Example 13. In 2001, *P*, a domestic corporation, earns a $100 dividend that is foreign source passive limitation income subject to a 30-percent withholding tax. A foreign tax credit for the withholding tax on the dividend is disallowed under section 901(k). A deduction for the tax is allowed, however, under sections 164 and 901(k)(7). In determining whether *P*'s passive income is high-taxed, the $100 dividend and the $30 deduction are allocated to the first group of income described in paragraph (c)(3)(iv) of this section (passive income subject to no withholding tax or other foreign tax).

(d) *High withholding tax interest.* The term ''high withholding tax interest'' means any interest if such interest is subject to a withholding tax of a foreign country or a possession of the United States and the rate of tax applicable to such interest is at least 5 percent. For purposes of the preceding sentence, a withholding tax is any tax imposed by a foreign country or possession of the United States that is determined on a gross basis. A withholding tax shall not be considered to be determined on a gross basis if the tax is not the final tax payable on the interest income, but is merely a prepayment or credit against a final foreign tax liability determined on a net basis on the interest alone or on interest and other income. High withholding tax interest does not include any interest described as export financing interest (as defined in section 904(d)(2)(G) and paragraph (h) of this section).

(e) *Financial services income*—(1) *In general.* The term ''financial services income'' means income derived by a financial services entity, as defined in paragraph (e)(3) of this section, that is:

(i) Income derived in the active conduct of a banking, insurance, financing, or similar business (active financing income as defined in paragraph (e)(2) of this section), except income described in paragraph (e)(2)(i)(W) of this section (high withholding tax interest);

(ii) Passive income as defined in section 904(d) (2) (A) and paragraph (b) of this section as determined before the application of the exception for high-taxed income;

(iii) Export financing interest as defined in section 904(d)(2)(G) and paragraph (h) of this section that, but for section 904(d)(2)(B)(ii), would also meet the definition of high withholding tax interest; or

(iv) Incidental income as defined in paragraph (e)(4) of this section.

(2) *Active financing income*—(i) *Income included.* For purposes of paragraph (e)(1) and (e)(3) of this section, income is active financing income only if it is described in any of the following subdivisions.

(A) Income that is of a kind that would be insurance income as defined in section 953(a) (including related party insurance income as defined in section 953(c)(2)) and determined without regard to those provisions of section 953(a)(1)(A) that limit insurance income to income from countries other than the country in which the corporation was created or organized.

(B) Income from the investment by an insurance company of its unearned premiums or reserves ordinary and necessary to the proper conduct of the insurance business, income from providing services as an insurance underwriter, income from insurance brokerage or agency services, and income from loss adjuster and surveyor services.

(C) Income from investing funds in circumstances in which the taxpayer holds itself out as providing a financial service by the acceptance or the investment of such funds, including income from investing deposits of money and income earned investing funds received for the purchase of traveler's checks or face amount certificates.

(D) Income from making personal, mortgage, industrial, or other loans.

(E) Income from purchasing, selling, discounting, or negotiating on a regular basis, notes, drafts, checks, bills of exchange, acceptances, or other evidences of indebtedness.

(F) Income from issuing letters of credit and negotiating drafts drawn thereunder.

(G) Income from providing trust services.

(H) Income from arranging foreign exchange transactions, or engaging in foreign exchange transactions.

(I) Income from purchasing stock, debt obligations, or other securities from an issuer or holder with a view to the public distribution thereof or offering or selling stock, debt obligations, or other securities for an issuer or holder in connection with the public distribution thereof, or participating in any such undertaking.

(J) Income earned by broker-dealers in the ordinary course of business (such as commissions) from the purchase or sale of stock, debt obligations, commodities futures, or other securities or financial instruments and dividend and interest income earned by broker dealers on stock, debt obligations, or other financial instruments that are held for sale.

(K) Service fee income from investment and correspondent banking.

(L) Income from interest rate and currency swaps.

(M) Income from providing fiduciary services.

(N) Income from services with respect to the management of funds.

(O) Bank-to-bank participation income.

(P) Income from providing charge and credit card services or for factoring receivables obtained in the course of providing such services.

(Q) Income from financing purchases from third parties.

(R) Income from gains on the disposition of tangible or intangible personal property or real property that was used in the active financing business (as defined in paragraph (e)(3)(i) of this section) but only to the extent that the property was held to generate or generated active financing income prior to its disposition.

(S) Income from hedging gain with respect to other active financing income.

(T) Income from providing traveller's check services.

(U) Income from servicing mortgages.

(V) Income from a finance lease. For this purpose, a finance lease is any lease that is a direct financing lease or a leveraged lease for accounting purposes and is also a lease for tax purposes.

(W) High withholding tax interest that would otherwise be described as active financing income.

(X) Income from providing investment advisory services, custodial services, agency paying services, collection agency services, and stock transfer agency services.

(Y) Any similar item of income that is disclosed in the manner provided in the instructions to the Form 1118 or 1116 or that is designated as a similar item of income in guidance published by the Internal Revenue Service.

(3) *Financial services entities*—(i) *In general.* The term ''financial services entity'' means an individual or entity that is predominantly engaged in the active conduct of a banking, insurance, financing, or similar business (active financing business) for any taxable Year. Except as provided in paragraph (e)(3)(ii) of this section, a determination of whether an entity is a financial services entity shall be done on an entity-by-entity basis. An individual or entity is predominantly engaged in the active financing business for any year if for that year at least 80 percent of its gross income is income described in paragraph (e)(2)(i) of this section. For this purpose, gross income includes all income realized by an individual or entity, whether includible or excludible from gross income under other operative provisions of the Code, but excludes gain from the disposition of stock of a corporation that prior to the disposition of its stock is related to the transferor within the meaning of section 267(b). For this purpose, income received from a related person that is a

financial services entity shall be excluded if such income is characterized under the look-through rules of section 904(d)(3) and §1.904–5. In addition, income received from a related person that is not a financial services entity but that is characterized as financial services income under the look-through rules shall be excluded. *See* paragraph (e)(3)(iv) *Example 5* of this section. Any income received from a related person that is characterized under the look-through rules and that is not otherwise excluded by this paragraph will retain its character either as active financing income or other income in the hands of the recipient for purposes of determining if the recipient is a financial services entity and if the income is financial services income to the recipient. For purposes of this paragraph, related person is defined in §1.904–5(i)(1).

(ii) *Special rule for affiliated groups.* In the case of any corporation that is not a financial services entity under paragraph (e)(3)(i) of this section, but is a member of an affiliated group (as defined in section 1504(a) without regard to section 1504(b)(3)), such corporation will be deemed to be a financial services entity if the affiliated group as a whole meets the requirements of section (e)(3)(i) of this section. For purposes of determining if the affiliated group meets the requirements of paragraph (e)(3)(i) of this section the rules of this paragraph (e)(3)(ii) apply. The income of the group will not include any income from transactions with other members of the group. Passive income will not be considered to be active financing income merely because that income is earned by a member of the group that is a financial services entity without regard to the rule in this paragraph (e)(3)(ii).

(iii) *Treatment of partnerships and other pass-through entities* For purposes of determining whether a partner (including a partnership that is a partner in a second partnership) is a financial services entity, all of the partner's income shall be taken into account, except that income that is excluded under paragraph (e)(3)(i) of this section shall not be taken into account. Thus, if a partnership is determined to be a financial services entity none of the income of the partner received from the partnership that is characterized under the look-through rules shall be included for purpose of determining if the partner is a financial services entity. If a partnership is determined not to be a financial services entity, then income of the partner from the partnership that is characterized under the look-through rules will be taken into account (unless such income is financial services income) and such income will retain its character either as active financing income or as other income in the hands of the partner for purposes of determining if the partner is a financial service entity and if the income is financial services income to the partner. If a partnership is a financial services entity and the partner's income from the partnership is characterized as financial services income under the look-through rules, then, for purposes of determining a partner's foreign tax credit limitation, the income from the partnership shall be considered to be financial services income to the partner regardless of whether the partner is itself a financial services entity. The rules of this paragraph (e)(3)(iii) will appIy for purposes of determining whether an owner of an interest in any other pass-through entity the character of the income of which is preserved when such income is included in the income of the owner of the interest is a financial services entity.

(iv) *Examples.* The principles of paragraph (e)(3) of this section are illustrated by the following examples.

Example 1. P is a domestic corporation that owns 100 percent of the stock of S, a controlled foreign corporation incorporated in Country X. For the 1990 taxable year, 60 percent of S's income is active financing income that consists of income that will be considered general limitation or passive income if S is not a financial services entity. The other 40 percent of S's income is passive non-active financing income. S is not a financial services entity and its active financing income thus retains its character as general limitation and passive income. S makes an interest payment to P in 1990 that is characterized under the look-through rules. Although the interest is not financial services income to S under the look-through rules, it retains its character as active financing income when paid to P and P must take that income into account in determining whether it is a financial services entity under paragraph (e)(3)(i) of this section. If P is determined to be a financial services entity, both the portion of the interest payment characterized as active financing income (whether general limitation or passive income in S's hands) and the portion characterized as passive non-active financing income received from S will be recharacterized as financial services income.

Example 2. [Reserved]

Example 3. PS is a domestic partnership operating in branch form in foreign country X. PS has two equal general partners, A and B. A and B are domestic corporations that each operate in branch form in foreign countries Y and Z. All of A's income, except that derived through PS, is manufacturing income. All of B's income, except that derived through PS, is active financing income. A and B's only income from PS are distributive shares of PS's income. PS is a financial services entity and all of its income is financial services income. The income from PS is excluded in determining if A or B are financial services entities. Thus, A is not a financial services entity because none of A's income is active financing income and B is a financial services entity because all of B's income is active financing income. However, both A and B's distributive shares of PS's taxable income consist of financial services income even though A is not a financial services entity.

Example 4. PS is a domestic partnership operating in foreign country X. A and B are domestic corporations that are equal general partners in PS and, therefore, the look-through rules apply for purposes of characterizing A's and B's distributive shares of PS's income. Fifty (50) percent of PS's gross income is active financing income that is not high withholding tax interest. The active financing income includes income that also meets the definition of passive income and income that meets the definition of general limitation income. The other 50 percent of PS's income is from manufacturing. PS is, therefore, not a financial services entity. A s and B's distributive shares of partnership taxable income consist of general limitation manufacturing income and active financing income. Under paragraph (c)(3)(i) of this section, the active financing income shall be financial services income to A or B if either A or B is determined to be a financial services entity. If A or B is not a financial services entity, the distributive shares of income from PS will not be financial services income to A or B and will consist of passive and general limitation income. All of the income from PS is included in determining if A or B are financial services entities.

Example 5. P is a United States corporation that is not a financial services entity. P owns 100 percent of the stock of S, a controlled foreign corporation that is not a financial services entity. S owns 100 percent of the stock of T, a controlled foreign corporation that is a financial services entity. In 1991, T pays a dividend to S. The dividend from T is characterized under the look-through rules of section 904(d)(3). Pursuant to paragraph (e)(3)(i) of this section, the dividend from T is excluded in determining whether S is a financial services entity. S is determined not to be a financial services entity but the dividend retains its character as financial services income in S's hands. Any subpart F inclusion or dividend to P out of earnings and profits attributable to the dividend from T will be excluded in determining whether P is a financial services entity but the inclusion or dividend will retain its character as financial services income.

(4) *Definition of incidental income*—(i) *In general*—(A) *Rule.* Incidental income is income that is integrally related to active financing income of a financial services entity. Such income includes, for example, income from precious metals trading and commodity trading that is integrally related to futures income. If securities, shares of stock, or other types of property are acquired by a financial services entity as an ordinary and necessary incident to the conduct of a active financing business, the income from such property will be considered to be financial services income but only so long as the retention of such property remains an ordinary or necessary incident to the conduct of such business. Thus property, including stock, acquired as the result of, or in order to prevent, a loss in an active financing business upon a loan held by the taxpayer in the ordinary course of such business will be considered ordinary and necessary to the conduct of such business, but income from such property will be considered financial services income only so long as the holding of such property remains an ordinary and necessary incident to the conduct of such business. If an entity holds such property for five years or less then the property is considered held incident to the financial services business. If an entity holds such property for more than five years, a presumption will be established that the entity is not holding such property incident to its financial services business. An entity will be able to rebut the presumption by demonstrating that under the facts and circumstances

it is not holding the property as an investment. However, the fact that an entity holds the property for more than five years and is not able to rebut the presumption that it is not holding the property incident to its financial services business will not affect the characterization of any income received from the property during the first five years as financial services income.

(B) *Examples.* The following examples illustrate the application of paragraph (e)(4)(i) of this section.

Example 1. X is a financial services entity within the meaning of paragraph (e)(3)(i) of this section. In 1987, X made a loan in the ordinary course of its business to an unrelated foreign corporation, Y. As security for that loan, Y pledged certain operating assets. Those assets generate income of a type that would be subject to the general limitation. In January 1989, Y defaulted on the loan and forfeited the collateral. During the period X held the assets, X earned operating income generated by those assets. This income was applied in partial satisfaction of Y's obligation. In 1993, X sold the forfeited assets. The sales proceeds were in excess of the remainder of Y's obligation. The operating income received in the period from 1989 to 1993 and the income on the sale of the assets in 1993 are financial services income of X.

Example 2. The facts are the same as in *Example* 1, except that instead of pledging its operating assets as collateral for the loan, Y pledged the stock of its operating subsidiary Z. In 1993 X sold the stock of Z in complete satisfaction of Y's obligation. X's income from the sale of Z stock in satisfaction of Y's obligation is financial services income.

Example 3. P, a domestic corporation, is a financial services entity within the meaning of paragraph (e)(3)(i) of this section. P holds a United States dollar denominated debt (the ‘‘obligation’’) of the Central Bank of foreign country X. The obligation evidences a loan of $100 made by P to the Central Bank. In 1988, pursuant to a program of country X, P delivers the obligation to the Central Bank which credits 70 units of country X currency to M, a country X corporation. M issues all of its only class of capital stock to P. M invests the 70 units of country X currency in the construction and operation of a new hotel in X. In 1994, M distributes 10 units of country X currency to P as a dividend. P is not able to rebut the presumption that it is not holding the stock of M incident to its financial services business. The dividend to P is, therefore, not financial services income.

(ii) *Income that is not incidental income.* Income that is attributable to non-financial activity is not incidental income within the meaning of paragraph (e)(4) (i) and (ii) of this section solely because such income represents a relatively small proportion of the taxpayer's total income or that the taxpayer engages in non-financial activity on a sporadic basis. Thus, for example, income from data processing services provided to related or unrelated parties or income from the sale of goods or non-financial services (for example travel services) is not financial services income, even if the recipient is a financial services entity.

(5) *Exceptions.* Financial services income does not include income that is:

(i) Export financing interest as defined in section 904(d)(2)(G) and paragraph (h) of this section unless that income would be high withholding tax interest as defined in section 904(d)(2)(B) but for paragraph (d)(2)(B)(ii) of that section;

(ii) High withholding tax interest as defined in section 904(d)(2)(B) unless that income also meets the definition of export financing interest; and

(iii) Dividends from noncontrolled section 902 corporations as defined in section 904(d)(2)(E) and paragraph (g) of this section.

(f) *Shipping income.* The term ‘‘shipping income’’ means any income received or accrued by any person that is of a kind that would be foreign base company shipping income (as defined in section 954(f) and the regulations thereunder). Shipping income does not include any dividends received or accrued from a noncontrolled section 902 corporation, any income that is financial services income, or any income described in section 904(d)(1)(G) (foreign trade income within the meaning of section 923(b)).

(g) *Noncontrolled section 902 corporation*—(1) *Definition.* Except as otherwise provided, the term ‘‘noncontrolled section 902 corporation’’ means any foreign corporation with respect to which the taxpayer meets the stock ownership requirements of section 902(a) or, for purposes of applying the look-through rules described in section 904(d)(3) and §1.904–5, the taxpayer meets the requirements of section 902(b). Except as provided in section 902 and the regulations under that section and paragraph (g)(3) of this section, a controlled foreign corporation shall not be treated as a noncontrolled section 902 corporation with respect to any distributions out of its earnings and profits for periods during which it was a controlled foreign corporation. In the case of a partnership owning a foreign corporation, the determination of whether a taxpayer meets the ownership requirements of section 902 (a) or (b) will be made with respect to the partner's indirect ownership, and not the partnership's direct ownership, in the foreign corporation.

(2) *Treatment of dividends from each separate noncontrolled section 902 corporation*—(i) *In general.* Except as otherwise provided, a separate foreign tax credit limitation applies to dividends received or accrued by a corporation from each noncontrolled section 902 corporation. Any dividend distribution made by a noncontrolled section 902 corporation out of earnings and profits attributable to periods in which the shareholder did not meet the stock ownership requirements of section 902(a) or section 902(b) shall be treated as distributions made by a noncontrolled section 902 corporation.

(ii) *Special rule for dividends received by a controlled foreign corporation.* If—

(A) Stock in a foreign corporation that it is not a controlled foreign corporation is owned by a controlled foreign corporation, see paragraph (g)(4) *Example 1,*

(B) There are two or more shareholders of that controlled foreign corporation, and

(C) The ownership requirements of section 902(b) with respect to the foreign corporation are met by at least one of the United States shareholders of the controlled foreign corporation,

then any dividends received by the controlled foreign corporation from the foreign corporation shall be treated in their entirety to the controlled foreign corporation as dividends from a noncontrolled section 902 corporation, notwithstanding that all the United States shareholders of the controlled foreign corporation do not meet the requirements of section 902(b). Any income received or accrued by a United States shareholder of a controlled foreign corporation described in the preceding sentence that is attributable to a dividend paid by a foreign corporation shall be considered to be passive income if the shareholder's interest in that foreign corporation does not satisfy the requirements of section 902(b).

(iii) *Special rules for high withholding tax interest.* If a taxpayer receives or accrues a dividend distribution from a noncontrolled section 902 corporation out of earnings and profits attributable to high withholding tax interest earned or accrued by the noncontrolled section 902 corporation, any gross basis foreign tax (as defined in paragraph (d) of this section) imposed on such interest, to the extent that the taxes are imposed at a rate in excess of 5 percent, shall not be treated as foreign taxes for purposes of determining the amount of foreign taxes deemed paid or accrued by the taxpayer under section 902. The preceding sentence shall have no effect upon the determination of the amount of earnings and profits of a noncontrolled section 902 corporation.

(iv) *Treatment of inclusions under section 1293.* If a foreign corporation is a noncontrolled section 902 corporation with respect to a taxpayer, any inclusion in the taxpayer's gross income under section 1293 with respect to that corporation shall be treated as a dividend from a noncontrolled section 902 corporation and thus shall be subject to a separate limitation.

(3) *Special rule for controlled foreign corporations*— (i) *General rule.* Distributions from a controlled foreign corporation shall be treated as dividends from a noncontrolled section 902 corporation, and therefore not subject to the look-through rules of § 1.904–5, to the extent that the distribution is out of earnings and profits for periods during which the controlled foreign corporation was not a controlled foreign corporation.

(ii) *Dividend distributions out of earnings and profits for a year during which a shareholder that is currently a more-than-90-percent United States shareholder was not a United States shareholder.* [Reserved]

(iii) *Ordering rule.* [Reserved]

(iv) *Examples.* [Reserved]

(4) *Examples.* The following examples illustrate the application of this paragraph (g).

Example 1. A and B are domestic corporations. A owns 90 percent of the stock of C, a foreign corporation and B owns the remaining 10 percent of the C stock. C is a controlled foreign corporation. A and B are United States shareholders. C owns 20 percent of the stock of D, a foreign corporation, not a controlled foreign corporation, that is incorporated in a different country than C. D is a noncontrolled section 902 corporation with respect to C and A, but not with respect to B. In 1987, C has foreign personal holding company income of $1000, $100 of which is attributable to a dividend from D. The remainder of the foreign personal holding company income is passive income. Assume that gross income and net income are equal and that C pays no foreign taxes on its foreign personal holding company income. In 1987, A and B have section 951(a)(1)(A) inclusions of $900 and $100, respectively, attributable to the foreign personal holding company income. Under paragraph (g)(2)(ii) of this section, the $900 included by A consists of $810 passive income and $90 of income attributable to a dividend from a noncontrolled section 902 corporation. The $100 included by B in gross income is characterized as passive income in its entirety although $10 of the $100 is attributable to the dividend from D, and, as to C, that dividend is characterized as a dividend from a noncontrolled section 902 corporation. As to B, the $10 is characterized as passive income because B does not meet the ownership requirements of section 902(b) with regard to D.

Example 2. In 1987, A, a domestic corporation, owned 9 percent of the stock of B, a foreign corporation. In 1988, A acquired an additional 20 percent of the stock of B. Thus, in 1988, B is a noncontrolled section 902 corporation with regard to A. In 1989, A acquired an additional 25 percent of the stock of B. A acquired no additional stock in 1990. In 1989 and 1990, A owned 54 percent of the stock of B. For 1989 and 1990, B is a controlled foreign corporation in which A is a United States shareholder. B has no subpart F income in 1989 or 1990. In 1990, B pays a dividend of $3,000 to A. One thousand dollars ($1,000) of the dividend is attributable to earnings and profits from 1987, $1,000 is attributable to earnings and profits from 1988, and $1,000 is attributable to earnings and profits from 1989. Under paragraph (g)(1) of this section, the $1,000 attributable to the earnings and profits from 1989 is subject to the look through rules of section 904(d)(3) and §1.904–5(c)(4) and is characterized in A's hands according to those rules. Under section 904(d)(2)(E)(i) and paragraph (g)(3) of this section, the $2,000 attributable to the 1987 and 1988 earnings and profits is treated as income subject to a separate limitation for dividends from a noncontrolled section 902 corporation (B corporation).

Example 3. M owns 40 percent of the voting stock of foreign corporation N. N is a noncontrolled section 902 corporation. In 1987, N earns $2,000 of gross interest income and incurs $1,700 of interest expense. N incurs no other expenses and earns no other income. One-thousand dollars ($1,000) of the interest income is subject to a 10 percent withholding tax and is, therefore, high withholding tax interest. N's earnings and profits are $200 ($2,000 gross interest income less $1,700 interest expense less $100 withholding tax). N pays the full $200 out as a dividend. M receives $80 (40 percent of the $200). Under paragraph (g)(2)(iii) of this section, $50 ($100−5% ×$1,000) of the $100 withholding tax is not treated as a foreign tax for purposes of determining the amount of foreign taxes deemed paid by M under section 902. M's deemed paid credit with respect to the $80 dividend it receives is, therefore, reduced from $40 ($100×$80/$200) to $20 ($50×$80/$200).

(h) *Export financing interest*—(1) *Definitions*—(i) *Export financing interest.* The term ''export financing interest'' means any interest derived from financing the sale (or other disposition) for use or consumption outside the United States of any property that is manufactured, produced, grown, or extracted in the United States by the taxpayer or a related person, and not more than 50 percent of the fair market value of which is attributable to products imported into the United States. For purposes of this paragraph, the term ''United States'' includes the fifty States, the District of Columbia, and the Commonwealth of Puerto Rico.

(ii) *Fair market value.* For purposes of this paragraph, the fair market value of any property imported into the United States shall be its appraised value, as determined by the Secretary under section 402 of the Tariff Act of 1930 (19 U.S.C. 1401a) in connection with its importation. For purposes of determining the foreign content of an item of property imported into the United States, see section 927 and the regulations thereunder.

(iii) *Related person.* For purposes of this paragraph, the term ''related person'' has the meaning given it by section 954(d)(3) except that such section shall be applied by substituting ''the person with respect to whom the determination is being made'' for ''controlled foreign corporation'' each place it applies.

(2) *Treatment of export financing interest.* Except as provided in paragraph (h)(3) of this section, if a taxpayer (including a financial services entity) receives or accrues export financing interest from an unrelated person, then that interest shall be treated as general limitation income.

(3) *Exceptions*—(i) *Export financing interest that is high withholding tax interest.* If a financial services entity receives or accrues export financing interest that would also be high withholding tax interest but for section 904(d)(2)(B)(ii), that income shall be treated as financial services income.

(ii) *Export financing interest that is also related person factoring income.* Export financing interest shall be treated as passive income if that income is also related person factoring income. For this purpose, related person factoring income is—

(A) Income received or accrued by a controlled foreign corporation that is income described in section 864(d)(6) (income of a controlled foreign corporation from a loan for the purpose of financing the purchase of inventory property of a related person); or

(B) Income received or accrued by any person that is income described in section 864(d)(1) (income from a trade receivable acquired from a related person).

(iii) *Export financing interest that is related person factoring income and is received or accrued by a financial services entity.* If a financial services entity receives or accrues export financing interest that is also related person factoring income, then the income shall be treated as financial services income. See section 864(d)(5)(A)(i).

(iv) *Export financing interest that is related person factoring income and high withholding tax interest.* If any taxpayer (including a financial services entity) receives or accrues export financing interest that is also related person factoring income and high withholding tax interest, then that income shall be treated as high withholding tax interest. See section 864(d)(5)(A)(i).

(4) *Examples.* The following examples illustrate the operation of paragraph (h)(3) of this section:

Example 1. Controlled foreign corporation S is a wholly-owned subsidiary of domestic corporation P. S is not a financial services entity and has accumulated cash reserves. P has uncollected trade and service receivables of foreign obligors. P sells the receivables at a discount (“factors”) to S. The income derived by S on the receivables is related person factoring income. The income is also export financing interest. Because the income is related person factoring income, the income is passive income to S.

Example 2. The facts are the same as in *Example (1)* except that S is a financial services entity and derives the income in an active financing business. The income derived by S on the receivables is related person factoring income and is also export financing interest. Therefore, pursuant to paragraph (h)(3)(iii) of this section, the income is financial services income to S.

Example 3. Domestic corporation S is a wholly-owned subsidiary of domestic corporation P. S is not a financial services entity and has accumulated cash reserves. P has uncollected trade and service receivables of foreign obligors. P factors the receivables to S. The income derived by S on the receivables is related person factoring income. The income is also export financing interest. The income will be passive income to S.

Example 4. The facts are the same as in *Example* 3 except that instead of factoring P’s receivables, S finances the sales of P’s goods by making loans to the purchasers of P’s goods. The interest derived by S on these loans is export financing interest and is not related person factoring income. The income will be general limitation income to S.

(5) *Income eligible for section 864(d)(7) exception (same country exception) from related person factoring treatment*—(i) *Income other than interest.* If any foreign person that is not a financial services entity receives or accrues income that is described in section 864(d)(7) (income on a trade or service receivable acquired from a related person in the same foreign country as the recipient) and such income would also meet the definition of export financing interest if section 864(d)(1) applied to such income (income on a trade or service receivable acquired from a related person treated as interest), then the income shall be considered to be export financing interest and shall be treated as general limitation income. If a financial services entity receives or accrues that income, the income shall not be considered to be export financing interest and, therefore, shall be treated as financial services income.

(ii) *Interest income.* If export financing interest is received or accrued by any foreign person and that income would otherwise be treated as related person factoring income under section 864(d)(6) if section 864(d)(7) did not apply, section 904(d)(2)(A)(iii)(II) shall apply, and the interest shall be treated as general limitation income unless the interest is received or accrued by a financial services entity. If that interest is received or accrued by a financial services entity, section 904(d)(2)(C)(iii)(III) shall apply and the interest shall be treated as general limitation income. If that interest also would be high withholding tax interest but for section 904(d)(2)(B)(ii), then the interest shall be treated as financial services income.

(iii) *Examples.* The following examples illustrate the operation of this paragraph (h)(5):

Example 1. Controlled foreign corporation S is a wholly-owned subsidiary of domestic corporation P. Controlled foreign corporation T is a wholly-owned subsidiary of controlled foreign corporation S. S and T are incorporated in Country M. In 1987, P sells tractors to T, which T sells to X, an unrelated foreign corporation organized in country M. The tractors are to be used in country M. T uses a substantial part of its assets in its trade or business located in Country M. T has uncollected trade receivables from X that it factors to S. S derived more than 20 percent of its gross income for 1987 other than from an active financing business and the income derived by S from the receivables is not derived in an active financing business. Thus, pursuant to paragraph (e)(3)(i) of this section, S is not a financial services entity. The income is not related person factoring income because it is described in section 864(d)(7) (income eligible for the same country exception). If section 864(d)(1) applied, the income S derived from the receivables would meet the definition of export financing interest. The income, therefore, is considered to be export financing interest and is general limitation income to S.

Example 2. The facts are the same as in *Example (1)* except that S is a financial services entity and derives the income on the receivables from the conduct of an active financing business. The income S derives from the receivables is not related person factoring income because it is described in section 864(d)(7). If the income would be high withholding tax interest but for section 904(d)(2)(B)(ii), then the income will not be considered to be export financing interest and will be financial services income to S. Otherwise, the income will be considered to be export financing interest and will be general limitation income to S.

Example 3. Controlled foreign corporation S is a wholly-owned subsidiary of domestic corporation, P. Controlled foreign corporation T is a wholly-owned subsidiary of controlled foreign corporation S. S and T are incorporated in country M. S is not a financial services entity. In 1987, P sells tractors to T, which T sells to X, a foreign partnership that is organized in country M and is related to S and T. S makes a loan to X to finance the tractor sales. The interest earned by S from financing the sales is described in section 864(d)(7) and is export financing interest. Therefore, the income shall be general limitation income to S.

Example 4. The facts are the same as in *Example (3)* except that S is a financial services entity and derives the interest on the loan to X in an active financing business. The interest S earns is export financing interest that is not described in section 864(d)(1) because it is described in section 864(d)(7). Because the interest is described in section 864 (d)(7) and is export financing interest, section 904(d)(2)(C)(iii)(III) shall apply and the income shall be general limitation income to S, unless it would also be high withholding tax interest but for section 904(d)(2)(B)(ii), in which case it will be financial services income to S.

(i) *Interaction of section 907(c) and income described in this section.* If a person receives or accrues income that is income described in section 907(c) (relating to oil and gas income), the rules of section 907(c) and the regulations thereunder, as well as the rules of this section, shall apply to the income. Thus, for example, if a taxpayer receives or accrues a dividend distribution from two separate noncontrolled section 902 corporations out of earnings and profits attributable to income received or accrued by the noncontrolled section 902 corporations that is income described in section 907(c), the rules provided in section 907 shall apply separately to the dividends received from each noncontrolled section 902 corporation. The reduction in amount allowed as foreign tax provided by section 907(a) shall therefore be calculated separately for dividends received or accrued by the taxpayer from each separate noncontrolled section 902 corporation.

(j) *Special rule for DASTM gain or loss.* Any DASTM gain or loss computed under §1.985–3(d) must be allocated among the categories of income under the rules of § 1.985–3 (e)(2)(iv) or (e)(3). The rules of § 1.985–3(e) apply before the rules of section 904(d)(2)(A)(iii)(III) (the exception from passive income for high-taxed income).

(k) *Special rule for alternative minimum tax foreign tax credit.* For purposes of computing the alternative minimum tax foreign tax credit under section 59(a), items included in alternative minimum taxable income by reason of section 56(g) (adjustments based on adjusted current earnings) shall be characterized as income described in a separate category under section 904(d) and this section based on the character of the underlying items of income.

(l) *Priority rules*—(1) *In general.* In the case of income that meets the definitions of more than one category of separate limitation income, the following priority rules apply:

(i) Income that meets the definitions of passive income and of any other separate limitation income described in section 904(d)(1) (B) through (H) will be subject to the other separate limitation;

(ii) Income that meets the definitions of financial services income and of either shipping income or passive income will be subject to the separate limitation for financial services income;

(iii) Income that meets the definitions of financial services income and of any separate limitation income other than shipping or passive income will be subject to the other separate limitation;

(iv) Income that meets the definitions of dividends from a noncontrolled section 902 corporation and of any other separate limitation income will be subject to the separate limitation for dividends from a noncontrolled section 902 corporation unless that income is foreign oil and gas extraction income defined in section 907(c), in which case it will be treated as general limitation income pursuant to § 1.907(a)–1(f);

(v) Income that meets the definitions of high withholding tax interest and of any other separate limitation income will be high withholding tax interest; and

(vi) Income that meets the definitions of shipping income and of foreign trade income will be subject to the separate limitation for foreign trade income.

(2) *Examples.* The provisions of this paragraph (l) are illustrated by the following examples:

Example 1. Controlled foreign corporation S is a wholly-owned subsidiary of domestic corporation P. S owns 20 percent of the voting stock of T, a foreign corporation that is not a controlled foreign corporation. In 1987, T pays S a dividend that qualifies as foreign base company shipping income to S under § 1.954–6(f)(1). The dividend from T is also a dividend from a noncontrolled section 902 corporation. Therefore, pursuant to section 904(d)(2)(D) and paragraph (l)(1)(iv) of this section, the dividend from T is treated as a dividend from a noncontrolled section 902 corporation.

Example 2. In 1987, domestic corporation P received a dividend from R, a foreign corporation that is not a controlled foreign corporation. P owns 30 percent of the voting stock of R. P is a financial services entity and the dividend from R qualifies as financial services income under paragraph (e)(4)(i)(A) of this section. The dividend from R is also a dividend from a noncontrolled section 902 corporation. Therefore, pursuant to section 904(d)(2)(C) (iii)(II) and paragraphs (l)(1)(iii) and (iv) of this section, the dividend from R is treated as a dividend from a noncontrolled section 902 corporation.

Example 3. P, a domestic corporation, owns 10 percent of foreign corporation S. S is a noncontrolled section 902 corporation. In 1990, S earns foreign oil and gas extraction income which is general limitation income. S pays a dividend to P out of its earnings and profits for 1990. The dividend from S is a dividend from a noncontrolled section 902 corporation that is also foreign oil and gas extraction income. Pursuant to section 907(c)(3)(A), § 1.907(a)–1(f) and paragraph (l)(1)(iv) of this section, P will include the dividend in income as general limitation income.

[T.D. 8214, 53 FR 27011, July 18, 1988, as amended by T.D. 8412, 57 FR 20644, May 14, 1992; 57 FR 45660, Oct. 2, 1992; T.D. 8556, 59 FR 37672, July 25, 1994; T.D. 8805, 64 FR 1515, Jan. 11, 1999]

§ 1.904–5 Look-through rules as applied to controlled foreign corporations and other entities.

(a) *Definitions.* For purposes of section 904(d)(3) and the regulations under section 904, the following definitions apply:

(1) The term *separate category* means, as the context requires, any category of income described in section 904(d)(1) (A), (B), (C), (D), (E), (F), (G), (H), or (I)

and in §1.904–4 (b), (d), (e), (f), and (g), or any category of earnings and profits to which income described in such provisions is attributable.

(2) The term *controlled foreign corporation* has the meaning given such term by section 957 (taking into account the special rule for certain captive insurance companies contained in section 953(c)).

(3) The term *United States shareholder* has the meaning given such term by section 951(b) (taking into account the special rule for certain captive insurance companies contained in section 953(c)), except that for purposes of this section, a United States shareholder shall include any member of the controlled group of the United States shareholder. For this purpose the controlled group is any member of the affiliated group within the meaning of section 1504(a)(1) except that 50 percent shall be substituted for 80 percent wherever it appears in section 1504(a)(2).

(b) *In general.* Except as otherwise provided in section 904(d) (2)(E) and (3) and this section, dividends, interest, rents, and royalties received or accrued by a taxpayer from a controlled foreign corporation in which the taxpayer is a United States shareholder shall be treated as general limitation income.

(c) *Rules for specific types of inclusions and payments*—(1) *Subpart F inclusions*—(i) *Rule.* Any amount included in gross income under section 951(a)(1)(A) shall be treated as income in a separate category to the extent the amount so included is attributable to income received or accrued by the controlled foreign corporation that is described as income in such category. For purposes of this §1.904–5, income shall be characterized under the rules of §1.904–4 prior to the application of the rules of paragraph (c) of this section. For rules concerning inclusions under section 951(a)(1)(B), see paragraph (c)(4)(i) of this section.

(ii) *Examples.* The following examples illustrate the application of this paragraph (c)(1):

Example 1. Controlled foreign corporation S is a wholly-owned subsidiary of P, a domestic corporation. S earns $200 of net income, $85 of which is foreign base company shipping income, $15 of which is foreign personal holding company income, and $100 of which is non-subpart F general limitation income. No foreign tax is imposed on the income. One hundred dollars ($100) of S's income is subpart F income taxed currently to P under section 951(a)(1)(A). Because $85 of the subpart F inclusion is attributable to shipping income of S, $85 of the subpart F inclusion is shipping income to P. Because $15 of the subpart F inclusion is attributable to passive income of S, $15 of the subpart F inclusion is passive income to P.

Example 2. Controlled foreign corporation S is a wholly-owned subsidiary of domestic corporation P. S is a financial services entity. P manufactures cars and is not a financial services entity. In 1987, S earns $200 of interest income unrelated to its banking business and $900 of interest income related to its banking business. Assume that S pays no foreign taxes and has no expenses. All of S's income is included in P's gross income as foreign personal holding company income. Because S is a financial services entity, income that would otherwise be passive income is considered to be financial services income. P, therefore, treats the entire subpart F inclusion as financial services income.

Example 3. Controlled foreign corporation S is a wholly-owned subsidiary of domestic corporation P. P is a financial services entity. S manufactures cars and is not a financial services entity. In 1987, S earns $200 of passive income that is subpart F income and $900 of general limitation non-subpart F income. Assume that S pays no foreign taxes on its passive earnings and has no expenses. P includes the $200 of subpart F income in gross income. Because P is a financial services entity, the inclusion will be financial services income to P.

Example 4. Controlled foreign corporation S is a wholly-owned subsidiary of domestic corporation P. Neither P nor S is a financial services entity. Controlled foreign corporation T is a wholly-owned subsidiary of controlled foreign corporation S. T is a financial services entity. In 1991, T pays a dividend to S. For purposes of determining whether S is a financial services entity under §1.904–4(e)(3)(i), the dividend from T is ignored. For purposes of characterizing the dividend in S's hands under the look-through rules of paragraph (c)(4) of this section, however, the dividend retains its character as financial services income. Similarly, any subpart F inclusion or dividend to P out of the earnings and profits attributable to the dividend from S is excluded in determining whether P is a financial services entity under §1.904–4(e)(3)(i), but retains its character in P's hands as financial services income under paragraph (c)(4) of this section.

Example 5. Controlled foreign corporation S is a wholly-owned subsidiary of domestic corporation P. S owns 40 percent of foreign corporation A, 45 percent of foreign corporation B, 30 percent of foreign corporation C and 20 percent of foreign corporation D. A, B, C, and D are noncontrolled section 902 corporations. In 1987, S's only income is a $100 dividend from each foreign corporation. Assume that S pays no foreign taxes and has no expenses. All $400 of the income is foreign personal holding company income and is included in P's gross income. P must include $100 in its separate limitation for dividends from A, $100 in its separate limitation for dividends from B, $100 in its separate limitation for dividends from C, and $100 in its separate limitation for dividends from D.

(2) *Interest*—(i) *In general.* For purposes of this paragraph, related person interest is any interest paid or accrued by a controlled foreign corporation to any United States shareholder in that corporation (or to any other related person) to which the look-through rules of section 904(d)(3) and this section apply. Unrelated person interest is all interest other than related person interest. Related person interest shall be treated as income in a separate category to the extent it is allocable to income of the controlled foreign corporation in that category. If related person interest is received or accrued from a controlled foreign corporation by two or more persons, the amount of interest received or accrued by each person that is allocable to any separate category of income shall be determined by multiplying the amount of related person interest allocable to that separate category of income by a fraction. The numerator of the fraction is the amount of related person interest received or accrued by that person and the denominator is the total amount of related person interest paid or accrued by the controlled foreign corporation.

(ii) *Allocating and apportioning expenses including interest paid to a related person.* Related person interest and other expenses of a controlled foreign corporation shall be allocated and apportioned in the following manner:

(A) Gross income in each separate category shall be determined;

(B) Any expenses that are definitely related to less than all of gross income as a class, including unrelated person interest that is directly allocated to income from a specific property, shall be allocated and apportioned under the principles of §§ 1.861–8 or 1.861-10T, as applicable, to income in each separate category;

(C) Related person interest shall be allocated to and shall reduce (but not below zero) the amount of passive foreign personal holding company income as determined after the application of paragraph (c)(2)(ii)(B) of this section;

(D) To the extent that related person interest exceeds passive foreign personal holding company income as determined after the application of paragraphs (c)(2)(ii) (B) and (C) of this section, the related person interest shall be apportioned under the rules of this paragraph to separate categories other than passive income.

(*1*) If under § 1.861–9T, the modified gross income method of apportioning interest expense is elected, related person interest shall be apportioned as follows:

$$\begin{array}{c}\text{Related person interest minus Related}\\ \text{person interest allocated under}\\ \text{paragraph (c)(2)(ii)(C) of this section}\end{array} \times \frac{\begin{array}{c}\text{Gross income in a separate category}\\ \text{(other than passive)}\end{array}}{\text{Total gross income (other than passive)}}$$

(*2*) If under § 1.861–9T, the asset method of apportioning interest expense is elected, related person interest shall be apportioned according to the following formula:

$$\begin{array}{c}\text{Related person interest minus Related}\\ \text{person interest minus allocated under}\\ \text{paragraph (c)(2)(ii)(C) of this section}\end{array} \times \frac{\begin{array}{c}\text{Value of assets in a separate category}\\ \text{(other than passive)}\end{array}}{\begin{array}{c}\text{Value of total assets}\\ \text{(other than passive)}\end{array}}$$

(E) Any other expenses (including unrelated person interest that is not directly allocated to income from a specific property) that are not definitely related expenses or that are definitely related to all of gross income as a class shall be apportioned under the rules of this paragraph to reduce income in each separate category.

(*1*) If under §1.861–9T, the modified gross income method of apportioning interest expense is elected, the interest expense shall be apportioned as follows:

$$\begin{array}{c}\text{Expense apportionable}\\ \text{to a separate category}\end{array} = \text{Expense} \times \frac{\begin{array}{c}\text{Gross income in a separate category (minus}\\ \text{related person interest allocated under}\\ \text{paragraph (c)(2)(ii)(C) of this section if}\\ \text{the category is passive)}\end{array}}{\begin{array}{c}\text{Total gross income minus related person}\\ \text{interest allocated to passive income}\\ \text{under paragraph (c)(2)(ii)(C) of}\\ \text{this section}\end{array}}$$

(*2*) If under §1.861–9T, the asset method of apportioning interest expense is elected, then the expense shall be apportioned as follows:

$$\begin{array}{c}\text{Expense apportionable}\\ \text{to a separate category}\end{array} = \text{Expense} \times \frac{\begin{array}{c}\text{Value of assets in a separate category}\\ \text{(minus related person debt}\\ \text{allocated to passive assets if}\\ \text{the category is passive)}\end{array}}{\begin{array}{c}\text{Value of total assets minus}\\ \text{related person debt allocated}\\ \text{to passive assets}\end{array}}$$

(*3*) Expenses other than interest shall be apportioned in a similar manner depending on the apportionment method used. *See* §1.861–8T(c)(1) (i)–(vi).

(iii) *Definitions*—(A) *Value of assets and reduction in value of assets and gross income.* For purposes of paragraph (c)(2)(ii) (D) and (E) of this section, the value of total assets is the value of assets in all categories (determined under the principles of §1.861–9T(g)). See §1.861–10T(d)(2) to determine the reduction in value of assets and gross income for purposes of apportioning additional third person interest expense that is not directly allocated when some interest expense has been directly allocated. For purposes of this paragraph and paragraph (c)(2)(ii)(E) of this section, any reduction in the value of assets for indebtedness that relates to interest allocated under paragraph (c)(2)(ii)(C) of this section is made before determining the average of asset values. For rules relating to the averaging of reduced asset values see §1.861–9T(g)(2).

(B) *Related person debt allocated to passive assets.* For purposes of paragraph (c)(2)(ii)(E) of this section, related person debt allocated to passive assets is determined as follows:

$$\text{Related person debt allocated to the passive category} = \text{Total related person debt} \times \frac{\text{Related person interest allocable to passive income under paragraph (c)(2)(ii)(C)}}{\text{All related person interest}}$$

For this purpose, the term *total related person debt* means the sum of the principal amounts of obligations of a controlled foreign corporation owed to any United States shareholder of such corporation or to any related entity (within the meaning of paragraph (g) of this section) determined at the end of the taxable year.

(iv) *Examples.* The following examples illustrate the operation of this paragraph (c)(2).

Example 1. (i) Controlled foreign corporation S is a wholly-owned subsidiary of P, a domestic corporation. In 1987, S earns $200 of foreign personal holding company income that is passive income. S also earns $100 of foreign base company sales income that is general limitation income. S has $2000 of passive assets and $2000 of general limitation assets. In 1987, S makes a $150 interest payment to P with respect to a $1500 loan from P. S also pays $100 of interest to an unrelated person on a $1000 loan from that person. S has no other expenses. S uses the asset method to apportion interest expense.

(ii) Under paragraph (c)(2)(ii)(C) of this section, the $150 related person interest payment is allocable to S's passive foreign personal holding company income. Therefore, the $150 interest payment is passive income to P. Because the entire related person interest payment is allocated to passive income under paragraph (c)(2)(ii)(C) of this section, none of the related person interest payment is apportioned to general limitation income under paragraph (c)(2)(ii)(D) of this section. Under paragraph (c)(2)(iii)(B) of this section, the entire amount of the related person debt is allocable to passive assets ($1500=$1500×$150/$150). Under paragraph (c)(2)(ii)(E) of this section, $20 of interest expense paid to an unrelated person is apportioned to passive income ($20=$100×($2000 − $1500)/($4000 − $1500)). Eighty dollars ($80) of the interest expense paid to an unrelated person is apportioned to general limitation income ($80=$100×$2000/($4000 − $1500)).

Example 2. The facts are the same as in *Example* 1, except that S uses the gross income method to apportion interest expense. Under paragraph (c)(2)(ii)(E) of this section, the unrelated person interest expense would be apportioned on a gross income method. Therefore, $33 of interest expense paid to unrelated persons would be apportioned to passive income ($33=$100×($200 − $150)/($300 − $150) and $67 of interest expense paid to unrelated persons would be apportioned to general limitation income ($67=$100×$100/($300 − $150).

Example 3. (i) The facts are the same as in *Example* 1, except that S has an additional $50 of third person interest expense that is directly allocated to income from a specific property that produces only passive income. The principal amount of indebtedness to which the interest relates is $500. S also has $50 of additional non-interest expenses that are not definitely related expenses and that are apportioned on an asset basis.

(ii) Under paragraph (c)(2)(ii)(B) of this section, the $50 of directly allocated third person interest is first allocated to reduce the passive income of S. Under paragraph (c)(2)(ii)(C) of this section, the $150 of related person interest is allocated to the remaining $150 of passive income. Under paragraph (c)(2)(iii)(B) of this section, all of the related person debt is allocated to passive assets. ($1500=$1500×$150/$150).

(iii) Under paragraph (c)(2)(ii)(E) of this section, the non-interest expenses that are not definitely related are apportioned on the basis of the asset values reduced by the allocated related person debt. Therefore, $10 of these expenses are apportioned to the passive category ($50×($2000 − $1500)/($4000 − $1500)) and $40 are apportioned to the general limitation category ($50×$2000/($4000 − $1500)).

(iv) In order to apportion third person interest between the categories of assets, the value of assets in a separate category must also be reduced under the principles of § 1.861–8 by the indebtedness relating to the specifically allocated interest. Therefore, under paragraph (c)(2)(iii)(B) of this section, the value of assets in the passive category for purposes of apportioning the additional third person interest=0 ($2000 minus $500 (the principal amount of the debt, the interest payment on which is directly allocated to specific interest producing properties) minus $1500 (the related person debt allocated to passive assets)). Under paragraph (c)(2)(ii)(E) of this section, all $100 of the non-definitely related third person interest is apportioned to the general limitation category ($100=$100×$2000/($4000−$500−$1500)).

Example 4. (i) Controlled foreign corporation S is a wholly-owned subsidiary of P, a domestic corporation. In 1987, S earns $100 of foreign personal holding company income that is passive income. S also earns $100 of foreign base company sales income that is general limitation income. S has $1000 of general limitation assets and $1000 of passive assets. In 1987, S makes a $150 interest payment to P on a $1500 loan from P and has $20 of general and administrative expenses (G & A) that under the principles of §§1.861–8 through 1.861–14T is treated as directly allocable to all of P's gross income. S also makes a $25 interest payment to an unrelated person on a $250 loan from the unrelated person. S has no other expenses. S uses the asset method to apportion interest expense. S uses the gross income method to apportion G & A.

(ii) Under paragraph (c)(2)(ii)(C) of this section, $100 of the interest payment to P is allocable to S's passive foreign personal holding company income. Under paragraph (c)(2)(ii)(D) of this section, the additional $50 of related person interest expense is apportioned to general limitation income ($50=$50×$1000/$1000). Under paragraph (c)(2)(iii)(B) of this section, related person debt allocated to passive assets equals $1000 ($1000=$1500×$100/$150).

(iii) Under paragraph (c)(2)(ii)(E) of this section, none of the $25 of interest expense paid to an unrelated person is apportioned to passive income ($0=$25×($1000−$1000)/($2000−$1000). Twenty-five dollars ($25) of the interest expense paid to an unrelated person is apportioned to general limitation income ($25=$25×$1000/($2000−$1000). Under paragraph (c)(2)(ii)(E) of this section, none of the G & A is allocable to S's passive foreign personal holding company income ($0=$20×($100−$100)/($200−$100). All $20 of the G & A is apportioned to S's general limitation income ($20=$20×$100/($200−$100).

Example 5. The facts are the same as in *Example* 4, except that S uses the gross income method to apportion interest expense. As in *Example* 4, $100 of the interest payment to P is allocate to passive income under paragraph (c)(2)(ii)(C) of this section. Under paragraph (c)(2)(ii)(D) of this section, the additional $50 of related person interest expense is apportioned to general limitation income ($150−100×$100/$100). Under paragraph (c)(2)(ii)(E) of this section, none of the unrelated person interest expense and none of the G & A is apportioned to passive income, because after the application of paragraph (c)(2)(ii)(C) of this section, no passive income remains in the passive income category.

Example 6. Controlled foreign corporation T is a wholly-owned subsidiary of S, a controlled foreign corporation. S is a wholly-owned subsidiary of P, a domestic corporation. S is not a financial services entity. S and T are incorporated in the same country. In 1987, P sells tractors to T, which T sells to X, a foreign corporation that is related to both S and T and is organized in the same country as S and T. S makes a loan to X to finance the tractor sales. Assume that the interest earned by S from financing the sales is export financing interest that is neither related person factoring income nor foreign personal holding company income. The export financing interest earned by S is, therefore, general limitation income. S earns no other income. S makes a $100 interest payment to P. The $100 of interest paid is allocable under the look-through rules of paragraph (c)(2)(ii) of this section to the general limitation income earned by S and is therefore general limitation income to P.

(3) *Rents and Royalties.* Any rents or royalties received or accrued from a controlled foreign corporation in which the taxpayer is a United States shareholder shall be treated as income in a separate category to the extent they are allocable to income of the controlled foreign corporation in that category under the principles of §§1.861–8 through 1.861–14T.

(4) *Dividends*—(i) *Look-through rule.* Any dividend paid or accrued out of the earnings and profits of any controlled foreign corporation, shall be treated as income in a separate category in proportion to the ratio of the portion of earnings and profits attributable to income in such category to the total amount of earnings and profits of the controlled foreign corporation. For purposes of this paragraph, the term "dividend" includes any amount included in gross income under section 951(a)(1)(B) as a pro rata share of a controlled foreign corporation's increase in earnings invested in United States property.

(ii) *Special rule for dividends attributable to certain loans.* If a dividend is distributed to a taxpayer by a controlled foreign corporation, that controlled foreign corporation is the recipient of loan proceeds from a related look-through entity (within the meaning of §1.904–5(i)), and the purpose of such loan is to alter the characterization of the dividend for purposes of this section, then, to the extent of the principal amount of the loan, the dividend shall be characterized with respect to the earnings and profits of the related person lender rather than with respect to the earnings and profits of the dividend payor. A loan will not be considered made for the purpose of altering the characterization of a dividend if the loan would have been made or maintained on substantially the same terms irrespective of the dividend. The determination of whether a loan would have been made or maintained on substantially the same terms irrespective of the dividend will be made taking into account all the facts and circumstances of the relationship between the lender and the borrower. Thus, for example, a loan by a related party lender to a controlled foreign corporation that arises from the sale of inventory in the ordinary course of business will not be considered a loan made for the purpose of altering the character of any dividend paid by the borrower.

(iii) *Examples.* The following examples illustrate the application of this paragraph (c)(4).

Example 1. Controlled foreign corporation S is a wholly-owned subsidiary of P, a domestic corporation. In 1987, S has earnings and profits of $1,000, $600 of which is attributable to general limitation income and $400 of which is attributable to dividends received by S from its wholly-owned subsidiary, T. T is a controlled foreign corporation and is incorporated and operates in the same country as S. All of T's income is financial services income. Neither S's general limitation income nor the dividend from T is subpart F income. In December 1987, S pays a dividend to P of $200, all of which is attributable to earnings and profits earned in 1987. Six-tenths of the dividend ($120) is treated as general limitation income because six-tenths of S's earnings and profits are attributable to general limitation income. Four-tenths of the dividend ($80) is treated as financial services income because four-tenths of S's earnings and profits are attributable to dividends from T, and all of T's earnings are financial services income.

Example 2. A, a United States person, has been the sole shareholder in controlled foreign corporation X since its organization on January 1, 1963. Both X and A are calendar year taxpayers. X's earnings and profits for 1963 through the end of 1987 totaled $3,000. A sells his stock in X at the end of 1987 and realizes a gain of $4,000. Of the total $4,000 gain, $3,000 (A's share of the post-1962 earnings and profits) is includible in A's gross income as a dividend and is subject to the look-through rules including the transition rule of § 1.904–7(a) with respect to the portion of the distribution out of pre-87 earnings and profits. The remaining $1,000 of the gain is includible as gain from the sale or exchange of the X stock and is passive income to A.

(d) *Effect of exclusions from subpart F income*—(1) *De minimis amount of subpart F income.* If the sum of a controlled foreign corporation's gross foreign base company income (determined under section 954(a) without regard to section 954(b)(5)) and gross insurance income (determined under section 953(a)) for the taxable year is less than the lesser of 5 percent of gross income or $1,000,000, then all of that income (other than income that would be financial services income without regard to this paragraph (d)(1)) shall be treated as general limitation income. In addition, if the test in the preceding sentence is satisfied, for purposes of paragraphs (c)(2)(ii) (D) and (E) of this section (apportionment of interest expense to passive income using the asset method), any passive limitation assets shall be treated as general limitation assets. The determination in the first sentence shall be made prior to the application of the exception for certain income subject to a high rate of foreign tax described in paragraph (d)(2) of this section.

(2) *Exception for certain income subject to high foreign tax.* For purposes of the dividend look-through rule of paragraph (c)(4)(i) of this section, an item of net income that would otherwise be passive income (after application of the priority rules of § 1.904–4(l)) and that is received or accrued by a controlled foreign corporation shall be treated as general limitation income, and the earnings and profits attributable to such income shall be treated as general limitation earnings and profits, if the taxpayer establishes to the satisfaction of the Secretary that such income was subject to an effective rate of income tax imposed by a foreign country greater than 90 percent of the maximum rate of tax specified in section 11 (with reference to section 15, if applicable). The preceding sentence has no effect on amounts (other than dividends) paid or accrued by a controlled foreign

corporation to a United States shareholder of such controlled foreign corporation to the extent those amounts are allocable to passive income of the controlled foreign corporation.

