the district director, of any deficiency for any year (even though assessment of the deficiency would otherwise be prevented by the operation of any law or rule of law at the time of filing the consent) to the extent that:

(A) The deficiency is attributable to the recomputation of the shareholder's taxable income in the manner described in paragraph (b) of §1.281–2, and

(B) The deficiency results from the shareholder's allocable portion of the ''reduced amount'' (described in paragraph (c) of §1.281–2) which gives rise to the refund or credit granted to the terminal railroad corporation under this subparagraph.

[T.D. 7356, 40 FR 23737, June 2, 1975]

SUBCHAPTER A—INCOME TAX (Continued)

PART 1—INCOME TAXES (Continued)

NORMAL TAXES AND SURTAXES (CONTINUED)

CORPORATE DISTRIBUTIONS AND ADJUSTMENTS

DISTRIBUTIONS BY CORPORATIONS

EFFECTS ON RECIPIENTS

Sec.
1.301–1 Rules applicable with respect to distributions of money and other property.
1.302–1 General.
1.302–2 Redemptions not taxable as dividends.
1.302–3 Substantially disproportionate redemption.
1.302–4 Termination of shareholder's interest.
1.303–1 General.
1.303–2 Requirements.
1.303–3 Application of other sections.
1.304–1 General.
1.304–2 Acquisition by related corporation (other than subsidiary).
1.304–3 Acquisition by a subsidiary.
1.304–4T Special rule for use of a related corporation to acquire for property the stock of another commonly owned corporation (temporary).
1.304–5 Control.
1.305–1 Stock dividends.
1.305–2 Distributions in lieu of money.
1.305–3 Disproportionate distributions.
1.305–4 Distributions of common and preferred stock.
1.305–5 Distributions on preferred stock.
1.305–6 Distributions of convertible preferred.
1.305–7 Certain transactions treated as distributions.
1.305–8 Effective dates.
1.306–1 General
1.306–2 Exception
1.306–3 Section 306 stock defined.
1.307–1 General.
1.307–2 Exception.

EFFECTS ON CORPORATION

1.312–1 Adjustment to earnings and profits reflecting distributions by corporations.
1.312–2 Distribution of inventory assets.
1.312–3 Liabilities.
1.312–4 Examples of adjustments provided in section 312(c).
1.312–5 Special rule for partial liquidations and certain redemptions.
1.312–6 Earnings and profits.
1.312–7 Effect on earnings and profits of gain or loss realized after February 28, 1913.
1.312–8 Effect on earnings and profits of receipt of tax-free distributions requiring adjustment or allocation of basis of stock.
1.312–9 Adjustments to earnings and profits reflecting increase in value accrued before March 1, 1913.
1.312–10 Allocation of earnings in certain corporate separations.
1.312–11 Effect on earnings and profits of certain other tax-free exchanges, tax-free distributions, and tax-free transfers from one corporation to another.
1.312–12 Distributions of proceeds of loans guaranteed by the United States.
1.312–15 Effect of depreciation on earnings and profits.

DEFINITIONS; CONSTRUCTIVE OWNERSHIP OF STOCK

1.316–1 Dividends.
1.316–2 Sources of distribution in general.
1.317–1 Property defined.
1.318–1 Constructive ownership of stock; introduction.
1.318–2 Application of general rules.
1.318–3 Estates, trusts, and options.
1.318–4 Constructive ownership as actual ownership; exceptions.

CORPORATE LIQUIDATIONS

EFFECTS ON RECIPIENTS

1.331–1 Corporate liquidations.
1.332–1 Distributions in liquidation of subsidiary corporation; general.
1.332–2 Requirements for nonrecognition of gain or loss.
1.332–3 Liquidations completed within one taxable year.
1.332–4 Liquidations covering more than one taxable year.
1.332–5 Distributions in liquidation as affecting minority interests.
1.332–6 Records to be kept and information to be filed with return.
1.332–7 Indebtedness of subsidiary to parent.
1.334–1 Basis of property received in liquidations.

EFFECTS ON CORPORATION

1.337(d)–1 Transitional loss limitation rule.
1.337(d)–1T [Reserved]
1.337(d)–2 Loss limitation window period.
1.337(d)–4 Taxable to tax-exempt.
1.338–0 Outline of topics.
1.338–1 Elections under section 338.

1.338–2 Miscellaneous issues under section 338.
1.338–3 Deemed sale and aggregate deemed sale price.
1.338–4 Asset and stock consistency.
1.338–5 International aspects of section 338.
1.338(b)–1 Adjusted grossed-up basis.
1.338(b)–2T Allocation of adjusted grossed-up basis among target assets (temporary).
1.338(b)–3T Subsequent adjustments to adjusted grossed-up basis (temporary).
1.338(h)(10)–1 Deemed asset sale and liquidation.
1.338(i)–1 Effective dates.

COLLAPSIBLE CORPORATIONS; FOREIGN PERSONAL HOLDING COMPANIES

1.341–1 Collapsible corporations; in general.
1.341–2 Definitions.
1.341–3 Presumptions.
1.341–4 Limitations on application of section.
1.341–5 Application of section.
1.341–6 Exceptions to application of section.
1.341–7 Certain sales of stock of consenting corporations.
1.342–1 General.

DEFINITION

1.346–1 Partial liquidation.
1.346–2 Treatment of certain redemptions.
1.346–3 Effect of certain sales.

CORPORATE ORGANIZATIONS AND REORGANIZATIONS

CORPORATE ORGANIZATIONS

1.351–1 Transfer to corporation controlled by transferor.
1.351–2 Receipt of property.
1.351–3 Records to be kept and information to be filed.

EFFECTS ON SHAREHOLDERS AND SECURITY HOLDERS

1.354–1 Exchanges of stock and securities in certain reorganizations.
1.355–0 In order to facilitate the use of §§1.355–1 through 1.355–6, this section lists the paragraphs, subparagraphs, and subdivisions in those sections.
1.355–1 Distribution of stock and securities of controlled corporation.
1.355–2 Limitations.
1.355–3 Active conduct of a trade or business.
1.355–4 Non pro rata distributions, etc.
1.355–5 Records to be kept and information to be filed.
1.355–6 Certain distributions qualifying under section 355 made ineligible for norecognition of gain to the distributing corporation under §337(d). [Reserved]
1.356–1 Receipt of additional consideration in connection with an exchange.
1.356–2 Receipt of additional consideration not in connection with an exchange.
1.356–3 Rules for treatment of securities as ‘‘other property’’.
1.356–4 Exchanges for section 306 stock.
1.356–5 Transactions involving gift or compensation.
§1.356–6T Rules for treatment of nonqualified preferred stock as ‘‘other property’’ (temporary).
1.357–1 Assumption of liability.
1.357–2 Liabilities in excess of basis.
1.358–1 Basis to distributees.
1.358–2 Allocation of basis among nonrecognition property.
1.358–3 Treatment of assumption of liabilities.
1.358–4 Exceptions.
1.358–5 [Reserved]
1.358–6 Stock basis in certain triangular reorganizations.

EFFECTS ON CORPORATION

1.361–1 Nonrecognition of gain or loss to corporations.
1.362–1 Basis to corporations.
1.362–2 Certain contributions to capital.
1.367(a)–1T Transfers to foreign corporations subject to section 367(a): In general (temporary).
1.367(a)–2T Exception for transfers of property for use in the active conduct of a trade or business (temporary).
1.367(a)–3 Treatment of transfers of stock or securities to foreign corporations.
1.367(a)–4T Special rules applicable to specified transfers of property (temporary).
1.367(a)–5T Property subject to section 367(a)(1) regardless of use in trade or business (temporary).
1.367(a)–6T Transfer of foreign branch with previously deducted losses (temporary).
1.367(a)–8 Gain recognition agreement requirements.
1.367(b)–1 Other transfers.
1.367(b)–2 Definitions.
1.367(b)–4 Certain exchanges of stock described in section 354, 351, or sections 354 and 351.
1.367(b)–7 Exchange of stock described in section 354.
1.367(b)–8 Transfer of assets by a foreign corporation in an exchange described in section 351.
1.367(b)–9 Attribution of earnings and profits on an exchange described in section 351, 354, or 356.
1.367(d)–1T Transfers of intangible property to foreign corporations (temporary).
1.367(e)–0T Treatment of section 355 distributions by U.S. corporations to foreign persons; table of contents.

1.367(e)–1T Treatment of section 355 distributions by U.S. corporations to foreign persons (temporary).
1.367(e)–2T Distributions described in section 367(e)(2) (temporary).

SPECIAL RULE; DEFINITIONS

1.368–1 Purpose and scope of exception of reorganization exchanges.
1.368–1T Purpose and scope of exception of reorganization exchanges (temporary).
1.368–2 Definition of terms.
1.368–3 Records to be kept and information to be filed with returns.

INSOLVENCY REORGANIZATIONS

1.371–1 Exchanges by corporations.
1.371–2 Exchanges by security holders.
1.372–1 Corporations.
1.374–1 Exchanges by insolvent railroad corporations.
1.374–2 Basis of property acquired after December 31, 1938, by railroad corporation in a receivership or railroad reorganization proceeding.
1.374–3 Records to be kept and information to be filed.
1.374–4 Property acquired by electric railway corporation in corporate reorganization proceeding.

CARRYOVERS

1.381(a)–1 General rule relating to carryovers in certain corporate acquisitions.
1.381(b)–1 Operating rules applicable to carryovers in certain corporate acquisitions.
1.381(c)(1)–1 Net operating loss carryovers in certain corporate acquisitions.
1.381(c)(1)–2 Net operating loss carryovers; two or more dates of distribution or transfer in the taxable year.
1.381(c)(2)–1 Earnings and profits.
1.381(c)(3)–1 Capital loss carryovers.
1.381(c)(4)–1 Method of accounting.
1.381(c)(5)–1 Inventories.
1.381(c)(6)–1 Depreciation method.
1.381(c)(8)–1 Installment method.
1.381(c)(9)–1 Amortization of bond discount or premium.
1.381(c)(10)–1 Deferred exploration and development expenditures.
1.381(c)(11)–1 Contributions to pension plan, employees' annuity plans, and stock bonus and profit-sharing plans.
1.381(c)(12)–1 Recovery of bad debts, prior taxes, or delinquency amounts.
1.381(c)(13)–1 Involuntary conversions.
1.381(c)(14)–1 Dividend carryover to personal holding company.
1.381(c)(15)–1 Indebtedness of certain personal holding companies.
1.381(c)(16)–1 Obligations of distributor or transferor corporation.
1.381(c)(17)–1 Deficiency dividend of personal holding company.
1.381(c)(18)–1 Depletion on extraction of ores or minerals from the waste or residue of prior mining.
1.381(c)(19)–1 Charitable contribution carryovers in certain acquisitions.
1.381(c)(21)–1 Pre-1954 adjustments resulting from change in method of accounting.
1.381(c)(22)–1 Successor life insurance company.
1.381(c)(23)–1 Investment credit carryovers in certain corporate acquisitions.
1.381(c)(24)–1 Work incentive program credit carryovers in certain corporate acquisitions.
1.381(c)(25)–1 Deficiency dividend of a qualified investment entity.
1.381(c)(26)–1 Credit for employment of certain new employees.
1.381(d)–1 Operations loss carryovers of life insurance companies.
1.382–1 Table of contents.
1.382–1T [Reserved]
1.382–2 General rules for ownership change.
1.382–2T Definition of ownership change under section 382, as amended by the Tax Reform Act of 1986 (temporary).
1.382–3 Definitions and rules relating to a 5–percent shareholder.
1.382–4 Constructive ownership of stock.
1.382–5 Section 382 limitation. [Reserved]
1.382–5T Section 382 limitation (temporary).
1.382–6 Allocation of income and loss to periods before and after the change date for purposes of section 382.
1.382–7 Built-in gains and loses. [Reserved]
1.382–8 Controlled groups. [Reserved]
1.382–8T Controlled groups (temporary).
1.382–9 Special rules under section 382 for corporations under the jurisdiction of a court in a title 11 or similar case.
1.382–10 [Reserved]
1.382–11 Effective dates. [Reserved]
1.383–0 Effective date.
1.383–1 Special limitations on certain capital losses and excess credits.
1.383–2 Limitations on certain capital losses and excess credits in computing alternative minimum tax. [Reserved]

CORPORATE DISTRIBUTIONS AND ADJUSTMENTS

DISTRIBUTIONS BY CORPORATIONS

EFFECTS ON RECIPIENTS

§ 1.301–1 Rules applicable with respect to distributions of money and other property.

(a) *General.* Section 301 provides the general rule for treatment of distributions on or after June 22, 1954, of property by a corporation to a shareholder with respect to its stock. The term *property* is defined in section 317(a). Such distributions, except as otherwise provided in this chapter, shall be treated as provided in section 301(c). Under section 301(c), distributions may be included in gross income, applied against and reduce the adjusted basis of the stock, treated as gain from the sale or exchange of property, or (in the case of certain distributions out of increase in value accrued before March 1, 1913) may be exempt from tax. The amount of the distributions to which section 301 applies is determined in accordance with the provisions of section 301(b). The basis of property received in a distribution to which section 301 applies is determined in accordance with the provisions of section 301(d). Accordingly, except as otherwise provided in this chapter, a distribution on or after June 22, 1954, of property by a corporation to a shareholder with respect to its stock shall be included in gross income to the extent the amount distributed is considered a dividend under section 316. For examples of distributions treated otherwise, see sections 116, 301(c)(2), 301(c)(3)(B), 301(e), 302(b), 303, and 305. See also part II (relating to distributions in partial or complete liquidation), part III (relating to corporate organizations and reorganizations), and part IV (relating to insolvency reorganizations), subchapter C, chapter 1 of the Code.

(b) *Time of inclusion in gross income and of determination of fair market value.* A distribution made by a corporation to its shareholders shall be included in the gross income of the distributees when the cash or other property is unqualifiedly made subject to their demands. However, if such distribution is a distribution other than in cash, the fair market value of the property shall be determined as of the date of distribution without regard to whether such date is the same as that on which the distribution is includible in gross income. For example, if a corporation distributes a taxable dividend in property (the adjusted basis of which exceeds its fair market value on December 31, 1955) on December 31, 1955, which is received by, or unqualifiedly made subject to the demand of, its shareholders on January 2, 1956, the amount to be included in the gross income of the shareholders will be the fair market value of such property on December 31, 1955, although such amount will not be includible in the gross income of the shareholders until January 2, 1956.

(c) *Application of section to shareholders.* Section 301 is not applicable to an amount paid by a corporation to a shareholder unless the amount is paid to the shareholder in his capacity as such.

(d) *Distributions to corporate shareholders.* (1) If the shareholder is a corporation, the amount of any distribution to be taken into account under section 301(c) shall be:

(i) The amount of money distributed,

(ii) An amount equal to the fair market value of any property distributed which consists of any obligations of the distributing corporation, stock of the distributing corporation treated as property under section 305(b), or rights to acquire such stock treated as property under section 305(b), plus

(iii) In the case of a distribution not described in subdivision (iv) of this subparagraph, an amount equal to (*a*) the fair market value of any other property distributed or, if lesser, (*b*) the adjusted basis of such other property in the hands of the distributing corporation (determined immediately before the distribution and increased for any gain recognized to the distributing corporation under section 311 (b), (c), or (d), or under section 341(f), 617(d), 1245(a), 1250(a), 1251(c), 1252(a), or 1254(a)), or

(iv) In the case of a distribution made after November 8, 1971, to a shareholder which is a foreign corporation, an amount equal to the fair market value of any other property distributed, but only if the distribution received by such shareholder is not effectively connected for the taxable year with the conduct of a trade or business in the United States by such shareholder.

(2) In the case of a distribution the amount of which is determined by reference to the adjusted basis described in subparagraph (1)(iii)(*b*) of this paragraph:

(i) That portion of the distribution which is a dividend under section 301(c)(1) may not exceed such adjusted basis, or

(ii) If the distribution is not out of earnings and profits, the amount of the reduction in basis of the shareholder's stock, and the amount of any gain resulting from such distribution, are to be determined by reference to such adjusted basis of the property which is distributed.

(3) Notwithstanding paragraph (d)(1)(iii), if a distribution of property described in such paragraph is made after December 31, 1962, by a foreign corporation to a shareholder which is a corporation, the amount of the distribution to be taken into account under section 301(c) shall be determined under section 301(b)(1)(C) and paragraph (n) of this section.

(e) *Adjusted basis.* In determining the adjusted basis of property distributed in the hands of the distributing corporation immediately before the distribution for purposes of section 301(b)(1)(B)(ii), (b)(1)(C)(i), and (d)(2)(B), the basis to be used shall be the basis for determining gain upon a sale or exchange.

(f) *Examples.* The application of this section (except paragraph (n)) may be illustrated by the following examples:

Example (1). On January 1, 1955, A, an individual owned all of the stock of Corporation M with an adjusted basis of $2,000. During 1955, A received distributions from Corporation M totaling $30,000, consisting of $10,000 in cash and listed securities having a basis in the hands of Corporation M and a fair market value on the date distributed of $20,000. Corporation M's taxable year is the calendar year. As of December 31, 1954, Corporation M had earnings and profits accumulated after February 28, 1913, in the amount of $26,000, and it had no earnings and profits and no deficit for 1955. Of the $30,000 received by A, $26,000 will be treated as an ordinary dividend; the remaining $4,000 will be applied against the adjusted basis of his stock; the $2,000 in excess of the adjusted basis of his stock will either be treated as gain from the sale or exchange of property (under section 301(c)(3)(A)) or, if out of increase in value accrued before March 1, 1913, will (under section 301(c)(3)(B)) be exempt from tax. If A subsequently sells his stock in Corporation M, the basis for determining gain or loss on the sale will be zero.

Example (2). The facts are the same as in Example 1 with the exceptions that the shareholder of Corporation M is Corporation W and that the securities which were distributed had an adjusted basis to Corporation M of $15,000. The distribution received by Corporation W totals $25,000 consisting of $10,000 in cash and securities with an adjusted basis of $15,000. The total $25,000 will be treated as a dividend to Corporation W since the earnings and profits of Corporation M ($26,000) are in excess of the amount of the distribution.

Example (3). Corporation X owns timber land which it acquired prior to March 1, 1913, at a cost of $50,000 with $5,000 allocated as the separate cost of the land. On March 1, 1913, this property had a fair market value of $150,000 of which $135,000 was attributable to the timber and $15,000 to the land. All of the timber was cut prior to 1955 and the full appreciation in the value thereof, $90,000 ($135,000 − $45,000), realized through depletion allowances based on March 1, 1913, value. None of this surplus from realized appreciation had been distributed. In 1955, Corporation X sold the land for $20,000 thereby realizing a gain of $15,000. Of this gain, $10,000 is due to realized appreciation in value which accrued before March 1, 1913 ($15,000 − $5,000). Of the gain of $15,000, $5,000 is taxable. Therefore, at December 31, 1955, Corporation X had a surplus from realized appreciation in the amount of $100,000. It had no accumulated earnings and profits and no deficit at January 1, 1955. The net earnings for 1955 (including the $5,000 gain on the sale of the land) were $20,000. During 1955, Corporation X distributed $75,000 to its stockholders. Of this amount, $20,000 will be treated as a dividend. The remaining $55,000, which is a distribution of realized appreciation, will be applied against and reduce the adjusted basis of the shareholders' stock. If any part of the $55,000 is in excess of the adjusted basis of a shareholder's stock, such part will be exempt from tax.

(g) *Reduction for liabilities.* For the purpose of section 301(a), the amount of any distribution shall be reduced by—

(1) The amount of any liability of the corporation assumed by the shareholder in connection with the distribution, and

(2) The amount of any liability to which the property received by the shareholder is subject immediately before and immediately after the distribution.

Such reduction, however, shall not cause the amount of the distribution to be reduced below zero.

(h) *Basis.* The basis of property received in the distribution to which section 301 applies shall be—

(1) If the shareholder is not a corporation, the fair market value of such property;

(2) If the shareholder is a corporation—

(i) In the case of a distribution of the obligations of the distributing corporation or of the stock of such corporation or rights to acquire such stock (if such stock or rights are treated as property under section 305(b)), the fair market value of such obligations, stock, or rights;

(ii) In the case of the distribution of any other property, except as provided in subdivision (iii) (relating to certain distributions by a foreign corporation) or subdivision (iv) (relating to certain distributions to foreign corporate distributees) of this subparagraph, whichever of the following is the lesser—

(*a*) The fair market value of such property; or

(*b*) The adjusted basis (in the hands of the distributing corporation immediately before the distribution) of such property increased in the amount of gain to the distributing corporation which is recognized under section 311(b) (relating to distributions of LIFO inventory), section 311(c) (relating to distributions of property subject to liabilities in excess of basis), section 311(d) (relating to appreciated proterty used to redeem stock), section 341(f) (relating to certain sales of stock of consenting corporations), section 617(d) (relating to gain from dispositions of certain mining property), section 1245(a) or 1250(a) (relating to gain from dispositions of certain depreciable property), section 1251(c) (relating to gain from disposition of farm recapture property), section 1252(a) (relating to gain from disposition of farm land), or 1254(a) (relating to gain from disposition of interest in natural resource recapture property);

(iii) In the case of the distribution by a foreign corporation of any other property after December 31, 1962, in a distribution not described in subdivision (iv) of this subparagraph, the amount determined under paragraph (n) of this section;

(iv) In the case of the distribution of any other property made after November 8, 1971, to a shareholder which is a foreign corporation, the fair market value of such property, but only if the distribution received by such shareholder is not effectively connected for the taxable year with the conduct of a trade or business in the United States by such shareholder.

(i) [Reserved]

(j) *Transfers for less than fair market value.* If property is transferred by a corporation to a shareholder which is not a corporation for an amount less than its fair market value in a sale or exchange, such shareholder shall be treated as having received a distribution to which section 301 applies. In such case, the amount of the distribution shall be the difference between the amount paid for the property and its fair market value. If property is transferred in a sale or exchange by a corporation to a shareholder which is a corporation, for an amount less than its fair market value and also less than its adjusted basis, such shareholder shall be treated as having received a distribution to which section 301 applies, and—

(1) Where the fair market value of the property equals or exceeds its adjusted basis in the hands of the distributing corporation the amount of the distribution shall be the excess of the adjusted basis (increased by the amount of gain recognized under section 311 (b), (c), or (d), or under section 341(f), 617(d), 1245(a), 1250(a), 1251(c), 1252(a), or 1254(a) to the distributing corporation) over the amount paid for the property;

(2) Where the fair market value of the property is less than its adjusted basis in the hands of the distributing corporation, the amount of the distribution shall be the excess of such fair market value over the amount paid for the property. If property is transferred in a sale or exchange after December 31, 1962, by a foreign corporation to a shareholder which is a corporation for an amount less than the amount which would have been computed under paragraph (n) of this section if such property had been received in a distribution to which section 301 applied, such shareholder shall be treated as having received a distribution to which section 301 applies, and the amount of the distribution shall be the excess of the amount which would have been computed under paragraph (n) of this section with respect to such property over the amount paid for the property. In all cases, the earnings and profits of the distributing corporation shall be decreased by the excess of the basis of the property in the hands of the distributing corporation over the amount received therefor. In computing gain or loss from the subsequent sale of such property, its basis shall be the amount paid for the property increased by the amount of the distribution.

If property is transferred in a sale or exchange after December 31, 1962, by a foreign corporation to a shareholder which is a corporation for an amount less than the amount which would have been computed under paragraph (n) of this section if such property had been received in a distribution to which section 301 applied, such shareholder shall be treated as having received a distribution to which section 301 applies, and the amount of the distribution shall be the excess of the amount which would have been computed under paragraph (n) of this section with respect to such property over the amount paid for the property. Notwithstanding the preceding provisions of this paragraph, if property is transferred in a sale or exchange after November 8, 1971, by a corporation to a shareholder which is a foreign corporation, for an amount less than its fair market value, and if paragraph (d)(1)(iv) of this section would apply if such property were received in a distribution to which section 301 applies, such shareholder shall be treated as having received a distribution to which section 301 applies and the amount of the distribution shall be the difference between the amount paid for the property and its fair market value. In all cases, the earnings and profits of the distributing corporation shall be decreased by the excess of the basis of the property in the hands of the distributing corporation over the amount received therefor. In computing gain or loss from the subsequent sale of such property, its basis shall be the amount paid for the property increased by the amount of the distribution.

(k) *Application of rule respecting transfers for less than fair market value.* The application of paragraph (j) of this section may be illustrated by the following examples:

Example (1). On January 1, 1955, A, an individual shareholder of corporation X, purchased property from that corporation for $20. The fair market value of such property was $100, and its basis in the hands of corporation X was $25. The amount of the distribution determined under section 301(b) is $80. If A were a corporation, the amount of the distribution would be $5 (assuming that sections 311 (b) and (c), 1245(a), and 1250(a) do not apply), the excess of the basis of the property in the hands of corporation X over the amount received therefor. The basis of such property to corporation A would be $25. If the basis of the property in the hands of corporation X were $10, the corporate shareholder, A, would not receive a distribution. The basis of such property to corporation A would be $20. Whether or not A is a corporation, the excess of the amount paid over the basis of the property in the hands of corporation X ($20 over $10) would be a taxable gain to corporation X.

Example (2). On January 1, 1963, corporation A, which is a shareholder of corporation B (a foreign corporation engaged in business within the United States), purchased one share of corporation X stock from B for $20. The fair market value of the share was $100, and its adjusted basis in the hands of B was $25. Assume that if the share of corporation X stock had been received by A in a distribution to which section 301 applied, the amount of the distribution under paragraph (n) of this section would have been $55. The amount of the distribution under section 301 is $35, i.e., $55 (amount computed under paragraph (n) of this section) minus $20 (amount paid for the property). The basis of such property to A is $55.

(l) *Transactions treated as distributions.* A distribution to shareholders with respect to their stock is within the terms of section 301 although it takes place at the same time as another transaction if the distribution is in substance a separate transaction whether or not connected in a formal sense. This is most likely to occur in the case of a recapitalization, a reincorporation, or a merger of a corporation with a newly organized corporation having substantially no property. For example, if a corporation having only common stock outstanding, exchanges one share of newly issued common stock and one bond in the principal amount of $10 for each share of outstanding common stock, the distribution of the bonds will be a distribution of property (to the extent of their fair market value) to which section 301 applies, even though the exchange of common stock for common stock may be pursuant to a plan of reorganization under the terms of section 368(a)(1)(E) (recapitalization) and even though the exchange of common stock for common stock may be tax free by virtue of section 354.

(m) *Cancellation of indebtedness.* The cancellation of indebtedness of a shareholder by a corporation shall be treated as a distribution of property.

(n) [Reserved]

(o) *Distributions of certain property by DISC's to corporate shareholders.* See § 1.997–1 for the rule that if a corporation which is a DISC or former DISC (as defined in section 992(a)(1) or (3) as the case may be) makes a distribution of property (other than money and other than the obligations of the DISC or former DISC) out of accumulated DISC income (as defined in section 996(f)(1)) or previously taxed income (as defined in section 996(f)(2)), such distribution of property shall be treated as if it were made to an individual and that the basis of the property distributed, in the hands of the recipient corporation, shall be determined as if such property were distributed to an individual.

(p) *Cross references.* For certain rules relating to adjustments to earnings and profits and for determining the extent to which a distribution is a dividend, see sections 312 and 316 and regulations thereunder.

[T.D. 6500, 25 FR 11607, Nov. 26, 1960, as amended by T.D. 6752, 29 FR 12701, Sept. 9, 1964; T.D. 7084, 36 FR 267, Jan. 8, 1971; T.D. 7209, 37 FR 20800, Oct. 5, 1972; 38 FR 20824, Aug. 3, 1973; 38 FR 32794, Nov. 28, 1973; T.D. 7556, 44 FR 1376, Jan. 5, 1979; T.D. 8474, 58 FR 25557, Apr. 27, 1993; T.D. 8586, 60 FR 2500, Jan. 10, 1995]

§1.302–1 General.

(a) Under section 302(d), unless otherwise provided in subchapter C, chapter 1 of the Code, a distribution in redemption of stock shall be treated as a distribution of property to which section 301 applies if the distribution is not within any of the provisions of section 302(b). A distribution in redemption of stock shall be considered a distribution in part or full payment in exchange for the stock under section 302(a) provided paragraph (1), (2), (3), or (4) of section 302(b) applies. Section 318(a) (relating to constructive ownership of stock) applies to all redemptions under section 302 except that in the termination of a shareholder's interest certain limitations are placed on the application of section 318(a)(1) by section 302(c)(2). The term *redemption of stock* is defined in section 317(b). Section 302 does not apply to that portion of any distribution which qualifies as a distribution in partial liquidation under section 346. For special rules relating to redemption of stock to pay death taxes see section 303. For special rules relating to redemption of section 306 stock see section 306. For special rules relating to redemption of stock in partial or complete liquidation see section 331.

(b) If, in connection with a partial liquidation under the terms of section 346, stock is redeemed in an amount in excess of the amount specified by section 331(a)(2), section 302(b) shall first apply as to each shareholder to which it is applicable without limitation because of section 331(a)(2). That portion of the total distribution which is used in all redemptions from specific shareholders which are within the terms of section 302(a) shall be excluded in determining the application of sections 346 and 331(a)(2). For example, Corporation X has $50,000 which is attributable to the sale of one of two active businesses and which, if distributed in redemption of stock, would qualify as a partial liquidation under the terms of section 346(b). Corporation X distributes $60,000 to its shareholders in redemption of stock, $20,000 of which is in redemption of all of the stock of shareholder A within the meaning of section 302(b)(3). The $20,000 distributed in redemption of the stock of shareholder A will be excluded in determining the application of sections 346 and 331(a)(2). The entire $60,000 will be treated as in part or full payment for stock ($20,000 qualifying under section 302(a) and $40,000 qualifying under sections 346 and 331(a)(2)).

§1.302–2 Redemptions not taxable as dividends.

(a) The fact that a redemption fails to meet the requirements of paragraph (2), (3) or (4) of section 302(b) shall not be taken into account in determining whether the redemption is not essentially equivalent to a dividend under section 302(b)(1). See, however, paragraph (b) of this section. For example, if a shareholder owns only nonvoting stock of a corporation which is not section 306 stock and which is limited and preferred as to dividends and in liquidation, and one-half of such stock is redeemed, the distribution will ordinarily meet the requirements of paragraph (1) of section 302(b) but will not meet the requirements of paragraph (2), (3) or (4) of such section. The determination of whether or not a distribution is within the phrase ‘‘essentially equivalent to a dividend’’ (that is, having the same effect as a distribution without any redemption of stock) shall be made without regard to the earnings and profits of the corporation at the time of the distribution. For example, if A owns all the stock of a corporation and the corporation redeems part of his stock at a time when it has no earnings and profits, the distribution shall be treated as a distribution under section 301 pursuant to section 302(d).

(b) The question whether a distribution in redemption of stock of a shareholder is not essentially equivalent to a dividend under section 302(b)(1) depends upon the facts and circumstances of each case. One of the facts to be considered in making this determination is the constructive stock ownership of such shareholder under section 318(a). All distributions in pro rata redemptions of a part of the stock of a corporation generally will be treated as distributions under section 301 if the corporation has only one class of stock outstanding. However, for distributions in partial liquidation, see section 346. The redemption of all of one class of stock (except section 306 stock) either at one time or in a series of redemptions generally will be considered as a distribution under section 301 if all classes of stock outstanding at the time of the redemption are held in the same proportion. Distribution in redemption of stock may be treated as distributions under section 301 regardless of the provisions of the stock certificate and regardless of whether all stock being redeemed was acquired by the stockholders from whom the stock was redeemed by purchase or otherwise. In every case in which a shareholder transfers stock to the corporation which issued such stock in exchange for property, the facts and circumstances shall be reported on his return except as provided in paragraph (d) of § 1.331–1. See sections 346(a) and 6043 for requirements relating to returns by corporations.

(c) In any case in which an amount received in redemption of stock is treated as a distribution of a dividend, proper adjustment of the basis of the remaining stock will be made with respect to the stock redeemed. (For adjustments to basis required for certain redemptions of corporate shareholders that are treated as extraordinary dividends, see section 1059 and the regulations thereunder.) The following examples illustrate the application of this rule:

Example (1). A, an individual, purchased all of the stock of Corporation X for $100,000. In 1955 the corporation redeems half of the stock for $150,000, and it is determined that this amount constitutes a dividend. The remaining stock of Corporation X held by A has a basis of $100,000.

Example (2). H and W, husband and wife, each own half of the stock of Corporation X. All of the stock was purchased by H for $100,000 cash. In 1950 H gave one-half of the stock to W, the stock transferred having a value in excess of $50,000. In 1955 all of the stock of H is redeemed for $150,000, and it is determined that the distribution to H in redemption of his shares constitutes the distribution of a dividend. Immediately after the transaction, W holds the remaining stock of Corporation X with a basis of $100,000.

Example (3). The facts are the same as in *Example (2)* with the additional facts that the outstanding stock of Corporation X consists of 1,000 shares and all but 10 shares of the stock of H is redeemed. Immediately after the transaction, H holds 10 shares of the stock of Corporation X with a basis of $50,000, and W holds 500 shares with a basis of $50,000.

[T.D. 6500, 25 FR 11607, Nov. 26, 1960, as amended by T.D. 8724, 62 FR 38028, July 26, 1997]

§ 1.302–3 Substantially disproportionate redemption.

(a) Section 302(b)(2) provides for the treatment of an amount received in redemption of stock as an amount received in exchange for such stock if—

(1) Immediately after the redemption the shareholder owns less than 50 percent of the total combined voting power of all classes of stock as provided in section 302(b)(2)(B),

(2) The redemption is a substantially disproportionate redemption within the meaning of section 302(b)(2)(C), and

(3) The redemption is not pursuant to a plan described in section 302(b)(2)(D).

Section 318(a) (relating to constructive ownership of stock) shall apply both in making the disproportionate redemption test and in determining the percentage of stock ownership after the redemption. The requirements under section 302(b)(2) shall be applied to each shareholder separately and shall be applied only with respect to stock which is issued and outstanding in the hands of the shareholders. Section 302(b)(2) only applies to a redemption of voting stock or to a redemption of both voting stock and other stock. Section 302(b)(2) does not apply to the redemption solely of nonvoting stock (common or preferred). However, if a redemption is treated as an exchange to a particular shareholder under the terms of section 302(b)(2), such section will apply to the simultaneous redemption of nonvoting preferred stock (which is not section 306 stock) owned by such shareholder and such redemption will also be treated as an exchange. Generally, for purposes of this section, stock which does not have voting rights until the happening of an event, such as a default in the payment of dividends on preferred stock, is not voting stock until the happening of the specified event. Subsection 302(b)(2)(D) provides that a redemption will not be treated as substantially disproportionate if made pursuant to a plan the purpose or effect of which is a series of redemptions which result in the aggregate in a distribution which is not substantially disproportionate. Whether or not such a plan exists will be determined from all the facts and circumstances.

(b) The application of paragraph (a) of this section is illustrated by the following example:

Example. Corporation M has outstanding 400 shares of common stock of which A, B, C and D each own 100 shares or 25 percent. No stock is considered constructively owned by A, B, C or D under section 318. Corporation M redeems 55 shares from A, 25 shares from B, and 20 shares from C. For the redemption to be disproportionate as to any shareholder, such shareholder must own after the redemptions less than 20 percent (80 percent of 25 percent) of the 300 shares of stock then outstanding. After the redemptions, A owns 45 shares (15 percent), B owns 75 shares (25 percent), and C owns 80 shares (26 2/3 percent). The distribution is disproportionate only with respect to A.

§1.302–4 Termination of shareholder's interest.

Section 302(b)(3) provides that a distribution in redemption of all of the stock of the corporation owned by a shareholder shall be treated as a distribution in part or full payment in exchange for the stock of such shareholder. In determining whether all of the stock of the shareholder has been redeemed, the general rule of section 302(c)(1) requires that the rules of constructive ownership provided in section 318(a) shall apply. Section 302(c)(2), however, provides that section 318(a)(1) (relating to constructive ownership of stock owned by members of a family) shall not apply where the specific requirements of section 302(c)(2) are met. The following rules shall be applicable in determining whether the specific requirements of section 302(c)(2) are met:

(a)(1) The agreement specified in section 302(c)(2)(A)(iii) shall be in the form of a separate statement in duplicate signed by the distributee and attached to the first return filed by the distributee for the taxable year in which the distribution described in section 302(b)(3) occurs. The agreement shall recite that the distributee has not acquired, other than by bequest or inheritance, any interest in the corporation (as described in section 302(c)(2)(A)(i)) since the distribution and that the distributee agrees to notify the district director for the internal revenue district in which the distributee resides of any acquisition, other than by bequest or inheritance, of such an interest in the corporation within 30 days after the acquisition, if the acquisition occurs within 10 years from the date of the distribution.

(2) If the distributee fails to file the agreement specified in section 302(c)(2)(A)(iii) at the time provided in paragraph (a)(1) of this section, then the district director for the internal revenue district in which the distributee resided at the time of filing the first return for the taxable year in which the distribution occurred shall grant a reasonable extension of time for filing such agreement, provided (i) it is established to the satisfaction of the district director that there was reasonable cause for failure to file the agreement within the prescribed time and (ii) a request for such extension is filed within such time as the district director considers reasonable under the circumstances.

(b) The distributee who files an agreement under section 302(c)(2)(A)(iii) shall retain copies of income tax returns and any other records indicating fully the amount of tax which would have been payable had the redemption been treated as a distribution subject to section 301.

(c) If stock of a parent corporation is redeemed, section 302(c)(2)(A), relating to acquisition of an interest in the corporation within 10 years after termination shall be applied with reference to an interest both in the parent corporation and any subsidiary of such parent corporation. If stock of a parent corporation is sold to a subsidiary in a transaction described in section 304, section 302(c)(2)(A) shall be applicable to the acquisition of an interest in such subsidiary corporation or in the parent corporation. If stock of a subsidiary corporation is redeemed, section 302(c)(2)(A) shall be applied with reference to an interest both in such subsidiary corporation and its parent. Section 302(c)(2)(A) shall also be applied with respect to an interest in a corporation which is a successor corporation to the corporation the interest in which has been terminated.

(d) For the purpose of section 302(c)(2)(A)(i), a person will be considered to be a creditor only if the rights of such person with respect to the corporation are not greater or broader in scope than necessary for the enforcement of his claim. Such claim must not in any sense be proprietary and must not be subordinate to the claims of general creditors. An obligation in the form of a debt may thus constitute a proprietary interest. For example, if under the terms of the instrument the corporation may discharge the principal amount of its obligation to a person by payments, the amount or certainty of which are dependent upon the earnings of the corporation, such a person is not a creditor of the corporation. Furthermore, if under the terms of the instrument the rate of purported interest is dependent upon earnings, the holder of such instrument may not, in some cases, be a creditor.

(e) In the case of a distributee to whom section 302(b)(3) is applicable, who is a creditor after such transaction, the acquisition of the assets of the corporation in the enforcement of the rights of such creditor shall not be considered an acquisition of an interest in the corporation for purposes of section 302(c)(2) unless stock of the corporation, its parent corporation, or, in the case of a redemption of stock of a parent corporation, of a subsidiary of such corporation is acquired.

(f) In determining whether an entire interest in the corporation has been terminated under section 302(b)(3), under all circumstances paragraphs (2), (3), (4), and (5) of section 318(a) (relating to constructive ownership of stock) shall be applicable.

(g) Section 302(c)(2)(B) provides that section 302(c)(2)(A) shall not apply—

(1) If any portion of the stock redeemed was acquired directly or indirectly within the 10-year period ending on the date of the distribution by the distributee from a person, the ownership of whose stock would (at the time of distribution) be attributable to the distributee under section 318(a), or

(2) If any person owns (at the time of the distribution) stock, the ownership of which is attributable to the distributee under section 318(a), such person acquired any stock in the corporation directly or indirectly from the distributee within the 10-year period ending on the date of the distribution, and such stock so acquired from the distributee is not redeemed in the same transaction,unless the acquisition (described in subparagraph (1) of this paragraph) or the disposition by the distributee (described in subparagraph (2) of this paragraph) did not have as one of its principal purposes the avoidance of Federal income tax. A transfer of stock by the transferor, within the 10-year period ending on the date of the distribution, to a person whose stock would be attributable to the transferor shall not be deemed to have as one of its principal purposes the avoidance of Federal income tax merely because the transferee is in a lower income tax bracket than the transferor.

(Sec. 302(c)(2)(A)(iii) (68A Stat. 87; 26 U.S.C. 302 (c)(2)(A)(iii)))

[T.D. 7535, 43 FR 10686, Mar. 15, 1978]

§ 1.303–1 General.

Section 303 provides that in certain cases a distribution in redemption of stock, the value of which is included in determining the value of the gross estate of a decedent, shall be treated as a distribution in full payment in exchange for the stock so redeemed.

§ 1.303–2 Requirements.

(a) Section 303 applies only where the distribution is with respect to stock of a corporation the value of whose stock in the gross estate of the decedent for Federal estate tax purposes is an amount in excess of (1) 35 percent of the value of the gross estate of such decedent, or (2) 50 percent of the taxable estate of such decedent. For the purposes of such 35 percent and 50 percent requirements, stock of two or more corporations shall be treated as the stock of a single corporation if more than 75 percent in value of the outstanding stock of each such corporation is included in determining the value of the decedent's gross estate. For the purpose of the 75 percent requirement, stock which, at the decedent's death, represents the surviving spouse's interest in community property shall be considered as having been included in determining the value of the decedent's gross estate.

(b) For the purpose of section 303(b)(2)(A)(i), the term *gross estate* means the gross estate as computed in accordance with section 2031 (or, in the case of the estate of a decedent nonresident not a citizen of the United States, in accordance with section 2103). For the purpose of section 303(b)(2)(A)(ii), the term *taxable estate* means the taxable estate as computed in accordance with section 2051 (or, in the case of the estate of a decedent nonresident not a citizen of the United States, in accordance with section 2106). In case the value of an estate is determined for Federal estate tax purposes under section 2032 (relating to alternate valuation), then, for purposes of section 303(b)(2), the value of the gross estate, the taxable estate, and the stock shall each be determined on the applicable date prescribed in section 2032.

(c)(1) In determining whether the estate of the decedent is comprised of stock of a corporation of sufficient value to satisfy the percentage requirements of section 303(b)(2)(A) and section 303(b)(2)(B), the total value, in the aggregate, of all classes of stock of the corporation includible in determining the value of the gross estate is taken into account. A distribution under section 303(a) may be in redemption of the stock of the corporation includible in determining the value of the gross estate, without regard to the class of such stock.

(2) The above may be illustrated by the following example:

Example. The gross estate of the decedent has a value of $1,000,000, the taxable estate is $700,000, and the sum of the death taxes and funeral and administration expenses is $275,000. Included in determining the gross estate of the decedent is stock of three corporations which, for Federal estate tax purposes, is valued as follows:

Corporation A:	
Common stock	$100,000
Preferred stock	100,000
Corporation B:	
Common stock	50,000
Preferred stock	350,000
Corporation C: Common stock	200,000

The stock of Corporation A and Corporation C included in the estate of the decedent constitutes all of the outstanding stock of both corporations. The stock of Corporation A and the stock of Corporation C, treated as the stock of a single corporation under section 303(b)(2)(B), has a value in excess of $350,000 (35 percent of the gross estate or 50 percent of the taxable estate). Likewise, the stock of Corporation B has a value in excess of $350,000. The distribution by one or more of the above corporations, within the period prescribed in section 303(b)(1), of amounts not exceeding, in the aggregate, $275,000, in redemption of preferred stock or common stock of such corporation or corporations, will be treated as in full payment in exchange for the stock so redeemed.

(d) If stock includible in determining the value of the gross estate of a decedent is exchanged for new stock, the basis of which is determined by reference to the basis of the old stock, the redemption of the new stock will be treated the same under section 303 as the redemption of the old stock would have been. Thus section 303 shall apply with respect to a distribution in redemption of stock received by the estate of a decedent (1) in connection with a reorganization under section 368, (2) in a distribution or exchange under section 355 (or so much of section 356 as relates to section 355), (3) in an exchange under section 1036 or (4) in a distribution to which section 305(a) applies. Similarly, a distribution in redemption of stock will qualify under section 303, notwithstanding the fact that the stock redeemed is section 306 stock to the extent that the conditions of section 303 are met.

(e) Section 303 applies to distributions made after the death of the decedent and (1) before the expiration of the 3-year period of limitations for the assessment of estate tax provided in section 6501(a) (determined without the application of any provisions of law extending or suspending the running of such period of limitations), or within 90 days after the expiration of such period, or (2) if a petition for redetermination of a deficiency in such estate tax has been filed with the Tax Court within the time prescribed in section 6213, at any time before the expiration of 60 days after the decision of the Tax Court becomes final. The extension of the period of distribution provided in section 303(b)(1)(B) has reference solely to bona fide contests in the Tax Court and will not apply in the case of a petition for redetermination of a deficiency which is initiated solely for the purpose of extending the period within which section 303 would otherwise be applicable.

(f) While section 303 will most frequently have application in the case where stock is redeemed from the executor or administrator of an estate, the section is also applicable to distributions in redemption of stock included in the decedent's gross estate and held at the time of the redemption by any person who acquired the stock by any of the means comprehended by part III, subchapter A, chapter 11 of the Code, including the heir, legatee, or donee of the decedent, a surviving joint tenant, surviving spouse, appointee, or taker in default of appointment, or a trustee of a trust created by the decedent. Thus section 303 may apply with respect to a distribution in redemption of stock from a donee to whom the decedent has transferred stock in contemplation of death where the value of such stock is included in the decedent's gross estate under section 2035. Similarly, section 303 may apply to the redemption of stock from a beneficiary of the estate to whom an executor has distributed the stock pursuant to the terms of the will of the decedent. However, section 303 is not applicable to the case where stock is redeemed from a stockholder who has acquired the stock by gift or purchase from any person to whom such stock has passed from the decedent. Nor is section 303 applicable to the case where stock is redeemed from a stockholder who has acquired the stock from the executor in satisfaction of a specific monetary bequest.

(g)(1) The total amount of the distributions to which section 303 may apply with respect to redemptions of stock included in the gross estate of a decedent may not exceed the sum of the estate, inheritance, legacy, and succession taxes (including any interest collected as a part of such taxes) imposed because of the decedent's death and the amount of funeral and administration expenses allowable as deductions to the estate. Where there is more than one distribution in redemption of stock described in section 303(b)(2) during the period of time prescribed in section 303(b)(1), the distributions shall be applied against the total amount which qualifies for treatment under section 303 in the order in which the distributions are made. For this purpose, all distributions in redemption of such stock shall be taken into account, including distributions which under another provision of the Code are treated as in part or full payment in exchange for the stock redeemed.

(2) Subparagraph (1) of this paragraph may be illustrated by the following example:

Example. (i) The gross estate of the decedent has a value of $800,000, the taxable estate is $500,000, and the sum of the death taxes and funeral and administrative expenses is $225,000. Included in determining the gross estate of the decedent is the stock of a corporation which for Federal estate tax purposes is valued at $450,000. During the first year of administration, one-third of such stock is distributed to a legatee and shortly thereafter this stock is redeemed by the corporation for $150,000. During the second year of administration, another one-third of such stock includible in the estate is redeemed for $150,000.

(ii) The first distribution of $150,000 is applied against the $225,000 amount that qualifies for treatment under section 303, regardless of whether the first distribution was treated as in payment in exchange for stock under section 302(a). Thus, only $75,000 of the second distribution may be treated as in full payment in exchange for stock under section 303. The tax treatment of the remaining $75,000 would be determined under other provisions of the Code.

(h) For the purpose of section 303, the estate tax or any other estate, inheritance, legacy, or succession tax shall be ascertained after the allowance of any credit, relief, discount, refund, remission or reduction of tax.

[T.D. 6500, 25 FR 11607, Nov. 26, 1960, as amended by T.D. 6724, 29 FR 5343, Apr. 21, 1964; T.D. 7346, 40 FR 10669, Mar. 7, 1975]

§ 1.303–3 Application of other sections.

(a) The sole effect of section 303 is to exempt from tax as a dividend a distribution to which such section is applicable when made in redemption of stock includible in a decedent's gross estate. Such section does not, however, in any other manner affect the principles set forth in sections 302 and 306.

Thus, if stock of a corporation is owned equally by A, B, and the C Estate, and the corporation redeems one-half of the stock of each shareholder, the determination of whether the distributions to A and B are essentially equivalent to dividends shall be made without regard to the effect which section 303 may have upon the taxability of the distribution to the C Estate.

(b) See section 304 relative to redemption of stock through the use of related corporations.

§1.304–1 General.

(a) Except as provided in paragraph (b) of this section, section 304 is applicable where a shareholder sells stock of one corporation to a related corporation as defined in section 304. Sales to which section 304 is applicable shall be treated as redemptions subject to sections 302 and 303.

(b) In the case of—

(1) Any acquisition of stock described in section 304 which occurred before June 22, 1954, and

(2) Any acquisition of stock described in section 304 which occurred on or after June 22, 1954, and on or before December 31, 1958, pursuant to a contract entered into before June 22, 1954.

The extent to which the property received in return for such acquisition shall be treated as a dividend shall be determined as if the Internal Revenue Code of 1939 continued to apply in respect of such acquisition and as if the Internal Revenue Code of 1954 had not been enacted. See section 391. In cases to which this paragraph applies, the basis of the stock received by the acquiring corporation shall be determined as if the Internal Revenue Code of 1939 continued to apply in respect of such acquisition and as if the Internal Revenue Code of 1954 had not been enacted.

[T.D. 6533, 26 FR 401, Jan. 19, 1961]

§1.304–2 Acquisition by related corporation (other than subsidiary).

(a) If a corporation, in return for property, acquires stock of another corporation from one or more persons, and the person or persons from whom the stock was acquired were in control of both such corporations before the acquisition, then such property shall be treated as received in redemption of stock of the acquiring corporation. The stock received by the acquiring corporation shall be treated as a contribution to the capital of such corporation. See section 362(a) for determination of the basis of such stock. The transferor's basis for his stock in the acquiring corporation shall be increased by the basis of the stock surrendered by him. (But see below in this paragraph for subsequent reductions of basis in certain cases.) As to each person transferring stock, the amount received shall be treated as a distribution of property under section 302(d), unless as to such person such amount is to be treated as received in exchange for the stock under the terms of section 302(a) or section 303. In applying section 302(b), reference shall be had to the shareholder's ownership of stock in the issuing corporation and not to his ownership of stock in the acquiring corporation (except for purposes of applying section 318(a)). In determining control and applying section 302(b), section 318(a) (relating to the constructive ownership of stock) shall be applied without regard to the 50-percent limitation contained in section 318(a)(2)(C) and (3)(C). A series of redemptions referred to in section 302(b)(2)(D) shall include acquisitions by either of the corporations of stock of the other and stock redemptions by both corporations. If section 302(d) applies to the surrender of stock by a shareholder, his basis for his stock in the acquiring corporation after the transaction (increased as stated above in this paragraph) shall not be decreased except as provided in section 301. If section 302(d) does not apply, the property received shall be treated as received in a distribution in payment in exchange for stock of the acquiring corporation under section 302(a), which stock has a basis equal to the amount by which the shareholder's basis for his stock in the acquiring corporation was increased on account of the contribution to capital as provided for above in this paragraph. Accordingly, such amount shall be applied in reduction of the shareholder's basis for his stock in the acquiring corporation. Thus, the basis of each share of the shareholder's stock in the acquiring corporation will be the same as the basis of such share before the entire transaction. The holding period of the stock which is considered to have been redeemed shall be the same as the holding period of the stock actually surrendered.

(b) In any case in which two or more persons, in the aggregate, control two corporations, section 304(a)(1) will apply to sales by such persons of stock in either corporation to the other (whether or not made simultaneously) provided the sales by each of such persons are related to each other. The determination of whether the sales are related to each other shall be dependent upon the facts and circumstances surrounding all of the sales. For this purpose, the fact that the sales may occur during a period of one or more years (such as in the case of a series of sales by persons who together control each of such corporations immediately prior to the first of such sales and immediately subsequent to the last of such sales) shall be disregarded, provided the other facts and circumstances indicate related transactions.

(c) The application of section 304(a)(1) may be illustrated by the following examples:

Example (1). Corporation X and corporation Y each have outstanding 200 shares of common stock. One-half of the stock of each corporation is owned by an individual, A, and one-half by another individual, B, who is unrelated to A. On or after August 31, 1964, A sells 30 shares of corporation X stock to corporation Y for $50,000, such stock having an adjusted basis of $10,000 to A. After the sale, A is considered as owning corporation X stock as follows: (i) 70 shares directly, and (ii) 15 shares constructively, since by virtue of his 50-percent ownership of Y he constructively owns 50 percent of the 30 shares owned directly by Y. Since A's percentage of ownership of X's voting stock after the sale (85 out of 200 shares, or 42.5%) is not less than 80 percent of his percentage of ownership of X's voting stock before the sale (100 out of 200 shares, or 50%), the transfer is not ''substantially disproportionate'' as to him as provided in section 302(b)(2). Under these facts, and assuming that section 302(b)(1) is not applicable, the entire $50,000 is treated as a dividend to A to the extent of the earnings and profits of corporation Y. The basis of the corporation X stock to corporation Y is $10,000, its adjusted basis to A. The amount of $10,000 is added to the basis of the stock of corporation Y in the hands of A.

Example (2). The facts are the same as in *Example (1)* except that A sells 80 shares of corporation X stock to corporation Y, and the sale occurs before August 31, 1964. After the sale, A is considered as owning corporation X stock as follows: (i) 20 shares directly, and (ii) 90 shares indirectly, since by virtue of his 50-percent ownership of Y he constructively owns 50 percent of the 80 shares owned directly by Y and 50 percent of the 100 shares attributed to Y because they are owned by Y's stockholder, B. Since after the sale A owns a total of more than 50 percent of the voting power of all of the outstanding stock of X (110 out of 200 shares, or 55%), the transfer is not ''substantially disproportionate'' as to him as provided in section 302(b)(2).

Example (3). Corporation X and corporation Y each have outstanding 100 shares of common stock. A, an individual, owns one-half the stock of corporation X, and C owns one-half the stock of corporation Y. A, B, and C are unrelated. A sells 30 shares of the stock of corporation X to corporation Y for $50,000, such stock having an adjusted basis of $10,000 to him. After the sale, A is considered as owning 35 shares of the stock of corporation X (20 shares directly and 15 constructively because one-half of the 30 shares owned by corporation Y are attributed to him). Since before the sale he owned 50 percent of the stock of corporation X and after the sale he owned directly and constructively only 35 percent of such stock, the redemption is substantially disproportionate as to him pursuant to the provisions of section 302(b)(2). He, therefore, realizes a gain of $40,000 ($50,000 minus $10,000). If the stock surrendered is a capital asset, such gain is long-term or short-term capital gain depending on the period of time that such stock was held. The basis to A for the stock of corporation Y is not changed as a result of the entire transaction. The basis to corporation Y for the stock of corporation X is $50,000, i.e., the basis of the transferor ($10,000), increased in the amount of gain recognized to the transferor ($40,000) on the transfer.

Example (4). Corporation X and corporation Y each have outstanding 100 shares of common stock. H, an individual, W, his wife, S, his son, and G, his grandson, each own 25 shares of stock of each corporation. H sells all of his 25 shares of stock of corporation X to corporation Y. Since both before and after the transaction H owned directly and constructively 100 percent of the stock of corporation X, and assuming that section 302(b)(1) is not applicable, the amount received by him for his stock of corporation X is treated as a dividend to him to the extent of the earnings and profits of corporation Y.

[T.D. 6500, 25 FR 11607, Nov. 26, 1960, as amended by T.D. 6969, 33 FR 11997, Aug. 23, 1968]

§1.304–3 Acquisition by a subsidiary.

(a) If a subsidiary acquires stock of its parent corporation from a shareholder of the parent corporation, the acquisition of such stock shall be treated as though the parent corporation had redeemed its own stock. For the purpose of this section, a corporation is a parent corporation if it meets the 50 percent ownership requirements of section 304(c). The determination whether the amount received shall be treated as an amount received in payment in exchange for the stock shall be made by applying section 303, or by applying section 302(b) with reference to the stock of the issuing parent corporation. If such distribution would have been treated as a distribution of property (pursuant to section 302(d)) under section 301, the entire amount of the selling price of the stock shall be treated as a dividend to the seller to the extent of the earnings and profits of the parent corporation determined as if the distribution had been made to it of the property that the subsidiary exchanged for the stock. In such cases, the transferor's basis for his remaining stock in the parent corporation will be determined by including the amount of the basis of the stock of the parent corporation sold to the subsidiary.

(b) Section 304(a)(2) may be illustrated by the following example:

Example. Corporation M has outstanding 100 shares of common stock which are owned as follows: B, 75 shares, C, son of B, 20 shares, and D, daughter of B, 5 shares. Corporation M owns the stock of Corporation X. B sells his 75 shares of Corporation M stock to Corporation X. Under section 302(b)(3) this is a termination of B's entire interest in Corporation M and the full amount received from the sale of his stock will be treated as payment in exchange for this stock, provided he fulfills the requirements of section 302(c)(2) (relating to an acquisition of an interest in the corporations).

§1.304–4T Special rule for use of a related corporation to acquire for property the stock of another commonly owned corporation (temporary).

(a) *In general.* At the discretion of the District Director, for purposes of determining the amount constituting a dividend, and source thereof, under section 304(b)(2), a corporation (deemed acquiring corporation) will be considered to have acquired for property the stock of a corporation (issuing corporation) acquired for property by another corporation (acquiring corporation) that is controlled by the deemed acquiring corporation, if one of the principal purposes for creating, organizing, or funding the acquiring corporation, through capital contributions or debt, is to avoid the application of section 304 to the deemed acquiring corporation. The following example illustrates the application of this paragraph (a).

Example. P, a domestic corporation, owns all of the stock of CFC1, a controlled foreign corporation with substantial accumulated earnings and profits. CFC1 is organized in Country X, which imposes a high rate of tax on CFC1's income. P also owns all of the stock of CFC2, another controlled foreign corporation, which has accumulated earnings and profits of $200x. CFC2 is organized in Country Y which imposes a low rate of tax on CFC2's income. P wishes to own all of its foreign corporations in a direct chain and to effectuate a repatriation of CFC2's cash to P. In order to avoid having to obtain Country X approval for the acquisition of CFC1 (a Country X corporation) by CFC2 (a Country Y corporation) and to avoid a dividend to P out of CFC2's earnings and profits that would otherwise occur as a result of the application of section 304, P causes CFC2 to form RFC as a Country X wholly-owned subsidiary and to contribute $100x to RFC. RFC will purchase, for $100x, all of the stock of CFC1 from P. Because one of P's principal purposes for having CFC1 owned by RFC is to avoid section 304, under §1.304–4T(a), CFC2 is considered to have acquired the stock of CFC1 for $100x for purposes of determining the amount constituting a dividend (and source thereof) for purposes of section 304(b)(2).

(b) *Availability to taxpayers.* Nothing in this regulation shall be construed to provide a taxpayer the right to compel the Internal Revenue Service to disregard the form of its transaction for Federal income tax purposes.

(c) *Effective date.* This section is effective June 14, 1988, with respect to acquisitions of stock occurring on or after June 14, 1988.

[T.D. 8209, 53 FR 22171, June 14, 1988]

§1.304–5 Control.

(a) *Control requirement in general.* Section 304(c)(1) provides that, for purposes of section 304, control means the ownership of stock possessing at least

50 percent of the total combined voting power of all classes of stock entitled to vote or at least 50 percent of the total value of shares of all classes of stock. Section 304(c)(3) makes section 318(a) (relating to constructive ownership of stock), as modified by section 304(c)(3)(B), applicable to section 304 for purposes of determining control under section 304(c)(1).

(b) *Effect of section 304(c)(2)(B)*—(1) *In general.* In determining whether the control test with respect to both the issuing and acquiring corporations is satisfied, section 304(a)(1) considers only the person or persons that—

(i) Control the issuing corporation before the transaction;

(ii) Transfer issuing corporation stock to the acquiring corporation for property; and

(iii) Control the acquiring corporation thereafter.

(2) *Application.* Section 317 defines property to include money, securities, and any other property except stock (or stock rights) in the distributing corporation. However, section 304(c)(2)(B) provides a special rule to extend the relevant group of persons to be tested for control of both the issuing and acquiring corporations to include the person or persons that do not acquire property, but rather solely stock from the acquiring corporation in the transaction. Section 304(c)(2)(B) provides that if two or more persons in control of the issuing corporation transfer stock of such corporation to the acquiring corporation, and if the transferors are in control of the acquiring corporation after the transfer, the person or persons in control of each corporation include each of those transferors. Because the purpose of section 304(c)(2)(B) is to include in the relevant control group the person or persons that retain or acquire acquiring corporation stock in the transaction, only the person or persons transferring stock of the issuing corporation that retain or acquire any proprietary interest in the acquiring corporation are taken into account for purposes of applying section 304(c)(2)(B).

(3) *Example.* This section may be illustrated by the following example.

Example (a) A, the owner of 20% of T's only class of stock, transfers that stock to P solely in exchange for all of the P stock. Pursuant to the same transaction, P, solely in exchange for cash, acquires the remaining 80% of the T stock from T's other shareholder, B, who is unrelated to A and P.

(b) Although A and B together were in control of T (the issuing corporation) before the transaction and A and B each transferred T stock to P (the acquiring corporation), sections 304(a)(1) and (c)(2)(B) do not apply to B because B did not retain or acquire any proprietary interest in P in the transaction. Section 304(a)(1) also does not apply to A because A (or any control group of which A was a member) did not control T before the transaction and P after the transaction.

(c) *Effective date.* This section is effective on January 20, 1994.

[T.D. 8515, 59 FR 2960, Jan. 20, 1994]

§ 1.305–1 Stock dividends.

(a) *In general.* Under section 305, a distribution made by a corporation to its shareholders in its stock or in rights to acquire its stock is not included in gross income except as provided in section 305(b) and the regulations promulgated under the authority of section 305(c). A distribution made by a corporation to its shareholders in its stock or rights to acquire its stock which would not otherwise be included in gross income by reason of section 305 shall not be so included merely because such distribution was made out of Treasury stock or consisted of rights to acquire Treasury stock. See section 307 for rules as to basis of stock and stock rights acquired in a distribution.

(b) *Amount of distribution.* (1) In general, where a distribution of stock or rights to acquire stock of a corporation is treated as a distribution of property to which section 301 applies by reason of section 305(b), the amount of the distribution, in accordance with section 301(b) and § 1.301–1, is the fair market value of such stock or rights on the date of distribution. See *Example (1)* of § 1.305–2(b).

(2) Where a corporation which regularly distributes its earnings and profits, such as a regulated investment company, declares a dividend pursuant to which the shareholders may elect to receive either money or stock of the distributing corporation of equivalent value, the amount of the distribution of the stock received by any shareholder electing to receive stock will be

considered to equal the amount of the money which could have been received instead. See *Example (2)* of §1.305–2(b).

(3) For rules for determining the amount of the distribution where certain transactions, such as changes in conversion ratios or periodic redemptions, are treated as distributions under section 305(c), see *Examples (6), (8), (9), and (15)* of §1.305–3(e).

(c) *Adjustment in purchase price.* A transfer of stock (or rights to acquire stock) or an increase or decrease in the conversion ratio or redemption price of stock which represents an adjustment of the price to be paid by the distributing corporation in acquiring property (within the meaning of section 317(a)) is not within the purview of section 305 because it is not a distribution with respect to its stock. For example, assume that on January 1, 1970, pursuant to a reorganization, corporation X acquires all the stock of corporation Y solely in exchange for its convertible preferred class B stock. Under the terms of the class B stock, its conversion ratio is to be adjusted in 1976 under a formula based upon the earnings of corporation Y over the 6-year period ending on December 31, 1975. Such an adjustment in 1976 is not covered by section 305.

(d) *Definitions.* (1) For purposes of this section and §§1.305–2 through 1.305–7, the term *stock* includes rights or warrants to acquire such stock.

(2) For purposes of §§1.305–2 through 1.305–7, the term *shareholder* includes a holder of rights or warrants or a holder of convertible securities.

[T.D. 7281, 38 FR 18532, July 12, 1973; 38 FR 19910, July 25, 1973]

§1.305–2 Distributions in lieu of money.

(a) *In general.* Under section 305(b)(1), if any shareholder has the right to an election or option with respect to whether a distribution shall be made either in money or any other property, or in stock or rights to acquire stock of the distributing corporation, then, with respect to all shareholders, the distribution of stock or rights to acquire stock is treated as a distribution of property to which section 301 applies regardless of—

(1) Whether the distribution is actually made in whole or in part in stock or in stock rights;

(2) Whether the election or option is exercised or exercisable before or after the declaration of the distribution;

(3) Whether the declaration of the distribution provides that the distribution will be made in one medium unless the shareholder specifically requests payment in the other;

(4) Whether the election governing the nature of the distribution is provided in the declaration of the distribution or in the corporate charter or arises from the circumstances of the distribution; or

(5) Whether all or part of the shareholders have the election.

(b) *Examples.* The application of section 305(b)(1) may be illustrated by the following examples:

Example (1). (i) Corporation X declared a dividend payable in additional shares of its common stock to the holders of its outstanding common stock on the basis of two additional shares for each share held on the record date but with the provision that, at the election of any shareholder made within a specified period prior to the distribution date, he may receive one additional share for each share held on the record date plus $12 principal amount of securities of corporation Y owned by corporation X. The fair market value of the stock of corporation X on the distribution date was $10 per share. The fair market value of $12 principal amount of securities of corporation Y on the distribution date was $11 but such securities had a cost basis to corporation X of $9.

(ii) The distribution to all shareholders of one additional share of stock of corporation X (with respect to which no election applies) for each share outstanding is not a distribution to which section 301 applies.

(iii) The distribution of the second share of stock of corporation X to those shareholders who do not elect to receive securities of corporation Y is a distribution of property to which section 301 applies, whether such shareholders are individuals or corporations. The amount of the distribution to which section 301 applies is $10 per share of stock of corporation X held on the record date (the fair market value of the stock of corporation X on the distribution date).

(iv) The distribution of securities of corporation Y in lieu of the second share of stock of corporation X to the shareholders of corporation X whether individuals or corporations, who elect to receive such securities, is also a distribution of property to which section 301 applies.

(v) In the case of the individual shareholders of corporation X who elects to receive such securities, the amount of the distribution to which section 301 applies is $11 per share of stock of corporation X held on the record date (the fair market value of the $12 principal amount of securities of corporation Y on the distribution date).

(vi) In the case of the corporate shareholders of corporation X electing to receive such securities, the amount of the distribution to which section 301 applies is $9 per share of stock of corporation X held on the record date (the basis of the securities of corporation Y in the hands of corporation X).

Example (2). On January 10, 1970, corporation X, a regulated investment company, declared a dividend of $1 per share on its common stock payable on February 11, 1970, in cash or in stock of corporation X of equivalent value determined as of January 22, 1970, at the election of the shareholder made on or before January 22, 1970. The amount of the distribution to which section 301 applies is $1 per share whether the shareholder elects to take cash or stock and whether the shareholder is an individual or a corporation. Such amount will also be used in determining the dividend paid deduction of corporation X and the reduction in earnings and profits of corporation X.

[T.D. 7281, 38 FR 18532, July 12, 1973]

§ 1.305–3 Disproportionate distributions.