(3) *Examples.* The following examples illustrate the application of this paragraph.

Example 1. Controlled foreign corporation S is a wholly-owned subsidiary of P, a domestic corporation. In 1987, S earns $100 of gross income, $4 of which is interest that is subpart F foreign personal holding company income and $96 of which is gross manufacturing income that is not subpart F income. S has no other earnings for 1987. S has no expenses and pays no foreign taxes. S pays P a $100 dividend. Under the de minimis rule of section 954(b)(3), none of S's income is treated as foreign base company income. All of S's income, therefore, is treated as general limitation income. The entire $100 dividend is general limitation income to P.

Example 2. (i) Controlled foreign corporation S is a wholly-owned subsidiary of P, a domestic corporation. In 1987, S earns $50 of shipping income of a type that is foreign base company shipping income. S also earns $50 of dividends from T, a foreign corporation in which S owns 45 percent of the voting stock, and receives $50 of dividends from U, a foreign corporation in which S owns 5% of the voting stock. Foreign persons hold the remaining voting stock of both T and U. S, T, and U are all incorporated in different foreign countries. The dividends S receives from T and U are of a type that normally would be subpart F foreign personal holding company income that is passive income. Under §1.904–4(l)(1)(iv), however, the dividends from T are dividends from a noncontrolled section 902 corporation rather than passive income. S has no expenses. The earnings and profits of S are equal to the net income after taxes of S. The dividends and the shipping income are taxed abroad by S's country of incorporation at an effective rate of 40 percent. P establishes to the satisfaction of the Secretary that the effective rate of tax on both the dividends and the shipping income exceeds 90 percent of the maximum United States tax rate. Thus, under section 954(b)(4), neither the shipping income nor the dividends are taxed currently to P under subpart F. S's earnings attributable to shipping income and dividends from a noncontrolled section 902 corporation retain their character as such. Under paragraph (d)(2) of this section, S's earnings attributable to the dividends from U are treated as earnings attributable to general limitation income. See §§1.905–3T and 1.905–4T, however, for rules concerning adjustments to the pools of earnings and profits and foreign taxes and redeterminations of United States tax liability when foreign taxes are refunded in a later year.

(ii) In 1988, S has no earnings and pays a $150 dividend (including gross-up) to P. The dividend is paid out of S's post-1986 pool of earnings and profits. One-third of the dividend ($50) is attributable to S's shipping earnings, one-third ($50) is attributable to the dividend from T, and one-third ($50) is attributable to the dividend from U. Pursuant to section 904(d)(3)(E) and paragraph (c)(4) of this section, one-third of the dividend is shipping income, one-third is a dividend from a noncontrolled section 902 corporation, T, and one-third is general limitation income to P.

(e) *Treatment of subpart F income in excess of 70 percent of gross income*—(1) *Rule.* If the sum of a controlled foreign corporation's gross foreign base company income (determined without regard to section 954(b)(5)) and gross insurance income for the taxable year exceeds 70 percent of the gross income, then all of the controlled foreign corporation's gross income shall be treated as foreign base company income (whichever is appropriate) and, thus, included in a United States shareholder's gross income. However, the inclusion in gross income of an amount that would not otherwise be subpart F income does not affect its character for purposes of determining whether the income is within a separate category. The determination of whether the controlled foreign corporation's gross foreign base company income and gross insurance income exceeds 70 percent of gross income is made before the exception for certain income subject to a high rate of foreign tax.

(2) *Example.* The following example illustrates the application of this paragraph.

Example. Controlled foreign corporation S is a wholly-owned subsidiary of P, a domestic corporation. S earns $100, $75 of which is foreign personal holding company income and $25 of which is non-subpart F services income. S is not a financial services entity. S's gross and net income are equal. Under the 70 percent full inclusion rule of section 954(b)(3)(B), the entire $100 is foreign base company income currently taxable to P under section 951. Because $75 of the $100 section 951 inclusion is attributable to S's passive income, $75 of the inclusion is passive income to P. The remaining $25 of the inclusion is treated as general limitation income to P because $25 is attributable to S's general limitation income.

(f) *Modification of look-through rules for certain income*—(1) *High withholding tax interest.* If a taxpayer receives or accrues interest from a controlled foreign corporation that is a financial services entity, and the interest would be described as high withholding tax interest if section 904(d)(3) and paragraph (c)(2) of this section (the look-through rules for interest) did not apply, then the interest shall be treated as high withholding tax interest to the extent that the interest is allocable under section 904(d)(3) and paragraph (c)(2)(i) of this section to financial services income of the controlled foreign corporation. See section 904(d)(3)(H). The amount treated as high-withholding tax interest under this paragraph (f)(1) shall not exceed the interest, or equivalent income, of the payor that would be taken into account in determining the financial services income of the payor if the look-through rules applied.

(2) *Dividends from a noncontrolled section 902 corporation.* (i) *Rule.* If a United States shareholder that is a corporation receives or accrues income from a controlled foreign corporation that is attributable to dividends from a noncontrolled section 902 corporation, such income shall be subject to a separate limitation for such dividends except as provided in § 1.904–4(g)(2)(ii) (relating to dividends from a foreign corporation with respect to which the United States shareholder does not meet the stock ownership requirements of section 902).

(ii) *Example.* The following example illustrates the provisions of this paragraph (f)(2).

Example. P, a domestic corporation, owns 40 percent of S, a controlled foreign corporation. U, an unrelated domestic corporation, owns the remaining 60 percent of S. S owns 10 percent of T, a noncontrolled section 902 corporation. In 1990, T pays S a dividend, which S includes in its gross income as a dividend from a noncontrolled section 902 corporation. S has no other income during 1990. P and U must include S's dividend income from T in their gross income under subpart F. Pursuant to § 1.904–4(g)(2)(ii)(C), the subpart F inclusion to U is characterized as a dividend from a noncontrolled section 902 corporation because U meets the 5 percent ownership requirement of section 902(b) (60%×10%=6%). The subpart F inclusion to P is characterized as passive income because P does not meet the 5 percent ownership requirement of section 902(b) (40%×10%=4%).

(3) *Distributions from a FSC.* Income received or accrued by a taxpayer that, under the rules of paragraph (c)(4) of this section (look-through rules for dividends), would be treated as foreign trade income or as passive income that is interest and carrying charges (as defined in section 927(d)(1)), and that is also a distribution from a FSC (or a former FSC), shall be treated as a distribution from a FSC (or a former FSC).

(4) *Example.* The following example illustrates the operation of paragraph (f)(1) of this section.

Example. Controlled foreign corporation S is a wholly-owned subsidiary of P, a domestic corporation. S is a financial services entity. In 1988, S earns $80 of interest that meets the definition of financial services income and $20 of high withholding tax interest. S makes a $100 interest payment to P. The interest payment to P is subject to a withholding tax of 15 percent. Twenty dollars ($20) of the interest payment to P is considered to be high withholding tax interest because, under section 904(d)(3), it is allocable to the high withholding tax interest earned by S. The remaining eighty dollars ($80) of the interest payment is also treated as high withholding tax interest to P because, under paragraph (f)(1) of this section, interest that is subject to a high withholding tax but would not be considered to be high withholding tax interest under the look-through rules of paragraph (c)(2) of this section, shall be treated as high withholding tax interest to the extent that the interest would have been treated as financial services interest income under the look-through rules of paragraph (c)(2)(i) of this section.

(g) *Application of look-through rules to certain domestic corporations.* The principles of section 904(d)(3) and this section shall apply to any foreign source interest, rents and royalties paid by a United States corporation to a related corporation. For this purpose, a United States corporation and another corporation are considered to be related if one owns, directly or indirectly, stock possessing 50 percent or more of the total voting power of all classes of stock of the other corporation or 50 percent or more of the total value of the other corporation. In addition, a United States corporation and another corporation shall be considered to be related if the same United States shareholders own, directly or indirectly, stock possessing 50 percent or more of the total voting power of all classes of stock or 50 percent of the total value of each corporation. For purposes of this paragraph, the constructive stock ownership rules of section 318 and the regulations under that section apply.

(h) *Application of look-through rules to partnerships and other pass-through entities*—(1) *General rule.* Except as provided in paragraph (h)(2) of this section, a partner's distributive share of partnership income shall be characterized as income in a separate category to the extent that the distributive share is a share of income earned or accrued by the partnership in such category. Payments to a partner described in section 707 (*e.g.,* payments to a partner not acting in capacity as a partner) shall be characterized as income in a separate category to the extent that the payment is attributable under the principles of §1.861–8 and this section to income earned or accrued by the partnership in such category, if the payments are interest, rents, or royalties that would be characterized under the look-through rules of this section if the partnership were a foreign corporation, and the partner who receives the payment owns 10 percent or more of the value of the partnership. A payment by a partnership to a member of the controlled group (as defined in paragraph (a)(3) of this section) of the partner shall be characterized under the look-through rules of this section if the payment would be a section 707 payment entitled to look-through treatment if it were made to the partner.

(2) *Exception for certain partnership interests*—(i) *Rule.* Except as otherwise provided, if any limited partner or corporate general partner owns less than 10 percent of the value in a partnership, the partner's distributive share of partnership income from the partnership shall be passive income to the partner, and the partner's distributive share of partnership deductions from the partnership shall be allocated and apportioned under the principles of §1.861–8 only to the partner's passive income from that partnership.

(ii) *Exceptions.* To the extent a partner's distributive share of income from a partnership is a share of high withholding tax interest received or accrued by the partnership, that partner's distributive share of partnership income will be high withholding tax interest regardless of the partner's level of ownership in the partnership. If a partnership interest described in paragraph (h)(2)(i) of this section is held in the ordinary course of a partner's active trade or business, the rules of paragraph (h)(1) of this section shall apply for purposes of characterizing the partner's distributive share of the partnership income. A partnership interest will be considered to be held in the ordinary course of a partner's active trade or business if the partner (or a member of the partner's affiliated group of corporations (within the meaning of section 1504(a) and without regard to section 1504(b)(3))) engages (other than through a less than 10 percent interest in a partnership) in the same or related trade or business as the partnership.

(3) *Income from the sale of a partnership interest.* To the extent a partner recognizes gain on the sale of a partnership interest, that income shall be treated as passive income to the partner, unless the income is considered to be high-taxed under section 904(d)(2)(A)(iii)(III) and §1.904–4(c).

(4) *Value of a partnership interest.* For purposes of paragraphs (i), (h)(1), and (h)(2) of this section, a partner will be considered as owning 10 percent of the value of a partnership for a particular year if the partner has 10 percent of the capital and profits interest of the partnership. Similarly, a partnership (first partnership) is considered as owning 50 percent of the value of another partnership (second partnership) if the first partnership owns 50 percent of the capital and profits interests of another partnership. For this purpose, value will be determined at the end of the partnership's taxable year.

(i) *Application of look-through rules to related entities*—(1) *In General.* Except as provided in paragraphs (i) (2) and (3) of this section, the principles of this section shall apply to distributions and payments that are subject to the look-through rules of section 904(d)(3) and this section from a controlled foreign corporation or other entity otherwise entitled to look-through treatment (a ‘‘look-through entity’’) under this section to a related 1ookthrough entity. Two look-through entities shall be considered to be related to each other if one owns, directly or indirectly, stock possessing more than 50 percent of the total voting power of all classes of voting stock of the other entity or more than 50 percent of the total value of such entity. In addition, two look-through entities are related if the same United States shareholders own, directly or indirectly, stock possessing 50 percent or more of the total voting power of all voting classes of stock (in the case of a corporation) or 50 percent or more of the total value of each look-through entity. In the case of a corporation, value shall be determined by taking into account all classes of stock. In the case of a partnership, value shall be determined under the rules in paragraph (h)(4) of this section. For purposes of this section, indirect ownership shall be determined under section 31B and the regulations thereunder.

(2) *Exception for distributive shares of partnership income.* In the case of tiered partnership arrangements, a distributive share of partnership income will be characterized under the look-through rules of section 904(d)(3) and this section if the partner meets the requirements of paragraph (h)(1) of this section with respect to the partnership (first partnership), whether or not the income is received through another partnership or partnerships (second partnership) and whether or not the first partnership and the second partnership are considered to be related under the rules of paragraph (i)(1) of this section.

(3) *Special rule for dividends.* [Reserved]

(4) *Examples.* The following examples illustrate the provisions of this paragraph (i):

Example 1. P, a domestic corporation, owns all of the stock of S, a controlled foreign corporation. S owns 40 percent of the stock of T, a controlled foreign corporation. The remaining 60 percent of the stock of T is owned by V, a domestic corporation. The percentages of value of T owned by S and V correspond to their percentages of stock ownership. T owns all of the stock of U, a controlled foreign corporation. U earns exclusively general limitation non-subpart F income. In 1992, U makes an interest payment of $100 to T, which is subpart F income to P and V. V and T are related look-through entities, but P and T are not related look-through entities. V, therefore, is entitled to look-through treatment on the interest payment to T and the payment will be treated as general limitation income. P is not entitled to look-through treatment (because P, through 5, owns only 40 percent of T) and the interest payment, therefore, is passive income to P.

Example 2. [Reserved]

(j) *Look-through rules applied to passive foreign investment company inclusions.* If a passive foreign investment company is a controlled foreign corporation and the taxpayer is a United States shareholder in that passive foreign investment company, any amount included in gross income under section 1293 shall be treated as income in a separate category to the extent the amount so included is attributable to income received or accrued by that controlled foreign corporation that is described as income in the separate category. For purposes of this paragraph (j), the priority rules of § 1.904–4(l) shall apply prior to the application of the rules of this paragraph.

(k) *Ordering rules*—(1) *In general.* Income received or accrued by a related person to which the look-through rules apply is characterized before amounts included from, or paid or distributed by that person and received or accrued by a related person. For purposes of determining the character of income received or accrued by a person from a related person if the payor or another related person also receives or accrues income from the recipient and the look-through rules apply to the income in all cases, the rules of paragraph (k)(2) of this section apply.

(2) *Specific rules.* For purposes of characterizing income under this paragraph, the following types of income are characterized in the order stated:

(i) Rents and royalties;

(ii) Interest;

(iii) Subpart F inclusions and distributive shares of partnership income;

(iv) Dividend distributions.

If an entity is both a recipient and a payor of income described in any one of the categories described in (k)(2) (i) through (iv) of this section, the income received will be characterized before the income that is paid. In addition, the amount of interest paid or accrued, directly or indirectly, by a person to a related person shall be offset against and eliminate any interest received or accrued, directly or indirectly, by a person from that related person before application of the ordering rules of this paragraph. In a case in which a person pays or accrues interest to a related person, and also receives or accrues interest indirectly from the related person, the smallest interest payment is eliminated and the amount of all other interest payments are reduced by the amount of the smallest interest payment.

(l) *Examples.* The following examples illustrate the application of paragraphs (g), (h), (i), and (k) of this section.

Example 1. S and T, controlled foreign corporations, are wholly-owned subsidiaries of P, a domestic corporation. S and T are incorporated in two different foreign countries and T is a financial services entity. In 1987, S earns $100 of income that is general limitation foreign base company sales income. After expenses, including a $50 interest payment to T, S's income is subject to foreign tax at an effective rate of 40 percent. P elects to exclude S's $50 of net income from subpart F under section 954(b)(4). T earns $350 of income that consists of $300 of subpart F financial services income and $50 of interest received from S. The $50 of interest is foreign personal holding company income in T's hands because section 954(c)(3)(A)(i) (same country exception for interest payments) does not apply. The $50 of interest is also general limitation income to T because S and T are related look-through entities within the meaning of paragraph (i)(1) of this section and, therefore the look-through rules of paragraph (c)(2)(i) of this section apply to characterize the interest payment. Thus, with respect to T, P includes in its gross income $50 of general limitation foreign personal holding company income and $300 of financial services income.

Example 2. The facts are the same as in *Example (1)* except that instead of earning $100 of general limitation foreign base company sales income, S earns $100 of foreign personal holding company income that is passive income. Although the interest payment to T would otherwise be passive income, T is a financial services entity and, under §1.904–4(e)(1), the income is treated as financial services income in T's hands. Thus, P's entire $350 section 951 inclusion consists of financial services income.

Example 3. P, a domestic corporation, wholly-owns S, a domestic corporation that is a 80/20 corporation. In 1987, S's earnings consist of $100 of foreign source shipping income and $100 of foreign source high withholding tax interest. S makes a $100 foreign source interest payment to P. The interest payment to P is subject to the look-through rules of paragraph (c)(2)(i) of this section, and is characterized as shipping income and high withholding tax interest to the extent that it is allocable to such income in S's hands.

Example 4. PS is a domestic partnership that is the sole shareholder of controlled foreign corporation S. PS has two general partners, A and B. A and B each have a greater than 10 percent interest in PS. PS also has two limited partners, C and D. C has a 50 percent interest in the partnership and D has a 9 percent interest. A, B, C and D are all United States persons. In 1987, S has $100 of general limitation non-subpart F income on which it pays no foreign tax. S pays a $100 dividend to PS. The dividend is the only income of PS. Under the look-through rule of paragraph (c)(4) of this section, the dividend to PS is general limitation income. Under paragraph (h)(1) of this section, A's, B's, and C's distributive shares of PS's income are general limitation income. Under paragraph (h)(2) of this section, because D is a limited partner with a less than 10 percent interest in PS, D's distributive share of PS's income is passive income.

Example 5. P has a 25 percent interest in partnership PS that he sells to X for $110. P's basis in his partnership interest is $35. P recognizes $75 of gain on the sale of its partnership interest and is subject to no foreign tax. Under paragraph (h)(3) of this section, the gain is treated as passive income.

Example 6. P, a domestic corporation, owns 100 percent of the stock of S, a controlled foreign corporation, and S owns 100 percent of the stock of T, a controlled foreign corporation. S has $100 of passive foreign personal holding company income from unrelated persons and $100 of general limitation income. S also has $50 of interest income from T. S pays T $100 of interest. Under paragraph (k)(2) of this section, the $100 interest payment from S to T is reduced for limitation purposes to the extent of the $50 interest payment from T to S before application of the rules in paragraph (c)(2)(ii) of this section. Therefore, the interest payment from T to S is disregarded. S is treated as if it paid $50 of interest to T, all of which is allocable to S's passive foreign personal holding company income. Therefore the $50 interest payment from S to T is passive income.

Example 7. P, a domestic corporation, owns 100 percent of the stock of S, a controlled foreign corporation. S owns 100 percent of the stock of T, a controlled foreign corporation and 100 percent of the stock of U, a controlled foreign corporation. In 1988, T pays S $5 of interest, S pays U $10 of interest and U pays T $20 of interest. Under paragraph (k)(2) of this section, the interest payments from S to U must be offset by the amount of interest that S is considered as receiving indirectly from U and the interest payment from U to T is offset by the amount of the interest payment that U is considered as receiving indirectly from T. The $l0 payment by S to U is reduced by $5, the amount of the interest payment from T to S that is treated as being paid indirectly by U to S. Similarly, the $20 interest payment from U to T is reduced by $5, the amount of the interest payment from S to U that is treated as being paid indirectly by T to U. Therefore, under paragraph (k)(2) of this section, T is treated as having made no interest payment to S, S is treated as having paid $5 of interest to U, and U is treated as having paid $15 to T.

Example 8. (i) P, a domestic corporation, owns 100 percent of the stock of S, a controlled foreign corporation, and S owns 100 percent of the stock of T, a controlled foreign corporation. In 1987, S earns $100 of passive foreign personal holding company income and $100 of general limitation non-subpart F sales income from unrelated persons and $100 of general limitation non-subpart F interest income from a related person, W. S pays $150 of interest to T. T earns $200 of general limitation sales income from unrelated persons and the $150 interest payment from S. T pays S $100 of interest.

(ii) Under paragraph (k)(2) of this section, the $100 interest payment from T to S reduces the $150 interest payment from S to T. S is treated as though it paid $50 of interest to T. T is treated as though it made no interest payment to S.

(iii) Under paragraph (k)(2)(ii) of this section, the remaining $50 interest payment from S to T is then characterized. The interest payment is first allocable under the rules of paragraph (c)(2)(ii)(C) of this section to S's passive income. Therefore, the $50 interest payment to T is passive income. The interest income is foreign personal holding company income in T's hands. T, therefore, has $50 of subpart F passive income and $200 of non-subpart F general limitation income.

(iv) Under paragraph (k)(2)(iii) of this section, subpart F inclusions are characterized next. P has a subpart F inclusion with respect to S of $50 that is attributable to passive income of S and is treated as passive income to P. P has a subpart F inclusion with respect to T of $50 that is attributable to passive income of T and is treated as passive income to P.

Example 9. (i) P, a domestic corporation, owns 100 percent of the stock of S, a controlled foreign corporation, and S owns 100 percent of the stock of T, a controlled foreign corporation. P also owns 100 percent of the stock of U, a controlled foreign corporation. In 1987, S earns $100 of passive foreign personal holding company income and $200 of non-subpart F general limitation income from unrelated persons. S also receives $150 of dividend income from T. S pays $100 of interest to T and $100 of interest to U. U earns $300 of non-subpart F general limitation income and the $100 of interest received from S. U pays a $100 royalty to T. T earns the $100 interest payment received from S and the $100 royalty received from U.

(ii) Under paragraph (k)(2)(i) of this section, the royalty paid by U to T is characterized first. Assume that the royalty is directly allocable to U's general limitation income. Also assume that the royalty is not subpart F income to T. With respect to T, the royalty is general limitation income.

(iii) Under paragraph (k)(2)(ii) of this section, the interest payments from S to T and U are characterized next. This characterization is done without regard to any dividend income received by S because, under paragraph (k)(2) of this section, dividends are characterized after interest payments from a related person. The interest payments are first allocable to S's passive income under paragraph (c)(2)(ii)(C) of this section. Therefore, $50 of the interest payment to T is passive and $50 of the interest payment to U is passive. The remaining $50 paid to T is general limitation income and the remaining $50 paid to U is general limitation income. All of the interest payments to T and U are subpart F foreign personal holding company income to both recipients.

(iv) Under paragraph (k)(2)(iii) of this section, P has a $100 subpart F inclusion with respect to T that is characterized next. Fifty dollars ($50) of the subpart F inclusion is passive income to P because it is attributable to the passive income portion of the interest income received by T from S, and $50 of the inclusion is treated as general limitation income to P because it is attributable to the general limitation portion of the interest income received by T from S. Under paragraph (k)(2)(iii) of this section, P also has a $100 subpart F inclusion with respect to U. Fifty dollars ($50) of the subpart F inclusion is passive income to P because it is attributable to the passive portion of the interest income received by U from S, and $50 of the inclusion is general limitation income to P because it is attributable to the general limitation portion of the interest income received by U from S.

(v) Under paragraph (k)(2)(iv) of this section, the $150 distribution from T to S is characterized next. One-hundred dollars ($100) of the distribution is out of earnings and profits attributable to previously taxed income. Therefore, only $50 is a dividend that is subject to the look-through rules of paragraph (d) of this section. The $50 dividend is attributable to T's general limitation income and is general limitation income to S in its entirety.

Example 10. (i) P, a domestic corporation, owns 100 percent of the stock of S, a controlled foreign corporation, and S owns 100 percent of the stock of T, a controlled foreign corporation. P also owns 100 percent of the stock of U, a controlled foreign corporation. S, T and U are all incorporated in the same foreign country. In 1987, S earns $100 of passive foreign personal holding income and $200 of general limitation non-subpart F income from unrelated persons. S pays $100 of interest to T and $100 of interest to U. U earns $300 of general limitation non-subpart F income and the $100 of interest received from S. T's only income is the $100 interest payment received from S.

(ii) Under paragraph (k)(2)(ii) of this section, the interest payments from S to T and U are characterized first. The interest payments are first allocated under the rule of paragraph (c)(2)(ii)(C) of this section to S's passive income. Therefore, under that provision and paragraph (c)(2)(i) of this section, $50 of the interest payment to T is passive income to T and $50 of the interest payment to U is passive income to U. The remaining $50 paid to T is general limitation income and the remaining $50 paid to U is general limitation income.

(iii) Under paragraph (k)(2)(iii) of this section, any subpart F inclusion of P is determined and characterized next. Under paragraph (c)(1)(i) of this section, paragraphs (c)(2)(i) and (c)(2)(ii) apply not only for purposes of determining the separate category of income of S to which the interest payments from S to T and U are allocable but also for purposes of determining the subpart F income of T and U. Although the interest payments from S to T and U are ''same country'' interest payments that would otherwise be excludible from T's and U's subpart F income under section 954(c)(3)(A)(i), section 954(c)(3)(B) provides that the exception for same country payments between related persons shall not apply to the extent such payments have reduced the subpart F income of the payor. In this case, $50 of the $100 interest payment from S to T reduced S's subpart F income and $50 of the $100 interest payment from S to U reduced the remaining $50 of S's subpart F income. Therefore, T has $50 of subpart F income that is passive income and U has $50 of subpart F income that is passive income. P includes $100 of subpart F income in gross income that is passive income to P.

(iv) The remaining $50 of interest paid by S to T and the remaining $50 of interest paid by S to U is not subpart F income to T or U because it did not reduce S's subpart F income and is therefore eligible for the same country exception.

Example 11. P, a domestic corporation, owns 100 percent of the stock of S, a controlled foreign corporation, and S owns 100 percent of the stock of T, a controlled foreign corporation. P also owns 100 percent of the stock of U, a controlled foreign corporation. In 1991, T earns $100 of general limitation income that is not subpart F income and distributes the entire amount to S as a dividend. S earns $100 of passive foreign personal holding company income and the $100 dividend from T. S pays $100 of interest to U. U earns $200 of general limitation income that is foreign base company income and $100 of interest income from S. This transaction does not involve circular payments and, therefore, the ordering rules of paragraph (k)(2) of this section do not apply. Instead, pursuant to paragraph (k)(1) of this section, income received is characterized first. T's earnings and, thus, the dividend from T to S are characterized first. S includes the $100 dividend from T in gross income as general limitation income because all of T's earnings are general limitation income. S thus has $100 of passive foreign personal holding company income and $100 of general limitation income. The interest payment to U is then characterized as $100 passive income under paragraph (c)(2)(ii)(C) of this section (allocation of related person interest to passive foreign personal holding company income). For 1991, U thus has $200 of general limitation income that is subpart F income, and $100 of passive foreign personal holding company income. For 1991, P includes in its gross income $200 of general limitation subpart F income from U, $100 of passive subpart F income from U (relating to the interest payment from S to U), and $100 of general limitation subpart F income from S (relating to the dividend from T to S).

(m) *Application of section 904(g)*—(1) *In general.* For purposes of determining the portion of an interest payment that is allocable to income earned or accrued by a controlled foreign corporation from sources within the United States under section 904(g)(3), the rules in paragraph (m)(2) of this section apply. For purposes of determining the portion of a dividend paid or accrued by a controlled foreign corporation that is treated as from sources within the United States under section 904(g)(4), the rules in paragraph (m)(4) of this section apply. For purposes of determining the portion of an amount included in gross income under section 951(a) that is attributable to income of the controlled foreign corporation from sources within the United States under section 904(g)(2), the rules in paragraph (m)(5) of this section apply. In order to determine whether section 904(g) applies, section 904(g)(5) (exception if controlled foreign corporation has a de minimis amount of United States source income) shall be applied to the total amount of earnings and profits of a controlled foreign corporation for a taxable year without regard to the characterization of those earnings under section 904(d).

(2) *Treatment of interest payments.* If interest is received or accrued by a United States shareholder or a person related to a United States shareholder (within the meaning of paragraph (c)(2)(ii) of this section) from a controlled foreign corporation, the interest shall be considered to be allocable to income of the controlled foreign corporation from sources within the United States for purposes of section 904(d) to the extent that the interest is allocable under paragraph (c)(2)(ii)(C) of this section to passive income that is from sources within the United States. If related person interest is less than or equal to passive income, the related person interest will be allocable to United States source passive income based on the ratio of United States source passive income to total passive income. To the extent that related person interest exceeds passive income, and, therefore, is allocated under paragraph (c)(2)(ii)(D) of this section to income in a separate category other than passive, the following formulas apply in determining the portion of the interest payment that is from sources within the United States. If the taxpayer uses the gross income method to allocate interest, the portion of the interest payment from sources within the United States is determined as follows:

$$\begin{array}{c}\text{The amount of the interest payment}\\ \text{allocated to the separate category under}\\ \text{paragraph (c)(2)(ii)(D) of this section}\end{array} \times \frac{\begin{array}{c}\text{Gross income from United States sources}\\ \text{in that category}\end{array}}{\begin{array}{c}\text{Gross income from all sources}\\ \text{in that category}\end{array}}$$

If the taxpayer uses the asset method to allocate interest, then the portion of the interest payment from sources within the United States is determined as follows:

$$\begin{array}{c}\text{The amount of the interest payment}\\ \text{allocated to the separate category under}\\ \text{paragraph (c)(2)(ii)(D) of this section}\end{array} \times \frac{\text{Value of domestic assets in that category}}{\text{Value of total assets in that category}}$$

For purposes of this paragraph, the value of assets in a separate category is the value of assets as determined under the principles of § 1.861–9T(g). See § 1.861–10T(d)(2) for purposes of determining the value of assets and gross income in a separate category as reduced for indebtedness the interest on which is directly allocated.

(3) *Examples.* The following examples illustrate the application of this paragraph.

Example 1. Controlled foreign corporation S is a wholly-owned subsidiary of P, a domestic corporation. In 1988, S pays P $300 of interest. S has no other expenses. In 1988, S has $3000 of assets that generate $650 of foreign source general limitation sales income and a $1000 loan to an unrelated foreign person that generates $20 of foreign source passive interest income. S also has a $4000 loan to an unrelated United States person that generates $70 of United States source passive income and $4000 of inventory that generates $100 of United States source general limitation income. S uses the asset method to allocate interest expense. The following chart summarizes S's assets and income:

	Foreign	U.S.	Totals
Assets:			
Passive	1000	4000	5000
General	3000	4000	7000
Total	4000	8000	12000
Income:			
Passive	20	70	90
General	650	100	750
Total	670	170	840

Under paragraph (c)(2)(ii)(C) of this section, $90 of the related person interest payment is allocable to S's passive income. Under paragraph (m)(2) of this section, $70 is from sources within the United States and $20 is from foreign sources. Under paragraph (c)(2)(ii)(D) of this section, the remaining $210 of the related person interest payment is allocated to general limitation income. Under paragraph (m)(2) of this section, $120 of the remaining $210 is treated as income from sources within the United States ($120=$210×$4000/$7000) and $90 is treated as income from foreign sources. ($90=$210×$3000/$7000).

Example 2. The facts are the same as in *Example* 1 except that S uses the gross income method to allocate interest expense. The first $90 of related person interest expense is allocated to passive income in the same manner as in Example 1. Under paragraph (c)(2)(ii)(D) of this section, the remaining $210 of the related person interest expense is allocated to general limitation income. Under paragraph (m)(2) of this section, $28 of the remaining $210 is treated as income from United States sources ($28=$210×$100/$750) and $182 is treated as income from foreign sources ($182=$210×$650/$750).

Example 3. Controlled foreign corporation S is a wholly-owned subsidiary of P, a domestic corporation. In 1988, S pays $300 of interest to P. S has no other expenses. S uses the asset method to allocate interest expense. In 1988, S has $4000 of assets that generate $650 of foreign source general limitation manufacturing income and a $1000 loan to an unrelated foreign person that generates $100 of foreign source passive interest income. S has $500 of shipping assets that generate $200 of foreign source shipping income and $500 of shipping assets that generate $200 of United States source shipping income. S also has a $1000 loan to an unrelated United States person that generates $100 of United States source passive income. S's passive income is not also described as shipping income. The following chart summarizes S's assets and income:

	Foreign	U.S.	Totals
Assets:			
Passive	1000	1000	2000
Shipping	500	500	1000
General	4000	0	4000
Total	5500	1500	7000
Income:			
Passive	100	100	200
Shipping	200	200	400
General	650	0	650
Total	950	300	1250

Under paragraph (c)(2)(ii)(C) of this section, $200 of the related person interest payment is allocable to S's passive income. Under paragraph (m)(2) of this section, $100 of this amount is from foreign sources and $100 is from sources within the United States.

Under paragraph (c)(2)(ii)(D) of this section, $80 of the remaining $100 of the related person interest payment is allocated to general limitation income ($80=$100×$4000/$5000) and $20 is allocated to shipping income ($20=$100×$1000/$5000).

Under paragraph (m)(2) of this section, none of $80 of the interest payment allocated to general limitation income is treated as income from United States sources ($0=$80×$0/$4000). Therefore, the entire $80 is treated as income from foreign sources.

Under paragraph (m)(2) of this section, $10 of the $20 of the interest payment allocated to the shipping income is treated as income from United States sources ($10=$20×$500/$1000) and $10 of the $20 is treated as income from foreign sources ($10=$20×$500/$1000).

Example 4. The facts are the same as in *Example* 3 except that S uses the gross income method to allocate interest expense. The interest allocated to passive income under paragraph (c)(2)(ii)(C) of this section is the same, $200, $100 from United States sources and $100 from foreign sources.

Under paragraph (c)(2)(ii)(D) of this section, the remaining $100 of related person interest is allocated between the shipping and general limitation categories based on the gross income in those categories. Therefore, $38 of the remaining $100 interest payment is allocated to shipping income ($38=$100×$400/($1250 − $200)) and $62 is treated as allocated to general limitation income ($62=$100×$650/($1250–$200)).

Under paragraph (m)(2) of this section, $19 of the $38 allocable to shipping income is treated as income from United States sources ($19=$38×$200/$400) and $19 is treated as income from foreign sources ($19=$38×$200/$400).

Under paragraph (m)(2) of this section, all of the $62 allocated to general limitation income is treated as income from foreign sources ($62=$62×$650/$650).

(4) *Treatment of dividend payments*—(i) *Rule.* Any dividend or distribution treated as a dividend under this section that is received or accrued by a United States shareholder from a controlled foreign corporation shall be treated as income in a separate category derived from sources within the United States in proportion to the ratio of the portion of the earnings and profits of the controlled foreign corporation in the corresponding separate category from United States sources to the total amount of earnings and profits of the controlled foreign corporation in that separate category.

(ii) *Determination of earnings and profits from United States sources.* In order to determine the portions of earnings and profits from United States sources and from foreign sources within each separate category, related person interest shall be allocated to the United States source portion of income in a separate category by applying the rules of paragraph (m)(2) of this section. Other expenses shall be allocated by applying the rules of paragraph (c)(2)(ii) of this section separately to the United States source income and the foreign source income in each category. For example, unrelated person interest expense that is allocated among categories of income based upon the relative amounts of assets in a category must be allocated between United States and foreign source income within each category by applying the rules of paragraph (c)(2)(ii)(E) of this section separately to United States source and foreign source assets in the separate category.

(iii) *Example.* The following example illustrates the application of this paragraph.

Example. Controlled foreign corporation, S, is a wholly owned subsidiary of P, a domestic corporation. S is a financial services entity. In 1987, S has $100 of non-subpart F general limitation earnings and profits and $100 of non-subpart F financial services income. None of the general limitation earnings and profits are from sources within the United States, and $50 of the financial services earnings and profits are from United States sources. In 1988, S earns $300 of non-subpart F general limitation earnings and profits and $500 of non-subpart F financial services earnings and profits. One hundred dollars ($100) of the general limitation earnings and profits are from sources within the United States. None of the financial services earnings and profits are from United States sources. In 1988, S pays P a $500 dividend. Under paragraph (c)(4) of this section, $200 of the dividend is attributable to general limitation earnings and profits ($200=$500×$400/$1000). Under this paragraph (m)(3), the portion of the dividend that is attributable to general limitation earnings and profits from sources within the United States is $50 ($200×$100/$400). Under paragraph (c)(4) of this section, $300 of the dividend is attributable to financial services earnings and profits ($300=$500×$600/$1000). Under this paragraph (m)(3), the portion of the dividend that is attributable to financial services earnings and profits from sources within the United States is $25 ($300×$50/$600).

(5) *Treatment of subpart F inclusions*—(i) *Rule.* Any amount included in the gross income of a United States shareholder of a controlled foreign corporation under section 951(a) shall be treated as income subject to a separate limitation that is derived from sources within the United States to the extent such amount is attributable to income of the controlled foreign corporation in the corresponding category of income from sources within the United States. In order to determine a controlled foreign corporation's taxable income and earnings and profits from sources within the United States in each separate category, the principles of paragraph (m)(4)(ii) of this section shall apply.

(ii) *Example.* The following example illustrates the application of this paragraph (m)(5).

Example. Controlled foreign corporation S is a wholly-owned subsidiary of domestic corporation, P. In 1987, S earns $100 of subpart F foreign personal holding company income that is passive income. Of this amount, $40 is derived from sources within the United States. S also earns $50 of subpart F general limitation income. None of this income is from sources within the United States. Assume that S pays no foreign taxes and has no expenses. P is required to include $150 in gross income under section 951(a). Of this amount, $60 will be foreign source passive income to P and $40 will be United States source passive income to P. Fifty dollars ($50) will be foreign source general limitation income to P.

(6) *Treatment of section 78 amount.* For purposes of treating taxes deemed paid by a taxpayer under section 902(a) and section 960(a)(1) as a dividend under section 78, taxes that are paid or accrued with respect to United States source income in a separate category shall be treated as United States source income in that separate category.

(7) *Coordination with treaties*—(i) *Rule.* If any amount of income derived from a United States-owned foreign corporation, as defined in section 904(g)(6), would be treated as derived from sources within the United States under section 904(g) and this paragraph (m) and, pursuant to an income tax convention with the United States, the taxpayer chooses to avail itself of benefits

of the convention that treat that amount as arising from sources outside the United States under a rule explicitly treating the income as foreign source, then that amount will be treated as foreign source income. However, sections 904 (a), (b), (c), (d) and (f), 902, 907, and 960 shall be applied separately to amounts described in the preceding sentence with respect to each treaty under which the taxpayer has claimed benefits and, within each treaty, to each separate category of income.

(ii) *Example.* The following example illustrates the application of this paragraph (m)(7).

Example. Controlled foreign corporation S is incorporated in Country A and is a wholly-owned subsidiary of P, a domestic corporation. In 1990, S earns $80 of foreign base company sales income in Country A which is general limitation income and $40 of U.S. source interest income. S incurs $20 of expenses attributable to its sales business. S pays P $40 of interest that is allocated to U.S. source passive income under paragraphs (c)(2)(ii)(C) and (m)(2) of this section. Assume that earnings and profits equal net income. All of S's net income of $60 is includible in P's gross income under subpart F (section 951(a)(1)). For 1990, P also has $100 of passive income derived from investments in Country B. Pursuant to section 904(g)(3) and paragraph (m)(2) of this section, the $40 interest payment from S is United States source income to P because it is attributable to United States source interest income of S. The United States-Country A income tax treaty, however, treats all interest payments by residents of Country A as Country A sourced and P elects to apply the treaty. Pursuant to section 904(g)(10) and this paragraph (m)(7), the entire interest payment will be treated as foreign source income to P. P thus has $60 of foreign source general limitation income, $40 of foreign source passive income from S, and $100 of other foreign source passive income. In determining P's foreign tax credit limitation on passive income, the passive income from Country A shall be treated separately from any other passive income.

(n) *Order of application of sections 904 (d) and (g).* In order to apply the rules of this section, section 904(d)(1) shall first be applied to the controlled foreign corporation to determine the amount of income and earnings and profits derived by the controlled foreign corporation in each separate category. The income and earnings and profits in each separate category that is from United States sources shall then be determined. Sections 904(d)(3), 904(g), and this section shall then be applied for purposes of characterizing and sourcing income received, accrued, or included by a United States shareholder in the controlled foreign corporation that is attributable or allocable to income or earnings and profits of the controlled foreign corporation.

(o) *Effective date.* Section 904(d)(3) and this section apply to distributions and section 951 inclusions of earnings and profits of a controlled foreign corporation (or other entity to which this section applies) derived during the first taxable year of the controlled foreign corporation (or other entity) beginning after December 31, 1986, and thereafter, and to payments made by a controlled foreign corporation (or other entity) during such taxable years, without regard to whether the corresponding taxable year of the recipient of the distribution or payment or of one or more of the United States shareholders of the controlled foreign corporation begins after December 31, 1986. Paragraph (k)(1) of this section does not apply on or after March 23, 1998. For rules applicable on or after March 23, 1998, see §1.904–5T(k)(1).

[T.D. 8214, 53 FR 27020, July 18, 1988, as amended by T.D. 8412, 57 FR 20648, May 14, 1992; T.D.8767, 63 FR 14615, Mar. 26, 1998]

§1.904–5T Look-through rules as applied to controlled foreign corporations and other entities (temporary).

(a) through (j) [Reserved]. For further guidance, see §1.904–5(a) through (j).

(k) *Ordering rules*—(1) *In general.* Income received or accrued by a related person to which the look-through rules apply is characterized before amounts included from, or paid or distributed by, that person and received or accrued by a related person. For purposes of determining the character of income received or accrued by a person from a related person if the payor or another related person also receives or accrues income from the recipient and the look-through rules apply to the income in all cases, the rules of paragraph (k)(2) of this section apply. Notwithstanding any other provision of this section, the principles of § 1.954–1T(c)(1)(i) will apply to any expense subject to that subparagraph.

(k)(2) through (n) [Reserved]. For further guidance, see § 1.904–5(k)(2) through (n).

(o) *Effective date.* Section 1.904–5T(k)(1) applies on or after March 23, 1998. For rules prior to March 23, 1998, see § 1.904–5(k)(1).

[T.D. 8767, 63 FR 14615, Mar. 26, 1998]

§ 1.904–6 Allocation and apportionment of taxes.

(a) *Allocation and apportionment of taxes to a separate category or categories of income*—(1) *In general*—(i) *Taxes related to a separate category of income.* The amount of foreign taxes paid or accrued with respect to a separate category of income (including United States source income) shall include only those taxes that are related to income in that separate category. Taxes are related to income if the income is included in the base upon which the tax is imposed. If, for example, foreign law exempts certain types of income from foreign taxes, or certain types of income are exempt from foreign tax under an income tax convention, then no taxes are considered to be related to such income for purposes of this paragraph. As another example, if foreign law provides for a specific rate of tax with respect to certain types of income (*e.g.*, capital gains), or certain expenses, deductions, or credits are allowed under foreign law only with respect to a particular type of income, then such provisions shall be taken into account in determining the amount of foreign tax imposed on such income. A withholding tax (unless it is a withholding tax that is not the final tax payable on the income as described in § 1.904–4(d)) is related to the income from which it is withheld. A tax that is imposed on a base that includes more than one separate category of income is considered to be imposed on income in all such categories, and, thus, the taxes are related to all such categories included within the foreign country or possession's taxable income base.

(ii) *Apportionment of taxes related to more than one separate category*. If a tax is related to more than one separate category, then, in order to determine the amount of the tax paid or accrued with respect to each separate category, the tax shall be apportioned on an annual basis among the separate categories on the basis of the following formula:

$$\text{Foreign tax related to more than one separate category} \times \frac{\text{Net income subject to that foreign tax included in a separate category}}{\text{Net income subject to that foreign tax}}$$

For purposes of apportioning foreign taxes among the separate categories, gross income is determined under the law of the foreign country or a possession of the United States to which the foreign income taxes have been paid or accrued. Gross income, as determined under foreign law, in the passive category shall first be reduced by any related person interest expense that is allocated to the income under the principles of section 954(b)(5) and § 1.904–5(c)(2)(ii)(C) (adjusted gross passive income). Gross income in all separate categories (including adjusted gross passive income) is next reduced by deducting any expenses, losses, or other amounts that are deductible under foreign law that are specifically allocable to the gross amount of such income under the laws of that foreign country or possession. If expenses are not specifically allocated under foreign law then the expenses will be apportioned under the principles of foreign law but only after taking into account the reduction of passive income by the application of section 954(b)(5). Thus, for example, if foreign law provides that expenses will be apportioned on a gross income basis, the gross income amounts will be those amounts determined under foreign law except that, in the case of passive income, the amount will be adjusted gross passive income. If foreign law does not provide for the direct allocation or apportionment of expenses, losses, or other deductions to a particular category of income, then the principles of §§1.861–8 through 1.861–14T and section 954(b)(5) shall apply in allocating and apportioning such expenses, losses, or other deductions to gross income as determined under foreign law after reduction of passive income by the amount of related person interest allocated to passive income under section 954(b)(5) and §1.904–5(c)(2)(ii)(C). For example, the principles of §§1.861–8 through 1.861–14T apply to require definitely related expenses to be directly allocated to particular categories of gross income and provide the methods of apportioning expenses that are definitely related to more than one category of gross income or that are not definitely related to any particular category of gross income. For this purpose, the apportionment of expenses required to be made under §§1.861–8 through 1.861–14T need not be made on other than a separate company basis. The rules in this paragraph apply only for purposes of the apportionment of taxes among separate categories of income and do not affect the computation of a taxpayer's foreign tax credit limitation with respect to a specific category of income.

(iii) *Apportionment of taxes for purposes of applying the high-tax income test.* If taxes have been allocated and apportioned to passive income under the rules of paragraph (a)(1) (i) or (ii) of this section, the taxes must further be apportioned to the groups of income described in §1.904–4(c) (3), (4) and (5) for purposes of determining if the group is high-taxed income. Taxes will be related to income in a particular group under the same rules as those in paragraph (a)(1) (i) and (ii) of this section except that those rules shall be applied by substituting the term ''group'' for the term ''category.''

(iv) *Special rule for base and timing differences.* If, under the law of a foreign country or possession of the United States, a tax is imposed on an item of income that does not constitute income under United States tax principles, that tax shall be treated as imposed with respect to general limitation income. If, under the law of a foreign country or possession of the United States, a tax is imposed on an item that would be income under United States tax principles in another year, that tax will be allocated to the appropriate separate category or categories as if the income were recognized under United States tax principles in the year in which the tax was imposed.

(2) *Treatment of certain dividends from noncontrolled section 902 corporations.* If a taxpayer receives or accrues a dividend from a noncontrolled section 902 corporation, and if the Commissioner establishes that there is an agreement, express or implied, that such dividend is paid out of the passive earnings or high withholding tax interest income of the foreign corporation, then only the foreign taxes imposed on passive income or high withholding tax interest income of the noncontrolled section 902 corporation will be considered to be taxes related to the dividend. For an illustration of this rule, see paragraph (c) *Example (7)* of this section.

(b) *Application of paragraph (a) to sections 902 and 960*—(1) *Determination of foreign taxes deemed paid.* If, for the taxable year, there is included in the gross income of a domestic corporation under section 951 an amount attributable to the earnings and profits of a controlled foreign corporation for any taxable year and the amount included consists of income in more than one separate category of the controlled foreign corporation, then the domestic corporation shall be deemed to have paid only a portion of the taxes paid or accrued, or deemed paid or accrued, by the controlled foreign corporation that are allocated to each separate category to which the inclusion is attributable. The portion of the taxes allocated to a particular separate category that shall be deemed paid by the United States shareholder shall be equal to the taxes allocated to that separate category multiplied by the amount of the inclusion with respect to that category (as determined under §1.904–5(c)(1)) and divided by the earnings and profits of the controlled foreign corporation with respect to that separate category (in accordance with § 1.904–5(c)(2)(ii)). The rules of this paragraph (b)(1) also apply for purposes of computing the foreign taxes deemed paid by United States shareholders of controlled foreign corporations under section 902.

(2) *Distributions received from foreign corporations that are excluded from gross income under section 959(b).* The principles of this paragraph shall be applied to—

(i) Any portion of a distribution received from a first-tier corporation by a domestic corporation or individual that is excluded from the domestic corporation's or individual's income under section 959(a) and § 1.959–1; and

(ii) Any portion of a distribution received from an immediately lower-tier corporation by a second- or first-tier corporation that is excluded from such foreign corporation's gross income under section 959(b) and § 1.959–2, if such distribution is treated as a dividend pursuant to § 1.960–2(a).

(3) *Application of section 78.* For purposes of treating taxes deemed paid by a taxpayer under section 902(a) and section 960(a)(1) as a dividend under section 78, taxes that were allocated to income in a separate category shall be treated as income in that same separate category.

(4) *Increase in limitation.* The amount of the increase in the foreign tax credit limitation allowed by section 960(b) and § 1.960–4 shall be determined with regard to the applicable category of income under section 904(d).

(c) *Examples.* The following examples illustrate the application of this section.

Example 1. M, a domestic corporation, conducts business in foreign country X. M earns $400 of shipping income, $200 of general limitation income and $200 of passive income as determined under foreign law. Under foreign law, none of M's expenses are directly allocated or apportioned to a particular category of income. Under the principles of §§ 1.861–8 through 1.861–14T, M apportions $75 of directly allocable expenses to shipping income, $10 of directly allocable expenses to general limitation income, and no such expenses to passive income. M also apportions expenses that are not directly allocable to a specific class of gross income—$40 to shipping income, $20 to general limitation income, and $20 to passive income. Therefore, for purposes of paragraph (a) of this section, M has $285 of net shipping income, $170 of net general limitation income, and $180 of net passive income. Country X imposes tax of $100 on a base that includes M's shipping income and general limitation income. Country X exempts passive income from tax. The tax paid by M is related to M's shipping and general limitation income. The $100 tax is apportioned between those limitations. Thus, M is considered to have paid $63 of X tax on its shipping income ($100×$285/$455) and $37 of tax on its general limitation income ($100×$170/$455). None of the X tax is allocated to M's passive income.

Example 2. The facts are the same as in example 1 except that X does not exempt all passive income from tax but only exempts interest income. M's passive income consists of $100 of gross dividend income, to which $10 of expenses that are not directly allocable are apportioned, and $100 of interest income, to which $10 of expenses that are not directly allocable are apportioned. The $90 of net dividend income is subject to X tax, and $90 of net interest income is exempt from X tax. M pays $130 of tax to X. The $130 of tax is related to M's general, shipping, and passive income. The tax is apportioned among those limitations as follows: $68 to shipping income ($130×$285/$545) $41 to general limitation income ($130×$170/$545), and $21 to passive income ($130×$90/$545).

Example 3. P, a domestic corporation, owns 100 percent of S, a controlled foreign corporation organized in country X. S owns l00 percent of T, a controlled foreign corporation that is also organized in country X. Country X grants group relief to S and T. In 1987, S earns $100 of income and T incurs an $80 loss. Under country X's group relief provisions, only $20 of S's income is subject to country X tax. Country X imposes a 30 percent tax on this income ($6). P includes $100 of S's income in gross income under section 951. Six dollars ($6) of foreign tax is related to that income for purposes of section 960.

Example 4. P, a domestic corporation, owns 100 percent of S, a controlled foreign corporation organized in country X and 100 percent of T, a controlled foreign corporation organized in country Y. T has $200 of gross manufacturing general limitation income and $50 of passive income. T also pays S $100 for shipping T's goods, a price that may be justified under section 482. T has no other expenses and S has no other income or expense. T's income and earnings and profits are the same. Foreign country X does not tax S on its shipping income. Foreign country Y taxes all of T's income at a rate of 20 percent. Under the law of foreign country Y, T is only allowed a $50 deduction for the payment to S. Therefore, for foreign law purposes, T has $150 of manufacturing income and earnings and profits and $50 of passive income and earnings and profits upon which it pays $40 of tax. Under the principles of foreign law, $30 of that tax is imposed on the general limitation manufacturing income and $10 of the tax is imposed on passive income. Therefore, the foreign effective rate on the general limitation income is 30 percent and the foreign effective rate on the passive income is 20 percent. T has $100 of general limitation income and $50 of passive income and pays $30 of general limitation taxes and $10 of passive taxes. S has $100 of shipping income and pays no foreign tax.

Example 5. R, a domestic corporation, owns 50 percent of T, a foreign corporation that is not a controlled foreign corporation and that is organized in foreign country X. R licenses certain property to T. T then relicenses this property to a third person. In 1987, T paid R a royalty of $100 all of which is treated as passive income to R because it was not an active royalty as defined in §1.904–4(b)(2). R has $10 of expenses associated with the royalty income and no foreign tax was imposed on the royalty so the high-tax kickout does not apply. In 1988, the Commissioner determined that the correct arm's length royalty was $150 and under the authority of section 482 reallocated an additional $50 of income to R for 1987. Under a closing agreement with the Commissioner, R elected the benefits of Rev. Proc. 65–17 in relation to the income reallocated from R and established an account receivable from T. In 1988, T paid R an additional $50 to reflect the section 482 adjustment and the account receivable that was established because of the adjustment. Foreign country X treats the $50 payment in 1988 as a dividend by T and imposes a $10 withholding tax on the payment. Under paragraph (a)(1) of this section, the $10 of withholding tax is treated as fully allocable to the $50 payment because under foreign law the tax is imposed only on that income. For U.S. purposes, the income is not characterized as a dividend but as a repayment of a bona fide debt and, therefore, the $50 of income is not required to be recognized by R in 1988. The $10 of tax is treated as a tax paid in 1988 on the $50 of passive income included by R in 1987 pursuant to the section 482 adjustment rather than as a tax associated with a dividend from a noncontrolled section 902 corporation. The $10 tax is a tax imposed on passive income under paragraph (a)(1)(iv) of this section.

Example 6. P, a domestic corporation owns all of the stock of S, a controlled foreign corporation that is incorporated in country X. In 1989, S has $100 of passive income, $200 of dividends from a noncontrolled section 902 corporation and $200 of general limitation income. S also has $100 of related person interest expense and $100 of other expenses that under foreign law are directly allocable to the general limitation income of S. S has no other expenses. Country X imposes a tax of 25% on all of the net income of S and S, therefore, pays $75 in foreign tax. Under paragraph (a)(1)(ii) of this section, the passive income of S is first reduced by the amount of related person interest for purposes of determining the net amount for purposes of allocating the $75 of tax. Under paragraph (a)(1)(ii) of this section, the general limitation income of S is reduced by the $100 of other expenses. Therefore, $50 of the foreign tax is allocated to the dividends from a noncontrolled section 902 corporation ($50=$75×$200/$300), $25 is allocated to the general limitation income of S ($25=$75×$100/$300), and no taxes are allocated to S's passive income.

Example 7. R, a domestic corporation owns preferred stock in T, a foreign corporation that is not a controlled foreign corporation, incorporated in foreign country X. R's stock represents 15 percent of the value of T. Dividends on the preferred stock are paid only out of certain designated passive investments of T. Foreign country X does not tax the passive income of T. Under paragraph (a)(2) of this section, no taxes will be considered to be related to any dividend paid by T to R.

Example 8. Domestic corporation P owns all of the stock of controlled foreign corporation S, which owns all of the stock of controlled foreign corporation T. All such corporations use the calendar year as the taxable year. Assume that earnings and profits are equal to net income and that the income amounts are identical under United States and foreign law principles. In 1987, T earns (before foreign taxes) $187.50 of net passive income and $62.50 of net general limitation income and pays $50 of foreign taxes. S earns no income in 1987 and pays no foreign taxes. For 1987, P is required under section 951 to include in gross income $175 attributable to the earnings and profits of T for that year. One hundred and fifty dollars ($150) of the subpart F inclusion is attributable to passive income earned by T, and $25 of the subpart F inclusion is attributable to general limitation income earned by T. In 1988, T earns no income and pays no foreign taxes. T pays a $200 dividend to S, consisting of $175 from its earnings and profits attributable to amounts required to be included in P's gross income with respect to T and $25 from its other earnings and profits. Assume that no withholding tax is imposed with respect to the distribution from T to S. In 1988, S earns $100 of net general limitation income and receives a $200 dividend from T. S pays $30 in foreign taxes. For 1988, P is required under section 951 to include in gross income $22.50 attributable to the earnings and profits of S for such year. The entire subpart F inclusion is attributable to general limitation income earned by S. In 1988, S pays P a dividend of $247.50, consisting of $157.50 from its earnings and profits attributable to the amount required under section 951 to be included in P's gross income with respect to T, $22.50 from its earnings and profits attributable to the amount required under section 951 to be included in P's gross income with respect to S, and $67.50 from its other earnings and profits. Assume the de minimis rule of section 954(b)(3)(A) and the full inclusion rule of section 954(b)(3)(B) do not apply to the gross amounts of income earned by S and T. The foreign income taxes deemed paid by P for 1987 and 1988 under section 960(a)(1) and section 902(a) are determined as follows on the basis of the following facts and computations.

T corporation (second-tier corporation):			
1. Pre-tax earnings and profits:			
(a) Passive income (p.i.)	187.50		
Plus:			
(b) General limitation income (g.l.i.)	62.50		
(c) Total	250.00		
Less:			
(d) Foreign income taxes paid on or with respect to T's earnings and profits (20%)		50.00	
(e) Earnings and profits			200.00
2. Allocation of taxes:			
(a) Foreign income taxes paid by T that are allocable to p.i. earned by T:			
Line 1(d) taxes		50.00	
Multiplied by: foreign law net p.i.		187.50	
Divided by: foreign law total net income		250.00	
Result			37.50
(b) Foreign income taxes paid by T that are allocable to g.l.i. earned by T:			
Line 1(d) taxes		50.00	
Multiplied by: foreign law net g.l.i.		62.50	
Divided by: foreign law total net income		250.00	
Result			12.50
3. T's earnings and profits:			
(a) Earnings and profits attributable to T's p.i.:			
Line (1)(a) e & p		187.50	
Less: line 2(a) taxes		37.50	
Result			150.00
(b) Earnings and profits attributable to T's g.l.i.:			
Line (1)(b) e & p		62.50	
Less: line 2(b) taxes		12.50	
Result			50.00
4. Subpart F inclusion attributable to T:			
(a) Amount required to be included in P's gross income for 1987 under section 951 with respect to T that is attributable to T's p.i.			150.00
(b) Amount required to be included in P's gross income for 1987 under section 951 with respect to T that is attributable to T's g.l.i.			25.00
5. Foreign income taxes deemed paid by P under section 960(a)(1) with respect to T:			
(a) Taxes deemed paid that are attributable to T's subpart F inclusion that are attributable to T's p.i.:			
Line 2(a) taxes		37.50	
Multiplied by: line 4(a) sec. 951 incl.		150.00	
Divided by: line 3(a) e & p		150.00	
Result:			37.50

(b) Taxes deemed paid that are attributable to T's subpart F inclusion that are attributable to T's g.l.i.:			
Line 2(b) taxes	....	12.50	
Multiplied by: line 4(b) sec. 951 incl.	....	25.00	
Divided by: line 3(b) e & p	....	50.00	
Result	....	....	6.25
6. Dividends paid to S:			
(a) Dividends attributable to T's previously taxed p.i.	....	150.00	
Plus:			
(b) Dividends attributable to T's previously taxed g.l.i.	....	25.00	
Plus:			
(c) Dividends from T's non-previously taxed earnings and profits attributable to p.i.	....	0	
Plus:			
(d) Dividends from T's non-previously taxed earnings and profits attributable to g.l.i.	....	....	25.00
(e) Total dividends paid to S	....	....	200.00
7. Taxes deemed paid by S:			
(a) Taxes of T deemed paid by S for 1987 under section 902(b)(1) with regard to T's p.i.:			
Line 2(a) taxes	....	37.50	
Multiplied by: line 6(c) dividend	....	0	
Dividend by: line 3(a) e & p	....	....	150.00
Result	....	....	0
(b) Taxes of T deemed paid by S for 1987 under section 902(b)(1) with regard to T's g.l.i.:			
Line 2(b) taxes	....	12.50	
Multiplied by: line 6(d) dividend	....	25.00	
Dividend by: line 3(b) e & p	....	50.00	
Result	....	....	6.25
S corporation (first-tier corporation):			
8. Pre-tax earnings and profits:			
(a) Dividends from T attributable to T's non-previously taxed p.i.	0		
Plus:			
(b) Dividends from T attributable to T's non-previously taxed g.l.i.	25		
Plus:			
(c) Dividends from T attributable to T's previously taxed p.i.	150		
Plus:			
(d) Dividends from T attributable to T's previously taxed g.l.i.	25		
Plus:			
(e) Passive income other than dividend from T	0		
Plus:			
(f) General limitation income other than dividend from T	100.00		
(g) Total pre-tax earnings and profits	....	300.00	
(h) Foreign income taxes paid on or with respect to S's earnings and profits (10%)	....	30.00	
(i) Earnings and profits	....	....	270.00
9. Allocation of taxes:			
(a) Foreign income taxes paid by S that are allocable to non-previously taxed p.i. earned by S:			
Line 8(h) taxes	....	30.00	
Multiplied by: foreign law line 8(a) & 8(e) p.i. amounts	....	0	

Dividend by: foreign law total net income		300.00	
Result			0
(b) Foreign income taxes paid by S that are allocable to S's previously taxed p.i. received from T:			
Line 8(h) taxes		30.00	
Multiplied by: foreign law line 8(c) p.i. amount		150.00	
Divided by: foreign law total net income		300.00	
Result			15.00
(c) Foreign income taxes paid by S that are allocable to non-previously taxed g.l.i. earned by S:			
Line 8(h) taxes		30.00	
Multiplied by: foreign law line 8(b) & line 8(f) g.l.i. amounts		125.00	
Divided by: foreign law total net income		300.00	
Result			12.50
(d) Foreign income taxes paid by S that are allocable to S's previously taxed g.l.i. received from T:			
Line 8(h) taxes		30.00	
Multiplied by: foreign law line 8(d) amount		25.00	
Divided by: foreign law total net income		300.00	
Result			2.50
10. (a) Non-previously taxed earnings and profits of S:			
Lines 8(a), 8(b), 8(e), & 8(f) e & p		125.00	
Less: lines 9(a) & 9(c) taxes		12.50	
Result			112.50
(b) Portion of result in 10(a) attributable to S's p.i.			0
(c) Portion of result in 10(a) attributable to S's g.l.i.			112.50
11. (a) Previously taxed earnings and profits of S:			
Lines 8(c) and 8(d) e & p		175.00	
Less: lines 9(b) & 9(d) taxes		17.50	
Result			157.50
(b) Portion of result in 11(a) attributable to T's p.i.:			
Line 8(c)		150.00	
Less: line 9(b) taxes		15.00	
Result			135.00
(c) Portion of result in 11(a) attributable to T's g.l.i.:			
Line 8(d)		25.00	
Less: line 9(d) taxes		2.50	
Result			22.50
12. Subpart F inclusion attributable to S:			
(a) Amount required to be included in P's gross income for 1988 under section 951 with respect to S that is attributable to S's p.i.			0
(b) Amount required to be included in P's gross income for 1988 under section 951 with respect to S that is attributable to S's g.l.i.			22.50
13. Foreign income taxes deemed paid by P under section 960(a)(1) with respect to S:			
(a) Taxes deemed paid that are attributable to S's subpart F inclusion that are attributable to S's p.i.:			
Line 9(a) taxes		0	

Multiplied by: line 12(a) sec. 951 incl.		0	
Divided by: line 10(b) e & p		0	
Result			0
(b) Taxes deemed paid that are attributable to S's subpart F inclusion that are attributable to S's g.l.i.:			
Line 9(c) taxes		12.50	
Multiplied by: line 12(b) sec. 951 incl.		22.50	
Divided by: line 10(c) e & p		112.50	
Result			2.50
(c) Foreign income taxes deemed paid by S deemed paid by P that are allocable to S's p.i.:			
Line 7(a) taxes deemed paid by S		0	
Multiplied by: line 12(a) sec. 951 incl.		0	
Divided by: line 10(b) e & p		0	
Result			0
(d) Foreign income taxes deemed paid by S deemed paid by P that are allocable to S's g.l.i.:			
Line 7(b) taxes deemed paid by S		6.25	
Multiplied by: line 12(b) sec. 951 incl.		22.50	
Divided by: line 10(c) e & p		112.50	
Result			1.25
14. Dividends paid to P:			
(a) Dividends from S attributable to S's previously taxed p.i.		0	
Plus:			
(b) Dividends from S attributable to S's previously taxed g.l.i.		22.50	
Plus:			
(c) Dividends to which section 902(a) applies:			
(i) Consisting of S's earnings and profits attributable to T's previously taxed p.i.	135.00		
Plus:			
(ii) Consisting of S's earnings and profits attributable to T's previously taxed g.l.i.	22.50		
Plus:			
(iii) Consisting of S's other p.i. earnings and profits	0		
Plus:			
(iv) Consisting of S's other g.l.i. earnings and profits	67.50		
(v) Total section 902 dividend		225.00	
(d) Total dividends paid to P			247.50
15. Foreign income taxes deemed paid by P under section 902 and section 960(a)(3) with respect to S:			
(a) Taxes paid by S deemed paid by P under section 902(a) with regard to S's p.i.:			
Line 9(a) taxes		0	
Multiplied by: line 14(c)(iii) div.		0	
Divided by: line 10(b) e & p		0	
Result			0
(b) Taxes paid by S deemed paid by P under section 902(a) with regard to S's g.l.i.:			
Line 9(c) taxes		12.50	
Multiplied by: line 14(c)(iv) div.		67.50	
Divided by: line 10(c) e & p		112.50	
Result			7.50

(c) Taxes deemed paid by S deemed paid by P under section 902(a) with regard to S's p.i.:		
Line 7(a) deemed paid taxes	0	
Multiplied by: line 14(c)(iii) div.	0	
Divided by: line 10(b) e & p	0	
Result		0
(d) Taxes deemed paid by S deemed paid by P under section 902(a) with regard to S's g.l.i.:		
Line 7(b) deemed paid taxes	6.25	
Multiplied by: line 14(c)(iv) div.	67.50	
Divided by: line 10(c) e & p	112.50	
Result		3.75
(e) Foreign income taxes paid by S under section 960(a)(3) deemed paid by P with regard to S's previously taxed p.i.:		
Line 9(b) taxes	15.00	
Multiplied by: line 14(c)(i) div.	135.00	
Divided by: line 11(b) e & p	135.00	
Result		15.00
(f) Foreign income taxes paid by S under section 960(a)(3) deemed paid by P with regard to S's previously taxed g.l.i.:		
Line 9(d) taxes	2.50	
Multiplied by: line 14(c)(ii) div.	22.50	
Divided by: line 11(c) e & p	22.50	
Result		2.50

Summary:		
Total taxes deemed paid by P under section 960(a)(1) with respect to—		
Passive income of S and T included under section 951 in income of P:		
Line 5(a)	37.50	
Plus: Line 13(a)	0	
Plus: Line 13(c)	0	
Result	37.50	
General limitation income of S and T included under section 951 in income of P:		
Line 5(b)	6.25	
Plus: Line 13(b)	2.50	
Plus: Line 13(d)	1.25	
Result	10.00	
Total deemed paid taxes under section 960(a)(1)	47.50	
Total taxes deemed paid by P under section 902 and section 960(a)(3) attributable to passive income of S and T (line 15(e))		15.00
Total taxes deemed paid by P under section 902 and section 960(a)(3) attributable to general limitation income of S and T:		
Line 15(b)	7.50	
Plus: Line 15(d)	3.75	
Plus: Line 15(f)	2.50	
Result	13.75	

[T.D. 8214, 53 FR 27029, July 18, 1988, as amended by T.D. 8412, 57 FR 20652, May 14, 1992]

§1.904–7 Transition rules.

(a) *Characterization of distributions and section 951(a)(1) (A) (ii) and (iii) and (B) inclusions of earnings of a controlled foreign corporation accumulated in taxable years beginning before January 1, 1987, during taxable years of both the payor controlled foreign corporation and the recipient which begin after December 31, 1986*—(1) *Distributions and section 951(a)(1) (A) (ii) and (iii) and (B) inclusions.* Earnings accumulated in taxable years beginning before January 1, 1987, by a foreign corporation that was a controlled foreign corporation when such earnings were accumulated are characterized in that foreign corporation's hands under section 904(d)(1)(A) (separate limitation interest income) or section 904(d)(1)(E) (general limitation income) (prior to their amendment by the Tax Reform Act of 1986 (the Act)) after application of the de minimis rule of former section 904(d)(3)(C) (prior to its amendment by the Act). When, in a taxable year after the effective date of the Act, earnings and profits attributable to such income are distributed to, or included in the gross income of, a United States shareholder under section 951(a)(1) (A) (ii) or (iii) or (B) (hereinafter in this section ''inclusions''), the ordering rules of section 904(d)(3)(D) and §1.904–5(c)(4) shall be applied in determining initially the character of the income of the distributee or United States shareholder. Thus, a proportionate amount of a distribution described in this paragraph initially will be characterized as separate limitation interest income in the hands of the distributee based on the ratio of the separate limitation interest earnings and profits out of which the dividend was paid to the total earnings and profits out of which the dividend was paid. The distribution or inclusions must then be recharacterized in the hands of the distributee or United States shareholder on the basis of the following principles:

(i) Distributions and inclusions that initially are characterized as separate limitation interest income shall be treated as passive income;

(ii) Distributions and inclusions that initially are characterized as old general limitation income shall be treated as general limitation income, unless the taxpayer establishes to the satisfaction of the Commissioner that the distribution or inclusion is attributable to:

(A) Earnings and profits accumulated with respect to shipping income, as defined in section 904(d)(2)(D) and §1.904–4(f); or

(B) In the case of a financial services entity, earnings and profits accumulated with respect to financial services income, as defined in section 904(d)(2)(C)(ii) and §1.904–4(e)(1); or

(C) Earnings and profits accumulated with respect to high withholding tax interest, as defined in section 904(d)(2)(B) and §1.904–4(d).

(2) *Limitation on establishing the character of earnings and profits.* In order for a taxpayer to establish that distributions or inclusions that are attributable to general limitation earnings and profits of a particular taxable year beginning before January 1, 1987, are attributable to shipping, financial services or high withholding tax interest earnings and profits, the taxpayer must establish the amounts of foreign taxes paid or accrued with respect to income attributable to those earnings and profits that are to be treated as taxes paid or accrued with respect to shipping, financial services or high withholding tax interest income, as the case may be, under section 904(d)(2)(I). Conversely, in order for a taxpayer to establish the amounts of general limitation taxes paid or accrued in a taxable year beginning before January 1, 1987, that are to be treated as taxes paid or accrued with respect to shipping, financial services or high withholding tax interest income, as the case may be, the taxpayer must establish the amount of any distributions or inclusions that are attributable to shipping, financial services or high withholding tax interest earnings and profits. For purposes of establishing the amounts of general limitation taxes that are to be treated as taxes paid or accrued with respect to shipping, financial services or high withholding tax interest income, the principles of §1.904–6 shall be applied.

(b) *Application of look-through rules to distributions (including deemed distributions) and payments by an entity to a recipient when one's taxable year begins before January 1, 1987 and the other's taxable year begins after December 31, 1986*—(1) *In general.* This paragraph provides rules relating to the application of section 904(d)(3) to payments made by a controlled foreign corporation or other entity to which the look-through rules apply during its taxable year beginning after December 31, 1986, but received in a taxable year of the recipient beginning before January 1, 1987. The paragraph also provides rules relating to distributions (including deemed distributions) or payments made by a controlled foreign corporation to which section 904(d)(3) (as in effect before the Act) applies during its taxable year beginning before January 1, 1987, and received in a taxable year of the recipient beginning after December 31, 1986.

(2) *Payor of interest, rents, or royalties is subject to the Act and recipient is not subject to the Act.* If interest, rents, or royalties are paid or accrued on or after the start of the payor's first taxable year beginning on or after January 1, 1987, but prior to the start of the recipient's first taxable year beginning on or after January 1, 1987, such interest, rents, or royalties shall initially be characterized in accordance with section 904(d)(3) and § 1.904–5. To the extent that interest payments in the hands of the recipient are initially characterized as passive income under these rules, they will be treated as separate limitation interest in the hands of the recipient. To the extent that rents or royalties in the hands of the recipient are initially characterized as passive income under these rules, they will be recharacterized as general limitation income in the hands of the recipient.

(3) *Recipient of interest, rents, or royalties is subject to the Act and payor is not subject to the Act.* If interest, rents, or royalties are paid or accrued before the start of the payor's first taxable year beginning on or after January 1, 1987, but on or after the start of the recipient's first taxable year beginning after January 1, 1987, the income in the recipient's hands shall be initially characterized in accordance with former section 904(d)(3) (prior to its amendment by the Act). To the extent interest income is characterized as separate limitation interest income under these rules, that income shall be recharacterized as passive income in the hands of the recipient. Rents or royalties will be characterized as general limitation income.

(4) *Recipient of dividends and subpart F inclusions is subject to the Act and payor is not subject to the Act.* If dividends are paid or accrued or section 951(a)(1) inclusions occur before the start of the first taxable year of a controlled foreign corporation beginning on or after January 1, 1987, but on or after the start of the first taxable year of the distributee or United States shareholder beginning on or after January 1, 1987, the dividends or section 951(a)(1) inclusions in the hands of the distributee or United States shareholder shall be initially characterized in accordance with former section 904(d)(3) (including the ordering rules of section 904(d)(3)(A). Therefore, under former section 904(d)(3)(A), dividends are considered to be paid or derived first from earnings attributable to separate limitation interest income. To the extent the dividend or section 951(a)(1) inclusion is initially characterized under these rules as separate limitation interest income in the hands of the distributee or United States shareholder, the dividend or section 951(a)(1) inclusion shall be recharacterized as passive income in the hands of the distributee or United States shareholder. The portion, if any, of the dividend or section 951(a)(1) inclusion that is not characterized as passive income shall be characterized according to the rules in paragraph (a) of this section. Therefore, a taxpayer may establish that income that would otherwise be characterized as general limitation income is shipping or financial services income. Rules comparable to the rules contained in section 904(d)(2)(I) shall be applied for purposes of characterizing foreign taxes deemed paid with respect to distributions and section 951(a)(1) inclusions covered by this paragraph (b)(4).

(5) *Examples.* The following examples illustrate the application of this paragraph (b).

Example 1. P is a domestic corporation that is a fiscal year taxpayer (July 1–June 30). S, a controlled foreign corporation, is a wholly-owned subsidiary of P and has a calendar taxable year. On June l, 1987, S makes a $100 interest payment to P. Because the payment is made after January 1, 1987 (the first day of S's first taxable year beginning after December 31, 1986), the look-through rules of section 904(d)(3) apply to characterize the payment made by S. To the extent, however, that the interest payment to P is allocable to passive income earned by S, the payment will be included in P's separate limitation for interest as provided in former section 904(d)(1)(A).

Example 2. P is a domestic corporation that is a calendar year taxpayer. S, a controlled foreign corporation, is a wholly-owned subsidiary of P and has a July 1–June 30 taxable year. On June 1, 1987, S makes a $100 interest payment to P. Because the payment is made prior to July l, 1987 (the first day of S's first taxable year beginning after December 31, 1986), the look-through rules of section 904(d)(3) do not apply. Assume that, under former section 904(d)(3), the interest payment would be characterized as separate limitation interest income. For purposes of determining P's foreign tax credit limitation, the interest payment will be passive income as provided in section 904(d)(1)(A).

Example 3. The facts are the same as in *Example* 2 except that on June 1, 1987, S makes a $100 dividend distribution to P. Because the dividend is paid prior to July l, 1987 (the first day of S's first taxable year beginning after December 31, 1986), the look-through rules of section 904(d)(3) do not apply. Assume that, under former section 904(d)(3), S's earnings and profits for the taxable year ending June 30, 1987, consist of $200 of earnings attributable to general limitation income and $75 of earnings attributable to separate limitation interest income. The portion of the dividend that is attributable to S's separate limitation interest and is treated as separate limitation interest income under former section 904(d)(3) is $75. The remaining $25 of the dividend is treated as general limitation income under former section 904(d)(3). For purposes of determining P's foreign tax credit limitation, $75 of the dividend will be recharacterized as passive income. The remaining $25 of the dividend will be characterized as general limitation income, unless P can establish that the general limitation portion is attributable to shipping or financial services income.

(c) *Installment sales.* If income is received or accrued by any person on or after the effective date of the Act (as applied to such person) that is attributable to a disposition of property by such person with regard to which section 453 or section 453A applies (installment sale treatment), and the disposition occurred prior to the effective date of the Act, that income shall be characterized according to the rules of §§1.904–4 through 1.904–7.

(d) *Special effective date for high withholding tax interest earned by persons with respect to qualified loans described in section 1201(e)(2) of the Act.* For purposes of characterizing interest received or accrued by any person, the definition of high withholding tax interest in §1.904–4(d) shall apply to taxable years beginning after December 31, 1986, except as provided in section 1201(e)(2) of the Act.

(e) *Treatment of certain recapture income.* Except as otherwise provided, if income is subject to recapture under section 585(c), the income shall be general limitation income. If the income is recaptured by a taxpayer that is a financial services entity, the entity may treat the income as financial services income if the taxpayer establishes to the satisfaction of the Secretary that the deduction to which the recapture amount is attributable is allocable to financial services income. If the taxpayer establishes to the satisfaction of the Secretary that the deduction to which the recapture amount is attributable is allocable to high-withholding tax interest income, the taxpayer may treat the income as high-withholding tax interest.

[T.D. 8214, 53 FR 27034, July 18, 1988, as amended by T.D. 8412, 57 FR 20653, May 14, 1992]

§1.904(b)–1 Treatment of capital gains for corporations.

(a) *In general.* For purposes of computing the foreign tax credit limitation of corporations, the following rules apply:

(1) *Inclusion in foreign source taxable income.* The taxable income of a corporation from sources without the United States includes gain from the sale or exchange of capital assets only in an amount equal to—

(i) Foreign source capital gain net income (as defined in paragraph (b)(2) of this section), reduced by

(ii) The rate differential portion (as defined in paragraph (b)(5) of this section) of foreign source net capital gain (as defined in paragraph (b)(4) of this section).

(2) *Inclusion in entire taxable income.* The entire taxable income of a corporation includes gain from the sale or exchange of capital assets only in an amount equal to—

(i) Capital gain net income (as defined in paragraph (b)(1) of this section), reduced by

(ii) The rate differential portion of net capital gain (as defined in paragraph (b)(3) of this section).

(3) *Treatment of capital losses.* The taxable income of a corporation from sources without the United States shall be reduced by an amount equal to—

(i) Any net capital loss (as defined in paragraph (b)(6) of this section) allocable or apportionable to sources without the United States to the extent taken into account in determining capital gain net income for the taxable year, less

(ii) An amount equal to the rate differential portion of the excess of net capital gain from sources within the United States over net capital gain (from all sources).

(b) *Definitions.* For purposes of section 904(b) and §§ 1.904(b)–1 through (b)–3, the following definitions shall apply:

(1) *Capital gain net income.* The term *capital gain net income* means the excess of the gains from the sales or exchanges of capital assets over the losses from such sales or exchanges. Such term shall include net section 1231 gain, but shall not include gains from the sale or exchange of capital assets to the extent that such gains are not treated as capital gains. In determining capital gain net income, gains and losses which are not from the sale or exchange of capital assets but which are treated as capital gains and losses under the Internal Revenue Code are included.

(2) *Foreign source capital gain net income.* The term *foreign source capital gain net income* means the lesser of—

(i) Capital gain net income from sources without the United States, or

(ii) Capital gain net income (from all sources).

(3) *Net capital gain.* The term *net capital gain* means the excess of the net long-term capital gain (including net section 1231 gain) for the taxable year over the net short-term capital loss for such year, but shall not include gains from the sale or exchange of capital assets to the extent that such gains are not treated as capital gains. In determining net capital gain, gains and losses which are not from the sale or exchange of capital assets but which are treated as capital gains and losses under the Internal Revenue Code are included.

(4) *Foreign source net capital gain.* The term *''foreign source net capital gain* means the lesser of—

(i) Net capital gain from sources without the United States, or

(ii) Net capital gain (from all sources).

(5) *Rate differential portion.* The term *rate differential portion* of foreign source net capital gain, net capital gain, or the excess of net capital gain from sources within the United States over net capital gain, as the case may be, is the same proportion of such amount as the excess of the highest rate of tax specified in section 11(b) over the alternative rate of tax under section 1201(a) bears to the highest rate of tax specified in section 11(b).

(6) *Net capital loss.* Except as provided in § 1.904(b)–2(b), the term *net capital loss* means the excess of the losses from sales and exchanges of capital assets over the sum allowed under section 1211. For purposes of paragraph (a) of this section, the term ''net capital loss'' includes any amounts which are short-term capital losses under section 1212(a). Net capital losses do not include losses from the sales or exchanges of capital assets which are not treated as capital losses under the Internal Revenue Code. In determining net capital loss, gains and losses which are not from the sale or exchange of capital assets but which are treated as capital gains and losses under the Internal Revenue Code are included.

(7) *Allocation and apportionment.* For purposes of this section and § 1.904 (b)–2 and (b)–3, the rules under § 1.861–8(e)(7) with respect to the allocation and apportionment of losses are to be applied with respect to losses on the sale, exchange or other disposition of property.

(8) *Computation of net section 1231 gain.* For purposes of this section and §1.904(b)–2, the netting of section 1231 gains and losses is determined by aggregating the gains and loss from sources both within and without the United States. The gain or loss determined by this aggregation determines the character of the section 1231 gains (and losses allocable or apportionable thereto) from sources without the United States and from all sources for purposes of computing the foreign tax credit limitation fraction.

(c) *Illustrations.* The principles of paragraph (a) of this section may be illustrated by the following examples:

Example 1. Corporation A had the following business taxable income, capital gains and capital losses for 1979:

	In thousands		
	Foreign source	U.S. source	All sources
Business income	$1,200	$2,000	$3,200
Long-term capital gain	300	200	500
Long-term capital loss	0	400	400
Short-term capital gain	100	400	500
Short-term capital loss	200	300	500

For purposes of computing the foreign tax credit limitations, the foreign source taxable income and the entire taxable income of A are computed as follows:

Step (1) First compute the net long-term capital gain and net short-term capital gain and the net long-term capital loss and net short-term capital loss allocable or apportionable to such sources, from sources without the United States and from all sources, as follows:

	In thousands	
	Sources without the U.S.	All sources
Net long-term capital gain	$300	$100
Net long-term capital loss	0	0
Net short-term capital gain	0	0
Net short-term capital loss	100	0

Step (2) Next compute capital gain net income and net capital gain from sources without the United States and from all sources as follows:

	In thousands	
	Sources without the U.S.	All sources
Capital gain net income	(a) $200	(b) $100
Net capital gain	(c)200	(d)100

Step (3) Next calculate foreign source capital gain net income and foreign source net capital gain, which is the lesser of (a) or (b) and the lesser of (c) or (d), respectively. Foreign source capital gain net income is $100,000, and foreign source net capital gain is $100,000.

Step (4) Compute taxable income from sources without the United States, using $\frac{18}{46}$ as the rate differential portion, as follows:

Foreign business income + Foreign source capital gain net income $-\frac{18}{46}$ (foreign source net capital gain)

$1,200,000 + $100,000 $-\frac{18}{46}$ ($100,000) (39,130)=$1,260,870

Step (5) Compute the entire taxable income as follows:

Business income + Capital gain net income $-\frac{18}{46}$ (net capital gain)

$3,200,000 + $100,000 $-\frac{18}{46}$ ($100,000) (39,130)=$3,260,870

Example 2. Corporation B had the following business taxable income, capital gains, and capital losses for 1979:

	In thousands		
	Foreign source	U.S. source	All sources
Business income	$1,200	$2,000	$3,200
Long-term capital gain	300	200	500
Long-term capital loss	500	100	600
Short-term capital gain	600	200	800
Short-term capital loss	100	200	300

For purposes of computing the foreign tax credit limitation, the foreign source taxable income and the entire taxable income of B are computed as follows:

Step (1) First compute the net long-term capital gain and net short-term capital gain and the net long-term capital loss and net short-term capital loss allocable or apportionable to such sources, from sources without the United States and from all sources, as follows:

	In thousands	
	Sources without U.S.	All sources
Net long-term capital gain	0	0
Net long-term capital loss	$200	$100
Net short-term capital gain	500	500
Net short-term capital loss	0	0

Step (2) Next compute capital gain net income and net capital gain from sources without the United States and from all sources as follows:

	In thousands	
	Sources without the U.S.	All sources
Capital gain net income	(a) $300	(b) $400
Net capital gain	(c) 0	(d) 0

Step (3) Next calculate foreign source capital gain net income and foreign source net capital gain which is the lesser of (a) or (b) and the lesser of (c) or (d), respectively. Foreign source capital gain net income is $300,000 and foreign source net capital gain is zero.

Step (4) Compute taxable income from sources without the United States, using $\frac{18}{46}$ as the rate differential portion, as follows:

Foreign business income+Foreign source capital gain net income $-\frac{18}{46}$ (foreign source net capital gain)

$1,200,000+300,000—$\frac{18}{46}$ (0)=$1,500,000

Step (5) Compute the entire taxable income as follows:

Business income+Capital gain net income $-\frac{18}{46}$ (net capital gain)

$3,200,000+$400,000 $-\frac{18}{46}$ (0)=$3,600,000

Example 3. Corporation C had the following business taxable income, capital gains, and capital losses for 1979:

	In thousands		
	Foreign source	U.S. source	All sources
Business income	$1,200	$2,000	3,200
Long-term capital gain	200	500	700
Long-term capital loss	600	100	700
Short-term capital gain	300	400	700
Short-term capital loss	500	100	600

For purposes of computing the foreign tax credit limitation, the foreign source taxable income and the entire taxable income of C are computed as follows:

Step (*1*) First compute the net long-term capital gain and net short-term capital gain and the net long-term capital loss and net short-term capital loss allocable or apportionable to such sources, from sources without the United States and from all sources, as follows:

	In thousands	
	Sources without the U.S.	All sources
Net long-term capital gain	0	0
Net long-term capital loss	$400	0
Net short-term capital gain	0	$100
Net short-term capital loss	200	0

Step (*2*) Next compute capital gain net income and net capital gain from sources without the United States and from all sources:

	In thousands	
	Sources without the U.S.	All sources
Capital gain net income	(a) 0	(b) $100
Net capital gain	(c) 0	(d) 0

Step (*3*) Next calculate foreign source capital gain net income and foreign source net capital gain which is the lesser of (a) or (b) and the lesser of (c) or (d) respectively. Foreign source capital gain net income is zero and foreign source net capital gain is zero.

Step (*4*) Under paragraph (a)(3)(i) of this section, the taxable income from sources without the United States is reduced by the amount by which the net capital loss allocable or apportionable to sources without the United States reduces capital gains (long and short-term) from sources within the United States when computing capital gain net income. This is determined by first computing the net capital loss allocable or apportionable to sources without the United States ($600,000) and the capital gain net income from sources within the United States ($700,000). In this case, $600,000 of net capital loss allocable or apportionable to sources without the United States reduces $600,000 of net long and short-term capital gains from sources within the United States in computing capital gain net income.

Step (*5*) Under paragraph (a)(3)(ii) of this section, the adjustment under paragraph (a)(3)(i) of this section is reduced by an amount equal to the rate differential portion of net capital gain from sources within the United States over net capital gain (from all sources). In this case, net capital gain from sources within the United States is $400,000 and net capital gain is zero, so an amount equal to $\frac{18}{46}$ multiplied by $400,000 is added to the numerator of the foreign tax credit limitation fraction in computing taxable income from sources without the United States.

Step (*6*) Computation of foreign tax credit limitation fraction.

(i) Taxable income from sources without the United States is as follows:

Foreign business income + Foreign source capital gain net income $-\frac{18}{46}$ (foreign source net captial gain) − paragraph (a)(3)(i) adjustment − paragraph (a)(3)(ii) adjustment

$$\$1{,}200{,}000 + 0 - 0 - \$600{,}000 + {}^{18}{}_{46}\frac{(\$400{,}000)}{(\$156{,}522)} = \$756{,}522$$

(ii) The entire taxable income is as follows:

Business income+Capital gain net income—
18⁄46 (net capital gain)
$3,200,000 + $100,000 − 0 = $3,300,000

Note that no adjustment under paragraph (a)(3) is made with respect to the denominator.

Example 4. Corporation D had the following business taxable income, capital gains and capital losses in 1979:

	In thousands		
	Foreign source	U.S. source	All sources
Business income	$2,000	$2,500	$4,500
Long-term capital gain	100	200	300
Long-term capital loss	100	100	200
Short-term capital gain	300	400	700
Short-term capital loss	800	....	800

For purposes of computing the foreign tax credit limitation, the foreign source taxable income and the entire taxable income are computed as follows:

Step (1) First compute the net long-term capital gain and net short-term capital gain and the net long-term capital loss and net short-term capital loss allocable or apportionate to such sources, from sources without the United States and from all sources, as follows:

	In thousands	
	Sources without the U.S.	All sources
Net long-term capital gain	0	100
Net long-term capital loss	0	0
Net short-term capital gain	0	0
Net short-term capital loss	500	100

Step (2) Next compute capital gain net income and net capital gain from sources without the United States and from all sources:

	In thousands	
	Sources without the U.S.	All sources
Capital gain net income	(a) 0	(b) 0
Net capital gain	(c) 0	(d) 0

Step (3) Next compute foreign source capital gain net income and foreign source net capital gain, which is the lesser of (a) or (b) and the lesser of (c) or (d), respectively. Foreign source capital gain net income is zero and foreign source net capital gain is zero.

Step (4) Under paragraph (a)(3)(i) of this section, the taxable income from sources without the United States is reduced by the amount by which the net capital loss allocable or apportionable to sources without the United States reduces capital gains (long- and short-term) from sources within the United States when computing capital gain net income. This is determined by first computing the net capital loss allocable or apportionable to sources without the United States ($500,000), and the capital gain net income from sources within the United States ($500,000). In this case, $500,000 of net capital loss allocable or apportionable to sources without the United States reduces $500,000 of net long- and short-term gains from sources within the United States in computing capital gain net income.

Step (5) Under paragraph (a)(3)(ii) of this section, the adjustment under paragraph (a)(3)(i) of this section is reduced by an amount equal to the rate differential portion of net capital gain from sources within the United States over net capital gain (from all sources). In this case, net capital gain from sources within the United States is $100,000 and the net capital gain is zero, so an amount equal to 18⁄46 multiplied by $100,000 is added to the numerator of the foreign tax credit limitation fraction in computing taxable income from sources without the United States.

Step (6) Computation of foreign tax credit limitation fraction.

(i) Taxable income from sources without the United States is as follows:

Foreign business income + Foreign source capital gain net income −18/46 (foreign source net capital gain) − (paragraph (a)(3)(i) adjustment − paragraph (a)(3)(ii) adjustment)

$$\$2{,}000{,}000 + 0 - 0 - \$500{,}000 + {}^{18}{}_{46}\frac{(\$100{,}000)}{(\$39{,}130)} = \$1{,}539{,}130$$

(ii) The entire taxable income is determined as follows:

Business income + Capital gain net income − 18⁄46 (net capital gain)

$4,500,000 + 0 − 0 = $4,500,000

Note that no adjustment under paragraph (a)(3) of this section is made with respect to the denominator.

[T.D. 7914, 48 FR 44520, Sept. 29, 1983]

§ 1.904(b)–2 Treatment of capital gains for other taxpayers.

(a) *In general.* For purposes of computing the foreign tax credit limitation of persons other than corporations, the following rules apply:

(1) *Inclusion in foreign source taxable income.* The taxable income from sources without the United States shall include gain from the sale or exchange of capital assets only to the extent of foreign source capital gain net income (as defined in paragraph (b)(2) of § 1.904(b)–1), reduced by an amount determined by multiplying foreign source net capital gain (as defined in paragraph (b)(4) of § 1.904(b)–1) by the percentage specified under section 1202(a).

(2) *Inclusion in entire taxable income.* The entire taxable income of a taxpayer other than a corporation shall include gains from the sale or exchange of capital assets only to the extent of capital gain net income (as defined in paragraph (b)(1) of § 1.904(b)–1), reduced by an amount determined by multiplying net capital gain (as defined in paragraph (b)(3) of § 1.904(b)–1) by the percentage specified under section 1202(a).

(3) *Treatment of capital losses.* The taxable income from sources without the United States shall be reduced by:

(i) Any net capital loss (as defined in paragraph (b) of this section) allocable or apportionable to sources without the United States to the extent taken into account in determining capital gain net income, less

(ii) An amount equal to the excess of net capital gain from sources within the United States over net capital gain, multiplied by the percentage specified under section 1202(a).

(b) *Definition of net capital loss.* For purposes of paragraph (a) of this section, the term *net capital loss* means the excess of the losses from the sale or exchange of capital assets treated as capital losses under the Internal Revenue Code and any carryforward as determined under section 1212 over the amount allowed under section 1211(b). In determining net capital loss, gains and losses which are not from the sale or exchange of capital assets but which are treated as capital gains and losses under the Internal Revenue Code are included.

(c) *Illustrations.* The principles of paragraph (a) of this section are illustrated by the following examples:

Example 1. X, an individual, has $1,500,000 of foreign source taxable income and $2,500,000 of U.S. source taxable income (exclusive of capital gains and losses) for 1979 and the following capital gains and losses:

	In thousands		
	Foreign source	U.S. source	All sources
Long-term capital gain	$300	$500	$800
Long-term capital loss	100	500	600
Short-term capital gain	100	400	500
Short-term capital loss	100	200	300

For purposes of computing the foreign tax credit limitation, the foreign source taxable income and the entire taxable income of X are computed as follows:

Step (1) First, compute the net long-term capital gain and net short-term capital gain and the net long-term capital loss and net short-term capital loss allocable or apportionable to such sources, from sources without the United States and from all sources, as follows:

	In thousands	
	Sources without the U.S.	All sources
Net long-term capital gain	$200	$200
Net long-term capital loss	0	0
Net short-term capital gain	0	200
Net short-term capital loss	0	0

Step (2) Next compute capital gain net income and net capital gain from sources without United States and from all sources as follows:

	In thousands	
	Sources without the U.S.	All sources
Capital gain net income	(a) $200	(b) $400
Net capital gain	(c) 200	(d) 200

Step (3) Next calculate foreign source capital gain net income and foreign source net capital gain, which is the lesser (a) or (b) and the lesser of (c) or (d), respectively. Foreign source capital gain net income is $200,000 and foreign source net capital gain is $200,000.

Step (4) Compute taxable income from sources without the United States, using 0.60 as the percentage specified in section 1202(a), as follows:

Foreign taxable income (exclusive of capital gains and losses)+Foreign source capital gain net income −0.60 (foreign source net capital gain)

$1,500,000+$200,000−0.60($200,000)=$1,580,000

Step (5) Compute the entire taxable income as follows:

Taxable income (exclusive of capital gains and losses)+Capital gain net income−0.60 (net capital gain)

$4,000,000+$400,000−0.60 ($200,000) ($120,000)=$4,280,000

Example 2. Y, an individual, has $2,000,000 of foreign source taxable income and $3,000,000 of U.S. source taxable income (exclusive of capital gains and losses) for 1979 and the following capital gains and losses:

	In thousands		
	Foreign source	U.S. source	All sources
Long-term capital gain	$200	$800	$1,000
Long-term capital loss	700	100	800
Short-term capital gain	100	300	400
Short-term capital loss	300	200	500

For purposes of computing the foreign tax credit limitation, the foreign source taxable income and the entire taxable income of Y are computed as follows:

Step (1) First, compute the net long-term capital gain and net short-term capital gain and the net long-term capital loss and net short-term capital loss allocable or apportionable to such sources, from sources without the United States and from all sources, as follows:

	In thousands	
	Sources without the United States	All sources
Net long-term capital gain	0	$200
Net lon-term capital loss	$500	0
Net short-term capital gain	0	0
Net short-term capital loss	200	100

Step (2) Next compute the capital gain net income and net capital gain from sources without the United States and from all sources as follows:

	In thousands	
	Sources without the United States	All sources
Capital gain net income	(a) 0	(b) $100
Net capital gain	(c) 0	(d) 100

Step (3) Next calculate foreign source capital gain net income and foreign source net capital gain, which is the lesser of (a) or (b) and the lesser of (c) or (d), respectively. Foreign source capital gain net income is zero and foreign source net capital gain is also zero.

Step (4) Under paragraph (a)(3)(i) of this section, the taxable income from sources without the United States is reduced by the amount by which the net capital loss allocable or apportionable to sources without the United States reduces capital gains (long and short-term) from sources within the United States when computing capital gain net income. This is determined by first computing the net capital loss allocable or apportionable to sources without the United States ($700,000) and the capital gain net income from sources within the United States ($800,000). In this case, $700,000 of net capital loss allocable or apportionable to sources without the United States reduces $700,000 of long and short-term capital gain in computing capital gain net income.

Step (5) Under paragraph (a)(3)(ii) of this section, the adjustment under paragraph (a)(3)(i) of this section is reduced by an amount equal to the difference between net capital gain from sources within the United States and net capital gain (from all sources), multiplied by the percentage specified under section 1202(a). In this case, the net capital gain from sources within the United States is $700,000 the net capital gain is $100,000 and the percentage specified under section 1202(a) is 0.60.

Step (6) Computation of foreign tax credit limitation fraction.

(i) Taxable income from sources without the United States is as follows:

Foreign income (exclusive of capital gains and losses)+Foreign source capital gain net income −0.60 (foreign source net capital gain)−(paragraph (a)(3)(i) adjustment−paragraph (a)(3)(ii) adjustment)

$$\$2{,}000{,}000 + 0 - 0 - \$700{,}000 + 0.60\ (\$600{,}000)\,(\$360{,}000) = \$1{,}660{,}000$$

(ii) The entire taxable income is as follows:

Taxable income (exclusive of capital gains and losses)+Capital gains net income−0.60(net capital gain)

$5,000,000+$100,000−$60,000=$5,040,000

Note that no adjustment under paragraph (a)(3) of this section is made with respect to the denominator.

[T.D. 7914, 48 FR 44523, Sept. 29, 1983]

§ 1.904(b)–3 Sale of personal property.

(a) *General rule.* For purposes of section 904 and the regulations thereunder, there shall be included as gain from sources within the United States any gain from sources without the United States arising from the sale or exchange of a capital asset which is personal property (as defined in § 1.1245–3(b)). For purposes of this paragraph, gain from the sale or exchange of a capital asset shall include net section 1231 gain, but shall not include gain from the sale or exchange of a capital asset which is not treated as capital gain. However, gains and losses which are not from the sale or exchange of capital assets but which are treated as capital gains and losses under the Internal Revenue Code are included. The special source rules provided under this section shall be applied on an item by item basis with respect to the sale of personal property within any taxable year, except that if substantially all the assets of a trade or business (within the meaning of section 368(a)(1)(C) are sold within any one country within any taxable year, the gains and losses from such sales of such assets shall be netted before applying the source rules under this section.

(b) *Special rules.* Paragraph (a) of this section shall not apply in each of the following cases:

(1) In the case of an individual, if the property is sold or exchanged within the country or possession of the individual's residence.

(2) In the case of a corporation if the property is stock in a second corporation, and is sold in a country or possession in which the second corporation derived more than 50 percent of its gross income for the 3-year period ending with the close of such second corporation's taxable year immediately preceding the year during which the sale or exchange occurred (or for such part of such period as the corporation has been in existence, but in no event less than a 12-month period). For purposes of this paragraph (b)(2) of this section the gross income of any foreign corporation shall be computed in the same manner as if the foreign corporation were a domestic corporation. Thus, the gross income of a foreign corporation for this purpose includes income from all sources, which is not specifically excluded from gross income under any other provisions of the Code.

(3) In the case of any taxpayer, if the property is personal property (other than stock in a corporation) which is sold or exchanged in a country or possession in which the property is used in a trade or business of the taxpayer, or in which the taxpayer derived more than 50 percent of its gross income for the 3-year period ending with the close of its taxable year immediately preceding the year during which the sale or exchange occurred (or, in case of a taxpayer other than an individual, for such part of such period as the taxpayer has been in existence, but in no event less than a 12-month period). In the case of property sold or exchanged by a partnership, trust, or estate, the determination required by the preceding sentence shall be made at the level of the partnership, trust (other than a grantor trust), or estate. For purposes of this paragraph (b)(3) of this section, the gross income of any foreign corporation (or other entity) shall be computed in the same manner as if

the foreign corporation were a domestic corporation (or a domestic entity).

(c) *Exception.* Paragraph (a) of this section shall not apply to a sale of personal property if the gain (determined under chapter 1 of the Internal Revenue Code and computed on an item by item basis as provided under paragraph (a) of this section) from the sale or exchange of the personal property is subject to an income, war profits, or excess profits tax (including a tax withheld with respect to nonresident aliens or foreign corporations) with respect to a foreign country or a possession of the United States in which the sale or exchange occurs, and the rate of tax imposed by such country or possession applicable to such gain is 10 percent or more. For purposes of this paragraph, the tax must be 10 percent or more of the total amount of gain (whether ordinary or capital) arising from the sale or exchange of the item of personal property.

(d) *Application of source rules.* In determining the foreign country or possession where property is sold or exchanged for purposes of paragraphs (b) and (c) of this section, and the foreign country or possession where gross income is derived for purposes of paragraphs (b)(2), (3) and (e) of this section, the source of any gain or income shall be determined by applying the principles under sections 861, 862, and 863 and the regulations thereunder.

(e) *Gain from liquidation of certain foreign corporations.* Paragraph (a) shall not apply with respect to a distribution in liquidation of a foreign corporation to which part II of subchapter C applies, if such corporation derived less than 50 percent of its gross income from sources within the United States for the 3-year period ending with the close of such corporation's taxable year immediately preceding the year during which the distribution occurred (or for such part of such period as the corporation has been in existence, but in no event less than a 12-month period). For purposes of paragraph (e) of this section, the gross income of the foreign corporation shall be computed in the same manner as if the foreign corporation were a domestic corporation.

(f) *Residence defined.* For purposes of paragraph (b)(1) of this section, the country of an individual's residence is to be determined by applying the rules under §§301.7701(b)–1 through 301.7701(b)–9 of this chapter.

(g) *Tax rate applicable to gain.* For purposes of paragraph (c) of this section, the tax rate applicable to the gain on the sale or exchange of personal property (as determined under chapter 1 of the Internal Revenue Code 1954) shall be determined by applying the tax laws of the foreign country or possession (and any applicable reduction under a tax treaty) to such gain and by treating the gain from such transaction as if such gain were the only income derived by the taxpayer during the taxable year (and the only deductions allowed are deductions directly attributable to such gain).

(h) *Country in which gross income derived.* Notwithstanding paragraph (d) of this section, for purposes of this section, dividends received by a shareholder who is not a U.S. person from a foreign corporation shall be deemed to be derived from sources within the foreign country under the laws of which the foreign corporation is created or organized.

[T.D. 7914, 48 FR 44524, Sept. 29, 1983, as amended by T.D. 8411, 57 FR 15241, Apr. 27, 1992]

§1.904(b)–4 Effective date.

Sections 1.904(b)–(1) and 1.904(b)–2 shall apply to taxable years beginning after December 31, 1975 and §1.904(b)–3 shall apply to sales and exchanges made after November 12, 1975.

[T.D. 7914, 48 FR 44525, Sept. 29, 1983]

§1.904(f)–1 Overall foreign loss and the overall foreign loss account.

(a) *Overview of regulations.* In general, section 904(f) and these regulations apply to any taxpayer that sustains an overall foreign loss (as defined in paragraph (c)(1) of this section) in a taxable year beginning after December 31, 1975. For taxable years ending after December 31, 1984, and beginning before January 1, 1987, there can be five types of overall foreign losses: a loss under each of the five separate limitations contained in former section 904(d)(1)(A) (passive interest limitation), (d)(1)(B) (DISC dividend limitation), (d)(1)(C) (foreign trade income limitation), (d)(1)(D) (foreign sales corporation (FSC) distributions limitation), and (d)(1)(E) (general limitation). For taxable years beginning after December 31, 1982, and ending before January 1, 1985, there can be three types of overall foreign losses under former section 904(d)(1)(A) (passive interest limitation), former section 904(d)(1)(B) (DISC dividend limitation) and former section 904(d)(1)(C) (general limitation). For taxpayers subject to section 907, the post-1982 general limitation overall foreign loss account may be further subdivided, as provided in § 1.904(f)–6. For taxable years beginning after December 31, 1975, and before January 1, 1983, taxpayers should have computed overall foreign losses separately under the passive interest limitation, the DISC dividend limitation, the general limitation, and the section 907(b) (FORI) limitation. However, for taxable years beginning after December 31, 1975, and before January 1, 1983, taxpayers may have computed only two types of overall foreign losses: A foreign oil related loss under the FORI limitation and an overall foreign loss computed on a combined basis for the passive interest limitation, the DISC dividend limitation, and the general limitation. A taxpayer that computed overall foreign losses for these years on a combined basis will not be required to amend its return to recompute such losses on a separate basis. If a taxpayer computed its overall foreign losses for these years separately under the passive interest limitation, the DISC dividend limitation, and the general limitation, on returns previously filed, a taxpayer may not amend those returns to compute such overall foreign losses on a combined basis. Section 1.904(f)–1 provides rules for determining a taxpayer's overall foreign losses, for establishing overall foreign loss accounts, and for making additions to and reductions of such accounts for purposes of section 904(f). Section 1.904(f)–2 provides rules for recapturing the balance in any overall foreign loss account under the general recapture rule of section 904(f)(1) and under the special recapture rule of section 904(f)(3) when the taxpayer disposes of property used predominantly outside the United States in a trade or business. Section 1.904(f)–3 provides rules for allocating overall foreign losses that are part of net operating losses or net capital losses to foreign source income in years to which such losses are carried. In addition, § 1.904(f)–3 provides transition rules for the treatment of net operating losses incurred in taxable years beginning after December 31, 1982, and carried back to taxable years beginning before January 1, 1983, and of net operating losses incurred in taxable years beginning before January 1, 1983, and carried forward to taxable years beginning after December 31, 1982. Section 1.904(f)–4 provides rules for recapture out of an accumulation distribution of a foreign trust. Section 1.904(f)–5 provides rules for recapture of overall foreign losses of domestic trusts. Section 1.904(f)–6 provides a transition rule for recapturing a taxpayer's pre-1983 overall foreign losses under the general limitation and the FORI limitation out of taxable income subject to the general limitation in taxable years beginning after December 31, 1982. Section § 1.1502–9 provides rules concerning the application of these regulations to corporations filing consolidated returns.

(b) *Overall foreign loss accounts.* Any taxpayer that sustains an overall foreign loss under paragraph (c) of this section must establish an account for such loss. Separate types of overall foreign losses must be kept in separate accounts. For taxable years beginning prior to January 1, 1983, taxpayers that computed losses on a combined basis in accordance with § 1.904(f)–1(c)(1) will keep one overall foreign loss account for such overall foreign loss. The balance in each overall foreign loss account represents the amount of such overall foreign loss subject to recapture by the taxpayer in a given year. From year to year, amounts may be added to or subtracted from the balances in such accounts as provided in paragraphs (d) and (e) of this section. The taxpayer must report the balances (if any) in its overall foreign loss accounts annually on a Form 1116 or 1118. Such forms must be filed for each taxable year ending after September 24, 1987. The balance in each account does not have to be attributed to the year or years in which the loss was incurred.

(c) *Determination of a taxpayer's overall foreign loss*—(1) *Overall foreign loss defined.* For taxable years beginning after December 31, 1982, and before January 1, 1987, a taxpayer sustains an overall foreign loss in any taxable year in which its gross income from sources without the United States subject to a separate limitation (as defined in paragraph (c)(2) of this section) is exceeded by the sum of the deductions properly allocated and apportioned thereto. Such losses are to be determined separately in accordance with the principles of the separate limitations. Accordingly, income and deductions subject to a separate limitation are not to be netted with income and deductions subject to another separate limitation for purposes of determining the amount of an overall foreign loss. A taxpayer may, for example, have an overall foreign loss under the general limitation in the same taxable year in which it has taxable income under the DISC dividend limitation. The same principles of calculating overall foreign losses on a separate limitation basis apply for taxable years beginning before January 1, 1983, except that a taxpayer shall determine its overall foreign losses on a combined basis, except for income subject to the FORI limitation, if the taxpayer filed its pre-1983 returns on such basis. Thus, for taxable years beginning prior to January 1, 1983, a taxpayer can net income and losses among the passive interest limitation, the DISC dividend limitation, and the general limitation if the taxpayer calculated its overall foreign losses that way at the time. Taxpayers that computed overall foreign losses separately under each of the separate limitations on their returns filed for taxable years beginning prior to January 1, 1983, may not amend such returns to compute their overall foreign losses for pre-1983 years on a combined basis.

(2) *Separate limitation defined.* For purposes of paragraph (c)(1) of this section and these regulations, the term separate limitation means any of the separate limitations under former section 904(d)(1)(A) (passive interest limitation), (B) (DISC dividend limitation), (C) (foreign trade income limitation), (D) (FSC distributions limitation), and (E) (general limitation) and the separate limitation under section 907(b) (FORI limitation) (for taxable years ending after December 31, 1975, and beginning before January 1, 1983).

(3) *Method of allocation and apportionment of deductions.* In determining its overall foreign loss, a taxpayer shall allocate and apportion expenses, losses, and other deductions to the appropriate category of gross income in accordance with section 862(b) and §1.861–8 of the regulations. However, the following deductions shall not be taken into account:

(i) The amount of any net operating loss deduction for such year under section 172(a); and

(ii) To the extent such losses are not compensated for by insurance or otherwise, the amount of any—

(A) Expropriation losses for such year (as defined in section 172(h)), or

(B) Losses for such year which arise from fire, storm, shipwreck, or other casualty, or from theft.

(d) *Additions to the overall foreign loss account*—(1) *General rule.* A taxpayer's overall foreign loss as determined under paragraph (c) of this section shall be added to the applicable overall foreign loss account at the end of its taxable year to the extent that the overall foreign loss has reduced United States source income during the taxable year or during a year to which the loss has been carried back. For rules with respect to carryovers see paragraph (d)(4) of this section and §1.904(f)–3.

(2) *Overall foreign net capital loss.* An overall foreign net capital loss shall be added to the applicable overall foreign loss account at the end of the taxable year to the extent that the foreign source capital loss has reduced United States source capital gain net income during the taxable year or during a year to which the loss has been carried back, subject to the adjustments in paragraph (d)(5) of this section. For rules with respect to carryovers, see paragraph (d)(4) of this section and §1.904(f)–3. As provided under section 1211(b), to the extent that a foreign source net capital loss has reduced United States source income other

than United States source capital gain net income, this additional amount would be added to the taxpayer's overall foreign loss account as if the United States source income had been offset by a foreign net operating loss that is not a capital loss.