(a) *In general.* Under section 305(b)(2), a distribution (including a deemed distribution) by a corporation of its stock or rights to acquire its stock is treated as a distribution of property to which section 301 applies if the distribution (or a series of distributions of which such distribution is one) has the result of (1) the receipt of money or other property by some shareholders, and (2) an increase in the proportionate interests of other shareholders in the assets or earnings and profits of the corporation. Thus, if a corporation has two classes of common stock outstanding and cash dividends are paid on one class and stock dividends are paid on the other class, the stock dividends are treated as distributions to which section 301 applies.

(b) *Special rules.* (1) As used in section 305(b)(2), the term *a series of distributions* encompasses all distributions of stock made or deemed made by a corporation which have the result of the receipt of cash or property by some shareholders and an increase in the proportionate interests of other shareholders.

(2) In order for a distribution of stock to be considered as one of a series of distributions it is not necessary that such distribution be pursuant to a plan to distribute cash or property to some shareholders and to increase the proportionate interests of other shareholders. It is sufficient if there is an actual or deemed distribution of stock (of which such distribution is one) and as a result of such distribution or distributions some shareholders receive cash or property and other shareholders increase their proportionate interests. For example, if a corporation pays quarterly stock dividends to one class of common shareholders and annual cash dividends to another class of common shareholders the quarterly stock dividends constitute a series of distributions of stock having the result of the receipt of cash or property by some shareholders and an increase in the proportionate interests of other shareholders. This is so whether or not the stock distributions and the cash distributions are steps in an overall plan or are independent and unrelated. Accordingly, all the quarterly stock dividends are distributions to which section 301 applies.

(3) There is no requirement that both elements of section 305(b)(2) (i.e., receipt of cash or property by some shareholders and an increase in proportionate interests of other shareholders) occur in the form of a distribution or series of distributions as long as the result of a distribution or distributions of stock is that some shareholders' proportionate interests increase and other shareholders in fact receive cash or property. Thus, there is no requirement that the shareholders receiving cash or property acquire the cash or property by way of a corporate distribution with respect to their shares, so long as they receive such cash or property in their capacity as shareholders, if there is a stock distribution which results in a change in the proportionate interests of some shareholders and other shareholders receive cash or property. However, in order for a distribution of property to meet the requirement of section 305(b)(2), such

distribution must be made to a shareholder in his capacity as a shareholder, and must be a distribution to which section 301, 356(a)(2), 871(a)(1)(A), 881(a)(1), 852(b), or 857(b) applies. (Under section 305(d)(2), the payment of interest to a holder of a convertible debenture is treated as a distribution of property to a shareholder for purposes of section 305(b)(2).) For example if a corporation makes a stock distribution to its shareholders and, pursuant to a prearranged plan with such corporation, a related corporation purchases such stock from those shareholders who want cash, in a transaction to which section 301 applies by virtue of section 304, the requirements of section 305(b)(2) are satisfied. In addition, a distribution of property incident to an isolated redemption of stock (for example, pursuant to a tender offer) will not cause section 305(b)(2) to apply even though the redemption distribution is treated as a distribution of property to which section 301, 871(a)(1)(A), 881(a)(1), or 356(a)(2) applies.

(4) Where the receipt of cash or property occurs more than 36 months following a distribution or series of distributions of stock, or where a distribution or series of distributions of stock is made more than 36 months following the receipt of cash or property, such distribution or distributions will be presumed not to result in the receipt of cash or property by some shareholders and an increase in the proportionate interest of other shareholders, unless the receipt of cash or property and the distribution or series of distributions of stock are made pursuant to a plan. For example, if, pursuant to a plan, a corporation pays cash dividends to some shareholders on January 1, 1971 and increases the proportionate interests of other shareholders on March 1, 1974, such increases in proportionate interests are distributions to which section 301 applies.

(5) In determining whether a distribution or a series of distributions has the result of a disproportionate distribution, there shall be treated as outstanding stock of the distributing corporation (i) any right to acquire such stock (whether or not exercisable during the taxable year), and (ii) any security convertible into stock of the distributing corporation (whether or not convertible during the taxable year).

(6) In cases where there is more than one class of stock outstanding, each class of stock is to be considered separately in determining whether a shareholder has increased his proportionate interest in the assets or earnings and profits of a corporation. The individual shareholders of a class of stock will be deemed to have an increased interest if the class of stock as a whole has an increased interest in the corporation.

(c) *Distributions of cash in lieu of fractional shares.* (1) Section 305(b)(2) will not apply if—

(i) A corporation declares a dividend payable in stock of the corporation and distributes cash in lieu of fractional shares to which shareholders would otherwise be entitled, or

(ii) Upon a conversion of convertible stock or securities a corporation distributes cash in lieu of fractional shares to which shareholders would otherwise be entitled.

Provided the purpose of the distribution of cash is to save the corporation the trouble, expense, and inconvenience of issuing and transferring fractional shares (or scrip representing fractional shares), or issuing full shares representing the sum of fractional shares, and not to give any particular group of shareholders an increased interest in the assets or earnings and profits of the corporation. For purposes of paragraph (c)(1)(i) of this section, if the total amount of cash distributed in lieu of fractional shares is 5 percent or less of the total fair market value of the stock distributed (determined as of the date of declaration), the distribution shall be considered to be for such valid purpose.

(2) In a case to which subparagraph (1) of this paragraph applies, the transaction will be treated as though the fractional shares were distributed as part of the stock distribution and then were redeemed by the corporation. The treatment of the cash received by a shareholder will be determined under section 302.

(d) *Adjustment in conversion ratio.* (1)(i) Except as provided in subparagraph (2) of this paragraph, if a corporation has convertible stock or convertible securities outstanding (upon which it pays or is deemed to pay dividends or interest in money or other property) and distributes a stock dividend (or rights to acquire such stock) with respect to the stock into which the convertible stock or securities are convertible, an increase in proportionate interest in the assets or earnings and profits of the corporation by reason of such stock dividend shall be considered to have occurred unless a full adjustment in the conversion ratio or conversion price to reflect such stock dividend is made. Under certain circumstances, however, the application of an adjustment formula which in effect provides for a ''credit'' where stock is issued for consideration in excess of the conversion price may not satisfy the requirement for a ''full adjustment.'' Thus, if under a ''conversion price'' antidilution formula the formula provides for a ''credit'' where stock is issued for consideration in excess of the conversion price (in effect as an offset against any decrease in the conversion price which would otherwise be required when stock is subsequently issued for consideration below the conversion price) there may still be an increase in proportionate interest by reason of a stock dividend after application of the formula, since any downward adjustment of the conversion price that would otherwise be required to reflect the stock dividend may be offset, in whole or in part, by the effect of prior sales made at prices above the conversion price. On the other hand, if there were no prior sales of stock above the conversion price then a full adjustment would occur upon the application of such an adjustment formula and there would be no change in proportionate interest. Similarly, if consideration is to be received in connection with the issuance of stock, such as in the case of a rights offering or a distribution of warrants, the fact that such consideration is taken into account in making the antidilution adjustment will not preclude a full adjustment. See paragraph (*b*) of the example in this subparagraph for a case where the application of an adjustment formula with a cumulative feature does not result in a full adjustment and where a change in proportionate interest therefore occurs. See paragraph (*c*) for a case where the application of an adjustment formula with a cumulative feature does result in a full adjustment and where no change in proportionate interest therefore occurs. See paragraph (*d*) for an application of an antidilution formula in the case of a rights offering. See paragraph (*e*) for a case where the application of a noncumulative type adjustment formula will in all cases prevent a change in proportionate interest from occurring in the case of a stock dividend, because of the omission of the cumulative feature.

(ii) The principles of this subparagraph may be illustrated by the following example.

Example. (a) Corporation S has two classes of securities outstanding, convertible debentures and common stock. At the time of issuance of the debentures the corporation had 100 shares of common stock outstanding. Each debenture is interest-paying and is convertible into common stock at a conversion price of $2. The debenture's conversion price is subject to reduction pursuant to the following formula:

(Number of common shares outstanding at date of issue of debentures times initial conversion price) *plus* (Consideration received upon issuance of additional common shares) *divided by* (Number of common shares outstanding at date of issue of debentures) *plus* (Number of additional common shares issued)

Under the formula, common stock dividends are treated as an issue of common stock for zero consideration. If the computation results in a figure which is less than the existing conversion price the conversion price is reduced. However, under the formula, the existing conversion price is never increased. The formula works upon a cumulative basis since the numerator includes the consideration received upon the issuance of all common shares subsequent to the issuance of the debentures, and the reduction effected by the formula because of a sale or issuance of common stock below the existing conversion price is thus limited by any prior sales made above the existing conversion price.

(*b*) In 1972 corporation S sells 100 common shares at $3 per share. In 1973 the corporation declares a stock dividend of 20 shares to all holders of common stock. Under the antidilution formula no adjustment will be made to the conversion price of the debentures to reflect the stock dividend to common stockholders since the prior sale of common stock in excess of the conversion price in 1972 offsets the reduction in the conversion price which would otherwise result, as follows:

100×$2+$300÷100+120=$500÷220=$2.27

Since $2.27 is greater than the existing conversion price of $2 no adjustment is required. As a result, there is an increase in proportionate interest of the common stockholders by reason of the stock dividend and the additional shares of common stock will be treated, pursuant to section 305(b)(2), as a distribution of property to which section 301 applies.

(*c*) Assume the same facts as above, but instead of selling 100 common shares at $3 per share in 1972, assume corporation S sold no shares. Application of the antidilution formula would give rise to an adjustment in the conversion price as follows:

100×$2+$0÷100+20=$200÷120=$1.67

The conversion price, being reduced from $2 to $1.67, fully reflects the stock dividend distributed to the common stockholders. Hence, the distribution of common stock is not treated under section 305(b)(2) as one to which section 301 applies because the distribution does not increase the proportionate interests of the common shareholders as a class.

(*d*) Corporation S distributes to its shareholders rights entitling the shareholders to purchase a total of 20 shares at $1 per share. Application of the antidilution formula would produce an adjustment in the conversion price as follows:

100×$2+20×$1÷100+20=$220÷120=$1.83

The conversion price, being reduced from $2 to $1.83, fully reflects the distribution of rights to purchase stock at a price lower than the conversion price. Hence, the distribution of the rights is not treated under section 305(b)(2) as one to which section 301 applies because the distribution does not increase the proportionate interests of the common shareholders as a class.

(*e*) Assume the same facts as in (*b*) above, but instead of using a ‘‘conversion price’’ antidilution formula which operates on a cumulative basis, assume corporation S has employed a formula which operates as follows with respect to all stock dividends: The conversion price in effect at the opening of business on the day following the dividend record date is reduced by multiplying such conversion price by a fraction the numerator of which is the number of shares of common stock outstanding at the close of business on the record date and the denominator of which is the sum of such shares so outstanding and the number of shares constituting the stock dividend. Under such a formula the following adjustment would be made to the conversion price upon the declaration of a stock dividend of 20 shares in 1973:

200÷200+20=200÷220×$2=$1.82

The conversion price, being reduced from $2 to $1.82, fully reflects the stock dividend distributed to the common stockholders. Hence, the distribution of common stock is not treated under section 305(b)(2) as one to which section 301 applies because the distribution does not increase the proportionate interests of the common shareholders as a class.

(2)(i) A distributing corporation either must make the adjustment required by subparagraph (1) of this paragraph as of the date of the distribution of the stock dividend, or must elect (in the manner provided in subdivision (iii) of this subparagraph) to make such adjustment within the time provided in subdivision (ii) of this subparagraph.

(ii) If the distributing corporation elects to make such adjustment, such adjustment must be made no later than the earlier of (*a*) 3 years after the date of the stock dividend, or (*b*) that date as of which the aggregate stock dividends for which adjustment of the conversion ratio has not previously been made total at least 3 percent of the issued and outstanding stock with respect to which such stock dividends were distributed.

(iii) The election provided by subdivision (ii) of this subparagraph shall be made by filing with the income tax return for the taxable year during which the stock dividend is distributed—

(*a*) A statement that an adjustment will be made as provided by that subdivision, and

(*b*) A description of the antidilution provisions under which the adjustment will be made.

(3) Notwithstanding the preceding subparagraph, if a distribution has been made before July 12, 1973, and the adjustment required by subparagraph (1) or the election to make such adjustment was not made before such date, the adjustment or the election to make such adjustment, as the case may be, shall be considered valid if made no later than 15 days following the date of the first annual meeting of the shareholders after July 12, 1973, or July 12, 1974, whichever is earlier. If the election is made within such period, and, if the income tax return has been filed before the time of such election, the statement of adjustment and the description of the antidilution provisions required by subparagraph (2)(iii) shall

be filed with the Internal Revenue Service Center with which the income tax return was filed.

(4) See § 1.305–7(b) for a discussion of antidilution adjustments in connection with the application of section 305(c) in conjunction with section 305(b).

(e) *Examples.* The application of section 305(b)(2) to distributions of stock and section 305(c) to deemed distributions of stock may be illustrated by the following examples:

Example 1. Corporation X is organized with two classes of common stock, class A and class B. Each share of stock is entitled to share equally in the assets and earnings and profits of the corporation. Dividends may be paid in stock or in cash on either class of stock without regard to the medium of payment of dividends on the other class. A dividend is declared on the class A stock payable in additional shares of class A stock and a dividend is declared on class B stock payable in cash. Since the class A shareholders as a class will have increased their proportionate interests in the assets and earnings and profits of the corporation and the class B shareholders will have received cash, the additional shares of class A stock are distributions of property to which section 301 applies. This is true even with respect to those shareholders who may own class A stock and class B stock in the same proportion.

Example 2. Corporation Y is organized with two classes of stock, class A common, and class B, which is nonconvertible and limited and preferred as to dividends. A dividend is declared upon the class A stock payable in additional shares of class A stock and a dividend is declared on the class B stock payable in cash. The distribution of class A stock is not one to which section 301 applies because the distribution does not increase the proportionate interests of the class A shareholders as a class.

Example 3. Corporation K is organized with two classes of stock, class A common, and class B, which is nonconvertible preferred stock. A dividend is declared upon the class A stock payable in shares of class B stock and a dividend is declared on the class B stock payable in cash. Since the class A shareholders as a class have an increased interest in the assets and earnings and profits of the corporation, the stock distribution is treated as a distribution to which section 301 applies. If, however, a dividend were declared upon the class A stock payable in a new class of preferred stock that is subordinated in all respects to the class B stock, the distribution would not increase the proportionate interests of the class A shareholders in the assets or earnings and profits of the corporation and would not be treated as a distribution to which section 301 applies.

Example 4. (i) Corporation W has one class of stock outstanding, class A common. The corporation also has outstanding interest paying securities convertible into class A common stock which have a fixed conversion ratio that is not subject to full adjustment in the event stock dividends or rights are distributed to the class A shareholders. Corporation W distributes to the class A shareholders rights to acquire additional shares of class A stock. During the year, interest is paid on the convertible securities.

(ii) The stock rights and convertible securities are considered to be outstanding stock of the corporation and the distribution increases the proportionate interests of the class A shareholders in the assets and earnings and profits of the corporation. Therefore, the distribution is treated as a distribution to which section 301 applies. The same result would follow if, instead of convertible securities, the corporation had outstanding convertible stock. If, however, the conversion ratio of the securities or stock were fully adjusted to reflect the distribution of rights to the class A shareholders, the rights to acquire class A stock would not increase the proportionate interests of the class A shareholders in the assets and earnings and profits of the corporation and would not be treated as a distribution to which section 301 applies.

Example 5. (i) Corporation S is organized with two classes of stock, class A common and class B convertible preferred. The class B is fully protected against dilution in the event of a stock dividend or stock split with respect to the class A stock; however, no adjustment in the conversion ratio is required to be made until the stock dividends equal 3 percent of the common stock issued and outstanding on the date of the first such stock dividend except that such adjustment must be made no later than 3 years after the date of the stock dividend. Cash dividends are paid annually on the class B stock.

(ii) Corporation S pays a 1 percent stock dividend on the class A stock in 1970. In 1971, another 1 percent stock dividend is paid and in 1972 another 1 percent stock dividend is paid. The conversion ratio of the class B stock is increased in 1972 to reflect the three stock dividends paid on the class A stock. The distributions of class A stock are not distributions to which section 301 applies because they do not increase the proportionate interests of the class A shareholders in the assets and earnings and profits of the corporation.

Example 6. (i) Corporation M is organized with two classes of stock outstanding, class A and class B. Each class B share may be converted, at the option of the holder, into class A shares. During the first year, the conversion ratio is one share of class A stock for each share of class B stock. At the beginning of each subsequent year, the conversion ratio is increased by 0.05 share of class A stock for each share of class B stock. Thus, during the second year, the conversion ratio would be 1.05 shares of class A stock for each share of class B stock, during the third year, the ratio would be 1.10 shares, etc.

(ii) M pays an annual cash dividend on the class A stock. At the beginning of the second year, when the conversion ratio is increased to 1.05 shares of class A stock for each share of class B stock, a distribution of 0.05 shares of class A stock is deemed made under section 305(c) with respect to each share of class B stock, since the proportionate interests of the class B shareholders in the assets or earnings and profits of M are increased and the transaction has the effect described in section 305(b)(2). Accordingly, sections 305(b)(2) and 301 apply to the transaction.

Example 7. (i) Corporation N has two classes of stock outstanding, class A and class B. Each class B share is convertible into class A stock. However, in accordance with a specified formula, the conversion ratio is decreased each time a cash dividend is paid on the class B stock to reflect the amount of the cash dividend. The conversion ratio is also adjusted in the event that cash dividends are paid on the class A stock to increase the number of class A shares into which the class B shares are convertible to compensate the class B shareholders for the cash dividend paid on the class A stock.

(ii) In 1972, a $1 cash dividend per share is declared and paid on the class B stock. On the date of payment, the conversion ratio of the class B stock is decreased. A distribution of stock is deemed made under section 305(c) to the class A shareholders, since the proportionate interest of the class A shareholders in the assets or earnings and profits of the corporation is increased and the transaction has the effect described in section 305(b)(2). Accordingly, sections 305(b)(2) and 301 apply to the transaction.

(iii) In the following year a cash dividend is paid on the class A stock and none is paid on the class B stock. The increase in conversion rights of the class B shares is deemed to be a distribution under section 305(c) to the class B shareholders since their proportionate interest in the assets or earnings and profits of the corporation is increased and since the transaction has the effect described in section 305(b)(2). Accordingly, sections 305(b)(2) and 301 apply to the transaction.

Example 8. Corporation T has 1,000 shares of stock outstanding. C owns 100 shares. Nine other shareholders each owns 100 shares. Pursuant to a plan for periodic redemptions, T redeems up to 5 percent of each shareholder's stock each year. During the year, each of the nine other shareholders has 5 shares of his stock redeemed for cash. Thus, C's proportionate interest in the assets and earnings and profits of T is increased. Assuming that the cash received by the nine other shareholders is taxable under section 301, C is deemed under section 305(c) to have received a distribution under section 305(b)(2) of 5.25 shares of T stock to which section 301 applies. The amount of C's distribution is measured by the fair market value of the number of shares which would have been distributed to C had the corporation sought to increase his interest by 0.47 percentage points (C owned 10 percent of the T stock immediately before the redemption and 10.47 percent immediately thereafter) and the other shareholders continued to hold 900 shares (i.e.,

(a) 100÷955=10.47% (percent of C's ownership after redemption)

(b) 100+x÷1000+x=10.47%; x=5.25 (additional shares considered to be distributed to C)).

Since in computing the amount of additional shares deemed to be distributed to C the redemption of shares is disregarded, the redemption of shares will be similarly disregarded in determining the value of the stock of the corporation which is deemed to be distributed. Thus, in the example, 1,005.25 shares of stock are considered as outstanding after the redemption. The value of each share deemed to be distributed to C is then determined by dividing the 1,005.25 shares into the aggregate fair market value of the actual shares outstanding (955) after the redemption.

Example 9. (i) Corporation O has a stock redemption program under which, instead of paying out earnings and profits to its shareholders in the form of dividends, it redeems the stock of its shareholders up to a stated amount which is determined by the earnings and profits of the corporation. If the stock tendered for redemption exceeds the stated amount, the corporation redeems the stock on a pro rata basis up to the stated amount.

(ii) During the year corporation O offers to distribute $10,000 in redemption of its stock. At the time of the offering, corporation O has 1,000 shares outstanding of which E and F each owns 150 shares and G and H each owns 350 shares. The corporation redeems 15 shares from E and 35 shares from G. F and H continue to hold all of their stock.

(iii) F and H have increased their proportionate interests in the assets and earnings and profits of the corporation. Assuming that the cash E and G receive is taxable under section 301, F will be deemed under section 305(c) to have received a distribution under section 305(b)(2) of 16.66 shares of stock to which section 301 applies and H will be deemed under section 305(c) to have received a distribution under section 305(b)(2) of 38.86 shares of stock to which section 301 applies. The amount of the distribution to F and H is measured by the number of shares which would have been distributed to F and H had the corporation sought to increase the interest of F by 0.79 percentage points (F owned 15 percent of the stock immediately before the redemption and 15.79 percent immediately thereafter) and the interest of H by 1.84 percentage points (H owned 35 percent of the stock immediately before the redemption and 36.84 percent immediately thereafter) and E and G had continued to hold 150 shares and 350 shares, respectively (i.e.,

(a) $150 \div 950 + 350 \div 950 = 52.63\%$ (percent of F and H's ownership after redemption)

(b) $500 + y \div 1000 + y = 52.63\%$; $y = 55.52$ (additional shares considered to be distributed to F and H)

(c)(1) $150 \div 500 \times 55.52 = 16.66$ (shares considered to be distributed to F)

(2) $350 \div 500 \times 55.52 = 38.86$ (shares considered to be distributed to H)).

Since in computing the amount of additional shares deemed to be distributed to F and H the redemption of shares is disregarded, the redemption of shares will be similarly disregarded in determining the value of the stock of the corporation which is deemed to be distributed. Thus, in the example, 1,055.52 shares of stock are considered as outstanding after the redemption. The value of each share deemed to be distributed to F and H is then determined by dividing the 1,055.52 shares into the aggregate fair market value of the actual shares outstanding (950) after the redemption.

Example 10. Corporation P has 1,000 shares of stock outstanding. T owns 700 shares of the P stock and G owns 300 shares of the P stock. In a single and isolated redemption to which section 301 applies, the corporation redeems 150 shares of T's stock. Since this is an isolated redemption and is not a part of a periodic redemption plan, G is not treated as having received a deemed distribution under section 305(c) to which sections 305(b)(2) and 301 apply even though he has an increased proportionate interest in the assets and earnings and profits of the corporation.

Example 11. Corporation Q is a large corporation whose sole class of stock is widely held. However, the four largest shareholders are officers of the corporation and each owns 8 percent of the outstanding stock. In 1974, in a distribution to which section 301 applies, the corporation redeems 1.5 percent of the stock from each of the four largest shareholders in preparation for their retirement. From 1970 through 1974, the corporation distributes annual stock dividends to its shareholders. No other distributions were made to these shareholders. Since the 1974 redemptions are isolated and are not part of a plan for periodically redeeming the stock of the corporation, the shareholders receiving stock dividends will not be treated as having received a distribution under section 305(b)(2) even though they have an increased proportionate interest in the assets and earnings and profits of the corporation and whether or not the redemptions are treated as distributions to which section 301 applies.

Example 12. Corporation R has 2,000 shares of class A stock outstanding. Five shareholders own 300 shares each and five shareholders own 100 shares each. In preparation for the retirement of the five major shareholders, corporation R, in a single and isolated transaction, has a recapitalization in which each share of class A stock may be exchanged either for five shares of new class B nonconvertible preferred stock plus 0.4 share of new class C common stock, or for two shares of new class C common stock. As a result of the exchanges, each of the five major shareholders receives 1,500 shares of class B nonconvertible preferred stock and 120 shares of class C common stock. The remaining shareholders each receives 200 shares of class C common stock. None of the exchanges are within the purview of section 305.

Example 13. Corporation P is a widely-held company whose shares are listed for trading on a stock exchange. P distributes annual cash dividends to its shareholders. P purchases shares of its common stock directly from small stockholders (holders of record of 100 shares or less) or through brokers where the holders may not be known at the time of purchase. Where such purchases are made through brokers, they are pursuant to the rules and regulations of the Securities and Exchange Commission. The shares are purchased for the purpose of issuance to employee stock investment plans, to holders of convertible stock or debt, to holders of stock options, or for future acquisitions. Provided the purchases are not pursuant to a plan to increase the proportionate interest of some shareholders and distribute property to other shareholders, the remaining shareholders of P are not treated as having received a deemed distribution under section 305(c) to which section 305(b)(2) and 301 apply, even though they have an increased proportionate interest in the assets and earnings and profits of the corporation.

Example 14. Corporation U is a large manufacturing company whose products are sold through independent dealers. In order to assist individuals who lack capital to become dealers, the corporation has an established investment plan under which it provides 75 percent of the capital necessary to form a dealership corporation and the individual dealer provides the remaining 25 percent. Corporation U receives class A stock and a note representing its 75 percent interest. The individual dealer receives class B stock representing his 25 percent interest. The class B stock is nonvoting until all the class A shares are redeemed. At least 70 percent of the earnings and profits of the dealership corporation must be used each year to retire the note and to redeem the class A stock. The class A stock is redeemed at a fixed price. The individual dealer has no control over the redemption of stock and has no right to have his stock redeemed during the period the plan is in existence. U's investment is thus systematically eliminated and the individual becomes the sole owner of the dealership corporation. Since this type of plan is akin to a security arrangement, the redemptions of the class A stock will not be deemed under section 305(c) as distributions taxable under sections 305(b)(2) and 301 during the years in which the class A stock is redeemed.

Example 15. (i) *Facts.* Corporation V is organized with two classes of stock, class A common and class B convertible preferred. The class B stock is issued for $100 per share and is convertible at the holder's option into class A at a fixed ratio that is not subject to full adjustment in the event stock dividends or rights are distributed to the class A shareholders. The class B stock pays no dividends but it is mandatorily redeemable in 10 years for $200. Under sections 305(c) and 305(b)(4), the entire redemption premium (i.e., the excess of the redemption price over the issue price) is deemed to be a distribution of preferred stock on preferred stock which is taxable as a distribution of property under section 301. This amount is considered to be distributed over the 10-year period under principles similar to the principles of section 1272(a). During the year, the corporation declares a dividend on the class A stock payable in additional shares of class A stock.

(ii) *Analysis.* The distribution on the class A stock is a distribution to which sections 305(b)(2) and 301 apply since it increases the proportionate interests of the class A shareholders in the assets and earnings and profits of the corporation and the class B shareholders have received property (i.e., the constructive distribution described above). If, however, the conversion ratio of the class B stock were subject to full adjustment to reflect the distribution of stock to class A shareholders, the distribution of stock dividends on the class A stock would not increase the proportionate interest of the class A shareholders in the assets and earnings and profits of the corporation and such distribution would not be a distribution to which section 301 applies.

(iii) *Effective date.* This *Example 15* applies to stock issued on or after December 20, 1995. For previously issued stock, see §1.305–3(e) *Example (15)* (as contained in the 26 CFR part 1 edition revised April 1, 1995).

[T.D. 7281, 38 FR 18532, July 12, 1973; 38 FR 19910, 19911, July 25, 1973; as amended by T.D. 7329, 39 FR 36860, Oct. 15, 1974; T.D. 8643, 60 FR 66136, Dec. 21, 1995]

§1.305–4 Distributions of common and preferred stock.

(a) *In general.* Under section 305(b)(3), a distribution (or a series of distributions) by a corporation which results in the receipt of preferred stock whether or not convertible into common stock) by some common shareholders and the receipt of common stock by other common shareholders is treated as a distribution of property to which section 301 applies. For the meaning of the term *a series of distribution,* see subparagraphs (1) through (6) of §1.305–3(b).

(b) *Examples.* The application of section 305(b)(3) may be illustrated by the following examples:

Example (1). Corporation X is organized with two classes of common stock, class A and class B. Dividends may be paid in stock or in cash on either class of stock without regard to the medium of payment of dividends on the other class. A dividend is declared on the class A stock payable in additional shares of class A stock and a dividend is declared on class B stock payable in newly authorized class C stock which is nonconvertible and limited and preferred as to dividends. Both the distribution of class A shares and the distribution of new class C shares are distributions to which section 301 applies.

Example (2). Corporation Y is organized with one class of stock, class A common. During the year the corporation declares a dividend on the class A stock payable in newly authorized class B preferred stock which is convertible into class A stock no later than 6 months from the date of distribution at a price that is only slightly higher than the market price of class A stock on the date of distribution. Taking into account the dividend rate, redemption provisions, the marketability of the convertible stock, and the conversion price, it is reasonable to anticipate that within a relatively short period of time some shareholders will exercise their conversion rights and some will not. Since the distribution can reasonably be expected to result in the receipt of preferred stock by some common shareholders and the receipt of common stock by other common shareholders, the distribution is a distribution of property to which section 301 applies.

[T.D. 7281, 38 FR 18536, July 12, 1973]

§1.305–5 Distributions on preferred stock.

(a) *In general.* Under section 305(b)(4), a distribution by a corporation of its stock (or rights to acquire its stock) made (or deemed made under section 305(c)) with respect to its preferred stock is treated as a distribution of property to which section 301 applies unless the distribution is made with respect to convertible preferred stock to take into account a stock dividend, stock split, or any similar event (such as the sale of stock at less than the fair market value pursuant to a rights offering) which would otherwise result in the dilution of the conversion right. For purposes of the preceding sentence, an adjustment in the conversion ratio of convertible preferred stock made solely to take into account the distribution by a closed end regulated investment company of a capital gain dividend with respect to the stock into which such stock is convertible shall not be considered a ''similar event.'' The term *preferred stock* generally refers to stock which, in relation to other classes of stock outstanding, enjoys certain limited rights and privileges (generally associated with specified dividend and liquidation priorities) but does not participate in corporate growth to any significant extent. The distinguishing feature of *preferred stock* for the purposes of section 305(b)(4) is not its privileged position as such, but that such privileged position is limited, and that such stock does not participate in corporate growth to any significant extent. However, a right to participate which lacks substance will not prevent a class of stock from being treated as preferred stock. Thus, stock which enjoys a priority as to dividends and on liquidation but which is entitled to participate, over and above such priority, with another less privileged class of stock in earnings and profits and upon liquidation, may nevertheless be treated as preferred stock for purposes of section 305 if, taking into account all the facts and circumstances, it is reasonable to anticipate at the time a distribution is made (or is deemed to have been made) with respect to such stock that there is little or no likelihood of such stock actually participating in current and anticipated earnings and upon liquidation beyond its preferred interest. Among the facts and circumstances to be considered are the prior and anticipated earnings per share, the cash dividends per share, the book value per share, the extent of preference and of participation of each class, both absolutely and relative to each other, and any other facts which indicate whether or not the stock has a real and meaningful probability of actually participating in the earnings and growth of the corporation. The determination of whether stock is preferred for purposes of section 305 shall be made without regard to any right to convert such stock into another class of stock of the corporation. The term *preferred stock*, however, does not include convertible debentures.

(b) *Redemption premium*—(1) *In general.* If a corporation issues preferred stock that may be redeemed under the circumstances described in this paragraph (b) at a price higher than the issue price, the difference (the redemption premium) is treated under section 305(c) as a constructive distribution (or series of constructive distributions) of additional stock on preferred stock that is taken into account under principles similar to the principles of section 1272(a). However, constructive distribution treatment does not result under this paragraph (b) if the redemption premium does not exceed a de minimis amount, as determined under the principles of section 1273(a)(3). For purposes of this paragraph (b), preferred stock that may be acquired by a person other than the issuer (the third person) is deemed to be redeemable under the circumstances described in this paragraph (b), and references to the issuer include the third person, if—

(i) This paragraph (b) would apply to the stock if the third person were the issuer; and

(ii) Either—

(A) The acquisition of the stock by the third person would be treated as a redemption for federal income tax purposes (under section 304 or otherwise); or

(B) The third person and the issuer are members of the same affiliated group (having the meaning for this purpose given the term by section 1504(a), except that section 1504(b) shall not apply) and a principal purpose of the arrangement for the third person to acquire the stock is to avoid the application of section 305 and paragraph (b)(1) of this section.

(2) *Mandatory redemption or holder put.* Paragraph (b)(1) of this section applies to stock if the issuer is required

to redeem the stock at a specified time or the holder has the option (whether or not currently exercisable) to require the issuer to redeem the stock. However, paragraph (b)(1) of this section will not apply if the issuer's obligation to redeem or the holder's ability to require the issuer to redeem is subject to a contingency that is beyond the legal or practical control of either the holder or the holders as a group (or through a related party within the meaning of section 267(b) or 707(b)), and that, based on all of the facts and circumstances as of the issue date, renders remote the likelihood of redemption. For purposes of this paragraph, a contingency does not include the possibility of default, insolvency, or similar circumstances, or that a redemption may be precluded by applicable law which requires that the issuer have a particular level of capital, surplus, or similar items. A contingency also does not include an issuer's option to require earlier redemption of the stock. For rules applicable if stock may be redeemed at more than one time, see paragraph (b)(4) of this section.

(3) *Issuer call*—(i) *In general.* Paragraph (b)(1) of this section applies to stock by reason of the issuer's right to redeem the stock (even if the right is immediately exercisable), but only if, based on all of the facts and circumstances as of the issue date, redemption pursuant to that right is more likely than not to occur. However, even if redemption is more likely than not to occur, paragraph (b)(1) of this section does not apply if the redemption premium is solely in the nature of a penalty for premature redemption. A redemption premium is not a penalty for premature redemption unless it is a premium paid as a result of changes in economic or market conditions over which neither the issuer nor the holder has legal or practical control.

(ii) *Safe harbor.* For purposes of this paragraph (b)(3), redemption pursuant to an issuer's right to redeem is not treated as more likely than not to occur if—

(A) The issuer and the holder are not related within the meaning of section 267(b) or 707(b) (for purposes of applying sections 267(b) and 707(b) (including section 267(f)(1)), the phrase ''20 percent'' shall be substituted for the phrase ''50 percent'');

(B) There are no plans, arrangements, or agreements that effectively require or are intended to compel the issuer to redeem the stock (disregarding, for this purpose, a separate mandatory redemption obligation described in paragraph (b)(2) of this section); and

(C) Exercise of the right to redeem would not reduce the yield of the stock, as determined under principles similar to the principles of section 1272(a) and the regulations under sections 1271 through 1275.

(iii) *Effect of not satisfying safe harbor.* The fact that a redemption right is not described in paragraph (b)(3)(ii) of this section does not affect the determination of whether a redemption pursuant to the right to redeem is more likely than not to occur.

(4) *Coordination of multiple redemption provisions.* If stock may be redeemed at more than one time, the time and price at which redemption is most likely to occur must be determined based on all of the facts and circumstances as of the issue date. Any constructive distribution under paragraph (b)(1) of this section will result only with respect to the time and price identified in the preceding sentence. However, if redemption does not occur at that identified time, the amount of any additional premium payable on any later redemption date, to the extent not previously treated as distributed, is treated as a constructive distribution over the period from the missed call or put date to that later date, to the extent required under the principles of this paragraph (b).

(5) *Consistency.* The issuer's determination as to whether there is a constructive distribution under this paragraph (b) is binding on all holders of the stock, other than a holder that explicitly discloses that its determination as to whether there is a constructive distribution under this paragraph (b) differs from that of the issuer. Unless otherwise prescribed by the Commissioner, the disclosure must be made on a statement attached to the holder's timely filed federal income tax return for the taxable year that includes the

date the holder acquired the stock. The issuer must provide the relevant information to the holder in a reasonable manner. For example, the issuer may provide the name or title and either the address or telephone number of a representative of the issuer who will make available to holders upon request the information required for holders to comply with this provision of this paragraph (b).

(c) *Cross reference.* For rules for applying sections 305(b)(4) and 305(c) to recapitalizations, see § 1.305–7(c).

(d) *Examples.* The application of sections 305(b)(4) and 305(c) may be illustrated by the following examples:

Example 1. (i) Corporation T has outstanding 1,000 shares of $100 par 5-percent cumulative preferred stock and 10,000 shares of no-par common stock. The corporation is 4 years in arrears on dividends to the preferred shareholders. The issue price of the preferred stock is $100 per share. Pursuant to a recapitalization under section 368(a)(1)(E), the preferred shareholders exchange their preferred stock, including the right to dividend arrearages, on the basis of one old preferred share for 1.20 newly authorized class A preferred shares. Immediately following the recapitalization, the new class A shares are traded at $100 per share. The class A shares are entitled to a liquidation preference of $100. The preferred shareholders have increased their proportionate interest in the assets or earnings and profits of corporation T since the fair market value of 1.20 shares of class A preferred stock ($120) exceeds the issue price of the old preferred stock ($100). Accordingly, the preferred shareholders are deemed under section 305(c) to receive a distribution in the amount of $20 on each share of old preferred stock and the distribution is one to which sections 305(b)(4) and 301 apply.

(ii) The same result would occur if the fair market value of the common stock immediately following the recapitalization were $20 per share and each share of preferred stock were exchanged for one share of the new class A preferred stock and one share of common stock.

Example 2. Corporation A, a publicly held company whose stock is traded on a securities exchange (or in the over-the-counter market) has two classes of stock outstanding, common and cumulative preferred. Each share of preferred stock is convertible into .75 shares of common stock. There are no dividend arrearages. At the time of issue of the preferred stock, there was no plan or prearrangement by which it was to be exchanged for common stock. The issue price of the preferred stock is $100 per share. In order to retire the preferred stock, corporation A recapitalizes in a transaction to which section 368(a)(1)(E) applies and each share of preferred stock is exchanged for one share of common stock. Immediately after the recapitalization the common stock has a fair market value of $110 per share. Notwithstanding the fact that the fair market value of the common stock received in the exchange (determined immediately following the recapitalization) exceeds the issue price of the preferred stock surrendered, the recapitalization is not deemed under section 305(c) to result in a distribution to which sections 305(b)(4) and 301 apply since the recapitalization is not pursuant to a plan to periodically increase a shareholder's proportionate interest in the assets or earnings and profits and does not involve dividend arrearages.

Example 3. Corporation V is organized with two classes of stock, 1,000 shares of class A common and 1,000 shares of class B convertible preferred. Each share of class B stock may be converted into two shares of class A stock. Pursuant to a recapitalization under section 368(a)(1)(E), the 1,000 shares of class A stock are surrendered in exchange for 500 shares of new class A common and 500 shares of newly authorized class C common. The conversion right of class B stock is changed to one share of class A stock and one share of class C stock for each share of class B stock. The change in the conversion right is not deemed under section 305(c) to be a distribution on preferred stock to which sections 305(b)(4) and 301 apply.

Example 4 —(i) *Facts.* Corporation X is a domestic corporation with only common stock outstanding. In connection with its acquisition of Corporation T, X issues 100 shares of its 4% preferred stock to the shareholders of T, who are unrelated to X both before and after the transaction. The issue price of the preferred stock is $40 per share. Each share of preferred stock is convertible at the shareholder's election into three shares of X common stock. At the time the preferred stock is issued, the X common stock has a value of $10 per share. The preferred stock does not provide for its mandatory redemption or for redemption at the option of the holder. It is callable at the option of X at any time beginning three years from the date of issuance for $100 per share. There are no other plans, arrangements, or agreements that effectively require or are intended to compel X to redeem the stock.

(ii) *Analysis.* The preferred stock is described in the safe harbor rule of paragraph (b)(3)(ii) of this section because X and the former shareholders of T are unrelated, there are no plans, arrangements, or agreements that effectively require or are intended to compel X to redeem the stock, and calling the stock for $100 per share would not reduce the yield of the preferred stock. Therefore, the $60 per share call premium is not treated as a constructive distribution to the shareholders of the preferred stock under paragraph (b) of this section.

Example 5 —(i) *Facts*—(A) Corporation Y is a domestic corporation with only common stock outstanding. On January 1, 1996, Y issues 100 shares of its 10% preferred stock to a holder. The holder is unrelated to Y both before and after the stock issuance. The issue price of the preferred stock is $100 per share. The preferred stock is—

(1) Callable at the option of Y on or before January 1, 2001, at a price of $105 per share plus any accrued but unpaid dividends; and

(2) Mandatorily redeemable on January 1, 2006, at a price of $100 per share plus any accrued but unpaid dividends.

(B) The preferred stock provides that if Y fails to exercise its option to call the preferred stock on or before January 1, 2001, the holder will be entitled to appoint a majority of Y's directors. Based on all of the facts and circumstances as of the issue date, Y is likely to have the legal and financial capacity to exercise its right to redeem. There are no other facts and circumstances as of the issue date that would affect whether Y will call the preferred stock on or before January 1, 2001.

(ii) *Analysis.* Under paragraph (b)(3)(i) of this section, paragraph (b)(1) of this section applies because, by virtue of the change of control provision and the absence of any contrary facts, it is more likely than not that Y will exercise its option to call the preferred stock on or before January 1, 2001. The safe harbor rule of paragraph (b)(3)(ii) of this section does not apply because the provision that failure to call will cause the holder to gain control of the corporation is a plan, arrangement, or agreement that effectively requires or is intended to compel Y to redeem the preferred stock. Under paragraph (b)(4) of this section, the constructive distribution occurs over the period ending on January 1, 2001. Redemption is most likely to occur on that date, because that is the date on which the corporation minimizes the rate of return to the holder while preventing the holder from gaining control. The de minimis exception of paragraph (b)(1) of this section does not apply because the $5 per share difference between the redemption price and the issue price exceeds the amount determined under the principles of section 1273(a)(3) (5×.0025×$105 = $1.31). Accordingly, $5 per share, the difference between the redemption price and the issue price, is treated as a constructive distribution received by the holder on an economic accrual basis over the five-year period ending on January 1, 2001, under principles similar to the principles of section 1272(a).

Example 6. Corporation A, a publicly held company whose stock is traded on a securities exchange (or in the over-the-counter market) has two classes of stock outstanding, common and preferred. The preferred stock is nonvoting and nonconvertible, limited and preferred as to dividends, and has a fixed liquidation preference. There are no dividend arrearages. At the time of issue of the preferred stock, there was no plan or prearrangement by which it was to be exchanged for common stock. In order to retire the preferred stock, corporation A recapitalizes in a transaction to which section 368(a)(1)(E) applies and the preferred stock is exchanged for common stock. The transaction is not deemed to be a distribution under section 305(c) and sections 305(b) and 301 do not apply to the transaction. The same result would follow if the preferred stock was exchanged in any reorganization described in section 368(a)(1) for a new preferred stock having substantially the same market value and having no greater call price or liquidation preference than the old preferred stock, whether the new preferred stock has voting rights or is convertible into common stock of corporation A at a fixed ratio subject to change solely to take account of stock dividends, stock splits, or similar transactions with respect to the stock into which the preferred stock is convertible.

Example 7 —(i) *Facts*—(A) Corporation Z is a domestic corporation with only common stock outstanding. On January 1, 1996, Z issues 100 shares of its 10% preferred stock to C, an individual unrelated to Z both before and after the stock issuance. The issue price of the preferred stock is $100 per share. The preferred stock is—

(1) Not callable for a period of 5 years from the issue date;

(2) Callable at the option of Z on January 1, 2001, at a price of $110 per share plus any accrued but unpaid dividends;

(3) Callable at the option of Z on July 1, 2002, at a price of $120 per share plus any accrued but unpaid dividends; and

(4) Mandatorily redeemable on January 1, 2004, at a price of $150 per share plus any accrued but unpaid dividends.

(B) There are no other plans, arrangements, or agreements between Z and C concerning redemption of the stock. Moreover, there are no other facts and circumstances as of the issue date that would affect whether Z will call the preferred stock on either January 1, 2001, or July 1, 2002.

(ii) *Analysis.* This stock is described in paragraph (b)(2) of this section because it is mandatorily redeemable. It is also potentially described in paragraph (b)(3)(i) of this section because it is callable at the option of the issuer. The safe harbor rule of paragraph (b)(3)(ii) of this section does not apply to the option to call on January 1, 2001, because the call would reduce the yield of the stock when compared to the yield produced by the January 1, 2004, mandatory redemption feature. Moreover, absent any other facts indicating a contrary result, the fact that redemption on January 1, 2001, would produce the lowest yield indicates that redemption is most likely to occur on that date. Under paragraph (b)(4) of this section, paragraph (b)(1) of this section applies with respect to the issuer's right to call on January 1, 2001, because redemption is most likely to occur on January 1, 2001, for $110 per share. The de minimis exception of paragraph (b)(1) of this section does not apply because the $10 per share difference between the redemption price payable in 2001 and the issue price exceeds the amount determined under the principles of section 1273(a)(3) (5×.0025×$110=$1.38). Accordingly, $10 per share, the difference between the redemption price and the issue price, is treated as a constructive distribution received by the holder on an economic accrual basis over the five-year period ending January 1, 2001, under principles similar to the principles of section 1272(a).

(iii) *Coordination rules*—(A) If Z does not exercise its option to call the preferred stock on January 1, 2001, paragraph (b)(4) of this section provides that the principles of paragraph (b) of this section must be applied to determine if any remaining constructive distribution occurs. Under paragraphs (b)(3)(i) and (b)(4) of this section, paragraph (b)(1) of this section applies because, absent any other facts indicating a contrary result, the fact that redemption on July 1, 2002, would produce a lower yield than the yield produced by the mandatory redemption feature indicates that redemption on that date is most likely to occur. The safe harbor rule of paragraph (b)(3)(ii) of this section does not apply to the option to call on July 1, 2002, because, as of January 1, 2001, a call by Z on July 1, 2002, for $120 would reduce the yield of the stock. The de minimis exception of paragraph (b)(1) of this section does not apply because the $10 per share difference between the redemption price and the issue price (revised as of the missed call date as provided by paragraph (b)(4) of this section) exceeds the amount determined under the principles of section 1273(a)(3) (1×.0025×$120=$.30). Accordingly, the $10 per share of additional redemption premium that is payable on July 1, 2002, is treated as a constructive distribution received by the holder on an economic accrual basis over the period between January 1, 2001, and July 1, 2002, under principles similar to the principles of section 1272(a).

(B) If Z does not exercise its second option to call the preferred stock on July 1, 2002, then the $30 additional redemption premium that is payable on January 1, 2004, is treated as a constructive distribution under paragraphs (b)(2) and (b)(1) of this section. The de minimis exception of paragraph (b)(1) of this section does not apply because the $30 per share difference between the redemption price and the issue price (revised as of the second missed call date) exceeds the amount determined under the principles of section 1273(a)(3) (1×.0025×$150=$.38). The holder is treated as receiving the constructive distribution on an economic accrual basis over the period between July 1, 2002, and January 1, 2004, under principles similar to the principles of section 1272(a).

Example 8 —(i) *Facts.* The facts are the same as in paragraph (i) of Example 7, except that, based on all of the facts and circumstances as of the issue date (including an expected lack of funds on the part of Z), it is unlikely that Z will exercise the right to redeem on either January 1, 2001, or July 1, 2002.

(ii) *Analysis.* The safe harbor rule of paragraph (b)(3)(ii) of this section does not apply to the option to call on either January 1, 2001, or July 1, 2002, because each call would reduce the yield of the stock. Under paragraph (b)(3)(i) of this section, neither option to call is more likely than not to occur, because, based on all of the facts and circumstances as of the issue date (including an expected lack of funds on the part of Z), it is not more likely than not that Z will exercise either option. However, the $50 per share redemption premium that is payable on January 1, 2004, is treated as a constructive distribution under paragraphs (b)(1) and (2) of this section, regardless of whether Z is anticipated to have sufficient funds to redeem on that date, because Z is required to redeem the stock on that date. The de minimis exception of paragraph (b)(1) of this section does not apply because the $50 per share difference between the redemption price and the issue price exceeds the amount determined under the principles of section 1273(a)(3)(8×.0025×$150=$3).

Example 9. Corporation Q is organized with 10,000 shares of class A stock and 1,000 shares of class B stock. The terms of the class B stock require that the class B have a preference of $5 per share with respect to dividends and $100 per share with respect to liquidation. In addition, upon a distribution of $10 per share to the class A stock, class B participates equally in any additional dividends. The terms also provide that upon liquidation the class B stock participates equally after the class A stock receives $100 per share. Corporation Q has no accumulated earnings and profits. In 1971 it earned $10,000, the highest earnings in its history. The corporation is in an industry in which it is reasonable to anticipate a growth in earnings of 5 percent per year. In 1971 the book value of corporation Q's assets totalled $100,000. In that year the corporation paid a dividend of $5 per share to the class B stock and $.50 per share to the class A. In 1972 the corporation had no earnings and in lieu of a $5 dividend distributed one share of class B stock for each outstanding share of class B. No distribution was made to the class A stock.

Since, in 1972, it was not reasonable to anticipate that the class B stock would participate in the current and anticipated earnings and growth of the corporation beyond its preferred interest, the class B stock is preferred stock and the distribution of class B shares to the class B shareholders is a distribution to which sections 305(b)(4) and 301 apply.

Example 10. Corporation P is organized with 10,000 shares of class A stock and 1,000 shares of class B stock. The terms of the class B stock require that the class B have a preference of $5 per share with respect to dividends and $100 per share with respect to liquidation. In addition, upon a distribution of $5 per share to the class A stock, class B participates equally in any additional dividends. The terms also provide that upon liquidation the class B stock participates equally after the class A receives $100 per share. Corporation P has accumulated earnings and profits of $100,000. In 1971 it earned $75,000. The corporation is in an industry in which it is reasonable to anticipate a growth in earnings of 10 percent per year. In 1971 the book value of corporation P's assets totalled $5 million. In that year the corporation paid a dividend of $5 per share to the class B stock, $5 per share to the class A stock, and it distributed an additional $1 per share to both class A and class B stock. In 1972 the corporation had earnings of $82,500. In that year it paid a dividend of $5 per share to the class B stock and $5 per share to the class A stock. In addition, the corporation declared stock dividends of one share of class B stock for every 10 outstanding shares of class B and one share of class A stock for every 10 outstanding shares of class A. Since, in 1972, it was reasonable to anticipate that both the class B stock and the class A stock would participate in the current and anticipated earnings and growth of the corporation beyond their preferred interests, neither class is preferred stock and the stock dividends are not distributions to which section 305(b)(4) applies.

(e) *Effective date.* The rules of paragraph (b) of this section and *Examples 4, 5, 7,* and *8* of paragraph (d) of this section apply to stock issued on or after December 20, 1995. For rules applicable to previously issued stock, see §1.305–5 (b) and (d) *Examples (4), (5),* and (*7*) (as contained in the 26 CFR part 1 edition revised April 1, 1995). Although the rules of paragraph (b) of this section and the revised examples do not apply to stock issued before December 20, 1995, the rules of sections 305(c)(1), (2), and (3) apply to stock described therein issued on or after October 10, 1990, except as provided in section 11322(b)(2) of the Revenue Reconciliation Act of 1990 (Public Law 101–508 Stat.). Moreover, except as provided in section 11322(b)(2) of the Revenue Reconciliation Act of 1990 (Public Law 101–508 Stat.), with respect to stock issued on or after October 10, 1990, and issued before December 20, 1995, the economic accrual rule of section 305(c)(3) will apply to the entire call premium on stock that is not described in paragraph (b)(2) of this section if the premium is considered to be unreasonable under the principles of §1.305–5(b) (as contained in the 26 CFR part 1 edition revised April 1, 1995). A call premium described in the preceding sentence will be accrued over the period of time during which the preferred stock cannot be called for redemption.

[T.D. 7281, 38 FR 18536, July 12, 1973, as amended by T.D. 7329, 39 FR 36860, Oct. 15, 1974; T.D. 8643, 60 FR 66136, Dec. 21, 1995]

§1.305–6 Distributions of convertible preferred.

(a) *In general.* (1) Under section 305(b)(5), a distribution by a corporation of its convertible preferred stock or rights to acquire such stock made or considered as made with respect to its stock is treated as a distribution of property to which section 301 applies unless the corporation establishes that such distribution will not result in a disproportionate distribution as described in §1.305–3.

(2) The distribution of convertible preferred stock is likely to result in a disproportionate distribution when both of the following conditions exist: (i) The conversion right must be exercised within a relatively short period of time after the date of distribution of the stock; and (ii) taking into account such factors as the dividend rate, the redemption provisions, the marketability of the convertible stock, and the conversion price, it may be anticipated that some shareholders will exercise their conversion rights and some will not. On the other hand, where the conversion right may be exercised over a period of many years and the dividend rate is consistent with market conditions at the time of distribution of the stock, there is no basis for predicting at what time and the extent to which the stock will be converted and

it is unlikely that a disproportionate distribution will result.

(b) *Examples.* The application of section 305(b)(5) may be illustrated by the following examples:

Example (1). Corporation Z is organized with one class of stock, class A common. During the year the corporation declares a dividend on the class A stock payable in newly authorized class B preferred stock which is convertible into class A stock for a period of 20 years from the date of issuance. Assuming dividend rates are normal in light of existing conditions so that there is no basis for predicting the extent to which the stock will be converted, the circumstances will ordinarily be sufficient to establish that a disproportionate distribution will not result since it is impossible to predict the extent to which the class B stock will be converted into class A stock. Accordingly, the distribution of class B stock is not one to which section 301 applies.

Example (2). Corporation X is organized with one class of stock, class A common. During the year the corporation declares a dividend on the class A stock payable in newly authorized redeemable class C preferred stock which is convertible into class A common stock no later than 4 months from the date of distribution at a price slightly higher than the market price of class A stock on the date of distribution. By prearrangement with corporation X, corporation Y, an insurance company, agrees to purchase class C stock from any shareholder who does not wish to convert. By reason of this prearrangement, it is anticipated that the shareholders will either sell the class C stock to the insurance company (which expects to retain the shares for investment purposes) or will convert. As a result, some of the shareholders exercise their conversion privilege and receive additional shares of class A stock, while other shareholders sell their class C stock to corporation Y and receive cash. The distribution is a distribution to which section 301 applies since it results in the receipt of property by some shareholders and an increase in the proportionate interests of other shareholders.

[T.D. 7281, 38 FR 18538, July 12, 1973]

§ 1.305–7 Certain transactions treated as distributions.

(a) *In general.* Under section 305(c), a change in conversion ratio, a change in redemption price, a difference between redemption price and issue price, a redemption which is treated as a distribution to which section 301 applies, or any transaction (including a recapitalization) having a similar effect on the interest of any shareholder may be treated as a distribution with respect to any shareholder whose proportionate interest in the earnings and profits or assets of the corporation is increased by such change, difference, redemption, or similar transaction. In general, such change, difference, redemption, or similar transaction will be treated as a distribution to which sections 305(b) and 301 apply where—

(1) The proportionate interest of any shareholder in the earnings and profits or assets of the corporation deemed to have made such distribution is increased by such change, difference, redemption, or similar transaction; and

(2) Such distribution has the result described in paragraph (2), (3), (4), or (5) of section 305(b).

Where such change, difference, redemption, or similar transaction is treated as a distribution under the provisions of this section, such distribution will be deemed made with respect to any shareholder whose interest in the earnings and profits or assets of the distributing corporation is increased thereby. Such distribution will be deemed to be a distribution of the stock of such corporation made by the corporation to such shareholder with respect to his stock. Depending upon the facts presented, the distribution may be deemed to be made in common or preferred stock. For example, where a redemption premium exists with respect to a class of preferred stock under the circumstances described in § 1.305–5(b) and the other requirements of this section are also met, the distribution will be deemed made with respect to such preferred stock, in stock of the same class. Accordingly, the preferred shareholders are considered under sections 305(b)(4) and 305(c) to have received a distribution of preferred stock to which section 301 applies. See the examples in §§ 1.305–3(e) and 1.305–5(d) for further illustrations of the application of section 305(c).

(b) *Antidilution provisions.* (1) For purposes of applying section 305(c) in conjunction with section 305(b), a change in the conversion ratio or conversion price of convertible preferred stock (or securities), or in the exercise price of rights or warrants, made pursuant to a bona fide, reasonable, adjustment formula (including, but not limited to, either the so-called ''market price'' or ''conversion price'' type of formulas) which has the effect of preventing dilution of the interest of the holders of such stock (or securities) will not be considered to result in a deemed distribution of stock. An adjustment in the conversion ratio or price to compensate for cash or property distributions to other shareholders that are taxable under section 301, 356(a)(2), 871(a)(1)(A), 881(a)(1), 852(b), or 857(b) will not be considered as made pursuant to a bona fide adjustment formula.

(2) The principles of this paragraph may be illustrated by the following example:

Example. (i) Corporation U has two classes of stock outstanding, class A and class B. Each class B share is convertible into class A stock. In accordance with a bonafide, reasonable, antidilution provision, the conversion price is adjusted if the corporation transfers class A stock to anyone for a consideration that is below the conversion price.

(ii) The corporation sells class A stock to the public at the current market price but below the conversion price. Pursuant to the antidilution provision, the conversion price is adjusted downward. Such a change in conversion price will not be deemed to be a distribution under section 305(c) for the purposes of section 305(b).

(c) *Recapitalizations.* (1) A recapitalization (whether or not an isolated transaction) will be deemed to result in a distribution to which section 305(c) and this section apply if—

(i) It is pursuant to a plan to periodically increase a shareholder's proportionate interest in the assets or earnings and profits of the corporation, or

(ii) A shareholder owning preferred stock with dividends in arrears exchanges his stock for other stock and, as a result, increases his proportionate interest in the assets or earnings and profits of the corporation. An increase in a preferred shareholder's proportionate interest occurs in any case where the fair market value or the liquidation preference, whichever is greater, of the stock received in the exchange (determined immediately following the recapitalization), exceeds the issue price of the preferred stock surrendered.

(2) In a case to which subparagraph (1)(ii) of this paragraph applies, the amount of the distribution deemed under section 305(c) to result from the recapitalization is the lesser of (i) the amount by which the fair market value or the liquidation preference, whichever is greater, of the stock received in the exchange (determined immediately following the recapitalization) exceeds the issue price of the preferred stock surrendered, or (ii) the amount of the dividends in arrears.

(3) For purposes of applying subparagraphs (1) and (2) of this paragraph with respect to stock issued before July 12, 1973, the term *issue price of the preferred stock surrendered* shall mean the greater of the issue price or the liquidation preference (not including dividends in arrears) of the stock surrendered.

(4) For an illustration of the application of this paragraph, see Example (12) of §1.305–3(e) and *Examples (1), (2), (3), and (6)* of §1.305–5(d).

(5) For rules relating to redemption premiums on preferred stock, see §1.305–5(b).

[T.D. 7281, 38 FR 18538, July 12, 1973, as amended by T.D. 8643, 60 FR 66138, Dec. 21, 1995]

§1.305–8 Effective dates.

(a) *In general.* Section 421(b) of the Tax Reform Act of 1969 (83 Stat. 615) provides as follows:

(b) *Effective dates.* (1) Except as otherwise provided in this subsection, the amendment made by subsection (a) shall apply with respect to distributions (or deemed distributions) made after January 10, 1969, in taxable years ending after such date.

(2)(A) Section 305(b)(2) of the Internal Revenue Code of 1954 (as added by subsection (a) shall not apply to a distribution (or deemed distribution) of stock made before January 1, 1991, with respect to stock (i) outstanding on January 10, 1969, (ii) issued pursuant to a contract binding on January 10, 1969, on the distributing corporation, (iii) which is additional stock of that class of stock which (as of January 10, 1969) had the largest fair market value of all classes of stock of the corporation (taking into account only stock outstanding on January 10, 1969, or issued pursuant to a contract binding on January 10, 1969), (iv) described in subparagraph (c)(iii), or (v) issued in a prior distribution described in clause (i), (ii), (iii), or (iv).

(B) Subparagraph (A) shall apply only if—

(i) The stock as to which there is a receipt of property was outstanding on January 10, 1969 (or was issued pursuant to a contract binding on January 10, 1969, on the distributing corporation), and

(ii) If such stock and any stock described in subparagraph (A)(i) were also outstanding on January 10, 1968, a distribution of property was made on or before January 10, 1969, with respect to such stock, and a distribution of stock was made on or before January 10, 1969, with respect to such stock described in subparagraph (A)(i).

(C) Subparagraph (A) shall cease to apply when at any time after October 9, 1969, the distributing corporation issues any of its stock (other than in a distribution of stock with respect to stock of the same class) which is not—

(i) Nonconvertible preferred stock,

(ii) Additional stock of that class of stock which meets the requirements of subparagraph (A)(iii), or

(iii) Preferred stock which is convertible into stock which meets the requirements of subparagraph (A)(iii) at a fixed conversion ratio which takes account of all stock dividends and stock splits with respect to the stock into which such convertible stock is convertible.

(D) For purposes of this paragraph, the term *stock* includes rights to acquire such stock.

(3) In cases to which Treasury Decision 6990 (promulgated January 10, 1969) would not have applied, in applying paragraphs (1) and (2) April 22, 1969, shall be substituted for January 10, 1969.

(4) Section 305(b)(4) of the Internal Revenue Code of 1954 (as added by subsection (a)) shall not apply to any distribution (or deemed distribution) with respect to preferred stock (including any increase in the conversation ratio of convertible stock) made before January 1, 1991, pursuant to the terms relating to the issuance of such stock which were in effect on January 10, 1969.

(5) With respect to distributions made or considered as made after January 10, 1969, in taxable years ending after such date, to the extent that the amendment made by subsection (a) does not apply by reason of paragraph (2), (3), or (4) of this subsection, section 305 of the Internal Revenue Code of 1954 (as in effect before the amendment made by subsection (a)) shall continue to apply.

(b) *Rules of application.* (1) The rules contained in section 421(b)(2) of the Tax Reform Act of 1969 (83 Stat. 615), hereinafter called ‘‘the Act’’, shall apply with respect to the application of section 305(b)(2), section 305(b)(3), and section 305(b)(5). Thus, for example, section 305(b)(5) of the Code will not apply to a distribution of convertible preferred stock made before January 1, 1991, with respect to stock outstanding on January 10, 1969 (or which was issued pursuant to a contract binding on the distributing corporation on January 10, 1969), provided the distribution is pursuant to the terms relating to the issuance of such stock which were in effect on January 10, 1969.

(2)(i) For purposes of section 421(b)(2)(A), (B)(i), and (C) of the Act, stock is considered as outstanding on January 10, 1969, if it could be acquired on such date or some future date by the exercise of a right or conversion privilege in existence on such date (including a right or conversion privilege with respect to stock issued pursuant to a contract binding, on January 10, 1969, on the distributing corporation). Thus, if on January 10, 1969, corporation X has outstanding 1,000 shares of class A common stock and 3,000 shares of class B common stock which are convertible on a one-to-one basis into class A stock, corporation X is considered for purposes of section 421(b)(2)(A), (B)(i), and (C) of the Act to have outstanding on January 10, 1969, 4,000 shares of class A stock (1,000 shares actually outstanding and 3,000 shares that could be acquired by the exercise of the conversion privilege contained in the class B stock) and 3,000 shares of class B stock.

(ii) For the purposes of section 421(b)(2)(A) (other than for the purpose of determining under section 421(b)(2)(A)(iii) that class of stock which as of January 10, 1969, had the largest fair market value of all classes of stock of the corporation), (B)(i), and (C) of the Act, stock will be considered as outstanding on January 10, 1969, if it is issued pursuant to a conversion privilege contained in stock issued, mediately or immediately, as a stock dividend with respect to stock outstanding on January 10, 1969.

(3) If, after applying subparagraph (2) of this paragraph, the class of stock which as of January 10, 1969, had the largest fair market value of all classes of stock of the corporation is a class of stock which is convertible into another class of nonconvertible stock, then for purposes of section 421(b)(2)(C)(ii) of the Act stock issued upon conversion of any such convertible stock (whether

or not outstanding on January 10, 1969) into stock of such other class shall be deemed to be stock which meets the requirements of section 421(b)(2)(A)(iii) of the Act.

(4) For purposes of section 421(b) of the Act, stock of a corporation held in its treasury will not be considered as outstanding and a distribution of such stock will be considered to be an issuance of such stock on the date of distribution. Stock of a parent corporation held by its subsidiary is not considered treasury stock.

(5) The following stock shall not be taken into account for purposes of applying section 421(b)(2)(B)(i) of the Act: (i) Stock issued after January 10, 1969, and before October 10, 1969 (other than stock which was issued pursuant to a contract binding on January 10, 1969, on the distributing corporation); (ii) stock described in section 421(b)(2)(C)(i), (ii), or (iii) of the Act; and (iii) stock issued, mediately or immediately, as a stock dividend with respect to stock of the same class outstanding on January 10, 1969. For example, if on June 1, 1970, corporation Y issues additional stock of that class of stock which as of January 10, 1969, had the largest fair market value of all classes of stock of the corporation, such additional stock will not be taken into account for the purpose of meeting the requirement under section 421(b)(2)(B)(i) of the Act that the stock as to which there is a receipt of property must have been outstanding on January 10, 1969, and thus subparagraph (A) of section 421(b)(2) of the Act will not, where otherwise applicable, cease to apply.

(6) Section 421(b)(2)(A) of the Act, if otherwise applicable, will not cease to apply if the distributing corporation issues after October 9, 1969, securities which are convertible into stock that meets the requirements of section 421(b)(2)(A)(iii) of the Act at a fixed conversion ratio which takes account of all stock dividends and stock splits with respect to the stock into which the securities are convertible.

(7) Under section 421(b)(4) of the Act, section 305(b)(4) does not apply to any distribution (or deemed distribution) by a corporation with respect to preferred stock made before January 1, 1991, if such distribution is pursuant to the terms relating to the issuance of such stock which were in effect on January 10, 1969. For example, if as of January 10, 1969, a corporation had followed the practice of paying stock dividends on preferred stock (or of periodically increasing the conversion ratio of convertible preferred stock) or if the preferred stock provided for a redemption price in excess of the issue price, then section 305(b)(4) would not apply to any distribution of stock made (or which would be considered made if section 305(b)(4) applied) before January 1, 1991, pursuant to such practice.

(8) If section 421(b)(2) is not applicable and, for that reason, a distribution (or deemed distribution) is treated as a distribution to which section 301 applies by virtue of the application of section 305(b)(2), (b)(3), or (b)(5), it is irrelevant that, by reason of the application of section 421(b)(4) of such Act, section 305(b)(4) is not applicable to the distribution.

[T.D. 7281, 38 FR 18539, July 12, 1973]

§1.306–1 General.

(a) Section 306 provides, in general, that the proceeds from the sale or redemption of certain stock (referred to as ''section 306 stock'') shall be treated either as ordinary income or as a distribution of property to which section 301 applies. Section 306 stock is defined in section 306(c) and is usually preferred stock received either as a nontaxable dividend or in a transaction in which no gain or loss is recognized. Section 306(b) lists certain circumstances in which the special rules of section 306(a) shall not apply.

(b)(1) If a shareholder sells or otherwise disposes of section 306 stock (other than by redemption or within the exceptions listed in section 306(b)), the entire proceeds received from such disposition shall be treated as ordinary income to the extent that the fair market value of the stock sold, on the date distributed to the shareholder, would have been a dividend to such shareholder had the distributing corporation distributed cash in lieu of stock. Any excess of the amount received over the sum of the amount treated as ordinary income plus the adjusted basis of the stock disposed of, shall be treated as gain from the sale of a capital asset or noncapital asset as the case may be. No loss shall be recognized. No reduction of earnings and profits results from any disposition of stock other than a redemption. The term *disposition* under section 306(a)(1) includes, among other things, pledges of stock under certain circumstances, particularly where the pledgee can look only to the stock itself as its security.