(3) *Overall foreign losses of another taxpayer.* If any portion of any overall foreign loss of another taxpayer is allocated to the taxpayer in accordance with § 1.904(f)–5 (relating to overall foreign losses of domestic trusts) or § 1.1502–9 (relating to consolidated overall foreign losses), the taxpayer shall add such amount to its applicable overall foreign loss account.

(4) *Additions to overall foreign loss account created by loss carryovers.* Subject to the adjustments under § 1.904(f)–1(d)(5), the taxpayer shall add to each overall foreign loss account—

(i) All net operating loss carryovers to the current taxable year attributable to the same limitation to the extent that overall foreign losses included in the net operating loss carryovers reduced United States source income for the taxable year, and

(ii) All capital loss carryovers to the current taxable year attributable to the same limitation to the extent that foreign source capital loss carryovers reduced United States source capital gain net income for the taxable year.

(5) *Adjustments.* The amount of overall foreign loss determined in paragraph (d)(1) of this section and the amount of overall foreign net capital loss determined in paragraph (d)(2) of this section which shall be added to a taxpayer's overall foreign loss account shall be adjusted as follows prior to being added to an account.

(i) *Adjustment due to reduction in foreign source income under section 904(b).* A taxpayer's overall foreign loss account shall not include any net capital loss from sources without the United States to the extent that the application of section 904(b) would result in a reduction of foreign source taxable income (but not below zero) for purposes of the numerator of the foreign tax credit limitation fraction.

(ii) *Adjustment to account for rate differential between ordinary income rate and capital gain rate.* Subject to the provisions of paragraph (d)(5)(i) of this section, if an overall foreign loss for a taxable year includes an overall foreign net capital loss, such amount shall be reduced as follows, in accordance with the provisions of section 904(b), before being added to the overall foreign loss account:

(A) In the case of a corporate taxpayer, to the extent that the United States source capital gain net income reduced by the foreign source net capital loss consists of United States source net capital gain, by an amount equal to the rate differential portion (as defined in section 904(b)(3)(D) of the Code and the regulations thereunder) of the United States source net capital gain; or

(B) In the case of a taxpayer other than a corporate taxpayer, for taxable years beginning prior to January 1, 1979, an amount equal to the taxpayer's United States source net capital gain that is offset by such foreign source net capital loss reduced by 50 percent of such gain, and for taxable years beginning after December 31, 1978, and before January 1, 1987, reduced by an amount equal to 60 percent of such gain.

(e) *Reductions of overall foreign loss accounts.* The taxpayer shall subtract the following amounts from its overall foreign loss accounts at the end of its taxable year in the following order, if applicable:

(1) *Pre-recapture reduction for amounts allocated to other taxpayers.* An overall foreign loss account is reduced by the amount of any overall foreign loss which is allocated to another taxpayer in accordance with § 1.904(f)–5 (relating to overall foreign losses of domestic trusts) or § 1.1502–9 (relating to consolidated overall foreign losses).

(2) *Reduction for amounts recaptured.* An overall foreign loss account is reduced by the amount of any foreign source income that is subject to the same limitation as the loss that resulted in the account and that is recaptured in accordance with § 1.904(f)–2 (c) (relating to recapture under section 904(f)(1)); § 1.904(f)–2 (d) (relating to recapture when the taxpayer disposes of certain properties under section 904(f)(3)); and § 1.904(f)–4 (relating to recapture when the taxpayer receives an

accumulation distribution from a foreign trust under section 904(f)(4)).

(f) *Illustrations.* The rules of this section are illustrated by the following examples.

Example 1. X Corporation is a domestic corporation with foreign branch operations in country C. X's taxable income and losses for its taxable year 1983 are as follows:

U.S. Source taxable income	$1,000
Foreign source taxable income (loss) subject to the general limitation	($500)
Foreign source taxable income subject to the passive interest limitation	$200

X has a general limitation overall foreign loss of $500 for 1983 in accordance with paragraph (c) (1) of this section. Since the general limitation overall foreign loss is not considered to offset income under the separate limitation for passive interest income, it therefore offsets $500 of United States source taxable income. This amount is added to X's general limitation overall foreign loss account at the end of 1983 in accordance with paragraphs (c) (1) and (d) (1) of this section.

Example 2. Y Corporation is a domestic corporation with foreign branch operations in Country C. Y's taxable income and losses for its taxable year 1982 are as follows:

U.S. source taxable income	$1,000
Foreign source taxable income (loss) subject to the general limitation	($500)
Foreign source taxable income subject to the passive interest limitation	$250

For its pre-1983 taxable years, Y filed its returns determining its overall foreign losses on a combined basis. In accordance with paragraphs (a) and (c) (1) of this section, Y may net the foreign source income and loss before offsetting the United States source income. Y therefore has a section 904(d)(1)(A–C) overall foreign loss account of $250 at the end of 1982.

Example 3. X Corporation is a domestic corporation with foreign branch operations in country C. For its taxable year 1985, X has taxable income (loss) determined as follows:

U.S. source taxable income	$200
Foreign source taxable income (loss) subject to the general limitation	($1,000)
Foreign source taxable income (loss) subject to the passive limitation	$1,800

X has a general limitation overall foreign loss of $1,000 in accordance with paragraph (c)(1) of this section. The overall foreign loss offsets $200 of United States source taxable income in 1985 and, therefore, X has a $200 general limitation overall foreign loss account at the end of 1985. The remaining $800 general limitation loss is offset by the passive interest limitation income in 1985 so that X has no net operating loss carryover that is attributable to the general limitation loss and no additional amount attributable to that loss will be added to the overall foreign loss account in 1985 or in any other year.

Example 4. In 1986, V Corporation has $1000 of general limitation foreign source taxable income and $500 of general limitation foreign source net capital loss which has reduced $500 of United States source capital gain net income (''short term gain'') (none of which is net capital gain). Under section 904(b), the numerator of V's foreign tax credit limitation fraction for income subject to the general limitation is reduced by $500 (see §1.904 (b)–1 (a)(3)). Under paragraph (d)(5)(i) of this section, none of that $500 goes into its general limitation overall foreign loss account.

Example 5. Z Corporation is a domestic corporation with foreign branch operations. For the taxable year 1984, Z's taxable income and (losses) are as follows:

U.S. source taxable ordinary income	$1,000
U.S. source net capital gain	$460
Foreign source taxable ordinary income subject to the general limitation	$200
Foreign source net capital loss subject to the general limitation	($800)

Z had no capital gain net income in any prior taxable year. Under paragraph (d)(2) and (5) of this section, the amount to be added to Z's general limitation overall foreign loss account is the excess of the amount which has reduced United States source capital gain net income for the taxable year ($460), adjusted for the rate differential because it has reduced United States source net capital gain ($460 × 28/46 = $280), over the amount which has reduced the numerator of Z's foreign tax credit limitation fraction under section 904(b)(2), which is $200. (The $200 amount is foreign source net capital loss that has reduced United States source net capital gain in the denominator of the fraction, but not exceeding the amount of foreign source income in the numerator before the section 904(b)(2) adjustment.) Thus, Z must add $80 (the excess of the $280 over $200) to its general limitation overall foreign loss account in 1984.

[T.D. 8153, 52 FR 31994, Aug. 25, 1987; 52 FR 43434, Nov. 12, 1987]

§1.904(f)–2 Recapture of overall foreign losses.

(a) *In general.* A taxpayer shall be required to recapture an overall foreign loss as provided in this section. Recapture is accomplished by treating as United States source income a portion of the taxpayer's foreign source taxable income of the same limitation as the foreign source loss that resulted in an overall foreign loss account. As a result, if the taxpayer elects the benefits of section 901 or section 936, the taxpayer's foreign tax credit limitation with respect to such income is decreased. As provided in § 1.904 (f)–1(e)(2), the balance in a taxpayer's overall foreign loss account is reduced by the amount of loss recaptured. Recapture continues until such time as the amount of foreign source taxable income recharacterized as United States source income equals the amount in the overall foreign loss account. As provided in § 1.904 (f)–1(e)(2), the balance in a overall foreign loss account is reduced at the end of each taxable year by the amount of the loss recaptured during that taxable year. Regardless of whether recapture occurs in a year in which a taxpayer elects the benefits of section 901 or in a year in which a taxpayer deducts its foreign taxes under section 164, the overall foreign loss account is recaptured only to the extent of foreign source taxable income remaining after applying the appropriate section 904(b) adjustments, if any, as provided in paragraph (b) of this section.

(b) *Determination of taxable income from sources without the United States for purposes of recapture*—(1) *In general.* For purposes of determining the amount of an overall foreign loss subject to recapture, the taxpayer's taxable income from sources without the United States shall be computed with respect to each of the separate limitations described in § 1.904 (f)–1(c)(2) in accordance with the rules set forth in § 1.904 (f)–1(c) (1) and (3). This computation is made without taking into account foreign source taxable income (and deductions properly allocated and apportioned thereto) subject to other separate limitations. Before applying the recapture rules to foreign source taxable income, the following provisions shall be applied to such income in the following order:

(i) Former section 904(b)(3)(C) (prior to its removal by the Tax Reform Act of 1986) and the regulations thereunder shall be applied to treat certain foreign source gain as United States source gain; and

(ii) Section 904(b)(2) and the regulations thereunder shall be applied to make adjustments in the foreign tax credit limitation fraction for certain capital gains and losses.

(c) *Section 904(f)(1) recapture*—(1) *In general.* In a year in which a taxpayer elects the benefits of sections 901 or 936, the amount of any foreign source taxable income subject to recapture in a taxable year in which paragraph (a) of this section is applicable is the lesser of the balance in the applicable overall foreign loss account (after reduction of such account in accordance with § 1.904 (f)–1(e)) or fifty percent of the taxpayer's foreign source taxable income of the same limitation as the loss that resulted in the overall foreign loss account (as determined under paragraph (b) of this section). If, in any year, in accordance with sections 164(a) and section 275(a)(4)(A), a taxpayer deducts rather than credits its foreign taxes, recapture is applied to the extent of the lesser of (i) the balance in the applicable overall foreign loss account or (ii) foreign source taxable income of the same limitation type that resulted in the overall foreign loss minus foreign taxes imposed on such income.

(2) *Election to recapture more of the overall foreign loss than is required under paragraph (c)(1).* In a year in which a taxpayer elects the benefits of sections 901 or 936, a taxpayer may make an annual revocable election to recapture a greater portion of the balance in an overall foreign loss account than is required to be recaptured under paragraph (c)(1) of this section. A taxpayer may make such an election or amend a prior election by attaching a statement to its annual Form 1116 or 1118. If an amendment is made to a prior year's election, an amended tax return should be filed. The statement attached to the Form 1116 or 1118 must indicate the percentage and dollar amount of the taxpayer's foreign source taxable income that is being recharacterized as United States source income and the percentage and dollar amount of the

balance (both before and after recapture) in the overall foreign loss account that is being recaptured. Except for the special recapture rules for section 936 corporations and for recapture of pre-1983 overall foreign losses determined on a combined basis, the taxpayer that elects to credit its foreign taxes may not elect to recapture an amount in excess of the taxpayer's foreign source taxable income subject to the same limitation as the loss that resulted in the overall foreign loss account.

(3) *Special rule for recapture of losses incurred prior to section 936 election.* If a corporation elects the application of section 936 and at the time of the election has a balance in any overall foreign loss account, such losses will be recaptured from the possessions source income of the electing section 936 corporation that qualifies for the section 936 credit, including qualified possession source investment income as defined in section 936(d)(2), even though the overall foreign loss to be recaptured may not be attributable to a loss in an income category of a type that would meet the definition of qualified possession source investment income. For purposes of recapturing an overall foreign loss incurred by a consolidated group including a corporation that subsequently elects to use section 936, the electing section 936 corporation's possession source income that qualifies for the section 936 credit, including qualified possession source investment income, shall be used to recapture the section 936 corporation's share of previously incurred overall foreign loss accounts. Rules for determining the section 936 corporation's share of the consolidated groups overall foreign loss accounts are provided in §1.1502–9(c).

(4) *Recapture of pre-1983 overall foreign losses determined on a combined basis.* If a taxpayer computed its overall foreign losses on a combined basis in accordance with §1.904(f)–1(c)(1) for taxable years beginning before January 1, 1983, any losses recaptured in taxable years beginning after December 31, 1982, shall be recaptured from income subject to the general limitation, subject to the rules in §1.904(f)–6 (a) and (b). Ordering rules for recapture of these losses are provided in §1.904(f)–6(c).

(5) *Illustrations.* The rules of this paragraph (c) are illustrated by the following examples, all of which assume a United States corporate tax rate of 50 percent unless otherwise stated.

Example 1. X Corporation is a domestic corporation that does business in the United States and abroad. On December 31, 1983, the balance in X's general limitation overall foreign loss account is $600, all of which is attributable to a loss incurred in 1983. For 1984, X has United States source taxable income of $500 and foreign source taxable income subject to the general limitation of $500. For 1984, X pays $200 in foreign taxes and elects section 901. Under paragraph (c)(1) of this section, X is required to recapture $250 (the lesser of $600 or 50 percent of $500) of its overall foreign loss. As a consequence, X's foreign tax credit limitation under the general limitation is $250/$1,000×$500, or $125, instead of $500/$1,000×$500, or $250. The balance in X's general limitation overall foreign loss account is reduced by $250 in accordance with §1.904(f)–1(e)(2).

Example 2. The facts are the same as in example 1 except that X makes an election to recapture its overall foreign loss to the extent of 80 percent of its foreign source taxable income subject to the general limitation (or $400) in accordance with paragraph (c)(2) of this section. As a result of recapture, X's 1984 foreign tax credit limitation for income subject to the general limitation is $100/$1,000×$500, or $50, instead of $500/$1,000×$500, or $250. X's general limitation overall foreign loss account is reduced by $400 in accordance with §1.904(f)–1(e)(2).

Example 3. The facts are the same as in example 1 except that X does not elect the benefits of section 901 in 1984 and instead deducts its foreign taxes paid. In 1984, X recaptures $300 of its overall foreign loss, the difference between X's foreign source taxable income of $500 and $200 of foreign taxes paid. The balance in X's general limitation overall foreign loss account is reduced by $300 in accordance with §1.904(f)–1(e)(2).

Example 4. The facts are the same as in example 1 except that in 1984, X also has $1,000 of foreign source DISC dividend income subject to the separate limitation for DISC dividends which carries a foreign tax of $50. Under paragraph (c)(1) of this section the amount of X's general limitation overall foreign loss subject to recapture is $250 (the lesser of the balance in the overall foreign loss account or 50 percent of the foreign source taxable income subject to the general limitation). There is no recapture with respect to the DISC dividend income. X's separate limitation for DISC dividend income is $1,000/$2,000×$1,000, or $500. Its general limitation is $250/$2,000×$1,000, or $125, instead of $500/$2,000×$1,000, or $250. The balance in X's general limitation overall foreign loss account is reduced by $250 in accordance with § 1.904(f)–1(e)(2).

Example 5. On December 31, 1980, V, a domestic corporation that does business in the United States and abroad, has a balance in its section 904(d)(1)(A–C) overall foreign loss account of $600. V also has a balance in its FORI limitation overall foreign loss account of $900. For 1981, V has foreign source taxable income subject to the general limitation of $500 and $500 of United States source income. V also has foreign source taxable income subject to the FORI limitation of $800. V is required to recapture $250 of its section 904(d)(1)(A–C) overall foreign loss account (the lesser of $600 or 50% of $500) and its general limitation foreign tax credit limitation is $250/$1,800×$900, or $125 instead of $500/$1,800×$900, or $250. V is also required to recapture $400 of its FORI limitation overall foreign loss account (the lesser of $900 or 50% of $800). V's foreign tax credit limitation for FORI is $400/$1,800×$900, or $200, instead of $800/$1,800×$900, or $400. The balance in V's FORI limitation overall foreign loss account is reduced to $500 and the balance in V's section 904(d)(1)(A–C) account is reduced to $350, in accordance with § 1.904(f)–1(e)(2).

Example 6. This example assumes a United States corporate tax rate of 46 percent (under section 11(b)) and an alternative rate of tax under section 1201(a) of 28 percent. W is a domestic corporation that does business in the United States and abroad. On December 31, 1984, W has $350 in its general limitation overall foreign loss account. For 1985, W has $500 of United States source taxable income, and has foreign source income subject to the general limitation as follows:

Foreign source taxable income other than net capital gain	$720
Foreign source net capital gain	$460

Under paragraph (b)(2) of this section, foreign source taxable income for purposes of recapture includes foreign source capital gain net income, reduced, under section 904(b)(2), by the rate differential portion of foreign source net capital gain, which adjusts for the reduced tax rate for net capital gain under section 1201(a):

Foreign source capital gain net income	$460
Rate differential portion of foreign source net capital gain (18/46 of $460)	−180
Foreign source capital gain included in foreign source taxable income	$280

The total foreign source taxable income of W for purposes of recapture in 1985 is $1,000 ($720+$280). Under paragraph (c)(1) of this section, W is required to recapture $350 (the lesser of $350 or 50 percent of $1,000), and W's general limitation overall foreign loss account is reduced to zero. W's foreign tax credit limitation for income subject to the general limitation is $650/$1,500×$690 ((.46) (500+720)+(.28) (460)), or $299, instead of $1,000/$1,500×$690, or $460.

(d) *Recapture of overall foreign losses from dispositions under section 904(f)(3)*—(1) *In general.* If a taxpayer disposes of property used or held for use predominantly without the United States in a trade or business during a taxable year and that property generates foreign source taxable income subject to a separate limitation to which paragraph (a) of this section is applicable, (i) gain will be recognized on the disposition of such property, (ii) such gain will be treated as foreign source income subject to the same limitation as the income the property generated, and (iii) the applicable overall foreign loss account shall be recaptured as provided in paragraphs (d)(2), (d)(3), and (d)(4) of this section. See paragraph (d)(5) of this section for definitions.

(2) *Treatment of net capital gain.* If the gain from a disposition of property to which this paragraph (d) applies is treated as net capital gain, all references to such gain in paragraphs (d)(3) and (d)(4) of this section shall mean such gain as adjusted under paragraph (b) of this section. The amount by which the overall foreign loss account shall be reduced shall be determined from such adjusted gain.

(3) *Dispositions where gain is recognized irrespective of section 904(f)(3).* If a taxpayer recognizes foreign source gain subject to a separate limitation on the disposition of property described in paragraph (d)(1) of this section, and there is a balance in a taxpayer's overall foreign loss account that is attributable to a loss under such limitation after applying paragraph (c) of this section, an additional portion of such balance shall be recaptured in accordance with paragraphs (a) and (b) of this section. The amount recaptured shall be the lesser of such balance or 100 percent of the foreign source gain recognized on the disposition that was not previously recharacterized.

(4) *Dispositions in which gain would not otherwise be recognized*—(1) *Recognition of gain to the extent of the overall foreign loss account.* If a taxpayer

makes a disposition of property described in paragraph (d)(1) of this section in which any amount of gain otherwise would not be recognized in the year of the disposition, and such property was used or held for use to generate foreign source taxable income subject to a separate limitation under which the taxpayer had a balance in its overall foreign loss account (including a balance that arose in the year of the disposition), the taxpayer shall recognize foreign source taxable income in an amount equal to the lesser of:

(A) The sum of the balance in the applicable overall foreign loss account (but only after such balance has been increased by amounts added to the account for the year of the disposition or has been reduced by amounts recaptured for the year of the disposition under paragraph (c) and paragraph (d)(3) of this section) plus the amount of any overall foreign loss that would be part of a net operating loss for the year of the disposition if gain from the disposition were not recognized under section 904(f)(3), plus the amount of any overall foreign loss that is part of a net operating loss carryover from a prior year, or

(B) The excess of the fair market value of such property over the taxpayer's adjusted basis in such property. The excess of the fair market value of such property over its adjusted basis shall be determined on an asset by asset basis. Losses from the disposition of an asset shall not be recognized. Any foreign source taxable income deemed received and recognized under this paragraph (d)(4)(i) will have the same character as if the property had been sold or exchanged in a taxable transaction and will constitute gain for all purposes.

(ii) *Basis adjustment.* The basis of the property received in an exchange to which this paragraph (d)(4) applies shall be increased by the amount of gain deemed recognized, in accordance with applicable sections of subchapters C (relating to corporate distributions and adjustments), K (relating to partners and partnerships), O (relating to gain or loss on the disposition of property), and P (relating to capital gains and losses). If the property to which this paragraph (d)(4) applies was transferred by gift, the basis of such property in the hands of the donor immediately preceding such gift shall be increased by the amount of the gain deemed recognized.

(iii) *Recapture of overall foreign loss to the extent of amount recognized.* The provisions of paragraphs (a) and (b) of this section shall be applied to the extent of 100 percent of the foreign source taxable income which is recognized under paragraph (d)(4)(i) of this section. However, amounts of foreign source gain that would not be recognized except by application of section 904(f)(3) and paragraph (d)(4)(i) of this section, and which are treated as United States source gain by application of section 904(b)(3)(C) (prior to its removal by the Tax Reform Act of 1986) and paragraph (b)(1) of this section, shall reduce the overall foreign loss account (subject to the adjustments described in paragraph (d)(2) of this section) if such gain is net capital gain, notwithstanding the fact that such amounts would otherwise not be recaptured under the ordering rules in paragraph (b) of this section.

(iv) *Priorities among dispositions in which gain is deemed to be recognized.* If, in a single taxable year, a taxpayer makes more than one disposition to which this paragraph (d)(4) is applicable, the rules of this paragraph (d)(4) shall be applied to each disposition in succession starting with the disposition which occurred earliest, until the balance in the applicable overall foreign loss account is reduced to zero. If the taxpayer simultaneously makes more than one disposition to which this paragraph (d)(4) is applicable, the rules of paragraph (d)(4) shall be applied so that the balance in the applicable overall foreign loss account to be recaptured will be allocated pro rata among the assets in proportion to the excess of the fair market value of each asset over the adjusted basis of each asset.

(5) *Definitions*—(i) *Disposition.* A disposition to which this paragraph (d) applies includes a sale; exchange; distribution; gift; transfer upon the foreclosure of a security interest (but not a mere transfer of title to a creditor upon creation of a security interest or to a debtor upon termination of a security interest); involuntary conversion;

contribution to a partnership, trust, or corporation; transfer at death; or any other transfer of property whether or not gain or loss is recognized under other provisions of the Code. However, a disposition to which this paragraph (d) applies does not include:

(A) A distribution or transfer of property to a domestic corporation described in section 381 (a) (provided that paragraph (d)(6) of this section applies);

(B) A disposition of property which is not a material factor in the realization of income by the taxpayer (as defined in paragraph (d)(5)(iv) of this section);

(C) A transaction in which gross income is not realized; or

(D) The entering into of a unitization or pooling agreement (as defined in § 1.614–8(b)(6) of the regulations) containing a valid election under section 761(a)(2), and in which the source of the entire gain from any disposition of the interest created by the agreement would be determined to be foreign source under section 862(a)(5) if the disposition occurred presently.

(ii) *Property used in a trade or business.* Property is used in a trade or business if it is held for the principal purpose of promoting the present or future conduct of the trade or business. This generally includes property acquired and held in the ordinary course of a trade or business or otherwise held in a direct relationship to a trade or business. In determining whether an asset is held in a direct relationship to a trade or business, principal consideration shall be given to whether the asset is used in the trade or business. Property will be treated as held in a direct relationship to a trade or business if the property was acquired with funds generated by that trade or business or if income generated from the asset is available for use in that trade or business. Property used in a trade or business may be tangible or intangible, real or personal property. It includes property, such as equipment, which is subject to an allowance for depreciation under section 167 or cost recovery under section 168. Property may be considered used in a trade or business even if it is a capital asset in the hands of the taxpayer. However, stock of another corporation shall not be considered property used in a trade or business if a substantial investment motive exists for acquiring and holding the stock. On the other hand, stock acquired or held to assure a source of supply for a trade or business shall be considered property used in that trade or business. Inventory is generally not considered property used in a trade or business. However, when disposed of in a manner not in the ordinary course of a trade or business, inventory will be considered property used in the trade or business. A partnership interest will be treated as property used in a trade or business if the underlying assets of the partnership would be property used in a trade or business. For purposes of section 904(f) (3) and § 1.904(f)–2 (d) (1) and (5), a disposition of a partnership interest to which this section applies will be treated as a disposition of a proportionate share of each of the assets of the partnership. For purposes of allocating the purchase price of the interest and the seller's basis in the interest to those assets, the principles of § 1.751–1(a) will apply.

(iii) *Property used predominantly outside the United States.* Property will be considered used predominantly outside the United States if for a 3-year period ending on the date of the disposition (or, if shorter, the period during which the property has been used in the trade or business) such property was located outside the United States more than 50 percent of the time. An aircraft, railroad rolling stock, vessel, motor vehicle, container, or other property used for transportation purposes is deemed to be used predominantly outside the United States if, during the 3-year (or shorter) period, either such property is located outside the United States more than 50 percent of the time or more than 50 percent of the miles traversed in the use of such property are traversed outside the United States.

(iv) *Property which is a material factor in the realization of income.* For purposes of this section, property used in a trade or business will be considered a material factor in the realization of income unless the taxpayer establishes that it is not (or, if the taxpayer did not realize income from the trade or business in the taxable year, would not be expected to be) necessary to the realization of income by the taxpayer.

(6) *Carryover of overall foreign loss accounts in a corporate acquisition to which section 381(a) applies.* In the case of a distribution or transfer described in section 381(a), an overall foreign loss account of the distributing or transferor corporation shall be treated as an overall foreign loss account of the acquiring or transferee corporation as of the close of the date of the distribution or transfer. If the transferee corporation had an overall foreign loss account under the same separate limitation prior to the distribution or transfer, the balance in the transferor's account must be added to the transferee's account. If not, the transferee must adopt the transferor's overall foreign loss account. An overall foreign loss of the transferor will be treated as incurred by the transferee in the year prior to the year of the transfer.

(7) *Illustrations.* The rules of this paragraph (d) are illustrated by the following examples which assume that the United States corporate tax rate is 50 percent (unless otherwise stated). For purposes of these examples, none of the foreign source gains are treated as net capital gains (unless so stated).

Example 1. X Corporation has a balance in its general limitation overall foreign loss account of $600 at the close of its taxable year ending December 31, 1984. In 1985, X sells assets used predominantly outside the United States in a trade or business and recognizes $1,000 of gain on the sale under section 1001. This gain is subject to the general limitation. This sale is a disposition within the meaning of paragraph (d)(5)(i) of this section, and to which this paragraph (d) applies. X has no other foreign source taxable income in 1985 and has $1,000 of United States source taxable income. Under paragraph (c), X is required to recapture $500 (the lesser of the balance in X's general limitation overall foreign loss account ($600) or 50 percent of $1,000) of its overall foreign loss account. The balance in X's general limitation overall foreign loss account is reduced to $100 in accordance with § 1.904(f)–1(e)(2). In addition, under paragraph (d)(3) of this section, X is required to recapture $100 (the lesser of the remaining balance in its general limitation overall foreign loss account ($100) or 100 percent of its foreign source taxable income recognized on such disposition that has not been previously recharacterized ($500)). The total amount recaptured is $600. X's foreign tax credit limitation for income subject to the general limitation in 1985 is $200 ($400/$2,000 x $1,000) instead of $500 ($1,000/$2,000 x $1,000). The balance in X's general limitation overall foreign loss account is reduced to zero in accordance with § 1.904(f)–1(e)(2).

Example 2. On December 31, 1984, Y Corporation has a balance in its general limitation overall foreign loss account of $1,500. In 1985, Y has $500 of United States source taxable income and $200 of foreign source taxable income subject to the general limitation. Y's foreign source taxable income is from the sale of property used predominantly outside of the United States in a trade or business. This sale is a disposition to which this paragraph (d) is applicable. In 1985, Y also transferred property used predominantly outside of the United States in a trade or business to another corporation. Under section 351, no gain was recognized on this transfer. Such property had been used to generate foreign source taxable income subject to the general limitation. The excess of the fair market value of the property transferred over Y's adjusted basis in such property was $2,000. In accordance with paragraph (c) of this section, Y is required to recapture $100 (the lesser of $1,500, the amount in Y's general limitation overall foreign loss account, or 50 percent of $200, the amount of general limitation foreign source taxable income for the current year) of its general limitation overall foreign loss. Y is then required to recapture an additional $100 of its general limitation overall foreign loss account under paragraph (d)(3) of this section out of the remaining gain recognized on the sale of assets, because 100 percent of such gain is subject to recapture. The balance in Y's general limitation overall foreign loss account is reduced to $1,300 in accordance with § 1.904(f)–1(e)(2). Y corporation is then required to recognize $1,300 of foreign source taxable income on its section 351 transfer under paragraph (d)(4) of this section. The remaining $700 of potential gain associated with the section 351 transfer is not recognized. Under paragraph (d)(4), 100 percent of the $1,300 is recharacterized as United States source taxable income, and Y's general limitation overall foreign loss account is reduced to zero. Y's entire taxable income for 1985 is:

U.S. source taxable income	$500
Foreign source taxable income subject to the general limitation that is recharacterized as U.S. source income by paragraphs (c) and (d)(3) of this section	200
Gain recognized under section 904(f)(3) and paragraph (d)(4) of this section, and recharacterized as U.S. source income	1,300
Total	$2,000

Y's foreign tax credit limitation for 1985 for income subject to the general limitation is $0 ($0/$2,000×$1,000) instead of $100 ($200/$700×$350).

Example 3. W Corporation is a calendar year domestic corporation with foreign branch operations in country C. As of December 31, 1984, W has no overall foreign loss accounts and has no net operating loss carryovers. W's entire taxable income in 1985 is:

U.S. source taxable income	$800
Foreign source taxable income (loss) subject to the general limitation	($1,000)

W cannot carry back its 1985 NOL to any earlier year. As of December 31, 1985, W therefore has $800 in its general limitation overall foreign loss account. In 1986, W earns $400 United States source taxable income and has an additional $1,000 loss from the operations of the foreign branch. Income in the loss category would be subject to the general limitation. Also in 1986, W disposes of property used predominately outside the United States in a trade or business. Such property generated income subject to the general limitation. The excess of the property's fair market value over its adjusted basis is $3,000. The disposition is of a type described in § 1.904 (f)–2(d)(4)(i). W has no other income in 1986. Under § 1.904 (f)–2(d)(4)(i), W is required to recognize foreign source taxable income on the disposition in an amount equal to the lesser of $2,000 ($800 (the balance in the general limitation overall foreign loss account as of 1985) + $400 (the increase in the general limitation overall foreign loss account attributable to the disposition year) + $600 (the general limitation overall foreign loss that is part of the NOL from 1986) + $200 (the general limitation overall foreign loss that is part of the NOL from 1985)) or $3,000. The $2,000 foreign source income required to be recognized under section 904(f)(3) is reduced to $1,200 by the remaining $600 loss in 1986 and the $200 net operating loss carried forward from 1985. This $1,200 of income is subject to the general limitation. In computing foreign tax credit limitation for general limitation income, the $1,200 of foreign source income is treated as United States source income and, therefore, W's foreign tax credit limitation for income subject to the general limitation is zero. W's overall foreign loss account is reduced to zero.

Example 4. Z Corporation has a balance in its FORI overall foreign loss account of $1,500 at the end of its taxable year 1980. In 1981, Z has $1,600 of foreign oil related income subject to the separate limitation for FORI income and no United States source income. In addition, in 1981, Z makes two dispositions of property used predominantly outside the United States in a trade or business on which no gain was recognized. Such property generated foreign oil related income. The excess of the fair market value of the property transferred in the first disposition over Z's adjusted basis in such property is $575. The excess of the fair market value of the property transferred in the second disposition over Z's adjusted basis in such property is $1,000. Under paragraph (c) of this section, Z is required to recapture $800 (the lesser of 50 percent of its foreign oil related income of $1,600 or the balance ($1,500) in its FORI overall foreign loss account) of its foreign oil related loss. In accordance with paragraphs (d)(4) (i) and (iv) of this section, Z is required to recognize foreign oil related income in the amount of $575 on the first disposition and, since the foreign oil related loss account is now reduced by $1,375 (the $800 and $575 amounts previously recaptured), Z is required to recognize foreign oil related income in the amount of $125 on the second disposition. In accordance with paragraph (d)(4)(iii) of this section, the entire amount recognized is treated as United States source income and the balance in the FORI overall foreign loss account is reduced to zero under § 1.904 (f)–1 (e)(2). Z's foreign tax credit limitation for FORI is $400 ($800/$2,300×$1,150) instead of $800 ($1,600/$1,600×$800).

Example 5. The facts are the same as in example 4, except that the gain from the two dispositions of property is treated as net capital gain and the United States corporate tax rate is assumed to be 46 percent. As in example 4, Z is required to recapture $800 of its foreign oil related loss from its 1981 ordinary foreign oil related income. In accordance with paragraph (d)(4) (i) and (iv) of this section, Z is first required to recognize foreign oil related income (which is net capital gain) on the first disposition in the amount of $575. Under paragraphs (b) and (d) (2) of this section, this net capital gain is adjusted by subtracting the rate differential portion of such gain from the total amount of such gain to determine the amount by which the foreign oil related loss account is reduced, which is $350 ($575− ($575×18/46)). The balance remaining in Z's foreign oil related loss account after this step is $350. Therefore, this process will be repeated, in accordance with paragraph (d)(4)(iv) of this section, to recapture that remaining balance out of the gain deemed recognized on the second disposition, resulting in reduction of the foreign oil related loss account to zero and net capital gain required to be recognized from the second dispostion in the amount of $575, which must also be adjusted by subtracting the rate differential portion to determine the amount by which the foreign oil related loss account is reduced (which is $350). The $575 of net capital gain from each disposition is recharacterized as United States source net capital gain. Z's section 907 (b) foreign tax credit limitation is the same as in example 4, and Z has $1,150 ($575+$575) of United States source net capital gain.

[T.D. 8153, 52 FR 31997, Aug. 25, 1987; 52 FR 43434, Nov. 12, 1987]

§1.904(f)–3 Allocation of net operating losses and net capital losses.

(a) *Allocation of net operating loss carrybacks and carryovers that include overall foreign losses.* If a taxpayer sustains an overall foreign loss that is part of a net operating loss for the year, then, in carrying such net operating loss back to an earlier year or forward to a later year in accordance with section 172 (or §1.1502–21T(b) (or §§1.1502–21A(b) and 1.1502–79A(a), as appropriate)), the portion, if any, of the net operating loss attributable to a United States source loss shall be allocated first to United States source income and the portion of the net operating loss attributable to an overall foreign loss shall be allocated first to foreign source taxable income subject to the same separate limitation in the carryback or carryover year. To the extent that the overall foreign loss component of the net operating loss exceeds foreign source taxable income subject to the same separate limitation in the year to which it is carried, it shall be allocated next to the taxpayer's United States source income for such year and then to foreign source taxable income subject to another separate limitation. See paragraph §1.904 (f)–1(d) of this section for additions to the applicable overall foreign loss account to the extent that the United States source taxable income is reduced in the taxable year to which the loss is carried.

(b) *Allocation of net capital loss carrybacks and carryovers that include overall foreign losses.* If a taxpayer sustains an overall foreign loss that is part of a net capital loss for the year, then in carrying the net capital loss back to an earlier year or forward to a later year in accordance with section 1212 (or §§1.1502–22T(b) (or §§1.1502–22A and 1.1502–79A(b), as appropriate)), the portion of the net capital loss that is attributable to a foreign source capital loss shall be allocated first to foreign source capital gain net income subject to the same separate limitation in the carryback or carryover year. To the extent that such foreign source capital loss exceeds foreign source capital gain net income subject to the same separate limitation in the year to which it is carried, it shall be allocated first to United States source capital gain net income in such year and then to foreign source capital gain net income subject to another separate limitation. An overall foreign source net capital loss carried over to a later year in accordance with this paragraph (b) shall be taken into consideration in determining the taxpayer's overall foreign loss in the year to which it is carried and shall be added to the applicable overall foreign loss account for such year in accordance with paragraph (c) of this section. An overall foreign source net capital loss carried back to an earlier year in accordance with this paragraph (b) shall be added to the applicable overall foreign loss account in the year in which the loss occurred.

(c) *Transitional rule.* When a taxpayer incurs a net operating loss in a post-1982 taxable year that is carried back to a pre-1983 taxable year and creates an overall foreign loss in the pre-1983 year, for purposes of this section, §1.904(f)–1(c)(1), and §1.904(f)–2(b), that loss will be treated as if it arose in the post-1982 year; thus the loss will first offset United States source income before it offsets foreign source income subject to another limitation. When a taxpayer incurs a net operating loss in a pre-1983 taxable year that is carried forward to a post-1982 taxable year and creates an overall foreign loss in the carryover year, for purposes of this section, §1.904(f)–1(c)(1), and §1.904(f)–2(b), that loss is treated as if it arose in the post-1982 taxable year; thus the loss will first offset United States source income before it offsets foreign source income subject to another limitation.

(d) *Illustrations.* The following examples illustrate the application of this section.

Example 1. X Corporation is a domestic corporation with foreign branch operations in Country C. For its taxable year 1985, X has a net operating loss of ($1250), determined as follows:

U.S. source taxable income (loss)...........($250)
Foreign source taxable income (loss)
subject to the general limitation

	($1,000)

The only prior year to which the net operating loss can be carried under section 172 is 1983. For its taxable year 1983, X had the following taxable income:

U.S. source taxable income	$1,900
Foreign source taxable income subject to the general limitation	$400

X has a general limitation overall foreign loss for 1985 of $1,000. X's overall foreign loss is part of a net operating loss of $1,250 for 1985. In accordance with § 1.904(f)–3(a), the foreign loss carried back to 1983 is first allocated to X's foreign source taxable income subject to the limitation under which the loss arose, the general limitation. This amount is not added to X's overall foreign loss account under paragraph (c)(1)(i). The remaining $600 of 1985 foreign source loss is allocated to and thus reduces 1983 United States source income, and this amount is added to X's general limitation overall foreign loss account in 1985.

Example 2. The facts are the same as in example 1, except that in 1983, X's United States source taxable income was zero. No amount is added to X's overall foreign loss account at the end of 1985. X's income and deductions for 1986 are as follows:

U.S. source taxable income	$1,250
Foreign source taxable income subject to the general limitation	$300

X has a net operating loss carryover to 1986 of $850 ($1,250–$400). The $850 net operating loss carryover is comprised of $600 of foreign losses ($1,000 of 1985 loss, minus $400 offset by foreign source income in the carryback year) and $250 of United States source loss. The $600 foreign source component of the net operating loss is first allocated to X's foreign source taxable income subject to the general limitation in 1986, in accordance with § 1.904(f)–3(a), prior to reducing United States source income. The $250 United States source component of the net operating loss component is also allocated first to United States income in the carryover year before reducing any foreign source income. Thus, $300 of the remaining $600 of foreign source net operating loss carryover is first applied to eliminate foreign source income in the carryover year, leaving $300 of foreign source net operating loss. The $250 United States source component of the net operating loss reduces United States source taxable income to $1,000 in 1986. This $1,000 of United States source income is then further reduced by the remaining $300 of foreign source net operating loss. Therefore, in 1986, X has $700 of United States source income and $300 is added to X's general limitation overall foreign loss account in accordance with § 1.904(f)–1(d)(4) of this section.

Example 3. Z is a domestic corporation that does business in the United States and abroad. For taxable years prior to 1983, Z computed its overall foreign losses on a separate limitation basis. In 1980, Z had $100 of United States source income and ($100) of foreign source loss subject to the general limitation. On December 31, 1980, the balance in Z's general limitation overall foreign loss account was $100. In 1981, Z had $50 of United States source income and $100 of general limitation foreign source income. In 1982, Z also had $50 United States source income and $100 foreign source general limitation income. Therefore, in both 1981 and 1982, Z recaptured $50 and at the end of 1982, Z's general limitation overall foreign loss account was reduced to zero. In 1983, Z had no income. In 1984, Z had a ($150) United States source loss and a ($150) general limitation foreign source loss. The 1984 net operating loss is carried back first to 1981 and then to 1982. Because of the overall foreign loss recapture that occurred in those years, Z is considered to have $100 of United States source income and $50 of foreign source income in each year. Thus, in 1981, ($50) of the ($150) foreign source component of the carryback eliminated the $50 foreign source income in that year and ($100) of the ($150) domestic source component of the carryback eliminated the United States source income in that year. In 1982, ($50) of the remaining domestic source component of the net operating loss reduced the United States source income to $50. The remaining ($100) of the foreign source component of the loss first reduced the foreign source income to zero and then reduced the remaining United States source income to zero, thus creating a $50 overall foreign loss. Therefore, at the end of 1984, Z has $50 in its general limitation overall foreign loss account.

Example 4. In 1985, V Corporation has a general limitation loss of <$1,000> and no other income or loss in that year. The 1985 loss is carried back to 1982. For taxable years prior to 1983, V computed its overall foreign losses on a combined basis for income subject to the passive interest limitation, the DISC dividend limitation, and the general limitation. In 1982, V had $400 of passive interest limitation income and $200 of general limitation income and $1,000 of United States source taxable income. Under paragraph (d) of this section, the $1,000 NOL attributable to the 1985 loss is first offset by the general limitation income in 1982 and then the United States source passive interest limitation income in that year. V therefore adds $800 to its general limitation overall foreign loss account in 1985.

Example 5. In 1982, W Corporation has a general limitation loss of <$500> and $200 of passive interest limitation income. For taxable years prior to 1983, W computed its overall foreign losses on a combined basis. W has no other taxable income or loss. W cannot carry back the $300 NOL and so it carries it forward to 1983, a year in which it has $600 passive interest limitation income and $500 of United States source income and no general limitation income. Under paragraph (d) of this section, the NOL is not offset by the foreign source income in 1984 but first is applied against United States source income. Thus, $300 is added to W's general limitation overall foreign loss account in 1984.

[T.D. 8153, 52 FR 32001, Aug. 25, 1987; 52 FR 43434, Nov. 12, 1987, as amended by T.D. 8677, 61 FR 33323, June 27, 1996]

§1.904(f)–4 Recapture of foreign losses out of accumulation distributions from a foreign trust.

(a) *In general.* If a taxpayer receives a distribution of foreign source taxable income subject to a separate limitation in which the taxpayer had a balance in an overall foreign loss account and that income is treated under section 666 as having been distributed by a foreign trust in a preceding taxable year, a portion of the balance in the taxpayer's applicable overall foreign loss account shall be subject to recapture under this section. The amount subject to recapture shall be the lesser of the balance in the taxpayer's overall foreign loss account (after applying §§1.904(f)–1, 1.904(f)–2, 1.904(f)–3, and 1.904(f)–6 to the taxpayer's other income or loss in the current taxable year) or the entire amount of foreign source taxable income deemed distributed in a preceding year or years under section 666.

(b) *Effect of recapture on foreign tax credit limitation under section 667(d).* If paragraph (a) of this section is applicable, then in applying the separate limitation (in accordance with section 667(d)(1) (A) and (C)) to determine the amount of foreign taxes deemed distributed under section 666 (b) and (c) that can be credited against the increase in tax in a computation year, a portion of the foreign source taxable income deemed distributed in such computation year shall be treated as United States source income. Such portion shall be determined by multiplying the amount of foreign source taxable income deemed distributed in the computation year by a fraction. The numerator of this fraction is the balance in the taxpayer's overall foreign loss account (after application of §§1.904(f)–1, 1.904(f)–2, 1.904(f)–3, and 1.904(f)–6), and the denominator of the fraction is the entire amount of foreign source taxable income deemed distributed under section 666. However, the numerator of this fraction shall not exceed the denominator of the fraction.

(c) *Recapture if taxpayer deducts foreign taxes deemed distributed.* If paragraph (a) of this section is applicable and if, in accordance with section 667(d)(1)(B), the beneficiary deducted rather than credited its taxes in the computation year, the beneficiary shall reduce its overall foreign loss account (but not below zero) by an amount equal to the lesser of the balance in the applicable overall foreign loss account or the amount of the actual distribution deemed distributed in the computation year (without regard to the foreign taxes deemed distributed).

(d) *Illustrations.* The provisions of this section are illustrated by the following examples:

Example 1. X Corporation is a domestic corporation that has a balance of $10,000 in its general limitation overall foreign loss account on December 31, 1980. For its taxable year beginning January 1, 1981, X's only income is an accumulation distribution from a foreign trust of $20,000 of general limitation foreign source taxable income. Under section 666, the amount distributed and the foreign taxes paid on such amount ($4,000) are deemed distributed in two prior taxable years. In determining the partial tax on such distribution under section 667(b), the amount added to each computation year is $12,000 (the sum of the actual distribution plus the taxes deemed distributed ($24,000) divided by the number of accumulation years (2)). Of that amount, $5,000 ($10,000/$24,000×$12,000) is treated as United States source taxable income in accordance with paragraph (b) of this section. Assuming the United States tax rate is 50 percent, X's separate foreign tax credit limitation against the increase in tax in each computation year is $3,500 ($7,000/$12,000×$6,000) instead of $6,000 ($12,000/$12,000×$6,000). X's overall foreign loss account is reduced to zero in accordance with paragraph (a) of this section.

Example 2. Assume the same facts as in Example 1, except that X deducted rather than credited its foreign taxes in the computation years. In 1979, the amount added to X's income is $12,000 under section 667(b), $2,000 of which is deductible under section 667(d)(1)(B). X must reduce its overall foreign loss account by $10,000, the amount of the actual distribution that is deemed distributed in 1979 (without regard to the $2,000 foreign taxes also deemed distributed). The entire overall foreign loss account is therefore reduced to $0 in 1979.

[T.D. 8153, 52 FR 32002, Aug. 25, 1987]

§ 1.904(f)–5 Special rules for recapture of overall foreign losses of a domestic trust.

(a) *In general.* Except as provided in this section, the rules contained in §§ 1.904(f)–1, 1.904(f)–2, 1.904(f)–3, 1.904(f)–4, and 1.904(f)–6 apply to domestic trusts.

(b) *Recapture of trust's overall foreign loss.* In taxable years in which a trust has foreign source taxable income subject to a separate limitation in which the trust has a balance in its overall foreign loss account, the balance in the trust's overall foreign loss account shall be recaptured as follows:

(1) *Trust accumulates income.* If the trust accumulates all of its foreign source taxable income subject to the same limitation as the loss that created the balance in the overall foreign loss account, its overall foreign loss shall be recaptured out of such income in accordance with §§ 1.904(f)–1, 1.904(f)–2, 1.904(f)–3, 1.904(f)–4, and 1.904(f)–6.

(2) *Trust distributes income.* If the trust distributes all of its foreign source taxable income subject to the same limitation as the loss that created the overall foreign loss account, the amount of the overall foreign loss that would be subject to recapture by the trust under paragraph (b)(1) of this section shall be allocated to the beneficiaries in proportion to the amount of such income which is distributed to each beneficiary in that year.

(3) *Trust accumulates and distributes income.* If the trust accumulates part of its foreign source taxable income subject to the same limitation as the loss that created the overall foreign loss account and distributes part of such income, the portion of the overall foreign loss that would be subject to recapture by the trust under paragraph (b)(1) of this section if the distributed income were accumulated shall be allocated to the beneficiaries receiving income distributions. The amount of overall foreign loss to be allocated to such beneficiaries shall be the same portion of the total amount of such overall foreign loss that would be recaptured as the amount of such income which is distributed to each beneficiary bears to the total amount of such income of the trust for such year. That portion of the overall foreign loss subject to recapture in such year that is not allocated to the beneficiaries in accordance with this paragraph (b)(3) shall be recaptured by the trust in accordance with paragraph (b)(1).

(c) *Amounts allocated to beneficiaries.* Amounts of a trust's overall foreign loss allocated to any beneficiary in accordance with paragraph (b)(2) or (3) of this section shall be added to the beneficiary's applicable overall foreign loss account and treated as an overall foreign loss of the beneficiary incurred in the taxable year preceding the year of such allocation. Such amounts shall be recaptured in accordance with §§ 1.904(f)-1, 1.904(f)-2, 1.904(f)-3, 1.904(f)-4, and 1.904(f)-6 out of foreign source taxable income distributed by the trust which is subject to the same separate limitation.

(d) *Section 904(f)(3) dispositions to which § 1.904(f)-2(d)(4)(i) is applicable.* Foreign source taxable income recognized by a trust under § 1.904(f)-2(d)(4) on a disposition of property used in a trade or business outside the United States shall be deemed to be accumulated by the trust. All such income shall be used to recapture the trust's overall foreign loss in accordance with § 1.904(f)-2(d)(4).

(e) *Illustrations.* The provisions of this section are illustrated by the following examples:

Example 1. T, a domestic trust, has a balance of $2,000 in a general limitation overall foreign loss account on December 31, 1983. For its taxable year ending on December 31, 1984, T has foreign source taxable income subject to the general limitation of $1,600, all of which it accumulates. Under paragraph (b)(1) of this section, T is required to recapture $800 in 1984 (the lesser of the overall foreign loss or 50 percent of the foreign source taxable income). This amount is treated as United States source income for purposes of taxing T in 1984 and upon subsequent distribution to T's beneficiaries. At the end of its 1984 taxable year, T has a balance of $1,200 in its overall foreign loss account.

Example 2. The facts are the same as in example 1. In 1985, T has general limitation foreign source taxable income of $1,000, which it distributes to its beneficiaries as follows: $500 to A, $250 to B, and $250 to C. Under paragraph (b)(1) of this section, T would have been required to recapture $500 of its overall foreign loss if it had accumulated all of such income. Therefore, under paragraph (b)(2) of this section, T must allocate $500 of its overall foreign loss to A, B, and C as follows: $250 to A ($500×$500/$1,000), $125 to B ($500×$250/$1,000), and $125 to C ($500×$250/$1,000). Under paragraph (c) of this section and §1.904(f)-1(d)(4), A, B, and C must add the amounts of general limitation overall foreign loss allocated to them from T to their overall foreign loss accounts and treat such amounts as overall foreign losses incurred in 1984. A, B, and C must then apply the rules of §§1.904(f)-1, 1.904(f)-2, 1.904(f)-3, 1.904(f)-4, and 1.904(f)-6 to recapture their overall foreign losses. T's overall foreign loss account is reduced in accordance with §1.904(f)–1(e)(1) by the $500 that is allocated to A, B, and C. At the end of 1985, T's general limitation overall foreign loss account has a balance of $700.

Example 3. The facts are the same as in example 2, including an overall foreign loss account at the end of 1984 of $1,200, except that in 1985 T's general limitation foreign source taxable income is $1,500 instead of $1,000, and T accumulates the additional $500. Under paragraph (b)(1) of this section, T would be required to recapture $750 of its overall foreign loss if it accumulated all of the $1,500. Under paragraph (b)(3) of this section, T must allocate $500 of its overall foreign loss to A, B, and C as follows: $250 to A ($750×$500/$1,500) and $125 each to B and C (750×$250/$1,500). T must also recapture $250 of its overall foreign loss, which is the amount subject to recapture in 1985 that is not allocated to the beneficiaries ($750−$500=$250). Under §1.904(f)-1(e)(1), T reduces its general limitation overall foreign loss account by $500. Under §1.904(f)-1(e)(2), T reduces its general limitation overall foreign loss account by $250. At the end of 1985 there is a balance in the general limitation overall foreign loss account of $450 (($1,200−$500)−$250).

[T.D. 8153, 52 FR 32002, Aug. 25, 1987; 52 FR 43434, Nov. 12, 1987]

§1.904(f)–6 Transitional rule for recapture of FORI and general limitation overall foreign losses incurred in taxable years beginning before January 1, 1983, from foreign source taxable income subject to the general limitation in taxable years beginning after December 31, 1982.

(a) *General rule.* For taxable years beginning after December 31, 1982, foreign source taxable income subject to the general limitation includes foreign oil related income (as defined in section 907(c)(2) prior to its amendment by section 211 of the Tax Equity and Fiscal Responsibility Act of 1982). However, for purposes of recapturing general limitation overall foreign losses incurred in taxable years beginning before January 1, 1983 (pre-1983) out of foreign source taxable income subject to the general limitation in taxable years beginning after December 31, 1982 (post-1982), the taxpayer shall make separate determinations of foreign oil related income and other general limitation income (as if the FORI limitation under ‘‘old section 907(b)’’ (prior to its amendment by section 211 of the Tax Equity and Fiscal Responsibility Act of 1982) were still in effect), and shall apply the rules set forth in this section. The taxpayer shall maintain separate accounts for its pre-1983 FORI limitation overall foreign losses, its pre-1983 general limitation overall foreign losses (or its pre-1983 section 904(d)(1)(A–C) overall foreign losses if such losses were computed on a combined basis), and its post-1982 general limitation overall foreign losses. The taxpayer shall continue to maintain such separate accounts, make such separate determinations, and apply the rules of this section separately to each account until the earlier of—

(1) Such time as the taxpayer's entire pre-1983 FORI limitation overall foreign loss account and pre-1983 general limitation overall foreign loss account (or, if the taxpayer determined pre-1983 overall foreign losses on a combined basis, the section 904(d)(1)(A–C) account) have been recaptured, or

(2) The end of the taxpayer's 8th post-1982 taxable year, at which time the taxpayer shall add any remaining balance in its pre-1983 FORI limitation account and pre-1983 general limitation overall foreign loss account (or the section 904(d)(1)(A-C) account) to its post-1982 general limitation overall foreign loss account.

(b) *Recapture of pre-1983 FORI and general limitation overall foreign losses from post-1982 income.* A taxpayer having a balance in its pre-1983 FORI limitation overall foreign loss account or its pre-1983 general limitation overall foreign loss account (or its pre-1983 section 904(d)(1)(A–C) account) in a post-1982 taxable year shall recapture such overall foreign loss as follows:

(1) *Recapture from income subject to the same limitation.* The taxpayer shall first apply the rules of §§1.904(f)–1 through

1.904(f)–5 to the taxpayer's separately determined foreign oil related income to recapture the pre-1983 FORI limitation overall foreign loss account, and shall apply such rules to the taxpayer's separately determined general limitation income (exclusive of foreign oil related income) to recapture the pre-1983 general limitation overall foreign loss account (or the section 904(d)(1)(A–C) overall foreign loss account. Rules for determining the recapture of the pre-1983 section 904 (d)(1)(A–C) losses are contained in § 1.904(f)–2(c)(4).

(2) *Recapture from income subject to the other limitation.* The taxpayer shall next apply the rules of §§ 1.904(f)–1 through 1.904(f)–5 to the taxpayer's separately determined foreign oil related income to recapture the pre-1983 general limitation overall foreign loss account (or the section 904(d)(1)(A–C) overall foreign loss account) and shall apply such rules to the taxpayer's separately determined general limitation income to recapture foreign oil related losses to the extent that—

(i) The amount recaptured from such separately determined income under paragraph (b)(1) of this section is less than 50 percent (or such larger percentage as the taxpayer elects) of such separately determined income, and

(ii) The amount recaptured from such separately determined income under this paragraph (b)(2) does not exceed an amount equal to 12½ percent of the balance in the taxpayer's pre-1983 FORI limitation overall foreign loss account or the pre-1983 general limitation overall foreign loss account (or the section 904(d)(1)(A-C) overall foreign loss account) at the beginning of the taxpayer's first post-1982 taxable year, multiplied by the number of post-1982 taxable years (including the year to which this rule is being applied) which have elapsed, less the amount (if any) recaptured in prior post-1982 taxable years under this paragraph (b)(2) from such separately determined income.

The taxpayer may elect to recapture a pre-1983 overall foreign loss from post-1982 income subject to the general limitation at a faster rate than is required by this paragraph (b)(2). This election shall be made in the same manner as an election to recapture more than 50 percent of the income subject to recapture under section 904(f)(1), as provided in § 1.904(f)–2(c)(2).

(c) *Coordination of recapture of pre-1983 and post-1982 overall foreign losses.* A taxpayer incurring a general limitation overall foreign loss in any post-1982 taxable year in which the taxpayer has a balance in a pre-1983 FORI limitation or its pre-1983 general limitation overall foreign loss account (or the section 904(d)(1)(A-C) overall foreign loss account) shall establish a separate overall foreign loss account for such loss. The taxpayer shall recapture its overall foreign losses in succeeding taxable years by first applying the rules of this section to recapture its pre-1983 overall foreign losses, and then applying the rules of §§ 1.904(f)–1 through 1.904(f)–5 to recapture its post-1982 general limitation overall foreign loss. A post-1982 general limitation overall foreign loss is required to be recaptured only to the extent that the amount of foreign source taxable income recharacterized under paragraph (b) of this section is less than 50 percent of the taxpayer's total general limitation foreign source taxable income (including foreign oil related income)) for such taxable year (except as required by section 904(f)(3)). However, a taxpayer may elect to recapture at a faster rate.

(d) *Illustrations.* The provisions of this section are illustrated by the following examples:

Example 1. X Corporation is a domestic corporation which has the calendar year as its taxable year. On December 31, 1982, X has a balance of $1,000 in its section 904(d)(1)(A-C) overall foreign loss account. X does not have a balance in a FORI limitation overall foreign loss account. For 1983, X has income of $1,200, which was subject to the general limitation and includes foreign oil related income of $1,000 and other general limitation income of $200. In 1983, X is required to recapture $225 of its pre-1983 section 904(d)(1)(A-C) overall foreign loss account computed as follows:

Amount recaptured under paragraph (b)(1) of this section	$100

The amount recaptured from general limitation income exclusive of foreign oil related income is the lesser of $1,000 (the pre-1983 loss reflected in the section 904(d)(1)(A-C) overall foreign loss account) or 50 pecent of $200 (the separately determined general limitation income (exclusive of foreign oil related income).

Amount recaptured under paragraph (b)(2) of this section $125

The amount recaptured from foreign oil related income is the lesser of $900 (the remaining pre-1983 section 904(d)(1)(A-C) overall foreign loss account after recapture under paragraph (b)(1) of this section) or 50 percent of $1,000 (the separately determined foreign oil related income), but as limited by paragraph (b)(2)(ii) of this section to (12½ percent of $1,000 x 1)—$0, which is $125.

Total amount recaptured in 1983 ....$225

Example 2. The facts are the same as in example 1, except that X has general limitation income of $50 for 1984 and $600 for 1985, all of which is foreign oil related income. X is required to recapture $25 in 1984 and $225 in 1985 of its pre-1983 section 904(d)(1)(A-C) overall foreign loss account computed as follows:

Amount recaptured under paragraph (b)(2) of this section in 1984 ....$25

The amount recaptured from foreign oil related income is the lesser of $775 (the remaining pre-1983 section 904(d)(1)(A-C) overall foreign loss account or 50 percent of $50 (the separately determined foreign oil related income).This amount is within the limitation of paragraph (b)(2)(ii) of this section, (12½ percent of $1,000 x 2)—$125, which is $125.

Amount recaptured under paragraph (b)(2) of this section in 1985.................$225

The amount recaptured from foreign oil related income is the lesser of $750 (the remaining pre-1983 section 904(d)(1)(A–C) overall foreign loss account) or 50 percent of $600 (the separately determined foreign oil related income), but as limited by paragraph (b)(2)(ii) of this section to (12½ percent of $1,000×3)–($125+$25), which is $225. ($125 is the amount recaptured in 1983 under paragraph (b)(2) of this section, and $25 is the amount recaptured in 1984 under paragraph (b)(2) of this section.)

Example 3. Y Corporation is a domestic corporation which has the calendar year as its taxable year. On December 31, 1982, Y has a balance of $400 in its section 904(d)(1)(A–C) overall foreign loss account. Y does not have a balance in a FORI overall foreign loss account. For 1983, Y has a general limitation overall foreign loss of $200. For 1984, Y has general limitation income of $1,200, all of which is foreign oil related income. In 1984, Y is required to recapture a total of $300 computed as follows:

Amount of pre-1983 overall foreign loss recaptured under paragraph (b)(2) of this section $100

The amount of the pre-1983 section 904(d)(1)(A–C) overall foreign loss account attributable to a general limitation loss recaptured from foreign oil related income is the lesser of $400 (the loss) or 50 percent of $1,200 (the separately determined foreign oil related income), but as limited by paragraph (b)(2)(ii) of this section to (12½ percent of $400×2) − $0, which is $100.

Amount of post-1982 overall foreign loss recaptured under paragraph (c) of this section $200

The amount of post-1982 general limitation overall foreign loss recaptured is the amount computed under §1.904 (f)−2(c)(1), which is the lesser of $200 (the post-1982 loss) or 50 percent of $1,200 (the income), but only to the extent that the amount of pre-1983 loss recaptured under paragraph (b) of this section is less than 50 percent of such income ((50 percent of $1,200)—$100 recaptured under paragraph (b) = $500).

Total amount recaptured in 1984 ....$300

At the end of 1984, Y has a balance in its pre-1983 section 904(d)(1)(A–C) overall foreign loss account of $300, and has reduced its post-1982 general limitation overall foreign loss account to zero.

Example 4. Z is a domestic corporation which has the calendar year as its taxable year. On December 31, 1982, Z has a balance of $400 in its section 904 (d)(1)(A–C) overall foreign loss account, and a balance of $1,000 in its FORI limitation overall foreign loss account. For 1983, Z has general limitation income of $2,000, which includes foreign oil related income of $1,000 and other general limitation income of $1,000. Keeping these amounts separate for purposes of this section, Z is required to recapture a total of $1,000 in 1983, computed as follows:

Amount recaptured under paragraph (b)(1) of this section $900

The amount of pre-1983 section 904(d)(1)(A–C) overall foreign loss account recaptured from general limitation income exclusive of foreign oil related income, in accordance with §1.904 (f)−2(c)(1), is the lesser of $400 (the section 904(d)(1)(A–C) overall foreign loss) or 50 percent of $1,000, the general limitation income exclusive of foreign oil related income), which is $400.

The amount of pre-1983 FORI overall foreign loss recaptured from foreign oil related income, in accordance with §1.904(f)–2(c)(1), is the lesser of $1,000 (the FORI overall foreign loss) or 50 percent of $1,000 (the foreign oil related income), which is $500.

Amount recaptured under paragraph (b)(2) of this section $100

The amount of pre-1983 FORI 907(b) overall foreign loss recaptured from section general limitation income exclusive of foreign oil related income is the lesser of $500 (the remaining balance in that loss account) or 50 percent of $1,000 (the general limitation income exclusive of foreign oil related income), but only to the extent that the amount recaptured from such income under paragraph (b)(1) of this section is less than 50 percent of such income, or $100 (50 percent of $1,000)—$400 recaptured due to section 904(d)(1)(A–C) overall foreign loss account, and only up to the amount permitted by paragraph (b)(2)(ii) of this section, which is (12½ percent of $1,000 x 1)—$0, or $125.

Total amount recaptured in 1983............$1,000

At the end of 1983, Z has reduced its pre-1983 section 904(d)(1)(A–C) overall foreign loss account to zero, and has a balance in its pre-1983 FORI overall foreign loss account of $400.

[T.D. 8153, 52 FR 32003, Aug. 25, 1987; 52 FR 43434, Nov. 12, 1987]

§§ 1.904(f)–7—1.904(f)–11 [Reserved]

§ 1.904(f)–12 Transition rules.

(a) *Recapture in years beginning after December 31, 1986, of overall foreign losses incurred in taxable years beginning before January 1, 1987*—(1) *In general.* If a taxpayer has a balance in an overall foreign loss account at the end of its last taxable year beginning before January 1, 1987 (pre-effective date years), the amount of that balance shall be recaptured in subsequent years by recharacterizing income received in the income category described in section 904(d) as in effect for taxable years beginning after December 31, 1986 (post-effective date years), that is analogous to the income category for which the overall foreign loss account was established, as follows:

(i) Interest income as defined in section 904(d)(1)(A) as in effect for pre-effective date taxable years is analogous to passive income as defined in section 904(d)(1)(A) as in effect for post-effective date years;

(ii) Dividends from a DISC or former DISC as defined in section 904(d)(1)(B) as in effect for pre-effective date taxable years is analogous to dividends from a DISC or former DISC as defined in section 904(d)(1)(F) as in effect for post-effective date taxable years;

(iii) Taxable income attributable to foreign trade income as defined in section 904(d)(1)(C) as in effect for pre-effective date taxable years is analogous to taxable income attributable to foreign trade income as defined in section 904(d)(1)(G) as in effect for post-effective date years;

(iv) Distributions from a FSC (or former FSC) as defined in section 904(d)(1)(D) as in effect for pre-effective date taxable years is analogous to distributions from a FSC (or former FSC) as defined in section 904(d)(1)(H) as in effect for post-effective date taxable years;

(v) For general limitation income as described in section 904(d)(1)(E) as in effect for pre-effective date taxable years, see the special rule in paragraph (a)(2) of this section.

(2) *Rule for general limitation losses*—(i) *In general.* Overall foreign losses incurred in the general limitation category of section 904(d)(1)(E), as in effect for pre-effective date taxable years, that are recaptured in post-effective date taxable years shall be recaptured from the taxpayer's general limitation income, financial services income, shipping income, and dividends from each noncontrolled section 902 corporation. If the sum of the taxpayer's general limitation income, financial services income, shipping income and dividends from each noncontrolled section 902 corporation for a taxable year subject to recapture exceeds the overall foreign loss to be recaptured, then the amount of each type of separate limitation income that will be treated as U.S. source income shall be determined as follows:

$$\text{Overall foreign loss subject to recapture} \times \frac{\text{Amount of income in each separate category from which the loss may be recaptured}}{\text{Sum of income in all separate categories from which the loss may be recaptured.}}$$

This recapture shall be made after the allocation of separate limitation losses pursuant to section 904(f)(5)(B) and before the recharacterization of post-effective date separate limitation income pursuant to section 904(f)(5)(C).

(ii) *Exception.* If a taxpayer can demonstrate to the satisfaction of the district director that an overall foreign loss in the general limitation category of section 904(d)(1)(E), as in effect for pre-effective date taxable years, is attributable, in sums certain, to losses in one or more separate categories of section 904(d)(1) (including for this purpose the passive income category and the high withholding tax interest category), as in effect for post-effective date taxable years, then the taxpayer may recapture the loss (in the amounts demonstrated) from those separate categories only.

(3) *Priority of recapture of overall foreign losses incurred in pre-effective date taxable years.* An overall foreign loss incurred by a taxpayer in pre-effective date taxable years shall be recaptured to the extent thereof before the taxpayer recaptures an overall foreign loss incurred in a post-effective date taxable year.

(4) *Examples.* The following examples illustrate the application of this paragraph (a).

Example 1. X corporation is a domestic corporation which operates a branch in Country Y. For its taxable year ending December 31, 1988, X has $800 of financial services income, $100 of general limitation income and $100 of shipping income. X has a balance of $100 in its general limitation overall foreign loss account which resulted from an overall foreign loss incurred during its 1986 taxable year. X is unable to demonstrate to which of the income categories set forth in section 904(d)(1) as in effect for post-effective date taxable years the loss is attributable. In addition, X has a balance of $100 in its shipping overall foreign loss account attributable to a shipping loss incurred during its 1987 taxable year. X has no other overall foreign loss accounts. Pursuant to section 904(f)(1), the full amount in each of X corporation's overall foreign loss accounts is subject to recapture since $200 (the sum of those amounts) is less than 50% of X's foreign source taxable income for its 1988 taxable year, or $500. X's overall foreign loss incurred during its 1986 taxable year is recaptured before the overall foreign loss incurred during its 1987 taxable year, as follows: $80 ($100×800/1000) of X's financial services income, $10 ($100×100/1000) of X's general limitation income, and $10 (100×100/1000) of X's shipping income will be treated as U.S. source income. The remaining $90 of X corporation's 1988 shipping income will be treated as U.S. source income for the purpose of recapturing X's 100 overall foreign loss attributable to the shipping loss incurred in 1987. $10 remains in X's shipping overall foreign loss account for recapture in subsequent taxable years.

Example 2. The facts are the same as in *Example* 1 except that X has $800 of financial services income, $100 of general limitation income, a $100 dividend from a noncontrolled section 902 corporation and a ($100) shipping loss for its taxable year ending December 31, 1988. Separate limitation losses are allocated pursuant to the rules of section 904(f)(5) before the recapture of overall foreign losses. Therefore, the ($100) shipping loss incurred by X will be allocated to its separate limitation income as follows: $80 ($100×800/1000) will be allocated to X's financial services income, $10 ($100×100/1000) will be allocated to its general limitation income and $10 ($100×100/1000) will be allocated to X's dividend from the noncontrolled section 902 corporation. Accordingly, after allocation of the 1988 shipping loss, X has $720 of financial services income, $90 of general limitation income, and a $90 dividend from the noncontrolled section 902 corporation. Pursuant to section 904(f)(1), the full amount in each of X corporation's overall foreign loss accounts is subject to recapture since $200 (the sum of those amounts) is less than 50% of X's net foreign source taxable income for its 1988 taxable year, or $450. X's overall foreign loss incurred during its 1986 taxable year is recaptured as follows: $80 ($100×720/900) of X's financial services income, $10 ($100×90/900) of its general limitation income and $10 ($100×90/900) of its dividend from the noncontrolled section 902 corporation will be treated as U.S. source income. Accordingly, after application of section 904(f), X has $100 of U.S. source income, $640 of financial services income, $80 of general limitation income and a $80 dividend from the noncontrolled section 902 corporation for its 1988 taxable year. X must establish a separate limitation loss account for each portion of the 1988 shipping loss that was allocated to its financial services income, general limitation income and dividends from the noncontrolled section 902 corporation. X's overall foreign loss account for the 1986 general limitation loss is reduced to zero. X still has a $100 balance in its overall foreign loss account that resulted from the 1987 shipping loss.

Example 3. Y is a domestic corporation which has a branch operation in Country Z. For its 1988 taxable year, Y has $5 of shipping income, $15 of general limitation income and $100 of financial services income. Y has a balance of $100 in its general limitation overall foreign loss account attributable to its 1986 taxable year. Y has no other overall foreign loss accounts. Pursuant to section 904(f)(1), $60 of the overall foreign loss is subject to recapture since 50% of Y's foreign source income for 1988 is less than the balance in its overall foreign loss account. Y can demonstrate that the entire $100 overall foreign loss was attributable to a shipping limitation loss incurred in 1986. Accordingly, only Y's $5 of shipping limitation income received in 1988 will be treated as U.S. source income, Because Y can demonstrate that the 1986 loss was entirely attributable to a shipping loss, none of Y's general limitation income or financial services income received in 1988 will be treated as U.S. source income.

Example 4. The facts are the same as in *Example* 3 except that Y can only demonstrate that $50 of the 1986 overall foreign loss account was attributable to a shipping loss incurred in 1986. Accordingly, Y's $5 of shipping limitation income received in 1988 will be treated as U.S. source income. The remaining $50 of the 1986 overall foreign loss that Y cannot trace to a particular separate limitation will be recaptured and treated as U.S. source income as follows: $43 ($50×100/115) of Y's financial services income will be treated as U.S. source income and $7 ($50×15/115) of Y's general limitation income will be treated as U.S. source income. Y has $45 remaining in its overall foreign loss account to be recaptured from shipping income in a future year.

(b) *Treatment of overall foreign losses that are part of net operating losses incurred in pre-effective date taxable years which are carried forward to post-effective date taxable years*—(1) *Rule.* An overall foreign loss that is part of a net operating loss incurred in a pre-effective date taxable year which is carried forward, pursuant to section 172, to a post-effective date taxable year will be carried forward under the rules of section 904(f)(5) and the regulations under that section. *See also* Notice 89–3, 1989–1 C.B. 623. For this purpose the loss must be allocated to income in the category analogous to the income category set forth in section 904(d) as in effect for pre-effective date taxable years in which the loss occurred. The analogous category shall be determined under the rules of paragraph (a) of this section.

(2) *Example.* The following example illustrates the rule of paragraph (b)(1) of this section.

Example. Z is a domestic corporation which has a branch operation in Country D. For its taxable year ending December 31, 1988, Z has $100 of passive income and $200 of general limitation income. Z also has a $60 net operating loss which was carried forward pursuant to section 172 from its 1986 taxable year. The net operating loss resulted from an overall foreign loss attributable to the general limitation income category. Z can demonstrate that the loss is a shipping loss. Therefore, the net operating loss will be treated as a shipping loss for Z's 1988 taxable year. Pursuant to section 904(f)(5), the shipping loss will be allocated as follows: $20 ($60×100/300) will be allocated to Z's passive income and $40 ($60×200/300) will be allocated to Z's general limitation income. Accordingly, after application of section 904(f), Z has $80 of passive income and $160 of general limitation income for its 1988 taxable year. Although no addition to Z's overall foreign loss account for shipping income will result from the NOL carry forward, shipping income earned by Z in subsequent taxable years, will be subject to recharacterization as a passive income and general limitation income pursuant to the rules set forth in section 904(f)(5).

(c) *Treatment of overall foreign losses that are part of net operating losses incurred in post-effective date taxable years which are carried back to pre-effective date taxable years*—(1) *Allocation to analogous income category.* An overall foreign loss that is part of a net operating loss incurred by the taxpayer in a post-effective date taxable year which is carried back, pursuant to section 172, to a pre-effective date taxable year shall be allocated first to income in the pre-effective date income category analogous to the income category set forth in section 904(d) as in effect for post-effective date taxable years in which the loss occurred. Except for the general limitation income category, the pre-effective date income category that is analogous to a post-effective date income category shall be determined under paragraphs (a)(1) (i) through (iv) of this section. The general limitation income category for pre-effective date years shall be treated as the income category that is analogous to the post-effective date categories for general limitation income, financial services income, shipping income, dividends from each noncontrolled section 902 corporation and high withholding tax interest income. If the net operating loss resulted from separate limitation losses in more than one post-effective date income category and more than one loss is carried back to pre-effective date general limitation income, then the losses shall be allocated to the pre-effective date general limitation income based on the following formula:

$$\text{Pre-effective date general limitation income} \times \frac{\text{Loss in each post-effective date separate limitation category that is analogous to pre-effective date general limitation income}}{\text{Losses in all post-effective categories that are analogous to pre-effective date general limitation income}}$$

(2) *Allocation to U.S. source income.* If an overall foreign loss is carried back to a pre-effective date taxable year and the loss exceeds the foreign source income in the analogous category for the carry back year, the remaining loss shall be allocated against U.S. source income as set forth in § 1.904(f)–3. The amount of the loss that offsets U.S. source income must be added to the taxpayer's overall foreign loss account. An addition to an overall foreign loss account resulting from the carry back of a net operating loss incurred by a taxpayer in a post-effective date taxable year shall be treated as having been incurred by the taxpayer in the year in which the loss arose and shall be subject to recapture pursuant to section 904(f) as in effect for post-effective date taxable years.

(3) *Allocation to other separate limitation categories.* To the extent that an overall foreign loss that is carried back as part of a net operating loss exceeds the separate limitation income to which it is allocated and the U.S. source income of the taxpayer for the taxable year to which the loss is carried, the loss shall be allocated pro rata to other separate limitation income of the taxpayer for the taxable year. However, there shall be no recharacterization of separate limitation income pursuant to section 904(f)(5) as a result of the alloction of such a net operating loss to other separate limitation income of the taxpayer.

(4) *Examples.* The following examples illustrate the rules of paragraph (c) of this section.

Example 1. X is a domestic corporation which has a branch operation in Country A. For its taxable year ending December 31, 1987, X has a $60 net operating loss which is carried back pursuant to section 172 to its taxable year ending December 31, 1985. The net operating loss resulted from a shipping loss; X had no U.S. source income in 1987. X had $20 of general limitation income, $40 of DISC limitation income and $10 of U.S. source income for its 1985 taxable year. The $60 NOL is allocated first to X's 1985 general limitation income to the extent thereof ($20) since the general limitation income category of section 904(d) as in effect for pre-effective date taxable years is the income category that is analogous to shipping income for post-effective date taxable years. Therefore, X has no general limitation income for its 1985 taxable year. Next, pursuant to section 904(f) as in effect for pre-effective date taxable years, the remaining $40 of the NOL is allocated first to X's $10 of U.S. source income and then to $30 of X's DISC limitation income for its 1985 taxable year. Accordingly, X has no U.S. source income and $10 of DISC limitation income for its 1985 taxable year after allocation of the NOL. X has a $10 balance in its shipping overall foreign loss account which is subject to recapture pursuant to section 904(f) as in effect for post-effective date taxable years. X will not be required to recharacterize, pursuant to section 904(f)(5), subsequent shipping income as DISC limitation income.

Example 2. Y is a domestic corporation which has a branch operation in Country B. For its taxable year ending December 31, 1987, X has a $200 net operating loss which is carried back pursuant to section 172 to its taxable year ending December 31, 1986. The net operating loss resulted from a ($100) general limitation loss and a ($100) shipping loss. Y had $100 of general limitation income and $200 of U.S. source income for its taxable year ending December 31, 1986. The separate limitation losses for 1987 are allocated pro rata to Y's 1986 general limitation income as follows: $50 of the ($100) general limitation loss ($100 x 100/200) and $50 of the ($100) shipping loss ($100 x 100/200) is allocated to Y's $100 of 1986 general limitation income. The remaining $50 of Y's general limitation loss and the remaining $50 of Y's shipping loss are allocated to Y's 1986 U.S. source income. Accordingly, Y has no foreign source income and $100 of U.S. source income for its 1986 taxable year. Y has a $50 balance in its general limitation overall foreign loss account and a $50 balance in its shipping overall foreign loss account, both of which will be subject to recapture pursuant to section 904(f) as in effect for post-effective date taxable years.

(d) *Recapture of FORI and general limitation overall foreign losses incurred in taxable years beginning before January 1, 1983.* For taxable years beginning after December 31, 1986, and before January 1, 1991, the rules set forth in § 1.904 (f)–6 shall apply for purposes of recapturing general limitation and foreign oil related income (FORI) overall foreign losses incurred in taxable years beginning before January 1, 1983 (pre-1983). For taxable years beginning after December 31, 1990, the rules set forth in this section shall apply for purposes of recapturing pre-1983 general limitation and FORI overall foreign losses.

(e) *Recapture of pre-1983 overall foreign losses determined on a combined basis.* The rules set forth in paragraph (a)(2) of this section shall apply for purposes of recapturing overall foreign losses incurred in taxable years beginning before January 1, 1983, that were computed on a combined basis in accordance with § 1.904 (f)–1(c) (1).

(f) *Transition rules for taxable years beginning before December 31, 1990.* For transition rules for taxable years beginning before January 1, 1990, see 26 CFR 1.904 (f)–13T as it appeared in the Code of Federal Regulations revised as of April 1, 1990.

[T.D. 8306, 55 FR 31381, Aug. 2, 1990]

§ 1.904(i)–1 Limitation on use of deconsolidation to avoid foreign tax credit limitations.

(a) *General rule.* If two or more includible corporations are affiliates, within the meaning of paragraph (b)(1) of this section, at any time during their taxable years, then, solely for purposes of applying the foreign tax credit provisions of section 59(a), sections 901 through 908, and section 960, the rules of this section will apply.

(1) *Determination of taxable income*—(i) Each affiliate must compute its net taxable income or loss in each separate category (as defined in § 1.904–5(a)(1), and treating U.S. source income or loss as a separate category) without regard to sections 904(f) and 907(c)(4). Only affiliates that are members of the same consolidated group use the consolidated return regulations (other than those under sections 904(f) and 907(c)(4)) in computing such net taxable income or loss. To the extent otherwise applicable, other provisions of the Code and regulations must be used in the determination of an affiliate's net taxable income or loss in a separate category.

(ii) The net taxable income amounts in each separate category determined under paragraph (a)(1)(i) of this section are combined for all affiliates to determine one amount for the group of affiliates in each separate category. However, a net loss of an affiliate (first affiliate) in a separate category determined under paragraph (a)(1)(i) of this section will be combined under this paragraph (a) with net income or loss amounts of other affiliates in the same category only if, and to the extent that, the net loss offsets taxable income, whether U.S. or foreign source, of the first affiliate. The consolidated return regulations that apply the principles of sections 904(f) and 907(c)(4) to consolidated groups will then be applied to the combined amounts in each separate category as if all affiliates were members of a single consolidated group.

(2) *Allocation.* Any net taxable income in a separate category calculated under paragraph (a)(1)(ii) of this section for purposes of the foreign tax credit provisions must then be allocated among the affiliates under any consistently applied reasonable method, taking into account all of the facts and circumstances. A method is consistently applied if used by all affiliates from year to year. Once chosen, an allocation method may be changed only with the consent of the Commissioner. This allocation will only affect the source and foreign tax credit separate limitation character of the income for purposes of the foreign tax credit separate limitation of each affiliate, and will not otherwise affect an affiliate's total net income or loss. This section applies whether the federal income tax consequences of its application favor, or are adverse to, the taxpayer.

(b) *Definitions and special rules*— For purposes of this section only, the following terms will have the meanings specified.

(1) *Affiliate*—(i) *Generally.* Affiliates are includible corporations—

(A) That are members of the same affiliated group, as defined in section 1504(a); or

(B) That would be members of the same affiliated group, as defined in section 1504(a) if—

(*1*) Any non-includible corporation meeting the ownership test of section 1504(a)(2) with respect to any such includible corporation was itself an includible corporation; or

(*2*) The constructive ownership rules of section 1563(e) were applied for purposes of section 1504(a).

(ii) *Rules for consolidated groups.* Affiliates that are members of the same consolidated group are treated as a single affiliate for purposes of this section. The provisions of paragraph (a) of this section shall not apply if the only affiliates under this definition are already members of the same consolidated group without operation of this section.

(iii) *Exception for newly acquired affiliates*—(A) With respect to acquisitions after December 7, 1995, an includible corporation acquired from unrelated third parties (First Corporation) will not be considered an affiliate of another includible corporation (Second Corporation) during the taxable year of the First Corporation beginning before the date on which the First Corporation originally becomes an affiliate with respect to the Second Corporation.

(B) With respect to acquisitions on or before December 7, 1995, an includible corporation acquired from unrelated third parties will not be considered an affiliate of another includible corporation during its taxable year beginning before the date on which the first includible corporation first becomes an affiliate with respect to that other includible corporation.

(C) This exception does not apply where the acquisition of an includible corporation is used to avoid the application of this section.

(2) *Includible corporation.* The term *includible corporation* has the same meaning it has in section 1504(b).

(c) *Taxable years.* If all of the affiliates use the same U.S. taxable year, then that taxable year must be used for purposes of applying this section. If, however, the affiliates use more than one U.S. taxable year, then an appropriate taxable year must be used for applying this section. The determination whether a taxable year is appropriate must take into account all of the relevant facts and circumstances, including the U.S. taxable years used by the affiliates for general U.S. income tax purposes. The taxable year chosen by the affiliates for purposes of applying this section must be used consistently from year to year. The taxable year may be changed only with the prior consent of the Commissioner. Those affiliates that do not use the year determined under this paragraph (c) as their U.S. taxable year for general U.S. income tax purposes must, for purposes of this section, use their U.S. taxable year or years ending within the taxable year determined under this paragraph (c). If, however, the stock of an affiliate is disposed of so that it ceases to be an affiliate, then the taxable year of that affiliate will be considered to end on the disposition date for purposes of this section.

(d) *Consistent treatment of foreign taxes paid.* All affiliates must consistently either elect under section 901(a) to claim a credit for foreign income taxes paid or accrued, or deemed paid or accrued, or deduct foreign taxes paid or accrued under section 164. See also §1.1502–4(a); §1.905–1(a).

(e) *Effective date.* Except as provided in paragraph (b)(1)(iii) of this section (relating to newly acquired affiliates), this section is effective for taxable years of affiliates beginning after December 31, 1993.

[T.D. 8627, 60 FR 56119, Nov. 7, 1995]

§1.905–1 When credit for taxes may be taken.

(a) *In general.* The credit for taxes provided in subpart A (section 901 and following), part III, subchapter N, chapter 1 of the Code, may ordinarily be taken either in the return for the year in which the taxes accrued or in which the taxes were paid, dependent upon whether the accounts of the taxpayer are kept and his returns filed using an accrual method or using the cash receipts and disbursements method. Section 905(a) allows the taxpayer, at his option and irrespective of the method of accounting employed in keeping his books, to take such credit for taxes as may be allowable in the return for the year in which the taxes accrued. An election thus made under section 905(a) (or under the corresponding provisions of prior internal revenue laws) must be followed in returns for all subsequent years, and no portion of any such taxes accrued in a year in which a credit is claimed will be allowed as a deduction from gross income in any year. See also § 1.905–4.

(b) *Foreign income subject to exchange controls.* If, however, under the provisions of the regulations under section 461, an amount otherwise constituting gross income for the taxable year from sources without the United States is, owing to monetary, exchange, or other restrictions imposed by a foreign country, not includible in gross income of the taxpayer for such year, the credit for income taxes imposed by such foreign country with respect to such amount shall be taken proportionately in any subsequent taxable year in which such amount or portion thereof is includible in gross income.

§ 1.905–2 Conditions of allowance of credit.

(a) *Forms and information.* (1) Whenever the taxpayer chooses, in accordance with paragraph (d) of § 1.901–1, to claim the benefits of the foreign tax credit, the claim for credit shall be accompanied by Form 1116 in the case of an individual or by Form 1118 in the case of a corporation.

(2) The form must be carefully filled in with all the information called for and with the calculations of credits indicated. Except where it is established to the satisfaction of the district director that it is impossible for the taxpayer to furnish such evidence, the taxpayer must provide upon request the receipt for each such tax payment if credit is sought for taxes already paid or the return on which each such accrued tax was based if credit is sought for taxes accrued. The receipt or return must be either the original, a duplicate original, or a duly certified or authenticated copy. The preceding two sentences are applicable for returns whose original due date falls on or after January 1, 1988. Any additional information necessary for the determination under part I (section 861 and following), subchapter N, chapter 1 of the Code, of the amount of income derived from sources without the United States and from each foreign country shall, upon the request of the district director, be furnished by the taxpayer. If the taxpayer upon request fails without justification to furnish any such additional information which is significant, including any significant information which he is requested to furnish pursuant to § 1.861–8(f)(5) as proposed in the FEDERAL REGISTER for November 8, 1976, the District Director may disallow the claim of the taxpayer to the benefits of the foreign tax credit.

(b) *Secondary evidence.* Where it has been established to the satisfaction of the District Director that it is impossible to furnish a receipt for such foreign tax payment, the foreign tax return, or direct evidence of the amount of tax withheld at the source, the District Director, may, in his discretion, accept secondary evidence thereof as follows:

(1) *Receipt for payment.* In the absence of a receipt for payment of foreign taxes there shall be submitted a photostatic copy of the check, draft, or other medium of payment showing the amount and date thereof, with certification identifying it with the tax claimed to have been paid, together with evidence establishing that the tax was paid for taxpayer's account as his own tax on his own income. If credit is claimed on an accrual method, it must be shown that the tax accrued in the taxable year.

(2) *Foreign tax return.* If the foreign tax return is not available, the foreign tax has not been paid, and credit is claimed on an accrual method, there shall be submitted—

(i) A certified statement of the amount shall be submitted—

(ii) Excerpts from the taxpayer's accounts showing amounts of foreign income and tax thereon accrued on its books.

(iii) A computation of the foreign tax based on income from the foreign country carried on the books and at current rates of tax to be established by data such as excerpts from the foreign law, assessment notices, or other documentary evidence thereof.

(iv) A bond, if deemed necessary by the District Director, filed in the manner provided in cases where the foreign return is available, and

(v) In case a bond is not required, a specific agreement wherein the taxpayer shall recognize its liability to report the correct amount of tax when ascertained, as required by the provisions of section 905 (c).

If at any time the foreign tax receipts or foreign tax returns become available to the taxpayer, they shall be promptly submitted to the district director.

(3) *Tax withheld at source.* In the case of taxes withheld at the source from dividends, interest, royalties, compensation, or other form of income, where evidence of withholding and of the amount withheld cannot be secured from those who have made the payments, the district director may, in his discretion, accept secondary evidence of such withholding and of the amount of the tax so withheld, having due regard to the taxpayer's books of account and to the rates of taxation prevailing in the particular foreign country during the period involved.

(c) *Credit for taxes accrued but not paid.* In the case of a credit sought for a tax accrued but not paid, the district director may, as a condition precedent to the allowance of a credit, require a bond from the taxpayer, in addition to Form 1116 or 1118. If such a bond is required, Form 1117 shall be used by an individual or by a corporation. It shall be in such sum as the Commissioner may prescribe, and shall be conditioned for the payment by the taxpayer of any amount of tax found due upon any redetermination of the tax made necessary by such credit proving incorrect, with such further conditions as the district director may require. This bond shall be executed by the taxpayer, or the agent or representative of the taxpayer, as principal, and by sureties satisfactory to and approved by the Commissioner. See also 6 U.S.C. 15.

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 7292, 38 FR 33300, Dec. 3, 1973; 38 FR 34802, Dec. 19, 1973; T.D. 7456, 42 FR 1214, Jan. 6, 1977; T.D. 8210, 53 FR 23613, June 23, 1988; T.D. 8412, 57 FR 20653, May 14, 1992; T.D. 8759, 63 FR 3813, Jan. 27, 1998]

§1.905–3T Adjustments to the pools of foreign taxes and earnings and profits when the allowable foreign tax credit changes (temporary).

(a) *Foreign tax redeterminations subject to sections 985 through 989 of the Internal Revenue Code.* This section applies to a foreign tax redetermination that occurs in a taxpayer's taxable year beginning after December 31, 1986 with respect to—

(1) Tax that is paid or accrued by or on behalf of a taxpayer (including taxes paid or accrued prior to January 1, 1987), or

(2) Tax that is deemed paid or accrued by a taxpayer under section 902 or section 960 with respect to earnings and profits of a foreign corporation accumulated in taxable years of the foreign corporation beginning after December 31, 1986.

(b) *Currency translation rules*—(1) *Accrual of foreign tax.* Accrued and unpaid foreign tax liabilities denominated in foreign currency, as determined under foreign law, shall be translated into dollars at the exchange rate as of the last day of the taxable year of the taxpayer.

(2) *Payments of foreign tax.* Foreign tax liabilities denominated in foreign currency shall be translated into dollars at the rate of exchange for the date of the payment of the foreign tax. Tax withheld in foreign currency shall be translated into dollars at the rate for the date on which the tax is withheld. Estimated tax paid in foreign currency shall be translated into dollars at the rate for the date on which the estimated tax payment is made.

(3) *Refunds of foreign tax.* A refund of foreign tax shall be translated into dollars using the exchange rate for the date of the payment of the foreign taxes. If a refund of foreign tax relates to foreign taxes paid on more than one date, then the refund shall be deemed to be derived from, and shall reduce, the last payment of foreign taxes first, to the extent thereof. See §1.905–3T(d)(3) relating to the method of adjustment of a foreign corporation's pools of earnings and profits and foreign taxes.

(4) *Allocation of refunds of foreign tax.* Refunds of foreign tax shall be allocated to the same separate category as

foreign taxes to which the refunded taxes relate. Refunds are related to foreign taxes of a separate category if the foreign tax that was refunded was imposed with respect to that separate category. See section 904(d) and § 1.904–6 concerning the allocation of taxes to separate categories of income. Earnings and profits of a foreign corporation in the separate category to which the refund relates shall be increased to reflect the foreign tax refund.

(5) *Basis of foreign currency refunded.* A recipient of a refund of foreign tax shall detemine its basis in the currency refunded under the following rules.

(i) If the functional currency of the qualified business unit (as defined in section 989 and the regulations thereunder, hereinafter ''QBU'') that paid the tax and received the refund is the United States dollar or the person receiving the refund is not a QBU, then the recipient's basis in the foreign currency refunded shall be the dollar value of the refund determined, under paragraph (b)(2) of this section, on the date the foreign tax was paid.

(ii) If the functional currency of the QBU receiving the refund is not the United States dollar and is different from the currency in which the foreign tax was paid, then the recipient's basis in the foreign currency refunded shall be equal to the functional currency value of the non-functional refunded translated into functional currency at the exchange rate between the functional currency and the non-functional currency, determined under paragraph (b)(2) of this section, on the date the foreign tax was paid.

(iii) If the functional currency of the QBU receiving the refund is the currency in which the refund was made, then the recipient's basis in the currency received shall be the amount of the functional currency received.

For purposes of determining exchange gain or loss on the initial payment of foreign tax in a non-functional currency, see section 988. For purposes of determining subsequent exchange gain or loss on the disposition of non-functional currency the basis of which is determined under this rule, see section 988.

(c) *Foreign tax redetermination.* For purposes of this section, the term ''foreign tax redetermination'' means a change in the foreign tax liability/ that may affect a United States taxpayer's foreign tax credit. A foreign tax redetermination includes—

(1) A refund of foreign taxes;

(2) A difference between the dollar value of the accrued foreign tax and the dollar value of the foreign tax actually paid attributable to differences in the units of foreign currency paid and the units of foreign currency accrued; or

(3) A difference between the dollar value of the accrued foreign tax and the dollar value of the foreign tax actually paid attributable to fluctuations in the value of the foreign currency relative to the dollar between the date of accrual and the date of payment.

(d) *Redetermination of United States tax liability*—(1) *Foreign taxes paid directly by a United States person.* If a foreign tax redetermination occurs with respect to foreign tax paid or accrued by or on behalf of a United States taxpayer, then a redetermination of the United States tax liability is required for the taxable year for which the foreign tax was claimed as a credit. See § 1.905–4T(b) which requires notification to the Internal Revenue Service of a foreign tax redetermination in situations in which a redetermination of United States liability is required. However, a redetermination of United States tax liability is not required (and a taxpayer need not notify the Service) if the foreign tax redetermination is described in paragraph (c)(3) (that is, it is caused solely by a foreign currency fluctuation), and the amount of the foreign tax redetermination with respect to the foreign country is less than the lesser of ten thousand dollars or two percent of the total dollar amount of the foreign tax initially accrued with respect to that foreign country for the taxable year. In such case, an appropriate adjustment shall be made to the taxpayer's United States tax liability in the taxable year during which the foreign tax redetermination occurs.

(2) *Foreign taxes deemed paid under sections 902 or 960*—(i) *Redetermination of the United States tax liability not required.* Subject to the special rule of paragraph (d)(4), a redetermination of

United States tax liability is not required to account for the effect of a redetermination of foreign tax paid or accrued by a foreign corporation on the foreign taxes deemed paid by a United States corporation under sections 902 or 960. Instead, adjustments shall be made, and notification of such adjustments shall be filed, as required by paragraphs (d) (2) and (3) of this section.

(ii) *Adjustments to pools.* In the case of a foreign tax redetermination that affects the amount of foreign taxes deemed paid by a United States corporation for a taxable year—

(A) If the foreign tax redetermination occurs more than 90 days before the due date (determined with extensions) of the United States taxpayer's United States income tax return for such taxable year and before the taxpayer actually files that return, then that United States taxpayer shall adjust the foreign tax credit to be claimed on that return for such taxable year to account for the effect of the foreign tax redetermination (including the impact of the foreign tax redetermination on the earnings and profits of the foreign corporation);

(B) If a foreign tax redetermination occurs after the filing of the United States tax return for such taxable year, than appropriate upward or downward adjustments shall be made at the time of the foreign tax redetermination to the pool of foreign taxes and the pool of earnings and profits of the foreign corporation as provided in paragraph (d)(3) to reflect the effect of the foreign tax redetermination in calculating foreign taxes deemed paid with respect to distributions and inclusions (and the amount of such distributions and inclusions) that are includible in taxable years subsequent to the taxable year for which such tax return is filed; and

(C) If the foreign tax redetermination occurs within 90 days of the due date (determined with extensions) of the United States tax return and before the taxpayer actually files its tax return, then the taxpayer may elect either to adjust the foreign tax credit to be claimed on that return in the manner described in subparagraph (A) of this paragraph (d)(2)(ii) or adjust the pools of foreign taxes and earnings and profits to reflect the effect of the foreign tax redetermination in the manner described in paragraph (d)(2)(ii)(B), provided that consistent elections are made by the taxpayer and all other members of the affiliated group, as defined in section 1504(a), of which the taxpayer is a member, with respect to all foreign tax redeterminations occurring on or before any date within the 90 day period.

(iii) *Reporting requirements.* If an adjustment to the appropriate pool of foreign taxes and earnings and profits is required under paragraphs (d)(2)(ii) (B) or (C), the United States corporation shall attach a notice of such adjustment to its return for the year with or within which ends the foreign corporation's taxable year during which the foreign tax redetermination occurs. The United States corporation shall provide: its name and identifying number; the foreign corporation's name, address, and identifying number (if any); the amount of any refunds of foreign taxes and the exchange rate as of the time of the original payment of the refunded foreign taxes; the amounts of unrefunded foreign taxes when paid and when accrued in foreign currency, the exchange rates for the accrual and payment dates of unrefunded foreign taxes, and the dollar amounts of unrefunded foreign taxes paid and accrued; the current balances of the pools of earnings and profits and foreign taxes before and after the foreign tax redetermination; and such other information as the Service may require. If a taxpayer may be required to redetermine its United States tax liability under paragraph (d)(4)(ii) of § 1.905–3T (relating to foreign tax adjustments of two percent or more), the notice shall specifically identify foreign tax adjustments described in such paragraph and shall include a complete factual description justifying the overaccrual of foreign tax. If the United States corporation fails to attach the required notice, to provide the necessary information, or to make the required adjustments, then it must provide notification of the foreign tax redetermination under § 1.905–4T. The Service may, in its discretion, make a redetermination of United States tax liability, and subject the taxpayer to the interest provisions of section 6601 and the penalty provisions of section 6689 and the regulations thereunder.

(iv) *Examples.* The following examples illustrate the application of paragraph (d)(2) (ii) and (iii) of this section. In each case, the exceptions of paragraph (d)(4) do not apply.

Example 1. Controlled foreign corporation S is a wholly-owned subsidiary of domestic corporation P. P is a fiscal year taxpayer whose taxable year ends on June 30. P does not request an extension for filing its United States tax return for the taxable year ending June 30, 1988 and files its return on its September 15, 1988 due date. S is a calendar year taxpayer. In 1987, S earned 100u of subpart F income and accrued foreign taxes with respect to that income of 20u. At the time of accrual, the exchange rate was $1:4u. S paid the 20u of accrued tax with respect to its income on June 15, 1988, when the exchange rate was $1:2u. P includes the 100u in gross income under section 951(a) and claims a credit under section 960. P must use the amount of taxes actually paid by S (20u=$10) in determining foreign taxes deemed paid by P. Pursuant to paragraph (d)(2)(ii)(A), P is required to compute foreign taxes deemed paid taking into account the foreign tax redetermination that occurred on June 15, which was more than 90 days before the due date of P's tax return (September 15, 1988) and before P actually filed its return.

Example 2. The facts are the same as in *Example* 1, except that S paid its tax liability on October 16, 1988. P filed its United States income tax return for 1987 on September 15, 1987, before the foreign tax redetermination. P properly computed its section 960 credit on its 1987 return with respect to its 100u subpart F inclusion on the basis of the amount of accrued foreign tax. Subject to the special rule of paragraph (d)(3)(iv), P is required, pursuant to the provisions of paragraph (d)(2)(ii)(B), to make the appropriate adjustments to the relevant pool of foreign taxes and pool of earnings and profits for purposes of calculating foreign taxes deemed paid in subsequent taxable years.

Example 3. Controlled foreign corporation S is a wholly-owned subsidiary of domestic corporation, P. P is a fiscal year (June 30) taxpayer, and S is a calendar year taxpayer. In 1987, S earned 100u of general limitation manufacturing income that was not subpart F income. S accrued 40u in foreign tax with respect to that income as of the end of its taxable year when the exchange rate was $1:4u. During 1987 and 1988, P received no distributions (and had no section 951(a)(1) inclusions) from S. S paid its taxes on March 15, 1988 when the exchange rate was $1:2u (40u=$20). S received a refund of foreign tax of 20u on July 1, 1988. No section 905 (c) adjustment is required on these facts. As of the end of 1988, S's pool of general limitation accumulated earnings and profits equals 80u (100u − 20u), and its pool of foreign taxes imposed on general limitation income equals $10 (40u − 20u=20u, translated as of the date of payment ($1:2u), equals $10)

(3) *Adjustments to the pools of earnings and profits and foreign taxes*—(i) *In general.* If a foreign corporation is required to adjust its earnings and profits and foreign taxes under § 1.905–3T(d)(2)(ii) (B) or (C), then that adjustment shall be made in accordance with the provisions of this section.

(ii) *Refunds of foreign taxes.* A foreign corporation shall reduce its pool of foreign taxes in the appropriate separate category by the United States dollar amount of a foreign tax refund translated as provided in paragraph (b)(3). A foreign corporation shall increase its pools of earnings and profits in the appropriate separate category by the functional currency amount of the foreign tax refund. The allocation of the refund to the appropriate separate categories shall be made in accordance with §§ 1.905–3T(b)(4) and 1.904–6. If a foreign corporation receives a refund of foreign tax in a currency other than its functional currency, that refund shall be translated into its functional currency, for purposes of computing the increase to its pool of earnings and profits, at the exchange rate as of the date of the payment of the foreign tax.

(iii) *Additional assessments of foreign tax.* A foreign corporation shall increase its pool of foreign taxes in the appropriate separate category by the United States dollar amount of the additional foreign tax paid or accrued translated as provided in paragraphs (b) (1) and (2). A foreign corporation shall decrease its earnings and profits in the appropriate separate category by the functional currency amount of the additional foreign tax paid or accrued. The allocation of the additional amount of foreign tax among separate categories shall be made in accordance with § 1.904–6.

(iv) *Refunds of foreign taxes of lower tier foreign corporations that cause deficits in foreign tax pools.* If a lower tier foreign corporation receives a refund of foreign tax after making a distribution to an upper tier foreign corporation and the refund would have the effect of reducing below zero the lower tier corporation's pool of foreign taxes in any separate category, then both the lower tier and upper tier corporations shall adjust the appropriate pool of foreign taxes to reflect that refund. The upper tier foreign corporation shall adjust its pool of foreign taxes by the difference between the United States dollar amount of foreign tax deemed paid by the upper tier foreign corporation prior to the refund and the United States dollar amount of foreign tax recomputed as if the refund occurred prior to the distribution. The upper tier foreign corporation shall not make any adjustment to its earnings and profits because foreign taxes deemed paid by the upper tier corporation are not included in the upper tier corporation's earnings and profits. The lower tier foreign corporation shall adjust its pool of foreign taxes by the difference between the United States dollar amount of the refund and the United States dollar amount of the adjustment to the upper tier foreign corporation's pool of foreign taxes. The earnings and profits of the lower tier foreign corporation shall be adjusted to reflect the full amount of the refund. The provisions of this paragraph (d)(3)(iv) do not apply to distributions or inclusions to a United States person. See §1.905–3T(d)(4)(iv) for rules relating to actual or deemed distributions made to a United States person.

(v) *Examples.* The following examples illustrate the application of this paragraph (d)(3).

Example 1. Controlled foreign corporation (CFC) is a wholly-owned subsidiary of its domestic parent, P. Both CFC and P are calendar year taxpayers. CFC has a functional currency, the u, other than the dollar and maintains its pool of earnings and profits in that currency. At the end of year 1, CFC paid 100u in taxes with respect to non-subpart F income when the exchange rate was $1:1u. In year 2, on a date that is after P filed its United States tax return, CFC receives a refund of 50u of its year 1 taxes. CFC made no distributions to P in year 1. In accordance with paragraph (d)(3)(ii) and subject to paragraph (d)(4), CFC shall reduce its pool of foreign taxes by $50 and increase its pool of earnings and profits by 50u.

Example 2. Controlled foreign corporation (CFC) is a wholly-owned subsidiary of its domestic parent, P. Both CFC and P are calendar year taxpayers. In year 1 CFC earned 400u of general limitation manufacturing income and 200u of shipping income. On date 1, CFC paid 200u of foreign tax, 100u with respect to general limitation manufacturing income, and 100u with respect to shipping income. On date 1, the exchange rate is $1:1u. On date 2, a date that is after the filing of P's United States tax return, CFC receives a refund of 75u, 25u of which is related to the manufacturing income and 50u of which is related to the shipping income. Subject to paragraph (d)(4), CFC shall reduce its pools of foreign taxes related to general limitation income and shipping income by $25 and $50, respectively (because the refund is translated at the rate of exchange prevailing on the date of payment of the foreign tax), and increase the respective pools of earnings and profits by 25u and 50u (because the earnings and profits are increased by the functional currency amount of the refund received). If the refund to CFC was not specifically related to any separate category of income, CFC, pursuant to §1.904–6, is required to allocate that refund in accordance with the provisions of that section.

Example 3. CFC1 is a foreign corporation that is wholly-owned by P, a domestic corporation. CFC2 is a foreign corporation that is wholly-owned by CFC1. Unless stated otherwise, the exchange rate is always $1.1u. In year 1, CFC2 has earnings and profits of 100u (net of foreign taxes) and paid 100u in foreign taxes with respect to those earnings. CFC2 has no income and pays no foreign taxes in years 2 and 3. CFC1 has no earnings and profits other than those resulting from distributions from CFC2 and pays no foreign taxes.

Situation (i). In year 2, CFC2 receives a refund of foreign taxes of 25u. In year 3, CFC2 makes a distribution of CFC1 of 50u. CFC1 is deemed to have paid $30 of foreign taxes with respect to that distribution (50u/125u×$75). At the end of year 3, the following reflects the pools of earnings and profits and foreign taxes of CFC1 and CFC2.

	Earnings and profits(u)	Foreign taxes
CFC2:		
Y1	100	$100
Y2	100+25=125	$100 – <$25>=$75
Y3	125 – <50>=75	$75 – <$30>=$45
CFC1:		
Y3	50	30

Situation (ii). The facts are the same as situation (i), except that CFC2 makes a distribution of 50u in year 2 and receives a refund of 75u in year 3. In year 2 the amount of foreign taxes deemed paid by CFC1 would be $50 (50u/100u×$100). Both CFC1 and CFC2 must adjust their pools of foreign taxes in year 3 because the year 3 refund would have the effect of reducing below zero CFC2's pool of foreign taxes. CFC1 reduces its pool of foreign taxes by $42.86 determined as follows: $50 (foreign taxes deemed paid on the distribution from CFC2) −$7.14 (the foreign taxes that would have been deemed paid had the refund occurred prior to the distribution (50u/175u×$25)). CFC2 reduces its pool of foreign taxes by $32.14 (the difference between the dollar value of 75u refund determined as of the date of payment of the foreign tax and the $42.86 adjustment to CFC1's pool of foreign taxes). At the end of year 3, the following reflects the pools of foreign taxes and earnings and profits for CFC1 and CFC2.

	Earnings and profits(u)	Foreign taxes
CFC2:		
Y1	100	$100
Y2	100 − <50>=50	$100 − <$50>=$50
Y3	50+75=125	$50 − <$32.14>=$17.86
CFC1:		
Y2	50	$50
Y3	50	$50 − <$42.86>=$7.14

(4) *Exceptions.* The provisions of paragraph (d)(2) of this section shall not apply and a redetermination of United States tax liability is required to account for the effect of a redetermination of foreign tax on foreign taxes deemed paid by a United States corporation under section 902 or section 960 to the extent provided in this paragraph (d)(4).

(i) *Hyperinflationary currencies.* A redetermination of United States tax liability is required if the foreign tax liability is in a hyperinflationary currency. The term ''hyperinflationary currency'' means the currency of a country in which there is cumulative inflation during the base period of at least 100% as determined by reference to the consumer price index of the country listed in the monthly issues of International Financial Statistics, or a successor publication, of the International Monetary Fund. ''Base period'' means, with respect to any taxable year, the thirty-six calendar months immediately preceding the last day of such taxable year (see § 1.985–2T(b)(2)).

(ii) *Foreign tax adjustment of two percent or more.* If the foreign tax liability of a United States taxpayer is in a currency other than a hyperinflationary currency and the amount of foreign tax accrued for the taxable year to a foreign country, as measured in units of foreign currency, exceeds the amount of foreign tax paid to that foreign country for the taxable year (as measured in units of foreign currency) by at least two percent, then the Service, in its discretion, may require a redetermination of United States tax liability.

(iii) *Example.* The provisions of paragraph (d)(4)(ii) are illustrated by the following example.

Example. Controlled foreign corporation is a wholly-owned subsidiary of its domestic parent, P. Both CFC and P are calendar year taxpayers. In year 1, CFC has general limitation income of 200u and, by year-end, had accrued foreign taxes with respect to that income of 100u when the exchange rate is $1:1u. In year 1, CFC makes a distribution to P of 50u, half of its earnings and profits of 100u. P is deemed to have paid $50 of foreign tax with respect to that distribution (50u/100u × $100). In year 2, after P has filed its United States tax return, CFC pays its actual foreign tax liability of 98.50 when the exchange rate is $1:1u. Subject to paragraph (d)(4), CFC must reduce its pool of foreign taxes by $1.50 and increase the corresponding pool of earnings and profits by 1.50u. (The refund is translated into dollars at the rate of exchange prevailing on the date of payment of the foreign tax, and the adjustment to earnings and profits is in ''u''s.) In year 2, CFC earns 200u of general limitation income and accrues 120u of tax when the exchange rate is $1:1u. In year 2, CFC distributes 100u to P. P is deemed to have paid $128 of foreign tax (($48.50 + $120) × 100u/(51.50u + 80u)). In year 3, after P filed its year 2 United States tax return, CFC pays its actual year 2 tax liability of 100u when the exchange rate is $1:1u. The Service may require P to recompute its year 2 United States tax liability to account for the effect of the overaccrual of foreign tax pursuant to § 1.905–3T(d)(4)(ii).

(iv) *Deficit in foreign tax pool.* A redetermination of United States tax liability is required if a foreign tax redetermination occurs with respect to foreign taxes deemed paid with respect to a subpart F inclusion or an actual distribution which has the effect of reducing below zero the distributing foreign corporation's pool of foreign taxes in any separate category. Whether a foreign corporation's pool of foreign taxes is reduced below zero shall be determined at the close of the taxable year of the foreign corporation in which the foreign tax redetermination occurred. In no case shall taxes paid or accrued with respect to one separate category be applied to offset a negative balance in any other separate category.

(v) *Example.* The provisions of paragraph (d)(4)(iv) are illustrated by the following example.