(2) Section 306(a)(1) may be illustrated by the following examples:

Example (1). On December 15, 1954, A and B owned equally all of the stock of Corporation X which files its income tax return on a calendar year basis. On that date Corporation X distributed pro rata 100 shares of preferred stock as a dividend on its outstanding common stock. On December 15, 1954, the preferred stock had a fair market value of $10,000. On December 31, 1954, the earnings and profits of Corporation X were $20,000. The 50 shares of preferred stock so distributed to A had an allocated basis to him of $10 per share or a total of $500 for the 50 shares. Such shares had a fair market value of $5,000 when issued. A sold the 50 shares of preferred stock on July 1, 1955, for $6,000. Of this amount $5,000 will be treated as ordinary income; $500 ($6,000 minus $5,500) will be treated as gain from the sale of a capital or noncapital asset as the case may be.

Example (2). The facts are the same as in *Example 1* except that A sold his 50 shares of preferred stock for $5,100. Of this amount $5,000 will be treated as ordinary income. No loss will be allowed. There will be added back to the basis of the common stock of Corporation X with respect to which the preferred stock was distributed, $400, the allocated basis of $500 reduced by the $100 received.

Example (3). The facts are the same as in *Example 1* except that A sold 25 of his shares of preferred stock for $2,600. Of this amount $2,500 will be treated as ordinary income. No loss will be allowed. There will be added back to the basis of the common stock of Corporation X with respect to which the preferred stock was distributed, $150, the allocated basis of $250 reduced by the $100 received.

(c) The entire amount received by a shareholder from the redemption of section 306 stock shall be treated as a distribution of property under section 301. See also section 303 (relating to distribution in redemption of stock to pay death taxes).

[T.D. 6500, 25 FR 11607, Nov. 26, 1960, as amended by T.D. 7556, 43 FR 34128, Aug. 3, 1978]

§ 1.306–2 Exception.

(a) If a shareholder terminates his entire stock interest in a corporation—

(1) By a sale or other disposition within the requirements of section 306(b)(1)(A), or

(2) By redemption under section 302(b)(3) (through the application of section 306(b)(1)(B)),

the amount received from such disposition shall be treated as an amount received in part or full payment for the stock sold or redeemed. In the case of a sale, only the stock interest need be terminated. In determining whether an entire stock interest has been terminated under section 306(b)(1)(A), all of the provisions of section 318(a) (relating to constructive ownership of stock) shall be applicable. In determining whether a shareholder has terminated his entire interest in a corporation by a redemption of his stock under section 302(b)(3), all of the provisions of section 318(a) shall be applicable unless the shareholder meets the requirements of section 302(c)(2) (relating to termination of all interest in the corporation). If the requirements of section 302(c)(2) are met, section 318(a)(1) (relating to members of a family) shall be inapplicable. Under all circumstances paragraphs (2), (3), (4), and (5) of section 318(a) shall be applicable.

(b) Section 306(a) does not apply to—

(1) Redemptions of section 306 stock pursuant to a partial or complete liquidation of a corporation to which part II (section 331 and following), subchapter C, chapter 1 of the Code applies,

(2) Exchanges of section 306 stock solely for stock in connection with a reorganization or in an exchange under section 351, 355, or section 1036 (relating to exchanges of stock for stock in the same corporation) to the extent that gain or loss is not recognized to the shareholder as the result of the exchange of the stock (see paragraph (d)

of §1.306–3 relative to the receipt of other property), and

(3) A disposition or redemption, if it is established to the satisfaction of the Commissioner that the distribution, and the disposition or redemption, was not in pursuance of a plan having as one of its principal purposes the avoidance of Federal income tax. However, in the case of a prior or simultaneous disposition (or redemption) of the stock with respect to which the section 306 stock disposed of (or redeemed) was issued, it is not necessary to establish that the distribution was not in pursuance of such a plan. For example, in the absence of such a plan and of any other facts the first sentence of this subparagraph would be applicable to the case of dividends and isolated dispositions of section 306 stock by minority shareholders. Similarly, in the absence of such a plan and of any other facts, if a shareholder received a distribution of 100 shares of section 306 stock on his holdings of 100 shares of voting common stock in a corporation and sells his voting common stock before he disposes of his section 306 stock, the subsequent disposition of his section 306 stock would not ordinarily be considered a disposition one of the principal purposes of which is the avoidance of Federal income tax.

[T.D. 6500, 25 FR 11607, Nov. 26, 1960, as amended by T.D. 6969, 33 FR 11998, Aug. 23, 1968]

§1.306–3 Section 306 stock defined.

(a) For the purpose of subchapter C, chapter 1 of the code, the term *section 306 stock* means stock which meets the requirements of section 306(c)(1). Any class of stock distributed to a shareholder in a transaction in which no amount is includible in the income of the shareholder or no gain or loss is recognized may be section 306 stock, if a distribution of money by the distributing corporation in lieu of such stock would have been a dividend in whole or in part. However, except as provided in section 306(g), if no part of a distribution of money by the distributing corporation in lieu of such stock would have been a dividend, the stock distributed will not constitute section 306 stock.

(b) For the purpose of section 306, rights to acquire stock shall be treated as stock. Such rights shall not be section 306 stock if no part of the distribution would have been a dividend if money had been distributed in lieu of the rights. When stock is acquired by the exercise of rights which are treated at section 306 stock, the stock acquired is section 306 stock. Upon the disposition of such stock (other than by redemption or within the exceptions listed in section 306(b)), the proceeds received from the disposition shall be treated as ordinary income to the extent that the fair market value of the stock rights, on the date distributed to the shareholder, would have been a dividend to the shareholder had the distributing corporation distributed cash in lieu of stock rights. Any excess of the amount realized over the sum of the amount treated as ordinary income plus the adjusted basis of the stock, shall be treated as gain from the sale of the stock.

(c) Section 306(c)(1)(A) provides that section 306 stock is any stock (other than common issued with respect to common) distributed to the shareholder selling or otherwise disposing thereof if, under section 305(a) (relating to distributions of stock and stock rights) any part of the distribution was not included in the gross income of the distributee.

(d) Section 306(c)(1)(B) includes in the definition of section 306 stock any stock except common stock, which is received by a shareholder in connection with a reorganization under section 368 or in a distribution or exchange under section 355 (or so much of section 356 as relates to section 355) provided the effect of the transaction is substantially the same as the receipt of a stock dividend, or the stock is received in exchange for section 306 stock. If, in a transaction to which section 356 is applicable, a shareholder exchanges section 306 stock for stock and money or other property, the entire amount of such money and of the fair market value of the other property (not limited to the gain recognized) shall be treated as a distribution of property to which section 301 applies. Common stock received in exchange for section 306 stock in a recapitalization shall not be considered section 306 stock. Ordinarily, section 306 stock includes stock which is not common stock received in pursuance of a plan of reorganization (within the meaning of section 368(a)) or received in a distribution or exchange to which section 355 (or so much of section 356 as relates to section 355) applies if cash received in lieu of such stock would have been treated as a dividend under section 356(a)(2) or would have been treated as a distribution to which section 301 applies by virtue of section 356(b) or section 302(d). The application of the preceding sentence is illustrated by the following examples:

Example (1). Corporation A, having only common stock outstanding, is merged in a statutory merger (qualifying as a reorganization under section 368(a)) with Corporation B. Pursuant to such merger, the shareholders of Corporation A received both common and preferred stock in Corporation B. The preferred stock received by such shareholders is section 306 stock.

Example (2). X and Y each own one-half of the 2,000 outstanding shares of preferred stock and one-half of the 2,000 outstanding shares of common stock of Corporation C. Pursuant to a reorganization within the meaning of section 368(a)(1)(E) (recapitalization) each shareholder exchanges his preferred stock for preferred stock of a new issue which is not substantially different from the preferred stock previously held. Unless the preferred stock exchanged was itself section 306 stock the preferred stock received is not section 306 stock.

(e) Section 306(c)(1)(C) includes in the definition of section 306 stock any stock (except as provided in section 306(c)(1)(B)) the basis of which in the hands of the person disposing of such stock, is determined by reference to section 306 stock held by such shareholder or any other person. Under this paragraph common stock can be section 306 stock. Thus, if a person owning section 306 stock in Corporation A transfers it to Corporation B which is controlled by him in exchange for common stock of Corporation B in a transaction to which section 351 is applicable, the common stock so received by him would be section 306 stock and subject to the provisions of section 306(a) on its disposition. In addition, the section 306 stock transferred is section 306 stock in the hands of Corporation B, the transferee. Section 306 stock transferred by gift remains section 306 stock in the hands of the donee. Stock received in exchange for section 306 stock under section 1036(a) (relating to exchange of stock for stock in the same corporation) or under so much of section 1031(b) as relates to section 1036(a) becomes section 306 stock and acquires, for purposes of section 306, the characteristics of the section 306 stock exchanged. The entire amount of the fair market value of the other property received in such transaction shall be considered as received upon a disposition (other than a redemption) to which section 306(a) applies. Section 306 stock ceases to be so classified if the basis of such stock is determined by reference to its fair market value on the date of the decedent-stockholder's death or the optional valuation date under section 1014.

(f) If section 306 stock which was distributed with respect to common stock is exchanged for common stock in the same corporation (whether or not such exchange is pursuant to a conversion privilege contained in section 306 stock), such common stock shall not be section 306 stock. This paragraph applies to exchanges not coming within the purview of section 306(c)(1)(B). Common stock which is convertible into stock other than common stock or into property, shall not be considered common stock. It is immaterial whether the conversion privilege is contained in the stock or in some type of collateral agreement.

(g) If there is a substantial change in the terms and conditions of any stock, then, for the purpose of this section—

(1) The fair market value of such stock shall be the fair market value at the time of distribution or the fair market value at the time of such change, whichever is higher;

(2) Such stock's ratable share of the amount which would have been a dividend if money had been distributed in lieu of stock shall be determined by reference to the time of distribution or by reference to the time of such change, whichever ratable share is higher; and

(3) Section 306(c)(2) shall be inapplicable if there would have been a dividend to any extent if money had been distributed in lieu of the stock either

at the time of the distribution or at the time of such change.

(h) When section 306 stock is disposed of, the amount treated under section 306(a)(1)(A) as ordinary income, for the purposes of part I, subchapter N, chapter 1 of the Code, be treated as derived from the same source as would have been the source if money had been received from the corporation as a dividend at the time of the distribution of such stock. If the amount is determined to be derived from sources within the United States, the amount shall be considered to be fixed or determinable annual or periodic gains, profits, and income within the meaning of section 871(a) or section 881(a), relating, respectively, to the tax on nonresident alien individuals and on foreign corporations not engaged in business in the United States.

(i) Section 306 shall be inapplicable to stock received before June 22, 1954, and to stock received on or after June 22, 1954, in transactions subject to the provisions of the Internal Revenue Code of 1939.

[T.D. 6500, 25 FR 11607, Nov. 26, 1960, as amended by T.D. 7281, 38 FR 18540, July 12, 1973; T.D. 7556, 43 FR 34128, Aug. 3, 1978]

§1.307–1 General.

(a) If a shareholder receives stock or stock rights as a distribution on stock previously held and under section 305 such distribution is not includible in gross income then, except as provided in section 307(b) and §1.307–2, the basis of the stock with respect to which the distribution was made shall be allocated between the old and new stocks or rights in proportion to the fair market values of each on the date of distribution. If a shareholder receives stock or stock rights as a distribution on stock previously held and pursuant to section 305 part of the distribution is not includible in gross income, then (except as provided in section 307(b) and §1.307–2) the basis of the stock with respect to which the distribution is made shall be allocated between (1) the old stock and (2) that part of the new stock or rights which is not includible in gross income, in proportion to the fair market values of each on the date of distribution. The date of distribution in each case shall be the date the stock or the rights are distributed to the stockholder and not the record date. The general rule will apply with respect to stock rights only if such rights are exercised or sold.

(b) The application of paragraph (a) of this section is illustrated by the following example:

Example A taxpayer in 1947 purchased 100 shares of common stock at $100 per share and in 1954 by reason of the ownership of such stock acquired 100 rights entitling him to subscribe to 100 additional shares of such stock at $90 a share. Immediately after the issuance of the rights, each of the shares of stock in respect of which the rights were acquired had a fair market value, ex-rights, of $110 and the rights had a fair market value of $19 each. The basis of the rights and the common stock for the purpose of determining the basis for gain or loss on a subsequent sale or exercise of the rights or a sale of the old stock is computed as follows:

100 (shares)×$100=$10,000, cost of old stock (stock in respect of which the rights were acquired).

100 (shares)×$110=$11,000, market value of old stock.

100 (rights)×$19=$1,900, market value of rights.

11,000/12,900 of $10,000=$8,527.13, cost of old stock apportioned to such stock.

1,900/12,900 of $10,000=$1,472.87, cost of old stock apportioned to rights.

If the rights are sold, the basis for determining gain or loss will be $14.7287 per right. If the rights are exercised, the basis of the new stock acquired will be the subscription price paid therefor ($90) plus the basis of the rights exercised ($14.7287 each) or $104.7287 per share. The remaining basis of the old stock for the purpose of determining gain or loss on a subsequent sale will be $85.2713 per share.

§1.307–2 Exception.

The basis of rights to buy stock which are excluded from gross income under section 305(a), shall be zero if the fair market value of such rights on the date of distribution is less than 15 percent of the fair market value of the old stock on that date, unless the shareholder elects to allocate part of the basis of the old stock to the rights as provided in paragraph (a) of §1.307–1. The election shall be made by a shareholder with respect to all the rights received by him in a particular distribution in respect of all the stock of the same class owned by him in the issuing corporation at the time of such distribution. Such election to allocate basis to rights shall be in the form of a statement attached to the shareholder's return for the year in which the rights are received. This election, once made, shall be irrevocable with respect to the rights for which the election was made. Any shareholder making such an election shall retain a copy of the election and of the tax return with which it was filed, in order to substantiate the use of an allocated basis upon a subsequent disposition of the stock acquired by exercise.

EFFECTS ON CORPORATION

§ 1.312–1 Adjustment to earnings and profits reflecting distributions by corporations.

(a) In general, on the distribution of property by a corporation with respect to its stock, its earnings, and profits (to the extent thereof) shall be decreased by—

(1) The amount of money,

(2) The principal amount of the obligations of such corporation issued in such distribution, and

(3) The adjusted basis of other property.

For special rule with respect to distributions to which section 312(e) applies, see § 1.312–5.

(b) The adjustment provided in section 312(a)(3) and paragraph (a)(3) of this section with respect to a distribution of property (other than money or its own obligations) shall be made notwithstanding the fact that such property has appreciated or depreciated in value since acquisition.

(c) The application of paragraphs (a) and (b) of this section may be illustrated by the following examples:

Example (1). Corporation A distributes to its sole shareholder property with a value of $10,000 and a basis of $5,000. It has $12,500 in earnings and profits. The reduction in earnings and profits by reason of such distribution is $5,000. Such is the reduction even though the amount of $10,000 is includible in the income of the shareholder (other than a corporation) as a dividend.

Example (2). The facts are the same as in *Example (1)* above except that the property has a basis of $15,000 and the earnings and profits of the corporation are $20,000. The reduction in earnings and profits is $15,000. Such is the reduction even though only the amount of $10,000 is includible in the income of the shareholder as a dividend.

(d) In the case of a distribution of stock or rights to acquire stock a portion of which is includible in income by reason of section 305(b), the earnings and profits shall be reduced by the fair market value of such portion. No reduction shall be made if a distribution of stock or rights to acquire stock is not includible in income under the provisions of section 305.

(e) No adjustment shall be made in the amount of the earnings and profits of the issuing corporation upon a disposition of section 306 stock unless such disposition is a redemption.

§ 1.312–2 Distribution of inventory assets.

Section 312(b) provides for the increase and the decrease of the earnings and profits of a corporation which distributes, with respect to its stock, inventory assets as defined in section 312(b)(2), where the fair market value of such assets exceeds their adjusted basis. The rules provided in section 312(b) (relating to distributions of certain inventory assets) shall be applicable without regard to the method used in computing inventories for the purpose of the computation of taxable income. Section 312(b) does not apply to distributions described in section 312(e).

§ 1.312–3 Liabilities.

The amount of any reductions in earnings and profits described in section 312 (a) or (b) shall be (a) reduced by the amount of any liability to which the property distributed was subject and by the amount of any other liability of the corporation assumed by the shareholder in connection with such distribution, and (b) increased by the amount of gain recognized to the corporation under section 311 (b), (c), or (d), or under section 341(f), 617(d), 1245(a), 1250(a), 1251(c), 1252(a), or 1254(a).

[T.D. 7209, 37 FR 20804, Oct. 5, 1972, as amended by T.D. 8586, 60 FR 2500, Jan. 10, 1995]

§1.312–4 Examples of adjustments provided in section 312(c).

The adjustments provided in section 312(c) may be illustrated by the following examples:

Example (1). On December 2, 1954, Corporation X distributed to its sole shareholder, A, an individual, as a dividend in kind a vacant lot which was not an inventory asset. On that date, the lot had a fair market value of $5,000 and was subject to a mortgage of $2,000. The adjusted basis of the lot was $3,100. The amount of the earnings and profits was $10,000. The amount of the dividend received by A is $3,000 ($5,000, the fair market value, less $2,000, the amount of the mortgage) and the reduction in the earnings and profits of Corporation X is $1,100 ($3,100, the basis, less $2,000, the amount of mortgage).

Example (2). The facts are the same as in *Example (1)* above with the exception that the amount of the mortgage to which the property was subject was $4,000. The amount of the dividend received by A is $1,000, and there is no reduction in the earnings and profits of the corporation as a result of the distribution (disregarding such reduction as may result from an increase in tax to Corporation X because, of gain resulting from the distribution). There is a gain of $900 recognized to Corporation X, the difference between the basis of the property ($3,100) and the amount of the mortgage ($4,000), under section 311(c) and an increase in earnings and profits of $900.

Example (3). Corporation A, having accumulated earnings and profits of $100,000, distributed in kind to its shareholders, not in liquidation, inventory assets which had a basis to it on the ‘‘Lifo’’ method (section 472) of $46,000 and on the basis of cost or market (section 471) of $50,000. The inventory had a fair market value of $55,000 and was subject to a liability of $35,000. This distribution results in a net decrease in earnings and profits of Corporation A of $11,000, (without regard to any tax on Corporation A) computed as follows:

“Fifo” basis of inventory	$50,000	
Less: “Lifo” basis of inventory	46,000	
Gain recognized—addition to earnings and profits (section 311(b))		$4,000
Adjustment to earnings and profits required by section 312(b)(1)(A):		
Fair market value of inventory	$55,000	
Less: “Lifo” basis plus adjustment under section 311(b)	50,000	5,000
Total increase in earnings and profits		9,000
Decrease in earnings and profits—under section 312(b)(1)(B)(i)	$55,000	
Less: Liability assumed	35,000	
Net amount of distribution (decrease in earnings)		20,000
Net decrease in earnings and profits		11,000

§1.312–5 Special rule for partial liquidations and certain redemptions.

The part of the distribution properly chargeable to capital account within the provisions of section 312(e) shall not be considered a distribution of earnings and profits within the meaning of section 301 for the purpose of determining taxability of subsequent distributions by the corporation.

§1.312–6 Earnings and profits.

(a) In determining the amount of earnings and profits (whether of the taxable year, or accumulated since February 28, 1913, or accumulated before March 1, 1913) due consideration must be given to the facts, and, while mere bookkeeping entries increasing or decreasing surplus will not be conclusive, the amount of the earnings and profits in any case will be dependent upon the method of accounting properly employed in computing taxable income (or net income, as the case may be). For instance, a corporation keeping its books and filing its income tax returns under subchapter E, chapter 1 of the Code, on the cash receipts and disbursements basis may not use the accrual basis in determining earnings and profits; a corporation computing income on the installment basis as provided in section 453 shall, with respect to the installment transactions, compute earnings and profits on such basis; and an insurance company subject to taxation under section 831 shall exclude from earnings and profits that portion of any premium which is unearned under the provisions of section 832(b)(4) and which is segregated accordingly in the unearned premium reserve.

(b) Among the items entering into the computation of corporate earnings and profits for a particular period are all income exempted by statute, income not taxable by the Federal Government under the Constitution, as well as all items includible in gross income under section 61 or corresponding provisions of prior revenue acts. Gains and losses within the purview of section 1002 or corresponding provisions of prior revenue acts are brought into the earnings and profits at the time and to the extent such gains and losses are recognized under that section. Interest on State bonds and certain other obligations, although not taxable when received by a corporation, is taxable to the same extent as other dividends when distributed to shareholders in the form of dividends.

(c)(1) In the case of a corporation in which depletion or depreciation is a factor in the determination of income, the only depletion or depreciation deductions to be considered in the computation of the total earnings and profits are those based on cost or other basis without regard to March 1, 1913, value. In computing the earnings and profits for any period beginning after February 28, 1913, the only depletion or depreciation deductions to be considered are those based on (i) cost or other basis, if the depletable or depreciable asset was acquired subsequent to February 28, 1913, or (ii) adjusted cost or March 1, 1913, value, whichever is higher, if acquired before March 1, 1913. Thus, discovery or percentage depletion under all revenue acts for mines and oil and gas wells is not to be taken into consideration in computing the earnings and profits of a corporation. Similarly, where the basis of property in the hands of a corporation is a substituted basis, such basis, and not the fair market value of the property at the time of the acquisition by the corporation, is the basis for computing depletion and depreciation for the purpose of determining earnings and profits of the corporation.

(2) The application of subparagraph (1) of this paragraph may be illustrated by the following example:

Example Oil producing property which A had acquired in 1949 at a cost of $28,000 was transferred to Corporation Y in December 1951, in exchange for all of its capital stock. The fair market value of the stock and of the property as of the date of the transfer was $247,000. Corporation Y, after four years' operation, effected in 1955 a cash distribution to A in the amount of $165,000. In determining the extent to which the earnings and profits of Corporation Y available for dividend distributions have been increased as the result of production and sale of oil, the depletion to be taken into account is to be computed upon the basis of $28,000 established in the nontaxable exchange in 1951 regardless of the fair market value of the property or of the stock issued in exchange therefor.

(d) A loss sustained for a year before the taxable year does not affect the earnings and profits of the taxable year. However, in determining the earnings and profits accumulated since February 28, 1913, the excess of a loss sustained for a year subsequent to February 28, 1913, over the undistributed earnings and profits accumulated since February 28, 1913, and before the year for which the loss was sustained, reduces surplus as of March 1, 1913, to the extent of such excess. If the surplus as of March 1, 1913, was sufficient to absorb such excess, distributions to shareholders after the year of the loss are out of earnings and profits accumulated since the year of the loss to the extent of such earnings.

(e) With respect to the effect on the earnings and profits accumulated since February 28, 1913, of distributions made on or after January 1, 1916, and before August 6, 1917, out of earnings or profits accumulated before March 1, 1913, which distributions were specifically declared to be out of earnings and profits accumulated before March 1, 1913, see section 31(b) of the Revenue Act of 1916, as added by section 1211 of the Revenue Act of 1917 (40 Stat. 336).

§ 1.312–7 Effect on earnings and profits of gain or loss realized after February 28, 1913.

(a) In order to determine the effect on earnings and profits of gain or loss realized from the sale or other disposition (after February 28, 1913) of property by a corporation, section 312(f)(1) prescribed certain rules for—

(1) The computation of the total earnings and profits of the corporation of most frequent application in determining invested capital; and

(2) The computation of earnings and profits of the corporation for any period beginning after February 28, 1913, of most frequent application in determining the source of dividend distributions.

Such rules are applicable whenever under any provision of subtitle A of the Code it is necessary to compute either the total earnings and profits of the corporation or the earnings and profits for any period beginning after February 28, 1913. For example, since the earnings and profits accumulated after

February 28, 1913, or the earnings and profits of the taxable year, are earnings and profits for a period beginning after February 28, 1913, the determination of either must be in accordance with the regulations prescribed by this section for the ascertainment of earnings and profits for any period beginning after February 28, 1913. Under subparagraph (1) of this paragraph, such gain or loss is determined by using the adjusted basis (under the law applicable to the year in which the sale or other disposition was made) for determining gain, but disregarding value as of March 1, 1913. Under subparagraph (2) of this paragraph, there is used such adjusted basis for determining gain, giving effect to the value as of March 1, 1913, whenever applicable. In both cases the rules are the same as those governing depreciation and depletion in computing earnings and profits (see §1.312–6). Under both subparagraphs (1) and (2) of this paragraph, the adjusted basis is subject to the limitations of the third sentence of section 312(f)(1) requiring the use of adjustments proper in determining earnings and profits. The proper adjustments may differ under section 312(f)(1)(A) and (B) depending upon the basis to which the adjustments are to be made. If the application of section 312(f)(1)(B) results in a loss and if the application of section 312(f)(1)(A) to the same transaction reaches a different result, then the loss under section 312(f)(1)(B) will be subject to the adjustment thereto required by section 312(g)(2). (See §1.312–9.)

(b)(1) The gain or loss so realized increases or decreases the earnings and profits to, but not beyond, the extent to which such gain or loss was recognized in computing taxable income (or net income, as the case may be) under the law applicable to the year in which such sale or disposition was made. As used in this paragraph, the term ‘‘recognized’’ has reference to that kind of realized gain or loss which is recognized for income tax purposes by the statute applicable to the year in which the gain or loss was realized. For example, see section 356. A loss (other than a wash sale loss with respect to which a deduction is disallowed under the provisions of section 1091 or corresponding provisions of prior revenue laws) may be recognized though not allowed as a deduction (by reason, for example, of the operation of sections 267 and 1211 and corresponding provisions of prior revenue laws) but the mere fact that it is not allowed does not prevent decrease in earnings and profits by the amount of such disallowed loss. Wash sale losses, however, disallowed under section 1091 and corresponding provisions of prior revenue laws, are deemed nonrecognized losses and do not reduce earnings or profits. The *recognized* gain or loss for the purpose of computing earnings and profits is determined by applying the recognition provisions to the realized gain or loss computed under the provisions of section 312(f)(1) as distinguished from the realized gain or loss used in computing taxable income (or net income, as the case may be).

(2) The application of subparagraph (1) of this paragraph may be illustrated by the following examples:

Example (1). Corporation X on January 1, 1952, owned stock in Corporation Y which it had acquired from Corporation Y in December 1951, in an exchange transaction in which no gain or loss was recognized. The adjusted basis to Corporation X of the property exchanged by it for the stock in Corporation Y was $30,000. The fair market value of the stock in Corporation Y when received by Corporation X was $930,000. On April 9, 1955, Corporation X made a cash distribution of $900,000 and, except for the possible effect of the transaction in 1951, had no earnings or profits accumulated after February 28, 1913, and had no earnings or profits for the taxable year. The amount of $900,000 representing the excess of the fair market value of the stock of Corporation Y over the adjusted basis of the property exchanged therefor was not recognized gain to Corporation X under the provisions of section 112 of the Internal Revenue Code of 1939. Accordingly, the earnings and profits of Corporation X are not increased by $900,000, the amount of the gain realized but not recognized in the exchange, and the distribution was not a taxable dividend. The basis in the hands of Corporation Y of the property acquired by it from Corporation X is $30,000. If such property is thereafter sold by Corporation Y, gain or loss will be computed on such basis of $30,000, and earnings and profits will be increased or decreased accordingly.

Example (2). On January 2, 1910, Corporation M acquired nondepreciable property at a cost of $1,000. On March 1, 1913, the fair market value of such property in the hands of Corporation M was $2,200. On December 31, 1952, Corporation M transfers such property to Corporation N in exchange for $1,900 in cash and all Corporation N's stock, which has a fair market value of $1,100. For the purpose of computing the total earnings and profits of Corporation M, the gain on such transaction is $2,000 (the sum of $1,900 in cash and stock worth $1,100 minus $1,000, the adjusted basis for computing gain, determined without regard to March 1, 1913, value), $1,900 of which is recognized under section 356, since this was the amount of money received, although for the purpose of computing net income the gain is only $800 (the sum of $1,900 in cash and stock worth $1,100, minus $2,200, the adjusted basis for computing gain determined by giving effect to March 1, 1913, value). Such earnings and profits will therefore be increased by only $800 as a reputing the earnings and profits of Corporation M for any period beginning after February 28, 1913, however, the gain arising from the transaction, like the taxable gain, is only $800, all of which is recognized under section 112(c) of the Internal Revenue Code of 1939, the money received being in excess of such amount. Such earnings and profits will therefore be increased by only $800 as a result of the transaction. For increase in that part of the earnings and profits consisting of increase in value of property accrued before, but realized on or after March 1, 1913, see § 1.312–9.

Example (3). On July 31, 1955, Corporation R owned oil-producing property acquired after February 28, 1913, at a cost of $200,000, but having an adjusted basis (by reason of taking percentage depletion) of $100,000 for determining gain. However, the adjusted basis of such property to be used in computing gain or loss for the purpose of earnings and profits is, because of the provisions of the third sentence of section 312(f)(1), $150,000. On such day Corporation R transferred such property to Corporation S in exchange for $25,000 in cash and all of the stock of Corporation S, which had a fair market value of $100,000. For the purpose of computing taxable income, Corporation R has realized a gain of $25,000 as a result of this transaction, all of which is recognized under section 356. For the purpose of computing earnings and profits, however, Corporation R has realized a loss of $25,000, none of which is recognized owing to the provisions of section 356(c). The earnings and profits of Corporation R are therefore neither increased nor decreased as a result of the transaction. The adjusted basis of the Corporation S stock in the hands of Corporation R for purposes of computing earnings and profits, however, will be $125,000 (though only $100,000 for the purpose of computing taxable income), computed as follows:

Basis of property transferred	$200,000
Less money received on exchange	25,000
Plus gain or minus loss recognized on exchange	None
Basis of stock	175,000
Less adjustments (same as those used in determining adjusted basis of property transferred)	50,000
Adjusted basis of stock	125,000

If, therefore, Corporation R should subsequently sell the Corporation S stock for $100,000, a loss of $25,000 will again be realized for the purpose of computing earnings and profits, all of which will be recognized and will be applied to decrease the earnings and profits of Corporation R.

(c)(1) The third sentence of section 312(f)(1) provides for cases in which the adjustments, prescribed in section 1016, to the basis indicated in section 312(f)(1)(A) or (B), as the case may be, differ from the adjustments to such basis proper for the purpose of determining earnings or profits. The adjustments provided by such third sentence reflect the treatment provided by §§ 1.312–6 and 1.312–15 relative to cases where the deductions for depletion and depreciation in computing taxable income (or net income, as the case may be) differ from the deductions proper for the purpose of computing earnings and profits.

(2) The effect of the third sentence of section 312(f)(1) may be illustrated by the following examples:

Example (1). Corporation X purchased on January 2, 1931, an oil lease at a cost of $10,000. The lease was operated only for the years 1931 and 1932. The deduction for depletion in each of the years 1931 and 1932 amounted to $2,750, of which amount $1,750 represented percentage depletion in excess of depletion based on cost. The lease was sold in 1955 for $15,000. Under section 1016(a)(2), in determining the gain or loss from the sale of the property, the basis must be adjusted for cost depletion of $1,000 in 1931 and percentage depletion of $2,750 in 1932. However, the adjustment of such basis, proper for the determination of earnings and profits, is $1,000 for each year, or $2,000. Hence, the cost is to be adjusted only to the extent of $2,000, leaving an adjusted basis of $8,000 and the earnings and profits will be increased by $7,000, and not by $8,750. The difference of $1,750 is equal to the amount by which the percentage depletion for the year 1932 ($2,750) exceeds the depletion on cost for that year ($1,000) and has already been applied in the computation of earnings and profits for the year 1932 by taking into account only $1,000 instead of $2,750 for depletion in the computation of such earnings and profits. (See § 1.316–1.)

Example (2). If, in *Example (1)*, above, the property, instead of being sold, is exchanged in a transaction described in section 1031 for like property having a fair market value of $7,750 and cash of $7,250, then the increase in earnings and profits amounts to $7,000, that is, $15,000 ($7,750 plus $7,250) minus the basis of $8,000. However, in computing taxable income of Corporation X, the gain is $8,750, that is, $15,000 minus $6,250 ($10,000 less depletion of $3,750), of which only $7,250 is recognized because the recognized gain cannot exceed the sum of money received in the transaction. See section 1031(b) and the corresponding provisions of prior revenue laws. If, however, the cash received was only $2,250 and the value of the property received was $12,750, then the increase in earnings and profits would be $2,250, that amount being the gain recognized under section 1031.

Example (3). On January 1, 1973, corporation X purchased for $10,000 a depreciable asset with an estimated useful life of 20 years and no salvage value. In computing depreciation on the asset, corporation X used the declining balance method with a rate twice the straight line rate. On December 31, 1976, the asset was sold for $9,000. Under section 1016(a)(2), the basis of the asset is adjusted for depreciation allowed for the years 1973 through 1976, or a total of $3,439. Thus, X realizes a gain of $2,439 (the excess of the amount realized, $9,000, over the adjusted basis, $6,561). However, the proper adjustment to basis for the purpose of determining earnings and profits is only $2,000, i.e., the total amount which, under §1.312–15, was applied in the computation of earnings and profits for the years 1973–76. Hence, upon sale of the asset, earnings and profits are increased by only $1,000, i.e., the excess of the amount realized, $9,000, over the adjusted basis for earnings and profits purposes, $8,000.

(d) For adjustment and allocation of the earnings and profits of the transferor as between the transferor and the transferee in cases where the transfer of property by one corporation to another corporation results in the nonrecognition in whole or in part of gain or loss, see §1.312–10; and see section 381 for earnings and profits of successor corporations in certain transactions.

[T.D. 6500, 25 FR 11607, Nov. 26, 1960, as amended by T.D. 7221, 37 FR 24746, Nov. 21, 1972]

§1.312–8 Effect on earnings and profits of receipt of tax-free distributions requiring adjustment or allocation of basis of stock.

(a) In order to determine the effect on earnings and profits, where a corporation receives (after February 28, 1913) from a second corporation a distribution which (under the law applicable to the year in which the distribution was made) was not a taxable dividend to the shareholders of the second corporation, section 312(f) prescribes certain rules. It provides that the amount of such distribution shall not increase the earnings and profits of the first or receiving corporation in the following cases: (1) No such increase shall be made in respect of the part of such distribution which (under the law applicable to the year in which the distribution was made) is directly applied in reduction of the basis of the stock in respect of which the distribution was made and (2) no such increase shall be made if (under the law applicable to the year in which the distribution was made) the distribution causes the basis of the stock in respect of which the distribution was made to be allocated between such stock and the property received (or such basis would but for section 307(b) be so allocated). Where, therefore, the law (applicable to the year in which the distribution was made, as, for example, a distribution in 1934 from earnings and profits accumulated before March 1, 1913) requires that the amount of such distribution shall be applied against and reduce the basis of the stock with respect to which the distribution was made, there is no increase in the earnings and profits by reason of the receipt of such distribution. Similarly, where there is received by a corporation a distribution from another corporation in the form of a stock dividend and the law applicable to the year in which such distribution was made requires the allocation, as between the old stock and the stock received as a dividend, of the basis of the old stock (or such basis would but for section 307(b) be so allocated), then there is no increase in the earnings and profits by reason of the receipt of such stock dividend even though such stock dividend constitutes income within the meaning of the sixteenth amendment to the Constitution.

(b) The principles set forth in paragraph (a) of this section may be illustrated by the following examples:

Example (1). Corporation X in 1955 distributed to Corporation Y, one of its shareholders, $10,000 which was out of earnings or profits accumulated before March 1, 1913, and did not exceed the adjusted basis of the stock in respect of which the distribution was made. This amount of $10,000 was, therefore, a tax-free distribution and under the provisions of section 301(c)(2) must be applied against and reduce the adjusted basis of the stock in respect of which the distribution was made. The earnings and profits of Corporation Y are not increased by reason of the receipt of this distribution.

Example (2). Corporation Z in 1955 had outstanding common and preferred stock of which Corporation Y held 100 shares of the common and no preferred. The stock had a cost basis to Corporation Y of $100 per share, or a total cost of $10,000. In December of that year it received a dividend of 100 shares of the preferred stock of Corporation Z. Such distribution is a stock dividend which, under section 305, was not taxable and was accordingly not included in the gross income of Corporation Y. The original cost of $10,000 is allocated to the 200 shares of Corporation Z none of which has been sold or otherwise disposed of by Corporation Y. See section 307 and § 1.307–1. The earnings and profits of Corporation Y are not increased by reason of the receipt of such stock dividend.

§ 1.312–9 Adjustments to earnings and profits reflecting increase in value accrued before March 1, 1913.

(a) In order to determine, for the purpose of ascertaining the source of dividend distributions, that part of the earnings and profits which is represented by increase in value of property accrued before, but realized on or after, March 1, 1913, section 312(g) prescribes certain rules.

(b)(1) Section 312(g)(1) sets forth the general rule with respect to computing the increase to be made in that part of the earnings and profits consisting of increase in value of property accrued before, but realized on or after, March 1, 1913.

(2) The effect of section 312(g)(1) may be illustrated by the following examples:

Example (1). Corporation X acquired nondepreciable property before March 1, 1913, at a cost of $10,000. Its fair market value as of March 1, 1913, was $12,000 and it was sold in 1955 for $15,000. The increase in earnings and profits based on the value as of March 1, 1913, representing earnings and profits accumulated since February 28, 1913, is $3,000. If the basis is determined without regard to the value as of March 1, 1913, there would be an increase in earnings and profits of $5,000. The difference of $2,000 ($5,000 minus $3,000) represents the increase to be made in that part of the earnings and profits of Corporation X consisting of the increase in value of property accrued before, but realized on or after, March 1, 1913.

Example (2). Corporation Y acquired depreciable property in 1908 at a cost of $100,000. Assuming no additions or betterments, and that the depreciation sustained before March 1, 1913, was $10,000, the adjusted cost as of that date was $90,000. Its fair market value as of March 1, 1913, was $94,000 and on February 28, 1955, it was sold for $25,000. For the purpose of determining gain from the sale, the basis of the property is the fair market value of $94,000 as of March 1, 1913, adjusted for depreciation for the period subsequent to February 28, 1913, computed on such fair market value. If the amount of the depreciation deduction allowed after February 28, 1913, and properly allowable for each of such years to the date of the sale in 1955 is the aggregate sum of $81,467, the adjusted basis for determining gain in 1955 ($94,000 less $81,467) is $12,533 and the gain would be $12,467 ($25,000 less $12,533). The increase in earnings and profits accumulated since February 28, 1913, by reason of the sale, based on the value as of March 1, 1913, adjusted for depreciation is $12,467. If the depreciation since February 28, 1913, had been based on the adjusted cost of $90,000 ($100,000 less $10,000) instead of the March 1, 1913, value of $94,000, the depreciation sustained from that date to the date of sale would have been $78,000 instead of $81,467 and the actual gain on the sale based on the cost of $100,000 adjusted by depreciation on such cost to $12,000 ($100,000 reduced by the sum of $10,000 and $78,000) would be $13,000 ($25,000 less $12,000). If the adjusted basis of the property was determined without regard to the value as of March 1, 1913, there would be an increase in earnings and profits of $13,000. The difference of $533 ($13,000 minus $12,467) represents the increase to be made in that part of the earnings and profits of Corporation Y consisting of the increase in value of property accrued before, but realized on or after, March 1, 1913 (assuming that the proper increase in such surplus had been made each year for the difference between depreciation based on cost and the depreciation based on March 1, 1913, value). Thus, the total increase in that part of earnings and profits consisting of the increase in value of property accrued before, but realized on or after, March 1, 1913, is $4,000 ($94,000 less $90,000).

(c)(1) Section 312(g)(2) is an exception to the general rule in section 312(g)(1) and also operates as a limitation on the application of section 312(f). It provides that, if the application of section 312(f)(1)(B) to a sale or other disposition after February 28, 1913, results in a loss which is to be applied in decrease of earnings and profits for any period beginning after February 28, 1913, then, notwithstanding section 312(f) and in lieu of the rule provided in section 312(g)(1), the amount of such loss so to be applied shall be reduced by the amount, if any, by which the adjusted basis of the property used in determining the loss, exceeds the adjusted basis computed without regard to the fair market value of the property on March 1, 1913. If the amount so applied in reduction of the loss exceeds such loss, the excess over such loss shall increase that part of the earnings and profits consisting of increase in value of property accrued before, but realized on or after March 1, 1913.

(2) The application of section 312(g)(2) may be illustrated by the following examples:

Example (1). Corporation Y acquired non-depreciable property before March 1, 1913, at a cost of $8,000. Its fair market value as of March 1, 1913, was $13,000, and it was sold in 1955 for $10,000. Under section 312(f)(1)(B) the adjusted basis would be $13,000 and there would be a loss of $3,000. The application of section 312(f)(1)(B) would result in a loss from the sale in 1955 to be applied in decrease of earnings and profits for that year. Section 312(g)(2), however, applies and the loss of $3,000 is reduced by the amount by which the adjusted basis of $13,000 exceeds the cost of $8,000 (the adjusted basis computed without regard to the value on March 1, 1913), namely $5,000. The amount of the loss is, accordingly, reduced from $3,000 to zero and there is no decrease in earnings and profits of Corporation Y for the year 1955 as a result of the sale. The amount applied in reduction of the decrease, namely, $5,000, exceeds $3,000. Accordingly, as a result of the sale the excess of $2,000 increases that part of the earnings and profits of Corporation Y consisting of increase in value of property accrued before, but realized on or after March 1, 1913.

Example (2). Corporation Z acquired non-depreciable property before March 1, 1913, at a cost of $10,000. Its fair market value as of March 1, 1913, was $12,000, and it was sold in 1955 for $8,000. Under section 312(f)(1)(B) the adjusted basis would be $12,000 and there would be a loss of $4,000. The application of section 312(f)(1)(B) would result in a loss from the sale in 1955 to be applied in decrease of earnings and profits for that year. Section 312(g)(2), however, applies and the loss of $4,000 is reduced by the amount by which the adjusted basis of $12,000 exceeds the cost of $10,000 (the adjusted basis computed without regard to the value on March 1, 1913), namely, $2,000. The amount of the loss is, accordingly, reduced from $4,000 to $2,000 and the decrease in earnings and profits of Corporation Z for the year 1955 as a result of the sale is $2,000 instead of $4,000. The amount applied in reduction of the decrease, namely, $2,000, does not exceed $4,000. Accordingly, as a result of the sale there is no increase in that part of the earnings and profits of Corporation Z consisting of increase in value of property accrued before, but realized on or after, March 1, 1913.

§1.312–10 Allocation of earnings in certain corporate separations.

(a) If one corporation transfers part of its assets constituting an active trade or business to another corporation in a transaction to which section 368(a)(1)(4) applies and immediately thereafter the stock and securities of the controlled corporation are distributed in a distribution or exchange to which section 355 (or so much of section 356 as relates to section 355) applies, the earnings and profits of the distributing corporation immediately before the transaction shall be allocated between the distributing corporation and the controlled corporation. In the case of a newly created controlled corporation, such allocation generally shall be made in proportion to the fair market value of the business or businesses (and interests in any other properties) retained by the distributing corporation and the business or businesses (and interests in any other properties) of the controlled corporation immediately after the transaction. In a proper case, allocation shall be made between the distributing corporation and the controlled corporation in proportion to the net basis of the assets transferred and of the assets retained or by such other method as may be appropriate under the facts and circumstances of the case. The term *net basis* means the basis of the assets less liabilities assumed or liabilities to which such assets are subject. The part of the earnings and profits of the taxable year of the distributing corporation in which the transaction occurs allocable to the controlled corporation shall be included in the computation of the earnings and profits of the first taxable year of the controlled corporation ending after the date of the transaction.

(b) If a distribution or exchange to which section 355 applies (or so much of section 356 as relates to section 355) is not in pursuance of a plan meeting the requirements of a reorganization as defined in section 368(a)(1)(D), the earnings and profits of the distributing corporation shall be decreased by the lesser of the following amounts:

(1) The amount by which the earnings and profits of the distributing corporation would have been decreased if it had transferred the stock of the controlled corporation to a new corporation in a reorganization to which section 368(a)(1)(D) applied and immediately thereafter distributed the stock of such new corporation or,

(2) The net worth of the controlled corporation. (For this purpose the term *net worth* means the sum of the basis of all of the properties plus cash minus all liabilities.)

If the earnings and profits of the controlled corporation immediately before the transaction are less than the amount of the decrease in earnings and profits of the distributing corporation (including a case in which the controlled corporation has a deficit) the earnings and profits of the controlled corporation, after the transaction, shall be equal to the amount of such decrease. If the earnings and profits of the controlled corporation immediately before the transaction are more than the amount of the decrease in the earnings and profits of the distributing corporation, they shall remain unchanged.

(c) In no case shall any part of a deficit of a distributing corporation within the meaning of section 355 be allocated to a controlled corporation.

§ 1.312–11 Effect on earnings and profits of certain other tax-free exchanges, tax-free distributions, and tax-free transfers from one corporation to another.

(a) If property is transferred by one corporation to another, and, under the law applicable to the year in which the transfer was made, no gain or loss was recognized (or was recognized only to the extent of the property received other than that permitted by such law to be received without the recognition of gain), then proper adjustment and allocation of the earnings and profits of the transferor shall be made as between the transferor and the transferee. Transfers to which the preceding sentence applies include contributions to capital, transfers under section 351, transfers in connection with reorganizations under section 368, transfers in liquidations under section 332 and intercompany transfers during a period of affiliation. However, if, for example, property is transferred from one corporation to another in a transaction under section 351 or as a contribution to capital and the transfer is not followed or preceded by a reorganization, a transaction under section 302(a) involving a substantial part of the transferor's stock, or a total or partial liquidation, then ordinarily no allocation of the earnings and profits of the transferor shall be made. For specific rules as to allocation of earnings and profits in certain reorganizations under section 368 and in certain liquidations under section 332 see section 381 and the regulations thereunder. For allocation of earnings and profits in certain corporate separations see section 312(i) and § 1.312–10.

(b) The general rule provided in section 316 that every distribution is made out of earnings or profits to the extent thereof and from the most recently accumulated earnings or profits does not apply to:

(1) The distribution, in pursuance of a plan of reorganization, by or on behalf of a corporation a party to the reorganization, or in a transaction subject to section 355, to its shareholders—

(i) Of stock or securities in such corporation or in another corporation a party to the reorganization in any taxable year beginning before January 1, 1934, without the surrender by the distributees of stock or securities in such corporation (see section 112(g) of the Revenue Act of 1932 (47 Stat. 197)); or

(ii) Of stock (other than preferred stock) in another corporation which is a party to the reorganization without the surrender by the distributees of stock in the distributing corporation if the distribution occurs after October 20, 1951, and is subject to section 112(b)(11) of the Internal Revenue Code of 1939; or

(iii) Of stock or securities in such corporation or in another corporation a party to the reorganization in any taxable year beginning before January 1, 1939, or on or after such date, in exchange for its stock or securities in a transaction to which section 112(b)(3) of the Internal Revenue Code of 1939 was applicable; or

(iv) Of stock or securities in such corporation or in another corporation in exchange for its stock or securities in a transaction subject to section 354 or 355,

if no gain to the distributees from the receipt of such stock or securities was recognized by law.

(2) The distribution in any taxable year (beginning before January 1, 1939, or on or after such date) of stock or securities, or other property or money, to a corporation in complete liquidation of another corporation, under the circumstances described in section 112(b)(6) of the Revenue Act of 1936 (49 Stat. 1679), the Revenue Act of 1938 (52 Stat. 485), of the Internal Revenue Code of 1939, or section 332 of the Internal Revenue Code of 1954.

(3) The distribution in any taxable year (beginning after December 31, 1938), of stock or securities, or other property or money, in the case of an exchange or distribution described in section 371 of the Internal Revenue Code of 1939 or in section 1081 of the Internal Revenue Code of 1954 (relating to exchanges and distributions in obedience to orders of the Securities and Exchange Commission), if no gain to the distributee from the receipt of such stock, securities, or other property or money was recognized by law.

(4) A stock dividend which was not subject to tax in the hands of the distributee because either it did not constitute income to him within the meaning of the sixteenth amendment to the Constitution or because exempt to him under section 115(f) of the Revenue Act of 1934 (48 Stat. 712) or a corresponding provision of a prior Revenue Act, or section 305 of the Code.

(5) The distribution, in a taxable year of the distributee beginning after December 31, 1931, by or on behalf of an insolvent corporation, in connection with a section 112(b)(10) reorganization under the Internal Revenue Code of 1939, or in a transaction subject to section 371 of the Internal Revenue Code of 1954, of stock or securities in a corporation organized or made use of to effectuate the plan of reorganization, if under section 112(e) of the Internal Revenue Code of 1939 or section 371 of the Internal Revenue Code of 1954 no gain to the distributee from the receipt of such stock or securities was recognized by law.

(c) A distribution described in paragraph (b) of this section does not diminish the earnings or profits of any corporation. In such cases, the earnings or profits remain intact and available for distribution as dividends by the corporation making such distribution, or by another corporation to which the earnings or profits are transferred upon such reorganization or other exchange. In the case, however, of amounts distributed in liquidation (other than a taxfree liquidation or reorganization described in paragraph (b)(1), (2), (3), or (5) of this section) the earnings or profits of the corporation making the distribution are diminished by the portion of such distribution properly chargeable to earnings or profits accumulated after February 28, 1913, after first deducting from the amount of such distribution the portion thereof allocable to capital account.

(d) For the purposes of this section, the terms *reorganization* and *party to the reorganization* shall, for any taxable year beginning before January 1, 1934, have the meanings assigned to such terms in section 112 of the Revenue Act of 1932 (47 Stat. 196); for any taxable year beginning after December 31, 1933, and before January 1, 1936, have the meanings assigned to such terms in section 112 of the Revenue Act of 1934 (48 Stat. 704); for any taxable year beginning after December 31, 1935, and before January 1, 1938, have the meanings assigned to such terms in section 112 of the Revenue Act of 1936 (49 Stat. 1678); for any taxable year beginning after December 31, 1937, and before January 1, 1939, have the meanings assigned to such terms in section 112 of the Revenue Act of 1938 (52 Stat. 485); and for any taxable year beginning after December 31, 1938, and ending before June 22, 1954, providing no election is made under section 393(b)(2) of the Internal Revenue Code of 1954, have the meanings assigned to such terms in section 112(g)(1) of the Internal Revenue Code of 1939.

§ 1.312–12 Distributions of proceeds of loans guaranteed by the United States.

(a) The provisions of section 312(j) are applicable with respect to a loan, any portion of which is guaranteed by an agency of the United States Government without regard to the percentage of such loan subject to such guarantee.

(b) The application of section 312(j) is illustrated by the following example:

Example. Corporation A borrowed $1,000,000 for the purpose of construction of an apartment house, the cost and adjusted basis of which was $900,000. This loan was guaranteed by an agency of the United States Government. One year after such loan was made and after the completion of construction of the building (but before such corporation had received any income) it distributed $100,000 cash to its shareholders. The earnings and profits of the taxable year of such corporation are increased (pursuant to section 312(j)) by $100,000 immediately prior to such distribution and are decreased by $100,000 immediately after such distribution. Such decrease, however, does not reduce the earnings and profits below zero. Two years later, it has no accumulated earnings and has earnings of the taxable year of $100,000. Before it has made any payments on the loan, it distributes $200,000 to its shareholders. The earnings and profits of the taxable year of the corporation ($100,000) are increased by $100,000, the excess of the amount of the guaranteed loan over the adjusted basis of the apartment house (calculated without adjustment for depreciation). The entire amount of each distribution is treated as a distribution out of earnings and profits and, accordingly, as a taxable dividend.

§ 1.312–15 Effect of depreciation on earnings and profits.

(a) *Depreciation for taxable years beginning after June 30, 1972*—(1) *In general.* Except as provided in subparagraph (2) of this paragraph and paragraph (c) of this section, for purposes of computing the earnings and profits of a corporation (including a real estate investment trust as defined in section 856) for any taxable year beginning after June 30, 1972, the allowance for depreciation (and amortization, if any) shall be deemed to be the amount which would be allowable for such year if the straight line method of depreciation had been used for all property for which depreciation is allowable for each taxable year beginning after June 30, 1972. Thus, for taxable years beginning after June 30, 1972, in determining the earnings and profits of a corporation, depreciation must be computed under the straight line method, notwithstanding that in determining taxable income the corporation uses an accelerated method of depreciation described in subparagraph (A), (B), or (C) of section 312(m)(2) or elects to amortize the basis of property under section 169, 184, 187, or 188, or any similar provision.

(2) *Exception.* (i) If, for any taxable year beginning after June 30, 1972, a method of depreciation is used by a corporation in computing taxable income which the Secretary or his delegate has determined results in a reasonable allowance under section 167(a) and which is not a declining balance method of depreciation (described in § 1.167(b)–2), the sum of the years-digits method (described in § 1.167(b)–3), or any other method allowed solely by reason of the application of subsection (b)(4) or (j)(1)(C) of section 167, then the adjustment to earnings and profits for depreciation for such year shall be determined under the method so used (in lieu of the straight line method).

(ii) The Commissioner has determined that the ‘‘unit of production’’ (see §1.167(b)–0(b)), and the ‘‘machine hour’’ methods of depreciation, when properly used under appropriate circumstances, meet the requirements of subdivision (i) of this subparagraph. Thus, the adjustment to earnings and profits for depreciation (for the taxable year for which either of such methods is properly used under appropriate circumstances) shall be determined under whichever of such methods is used to compute taxable income.

(3) *Determinations under straight line method.* (i) In the case of property with respect to which an allowance for depreciation is claimed in computing taxable income, the determination of the amount which would be allowable under the straight line method shall be

based on the manner in which the corporation computes depreciation in determining taxable income. Thus, if an election under §1.167(a)–11 is in effect with respect to the property, the amount of depreciation which would be allowable under the straight line method shall be determined under §1.167(a)–11(g)(3). On the other hand, if property is not depreciated under the provisions of §1.167(a)–11, the amount of depreciation which would be allowable under the straight line method shall be determined under §1.167(b)–1. Any election made under section 167(f), with respect to reducing the amount of salvage value taken into account in computing the depreciation allowance for certain property, or any convention adopted under §1.167(a)–10(b) or §1.167(a)–11(c)(2), with respect to additions and retirements from multiple asset accounts, which is used in computing depreciation for taxable income shall be used in computing depreciation for earnings and profits purposes.

(ii) In the case of property with respect to which an election to amortize is in effect under section 169, 184, 187, or 188, or any similar provision, the amount which would be allowable under the straight line method of depreciation shall be determined under the provisions of §1.167(b)–1. Thus, the cost or other basis of the property, less its estimated salvage value, is to be deducted in equal annual amounts over the period of the estimated useful life of the property. In computing the amount of depreciation for earnings and profits purposes, a taxpayer may utilize the provisions of section 167(f) (relating to the reduction in the amount of salvage value taken into account in computing the depreciation allowance for certain property) and any convention which could have been adopted for such property under §1.167(a)–10(b) (relating to additions and retirements from multiple asset accounts).

(b) *Transitional rules*—(1) *Depreciation*. If, for the taxable year which includes June 30, 1972, (i) the allowance for depreciation of any property is computed under a method other than the straight line method or a method described in paragraph (a)(2) of this section, and (ii) paragraph (a)(1) of this section applies to such property for the first taxable year beginning after June 30, 1972, then adjustments to earnings and profits for depreciation of such property for taxable years beginning after June 30, 1972, shall be determined as if the corporation changed to the straight line method with respect to such property as of the first day of the first taxable year beginning after June 30, 1972. Thus, if an election under §1.167 (a)–11 is in effect with respect to the property, the change shall be made under the provisions of §1.167(a)–11(c)(1)(iii), except that no statement setting forth the vintage accounts for which the change is made shall be furnished with the income tax return of the year of change if the change is only for purposes of computing earnings and profits. In all other cases, the unrecovered cost or other basis of the property (less a reasonable estimate for salvage) as of such first day shall be recovered through equal annual allowances over the estimated remaining useful life determined in accordance with the circumstances existing at that time. See paragraph (a)(3)(i) of this section for rules relating to the applicability of section 167(f) in determining salvage value.

(2) *Amortization*. If, for the taxable year which includes June 30, 1972, the basis of any property is amortized under section 169, 184, 187, or 188, or any similar provision, then adjustments to earnings and profits for depreciation or amortization of such property for taxable years beginning after June 30, 1972, shall be determined as if the unrecovered cost or other basis of the property (less a reasonable estimate for salvage) as of the first day of the first taxable year beginning after June 30, 1972, were recovered through equal annual allowances over the estimated remaining useful life of the property determined in accordance with the circumstances existing at that time. See paragraph (a)(3)(ii) of this section for rules relating to the applicability of section 167(f).

(c) *Certain foreign corporations*. Paragraphs (a) and (b) of this section shall not apply in computing the earnings and profits of a foreign corporation for any taxable year for which less than 20 percent of the gross income from all sources of such corporation is derived from sources within the United States.

(d) *Books and records.* Wherever different methods of depreciation are used for taxable income and earnings and profits purposes, records shall be maintained which show the depreciation taken for earnings and profits purposes each year and which will allow computation of the adjusted basis of the property in each account using the depreciation taken for earnings and profits purposes.

[T.D. 7221, 37 FR 24746, Nov. 21, 1972]

DEFINITIONS; CONSTRUCTIVE OWNERSHIP OF STOCK

§ 1.316–1 Dividends.

(a)(1) The term *dividend* for the purpose of subtitle A of the Code (except when used in subchapter L, chapter 1 of the Code, in any case where the reference is to dividends and similar distributions of insurance companies paid to policyholders as such) comprises any distribution of property as defined in section 317 in the ordinary course of business, even though extraordinary in amount, made by a domestic or foreign corporation to its shareholders out of either—

(i) Earnings and profits accumulated since February 28, 1913, or

(ii) Earnings and profits of the taxable year computed without regard to the amount of the earnings and profits (whether of such year or accumulated since February 28, 1913) at the time the distribution was made.

The earnings and profits of the taxable year shall be computed as of the close of such year, without diminution by reason of any distributions made during the taxable year. For the purpose of determining whether a distribution constitutes a dividend, it is unnecessary to ascertain the amount of the earnings and profits accumulated since February 28, 1913, if the earnings and profits of the taxable year are equal to or in excess of the total amount of the distributions made within such year.

(2) Where a corporation distributes property to its shareholders on or after June 22, 1954, the amount of the distribution which is a dividend to them may not exceed the earnings and profits of the distributing corporation.

(3) The rule of (2) above may be illustrated by the following example:

Example X and Y, individuals, each own one-half of the stock of Corporation A which has earnings and profits of $10,000. Corporation A distributes property having a basis of $6,000 and a fair market value of $16,000 to its shareholders, each shareholder receiving property with a basis of $3,000 and with a fair market value of $8,000 in a distribution to which section 301 applies. The amount taxable to each shareholder as a dividend under section 301(c) is $5,000.

(b)(1) In the case of a corporation which, under the law applicable to the taxable year in which a distribution is made, is a personal holding company or which, for the taxable year in respect of which a distribution is made under section 563 (relating to dividends paid within 2 1/2 months after the close of the taxable year), or section 547 (relating to deficiency dividends), or corresponding provisions of a prior income tax law, was under the applicable law a personal holding company, the term *dividend*, in addition to the meaning set forth in the first sentence of section 316, also means a distribution to its shareholders as follows: A distribution within a taxable year of the corporation, or of a shareholder, is a dividend to the extent of the corporation's undistributed personal holding company income (determined under section 545 without regard to distributions under section 316(b)(2)) for the taxable year in which, or, in the case of a distribution under section 563 or section 547, the taxable year in respect of which, the distribution was made. This subparagraph does not apply to distributions in partial or complete liquidation of a personal holding company. In the case of certain complete liquidations of a personal holding company see subparagraph (2) of this paragraph.

(2) In the case of a corporation which, under the law applicable to the taxable year in which a distribution is made, is a personal holding company or which, for the taxable year in respect of which a distribution is made under section 563, or section 547, or corresponding provisions of a prior income tax law, was under the applicable law a personal holding company, the term *dividend*, in addition to the meaning set forth in the first sentence of section 316, also

means, in the case of a complete liquidation occurring within 24 months after the adoption of a plan of liquidation, a distribution of property to its shareholders within such period, but—

(i) Only to the extent of the amounts distributed to distributees other than corporate shareholders, and

(ii) Only to the extent that the corporation designates such amounts as a dividend distribution and duly notifies such distributees in accordance with subparagraph (5) of this paragraph, but

(iii) Not in excess of the sum of such distributees' allocable share of the undistributed personal holding company income for such year (determined under section 545 without regard to sections 562(b) and 316(b)(2)(B)).

Section 316(b)(2)(B) and this subparagraph apply only to distributions made in any taxable year of the distributing corporation beginning after December 31, 1963. The amount designated with respect to a noncorporate distributee may not exceed the amount actually distributed to such distributee. For purposes of determining a noncorporate distributee's gain or loss on liquidation, amounts distributed in complete liquidation to such distributee during a taxable year are reduced by the amounts designated as a dividend with respect to such distributee for such year. For purposes of section 333(e)(1), a shareholder's ratable share of the earnings and profits of the corporation accumulated after February 28, 1913, shall be reduced by the amounts designated as a dividend with respect to such shareholder (even though such designated amounts are distributed during the 1-month period referred to in section 333).

(3) For purposes of subparagraph (2)(iii) of this paragraph—

(i) Except as provided in subdivision (ii) of this subparagraph, the sum of the noncorporate distributees' allocable share of undistributed personal holding company income for the taxable year in which, or in respect of which, the distribution was made (computed without regard to sections 562(b) and 316(b)(2)(B)) shall be determined by multiplying such undistributed personal holding company income by the ratio which the aggregate value of the stock held by all noncorporate shareholders immediately before the record date of the last liquidating distribution in such year bears to the total value of all stock outstanding on such date. For rules applicable in a case where the distributing corporation has more than one class of stock, see subdivision (iii) of this subparagraph.

(ii) If more than one liquidating distribution was made during the year, and if, after the record date of the first distribution but before the record date of the last distribution, there was a change in the relative shareholdings as between noncorporate shareholders and corporate shareholders, then the sum of the noncorporate distributees' allocable share of undistributed personal holding company income for the taxable year in which, or in respect of which, the distributions were made (computed without regard to sections 562(b) and 316(b)(2)(B)) shall be determined as follows:

(*a*) First, allocate the corporation's undistributed personal holding company income among the distributions made during the taxable year by reference to the ratio which the aggregate amount of each distribution bears to the total amount of all distributions during such year;

(*b*) Second, determine the noncorporate distributees' allocable share of the corporation's undistributed personal holding company income for each distribution by multiplying the amount determined under (*a*) of this subdivision (ii) for each distribution by the ratio which the aggregate value of the stock held by all noncorporate shareholders immediately before the record date of such distribution bears to the total value of all stock outstanding on such date; and

(*c*) Last, determine the sum of the noncorporate distributees' allocable share of the corporation's undistributed personal holding company income for all such distributions.

For rules applicable in a case where the distributing corporation has more than one class of stock, see subdivision (iii) of this subparagraph.

(iii) Where the distributing corporation has more than one class of stock—

(*a*) The undistributed personal holding company income for the taxable year in which, or in respect of which the distribution was made shall be treated as a fund from which dividends may properly be paid and shall be allocated between or among the classes of stock in a manner consistent with the dividend rights of such classes under local law and the pertinent governing instruments, such as, for example, the distributing corporation's articles or certificate of incorporation and bylaws;

(*b*) The noncorporate distributees' allocable share of the undistributed personal holding company income for each class of stock shall be determined separately in accordance with the rules set forth in subdivisions (i) or (ii) of this subparagraph, as if each class of stock were the only class of stock outstanding; and

(*c*) The sum of the noncorporate distributees' allocable share of the undistributed personal holding company income for the taxable year in which, or in respect of which, the distribution was made shall be the sum of the noncorporate distributees' allocable share of the undistributed personal holding company income for all classes of stock.

(iv) For purposes of this subparagraph, in any case where the record date of a liquidating distribution cannot be ascertained, the record date of the distribution shall be the date on which the liquidating distribution was actually made.

(4) The amount designated as a dividend to a noncorporate distributee for any taxable year of the distributing corporation may not exceed an amount equal to the sum of the noncorporate distributees' allocable share of undistributed personal holding company income (as determined under subparagraph (3) of this paragraph) for such year multiplied by the ratio which the aggregate value of the stock held by such distributee immediately before the record date of the liquidating distribution or, if the record date cannot be ascertained, immediately before the date on which the liquidating distribution was actually made, bears to the aggregate value of stock outstanding held by all noncorporate distributees on such date. In any case where more than one liquidating distribution is made during the taxable year, the aggregate amount which may be designated as a dividend to a noncorporate distributee for such year may not exceed the aggregate of the amounts determined by applying the principle of the preceding sentence to the amounts determined under subparagraphs (3)(ii)(*a*) and (*b*) of this paragraph for each distribution. Where the distributing corporation has more than one class of stock, the limitation on the amount which may be designated as a dividend to a noncorporate distributee for any taxable year shall be determined by applying the rules of this subparagraph separately with respect to the noncorporate distributees' allocable share of the undistributed personal holding company income for each class of stock (as determined under subparagraphs (3)(iii)(*a*) and (*b*) of this paragraph).

(5) A corporation may designate as a dividend to a shareholder all or part of a distribution in complete liquidation described in section 316(b)(2)(B) of this paragraph by:

(i) Claiming a dividends paid deduction for such amount in its return for the year in which, or in respect of which, the distribution is made,

(ii) Including such amount as a dividend in Form 1099 filed in respect of such shareholder pursuant to section 6042(a) and the regulations thereunder and in a written statement of dividend payments furnished to such shareholder pursuant to section 6042(c) and § 1.6042–4, and

(iii) Indicating on the written statement of dividend payments furnished to such shareholder the amount included in such statement which is designated as a dividend under section 316(b)(2)(B) and this paragraph.

If a corporation complies with the procedure prescribed in the preceding sentence, it satisfies both the designation and notification requirements of section 316(b)(2)(B)(ii) and paragraph (b)(2)(ii) of this section. An amount designated as a dividend shall not be included as a distribution in liquidation on Form 1099L filed pursuant to § 1.6043–2 (relating to returns of information respecting distributions in liquidation). If a corporation designates a dividend in accordance with this subparagraph, it shall attach to the return in which it claims a deduction for such designated dividend a schedule indicating all facts necessary to determine the sum of the noncorporate distributees' allocable share of undistributed personal holding company income (determined in accordance with subparagraph (3) of this paragraph) for the year in which, or in respect of which, the distribution is made.

(c) Except as provided in section 316(b)(1), the term *dividend* includes any distribution of property to shareholders to the extent made out of accumulated or current earnings and profits. See, however, section 331 (relating to distributions in complete or partial liquidation), section 301(e) (relating to distributions by personal service corporations), section 302(b) (relating to redemptions treated as amounts received from the sale or exchange of stock), and section 303 (relating to distributions in redemption of stock to pay death taxes). See also section 305(b) for certain distributions of stock or stock rights treated as distributions of property.

(d) In the case of a corporation which, under the law applicable to the taxable year in respect of which a distribution is made under section 860 (relating to deficiency dividends), was a regulated investment company (within the meaning of section 851), or a real estate investment trust (within the meaning of section 856), the term *dividend*, in addition to the meaning set forth in paragraphs (a) and (b) of section 316, means a distribution of property to its shareholders which constitutes a ''deficiency dividend'' as defined in section 860(f).