Example. Controlled foreign corporation (CFC) is a wholly-owned subsidiary of P, a domestic corporation. Both P and CFC are calendar year taxpayers. In year 1, CFC has 200u of general limitation income with respect to which 100 of taxes are paid when the exchange rate was $1:1u. In year 1, CFC distributes half (50u) of its earnings and profits (100u). Under section 902, P is deemed to have paid $50 of the foreign taxes paid by CFC with respect to that distribution (50u/100u × $100). In year 2, CFC receives a refund of all of its year 1 taxes (100u). In year 2, CFC earns an additional 290u of income—200u of shipping income with respect to which 100u of taxes are paid, and 90u of general limitation income with respect to which 45u of taxes are paid when the exchange rate was $1:1u. P is required to redetermine its year 1 United States tax liability to account for the foreign tax redetermination occurring in year 2 because, if an adjustment to CFC's pool of general limitation taxes were made, the pool would be <$5≤. CFC is not permitted to carry a deficit in any pool of foreign taxes; therefore, P must redetermine its United States liability for year 1.

(e) *Foreign tax imposed on foreign refund.* If the redetermination of foreign tax for a taxable year or years is occasioned by the refund to the taxpayer of taxes paid to a foreign country or possession of the United States and the foreign country or possession imposed tax on the refund, then the amount of the refund shall be considered to be reduced by the amount of any tax described in section 901 imposed by the foreign country or possession of the United States with respect to such refund. In such case, no other credit under section 901, and no deduction under section 164, shall be allowed for any taxable year with respect to such tax imposed on such refund.

(f) *Reduction of corporate level tax on distribution of earnings and profits.* If a United States shareholder of a controlled foreign corporation receives a distribution out of previously taxed earnings and profits and a foreign country has imposed tax on the income of the controlled foreign corporation, which tax is reduced on distribution of the earnings and profits of the corporation, then the United States shareholder shall redetermine its United States tax liability for the year or years affected.

[T.D. 8210, 53 FR 23613, June 23, 1988]

§ 1.905–4T Notification and redetermination of United States tax liability (temporary).

(a) *Application of this section.* The rules of this section shall apply if, as a result of a foreign tax redetermination as defined in § 1.905–3T(c), a redetermination of United States tax liability is required under § 1.905–3T.

(b) *Notification*—(1) *General rules.* Any United States taxpayer for which a redetermination of United States tax liability is required shall notify the Secretary in the manner described in this paragraph (b), and the Service will redetermine the United States tax liability of the United States taxpayer. Notification shall be made by filing Form 1120X or 1040X, and Form 1118 or 1116, in the manner described in the instructions to Form 1118 with the Service Center where the taxpayer filed the tax return claiming the foreign tax credit to which the notice relates. Notification shall be filed within the time prescribed by and shall contain the information required by this paragraph (b). The amount of tax, if any, due upon a redetermination shall be paid by the taxpayer after notice and demand has been made by the Service. Subchapter B of chapter 63 of the Code (relating to deficiency procedures) shall not apply with respect to the assessment of the amount due upon such redetermination. In accordance with section 905(c) and section 6501(c)(5), the amount of additional tax due shall be assessed and collected without regard to the provisions of section 6401(a) (relating to limitations on assessment and collection). The amount of tax, if any, shown by a redetermination to have been overpaid shall be credited or refunded to the taxpayer in accordance with the provisions of § 301.6511(d)–3.

(2) *Time for filing.* If a redetermination of United States tax liability is necessitated by a foreign tax redetermination that reduced the amount of foreign taxes paid or deemed paid, then the United States taxpayer shall file the notification with respect to such foreign tax redetermination within 180

days after the date the foreign tax redetermination occurs. If a redetermination of United States liability is necessitated by a foreign tax redetermination that increased the amount of foreign taxes paid or deemed paid, then the United States taxpayer claiming foreign tax credits for accrued foreign taxes must notify the Service within the period provided by section 6511(d)(3)(A). Filing of the appropriate notification within the prescribed time shall constitute a claim for the refund of United States tax.

(3) *Notification contents*—(i) *In general.* The taxpayer shall provide the Service with information sufficient to redetermine the tax including, but not limited to the following: the United States taxpayer's name, address, and identifying number; the taxable year or years of the taxpayer that are affected by the redetermination of United States tax liability; information required in paragraph (b) (ii) and (iii) below the respect to foreign tax redeterminations affecting the redetermination of United States tax liability, including information in a form that will enable the Service to verify and compare the original computations with respect to a claimed foreign tax credit, the revised computations resulting from the foreign tax redeterminations, and the net changes resulting therefrom.

(ii) *Direct foreign tax credit.* In the case of foreign taxes paid by or on behalf of the taxpayer, if—

(A) The taxpayer receives a refund of foreign tax, the taxpayer's information shall include: the amount of foreign taxes paid in foreign currency; the date or dates the foreign taxes were paid; the rate of exchange on each date the foreign taxes were paid; the amount of the foreign taxes refunded in foreign currency;

(B) The foreign taxes when paid differ from the accrued amounts claimed as credits by the taxpayer because of fluctuation in the value of the foreign currency in which the foreign taxes were paid, the taxpayer's information shall include the following: the date on which foreign taxes were accrued and the dates on which the foreign taxes were paid; the rates of exchange for each such date; and the amount of foreign taxes accrued or paid in foreign currency on each such date;

(C) The foreign taxes when paid differ from accrued amounts claimed as credits by the taxpayer because the taxpayer is assessed additional or less foreign tax, the taxpayer's information shall include the following: the original amounts and information described in subdivision (B) of this paragraph (b)(3)(ii); the amount of additional or reduced foreign tax in foreign currency; and the revised amounts and information described in subdivision (B) of this paragraph (b)(3)(ii).

(iii) *Foreign taxes deemed paid.* In the case of foreign taxes paid or accrued by a foreign corporation that are deemed paid or accrued under section 902 or section 960 and with respect to which the taxpayer is required to redetermine its United States tax liability, the United States taxpayer's information shall include the following: the foreign corporation's name and identifying number (if any); the dates and amounts of any dividend distributions or other inclusions made out of earnings and profits for the affected year or years; and the amount of earnings and profits from which such dividends were paid for the affected year or years; and information described in paragraph (b)(3)(ii) as applied to the foreign corporation. In the case of a failure to attach the required notification or to make the required adjustments described in §1.905–3T(d)(2)(iii), the taxpayer's information shall also include a complete factual description justifying that failure.

(c) *Interest and penalty*—(1) *General rules.* If a foreign tax redetermination results in a redetermination of United States tax liability, then interest shall be computed on the deficiency or overpayment in accordance with sections 6601 and 6611 and the regulations thereunder. No interest shall be assessed or collected on any deficiency resulting from a refund of foreign tax for any period before the receipt of the refund, except to the extent interest was paid by the foreign country or possession of the United States on the refund for the period. In no case, however, shall interest assessed and collected pursuant to the preceding sentence for any period before receipt of the refund exceed the amount that otherwise would have been assessed and collected under section 6601 and the regulations thereunder for that period. Interest shall be assessed from the time the taxpayer (or the foreign corporation of which the taxpayer is a shareholder) receives a refund until the taxpayer pays the additional tax due the United States.

(2) *No interest on adjustments to pools of foreign taxes.* A deficiency or overpayment of United States tax liability does not result from a redetermination of foreign tax unless a redetermination of United States liability is required. Consequently, no interest will be paid by or to a United States corporation as a result of adjustments by a foreign corporation to its pools of foreign taxes and earnings and profits under paragraph (d)(2) of § 1.905–3T.

(3) *Imposition of penalty.* Failure to comply with the provisions of this section shall subject the taxpayer to the penalty provisions of section 6689 and the regulations thereunder.

(d) *Effective date.* The provisions of this section apply to foreign tax redeterminations described in § 1.905–3T(a). Notwithstanding paragraph (b)(2) of this section (relating to time for filing the required notice), the taxpayer shall have 180 days after the publication of an Announcement in the Internal Revenue Bulletin notifying taxpayers of the availability of the Forms and instructions to comply with the provisions of this section. In no case, however, shall this paragraph (d) operate to extend the statute of limitations provided by section 6511(d)(3)(A).

[T.D. 8210, 53 FR 23617, June 23, 1988]

§ 1.905–5T Foreign tax redeterminations and currency translation rules for foreign tax redeterminations occurring in taxable years beginning prior to January 1, 1987 (temporary).

(a) *In general.* This section sets forth rules governing the application of section 905(c) to foreign tax redeterminations occurring prior to January 1, 1987. However, the rules of this section also apply to foreign tax redeterminations occurring after December 31, 1986 with respect to foreign tax deemed paid under section 902 or section 960 with respect to earnings and profits accumulated in taxable years of a foreign corporation beginning prior to January 1, 1987.

(b) *Currency translation rules*—(1) *Foreign taxes paid by the taxpayer and certain foreign taxes deemed paid.* Foreign taxes paid in foreign currency that are paid by or on behalf of a taxpayer or deemed paid under section 960 (or under section 902 in a deemed distribution under section 1248) shall be translated into dollars at the rate of exchange for the date of the payment of the foreign tax. Refunds of such taxes shall be translated into dollars at the rate of exchange for the date of the refund.

(2) *Foreign taxes deemed paid on an actual distribution.* Foreign taxes deemed paid by a taxpayer under section 902 with respect to an actual distribution and refunds of such taxes shall be translated into dollars at the rate of exchange for the date of the distribution of the earnings to which the taxes relate.

(c) *Foreign tax redetermination.* The term ‘‘foreign tax redetermination’’ means a foreign tax redetermination as defined in § 1.905–3T(c).

(d) *Redetermination of United States tax liability*—(1) *In general.* A redetermination of United States tax liability is required with respect to any foreign tax redetermination subject to this section and shall be subject to the requirements of § 1.905–4T(b). The content of the notification required by this paragraph (d) shall be the same as provided in § 1.905–4(b)(3), except as modified by paragraphs (d) (2), (3), and (4) of this section.

(2) *Refunds.* In the case of any refund of foreign tax, the rate of exchange on the date of the refund shall be included in the information required by § 1.905–4T(b)(3)(ii)(A).

(3) *Foreign taxes deemed paid under section 902.* In the case of foreign taxes paid or accrued by a foreign corporation that are deemed paid or accrued under section 902 with respect to an actual distribution and with respect to which there was a redetermination of foreign tax, the United States taxpayer's information shall include, in lieu of the information required by paragraph (b)(3)(iii), the following: the foreign corporation's name and identifying number (if any); the date on

which the foreign taxes were accrued and the dates on which the foreign taxes were paid; the amounts of the foreign taxes accrued or paid in foreign currency on each such date; the dates on which any foreign taxes were refunded and the amounts thereof; the dates and amounts of any dividend distributions made out of earnings and profits for the affected year or years; the rate of exchange on the date of any such distribution; and the amount of earnings and profits from which such dividends were paid for the affected year or years.

(4) *Foreign taxes deemed paid under section 960.* In the case of foreign taxes paid under section 960 (or under section 902 in the case of an amount treated as a dividend under section 1248), the rate of exchange determined under § 1.964–1 for translating accrued foreign taxes shall be included in the information required by § 1.905–4T(b)(3)(iii) in lieu of the exchange rate for the date of the accrual.

(e) *Exception for de minimis currency fluctuations.* A United States taxpayer need not notify the Service of a foreign tax redetermination that results solely from a currency fluctuation if the amount of such redetermination with respect to the foreign country is less than the lesser of ten thousand dollars or two percent of the total dollar amount of the foreign tax, prior to the adjustment, initially accrued with respect to that foreign country for the taxable year.

(f) *Special effective date.* If a foreign tax redetermination within the meaning of this section occurs after December 31, 1979, and before July 25, 1988, and the taxpayer has not notified the Service before that date of the redetermination as required under § 1.905–3 as it appeared in the CFR dated April 1, 1988, then the taxpayer shall have 180 days after the publication of an Announcement in the Internal Revenue Bulletin notifying taxpayers of the availability of the Forms and instructions to comply with the provisions of this section. Failure to comply with the provisions of this section shall subject the taxpayer to the penalty provisions of section 6689 and the regulations thereunder. In no case, however, shall this paragraph operate to extend the statute of limitations provided by section 6511(d)(3)(A).

[T.D. 8210, 53 FR 23618, June 23, 1988]

§ 1.907–0 Outline of regulation provisions for section 907.

This section lists the paragraphs contained in §§ 1.907(a)–0 through 1.907(f)–1.

§ 1.907(a)–0 Introduction (for taxable years beginning after December 31, 1982).

(a) Effective dates.
(b) Key terms.
(c) FOGEI tax limitation.
(d) Reduction of creditable FORI taxes.
(e) FOGEI and FORI.
(f) Posted prices.
(g) Transitional rules.
(h) Section 907(f) carrybacks and carryovers.
(i) Statutes covered.

§ 1.907(a)–1 Reduction in taxes paid on FOGEI (for taxable years beginning after December 31, 1982).

(a) Amount of reduction.
(b) Foreign taxes paid or accrued.
(1) Foreign taxes.
(2) Foreign taxes paid or accrued.
(c) Limitation level.
(1) In general.
(2) Limitation percentage of corporations.
(3) Limitation percentage of individuals.
(4) Losses.
(5) Priority.
(d) Illustrations.
(e) Effect on other provisions.
(1) Deduction denied.
(2) Reduction inapplicable.
(3) Section 78 dividend.
(f) Section 904 limitation.

§ 1.907(b)–1 Reduction of creditable FORI taxes (for taxable years beginning after December 31, 1982).

§ 1.907(c)–1 Definitions relating to FOGEI and FORI (for taxable years beginning after December 31, 1982).

(a) Scope.
(b) FOGEI.
(1) General rule.
(2) Amount.
(3) Other circumstances.
(4) Income directly related to extraction.
(5) Income not included.
(6) Fair market value.
(7) Economic interest.
(c) Carryover of foreign oil extraction losses.
(1) In general.
(2) Reduction.
(3) Foreign oil extraction loss defined.
(4) Affiliated groups.
(5) FOGEI taxes.
(6) Examples.
(d) FORI.

(1) In general.
(2) Transportation.
(3) Distribution or sale.
(4) Processing.
(5) Primary product from oil.
(6) Primary product from gas.
(7) Directly related income.
(e) Assets used in a trade or business.
(1) In general.
(2) Section 907(c) activities.
(3) Stock.
(4) Losses on sale of stock.
(5) Character of gain or loss.
(6) Allocation of amount realized.
(7) Interest.
(f) Terms and items common to FORI and FOGEI.
(1) Minerals
(2) Taxable income.
(3) Interest on working capital.
(4) Exchange gain or loss.
(5) Allocation.
(6) Facts and circumstances.
(g) Directly related income.
(1) In general.
(2) Directly related services.
(3) Leases and licenses.
(4) Related person.
(5) Gross income.
(h) Coordination with other provisions.
(1) Certain adjustments.
(2) Section 901(f).

§1.907(c)–2 Section 907(c)(3) items (for taxable years beginning after December 31, 1982).

(a) Scope.
(b) Dividend.
(1) Section 1248.
(2) Section 78 dividend.
(c) Taxes deemed paid.
(1) Voting stock test.
(2) Dividends and interest.
(3) Amounts included under section 951(a).
(d) Amount attributable to certain items.
(1) Certain dividends.
(2) Interest received from certain foreign corporations.
(3) Dividends from domestic corporation.
(4) Amounts with respect to which taxes are deemed paid under section 960(a).
(5) Section 78 dividend.
(6) Special rule.
(7) Deficits.
(8) Illustrations.
(e) Dividends, interest, and other amounts from sources within a possession.
(f) Income from partnerships, trusts, etc.

§1.907(c)–3 FOGEI and FORI taxes (for taxable years beginning after December 31, 1982).

(a) Tax characterization, allocation and apportionment.
(1) Scope.
(2) Three classes of income.
(3) More than one class in a foreign tax base.
(4) Allocation of tax within a base.
(5) Modified gross income.
(6) Allocation of tax credits.
(7) Withholding taxes.
(b) Dividends.
(1) In general.
(2) Section 78 dividend.
(c) Includable amounts under section 951(a).
(d) Partnerships.
(e) Illustrations.

§1.907(d)–1 Disregard of posted prices for purposes of chapter 1 of the Code (for taxable years beginning after December 31, 1982).

(a) In general.
(1) Scope.
(2) Initial computation requirement.
(3) Burden of proof.
(4) Related parties.
(b) Adjustments.
(c) Definitions.
(1) Foreign government.
(2) Minerals.
(3) Posted price.
(4) Other pricing arrangement.
(5) Fair market value.

§1.907(f)–1 Carryback and carryover of credits disallowed by section 907(a) (for amounts carried between taxable years that each begin after December 31, 1982).

(a) In general.
(b) Unused FOGEI.
(1) In general.
(2) Year of origin.
(c) Tax deemed paid or accrued.
(d) Excess extraction limitation.
(e) Excess general section 904 limitation.
(f) Section 907(f) priority.
(g) Cross-reference.
(h) Example.

[T.D. 8338, 56 FR 11063, Mar. 15, 1991; 56 FR 21926, May 13, 1991; T.D. 8655, 61 FR 516, Jan. 8, 1996]

§1.907(a)–0 Introduction (for taxable years beginning after December 31, 1982).

(a) *Effective dates.* The provisions of §§1.907(a)–0 through 1.907(f)–1 apply to taxable years beginning after December 31, 1982. For provisions that apply to taxable years beginning before January 1, 1983, see §§1.907(a)–0A through 1.907(f)–1A.

(b) *Key terms.* For purposes of the regulations under section 907—

(1) *FOGEI* means foreign oil and gas extraction income.

(2) *FORI* means foreign oil related income.

(3) *FOGEI taxes* mean foreign oil and gas extraction taxes as defined in section 907(c)(5).

(4) *FORI taxes* means foreign taxes on foreign oil related income. See § 1.907(c)–3.

(c) *FOGEI tax limitation.* Section 907(a) limits the foreign tax credit for taxes paid or accrued on FOGEI. See § 1.907(a)–1.

(d) *Reduction of creditable FORI taxes.* Section 907(b) recharacterizes FORI taxes as non-creditable deductible expenses to the extent that the foreign law imposing the FORI taxes is structured, or in fact operates, so that the amount of tax imposed with respect to FORI will be materially greater, over a reasonable period of time, than the amount generally imposed on income that is neither FOGEI nor FORI. See § 1.907(b)–1.

(e) *FOGEI and FORI.* FOGEI includes the taxable income from the extraction of minerals from oil or gas wells by a taxpayer (or another person) and from the sale or exchange of assets used in the extraction business. FORI includes taxable income from the activities of processing oil and gas into their primary products, transporting or distributing oil and gas and their primary products, and from the disposition of assets used in these activities. For this purpose, a disposition includes only a sale or exchange. FOGEI and FORI may also include taxable income from the performance of related services or from the lease of related property and certain dividends, interest, or amounts described in section 951(a). See §§ 1.907(c)–1 through 1.907(c)–3.

(f) *Posted prices.* Certain sales prices are disregarded when computing FOGEI for purposes of chapter 1 of the Code. See § 1.907(d)–1.

(g) *Transitional rules.* Section 907(e) provides rules for the carryover of unused FOGEI taxes from taxable years beginning before January 1, 1983, and carryback of FOGEI taxes arising in taxable years beginning after December 31, 1982. See § 1.907(e)–1.

(h) *Section 907(f) carrybacks and carryovers.* FOGEI taxes disallowed under section 907(a) may be carried back or forward to other taxable years. These FOGEI taxes may be absorbed in another taxable year to the extent of the lesser of the separate excess extraction limitation or the excess limitation in the general limitation category (section 904(d)(1)(I)) for the carryback or carryover year. See § 1.907(f)–1.

(i) *Statutes covered.* The regulations under section 907 are issued as a result of the enactment of section 601 of the Tax Reduction Act of 1975, of section 1035 of the Tax Reform Act of 1976, of section 301(b)(14) of the Revenue Act of 1978, of section 211 of the Tax Equity and Fiscal Responsibility Act of 1982 and of section 1012(g)(6) (A)–(B) of the Technical and Miscellaneous Revenue Act of 1988.

[T.D. 8338, 56 FR 11065, Mar. 15, 1991]

§ 1.907(a)–1 Reduction in taxes paid on FOGEI (for taxable years beginning after December 31, 1982).

(a) *Amount of reduction.* FOGEI taxes are reduced by the amount by which they exceed a limitation level (as defined in paragraph (c) of this section).

(b) *Foreign taxes paid or accrued.* For purposes of the regulations under section 907—

(1) *Foreign taxes.* The term ''foreign taxes'' means income, war profits, or excess profits taxes of foreign countries or possessions of the United States otherwise creditable under section 901 (including those creditable by reason of section 903).

(2) *Foreign taxes paid or accrued.* The terms ''foreign taxes paid or accrued,'' ''FOGEI taxes paid or accrued,'' and ''FORI taxes paid or accrued'' include foreign taxes deemed paid under sections 902 and 960. Unless otherwise expressly provided, these terms do not include foreign taxes deemed paid by reason of sections 904(c) and 907(f).

(c) *Limitation level*—(1) *In general.* The limitation level is FOGEI for the taxable year multiplied by the limitation percentage for that year.

(2) *Limitation percentage for corporations.* A corporation's limitation percentage is the highest rate of tax specified in section 11(b) for the particular year.

(3) *Limitation percentage for individuals.* Section 907(a)(2)(B) provides that the limitation percentage for individual taxpayers is the effective rate of tax for those taxpayers. The effective rate of tax is computed by dividing the entire tax, before the credit under section 901(a) is taken, by the taxpayer's entire taxable income.

(4) *Losses.* (i) For purposes of determining whether income is FOGEI, a taxpayer's FOGEI will be recharacterized as foreign source non-FOGEI to the extent that FOGEI losses for preceding taxable years beginning after December 31, 1982, exceed the amount of FOGEI already recharacterized. See §1.907(c)–1(c). However, taxes that were paid or accrued on the recharacterized FOGEI will remain FOGEI taxes.

(ii) Taxes paid or accrued by a person to a foreign country may be FOGEI taxes even though that person has under U.S. law a net operating loss from sources within that country.

(iii) For purposes of determining whether income is FOGEI, a taxpayer's income will be treated as income from sources outside the United States even though all or a portion of that income may be resourced as income from sources within the United States under section 904(f) (1) and (4).

(5) *Priority.* (i) Section 907(a) applies before section 908, relating to reduction of credit for participation in or cooperation with an international boycott.

(ii) Section 901(f) (relating to certain payments with respect to oil and gas not considered as taxes) applies before section 907.

(d) *Illustrations.* Paragraphs (a) through (c) of this section are illustrated by the following examples.

Example 1. M, a U.S. corporation, uses the accrual method of accounting and the calendar year as its taxable year. For 1984, M has $20,000 of FOGEI, derived from operations in foreign countries X and Y, and has accrued $11,500 of foreign taxes with respect to FOGEI. The highest tax rate specified in section 11(b) for M's 1984 taxable year is 46 percent. Pursuant to section 907(a), M's FOGEI taxes limitation level for 1984 is $9,200 (46%×$20,000). The foreign taxes in excess of this limitation level ($2,300) may be carried back or forward. See section 907(f) and §1.907(f)–1 and section 907(e) and §1.907(e)–1.

Example 2. The facts are the same as in *Example 1* except that M is a partnership owned equally by U.S. citizens A and B who each file as unmarried individuals and do not itemize deductions. Pursuant to section 905(a), A and B have elected to credit foreign taxes in the year accrued. The total amount of foreign taxes accrued by A and B with respect to their distributive shares of M's FOGEI is $11,500 ($5,750 accrued by A and $5,750 accrued by B). A and B have no other FOGEI. A's only taxable income for 1984 is his 50% distributive share ($10,000) of M's FOGEI and A has a preliminary U.S. tax liability of $1,079. B has $112,130 of taxable income for 1984 (including his 50% distributive share ($10,000) of M's FOGEI) and has a preliminary U.S. tax liability of $44,000. Pursuant to section 907(a), A's FOGEI taxes limitation level for 1984 is $1,079 (($1,079/$10,000)×$10,000) and B's FOGEI taxes limitation level for 1984 is $3,924 (($44,000/$112,130)×$10,000).

(e) *Effect on other provisions*—(1) *Deduction denied.* If a credit is claimed under section 901, no deduction under section 164(a)(3) is allowed for the amount of the FOGEI taxes that exceed a taxpayer's limitation level for the taxable year. See section 275(a)(4)(A). Thus, FOGEI taxes disallowed under section 907(a) are not added to the cost or inventory amount of oil or gas.

(2) *Reduction inapplicable.* The reduction under section 907(a) does not apply to a taxpayer that deducts foreign taxes and does not claim the benefits of section 901 for a taxable year.

(3) *Section 78 dividend.* The reduction under section 907(a) has no effect on the amount of foreign taxes that are treated as dividends under section 78.

(f) *Section 904 limitation.* FOGEI taxes as reduced under section 907(a) are creditable only to the extent permitted by the general limitation of section 904(d)(1)(I).

[T.D. 8338, 56 FR 11066, Mar. 15, 1991]

§1.907(b)–1 Reduction of creditable FORI taxes (for taxable years beginning after December 31, 1982).

If the foreign law imposing a FORI tax (as defined in §1.907(c)–3) is either structured in a manner, or operates in a manner, so that the amount of tax imposed on FORI is generally materially greater than the tax imposed by the foreign law on income that is neither FORI nor FOGEI (“described manner”), section 907(b) provides a special rule which limits the amount of FORI taxes paid or accrued by a person to a foreign country which will be considered income, war profits, or excess profits taxes. Section 907(b) will apply to a person regardless of whether that person is a dual capacity taxpayer as defined in §1.901–2(a)(2)(ii)(A). (In general, a dual capacity taxpayer is a person who pays an amount to a foreign country part of which is attributable to an income tax and the remainder of which is a payment for a specific economic benefit derived from that country.) Foreign law imposing a tax on FORI will be considered either to be structured in or to operate in the described manner only if, under the facts and circumstances, there has been a shifting of tax by the foreign country from a tax on FOGEI to a tax on FORI.

[T.D. 8338, 56 FR 11066, Mar. 15, 1991]

§ 1.907(c)–1 Definitions relating to FOGEI and FORI (for taxable years beginning after December 31, 1982).

(a) *Scope.* This section explains the meaning to be given certain terms and items in section 907(c) (1), (2), and (4). See also §§ 1.907(a)–0(b) and 1.907(c)–2 for further definitions.

(b) *FOGEI*—(1) *General rule.* Under section 907(c)(1), FOGEI means taxable income (or loss) derived from sources outside the United States and its possessions from the extraction (by the taxpayer or any other person) of minerals from oil or gas wells located outside the United States and its possessions or from the sale or exchange of assets used by the taxpayer in the trade or business of extracting those minerals. Extraction of minerals from oil or gas wells will result in gross income from extraction in every case in which that person has an economic interest in the minerals in place. For other circumstances in which gross income from extraction may arise, see paragraph (b)(3) of this section. For determination of the amount of gross income from extraction, see paragraph (b)(2) of this section. For definition of the phrase ‘‘assets used by the taxpayer in the trade or business’’ and for rules relating to that type of FOGEI, see paragraph (e)(1) of this section. The term ‘‘minerals’’ is defined in paragraph (f)(1) of this section. For determination of taxable income, see paragraph (f)(2) of this section. FOGEI includes, in addition, items listed in section 907(c)(3) (relating to dividends, interest, partnership distributions, etc.) and explained in § 1.907(c)–2. For the reduction of what would otherwise be FOGEI by losses incurred in a prior year, see section 907(c)(4) and paragraph (c) of this section.

(2) *Amount.* The gross income from extraction is determined by reference to the fair market value of the minerals in the immediate vicinity of the well. Fair market value is determined under paragraph (b)(6) of this section.

(3) *Other circumstances.* Gross income from extraction or the sale or exchange of assets described in section 907(c)(1)(B) includes income from any arrangement, or a combination of arrangements or transactions, to the extent the income is in substance attributable to the extraction of minerals or such a sale or exchange. For instance, a person may have gross income from such a sale or exchange if the person purchased minerals from a foreign government at a discount and the discount reflects an arm’s-length amount in consideration for the government’s nationalization of assets that person owned and used in the extraction of minerals.

(4) *Income directly related to extraction.* Gross income from extraction includes directly related income under paragraph (g) of this section.

(5) *Income not included.* FOGEI as otherwise determined under this paragraph (b), nevertheless, does not include income to the extent attributable to marketing, distributing, processing or transporting minerals or primary products. Income from the purchase and sale of minerals is not ordinarily FOGEI. If the foreign taxes paid or accrued in connection with income from a purchase and sale are not creditable by reason of section 901(f), that income is not FOGEI. A taxpayer to whom section 901(f) applies is not a producer.

(6) *Fair market value.* For purposes of this paragraph (b), the fair market value of oil or gas in the immediate vicinity of the well depends on all of the facts and circumstances as they exist relative to a party in any particular case. The facts and circumstances that may be taken into account include, but are not limited to, the following—

(i) The facts and circumstances pertaining to an independent market value (if any) in the immediate vicinity of the well,

(ii) The facts and circumstances pertaining to the relationships between the taxpayer and the foreign government. If an independent fair market value in the immediate vicinity of the well cannot be determined but fair market value at the port, or a similar point, in the foreign country can be determined (port price), an analysis of the arrangement between the taxpayer and the foreign government that retains a share of production could be evidence of the appropriate, arm's-length difference between the port price and the field price, and

(iii) The other facts and circumstances pertaining to any difference in the producing country between the field and port prices.

(7) *Economic interest.* For purposes of this paragraph (b), the term ''economic interest'' means an economic interest as defined in §1.611–1(b)(1), whether or not a deduction for depletion is allowable under section 611.

(c) *Carryover of foreign oil extraction losses*—(1) *In general.* Pursuant to section 907(c)(4), the determination of FOGEI for a particular taxable year takes into account a foreign oil extraction loss incurred in prior taxable years beginning after December 31, 1982. There is no time limitation on this carryover of foreign oil extraction losses. Section 907(c)(4) does not provide for any carryback of these losses. Section 907(c)(4) operates solely for purposes of determining FOGEI and thus operates independently of section 904(f).

(2) *Reduction.* That portion of the income of the taxpayer for the taxable year which but for this paragraph (c) would be treated as FOGEI is reduced (but not below zero) by the excess of—

(i) The aggregate amount of foreign oil extraction losses for preceding taxable years beginning after December 31, 1982, over

(ii) The aggregate amount of reductions under this paragraph (c) for preceding taxable years beginning after December 31, 1982.

(3) *Foreign oil extraction loss defined*—(i) *In general.* For purposes of this paragraph (c), the term ''foreign oil extraction loss'' means the amount by which the gross income for the taxable year that is taken into account in determining FOGEI for that year is exceeded by the sum of the deductions properly allocated and apportioned to that gross income as determined under paragraph (f)(2) of this section). A person can have a foreign oil extraction loss for a taxable year even if the person has not chosen the benefits of section 901 for that year.

(ii) *Items not taken into account.* For purposes of paragraph (c)(3)(i) of this section, the following items are not taken into account—

(A) The net operating loss deduction allowable for the taxable year under section 172(a),

(B) Any foreign expropriation loss (as defined in section 172(h)) for the taxable year, and

(C) Any loss for the taxable year which arises from fire, storm, shipwreck, or other casualty, or from theft.

A loss mentioned in paragraph (c)(3)(ii) (B) or (C) of this section is taken into account, however, to the extent compensation (for instance by insurance) for the loss is included in gross income.

(4) *Affiliated groups.* The foreign oil extraction loss of an affiliated group of corporations (within the meaning of section 1504(a)) that files a consolidated return is determined on a group basis. If the group does not have a foreign oil extraction loss, the foreign oil extraction loss of a member of that group will not reduce on a separate basis that member's FOGEI for a later taxable year. For special rules affecting the foreign oil extraction loss in the case of certain related domestic corporations that are not members of the same affiliated group, see section 904(i).

(5) *FOGEI taxes.* If FOGEI is reduced pursuant to this paragraph (c) (and thereby recharacterized as non-FOGEI income), any foreign taxes imposed on the FOGEI that is recharacterized as other income retain their character as FOGEI taxes. See section 907(c)(5).

(6) *Examples.* The provisions of this paragraph (c) may be illustrated by the following examples.

Example 1 —(i) *Facts.* X, a U.S. corporation using the accrual method of accounting and the calendar year as its taxable year, is engaged in extraction activities in three foreign countries. X has only the following combined foreign tax items for the three countries (prior to the application of this paragraph (c)) for 1983, 1984, and 1985:

	1983	1984	1985
FOGEI	$(700)	$100	$450
FOGEI taxes	10	60	200
Net operating loss deduction	(200)	0	0
Foreign oil extraction loss allowable after adjustment for paragraph (c)(3)(ii) amounts	(500)	0	0
General limitation taxes other than FOGEI taxes	30	90	230

(ii) *1983.* Because X's FOGEI for 1983 is a loss of $(700), X's section 907(a) limitation for 1983 is $0 (.46×$0). Thus, none of the FOGEI taxes paid or accrued in 1983 ($10) can be credited in 1983. They can, however, be carried back to 1981 or 1982 pursuant to the provisions of section 907(e)(2) and § 1.907(e)–1 and carried forward pursuant to the provisions of section 907(f) and § 1.907(f)–1.

(iii) *1984.* X's FOGEI for 1984, prior to the application of this paragraph (c), is $100. X has a foreign oil extraction loss for 1983 of $(500). This loss must be applied against X's preliminary FOGEI of $100 for 1984. Thus, X's FOGEI for 1984 is $0 and X has $(400) ($500 − $100) of foreign oil extraction loss from 1983 to be carried to 1985. Since X's FOGEI for 1984 is $0, its section 907(a) limitation is $0 (.46×$0). Therefore, none of the FOGEI taxes paid or accrued in 1984 ($60) can be credited in 1984. They can, however, be carried back pursuant to the provisions of section 907(e)(2) and § 1.907(e)–1 and carried forward pursuant to the provisions of section 907(f) and § 1.907(f)–1.

(iv) *1985.* X's FOGEI for 1985, prior to the application of this paragraph (c), is $450. X's remaining foreign oil extraction loss carryover from 1983 is $(400) and this must be applied against X's preliminary FOGEI of $450 for 1985. Thus, X's FOGEI for 1984 is $50 ($450 − $400). X's section 907 (a) limitation is $23 (.46×$50). Therefore, $23 of the FOGEI taxes paid or accrued in 1985, together with the other $230 of general limitation taxes, can be credited in 1985, subject to the general limitation of section 904(d)(1)(E) (as in effect prior to 1987). The excess of FOGEI taxes, $177 ($200 − $23), can be carried back pursuant to the provisions of section 907(e)(2) and § 1.907(e)–1 and carried forward pursuant to the provisions of section 907(f) and § 1.907(f)–1.

Example 2 —(i) *Facts.* The facts are the same as in *Example 1* except that X's paragraph (c)(3)(ii) items for 1983 allocable to FOGEI are $(800) instead of $(200). FOGEI remains a loss of $(700). Thus, X does not have a foreign oil extraction loss for 1983 because it has $100 of FOGEI when its paragraph (c)(3)(ii) items are not taken into account ($(700)+$800).

(ii) *1983.* The results are the same as in Example 1.

(iii) *1984.* Although X had FOGEI loss of $(700) in 1983, there is not a loss that can be carried forward after adjustment for paragraph (c)(3)(ii) items. Thus, X's FOGEI for 1984 is not reduced by the 1983 loss. X's section 907(a) limitation for 1984 is $46 (.46×$100). Therefore, $46 of the FOGEI taxes paid or accrued in 1984, together with the other $90 of general limitation taxes, can be credited in 1984, subject to the general limitation of section 904(d)(1)(E) (as in effect prior to 1987). The excess of $14 ($60 − $46) can be carried back to 1982 pursuant to the provisions of section 907(e)(2) and § 1.907(e)–1 and carried forward pursuant to the provisions of section 907(f) and § 1.907(f)–1.

(iv) *1985.* Since there is no foreign oil extraction loss for either 1983 or 1984 to be applied in 1985, X's FOGEI for 1985 is $450. Thus, its section 907(a) limitation for 1985 is $207 (.46×$450) and all of its FOGEI taxes paid or accrued in 1985 ($200), together with the other $230 of general limitation taxes, can be credited in 1985, subject to the general limitation of section 904(d)(1)(E) (as in effect prior to 1987). FOGEI taxes in the amount of $10 from 1983 and $14 from 1984 may be carried forward to 1985 if they have not been used in carryback years. However, because the excess section 907(a) limitation for 1985 is only $7, that is the maximum potential FOGEI taxes from 1983 or 1984 that may be used in 1985.

Example 3 —(i) *Facts.* Y, a U.S. corporation using the accrual method of accounting and the calendar year as its taxable year, is engaged in extraction activities in three foreign countries. Y's only foreign taxable income is income subject to the general limitation of section 904(d)(1)(E) (as in effect prior to 1987). Y has no paragraph (c)(3)(ii) items. Y has the following foreign tax items for 1983 and 1984:

	1983	1984
FOGEI	$(400)	$300
Other foreign taxable income	250	200
U.S. taxable income	1,000	1,100
Worldwide taxable income	850	1,600
FOGEI taxes	10	180
Other general limitation taxes	50	40
Foreign oil extraction loss	(400)	0

(ii) *1983*—(A) *Section 907(a) limitation.* Because Y's FOGEI for 1983 is a loss of $(400), Y's section 907(a) limitation for 1983 is $0. Thus, none of the FOGEI taxes paid or accrued in 1983 ($10) can be credited in 1983. They can, however, be carried back to 1981 or 1982 pursuant to the provisions of section 907(e)(2) and § 1.907(e)–1 and carried forward pursuant to the provisions of section 907(f) and § 1.907(f)–1.

(B) *Section 904(d) fraction.* Y has a foreign loss of $(150) ($(400 + $250) for 1983. Thus, its fraction for purposes of determining its general limitation of section 904(d)(1)(E) is $0/$850.

(iii) *1984*—(A) *Section 907(a) limitation.* Y's foreign oil extraction loss for 1983 is $(400).

Applying this loss to its preliminary FOGEI for 1984 ($300) eliminates all of Y's FOGEI for 1984. Because Y's FOGEI for 1984 is $0, its section 907(a) limitation is also $0. Thus, none of the FOGEI taxes paid or accrued in 1984 ($180) can be credited in 1984. They can, however, be carried back to 1982 pursuant to the provisions of section 907(e)(2) and §1.907(e)–1 and carried forward pursuant to the provisions of section 907(f) and §1.907(f)–1. Y has a remaining foreign oil extraction loss of $(100) from 1983 to be carried to 1985.

(B) *Section 904(d) fraction.* Y's preliminary foreign taxable income for purposes of determining its general limitation of section 904(d)(1)(E) is $500 ($300 + $200). However, Y has an overall foreign loss from 1983 of $(150) ($(400) + $250) and thus, pursuant to section 904(f), Y must recharacterize $150 (lesser of $150 or 50% of $500) of its 1984 foreign taxable income as U.S. taxable income. Thus, Y's fraction for purposes of determining its general limitation of section 904(d)(1)(E) for 1984 is $350/$1,600.

Example 4 —(i) *Facts.* Assume the same facts as in *Example 3* except that Y has the following foreign tax items:

	1983	1984	1985
FOGEI		$(100)	$225
Other foreign source taxable income subject to the general limitation of section 904(d)(1)(E)	$(50)		
U.S. source taxable income	50		
Worldwide taxable income		(100)	225
FOGEI taxes		10	125
Foreign oil extraction loss		(100)	

(ii) *1983.* For 1983, Y has a section 904(d)(1)(E) overall foreign loss account of $50; see section 904(f) and §1.904(f)–1(b).

(iii) *1984.* Because Y's FOGEI for 1984 is a loss of $(100), Y's section 907(a) limitation for 1984 is $0. Thus, none of the FOGEI taxes paid or accrued in 1984 ($10) can be credited in 1984. They can, however, be carried back under the provisions of section 907(e)(2) and §1.907(e)–1 and carried forward under the provisions of section 907(f) and §1.907(f)–1.

(iv) *1985.* Y's FOGEI loss of $(100) for 1984 is carried forward to 1985 and offsets FOGEI income in that amount in 1985. The entire section 904(d)(1)(E) overall foreign loss account of $50 is recaptured in 1985; therefore, Y has $75 of foreign source income and $50 of U.S. source income. However, Y has $125 of FOGEI since, for purposes of section 907(a), the $50 resourced by section 904(f) will be treated as income from sources outside the United States; see §1.907(a)–1(c)(4)(iii). Accordingly, Y's section 907(a) limitation is $57.50 (.46 x $125). Y's section 904(d)(1)(E) limitation is, however, only $34.50 (.46 x $75). Thus, Y may claim a foreign tax credit of $34.50 in 1985. Y may carry back or carry forward $23 ($57.50–$34.50) and that amount is not subject to the section 907(a) limitation in the carry to year. In addition, $67.50 ($125 − $57.50) may be carried back pursuant to the provisions of section 907(e)(2) and §1.907(e)–1 and carried forward pursuant to the provisions of section 907(f) and §1.907(f)–1. This amount is subject to the section 907(a) limitation in the carry to year.

(d) *FORI*—(1) *In general.* Section 907(c)(2) defines FORI to include taxable income from the processing of oil and gas into their primary products, from the transportation or distribution and sale of oil and gas and their primary products, from the disposition of assets used in these activities and from the performance of any other related service. FORI may also include, under section 907(c)(3), certain dividends, interest, or amounts described in section 951(a). This paragraph (d) defines certain terms and items applicable to FORI.

(2) *Transportation.* Gross income from transportation of minerals or primary products (''gross transportation income'') is gross income arising from carrying minerals or primary products between two places (including time or voyage charter hires) by any means of transportation, such as a vessel, pipeline, truck, railroad, or aircraft. Except for directly related income under paragraphs (d)(7) and (g) of this section, gross transportation income does not include gross income received by a lessor from a bareboat charter hire of a means of transportation, certain other rental income, or income from the performance of certain services.

(3) *Distribution or sale.* The term ''distribution or sale'' means the sale or exchange of minerals or primary products to processors, users who purchase, store, or use in bulk quantities, other persons for further distribution, retailers, or consumers. Gross income from distribution or sale includes interest income attributable to the distribution of minerals or primary products on credit.

(4) *Processing.* The term ''processing'' means the destructive distillation, or a process similar in effect to destructive distillation, of crude oil and the processing of natural gas into their primary products including processes used to remove pollutants from crude oil or natural gas.

(5) *Primary product from oil.* The term ‘‘primary product’’ (in the case of oil) means all products derived from the processing of crude oil, including volatile products, light oils (such as motor fuel and kerosene), distillates (such as naphtha), lubricating oils, greases and waxes, and residues (such as fuel oil).

(6) *Primary product from gas.* The term ‘‘primary product’’ (in the case of gas) means all gas and associated hydrocarbon components from gas wells or oil wells, whether recovered at the lease or upon further processing, including natural gas, condensates, liquefiable petroleum gases (such as ethane, propane, and butane), and liquid products (such as natural gasoline).

(7) *Directly related income.* FORI also includes directly related income under paragraph (g) of this section.

(e) *Assets used in a trade or business*—(1) *In general.* The term ‘‘assets used by the taxpayer in the trade or business’’ in section 907(c) (1)(B) and (2)(D) means property primarily used in one or more of the trades or businesses that are section 907(c) activities. For purposes of this paragraph (e), assets used in a trade or business are assets described in section 1231(b) (applied without regard to any holding period or the character of the asset as being subject to the allowance for depreciation under section 167).

(2) *Section 907(c) activities.* Section 907(c) activities are those described in section 907(c)(1)(A) (for FOGEI) or (c)(2)(A) through (C) (for FORI). If an asset is used primarily in one or more section 907(c) activities, then the entire gain (or loss) will be considered attributable to those activities. For example, if a person uses a service station primarily to distribute primary products from oil, then all of the gain (or loss) on the sale of the station is FORI even though the person uses the station to distribute products that are not primary products (such as tires or batteries). If an asset is not primarily used in one or more section 907(c) activities, then the entire gain or loss will not be FOGEI or FORI.

(3) *Stock.* Stock of any corporation (whether foreign or domestic) will not be treated as an asset used by a person in section 907(c) activities.

(4) *Losses on sale of stock.* If, under § 1.861–8(e)(7), a loss on the sale, exchange, or disposition of stock is considered a deduction which is definitely related and allocable to FOGEI or FORI, then notwithstanding § 1.861–8 (e)(7) and paragraph (f)(2) of this section, this loss shall be allocated and apportioned to the same class of income that would have been produced if there were capital gain from the sale, exchange or disposition.

(5) *Character of gain or loss.* Except in the case of stock, gain or loss from the sale, exchange or disposition of assets used in the trade or business may be FORI or FOGEI to the extent taken into account in computing taxable income for the taxable year, whether or not the gain or loss is ordinary income or ordinary loss.

(6) *Allocation of amount realized.* The amount realized from the sale, exchange or disposition of several assets in one transaction is allocated among them in proportion to their respective fair market values. This allocation is made under the principles set forth in § 1.1245–1(a)(5) (relating to allocation between section 1245 property and non-section 1245 property).

(7) *Interest.* Gross income from the sale, exchange or disposition of an asset used in a section 907(c) activity includes interest income from such a sale, exchange or disposition.

(f) *Terms and items common to FORI and FOGEI*—(1) *Minerals.* The term ‘‘minerals’’ means hydrocarbon minerals extracted from oil and gas wells, including crude oil or natural gas (as defined in section 613A(e)). The term includes incidental impurities from these wells, such as sulphur, nitrogen, or helium. The term does not include hydrocarbon minerals derived from shale oil or tar sands.

(2) *Taxable income.* Deductions to be taken into account in computing taxable income or net operating loss attributable to FOGEI or FORI are determined under the principles of § 1.861–8. For an exception with regard to losses, see paragraph (e)(4) of this section.

(3) *Interest on working capital.* FORI and FOGEI may include interest on bank deposits or on any other temporary investment which is not in excess of funds reasonably necessary to

meet the working capital requirements and the specifically anticipated business needs of the person that is engaged in the conduct of the activities described in section 907(c) (1) or (2).

(4) *Exchange gain or loss.* Exchange gain (and loss) may be FORI and FOGEI. For taxable years beginning after 1986, exchange gain or loss from a section 988 transaction may be FORI or FOGEI only if directly related to the business needs (under the principles of section 954(c)(1)(D)) attributable to the conduct of the section 907(c) activity.

(5) *Allocation.* Interest income and exchange gain (or loss) described, respectively, in paragraph (f) (3) and (4) of this section are allocated among FORI, FOGEI, and any other class of income relevant for purposes of the foreign tax credit limitations under any reasonable method which is consistently applied from year-to-year.

(6) *Facts and circumstances.* Income not described elsewhere in this section may be FOGEI or FORI if, under the facts and circumstances in the particular case, the income is in substance directly attributable to the activities described in section 907(c) (1) or (2). For example, assume that a producer in the North Sea suffers a casualty caused by an explosion, fire, and resulting destruction of a drilling platform. Insurance proceeds received for the platform's destruction in excess of the producer's basis is extraction income if the excess constitutes income from sources outside the United States. In addition, income from an insurance policy for business interruption may be extraction income to the extent the payments under the policy are geared directly to the loss of income from production and are treated as income from sources outside the United States. Also, if an oil company's oil concession or assets used in extraction activities described in section 907(c)(1)(A) and located outside the United States are nationalized or expropriated by a foreign government, or instrumentality thereof, income derived from that nationalization or expropriation (including interest on the income paid pursuant to the nationalization or expropriation) is FOGEI. Likewise, if a company's assets used in the activities described in section 907(c)(2) (A) through (C) and located outside the United States are nationalized or expropriated by a foreign government, or instrumentality thereof, income (including interest on the income paid pursuant to the nationalization or expropriation) derived from the nationalization or expropriation will be FORI. Nationalization or expropriation is deemed to be a sale or exchange for purposes of section 907(c)(1)(B) and a disposition for purposes of section 907(c)(2)(D). In further example, assume that an oil company has an exclusive right to buy all the oil in country X from Y, an instrumentality of the foreign sovereign which owns all of the oil in X. The oil company does not have an economic interest in any oil in country X. Y has a temporary cash-flow problem and demands that the oil company make advance deposits for the purchase of oil not yet delivered. In return, Y grants the oil company a discount on the price of the oil when delivered. Income represented by the discount on the later disposition of the oil is FORI described in section 907(c)(2)(C). The result would be the same if Y credited the oil company with interest on the advance deposits, which had to be used to purchase oil (the interest income would be FORI).

(g) *Directly related income*—(1) *In general.* Section 907(c)(2)(E) and this paragraph (g) include in FORI, and this paragraph (g) includes in FOGEI, income from the performance of directly related services (as defined in paragraph (g)(2) of this section). This paragraph (g) also includes in FORI and FOGEI income from the lease or license of related property (as defined in paragraph (g)(3) of this section). Section 907(c)(2)(E) with regard to FORI and this paragraph (g) with regard to both FORI and FOGEI do not apply to a person if—

(i) Neither that person nor a related person (as defined in paragraph (g)(4) of this section) has FOGEI described in paragraph (b) of this section (other than paragraph (b)(4) of this section relating to directly related income) or FORI described in paragraph (d) of this section (other than paragraph (d)(7) of this section relating to directly related income), or

(ii) Less than 50 percent of that person's gross income from sources outside the United States which is related exclusively to the performance of services and from the lease or license of property described in paragraph (g) (2) and (3) of this section, respectively, is attributable to services performed for (or on behalf of), leases to, or licenses with, related persons, but

(iii) Paragraph (g)(1)(ii) of this section will not apply to a person if 50 percent or more of that person's total gross income from sources outside the United States is FOGEI and FORI (as both are described in paragraph (g)(1)(i) of this section).

A person described in paragraph (g)(1) (i) or (ii) of this section will, however, have directly related services income which is FOGEI if the income is so classified by reason of the income based on output test set forth in paragraph (g)(2)(i)(B) of this section.

(2) *Directly related services*—(i) *FOGEI.* (A) Income from directly related services will be FOGEI, as that term is defined in paragraph (b) (1) and (3) of this section, if those services are directly related to the active conduct of extraction (including exploration) of minerals from oil and gas wells. Paragraph (b)(1) of this section provides that, in order to have extraction income, a person must have an economic interest in the minerals in place. However, paragraph (b)(3) of this section recognizes that income arising from ''other circumstances'' is extraction income if that income is in substance attributable to the extraction of minerals.

(B) An example of ''other circumstances'' under paragraph (b)(3) of this section is the ''income based on output test.'' This income based on output test provides that, if the amount of compensation paid or credited to a person for services is dependent on the amount of minerals discovered or extracted, the income of the person from the performance of the services will be directly related services income which is FOGEI. This test will apply whether or not the person performing the services has, or had, an economic interest in the minerals discovered or extracted.

(ii) *FORI.* With regard to the determination of directly related services income which is FORI, directly related services are those services directly related to the active conduct of the operations described in section 907(c)(2) (A) through (C). Those services include, for example, services performed in relation to the distribution of minerals or primary products or in connection with the operation of a refinery, or the types of services described in § 1.954–6(d) (other than § 1.954–6(d)(4) which relate to foreign base company shipping income.

(iii) *Recipient of the services.* Directly related services described in paragraph (g)(2) (i) and (ii) of this section may be performed for any person without regard to whether that person is a related person.

(iv) *Excluded services*—(A) *FOGEI.* Directly related services which produce FOGEI do not include insurance, accounting or managerial services.

(B) *FORI.* Directly related services which produce FORI do not, generally, include insurance, accounting or managerial services. These services will, however, produce FORI if they are performed by the person performing the operations described in section 907(c)(2) (A) through (C). For these purposes, insurance income which is FORI means taxable income as defined in section 832(a).

(3) *Leases and licenses.* A lease or license of related property is the lease or license of assets used (or held for use) by the lessor, licensor, or another person (including the lessee or a sublessee) in the active conduct of the activities described in section 907 (c)(1)(A) or (c)(2) (A) through (C). The leases or licenses described in this paragraph (g)(3) include, for example, a lease of a means of transportation under a bareboat charter hire, of drilling equipment used in extraction operations, or the license of a patent, know-how, or similar intangible property used in extracting, transporting, distributing or processing minerals or primary products. This paragraph (g)(3) applies without regard to whether the parties are related persons.

(4) *Related person.* A person will be treated as a related person for purposes of this paragraph (g) if that person would be so treated within the meaning

of section 954(d)(3) (as applied by substituting the word ‘‘corporation’’ for the word ‘‘controlled foreign corporation’’) or that person is a partnership or partner described in section 707(b)(1).

(5) *Gross income.* A foreign corporation shall be treated as a domestic corporation for the purpose of applying the gross-income rules in paragraph (g)(1) (ii) and (iii) of this section.

(h) *Coordination with other provisions*—(1) *Certain adjustments.* The character of income as FOGEI or FORI is determined before making any adjustment under section 482 or section 907(d). For example, assume that X and Y are related parties, Y's only income is from the sale of oil that Y purchased from X, and FOGEI from X is diverted to Y through an arrangement described in paragraph (b)(3) of this section. Accordingly, Y has FOGEI. If under section 482 the Commissioner reallocates the FOGEI from Y to X, then Y's remaining income represents only a profit from distributing the oil, and thus is FORI. If the foreign taxes paid by Y on this income are otherwise creditable under section 901, the foreign taxes that are not refunded to Y retain their characterization as FOGEI taxes.

(2) *Section 901(f).* Section 901(f) (relating to certain payments with respect to oil and gas not considered as taxes) applies before section 907. Taxes disallowed by section 901(f) are added to the cost or inventory amount of oil or gas.

[T.D. 8338, 56 FR 11067, Mar. 15, 1991]

§1.907(c)–2 Section 907(c)(3) items (for taxable years beginning after December 31, 1982).

(a) *Scope.* This section provides rules relating to certain items listed in section 907(c)(3). The rules of this section are expressed in terms of FORI but apply for determining FOGEI by substituting ‘‘FOGEI’’ for ‘‘FORI’’ whenever appropriate. FOGEI does not include interest described in section 907(c)(3)(A). Dividends paid prior to January 1, 1987, and described in section 907(c)(3)(B), as in effect prior to amendment by the Technical and Miscellaneous Revenue Act of 1988, are included in FORI and not FOGEI.

(b) *Dividend*—(1) *Section 1248 dividend.* A section 1248 dividend is a dividend described in section 907(c)(3)(A). Except as otherwise provided in this paragraph (b)(1), gain (or loss) from the disposition of stock in any corporation is not FOGEI or FORI. See §1.907(c)–1(e) (3) and (4).

(2) *Section 78 dividend.* A section 78 dividend is FORI to the extent it arises from a dividend described in section 907(c)(3)(A), or an amount described in section 907(c)(3)(C).

(c) *Taxes deemed paid*—(1) *Voting stock test.* Items described in section 907(c)(3)(A) or (C) are FORI only if a deemed-paid-tax test is met under the criteria of section 902 or 960. The purpose of this test is to require minimum direct or indirect ownership by a domestic corporation in the voting stock of a foreign corporation as a prerequisite for the item to qualify as FORI in the hands of the domestic corporation. The test is whether a domestic corporation would be deemed to pay any taxes of a foreign corporation when a dividend or an amount described in section 907(c)(3)(A) or (C), respectively, is included in the domestic corporation's gross income. In the case of interest described in section 907(c)(3)(A), the test is whether any taxes would be deemed paid if there were a hypothetical dividend.

(2) *Dividends and interest.* For purposes of section 907(c)(3)(A), a domestic corporation is deemed under section 902 to pay taxes in respect of dividends and interest received from a foreign corporation whether or not the foreign corporation:

(i) Actually pays or is deemed to pay taxes, or

(ii) In the case of interest, actually pays dividends.

This paragraph (c)(2) also applies to dividends received by a foreign corporation from a second-tier or third-tier foreign corporation (as defined in §1.902–1(a) (3)(i) and (4), respectively). In the case of interest received by a foreign corporation from another foreign corporation, this paragraph (c)(2) applies if the taxes of both foreign corporations would be deemed paid under section 902 (a) or (b) for purposes of applying section 902(a) to the same taxpayer which is a domestic corporation.

In the case of interest received by any corporation (whether foreign or domestic), all members of an affiliated group filing a consolidated return will be treated as the same taxpayer under section 907(c)(3)(A) if the foreign taxes of the payor and (if the recipient is a foreign corporation) the foreign taxes of the recipient would be deemed paid under section 902 by at least one member. The term ''member'' is defined in § 1.1502-1(b). Thus, for example, assume that P owns all of the stock of D1 and D2 and P. D1, and D2 are members of an affiliated group filing a consolidated return. Assume further that D1 owns all of the stock of F1 and D2 owns all of the stock of F2, where F1 and F2 are foreign corporations. Interest paid by F1 to P, D2, or F2 may be FORI.

(3) *Amounts included under section 951(a).* For purposes of section 907(c)(3)(C), a domestic corporation is deemed under section 960 to pay taxes in respect of a foreign corporation, whether or not the foreign corporation actually pays taxes on the amounts included in gross income under section 951(a).

(d) *Amount attributable to certain items*—(1) *Certain dividends*—(i) *General rule.* The portion of a dividend described in section 907(c)(3)(A) that is FORI equals—

Amount of dividend x a/b

a = FORI accumulated profits in excess of FORI taxes paid or accrued, and
b = Total accumulated profits in excess of total foreign taxes paid or accrued.

This paragraph (d)(1)(i) applies even though the FORI accumulated profits arose in a taxable year of a foreign corporation beginning before January 1, 1983. Determination of the FORI amount of dividends under this paragraph (d)(1)(i) must be made separately for FORI accumulated profits and total accumulated profits that arose in taxable years beginning before January 1, 1987, and for FORI accumulated profits and total accumulated profits that arose in taxable years beginning after December 31, 1986. Dividends are deemed to be paid first out of FORI and total accumulated profits that arose in table years beginning after December 31, 1986. With regard to FORI accumulated profits and total accumulated profits that arose in taxable years beginning after December 31, 1986, the portion of a dividend that is FORI equals—

Amount of dividend x a/b

a = Post-1986 undistributed FORI earnings determined under the principles of section 902(c)(1), and
b = Post-1986 undistributed earnings determined under the principles of section 902(c)(1).

(ii) *Cross-references.* See § 1.902–1(g) for the determination of a foreign corporation's earnings and profits and of those out of which a dividend is paid. See § 1.1248–2 or 1.1248–3 for the determination of the earnings and profits attributable to the sale or exchange of stock in certain foreign corporations.

(2) *Interest received from certain foreign corporations.* Interest described in section 907(c)(3)(A) is FORI to the extent the corresponding interest expense of the paying corporation is properly allocable and apportionable to the gross income of the paying corporation that would be FORI were that corporation a domestic corporation. This allocation and apportionment is made in a manner consistent with the rules of section 954(b)(5) and § 1.861–8(e)(2).

(3) *Dividends from domestic corporation.* The amount of a dividend from a corporation described in section 907(c)(3)(B), as in effect prior to amendment by the Technical and Miscellaneous Revenue Act of 1988, paid in a taxable year of that corporation beginning before December 31, 1986, that is FORI is determined under the principles of paragraph (d)(1)(i) of this section with respect to its current earnings and profits under section 316(a)(2) or its accumulated earnings and profits under section 316(a)(1), as the case may be.

(4) *Amounts with respect to which taxes are deemed paid under section 906(a)*—(i) *Portion attributable to FORI.* The portion of an amount described in section 907(c)(3)(C) that is FORI equals:

$$A \times \frac{B}{C}$$

A=Amount described in section 907(c)(3)(C)
B=FORI earnings and profits
C=Total earnings and profits

For taxable years ending after January 23, 1989, the facts and circumstances will be used to determined what part of the amount of the section 907(c)(3)(C) amount is directly attributable to FOGEI, FORI and other income.

(ii) *Earnings and profits.* Total earnings and profits are those of the foreign corporation for a taxable year under section 964 and the regulations under that section.

(5) *Section 78 dividend.* The portion of a section 78 dividend that will be considered FORI will equal the amount of taxes deemed paid under either section 902(a) or section 960(a)(1) with respect to the dividend to the extent the taxes deemed paid are FORI taxes under §1.907(c)–3 (b) or (c). See §1.907(c)–3(a)(1).

(6) *Special rule.* (i) No item in the formula described in paragraph (d)(1)(i) of this section includes amounts excluded from the gross income of a United States shareholder under section 959(a)(1).

(ii) With respect to a foreign corporation, earnings and profits in the formula described in paragraph (d)(4)(i) of this section do not include amounts excluded under section 959(b) from its gross income.

(7) *Deficits*—(i) *Allocation of deficits within a separate category*. In a taxable year in which a foreign corporation described in section 907(c)(3)(A) pays a dividend or has income that is subject to inclusion under section 951, if the foreign corporation has positive post—1986 undistributed earnings in a separate category but within that separate category there is a deficit in post-1986 undistributed earnings attributable to earnings other than FOGEI and FORI, that deficit shall be allocated ratably between the FOGEI and FORI post-1986 undistributed earnings within that separate category. Any deficit in post-1986 undistributed earnings attributable to either FOGEI or FORI shall be allocated first to FOGEI or FORI post-1986 undistributed earnings (as the case may be) to the extent thereof. Post-1986 undistributed FORI earnings are the post-1986 undistributed earnings (as defined in section 902 and the regulations under that section) attributable to FORI as defined in section 907(c) (2) and (3). Post-1986 undistributed FOGEI earnings are the post-1986 undistributed earnings (as defined in section 902 and the regulations under that section) attributable to FOGEI as defined in section 907(c) (1) and (3).

Example. Foreign corporation X for years 1987 and 1988 had the following undistributed earnings (none of which is income that is subject to inclusion under section 951) and foreign taxes:

	Earnings	Taxes
FOGEI	$800	$400
FORI	(750)	....
Other	700	250
Total	$750	$650

On December 31, 1988, X paid a dividend of all of its post-1986 undistributed earnings to its sole shareholder Y. Under paragraph (d)(5) and (7)(i) of this section and §1.907 (c)–2 (d)(5), $450 of Y's dividend is attributable to FOGEI ($50 from undistributed earnings plus a $400 section 78 dividend) and $950 is attributable to other earnings ($700 from undistributed earnings plus a $250 section 78 dividend).

(ii) *Deficits allocated among separate categories.* If a deficit in a separate category (''first separate category'') is allocated to another separate category (''second separate category'') under sections 902 and 960 pursuant to notice 88–71, 1988–2 CB 374 and the regulations under those sections, the following rules shall apply. Any deficit in post-1986 undistributed earnings attributable to either FOGEI (or FORI) from the first separate category shall be allocated to post-1986 undistributed earnings in the second separate category to the extent thereof in the following order:

(A) FOGEI (or FORI),

(B) FORI (or FOGEI), and

(C) Other income.

Any deficit in post-1986 undistributed earnings attributable to other income from the first separate category shall be allocated first to other post-1986 undistributed earnings and then ratably to FOGEI and FORI post—1986 undistributed earnings in the second separate category.

(iii) *Pre-1987 deficits.* The amount of a dividend paid by a foreign corporation described in section 907(c)(3)(A) out of positive pre-1987 earnings that is attributable to FOGEI and FORI shall be determined in a manner similar to that used in paragraph (d)(7) (i) and (ii) of this section except that the determinations shall be made on an annual basis.

(8) *Illustrations.* The application of this paragraph (d) is illustrated by the following examples.

Example 1. X, a domestic corporation, owns all of the stock of Y, a foreign corporation organized in country S. Y owns all of the stock of Z, a foreign corporation also organized in country S. Each corporation uses the calendar year as its taxable year. In 1983, Z has $150 of FOGEI earnings and profits and $250 of earnings and profits other than FOGEI or FORI. Assume that Z paid no taxes to S and X must include $100 in its gross income under section 951(a) with respect to Z. Under paragraph (d)(4)(i) of this section, $37.50 of the amount described in section 951(a) is FOGEI ($100×$150/$400). the remaining $62.50 of the section 951(a) amount represents other income.

Example 2. Assume the same facts as in Example 1 except that the taxable year in question is 1988. In addition, under the facts and circumstances, it is determined that of the $100 section 951(a) amount included in X's gross income, $30 is directly attributable to Z's FOGEI activity, $60 is directly attributable to Z's FORI activity and $10 is directly attributable to Z's other activity. Accordingly, under paragraph (d)(4)(i), $30 will be FOGEI and $60 will be FORI to X.

Example 3. (i) Assume the same facts as in *Example 1.* Assume further that, in 1983, Z distributes its entire earnings and profits ($400) to Y which consists of a dividend of $300 and a section 959(a)(1) distribution of $100. Y has no other earnings and profits during 1983. Assume that the dividend and distribution are not foreign personal holding company income under section 954(c). Y pays no taxes to S. In 1983, Y distributes its entire earnings and profits to X.

(ii) Under paragraphs (c)(2) and (d)(1)(i) of this section, Y has FOGEI of $112.50, *i.e.*, the amount of the dividend received by Y ($300) multiplied by the fraction described in paragraph (d)(1)(i). The numerator of the fraction is Z's FOGEI accumulated profits in excess of the FOGEI taxes paid ($112.50) and the denominator is Z's total accumulated profits in excess of total foreign taxes paid ($400) minus the amount excluded from Y's gross income under section 959(a)(1) ($100). The rule of paragraph (d)(6)(ii) of this section does not apply since X does not include any amount in its gross income under section 951(a) with respect to Y. If Y paid taxes to S, this paragraph (d) would apply to characterize those taxes as FOGEI taxes or other taxes. See § 1.907(c)–3(a)(8) and Example 2 (iii) under § 1.907(c)–3(e).

(iii) The distribution from Y to X is a dividend to the extent of $300, *i.e.*, the amount of the distribution ($400) minus the amount excluded from X's gross income under section 959(a)(1) ($100). Under paragraphs (d) (1)(i) and (6)(i) of this section, $112.50 of the dividend is FOGEI, *i.e.*, the amount of the dividend ($300) multiplied by a fraction. The numerator of the fraction is $112.50, *i.e.*, the FOGEI accumulated profits of Y in excess of FOGEI taxes paid ($150) minus the FOGEI accumulated profits of Y in excess of FOGEI taxes paid excluded from X's gross income under section 959(a)(1) ($37.50). The denominator of the fraction is $300, *i.e.*, the total accumulated profits of Y in excess of taxes paid ($400) minus the amount excluded from X's gross income under section 959(a)(1) ($100).

Example 4. Assume the same facts as in Example 1 with the following modifications: In 1983, Z's only earnings and profits are FORI earnings and profits which are included in X's gross income under section 951(a). Z distributes its entire earnings and profits to Y. In 1983, Y has total earnings and profits of $100 without regard to the dividend from Z, $60 of which are FORI earnings and profits. Y also has $40 which is included in X's gross income under section 951(a). Under paragraph (d)(6)(ii) of this section, the dividend from Z is disregarded for purposes of applying paragraph (d)(4)(i) of this section to the $40 included in X's gross income under section 951(a) with respect to Y. Accordingly, $24 of the amount described in section 951(a) is FORI ($40×$60/$100). Had these circumstances existed in 1988, and if the $40 included in X's gross income under section 951(a) was directly attributable to FORI activity, all of that income would be FORI to X.

(e) *Dividends, interest, and other amounts from sources within a possession.* FORI includes the items listed in (A) and (C) to the extent attributable to FORI of a corporation that is created or organized in or under the laws of a possession of the United States.

(f) *Income from partnerships, trusts, etc.* FORI and FOGEI include a person's distributive share (determined under the principles of section 704) of the income of any partnership and amounts included in income under subchapter J of chapter 1 of the Code (relating to the taxation of trusts, estates, and beneficiaries) to the extent the income and amounts are attributable to FORI and FOGEI. For taxable years beginning after 1986, the principles of § 1.904–5 (h) and (i) shall be applied to determine whether (and to what extent) a person's distributive share is FORI and FOGEI. Thus, for example, a less-than-10 percent corporate partner's share of income of the partnership would generally be treated as passive income to the partner, and not as FORI or FOGEI, unless an exception under §1.904–5 (h) and (i) applies.

[T.D. 8338, 56 FR 11071, Mar. 15, 1991]

§1.907(c)–3 FOGEI and FORI taxes (for taxable years beginning after December 31, 1982).

(a) *Tax characterization, allocation and apportionment*—(1) *Scope.* Paragraphs (a) (2) through (6) of this section provides rules for the characterization, allocation, and apportionment of the income taxes (other than withholding taxes) paid or accrued to a foreign country among FOGEI, FORI, and other income relevant for purposes of sections 907 and 904. Some of the rules in this section are expressed in terms of FOGEI taxes but they apply to FORI taxes by substituting ''FORI taxes'' for ''FOGEI taxes'' whenever appropriate. For the treatment of withholding taxes, see paragraph (a)(8) of this section. FOGEI taxes are determined without any reduction under section 907(a). In addition, determination of FOGEI taxes will not be affected by recharacterization of FOGEI by section 907(c)(4). See §1.907(c)–1(c)(5). Foreign taxes will not be characterized as creditable FORI taxes if section 907(b) and §1.907(b)–1 apply.

(2) *Three classes of income.* There are three classes of income: FOGEI, FORI, and other income.

(3) *More than one class in a foreign tax base.* If more than one class of income is taxed under one tax base under the law of a foreign country, the amount of pre-credit foreign tax for each base must be determined. This amount is the foreign taxes paid or accrued to that country for the base as increased by the tax credits (if any) which reduced those taxes and were allowed in the country for that tax. More than one class of income is taxed under the same base, if, under a foreign country's law, deductions from one class of income may reduce the income of any other class and the classes are subject to foreign tax at the same rates.

(4) *Allocation of tax within a base.* If more than one class of income is taxed under the same base under a foreign country's law, the pre-credit foreign tax for the base is apportioned to each class of income in proportion to the income of each class. Tax credits are than allocated (under paragraph (a)(6) of this section) to the apportioned pre-credit tax. Income of a class over the deductions allowed under foreign law for, and which are attributable to, that class.

(5) *Modified gross income.* Modified gross income is not necessarily the same as gross income as defined for purposes of chapter 1 of the Internal Revenue Code. Modified gross income is determined with reference to the foreign tax base for gross income (or its equivalent). However, the characterization of the base as a particular class of income is governed by general principles of U.S. tax law. Thus, for example—

(i) Gross income from extraction is the fair market value of oil or gas in the immediate vicinity of the well (as determined under §1.907(c)–1(b)(6) (without any deductions)).

(ii) Whether cost of goods sold (or any other deduction) is a deduction from modified gross income and the amount of such a deduction is determined under foreign law.

(iii) Modified gross income includes items that are part of the foreign tax base even though they are not gross income under U.S. law so long as the foreign taxes paid on the base constitute creditable taxes under section 901 (including taxes described in section 903). For example, if a foreign country imposes a tax (creditable under section 901) on a tax base that includes in small part a percentage of the value of a company's oil reserves in place, modified gross income from extraction includes such a percentage of value solely for purposes of making the tax allocation in paragraph (a)(4) of this section.

(iv) Modified gross income from extraction is increased for purposes of this paragraph (a)(5) by the entire excess of the posted price over fair market value if the foreign country uses a posted price system or other pricing arrangement described in section 907(d) in imposing its income tax.

(v) Modified gross income from FORI is that income attributable to the activities in sections 907(c)(2) (A) through (C) and (E).

(vi) Modified gross income for any class may not include gross income that is not subject to taxation by the foreign country.

(6) *Allocation of tax credits.* The foreign taxes paid or accrued on a particular class of income equals the precredit tax on the class reduced (but not below zero) by the credits allowed under foreign law against the foreign tax on the particular class. Any tax credit attributable to a class that is not allocated to that class is allocated to the other class in the base or, if there are three classes in the base, is apportioned ratably among the taxes paid or accrued on the other two classes (as reduced in accordance with the preceding sentence).

(7) *Withholding taxes.* Paragraph (a) (2) through (6) of this section does not apply to withholding taxes imposed by a foreign country. FOGEI taxes may include withholding taxes imposed with respect to a distribution from a corporation. The portion of the total withholding taxes on a distribution that constitutes FOGEI taxes is determined by the portion of the distribution that is FOGEI. In addition, FOGEI taxes may include taxes imposed on a distribution described in section 959(a)(1) or on amounts described in section 959(b). The portion of the total withholding taxes imposed on a distribution described in section 959(a)(1) or on amounts described in section 959(b) is determined by reference to the portion of the amount included in gross income under section 951(a) that was FOGEI.

(b) *Dividenss—In general*—(i) FOGEI taxes deemed paid with respect to a dividend equal the total taxes deemed paid with respect to the dividend multiplied by the fraction:

FOGEI taxes paid or accrued by the payor/Total foreign taxes paid or accrued by the payor.

(ii) With regard to dividends received in taxable years beginning after December 31, 1986, FOGEI taxes deemed paid with respect to a dividend equal the total taxes deemed paid with respect to the portion of the dividend within a separate category multiplied by the fraction:

$$\frac{\text{Post-1986 FOGEI taxes as determined under the principles of section 902(c)(2) that are allocable to that separate category}}{\text{Post-1986 foreign income taxes as determined under the principles of section 902(c)(2) that are allocable to that separate category.}}$$

(iii) This paragraph (b) applies to a dividend described in section 907(c)(3)(A) (including a section 1248 dividend) with reference to the particular taxable year or years of those accumulated profits out of which a dividend is paid. Determination of FOGEI taxes under this paragraph (b) must be made separately.

(A) For FOGEI taxes paid on FOGEI accumulated profits and total taxes paid on accumulated profits that arose in taxable years beginning before January 1, 1987, to which paragraph (b)(1)(i) of this section applies, and

(B) For FOGEI taxes paid on FOGEI accumulated profits and total taxes paid on accumulated profits that arose in taxable years beginning after December 31, 1986, to which paragraph (b)(1)(ii) of this section applies.

For purposes of these determinations, dividends are deemed to be paid first out of FOGEI and total accumulated profits that arose in taxable years beginning after December 31, 1986. See § 1.907(c)–2(d)(1)(i). See section 960(a)(3) and § 1.960–2 relating to distributions that are treated as dividends for purposes of section 902.

(2) *Section 78 dividend.* There are no FOGEI taxes with respect to section 78 dividends.

(c) *Includable amounts under section 951(a)*. (1) FOGEI taxes deemed paid with respect to an amount includable in gross income under section 951(a) equal the total taxes deemed paid with respect to that amount multiplied by the fraction:

$$\frac{\text{FOGEI taxes paid or accrued by the foreign corporation}}{\text{Total foreign taxes paid or accrued by the foreign corporation.}}$$

(2) With regard to an amount includable in gross income under section 951(a) in taxable years beginning after December 31, 1986, FOGEI taxes deemed paid with respect to that amount equal the total taxes deemed paid with respect to that amount within a separate category multiplied by the fraction:

$$\frac{\text{Post-1986 FOGEI taxes as determined under the principles of section 902(c)(2) that are allocable to that separate category}}{\text{Post-1986 foreign income taxes as determined under the principles of section 902(c)(2) that are allocable to that separate category.}}$$

Taxes in the fraction in this paragraph (c)(2) include only those foreign taxes that may be deemed paid under section 960(a) by reason of such inclusion. See §§1.960–1(c)(3) and 1.960–2(c).

(d) *Partnerships.* A partner's distributive share of the partnership's FOGEI taxes is determined under the principles of section 704.

(e) *Illustrations.* The application of this section may be illustrated by the following examples.

Example 1. X, a domestic corporation, owns all of the stock of Y, a foreign corporation organized in country S. Y owns all of the stock of Z, a foreign corporation organized in country T. Each corporation used the calendar year as its taxable year. In 1983, X includes in its gross income an amount described in section 951(a) with respect to Z. Assume that the taxes deemed paid under section 902(a) by X by reason of such an inclusion is $70. Assume further that Z paid total taxes of $120, $80 of which is FOGEI tax. Under paragraph (c) of this section, the FOGEI tax deemed paid is $46.67 (*i.e.*, $70 x $80/$120). This $46.67 is also FOGEI under §1.907(c)–2(d)(5) because it must be included in X's gross income under section 78.

Example 2 —(i) Assume the same facts as in Example 1. Assume further that in 1983, Z distributes its entire earnings and profits to Y. Y has no earnings and profits during 1983 other than this dividend. Y paid a tax of $50 to S. Assume that Y is deemed under section 902(b)(1) to pay $50 of the tax paid by Z which was not deemed paid by X under section 960(a)(1) in 1983. In 1983, Y distributes its entire earnings and profits to X. Assume that X is deemed under section 902(a) to pay $100 of the taxes actually paid, and deemed paid, by Y.

(ii) Paragraph (b)(1) of this section applies to characterize the $50 tax of Z that Y is deemed to pay under section 902(b)(1). Y is deemed to pay $33.33 of FOGEI tax, *i.e.*, the amount of the tax deemed paid by Y ($50) multiplied by a fraction. The numerator of the fraction is the amount of Z's FOGEI tax ($80) and the denominator is the total taxes paid by Z ($120).

(iii) Under paragraph (a)(8) of this section, a portion of the $50 tax actually paid by Y on the earnings and profits received from Z is FOGEI tax. The amount of tax actually paid by Y that is FOGEI tax depends on the amount of the distribution from Z that is FOGEI (see §1.907(c)–2(d)(1) (i) and Example 2 (ii) under §1.907(c)–2(d)(8)). This result does not depend upon whether a portion of the distribution from Z is described in section 959(b) and it follows even though a portion of Y's earnings and profits will be excluded from X's gross income under section 959(a)(1) when distributed by Y. Assume that $12.50 of the $50 tax actually paid by Y is FOGEI tax.

(iv) Under paragraph (b)(1) of this section, X is deemed to pay $45.83 of FOGEI tax by reason of the distribution from Y. This amount is determined by multiplying the total taxes deemed paid by X by reason of such distribution ($100) by a fraction. The numerator of the fraction is the FOGEI tax paid, and deemed paid, by Y ($45.83, *i.e.*, $33.33

under paragraph (ii) of this example plus $12.50 under paragraph (iii) of this example). The denominator of the fraction is the total taxes paid, and deemed paid, by Y ($100). This $45.83 is FOGEI under § 1.907(c)–2(d)(5) because it is included in X's gross income as a section 78 dividend.

Example 3 —(i) X, a domestic corporation, has a concession with foreign country Y that gives it the exclusive right to extract and export the crude oil and natural gas owned by Y. The concession agreement and location of the oil and gas wells mandate that X construct a system of pipelines to transport the minerals that are extracted to a port where they are loaded onto tankers for export. X owns the transportation facilities. Y has an income tax system under which income from mineral operations is subject to a 50 percent tax rate. The taxation by Y of the mineral operations is a separate tax base under paragraph (a)(3) of this section. Under this system, Y imposes the tax at the port prior to export and it establishes a posted price of $12 per barrel. Y also collects royalties of $1.44 per barrel (*i.e.*, 12 percent of this posted price) which is deductible in computing the petroleum tax. Y also allows X deductible lifting costs of $.20 per barrel and deductible transporting costs of $.80 per barrel. Y does not allow any credits against the mineral tax. Assume that X does not have any income in Y other than the mineral income. (In 1983, X extracts, transports, and exports 10,000,000 barrels of crude oil, but for convenience, all computations are in terms of one barrel). X pays foreign taxes of $4.78 per barrel, computed as follows:

Sales		$12.00
Royalties	$1.44	
Lifting	.20	
Transporting	.80	
	2.44	(2.44)
Income base		9.56
Tax rate (percent)		.50
Tax		4.78

Assume that these taxes are creditable taxes under section 901, that the fair market value of the oil at the port is $10 per barrel, and that under § 1.907(c)–1(b)(6) fair market value in the immediate vicinity of the oil wells is $9 per barrel. Thus, at the port, the excess of posted price ($12) over fair market value ($10) is $2.

(ii) The $4.78 foreign tax paid to Y is allocated to FOGEI and FORI in accordance with the rules in paragraph (a) (2) through (5) of this section.

(iii) Under paragraph (a)(3) of this section, FOGEI and FORI are subject to foreign taxation under one tax base. This foreign tax is allocated between FOGEI tax and FORI tax in accordance with paragraph (a) (4) and (5) of this section.

(iv) The modified gross income for FOGEI is $11, *i.e.*, fair market value in the immediate vicinity of the well ($9) plus the excess at the port of posted price over fair market value ($2). The modified gross income for FORI is $1, *i.e.*, value added to the oil beyond the well-head which is part of Y's tax base ($10–$9).

(v) The royalty deductions are all directly attributable to FOGEI.

(vi) Under paragraph (a)(4) of this section, the income of each class is determined as follows:

	FOGEI	FORI
Modified gross income	$11.00	$1.00
Deductions:		
Royalties	1.44	0
Lifting	.20	0
Transporting	0	.80
Total	1.64	.80
Net Income	9.36	.20

(vii) Under paragraph (a)(4) of this section, the total tax paid to Y is allocated to FOGEI and FORI in proportion to the income in each class. The calculation is as follows:

FOGEI tax=$4.78×$9.36/$9.56=$4.68
FORI tax=$4.78×$0.20/$9.56=$0.10

Thus, for the 10,000,000 barrels, the FOGEI tax is $46,800,000 and the FORI tax is $1,000,000.

(viii) The allocation under paragraph (a)(4) of this section, rather than the direct application of stated foreign tax rates to foreign-law taxable income in each class of income (which would produce the same results in the facts of this example), is necessary when a foreign country taxes more than one class of income under a progressive rate structure. See Example 4 in this paragraph (e).

Example 4. Assume the same facts as in Example 3 except that Y's tax is imposed at 40 percent for the first $20,000,000 of income and at 60 percent for all other income. The foreign taxes are allocated under paragraph (a)(4) of this section between FOGEI and FORI in the same manner as in paragraphs (vi) and (vii) of Example 3, as follows:

(1) Taxable income	$95,600,000
(2) Tax:	
(a) 40% of $20,000,000	8,000,000
(b) 60% of $75,600,000	45,360,000
(c) Total tax	53,360,000
(3) FOGEI tax (line 2(c)×$9.36/ $9.56)	52,243,680
(4) FORI tax (line 2(c)×$0.20/$9.56)	1,116,320

Example 5. Assume the same facts as in Example 3. Assume further that X refines the crude oil into primary products prior to export and Y imposes its tax on the basis of crude oil equivalences of $12 per barrel, rather than the value of the primary products, to establish port prices. Assume that this arrangement is a pricing arrangement described in section 907(d). Thus, Y does not

tax the refinery income. The results are the same as in Example 3 even if $12 per barrel is equal to, more than, or less than, the value of the primary products at the port. See paragraph (a)(5)(vi) of this section.

[T.D. 8338, 56 FR 11073, Mar. 15, 1991]

§1.907(d)–1 Disregard of posted prices for purposes of chapter 1 of the Code (for taxable years beginning after December 31, 1982).

(a) *In general*—(1) *Scope.* Section 907(d) applies if a person has FOGEI from the—

(i) Acquisition (other than from a foreign government) or

(ii) Disposition of minerals at a posted price that differs from the fair market value at the time of the transaction. Also, if a seller (other than a foreign government) derives FOGEI upon a disposition described in the preceding sentence, section 907(d) applies to the acquisition by the purchaser whether or not the purchaser has FOGEI. Thus, section 907(d) may apply in determining a person's FORI.

(2) *Initial computation requirement.* If section 907(d) applies to any person, income on the transaction as initially reflected on the person's return shall be computed as if the transaction were effected at fair market value. This requirement applies the first time a person has taxable income derived from either the transaction or an item (such as a dividend described in section 907(c)(3)(A)) determined with reference to that income.

(3) *Burden of proof.* The taxpayer must be able to demonstrate the transaction as it actually occurred and the basis for reporting the transaction under the principles of paragraph (a)(2) of this section.

(4) *Related parties.* Section 907(d) (as a rule of characterization) applies whether or not the parties to the transaction are related. Thus, the excess of the posted price over the fair market value may never be taken into account in determining a person's FOGEI under section 907(a) but may be taken into account in determining a person's FORI.

(b) *Adjustments.* If a taxpayer does not comply with the initial requirement of paragraph (a)(2) of this section, adjustments under section 907(d) may be made only by the Commissioner in the same manner that section 482 is administered. Correlative and similar adjustments consistent with the substantive and procedural principles of section 482 and §1.482–1(d) apply. However, section 907(d) is not a limitation on section 482. If a taxpayer disposing of minerals at a posted price does comply with the initial computation requirement of this section, adjustments and correlative and similar adjustments consistent with the substantive and procedural aspects of section 482 and §1.482–1(d) shall apply, whether made on the return by the taxpayer or on a later audit. This paragraph (b) does not apply to an actual sale or exchange of minerals made between persons with respect to whom adjustments under section 482 would never apply (but see paragraph (a)(4) of this section).

(c) *Definitions.* For purposes of this section—

(1) *Foreign government.* The term *foreign government* means only the integral parts or controlled entities of a foreign sovereign and political subdivisions of a foreign country.

(2) *Minerals.* The term *minerals* has the same meaning as in §1.907(c)–1(f)(1).

(3) *Posted price.* The term *posted price* means the price set by, or at the direction of, a foreign government to calculate income for purposes of its tax or at which minerals must be sold.

(4) *Other pricing arrangement.* The term *other pricing arrangement* in section 907(d) means a pricing arrangement having the effect of a posted price.

(5) *Fair market value.* The term *fair market value,* whether or not at the port prior to export, is determined in the same way that the wellhead price is determined under §1.907(c)–1(b)(6).

[T.D. 8338, 56 FR 11075, Mar. 15, 1991]

§1.907(e)–1 [Reserved]

§1.907(f)–1 Carryback and carryover of credits disallowed by section 907(a) (for amounts carried between taxable years that each begin after December 31, 1982).

(a) *In general.* If a taxpayer chooses the benefits of section 901, any unused FOGEI tax paid or accrued in a taxable year beginning after December 31, 1982, may be carried to the taxable years specified in section 907(f) under the carryback and carryover principles of this section § 1.904–2(b). See section 907(e) and § 1.907(e)–1 for transitional rules that apply to unused FOGEI taxes carried back or forward between a taxable year beginning before January 1, 1983, and a taxable year beginning after December 31, 1982.

(b) *Unused FOGEI tax*—(1) *In general.* The ''unused FOGEI tax'' for purposes of this section is the excess of the FOGEI taxes for a taxable year (year of origin) over that year's limitation level (as defined in § 1.907(a)–1(b)).

(2) *Year of origin.* The term ''year of origin'' in the regulations under section 904 corresponds to the term ''unused credit year'' under section 907(f).

(c) *Tax deemed paid or accrued.* The unused FOGEI tax from a year of origin that may be deemed paid or accrued under section 907(f) in any preceding or succeeding taxable year (''excess limitation year'') may not exceed the lesser of—

(1) The excess extraction limitation for the excess limitation year, or

(2) The excess general section 904 limitation for the excess limitation year.

(d) *Excess extraction limitation.* Under section 907(f)(2)(A), the ''excess extraction limitation'' for an excess limitation year is the amount by which that year's section 907(a) extraction limitation exceeds the sum of—

(1) The FOGEI taxes paid or accrued, and

(2) The FOGEI taxes deemed paid or accrued in that year by reason of a section 907(f) carryback or carryover from preceding years of origin.

(e) *Excess general section 904 limitation.* Under section 907(f)(2)(B), the ''excess general section 904 limitation'' for an excess limitation year is the amount by which that year's section 904 general limitation exceeds the sum of—

(1) The general limitation taxes paid or accrued (or deemed to have been paid under section 902 or 960) to all foreign countries and possessions of the United States during the taxable year,

(2) The general limitation taxes deemed paid or accrued in such taxable year under section 904(c) and which are attributable to taxable years preceding the unused credit year, plus

(3) The FOGEI taxes deemed paid or accrued in that year by reason of a section 907(f) carryover (or carryback) from preceding years of origin.

(f) *Section 907(f) priority.* If a taxable year is a year of origin under both section 907(f) and section 904(c), section 907(f) applies first. See section 907(f)(3)(A).

(g) *Cross-reference.* In computing the carryback and carryover of disallowed credits under section 907(f), the principles of § 1.904–2 (d), (e), and (f) apply.

(h) *Example.* The following example illustrates the application of section 907(f).

Example. X, a U.S. corporation organized on January 1, 1983, uses the accrual method of accounting and the calendar year as its taxable year. X's only income is income which is not subject to a separate tax limitation under section 904(d). X's preliminary U.S. tax liability indicates an effective rate of 46% for taxable years 1983–1985. X has the following foreign tax items for 1983–1985:

	1983	1984	1985
1. FOGEI	$15,000	$20,000	$10,000
2. FOGEI taxes	7,500	9,200	4,200
3. Other foreign taxable income	8,000	5,000	10,000
4. Other foreign taxes	3,200	2,000	3,000
5. (a) Section 907(a) limitation (.46 x Line 1)	6,900	9,200	4,600
(b) General section 904 limitation (.46 x (line 1 plus line 3))	10,580	11,500	9,200
6. (a) Unused FOGEI taxes (excess of line 2 over line 5(a))	600	0	0
(b) Unused general limitation taxes (excess of line 4 plus lesser of line 2 or line 5(a) over line 5(b))	0	0	0
7. (a) FOGEI taxes from years preceding 1983 deemed accrued under section 907(f)	0	0	0
(b) Section 904 general limitation taxes from years preceding 1983 deemed accrued under section 904(c)	0	0	0
8. (a) Excess section 907(a) limitation (excess of line 5(a) over sum of line 2 and line 7(a))	0	0	400
(b) Excess section 904 general limitation (excess of line 5(b) over sum of line 4, lesser of line 2 and line 5(a) and line 7(b))	480	300	2,000
9. Limit on FOGEI taxes that will be deemed accrued under section 907(f) (lesser of line 8(a) and line 8(b)	0	0	400

X has unused 1983 FOGEI taxes of $600. Since the excess section 907(a) limitation for 1984 is zero, the unused FOGEI taxes are carried to 1985. Of the $600 carryover, $400 is deemed accrued in 1985 and the balance of $200 is carried to following years (but not to a year after 1988). After the carryover from 1983 to 1985, the excess section 904 general limitation for 1985 (line 8(b)) is reduced by $400 to $1,600 to reflect the amount of 1983 FOGEI taxes deemed accrued in 1985 under section 907(f).

[T.D. 8338, 56 FR 11079, Mar. 15, 1991]

SUBCHAPTER A—INCOME TAX (Continued)

PART 1—INCOME TAXES (CONTINUED)

Normal Taxes and Surtaxes (Continued)

TAX BASED ON INCOME FROM SOURCES WITHIN OR WITHOUT THE UNITED STATES (CONTINUED)

EARNED INCOME OF CITIZENS OR RESIDENTS OF UNITED STATES

1.911–1 Partial exclusion for earned income from sources within a foreign country and foreign housing costs.
1.911–2 Qualified individuals.
1.911–3 Determination of amount of foreign earned income to be excluded.
1.911–4 Determination of housing cost amount eligible for exclusion or deduction.
1.911–5 Special rules for married couples.
1.911–6 Disallowance of deductions, exclusions, and credits.
1.911–7 Procedural rules.
1.911–8 Former deduction for certain expenses of living abroad.

EARNED INCOME OF CITIZENS OF UNITED STATES

1.912–1 Exclusion of certain cost-of-living allowances.
1.912–2 Exclusion of certain allowances of Foreign Service personnel.
1.921–1T Temporary regulations providing transition rules for DISCs and FSCs.
1.921–2 Foreign Sales Corporation—general rules.
1.921–3T Temporary regulations; Foreign Sales Corporation general rules.
1.922–1 Requirements that a corporation must satisfy to be a FSC or a small FSC.
1.923–1T Temporary regulations; exempt foreign trade income.
1.924(a)–1T Temporary regulations; definition of foreign trading gross receipts.
1.924(c)–1 Requirement that a FSC be managed outside the United States.
1.924(d)–1 Requirement that economic processes take place outside the United States.
1.924(e)–1 Activities relating to the disposition of export property.
1.925(a)–1T Temporary regulations; transfer pricing rules for FSCs.
1.925(b)–1T Temporary regulations; marginal costing rules.
1.926(a)–1 Distributions to shareholders.
1.926(a)–1T Temporary regulations; distributions to shareholders.
1.927(a)–1T Temporary regulations; definition of export property.
1.927(b)–1T Temporary regulations; definition of gross receipts.
1.927(d)–1 Other definitions.
1.927(d)–2T Temporary regulations; definitions and special rules relating to Foreign Sales Corporation.
1.927(e)–1 Special sourcing rule.
1.927(e)–2T Temporary regulations; effect of boycott participation on FSC and small FSC benefits.
1.927(f)–1 Election and termination of status as a Foreign Sales Corporation.

POSSESSIONS OF THE UNITED STATES

1.931–1 Citizens of the United States and domestic corporations deriving income from sources within a certain possession of the United States.
1.932–1 Status of citizens of U.S. possessions.
1.933–1 Exclusion of certain income from sources within Puerto Rico.
1.934–1 Limitation on reduction in income tax liability incurred to the Virgin Islands.
1.935–1 Coordination of U.S. and Guam individual income taxes.
1.936–1 Elections.
1.936–4 Intangible property income in the absence of an election out.
1.936–5 Intangible property income when an election out is made: Product, business presence, and contract manufacturing.
1.936–6 Intangible property income when an election out is made: cost sharing and profit split options; covered intangibles.
1.936–7 Manner of making election under section 936 (h)(5); special election for export sales; revocation of election under section 936(a).
1.936–8T Qualified possession source investment income (temporary). [Reserved]
1.936–9T Source of qualified possession source investment income (temporary). [Reserved]
1.936–10 Qualified investments.
1.936–11T New lines of business prohibited (Temporary).

CHINA TRADE ACT CORPORATIONS

1.941–1 Special deduction for China Trade Act corporations.
1.941–2 Meaning of terms used in connection with China Trade Act corporations.
1.941–3 Illustration of principles.
1.943–1 Withholding by a China Trade Act corporation.

CONTROLLED FOREIGN CORPORATIONS

1.951–1 Amounts included in gross income of United States shareholders.
1.951–2 Coordination of subpart F with election of a foreign investment company to distribute income.
1.951–3 Coordination of subpart F with foreign personal holding company provisions.
1.952–1 Subpart F income defined.
1.952–2 Determination of gross income and taxable income of a foreign corporation.
1.953–1 Income from insurance of United States risks.
1.953–2 Actual United States risks.
1.953–3 Risks deemed to be United States risks.
1.953–4 Taxable income to which section 953 applies.
1.953–5 Corporations not qualifying as insurance companies.
1.953–6 Relationship of sections 953 and 954.
1.954–0 Introduction.
1.954–1 Foreign base company income.
1.954–1T Foreign base company income (temporary).
1.954–2 Foreign personal holding company income.
1.954–2T Foreign personal holding company income (temporary).
1.954–3 Foreign base company sales income.
1.954–4 Foreign base company services income.
1.954–5 Increase in qualified investments in less developed countries; taxable years of controlled foreign corporations beginning before January 1, 1976.
1.954–6 Foreign base company shipping income.
1.954–7 Increase in qualified investments in foreign base company shipping operations.
1.954–8 Foreign base company oil related income.
1.954–9T Hybrid branches (temporary).
1.955–0 Effective dates.
1.955–1 Shareholder's pro rata share of amount of previously excluded subpart F income withdrawn from investment in less developed countries.
1.955–2 Amount of a controlled foreign corporation's qualified investments in less developed countries.
1.955–3 Election as to date of determining qualified investments in less developed countries.
1.955–4 Definition of less developed country.
1.955–5 Definition of less developed country corporation.
1.955–6 Gross income from sources within less developed countries.
1.955A–1 Shareholder's pro rata share of amount of previously excluded subpart F income withdrawn from investment in foreign base company shipping operations.
1.955A–2 Amount of a controlled foreign corporation's qualified investments in foreign base company shipping operations.
1.955A–3 Election as to qualified investments by related persons.
1.955A–4 Election as to date of determining qualified investment in foreign base company shipping operations.
1.956–1 Shareholder's pro rata share of a controlled foreign corporation's increase in earnings invested in United States property.
1.956–1T Shareholder's pro rata share of a controlled foreign corporation's increase in earnings invested in United States property (temporary).
1.956–2 Definition of United States property.
1.956–2T Definition of United States property (temporary).
1.956–3T Certain trade or service receivables acquired from United States persons (temporary).
1.957–1 Definition of controlled foreign corporation.
1.957–2 Controlled foreign corporation deriving income from insurance of United States risks.
1.957–3 Corporations organized in United States possessions.
1.957–4 United States person defined.
1.958–1 Direct and indirect ownership of stock.
1.958–2 Constructive ownership of stock.
1.959–1 Exclusion from gross income of United States persons of previously taxed earning and profits.
1.959–2 Exclusion from gross income of controlled foreign corporations of previously taxed earnings and profits.
1.959–3 Allocation of distributions to earnings and profits of foreign corporations.
1.959–4 Distributions to United States persons not counting as dividends.
1.960–1 Foreign tax credit with respect to taxes paid on earnings and profits of controlled foreign corporations.
1.960–2 Interrelation of section 902 and section 960 when dividends are paid by third-, second-, or first-tier corporation.
1.960–3 Gross-up of amounts included in income under section 951.
1.960–4 Additional foreign tax credit in year of receipt of previously taxed earnings and profits.
1.960–5 Credit for taxable year of inclusion binding for taxable year of exclusion.
1.960–6 Overpayments resulting from increase in limitation for taxable year of exclusion.
1.960–7 Effective dates.
1.961–1 Increase in basis of stock in controlled foreign corporations and of other property.
1.961–2 Reduction in basis of stock in foreign corporations and of other property.

1.962–1 Limitation of tax for individuals on amounts included in gross income under section 951(a).
1.962–2 Election of limitation of tax for individuals.
1.962–3 Treatment of actual distributions.
1.962–4 Transitional rules for certain taxable years.
1.963–0 Repeal of section 963; effective dates.
1.963–1 Exclusion of subpart F income upon receipt of minimum distribution.
1.963–2 Determination of the amount of the minimum distribution.
1.963–3 Distributions counting toward a minimum distribution.
1.963–4 Limitations on minimum distribution from a chain or group.
1.963–5 Foreign corporations with variation in foreign tax rate because of distributions.
1.963–6 Deficiency distribution.
1.963–7 Transitional rules for certain taxable years.
1.963–8 Determination of minimum distribution during the surcharge period.
1.964–1 Determination of the earnings and profits of a foreign corporation.
1.964–1T Special rules for computing earnings and profits of controlled foreign corporations in taxable years beginning after December 31, 1986 (temporary).
1.964–2 Treatment of blocked earnings and profits.
1.964–3 Records to be provided by United States shareholders.
1.964–4 Verification of certain classes of income.
1.964–5 Effective date of subpart F.

EXPORT TRADE CORPORATIONS

1.970–1 Export trade corporations.
1.970–2 Elections as to date of determining investments in export trade assets.
1.970–3 Effective date of subpart G.
1.971–1 Definitions with respect to export trade corporations.
1.972–1 Consolidation of group of export trade corporations.
1.981–0 Repeal of section 981; effective dates.
1.981–1 Foreign law community income for taxable years beginning after December 31, 1966, and before January 1, 1977.
1.981–2 Foreign law community income for taxable years beginning before January 1, 1967.
1.981–3 Definitions and other special rules.
1.985–0 Outline of regulation.
1.985–1 Functional currency.
1.985–2 Election to use the United States dollar as the functional currency of a QBU.
1.985–3 United States dollar approximate separate transactions method.
1.985–4 Method of accounting.
1.985–5 Adjustments required upon change in functional currency.
1.985–6 Transition rules for a QBU that uses the dollar approximate separate transactions method for its first taxable year beginning in 1987.
1.985–7 Adjustments required in connection with a change to DASTM.
1.985–8T Special rules applicable to the European Monetary Union (conversion to the euro) (temporary).
1.987–1 Profit and loss method of accounting for a qualified business unit of a taxpayer having a different functional currency from the taxpayer. [Reserved]
1.987–2 Accounting for gain or loss on certain transfers of property. [Reserved]
1.987–3 Termination. [Reserved]
1.987–4 Special rules relating to QBU branches of foreign taxpayers. [Reserved]
1.987–5 Transition rules for certain qualified business units using a profit and loss method of accounting for taxable years beginning before January 1, 1987.
1.988–0 Taxation of gain or loss from a section 988 transaction; table of contents.
1.988–1 Certain definitions and special rules.
1.988–2 Recognition and computation of exchange gain or loss.
1.988–3 Character of exchange gain or loss.
1.988–4 Source of gain or loss realized on a section 988 transaction.
1.988–5 Section 988(d) hedging transactions.
1.989(a)–1 Definition of a qualified business unit.
1.989(b)–1 Definition of weighted average exchange rate.
1.989(c)–1 Transition rules for certain branches of United States persons using a net worth method of accounting for taxable years beginning before January 1, 1987.

DOMESTIC INTERNATIONAL SALES CORPORATIONS

1.991–1 Taxation of a domestic international sales corporation.
1.992–1 Requirements of a DISC.
1.992–2 Election to be treated as a DISC.
1.992–3 Deficiency distributions to meet qualification requirements.
1.992–4 Coordination with personal holding company provisions in case of certain produced film rents.
1.993–1 Definition of qualified export receipts.
1.993–2 Definition of qualified export assets.
1.993–3 Definition of export property.
1.993–4 Definition of producer's loans.
1.993–5 Definition of related foreign export corporation.
1.993–6 Definition of gross receipts.
1.993–7 Definition of United States.
1.994–1 Inter-company pricing rules for DISC's.
1.994–2 Marginal costing rules.
1.995–1 Taxation of DISC income to shareholders.

1.995–2 Deemed distributions in qualified years.
1.995–3 Distributions upon disqualification.
1.995–4 Gain on disposition of stock in a DISC.
1.995–5 Foreign investment attributable to producer's loans.
1.995–6 Taxable income attributable to military property.
1.996–1 Rules for actual distributions and certain deemed distributions.
1.996–2 Ordering rules for losses.
1.996–3 Divisions of earnings and profits.
1.996–4 Subsequent effect of previous disposition of DISC stock.
1.996–5 Adjustment to basis.
1.996–6 Effectively connected income.
1.996–7 Carryover of DISC tax attributes.
1.996–8 Effect of carryback of capital loss or net operating loss to prior DISC taxable year.
1.997–1 Special rules for subchapter C of the Code.

EARNED INCOME OF CITIZENS OR RESIDENTS OF UNITED STATES

§ 1.911–1 Partial exclusion for earned income from sources within a foreign country and foreign housing costs.

(a) *In general.* Section 911 provides that a qualified individual may elect to exclude the individual's foreign earned income and the housing cost amount from the individual's gross income for the taxable year. Foreign earned income is excludable to the extent of the applicable limitation for the taxable year. The housing cost amount for the taxable year is excludable to the extent attributable to employer provided amounts. If a portion of the housing cost amount for the taxable year is attributable to non-employer provided amounts, such amount may be deductible by the qualified individual subject to a limitation. The amounts excluded under section 911(a) and the amount deducted under section 911(c)(3)(A) for the taxable year shall not exceed the individual's foreign earned income for such taxable year. Foreign earned income must be earned during a period for which the individual qualifies to make an election under section 911(d)(1). A housing cost amount that would be deductible except for the application of this limitation may be carried over to the next taxable year and is deductible to the extent of the limitation for that year. Except as otherwise provided, §§ 1.911–1 through 1.911–7 apply to taxable years beginning after December 31, 1981. These sections do not apply to any item of income, expense, deduction, or credit arising before January 1, 1982, even if such item is attributable to services performed after December 31, 1981.

(b) *Scope.* Section 1.911–2 provides rules for determining whether an individual qualifies to make an election under section 911. Section 1.911–3 provides rules for determining the amount of foreign earned income that is excludable under section 911(a)(1). Section 1.911–4 provides rules for determining the housing cost amount and the portions excludable under section 911(a)(2) or deductible under section 911(c)(3). Section 1.911–5 provides special rules applicable to married couples. Section 1.911–6 provides for the disallowance of deductions, exclusions, and credits attributable to amounts excluded under section 911. Section 1.911–7 provides procedural rules for making or revoking an election under section 911. Section 1.911–8 provides a reference to rules applicable to taxable years beginning before January 1, 1982.

(Sec. 911 (95 Stat. 194; 26 U.S.C. 911) and sec. 7805 (68A Stat. 917; 26 U.S.C. 7805) of the Internal Revenue Code of 1954)

[T.D. 8006, 50 FR 2964, Jan. 23, 1985]

§1.911–2 Qualified individuals.

(a) *In general.* An individual is a qualified individual if:

(1) The individual's tax home is in a foreign country or countries throughout—

(i) The period of bona fide residence described in paragraph (a)(2)(i) of this section, or

(ii) The 330 full days of presence described in paragraph (a)(2)(ii) of this section, and

(2) The individual is either—

(i) A citizen of the United States who establishes to the satisfaction of the Commissioner or his delegate that the individual has been a bona fide resident of a foreign country or countries for an uninterrupted period which includes an entire taxable year, or

(ii) A citizen or resident of the United States who has been physically present in a foreign country or countries for at least 330 full days during any period of twelve consecutive months.

(b) *Tax home.* For purposes of paragraph (a)(i) of this section, the term "tax home" has the same meaning which it has for purposes of section 162(a)(2) (relating to travel expenses away from home). Thus, under section 911, an individual's tax home is considered to be located at his regular or principal (if more than one regular) place of business or, if the individual has no regular or principal place of business because of the nature of the business, then at his regular place of abode in a real and substantial sense. An individual shall not, however, be considered to have a tax home in a foreign country for any period for which the individual's abode is in the United States. Temporary presence of the individual in the United States does not necessarily mean that the individual's abode is in the United States during that time. Maintenance of a dwelling in the United States by an individual, whether or not that dwelling is used by the individual's spouse and dependents, does not necessarily mean that the individual's abode is in the United States.

(c) *Determination of bona fide residence.* For purposes of paragraph (a)(2)(i) of this section, whether an individual is a bona fide resident of a foreign country shall be determined by applying, to the extent practical, the principles of section 871 and the regulations thereunder, relating to the determination of the residence of aliens. Bona fide residence in a foreign country or countries for an uninterrupted period may be established, even if temporary visits are made during the period to the United States or elsewhere on vacation or business. An individual with earned income from sources within a foreign country is not a bona fide resident of that country if:

(1) The individual claims to be a nonresident of that foreign country in a statement submitted to the authorities of that country, and

(2) The earned income of the individual is not subject, by reason of nonresidency in the foreign country, to the income tax of that country.

If an individual has submitted a statement of nonresidence to the authorities of a foreign country the accuracy of which has not been resolved as of any date when a determination of the individual's bona fide residence is being made, then the individual will not be considered a bona fide resident of the foreign country as of that date.

(d) *Determination of physical presence.* For purposes of paragraph (a)(2)(ii) of this section, the following rules apply.

(1) *Twelve-month test.* A period of twelve consecutive months may begin with any day but must end on the day before the corresponding day in the twelfth succeeding month. The twelve-month period may begin before or after arrival in a foreign country and may end before or after departure.

(2) *330-day test.* The 330 full days need not be consecutive but may be interrupted by periods during which the individual is not present in a foreign country. In computing the minimum 330 full days of presence in a foreign country or countries, all separate periods of such presence during the period of twelve consecutive months are aggregated. A full day is a continuous period of twenty-four hours beginning with midnight and ending with the following midnight. An individual who has been present in a foreign country and then travels over areas not within any foreign country for less than twenty-four hours shall not be deemed outside a foreign country during the period of travel. If an individual who is in transit between two points outside the United States is physically present in the United States for less than twenty-four hours, such individual shall not be treated as present in the United States during such transit but shall be treated as travelling over areas not within any foreign country. For purposes of this paragraph (d)(2), the term ‘‘transit between two points outside the United States’’ has the same meaning that it has when used in section 7701(b)(6)(C).

(3) *Illustrations of the physical presence requirement.* The physical presence requirement of paragraph (a)(2)(ii) of this section is illustrated by the following examples:

Example 1. B, a U.S. citizen, arrives in Venezuela from New York at 12 noon on April 24, 1982. B remains in Venezuela until 2 p.m. on March 21, 1983, at which time B departs for the United States. Among other possible twelve month periods, B is present in a foreign country an aggregate of 330 full days during each of the following twelve month periods: March 21, 1982 through March 20, 1983; and April 25, 1982 through April 24, 1983.

Example 2. C, a U.S. citizen, travels extensively from the time C leaves the United States on March 5, 1982, until the time C departs the United Kingdom on January 1, 1984, to return to the United States permanently. The schedule of C’s travel and the number of full days at each location are listed below:

Country	Time and date of arrival	Time and date of departure	Full days in foreign country
United States		10 p.m. (by air) Mar. 5, 1982	
United Kingdom	9 a.m. Mar. 6, 1982	10 p.m. (by ship) June 25, 1982	110
United States	11 a.m. June 30, 1982	1 p.m. (by ship) July 19, 1982	0
France	3 p.m. July 24, 1982	11 a.m. (by air) Aug. 22, 1983	393
United States	4 p.m. Aug. 22, 1983	9 a.m. (by air) Sept. 4, 1983	0
United Kingdom	9 a.m. Sept. 5, 1983	9 a.m. (by air) Jan. 1, 1984	117
United States	1 p.m. Jan. 1, 1984		

Among other possible twelve–month periods, C is present in a foreign country or countries an aggregate of 330 full days during the following twelve–month periods: March 2, 1982 through March 1, 1983; and January 21, 1983 through January 20, 1984. The computation of days with respect to each twelve month period may be illustrated as follows:

First twelve–month period (March 2, 1982 through March 1, 1983):

	Full days in foreign country
Mar. 2, 1982 through Mar. 6, 1982	0
Mar. 7, 1982 through June 24, 1982	110
June 25, 1982 through July 24, 1982	0
July 25, 1982 through Mar. 1, 1983	220
Total full days	330

Second twelve–month period (January 21, 1983 through January 20, 1984):

	Full days in foreign country
Jan. 21, 1983 through Aug. 21, 1983	213
Aug. 22, 1983 through Sept. 5, 1983	0
Sept. 6, 1983 through Dec. 31, 1983	117

	Full days in foreign country
Jan. 1, 1984 through Jan. 20, 1984	0
Total full days	330

(e) *Special rules.* For purposes only of establishing that an individual is a qualified individual under paragraph (a) of this section, residence or presence in a foreign country while there employed by the U.S. government or any agency or instrumentality of the U.S. government counts towards satisfaction of the requirements of §1.911–2(a). (But see section 911(b)(1)(B)(ii) and §1.911–3(c)(3) for the rule excluding amounts paid by the U.S. government to an employee from the definition of foreign earned income.) Time spent in a foreign country prior to January 1, 1982, counts toward satisfaction of the bona fide residence and physical presence requirements, even though no exclusion or deduction may be allowed under section 911 for income attributable to services performed during that time. For purposes or paragraph (a)(2)(ii) of this section, the term ''resident of the United States'' includes an individual for whom a valid election is in effect under section 6013 (g) or (h) for the taxable year or years during which the physical presence requirement is satisfied.