(e) The application of section 316 may be illustrated by the following examples:

Example (1). At the beginning of the calendar year 1955, Corporation M had an operating deficit of $200,000 and the earnings and profits for the year amounted to $100,000. Beginning on March 16, 1955, the corporation made quarterly distributions of $25,000 during the taxable year to its shareholders. Each distribution is a taxable dividend in full, irrespective of the actual or the pro rata amount of the earnings and profits on hand at any of the dates of distribution, since the total distributions made during the year ($100,000) did not exceed the total earnings and profits of the year ($100,000).

Example (2). At the beginning of the calendar year 1955, Corporation N, a personal holding company, had no accumulated earnings and profits. During that year it made no earnings and profits but, due to the disallowance of certain deductions, its undistributed personal holding company income (determined under section 545 without regard to distributions under section 316(b)(2)) was $16,000. It distributed to shareholders on December 15, 1955, $15,000, and on February 1, 1956, $1,000, the latter amount being claimed as a deduction under section 563 in its personal holding company schedule for 1955 filed with its return for 1955 on March 15, 1956. Both distributions are taxable dividends in full, since they do not exceed the undistributed personal holding company income (determined without regard to such distributions) for 1955, the taxable year in which the distribution of $15,000 was made and with respect to which the distribution of $1,000 was made. It is immaterial whether Corporation N is a personal holding company for the taxable year 1956 or whether it had any income for that year.

Example (3). In 1959, a deficiency in personal holding company tax was established against Corporation O for the taxable year 1955 in the amount of $35,500 based on an undistributed personal holding company income of $42,000. Corporation O complied with the provisions of section 547 and in December 1959 distributed $42,000 to its stockholders as ''deficiency dividends.'' The distribution of $42,000 is a taxable dividend since it does not exceed $42,000 (the undistributed personal holding company income for 1955, the taxable year with respect to which the distribution was made). It is immaterial whether Corporation O is a personal holding company for the taxable year 1959 or whether it had any income for that year.

Example (4). At the beginning of the taxable year 1955, Corporation P, a personal holding company, had a deficit in earnings and profits of $200,000. During that year it made earnings and profits of $90,000. For that year, however, it had an undistributed personal holding income (determined under section 545 without regard to distributions under section 316(b)(2)) of $80,000. During such taxable year it distributed to its shareholders $100,000. The distribution of $100,000 is a taxable dividend to the extent of $90,000 since its earnings and profits for that year, $90,000, exceed $80,000, the undistributed personal holding company income determined without regard to such distribution.

Example (5). Corporation O, a calendar year taxpayer, is completely liquidated on December 31, 1964, pursuant to a plan of liquidation adopted July 1, 1964. No distributions in liquidation were made pursuant to the plan of liquidation adopted July 1, 1964, until the distribution in complete liquidation on December 31, 1964. Corporation O has undistributed personal holding company income of $300,000 for the year 1964 (computed without regard to section 562(b) or section 316(b)(2)(B)). On December 31, 1964, immediately before the record date of the distribution in complete liquidation, individual A owns 200 shares of Corporation O's outstanding stock and Corporation P owns the remaining 100 shares of outstanding stock. All shares are equal in value. The noncorporate distributees' allocable share of undistributed personal holding company income for 1964 is $200,000

200 shares÷300 shares × $300,000.

If at least $200,000 is distributed to A in the liquidation, then Corporation O may designate $200,000 to A as a dividend in accordance with paragraph (b)(5) of this section, and, if such amount is designated, then A must treat $200,000 as a dividend to which section 301 applies. For an example of the treatment of the distribution to Corporation P see paragraph (b)(2)(iii) of § 1.562–1.

Example (6). Corporation Q, a calendar year taxpayer, is completely liquidated on December 31, 1964, pursuant to a plan of liquidation adopted July 1, 1964. No distributions in liquidation were made pursuant to the plan of liquidation adopted July 1, 1964, until the distribution in complete liquidation on December 31, 1964. Corporation Q has undistributed personal holding company income of $40,000 for the year 1964 (computed without regard to section 562(b) or section 316(b)(2)(B)). On December 31, 1964, immediately before the record date of the distribution in complete liquidation, Corporation Q has outstanding 300 shares of common stock and 100 shares of noncumulative preferred stock. Corporation Q's articles of incorporation provide that the preferred stock is entitled to dividends of $10 per share per year. Of Corporation Q's stock, individual B owns 200 shares of the common stock and 50 shares of the preferred stock, and Corporation R owns all remaining shares. All of the common shares are equal in value, and all of the preferred shares are equal in value. No dividends had been paid on the preferred stock during the year 1964. Of the $40,000 of undistributed personal holding company income, $1,000 must be allocated to the preferred stock because of the rights of the holders of such stock, under Q's articles of incorporation, to receive that amount in dividends for the year 1964. The noncorporate distributees' allocable share of undistributed personal holding company income for 1964 is $26,500.

50 preferred shares÷100 preferred shares×$1,000+200 common shares ÷ 300 common shares×$39,000

If at least $26,500 is distributed to B in the liquidation, then corporation Q may designate $26,500 to B as a dividend in accordance with paragraph (b)(5) of this section, and, if such amount is designated, then B must treat $26,500 as a dividend to which section 301 applies.

Example (7). In 1979, a deficiency of $46,000 in the tax on real estate investment trust taxable income is established against corporation R for the taxable year 1977, based on an increase in real estate investment trust taxable income of $100,000. Corporation R complied with the provisions of section 860 and in December 1979 distributed to its stockholders $100,000, which qualified as ''deficiency dividends'' under section 860. The distribution of $100,000 is a taxable dividend. It is immaterial whether corporation R is a real estate investment trust for the taxable year 1979 or whether it had accumulated or current earnings and profits in 1979. See section 316(b)(3).

(Sec. 860(l) (92 Stat. 2849, 26 U.S.C. 860(l)); sec. 860(g) (92 Stat. 2850, 26 U.S.C. 860(g)); and sec. 7805 (68A Stat. 917, 26 U.S.C. 7805))

[T.D. 6500, 25 FR 11607, Nov. 26, 1960, as amended by T.D. 6625, 27 FR 12541, Dec. 19, 1962; T.D. 6949, 33 FR 5519, Apr. 9, 1968; T.D. 7767, 46 FR 11264, Feb. 6, 1981; T.D. 7936, 49 FR 2105, Jan. 18, 1984]

§ 1.316–2 Sources of distribution in general.

(a) For the purpose of income taxation every distribution made by a corporation is made out of earnings and profits to the extent thereof and from the most recently accumulated earnings and profits. In determining the source of a distribution, consideration should be given first, to the earnings and profits of the taxable year; second, to the earnings and profits accumulated since February 28, 1913, only in the case where, and to the extent that, the distributions made during the taxable year are not regarded as out of the earnings and profits of that year; third, to the earnings and profits accumulated before March 1, 1913, only after all the earnings and profits of the taxable year and all the earnings and profits accumulated since February 28, 1913, have been distributed; and, fourth, to sources other than earnings and profits only after the earnings and profits have been distributed.

(b) If the earnings and profits of the taxable year (computed as of the close of the year without diminution by reason of any distributions made during the year and without regard to the amount of earnings and profits at the time of the distribution) are sufficient in amount to cover all the distributions made during that year, then each distribution is a taxable dividend. See §1.316–1. If the distributions made during the taxable year consist only of money and exceed the earnings and profits of such year, then that proportion of each distribution which the total of the earnings and profits of the year bears to the total distributions made during the year shall be regarded as out of the earnings and profits of that year. The portion of each such distribution which is not regarded as out of earnings and profits of the taxable year shall be considered a taxable dividend to the extent of the earnings and profits accumulated since February 28, 1913, and available on the date of the distribution. In any case in which it is necessary to determine the amount of earnings and profits accumulated since February 28, 1913, and the actual earnings and profits to the date of a distribution within any taxable year (whether beginning before January 1, 1936, or, in the case of an operating deficit, on or after that date) cannot be shown, the earnings and profits for the year (or accounting period, if less than a year) in which the distribution was made shall be prorated to the date of the distribution not counting the date on which the distribution was made.

(c) The provisions of the section may be illustrated by the following example:

Example At the beginning of the calendar year 1955, Corporation M had $12,000 in earnings and profits accumulated since February 28, 1913. Its earnings and profits for 1955 amounted to $30,000. During the year it made quarterly cash distributions of $15,000 each. Of each of the four distributions made, $7,500 (that portion of $15,000 which the amount of $30,000, the total earnings and profits of the taxable year, bears to $60,000, the total distributions made during the year) was paid out of the earnings and profits of the taxable year; and of the first and second distributions, $7,500 and $4,500, respectively, were paid out of the earnings and profits accumulated after February 28, 1913, and before the taxable year, as follows:

Distributions during 1955		Portion out of earnings and profits of the taxable year	Portion out of earnings accumulated since Feb. 28, 1913, and before the taxable year	Taxable amt. of each distribution
Date	Amount			
March 10	$15,000	$7,500	$7,500	$15,000
June 10	15,000	7,500	4,500	12,000
September 10	15,000	7,500		7,500
December 10	15,000	7,500		7,500
Total amount taxable as dividends				42,000

(d) Any distribution by a corporation out of earnings and profits accumulated before March 1, 1913, or out of increase in value of property accrued before March 1, 1913 (whether or not realized by sale or other disposition, and, if realized, whether before, on, or after March 1, 1913), is not a dividend within the meaning of subtitle A of the Code.

(e) A reserve set up out of gross income by a corporation and maintained for the purpose of making good any loss of capital assets on account of depletion or depreciation is not a part of surplus out of which ordinary dividends may be paid. A distribution made from a depletion or a depreciation reserve based upon the cost or other basis of the property will not be considered as having been paid out of earnings and profits, but the amount thereof shall be applied against and reduce the cost or other basis of the stock upon which declared. If such a distribution is in excess of the basis, the excess shall be taxed as a gain from the sale or other disposition of property as provided in section 301(c)(3)(A). A distribution from a depletion reserve based upon discovery value to the extent that such reserve represents the excess of the discovery value over the cost or other basis for determining gain or loss, is, when received by the shareholders, taxable as an ordinary dividend. The amount by which a corporation's percentage depletion allowance for any year exceeds depletion sustained on cost or other basis, that is, determined without regard to discovery or percentage depletion allowances for the year of distribution or prior years, constitutes a part of the corporation's ''earnings and profits accumulated after February 28, 1913,'' within the meaning of section 316, and, upon distribution to shareholders, is taxable to them as a dividend. A distribution made from that portion of a depletion reserve based upon a valuation as of March 1, 1913, which is in excess of the depletion reserve based upon cost, will not be considered as having been paid out of earnings and profits, but the amount of the distribution shall be applied against and reduce the cost or other basis of the stock upon which declared. See section 301. No distribution, however, can be made from such a reserve until all the earnings and profits of the corporation have first been distributed.

§ 1.317–1 Property defined.

The term *property*, for purposes of part 1, subchapter C, chapter 1 of the Code, means any property (including money, securities, and indebtedness to the corporation) other than stock, or rights to acquire stock, in the corporation making the distribution.

§ 1.318–1 Constructive ownership of stock; introduction.

(a) For the purposes of certain provisions of chapter 1 of the Code, section 318(a) provides that stock owned by a taxpayer includes stock constructively owned by such taxpayer under the rules set forth in such section. An individual is considered to own the stock owned, directly or indirectly, by or for his spouse (other than a spouse who is legally separated from the individual under a decree of divorce or separate maintenance), and by or for his children, grandchildren, and parents. Under section 318(a)(2) and (3), constructive ownership rules are established for partnerships and partners, estates and beneficiaries, trusts and beneficiaries, and corporations and stockholders. If any person has an option to acquire stock, such stock is considered as owned by such person. The term *option* includes an option to acquire such an option and each of a series of such options.

(b) In applying section 318(a) to determine the stock ownership of any person for any one purpose—

(1) A corporation shall not be considered to own its own stock by reason of section 318(a)(3)(C);

(2) In any case in which an amount of stock owned by any person may be included in the computation more than one time, such stock shall be included only once, in the manner in which it will impute to the person concerned the largest total stock ownership; and

(3) In determining the 50-percent requirement of section 318(a)(2)(C) and (3)(C), all of the stock owned actually and constructively by the person concerned shall be aggregated.

[T.D. 6969, 33 FR 11999, Aug. 23, 1968]

§ 1.318–2 Application of general rules.

(a) The application of paragraph (b) of § 1.318–1 may be illustrated by the following examples:

Example (1). H, an individual, owns all of the stock of corporation A. Corporation A is not considered to own the stock owned by H in corporation A.

Example (2). H, an individual, his wife, W, and his son, S, each own one-third of the stock of the Green Corporation. For purposes of determining the amount of stock owned by H, W, or S for purposes of section 318(a)(2)(C) and (3)(C), the amount of stock held by the other members of the family shall be added pursuant to paragraph (b)(3) of § 1.318–1 in applying the 50-percent requirement of such section. H, W, or S, as the case may be, is for this purpose deemed to own 100 percent of the stock of the Green Corporation.

(b) The application of section 318(a)(1), relating to members of a family, may be illustrated by the following example:

Example An individual, H, his wife, W, his son, S, and his grandson (S's son), G, own the 100 outstanding shares of stock of a corporation, each owning 25 shares. H, W, and S are each considered as owning 100 shares. G is considered as owning only 50 shares, that is, his own and his father's.

(c) The application of section 318(a)(2) and (3), relating to partnerships, trusts and corporations, may be illustrated by the following examples:

Example (1). A, an individual, has a 50 percent interest in a partnership. The partnership owns 50 of the 100 outstanding shares of stock of a corporation, the remaining 50 shares being owned by A. The partnership is considered as owning 100 shares. A is considered as owning 75 shares.

Example (2). A testamentary trust owns 25 of the outstanding 100 shares of stock of a corporation. A, an individual, who holds a vested remainder in the trust having a value, computed actuarially equal to 4 percent of the value of the trust property, owns the remaining 75 shares. Since the interest of A in the trust is a vested interest rather than a contingent interest (whether or not remote), the trust is considered as owning 100 shares. A is considered as owning 76 shares.

Example (3). The facts are the same as in (2), above, except that A's interest in the trust is a contingent remainder. A is considered as owning 76 shares. However, since A's interest in the trust is a remote contingent interest, the trust is not considered as owning any of the shares owned by A.

Example (4). A and B, unrelated individuals, own 70 percent and 30 percent, respectively, in value of the stock of Corporation M. Corporation M owns 50 of the 100 outstanding shares of stock of Corporation O, the remaining 50 shares being owned by A. Corporation M is considered as owning 100 shares of Corporation O, and A is considered as owning 85 shares.

Example (5). A and B, unrelated individuals, own 70 percent and 30 percent, respectively, of the stock of corporation M. A, B, and corporation M all own stock of corporation O. Since B owns less than 50 percent in value of the stock of corporation M, neither B nor corporation M constructively owns the stock of corporation O owned by the other. However, for purposes of certain sections of the Code, such as sections 304 and 856(d), the 50-percent limitation of section 318(a)(2)(C) and (3)(C) is disregarded or is reduced to less than 30 percent. For such purposes, B constructively owns his proportionate share of the stock of corporation O owned directly by corporation M, and corporation M constructively owns the stock of corporation O owned by B.

[T.D. 6500, 25 FR 11607, Nov. 26, 1960, as amended by T.D. 6969, 33 FR 11999, Aug. 23, 1968]

§1.318–3 Estates, trusts, and options.

(a) For the purpose of applying section 318(a), relating to estates, property of a decedent shall be considered as owned by his estate if such property is subject to administration by the executor or administrator for the purpose of paying claims against the estate and expenses of administration notwithstanding that, under local law, legal title to such property vests in the decedent's heirs, legatees or devisees immediately upon death. The term *beneficiary* includes any person entitled to receive property of a decedent pursuant to a will or pursuant to laws of descent and distribution. A person shall no longer be considered a beneficiary of an estate when all the property to which he is entitled has been received by him, when he no longer has a claim against the estate arising out of having been a beneficiary, and when there is only a remote possibility that it will be necessary for the estate to seek the return of property or to seek payment from him by contribution or otherwise to satisfy claims against the estate or expenses of administration. When, pursuant to the preceding sentence, a person ceases to be a beneficiary, stock owned by him shall not thereafter be considered owned by the estate, and stock owned by the estate shall not thereafter be considered owned by him. The application of section 318(a) relating to estates may be illustrated by the following examples:

Example (1). (a) A decedent's estate owns 50 of the 100 outstanding shares of stock of corporation X. The remaining shares are owned by three unrelated individuals, A, B, and C, who together own the entire interest in the estate. A owns 12 shares of stock of corporation X directly and is entitled to 50 percent of the estate. B owns 18 shares directly and has a life estate in the remaining 50 percent of the estate. C owns 20 shares directly and also owns the remainder interest after B's life estate.

(b) If section 318(a)(5)(C) applies (see paragraph (c)(3) of §1.318–4), the stock of corporation X is considered to be owned as follows: the estate is considered as owning 80 shares, 50 shares directly, 12 shares constructively through A, and 18 shares constructively through B; A is considered as owning 37 shares, 12 shares directly, and 25 shares constructively (50 percent of the 50 shares owned directly by the estate); B is considered as owning 43 shares, 18 shares directly and 25 shares constructively (50 percent of the 50 shares owned directly by the estate); C is considered as owning 20 shares directly and no shares constructively. C is not considered a beneficiary of the estate under section 318(a) since he has no direct present interest in the property held by the estate nor in the income produced by such property.

(c) If section 318(a)(5)(C) does not apply, A is considered as owning nine additional shares (50 percent of the 18 shares owned constructively by the estate through B), and B is considered as owning six additional shares

(50 percent of the 12 shares owned constructively by the estate through A).

Example (2). Under the will of A, Blackacre is left to B for life, remainder to C, an unrelated individual. The residue of the estate consisting of stock of a corporation is left to D. B and D are beneficiaries of the estate under section 318(a). C is not considered a beneficiary since he has no direct present interest in Blackacre nor in the income produced by such property. The stock owned by the estate is considered as owned proportionately by B and D.

(b) For the purpose of section 318(a)(2)(B) stock owned by a trust will be considered as being owned by its beneficiaries only to the extent of the interest of such beneficiaries in the trust. Accordingly, the interest of income beneficiaries, remainder beneficiaries, and other beneficiaries will be computed on an actuarial basis. Thus, if a trust owns 100 percent of the stock of Corporation A, and if, on an actuarial basis, W's life interest in the trust is 15 percent, Y's life interest is 25 percent, and Z's remainder interest is 60 percent, under this provision W will be considered to be the owner of 15 percent of the stock of Corporation A, Y will be considered to be the owner of 25 percent of such stock, and Z will be considered to be the owner of 60 percent of such stock. The factors and methods prescribed in § 20.2031–7 of this chapter (Estate Tax Regulations) for use in ascertaining the value of an interest in property for estate tax purposes shall be used in determining a beneficiary's actuarial interest in a trust for purposes of this section. See § 20.2031–7 of this chapter (Estate Tax Regulations) for examples illustrating the use of these factors and methods.

(c) The application of section 318(a) relating to options may be illustrated by the following example:

Example. A and B, unrelated individuals, own all of the 100 outstanding shares of stock of a corporation, each owning 50 shares. A has an option to acquire 25 of B's shares and has an option to acquire a further option to acquire the remaining 25 of B's shares. A is considered as owning the entire 100 shares of stock of the corporation.

[T.D. 6500, 25 FR 11607, Nov. 26, 1960, as amended by T.D. 6969, 33 FR 11999, Aug. 23, 1968]

§ 1.318–4 Constructive ownership as actual ownership; exceptions.

(a) *In general.* Section 318(a)(5)(A) provides that, except as provided in section 318(a)(5) (B) and (C), stock constructively owned by a person by reason of the application of section 318(a) (1), (2), (3), or (4) shall be considered as actually owned by such person for purposes of applying section 318(a) (1), (2), (3), and (4). For example, if a trust owns 50 percent of the stock of corporation X, stock of corporation Y owned by corporation X which is attributed to the trust may be further attributed to the beneficiaries of the trust.

(b) *Constructive family ownership.* Section 318(a)(5)(B) provides that stock constructively owned by an individual by reason of ownership by a member of his family shall not be considered as owned by him for purposes of making another family member the constructive owner of such stock under section 318(a)(1). For example, if F and his two sons, A and B, each own one-third of the stock of a corporation, under section 318(a)(1), A is treated as owning constructively the stock owned by his father but is not treated as owning the stock owned by B. Section 318(a)(5)(B) prevents the attribution of the stock of one brother through the father to the other brother, an attribution beyond the scope of section 318(a)(1) directly.

(c) *Reattribution.* (1) Section 318(a)(5)(C) provides that stock constructively owned by a partnership, estate, trust, or corporation by reason of the application of section 318(a)(3) shall not be considered as owned by it for purposes of applying section 318(a)(2) in order to make another the constructive owner of such stock. For example, if two unrelated individuals are beneficiaries of the same trust, stock held by one which is attributed to the trust under section 318(a)(3) is not reattributed from the trust to the other beneficiary. However, stock constructively owned by reason of section 318(a)(2) may be reattributed under section 318(a)(3). Thus, for example, if all the stock of corporations X and Y is owned by A, stock of corporation Z held by X is attributed to Y through A.

(2) Section 318(a)(5)(C) does not prevent reattribution under section 318(a)(2) of stock constructively owned

by an entity under section 318(a)(3) if the stock is also constructively owned by the entity under section 318(a)(4). For example, if individuals A and B are beneficiaries of a trust and the trust has an option to buy stock from A, B is considered under section 318(a)(2)(B) as owning a proportionate part of such stock.

(3) Section 318(a)(5)(C) is effective on and after August 31, 1964, except that for purposes of sections 302 and 304 it does not apply with respect to distributions in payment for stock acquisitions or redemptions if such acquisitions or redemptions occurred before August 31, 1964.

[T.D. 6969, 33 FR 11999, Aug. 23, 1968]

CORPORATE LIQUIDATIONS

EFFECTS ON RECIPIENTS

§1.331–1 Corporate liquidations.

(a) Section 331 contains rules governing the extent to which gain or loss is recognized to a shareholder receiving a distribution in complete or partial liquidation of a corporation. Under section 331(a)(1), it is provided that amounts distributed in complete liquidation of a corporation shall be treated as in full payment in exchange for the stock. Under section 331(a)(2), it is provided that amounts distributed in partial liquidation of a corporation shall be treated as in full or part payment in exchange for the stock. For this purpose, the term *partial liquidation* shall have the meaning ascribed in section 346. If section 331 is applicable to the distribution of property by a corporation, section 301 (relating to the effects on a shareholder of distributions of property) has no application other than to a distribution in complete liquidation to which section 316(b)(2)(B) applies. See paragraph (b)(2) of §1.316–1.

(b) The gain or loss to a shareholder from a distribution in partial or complete liquidation is to be determined under section 1001 by comparing the amount of the distribution with the cost or other basis of the stock. The gain or loss will be recognized to the extent provided in section 1002 and will be subject to the provisions of parts I, II, and III (section 1201 and following), subchapter P, chapter 1 of the Code.

(c) A liquidation which is followed by a transfer to another corporation of all or part of the assets of the liquidating corporation or which is preceded by such a transfer may, however, have the effect of the distribution of a dividend or of a transaction in which no loss is recognized and gain is recognized only to the extent of ‘‘other property.’’ See sections 301 and 356.

(d) In every case in which a shareholder transfers stock in exchange for property to the corporation which issued such stock, the facts and circumstances shall be reported on his return unless the property is part of a distribution made pursuant to a corporate resolution reciting that the distribution is made in liquidation of the corporation and the corporation is completely liquidated and dissolved within one year after the distribution. See section 6043 for requirements relating to returns by corporations.

(e) The provisions of this section may be illustrated by the following example:

Example A, an individual who makes his income tax returns on the calendar year basis, owns 20 shares of stock of the P Corporation, a domestic corporation, 10 shares of which were acquired in 1951 at a cost of $1,500 and the remainder of 10 shares in December 1954 at a cost of $2,900. He receives in April 1955 a distribution of $250 per share in complete liquidation, or $2,500 on the 10 shares acquired in 1951, and $2,500 on the 10 shares acquired in December 1954. The gain of $1,000 on the shares acquired in 1951 is a long-term capital gain to be treated as provided in parts I, II, and III (section 1201 and following), subchapter P, chapter 1 of the Code. The loss of $400 on the shares acquired in 1954 is a short-term capital loss to be treated as provided in parts I, II, and III (section 1201 and following), subchapter P, chapter 1 of the Code.

[T.D. 6500, 25 FR 11607, Nov. 26, 1960, as amended by T.D. 6949, 33 FR 5521, Apr. 9, 1968]

§1.332–1 Distributions in liquidation of subsidiary corporation; general.

Under the general rule prescribed by section 331 for the treatment of distributions in liquidation of a corporation, amounts received by one corporation in complete liquidation of another corporation are treated as in full payment in exchange for stock in such other corporation, and gain or loss from the receipt of such amounts is to be determined as provided in section 1001. Section 332 excepts from the general rule property received, under certain specifically described circumstances, by one corporation as a distribution in complete liquidation of the stock of another corporation and provides for the nonrecognition of gain or loss in those cases which meet the statutory requirements. Section 367 places a limitation on the application of section 332 in the case of foreign corporations. See section 334(b) for the basis for determining gain or loss from the subsequent sale of property received upon complete liquidations such as described in this section. See section 453(d)(4)(A) relative to distribution of installment obligations by subsidiary.

§ 1.332–2 Requirements for nonrecognition of gain or loss.

(a) The nonrecognition of gain or loss is limited to the receipt of such property by a corporation which is the actual owner of stock (in the liquidating corporation) possessing at least 80 percent of the total combined voting power of all classes of stock entitled to vote and the owner of at least 80 percent of the total number of shares of all other classes of stock (except nonvoting stock which is limited and preferred as to dividends). The recipient corporation must have been the owner of the specified amount of such stock on the date of the adoption of the plan of liquidation and have continued so to be at all times until the receipt of the property. If the recipient corporation does not continue qualified with respect to the ownership of stock of the liquidating corporation and if the failure to continue qualified occurs at any time prior to the completion of the transfer of all the property, the provisions for the nonrecognition of gain or loss do not apply to any distribution received under the plan.

(b) Section 332 applies only to those cases in which the recipient corporation receives at least partial payment for the stock which it owns in the liquidating corporation. If section 332 is not applicable, see section 165(g) relative to allowance of losses on worthless securities.

(c) To constitute a distribution in complete liquidation within the meaning of section 332, the distribution must be (1) made by the liquidating corporation in complete cancellation or redemption of all of its stock in accordance with a plan of liquidation, or (2) one of a series of distributions in complete cancellation or redemption of all its stock in accordance with a plan of liquidation. Where there is more than one distribution, it is essential that a status of liquidation exist at the time the first distribution is made under the plan and that such status continue until the liquidation is completed. Liquidation is completed when the liquidating corporation and the receiver or trustees in liquidation are finally divested of all the property (both tangible and intangible). A status of liquidation exists when the corporation ceases to be a going concern and its activities are merely for the purpose of winding up its affairs, paying its debts, and distributing any remaining balance to its shareholders. A liquidation may be completed prior to the actual dissolution of the liquidating corporation. However, legal dissolution of the corporation is not required. Nor will the mere retention of a nominal amount of assets for the sole purpose of preserving the corporation's legal existence disqualify the transaction. (See 26 CFR (1939) 39.22(a)–20 (Regulations 118).)

(d) If a transaction constitutes a distribution in complete liquidation within the meaning of the Internal Revenue Code of 1954 and satisfies the requirements of section 332, it is not material that it is otherwise described under the local law. If a liquidating corporation distributes all of its property in complete liquidation and if pursuant to the plan for such complete liquidation a corporation owning the specified amount of stock in the liquidating corporation receives property constituting amounts distributed in complete liquidation within the meaning of the Code and also receives other property attributable to shares not owned by it, the transfer of the property to the recipient corporation shall not be treated, by reason of the receipt of such other property, as not being a distribution (or one of a series of distributions) in complete cancellation or redemption of all of the stock of the liquidating corporation within the meaning of section 332, even though for purposes of those provisions relating to corporate reorganizations the amount received by the recipient corporation in excess of its ratable share is regarded as acquired upon the issuance of its stock or securities in a tax-free exchange as described in section 361 and the cancellation or redemption of the stock not owned by the recipient corporation is treated as occurring as a result of a taxfree exchange described in section 354.

(e) The application of these rules may be illustrated by the following example:

Example On September 1, 1954, the M Corporation had outstanding capital stock consisting of 3,000 shares of common stock, par value $100 a share, and 1,000 shares of preferred stock, par value $100 a share, which preferred stock was limited and preferred as to dividends and had no voting rights. On that date, and thereafter until the date of dissolution of the M Corporation, the O Corporation owned 2,500 shares of common stock of the M Corporation. By statutory merger consummated on October 1, 1954, pursuant to a plan of liquidation adopted on September 1, 1954, the M Corporation was merged into the O Corporation, the O Corporation under the plan issuing stock which was received by the other holders of the stock of the M Corporation. The receipt by the O Corporation of the properties of the M Corporation is a distribution received by the O Corporation in complete liquidation of the M Corporation within the meaning of section 332, and no gain or loss is recognized as the result of the receipt of such properties.

§1.332–3 Liquidations completed within one taxable year.

If in a liquidation completed within one taxable year pursuant to a plan of complete liquidation, distributions in complete liquidation are received by a corporation which owns the specified amount of stock in the liquidating corporation and which continues qualified with respect to the ownership of such stock until the transfer of all the property within such year is completed (see paragraph (a) of §1.332–2), then no gain or loss shall be recognized with respect to the distributions received by the recipient corporation. In such case no waiver or bond is required of the recipient corporation under section 332.

§1.332–4 Liquidations covering more than one taxable year.

(a) If the plan of liquidation is consummated by a series of distributions extending over a period of more than one taxable year, the nonrecognition of gain or loss with respect to the distributions in liquidation shall, in addition to the requirements of §1.332–2, be subject to the following requirements:

(1) In order for the distribution in liquidation to be brought within the exception provided in section 332 to the general rule for computing gain or loss with respect to amounts received in liquidation of a corporation, the entire property of the corporation shall be transferred in accordance with a plan of liquidation, which plan shall include a statement showing the period within which the transfer of the property of the liquidating corporation to the recipient corporation is to be completed. The transfer of all the property under the liquidation must be completed within three years from the close of the taxable year during which is made the first of the series of distributions under the plan.

(2) For each of the taxable years which falls wholly or partly within the period of liquidation, the recipient corporation shall, at the time of filing its return, file with the district director of internal revenue a waiver of the statute of limitations on assessment. The waiver shall be executed on such form as may be prescribed by the Commissioner and shall extend the period of assessment of all income and profits taxes for each such year to a date not earlier than one year after the last date of the period for assessment of such taxes for the last taxable year in which the transfer of the property of such liquidating corporation to the controlling corporation may be completed in accordance with section 332. Such waiver shall also contain such other terms with respect to assessment as may be considered by the Commissioner to be necessary to insure the assessment and collection of the correct tax liability for each year within the period of liquidation.

(3) For each of the taxable years which falls wholly or partly within the period of liquidation, the recipient corporation may be required to file a bond, the amount of which shall be fixed by the district director. The bond shall contain all terms specified by the Commissioner, including provisions unequivocally assuring prompt payment of the excess of income and profits taxes (plus penalty, if any, and interest) as computed by the district director without regard to the provisions of sections 332 and 334(b) over such taxes computed with regard to such provisions, regardless of whether such excess may or may not be made the subject of a notice of deficiency under section 6212 and regardless of whether it may or may not be assessed. Any bond required under section 332 shall have such surety or sureties as the Commissioner may require. However, see 6 U.S.C. 15, providing that where a bond is required by law or regulations, in lieu of surety or sureties there may be deposited bonds or notes of the United States. Only surety companies holding certificates of authority from the Secretary as acceptable sureties on Federal bonds will be approved as sureties. The bonds shall be executed in triplicate so that the Commissioner, the taxpayer, and the surety or the depositary may each have a copy. On and after September 1, 1953, the functions of the Commissioner with respect to such bonds shall be performed by the district director for the internal revenue district in which the return was filed and any bond filed on or after such date shall be filed with such district director.

(b) Pending the completion of the liquidation, if there is a compliance with paragraph (a) (1), (2), and (3) of this section and § 1.332–2 with respect to the nonrecognition of gain or loss, the income and profits tax liability of the recipient corporation for each of the years covered in whole or in part by the liquidation shall be determined without the recognition of any gain or loss on account of the receipt of the distributions in liquidation. In such determination, the basis of the property or properties received by the recipient corporation shall be determined in accordance with section 334(b). However, if the transfer of the property is not completed within the three-year period allowed by section 332 or if the recipient corporation does not continue qualified with respect to the ownership of stock of the liquidating corporation as required by that section, gain or loss shall be recognized with respect to each distribution and the tax liability for each of the years covered in whole or in part by the liquidation shall be recomputed without regard to the provisions of section 332 or section 334(b) and the amount of any additional tax due upon such recomputation shall be promptly paid.

§ 1.332–5 Distributions in liquidation as affecting minority interests.

Upon the liquidation of a corporation in pursuance of a plan of complete liquidation, the gain or loss of minority shareholders shall be determined without regard to section 332, since it does not apply to that part of distributions in liquidation received by minority shareholders.

§ 1.332–6 Records to be kept and information to be filed with return.

(a) Permanent records in substantial form shall be kept by every corporation receiving distributions in complete liquidation within the exception provided in section 332 showing the information required by this section to be submitted with its return. The plan of liquidation must be adopted by each of the corporations parties thereto; and the adoption must be shown by the acts of its duly constituted responsible officers, and appear upon the official records of each such corporation.

(b) For the taxable year in which the liquidation occurs, or, if the plan of liquidation provides for a series of distributions over a period of more than one year, for each taxable year in which a distribution is received under the plan the recipient must file with its return a complete statement of all facts pertinent to the nonrecognition of gain or loss, including:

(1) A certified copy of the plan for complete liquidation, and of the resolutions under which the plan was adopted and the liquidation was authorized, together with a statement under oath

showing in detail all transactions incident to, or pursuant to, the plan.

(2) A list of all the properties received upon the distribution, showing the cost or other basis of such properties to the liquidating corporation at the date of distribution and the fair market value of such properties on the date distributed.

(3) A statement of any indebtedness of the liquidating corporation to the recipient corporation on the date the plan of liquidation was adopted and on the date of the first liquidating distribution. If any such indebtedness was acquired at less than face value, the cost thereof to the recipient corporation must also be shown.

(4) A statement as to its ownership of all classes of stock of the liquidating corporation (showing as to each class the number of shares and percentage owned and the voting power of each share) as of the date of the adoption of the plan of liquidation, and at all times since, to and including the date of the distribution in liquidation. The cost or other basis of such stock and the date or dates on which purchased must also be shown.

§1.332–7 Indebtedness of subsidiary to parent.

If section 332(a) is applicable to the receipt of the subsidiary's property in complete liquidation, then no gain or loss shall be recognized to the subsidiary upon the transfer of such properties even though some of the properties are transferred in satisfaction of the subsidiary's indebtedness to its parent. However, any gain or loss realized by the parent corporation on such satisfaction of indebtedness, shall be recognized to the parent corporation at the time of the liquidation. For example, if the parent corporation purchased its subsidiary's bonds at a discount and upon liquidation of the subsidiary the parent corporation receives payment for the face amount of such bonds, gain shall be recognized to the parent corporation. Such gain shall be measured by the difference between the cost or other basis of the bonds to the parent and the amount received in payment of the bonds.

§1.334–1 Basis of property received in liquidations.

(a) *In general.* Section 334 sets forth rules prescribing the basis of property received in a distribution in partial or complete liquidation of a corporation. The general rule of section 334 is set forth in section 334(a) to the effect that if property is received in a distribution in partial or complete liquidation and if gain or loss is recognized on the receipt of such property, then the basis of the property in the hands of the distributee shall be the fair market value of such property at the time of the distribution. Such general rule has no application to a liquidation to which section 332 or section 333 applies. See section 334 (b) and (c).

(b) *Transferor's basis.* Unless section 334(b)(2) and subsection (c) of this section apply, property received by a parent corporation in a complete liquidation to which section 332 is applicable shall, under section 334(b)(1), have the same basis in the hands of the parent as its adjusted basis in the hands of the subsidiary. The rule stated above is applicable even though the subsidiary was indebted to the parent on the date the plan of liquidation was adopted and part of such property was received in satisfaction of such indebtedness in a transfer to which section 332(c) is applicable.

[T.D. 7231, 37 FR 28287, Dec. 22, 1972, as amended at T.D. 8474, 58 FR 25557, Apr. 27, 1993]

EFFECTS ON CORPORATION

§1.337(d)–1 Transitional loss limitation rule.

(a) *Loss limitation rule for transitional subsidiary*—(1) *General rule.* No deduction is allowed for any loss recognized by a member of a consolidated group with respect to the disposition of stock of a transitional subsidiary.

(2) *Allowable loss*—(i) *In general.* Paragraph (a)(1) of this section does not apply to the extent the taxpayer establishes that the loss is not attributable to the recognition of built-in gain by any transitional subsidiary on the disposition of an asset (including stock and securities) after January 6, 1987.

(ii) *Statement of allowable loss.* Paragraph (a)(2)(i) of this section applies only if a separate statement entitled ‘‘Allowable Loss Under § 1.337(d)–1(a)’’ is filed with the taxpayer’s return for the year of the stock disposition. If the separate statement is required to be filed with a return the due date (including extensions) of which is before January 16, 1991, or with a return due (including extensions) after January 15, 1991 but filed before that date, the statement may be filed with an amended return for the year of the disposition or with the taxpayer’s first subsequent return the due date (including extensions) of which is after January 15, 1991.

(iii) *Contents of statement.* The statement required under paragraph (a)(2)(ii) of this section must contain—

(A) The name and employer identification number (E.I.N.) of the transitional subsidiary.

(B) The basis of the stock of the transitional subsidiary immediately before the disposition.

(C) The amount realized on the disposition.

(D) The amount of the deduction not disallowed under paragraph (a)(1) of this section by reason of this paragraph (a)(2).

(E) The amount of loss disallowed under paragraph (a)(1) of this section.

(3) *Coordination with loss deferral and other disallowance rules.* (i) For purposes of this section, the rules of § 1.1502–20(a)(3) apply, with appropriate adjustments to reflect differences between the approach of this section and that of § 1.1502–20.

(ii) *Other loss deferral rules.* If paragraph (a)(1) of this section applies to a loss subject to deferral or disallowance under any other provision of the Code or the regulations, the other provision applies to the loss only to the extent it is not disallowed under paragraph (a)(1).

(4) *Definitions.* For purposes of this section—

(i) The definitions in § 1.1502–1 apply.

(ii) *Transitional subsidiary* means any corporation that became a subsidiary of the group (whether or not the group was a consolidated group) after January 6, 1987. Notwithstanding the preceding sentence, a subsidiary is not a transitional subsidiary if the subsidiary (and each predecessor) was a member of the group at all times after the subsidiary’s (and each predecessor’s) organization.

(iii) *Built-in gain* of a transitional subsidiary means gain attributable, directly or indirectly, in whole or in part, to any excess of value over basis, determined immediately before the transitional subsidiary became a subsidiary, with respect to any asset owned directly or indirectly by the transitional subsidiary at that time.

(iv) *Disposition* means any event in which gain or loss is recognized, in whole or in part.

(v) *Value* means fair market value.

(5) *Examples.* For purposes of the examples in this section, unless otherwise stated, the group files consolidated returns on a calendar year basis, the facts set forth the only corporate activity, and all sales and purchases are with unrelated buyers or sellers. The basis of each asset is the same determining earnings and profits adjustments and taxable income. Tax liability and its effect on basis, value, and earnings and profits are disregarded. *Investment adjustment system* means the rules of § 1.1502–32. The principles of this paragraph (a) are illustrated by the following examples:

Example 1. Loss attributable to recognized built-in gain.

(i) P buys all the stock of T for $100 on February 1, 1987, and T becomes a member of the P group. T has an asset with a value of $100 and basis of $0. T sells the asset in 1989 and recognizes $100 of built-in gain on the sale (*i.e.,* the asset’s value exceeded its basis by $100 at the time T became a member of the P group). Under the investment adjustment system, P’s basis in the T stock increases to $200. P sells all the stock of T on December 31, 1989, and recognizes a loss of $100. Under paragraph (a)(1) of this section, no deduction is allowed to P for the $100 loss.

(ii) Assume that, after T sells its asset but before P sells the T stock, T issues additional stock to unrelated persons and ceases to be a member of the P group. P then sells all its stock of T in 1997. Although T ceases to be a subsidiary within the meaning of § 1.1502–1, T continues to be a transitional subsidiary within the meaning of this section. Consequently, under paragraph (a)(1) of this section, no deduction is allowed to P for its $100 loss.

Example 2. Loss attributable to post-acquisition loss.

P buys all the stock of T for $100 on February 1, 1987, and T becomes a member of the

P group. T has $50 cash and an asset with $50 of built-in gain. During 1988, T retains the asset but loses $40 of the cash. The P group is unable to use the loss, and the loss becomes a net operating loss carryover attributable to T. Under the investment adjustment system, P's basis in the stock of T remains $100. P sells all the stock of T on December 31, 1988, for $60 and recognizes a $40 loss. Under paragraph (a)(2)(i) of this section, P establishes that it did not dispose of the built-in gain asset. None of P's loss is disallowed under paragraph (a)(1) if P satisfies the requirements of paragraph (a)(2)(ii) of this section.

Example 3. Stacking rules—postacquisition loss offsets postacquisition gain.

(i) P. buys all the stock of T for $100 on February 1, 1987, and T becomes a member of the P group. T has 2 assets. Asset 1 has a basis and value of $50, and asset 2 has a basis of $0 and a value of $50. During 1989, asset 1 declines in value to $0, and T sells asset 2 for $50, and reinvests the proceeds in asset 3. The value of asset 3 appreciates to $90. Under the investment adjustment system, P's basis in the stock of T increases from $100 to $150 as a result of the gain recognized on the sale of asset 2 but is unaffected by the unrealized post-acquisition decline in the value of asset 1. On December 31, 1989, P sells all the stock of T for $90 and recognizes a $60 loss.

(ii) Although T incurred a $50 post-acquisition loss of built-in gain because of the decline in the value of asset 1, T also recognized $50 of built-in gain. Under paragraph (a)(2) of this section, any loss on the sale of stock is treated first as attributable to recognized built-in gain. Thus, for purposes of determining under paragraph (a)(2) of this section whether P's $60 loss on the disposition of the T stock is attributable to the recognition of built-in gain on the disposition of an asset, T's unrealized post-acquisition gain of $40 offsets $40 of the $50 of unrealized post-acquisition loss. Therefore, $50 of the $60 loss is attributable to the recognition of built-in gain on the disposition of an asset and is disallowed under paragraph (a)(1) of this section.

Example 4. Stacking rules—built-in loss offsets built-in gain.

(i) P buys all the stock of T for $50 on February 1, 1987, and T becomes a member of the P group. T has 2 assets. Asset 1 has a basis of $50 and a value of $0, and asset 2 has a basis of $0 and a value of $50. During 1989, T sells asset 1 for $0 and asset 2 for $50, and reinvests the $50 proceeds in asset 3. The value of asset 3 declines to $40. Under the investment adjustment system, P's basis in the stock of T remains $50 as a result of the offsetting gain and loss recognized on the sale of assets 1 and 2 and is unaffected by the unrealized post-acquisition decline in the value of asset 3. On December 31, 1989, P sells all the stock of T for $40 and recognizes a $10 loss.

(ii) Although T recognized a $50 built-in gain on the sale of asset 2, T also recognized a $50 built-in loss on the sale of asset 1. For purposes of determining under paragraph (a)(2) of this section whether P's $10 loss on the disposition of the T stock is attributable to the recognition of built-in gain on the disposition of an asset, T's recognized built-in gain is offset by its recognized built-in loss. Thus none of P's $10 loss is attributable to the recognition of built-in gain on the disposition of an asset.

(iii) The result would be the same if, instead of a $50 built-in loss in asset 2, T has a $50 net operating loss carryover when P buys the T stock, and the net operating loss carryover is used to offset the built-in gain.

Example 5. Outside basis partially corresponds to inside basis.

(i) Individual A owns all the stock of T, for which A has a basis of $60. On February 1, 1987, T owns 1 asset with a basis of $0 and a value of $100, P acquires all the stock of T from A in an exchange to which section 351(a) applies, and T becomes a member of the P group. P has a carryover basis of $60 in the T stock. During 1988, T sells the asset and recognizes $100 of gain. Under the investment adjustment system, P's basis in the T stock increases from $60 to $160. T reinvests the $100 proceeds in another asset, which declines in value to $90. On January 1, 1989, P sells all the stock of T for $90 and recognizes a loss of $70.

(ii) Although P's basis in the T stock was increased by $100 as a result of the recognition of built-in gain on the disposition of T's asset, only $60 of the $70 loss on the sale of the stock is attributable under paragraph (a)(2) of this section to the recognition of built-in gain from the disposition of the asset. (Had T's asset not declined in value to $90, the T stock would have been sold for $100, and a $60 loss would have been attributable to the recognition of the built-in gain.) Therefore, $60 of the $70 loss is disallowed under paragraph (a)(2), and $10 is not disallowed if P satisfies the requirements of paragraph (a)(2). If P had sold the stock of T for $95 because T's other assets had unrealized appreciation of $5, $60 of the $65 loss would still be attributable to T's recognition of built-in gain on the disposition of assets.

Example 6. Creeping acquisition.

P owns 60 percent of the stock of S on January 6, 1987. On February 1, 1987, P buys an additional 20 percent of the stock of S, and S becomes a member of the P group. P sells all the S stock on March 1, 1989 and recognizes a loss of $100. All 80 percent of the stock of S owned by P is subject to the rules of this section and, under paragraph (a) (1) and (2) of this section, P is not allowed to deduct the $100 loss, except to the extent P establishes the loss is not attributable to the recognition by S of built-in gain on the disposition of assets.

Example 7. Effect of post-acquisition appreciation. P buys all the stock of T for $100, and T becomes a member of the P group. T has an asset with a basis of $0 and a value of $100. T sells the asset for $100. Under the investment adjustment system, P's basis in the T stock increases to $200. T reinvests the proceeds of the sale in an asset that appreciates in value to $180. Five years after the sale, P sells all the stock of T for $180 and recognizes a $20 loss. Under paragraph (a)(1) of this section, no deduction is allowed to P for the $20 loss.

Example 8. Deferred loss and recognized gain.

(i) P is the common parent of a consolidated group, S is a wholly owned subsidiary of P, and T is a wholly owned subsidiary of S. S purchased all of the T stock on February 1, 1987 for $100, and T has an asset with a basis of $40 and a value of $100. T sells the asset for $100, recognizing $60 of gain. Under the investment adjustment system, S's basis in the T stock increases from $100 to $160. S sells its T stock to P for $100 in a deferred intercompany transaction, recognizing a $60 loss that is deferred under section 267(f) and § 1.1502–13. P subsequently sells all the stock of T for $100 to X, a member of the same controlled group (as defined in section 267(f)) as P but not a member of the P consolidated group.

(ii) Under paragraph (a)(3) of this section, the application of paragraph (a)(1) of this section to S's $60 loss is deferred, because S's loss is deferred under section 267(f) and § 1.1502–13. Although P's sale of the T stock to X would cause S's deferred loss to be taken into account under § 1.1502–13, § 1.267(f)–1 provides that the loss is not taken into account because X is a member of the same controlled group as P and S. Nevertheless, under paragraph (a)(3) of this section, because the T stock ceases to be owned by a member of the P consolidated group, S's deferred loss is disallowed immediately before the sale and is never taken into account under section 267(f).

(b) *Indirect disposition of transitional subsidiary*—(1) *Loss limitation rule for transitional parent.* No deduction is allowed for any loss recognized by a member of a consolidated group with respect to the disposition of stock of a transitional parent.

(2) *Allowable loss*—(i) *In general.* Paragraph (b)(1) of this section does not apply to the extent the taxpayer establishes that the loss exceeds the amount that would be disallowed under paragraph (a) of this section if each highest tier transitional subsidiary's stock in which the transitional parent has a direct or indirect interest had been sold immediately before the disposition of the transitional parent's stock. In applying the preceding sentence, appropriate adjustments shall be made to take into account circumstances where less than all the stock of a transitional parent owned by members of a consolidated group is disposed of in the same transaction, or the stock of a transitional subsidiary or a transitional parent is directly owned by more than 1 member.

(ii) *Statement of allowable loss.* Paragraph (b)(2)(i) of this section applies only if a separate statement entitled ''Allowable Loss Under Section 1.337(d)–1(b)'' is filed with the taxpayer's return for the year of the stock disposition. If the separate statement is required to be filed with a return the due date (including extensions) of which is before January 16, 1991, or with a return due (including extensions) after January 15, 1991 but filed before that date, the statement may be filed with an amended return for the year of the disposition or with the taxpayer's first subsequent return the due date (including extensions) of which is after January 15, 1991.

(iii) *Contents of statement.* The statement required under paragraph (b)(2)(ii) of this section must contain—

(A) The name and employer identification number (E.I.N.) of the transitional parent.

(B) The basis of the stock of the transitional parent immediately before the disposition.

(C) The amount realized on the disposition.

(D) The amount of the deduction not disallowed under paragraph (b)(1) of this section by reason of this paragraph (b)(2).

(E) The amount of loss disallowed under paragraph (b)(1) of this section.

(3) *Coordination with loss deferral and other disallowance rules.* (i) For purposes of this section, the rules of § 1.1502–20(a)(3) apply, with appropriate adjustments to reflect differences between the approach of this section and that of § 1.1502–20.

(ii) *Other loss deferral rules.* If paragraph (b)(1) of this section applies to a loss subject to deferral or disallowance under any other provision of the Code or the regulations, the other provision applies to the loss only to the extent it is not disallowed under paragraph (b)(1).

(4) *Definitions.* For purposes of this section—

(i) *Transitional parent* means any subsidiary, other than a transitional subsidiary, that owned at any time after January 6, 1987, a direct or indirect interest in the stock of a corporation that is a transitional subsidiary.

(ii) *Highest tier transitional subsidiary* means the transitional subsidiary (or subsidiaries) in which the transitional parent has a direct or indirect interest and that is the highest transitional subsidiary (or subsidiaries) in a chain of members.

(5) *Examples.* The principles of this paragraph (b) are illustrated by the following examples:

Example 1. Ownership of chain of transitional subsidiaries. (i) P forms S with $200 on January 1, 1985, and S becomes a member of the P group. On February 1, 1987, S buys all the stock of T, and T buys all the stock of T1, and both T and T1 become members of the P group. On January 1, 1988, P sells all the stock of S and recognizes a $90 loss on the sale.

(ii) Under paragraph (a)(4)(ii) of this section, both T and T1 are transitional subsidiaries, because they became members of the P group after January 6, 1987. Under paragraph (b)(4)(i) of this section, S is a transitional parent, because it owns a direct interest in stock of transitional subsidiaries and is not itself a transitional subsidiary.

(iii) Under paragraph (b) (1) and (2) of this section, because S is a transitional parent, no deduction is allowed to P for its $90 loss except to the extent the loss exceeds the amount of S's loss that would have been disallowed if S had sold all the stock of T, S's highest tier transitional subsidiary, immediately before P's sale of all the S stock. Assume all the T stock would have been sold for a $90 loss and that all the loss would be attributable to the recognition of built-in gain from the disposition of assets. Because in that case $90 of loss would be disallowed, all of P's loss on the sale of the S stock is disallowed under paragraph (b).

Example 2. Ownership of brother-sister transitional subsidiaries.

(i) P forms S with $200 on January 1, 1985, and S becomes a member of the P group. On February 1, 1987, S buys all the stock of both T and T1, and T and T1 become members of the P group. On January 1, 1988, P sells all the stock of S and recognizes a $90 loss on the sale.

(ii) Under paragraph (b) (1) and (2) of this section, no deduction is allowed to P for its $90 loss except to the extent P establishes that the loss exceeds the amount of S's stock losses that would be disallowed if S sold all the stock of T and T1, S's highest tier transitional subsidiaries, immediately before P's sale of all the S stock. Assume that all the T stock would have been sold for a $50 loss, all the T1 stock of a $40 loss, and that the entire amount of each loss would be attributable to the recognition of built-in gain on the disposition of assets. Because $90 of loss would be disallowed with respect to the sale of S's T and T1 stock, P's $90 loss on the sale of all the S stock is disallowed under paragraph (b).

(c) *Successors*—(1) *General rule.* This section applies, to the extent necessary to effectuate the purposes of this section, to—

(i) Any property owned by a member or former member, the basis of which is determined, directly or indirectly, in whole or in part, by reference to the basis in a subsidiary's stock, and

(ii) Any property owned by any other person whose basis in the property is determined, directly or indirectly, in whole or in part, by reference to a member's (or former member's) basis in a subsidiary's stock.

(2) *Examples.* The principles of this paragraph (c) are illustrated by the following examples:

Example 1. Merger into grandfathered subsidiary. P, the common parent of a group, owns all the stock of T, a transitional subsidiary. On January 1, 1989, T merges into S, a wholly owned subsidiary of P that is not a transitional subsidiary. Under paragraph (c)(1) of this section, all the stock of S is treated as stock of a transitional subsidiary. As a result, no deduction is allowed for any loss recognized by P on the disposition of any S stock, except to the extent the P group establishes under paragraph (a)(2) that the loss is not attributable to the recognition of built-in gain on the disposition of assets of T.

Example 2. Nonrecognition exchange of transitional stock.

(i) P, the common parent of a group, owns all the stock of T, a transitional subsidiary. On January 1, 1989, P transfers the stock of T to X, a corporation that is not a member of the P group, in exchange for 20 percent of its stock in a transaction to which section 351(a) applies. T and X file separate returns.

(ii) Under paragraph (c)(1) of this section, all the stock of X owned by P is treated as stock of a transitional subsidiary because P's basis for the X stock is determined by reference to its basis for the T stock. As a result, no deduction is allowed to P for any loss recognized on the disposition of the X stock, except to the extent permitted under paragraph (a) of this section.

(iii) Under paragraph (c)(1), X is treated as a member subject to paragraph (a) of this section with respect to the T stock because X's basis for the stock is determined by reference to P's basis for the stock. Moreover, all of the T stock owned by X continues to be stock of a transitional subsidiary. As a result, no deduction is allowed to X for any loss recognized on the disposition of any T stock, except to the extent permitted under paragraph (a) of this section.

(d) *Investment adjustments and earnings and profits*—(1) *In general.* For purposes of determining investment adjustments under § 1.1502–32 and earnings and profits under § 1.1502–33(c) with respect to a member of a consolidated group that owns stock in a subsidiary, any deduction that is disallowed under this section is treated as a loss arising and absorbed by the member in the tax year in which the disallowance occurs.

(2) *Example.* (i) In 1986, P forms S with a contribution of $100, and S becomes a member of the P group. On February 1, 1987, S buys all the stock of T for $100. T has an asset with a basis of $0 and a value of $100. In 1988, T sells the asset for $100. Under the investment adjustment system, S's basis in the T stock increases to adjustment system, S's basis in the T stock increases to $200, P's basis in the S stock increases to $200, and P's earnings and profits and S's earnings and profits increase by $100. In 1989, S sells all of the T stock for $100, and S's recognized loss of $100 is disallowed under paragraph (a)(1) of this section.

(ii) Under paragraph (d)(1) of this section, S's earnings and profits for 1989 are reduced by $100, the amount of the loss disallowed under paragraph (a)(1). As a result, P's basis in the S stock is reduced from $200 to $100 under the investment adjustment system. P's earnings and profits for 1989 are correspondingly reduced by $100.

(e) *Effective dates*—(1) *General rule.* This section applies with respect to dispositions after January 6, 1987. For dispositions on or after November 19, 1990, however, this section applies only if the stock was deconsolidated (as that term is defined in § 1.337(d)–2(b)(2)) before November 19, 1990, and only to the extent the disposition is not subject to § 1.337(d)–2 or § 1.1502–20.

(2) *Binding contract rule.* For purposes of this paragraph (e), if a corporation became a subsidiary pursuant to a binding written contract entered into before January 6, 1987, and in continuous effect until the corporation became a subsidiary, or a disposition was pursuant to a binding written contract entered into before March 9, 1990, and in continuous effect until the disposition, the date the contract became binding shall be treated as the date the corporation became a subsidiary or as the date of disposition.

(3) *Application of § 1.1502–20T to certain transactions*—(i) *In general.* If a group files the certification described in paragraph (e)(3)(ii) of this section, it may apply § 1.1502–20T (as contained in the CFR edition revised as of April 1, 1990), to all of its members with respect to all dispositions and deconsolidations by the certifying group to which § 1.1502–20T otherwise applied by its terms occurring—

(A) On or after March 9, 1990 (but only if not pursuant to a binding contract described in § 1.337(d)–1T(e)(2) (as contained in the CFR edition revised as of April 1, 1990) that was entered into before March 9, 1990); and

(B) Before November 19, 1990 (or thereafter, if pursuant to a binding contract described in § 1.1502–20T(g)(3) that was entered into on or after March 9, 1990 and before November 19, 1990).

The certification under this paragraph (e)(3)(i) with respect to the application of § 1.1502–20T to any transaction described in this paragraph (e)(3)(i) may not be withdrawn and, if the certification is filed, § 1.1502–20T must be applied to all such transactions on all returns (including amended returns) on which such transactions are included.

(ii) *Time and manner of filing certification.* The certification described in paragraph (e)(3)(i) of this section must be made in a separate statement entitled ''[insert name and employer identification number of common parent] hereby certifies under § 1.337(d)–1 (e)(3) that the group of which it is the common parent is applying § 1.1502–20T to all transactions to which that section otherwise applied by it terms.'' The statement must be signed by the common parent and filed with the group's income tax return for the taxable year of the first disposition or deconsolidation to which the certification applies. If the separate statement required under this paragraph (e)(3) is to be filed with a return the due date (including extensions) of which is before November 16, 1991, the statement may be filed with an amended return for the year of the disposition or deconsolidation that is filed within 180 days after September 13, 1991. Any other filings required under §1.1502–20T, such as the statement required under §1.1502–20T(f)(5), may be made with the amended return, regardless of whether §1.1502–20T permits such filing by amended return.

[T.D. 8319, 55 FR 49031, Nov. 26, 1990, as amended by T.D. 8364, 56 FR 47389, Sept. 19, 1991; 57 FR 53550, Nov. 12, 1992; T.D. 8560, 59 FR 41674, 41675, Aug. 15, 1994; T.D. 8597, 60 FR 36679, July 18, 1995]

§1.337(d)–1T [Reserved]

§1.337(d)–2 Loss limitation window period.

(a) *Loss disallowance*—(1) *General rule.* No deduction is allowed for any loss recognized by a member of a consolidated group with respect to the disposition of stock of a subsidiary.

(2) *Definitions.* For purposes of this section—

(i) The definitions in §1.1502–1 apply.

(ii) *Disposition* means any event in which gain or loss is recognized, in whole or in part.

(3) *Coordination with loss deferral and other disallowance rules.* For purposes of this section, the rules of §1.1502–20(a)(3) apply, with appropriate adjustments to reflect differences between the approach of this section and that of §1.1502–20.

(b) *Basis reduction on deconsolidation*—(1) *General rule.* If the basis of a member of a consolidated group in a share of stock of a subsidiary exceeds its value immediately before a deconsolidation of the share, the basis of the share is reduced at that time to an amount equal to its value. If both a disposition and a deconsolidation occur with respect to a share in the same transaction, paragraph (a) of this section applies and, to the extent necessary to effectuate the purposes of this section, this paragraph (b) applies following the application of paragraph (a) of this section.

(2) *Deconsolidation.* ‘‘Deconsolidation’’ means any event that causes a share of stock of a subsidiary that remains outstanding to be no longer owned by a member of any consolidated group of which the subsidiary is also a member.

(3) *Value.* ‘‘Value’’ means fair market value.

(4) *Loss within 2 years after basis reduction*—(i) *In general.* If a share is deconsolidated and a direct or indirect disposition of the share occurs within 2 years after the date of the deconsolidation, a separate statement entitled ‘‘statement pursuant to §1.337(d)–2(b)(4)’’ must be filed with the taxpayer's return for the year of disposition. If the taxpayer fails to file the statement as required, no deduction is allowed for any loss recognized with respect to the disposition. If the separate statement is required to be filed with a return the due date (including extensions) of which is before January 16, 1991, or with a return due (including extensions) after January 15, 1991 but filed before that date, the statement may be filed with an amended return for the year of the disposition or with the taxpayer's first subsequent return the due date (including extensions) of which is after January 15, 1991. A disposition after the 2-year period described in this paragraph (b)(4) that is pursuant to an agreement, option, or other arrangement entered into within the 2-year period is treated as a disposition within the 2-year period for purposes of this section.

(ii) *Contents of statement.* The statement required under paragraph (b)(4)(i) of this section must contain—

(A) The name and employer identification number (E.I.N.) of the subsidiary.

(B) The amount of prior basis reduction with respect to the stock of the subsidiary under paragraph (b)(1) of this section.

(C) The basis of the stock of the subsidiary immediately before the disposition.

(D) The amount realized on the disposition.

(E) The amount of the loss recognized on the disposition.

(c) *Allowable loss*—(1) *Application.* This paragraph (c) applies with respect to stock of a subsidiary only if—

(i) Before February 1, 1991, the consolidated group either—

(A) Disposes (in one or more transactions) of its entire equity interest in the subsidiary to persons not related to any member of the consoldiated group within the meaning of section 267(b) or section 707(b)(1) (substituting ''10 percent'' for ''50 percent'' each place that it appears); or

(B) Sustains a worthless stock loss under section 165(g); and

(ii) A separate statement entitled ''allowed loss under § 1.337(d)–2(c)'' is filed in accordance with paragraph (c)(3) of this section.

(2) *General rule.* Loss is not disallowed under paragraph (a)(1) of this section and basis is not reduced under paragraph (b)(1) of this section to the extent the taxpayer establishes that the loss or basis is not attributable to the recognition of built-in gain on the disposition of an asset (including stock and securities). Loss or basis may be attributable to the recognition of built-in gain on the disposition of an asset by a prior group. For purposes of this section, gain recognized on the disposition of an asset is built-in gain to the extent attributable, directly or indirectly, in whole or in part, to any excess of value over basis that is reflected, before the disposition of the asset, in the basis of the share, directly or indirectly, in whole or in part, after applying section 1503(e) and other applicable provisions of the Code and regulations.

(3) *Contents of statement and time of filing.* The statement required under paragraph (c)(1)(ii) of this section must be filed with the taxpayer's return for the year of the disposition or deconsolidation, and must contain—

(i) The name and employer identification number (E.I.N.) of the subsidiary.

(ii) The basis of the stock of the subsidiary immediately before the disposition or deconsolidation.

(iii) The amount realized on the disposition and the amount of fair market value on the deconsolidation.

(iv) The amount of the deduction not disallowed under paragraph (a)(1) of this section by reason of this paragraph (c) and the amount of basis not reduced under paragraph (b)(1) of this section by reason of this paragraph (c).

(v) The amount of loss disallowed under paragraph (a)(1) of this section and the amount of basis reduced under paragraph (b)(1) of this section.

If the separate statement is required to be filed with a return the due date (including extensions) of which is before January 16, 1991, or with a return due (including extensions) after January 15, 1991 but filed before that date, the statement may be filed with an amended return for the year of the disposition or deconsolidation or with the taxpayer's first subsequent return the due date (including extensions) of which is after January 15, 1991.

(4) *Example.* The principles of paragraphs (a), (b), and (c) of this section are illustrated by the examples in §§ 1.337(d)–1(a) and 1.1502–20(a) (other than *Examples 3, 4,* and *5*) and (b), with appropriate adjustments to reflect differences between the approach of this section and that of § 1.1502–20, and by the following example. For purposes of the examples in this section, unless otherwise stated, the group files consolidated returns on a calendar year basis, the facts set forth the only corporate activity, and all sales and purchases are with unrelated buyers or sellers. The basis of each asset is the same for determining earnings and profits adjustments and taxable income. Tax liability and its effect on basis, value, and earnings and profits are disregarded. *Investment adjustment system* means the rules of § 1.1502–32.

Example. Loss offsetting built-in gain in a prior group. (i) P buys all the stock of T for $50 in Year 1, and T becomes a member of the P group. T has 2 assets. Asset 1 has a basis of $50 and a value of $0, and asset 2 has a basis of $0 and a value of $50. T sells asset 2 during Year 3 for $50, and recognizes a $50 gain. Under the investment adjustment system, P's basis in the T stock increases to $100 as a result of the recognition of gain. In year 5, all of the stock of P is acquired by the P1 group, and the former members of the P group become members of the P1 group. T then sells asset 1 for $0, and recognizes a $50 loss. Under the investment adjustment system. P's basis in the T stock decreases to $50 as a result of the loss. T's assets decline in value from $50 to $40. P then sells all the stock of T for $40 and recognizes a $10 loss.

(ii) P's basis in the T stock reflects both T's unrecognized gain and unrecognized loss with respect to its assets. The gain T recognizes on the disposition of asset 2 is built-in gain with respect to both the P and the P1 groups for purposes of paragraph (c)(2) of this section. In addition, the loss T recognizes on the disposition of asset 2 is built-in loss with respect to the P and P1 groups for purposes of paragraph (c)(2) of this section. T's recognition of the built-in loss while a member of the P1 group offsets the effect on T's stock basis of T's recognition of the built-in gain while a member of the P group. Thus, P's $10 loss on the sale of the T stock is not attributable to the recognition of built-in gain, and the loss is therefore not disallowed under paragraph (c)(2) of this section.

(iii) The result would be the same if, instead of having a $50 built-in loss in asset 2 when it becomes a member of the P group, T has a $50 net operating loss carryover and the carryover is used by the P group.

(d) *Successors.* For purposes of this section, the rules and examples of §1.1502–20(d) apply, with appropriate adjustments to reflect differences between the approach of this section and that of §1.1502–20.

(e) *Anti-avoidance rules.* For purposes of this section, the rules and examples of §1.1502–20(e) apply, with appropriate adjustments to reflect differences between the approach of this section and that of §1.1502–20.

(f) *Investment adjustments and earnings and profits.* For purposes of this section, the rules and examples of §1.1502–20 (f) apply, with appropriate adjustments to reflect differences between the approach of this section and that of §1.1502–20.

(g) *Effective dates*—(1) *General rule.* Except as otherwise provided in this paragraph (g), this section applies with respect to dispositions and deconsolidations on or after November 19, 1990, but only to the extent the disposition or deconsolidation is not subject to §1.1502–20. For this purpose, dispositions deferred under §§1.1502–13 and 1.1502–14 (as contained in the 26 CFR part 1 edition revised as of April 1, 1995) are deemed to occur at the time the deferred gain or loss is taken into account unless the stock was deconsolidated before November 19, 1990. If stock of a subsidiary became worthless during a taxable year including November 19, 1990, the disposition with respect to the stock is treated as occurring on the date the stock became worthless.

(2) *Binding contract rule.* For purposes of this paragraph (g), if a disposition or deconsolidation is pursuant to a binding written contract entered into before March 9, 1990, and in continuous effect until the disposition or deconsolidation, the date the contract became binding is treated as the date of the disposition or deconsolidation.

(3) *Application of §1.1502–20T to certain transactions*—(i) *In general.* If a group files the certification described in paragraph (g)(3)(ii) of this section, it may apply §1.1502–20T (as contained in the CFR edition revised as of April 1, 1990), to all of its members with respect to all dispositions and deconsolidations by the certifying group to which §1.1502–20T otherwise applied by its terms occurring—

(A) On or after March 9, 1990 (but only if not pursuant to a binding contract described in §1.337(d)–1T(e)(2) (as contained in the CFR edition revised as of April 1, 1990) that was entered into before March 9, 1990); and

(B) Before November 19, 1990 (or thereafter, if pursuant to a binding contract described in §1.1502–20T(g)(3) that was entered into on or after March 9, 1990 and before November 19, 1990).

The certification under this paragraph (g)(3)(i) with respect to the application of §1.1502–20T to any transaction described in this paragraph (g)(3)(i) may not be withdrawn and, if the certification is filed, §1.1502–20T must be applied to all such transactions on all returns (including amended returns) on which such transactions are included.

(ii) *Time and manner of filing certification.* The certification described in paragraph (g)(3)(i) of this section must be made in a separate statement entitled "[insert name and employer identification number of common parent] hereby certifies under §1.337(d)–2(g)(3) that the group of which it is the common parent is applying §1.1502–20T to all transactions to which that section otherwise applied by its terms." The statement must be signed by the common parent and filed with the group's income tax return for the taxable year of the first disposition or deconsolidation to which the certification applies. If the separate statement required under this paragraph (g)(3) is to be filed with a return the due date (including extensions) of which is before November 16, 1991, the statement may be filed with an amended return for the year of the disposition or deconsolidation that is filed within 180 days after September 13, 1991. Any other filings required under § 1.1502–20T, such as the statement required under § 1.1502–20T(f)(5), may be made with the amended return, regardless of whether § 1.1502–20T permits such filing by amended return.

[T.D. 8364, 56 FR 47390, Sept. 19, 1991; 57 FR 53550, Nov. 12, 1992; T.D. 8560, 59 FR 41674, Aug. 15, 1994; T.D. 8597, 60 FR 36679, July 18, 1995]

§ 1.337(d)–4 Taxable to tax-exempt.

(a) *Gain or loss recognition*—(1) *General rule.* Except as provided in paragraph (b) of this section, if a taxable corporation transfers all or substantially all of its assets to one or more tax-exempt entities, the taxable corporation must recognize gain or loss immediately before the transfer as if the assets transferred were sold at their fair market values. But see section 267 and paragraph (d) of this section concerning limitations on the recognition of loss.

(2) *Change in corporation's tax status treated as asset transfer.* Except as provided in paragraphs (a)(3) and (b) of this section, a taxable corporation's change in status to a tax-exempt entity will be treated as if it transferred all of its assets to a tax-exempt entity immediately before the change in status becomes effective in a transaction to which paragraph (a)(1) of this section applies. For example, if a State, a political subdivision thereof, or an entity any portion of whose income is excluded from gross income under section 115, acquires the stock of a taxable corporation and thereafter any of the taxable corporation's income is excluded from gross income under section 115, the taxable corporation will be treated as if it transferred all of its assets to a tax-exempt entity immediately before the stock acquisition.

(3) *Exceptions for certain changes in status*—(i) *To whom available.* Paragraph (a)(2) of this section does not apply to the following corporations—

(A) A corporation previously tax-exempt under section 501(a) which regains its tax-exempt status under section 501(a) within three years from the later of a final adverse adjudication on the corporation's tax exempt status, or the filing by the corporation, or by the Secretary or his delegate under section 6020(b), of a federal income tax return of the type filed by a taxable corporation;

(B) A corporation previously tax-exempt under section 501(a) or that applied for but did not receive recognition of exemption under section 501(a) before January 15, 1997, if such corporation is tax-exempt under section 501(a) within three years from January 28, 1999;

(C) A newly formed corporation that is tax-exempt under section 501(a) (other than an organization described in section 501(c)(7)) within three taxable years from the end of the taxable year in which it was formed;

(D) A newly formed corporation that is tax-exempt under section 501(a) as an organization described in section 501(c)(7) within seven taxable years from the end of the taxable year in which it was formed;

(E) A corporation previously tax-exempt under section 501(a) as an organization described in section 501(c)(12), which, in a given taxable year or years prior to again becoming tax-exempt, is a taxable corporation solely because less than 85 percent of its income consists of amounts collected from members for the sole purpose of meeting losses and expenses; if, in a taxable year, such a corporation would be a taxable corporation even if 85 percent or more of its income consists of amounts collected from members for the sole purpose of meeting losses and expenses (a non-85 percent violation), paragraph (a)(3)(i)(A) of this section shall apply as if the corporation became a taxable corporation in its first taxable year that a non-85 percent violation occurred; or

(F) A corporation previously taxable that becomes tax-exempt under section 501(a) as an organization described in section 501(c)(15) if during each taxable year in which it is described in section

501(c)(15) the organization is the subject of a court supervised rehabilitation, conservatorship, liquidation, or similar state proceeding; if such a corporation continues to be described in section 501(c)(15) in a taxable year when it is no longer the subject of a court supervised rehabilitation, conservatorship, liquidation, or similar state proceeding, paragraph (a)(2) of this section shall apply as if the corporation first became tax-exempt for such taxable year.

(ii) *Application for recognition.* An organization is deemed to have or regain tax-exempt status within one of the periods described in paragraph (a)(3)(i)(A), (B), (C), or (D) of this section if it files an application for recognition of exemption with the Commissioner within the applicable period and the application either results in a determination by the Commissioner or a final adjudication that the organization is tax-exempt under section 501(a) during any part of the applicable period. The preceding sentence does not require the filing of an application for recognition of exemption by any organization not otherwise required, such as by §1.501(a)-1, §1.505(c)-1T, and §1.508–1(a), to apply for recognition of exemption.

(iii) *Anti-abuse rule.* This paragraph (a)(3) does not apply to a corporation that, with a principal purpose of avoiding the application of paragraph (a)(1) or (a)(2) of this section, acquires all or substantially all of the assets of another taxable corporation and then changes its status to that of a tax-exempt entity.

(4) *Related transactions.* This section applies to any series of related transactions having an effect similar to any of the transactions to which this section applies.

(b) *Exceptions.* Paragraph (a) of this section does not apply to—

(1) Any assets transferred to a tax-exempt entity to the extent that the assets are used in an activity the income from which is subject to tax under section 511(a) (referred to hereinafter as a ‘‘section 511(a) activity’’). However, if assets used to any extent in a section 511(a) activity are disposed of by the tax-exempt entity, then, notwithstanding any other provision of law (except section 1031 or section 1033), any gain (not in excess of the amount not recognized by reason of the preceding sentence) shall be included in the tax-exempt entity’s unrelated business taxable income. To the extent that the tax-exempt entity ceases to use the assets in a section 511(a) activity, the entity will be treated for purposes of this paragraph (b)(1) as having disposed of the assets on the date of the cessation for their fair market value. For purposes of paragraph (a)(1) of this section and this paragraph (b)(1)—

(i) If during the first taxable year following the transfer of an asset or the corporation’s change to tax-exempt status the asset will be used by the tax-exempt entity partly or wholly in a section 511(a) activity, the taxable corporation will recognize an amount of gain or loss that bears the same ratio to the asset’s built-in gain or loss as 100 percent reduced by the percentage of use for such taxable year in the section 511(a) activity bears to 100 percent. For purposes of determining the gain or loss, if any, to be recognized, the taxable corporation may rely on a written representation from the tax-exempt entity estimating the percentage of the asset’s anticipated use in a section 511(a) activity for such taxable year, using a reasonable method of allocation, unless the taxable corporation has reason to believe that the tax-exempt entity’s representation is not made in good faith;

(ii) If for any taxable year the percentage of an asset’s use in a section 511(a) activity decreases from the estimate used in computing gain or loss recognized under paragraph (b)(1)(i) of this section, adjusted for any decreases taken into account under this paragraph (b)(1)(ii) in prior taxable years, the tax-exempt entity shall recognize an amount of gain or loss that bears the same ratio to the asset’s built-in gain or loss as the percentage point decrease in use in the section 511(a) activity for the taxable year bears to 100 percent;

(iii) If property on which all or a portion of the gain or loss is not recognized by reason of the first sentence of paragraph (b)(1) of this section is disposed of in a transaction that qualifies for nonrecognition treatment under section 1031 or section 1033, the tax-exempt entity must treat the replacement property as remaining subject to paragraph (b)(1) of this section to the extent that the exchanged or involuntarily converted property was so subject;

(iv) The tax-exempt entity must use the same reasonable method of allocation for determining the percentage that it uses the assets in a section 511(a) activity as it uses for other tax purposes, such as determining the amount of depreciation deductions. The tax-exempt entity also must use this same reasonable method of allocation for each taxable year that it holds the assets; and

(v) An asset's built-in gain or loss is the amount that would be recognized under paragraph (a)(1) of this section except for this paragraph (b)(1);

(2) Any transfer of assets to the extent gain or loss otherwise is recognized by the taxable corporation on the transfer. See, for example, sections 336, 337(b)(2), 367, and 1001;

(3) Any transfer of assets to the extent the transaction qualifies for nonrecognition treatment under section 1031 or section 1033; or

(4) Any forfeiture of a taxable corporation's assets in a criminal or civil action to the United States, the government of a possession of the United States, a state, the District of Columbia, the government of a foreign country, or a political subdivision of any of the foregoing; or any expropriation of a taxable corporation's assets by the government of a foreign country.

(c) *Definitions.* For purposes of this section:

(1) *Taxable corporation.* A *taxable corporation* is any corporation that is not a tax-exempt entity as defined in paragraph (c)(2) of this section.

(2) *Tax-exempt entity.* A *tax-exempt entity* is—

(i) Any entity that is exempt from tax under section 501(a) or section 529;

(ii) A charitable remainder annuity trust or charitable remainder unitrust as defined in section 664(d);

(iii) The United States, the government of a possession of the United States, a state, the District of Columbia, the government of a foreign country, or a political subdivision of any of the foregoing;

(iv) An Indian Tribal Government as defined in section 7701(a)(40), a subdivision of an Indian Tribal Government determined in accordance with section 7871(d), or an agency or instrumentality of an Indian Tribal Government or subdivision thereof;

(v) An Indian Tribal Corporation organized under section 17 of the Indian Reorganization Act of 1934, 25 U.S.C. 477, or section 3 of the Oklahoma Welfare Act, 25 U.S.C. 503;

(vi) An international organization as defined in section 7701(a)(18);

(vii) An entity any portion of whose income is excluded under section 115; or

(viii) An entity that would not be taxable under the Internal Revenue Code for reasons substantially similar to those applicable to any entity listed in this paragraph (c)(2) unless otherwise explicitly made exempt from the application of this section by statute or by action of the Commissioner.

(3) *Substantially all.* The term *substantially all* has the same meaning as under section 368(a)(1)(C).

(d) *Loss limitation rule.* For purposes of determining the amount of gain or loss recognized by a taxable corporation on the transfer of its assets to a tax-exempt entity under paragraph (a) of this section, if assets are acquired by the taxable corporation in a transaction to which section 351 applied or as a contribution to capital, or assets are distributed from the taxable corporation to a shareholder or another member of the taxable corporation's affiliated group, and in either case such acquisition or distribution is made as part of a plan a principal purpose of which is to recognize loss by the taxable corporation on the transfer of such assets to the tax-exempt entity, the losses recognized by the taxable corporation on such assets transferred to the tax-exempt entity will be disallowed. For purposes of the preceding sentence, the principles of section 336(d)(2) apply.

(e) *Effective date.* This section is applicable to transfers of assets as described in paragraph (a) of this section occurring after January 28, 1999, unless the transfer is pursuant to a written agreement which is (subject to customary conditions) binding on or before January 28, 1999.

§ 1.338–4 Asset and stock consistency.

(a) Introduction.
(1) Overview.
(2) General application.
(3) Extensions of the general rules.
(4) Application where certain dividends are paid.
(5) Application to foreign target affiliates.
(6) Stock consistency.
(b) Consistency for direct acquisitions.
(1) General rule.
(2) Section 338(h)(10) elections.
(c) Gain from disposition reflected in basis of target stock.
(1) General rule.
(2) Gain not reflected if section 338 election made for target.
(3) Gain reflected by reason of distributions.
(4) Controlled foreign corporations.
(5) Gain recognized outside the consolidated group.
(d) Basis of acquired assets.
(1) Carryover basis rule.
(2) Exceptions to carryover basis rule for certain assets.
(3) Exception to carryover basis rule for de minimis assets.
(4) Mitigation rule.
(i) General rule.
(ii) Time for transfer.
(e) Examples.
(1) In general.
(2) Direct acquisitions.
(f) Extension of consistency to indirect acquisitions.
(1) Introduction.
(2) General rule.
(3) Basis of acquired assets.
(4) Examples.
(g) Extension of consistency if dividends qualifying for 100 percent dividends received deduction are paid.
(1) General rule for direct acquisitions from target.
(2) Other direct acquisitions having same effect.
(3) Indirect acquisitions.
(4) Examples.
(h) Consistency for target affiliates that are controlled foreign corporations.
(1) In general.
(2) Income or gain resulting from asset dispositions.
(i) General rule.
(ii) Basis of controlled foreign corporation stock.
(iii) Operating rule.
(iv) Increase in asset or stock basis.
(3) Stock issued by target affiliate that is a controlled foreign corporation.
(4) Certain distributions.
(i) General rule.
(ii) Basis of controlled foreign corporation stock.
(iii) Increase in asset or stock basis.
(5) Examples.
(i) [Reserved]
(j) Anti-avoidance rules.
(1) Extension of consistency period.
(2) Qualified stock purchase and 12-month acquisition period.
(3) Acquisitions by conduits.
(i) Asset ownership.
(A) General rule.
(B) Application of carryover basis rule.
(ii) Stock acquisitions.
(A) Purchase by conduit.
(B) Purchase of conduit by corporation.
(C) Purchase of conduit by conduit.
(4) Conduit.
(5) Existence of arrangement.
(6) Predecessor and successor.
(i) Persons.
(ii) Assets.
(7) Examples.

§ 1.338–5 International aspects of section 338.

(a) Scope.
(b) Application of section 338 to foreign targets.

(1) In general.

(2) Ownership of FT stock on the acquisition date.

(3) Carryover FT stock.

(i) Definition.

(ii) Carryover of earnings and profits.

(iii) Cap on carryover of earnings and profits.

(iv) Post-acquisition date distribution of old FT earnings and profits.

(v) Old FT earnings and profits unaffected by post-acquisition date deficits.

(vi) Character of FT stock as carryover FT stock eliminated upon disposition.

(4) Passive foreign investment company stock.

(c) Dividend treatment under section 1248(e).

(d) Allocation of foreign taxes.

(e) Operation of section 338(h)(16). [Reserved]

(f) Examples.

§1.338(b)–1 Adjusted grossed-up basis.

(a) Scope.

(b) Adjustment events.

(c) AGUB.

(1) In general.

(2) Time when AGUB determined.

(d) Grossed-up basis of recently purchased stock.

(1) General rule.

(2) Application.

(e) Basis of nonrecently purchased stock.

(1) In general.

(2) Effect of gain recognition election.

(i) In general.

(ii) Basis amount.

(iii) Losses not recognized.

(iv) Stock subject to election.

(3) Procedure for making gain recognition election.

(i) In general.

(ii) Section 338(h)(10) election.

(4) Comparison with ADSP formula.

(f) Liabilities of new target.

(1) In general.

(2) Excluded obligations.

(i) In general.

(ii) Time when excluded obligations taken into account.

(3) Liabilities taken into account in determining amount realized on subsequent disposition.

(g) Other relevant items.

(1) In general.

(2) Flow-through of relevant item adjustment to target subsidiary.

(3) Adjustments by the Internal Revenue Service.

(h) Examples.

§1.338(b)–2T Allocation of adjusted grossed-up basis among target assets (temporary).

(a) Introduction.

(1) In general.

(2) Fair market value.

(b) General rule for allocating adjusted grossed-up basis.

(1) Cash and other items designated by the Internal Revenue Service.

(2) Other assets.

(i) In general.

(ii) Class II assets.

(iii) Class III assets.

(iv) Class IV assets.

(v) Class V assets.

(c) Certain limitations and special rules for basis allocable to an asset.

(1) Basis not to exceed fair market value.

(2) Assets subject to other limitations.

(3) Special rule for allocating adjusted grossed-up basis when purchasing corporation has nonrecently purchased stock.

(i) Scope.

(ii) Determination of hypothetical purchase price.

(iii) Allocation of adjusted grossed-up basis.

(4) Effective dates.

(d) Examples.

§1.338(b)–3T Subsequent adjustments to adjusted grossed-up basis (temporary).

(a) Scope.

(1) In general.

(2) Exceptions to applicability of section.

(3) Adjustment of aggregate deemed sale price.

(b) Definitions.

(1) Contingent liability.

(2) Contingent amount.

(3) Reduction amount.

(4) Acquisition date asset.

(c) General rule.

(1) Time when increases in adjusted grossed-up basis taken into account.

(2) Time when decreases in adjusted grossed-up basis taken into account.

(3) Amount of increases and decreases in adjusted grossed-up basis.

(d) Allocation of increases in adjusted grossed-up basis.

(1) In general.

(2) Effect of disposition or depreciation of acquisition date assets.

(e) Allocation of decreases in adjusted grossed-up basis.

(1) In general.

(2) Effect of disposition of assets or reduction of basis below zero.

(3) Section 338 property.

(f) Special rule for allocation of increases (or decreases) in adjusted grossed-up basis when hypothetical purchase price was used in allocating adjusted grossed-up basis.

(1) Scope.

(2) Allocation of increases (decreases) in adjusted grossed-up basis.

(3) Allocation to contingent income assets.

(g) Special rule for allocation of increases (decreases) in adjusted grossed-up basis to specific assets.

(1) Patents and similar property.
(i) Scope.
(ii) Specific allocation.
(2) Internal Revenue Service authority.
(h) Changes in old target's aggregate deemed sale price of assets.
(1) General rule.
(i) In general.
(ii) Redetermination of aggregate deemed sale price if the elective formula under section 338(h)(11) is used.
(iii) Redetermination of aggregate deemed sale price if the elective formula under section 338(h)(11) is not used.
(2) Procedure for transactions in which section 338(h)(10) is not elected.
(i) Income or loss included in new target's return.
(ii) Carryovers and carrybacks.
(A) Loss carryovers to new target taxable years.
(B) Loss carrybacks to taxable years of old target.
(C) Credit carryovers and carrybacks.
(3) Procedure for transactions in which section 338(h)(10) is elected.
(i) [Reserved.]
(j) Examples.

§ 1.338(h)(10)–1 Deemed asset sale and liquidation.

(a) Scope.
(b) Nomenclature.
(c) Definitions.
(1) Section 338(h)(10) target.
(2) S corporation shareholders.
(3) Selling consolidated group.
(4) Selling affiliate.
(d) Section 338(h)(10) election.
(1) In general.
(2) Simultaneous joint election requirement.
(3) Irrevocability.
(4) Effect of invalid election.
(e) Certain consequences of section 338(h)(10) election.
(1) Old T.
(2) Selling consolidated group, selling affiliate, or S corporation shareholders.
(i) In general.
(ii) Deemed liquidation of old T.
(iii) Basis of stock not acquired.
(iv) T stock sale.
(v) Example.
(3) Certain minority shareholders.
(i) In general.
(ii) T stock sale.
(iii) T stock not acquired.
(4) P.
(5) New T.
(6) Consolidated return of selling consolidated group.

(2) Formula.
(3) Liabilities.
(4) Other relevant items.
(5) Cross-reference.
(g) Examples.
(h) Inapplicability of provisions.

§ 1.338(i)–1 Effective dates.

(a) In general.
(b) Elective retroactive application.
(c) MADSP.
(d) Deemed election.

[T.D. 8515, 59 FR 2960, Jan. 20. 1994, as amended by T.D. 8626, 60 FR 54944, Oct. 27, 1995; T.D. 8711, 62 FR 2268, Jan. 16, 1997; T.D. 8710, 62 FR 3459, Jan. 23, 1997]

§ 1.338–1 Elections under section 338.

(a) *Scope.* This section prescribes rules relating to elections under section 338. Paragraphs (c)(6), (e), and (g) of this section do not apply to a target for which a section 338(h)(10) election is made.

(b) *Nomenclature.* For purposes of the regulations under section 338 (except as otherwise provided):

(1) T is a domestic corporation that has only one class of stock outstanding.

(2) P is a domestic corporation that purchases stock of T in a qualified stock purchase.

(3) The P group is an affiliated group of which P is a member.

(4) P1, P2, etc., are domestic corporations that are members of the P group.

(5) T1, T2, etc., are domestic corporations that are target affiliates of T. These corporations (T1, T2, etc.) have only one class of stock outstanding and may also be targets.

(6) S is a domestic corporation (unrelated to P and B) that owns T prior to the purchase of T by P. (S is referred to in cases in which it is appropriate to consider the effects of having all of the outstanding stock of T owned by a domestic corporation.)

(7) A, a U.S. resident or citizen, is an individual (unrelated to P and B) who owns T prior to the purchase of T by P. (A is referred to in cases in which it is appropriate to consider the effects of having all of the outstanding stock of T owned by an individual who is a U.S. resident or citizen. Ownership of T by A and ownership of T by S are mutually exclusive circumstances.)

(8) B, a U.S. resident or citizen, is an individual (unrelated to T, S, and A) who owns the stock of P.

(9) F, used as a prefix with the other terms in this paragraph (b), connotes foreign, rather than domestic, status. For example, FT is a foreign corporation (as defined in section 7701(a)(5)) and FA is an individual other than a U.S. citizen or resident.

(10) CFC, used as a prefix with the other terms in this paragraph (b) referring to a corporation, connotes a controlled foreign corporation (as defined in section 957, taking into account section 953(c)). A corporation identified with the prefix F may be a controlled foreign corporation. The prefix CFC is used when the corporation's status as a controlled foreign corporation is significant.

(c) *Definitions.* For purposes of the regulations under section 338 (except as otherwise provided):

(1) *Acquisition date.* The term *acquisition date* has the same meaning as in section 338(h)(2).

(2) *Affiliated group.* The term *affiliated group* has the same meaning as in section 338(h)(5). Corporations are affiliated on any day they are members of the same affiliated group with each other.

(3) *Common parent.* The term *common parent* has the same meaning as in section 1504.

(4) *Consistency period.* The *consistency period* is the period described in section 338(h)(4)(A) unless extended pursuant to § 1.338–4(j)(1).

(5) *Domestic corporation.* A *domestic* corporation is a corporation—

(i) That is domestic within the meaning of section 7701(a)(4) or that is treated as domestic for purposes of subtitle A of the Internal Revenue Code (e.g., to which an election under section 953(d) or 1504(d) applies); and

(ii) That is not a DISC, a corporation described in section 1248(e), or a corporation to which an election under section 936 applies.

(6) *Old target's final return. Old target's final return* is the income tax return of old target for the taxable year ending at the close of the acquisition date that includes the deemed sale of assets under section 338. If the disaffiliation rule of paragraph (e)(2)(i) of this section applies, target's *deemed sale return* is considered old target's final return.

(7) *Purchasing corporation.* The term *purchasing corporation* has the same meaning as in section 338(d)(1). Unless otherwise provided, any reference to the purchasing corporation is a reference to all members of the affiliated group of which the purchasing corporation is a member. See sections 338(h) (5) and (8).

(8) *Qualified stock purchase.* The term *qualified stock purchase* has the same meaning as in section 338(d)(3).

(9) *Related persons.* Two persons are related if stock in a corporation owned by one of the persons would be attributed under section 318(a) (other than section 318(a)(4)) to the other.

(10) *Section 338 election.* A *section 338 election* is an election to apply section 338(a) to target. A section 338 election may be made by filing a statement of section 338 election pursuant to § 1.338–1(d). The form on which this statement is filed is referred to in the regulations under section 338 as the *Form 8023.*

(11) *Section 338(h)(10) election.* A *section 338(h)(10) election* is an election to apply section 338(h)(10) to target. A section 338(h)(10) election may be made by making a joint election for target under § 1.338(h)(10)–1.

(12) *Selling group.* The *selling group* is the affiliated group (as defined in section 1504) that is eligible to file a consolidated return that includes target for the target's taxable period that includes the acquisition date and that does not have a target as common parent for the taxable year including the acquisition date.

(13) *Target; old target; new target. Target* is the target corporation as defined in section 338(d)(2). *Old target* refers to target for periods ending as of the close of the date of target's deemed sale of assets. *New target* refers to target for subsequent periods.

(14) *Target affiliate.* The term *target affiliate* has the same meaning as in section 338(h)(6) (applied without section 338(h)(6)(B)(i)). Thus, a corporation described in section 338(h)(6)(B)(i) is considered a target affiliate for all purposes of section 338. If a target affiliate is acquired in a qualified stock purchase, it is also a target.

(15) *12-month acquisition period.* The *12-month acquisition period* is the period

described in section 338(h)(1), unless extended pursuant to § 1.338–4(j)(2).

(d) *Time and manner of making election.* The purchasing corporation makes a section 338 election for target by filing a statement of section 338 election on Form 8023 in accordance with the instructions to the form. The section 338 election must be made not later than the 15th day of the 9th month beginning after the month in which the acquisition date occurs. A section 338 election is irrevocable.

(e) *Returns including tax liability from deemed sale*—(1) *In general.* Except as provided in paragraphs (e)(2) and (3) of this section, any tax liability resulting from the deemed sale of assets under section 338 is included in the final return of old target filed for old target's taxable year that ends at the close of the acquisition date. If old target is the common parent of an affiliated group, the final return may be a consolidated return (any such consolidated return must also include any tax liability from any deemed sales under section 338 by subsidiaries in the consolidated group that have the same acquisition date as old target and that are acquired by the purchasing corporation).

(2) *Old target's final taxable year otherwise included in consolidated return of selling group*—(i) *General rule.* If the selling group files a consolidated return for the period that includes the acquisition date, old target is disaffiliated from that group immediately before its deemed sale of assets under section 338 and must file a separate final return that includes only the items resulting from the deemed sale and the carryover items specified in paragraph (e)(2)(iii) of this section (deemed sale return). The deemed sale occurs at the close of the acquisition date and is the last transaction of old target. Any transactions of old target occurring on the acquisition date other than the deemed sale are included in the selling group's consolidated return. A deemed sale return includes a *combined return* as defined in paragraph (e)(4) of this section.

(ii) *Separate taxable year.* The deemed sale included in the deemed sale return under this paragraph (e)(2) occurs in a separate taxable year, except that old target's taxable year of the sale and the consolidated year of the selling group that includes the acquisition date are treated as the same year for purposes of determining the number of years in a carryover or carryback period.

(iii) *Carryover and carryback of tax attributes.* Target's attributes may be carried over to, and carried back from, the deemed sale return under the rules applicable to a corporation that ceases to be a member of a consolidated group.

(iv) *Old target is a component member of purchasing corporation's controlled group.* For purposes of its deemed sale return, target is a component member of the controlled group of corporations including the purchasing corporation unless target is treated as an excluded member under section 1563(b)(2).

(3) *Old target an S corporation.* If target is an S corporation for the period that ends on the day before the acquisition date, old target must file a deemed sale return as a C corporation. For this purpose, the principles of paragraph (e)(2) of this section apply.

(4) *Combined deemed sale return*—(i) *General rule.* Under section 338(h)(15), a combined deemed sale return (combined return) may be filed for all targets from a single selling consolidated group (as defined in § 1.338(h)(10)–1(c)(3)) that are acquired by the purchasing corporation on the same acquisition date and that otherwise would be required to file separate deemed sale returns. The combined return must include all such targets. For example, T and T1 may be included in a combined return if—

(A) T and T1 are directly owned subsidiaries of S;

(B) S is the common parent of a consolidated group; and

(C) P makes qualified stock purchases of T and T1 on the same acquisition date.

(ii) *Gain and loss offsets.* Gains and losses recognized on the deemed sale of assets by targets included in a combined return are treated as the gains and losses of a single target. In addition, loss carryovers of a target that were not subject to the separate return limitation year restrictions (SRLY restrictions) of the consolidated return regulations while that target was a member of the selling consolidated group may be applied without limitation to the gains of other targets included in the combined return. If, however, a target has loss carryovers that were subject to the SRLY restrictions while that target was a member of the selling consolidated group, the use of those losses in the combined return continues to be subject to those restrictions, applied in the same manner as if the combined return were a consolidated return. A similar rule applies, when appropriate, to other tax attributes.

(iii) *Procedure for filing a combined return.* A combined return is made by filing a single corporation income tax return in lieu of separate deemed sale returns for all targets required to be included in the combined return. The combined return reflects the deemed sales of all targets required to be included in the combined return. If the targets included in the combined return constitute a single affiliated group within the meaning of section 1504(a), the income tax return is signed by an officer of the common parent of that group. Otherwise, the return must be signed by an officer of each target included in the combined return. Rules similar to the rules in §1.1502–75(j) apply for purposes of preparing the combined return. The combined return must include an attachment prominently identified as an ‘‘ELECTION TO FILE A COMBINED RETURN UNDER SECTION 338(h)(15).’’ The attachment must—

(A) Contain the name, address, and employer identification number of each target required to be included in the combined return;

(B) Contain the following declaration (or a substantially similar declaration): ‘‘EACH TARGET IDENTIFIED IN THIS ELECTION TO FILE A COMBINED RETURN CONSENTS TO THE FILING OF A COMBINED RETURN’’; and

(C) For each target, be signed by a person who states under penalties of perjury that he or she is authorized to act on behalf of such target.

(iv) *Consequences of filing a combined return.* Each target included in a combined return is severally liable for any tax associated with the combined return. See §1.338–2(d)(1).

(5) *Deemed sale excluded from purchasing corporation's consolidated return.* Old target may not be considered a member of any affiliated group that includes the purchasing corporation with respect to the deemed sale of target assets under section 338.

(6) *Due date for old target's final return*—(i) *General rule.* Old target's final return is generally due on the 15th day of the third calendar month following the month in which the acquisition date occurs. See section 6072 (time for filing income tax returns).

(ii) *Application of §1.1502–76(c)*—(A) *In general.* Section 1.1502–76(c) applies to old target's final return if old target was a member of a selling group that did not file consolidated returns for the taxable year of the common parent that precedes the year that includes old target's acquisition date. If the selling group has not filed a consolidated return that includes old target's taxable period that ends on the acquisition date, target may, on or before the final return due date (including extensions), either—

(*1*) File a deemed sale return on the assumption that the selling group will file the consolidated return; or

(*2*) File a return for so much of old target's taxable period as ends at the close of the acquisition date on the assumption that the consolidated return will not be filed.

(B) *Deemed extension.* For purposes of applying §1.1502–76(c)(2), an extension of time to file old target's final return is considered to be in effect until the last date for making the election under section 338.

(C) *Erroneous filing of deemed sale return.* If, pursuant to this paragraph (e)(6)(ii), target files a deemed sale return but the selling group does not file a consolidated return, target must file a substituted return for old target not later than the due date (including extensions) for the return of the common parent with which old target would have been included in the consolidated return. The substituted return is for so much of old target's taxable year as ends at the close of the acquisition date. Under §1.1502–76(c)(2), the deemed sale return is not considered a return for purposes of section 6011 (relating to the general requirement of filing a return) if a substituted return must be filed.

(D) *Erroneous filing of return for regular tax year.* If, pursuant to this paragraph (e)(6)(ii), target files a return for so much of old target's regular taxable year as ends at the close of the acquisition date but the selling group files a consolidated return, target must file an amended return for old target not later than the due date (including extensions) for the selling group's consolidated return. (The amended return is a deemed sale return.)

(E) *Last date for payment of tax.* If either a substituted or amended final return of old target is filed pursuant to this paragraph (e)(6)(ii), the last date prescribed for payment of tax is the final return due date (as defined in paragraph (e)(6)(i) of this section).

(7) *Examples.* This paragraph (e) may be illustrated by the following examples:

Example 1. (a) S is the common parent of a consolidated group that includes T. The S group files calendar year consolidated returns. At the close of June 30 of Year 1, P makes a qualified stock purchase of T from S. P makes a section 338 election for T, and the deemed sale of T's assets occurs as of the close of T's acquisition date (June 30).

(b) T is considered disaffiliated for purposes of reporting the deemed sale. Accordingly, T is included in the S group's consolidated return through T's acquisition date except that the tax liability resulting from the deemed sale of assets is reported in a separate deemed sale return of T. Provided that T is not treated as an excluded member under section 1563(b)(2), T is a component member of P's controlled group for the taxable year represented by the deemed sale, and the taxable income bracket amounts available in calculating tax on the deemed sale return must be limited accordingly.

(c) If P purchased the stock of T at 10 a.m. on June 30 of Year 1, the results would be the same. See paragraph (e)(2)(i) of this section.

Example 2. The facts are the same as in *Example 1*, except that the S group does not file consolidated returns. T must file a separate return for its taxable year ending on June 30 of Year 1, which includes the deemed sale.

(f) *Waiver*—(1) *Certain additions to tax.* An addition to tax or additional amount (addition) under subchapter A of chapter 68 of the Internal Revenue Code arising on or before the last day for making the election under section 338, by reason of circumstances that would not exist but for an election under section 338, is waived if—

(i) Under the particular statute the addition is excusable upon a showing of reasonable cause; and

(ii) Corrective action is taken on or before the last day.

(2) *Notification.* The Service should be notified at the time of correction (e.g., by attaching a statement to a return that constitutes corrective action) that the waiver rule of this paragraph (f) is being asserted.

(3) *Elections or other actions required to be specified on a timely filed return*—(i) *In general.* If paragraph (f)(1) of this section applies or would apply if there was an underpayment, any election or other action that must be specified on a timely filed return for the taxable period covered by the late filed return described in paragraph (f)(1) of this section is considered timely if specified on a late-filed return filed on or before the last day for making the election under section 338.

(ii) *New target in purchasing corporation's consolidated return.* If new target is includible for its first taxable year in a consolidated return filed by the affiliated group of which the purchasing corporation is a member on or before the last day for making the election under section 338, any election or other action that must be specified in a timely filed return for new target's first taxable year (but which is not specified in the consolidated return) is considered timely if specified in an amended return filed on or before such last day, at the place where the consolidated return was filed.

(4) *Examples.* This paragraph (f) may be illustrated by the following examples:

Example 1. T is an unaffiliated corporation with a tax year ending March 31. At the close of September 20 of Year 1, P makes a qualified stock purchase of T. P does not join in filing a consolidated return. P makes a section 338 election for T on or before June 15 of Year 2, which causes T's taxable year to end as of the close of September 20 of Year 1. An income tax return for T's taxable period ending on September 20 of Year 1 was due on December 15 of Year 1. Additions to tax for failure to file a return and to pay tax shown on a return will not be imposed if T's return is filed and the tax paid on or before June 15 of

Year 2. (This waiver applies even if the acquisition date coincides with the last day of T's former taxable year, i.e., March 31 of Year 2.) Interest on any underpayment of tax for old T's short taxable year ending September 20 of Year 1 runs from December 15 of Year 1. A statement indicating that the waiver rule of §1.338–1(f) is being asserted should be attached to T's return.

Example 2. Assume the same facts as in *Example 1.* Assume further that new T adopts the calendar year by filing, on or before June 15 of Year 2, its first return (for the period beginning on September 21 of Year 1 and ending on December 31 of Year 1) indicating that a calendar year is chosen. See §1.338–2(d)(8). Any additions to tax or amounts described in this paragraph (f) which arise by reason of the late filing of a return for the period ending on December 31 of Year 1 are waived, because they are based on circumstances that would not exist but for the section 338 election. Notwithstanding this waiver, however, the return is still considered due March 15 of Year 2, and interest on any underpayment runs from that date.

Example 3. Assume the same facts as in *Example 2,* except that T's former taxable year ends on October 31. Although prior to the election old T had a return due on January 15 of Year 2 for its year ending October 31 of Year 1, that return need not be filed because a timely election under section 338 was made. Instead, old T must file a final return for the period ending on September 20 of Year 1, which is due on December 15 of Year 1.

(g) *Special rules for foreign corporations or DISCs*—(1) *Elections by certain foreign purchasing corporations*—(i) *General rule.* A qualifying foreign purchasing corporation is not required to file a statement of section 338 election for a qualifying foreign target before the earlier of 3 years after the acquisition date and the 180th day after the close of the purchasing corporation's taxable year within which a triggering event occurs.

(ii) *Qualifying foreign purchasing corporation.* A purchasing corporation is a *qualifying foreign purchasing corporation* only if, during the acquisition period of a qualifying foreign target, all the corporations in the purchasing corporation's affiliated group are foreign corporations that are not subject to United States tax.

(iii) *Qualifying foreign target.* A target is a *qualifying foreign target* only if target and its target affiliates are foreign corporations that, during target's acquisition period, are not subject to United States tax (and will not become subject to United States tax during such period by reason of a section 338 election). A target affiliate is taken into account for purposes of the preceding sentence only if, during target's 12-month acquisition period, it is or becomes a member of the affiliated group that includes the purchasing corporation.

(iv) *Triggering event.* A triggering event occurs in the taxable year of the qualifying foreign purchasing corporation in which either that corporation or any corporation in its affiliated group becomes subject to United States tax.

(v) *Subject to United States tax.* For purposes of this paragraph (g)(1), a foreign corporation is considered *subject to United States tax*—

(A) For the taxable year for which that corporation is required under §1.6012–2(g) (other than §1.6012–2(g)(2)(i)(*b*)(*2*)) to file a United States income tax return; or

(B) For the period during which that corporation is a controlled foreign corporation, a passive foreign investment company for which an election under section 1295 is in effect, a foreign investment company, or a foreign corporation the stock ownership of which is described in section 552(a)(2).

(2) *Acquisition period.* For purposes of this paragraph (g), the term *acquisition period* means the period beginning on the first day of the 12-month acquisition period and ending on the acquisition date.

(3) *Statement of section 338 election may be filed by United States shareholders in certain cases.* The United States shareholders (as defined in section 951(b)) of a foreign purchasing corporation that is a controlled foreign corporation (as defined in section 957 (taking into account section 953(c))) may file a statement of section 338 election on behalf of the purchasing corporation if the purchasing corporation is not required under §1.6012–2(g) (other than §1.6012–2(g)(2)(i)(*b*)(*2*)) to file a United States income tax return for its taxable year that includes the acquisition date. Form 8023 must be filed as described in the form and its instructions and also must be attached to the Form 5471 (information return with respect to a foreign corporation) filed with respect to

the purchasing corporation by each United States shareholder for the purchasing corporation's taxable year that includes the acquisition date (or, if paragraph (g)(1)(i) of this section applies to the election, for the purchasing corporation's taxable year within which it becomes a controlled foreign corporation). The provisions of § 1.964–1(c) (including § 1.964–1(c)(7)) do not apply to an election made by the United States shareholders.

(4) *Notice requirement for U.S. persons holding stock in foreign target*—(i) *General rule.* If a target subject to a section 338 election was a controlled foreign corporation, a passive foreign investment company, or a foreign personal holding company at any time during the portion of its taxable year that ends on its acquisition date, the purchasing corporation must deliver written notice of the election (and a copy of Form 8023, its attachments and instructions) to—

(A) Each U.S. person (other than a member of the affiliated group of which the purchasing corporation is a member (the purchasing group member)) that, on the acquisition date of the foreign target, holds stock in the foreign target; and

(B) Each U.S. person (other than a purchasing group member) that sells stock in the foreign target to a purchasing group member during the foreign target's 12-month acquisition period.

(ii) *Limitation.* The notice requirement of this paragraph (g)(4) applies only where the section 338 election for the foreign target affects income, gain, loss, deduction, or credit of the U.S. person described in paragraph (g)(4)(i) of this section under section 551, 951, 1248, or 1293.

(iii) *Form of notice.* The notice to U.S. persons must be identified prominently as a notice of section 338 election and must—

(A) Contain the name, address, and employer identification number (if any) of, and the country (and, if relevant, the lesser political subdivision) under the laws of which is organized, the purchasing corporation and the relevant target (i.e., target the stock of which the particular U.S. person held or sold under the circumstances described in paragraph (g)(4)(i) of this section);

(B) Identify those corporations as the purchasing corporation and the foreign target, respectively; and

(C) Contain the following declaration (or a substantially similar declaration): "THIS DOCUMENT SERVES AS NOTICE OF AN ELECTION UNDER SECTION 338 FOR THE ABOVE CITED FOREIGN TARGET THE STOCK OF WHICH YOU EITHER HELD OR SOLD UNDER THE CIRCUMSTANCES DESCRIBED IN TREASURY REGULATIONS § 1.338–1(g)(4). FOR POSSIBLE UNITED STATES FEDERAL INCOME TAX CONSEQUENCES UNDER SECTION 551, 951, 1248, OR 1293 OF THE INTERNAL REVENUE CODE OF 1986 THAT MAY APPLY TO YOU, SEE TREASURY REGULATIONS § 1.338–5(b). YOU MAY BE REQUIRED TO ATTACH THE INFORMATION ATTACHED TO THIS NOTICE TO CERTAIN RETURNS".

(iv) *Timing of notice.* The notice required by this paragraph (g)(4) must be delivered to the U.S. person on or before the later of the 120th day after the acquisition date of the particular target or the day on which Form 8023 is filed. If notice is delivered by United States mail, the date of the United States postmark is deemed to be the date of delivery.

(v) *Consequence of failure to comply.* A statement of section 338 election is not valid if timely notice is not given to one or more U.S. persons described in this paragraph (g)(4). If the form of notice fails to comply with all requirements of this paragraph (g)(4), the section 338 election is valid, but the waiver rule of paragraph (f)(1) of this section does not apply.

(vi) *Good faith effort to comply.* The purchasing corporation will be considered to have complied with this paragraph (g)(4), even though it failed to provide notice or provide timely notice to each person described in this paragraph (g)(4), if the Commissioner determines that the purchasing corporation made a good faith effort to identify and provide timely notice to those U.S. persons.

[T.D. 8515, 59 FR 2963, Jan. 20, 1994]

§1.338–2 Miscellaneous issues under section 338.

(a) *Scope.* This section provides guidance on miscellaneous issues under section 338.

(b) *Rules relating to qualified stock purchases*—(1) *Purchasing corporation requirement.* An individual cannot make a qualified stock purchase of target. Section 338(d)(3) requires, as a condition of a qualified stock purchase, that a corporation purchase the stock of target. If an individual forms a corporation (new P) to acquire target stock, new P can make a qualified stock purchase of target if new P is considered for tax purposes to purchase the target stock. Facts that may indicate that new P does not purchase the target stock include that new P merges downstream into target, liquidates, or otherwise disposes of the target stock following the purported qualified stock purchase.

(2) *Purchase*—(i) *Definition.* The term *purchase* has the same meaning as in section 338(h)(3).

(ii) *Examples.* This paragraph (b)(2) may be illustrated by the following examples:

Example 1. A, who owns all of the stock of P and T, sells the T stock to P for cash. A is treated under section 304(a)(1) as receiving a distribution in redemption of the P stock to which section 301 applies. P is treated as receiving the T stock as a contribution to its capital. Under section 362(a) and §1.304–2(a), P's basis in the T stock is determined by reference to A's adjusted basis in the stock. Further, stock owned by A would be attributed to P under section 318(a)(3)(C). Thus, P is not considered to have acquired the T stock by purchase. See sections 338(h)(3)(A)(i) and (iii).

Example 2. P exchanges cash for all of the stock of N, a newly formed corporation. N was formed for the sole purpose of acquiring all of the T stock by means of a reverse subsidiary cash merger. Prior to the merger, N conducted no activities other than those required for the merger. Pursuant to the plan, N merges into T, and the T shareholders receive cash for their T stock. No T shareholder is related to P, and no group of T shareholders controls P within the meaning of section 304(c). The existence of N is disregarded, and P is considered to acquire the T stock directly from the T shareholders for cash. Thus, P is considered to have acquired the T stock by purchase.

(3) *Date of purchase from related corporations*—(i) *In general.* Stock acquired by a purchasing corporation from a related corporation (R) is generally not considered acquired by purchase. See section 338(h)(3)(A)(iii). However, if section 338(h)(3)(C) applies and the purchasing corporation is treated as acquiring stock by purchase from R, solely for purposes of determining when the stock is considered acquired—

(A) Target stock acquired from R is considered to have been acquired by the purchasing corporation on the day on which the purchasing corporation is first considered to own that stock under section 318(a) (other than section 318(a)(4)); and

(B) If such stock first may be considered owned by the purchasing corporation on more than one date, such stock is deemed acquired on the earliest date first to the extent thereof, then on the next earliest date, and so on.

(ii) *Examples.* This paragraph (b)(3) may be illustrated by the following examples:

Example 1. (a) On January 1 of Year 1, P purchases 75% in value of the R stock. On that date, R owns 4 of the 100 shares of T stock. On June 1 of Year 1, R acquires an additional 16 shares of T stock. On December 1 of Year 1, P purchases 70 shares of T stock from an unrelated person and 12 of the 20 shares of T stock held by R.

(b) Of the 12 shares of T stock purchased by P from R on December 1 of Year 1, 3 of those shares are deemed to have been acquired by P on January 1 of Year 1, the date on which 3 of the 4 shares of T stock held by R on that date were first considered owned by P under section 318(a)(2)(C) (i.e., 4×.75). The remaining 9 shares of T stock purchased by P from R on December 1 of Year 1, are deemed to have been acquired by P on June 1 of Year 1, the date on which an additional 12 of the 20 shares of T stock owned by R on that date were first considered owned by P under section 318(a)(2)(C) (i.e., (20×.75) −3). Because stock acquisitions by P sufficient for a qualified stock purchase of T occur within a 12-month period (i.e., 3 shares constructively on January 1 of Year 1, 9 shares constructively on June 1 of Year 1, and 70 shares actually on December 1 of Year 1), a qualified stock purchase is made on December 1 of Year 1.

Example 2. (a) On February 1 of Year 1, P acquires 25% in value of the R stock from B (the sole shareholder of P). That R stock is not acquired by purchase. See section 338(h)(3)(A)(iii). On that date, R owns 4 of the 100 shares of T stock. On June 1 of Year 1, P purchases an additional 25% in value of the

R stock, and on January 1 of Year 2, P purchases another 25% in value of the R stock. On June 1 of Year 2, R acquires an additional 16 shares of the T stock. On December 1 of Year 2, P purchases 68 shares of the T stock from an unrelated person and 12 of the 20 shares of the T stock held by R.

(b) Of the 12 shares of the T stock purchased by P from R on December 1 of Year 2, 2 of those shares are deemed to have been acquired by P on June 1 of Year 1, the date on which 2 of the 4 shares of the T stock held by R on that date were first considered owned by P under section 318(a)(2)(C) (i.e., 4×.5). For purposes of this attribution, the R stock need not be acquired by P by purchase. See section 338(h)(1). (By contrast, the acquisition of the T stock by P from R does not qualify as a purchase unless P has acquired at least 50% in value of the R stock by purchase. Section 338(h)(3)(C)(i).) Of the remaining 10 shares of the T stock purchased by P from R on December 1 of Year 2, 1 of those shares is deemed to have been acquired by P on January 1 of Year 2, the date on which an additional 1 share of the 4 shares of the T stock held by R on that date was first considered owned by P under section 318(a)(2)(C) (i.e., (4×.75) −2). The remaining 9 shares of the T stock purchased by P from R on December 1 of Year 2, are deemed to have been acquired by P on June 1 of Year 2, the date on which an additional 12 shares of the T stock held by R on that date were first considered owned by P under section 318(a)(2)(C) (i.e., (20×.75) −3). Because a qualified stock purchase of T by P is made on December 1 of Year 2, only if all 12 shares of the T stock purchased by P from R on that date are considered acquired during a 12-month period ending on that date (so that, in conjunction with the 68 shares of the T stock P purchased on that date from the unrelated person, 80 of T's 100 shares are acquired by P during a 12-month period) and because 2 of those 12 shares are considered to have been acquired by P more than 12 months before December 1 of Year 2 (i.e., on June 1 of Year 1), a qualified stock purchase is not made. (Under §1.338–4(j)(2), for purposes of applying the consistency rules, P is treated as making a qualified stock purchase of T if, pursuant to an arrangement, P purchases T stock satisfying the requirements of section 1504(a)(2) over a period of more than 12 months.)

Example 3. Assume the same facts as in *Example 2,* except that on February 1 of Year 1, P acquires 25% in value of the R stock by purchase. The result is the same as in *Example 2.*

(4) *Acquisition date for tiered targets*—(i) *Stock sold in deemed asset sale.* If an election under section 338 is made for target, old target is deemed to sell target's assets and new target is deemed to acquire those assets. Under section 338(h)(3)(B), new target's deemed purchase of stock of another corporation is a purchase for purposes of section 338(d)(3) on the acquisition date of target. If new target's deemed purchase causes a qualified stock purchase of the other corporation and if a section 338 election is made for the other corporation, the acquisition date for the other corporation is the same as the acquisition date of target. However, the deemed sale and purchase of the other corporation's assets is considered to take place after the deemed sale and purchase of target's assets.

(ii) *Examples.* This paragraph (b)(4) may be illustrated by the following examples:

Example 1. A owns all of the T stock. T owns 50 of the 100 shares of X stock. The other 50 shares of X stock are owned by corporation Y, which is unrelated to A, T, or P. On January 1 of Year 1, P makes a qualified stock purchase of T from A and makes a section 338 election for T. On December 1 of Year 1, P purchases the 50 shares of X stock held by Y. A qualified stock purchase of X is made on December 1 of Year 1, because the deemed purchase of 50 shares of X stock by new T by reason of the section 338 election for T and the actual purchase of 50 shares of X stock by P are treated as purchases made by one corporation. Section 338(h)(8). For purposes of determining whether those purchases occur within a 12-month acquisition period as required by section 338(d)(3), T is deemed to purchase its X stock on T's acquisition date, i.e., January 1 of Year 1.

Example 2. On January 1 of Year 1, P makes a qualified stock purchase of T and makes a section 338 election for T. On that day, T sells all of the stock of T1 to A. Although T held all of the T1 stock on T's acquisition date, T is not considered to have purchased the T1 stock by reason of the section 338 election for T. In order for T to be treated as purchasing the T1 stock, T must hold the T1 stock when T's deemed sale of assets occurs pursuant to section 338(a). The deemed sale of assets is considered the last transaction of old T at the close of T's acquisition date. Accordingly, the T1 stock actually disposed of by T on the acquisition date is not included in the deemed sale of assets. Thus, T does not make a qualified stock purchase of T1.

(5) *Effect of redemptions*—(i) *General rule.* Except as provided in this paragraph (b)(5), a qualified stock purchase is made on the first day on which the percentage ownership requirements of

section 338(d)(3) are satisfied by reference to target stock that is both—

(A) Held on that day by the purchasing corporation; and

(B) Purchased by the purchasing corporation during the 12-month period ending on that day.

(ii) *Redemptions from persons unrelated to the purchasing corporation.* Target stock redemptions from persons unrelated to the purchasing corporation that occur during the 12-month acquisition period are taken into account as reductions in target's outstanding stock for purposes of determining whether target stock purchased by the purchasing corporation in the 12-month acquisition period satisfies the percentage ownership requirements of section 338(d)(3).

(iii) *Redemptions from the purchasing corporation or related persons during 12-month acquisition period*—(A) *General rule.* For purposes of the percentage ownership requirements of section 338(d)(3), a redemption of target stock during the 12-month acquisition period from the purchasing corporation or from any person related to the purchasing corporation is not taken into account as a reduction in target's outstanding stock.

(B) *Exception for certain redemptions from related corporations.* A redemption of target stock during the 12-month acquisition period from a corporation related to the purchasing corporation is taken into account as a reduction in target's outstanding stock to the extent that the redeemed stock would have been considered purchased by the purchasing corporation (by reason of section 338(h)(3)(C)) during the 12-month acquisition period if the redeemed stock had been acquired by the purchasing corporation from the related corporation on the day of the redemption. See paragraph (b)(3) of this section.

(iv) *Examples.* This paragraph (b)(5) may be illustrated by the following examples:

*Example 1. QSP on stock purchase date; redemption from unrelated person during 12-month period.*A owns all 100 shares of T stock. On January 1 of Year 1, P purchases 40 shares of the T stock from A. On July 1 of Year 1, T redeems 25 shares from A. On December 1 of Year 1, P purchases 20 shares of the T stock from A. P makes a qualified stock purchase of T on December 1 of Year 1, because the 60 shares of T stock purchased by P within the 12-month period ending on that date satisfy the 80-percent ownership requirements of section 338(d)(3) (i.e., 60/75 shares), determined by taking into account the redemption of 25 shares.

*Example 2. QSP on stock redemption date; redemption from unrelated person during 12-month period.*The facts are the same as in *Example 1,* except that P purchases 60 shares of T stock on January 1 of Year 1 and none on December 1 of Year 1. P makes a qualified stock purchase of T on July 1 of Year 1, because that is the first day on which the T stock purchased by P within the preceding 12-month period satisfies the 80-percent ownership requirements of section 338(d)(3) (i.e., 60/75 shares), determined by taking into account the redemption of 25 shares.

*Example 3. Redemption from unrelated person more than 12 months before stock purchase.*A owns all 100 shares of T stock. On January 1 of Year 1, T redeems 25 of its shares. On January 15 of Year 2, P purchases 60 shares of T stock from A. P makes a qualified stock purchase of T on January 15 of Year 2. The 60 shares of T stock purchased by P within the 12-month period ending on that date satisfy the 80-percent ownership requirements of section 338(d)(3) (i.e., 60/75 shares), determined by taking into account the redemption of 25 shares. It is irrelevant that the redemption occurred before the 12-month acquisition period.

*Example 4. Redemption from unrelated person more than 12 months after stock purchase.*The facts are the same as in *Example 3,* except that the redemption occurs on April 1 of Year 3. P does not make a qualified stock purchase of T on April 1 of Year 3, because 80% of the T stock, as of April 1 of Year 3 had not been purchased in the preceding 12 months. (Under §1.338–4(j)(2), for purposes of applying the consistency rules, P is treated as making a qualified stock purchase of T if, pursuant to an arrangement, P purchases T stock satisfying the requirements of section 1504(a)(2) over a period of more than 12 months.)

*Example 5. Redemption from purchasing corporation not taken into account.*On December 15 of Year 1, T redeems 30% of its stock from P. The redeemed stock was held by P for several years and constituted P's total interest in T. On December 1 of Year 2, P purchases the remaining T stock from A. P does not make a qualified stock purchase of T on December 1 of Year 2. For purposes of the 80-percent ownership requirements of section 338(d)(3), the redemption of P's T stock on December 15 of Year 1 is not taken into account as a reduction in T's outstanding stock.

*Example 6. Redemption from related person taken into account.*On January 1 of Year 1, P purchases 60 of the 100 shares of X stock. On that date, X owns 40 of the 100 shares of T stock. On April 1 of Year 1, T redeems X's T stock and P purchases the remaining 60 shares of T stock from an unrelated person. For purposes of the 80-percent ownership requirements of section 338(d)(3), the redemption of the T stock from X (a person related to P) is taken into account as a reduction in T's outstanding stock. If P had purchased the 40 redeemed shares from X on April 1 of Year 1, all 40 of the shares would have been considered purchased (by reason of section 338(h)(3)(C)(i)) during the 12-month period ending on April of Year 1 (24 of the 40 shares would have been considered purchased by P on January 1 of Year 1 and the remaining 16 shares would have been considered purchased by P on April 1 of Year 1). See paragraph (b)(3) of this section. Accordingly, P makes a qualified stock purchase of T on April 1 of Year 1, because the 60 shares of T stock purchased by P on that date satisfy the 80-percent ownership requirements of section 338(d)(3) (i.e., 60/60 shares), determined by taking into account the redemption of 40 shares.

(c) *Effect of post-acquisition events on eligibility for section 338 election*—(1) *Post-acquisition elimination of target.* (i) The purchasing corporation may make an election under section 338 for target even though target is liquidated on or after the acquisition date. If target liquidates on the acquisition date, the liquidation is considered to occur on the following day and immediately after new target's deemed purchase of assets. The purchasing corporation may also make an election under section 338 for target even though target is merged into another corporation, or otherwise disposed of by the purchasing corporation provided that, under the facts and circumstances, the purchasing corporation is considered for tax purposes as the purchaser of the target stock.

(ii) This paragraph (c)(1) may be illustrated by the following examples:

Example 1. On January 1 of Year 1, P makes a qualified stock purchase of T. On June 1 of Year 1, P sells the T stock to an unrelated person. Assuming that P is considered for tax purposes as the purchaser of the T stock, P remains eligible, after June 1 of Year 1, to make a section 338 election for T that results in a deemed sale of T's assets on January 1 of Year 1.

Example 2. On January 1 of Year 1, P makes a qualified stock purchase of T. On that date, T owns the stock of T1. On March 1 of Year 1, T sells the T1 stock to an unrelated person. On April 1 of Year 1, P makes a section 338 election for T. Notwithstanding that the T1 stock was sold on March 1 of Year 1, the section 338 election for T on April 1 of Year 1, results in a qualified stock purchase by T of T1 on January 1 of Year 1. See paragraph (b)(4)(i) of this section.

(2) *Post-acquisition elimination of the purchasing corporation.* An election under section 338 may be made for target after the acquisition of assets of the purchasing corporation by another corporation in a transaction described in section 381(a), provided that the purchasing corporation is considered for tax purposes as the purchaser of the target stock. The acquiring corporation in the section 381(a) transaction may make an election under section 338 for target.

(3) *Consequences of post-acquisition elimination of target*—(i) *Scope.* The rules of this paragraph (c)(3) apply to the transfer of target assets to the purchasing corporation (or another member of the same affiliated group as the purchasing corporation) (the transferee) following a qualified stock purchase of target stock, if the purchasing corporation does not make a section 338 election for target. Notwithstanding the rules of this paragraph (c)(3), section 354(a) (and so much of section 356 as relates to section 354) cannot apply to any person other than the purchasing corporation or another member of the same affiliated group as the purchasing corporation unless the transfer of target assets is pursuant to a reorganization as determined without regard to this paragraph (c)(3).

(ii) *Continuity of interest.* By virtue of section 338, in determining whether the continuity of interest requirement of § 1.368–1 (b) and (e) is satisfied on the transfer of assets from target to the transferee, the purchasing corporation's target stock acquired in the qualified stock purchase shall be treated as though it was not acquired in connection with the transfer of target assets.

(iii) *Control requirement.* By virtue of section 338, the acquisition of target stock in the qualified stock purchase will not prevent the purchasing corporation from qualifying as a shareholder of the target transferor for the purpose of determining whether, immediately after the transfer of target assets, a shareholder of the transferor is in control of the corporation to which the assets are transferred within the meaning of section 368(a)(1)(D).

(iv) *Example.* This paragraph (c)(3) is illustrated by the following example:

Example (A) *Facts.* P, T, and X are domestic corporations. T and X each operate a trade or business. A and K, individuals unrelated to P, own 85 and 15 percent, respectively, of the stock of T. P owns all of the stock of X. The total adjusted basis of T's property exceeds the sum of T's liabilities plus the amount of liabilities to which T's property is subject. P purchases all of A's T stock for cash in a qualified stock purchase. P does not make an election under section 338(g) with respect to its acquisition of T stock. Shortly after the acquisition date, and as part of the same plan, T merges under applicable state law into X in a transaction that, but for the question of continuity of interest, satisfies all the requirements of section 368(a)(1)(A). In the merger, all of T's assets are transferred to X. P and K receive X stock in exchange for their T stock. P intends to retain the stock of X indefinitely.

(B) *Status of transfer as a reorganization.* By virtue of section 338, for the purpose of determining whether the continuity of interest requirement of § 1.368–1(b) is satisfied, P's T stock acquired in the qualified stock purchase shall be treated as though it was not acquired in connection with the transfer of T assets to X. Thus, the continuity of interest requirement is satisfied and the merger of T into X is a reorganization within the meaning of section 368(a)(1)(A). Moreover, by virtue of section 338, the requirement of section 368(a)(1)(D) that a target shareholder control the transferee immediately after the transfer is satisfied because P controls X immediately after the transfer. In addition, all of T's assets are transferred to X in the merger and P and K receive the X stock exchanged therefor in pursuance of the plan of reorganization. Thus, the merger of T into X is also a reorganization within the meaning of section 368(a)(1)(D).

(C) *Treatment of T and X.* Under section 361(a), T recognizes no gain or loss in the merger. Under section 362(b), X's basis in the assets received in the merger is the same as the basis of the assets in T's hands. X succeeds to and takes into account the items of T as provided in section 381.

(D) *Treatment of P.* By virtue of section 338, the transfer of T assets to X is a reorganization. Pursuant to that reorganization, P exchanges its T stock solely for stock of X, a party to the reorganization. Because P is the purchasing corporation, section 354 applies to P's exchange of T stock for X stock in the merger of T into X. Thus, P recognizes no gain or loss on the exchange. Under section 358, P's basis in the X stock received in the exchange is the same as the basis of P's T stock exchanged therefor.

(E) *Treatment of K.* Because K is not the purchasing corporation (or an affiliate thereof), section 354 cannot apply to K's exchange of T stock for X stock in the merger of T into X unless the transfer of T's assets is pursuant to a reorganization as determined without regard to § 1.338–2(c)(3). Under general income tax principles applicable to reorganizations, the continuity of interest requirement is not satisfied because P's stock purchase and the merger of T into X are pursuant to an integrated transaction in which A, the owner of 85 percent of the stock of T, received solely cash in exchange for A's T stock. See, e.g., *Yoc Heating* v. *Commissioner,* 61 T.C. 168 (1973); *Kass* v. *Commissioner,* 60 T.C. 218 (1973), *aff'd,* 491 F.2d 749 (3d Cir. 1974). Thus, the requisite continuity of interest under § 1.368–1(b) is lacking and section 354 does not apply to K's exchange of T stock for X stock. K recognizes gain or loss, if any, pursuant to section 1001(c) with respect to its T stock.

(v) *Effective date.* The provisions of this paragraph (c)(3) are effective for transfers of target assets on or after October 26, 1995.

(d) *Miscellaneous matters affecting new target*—(1) *General rule for subtitle A.* Except as provided in this paragraph (d), new target is treated as a new corporation that is unrelated to old target for purposes of subtitle A of the Internal Revenue Code. Thus, in the section 338(a)(1) deemed sale, new target is treated as purchasing assets from an unrelated person, and—

(i) New target is not considered related to old target for purposes of section 168 and may make new elections under section 168 without taking into account the elections made by old target; and—

(ii) New target may adopt, without obtaining prior approval from the Commissioner, any taxable year that meets the requirements of section 441 and any method of accounting that meets the requirements of section 446.

(2) *Exceptions for subtitle A.* New target and old target are treated as the same corporation for purposes of—

(i) The rules applicable to employee benefit plans (including those plans described in sections 79, 104, 105, 120, 125, 127, and 129), qualified pension, profit-sharing, stock bonus and annuity plans (sections 401(a) and 403(a)), simplified employee pensions (section 408(k)), and tax qualified stock option plans (sections 422 and 423);

(ii) Sections 1311–1314 (relating to the mitigation of the effect of limitations) if a section 338(h)(10) election is not made for target; and

(iii) Any other provision identified by the Commissioner.

(3) *Taxable year of new target.* Notwithstanding § 1.441–1T(b)(2), a new target may adopt a taxable year on or before the last day for making the election under section 338 by filing its first return for the desired taxable year on or before that date.

(4) *General rule for other provisions of the Internal Revenue Code.* Except as provided in the regulations under section 338 or by the Commissioner, new target is treated as a continuation of old target for purposes other than subtitle A. For example—

(i) New target is liable for old target's federal income tax liabilities, including tax liabilities resulting from the deemed asset sale and those tax liabilities of the other members of any consolidated group that included old target that are attributable to taxable years in which those corporations and old target joined in the same consolidated return (see § 1.1502–6(a));

(ii) Wages earned by the employees of old target are considered wages earned by such employees from new target for purposes of sections 3101 and 3111 (Federal Insurance Contributions Act) and section 3301 (Federal Unemployment Tax Act); and

(iii) Old target and new target must use the same employer identification number.

[T.D. 8515, 59 FR 2966, Jan. 20, 1994, as amended by T.D. 8626, 60 FR 54944, Oct. 27, 1995; T.D. 8760, 63 FR 4178, Jan. 28, 1998]

§ 1.338–3 Deemed sale and aggregate deemed sale price.

(a) *Scope.* This section provides guidance regarding the recognition of gain or loss on the deemed sale of target affiliate stock. This section also provides guidance regarding the determination of the price (the aggregate deemed sale price) at which old target is treated as selling its assets in the section 338(a)(1) deemed sale for purposes of determining the gain or loss recognized by target in the deemed sale. Notwithstanding section 338(h)(6)(B)(ii), stock held by a target affiliate in a foreign corporation or in a corporation that is a DISC or that is described in section 1248(e) is not excluded from the operation of section 338.

(b) *Definitions.* For purposes of the regulations under section 338:

(1) *ADSP.* The *ADSP* is the aggregate deemed sale price, i.e., the price at which target is deemed to have sold all of its assets in the deemed sale under section 338(a)(1). See paragraph (d) of this section for the determination of the ADSP.

(2) *Allocable ADSP amount.* The *allocable ADSP amount* is the portion of the ADSP that is allocable to a particular target asset. Deemed sale gain on a target asset is computed by reference to the allocable ADSP amount for that asset. Except as provided in section 7701(g) (relating to fair market value in the case of nonrecourse indebtedness), the ADSP is allocated among target assets for this purpose under the principles of § 1.338(b)–2T (without taking into account § 1.338(b)–2T(c)(2)). Appropriate adjustments to reflect accurately the fair market value of assets must be made if stock of a target affiliate is purchased in the section 338(a)(1) deemed sale, a section 338 election is made for the target affiliate, and target recognizes no gain or loss on the deemed sale of the target affiliate stock under paragraph (c) of this section. See *Example 4* of paragraph (d)(8) of this section.

(3) *Deemed sale gain. Deemed sale gain* is gain (or loss) that is recognized in the section 338(a)(1) deemed sale. For purposes of subtitle A of the Internal Revenue Code, deemed sale gain is taken into account by treating the old target as if, on the acquisition date, it sold all of its assets to an unrelated person in the deemed sale. See § 1.338–2(d)(1). For example, section 267 does not apply to loss recognized on the deemed sale.

(4) *Classes of assets.* The classes of assets are defined in § 1.338(b)–2T(b).

(c) *Deemed sale of target affiliate stock*—(1) *In general.* This paragraph (c) prescribes rules relating to the treatment of gain or loss realized on the deemed sale of stock of a target affiliate where a section 338 election (but not a section 338(h)(10) election) is made for the target affiliate. For purposes of this paragraph (c), the definition of domestic corporation in §1.338–1(c)(5) is applied without the exclusion therein for DISCs, corporations described in section 1248(e), and corporations to which an election under section 936 applies.

(2) *General rule.* Except as otherwise provided in this paragraph (c), if a section 338 election is made for target, no gain or loss is recognized by target on the deemed sale of stock of a target affiliate having the same acquisition date and for which a section 338 election is made if—

(i) Target directly owns stock in the target affiliate satisfying the requirements of section 1504(a)(2);

(ii) Target and the target affiliate are members of a consolidated group filing a final consolidated return described in §1.338–1(e)(1); or

(iii) Target and the target affiliate file a combined return under §1.338–1(e)(4).

(3) *Deemed sale of foreign target affiliate by a domestic target.* Gain or loss is recognized by a domestic target on the deemed sale of stock of a foreign target affiliate. For the proper treatment of such gain or loss, see, e.g., sections 1246, 1248, 1291 *et seq.*, and 338(h)(16) and §1.338–5.

(4) *Deemed sale producing effectively connected income.* Gain or loss is recognized by a foreign target on the deemed sale of stock of a foreign target affiliate to the extent that such gain or loss is effectively connected (or treated as effectively connected) with the conduct of a trade or business in the United States.

(5) *Deemed sale of insurance company target affiliate electing under section 953(d).* Gain (but not loss) is recognized by a domestic target on the deemed sale of stock of a target affiliate that has in effect an election under section 953(d) in an amount equal to the lesser of the gain realized or the earnings and profits described in section 953(d)(4)(B).

(6) *Deemed sale of DISC target affiliate.* Gain (but not loss) is recognized by a foreign or domestic target on the deemed sale of stock of a target affiliate that is a DISC or a former DISC (as defined in section 992(a)) in an amount equal to the lesser of the gain realized or the amount of accumulated DISC income determined with respect to such stock under section 995(c). Such gain is included in gross income as a dividend as provided in sections 995(c)(2) and 996(g).

(7) *Anti-stuffing rule.* If an asset the adjusted basis of which exceeds its fair market value is contributed or transferred to a target affiliate as transferred basis property (within the meaning of section 7701(a)(43)) and a purpose of such transaction is to reduce the gain (or increase the loss) recognized on the deemed sale of such target affiliate's stock, the gain or loss recognized by target on the deemed sale of stock of the target affiliate is determined as if such asset had not been contributed or transferred.

(8) *Examples.* This paragraph (c) may be illustrated by the following examples:

Example 1. (a) P makes a qualified stock purchase of T and makes a section 338 election for T. T's sole asset, all of the T1 stock, has a basis of $50 and a fair market value of $150. T's deemed purchase of the T1 stock results in a qualified stock purchase of T1 and a section 338 election is made for T1. T1's assets have a basis of $50 and a fair market value of $150.

(b) T realizes $100 of gain on the deemed sale of the T1 stock, but the gain is not recognized because T directly owns stock in T1 satisfying the requirements of section 1504(a)(2) and a section 338 election is made for T1.

(c) T1 recognizes gain of $100 on the deemed sale of its assets.

Example 2. The facts are the same as in *Example 1,* except that P does not make a section 338 election for T1. Because a section 338 election is not made for T1, the $100 gain realized by T on the deemed sale of the T1 stock is recognized.

Example 3. (a) P makes a qualified stock purchase of T and makes a section 338 election for T. T owns all of the stock of T1 and T2. T's deemed purchase of the T1 and T2 stock results in a qualified stock purchase of T1 and T2 and a section 338 election is made for T1 and T2. T1 and T2 each own 50% of the vote and value of T3 stock. The deemed purchases by T1 and T2 of the T3 stock result in a qualified stock purchase of T3 and a section 338 election is made for T3. T is the common parent of a consolidated group and all of the deemed sales are reported on the T group's final consolidated return. See § 1.338–1(e)(1).

(b) Because T, T1, T2 and T3 are members of a consolidated group filing a final consolidated return, no gain or loss is recognized by T, T1 or T2 on their respective deemed sales of target affiliate stock.

Example 4. (a) T's sole asset, all of the FT1 stock, has a basis of $25 and a fair market value of $150. FT1's sole asset, all of the FT2 stock, has a basis of $75 and a fair market value of $150. FT1 and FT2 each have $50 of accumulated earnings and profits for purposes of section 1248(c) and (d). FT2's assets have a basis of $125 and a fair market value of $150, and their sale would not generate subpart F income under section 951. The sale of the FT2 stock or assets would not generate income effectively connected with the conduct of a trade or business within the United States. FT1 does not have an election in effect under section 953(d) and neither FT1 nor FT2 is a passive foreign investment company.

(b) P makes a qualified stock purchase of T and makes a section 338 election for T. T's deemed purchase of the FT1 stock results in a qualified stock purchase of FT1 and a section 338 election is made for FT1. Similarly, FT1's deemed purchase of the FT2 stock results in a qualified stock purchase of FT2 and a section 338 election is made for FT2.

(c) T recognizes $125 of gain on the deemed sale of the FT1 stock under paragraph (c)(3) of this section. FT1's $75 of gain on the deemed sale of the FT2 stock is not recognized under paragraph (c)(2) of this section. FT2 recognizes $25 of gain on the deemed sale of its assets. The $125 gain T recognizes on the deemed sale of the FT1 stock is included in T's income as a dividend under section 1248, because FT1 and FT2 have sufficient earnings and profits for full recharacterization ($50 of accumulated earnings and profits in FT1, $50 of accumulated earnings and profits in FT2, and $25 of deemed sale earnings and profits in FT2). § 1.338–5(b). For purposes of sections 901 through 908, the source and foreign tax credit limitation basket of $25 of the recharacterized gain on the deemed sale of the FT1 stock is determined under section 338(h)(16).

(d) *Determination of ADSP*—(1) *General rule.* The ADSP is the sum of—

(i) The grossed-up basis of the purchasing corporation's recently purchased target stock (as defined in section 338(b)(6)(A));

(ii) The liabilities of new target (including any tax liabilities resulting from the deemed sale); and

(iii) Other relevant items.

(2) *Grossed-up basis of the purchasing corporation's recently purchased target stock.* The grossed-up basis of the purchasing corporation's recently purchased target stock is an amount equal to the purchasing corporation's basis in recently purchased target stock, divided by the percentage of target stock (by value) attributable to that recently purchased target stock. If target has a single class of outstanding stock, the grossed-up basis of the purchasing corporation's recently purchased target stock reflects the total price the purchasing corporation would have paid for all outstanding target stock had it purchased all such stock for a price per share equal to the average price per share that it paid for the recently purchased target stock.

(3) *Liabilities.* Liabilities taken into account are the liabilities of new target described in § 1.338(b)–1(f). The amount of the liabilities of new target taken into account to calculate ADSP is determined as if old target had sold its assets to an unrelated person for consideration that included the liabilities. Thus, the ADSP takes into account both tax credit recapture liability arising by reason of the deemed sale and the tax liability on deemed sale gain. The ADSP reflects the fact that deemed sale gain (loss) both increases (decreases) the ADSP by creating (reducing) a tax liability and is computed by reference to the ADSP.

(4) *Other relevant items.* Other relevant items include reductions for acquisition costs of the purchasing corporation incurred in connection with the qualified stock purchase that are capitalized in the basis of recently purchased target stock (e.g., brokerage commissions and any similar costs paid by the purchasing corporation to acquire target stock).

(5) *Calculation of deemed sale gain and loss.* Deemed sale gain on each asset is computed by reference to the ADSP. In certain cases, the determination of the tax liability resulting from the deemed sale and therefore the determination of the ADSP may require trial and error computations.

(6) *Other rules apply in determining ADSP.* The ADSP may not be applied in such a way as to contravene other applicable rules. For example, a capital

loss cannot be applied to reduce ordinary income in calculating the tax liability on the deemed sale for purposes of determining the ADSP.

(7) *Cross-reference.* See §1.338(b)–3T(h) for adjustments to ADSP because of events occurring after the acquisition date and §1.338(h)(10)–1(f) for the determination of modified ADSP.

(8) *Examples.* (i) For purposes of the examples in this paragraph (d)(8), unless otherwise stated, T is a calendar year taxpayer that files separate returns and that has no loss, tax credit, or other carryovers to Year 1. Depreciation for Year 1 is not taken into account. T has no liabilities other than a federal income tax liability resulting from the deemed sale of assets, and T has no other relevant items. Assume that T's tax rate for any ordinary income or net capital gain resulting from the deemed sale of assets is 34 percent and that any capital loss is offset by capital gain. On July 1 of Year 1, P purchases all of the stock of T and makes a section 338 election for T.

(ii) This paragraph (d) may be illustrated by the following examples:

Example 1. One class. (a) On July 1 of Year 1, T's only asset is an item of section 1245 property with an adjusted basis to T of $50,400, a recomputed basis of $80,000, and a fair market value of $100,000. P purchases all of the T stock for $75,000.

(b) The ADSP may be determined as follows. (In the formula below, G is the grossed-up basis in P's recently purchased T stock, L is T's liabilities other than T's tax liabilities for deemed sale gain determined by reference to the ADSP, T_R is the applicable tax rate, and B is the adjusted basis of the asset deemed sold.)

$$\text{ADSP}=G+L+T_R\times(\text{ADSP}-B)$$

$$\text{ADSP}=(\$75{,}000/1)+\$0+.34\times(\text{ADSP}-\$50{,}400)$$

$$\text{ADSP}=\$75{,}000+.34\text{ADSP}-\$17{,}136$$

$$.66\text{ADSP}=\$57{,}864$$

$$\text{ADSP}=\$87{,}672.72$$

(c) Because the ADSP for T ($87,672.72) does not exceed the fair market value of T's asset ($100,000), a Class III asset, T's entire ADSP is allocated to that asset. Thus, T has deemed sale gain of $37,272.72 (consisting of $29,600 of ordinary income and $7,672.72 of capital gain).

(d) The facts are the same as in paragraph (a) of this *Example 1,* except that on July 1 of Year 1, P purchases only 80 of the 100 shares of T stock for $60,000. The grossed-up basis in P's recently purchased T stock (G) is $75,000 ($60,000/.8). Consequently, the ADSP and deemed sale gain are the same as in paragraphs (b) and (c) of this *Example 1.*

(e) The facts are the same as in paragraph (a) of this *Example 1,* except that T also has goodwill (a Class V asset) with an appraised value of $10,000. The results are the same as in paragraphs (b) and (c) of this *Example 1.* Because the ADSP does not exceed the fair market value of the Class III asset, no amount is allocated to the Class V assets (assets in the nature of goodwill and going concern value).

Example 2. More than one class. (a) P purchases all of the T stock for $140,000. On July 1 of Year 1, T has liabilities (not including the tax liability for deemed sale gain of its assets) of $50,000, cash (a Class I asset) of $10,000, readily marketable securities (a Class II asset) with a basis of $4,000 and a fair market value of $10,000, goodwill (a Class V asset) with a basis of $3,000, and the following Class III assets:

Asset	Basis	FMV	Ratio
1. Land	$5,000	$35,000	.14
2. Inventory	10,000	50,000	.20
3. Equipment A (recomputed basis $80,000)	5,000	90,000	.36
4. Equipment B (recomputed basis $20,000)	10,000	75,000	.30
Totals	$30,000	$250,000	1.00

(b) The ADSP exceeds $20,000. Thus, $10,000 of the ADSP is allocated to the cash and $10,000 to the marketable securities. Except as provided in section 7701(g), the amount allocated to an asset (other than a Class V asset) cannot exceed its fair market value. See §1.338(b)–2T(c)(1) (relating to fair market value limitation).

(c) The portion of the ADSP allocable to the Class III assets is preliminarily determined as follows. (In the formula, the amount allocated to the Class I assets is referred to as *I* and the amount allocated to the Class II assets as *II*.)

$$\text{ADSP}_{\text{III}} = (G-(I+II))+L+T_R \times [(II-B_{\text{II}}) + (\text{ADSP}_{\text{III}}-B_{\text{III}})]$$

$$\text{ADSP}_{\text{III}} = (\$140{,}000 - (\$10{,}000+\$10{,}000)) + \$50{,}000 + .34 \times [(\$10{,}000-\$4{,}000) + (\text{ADSP}_{\text{III}} - (\$5{,}000+\$10{,}000+\$5{,}000+\$10{,}000))]$$

$$\text{ADSP}_{\text{III}}=\$161{,}840+.34\text{ADSP}_{\text{III}}$$

$$.66\text{ADSP}_{\text{III}}=\$161{,}840$$

$$\text{ADSP}_{\text{III}}=\$245{,}212.12$$

(d) Because, under the preliminary calculations of the ADSP, the amount to be allocated to the Class I, II, III, and IV assets does not exceed their aggregate fair market value, no ADSP amount is allocated to goodwill. Accordingly, the deemed sale of the goodwill results in a capital loss of $3,000. The portion of the ADSP allocable to the Class III assets is finally determined by taking into account this loss as follows:

$$ADSP_{III} = (G - (I + II)) + L + T_R \times [(II - B_{II}) + (ADSP_{III} - B_{III}) + (ADSP_V - B_V)]$$

$$ADSP_{III} = (\$140,000 - (\$10,000 + \$10,000)) + \$50,000 + .34 \times [(\$10,000 - \$4,000) + (ADSP_{III} - \$30,000) + (\$0 - \$3,000)]$$

$$ADSP_{III} = \$160,820 + .34ADSP_{III}$$

$$.66ADSP_{III} = \$160,820$$

$$ADSP_{III} = \$243,666.67$$

(e) The allocation of $ADSP_{III}$ among the Class III assets is in proportion to their fair market values, as follows:

Asset	ADSP	Gain
1. Land	$34,113.33	$29,113.33 (capital gain)
2. Inventory	48,733.34	38,733.34 (ordinary income)
3. Equipment A	87,720.00	82,720.00 (75,000 ordinary income 7,720 capital gain)
4. Equipment B	73,100.00	63,100.00 (10,000 ordinary income 53,100 capital gain)
Totals	243,666.67	213,666.67

Example 3. More than one class. (a) The facts are the same as in *Example 2,* except that P purchases the T stock for $150,000, rather than $140,000.

(b) As in *Example 2,* the ADSP exceeds $20,000. Thus, $10,000 of the ADSP is allocated to the cash and $10,000 to the marketable securities.

(c) The portion of the ADSP allocable to the Class III assets as preliminarily determined under the formula set forth in paragraph (c) of *Example 2* is $260,363.64. The amount allocated to the Class III assets cannot exceed their aggregate fair market value ($250,000). Thus, preliminarily, the ADSP amount allocated to Class III assets is $250,000.

(d)(1) Based on the preliminary allocation, the ADSP is determined as follows: (In the formula, the amount allocated to the Class I assets is referred to as *I*, the amount allocated to the Class II assets as *II*, and the amount allocated to the Class III assets as *III*.)

$$ADSP = G + L + T_R \times [(II - B_{II}) + (III - B_{III}) + (ADSP - (I + II + III + B_V))]$$

$$ADSP = \$150,000 + \$50,000 + .34 \times [(\$10,000 - \$4,000) + (\$250,000 - \$30,000) + (ADSP - (\$10,000 + \$10,000 + \$250,000 + \$3,000))]$$

$$ADSP = \$200,000 + .34ADSP - \$15,980$$

$$.66ADSP = \$184,020$$

$$ADSP = \$278,818.18$$

(2) Because the ADSP as determined exceeds the aggregate fair market value of the Class I, II, III, and IV assets, the $250,000 amount preliminarily allocated to the Class III assets is appropriate. Thus, the amount of the ADSP allocated to Class III assets equals their aggregate fair market value ($250,000), and the allocated ADSP amount for each Class III asset is its fair market value. Further, because there are no Class IV assets, the allocable ADSP amount for the Class V asset (goodwill) is $8,818.18 (the excess of the ADSP over the aggregate ADSP amounts for the Class I, II, and III assets).

Example 4. Amount allocated to T1 stock. (a) The facts are the same as in *Example 2,* except that T owns all of the T1 stock (instead of the inventory), and T1's only asset is the inventory. The T1 stock and inventory each have a fair market value of $50,000, and the inventory has a basis of $10,000. A section 338 election is made for T1 (as well as T), and T1 has no liabilities other than a tax liability resulting from the deemed sale gain. Under paragraph (c) of this section, T recognizes no gain or loss on its deemed sale of T1 stock.

(b) The ADSP exceeds $20,000. Thus, $10,000 of the ADSP is allocated to the cash and $10,000 to the marketable securities.

(c) T1 stock is purchased in the deemed sale of T assets, T does not recognize any gain on the deemed sale of the T1 stock under paragraph (c) of this section, and a section 338 election is made for T1. Thus, under paragraph (b)(2) of this section, in determining the allocation of ADSP among T's Class III assets, including the T1 stock, appropriate adjustments must be made to reflect accurately the fair market value of the T and T1 assets. In preliminarily calculating $ADSP_{III}$ in this case, the T1 stock can be disregarded and, because T owns all of the T1 stock, the T1 asset can be treated as a T asset. Under this assumption, $ADSP_{III}$ is $243,666.67. See paragraph (d) of *Example 2.*

(d) Because the portion of the preliminary ADSP allocable to Class III assets ($243,666.67) does not exceed their fair market value ($250,000), no amount is allocated to Class V assets for T. Further, this amount ($243,666.67) is allocated among T's Class III assets in proportion to their fair market values. See paragraph (e) of *Example 2.* Tentatively, $48,733.34 of this amount is allocated to the T1 stock.

(e) The amount tentatively allocated to the T1 stock, however, reflects the tax incurred on the deemed sale of the T1 asset equal to $13,169.34 (.34 × ($48,733.34 − $10,000)). Thus, the ADSP allocable to the Class III assets of T, and the allocable ADSP amount for the T1 stock, as preliminarily calculated, each must be reduced by $13,169.34. Consequently, these amounts, respectively, are $230,497.33 and $35,564.00. In determining the ADSP for T1, the grossed-up basis of T's recently purchased T1 stock is $35,564.00.

(f) The facts are the same as in paragraph (a) of this *Example 4,* except that the T1 inventory has a $12,500 basis and a $62,500 value, the T1 stock has a $62,500 value, and T owns 80% of the T1 stock. In preliminarily calculating $ADSP_{III}$, the T1 stock can be disregarded but, because T owns only 80% of the

T1 stock, only 80% of T1 asset basis and value should be taken into account in calculating T's ADSP. By taking into account 80% of these amounts, the remaining calculations and results are the same as in paragraphs (b), (c), (d), and (e) of this *Example 4*, except that the grossed-up basis in T's recently purchased T1 stock is $44,455.00 ($35,564.00/0.8).

[T.D. 8515, 59 FR 2969, Jan. 20, 1994; as amended by T.D. 8711, 62 FR 2268, Jan. 16, 1997]

§1.338–4 Asset and stock consistency.

(a) *Introduction*—(1) *Overview*. This section implements the consistency rules of sections 338(e) and (f). Under this section, no election under section 338 is deemed made or required with respect to target or any target affiliate. Instead, the person acquiring an asset may have a carryover basis in the asset.

(2) *General application*. The consistency rules generally apply if the purchasing corporation acquires an asset directly from target during the target consistency period and target is a subsidiary in a consolidated group. In such a case, gain from the sale of the asset is reflected under the investment adjustment provisions of the consolidated return regulations in the basis of target stock and may reduce gain from the sale of the stock. See §1.1502–32 (investment adjustment provisions). Under the consistency rules, the purchasing corporation generally takes a carryover basis in the asset, unless a section 338 election is made for target. Similar rules apply if the purchasing corporation acquires an asset directly from a lower-tier target affiliate if gain from the sale is reflected under the investment adjustment provisions in the basis of target stock.

(3) *Extensions of the general rules.* If an arrangement exists, paragraph (f) of this section generally extends the carryover basis rule to certain cases in which the purchasing corporation acquires assets indirectly from target (or a lower-tier target affiliate). To prevent avoidance of the consistency rules, paragraph (j) of this section also may extend the consistency period or the 12-month acquisition period and may disregard the presence of conduits.

(4) *Application where certain dividends are paid.* Paragraph (g) of this section extends the carryover basis rule to certain cases in which dividends are paid to a corporation that is not a member of the same consolidated group as the distributing corporation. Generally, this rule applies where a 100 percent dividends received deduction is used in conjunction with asset dispositions to achieve an effect similar to that available under the investment adjustment provisions of the consolidated return regulations.

(5) *Application to foreign target affiliates.* Paragraph (h) of this section extends the carryover basis rule to certain cases involving target affiliates that are controlled foreign corporations.

(6) *Stock consistency*. This section limits the application of the stock consistency rules to cases in which the rules are necessary to prevent avoidance of the asset consistency rules. Following the general treatment of a section 338(h)(10) election, a sale of a corporation's stock is treated as a sale of the corporation's assets if a section 338(h)(10) election is made. Because gain from this asset sale may be reflected in the basis of the stock of a higher-tier target, the carryover basis rule may apply to the assets.

(b) *Consistency for direct acquisitions*—(1) *General rule.* The basis rules of paragraph (d) of this section apply to an asset if—

(i) The asset is disposed of during the target consistency period;

(ii) The basis of target stock, as of the target acquisition date, reflects gain from the disposition of the asset (see paragraph (c) of this section); and

(iii) The asset is owned, immediately after its acquisition and on the target acquisition date, by a corporation that acquires stock of target in the qualified stock purchase (or by an affiliate of an acquiring corporation).

(2) *Section 338(h)(10) elections.* For purposes of this section, if a section 338(h)(10) election is made for a corporation acquired in a qualified stock purchase—

(i) The acquisition is treated as an acquisition of the corporation's assets (see §1.338(h)(10)–1); and

(ii) The corporation is not treated as target.

(c) *Gain from disposition reflected in basis of target stock*. For purposes of this section:

(1) *General rule.* Gain from the disposition of an asset is reflected in the basis of a corporation's stock if the gain is taken into account under § 1.1502–32, directly or indirectly, in determining the basis of the stock, after applying section 1503(e) and other provisions of the Internal Revenue Code.

(2) *Gain not reflected if section 338 election made for target.* Gain from the disposition of an asset that is otherwise reflected in the basis of target stock as of the target acquisition date is not considered reflected in the basis of target stock if a section 338 election is made for target.

(3) *Gain reflected by reason of distributions.* Gain from the disposition of an asset is not considered reflected in the basis of target stock merely by reason of the receipt of a distribution from a target affiliate that is not a member of the same consolidated group as the distributee. See paragraph (g) of this section for the treatment of dividends eligible for a 100 percent dividends received deduction.

(4) *Controlled foreign corporations.* For a limitation applicable to gain of a target affiliate that is a controlled foreign corporation, see paragraph (h)(2) of this section.

(5) *Gain recognized outside the consolidated group.* Gain from the disposition of an asset by a person other than target or a target affiliate is not reflected in the basis of a corporation's stock unless the person is a conduit, as defined in paragraph (j)(4) of this section.

(d) *Basis of acquired assets*—(1) *Carryover basis rule.* If this paragraph (d) applies to an asset, the asset's basis immediately after its acquisition is, for all purposes of the Internal Revenue Code, its adjusted basis immediately before its disposition.

(2) *Exceptions to carryover basis rule for certain assets.* The carryover basis rule of paragraph (d)(1) of this section does not apply to the following assets—

(i) Any asset disposed of in the ordinary course of a trade or business (see section 338(e)(2)(A));

(ii) Any asset the basis of which is determined wholly by reference to the adjusted basis of the asset in the hands of the person that disposed of the asset (see section 338(e)(2)(B));

(iii) Any debt or equity instrument issued by target or a target affiliate (*see* paragraph (h)(3) of this section for an exception relating to the stock of a target affiliate that is a controlled foreign corporation);

(iv) Any asset the basis of which immediately after its acquisition would otherwise be less than its adjusted basis immediately before its disposition; and

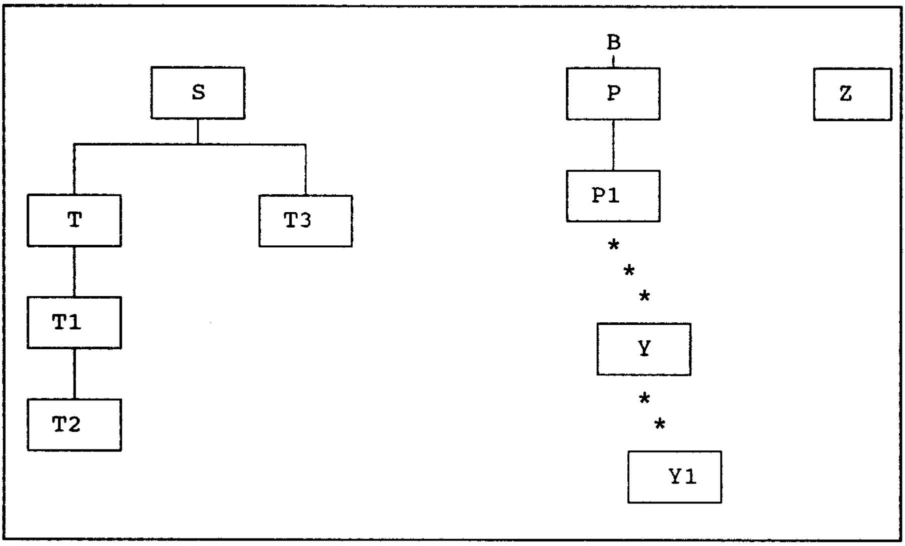
(v) Any asset identified by the Internal Revenue Service in a revenue ruling or revenue procedure.

(3) *Exception to carryover basis rule for de minimis assets.* The carryover basis rules of this section do not apply to an asset if the asset is not disposed of as part of the same arrangement as the acquisition of target and the aggregate amount realized for all assets otherwise subject to the carryover basis rules of this section does not exceed $250,000.

(4) *Mitigation rule*—(i) *General rule.* If the carryover basis rules of this section apply to an asset and the asset is transferred to a domestic corporation in a transaction to which section 351 applies or as a contribution to capital and no gain is recognized, the transferor's basis in the stock of the transferee (but not the transferee's basis in the asset) is determined without taking into account the carryover basis rules of this section.

(ii) *Time for transfer.* This paragraph (d)(4) applies only if the asset is transferred before the due date (including extensions) for the transferor's income tax return for the year that includes the last date for which a section 338 election may be made for target.

(e) *Examples*—(1) *In general.* For purposes of the examples in this section, unless otherwise stated, the basis of each asset is the same for determining earnings and profits and taxable income, the exceptions to paragraph (d)(1) of this section do not apply, the taxable year of all persons is the calendar year, and the following facts apply: S is the common parent of a consolidated group that includes T, T1, T2, and T3; S owns all of the stock of T and T3; and T owns all of the stock of T1, which owns all of the stock of T2. B is unrelated to the S group and owns all of the stock of P, which owns all of the stock of P1. Y and Y1 are partnerships that are unrelated to the S group but may be related to the P group. Z is a corporation that is not related to any of the other parties.



(2) *Direct acquisitions.* Paragraphs (b), (c), and (d) of this section may be illustrated by the following examples:

Example 1. Asset acquired from target by purchasing corporation. (a) On February 1 of Year 1, T sells an asset to P1 and recognizes gain. T's gain from the disposition of the asset is taken into account under §1.1502–32 in determining S's basis in the T stock. On January 1 of Year 2, P1 makes a qualified stock purchase of T from S. No section 338 election is made for T.

(b) T disposed of the asset during its consistency period, gain from the asset disposition is reflected in the basis of the T stock as of T's acquisition date (January 1 of Year 2), and the asset is owned both immediately after the asset disposition (February 1 of Year 1) and on T's acquisition date by P1, the corporation that acquired T stock in the qualified stock purchase. Consequently, under paragraph (b) of this section, paragraph (d)(1) of this section applies to the asset and P1's basis in the asset is T's adjusted basis in the asset immediately before the sale to P1.

Example 2. Gain from section 338(h)(10) election reflected in stock basis. (a) On February 1 of Year 1, P1 makes a qualified stock purchase of T2 from T1. A section 338(h)(10) election is made for T2 and T2 recognizes gain on each of its assets. T2's gain is taken into account under §1.1502–32 in determining S's basis in the T stock. On January 1 of Year 2, P1 makes a qualified stock purchase of T from S. No section 338 election is made for T.

(b) Under paragraph (b)(2) of this section, the acquisition of the T2 stock is treated as an acquisition of T2's assets on February 1 of Year 1, because a section 338(h)(10) election is made for T2. The gain recognized by T2 under section 338(h)(10) is reflected in S's basis in the T stock as of T's acquisition date. Because the other requirements of paragraph (b) of this section are satisfied, paragraph (d)(1) of this section applies to the assets and new T2's basis in its assets is old T2's adjusted basis in the assets immediately before the disposition.

Example 3. Corporation owning asset ceases affiliation with corporation purchasing target before target acquisition date. (a) On February 1 of Year 1, T sells an asset to P1 and recognizes gain. On December 1 of Year 1, P disposes of all of the P1 stock while P1 still owns the asset. On January 1 of Year 2, P makes a qualified stock purchase of T from S. No section 338 election is made for T.

(b) Immediately after T's disposition of the asset, the asset is owned by P1 which is affiliated on that date with P, the corporation that acquired T stock in the qualified stock purchase. However, the asset is owned by a corporation (P1) that is no longer affiliated with P on T's acquisition date. Although the other requirements of paragraph (b) of this section are satisfied, the requirements of paragraph (b)(1)(iii) of this section are not satisfied. Consequently, the basis rules of paragraph (d) of this section do not apply to the asset by reason of P1's acquisition.

(c) If P acquires all of the Z stock and P1 transfers the asset to Z on or before T's acquisition date (January 1 of Year 2), the asset is owned by an affiliate of P both on February 1 of Year 1 (P1) and on January 1 of Year 2 (Z). Consequently, all of the requirements of paragraph (b) of this section are satisfied and paragraph (d)(1) of this section applies to the asset and P1's basis in the asset is T's adjusted basis in the asset immediately before the sale to P1.

Example 4. Gain reflected in stock basis notwithstanding offsetting loss or distribution. (a) On April 1 of Year 1, T sells an asset to P1 and recognizes gain. In Year 1, T distributes an amount equal to the gain. On March 1 of Year 2, P makes a qualified stock purchase of T from S. No section 338 election is made for T.

(b) Although, as a result of the distribution, there is no adjustment with respect to the T stock under § 1.1502–32 for Year 1, T's gain from the disposition of the asset is considered reflected in S's basis in the T stock. The gain is considered to have been taken into account under § 1.1502–32 in determining the adjustments to S's basis in the T stock because S's basis in the T stock is different from what it would have been had there been no gain.

(c) If T distributes an amount equal to the gain on February 1 of Year 2, rather than in Year 1, the results would be the same because S's basis in the T stock is different from what it would have been had there been no gain. If the distribution in Year 2 is by reason of an election under § 1.1502–32(f)(2), the results would be the same.

(d) If, in Year 1, T does not make a distribution and the S group does not file a consolidated return, but, in Year 2, the S group does file a consolidated return and makes an election under § 1.1502–32(f)(2) for T, the results would be the same. S's basis in the T stock is different from what it would have been had there been no gain. Paragraph (c)(3) of this section (gain not considered reflected by reason of distributions) does not apply to the deemed distribution under the election because S and T are members of the same consolidated group. If T distributes an amount equal to the gain in Year 2 and no election is made under § 1.1502–32(f)(2), the results would be the same.

(e) If, in Year 1, T incurs an unrelated loss in an amount equal to the gain, rather than distributing an amount equal to the gain, the results would be the same because the gain is taken into account under § 1.1502–32 in determining S's basis in the T stock.

Example 5. Gain of a target affiliate reflected in stock basis after corporate reorganization. (a) On February 1 of Year 1, T3 sells an asset to P1 and recognizes gain. On March 1 of Year 1, S contributes the T3 stock to T in a transaction qualifying under section 351. On January 15 of Year 2, P1 makes a qualified stock purchase of T from S. No section 338 election is made for T.

(b) T3's gain from the asset sale is taken into account under § 1.1502–32 in determining S's basis in the T3 stock. Under section 358, the gain that is taken into account under § 1.1502–32 in determining S's basis in the T3 stock is also taken into account in determining S's basis in the T stock following S's contribution of the T3 stock to T. Consequently, under paragraph (b) of this section, paragraph (d)(1) of this section applies to the asset and P1's basis in the asset is T3's adjusted basis in the asset immediately before the sale to P1.

(c) If on March 1 of Year 1, rather than S contributing the T3 stock to T, S causes T3 to merge into T in a transaction qualifying under section 368(a)(1)(D), the results would be the same.

Example 6. Gain not reflected if election under section 338 made. (a) On February 1 of Year 1, T1 sells an asset to P1 and recognizes gain. On January 1 of Year 2, P1 makes a qualified stock purchase of T1 from T. A section 338 election (but not a section 338(h)(10) election) is made for T1.

(b) Under paragraph (c)(2) of this section, because a section 338 election is made for T1, T's basis in the T1 stock is considered not to reflect gain from the disposition. Consequently, the requirement of paragraph (b)(1)(ii) of this section is not satisfied. Thus, P1's basis in the asset is not determined under paragraph (d) of this section. Although the section 338 election for T1 results in a qualified stock purchase of T2, the requirement of paragraph (b)(1)(ii) of this section is not satisfied with respect to T2, whether or not a section 338 election is made for T2.

(c) If, on January 1 of Year 2, P1 makes a qualified stock purchase of T from S and a section 338 election for T, rather than T1, S's basis in the T stock is considered not to reflect gain from T1's disposition of the asset. However, the section 338 election for T results in a qualified stock purchase of T1. Because the gain is reflected in T's basis in the T1 stock, the requirements of paragraph (b) of this section are satisfied. Consequently, P1's basis in the asset is determined under paragraph (d)(1) of this section unless a section 338 election is also made for T1.

(f) *Extension of consistency to indirect acquisitions*—(1) *Introduction*. If an arrangement exists (see paragraph (j)(5) of this section), this paragraph (f) generally extends the consistency rules to indirect acquisitions that have the same effect as direct acquisitions. For example, this paragraph (f) applies if, pursuant to an arrangement, target sells an asset to an unrelated person who then sells the asset to the purchasing corporation.

(2) *General rule.* This paragraph (f) applies to an asset if, pursuant to an arrangement—

(i) The asset is disposed of during the target consistency period;

(ii) The basis of target stock as of, or at any time before, the target acquisition date reflects gain from the disposition of the asset; and

(iii) The asset ownership requirements of paragraph (b)(1)(iii) of this section are not satisfied, but the asset is owned, at any time during the portion of the target consistency period following the target acquisition date, by—

(A) A corporation—

(*1*) The basis of whose stock, as of, or at any time before, the target acquisition date, reflects gain from the disposition of the asset; and

(*2*) That is affiliated, at any time during the target consistency period, with a corporation that acquires stock of target in the qualified stock purchase; or

(B) A corporation that at the time it owns the asset is affiliated with a corporation described in paragraph (f)(2)(iii)(A) of this section.

(3) *Basis of acquired assets.* If this paragraph (f) applies to an asset, the principles of the basis rules of paragraph (d) of this section apply to the asset as of the date, following the disposition with respect to which gain is reflected in the basis of target's stock, that the asset is first owned by a corporation described in paragraph (f)(2)(iii) of this section. If the principles of the carryover basis rule of paragraph (d)(1) of this section apply to an asset, the asset's basis also is reduced (but not below zero) by the amount of any reduction in its basis occurring after the disposition with respect to which gain is reflected in the basis of target's stock.

(4) *Examples.* This paragraph (f) may be illustrated by the following examples:

Example 1. Acquisition of asset from unrelated party by purchasing corporation. (a) On February 1 of Year 1, T sells an asset to Z and recognizes gain. On February 15 of Year 1, P1 makes a qualified stock purchase of T from S. No section 338 election is made for T. P1 buys the asset from Z on March 1 of Year 1, before Z has reduced the basis of the asset through depreciation or otherwise.

(b) Paragraph (b) of this section does not apply to the asset because the asset ownership requirements of paragraph (b)(1)(iii) of this section are not satisfied. However, the asset ownership requirements of paragraph (f)(2)(iii) of this section are satisfied because, during the portion of T's consistency period following T's acquisition date, the asset is owned by P1 while it is affiliated with T. Consequently, paragraph (f) of this section applies to the asset if there is an arrangement for T to dispose of the asset during T's consistency period, for the gain to be reflected in S's basis in the T stock as of T's acquisition date, and for P1 to own the asset during the portion of T's consistency period following T's acquisition date. If the arrangement exists, under paragraph (f)(3) of this section, P1's basis in the asset is determined as of March 1 of Year 1, under the principles of paragraph (d) of this section. Consequently, P1's basis in the asset is T's adjusted basis in the asset immediately before the sale to Z.

(c) If P1 acquires the asset from Z on January 15 of Year 2 (rather than on March 1 of Year 1), and Z's basis in the asset has been reduced through depreciation at the time of the acquisition, P1's basis in the asset as of January 15 of Year 2 would be T's adjusted basis in the asset immediately before the sale to Z, reduced (but not below zero) by the amount of the depreciation. Z's basis and depreciation are determined without taking into account the basis rules of paragraph (d) of this section.

(d) If P, rather than P1, acquires the asset from Z, the results would be the same.

(e) If, on March 1 of Year 1, P1 acquires the Z stock, rather than acquiring the asset from Z, paragraph (f) of this section would apply to the asset if an arrangement exists. However, under paragraph (f)(3) of this section, Z's basis in the asset would be determined as of February 1 of Year 1, the date the asset is first owned by a corporation (Z) described in paragraph (f)(2)(iii) of this section. Consequently, Z's basis in the asset as of February 1 of Year 1, determined under the principles of paragraph (d) of this section, would be T's adjusted basis in the asset immediately before the sale to Z.

Example 2. Acquisition of asset from target by target affiliate. (a) On February 1 of Year 1, T contributes an asset to T1 in a transaction qualifying under section 351 and in which T recognizes gain under section 351(b) that is deferred under § 1.1502–13. On March 1 of Year 1, P1 makes a qualified stock purchase of T from S and, pursuant to § 1.1502–13, the deferred gain is taken into account by T immediately before T ceases to be a member of the S group. No section 338 election is made for T.

(b) Paragraph (b) of this section does not apply to the asset because the asset ownership requirements of paragraph (b)(1)(iii) of this section are not satisfied.

(c) T1 is not described in paragraph (f)(2)(iii)(A) of this section because the basis of the T1 stock does not reflect gain from the disposition of the asset. Although, under section 358(a)(1)(B)(ii), T's basis in the T1 stock is increased by the amount of the gain, the gain is not taken into account directly or indirectly under § 1.1502–32 in determining T's basis in the T1 stock.

(d) T1 is described in paragraph (f)(2)(iii)(B) of this section because, during the portion of T's consistency period following T's acquisition date, T1 owns the asset while it is affiliated with T, a corporation described in paragraph (f)(2)(iii)(A) of this section. Consequently, paragraph (f) of this section applies to the asset if there is an arrangement. Under paragraph (j)(5) of this section, the fact that, at the time T1 acquires the asset from T, T1 is related (within the meaning of section 267(b)) to T indicates that an arrangement exists.

Example 3. Acquisition of asset from target and indirect acquisition of target stock. (a) On February 1 of Year 1, T sells an asset to P1 and recognizes gain. On March 1 of Year 1, Z makes a qualified stock purchase of T from S. No section 338 election is made for T. On January 1 of Year 2, P1 acquires the T stock from Z other than in a qualified stock purchase.

(b) The asset ownership requirements of paragraph (b)(1)(iii) of this section are not satisfied because the asset was never owned by Z, the corporation that acquired T stock in the qualified stock purchase (or by a corporation that was affiliated with Z at the time it owned the asset). However, because the asset is owned by P1 while it is affiliated with T during the portion of T's consistency period following T's acquisition date, paragraph (f) of this section applies to the asset if there is an arrangement. If there is an arrangement, the principles of the carryover basis rule of paragraph (d)(1) of this section apply to determine P1's basis in the asset unless Z makes a section 338 election for T. See paragraph (c)(2) of this section.

(c) If P1 also makes a qualified stock purchase of T from Z, the results would be the same. If there is an arrangement, the principles of the carryover basis rule of paragraph (d)(1) of this section apply to determine P1's basis in the asset unless Z makes a section 338 election for T. However, these principles apply to determine P1's basis in the asset if P1, but not Z, makes a section 338 election for T. The basis of the T stock no longer reflects, as of T's acquisition date by P1, the gain from the disposition of the asset.

(d) Assume Z purchases the T stock other than in a qualified stock purchase and P1 makes a qualified stock purchase of T from Z. Paragraph (b) of this section does not apply to the asset because gain from the disposition of the asset is not reflected in the basis of T's stock as of T's acquisition date (January 1 of Year 2). However, because the gain is reflected in S's basis in the T stock before T's acquisition date and the asset is owned by P1 while it is affiliated with T during the portion of T's consistency period following T's acquisition date, paragraph (f) of this section applies to the asset if there is an arrangement. If there is an arrangement, the principles of the carryover basis rule of paragraph (d)(1) of this section apply to determine P1's basis in the asset even if P1 makes a section 338 election for T. The basis of the T stock no longer reflects, as of T's acquisition date, the gain from the disposition of the asset.

Example 4. Asset acquired from target affiliate by corporation that becomes its affiliate.(a) On February 1 of Year 1, T1 sells an asset to P1 and recognizes gain. On February 15 of Year 1, Z makes a qualified stock purchase of T from S. No section 338 election is made for T. On June 1 of Year 1, P1 acquires the T1 stock from T, other than in a qualified stock purchase.

(b) The asset ownership requirements of paragraph (b)(1)(iii) of this section are not satisfied because the asset was never owned by Z, the corporation that acquired T stock in the qualified stock purchase (or by a corporation that was affiliated with Z at the time it owned the asset).

(c) P1 is not described in paragraph (f)(2)(iii)(A) of this section because gain from the disposition of the asset is not reflected in the basis of the P1 stock.

(d) P1 is described in paragraph (f)(2)(iii)(B) of this section because the asset is owned by P1 while P1 is affiliated with T1 during the portion of T's consistency period following T's acquisition date. T1 becomes affiliated with Z, the corporation that acquired T stock in the qualified stock purchase, during T's consistency period, and, as of T's acquisition date, the basis of T1's stock reflects gain from the disposition of the asset. Consequently, paragraph (f) of this section applies to the asset if there is an arrangement.

Example 5. De minimis rules.(a) On February 1 of Year 1, T sells an asset to P and recognizes gain. On February 15 of Year 1, T1 sells an asset to Z and recognizes gain. The aggregate amount realized by T and T1 on their respective sales of assets is not more than $250,000. On March 1 of Year 1, T3 sells an asset to P and recognizes gain. On April 1 of Year 1, P makes a qualified stock purchase of T from S. No section 338 election is made for T. On June 1 of Year 1, P1 buys from Z the asset sold by T1.

(b) Under paragraph (b) of this section, the basis rules of paragraph (d) of this section apply to the asset sold by T. Under paragraph (f) of this section, the principles of the basis rules of paragraph (d) of this section apply to the asset sold by T1 if there is an arrangement. Because T3's gain is not reflected in the basis of the T stock, the basis rules of this section do not apply to the asset sold by T3.

(c) The de minimis rule of paragraph (d)(3) of this section applies to an asset if the asset is not disposed of as part of the same arrangement as the acquisition of T and the aggregate amount realized for all assets otherwise subject to the carryover basis rules does not exceed $250,000. The aggregate amount realized by T and T1 does not exceed $250,000. (The asset sold by T3 is not taken into account for purposes of the de minimis rule.) Thus, the de minimis rule applies to the asset sold by T if the asset is not disposed of as part of the same arrangement as the acquisition of T.

(d) If, under paragraph (f) of this section, the principles of the carryover basis rules of paragraph (d)(1) of this section otherwise apply to the asset sold by T1 because of an arrangement, the de minimis rules of this section do not apply to the asset because of the arrangement.

(e) Assume on June 1 of Year 1, Z acquires the T1 stock from T, other than in a qualified stock purchase, rather than P1 buying the T1 asset, and paragraph (f) of this section applies because there is an arrangement. Because the asset was disposed of and the T1 stock was acquired as part of the arrangement, the de minimis rules of this section do not apply to the asset.

(g) *Extension of consistency if dividends qualifying for 100 percent dividends received deduction are paid*—(1) *General rule for direct acquisitions from target.* Unless a section 338 election is made for target, the basis rules of paragraph (d) of this section apply to an asset if—

(i) Target recognizes gain (whether or not deferred) on disposition of the asset during the portion of the target consistency period that ends on the target acquisition date;

(ii) The asset is owned, immediately after the asset disposition and on the target acquisition date, by a corporation that acquires stock of target in the qualified stock purchase (or by an affiliate of an acquiring corporation); and

(iii) During the portion of the target consistency period that ends on the target acquisition date, the aggregate amount of dividends paid by target, to which section 243(a)(3) applies, exceeds the greater of—

(A) $250,000; or

(B) 125 percent of the yearly average amount of dividends paid by target, to which section 243(a)(3) applies, during the three calendar years immediately preceding the year in which the target consistency period begins (or, if shorter, the period target was in existence).

(2) *Other direct acquisitions having same effect.* The basis rules of paragraph (d) of this section also apply to an asset if the effect of a transaction described in paragraph (g)(1) of this section is achieved through any combination of disposition of assets and payment of dividends to which section 243(a)(3) applies (or any other dividends eligible for a 100 percent dividends received deduction). See paragraph (h)(4) of this section for additional rules relating to target affiliates that are controlled foreign corporations.

(3) *Indirect acquisitions.* The principles of paragraph (f) of this section also apply for purposes of this paragraph (g).

(4) *Examples.* This paragraph (g) may be illustrated by the following examples:

Example 1. Asset acquired from target paying dividends to which section 243(a)(3) applies.(a) The S group does not file a consolidated return. In Year 1, Year 2, and Year 3, T pays dividends to S to which section 243(a)(3) applies of $200,000, $250,000, and $300,000, respectively. On February 1 of Year 4, T sells an asset to P and recognizes gain. On January 1 of Year 5, P makes a qualified stock purchase of T from S. No section 338 election is made for T. During the portion of T's consistency period that ends on T's acquisition date, T pays S dividends to which section 243(a)(3) applies of $1,000,000.

(b) Under paragraph (g)(1) of this section, paragraph (d) of this section applies to the asset. T recognizes gain on disposition of the asset during the portion of T's consistency period that ends on T's acquisition date, the asset is owned by P immediately after the disposition and on T's acquisition date, and T pays dividends described in paragraph (g)(1)(iii) of this section. Consequently, under paragraph (d)(1) of this section, P's basis in the asset is T's adjusted basis in the asset immediately before the sale to P.

(c) If T is a controlled foreign corporation, the results would be the same if T pays dividends in the amount described in paragraph (g)(1)(iii) of this section that qualify for a 100 percent dividends received deduction. See sections 243(e) and 245.

(d) If S and T3 file a consolidated return in which T, T1, and T2 do not join, the results would be the same because the dividends paid by T are still described in paragraph (g)(1)(iii) of this section.

(e) If T, T1, and T2 file a consolidated return in which S and T3 do not join, the results would be the same because the dividends paid by T are still described in paragraph (g)(1)(iii) of this section.

Example 2. Asset disposition by target affiliate achieving same effect.(a) The S group does not file a consolidated return. On February 1 of Year 1, T2 sells an asset to P and recognizes gain. T pays dividends to S described in paragraph (g)(1)(iii) of this section. On January 1 of Year 2, P makes a qualified stock purchase of T from S. No section 338 election is made for T.

(b) Paragraph (g)(1) of this section does not apply to the asset because T did not recognize gain on the disposition of the asset. However, under paragraph (g)(2) of this section, because the asset disposition by T2 and the dividends paid by T achieve the effect of a transaction described in paragraph (g)(1) of this section, the carryover basis rule of paragraph (d)(1) of this section applies to the asset. The effect was achieved because T2 is a lower-tier affiliate of T and the dividends paid by T to S reduce the value to S of T and its lower-tier affiliates.

(c) If T2 is a controlled foreign corporation, the results would be the same because T2 is a lower-tier affiliate of T and the dividends paid by T to S reduce the value to S of T and its lower-tier affiliates.

(d) If P buys an asset from T3, rather than T2, the asset disposition and the dividends do not achieve the effect of a transaction described in paragraph (g)(1) of this section because T3 is not a lower-tier affiliate of T. Thus, the basis rules of paragraph (d) of this section do not apply to the asset. The results would be the same whether or not P also acquires the T3 stock (whether or not in a qualified stock purchase).

Example 3. Dividends by target affiliate achieving same effect.(a) The S group does not file a consolidated return. On February 1 of Year 1, T1 sells an asset to P and recognizes gain. On January 1 of Year 2, P makes a qualified stock purchase of T from S. No section 338 election is made for T. T does not pay dividends to S described in paragraph (g)(1)(iii) of this section. However, T1 pays dividends to T that would be described in paragraph (g)(1)(iii) of this section if T1 were a target.

(b) Paragraph (g)(1) of this section does not apply to the asset because T did not recognize gain on the disposition of the asset and did not pay dividends described in paragraph (g)(1)(iii) of this section. Further, paragraph (g)(2) of this section does not apply because the dividends paid by T1 to T do not reduce the value to S of T and its lower-tier affiliates.

(c) If both S and T own T1 stock and T1 pays dividends to S that would be described in paragraph (g)(1)(iii) of this section if T1 were a target, paragraph (g)(2) of this section would apply because the dividends paid by T1 to S reduce the value to S of T and its lower-tier affiliates. If T, rather than T1, sold the asset to P, the results would be the same. Further, if T and T1 pay dividends to S that, only when aggregated, would be described in paragraph (g)(1)(iii) of this section (if they were all paid by T), the results would be the same.

Example 4. Gain reflected by reason of dividends.(a) S and T file a consolidated return in which T1 and T2 do not join. On February 1 of Year 1, T1 sells an asset to P and recognizes gain. On January 1 of Year 2, P makes a qualified stock purchase of T from S. No section 338 election is made for T. T1 pays dividends to T that would be described in paragraph (g)(1)(iii) of this section if T1 were a target.

(b) The requirements of paragraph (b) of this section are not satisfied because, under paragraph (c)(3) of this section, gain from T1's sale is not reflected in S's basis in the T stock by reason of the dividends paid by T1 to T.

(c) Although the dividends paid by T1 to T do not reduce the value to S of T and its lower-tier affiliates, paragraph (g)(2) of this section applies because the dividends paid by T1 to T are taken into account under § 1.1502–32 in determining S's basis in the T stock. Consequently, the carryover basis rule of paragraph (d)(1) of this section applies to the asset.

(h) *Consistency for target affiliates that are controlled foreign corporations*—(1) *In general.* This paragraph (h) applies only if target is a domestic corporation. For additional rules that may apply with respect to controlled foreign corporations, see paragraph (g) of this section. The definitions and nomenclature of § 1.338–1 (b) and (c) and paragraph (e) of this section apply for purposes of this section.

(2) *Income or gain resulting from asset dispositions*—(i) *General rule.* Income or gain of a target affiliate that is a controlled foreign corporation from the disposition of an asset is not reflected

in the basis of target stock under paragraph (c) of this section unless the income or gain results in an inclusion under section 951(a)(1)(A), 951(a)(1)(C), 1291 or 1293.

(ii) *Basis of controlled foreign corporation stock.* If, by reason of paragraph (h)(2)(i) of this section, the carryover basis rules of this section apply to an asset, no increase in basis in the stock of a controlled foreign corporation under section 961(a) or 1293(d)(1), or under regulations issued pursuant to section 1297(b)(5), is allowed to target or a target affiliate to the extent the increase is attributable to income or gain described in paragraph (h)(2)(i) of this section. A similar rule applies to the basis of any property by reason of which the stock of the controlled foreign corporation is considered owned under section 958(a)(2) or 1297(a).

(iii) *Operating rule.* For purposes of this paragraph (h)(2)—

(A) If there is an income inclusion under section 951 (a)(1)(A) or (C), the shareholder's income inclusion is first attributed to the income or gain of the controlled foreign corporation from the disposition of the asset to the extent of the shareholder's pro rata share of such income or gain; and

(B) Any income or gain under section 1293 is first attributed to the income or gain from the disposition of the asset to the extent of the shareholder's pro rata share of the income or gain.

(iv) *Increase in asset or stock basis*—(A) If the carryover basis rules under paragraph (h)(2)(i) of this section apply to an asset, and the purchasing corporation disposes of the asset to an unrelated party in a taxable transaction and recognizes and includes in its U.S. gross income or the U.S. gross income of its shareholders the greater of the income or gain from the disposition of the asset by the selling controlled foreign corporation that was reflected in the basis of the target stock under paragraph (c) of this section, or the gain recognized on the asset by the purchasing corporation on the disposition of the asset, then the purchasing corporation or the target or a target affiliate, as appropriate, shall increase the basis of the selling controlled foreign corporation stock subject to paragraph (h)(2)(ii) of this section, as of the date of the disposition of the asset by the purchasing corporation, by the amount of the basis increase that was denied under paragraph (h)(2)(ii) of this section. The preceding sentence shall apply only to the extent that the controlled foreign corporation stock is owned (within the meaning of section 958(a)) by a member of the purchasing corporation's affiliated group.

(B) If the carryover basis rules under paragraph (h)(2)(i) of this section apply to an asset, and the purchasing corporation or the target or a target affiliate, as appropriate, disposes of the stock of the selling controlled foreign corporation to an unrelated party in a taxable transaction and recognizes and includes in its U.S. gross income or the U.S. gross income of its shareholders the greater of the gain equal to the basis increase that was denied under paragraph (h)(2)(ii) of this section, or the gain recognized in the stock by the purchasing corporation or by the target or a target affiliate, as appropriate, on the disposition of the stock, then the purchasing corporation shall increase the basis of the asset, as of the date of the disposition of the stock of the selling controlled foreign corporation by the purchasing corporation or by the target or a target affiliate, as appropriate, by the amount of the basis increase that was denied pursuant to paragraph (h)(2)(i) of this section. The preceding sentence shall apply only to the extent that the asset is owned (within the meaning of section 958(a)) by a member of the purchasing corporation's affiliated group.

(3) *Stock issued by target affiliate that is a controlled foreign corporation.* The exception to the carryover basis rules of this section provided in paragraph (d)(2)(iii) of this section does not apply to stock issued by a target affiliate that is a controlled foreign corporation. After applying the carryover basis rules of this section to the stock, the basis in the stock is increased by the amount treated as a dividend under section 1248 on the disposition of the stock (or that would have been so treated but for section 1291), except to the extent the basis increase is attributable to the disposition of an asset in which a carryover basis is taken under this section.

(4) *Certain distributions*—(i) *General rule.* In the case of a target affiliate that is a controlled foreign corporation, paragraph (g) of this section applies with respect to the target affiliate by treating any reference to a dividend to which section 243(a)(3) applies as a reference to any amount taken into account under § 1.1502–32 in determining the basis of target stock that is—

(A) A dividend;

(B) An amount treated as a dividend under section 1248 (or that would have been so treated but for section 1291); or

(C) An amount included in income under section 951(a)(1)(B).

(ii) *Basis of controlled foreign corporation stock.* If the carryover basis rules of this section apply to an asset, the basis in the stock of the controlled foreign corporation (or any property by reason of which the stock is considered owned under section 958(a)(2)) is reduced (but not below zero) by the sum of any amounts that are treated, solely by reason of the disposition of the asset, as a dividend, amount treated as a dividend under section 1248 (or that would have been so treated but for section 1291), or amount included in income under section 951(a)(1)(B). For this purpose, any dividend, amount treated as a dividend under section 1248 (or that would have been so treated but for section 1291), or amount included in income under section 951(a)(1)(B) is considered attributable first to earnings and profits resulting from the disposition of the asset.

(iii) *Increase in asset or stock basis*—(A) If the carryover basis rules under paragraphs (g) and (h)(4)(i) of this section apply to an asset, and the purchasing corporation disposes of the asset to an unrelated party in a taxable transaction and recognizes and includes in its U.S. gross income or the U.S. gross income of its shareholders the greater of the gain equal to the basis increase denied in the asset pursuant to paragraphs (g) and (h)(4)(i) of this section, or the gain recognized on the asset by the purchasing corporation on the disposition of the asset, then the purchasing corporation or the target or a target affiliate, as appropriate, shall increase the basis of the selling controlled foreign corporation stock subject to paragraph (h)(4)(ii) of this section, as of the date of the disposition of the asset by the purchasing corporation, by the amount of the basis reduction under paragraph (h)(4)(ii) of this section. The preceding sentence shall apply only to the extent that the controlled foreign corporation stock is owned (within the meaning of section 958(a)) by a member of the purchasing corporation's affiliated group.

(B) If the carryover basis rules under paragraphs (g) and (h)(4)(i) of this section apply to an asset, and the purchasing corporation or the target or a target affiliate, as appropriate, disposes of the stock of the selling controlled foreign corporation to an unrelated party in a taxable transaction and recognizes and includes in its U.S. gross income or the U.S. gross income of its shareholders the greater of the amount of the basis reduction under paragraph (h)(4)(ii) of this section, or the gain recognized in the stock by the purchasing corporation or by the target or a target affiliate, as appropriate, on the disposition of the stock, then the purchasing corporation shall increase the basis of the asset, as of the date of the disposition of the stock of the selling controlled foreign corporation by the purchasing corporation or by the target or a target affiliate, as appropriate, by the amount of the basis increase that was denied pursuant to paragraphs (g) and (h)(4)(i) of this section. The preceding sentence shall apply only to the extent that the asset is owned (within the meaning of section 958(a)) by a member of the purchasing corporation's affiliated group.

(5) *Examples.* This paragraph (h) may be illustrated by the following examples:

Example 1. Stock of target affiliate that is a CFC.(a) The S group files a consolidated return; however, T2 is a controlled foreign corporation. On December 1 of Year 1, T1 sells the T2 stock to P and recognizes gain. On January 2 of Year 2, P makes a qualified stock purchase of T from S. No section 338 election is made for T.

(b) Under paragraph (b)(1) of this section, paragraph (d) of this section applies to the T2 stock. Under paragraph (h)(3) of this section, paragraph (d)(2)(iii) of this section does not apply to the T2 stock. Consequently, paragraph (d)(1) of this section applies to the T2 stock. However, after applying paragraph (d)(1) of this section, P's basis in the T2 stock is increased by the amount of T1's gain on the sale of the T2 stock that is treated as a dividend under section 1248. Because P has a carryover basis in the T2 stock, the T2 stock is not considered purchased within the meaning of section 338(h)(3) and no section 338 election may be made for T2.

Example 2. Stock of target affiliate CFC; inclusion under subpart F.(a) The S group files a consolidated return; however, T2 is a controlled foreign corporation. On December 1 of Year 1, T2 sells an asset to P and recognizes subpart F income that results in an inclusion in T1's gross income under section 951(a)(1)(A). On January 2 of Year 2, P makes a qualified stock purchase of T from S. No section 338 election is made for T.

(b) Because gain from the disposition of the asset results in an inclusion under section 951(a)(1)(A), the gain is reflected in the basis of the T stock as of T's acquisition date. See paragraph (h)(2)(i) of this section. Consequently, under paragraph (b)(1) of this section, paragraph (d)(1) of this section applies to the asset. In addition, under paragraph (h)(2)(ii) of this section, T1's basis in the T2 stock is not increased under section 961(a) by the amount of the inclusion that is attributable to the sale of the asset.

(c) If, in addition to making a qualified stock purchase of T, P acquires the T2 stock from T1 on January 1 of Year 2, the results are the same for the asset sold by T2. In addition, under paragraph (h)(2)(ii) of this section, T1's basis in the T2 stock is not increased by the amount of the inclusion that is attributable to the gain on the sale of the asset. Further, under paragraph (h)(3) of this section, paragraph (d)(1) of this section applies to the T2 stock. However, after applying paragraph (d)(1) of this section, P's basis in the T2 stock is increased by the amount of T1's gain on the sale of the T2 stock that is treated as a dividend under section 1248. Finally, because P has a carryover basis in the T2 stock, the T2 stock is not considered purchased within the meaning of section 338(h)(3) and no section 338 election may be made for T2.

(d) If P makes a qualified stock purchase of T2 from T1, rather than of T from S, and T1's gain on the sale of T2 is treated as a dividend under section 1248, under paragraph (h)(1) of this section, paragraphs (h)(2) and (3) of this section do not apply because there is no target that is a domestic corporation. Consequently, the carryover basis rules of paragraph do not apply to the asset sold by T2 or the T2 stock.

Example 3. Gain reflected by reason of section 1248 dividend; gain from non-subpart F asset.(a) The S group files a consolidated return; however, T2 is a controlled foreign corporation. In Years 1 through 4, T2 does not pay any dividends to T1 and no amount is included in T1's income under section 951(a)(1)(B). On December 1 of Year 4, T2 sells an asset with a basis of $400,000 to P for $900,000. T2's gain of $500,000 is not subpart F income. On December 15 of Year 4, T1 sells T2, in which it has a basis of $600,000, to P for $1,600,000. Under section 1248, $800,000 of T1's gain of $1,000,000 is treated as a dividend. However, in the absence of the sale of the asset by T2 to P, only $300,000 would have been treated as a dividend under section 1248. On December 30 of Year 4, P makes a qualified stock purchase of T1 from T. No section 338 election is made for T1.

(b) Under paragraph (h)(4) of this section, paragraph (g)(2) of this section applies by reference to the amount treated as a dividend under section 1248 on the disposition of the T2 stock. Because the amount treated as a dividend is taken into account in determining T's basis in the T1 stock under §1.1502–32, the sale of the T2 stock and the deemed dividend have the effect of a transaction described in paragraph (g)(1) of this section. Consequently, paragraph (d)(1) of this section applies to the asset sold by T2 to P and P's basis in the asset is $400,000 as of December 1 of Year 4.

(c) Under paragraph (h)(3) of this section, paragraph (d)(1) of this section applies to the T2 stock and P's basis in the T2 stock is $600,000 as of December 15 of Year 4. Under paragraphs (h)(3) and (4)(ii) of this section, however, P's basis in the T2 stock is increased by $300,000 (the amount of T1's gain treated as a dividend under section 1248 ($800,000), other than the amount treated as a dividend solely as a result of the sale of the asset by T2 to P ($500,000)) to $900,000.

(i) [Reserved]

(j) *Anti-avoidance rules.* For purposes of this section—

(1) *Extension of consistency period.* The target consistency period is extended to include any continuous period that ends on, or begins on, any day of the consistency period during which a purchasing corporation, or any person related, within the meaning of section 267(b) or 707(b)(1), to a purchasing corporation, has an arrangement—

(i) To purchase stock of target; or

(ii) To own an asset to which the carryover basis rules of this section apply, taking into account the extension.

(2) *Qualified stock purchase and 12-month acquisition period.* The 12-month acquisition period is extended if, pursuant to an arrangement, a corporation acquires by purchase stock of another corporation satisfying the requirements of section 1504(a)(2) over a period of more than 12 months.

(3) *Acquisitions by conduits*—(i) *Asset ownership*—(A) *General rule.* A corporation is treated as owning any portion of an asset attributed to the corporation from a conduit under section 318(a) (treating any asset as stock for this purpose), for purposes of—

(*1*) The asset ownership requirements of this section; and

(*2*) Determining whether a controlled foreign corporation is a target affiliate for purposes of paragraph (h) of this section.

(B) *Application of carryover basis rule.* If the basis rules of this section apply to the asset, the basis rules of this section apply to the entire asset (not just the portion for which ownership is attributed).

(ii) *Stock acquisitions*—(A) *Purchase by conduit.* A corporation is treated as purchasing stock of another corporation attributed to the corporation from a conduit under section 318(a) on the day the stock is purchased by the conduit. The corporation is not treated as purchasing the stock, however, if the conduit purchased the stock more than two years before the date the stock is first attributed to the corporation.

(B) *Purchase of conduit by corporation.* If a corporation purchases an interest in a conduit (treating the interest as stock for this purpose), the corporation is treated as purchasing on that date any stock owned by a conduit on that date and attributed to the corporation under section 318(a) with respect to the interest in the conduit that was purchased.

(C) *Purchase of conduit by conduit.* If a conduit (the *first* conduit) purchases an interest in a second conduit (treating the interest as stock for this purpose), the first conduit is treated as purchasing on that date any stock owned by a conduit on that date and attributed to the first conduit under section 318(a) with respect to the interest in the second conduit that was purchased.

(4) *Conduit.* A person (other than a corporation) is a conduit as to a corporation if—

(i) The corporation would be treated under section 318(a)(2)(A) and (B) (attribution from partnerships, estates, and trusts) as owning any stock owned by the person; and

(ii) The corporation, together with its affiliates, would be treated as owning an aggregate of at least 50 percent of the stock owned by the person.

(5) *Existence of arrangement.* The existence of an arrangement is determined under all the facts and circumstances. For an arrangement to exist, there need not be an enforceable, written, or unconditional agreement, and all the parties to the transaction need not have participated in each step of the transaction. One factor indicating the existence of an arrangement is the participation of a related party. For this purpose, persons are related if they are related within the meaning of section 267(b) or 707(b)(1).

(6) *Predecessor and successor*—(i) *Persons.* A reference to a person (including target, target affiliate, and purchasing corporation) includes, as the context may require, a reference to a predecessor or successor. For this purpose, a predecessor is a transferor or distributor of assets to a person (the successor) in a transaction—

(A) To which section 381(a) applies; or

(B) In which the successor's basis for the assets is determined, directly or indirectly, in whole or in part, by reference to the basis of the transferor or distributor.

(ii) *Assets.* A reference to an asset (the first asset) includes, as the context may require, a reference to any asset the basis of which is determined, directly or indirectly, in whole or in part, by reference to the first asset.

(7) *Examples.* This paragraph (j) may be illustrated by the following examples:

Example 1. Asset owned by conduit treated as owned by purchaser of target stock.(a) P owns a 60-percent interest in Y. On March 1 of Year 1, T sells an asset to Y and recognizes gain. On January 1 of Year 2, P makes a qualified stock purchase of T from S. No section 338 election is made for T.

(b) Under paragraph (j)(4) of this section, Y is a conduit with respect to P. Consequently, under paragraph (j)(3)(i)(A) of this section, P is treated as owning 60% of the asset on March 1 of Year 1 and January 1 of Year 2. Because P is treated as owning part or all of the asset both immediately after the asset disposition and on T's acquisition date, paragraph (b) of this section applies to the asset. Consequently, paragraph (d)(1) of this section applies to the asset and Y's basis in the asset is T's adjusted basis in the asset immediately before the sale to Y.

Example 2. Corporation whose stock is owned by conduit treated as affiliate.(a) P owns an 80-percent interest in Y. Y owns all of the stock of Z. On March 1 of Year 1, T sells an asset to Z and recognizes gain. On January 1 of Year 2, P makes a qualified stock purchase of T from S. No section 338 election is made for T.

(b) Under paragraph (j)(4) of this section, Y is a conduit with respect to P. Consequently, under paragraph (j)(3)(i)(A) of this section, P is treated as owning 80% of the Z stock and Z is therefore treated as an affiliate of P for purposes of applying the asset ownership requirements of paragraph (b)(1)(iii) of this section. Because Z, an affiliate of P, owns the asset both immediately after the asset disposition and on T's acquisition date, paragraph (b) of this section applies to the asset, and the asset's basis is determined under paragraph (d) of this section.

(c) If, instead of owning an 80-percent interest in Y, P owned a 79-percent interest in Y, Z would not be treated as an affiliate of P and paragraph (b) of this section would not apply to the asset.

Example 3. Qualified stock purchase by reason of stock purchase by conduit.(a) P owns a 90-percent interest in Y. Y owns a 60-percent interest in Y1. On February 1 of Year 2, T sells an asset to P and recognizes gain. On January 1 of Year 3, P purchases 70% of the T stock from S and Y1 purchases the remaining 30% of the T stock from S.

(b) Under paragraph (j)(3)(ii)(A) of this section, P is treated as purchasing on January 1 of Year 3, the 16.2% of the T stock that is attributed to P from Y and Y1 under section 318(a). Thus, for purposes of this section, P is treated as making a qualified stock purchase of T on January 1 of Year 3, paragraph (b) of this section applies to the asset, and the asset's basis is determined under paragraph (d) of this section. However, because P is not treated as having made a qualified stock purchase of T for purposes of making an election under section 338, no election can be made for T.

(c) If Y1 purchases 20% of the T stock from S on December 1 of Year 1, rather than 30% on January 1 of Year 3, P would be treated as purchasing 10.8% of the T stock on December 1 of Year 1. Thus, if paragraph (j)(2) of this section (relating to extension of the 12-month acquisition period) does not apply, P would not be treated as making a qualified stock purchase of T, because P is not treated as purchasing T stock satisfying the requirements of section 1504(a)(2) within a 12-month period.

Example 4. Successor asset.(a) On February 1 of Year 1, T sells stock of X to P1 and recognizes gain. On December 1 of Year 1, P1 exchanges its X stock for stock in new X in a reorganization qualifying under section 368(a)(1)(F). On January 1 of Year 2, P1 makes a qualified stock purchase of T from S. No section 338 election is made for T.

(b) The asset ownership requirements of paragraph (b)(1)(iii) of this section are satisfied because, under paragraph (j)(6)(ii) of this section, P1 is treated as owning the X stock on T's acquisition date. P1 is treated as owning the X stock on that date because P1 owns the new X stock and P1's basis in the new X stock is determined by reference to P1's basis in the X stock. Consequently, under paragraph (d)(1) of this section, P1's basis in the X stock on February 1 of Year 1 is T's adjusted basis in the X stock immediately before the sale to P1.

[T.D. 8515, 59 FR 2972, Jan. 20, 1994, as amended by T.D. 8597, 60 FR 36679, July 18, 1995; T.D. 8710, 62 FR 3459, Jan. 23, 1997]

§1.338–5 International aspects of section 338.

(a) *Scope.* This section provides guidance regarding international aspects of section 338. As provided in §1.338–1(c)(14), a foreign corporation, a DISC, or a corporation for which a section 936 election has been made is considered a target affiliate for all purposes of section 338. In addition, stock described in section 338(h)(6)(B)(ii) held by a target affiliate is not excluded from the operation of section 338.

(b) *Application of section 338 to foreign targets*—(1) *In general.* For purposes of subtitle A, the deemed sale gain, as defined in §1.338–3(b)(4), of a foreign target for which a section 338 election is made (FT), and the corresponding earnings and profits, are taken into account in determining the taxation of FT and FT's direct and indirect shareholders. See, however, section 338(h)(16). For example, the income and earnings and profits of FT are determined, for purposes of sections 551, 951, 1248, and 1293, by taking into account the deemed sale gain.

(2) *Ownership of FT stock on the acquisition date.* A person who transfers FT stock to the purchasing corporation on FT's acquisition date is considered to own the transferred stock at the close of FT's acquisition date. See, e.g., §1.951–1(f) (relating to determination of holding period for purposes of sections 951 through 964). If on the acquisition date the purchasing corporation owns a block of FT stock that was acquired before FT's acquisition date, the purchasing corporation is considered to

own such block of stock at the close of the acquisition date.

(3) *Carryover FT stock*—(i) *Definition.* FT stock is carryover FT stock if—

(A) FT was a controlled foreign corporation within the meaning of section 957 (taking into account section 953(c)) at any time during the portion of the 12-month acquisition period that ends on the acquisition date; and

(B) Such stock is owned as of the beginning of the day after FT's acquisition date by a person other than a purchasing corporation, or by a purchasing corporation if the stock is nonrecently purchased and is not subject to a gain recognition election under § 1.338(b)–1(e)(2).

(ii) *Carryover of earnings and profits.* The earnings and profits of old FT (and associated foreign taxes) attributable to the carryover FT stock (adjusted to reflect deemed sale gain) carry over to new FT solely for purposes of—

(A) Characterizing an actual distribution with respect to a share of carryover FT stock as a dividend;

(B) Characterizing gain on a post-acquisition date transfer of a share of carryover FT stock as a dividend under section 1248 (if such section is otherwise applicable);

(C) Characterizing an investment of earnings in United States property as income under sections 951(a)(1)(B) and 956 (if such sections are otherwise applicable); and

(D) Determining foreign taxes deemed paid under sections 902 and 960 with respect to the amount treated as a dividend or income by virtue of this paragraph (b)(3)(ii) (subject to the operation of section 338(h)(16)).

(iii) *Cap on carryover of earnings and profits.* The amount of earnings and profits of old FT taken into account with respect to a share of carryover FT stock is limited to the amount that would have been included in gross income of the owner of such stock as a dividend under section 1248 if—

(A) The shareholder transferred that share to the purchasing corporation on FT's acquisition date for a consideration equal to the fair market value of that share on that date; or

(B) In the case of nonrecently purchased FT stock treated as carryover FT stock, a gain recognition election under section 338(b)(3)(A) applied to that share. For purposes of the preceding sentence, a shareholder that is a controlled foreign corporation is considered to be a United States person, and the principle of section 1248(c)(2)(D)(ii) (concerning a United States person's indirect ownership of stock in a foreign corporation) applies in determining the correct holding period.

(iv) *Post-acquisition date distribution of old FT earnings and profits.* A post-acquisition date distribution with respect to a share of carryover FT stock is considered to be derived first from earnings and profits derived after FT's acquisition date and then from earnings and profits derived on or before FT's acquisition date.

(v) *Old FT earnings and profits unaffected by post-acquisition date deficits.* The carryover amount for a share of carryover FT stock is not reduced by deficits in earnings and profits incurred by new FT. This rule applies for purposes of determining the amount of foreign taxes deemed paid regardless of the fact that there are no accumulated earnings and profits. For example, a distribution by new FT with respect to a share of carryover FT stock is treated as a dividend by the distributee to the extent of the carryover amount for that share notwithstanding that new FT has no earnings and profits.

(vi) *Character of FT stock as carryover FT stock eliminated upon disposition.* A share of FT stock is not considered carryover FT stock after it is disposed of provided that all gain realized on the transfer is recognized at the time of the transfer, or that, if less than all of the realized gain is recognized, the recognized amount equals or exceeds the remaining carryover amount for that share.

(4) *Passive foreign investment company stock.* Stock that is owned as of the beginning of the day after FT's acquisition date by a person other than a purchasing corporation, or by a purchasing corporation if the FT stock is nonrecently purchased stock not subject to a gain recognition election under § 1.338(b)–1(e)(2), is treated as passive foreign investment company stock to the extent provided in section 1297(b)(1).

(c) *Dividend treatment under section 1248(e).* The principles of this paragraph (b) apply to shareholders of a domestic corporation subject to section 1248(e).

(d) *Allocation of foreign taxes.* If a section 338 election is made for target (whether foreign or domestic), and target's taxable year under foreign law (if any) does not close at the end of the acquisition date, foreign income taxes attributable to the foreign taxable income earned by target during such foreign taxable year are allocated to old target and new target. Such allocation is made under the principles of § 1.1502–76(b).

(e) *Operation of section 338(h)(16).* [Reserved]

(f) *Examples.* (1) Except as otherwise provided, all corporations use the calendar year as the taxable year, have no earnings and profits (or deficit) accumulated for any taxable year, and have only one class of outstanding stock.

(2) This section may be illustrated by the following examples:

Example 1. Gain recognition election for carryover FT stock.(a) A has owned 90 of the 100 shares of CFCT stock since CFCT was organized on March 13, 1989. P has owned the remaining 10 shares of CFCT stock since CFCT was organized. Those 10 shares constitute nonrecently purchased stock in P's hands within the meaning of section 338(b)(6)(B). On November 1, 1994, P purchases A's 90 shares of CFCT stock for $90,000 and makes a section 338 election for CFCT. P also makes a gain recognition election under section 338(b)(3)(A) and § 1.338(b)–1(e)(2).

(b) CFCT's earnings and profits for its short taxable year ending on November 1, 1994, are $50,000, determined without taking into account the deemed asset sale. Assume A recognizes gain of $81,000 on the sale of the CFCT stock. Further, assume that CFCT recognizes gain of $40,000 by reason of its deemed sale of assets under section 338(a)(1).

(c) A's sale of CFCT stock to P is a transfer to which section 1248 and paragraphs (b)(1) and (2) of this section apply. For purposes of applying section 1248(a) to A, the earnings and profits of CFCT for its short taxable year ending on November 1, 1994, are $90,000 (the earnings and profits for that taxable year as determined under § 1.1248–2(e) ($50,000) plus earnings from the deemed sale ($40,000)). Thus, A's entire gain is characterized as a dividend under section 1248 (but see section 338(h)(16)).

(d) Assume that P recognizes a gain of $9,000 with respect to the 10 shares of nonrecently purchased CFCT stock by reason of the gain recognition election. Because P is treated as selling the nonrecently purchased stock for all purposes of the Internal Revenue Code, section 1248 applies. Thus, under § 1.1248–2(e), $9,000 of the $90,000 of earnings and profits for 1994 are attributable to the block of 10 shares of CFCT stock deemed sold by P at the close of November 1, 1994 ($90,000 × 10/100). Accordingly, P's entire gain on the deemed sale of 10 shares of CFCT stock is included under section 1248(a) in P's gross income as a dividend (but see section 338(h)(16)).

Example 2. No gain recognition election for carryover FT stock.(a) Assume the same facts as in *Example 1,* except that P does not make a gain recognition election.

(b) The 10 shares of nonrecently purchased CFCT stock held by P is carryover FT stock under paragraph (b)(3) of this section. Accordingly, the earnings and profits (and attributable foreign taxes) of old CFCT carry over to new CFCT solely for purposes of that block of 10 shares. The amount of old CFCT's earnings and profits taken into account with respect to that block in the event, for example, of a distribution by new CFCT with respect to that block is the amount of the section 1248 dividend that P would have recognized with respect to that block had it made a gain recognition election under section 338(b)(3)(A). Under the facts of *Example 1,* P would have recognized a gain of $9,000 with respect to that block, all of which would have been a section 1248 dividend ($90,000 × 10/100). Accordingly, the carryover amount for the block of 10 shares of nonrecently purchased CFCT stock is $9,000.

Example 3. Sale of controlled foreign corporation stock prior to and on the acquisition date.(a) X and Y, both U.S. corporations, have each owned 50% of the CFCT stock since 1986. Among CFCT's assets are assets the sale of which would generate subpart F income. On December 31, 1994, X sells its CFCT stock to P. On June 30, 1995, Y sells its CFCT stock to P. P makes a section 338 election for CFCT. In both 1994 and 1995, CFCT has subpart F income resulting from operations.

(b) For taxable year 1994, X and Y are United States shareholders on the last day of CFCT's taxable year, so pursuant to section 951(a)(1)(A) each must include in income its pro rata share of CFCT's subpart F income for 1994. Because P's holding period in the CFCT stock acquired from X does not begin until January 1, 1995, P is not a United States shareholder on the last day of 1994 for purposes of section 951(a)(1)(A) (see § 1.951–1(f)). X must then determine the extent to which section 1248 recharacterizes its gain on the sale of CFCT stock as a dividend.

(c) For the short taxable year ending June 30, 1995, Y is considered to own the CFCT stock sold to P at the close of CFCT's acquisition date. Because the acquisition date is the last day of CFCT's taxable year, Y and P are United States shareholders on the last day of CFCT's taxable year. Pursuant to section 951(a)(1)(A), each must include its pro rata share of CFCT's subpart F income for the short taxable year ending June 30, 1995. This includes any income generated on the deemed sale of CFCT's assets. Y must then determine the extent to which section 1248 recharacterizes its gain on the sale of the CFCT stock as a dividend, taking into account any increase in CFCT's earnings and profits due to the deemed sale of assets.

*Example 4. Acquisition of control for purposes of section 951 prior to the acquisition date.*FS owns 100% of the FT stock. On July 1, 1994, P buys 60% of the FT stock. On December 31, 1994, P buys the remaining 40% of the FT stock and makes a section 338 election for FT. For tax year 1994, FT has earnings and profits of $1,000 (including earnings resulting from the deemed sale). The section 338 election results in $500 of subpart F income. As a result of the section 338 election, P must include in gross income the following amount under section 951(a)(1)(A) (see § 1.951–(b)(2)):

FT's subpart F income for 1994	$500.00
Less: reduction under section 951(a)(2)(A) for period (1–1–94 through 7–1–94) during which FT is not a controlled foreign corporation ($500×182/365)	249.32
Subpart F income as limited by section 951 (a)(2)(A)	250.68
P's pro rata share of subpart F income as determined under section 951(a)(2)(A) (60%×250.68)	150.41

Example 5. Coordination with section 936.(a) T is a corporation for which a section 936 election has been made. P makes a qualified stock purchase of T and makes a section 338 election for T.

(b) T's deemed sale of assets under section 338 constitutes a sale for purposes of subtitle A of the Internal Revenue Code, including section 936(a)(1)(A)(ii). To the extent that the assets deemed sold are used in the conduct of an active trade or business in a possession for purposes of section 936(a)(1)(A)(i), and assuming all the other conditions of section 936 are satisfied, the income from the deemed sale qualifies for the credit granted by section 936(a). The source of income from the deemed sale is determined as if the assets had actually been sold and is not affected for purposes of section 936 by section 338(h)(16).

(c) Because new T is treated a new corporation for purposes of subtitle A of the Internal Revenue Code, the three year testing period in section 936(a)(2)(A) begins again for new T on the day following T's acquisition date. Thus, if the character or source of old T's gross income disqualified it for the credit under section 936, a fresh start is allowed by a section 338 election.

[T.D. 8515, 59 FR 2978, Jan. 20, 1994]

§ 1.338(b)–1 Adjusted grossed-up basis.

(a) *Scope.* This section provides rules under section 338(b) to determine the adjusted grossed-up basis (AGUB) for target. The AGUB is the amount for which new target is deemed to have purchased all of its assets in the deemed purchase under section 338(a)(2). The AGUB is allocated among target's assets in accordance with § 1.338(b)–2T to determine the price at which the assets are deemed to have been purchased. Subsequent adjustments to AGUB and the allocation of such adjustments to target's assets may be made under § 1.338(b)–3T.

(b) *Adjustment events.* Adjustment events are increases (or decreases) in the consideration paid for recently or nonrecently purchased stock, reductions in target's liabilities included in AGUB as of the beginning of the day after the acquisition date, and old target liabilities that become fixed and determinable.

(c) *AGUB*—(1) *In general.* AGUB is the sum of—

(i) The grossed-up basis in the purchasing corporation's recently purchased target stock;

(ii) The purchasing corporation's basis in nonrecently purchased target stock;

(iii) The liabilities of new target; and

(iv) Other relevant items.

(2) *Time when AGUB determined.* AGUB is initially determined at the beginning of the day after the acquisition date of target. However, adjustment events that occur during new target's first taxable year are taken into account for purposes of determining AGUB and the basis of target's assets as if they had occurred at the beginning of the day after the acquisition date.

(d) *Grossed-up basis of recently purchased stock*—(1) *General rule.* The purchasing corporation's grossed-up basis of recently purchased target stock is the product of—

(i) The purchasing corporation's basis in recently purchased target stock (as defined in section 338(b)(6)(A)) at the beginning of the day after the acquisition date; multiplied by

(ii) A fraction the numerator of which is 100 percent minus the percentage of target stock (by value) attributable to the purchasing corporation's nonrecently purchased target stock and the denominator of which is the percentage of target stock (by value) attributable to the purchasing corporation's recently purchased target stock. See section 338(b)(4).

(2) *Application.* If target has a single class of outstanding stock, the grossed-up basis in the purchasing corporation's recently purchased target stock reflects the total price the purchasing corporation would have paid for all outstanding target stock (other than the purchasing corporation's nonrecently purchased target stock, as defined in section 338(b)(6)(B)) had the purchasing corporation purchased all such stock (other than the nonrecently purchased target stock) for a price per share equal to the average price per share that the purchasing corporation paid for the recently purchased target stock.

(e) *Basis of nonrecently purchased stock*—(1) *In general.* In the absence of an election under section 338(b)(3) (gain recognition election), the purchasing corporation retains its basis in the nonrecently purchased stock. A gain recognition election applies to nonrecently purchased stock of target (or a target affiliate) only if a section 338 election is made for target (or the target affiliate).

(2) *Effect of gain recognition election*—(i) *In general.* If the purchasing corporation makes a gain recognition election, for all purposes of the Internal Revenue Code—

(A) The purchasing corporation is treated as if it sold on the acquisition date the nonrecently purchased target stock for the basis amount determined under paragraph (e)(2)(ii) of this section; and

(B) The purchasing corporation's basis on the acquisition date in nonrecently purchased target stock is the basis amount.

(ii) *Basis amount.* The basis amount is equal to the purchasing corporation's grossed-up basis in recently purchased target stock multiplied by a fraction the numerator of which is the percentage of target stock (by value) attributable to the purchasing corporation's nonrecently purchased target stock and the denominator of which is 100 percent minus the numerator amount. Thus, if target has a single class of outstanding stock, the purchasing corporation's basis in each share of nonrecently purchased target stock after the gain recognition election is equal to the average price per share of the purchasing corporation's recently purchased target stock.

(iii) *Losses not recognized.* Only gains (unreduced by losses) on the nonrecently purchased target stock are recognized.

(iv) *Stock subject to election.* The gain recognition election applies to—

(A) All nonrecently purchased target stock; and

(B) Any nonrecently purchased stock in a target affiliate having the same acquisition date as target if such target affiliate stock is held by the purchasing corporation on such date.

(3) *Procedure for making gain recognition election*—(i) *In general.* The gain recognition election is made by attaching a gain recognition statement to a timely filed Form 8023 for target. The gain recognition statement must contain the information specified in the form and its instructions. The gain recognition election is irrevocable.

(ii) *Section 338(h)(10) election.* If a section 338(h)(10) election is made for target, the purchasing corporation is deemed to have made a gain recognition election.

(4) *Comparison with ADSP formula.* Whenever the purchasing corporation holds nonrecently purchased target stock at a basis that differs from the purchasing corporation's basis in recently purchased target stock, the grossed-up basis in the purchasing corporation's recently purchased target stock as calculated for purposes of the AGUB differs from the grossed-up basis of the purchasing corporation's recently purchased target stock as calculated in the ADSP formula. The ADSP formula treats the purchasing corporation's nonrecently purchased target stock in the same manner as

target stock not held by the purchasing corporation. If a gain recognition election is made, the sum of the grossed-up basis in the purchasing corporation's recently purchased target stock and the purchasing corporation's basis in nonrecently purchased target stock equals the grossed-up basis of the purchasing corporation's recently purchased target stock as calculated in the ADSP formula.

(f) *Liabilities of new target*—(1) *In general.* The liabilities of new target are its liabilities (and the liabilities to which target's assets are subject) as of the beginning of the day after the acquisition date (other than liabilities that were neither liabilities of old target nor liabilities to which old target's assets were subject). The amount of the liabilities of new target taken into account to determine AGUB is determined as if new target had acquired old target's assets from an unrelated person and, as part of the transaction, had assumed or taken property subject to the liabilities.

(2) *Excluded obligations*—(i) *In general.* In order to be included in AGUB at the beginning of the day after the acquisition date, an obligation must be a bona fide liability of target as of that date which is properly includible in basis under principles of tax law that would apply if new target had acquired old target's assets from an unrelated person and, as part of the transaction, had assumed or taken property subject to the obligation. For example, if, as of the beginning of the day after the acquisition date, the amount of a contingent or speculative obligation of target is not properly includible in basis under the preceding sentence, the obligation is not initially included in AGUB.

(ii) *Time when excluded obligations taken into account.* Obligations that, under this paragraph (f)(2), are initially excluded from AGUB are taken into account in redetermining AGUB and the basis of target's assets under principles of tax law that would apply if new target had acquired old target's assets directly from an unrelated person and, as part of the transaction, had assumed or taken property subject to those obligations. For the application of these principles of tax law to certain contingent liabilities that are initially excluded from AGUB under this paragraph (f)(2), see § 1.338(b)–3T.

(3) *Liabilities taken into account in determining amount realized on subsequent disposition.* In determining the amount realized on a subsequent sale or other disposition of property deemed purchased by new target, the entire amount of any liability included in AGUB is considered to be an amount taken into account in determining new target's basis in property which secures the liability for purposes of applying § 1.1001–2(a). Thus, if a liability is included in AGUB, § 1.1001–2(a)(3) does not prevent the amount of such liability from being treated as discharged within the meaning of § 1.1001–2(a)(4) as a result of new target's sale or disposition of the property which secures such liability.

(g) *Other relevant items*—(1) *In general.* AGUB may be increased (or decreased) for *other relevant items.* For this purpose, other relevant items may only arise from adjustment events that occur after the close of new target's first taxable year and adjustments under paragraph (g)(3) of this section. See § 1.338(b)–3T (relating to the treatment of certain subsequent adjustments to AGUB). Unlike in the determination of ADSP or MADSP, other relevant items do not include reductions for acquisition costs incurred by the purchasing corporation in connection with the qualified stock purchase that are capitalized in the basis of recently purchased target stock.

(2) *Flow-through of relevant item adjustment to target subsidiary.* If the amount of AGUB of target (T) allocated to the stock of a target affiliate (T1) is subsequently increased (or decreased) by reason of an other relevant item under this paragraph (g), the grossed-up basis of the T1 stock (and, if a section 338 election is made for T1, T1's AGUB) is also increased (or decreased) as if the increase (or decrease) in the basis of the stock was an adjustment to the purchase price deemed paid by T for such stock. The resulting increase (or decrease) in AGUB of T1 is allocated among T1's assets in accordance with §§ 1.338(b)–2T and 1.338(b)–3T.

(3) *Adjustments by the Internal Revenue Service.* In connection with the examination of a return, the District Director may increase (or decrease) AGUB for items other than those described in paragraphs (g)(1) and (2) of this section under the authority of section 338(b)(2) and allocate such amounts to target's assets under the authority of section 338(b)(5) so that AGUB and the basis of target's assets properly reflect the cost to the purchasing corporation of its interest in target's assets. Such items may include distributions from target to the purchasing corporation, capital contributions from the purchasing corporation to target during the 12-month acquisition period, or acquisitions of target stock by purchasing corporation after the acquisition date from minority shareholders.

(h) *Examples.* (1) For purposes of the examples in this paragraph (h), T has no liabilities other than a tax liability resulting from the deemed sale of assets.

(2) This section may be illustrated by the following examples:

Example 1. (a) Before July 1 of Year 1, P purchases 10 of the 100 shares of T stock for $5,000. On July 1 of Year 2, P purchases 80 shares of T stock for $60,000 and makes a section 338 election for T. As of July 1 of Year 2, T's only asset is raw land with an adjusted basis to T of $50,400 and a fair market value of $100,000. T has no loss or tax credit carryovers to Year 2. T's marginal tax rate for any ordinary income or net capital gain resulting from the deemed sale of assets is 34%. The 10 shares purchased before July 1 of Year 1 constitute nonrecently purchased T stock with respect to P's qualified stock purchase of T stock on July 1 of Year 2.

(b) The ADSP formula as applied to these facts is the same as in *Example 2* of §1.338–3(d)(9). Accordingly, the ADSP of T is $87,672.72. The existence of nonrecently purchased T stock is irrelevant for purposes of the ADSP formula, because that formula treats P's nonrecently purchased T stock in the same manner as T stock not held by P.

(c) The total tax liability resulting from T's deemed sale of assets, as calculated under the ADSP formula, is $12,672.72.

(d) If P does not make a gain recognition election, the AGUB of new T's assets is $85,172.72, determined as follows. (In the formula below, GRP is the grossed-up basis in P's recently purchased T stock, BNP is P's basis in nonrecently purchased T stock, L is T's liabilities, and X is other relevant items.)

AGUB=GRP+BNP+L+X
AGUB=$60,000×[(1−.1)/.8]+$5,000+$12,672.72+0
AGUB=$85,172.72

(e) If P makes a gain recognition election, the AGUB of new T's assets is $87,672.72, determined as follows:

AGUB=$60,000×[(1−.1)/.8]+$60,000×[(1−.1)/.8]×[.1/(1−.1)]+$12,672.72
AGUB=$87,672.72

(f) The calculation of AGUB if P makes a gain recognition election may be simplified as follows:

AGUB=$60,000/.8+$12,672.72
AGUB=$87,672.72

(g) As a result of the gain recognition election, P's basis in its nonrecently purchased T stock is increased from $5,000 to $7,500 (i.e., $60,000×[(1−.1)/.8]×[.1/(1−.1)]). Thus, P recognizes a gain in Year 2 with respect to its nonrecently purchased T stock of $2,500 (*i.e.*, $7,500−$5,000).

Example 2. On January 1 of Year 1, P purchases one-third of the T stock. On March 1 of Year 1, T distributes a dividend to all of its shareholders. On April 15 of Year 1, P purchases the remaining T stock and makes a section 338 election for T. In appropriate circumstances, the District Director may decrease the AGUB of T to take into account the payment of the dividend and properly reflect the fair market value of T's assets deemed purchased.

Example 3. (a) T's sole asset is a building worth $100,000. On August 1 of Year 1, P purchases 10 of the 100 shares of T stock for $8,000. On June 1 of Year 2, P purchases 50 shares of T stock for $50,000. On June 15 of Year 2, P contributes a tract of land to the capital of T and receives 10 additional shares of T stock as a result of the contribution. Both the basis and fair market value of the land at that time are $10,800. On June 30 of Year 2, P purchases the remaining 40 shares of T stock for $40,000 and makes a section 338 election for T. The AGUB of T is $108,800.

(b) To prevent the shifting of basis from the contributed property to other assets of T, the District Director may allocate $10,800 of the AGUB to the land, leaving $98,000 to be allocated to the building.

[T.D. 8515, 59 FR 2979, Jan. 20, 1994]

§1.338(b)–2T Allocation of adjusted grossed-up basis among target assets (temporary).

(a) *Introduction*—(1) *In general.* This section prescribes rules under section 338(b)(5) for allocating adjusted grossed-up basis among the assets of a target for which a section 338 election is made.

(2) *Fair market value.* The *fair market value* of an asset is the gross fair market value of that asset (*i.e.*, fair market value determined without regard to mortgages, liens, pledges, or other liabilities).

(b) *General rule for allocating adjusted grossed-up basis*—(1) *Cash and other items designated by the Internal Revenue Service.* Adjusted grossed-up basis is first reduced by the amount of Class I assets. Class I assets are cash, demand deposits and similar accounts in banks, savings and loan associations (and other similar depository institutions), and other items designated in the Internal Revenue Bulletin by the Internal Revenue Service.

(2) *Other assets*—(i) *In general.* Subject to the limitations and other special rules of paragraph (c) of this section, adjusted grossed-up basis (as reduced by Class I assets) is allocated among Class II assets of target held at the beginning of the day after the acquisition date in proportion to their fair market values at such time, then among Class III assets so held in such proportion, then among Class IV assets so held in such proportion, and finally to Class V assets.

(ii) *Class II assets.* Class II assets are certificates of deposit, U.S. Government securities, readily marketable stock or securities (within the meaning of §1.351–1(c)(3)), foreign currency, and other items designated in the Internal Revenue Bulletin by the Internal Revenue Service.

(iii) *Class III assets.* Class III assets are all assets of target other than Class I, II, IV, and V assets.

(iv) *Class IV assets.* Class IV assets are all section 197 intangibles, as defined in section 197, except those in the nature of goodwill and going concern value.

(v) *Class V assets.* Class V assets are section 197 intangibles in the nature of goodwill and going concern value.

(c) *Certain limitations and special rules for basis allocable to an asset*—(1) *Basis not to exceed fair market value.* The amount of adjusted grossed-up basis allocated to an asset (other than Class V assets) shall not exceed the fair market value of that asset at the beginning of the day after the acquisition date. For modification of this fair market value limitation with respect to certain contingent income assets, see § 1.338(b)–3T(g).

(2) *Assets subject to other limitations.* The amount of adjusted grossed-up basis allocated to an asset shall be subject to the limitations under the provisions of the Internal Revenue Code or principles of tax law in the same manner as if such asset were acquired from an unrelated person in a sale or exchange. For example, if the deemed sale (and purchase) of assets is a transaction described in section 1056(a) (relating to basis limitation for player contracts transferred in connection with the sale of a franchise), the amount of adjusted grossed-up basis allocated to a contract for the services of an athlete shall not exceed the limitation imposed by that section. For another example, see § 1.338(b)–1(f)(2), relating to excluded obligations.

(3) *Special rule for allocating adjusted grossed-up basis when purchasing corporation has nonrecently purchased stock*—(i) *Scope.* This paragraph (c)(3) applies if at the beginning of the day after the acquisition date (A) the purchasing corporation holds nonrecently purchased stock for which a gain recognition election under section 338(b)(3) and § 1.338(b)–1(e)(2) is not made and (B) the hypothetical purchase price determined under paragraph (c)(3)(ii) of this section exceeds the adjusted grossed-up basis determined under § 1.338(b)–1(c)(1). The determinations required under the preceding sentence shall be made without regard to adjustment events occurring after the close of new target's first taxable year.

(ii) *Determination of hypothetical purchase price.* Hypothetical purchase price is the sum of the grossed-up basis of recently purchased stock as determined under § 1.338–3(d)(2) and liabilities of target.

(iii) *Allocation of adjusted grossed-up basis.* Subject to the limitations in paragraphs (c)(1) and (2) of this section, adjusted grossed-up basis (after reduction by the amount of Class I assets) is allocated among Class II, III, IV, and V assets of target held at the beginning of the day after the acquisition date in proportion to their fair market values at such time. For this purpose, the fair market value of Class V assets is deemed to be the excess, if any, of the hypothetical purchase price over the sum of the amount of the Class I assets and the fair market values of the Class II, III, and IV assets.

(4) *Effective dates.* This section applies for acquisition dates on or after February 14, 1997. For acquisition dates before February 14, 1997, if section 197 does not apply to any asset deemed acquired, the provisions of the regulations in effect before February 14, 1997, apply (see §1.338(b)–2T as contained in 26 CFR part 1 revised April 1, 1996). For acquisition dates before February 14, 1997, if section 197 applies to any asset deemed acquired, the taxpayer (and all related parties) may consistently (in all transactions in which AGUB, ADSP, MADSP, or consideration must be allocated under section 338 or 1060)—

(i) Apply the provisions of this section;

(ii) Apply the provisions of this section as in effect before February 14, 1997 (see §1.338(b)–2T as contained in 26 CFR part 1 revised April 1, 1996); or

(iii) Apply the provisions of this section as in effect before February 14, 1997 (see §1.338(b)–2T as contained in 26 CFR part 1 revised April 1, 1996), but treat all amortizable section 197 intangibles as Class IV assets.

(d) *Examples.* The provisions of this section and §1.338(b)–1 may be illustrated by the following examples:

Example (1). (i) T owns 90% of the outstanding T1 stock. P purchases 100% of the outstanding T stock for $2,000. A section 338 election is made for T and, as a result, T1 is considered acquired in a qualified stock purchase. A section 338 election is made for T1. The grossed-up basis of the T stock is $2,000 (i.e., $2,000 × 1/1).

(ii) Assume that the liabilities of T as of the beginning of the day after the acquisition date (including income tax liabilities arising on the deemed sale of its assets) are as follows:

Liabilities (nonrecourse mortgage plus unsecured liabilities)	$700
Taxes payable	300
Total	1,000

(iii) The adjusted grossed-up basis (“AGUB”) of T is determined as follows:

Grossed-up basis	$2,000
Total liabilities	1,000
AGUB	3,000

(iv) Assume that, at the beginning of the day after the acquisition date, T’s cash and the fair market values of T’s Class II and III assets are as follows:

Asset class	Asset	Fair market value
I	Cash	*$200
II	Portfolio of marketable securities	300
III	Inventory	300
III	Accounts receivable	600
III	Building	800
III	Land	200
III	Investment in Tl	450
	Total	2,850

*Amount.

(v) Under paragraph (b)(2) of this section the amount of AGUB allocable to T’s Class II and III assets is reduced by the amount of cash to $2,800, *i.e.*, $3,000 − $200. $300 of AGUB is then allocated to marketable securities. Since the remaining amount of AGUB is $2,500 (*i.e.*, $3,000 − ($200 + $300)), an amount which exceeds the sum of the fair market values of T’s Class III assets, the amount allocated to each Class III asset is its fair market value:

Inventory	$300
Accounts receivable	600
Building	800
Land	200
Investment in T1	450
Total	2,350

(vi) T has no Class IV assets. The amount allocated to T’s Class V assets (assets in the nature of goodwill and going concern value) is $150, i.e., $2,500–$2,350.

(vii) The grossed-up basis of the T1 stock is $500, *i.e.*, $450×1/.9.

(viii) Assume that the liabilities of T1 as of the beginning of the day after the acquisition date (including income tax liabilities arising on the deemed sale of its assets) are as follows:

General liabilities	$100
Taxes payable	20
Total	120

(ix) The AGUB of T1 is determined as follows:

Grossed-up basis of T1 stock	$500
Liabilities	120
AGUB	620

(x) Assume that at the beginning of the day after the acquisition date, T1’s cash and the fair market values of its Class III and IV assets are as follows:

Asset class	Asset	Fair market value
I	Cash	$50*
III	Equipment	200
IV	Patent	350
	Total	$600

*Amount

(xi) The amount of AGUB allocable to T1's Class III and IV assets is first reduced by the $50 of cash.

(xii) Since the remaining amount of AGUB ($570) is an amount which exceeds the fair market value of T1's only Class III asset, the equipment, the amount allocated to the equipment is its fair market value ($200). After that, the remaining amount of AGUB ($370) exceeds the fair market value of T1's only Class IV asset, the patent. Thus, the amount allocated to the patent is its fair market value ($350).

(xiii) The amount allocated to T1's Class V assets (assets in the nature of goodwill and going concern value) is $20, i.e., $570−$550.

Example (2). (i) Assume that the facts are the same as in *Example (1)* except that P has, for five years, owned 20% of T's stock, which has a basis in P's hands at the beginning of the day after the acquisition date of $100, and P purchases the remaining 80% of T's stock for $1,600. P does not make a gain recognition election under section 338(b)(3).

(ii) Under § 1.338(b)-1(d), the grossed-up basis of recently purchased T stock is $1,600, *i.e.*, $1,600×(1−.2)/.8.

(iii) The AGUB of T is determined as follows:

Grossed-up basis of recently purchased stock	$1,600
Basis of nonrecently purchased stock	100
Liabilities	1,000
AGUB	2,700

(iv) Since P holds nonrecently purchased stock, the hypothetical purchase price of the T stock must be computed and is determined as follows:

Grossed-up basis of recently purchased stock as determined under § 1.338–3(d)(2) ($1,600/.8)	$2,000
Liabilities	1,000
Total	3,000

(v) Since the hypothetical purchase price ($3,000) exceeds the AGUB (and no gain recognition election is made under section 338(b)(3)), AGUB is allocated under paragraph (c)(3) of this section.

(vi) The amount of AGUB ($2,700) available to allocate to T's assets is reduced by the amount of cash to $2,500, i.e., $2,700−$200. This $2,500 balance is then allocated among the Class II, III, IV, and V assets in proportion to, and not in excess of, their fair market values (as determined under § 1.338(b)–2T(c)(3)(iii)).

(vii) Under paragraph (c)(3) of this section, the fair market value of the Class V assets is deemed to be $150, i.e., the $3,000 hypothetical purchase price minus $2,850 (the sum of T's cash, $200, and the fair market value of its Class II, III, and IV assets, $2,650). The allocation is as follows:

Portfolio of marketable securities	*$268
Inventory	268
Accounts receivable	536
Building	714
Land	178
Investment in T1	402
Goodwill and going concern value	134
Total	$2,500

*All numbers rounded for convenience.

(viii) If the AGUB of T is increased (or decreased) as a result of a subsequent adjustment, the hypothetical purchase price and the deemed fair market value of the Class V assets shall be redetermined and the increase (or decrease) in AGUB shall be allocated among T's acquisition date assets pursuant to § 1.338(b)–3T(f). The increase (or decrease) in AGUB is allocated pursuant to § 1.338(b)–3T(f) even if the hypothetical purchase price, as redetermined, no longer exceeds AGUB, as redetermined.

[T.D. 8072, 51 FR 10624, Mar. 28, 1986 as amended by T.D. 8092, 51 FR 23742, July 1, 1986; 51 FR 33033, Sept. 18, 1986; T.D. 8515, 59 FR 2960, Jan. 20, 1994; T.D. 8515, 59 FR 2981, Jan. 20, 1994; T.D. 8515, 59 FR 2984, Jan. 20, 1994; T.D. 8711, 62 FR 2269, Jan. 16, 1997]

§ 1.338(b)–3T Subsequent adjustments to adjusted grossed-up basis (temporary).

(a) *Scope*—(1) *In general.* This section provides rules for redetermining adjusted grossed-up basis to account for adjustment events that occur after the close of new target's first taxable year. These adjustments must be made upon the payment of contingent amounts for recently or nonrecently purchased stock, the change in a contingent liability of old target to one which is fixed and determinable, reductions in the amounts paid for recently or nonrecently purchased stock, and reductions in liabilities of target (and the liabilities to which its assets are subject) that were taken into account in determining adjusted grossed-up basis. Adjusted grossed-up basis is redetermined under this section only if such an adjustment would be required, under general principles of tax law, in connection with an actual asset purchase by new target from an unrelated person. This section also provides rules for the allocation of such adjustments subsequent to the close of new target's first taxable year. For the treatment of adjustments prior to the close of new target's first taxable year, see §§1.338(b)–1 and 1.338(b)–2T.

(2) *Exceptions to applicability of section.* This section does not apply to a reduction in indebtedness that is (1) includible in gross income as discharge of indebtedness income (or would be includible but for section 108(a)), (2) due to a contribution to capital, (3) payment of a liability, or (4) the discharge of a liability within the meaning of §1.1001–2.

(3) *Adjustment of aggregate deemed sale price.* See paragraph (h) of this section for certain rules relating to a change in the aggregate deemed sale price of target's assets.

(b) *Definitions*—(1) *Contingent liability.* A contingent liability is a liability of target at the beginning of the day after the acquisition date that is not fixed and determinable by the close of new target's first taxable year.

(2) *Contingent amount.* The term *contingent amount* means the amount of the consideration to be paid for recently or nonrecently purchased stock that is not fixed or determinable by the close of new target's first taxable year, plus contingent liabilities of target.

(3) *Reduction amount.* The term *reduction amount* means a reduction after the close of new target's first taxable year in either—

(i) The consideration paid for recently or nonrecently purchased stock; or

(ii) A liability of target (or a liability to which one or more of its assets are subject) that has been taken into account in determining AGUB.

(4) *Acquisition date asset.* The term *acquisition date asset* means any asset held by new target at the beginning of the day after the acquisition date (other than Class I assets).

(c) *General rule*—(1) *Time when increases in adjusted gross-up basis taken into account.* A contingent amount that is taken into account for purposes of calculating adjusted grossed-up basis and the bases of assets of target is taken into account at the time at which such amount becomes fixed and determinable.

(2) *Time when decreases in adjusted grossed-up basis taken into account.* A reduction amount is taken into account for purposes of calculating adjusted grossed-up basis and the bases of assets of target when the reduction in the consideration paid or the reduction of the liability occurs.

(3) *Amount of increases and decreases in adjusted grossed-up basis.* The amount of an increase (or decrease) in adjusted grossed-up basis described in paragraph (c)(1) or (2) of this section is the difference between (i) adjusted grossed-up basis immediately before the increase (or decrease) and (ii) adjusted grossed-up basis recomputed by taking into account the increase (or decrease). For example, if an additional amount is paid for recently purchased stock of target, grossed-up basis of recently purchased stock and adjusted grossed-up basis are recomputed by applying the fraction in section 338(b)(4) to the basis of the recently purchased stock at the beginning of the day after the acquisition date, adjusted for additional amounts paid. Any other adjustments required by a change in grossed-up basis would also be taken into account in making the recomputation, such as a change in the basis of nonrecently purchased stock under section 338(b)(3) and, if there has not been a section 338(h)(10) election, any additional income tax liabilities of target resulting from the additional payment.

(d) *Allocation of increases in adjusted grossed-up basis*—(1) *In general.* An increase in adjusted grossed-up basis (as determined under paragraph (c)(3) of this section) is allocated among target's acquisition date assets under §1.338(b)–2T. Amounts allocable to an acquisition date asset (or with respect to a disposed-of acquisition date asset) are subject to the fair market value limitation and other limitations in §1.338(b)–2T(c)(1) and (2). Except as provided in paragraph (g) of this section, for the purpose of applying §1.338(b)–2T(c)(1) and (2), the fair market value is determined at the beginning of the day after the acquisition date. If adjusted grossed-up basis was allocated among target's assets pursuant to § 1.338(b)–2T(c)(3), an increase in adjusted grossed-up basis (as determined under paragraph (c)(3) of this section) is accounted for in accordance with the rules of paragraph (f) of this section.

(2) *Effect of disposition or depreciation of acquisition date assets.* If an acquisition date asset has been disposed of, depreciated, amortized or depleted by new target before a contingent amount is taken into account in redetermining adjusted grossed-up basis, the contingent amount otherwise allocable to such asset is treated under principles of tax law applicable when part of the cost of an asset (not previously reflected in its basis) is paid after the asset has been disposed of, depreciated, amortized or depleted.

(e) *Allocation of decreases in adjusted grossed-up basis*—(1) *In general.* If adjusted grossed-up basis was allocated in accordance with the rules of § 1.338(b)–2T(b)(2), a decrease in adjusted grossed-up basis (as determined under paragraph (c)(3) of this section) is allocated in the following order: first, as a reduction in the bases of target's Class V acquisition date assets, second, as a reduction of the bases of target's Class IV acquisition date assets in proportion to their fair market values at the beginning of the day after the acquisition date, third, as a reduction of the bases of target's Class III acquisition date assets in proportion to their fair market values at the beginning of the day after the acquisition date, and finally, as a reduction of the bases of target's Class II acquisition date assets in proportion to their fair market values at the beginning of the day after the acquisition date. The decrease in adjusted grossed-up basis allocated to an asset shall not exceed the adjusted grossed-up basis of target previously allocated to that asset. If adjusted grossed-up basis was allocated among target's assets pursuant to § 1.338(b)–2T(c)(3), a decrease in adjusted grossed-up basis (as determined under paragraph (c)(3) of this section) is accounted for in accordance with the rules of paragraph (f) of this section.

(2) *Effect of disposition of assets or reduction of basis below zero.* If an acquisition date asset has been disposed of, depreciated, amortized, or depleted by new target before a reduction amount is taken into account in adjusted grossed-up basis, the decrease in adjusted grossed-up basis attributable to such reduction amount otherwise allocable to such asset is treated under principles of tax law applicable when the cost of an asset (previously reflected in its basis) is reduced after the asset has been disposed of or depreciated, amortized, or depleted. For purposes of this subparagraph (2), an asset is considered to have been disposed of to the extent that its allocable portion of the decrease in adjusted grossed-up basis would reduce its basis below zero.

(3) *Section 38 property.* Section 1.47–2(c) applies to a reduction in basis of section 38 property under this section.

(f) *Special rule for allocation of increases (or decreases) in adjusted grossed-up basis when hypothetical purchase price was used in allocating adjusted grossed-up basis*—(1) *Scope.* This paragraph (f) applies if adjusted grossed-up basis was allocated among new target's Class II, III, IV, and V assets in accordance with § 1.338(b)–2T(c)(3) and an adjustment event occurs after the close of the new target's first taxable year.

(2) *Allocation of increases (decreases) in adjusted grossed-up basis.* If an adjustment event after the close of new target's first taxable year increases (or decreases) adjusted grossed-up basis, the following items shall be redetermined, taking into account such adjustment event: the hypothetical purchase price, the deemed fair market value of Class V assets, and the adjusted grossed-up basis allocable to each acquisition date asset under § 1.338(b)–2T(c)(3) (the redetermined (c)(3) amount). (The redetermination of the deemed fair market value of Class V assets under this paragraph (f)(2) is made by taking into account the target's Class I assets and the fair market values of its Class II, III, and IV assets at the beginning of the day after the acquisition date.) If the redetermined (c)(3) amount for an acquisition date asset exceeds the amount of adjusted grossed-up basis previously allocated to such asset (taking into account prior adjustments under this paragraph (f)), an amount of adjusted grossed-up basis equal to such

excess shall be allocated to such asset. If the amount of the adjusted grossed-up basis previously allocated to an acquisition date asset (taking into account prior adjustments under this paragraph (f)) exceeds the redetermined (c)(3) amount for that asset, an amount equal to such excess shall be allocated as a reduction in the basis of such asset. The rules of paragraph (d)(2) of this section (or paragraph (e)(2) of this section) apply for the treatment of amounts allocable under this paragraph (f) to an acquisition date asset that has been disposed of, depreciated, amortized, or depleted.

(3) *Allocation to contingent income assets.* For modification of this rule with respect to certain assets, see paragraph (g) of this section.

(g) *Special rule for allocation of increases (or decreases) in adjusted grossed-up basis to specific assets*—(1) *Patents and similar property*—(i) *Scope.* The rules of this paragraph (g)(1) apply for purposes of allocating an increase (or decrease) in adjusted grossed-up basis to the extent (A) the contingency that results in the increase (or decrease) directly relates to income produced by a particular intangible asset (‘‘contingent income asset’’), such as a patent, a secret process, or a copyright, and (B) the increase (or decrease) is related to such contingent income asset and not to other target assets. Adjusted grossed-up basis, as determined under §1.338(b)–1 at the beginning of the day after the acquisition date, and any increase (or decrease) to adjusted grossed-up basis to which this paragraph (g) does not apply, are allocated among target's acquisition date assets (including contingent income assets) in accordance with the provisions of §1.338(b)–2T and paragraph (d), (e), or (f) of this section.

(ii) *Specific allocation.* Subject to the fair market value limitation and other limitations in §1.338(b)–2T(c)(1) and (2), any increase (or decrease) to adjusted grossed-up basis to which this paragraph (f) applies is allocated (A) first, specifically to the contingent income asset to which the increase (or decrease) relates and, then, (B) in accordance with the provisions of paragraph (d), (e), or (f) of this section. Solely for purposes of applying the fair market value limitation and other limitations of §1.338(b)–2T(c)(1) and (2) to a contingent income asset, the fair market value of such asset at the beginning of the day after the acquisition date shall (may, in the case of qualified stock purchases for which the acquisition date is before September 16, 1988) be redetermined when the contingent amount (or reduction amount) is taken into account under paragraph (c) of this section. (For purposes of this redetermination, only those circumstances that resulted in the increase (or decrease) to adjusted grossed-up basis are taken into account.) However, the fair market value limitation and other limitations of §1.338(b)–2T(c)(1) and (2) as they apply to target's other acquisition date assets are not affected by such adjustments.

(2) *Internal Revenue Service authority.* In connection with the examination of a return, the District Director, in appropriate cases, may apply the principles of paragraph (g)(1) of this section to allocate an increase (or decrease) in adjusted grossed-up basis among particular of target's acquisition date assets to the extent such allocation is necessary to reflect properly the consideration that relates to each of those assets.

(h) *Changes in old target's aggregate deemed sale price of assets*—(1) *General rule*—(i) *In general.* Pursuant to general principles of tax law, the price at which old target is deemed to have sold its assets shall be adjusted to take into account adjustment events occurring after the acquisition date. In making such an adjustment, recognition of income (or loss) under this paragraph (h) with respect to the deemed sale of assets is not precluded because the target is treated as a new corporation after the acquisition date. To the extent general tax law principles require seller to account for adjustment events, target (or a member of the selling consolidated group in the event of an election under section 338(h)(10)) shall make such an accounting, which may result in reporting income, loss, or other amount.

(ii) *Redetermination of aggregate deemed sale price if the elective formula under section 338(h)(11) is used.* If the elective formula under section

338(h)(11) is used to determine the aggregate deemed sale price, that price generally shall be redetermined under § 1.338–3(d) (or § 1.338(h)(10)–1(f) if an election under section 338(h)(10) is in effect) to take into account, to the extent required by general principles of tax law, adjustment events occurring after the acquisition date. For example, the aggregate deemed sale price generally shall be redetermined to take into account any additional payments made to the seller for recently purchased stock. If an increase (or decrease) in adjusted grossed-up basis is specifically allocated to a contingent income asset (or other asset) under paragraph (g) of this section, then any redetermination of the fair market value of the asset under that paragraph (g) is taken into account in making adjustments to the aggregate deemed sale price allocable to such asset.

(iii) *Redetermination of aggregate deemed sale price if the elective formula under section 338(h)(11) is not used.* If the elective formula under section 338(h)(11) is not used to determine the aggregate deemed sale price, an adjustment to aggregate deemed sale price may be required under this paragraph (h) only with respect to assets described in paragraph (g)(1)(i) and (2) of this section. In such a case, the adjustment to the portion of the aggregate deemed sale price allocable to such asset shall be the amount of the increase (or decrease) in adjusted grossed-up basis specifically allocated to the asset. However, the amount of the increase (or decrease) allocated to such asset shall not increase (or decrease) the portion of the aggregate deemed sale price allocable to the asset (taking into account all previous adjustments under this paragraph (h)) above or below the fair market value of such asset as of the date an adjustment under this paragraph (h) is required.

(2) *Procedure for transactions in which section 338(h)(10) is not elected*—(i) *Income or loss included in new target's return.* If an election under section 338(h)(10) is not made, any income, loss, or other amount of old target resulting from a change in the aggregate deemed sale price of old target's assets pursuant to paragraph (h)(1) of this section shall be included in new target's income tax return for new target's taxable year in which such change occurs. The amount of such income, loss, or other amount is determined with reference to old target's deemed sale of assets on the acquisition date. Thus, for example, if after the acquisition date there is an increase in the allocable aggregate deemed sale price of section 1245 property for which the recomputed basis (but not the adjusted basis) exceeded the portion of the aggregate deemed sale price allocable to that particular asset on the acquisition date, the additional gain shall be treated as ordinary income to the extent it does not exceed such excess amount. See paragraph (h)(2)(ii) for the special treatment of old target's carryovers and carrybacks. Although included in new target's income tax return, such income, loss, or other amount is separately accounted for as an item of old target and may not be offset by income, loss, credit, or other amount of new target. The amount of tax on income of old target recognized pursuant to this paragraph (h) is determined as if such income had been recognized in old target's taxable year ending at the close of the acquisition date. Any increase (or decrease) in new target's income tax liability by reason of this paragraph (h)(2)(i) shall be allocated among new target's acquisition date assets in accordance with paragraph (d), (e), (f), or (g) of this section when such liability becomes fixed and determinable.

(ii) *Carryovers and carrybacks*—(A) *Loss carryovers to new target taxable years.* A net operating loss or net capital loss of old target may be carried forward to a taxable year of new target, under the principles of section 172 or 1212, as the case may be, but is allowed as a deduction only to the extent of any recognized income of old target for such taxable year, as described in paragraph (h)(2)(i) of this section. For this purpose, however, taxable years of new target shall not be taken into account in applying the 15-taxable-year limitation (or other similar limitation) in section 172(b)(1) or the 5-taxable-year limitation (or other similar limitation) in section 1212(a)(1)(B). In applying sections 172(b) and 1212(a)(1), only income, deductions, and other amounts of old target shall be taken into account. Thus, if old target has an unexpired net operating loss at the close of its taxable year in which the deemed asset sale occurred that could be carried forward to a subsequent taxable year, such loss may be carried forward until it is absorbed by old target's income.

(B) *Loss carrybacks to taxable years of old target.* An ordinary loss or capital loss accounted for as a separate item of old target under paragraph (h)(2)(i) of this section may be carried back to a taxable year of old target under the principles of section 172 or 1212, as the case may be. For this purpose, taxable years of new target shall not be taken into account in applying the 3-taxable-year limitation (or other similar limitation) in section 172(b) or 1212(a).

(C) *Credit carryovers and carrybacks.* The principles described in paragraph (h)(2)(ii)(A) and (B) of this section apply to carryovers and carrybacks of amounts for purposes of determining the amount of a credit allowable under part IV, subchapter A, chapter 1 of the Code. Thus, for example, credit carryovers of old target may only offset income tax attributable to items described in paragraph (h)(2)(i) of this section.

(3) *Procedure for transactions in which section 338(h)(10) is elected*— If an election under section 338(h)(10) is made, any income, loss, or other amount resulting from a change in the aggregate deemed sale price of old target's assets pursuant to paragraph (h)(1) of this section shall be accounted for in determining the taxable income (or other amount) of the member of the selling consolidated group (or other person) to which such income, loss, or other amount is attributable for the taxable year in which such change occurs. The amount of such income, loss, or other amount is determined with reference to old target's deemed sale of assets on the acquisition date.

(i) [Reserved]

(j) *Examples.* This section is illustrated by the following examples. Any contingent amount or reduction amount described in the following examples is exclusive of interest. For rules characterizing deferred contingent payments as principal or interest, see regulations under section 1274 and 1275 (d) or 483.

Example 1. (i)(A) T's assets other than goodwill and going concern value, and their fair market values at the beginning of the day after the acquisition date, are as follows:

Asset class	Asset	Fair market value
III	Building	$100
III	Stock of X (not a target)	200
	Total	$300

(B) T has no liabilities other than a contingent obligation and T does not use the elective formula under section 338(h)(11).

(ii)(A) On September 1, 1997, P purchases all of the outstanding stock of T for $270 and makes an express election for T. The grossed-up basis of the T stock and T's adjusted grossed-up basis (AGUB) are both $270. The AGUB is ratably allocated among T's Class III assets in proportion to their fair market values as follows:

Asset	Basis
Building ($270×100/300)	$ 90
Stock ($270×200/300)	180
Total	$270

(B) No amount is allocated to the Class V assets. New T is a calendar year taxpayer. Assume that the X stock is a capital asset in the hands of new T.

(iii) On January 1, 1998, new T sells the X stock and uses the proceeds to purchase inventory.

(iv) On June 30, 1999, the contingent liability of old T becomes fixed and determinable. The amount of the liability is $60.

(v) T's AGUB increases by $60 from $270 to $330. This $60 increase in AGUB is first allocated among T's acquisition date assets in accordance with the provisions of §1.338(b)–2T. Since the redetermined AGUB for T ($330) exceeds the sum of the fair market values at the beginning of the day after the acquisition date of the Class III acquisition date assets ($300), AGUB allocated to those assets is limited to those fair market values under §1.338(b)–2T(c)(1). As there are no Class IV assets, the remaining AGUB of $30 is allocated to goodwill and going concern value (Class V assets). The amount of increase in AGUB allocated to each acquisition date asset is determined as follows:

Asset	Original AGUB	Redetermined AGUB	Increase in AGUB
Building	$ 90	$100	$10
X Stock	180	200	20
Goodwill and going concern value	0	30	30
Total	$270	$330	$60

(vi) Since the X stock was disposed of before the contingent liability became fixed and determinable, no amount of the increase in AGUB attributable to such stock may be allocated to any T asset. Rather, such amount, $20, is allowed as a capital loss to T for the taxable year 1999 under the principles of *Arrowsmith v. Commissioner,* 344 U.S. 6 (1952). In addition, the $10 increase in AGUB allocated to the building and the $30 increase in AGUB allocated to the goodwill and going concern value are treated as basis redeterminations in 1999. See paragraph (d)(2) of this section.

Example 2. (i) On January 1, 1998, P purchases all of the outstanding stock of T and makes an express election for T. T does not use the elective formula under section 338(h)(11). Assume that the AGUB of T is $500 and is allocated among T's acquisition date assets as follows:

Asset class	Asset	Basis
III	Machinery	$150
III	Land	250
V	Goodwill and going concern value	100
	Total	$500

(ii) On September 30, 1998, P filed a claim against the selling shareholders of T in a court of appropriate jurisdiction alleging fraud in the sale of the T stock.

(iii) On January 1, 2007, the former shareholders refund part of the purchase price to P in a settlement of the lawsuit. This refund results in a decrease of T's AGUB of $140.

(iv) Under paragraph (e)(1) of this section, the decrease in AGUB is allocated among T's acquisition date assets. First, because $100 was originally allocated to the Class V assets, $100 of the decrease is allocated to those assets. As there were no Class IV assets acquired, the remaining decrease in AGUB ($40) is allocated to the Class III assets in proportion to their fair market values at the beginning of the day after the acquisition date. Thus, $15 is allocated to the machinery ($40 x 150/$400) and $25 to the land ($40 x 250/$400).

(v) Assume that, as a result of deductions under section 168, the adjusted basis of the machinery immediately before the decrease in AGUB is zero. The machinery is treated as if it were disposed of before the decrease is taken into account. In 2007, T recognizes income of $15, the character of which is determined under the principles of *Arrowsmith* v. *Commissioner,* 344 U.S. 6 (1952), and the tax benefit rule. No adjustment to the basis of T's assets is made for any tax paid on this amount. Assume also that, as a result of amortization deductions, the adjusted basis of the goodwill and going concern value immediately before the decrease in AGUB is $40. A similar adjustment to income is made in 2007 with respect to the $60 of previously amortized goodwill and going concern value.

(vi) In summary, the basis of T's acquisition date assets, as of January 1, 2007, is as follows:

Asset	Basis
Machinery	$0
Land	225
Goodwill and going concern value	0

Example 3. (i) Assume that the facts are the same as *Example 2* of §1.338(b)–2T(d) except that the recently purchased stock is acquired for $1,600 plus additional payments that are contingent upon T's future earnings. Thus, T's AGUB, determined as of the beginning of the day after the acquisition date (after reduction by T's cash of $200), is $2,500 and is allocable among T's Class II, III, IV, and V acquisition date assets pursuant to §1.338(b)–2T(c)(3)(iii) as follows:

Asset	Basis
Portfolio of marketable securities	*$268
Inventory	268
Accounts receivable	536
Building	714
Land	178
Investment in T1	402
Goodwill and going concern value	134
Total	$2,500

*All numbers rounded for convenience.

(ii) Subsequent to the close of new target's first taxable year, P pays an additional $200 for its recently purchased T stock.

(iii) T's AGUB increase by $200, from $2,700 to $2,900. This $200 increase in AGUB is accounted for in accordance with the provisions of §1.338(b)–2T (c)(3)(iii) and paragraph (f) of this section.

(iv) The hypothetical purchase price of the T stock is redetermined as follows:

Grossed-up basis of recently purchased stock as determined under §1.338–4T(h) ($1,800/.8)	$2,250
Liabilities	1,000
Total	$3,250

(v) Under §1.338(b)–2T(c)(3) the redetermined fair market value of Class V assets is deemed to be $400, i.e., the hypothetical purchase price, as redetermined, of $3,250 minus $2,850 (the sum of T's cash, $200, and the fair market values of its Class II, III, and IV assets, $2,650).

(vi) The amount of AGUB available to allocate to T's Class II, III, IV, and V acquisition date assets is $2,700 (i.e., redetermined AGUB reduced by cash). AGUB allocable to each of T's acquisition date assets (i.e., the redetermined (c)(3) amount) is redetermined using the deemed fair market value of the Class V assets from paragraph (v) of this Example as follows:

Asset	Basis
Portfolio of marketable securities	*$266
Inventory	266
Accounts receivable	531
Building	708
Land	177
Investment in T1	398
Goodwill and going concern value	354
Total	$2,700

*All numbers rounded for convenience.

(vii) As illustrated by this example, the application of paragraph (f) of this section results in a basis increase for some assets and a basis decrease for other assets. The amount of increase (or decrease) in AGUB allocated to each acquisition date asset is determined as follows:

Asset	Original AGUB	Redetermined (c)(3) amount	Increase (or decrease) in AGUB
Portfolio of marketable securities	$268	$266	$(2)
Inventory	268	266	(2)
Accounts receivable	536	531	(5)
Building	714	708	(6)
Land	178	177	(1)
Investment in T1	402	398	(4)
Goodwill and going concern value	134	354	220
Total	$2,500	$2,700	$200

(viii) If P made a gain recognition election under section 338 (b)(3) with respect to its nonrecently purchased stock, paragraph (f) of this section would be inapplicable.

Example 4. (i) On January 1, 1987, P purchases all of the outstanding T stock and makes an express election for T. The fair market value of T's assets (other than goodwill and going concern value) as of the beginning of the following day is as follows:

Asset class	Assets	Fair market value
III	Equipment	$200
III	Accounts receivable	100
III	Building	500
	Total	800

(ii) T has elected the elective ADSP formula, in accordance with §1.338–4T(h)(3) *Answer 2* (ii)(B) (as contained in the CFR edition revised as of April 1, 1993) to determine the aggregate deemed sale price of old T's assets. Assume that the ADSP as so determined is $700. Assume also that the AGUB is equal to $700. T has no liabilities.

(iii) The AGUB of $700 is ratably allocated among T's Class III acquisition date assets in proportion to their fair market values as follows:

Asset	Basis
Equipment ($700×200/800)	$175.00
Accounts receivable ($700×100/800)	87.50
Building ($700×500/800)	437.50
Total	700.00

No amount is allocated to goodwill (or going concern value).

(iv) P and T file a consolidated return for 1987 and each following year with P as the common parent of the affiliated group.

(v) In 1990, a contingent amount of $117 is paid by P for the stock of old T. As a result, additional income is recognized under section 1245 by old T for 1990 on the deemed sale of old T's assets. This income must be reported on the consolidated return of new T for 1990, but it is separately accounted for and may not be absorbed by losses or deductions of P or of new T. Assume that the tax on this income is $3.

(vi) In 1990, there is an increase in T's AGUB of $120, *i.e.*, $117 + $3. The amount of this increase allocated to each acquisition date asset is determined as follows:

Asset	Original AGUB	Redetermined AGUB	Increase
Equipment	$175.00	$200.00	$25.00
Accounts receivable	87.50	100.00	12.50
Building	437.50	500.00	62.50
Goodwill (and going concern value)	0.00	20.00	20.00
Total	700.00	820.00	120.00

Example 5. (i) On June 1, 1990, P purchases all of the stock of T and makes an express election for T. T has one item of section 38 property whose basis on June 2, 1990 is $100,000. An investment credit of $8,000 is allowed to new T for the equipment because of an election under section 48 (q)(4).

(ii) In 1992, part of the purchase price of the T stock is refunded to P. Assume that the amount of the resulting decrease in AGUB allocated to the machinery is $7,000. Pursuant to § 1.47–2(c), the machinery ceases to be section 38 property to the extent of $7,000 of its original basis.

(iii) The additional tax of $560 (8% ×$7,000) resulting from the machine ceasing to be section 38 property is reported on T's return for 1992. Such amount is not an adjustment to AGUB.

Example 6. (i)(A) T has three assets (other than goodwill and going concern value) whose fair market values as of the beginning of the day after the acquisition date are as follows:

Asset class	Asset	Fair market value
III	Building	$100
III	Equipment	50
IV	Secret process	50
	Total	$200

(B) The secret process is a section 197 intangible. T has no liabilities. Assume that no election under section 338 (h)(10) or (h)(11) is in effect.

(ii) On January 1, 1998, P purchases all of the outstanding T stock for $225 plus 50 percent of the net profits generated by the secret process for each of the next three years, determinable and payable on January 1 of each following year. P and T are calendar year taxpayers.

(iii) As of the beginning of January 2, 1998, T's AGUB is $225, allocated as follows:

Asset class	Asset	Basis
III	Building	$100
III	Equipment	50
IV	Secret process	50
V	Goodwill and going concern value	25
	Total	$225

(iv) On January 1, 1999, $5 is paid by P for the T stock by reason of the net profits from the secret process. The payments are not attributable in any respect to any of T's other acquisition date assets. As a result, T's AGUB on January 1, 1999 is increased by $5.

(v) Assume that on January 1, 1999, the fair market value of the secret process is redetermined to be $52. (For purposes of this redetermination, only those circumstances that resulted in the increase to AGUB are taken into account.)

(vi) On January 1, 1999, only $2 of the $5 increase in AGUB is allocated to the secret process because the increase in AGUB so allocated cannot increase the basis of the secret process above its redetermined fair market value ($52). The balance of the increase is allocated to goodwill and going concern value because the fair market value limitation of § 1.338(b)–2T(c)(1) precludes allocating additional AGUB to the Class III and IV assets.

(vii) The price for which old target is deemed to have sold the secret process is increased to reflect the $2 increase allocated to its basis to new target. See § 1.338–3(d) and paragraph (h)(1) of this section.

(viii) If the fair market value of the secret process as of January 1, 1999, is unchanged from the fair market value as of the beginning of the day after the acquisition date, then the $5 increase in AGUB is allocated to T's goodwill and going concern value.

Example 7. (i) The facts are the same as in *Example 6* except that—

(A) The secret process is valued at $75 as of the beginning of the day after the acquisition date; and

(B) P pays $250 for the T stock and the former T shareholders agree to refund a portion of the purchase price to P for each of the three years that the net income from the secret process is less than $15 per year, determinable and payable on January 1 of the next year.

(ii) Assume that the secret process in the hands of new T is an amortizable section 197 intangible and, therefore, on January 1, 1999, new T's adjusted basis in the secret process is $70 (i.e., $75–$5 of allowable amortization).

(iii) Assume the net income from the process is less than $15 for 1998, and on January 1, 1999, P receives a refund that reduces the stock purchase price by $3.

(iv) Assume that as of January 1, 1999, the fair market value of the secret process is redetermined to be $65. (For purposes of this redetermination, only those circumstances that resulted in the decrease to AGUB are taken into account.)

(v) As of January 1, 1999, the AGUB of T is decreased by $3. This decrease is allocated to the secret process, the basis of which becomes $67 (i.e., $70–$3) and is amortizable over the remaining 14 years.

(vi) The price for which old target is deemed to have sold the secret process is decreased to reflect the $3 decrease allocated to its basis to new target. See §1.338–3(d) and paragraph (h)(1) of this section.

Example 8. The facts are the same as in *Example 6* except that the intangible Class IV asset is a patent instead of a secret process. The redetermination of the fair market value of the patent on January 1, 1999, is made without regard to the decrease in the remaining life of the patent because that is not a circumstance that resulted in the increase in AGUB.

[T.D. 8072, 51 FR 10626, Mar. 28, 1986, as amended by T.D. 8215, 53 FR 27043, July 18, 1988; T.D. 8515, 59 FR 2981, Jan. 20, 1994; T.D. 8515, 59 FR 2984, Jan. 20, 1994; T.D. 8711, 62 FR 2270, Jan. 16, 1997]

§1.338(h)(10)–1 Deemed asset sale and liquidation.

(a) *Scope.* This section prescribes rules relating to section 338(h)(10) elections. If an election is made, target generally is deemed to sell all of its assets and distribute the proceeds in complete liquidation. Thus, the sale of target stock included in the qualified stock purchase generally is ignored. A section 338(h)(10) election may be made for target only if it is a member of a selling consolidated group, a member of a selling affiliated group filing separate returns, or an S corporation.

(b) *Nomenclature.* For purposes of this section, the nomenclature in §1.338–1(b) does not apply; instead:

(1) T is a section 338(h)(10) target. Old T refers to T for periods ending on or before the close of T's acquisition date; new T refers to T for subsequent periods.

(2) P is the purchasing corporation. Unless the context otherwise requires, any reference to P is a reference to all purchasing corporations. See sections 338(h)(5) and (8).

(c) *Definitions*—(1) *Section 338(h)(10) target.* A *section 338(h)(10) target* is a domestic corporation that is a target for which a section 338(h)(10) election is made.

(2) *S corporation shareholders. S corporation shareholders* are the T shareholders if T is an S corporation immediately before T's acquisition date. Thus, if T is an S corporation, for T to be a section 338(h)(10) target, P can purchase no T stock before the acquisition date.

(3) *Selling consolidated group.* A *selling consolidated group* is a selling group that files a consolidated return for the period that includes T's acquisition date. Thus, T is a member of the selling consolidated group on the acquisition date.

(4) *Selling affiliate.* A *selling affiliate* is a domestic corporation that is not a member of the selling consolidated group and from which, on the acquisition date, P purchases an amount of T stock that satisfies the requirements of section 1504(a)(2). Thus, on the acquisition date, the selling affiliate and T are affiliated (within the meaning of section 1504) but are not includible members of the same consolidated group.

(d) *Section 338(h)(10) election*—(1) *In general.* A section 338(h)(10) election may be made for T if P acquires T in a qualified stock purchase from—

(i) A selling consolidated group;

(ii) A selling affiliate; or

(iii) S corporation shareholders.

(2) *Simultaneous joint election requirement.* A section 338(h)(10) election is made jointly by P and the selling consolidated group (or the selling affiliate or the S corporation shareholders) on Form 8023 in accordance with the instructions to the form. The section 338(h)(10) election must be made not later than the 15th day of the 9th month beginning after the month in which the acquisition date occurs.

(3) *Irrevocability.* A section 338(h)(10) election is irrevocable. If a section 338(h)(10) election is made for T, a section 338 election is deemed made for T.

(4) *Effect of invalid election.* If a section 338(h)(10) election for T is not valid, the section 338 election for T is also not valid.

(e) *Certain consequences of section 338(h)(10) election.* This paragraph (e) applies if an election under section 338(h)(10) is made.

(1) *Old T.* Old T recognizes gain or loss as if, while old T was a member of the selling consolidated group (or owned by the selling affiliate or S corporation shareholders), it sold all of its assets in a single transaction at the close of the acquisition date (but before the deemed liquidation). Old T's gain or loss on each asset is determined under paragraph (f) of this section. If P makes a qualified stock purchase from a selling affiliate or S corporation shareholders, the principles of §§ 1.338–1(c)(6) and (e)(1), (5), and (6)(i) apply to the return filed by old T that includes the gain or loss and tax liability from the deemed sale.

(2) *Selling consolidated group, selling affiliate, or S corporation shareholders*—(i) *In general.* This paragraph (e)(2) describes the treatment of members of the selling consolidated group, the selling affiliate, and S corporation shareholders.

(ii) *Deemed liquidation for old T.* For purposes of subtitle A of the Internal Revenue Code, old T is treated as if, while T is a member of the selling consolidated group (or owned by the selling affiliate or S corporation shareholders), it distributed all of its assets in complete liquidation. If T is an S corporation immediately before the acquisition date, nothing in this section prevents a holder of T stock from taking deemed sale gain into account under section 1366 and 1367. See section 331 or 332 for gain or loss recognized by the old T shareholders as a result of the deemed liquidation.

(iii) *Basis of T stock not acquired.* The basis of T stock retained by the selling consolidated group (or the selling affiliate or an S corporation shareholder) is its fair market value. For purposes of this paragraph, the fair market value of all of the T stock equals G less any reductions in determining MADSP for acquisition costs of P incurred in connection with the qualified stock purchase that are capitalized in the basis of recently purchased T stock. See paragraph (f) of this section for the definition of G and a description of MADSP.

(iv) *T stock sale.* No gain or loss is recognized on the sale or exchange by the selling consolidated group (or the selling affiliate or an S corporation shareholder) of T stock included in the qualified stock purchase. If T is an S corporation immediately before T's acquisition date, the sale or exchange of old T stock to P on the acquisition date does not result in a termination of the section 1362(a) election for the S corporation.

(v) *Example.* This paragraph (e)(2) may be illustrated by the following example.

Example. (a) S1 owns all of the T stock and T owns all of the stock of T1 and T2. S1 is the common parent of a consolidated group that includes T, T1, and T2. P makes a qualified stock purchase of all of the T stock from S1. A section 338(h)(10) election is made for T. A section 338(h)(10) election also is made for the deemed purchase of T1. A section 338 election is not made for T2.

(b) S1 does not recognize gain or loss on the sale of the T stock and T does not recognize gain or loss on the sale of the T1 stock because T and T1 are section 338(h)(10) targets. Thus, for example, gain or loss realized on the sale of the T or T1 stock is not taken into account in earnings and profits. However, because a section 338 election is not made for T2, T must recognize any gain or loss realized on the deemed sale of the T2 stock. See § 1.338–3(c).

(c) The results would be the same if S1, T, T1, and T2 are not members of any consolidated group, because S1 and T are selling affiliates.

(3) *Certain minority shareholders*—(i) *In general.* This paragraph (e)(3) describes the treatment of shareholders of old T other than members of the selling consolidated group, the selling affiliate, S corporation shareholders, and P. A shareholder to which this paragraph (e)(3) applies is called a *minority shareholder.*

(ii) *T stock sale.* Notwithstanding paragraph (e)(2)(iv) of this section, a minority shareholder recognizes gain or loss on the shareholder's sale or exchange of T stock included in the qualified stock purchase.

(iii) *T stock not acquired.* A minority shareholder does not recognize gain or loss under this section with respect to shares of T stock retained by the shareholder. The shareholder's basis and holding period for that T stock is not affected by the section 338(h)(10) election.

(4) *P.* P is treated as making a gain recognition election for its nonrecently purchased T stock. See § 1.338(b)–1(e)(2)

(effect of a gain recognition election) and § 1.338(b)–1(e)(3)(ii) (gain recognition election deemed made).

(5) *New T.* The adjusted grossed-up basis for new T's assets is determined in accordance with § 1.338(b)–1(c) and is allocated among the assets in accordance with §§ 1.338(b)–2T and 1.338(b)–3T. Notwithstanding paragraph (e)(2)(ii) of this section, new T remains liable for the tax liabilities of old T (including tax liabilities resulting from the deemed sale of assets). For example, new T remains liable for the tax liabilities of the members of any consolidated group that are attributable to taxable years in which those corporations and old T joined in the same consolidated return. See § 1.1502–6(a).

(6) *Consolidated return of selling consolidated group.* If P acquires T in a qualified stock purchase from a selling consolidated group—

(i) The selling consolidated group must file a consolidated return for the taxable period that includes the acquisition date;

(ii) A consolidated return for the selling consolidated group for that period may not be withdrawn on or after the day that a section 338(h)(10) election is made for T; and

(iii) Permission to discontinue filing consolidated returns cannot be granted for, and shall not apply to, that period or any of the immediately preceding taxable periods during which consolidated returns continuously have been filed.

(f) *Deemed sale price*—(1) *General rule.* The price at which each asset of old T is deemed to have been sold is calculated by—

(i) Determining the modified ADSP (MADSP); and

(ii) Then allocating MADSP among the assets of old T in accordance with § 1.338(b)–2T (without taking into account § 1.338(b)–2T(c)(2)).

(2) *Formula.* (i) The MADSP formula is as follows:

$$MADSP = G + L + X$$

(ii) For purposes of this formula—

(A) *G* is the grossed-up basis of P's recently purchased T stock determined under § 1.338–3(d)(2).

(B) *L* is new T's liabilities.

(C) *X* is other relevant items.

(3) *Liabilities.* Liabilities taken into account are the liabilities of new target described in § 1.338(b)–1(f). The amount of the liabilities of new T taken into account to determine MADSP is determined as if old T had sold its assets to an unrelated person for consideration that included the liabilities.

(4) *Other relevant items.* Other relevant items include reductions for—

(i) Acquisition costs of P incurred in connection with the qualified stock purchase that are capitalized in the basis of recently purchased T stock (e.g., brokerage commissions and any similar costs incurred by P to acquire T stock); and

(ii) Selling costs of the selling consolidated group (or selling affiliate or S corporation shareholders) incurred in connection with the qualified stock purchase that reduce the amount realized on the sale of recently purchased T stock (e.g., brokerage commissions and any similar costs incurred by the selling group to sell T stock).

(5) *Cross-reference.* For adjustments to MADSP because of events occurring after the acquisition date, see § 1.338(b)–3T(h).

(g) *Examples.* (1) For purposes of the examples in this paragraph (g), unless otherwise provided, T, a member of a selling consolidated group, has only one class of stock, all of which is owned by S1. As of the close of Year 1, old T had no items described in section 381(c) (including no accumulated earnings and profits nor deficit in earnings and profits). On March 1 of Year 2, S1 sells its T stock to P for $80,000, and a section 338(h)(10) election is made for T. As of the close of March 1 of Year 2, old T's current earnings and profits, other than those generated from the deemed sale of its assets, are $21,950.

(2) Paragraphs (e) and (f) of this section may be illustrated by the following examples:

Example 1. (a) On March 1 of Year 2, T owns land with a $50,000 basis and $75,000 fair market value and equipment with a $30,000 adjusted basis, $70,000 recomputed basis, and $60,000 fair market value. T also has a $40,000 liability. S1 pays old T's allocable share of the selling group's consolidated tax liability for Year 2, which is $13,600 and attributable to the deemed sale of T's assets.

(b) The MADSP of $120,000 ($80,000+$40,000+0) is allocated to each asset as follows:

Assets	Basis	FMV	Fraction	Allocable MADSP
Land	$50,000	$75,000	5/9	$66,667
Equipment	30,000	60,000	4/9	53,333
Total	80,000	135,000	1	120,000

(c) Under paragraph (e)(1) of this section, old T has gain on the deemed sale of $40,000 (consisting of $16,667 of capital gain and $23,333 of ordinary income), which produces $40,000 of earnings and profits. As of the close of the acquisition date but after the deemed sale of its assets, old T's earnings and profits are $48,350 ($21,950 (its earnings and profits other than from the deemed sale) plus $40,000 (T's deemed sale gain) less $13,600 (T's allocable share of the consolidated tax liability)).

(d) Under paragraph (e)(2) of this section, S1 does not recognize gain or loss upon its sale of the old T stock to P. See section 332. S1 takes into account old T's earnings and profits of $48,350, determined as of the close of the acquisition date but after the deemed sale.

(e) P's basis in new T stock is P's cost for the stock, $80,000. See section 1012.

(f) Under §1.338(b)–1, the adjusted grossed-up basis for new T is $120,000, i.e., P's cost for the old T stock ($80,000) plus T's liability ($40,000). (Assume there are no other relevant items.) This adjusted grossed-up basis is allocated as basis among the new T assets under §§1.338(b)–2T and 1.338(b)–3T.

Example 2. (a) The facts are the same as in *Example 1,* except that S1 sells 80% of the old T stock to P for $64,000, rather than 100% of the old T stock for $80,000.

(b) The consequences to P, T, and S1 are the same as in *Example 1,* except that:

(i) P's basis for its 80-percent interest in the new T stock is P's $64,000 cost for the stock. See section 1012.

(ii) Under §1.338(b)–1, the adjusted grossed-up basis for new T is $120,000 (i.e., $64,000/.8+$40,000+$0).

(iii) Under paragraph (e)(2) of this section, S1 does not recognize gain or loss with respect to the retained stock in T. See section 332.

(iv) Under paragraph (e)(2)(iii) of this section, the basis of the T stock retained by S1 is $16,000 (i.e., $120,000 − $40,000 (the MADSP amount for the old T assets over the sum of new T's liabilities immediately after the acquisition date) × .20 (the proportion of T stock retained by S1)).

Example 3. (a) The facts are the same as in *Example 2,* except that K, a shareholder unrelated to T or P, owns the 20% of the T stock that is not acquired by P in the qualified stock purchase. K's basis in its T stock is $5,000.

(b) The consequences to P, T, and S1 are the same as in *Example 3,* except that S1 takes into account only $38,680 of T's earnings and profits (80% of $48,350).

(c) Under paragraph (e)(3) of this section, K recognizes no gain or loss, and K's basis in its T stock remains at $5,000.

Example 4. (a) The facts are the same as in *Example 1,* except that the equipment is held by T1, a wholly-owned subsidiary of T, and a section 338(h)(10) election is made for T1. The T1 stock has a fair market value of $60,000. T1 has no assets other than the equipment and no liabilities. S1 pays old T's and old T1's allocable shares of the selling group's consolidated tax liability for Year 2, which are $5,667 and $7,933, respectively, and attributable to the deemed asset sales by T and T1. As of the close of the acquisition date, but before the deemed sale of the equipment, old T1 has none of the attributes listed in section 381(c).

(b) The MADSP for T1 is $53,333 (i.e., $53,333+$0+$0). On the deemed sale, T1 recognizes ordinary income of $23,333. As of the close of the acquisition date, but after the deemed sale of the equipment, T1's earnings and profits are $15,400 ($0 plus $23,333 (T1's deemed sale gain) less $7,933 (T1's allocable share of the consolidated tax liability)).

(c) The MADSP for T is $120,000, allocated $66,667 to the land and $53,333 to the stock. Old T's deemed sale gain is $16,667 (the capital gain on its deemed sale of the land). Under paragraph (e)(2) of this section, old T does not recognize gain or loss on its deemed sale of the T1 stock. See section 332.

(d) Old T takes into account old T1's earnings and profits of $15,400, determined as of the close of the acquisition date but after the deemed sale by T1 of its asset. Thus, as of the close of the acquisition date, but after the deemed sale of old T's assets, old T's earnings and profits are $48,350, ($21,950 (its earnings and profits other than from the deemed sale) plus $15,400 (from T1) plus $16,667 (T's deemed sale gain) less $5,667 (T's allocable share of the consolidated tax liability)).

(e) Under paragraph (e)(2) of this section, S1 does not recognize gain or loss upon its sale of the old T stock to P and takes into account old T's earnings and profits of $48,350, determined as of the close of the acquisition date but after the deemed sale of old T's assets.

Example 5. (a) The facts are the same as in *Example 4,* except that P already owns 20% of the T stock, which is nonrecently purchased stock with a basis of $6,000, and that P purchases the remaining 80% of the T stock from S1 for $64,000.

(b) The results are the same as in *Example 4,* except that:

(i) S1 takes into account only $38,680 of old T's earnings and profits.

(ii) Under paragraph (e)(4) of this section and §1.338(b)–1(e)(2), P is deemed to have made a gain recognition election for its nonrecently purchased T stock. As a result, P recognizes gain of $10,000 and its basis in the nonrecently purchased T stock is increased from $6,000 to $16,000. P's basis in all the T stock is $80,000 (i.e., $64,000+$16,000). The computations are as follows:

(A) P's grossed-up basis for the recently purchased T stock is $64,000 (i.e., $64,000 (the basis of the recently purchased T stock)×(1−.2)/(.8) (the fraction in section 338(b)(4)).

(B) P's basis amount for the nonrecently purchased T stock is $16,000 (i.e., $64,000 (the grossed-up basis in the recently purchased T stock)×(.2)/(1.0−.2) (the fraction in section 338(b)(3)(B)).

(C) The gain recognized on the nonrecently purchased stock is $10,000 (i.e., $16,000−$6,000).

(h) *Inapplicability of provisions.* The provisions of section 6043, §1.331–1(d), and §1.332–6 (relating to information returns and record keeping requirements for corporate liquidations) do not apply to the deemed liquidation of old T under paragraph (e)(2) of this section.

[T.D. 8515, 59 FR 2981, Jan. 20, 1994]

§1.338(i)–1 Effective dates.

(a) *In general.* Sections 1.338–1 through 1.338–5 (except §1.338–4(h)), 1.338(b)–1, and 1.338(h)(10)–1 generally are applicable for targets with acquisition dates on or after January 20, 1994. Section 1.338–4(h) is applicable for targets with acquisition dates on or after January 20, 1997. Section 1.338–4T(h) (as contained in 26 CFR part 1 as revised April 1, 1996) is generally applicable for targets with acquisition dates on or after January 20, 1994, and before January 20, 1997.

(b) *Elective retroactive application.* A target with an acquisition date on or after January 14, 1992 and before January 20, 1994 may apply §§1.338–1 through 1.338–5, 1.338–4T(h) (as contained in 26 CFR part 1 as revised April 1, 1996), 1.338(b)–1, and 1.338(h)(10)–1 by including a statement with its return (including a timely filed amended return) for the period that includes the acquisition date to the effect that it is applying all of these sections pursuant to this paragraph (b). A target with an acquisition date on or after January 14, 1992, and before January 20, 1997, may choose to apply §1.338–4(h) for the period that includes the acquisition date pursuant to paragraph (b) of this section.

(c) *MADSP.* Section 1.338(h)(10)–1(f), which requires use of the MADSP formula to determine deemed sale price, is effective for qualified stock purchases for which the acquisition date is on or after November 10, 1986, unless the acquisition occurs pursuant to a binding contract entered into before that date.

(d) *Deemed election.* The District Director's discretion to impose (without the taxpayer's consent) a deemed election under section 338(e)(1) and §1.338–4T(f)(6)(i) (as contained in the CFR edition revised as of April 1, 1993) is revoked for all open tax years.

[T.D. 8515, 59 FR 2984, Jan. 20, 1994; as amended by T.D. 8710, 62 FR 3461, Jan. 23, 1997]

COLLAPSIBLE CORPORATIONS; FOREIGN PERSONAL HOLDING COMPANIES

§1.341–1 Collapsible corporations; in general.

Subject to the limitations contained in §1.341–4 and the exceptions contained in §1.341–6 and §1.341–7(a), the entire gain from the actual sale or exchange of stock of a collapsible corporation, (b) amounts distributed in complete or partial liquidation of a collapsible corporation which are treated, under section 331, as payment in exchange for stock, and (c) a distribution made by a collapsible corporation which, under section 301(c)(3), is treated, to the extent it exceeds the basis of the stock, in the same manner as a gain from the sale or exchange of property, shall be considered as ordinary income.

[T.D. 7655, 44 FR 68459, Nov. 29, 1979]

§ 1.341–2 Definitions.

(a) *Determination of collapsible corporation.* (1) A collapsible corporation is defined by section 341(b)(1) to be a corporation formed or availed of principally (i) for the manufacture, construction, or production of property, (ii) for the purchase of property which (in the hands of the corporation) is property described in section 341(b)(3), or (iii) for the holding of stock in a corporation so formed or availed of, with a view to (*a*) the sale or exchange of stock by its shareholders (whether in liquidation or otherwise), or a distribution to its shareholders, prior to the realization by the corporation manufacturing, constructing, producing, or purchasing the property of a substantial part of the taxable income to be derived from such property, and (*b*) the realization by such shareholders of gain attributable to such property. See § 1.341–5 for a description of the facts which will ordinarily be considered sufficient to establish whether or not a corporation is a collapsible corporation under the rules of this section. See paragraph (d) of § 1.341–5 for examples of the application of section 341.

(2) Under section 341(b)(1) the corporation must be formed or availed of with a view to the action therein described, that is, the sale or exchange of its stock by its shareholders, or a distribution to them prior to the realization by the corporation manufacturing, constructing, producing, or purchasing the property of a substantial part of the taxable income to be derived from such property, and the realization by the shareholders of gain attributable to such property. This requirement is satisfied in any case in which such action was contemplated by those persons in a position to determine the policies of the corporation, whether by reason of their owning a majority of the voting stock of the corporation or otherwise. The requirement is satisfied whether such action was contemplated, unconditionally, conditionally, or as a recognized possibility. If the corporation was so formed or availed of, it is immaterial that a particular shareholder was not a shareholder at the time of the manufacture, construction, production, or purchase of the property, or if a shareholder at such time, did not share in such view. Any gain of such a shareholder on his stock in the corporation shall be treated in the same manner as gain of a shareholder who did share in such view. The existence of a bona fide business reason for doing business in the corporate form does not, by itself, negate the fact that the corporation may also have been formed or availed of with a view to the action described in section 341(b).

(3) A corporation is formed or availed of with a view to the action described in section 341(b) if the requisite view existed at any time during the manufacture, production, construction, or purchase referred to in that section. Thus, if the sale, exchange, or distribution is attributable solely to circumstances which arose after the manufacture, construction, production, or purchase (other than circumstances which reasonably could be anticipated at the time of such manufacture, construction, production, or purchase), the corporation shall, in the absence of compelling facts to the contrary, be considered not to have been so formed or availed of. However, if the sale, exchange or distribution is attributable to circumstances present at the time of the manufacture, construction, production, or purchase, the corporation shall, in the absence of compelling facts to the contrary, be considered to have been so formed or availed of.

(4) The property referred to in section 341(b) is that property or the aggregate of those properties with respect to which the requisite view existed. In order to ascertain the property or properties as to which the requisite view existed, reference shall be made to each property as to which, at the time of the sale, exchange, or distribution referred to in section 341(b) there has not been a realization by the corporation manufacturing, constructing, producing, or purchasing the property of a substantial part of the taxable income to be derived from such property. However, where any such property is a unit of an integrated project involving several properties similar in kind, the determination

whether the requisite view existed shall be made only if a substantial part of the taxable income to be derived from the project has not been realized at the time of the sale, exchange, or distribution, and in such case the determination shall be made by reference to the aggregate of the properties constituting the single project.

(5) A corporation shall be deemed to have manufactured, constructed, produced, or purchased property if it (i) engaged in the manufacture, construction, or production of property to any extent, or (ii) holds property having a basis determined, in whole or in part, by reference to the cost of such property in the hands of a person who manufactured, constructed, produced, or purchased the property, or (iii) holds property having a basis determined, in whole or in part, by reference to the cost of property manufactured, constructed, produced, or purchased by the corporation. Thus, under subdivision (i) of this subparagraph, for example, a corporation need not have originated nor have completed the manufacture, construction, or production of the property. Under subdivision (ii) of this subparagraph, for example, if an individual were to transfer property constructed by him to a corporation in exchange for all of the capital stock of such corporation, and such transfer qualifies under section 351, then the corporation would be deemed to have constructed the property, since the basis of the property in the hands of the corporation would, under section 362 be determined by reference to the basis of the property in the hands of the individual. Under subdivision (iii) of this subparagraph, for example, if a corporation were to exchange property constructed by it for property of like kind constructed by another person, and such exchange qualifies under section 1031(a), then the corporation would be deemed to have constructed the property received by it in the exchange, since the basis of the property received by it in the exchange would, under section 1031(d), be determined by reference to the basis of the property constructed by the corporation.

(6) In determining whether a corporation is a collapsible corporation by reason of the purchase of property, it is immaterial whether the property is purchased from the shareholders of the corporation or from persons other than such shareholders. The property, however, must be property which, in the hands of the corporation, is property of a kind described in section 341(b)(3). The determination whether property is of a kind described in section 341(b)(3) shall be made without regard to the fact that the corporation is formed or availed of with a view to the action described in section 341(b)(1).

(7) Section 341 is applicable whether the shareholder is an individual, a trust, an estate, a partnership, a company, or a corporation.

(b) *Section 341 assets.* For the purposes of this section, the term ‘‘section 341 assets’’ means the following listed property if held for less than 3 years:

(1) Stock in trade of the corporation, or other property of a kind which would properly be included in the inventory of the corporation if on hand at the close of the taxable year.

(2) Property held primarily for sale to customers in the ordinary course of a trade or business.

(3) Property used in a trade or business as defined in section 1231(b) and held for less than 3 years, except property that is or has been used in connection with the manufacture, construction, production or sale of property described in subparagraphs (1) and (2) of this paragraph.

(4) Unrealized receivables or fees pertaining to property listed in this paragraph. The term *unrealized receivables or fees* means any rights (contractual or otherwise) to payment for property listed in subparagraphs (1), (2), and (3) of this paragraph which has been delivered or is to be delivered and rights to payments for services rendered or to be rendered, to the extent such rights have not been included in the income of the corporation under the method of accounting used by it. In determining whether the assets referred to in this paragraph have been held for 3 years, the time such assets were held by a transferor shall be taken into consideration (section 1223). However, no such period shall begin before the date the manufacture, construction, production, or purchase of such assets is completed.

§ 1.341–3 Presumptions.

(a) Unless shown to the contrary a corporation shall be considered to be a collapsible corporation if at the time of the transactions described in § 1.341–1 the fair market value of the section 341 assets held by it constitutes 50 percent or more of the fair market value of its total assets and the fair market value of the section 341 assets is 120 percent or more of the adjusted basis of such assets. In determining the fair market value of the total assets, cash, obligations which are capital assets in the hands of the corporation, governmental obligations, and stock in any other corporation shall not be taken into consideration. The failure of a corporation to meet the requirements of this paragraph, shall not give rise to the presumption that the corporation was not a collapsible corporation.

(b) The following example will illustrate the application of this section:

Example A corporation, filing its income tax returns on the accrual basis, on July 31, 1955, owned assets with the following fair market values: Cash, $175,000; note receivable held for investment, $130,000; stocks of other corporations, $545,000; rents receivable, $15,000; and a building constructed by the corporation in 1953 and held thereafter as rental property, $750,000. The adjusted basis of the building on that date was $600,000. The only debt outstanding was a $500,000 mortgage on the building. On July 31, 1955, the corporation liquidated and distributed all of its assets to its shareholders. In computing whether the fair market value of the section 341 assets (only the building) is 50 percent or more of the fair market value of the total assets, the cash, note receivable, and stocks of other corporations are not taken into account in determining the value of the total assets, with the result that the fair market value of the total assets was $765,000 ($750,000 (building) plus $15,000 rents receivable). Therefore, the value of the building is 98 percent of the total assets ($750,000÷$765,000). The value of the building is also 125 percent of the adjusted basis of the building ($750,000÷$600,000). In view of the above facts, there arises a presumption that the corporation is a collapsible corporation.

§ 1.341–4 Limitations on application of section.

(a) *General.* This section shall apply only to the extent that the recognized gain of a shareholder upon his stock in a collapsible corporation would be considered, but for the provisions of this section, as gain from the sale or exchange of a capital asset held for more than 1 year (6 months for taxable years before 1977; 9 months for taxable years beginning in 1977). Thus, if a taxpayer sells at a gain stock of a collapsible corporation which he had held for six months or less, this section would not, in any event, apply to such gain. Also, if it is determined, under provisions of law other than section 341, that a sale or exchange at a gain of stock of a collapsible corporation which has been held for more than 1 year (6 months for taxable years before 1977; 9 months for taxable years beginning in 1977) results in ordinary income rather than long-term capital gain, then this section (including the limitations contained herein) has no application whatsoever to such gain.

(b) *Stock ownership rules.* (1) This section shall apply in the case of gain realized by a shareholder upon his stock in a collapsible corporation only if the shareholder, at any time after the actual commencement of the manufacture, construction, or production of the property, or at the time of the purchase of the property described in section 341(b)(3) or at any time thereafter, (i) owned, or was considered as owning, more than 5 percent in value of the outstanding stock of the corporation, or (ii) owned stock which was considered as owned at such time by another shareholder who then owned, or was considered as owning, more than 5 percent in value of the outstanding stock of the corporation.

(2) The ownership of stock shall be determined in accordance with the rules prescribed by section 544(a)(1), (2), (3), (5), and (6), except that, in addition to the persons prescribed by section 544(a)(2), the family of an individual shall include the spouses of that individual’s brothers and sisters, whether such brothers and sisters are by the whole or the half blood, and the spouses of that individual’s lineal descendants.

(3) For the purpose of this limitation, treasury stock shall not be considered as outstanding stock.

(4) It is possible, under this limitation, that a shareholder in a collapsible corporation may have gain upon his

stock in that corporation treated differently from the gain of another shareholder in the same collapsible corporation.

(c) *Seventy-percent rule.* (1) This section shall apply to the gain recognized during a taxable year upon the stock in a collapsible corporation only if more than 70 percent of such gain is attributable to the property referred to in section 341(b)(1). If more than 70 percent of such gain is so attributable, then all of such gain is subject to this section, and, if 70 percent or less of such gain is so attributable, then none of such gain is subject to this section.

(2) For the purpose of this limitation, the gain attributable to the property referred to in section 341(b)(1) is the excess of the recognized gain of the shareholder during the taxable year upon his stock in the collapsible corporation over the recognized gain which the shareholder would have if the property had not been manufactured, constructed, produced, or purchased. In the case of gain on a distribution in partial liquidation or a distribution described in section 301(c)(3)(A), the gain attributable to the property shall not be less than an amount which bears the same ratio to the gain on such distribution as the gain which would be attributable to the property if there had been a complete liquidation at the time of such distribution bears to the total gain which would have resulted from such complete liquidation.

(3) Gain may be attributable to the property referred to in section 341(b)(1) even though such gain is represented by an appreciation in the value of property other than that manufactured, constructed, produced, or purchased. Where, for example, a corporation owns a tract of land and the development of one-half of the tract increases the value of the other half, the gain attributable to the developed half of the tract includes the increase in the value of the other half.

(4) The following example will illustrate the application of the 70 percent rule:

Example: On January 2, 1954, A formed the Z Corporation and contributed $1,000,000 cash in exchange for all of the stock thereof. The Z Corporation invested $400,000 in one project for the purpose of building and selling residential houses. As of December 31, 1954, the residential houses in this project were all sold, resulting in a profit of $100,000 (after taxes). Simultaneously with the development of the first project and in connection with a second and separate project the Z Corporation invested $600,000 in land for the purpose of subdividing such land into lots suitable for sale as home sites and distributing such lots in liquidation before the realization by the corporation of a substantial part of the taxable income to be realized from this second project. As of December 31, 1954, Corporation Z had derived $60,000 in profits (after taxes) from the sale of some of the lots. On January 2, 1955, the Z Corporation made a distribution in complete liquidation to shareholder A who received:

(i) $560,000 in cash and notes, and

(ii) Lots having a fair market value of $940,000.

The gain recognized to shareholder A upon the liquidation is $500,000 ($1,500,000 minus $1,000,000). The gain which would have been recognized to A if the second project had not been undertaken is $100,000 ($1,100,000 minus $1,000,000). Therefore, the gain attributable to the second project which is property referred to in section 341(b)(1), is $400,000 ($500,000 minus $100,000). Since this gain ($400,000) is more than 70 percent of the entire gain ($500,000) recognized to A on the liquidation, the entire gain so recognized is gain subject to section 341(a).

(d) *Three-year rule.* This section shall not apply to that portion of the gain of a shareholder that is realized more than three years after the actual completion of the manufacture, construction, production, or purchase of the property referred to in section 341(b)(1) to which such portion is attributable. However, if the actual completion of the manufacture, construction, production, or purchase of all of such property occurred more than 3 years before the date on which the gain is realized, this section shall not apply to any part of the gain realized.

[T.D. 6500, 25 FR 11607, Nov. 26, 1960, as amended by T.D. 6738, 29 FR 7671, June 16, 1964; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§1.341–5 Application of section.

(a) Whether or not a corporation is a collapsible corporation shall be determined under the regulations of §§1.341–2 and 1.341–3 on the basis of all the facts and circumstances in each particular case. The following paragraphs of this section set forth those facts which will ordinarily be considered sufficient to establish that a corporation is or is not a collapsible corporation. The facts set forth in the following paragraphs of this section are not exclusive of other facts which may be controlling in any particular case. For example, if the facts in paragraph (b) of this section, but not the facts in paragraph (c) of this section, are present, the corporation may nevertheless not be a collapsible corporation if there are other facts which clearly establish that the regulations of §§ 1.341–2 and 1.341–3 are not satisfied. Similarly, if the facts in paragraph (c) of this section are present, the corporation may nevertheless be a collapsible corporation if there are other facts which clearly establish that the corporation was formed or availed of in the manner described in §§ 1.341–2 and 1.341–3 or if the facts in paragraph (c) of this section are not significant by reason of other facts, such as the fact that the corporation is subject to the control of persons other than those who were in control immediately prior to the manufacture, construction, production, or purchase of the property. See § 1.341–4 for provisions which make section 341 inapplicable to certain shareholders of collapsible corporations.

(b) The following facts will ordinarily be considered sufficient (except as otherwise provided in paragraph (a) of this section and paragraph (c) of this section) to establish that a corporation is a collapsible corporation:

(1) A shareholder of the corporation sells or exchanges his stock, or receives a liquidating distribution, or a distribution described in section 301(c)(3)(A),

(2) Upon such sale, exchange, or distribution, such shareholder realizes gain attributable to the property described in subparagraphs (4) and (5) of this paragraph, and

(3) At the time of the manufacture, construction, production, or purchase of the property described in subparagraphs (4) and (5) of this paragraph, such activity was substantial in relation to the other activities of the corporation which manufactured, constructed, produced, or purchased such property.

The property referred to in subparagraphs (2) and (3) of this paragraph is that property or the aggregate of those properties which meet the following two requirements:

(4) The property is manufactured, constructed, or produced by the corporation or by another corporation stock of which is held by the corporation, or is property purchased by the corporation or by such other corporation which (in the hands of the corporation holding such property) is property described in section 341(b)(3), and

(5) At the time of the sale, exchange, or distribution described in subparagraph (1) of this paragraph, the corporation which manufactured, constructed, produced, or purchased such property has not realized a substantial part of the taxable income to be derived from such property.

In the case of property which is a unit of an integrated project involving several properties similar in kind, the rules of this subparagraph shall be applied to the aggregate of the properties constituting the single project rather than separately to such unit. Under the rules of this subparagraph, a corporation shall be considered a collapsible corporation by reason of holding stock in other corporations which manufactured, constructed, produced, or purchased the property only if the activity of the corporation in holding stock in such other corporations is substantial in relation to the other activities of the corporation.

(c) The absence of any of the facts set forth in paragraph (b) of this section or the presence of the following facts will ordinarily be considered sufficient (except as otherwise provided in paragraph (a) of this section) to establish that a corporation is not a collapsible corporation:

(1) In the case of a corporation subject to paragraph (b) of this section only by reason of the manufacture, construction, production, or purchase (either by the corporation or by another corporation the stock of which is held by the corporation) of property which is property described in section 341(b)(3)(A) and (B), the amount (both in quantity and value) of such property

is not in excess of the amount which is normal—

(i) For the purpose of the business activities of the corporation which manufactured, constructed, produced, or purchased the property if such corporation has a substantial prior business history involving the use of such property and continues in business, or

(ii) For the purpose of an orderly liquidation of the business if the corporation which manufactured, constructed, produced, or purchased such property has a substantial prior business history involving the use of such property and is in the process of liquidation.

(2) In the case of a corporation subject to paragraph (b) of this section with respect to the manufacture, construction, or production (either by the corporation or by another corporation the stock of which is held by the corporation) of property, the amount of the unrealized taxable income from such property is not substantial in relation to the amount of the taxable income realized (after the completion of a material part of such manufacture, construction, or production, and prior to the sale, exchange, or distribution referred to in paragraph (b)(1) of this section) from such property and from other property manufactured, constructed, or produced by the corporation.

(d) The following examples will illustrate the application of this section:

Example (1). (i) On January 2, 1954, A formed the W Corporation and contributed $50,000 cash in exchange for all of the stock thereof. The W Corporation borrowed $900,000 from a bank and used $800,000 of such sum in the construction of an apartment house on land which it purchased for $50,000. The apartment house was completed on December 31, 1954. On December 31, 1954, the corporation, having determined that the fair market value of the apartment house, separate and apart from the land, was $900,000, made a distribution (permitted under the applicable State law) to A of $100,000. At this time, the fair market value of the land was $50,000. As of December 31, 1954, the corporation has not realized any earnings and profits. In 1955, the corporation began the operation of the apartment house and received rentals therefrom. The corporation has since continued to own and operate the building. The corporation reported on the basis of the calendar year and cash receipts and disbursements.

(ii) Since A received a distribution and realized a gain attributable to the building constructed by the corporation, since, at the time of such distribution, the corporation has not realized a substantial part of the taxable income to be derived from such building, and since the construction of the building was a substantial activity of the corporation, the W Corporation is considered a collapsible corporation under paragraph (b) of §1.341–5. The provisions of section 341(d) do not prohibit the application of section 341(a). Therefore, the distribution, if and to the extent that it may be considered long-term capital gain rather than ordinary income without regard to section 341, will be considered ordinary income under section 341(a).

(iii) In the event of the existence of additional facts and circumstances in the above case, the corporation, notwithstanding the above facts, might not be considered a collapsible corporation. See §1.342–2 and paragraph (a) of §1.341–5.

Example (2). (i) On January 2, 1954, B formed X Corporation and became its sole shareholder. In August 1954, the corporation completed construction of an office building. It immediately sold this building at a gain of $50,000, included this entire gain in its return for 1954, and distributed this entire gain (less taxes) to B. In June 1955, the corporation completed construction of a second office building. In August 1955, B sold the entire stock of X Corporation at a gain of $12,000, which gain is attributable to the second building.

(ii) X Corporation is a collapsible corporation under section 341(b) for the following reasons: The gain realized through the sale of the stock of X Corporation was attributable to the second office building; the construction of that building was a substantial activity of X Corporation during the time of construction and, at the time of sale, the corporation had not realized a substantial part of the taxable income to be derived from such building. Since the provisions of section 341(d) do not prohibit the application of section 341 (a) to B, the gain of $12,000 to B is, accordingly, considered ordinary income.

Example (3). The facts are the same as in *Example (2)*, except that the following facts are shown: B was the president of the X Corporation and active in the conduct of its business. The second building was constructed as the first step in a project of the X Corporation for the development for rental purposes of a large suburban center involving the construction of several buildings by the corporation. The sale of the stock by B was caused by his retiring from all business activity as a result of illness arising after the second building was constructed. Under these additional facts, the corporation is not considered a collapsible corporation. See §1.341–2 and paragraph (a) of §1.341–5.

Example (4). (i) On January 2, 1948, C formed the Y Corporation and became the sole shareholder thereof. The Y Corporation has been engaged solely in the business of producing motion pictures and licensing their exhibition. On January 2, 1955, C sold all of the stock of the Y Corporation at a gain. The Y Corporation has produced one motion picture each year since its organization and before January 2, 1955, it has realized a substantial part of the taxable income to be derived from each of its motion pictures except the last one made in 1954. This last motion picture was completed September 1, 1954. As of January 2, 1955, no license had been made for its exhibition. The fair market value on January 2, 1955, of this last motion picture exceeds the cost of its production by $50,000. A material part of the production of this last picture was completed on January 1, 1954, and between that date and January 2, 1955, the corporation had realized taxable income of $500,000 from other motion pictures produced by it. The corporation has consistently distributed to its shareholder its taxable income when received (after adjustment for taxes).

(ii) Although the corporation is within paragraph (b) of this section with respect to the production of property, the amount of the unrealized income from such property ($50,000) is not substantial in relation to the amount of the income realized, after the completion of a material part of the production of such property and prior to sale of the stock, from such property and other property produced by the corporation ($500,000). Accordingly, the Y Corporation is within paragraph (c)(2) of this section, and is not considered a collapsible corporation.

Example (5). The facts are the same as in *Example (4)* except that C sold all of his stock to D on February 1, 1954. On January 2, 1955, D sold all of the Y Corporation stock at a gain, the gain being attributable to the picture completed September 1, 1954, and not released by the corporation for exhibition. In view of the change of control of the corporation, the provisions of paragraph (c)(2) of this section are not significant at the time of the sale by D, and the Y Corporation would be considered a collapsible corporation on January 2, 1955. See § 1.341–2 and paragraph (a) of § 1.341–5.

§ 1.341–6 Exceptions to application of section.

(a) *In general*—(1) *Transactions excepted.* Section 341(e) excepts 4 types of transactions from the application of the collapsible corporation provisions. These exceptions, where applicable, eliminate the necessity of determining whether a corporation is a collapsible corporation within the meaning of section 341(b) or whether any of the limitations of section 341(d) are applicable. Under section 341(e)(1) and (2), there are 2 exceptions which are designed to allow the shareholders of a corporation either to sell or exchange their stock or to receive distributions in certain complete liquidations without having any gain considered under section 341(a)(1) or (2) as gain from the sale or exchange of property which is not a capital asset. Under section 341(e)(3), a third exception is designed to permit the shareholders of a corporation to make use of section 333, relating to elections as to recognition of gain in certain complete liquidations occurring within one calendar month. Under section 341(e)(4), the fourth exception permits a corporation to make use of section 337, relating to nonrecognition of gain or loss on sales or exchanges of property by a corporation following the adoption of a plan of complete liquidation. Section 341(e) does not apply to distributions in partial liquidation or in redemption of stock (other than any such distribution pursuant to a plan of complete liquidation), or to distributions described in section 301(c)(3)(A).

(2) *Effective date.* The exceptions in section 341(e)(1), (2), and (3) apply only with respect to taxable years of shareholders beginning after December 31, 1957, and only with respect to sales or exchanges of stock and distributions of property occurring after September 2, 1958. The exception in section 341(e)(4) applies only with respect to taxable years of corporations beginning after December 31, 1957, and only if all sales or exchanges of property, and all liquidating distributions, made by the corporation under the plan of complete liquidation occur after September 2, 1958.

(3) *Definition of constructive shareholder and attribution rules.* (i) For purposes of this section, the term *constructive shareholder* means a person who does not actually own any stock but who is considered to own stock by reason of the application of subdivision (ii) of this subparagraph.

(ii) For purposes of this section (other than paragraph (k), relating to definition of related person) a person shall be considered to own the stock he actually owns plus any stock which is attributed to him by reason of applying the rules prescribed in paragraph (b)(2) and (3) of §1.341–4. See section 341(e)(10).

(iii) As an example of this subparagraph, if a husband does not actually own any stock in a corporation but his wife is the actual owner of 5 shares in the corporation, then the husband is a constructive shareholder who is considered to own 5 shares in the corporation.

(4) *General corporate test.* No exception provided in section 341(e) applies unless a general corporate test and, where applicable, a specific shareholder test are satisfied. Under the general corporate test no taxpayer may utilize the provisions of section 341(e) unless the net increase in value (called ‘‘net unrealized appreciation’’) in the corporation's ‘‘subsection (e) assets’’ does not exceed 15 percent of the corporation's net worth. Subsection (e) assets are, in general, those assets of the corporation which, if sold at a gain by the corporation or by any actual or constructive shareholder who is considered to own more than 20 percent in value of the outstanding stock, would result in the realization of ordinary income. See paragraph (b) of this section for the definition of subsection (e) assets, and paragraph (h) of this section for definition of net unrealized appreciation. This subparagraph may be illustrated by the following examples:

Example (1). X Corporation is in the business of selling whiskey. The net unrealized appreciation in its whiskey is $20,000 and the net worth of the corporation is $100,000. Since the corporation's whiskey is a subsection (e) asset and since the net unrealized appreciation in subsection (e) assets ($20,000) exceeds 15 percent of net worth ($15,000), the general corporate test is not satisfied and section 341(e) is inapplicable to the corporation or its shareholders.

Example (2). Assume the same facts as in *Example (1)* except that X Corporation is not in the business of selling whiskey. Assume further that an actual shareholder who owns more than 20 percent in value of the outstanding X stock (or a person who is considered to own such actual shareholder's stock, such as his spouse) is in the business of selling whiskey. The result is the same as in *Example (1).*

(5) *Specific shareholder test.* Even if the general corporate test is met, a shareholder selling or exchanging his stock or receiving a distribution with respect to his stock (referred to as a ‘‘specific shareholder’’) who is considered to own more than 5 percent in value of the outstanding stock of the corporation may not utilize the benefits of the exception in section 341(e)(1) (or the exception in section 341(e)(2)) unless he satisfies the applicable specific shareholder test. In general, the specific shareholder test is satisfied if the net unrealized appreciation in subsection (e) assets of the corporation, plus the net unrealized appreciation in certain other assets of the corporation which would be subsection (e) assets in respect of the specific shareholder under the following circumstances, does not exceed 15 percent of the corporation's net worth:

(i) If the specific shareholder is considered to own more than 5 percent but not more than 20 percent in value of the outstanding stock, he must take into account the net unrealized appreciation in assets of the corporation which would be subsection (e) assets if he was considered to own more than 20 percent in value of the outstanding stock (see paragraph (c)(3)(i) of this section);

(ii) In addition, if the specific shareholder is considered to own more than 20 percent in value of the outstanding stock, he must also take into account the net unrealized appreciation in assets of the corporation which would be subsection (e) assets under section 341(e)(5)(A)(i) and (iii) if his ownership within the preceding 3 years of stock in certain ‘‘related’’ corporations were taken into account in the manner prescribed in paragraphs (c)(3)(ii) and (d) of this section.

(b) *Subsection (e) asset defined*—(1) *General.* The benefits of section 341(e) are unavailable if the net unrealized appreciation (as defined in paragraph (h) of this section) in certain assets of the corporation (hereinafter called ‘‘subsection (e) assets’’) exceeds 15 percent of the corporation's net worth. In determining whether property is a subsection (e) asset, it is immaterial whether the property is described in section 341(b), and there shall not be taken into account sections 617(d) (relating to gain from dispositions of certain mining property), 1245 and 1250 (relating to gain from dispositions of certain depreciable property), 1251 (relating to gain from disposition of farm property where farm losses offset nonfarm income), 1252 (relating to gain from disposition of farm land), and 1254 (relating to gain from disposition of natural resource recapture property).

(2) *Categories of subsection (e) assets.* The term *subsection (e) assets,* as defined in section 341(e)(5)(A)(i), (ii), (iii), and (iv), means the following categories of property held by a corporation:

(i) The first category is property (except property described in section 1231(b), without regard to any holding period prescribed therein) which in the hands of the corporation is, or in the hands of any actual or constructive shareholder who is considered to own more than 20 percent in value of the outstanding stock of the corporation would be, property gain from the sale or exchange of which would under any provision of chapter 1 of the Code (other than section 617(d), 1245, 1250, 1251, 1252, or 1254) be considered in whole or in part as gain from the sale or exchange of property which is neither a capital asset nor property described in section 1231(b). For example, included in this category is property held by a corporation which in its hands is stock in trade, inventory, or property held by it primarily for sale to customers in the ordinary course of its trade or business regardless of whether such property is appreciated or depreciated in value. Also included in this category is property held by a corporation which is a capital asset in its hands but which, in the hands of any actual or constructive shareholder who is considered to own more than 20 percent in value of the outstanding stock, would be stock in trade, inventory, or property held by such actual or constructive shareholder primarily for sale to customers in the ordinary course of his trade or business. For additional rules relating to whether property is a subsection (e) asset under this subdivision, see subparagraphs (3), (4), and (5) of this paragraph.

(ii) The second category of subsection (e) assets is property which in the hands of the corporation is property described in section 1231(b) (without regard to any holding period prescribed therein), but only if there is net unrealized depreciation (within the meaning of paragraph (h)(2) of this section) on all such property. This subdivision may be illustrated by the following example:

Example. X Corporation owns only the following section 1231(b) property (determined without regard to holding period).

Oil leaseholds	Adjusted basis	Fair market value	Unrealized appreciation (depreciation)
No. 1	$16,000	$10,000	($6,000)
No. 2	8,000	5,000	(3,000)
No. 3	5,000	5,000	0
No. 4	3,000	5,000	2,000
Totals	32,000	25,000	(7,000)

Since with respect to such property the unrealized depreciation in property on which there is unrealized depreciation ($9,000) exceeds the unrealized appreciation in property on which there is unrealized appreciation ($2,000), all such property is included in subsection (e) assets under clause (ii) of section 341(e)(5)(A).

(iii) The third category of subsection (e) assets exists only if there is net unrealized appreciation on all property which in the hands of the corporation is property described in section 1231(b) (without regard to any holding period prescribed therein). In such case, any such section 1231(b) property (whether appreciated or depreciated) is a subsection (e) asset of the third category if, in the hands of an actual or constructive shareholder who is considered to own more than 20 percent in value of the outstanding stock of the corporation, such property would be property gain from the sale or exchange of which would under any provision of chapter 1 of the Code (other than section 617(d), 1245, 1250, 1251, 1252, or 1254) be considered in whole or in part as gain from the sale or exchange of property which is neither a capital asset nor property described in section 1231(b). Included in this category, for example, is property which in the hands of the corporation is property described in section 1231(b) (without regard to any holding period prescribed therein), but which in the hands of an actual or constructive more-than-20-percent shareholder would be property used in his trade or business held for not more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977), stock in trade, inventory, or property held by such shareholder primarily for sale to customers in the ordinary course of his trade or business. For additional rules relating to whether property is a subsection (e) asset under this subdivision, see subparagraphs (3) and (4) of this paragraph. This subdivision may be further illustrated by the following example:

Example. Assume the same facts as stated in the example under subdivision (ii) of this subparagraph, except that in addition to the oil leaseholds the corporation also owns land which has a fair market value of $30,000 and an adjusted basis of $20,000 and which in the hands of the corporation is property described in section 1231(b) (without regard to any holding period prescribed therein). Assume further that A is a constructive shareholder of the corporation who is considered to own 25 percent in value of its outstanding stock and that A holds land primarily for sale to customers in the ordinary course of his trade or business, and that no actual or constructive shareholder who is considered to own more than 20 percent in value of the stock of corporation X so holds oil leases. Since with respect to the corporation's section 1231(b) property the unrealized appreciation in such property on which there is unrealized appreciation ($12,000) exceeds the unrealized depreciation in such property on which there is unrealized depreciation ($9,000), then clause (iii), and not clause (ii), of section 341(e)(5)(A) is applicable. Therefore, no oil lease of the corporation is a subsection (e) asset. However, since in the hands of A, a more-than-20-percent constructive shareholder, the land would be property gain from the sale or exchange of which would be considered as gain from the sale or exchange of property which is neither a capital asset nor property described in section 1231(b), the land is a subsection (e) asset. Consequently, the net unrealized appreciation on subsection (e) assets of the corporation is $10,000 since the net unrealized depreciation on the oil leases is not taken into account.

(iv) The fourth category of subsection (e) assets is property (unless included under subdivision (i), (ii), or (iii) of this subparagraph) which consists of a copyright, a literary, musical, or artistic composition, a letter or memorandum, or similar property, or any interest in any such property, if the property was created in whole or in part by the personal efforts of, or, in the case of a letter, memorandum, or property similar to a letter or memorandum, was prepared, or produced in whole or in part, for, any individual actual or constructive shareholder who is considered to own more than 5 percent in value of the outstanding stock of the corporation. For items included in the phrase ''similar property'' see paragraph (c) of §1.1221–1. In general, property is created in whole or in part by the personal efforts of an individual if such individual performs literary, theatrical, musical, artistic, or other creative or productive work which affirmatively contributes to the creation of the property, or if such individual directs and guides others in the performance of such work. An individual, such as a corporate executive, who merely has administrative control of writers, actors, artists, or personnel and who does not substantially engage in the direction and guidance of such persons in the performance of their work, does not create property by his personal efforts. However, a letter or memorandum, or property similar to a letter or memorandum, which is prepared by personnel who are under the administrative control of an individual, such as a corporate executive, shall be deemed to have been prepared or produced for him whether or not such letter, memorandum, or similar property is reviewed by him. In addition, a letter, memorandum, or property similar to a letter or memorandum, addressed to an individual shall be considered as prepared or produced for him. In the case of a letter, memorandum, or property similar to a letter or memorandum, this subdivision applies only to sales and other dispositions occurring after July 25, 1969.

(3) *Manner of determination.* For purposes of determining whether property is a subsection (e) asset under subparagraph (2)(i) or (iii) of this paragraph, the determination as to whether property of a corporation in the hands of the corporation is, or in the hands of an actual or constructive shareholder of the corporation would be, property

gain from the sale or exchange of which would under any provision of chapter 1 of the Code (other than section 617(d), 1245, 1250, 1251, 1252, or 1254) be considered in whole or in part as gain from the sale or exchange of property which is neither a capital asset nor property described in section 1231(b) shall be made as if all property of the corporation had been sold or exchanged to one person in one transaction. For example, if a corporation whose sole asset is an interest in a gas well has entered into a long-term contract for the future delivery of gas from the well, the ownership of which will pass to the buyer only after extraction or severance from the well, the determination as to whether such contract is a subsection (e) asset shall be made as if the contract were sold or exchanged to one person in one transaction together with such corporation's interest in the well. An assumed sale under this subparagraph does not affect the character of property which is held for sale to customers in the ordinary course of a person's trade or business or the character of a transaction which would be an anticipatory assignment of income. Thus, for example, if a corporation holds subdivided lots for sale to customers in the ordinary course of its trade or business, this subparagraph shall not be applied to change the manner in which the lots are held.

(4) *Shareholder reference test.* For purposes of subparagraph (2)(i) and (iii) of this paragraph, in determining whether any property of the corporation would, in the hands of a particular actual or constructive shareholder, be property gain from the sale or exchange of which would be considered in whole or in part as gain from the sale or exchange of property which is neither a capital asset nor property described in section 1231(b), all the facts and circumstances of the direct and indirect activities of the shareholder must be taken into account. If the particular shareholder holds property primarily for sale to customers in the ordinary course of his trade or business and if similar property is held by the corporation, then in the hands of the shareholder such corporate property will be treated as held primarily for sale to customers in the ordinary course of his trade or business. Moreover, even if the shareholder does not presently so hold property which is similar to property held by the corporation, it may be determined under the particular facts and circumstances (taking into account an assumed sale of such corporate property by the shareholder, all his other direct and indirect activities, and, if applicable, the fact that he previously so held similar property) that he would hold the corporate property primarily for sale to customers in the ordinary course of his trade or business. See also paragraph (d) of this section, pertaining to effect of stock in related corporations.

(5) *Special rule for stock in shareholder's investment account.* If—

(i) A dealer in stock or securities is an actual shareholder (considered to own more than 20 percent of the outstanding stock of a corporation) and holds such stock which he actually owns in his investment account pursuant to section 1236(a), or

(ii) A dealer in stock or securities is a constructive shareholder who is considered to own more than 20 percent of the outstanding stock of a corporation,

then stock or securities held by such corporation shall not be considered subsection (e) assets under subparagraph (2)(i) of this paragraph solely because such actual or constructive shareholder is a dealer in stock or securities. However, stock held by such corporation shall be considered as a subsection (e) asset if, in the hands of any more-than-20-percent actual or constructive shareholder of the corporation, the gain (or any portion thereof) upon a sale of such stock would (if it were held for more than 1 year (6 months for taxable years beginning before 1977; 9 months for taxable years beginning in 1977), constitute, by reason of the application of section 341, gain from the sale of property which is not a capital asset. This subparagraph may be illustrated by the following example:

Example. Jones, a more-than-20-percent actual shareholder in corporation X holds his X stock in an investment account in the manner prescribed in section 1236(a). Jones is a dealer in stock and securities and holds land for sale to customers in the ordinary course of his trade or business. No other actual or constructive shareholder is a dealer in stock and securities or so holds land. X holds all of the stock in corporation Y, a collapsible corporation within the meaning of section 341(b). Y's sole asset is land on which unrealized appreciation exceeds 15 percent of Y's net worth. Since Jones holds his X stock in an investment account pursuant to section 1236(a), the Y stock cannot be considered a subsection (e) asset of the X Corporation merely because Jones is a dealer in stock and securities. Nevertheless, the Y stock is a subsection (e) asset of the X Corporation because if Jones were treated as having sold the Y stock, his gain would be treated as gain from the sale of property which is not a capital asset by reason of the application of section 341. If, however, the net unrealized appreciation on Y's land did not exceed 15 percent of Y's net worth the Y stock would not be a subsection (e) asset since section 341(e)(1) would except such sale from the application of section 341.

(c) *Sales or exchanges of stock*—(1) *General.* Section 341(e)(1) provides that, if certain requirements are satisfied, the provisions of section 341(a)(1) shall in no event apply to certain sales or exchanges of stock by a shareholder. See subparagraph (5) of this paragraph for sales or exchanges of stock which do not qualify under section 341(e)(1). Section 341(e)(1) applies to a sale or exchange of stock by a shareholder only if, at the time of such sale or exchange, the general corporate test and, if applicable, the specific shareholder test are satisfied.

(2) *General corporate test.* The general corporate test is satisfied if the net unrealized appreciation in subsection (e) assets of the corporation does not exceed an amount equal to 15 percent of the net worth of the corporation. See paragraphs (h), (b), and (j) of this section for the definition of ''net unrealized appreciation,'' ''subsection (e) assets,'' and ''net worth.''

(3) *Specific shareholder test.* The specific shareholder test (if applicable) is satisfied if the following conditions are met:

(i) If the shareholder selling or exchanging the stock is considered to own more than 5 percent but not more than 20 percent in value of the outstanding stock, the sum of the net unrealized appreciation in the following assets of the corporation must not exceed an amount equal to 15 percent of the net worth of the corporation:

(*a*) The subsection (e) assets of the corporation, plus

(*b*) The other assets of the corporation which would be subsection (e) assets under section 341(e)(5)(A)(i) and (iii) if such shareholder were considered to own more than 20 percent in value of the outstanding stock.

(ii) If the shareholder selling or exchanging the stock is considered to own more than 20 percent in value of the outstanding stock, the sum of the net unrealized appreciation in the following assets of the corporation must not exceed an amount equal to 15 percent of the net worth of the corporation:

(*a*) The subsection (e) assets of the corporation, plus

(*b*) The other assets of the corporation which would be subsection (e) assets under section 341(e)(5)(A)(i) and (iii) if the shareholder's ownership of stock in certain related corporations were taken into account in the manner prescribed in paragraph (d) of this section.

(4) *Example.* Subparagraph (3) of this paragraph may be illustrated by the following example:

Example. Assume an individual, A, and his grandfather, G, each actually owns 3 percent in value of the stock of corporation X, a corporation holding apartment houses used in its trade or business on which net unrealized appreciation exceeds 15 percent of X's net worth. A, but not G, holds apartment houses primarily for sale to customers in the ordinary course of trade or business. Assume that X satisfies the general corporate test. A and G desire to sell their stock and to take advantage of section 341(e)(1). Since a grandfather and grandson are each considered to own the other's stock under paragraph (a)(3)(ii) of this section, A and G are each considered to own 6 percent in value of corporation X's outstanding stock. Therefore, A cannot avail himself of section 341(e)(1) since he does not satisfy the specific shareholder test prescribed in subparagraph (3)(i) of this paragraph. G, however, who is considered to own 6 percent in value of the stock, does not hold apartment houses for sale to customers in the ordinary course of trade or business. Therefore, G satisfies the specific shareholder test and may benefit from section 341(e)(1).

(5) *Nonqualifying sales or exchanges.* Section 341(e)(1) does not apply to any

sale or exchange of stock to the issuing corporation. Thus, stock redemptions (including distributions in complete or partial liquidation) cannot qualify under section 341(e)(1). In addition, section 341(e)(1) does not apply in any case where a shareholder who is considered to own more than 20 percent in value of the outstanding stock sells or exchanges stock to any person related (within the meaning of paragraph (k) of this section) to such shareholder. A sale or exchange of stock of the corporation by a shareholder to which section 341(e)(1) does not apply because of this subparagraph shall have no effect on the application of this section to other sales or exchanges of stock of the corporation.

(6) *Example.* For an illustration of the application of this paragraph, see *Example (2)* in paragraph (o) of this section.

(d) *Stock in related corporations*—(1) *General.* This paragraph provides rules for applying the specific shareholder test prescribed in paragraph (c)(3)(ii) of this section for purposes of determining whether section 341(e)(1) (relating to sales or exchanges of stock of a corporation) or section 341(e)(2) (relating to distributions in complete liquidation of a corporation) applies to an actual shareholder who is considered as owning more than 20 percent in value of the corporation's outstanding stock. In general, if such a more-than-20-percent shareholder of such corporation (referred to as a ''first'' corporation) owns, or at any time during the preceding 3 years has owned, more than 20 percent in value of the outstanding stock of a ''related'' corporation (see subparagraph (2) of this paragraph), then certain transactions in respect of the stock of the related corporation are taken into account in the manner prescribed in subparagraph (3) of this paragraph. By taking such transactions into account, such shareholder of the first corporation may be deemed to hold primarily for sale to customers in the ordinary course of trade or business property similar or related in service or use to property owned by the first corporation where his other activities, direct and indirect, are insufficient to treat him as so holding such property. See section 341(e)(1)(C) and (2)(C). The transactions in respect of stock in a related corporation are taken into account solely for the purpose of determining the extent to which assets (other than subsection (e) assets) of the first corporation are treated as subsection (e) assets under the shareholder reference tests of section 341(e)(5)(A)(i) and (iii). For purposes of this paragraph, the term ''similar or related in service or use'' shall have the same meaning as such term has in section 1033 (relating to involuntary conversions), without regard to subsection (g) thereof.

(2) *Related corporation defined.* (i) A corporation (referred to as a ''second'' corporation) is ''related'' to another corporation (referred to as a ''first'' corporation) if the stock ownership test specified in subdivision (ii) of this subparagraph and the more-than-70-percent-asset comparison test specified in subdivision (iii) of this subparagraph are met.

(ii) The stock ownership test specified in this subdivision is met—

(*a*) In the case of a sale or exchange referred to in paragraph (c)(1) of this section, if the shareholder in the first corporation is considered to own on the date of such sale or exchange more than 20 percent in value of the outstanding stock of the first corporation, and if on such date (or at any time during the 3-year period preceding such date) such shareholder in the first corporation is an actual or constructive shareholder in the second corporation who was considered to own more than 20 percent in value of the outstanding stock of the second corporation, or

(*b*) In the case of a distribution pursuant to the adoption by the first corporation of a plan of complete liquidation referred to in paragraph (e) of this section, if the shareholder in the first corporation is considered to own on any date after the adoption of such plan more than 20 percent in value of the outstanding stock of the first corporation, and if on such date (or at any time during the 3-year period preceding such date) such shareholder in the first corporation was an actual or constructive shareholder in the second corporation who was considered to own more than 20 percent in value of the outstanding stock of the second corporation.

(iii) The more-than-70-percent-asset comparison test specified in this subdivision is met if more than 70 percent in value of the assets of the second corporation (at any of the applicable times determined under subdivision (ii) of this subparagraph during which the shareholder of the first corporation is or was considered to own more than 20 percent in value of the outstanding stock of the second corporation) are, or were, assets similar or related in service or use to assets comprising more than 70 percent in value of the assets of the first corporation (at any of the times determined under subdivision (ii) of this subparagraph during which the shareholder of the first corporation is or was considered to own more than 20 percent in value of the outstanding stock of the first corporation).

(iv) This subparagraph may be illustrated by the following example:

Example. X is a first corporation and Y is a second corporation. On January 15, 1960, Jones purchased 21 percent in value of the outstanding stock of X, which he sold on January 1, 1961. On January 15, 1955, Jones had purchased 21 percent in value of the outstanding stock of Y which he sold on December 15, 1959. Since Jones owned 21 percent of the outstanding X stock on January 1, 1961 (the date he sold his X stock) and also owned 21 percent of the outstanding Y stock at some time during the 3-year period preceding January 1, 1961, the stock ownership test specified in subdivision (ii)(*a*) of this subparagraph is met. Assume that more than 70 percent in value of the assets of Y were apartment houses held for rental purposes at some time between January 1, 1958, and December 15, 1959 (the portion of the 3-year period preceding the date Jones sold his X stock during which he was a more-than-20-percent shareholder in Y) and that more than 70 percent in value of the assets of X were apartment houses held for rental purposes at some time during the period January 15, 1960, to January 1, 1961, inclusive (the portion of the 3-year period preceding the date he sold his X stock during which he was a more-than-20-percent shareholder in X). Thus, the more-than-70-percent-asset comparison test specified in subdivision (iii) of this subparagraph is met. Accordingly, corporation Y is related to corporation X within the meaning of this subparagraph.

(3) *Manner of taking into account.* If an actual shareholder in a first corporation who is considered to own more than 20 percent of the first corporation's stock, owns or has owned stock in a related corporation, then—

(i) Any sale or exchange by such shareholder, during the applicable period specified in subparagraph (2)(ii) of this paragraph, of stock in the related corporation shall be treated as a sale or exchange by him of his proportionate share of the assets of the related corporation, if immediately before such sale or exchange he was an actual shareholder of the related corporation who was considered to own more than 20 percent in value of the outstanding stock of the related corporation. A shareholder's proportionate share of the assets of a related corporation shall be that percent of each asset of the related corporation as the fair market value of the stock of the related corporation which he actually sold or exchanged bears, immediately before such sale or exchange, to the total fair market value of the outstanding stock of such related corporation; and

(ii) Any sale or exchange of property by the related corporation during the applicable period specified in subparagraph (2)(ii) of this paragraph, gain or loss on which was not recognized to the related corporation by reason of the application of section 337(a), shall be treated as a sale or exchange by him of his proportionate share of the related corporation's property sold or exchanged, if at the time of such sale or exchange he was an actual or constructive shareholder of the related corporation who was considered to own more than 20 percent in value of the outstanding stock of such related corporation. A shareholder's proportionate share of such related corporation's property sold or exchanged shall be that percent of each such property sold or exchanged as the fair market value of the stock which he was considered to own in the related corporation immediately before such sale or exchange bears to the total fair market value of the outstanding stock of such related corporation at such time.

(4) *Example.* This paragraph may be illustrated by the following example:

Example. (i) A owns 25 percent in value of the outstanding stock of Z Corporation. On

December 31, 1959, he sells all his stock in the corporation and desires to take advantage of section 341(e)(1). The only asset of Z Corporation is an appreciated apartment house held for rental purposes but which is not a subsection (e) asset. However, during the preceding 3-year period A sold 25 percent in value of the outstanding stock of each of 3 related corporations. More than 70 percent in value of the assets of each related corporation consisted of an apartment house.

(ii) In determining whether the apartment house owned by Z Corporation would be a subsection (e) asset under the shareholder reference test of section 341(e)(5)(A)(iii), A is treated as having sold a one-fourth interest in each of 3 apartment houses during the preceding 3-year period and these sales must be taken into account, together with all other facts and circumstances, in determining whether the apartment house owned by Z Corporation would be, in the hands of A, property gain from the sale or exchange of which would under any provision of chapter 1 of the Code (other than section 1245 or 1250) be considered as gain from the sale or exchange of property which is neither a capital asset nor property described in section 1231(b). However, A's sales of related corporation stock are not taken into account in determining whether section 341(e)(1) or (2) would be applicable to sales or exchanges of stock by (or liquidating distributions to) other shareholders of Z Corporation.

(e) *Distributions in certain liquidations pursuant to section 337*—(1) *In general.* Section 341(e)(2) provides that, if certain requirements are met, the provisions of section 341(a)(2) shall in no event apply to certain distributions in complete liquidation of a corporation. Section 341(e)(2) applies with respect to any distribution to a shareholder pursuant to a plan of complete liquidation if the following 3 requirements are satisfied:

(i) By reason of the application of section 341(e)(4) and paragraph (g) of this section, section 337(a) applies to sales or exchanges of property by the corporation within the 12-month period beginning on the date of the adoption of such plan. Thus, for example, section 341(e)(2) is not applicable in any case where depreciable, amortizable, or depletable property is distributed after the date of adoption of the plan or if the corporation does not sell substantially all of the properties held by it on such date within such 12-month period, since such a distribution, or the failure to make such a sale, makes section 337(a) inapplicable under section 341(e)(4).

(ii) At all times within such 12-month period the general corporate test of paragraph (c)(2) of this section is satisfied.

(iii) In respect of the shareholder who receives the distribution—

(*a*) At all times within such 12-month period while such shareholder is considered to own more than 5 percent but not more than 20 percent in value of the outstanding stock of the corporation, the shareholder must satisfy the specific shareholder test of paragraph (c)(3)(i) of this section, and

(*b*) At all times within such 12-month period while such shareholder is considered to own more than 20 percent in value of the outstanding stock of the corporation, the shareholder must satisfy the specific shareholder test of paragraph (c)(3)(ii) of this section.

(2) *Illustration.* For an illustration of this paragraph, see *Example (4)* in paragraph (o) of this section.