(f) *Waiver of period of stay in foreign country due to war or civil unrest.* Notwithstanding the requirements of paragraph (a) of this section, an individual whose tax home is in, a foreign country, and who is a bona fide resident of, or present in a foreign country for any period, who leaves the foreign country after August 31, 1978, before meeting the requirements of paragraph (a) of this section, may as provided in this paragraph, qualify to make an election under section 911(a) and §1.911–7(a). If the Secretary determines, after consultation with the Secretary of State or his delegate, that war, civil unrest, or similar adverse conditions existed in a foreign country, then the Secretary shall publish the name of the foreign country and the dates between which such conditions were deemed to exist. In order to qualify to make an election under this paragraph, the individual must establish to the satisfaction of the Secretary that the individual left a foreign country, the name of which has been published by the Secretary, during the period when adverse conditions existed and that the individual could reasonably have expected to meet the requirements of paragraph (a) of this section but for the adverse conditions. The individual shall attach to his return for the taxable year a statement that the individual expected to meet the requirements of paragraph (a) of this section but for the conditions in the foreign country which precluded the normal conduct of business by the individual. Such individual shall be treated as a qualified individual, but only for the actual period of residence or presence. Thus, in determining the number of the individual's qualifying days, only days within the period of actual residence or presence shall be counted.

(g) *United States.* The term ''United States'' when used in a geographical sense includes any territory under the sovereignty of the United States. It includes the states, the District of Columbia, the possessions and territories of the United States, the territorial waters of the United States, the air space over the United States, and the seabed and subsoil of those submarine areas which are adjacent to the territorial waters of the United States and over which the United States has exclusive rights, in accordance with international law, with respect to the exploration and exploitation of natural resources.

(h) *Foreign country.* The term ''foreign country'' when used in a geographical sense includes any territory under the sovereignty of a government other than that of the United States. It includes the territorial waters of the foreign country (determined in accordance with the laws of the United States), the air space over the foreign country, and the seabed and subsoil of those submarine areas which are adjacent to the territorial waters of the foreign country and over which the foreign country has exclusive rights, in accordance with international law, with respect to the exploration and exploitation of natural resources.

(Sec. 911 (95 Stat. 194; 26 U.S.C. 911) and sec. 7805 (68A Stat. 917; 26 U.S.C. 7805) of the Internal Revenue Code of 1954)

[T.D. 8006, 50 FR 2965, Jan. 23, 1985]

§ 1.911–3 Determination of amount of foreign earned income to be excluded.

(a) *Definition of foreign earned income.* For purposes of section 911 and the regulations thereunder, the term ''foreign earned income'' means earned income (as defined in paragraph (b) of this section) from sources within a foreign country (as defined in § 1.911–2(h)) that is earned during a period for which the individual qualifies under § 1.911–2(a) to make an election. Earned income is from sources within a foreign country if it is attributable to services performed by an individual in a foreign country or countries. The place of receipt of earned income is immaterial in determining whether earned income is attributable to services performed in a foreign country or countries.

(b) *Definition of earned income*—(1) *In general.* The term ''earned income'' means wages, salaries, professional fees, and other amounts received as compensation for personal services actually rendered including the fair market value of all remuneration paid in any medium other than cash. Earned income does not include any portion of an amount paid by a corporation which represents a distribution of earnings and profits rather than a reasonable allowance as compensation for personal services actually rendered to the corporation.

(2) *Earned income from business in which capital is material.* In the case of an individual engaged in a trade or business (other than in corporate form) in which both personal services and capital are material income producing factors, a reasonable allowance as compensation for the personal services actually rendered by the individual shall be considered earned income, but the total amount which shall be treated as the earned income of the individual from such trade or business shall in no case exceed thirty percent of the individual's share of the net profits of such trade or business.

(3) *Professional fees.* Earned income includes all fees received by an individual engaged in a professional occupation (such as doctor or lawyer) in the performance of professional activities. Professional fees constitute earned income even though the individual employs assistants to perform part or all of the services, provided the patients or clients are those of the individual and look to the individual as the person responsible for the services rendered.

(c) *Amounts not included in foreign earned income.* Foreign earned income does not include an amount:

(1) Excluded from gross income under section 119;

(2) Received as a pension or annuity (including social security benefits);

(3) Paid to an employee by an employer which is the U.S. government or any U.S. government agency or instrumentality;

(4) Included in the individual's gross income by reason of section 402(b) (relating to the taxability of a beneficiary of a nonexempt trust) or section 403(c) (relating to the taxability of a beneficiary under a nonqualified annuity or under annuities purchased by exempt organizations);

(5) Included in gross income by reason of § 1.911–6(b)(4)(ii); or

(6) Received after the close of the first taxable year following the taxable year in which the services giving rise to the amounts were performed. For treatment of amounts received after December 31, 1962, which are attributable to services performed on or before December 31, 1962, and with respect to which there existed on March 12, 1962, a right (whether forfeitable or nonforfeitable) to receive such amounts, see § 1.72–8.

(d) *Determination of the amount of foreign earned income that may be excluded under section 911(a)(1)*—(1) *In general.* Foreign earned income described in this section may be excluded under section 911(a)(1) and this paragraph only to the extent of the limitation specified in paragraph (d)(2) of this section. Income is considered to be earned in the taxable year in which the services giving rise to the income are performed. The determination of the amount of excluded earned income in this manner does not affect the time for reporting any amounts included in gross income.

(2) *Limitation*—(i) *In general.* The term ‘‘section 911(a)(1) limitation’’ means the amount of foreign earned income for a taxable year which may be excluded under section 911(a)(1). The section 911(a)(1) limitation shall be equal to the lesser of the qualified individual's foreign earned income for the taxable year in excess of amounts that the individual elected to exclude from gross income under section 911(a)(2) or the product of the annual rate for the taxable year (as specified in paragraph (d)(2)(ii) of this section) multiplied by the following fraction:

$$\frac{\text{The number of qualifying days in the taxable year}}{\text{The number of days in the taxable year}}$$

(ii) *Annual rate for the taxable year.* The annual rate for the taxable year is the rate set forth in section 911(b)(2)(A).

(3) *Number of qualifying days.* For purposes of section 911 and the regulations thereunder, the number of qualifying days is the number of days in the taxable year within the period during which the individual met the tax home requirement and either the bona fide residence requirement or the physical presence requirement of §1.911–2(a). Although the period of bona fide residence must include an entire taxable year, the entire uninterrupted period of residence may include fractional parts of a taxable year. For instance, if an individual who was a calendar year taxpayer established a tax home and a residence in a foreign country as of November 1, 1982, and maintained the tax home and the residence through March 31, 1984, then the uninterrupted period of bona fide residence includes fractional parts of the years 1982 and 1984, and all of 1983. The number of qualifying days in 1982 is sixty-one. The number of qualifying days in 1983 is 365. The number of qualifying days in 1984 is ninety-one. The period during which the physical presence requirement of §1.911–2(a)(2)(ii) is met is any twelve consecutive month period during which the individual is physically present in one or more foreign countries for 330 days and the individual's tax home is in a foreign country during each day of such physical presence. Such period may include days when the individual is not physically present in a foreign country, and days when the individual does not maintain a tax home in a foreign country. Such period may include fractional parts of a taxable year. Thus, if an individual's period of physical, presence is the twelve-month period beginning June 1, 1982, and ending May 31, 1983, the number of qualifying days in 1982 is 214 and the number of qualifying days in 1983 is 151.

(e) *Attribution rules*—(1) *In general.* Foreign earned income is considered to be earned in the taxable year in which the individual performed the services giving rise to the income. If income is earned in one taxable year and received in another taxable year, then, for purposes of determining the amount of foreign earned income that the individual may exclude under section 911(a), the individual must attribute the income to the taxable year in which the services giving rise to the income were performed. Thus, any reimbursement would be attributable to the taxable year in which the services giving rise to the obligation to pay the reimbursement were performed, not the taxable year in which the reimbursement was received. For example, tax equalization payments are normally received in the year after the year in which the services giving rise to the obligation to pay the tax equalization payment were performed. Therefore, such payments will almost always have to be attributed to the prior year. Foreign earned income attributable to services performed in a preceding taxable year shall be excludable from gross income in the year of receipt only to the extent such amount could have been excluded under paragraph (d)(1) in the preceding taxable year, had such amount been received in the preceding taxable year. The taxable year to which income is attributable will be determined on the basis of all the facts and circumstances.

(2) *Priority of use of the section 911(a)(1) limitation.* Foreign earned income received in the year in which it is earned shall be applied to the section 911(a)(1) limitation for that year before applying income earned in that year

that is received in any other year. Foreign earned income that is earned in one year and received in another year shall be applied to the section 911(a)(1) limitation for the year in which it was earned, on a year by year basis, in any order that the individual chooses. (But see section 911(b)(1)(B)(iv)). An individual may not amend his return to change the treatment of income with respect to the section 911(a)(1) exclusion after the period provided by section 6511(a). The special period of limitation provided by section 6511(d)(3) does not apply for this purpose. For example, C, a qualified individual, receives an advance bonus of $10,000 in 1982, salary of $70,000 in 1983, and a performance bonus of $10,000 in 1984, all of which are foreign earned income for 1983. C has a section 911(a)(1) limitation for 1983 of $80,000, and has no housing cost amount exclusion. On his income tax return for 1983, C elects to exclude foreign earned income of $70,000 received in 1983. C may also exclude his $10,000 advance bonus received in 1982 (by filing an amended return for 1982), or he may exclude the $10,000 performance bonus received in 1984 on his 1984 income tax return. However, C may not exclude part of the 1982 bonus and part of the 1984 bonus.

(3) *Exception for year-end payroll period.* Notwithstanding paragraph (e)(1) of this section, salary or wage payments of a cash basis taxpayer shall be attributed entirely to the year of receipt under the following circumstances:

(i) The period for which the payment is made is a normal payroll period of the employer which regularly applies to the employee;

(ii) The payroll period includes the last day of the employee's taxable year;

(iii) The payroll period does not exceed 16 days; and

(iv) The payment is part of a normal payroll of the employer that is distributed at the same time, in relation to the payroll period, that such payroll would normally be distributed, and is distributed before the end of the next succeeding payroll period.

(4) *Attribution of bonuses and substantially nonvested property to periods in which services were performed*—(i) *In general.* Bonuses and substantially nonvested property are attributable to all of the services giving rise to the income on the basis of all the facts and circumstances. If an individual receives a bonus or substantially nonvested property (as defined in § 1.83–3(b)) and it is determined to be attributable to services performed in more than one taxable year, then, for purposes of determining the amount eligible for exclusion from gross income in the year the bonus is received or the property vests, a portion of such amount shall be treated as attributable to services performed in each taxable year (or portion thereof) during the period when services giving rise to the bonus or the substantially nonvested property were performed. Such portion shall be determined by dividing the amount of the bonus or the excess of the fair market value of the vested property over the amount paid, if any, for the vested property, by the number of months in the period when services giving rise to such amount were performed, and multiplying the quotient by the number of months in such period in the taxable year. For purposes of this section, the term ''month'' means a calendar month. A fraction of a calendar month shall be deemed a month if it includes fifteen or more days.

(ii) *Examples.* The following examples illustrate the application of this paragraph (e)(4).

Example 1. A, an employee of M Corporation during all of 1983 and 1984, worked in the United States from January 1 through April 30, 1983, and received $12,000 of salary for that period. A worked in country F from May 1, 1983 through the end of 1984, and is a qualified individual under § 1.911–2(a) for that period. For the period from May 1 through December 31, 1983, A received $32,000 of salary. M pays a bonus on December 20, 1983 to each of M's employees in an amount equal to 10 percent of the employee's regular wages or salary for the 1983 calendar year. The amount of A's bonus is $4,400 for 1983. The portion of A's bonus that is attributable to services performed in country F and is foreign earned income for 1983 is $3,200, or $32,000×10 percent. The remaining $1,200 of A's bonus is attributable to services performed in the United States, and is not foreign earned income.

Example 2. The facts are the same as in example 1, except that M determines bonuses separately for each country based on the productivity of the employees in that country. M pays a bonus to employees in country F, in the amount of 15 percent of each employee's wages or salary earned in country F. A's country F bonus is $4,800 for 1983 ($32,000×15 percent), and is foreign earned income for 1983. If A also receives a bonus (or if A's bonus is increased) for working in the United States during 1983, that amount is not foreign earned income.

Example 3. X corporation offers its employees a bonus of $40,000 if the employee accepts employment in a foreign country and remains in a foreign country for a period of at least four years. A, an employee of X, is a calendar year and cash basis taxpayer. A accepts employment with X in foreign country F. A begins work in F on July 1, 1983 and continues to work in F for X until June 30, 1987. In 1987 X pays A a $40,000 bonus. The bonus is attributable to services A performed from July 1, 1983 through June 30, 1987. The amount of the bonus attributable to 1987 is $5,000 (($40,000÷48)×6). The amount of the bonus attributable to 1986 is $10,000 (($40,000÷48)×12). A may exclude the $10,000 attributable to 1986 only to the extent that amount could have been excluded under section 911(a)(1) had A received it in 1986. The remaining $25,000 is attributable to services performed in taxable years before 1986. Such amounts may not be excluded under section 911 because they are received after the close of the taxable year following the taxable year in which the services giving rise to the income were performed.

(iii) *Special rule for elections under section 83(b).* If an individual receives substantially nonvested property and makes an election under section 83(b) and §1.83–2(a) to include in his gross income the amount determined under section 83(b)(1)(A) and (B) and §1.83–2(a) for the taxable year in which the property is transferred (as defined in §1.83–3(a)), then, for the purpose of determining the amount eligible for exclusion in the year of receipt, the individual may elect either of the following options:

(A) Substantially nonvested property may be treated as attributable entirely to services performed in the taxable year in which an election to include it in income is made. If so treated, then the amount otherwise included in gross income as determined under §1.83–2(a) will be excludable under section 911(a) for such year subject to the limitation provided in §1.911–3(d)(2) for such year.

(B) A portion of the substantially nonvested property may be treated as attributable to services performed or to be performed in each taxable year during which the substantial risk of forfeiture (as defined in section 83(c) and §1.83–3(c)) exists. The portion treated as attributable to services performed or to be performed in each taxable year is determined by dividing the amount of the substantially nonvested property included in gross income as determined under §1.83–2(a) by the number of months during the period when a substantial risk of forfeiture exists. The quotient is multiplied by the total number of months in the taxable year during which a substantial risk of forfeiture exists. The amount determined to be attributable to services performed in the year the election is made shall be excluded from gross income for such year as provided in paragraph (d)(2) of this section. Amounts treated as attributable to services performed in subsequent taxable years shall be excludable in the year of receipt only to the extent such amounts could be excluded under paragraph (d)(2) of this section in such subsequent years. An individual may obtain such additional exclusion by filing an amended return for the taxable year in which the property was transferred. The individual may only amend his or her return within the period provided by section 6511(a) and the regulations thereunder.

(5) *Moving expense reimbursements*—(i) *Source of reimbursements.* For the purpose of determining whether a moving expense reimbursement is attributable to services performed within a foreign country or within the United States, in the absence of evidence to the contrary, the reimbursement shall be attributable to future services to be performed at the new principal place of work. Thus, a reimbursement received by an employee from his employer for the expenses of a move to a foreign country will generally be attributable to services performed in the foreign country. A reimbursement received by an employee from his employer for the expenses of a move from a foreign country to the United States will generally be attributable to services performed in the United States. For purposes of this paragraph (e)(5), evidence to the contrary includes, but is not

limited to, an agreement, between the employer and the employee, or a statement of company policy, which is reduced to writing before the move to the foreign country and which is entered into or established to induce the employee or employees to move to a foreign country. The writing must state that the employer will reimburse the employee for moving expenses incurred in returning to the United States regardless of whether the employee continues to work for the employer after the employee returns to the United States. The writing may contain conditions upon which the right to reimbursement is determined as long as the conditions set forth standards that are definitely ascertainable and the conditions can only be fulfilled prior to, or through completion of the employee's return move to the United States that is the subject of the writing. In no case will an oral agreement or statement of company policy concerning moving expenses be considered evidence to the contrary. For the purpose of determining whether a storage expense reimbursement is attributable to services performed within a foreign country, in the case of storage expenses incurred after December 31, 1983, the reimbursement shall be attributable to services performed during the period of time for which the storage expenses are incurred.

(ii) *Attribution of foreign source reimbursements to taxable years in which services are performed*—(A) *In general.* If a reimbursement for moving expenses is determined to be from foreign sources under paragraph (e)(5)(i) of this section, then for the purpose of determining the amount eligible for exclusion in accordance with paragraphs (d)(2) and (e)(2) of this section, the reimbursement shall be considered attributable to services performed in the year of the move as long as the individual is a qualified individual for a period that includes 120 days in the year of the move. The period that is used in determining the number of qualifying days for purposes of the individual's section 911(a)(1) limitation (under paragraph (d)(2) of this section) must also be used in determining whether the individual is a qualified individual for a period that includes 120 days in the year of the move. If the individual is not a qualified individual for such period, then the individual shall treat a portion of the reimbursement as attributable to services performed in the year of the move, and a portion as attributable to services performed in the succeeding taxable year, if the move is from the United States to a foreign country, or to the prior taxable year, if the move is from a foreign country to the United States. The portion of the reimbursement treated as attributable to services performed in the year of the move shall be determined by multiplying the total reimbursement by the following fraction:

$$\frac{\text{The number of qualifying days (as defined in paragraph (d)(3) of this section) in the year of the move}}{\text{The number of days in the taxable year of the move.}}$$

The remaining portion of the reimbursement shall be treated as attributable to services performed in the year succeeding or preceding the year of the move. Amounts treated as attributable to services performed in a year succeeding or preceding the year of the move shall be excludable in the year of receipt only to the extent such amounts could be excluded under paragraph (d)(2) of this section in such succeeding or preceding year.

(B) *Moves beginning before January 1, 1984.* Notwithstanding paragraph (e)(5)(ii)(A) of this section, this paragraph (e)(5)(ii)(B) shall apply for moves begun before January 1, 1984. If a reimbursement for moving expenses is determined to be from foreign sources under paragraph (e)(5)(i) of this section, then for the purpose of determining the amount eligible for exclusion in accordance with paragraphs (d)(2) and (e)(2) of this section, the reimbursement shall be considered attributable to services performed in the year of the move. However, if the individual does not qualify under section 911(d)(1) and §1.911–2(a) for the entire taxable year of the move, then the individual shall treat a portion of the reimbursement as attributable to services performed in the succeeding taxable year, if the move is from the United States to a foreign country, or to the prior taxable year, if the move is from a foreign country to the United States. The portion of the reimbursement treated as attributable to services performed in the year succeeding or preceding the move shall be determined by multiplying the total reimbursement by the following fraction:

$$\frac{\text{The number of qualifying days (as defined in paragraph (d)(3) of this section) in the year of the move}}{\text{The number of days in the taxable year of the move.}}$$

and subtracting the product from the total reimbursement. Amounts treated as attributable to services performed in a year succeeding or preceding the year of the move shall be excludable in the year of receipt only to the extent such amounts could be excluded under paragraph (d)(2) of this section in such succeeding or preceding year.

(f) *Examples.* The following examples illustrate the application of this section.

Example 1. A is a U.S. citizen and calendar year taxpayer. A's tax home was in foreign country F and A was physically present in F for 330 days during the period from July 4, 1982 through July 3, 1983. The number of A's qualifying days in 1982 as determined under paragraph (d)(2) of this section is 181. In 1982 A receives $40,000 attributable to services performed in foreign country F in 1982. Under paragraph (d)(2) of this section A's section 911(a)(1) limitation is $37,192, that is the lesser of $40,000 (foreign earned income) or

$$\$75{,}000\,(\text{annual rate}) \times \frac{181\,(\text{qualifying days})}{365\,(\text{days in taxable year}).}$$

Example 2. The facts are the same as in example 1 except that in 1982 A receives $30,000 attributable to services performed in foreign country F. A excludes this amount from gross income under paragraph (d) of this section. In addition, in 1983 A receives $10,000 attributable to services performed in F in 1982 and $35,000 attributable to services performed in F in 1983. On his return for 1983, A must report $45,000 of income. A's section 911(a)(1) limitation for 1983 is the lesser of $35,000 (foreign earned income) or $49,329, the annual rate for the taxable year multiplied by a fraction the numerator of which is A's qualifying days in the taxable year and the denominator of which is the number of days in the taxable year ($80,000×184/365). On his tax return for 1983 A may exclude $35,000 attributable to services performed in 1983. A may only exclude $7,192 of the $10,000 received in 1983 attributable to services performed in 1982 because such amount is only excludable in 1983 to the extent such amount could have been excluded in 1982 subject to the section 911(a)(1) limitation for 1982 which is $37,192 ($75,000×181/365). No portion of amounts attributable to services performed in 1982 may be used in calculating A's section 911(a)(1) limitation for 1983. Thus, even though A could have excluded an additional $5,329 in 1983 if A had had more foreign earned income attributable to 1983, A may not exclude the $2,808 of remaining foreign earned income attributable to 1982.

Example 3. C is a U.S. citizen and calendar year taxpayer. C establishes a bona fide residence and a tax home in foreign country J on March 1, 1982, and maintains a tax home and a residence in J until December 31, 1986. In March of 1982 C's employer, Y corporation, transfers stock in Y to C. The stock is subject to forfeiture if C returns to the U.S. before January 1, 1985. C elects under section 83(b) to include $15,000, the amount determined with respect to such stock under section 83(b)(1), in gross income in 1982. C's other foreign earned income in 1982 is $58,000. C elects under paragraph (e)(4)(iii)(B) of this section to treat the stock as if earned over the period of the substantial risk of forfeiture. The number of months in the period of the substantial risk of forfeiture is thirty-four. The number of months in the taxable year 1982 within the period of foreign employment is ten. For purposes of determining C's section 911(a)(1) limitation, $4,412 (($15,000/34)×10) of the amount included in gross income under section 83(b) is treated as attributable to services performed in 1982, $5,294 is treated as attributable to services to be performed in 1983, and $5,294 is treated as attributable to services to be performed in 1984. In 1982, C excludes $62,412 under section 911(a)(1). That is the lesser of foreign earned income for 1982 ($58,000+$4,412) or the annual rate for the taxable year multiplied by a fraction the numerator of which is C's qualifying days in the taxable year and the denominator of which is the number of days in the taxable year ($75,000×306/365). C continues to perform services in foreign country J throughout 1983 and 1984. C would be able to exclude the remaining $5,294 attributable to services performed in 1983 and $5,294 attributable to services performed in 1984 if those amounts would be excludable if they had been received in 1983 or 1984 respectively. If C is entitled to exclude the additional amounts, C must claim the exclusion by filing an amended return for 1982.

Example 4. D is a U.S. citizen and a calendar year taxpayer. In September, 1984 D moves to a foreign country K. D is physically present in K, and D's tax home is in K, from September 15, 1984 through December 31, 1985. D receives $6,000 in April, 1985 from his employer, as a reimbursement for expenses of moving to K, pursuant to a written agreement that such moving expenses would be reimbursed to D upon successful completion of 6 months employment in K. Under paragraph (e)(15)(i) of this section, the reimbursement is attributable to services performed in K. Under the physical presence test of § 1.911–2(a)(2)(ii), among other periods D is a qualified individual for the period of August 10, 1984 through August 9, 1985, which includes 144 days in 1984. Under paragraph (e)(5)(ii)(A) of this section, for the purpose of determining the amount eligible for exclusion, the reimbursement is considered attributable to services performed in 1984 (the year of the move) because D is a qualified individual under § 1.911–2(a) for a period that includes 120 days in 1984. The reimbursement may be excluded under paragraphs (d)(2) and (e)(2) of this section, to the extent that D's foreign earned income for 1984 that was earned and received in 1984 was less than the annual rate for the taxable year multiplied by the number of D's qualifying days in the taxable year over the number of days in D's taxable year ($80,000×144/366), or $31,475.

Example 5. The facts are the same as in example 4 except that D is not a qualified individual under the physical presence test, but is a qualified individual under the bona fide residence test for the period of September 15, 1984 through December 31, 1985. Under paragraph (e)(5)(ii)(A) of this section, for the purpose of determining the amount eligible for exclusion, the reimbursement is considered attributable to services performed in 1984 and 1985 because D is not a qualified individual for a period that includes 120 days in 1984 (the year of the move). The portion of the reimbursement treated as attributable to services performed in 1984 is $6,000×108/366, or $1,770, and may be excluded, subject to D's 1984 section 911(a)(1) limitation. The balance of the reimbursement, $4,230, is treated as attributable to services performed in 1985, and may be excluded to the extent provided in paragraphs (d)(2) and (e)(2) of this section.

Example 6. The facts are the same as in example 4, with the following additions. Before D moved to K, D and his employer signed a written agreement that D would perform services for the employer for at least one year, primarily in country K, and, if D did not voluntarily cease to work for the employer primarily in country K before one year had elapsed, the employer would reimburse D for one half of D's expenses, up to a maximum of $4,000, of moving back to the United States. The agreement also stated that, if D did not voluntarily leave the employment in K before two years had elapsed, the employer would reimburse D for all of D's reasonable expenses of moving back to the United States. The agreement further stated that D's right to reimbursement would not be conditioned upon the performance of services after D ceased to work in K. D worked in country K for all of 1985. On January 1, 1986, D left K and moved to the United States. In February, 1986 the employer paid D $3,500 as reimbursement for one-half of D's expenses of moving to the United States. Although D did not fulfill the condition in the agreement to receive full reimbursement, all of the conditions in the agreement set forth definitely ascertainable standards and no condition could be fulfilled after D moved back to the United States. The agreement fulfills the requirements of paragraph (e)(5)(i) of this section, and therefore is evidence that the reimbursement should not be attributable to future services to be performed at D's new principal place of work. Under the facts and circumstances, the reimbursement is attributable to services performed in K. Under paragraph (e)(5)(ii)(A) of this section, the entire reimbursement is attributable to services performed in 1985. The amount attributable to

1985 may be excluded to the extent provided in paragraphs (d)(2) and (e)(2) of this section.

(Sec. 911 (95 Stat. 194; 26 U.S.C. 911) and sec. 7805 (68A Stat. 917; 26 U.S.C. 7805) of the Internal Revenue Code of 1954)

[T.D. 8006, 50 FR 2966, Jan. 23, 1985]

§1.911–4 Determination of housing cost amount eligible for exclusion or deduction.

(a) *Definition of housing cost amount.* The term ‘‘housing cost amount’’ means an amount equal to the reasonable expenses paid or incurred (as defined in section 7701(a)(25)) during the taxable year by or on behalf of the individual attributable to housing in a foreign country for the individual and any spouse or dependents who reside with the individual (or live in a second foreign household described in paragraph (b)(5) of this section) less the base housing amount as defined in paragraph (c) of this section. The housing cost amount must be reduced by the amount of any military or section 912 allowance or similar allowance excludable from gross income that is intended to compensate the individual or the individual’s spouse in whole or in part for the expenses of housing during the same period for which the individual claims a housing cost amount exclusion or deduction.

(b) *Housing expenses*—(1) *Included expenses.* For purposes of paragraph (a) of this section, housing expenses include rent, the fair rental value of housing provided in kind by the employer, utilities (other than telephone charges), real and personal property insurance, occupancy taxes not described in paragraph (b)(2)(v) of this section, nonrefundable fees paid for securing a leasehold, rental of furniture and accessories, household repairs, and residential parking.

(2) *Excluded expenses.* Housing expenses do not include:

(i) The cost of house purchase, improvements, and other costs that are capital expenditures;

(ii) The cost of purchased furniture or accessories or domestic labor (maids, gardeners, etc.);

(iii) Amortized payments of principal with respect to an evidence of indebtedness secured by a mortgage on the taxpayer’s housing;

(iv) Depreciation of housing owned by the taxpayer, or amortization or depreciation of capital improvements made to housing leased by the taxpayer;

(v) Interest and taxes deductible under section 163 or 164 or other amounts deductible under section 216(a) (relating to deduction of interest and taxes by cooperative housing corporation tenant);

(vi) The expenses of more than one foreign household except as provided in paragraph (b)(5) of this section;

(vii) Expenses excluded from gross income under section 119;

(viii) Expenses claimed as deductible moving expenses under section 217; or

(ix) The cost of a pay television subscription.

(3) *Limitation.* Housing expenses are taken into account for purposes of this section only to the extent attributable to housing for portions of the taxable year within the period during which the individual satisfies the requirements of §1.911–2(a). Housing expenses are not taken into account for the period during which the value of the individual’s housing is excluded from gross income under section 119, unless the individual maintains a second foreign household described in paragraph (b)(5) of this section. If an individual maintains two foreign households, only expenses incurred with respect to the abode which bears the closest relationship, not necessarily geographic, with respect to the individual’s tax home shall be taken into account, unless one of the households is a second foreign household.

(4) *Reasonableness.* An amount paid for housing shall not be treated as reasonable, for purposes of paragraph (a) of this section, to the extent that the expense is lavish or extravagant under the circumstances.

(5) *Expenses of a second foreign household*—(i) *In general.* The term ‘‘second foreign household’’ means a separate abode maintained by an individual outside of the U.S. for his or her spouse or dependents (who, if minors, are in the individual’s legal custody or the joint custody of the individual and the individual’s spouse) at a place other than the tax home of the individual because of adverse living conditions at the individual’s tax home. If an individual

maintains a second foreign household the expenses of the second foreign household may be included in the individual's housing expenses under paragraph (b)(1) of this section. Under no circumstances shall an individual be considered to maintain more than one second foreign household at the same time.

(ii) *Adverse living conditions.* Solely for purposes of paragraph (b)(5)(i) of this section, adverse living conditions are living conditions which are dangerous, unhealthful, or otherwise adverse. Adverse living conditions include a state of warfare or civil insurrection in the general area of the individual's tax home. Adverse living conditions exist if the individual resides on the business premises of the employer for the convenience of the employer and, because of the nature of the business (for example, a construction site or drilling rig), it is not feasible for the employer to provide housing for the individual's spouse or dependents. The criteria used by the Department of State in granting a separate maintenance allowance are relevant, but not determinative, for purposes of determining whether a separate household is provided because of adverse living conditions.

(c) *Base housing amount*—(1) *In general.* The base housing amount is equal to the product of 16 percent of the annual salary of an employee of the United States who is compensated at a rate equal to the annual salary rate paid for step 1 of grade GS–14, multiplied by the following fraction:

$$\frac{\text{The number of qualifying days}}{\text{The number of days in the taxable year}}$$

For purposes of the above fraction, the number of qualifying days is determined in accordance with § 1.911–3(d)(3).

(2) *Annual salary of step 1 of grade GS–14.* The annual salary rate for a step 1 of grade GS–14 is determined on January first of the calendar year in which the individual's taxable year begins.

(d) *Housing cost amount exclusion*—(1) *Limitation.* A qualified individual who has elected to exclude his or her housing cost amount may only exclude the lesser of the full amount of either the individual's housing cost amount attributable to employer provided amounts or the individual's foreign earned income for the taxable year. A qualified individual who elects to exclude his or her housing cost amount may not claim less than the full amount of the housing cost exclusion determined under this paragraph.

(2) *Employer provided amounts.* For purposes of this section, the term ''employer provided amounts'' means any amounts paid or incurred on behalf of the individual by the individual's employer which are foreign earned income included in the individual's gross income for the taxable year (without regard to section 911). Employer provided amounts include, but are not limited to, the following amounts: Any salary paid by the employer to the employee; any reimbursement paid by the employer to the employee for housing expenses, educational expenses for the individual's dependents, or as part of a tax equalization plan; the fair market value of compensation provided in kind (including lodging, unless excluded under section 119, relating to meals and lodging furnished for the convenience of the employer); and any amount paid by the employer to any third party on behalf of the employee. An individual will only have earnings that are not employer provided amounts if the individual has earnings from self-employment.

(3) *Housing cost amount attributable to employer provided amounts.* For the purpose of determining what portion of the housing cost amount is excludable and what portion is deductible the following rules apply. If the individual has no income from self-employment, then the entire housing cost amount is attributable to employer provided amounts and is, therefore, excludable to the extent of the limitation provided in paragraph (d)(1) of this section. If the individual only has income from self-employment, then the entire housing cost amount is attributable to non-employer provided amounts and is, therefore, deductible to the extent of the limitation provided in paragraph (e) of this section. In all other instances, the housing cost amount attributable to employer provided amounts shall be determined by multiplying the housing cost amount by the

following fraction: Employer provided amounts over foreign earned income for the taxable year. The housing cost amount attributable to non-employer provided amounts shall be determined by subtracting the portion of the housing cost amount attributable to employer provided amounts from the total housing cost amount.

(e) *Housing cost amount deduction*—(1) *In general.* If a portion of the individual's housing cost amount is determined under paragraph (d)(3) of this section to be attributable to non-employer provided amounts, the individual may deduct that amount from gross income for the taxable year but only to the extent of the individual's foreign earned income (as defined in §1.911–3) for the taxable year in excess of foreign earned income excluded and the housing cost amount excluded from gross income for the taxable year under §1.911–3 and this section.

(2) *Carryover.* If any portion of the individual's housing cost amount deduction is disallowed for the taxable year under paragraph (e)(1) of this section, such portion shall be carried over and treated as a deduction from gross income for the succeeding taxable year (but only for the succeeding taxable year) to the extent of the excess, if any, of:

(i) The amount of foreign earned income for the succeeding taxable year less the foreign earned income and the housing cost amount excluded from gross income under §1.911–3 and this section for the succeeding taxable year over,

(ii) The portion, if any, of the housing cost amount that is deductible under paragraph (e)(1) of this section for the succeeding taxable year.

(f) *Examples.* The following examples illustrate the application of this section. In all examples the annual rate for a step 1 of GS–14 as of January first of the calendar year in which the individual's taxable year begins is $39,689.

Example 1. B, a U.S. citizen is a calendar year taxpayer who was a bona fide resident of and whose tax home was located in foreign country G for the entire taxable year 1982. B receives an $80,000 salary from B's employer for services performed in G. B incurs no business expenses. B receives housing provided by B's employer with a fair rental value of $15,000. The value of the housing furnished by B's employer is not excluded from gross income under section 119. B pays $10,000 for housing expenses. B's gross income and foreign earned income for 1982 is $95,000. B elects the foreign earned income exclusion of section 911(a)(1) and the housing cost amount exclusion of section 911(a)(2). B must first compute his housing cost amount exclusion. B's housing cost amount is $18,650 determined by reducing B's housing expenses, $25,000 ($15,000 fair rental value of housing and $10,000 of other expenses), by the base housing amount of $6,350 (($39,689×.16)×365/365). Because B has no income from self-employment, the entire amount is attributable to employer provided amounts and therefore, is excludable. B's section 911(a)(1) limitation is $75,000. That is the lesser of $75,000×365/365 or $95,000−18,650. B's total exclusion for 1982 under section 911(a)(1) and (2) is $93,650.

Example 2. The facts are the same as in example 1 except that B's salary for 1982 is $70,000. B's foreign earned income for 1982 is $85,000. B's housing cost amount is $18,650, all of which is attributable to employer provided amounts. B's housing cost amount is excludable to the extent of the lesser of B's housing cost amount attributable to employer provided amounts, $18,650, or the foreign earned income for the taxable year, $85,000. Thus, B excludes $18,650 under section 911(a)(2). B's section 911(a)(1) limitation for 1982 is $66,350 (the lesser of $75,000×365/365 or $85,000−18,650). B's total exclusion for 1982 under section 911(a)(1) and (2) is $85,000.

Example 3. The facts are the same as in example 2 except that in 1983, B receives $5,000 attributable to services performed in 1982. B may exclude the entire $5,000 in 1983 because such amount would have been excludable under §1.911–3(d)(1) had it been received in 1982.

Example 4. C is a U.S. citizen self-employed and a calendar year and cash basis taxpayer. C arrived in foreign country H on October 3, 1982, and departed from H on March 8, 1984. C's tax home was located in H throughout that period. C was physically present for 330 full days during the twelve consecutive month period August 30, 1982, through August 29, 1983. The number of C's qualifying days in 1982 is 124. During 1982 C had $35,000 of foreign earned income, none of which was attributable to employer provided amounts and $8,000 of reasonable housing expenses. C's housing cost amount is $5,843 ($8,000−((39,689×.16)×124/365)). C elects to exclude her foreign earned income under §1.911–3(d)(1). C's section 911(a)(1) limitation for 1982 is $25,479 (the lesser of C's foreign earned income for the taxable year ($35,000) or the annual rate for the taxable year multiplied by the number of C's qualifying days over the number of days in the taxable year ($75,000×124/365=$25,479). C may not claim the housing cost amount exclusion under section 911(a)(2) because no portion of the housing cost amount is attributable to employer provided amounts. C may deduct the lesser of her housing cost amount ($5,843) or her foreign earned income in excess of amounts excluded under section 911(a) ($35,000 − 25,479=$9,521). Thus, C's housing cost amount deduction is $5,843.

Example 5. The facts are the same as in example 4 except that C had $30,000 of foreign earned income for 1982, none of which was attributable to employer provided amounts. C elects to exclude $25,479 under § 1.911–3(d)(1). C may only deduct $4,521 of her housing cost amount under paragraph (e)(1) of this section because her foreign earned income in excess of amounts excluded under section 911(a) is $4,521($30,000 − 25,479). The $1,322 of unused housing cost amount deduction may be carried over to the subsequent taxable year.

Example 6. The facts are the same as in example 4 except that C had $15,000 of foreign earned income of 1982, none of which was attributable to employer provided amounts. C elects to exclude the entire $15,000 under § 1.911–3(d)(1). C is not entitled to a housing cost amount deduction for 1982 since she has no foreign earned income in excess of amounts excluded under section 911(a). C may carry over her entire housing cost amount deduction to 1983.

Example 7. The facts are the same as in example 6. In addition, during taxable year 1983 C had $115,000 of foreign earned income, none of which was attributable to employer provided amounts, and $40,000 of reasonable housing expenses C elects to exclude her foreign earned income under § 1.911–3(d)(1). C's section 911(a)(1) limitation is the lesser of $115,000 or $80,000 ($80,000×365/365). C's housing cost amount for 1983 is $33,650 (40,000 − (39,689×.16)×365/365). Since no portion of that amount is attributable to employer provided amounts, C may not claim a housing cost amount exclusion. C may deduct the lesser of her housing cost amount ($33,650) or her foreign earned income in excess of amounts excluded under section 911(a) ($115,000 − 80,000=35,000). Thus, C may deduct her $33,650 housing cost amount in 1983. In addition, C may deduct $1,350 of the housing cost amount deduction carried over from taxable year 1982.

(($115.000 − 80,000) − 33,650=$1,350). The remaining $4,493 ($5,843 − 1,350) of the housing cost amount deduction carried over from taxable year 1982 may not be deducted in 1983 or carried over to 1984.

Example 8. D is a U.S. citizen and a calendar year and cash basis taxpayer. D is a bona fide resident of and maintains his tax home in foreign country J for all of taxable year 1984. In 1984, D earns $80,000 of foreign earned income, $60,000 of which is an employer provided amount and $20,000 of which is a non-employer provided amount. D's total housing cost amount for 1984 is $25,000. D elects to exclude, under section 911(a)(2), the portion of his housing cost amount that is attributable to employer provided amounts. D's excludable housing cost amount is $18,750; that is the total housing cost amount ($25,000) multiplied by employer provided amounts for the taxable year ($60,000) over foreign earned income for the taxable year ($80,000). D also elects to exclude his foreign earned income under § 1.911–3(d)(1). D's section 911(a)(1) limitation for 1984 is $61,250 (the lesser of $80,000 − $18,750 or $80,000×366/366). D's total exclusion for 1984 under section 911(a)(1) and (2) is $80,000. D cannot claim a housing cost amount deduction in 1984 because D has no foreign earned income in excess of his foreign earned income and housing cost amount excluded from gross income for the taxable year under § 1.911–3 and this section. D may carry over his housing cost amount deduction of $6,250, the total housing cost amount less the portion attributable to employer provided amounts ($25,000 − 18,750), to taxable year 1985.

(Sec. 911 (95 Stat. 194; 26 U.S.C. 911) and sec. 7805 (68A Stat. 917; 26 U.S.C. 7805) of the Internal Revenue Code of 1954)

[T.D. 8006, 50 FR 2970, Jan. 23, 1985]

§ 1.911–5 Special rules for married couples.

(a) *Married couples with two qualified individuals*—(1) *In general.* In the case in which a husband and wife both are qualified individuals under § 1.911–2(a), each individual may make one or more elections under § 1.911–7 and exclude from gross income foreign earned income and exclude or deduct housing cost amounts subject to the rules of paragraphs (a)(2) and (3) of this section.

(2) *Computation of excluded foreign earned income.* The amount of excludable foreign earned income is determined separately for each spouse under the rule of § 1.911–3 on the basis of the income attributable to the services of that spouse. If the spouses file separate returns each may exclude the amount of his or her foreign earned income attributable to his or her services subject to the limitations of § 1.911–3(d)(2). If the spouses file a joint return, the sum of these foreign earned income amounts so determined for each spouse may be excluded. For example, H and W both qualify under § 1.911–2(a)(2)(i) for the entire 1983 taxable year. During 1983 W earns $100,000 of foreign earned income and H earns $45,000 of foreign earned income. H and W file a joint return for 1983. On their joint return H

and W may exclude from gross income a total of $125,000. That amount is determined by adding W's section 911(a)(1) limitation, $80,000 (the lesser of $80,000×365/365 or $100,000), and H's section 911(a)(1) limitation, $45,000 (the lesser of $80,000×365/365 or $45,000).

(3) *Computation of housing cost amount*—(i) *Spouses residing together.* If the spouses reside together, and file a joint return, they may compute their housing cost amount either jointly or separately. If the spouses reside together and file separate returns, they must compute their housing cost amounts separately. If the spouses compute their housing cost amounts separately, they may allocate the housing expenses to either of them or between them for the purpose of calculating separate housing cost amounts, but each spouse claiming a housing cost amount exclusion or deduction must use his or her full base housing amount in such computation. If the spouses compute their housing cost amount jointly, then only one of the spouses may claim the housing cost amount exclusion or deduction.

Either spouse may claim the housing cost amount exclusion or deduction; however, if the spouses have different periods of residence or presence and the spouse with the shorter period of residence or presence claims the exclusion or deduction, then only the expenses incurred in that shorter period may be claimed as housing expenses. The spouse claiming the exclusion or deduction may aggregate the couple's housing expenses, and subtract his or her base housing amount. For example, H and W reside together and file a joint return. H was a bona fide resident of and maintained his tax home in foreign country M from August 17, 1982, through December 31, 1983. W was a bona fide resident of and maintained her tax home in foreign country M from September 15, 1982, through December 31, 1983. During 1982, H and W earn and receive, respectively, $25,000 and $10,000 of foreign earned income. H paid $10,000 for qualified housing expenses in 1982, $7,500 of that was for qualified housing expenses incurred from September 15, 1982, through December 31, 1982. W paid $3,000 for qualified housing expenses in 1982 all of which were incurred during her period of residence. H and W may choose to compute their housing cost amount jointly. If they do so and H claims the housing cost amount exclusion his exclusion would be $10,617. H's housing expenses would be $13,000 ($10,000+$3,000) and his base housing amount would be $2,383 ((39,689×.16)×137/365=$2,383). If instead W claims the housing cost amount exclusion her exclusion would be $8,621. W's housing expenses would be $10,500 ($7,500+3,000) and her base housing amount would be $1,879 (($39,689×.16)×108/365=$1,879). If H and W file jointly and both claim a housing cost amount exclusion, then H's and W's housing cost amounts would be, respectively, $7,617 ($10,000−2,383) and $1,121 ($3,000−1,879).

(ii) *Spouses residing apart.* If the spouses reside apart, both spouses may exclude or deduct their housing cost amount if the spouses have different tax homes that are not within reasonable commuting distance (as defined in §1.119–1(d)(4)) of each other and neither spouse's residence is within a reasonable commuting distance of the other spouse's tax home. If the spouses' tax homes, or one spouse's residence and the other spouse's tax home, are within a reasonable commuting distance of each other, only one spouse may exclude or deduct his or her housing cost amount. Regardless of whether the spouses file joint or separate returns, the amount of the housing cost amount exclusion or deduction must be determined separately for each spouse under the rules of §1.911–4. If both spouses claim a housing cost amount exclusion or deduction directly as qualified individuals, neither may claim any such exclusion or deduction under section 911(c)(2)(B)(ii), relating to a second foreign household maintained for the other spouse. If one spouse fails to claim a housing cost amount exclusion or deduction which that spouse could claim directly, the other spouse may claim such exclusion or deduction under section 911(c)(2)(B)(ii), relating to a second foreign household maintained for the first spouse, provided that all the requirements of that section are met. Spouses may not claim more than one second foreign household and the expenses of such household may only be claimed by one spouse. For example, if both H and W are qualified individuals and H's tax home is in London and W's tax home is in Paris, then both H and W may exclude or deduct their housing cost amounts; however, H and W must compute these amounts separately regardless of whether they file joint or separate returns. If instead of living in Paris, W lives in an area where there are adverse living conditions and W maintains H's home in London, then W may add those housing expenses to her housing expenses and compute one base housing amount. In that case H may not claim a housing cost amount exclusion or deduction.

(iii) *Housing cost amount attributable to employer provided amounts.* Each spouse claiming a housing cost amount exclusion or deduction shall compute the portion of the housing cost amount that is attributable to employer provided amounts separately, based on his or her separate foreign earned income, in accordance with § 1.911–4(d)(3).

(b) *Married couples with community income.* The amount of excludable foreign earned income of a husband and wife with community income is determined separately for each spouse in accordance with paragraph (a) of this section on the basis of income attributable to that spouse's services without regard to community property laws. See sections 879 and 6013 (g) and (h) for special rules regarding treatment of community income of a nonresident alien individual married to a U.S. citizen or resident.

(Sec. 911 (95 Stat. 194; 26 U.S.C. 911) and sec. 7805 (68A Stat. 917; 26 U.S.C. 7805) of the Internal Revenue Code of 1954)

[T.D. 8006, 50 FR 2972, Jan. 23, 1985]

§ 1.911–6 Disallowance of deductions, exclusions, and credits.

(a) *In general.* No deduction or exclusion from gross income under subtitle A of the Code or credit against the tax imposed by chapter 1 of the Code shall be allowed to the extent the deduction, exclusion, or credit is properly allocable to or chargeable against amounts excluded from gross income under section 911(a). For purposes of the preceding sentence, deductions, exclusions, and credits which are definitely related (as provided in § 1.861–8), in whole or in part, to earned income shall be allocated and apportioned to foreign earned income and U.S. source earned income in accordance with the rules contained in § 1.861–8. Deductions, exclusions, and credits which are definitely related to all gross income under § 1.861–8, including deductions for interest described in § 1.861–8(e)(2)(ii), are definitely related, in whole or in part, to earned income. In the case of interest expense allocable, in whole or in part, to foreign earned income under § 1.861–8(e)(2)(ii), the expense shall normally be apportioned under option one of the optional gross income methods of apportionment (§ 1.861–8(e)(2)(v)i(A)), but without regard to conditions (*1*) and (*2*) of subdivision (vi)(A) (the fifty percent conditions). Such interest expense shall not normally be apportioned under the asset method of § 1.861–8(e)(2)(v). This is because, where section 911 is the operative section, the expense normally relates more closely to gross income generated from activities than to the amount of capital utilized or invested in activities or property. Deductions that are allocated and apportioned to foreign earned income must then be allocated and apportioned to foreign earned income that is excluded under section 911(a). If an individual has foreign earned income from both self-employment and other employment, the amount excluded under section 911(a)(1) shall be deemed to include a pro rata amount of the self-employment income and the income from other employment; thus, a pro rata portion of deductible expenses attributable to self-employment income must be disallowed. For purposes of section 911 (d)(6) and this section only, deductions, exclusions, or credits which are not definitely related to any class of gross income shall not be allocable or chargeable to excluded amounts and are, therefore, deductible to the extent allowed by chapter 1 of the Code. Examples of deductions that are not definitely related to a class of gross income are personal and family medical expenses, qualified retirement contributions (but see section

219(b)(1)), real estate taxes and mortgage interest on a personal residence, charitable contributions, alimony payments, and deductions for personal exemptions. In addition, for purposes of this section, amounts excludable or deductible under section 911 or 119 shall not be allocable or chargeable to other amounts excluded under section 911(a). Thus, an individual's housing cost amount which is excludable or deductible under §1.911–4(d) for a taxable year is not apportioned in part to the individual's foreign earned income which is excluded for such year under §1.911–3(d). Therefore, the entire amount of such exclusion or deduction is allowed to the extent provided in §1.911–4. This section does not affect the time for claiming any deduction, exclusion, or credit that is not allocated or apportioned to excluded amounts.

(b) *Moving expenses*—(1) *In general.* No deduction shall be allowed for moving expenses under section 217 to the extent the deduction is properly allocable to or chargeable against amounts of foreign earned income excluded from gross income under section 911(a). If an individual's new principal place of work is in a foreign country, deductible moving expenses will be allocable to foreign earned income. If an individual treats a reimbursement from his employer for the expenses of a move from a foreign country to the United States as attributable to services performed in a foreign country under §1.911–3(e)(5)(i), then deductible moving expenses attributable to that move will be allocable to foreign earned income. If the individual is a qualified individual who elects to exclude foreign earned income under section 911(a), then some or all of such moving expenses must be disallowed as a deduction.

(2) *Attribution of moving expense deduction to taxable years in which services are performed.* If a moving expense deduction is properly allocable to foreign earned income, the deduction shall be considered attributable to services performed in the year of the move as long as the individual is a qualified individual under §1.911–2(a) for a period that includes 120 days in the year of the move. If the individual is not a qualified individual for such period, then the individual shall treat the deduction as attributable to services performed in both the year of the move and the succeeding taxable year, if the move is from the United States to the foreign country, or the prior taxable year, if the move is from a foreign country to the United States. Notwithstanding the preceding two sentences, storage expenses incurred after December 31, 1983 shall be treated as attributable to services performed in the year in which the expenses are incurred.

(3) *Formula for disallowance of moving expense deduction.* The portion of the moving expense deduction that is disallowed shall be determined by multiplying the moving expense deduction by a fraction the numerator of which is all amounts excluded under section 911(a) for the year or years to which the deduction is attributable (under paragraph (b)(2) of this section) and the denominator of which is foreign earned income (as defined in §1.911–3(a)) for that year or years.

(4) *Effect of disallowance based on attribution of deduction to subsequent year's income.* An individual may claim a moving expense deduction in the taxable year in which the amount of the expense is paid or incurred even if attributable, in part, to the succeeding year. However, at such time as the individual excludes income under section 911(a) for the year or years to which the deduction is attributable, the individual shall either—

(i) File an amended return for the year in which the deduction was claimed that does not claim the portion of the deduction that is disallowed because it is chargeable against excluded income, or

(ii) Include in income for the year following the year in which the deduction was claimed an amount equal to the amount of the deduction that is disallowed.

Any amount included in income under paragraph (b)(4)(ii) of this section is not foreign earned income.

(5) *Moves beginning before January 1, 1984.* Notwithstanding paragraphs (b)(1) through (3) of this section, the rules of this paragraph (b)(5) shall apply for moves beginning before January 1, 1984.

(i) *Individual qualifies for the entire taxable year of the move.* If the individual is a qualified individual for the entire taxable year of the move, then the amount of moving expense disallowed shall be determined by multiplying the moving expense deduction otherwise allowable by a fraction the numerator of which is the foreign earned income excluded under section 911(a) for the taxable year of the move and the denominator of which is the foreign earned income for the same taxable year.

(ii) *Individual qualifies for less than the entire taxable year of the move.* If the individual is a qualified individual for less than the entire taxable year of the move, then, for the purpose of determining the portion of the otherwise allowable moving expense deduction that is disallowed, the individual must attribute a portion of the otherwise allowable moving expense deduction either to the succeeding taxable year, if the move is from the United States to a foreign country, or to the prior taxable year, if the move is from a foreign country to the United States. The portion of the moving expense deduction treated as attributable to services performed in the year of the move shall be determined by multiplying the otherwise allowable moving expense deduction by the following fraction:

$$\frac{\text{The number of qualifying days (as defined in §1.911-3(d)(3) in the year of the move}}{\text{The number of days in the taxable year of the move.}}$$

The portion of the moving expense deduction treated as attributable to the year succeeding or preceding the move shall be determined by subtracting the portion of the moving expense deduction that is attributable to the year of the move from the total moving expense deduction. The allocation of a portion of the moving expense deduction to a succeeding or preceding taxable year does not affect the time for claiming the allowable moving expense deduction. The portion of the moving expense deduction that is disallowed shall be determined by multiplying the moving expense deduction attributable to the year of the move or the succeeding or preceding year, as the case may be, by a fraction the numerator of which is amounts excluded under section 911(a) for that year and the denominator of which is foreign earned income for that year.

(c) *Foreign taxes*—(1) *Amount disallowed.* No deduction or credit is allowed for foreign income, war profits, or excess profits taxes paid or accrued with respect to amounts excluded from gross income under section 911. To determine the amount of disallowed foreign taxes, multiply the foreign tax imposed on foreign earned income (as defined in § 1.911–3(a)) received or accrued during the taxable year by a fraction, the numerator of which is amounts excluded under section 911(a) in such taxable year less deductible expenses properly allocated to such amounts (see paragraphs (a) and (b) of this section), and the denominator of which is foreign earned income (as defined in § 1.911–3(a)) received or accrued during the taxable year less deductible expenses properly allocated or apportioned thereto. For the purpose of determining the extent to which foreign taxes are disallowed, the housing cost amount deduction is treated as definitely related to foreign earned income that is not excluded. If the foreign tax is imposed on foreign earned income and some other income (for example earned income from sources within the United States or an amount not subject to tax in the United States), and the taxes on the other amount cannot be segregated, then the denominator equals the total of the amounts subject to tax less deductible expenses allocable to all such amounts.

(2) *Definitions and special rules*—(i) *Taxable year.* For purposes of paragraph (c)(1) of this section, the term ‘‘taxable year’’ means the individual’s taxable

year for U.S. tax purposes. Such term includes the portion of any foreign taxable year within the individual's U.S. taxable year and excludes the portion of any foreign taxable year not within the individual's U.S. taxable year.

(ii) *Apportionment of foreign taxes.* For purposes of this paragraph (c), foreign taxes imposed on foreign earned income shall be deemed to accrue, on a pro rata basis, to income as the income is received or accrued. The taxes so accrued shall be apportioned to the taxable year during which the income is received or accrued. This rule applies for all individuals, regardless of their method of accounting.

(iii) *Effect of disallowance.* The disallowance of foreign taxes under this paragraph (c) shall not affect the time for claiming any deduction or credit for foreign taxes paid. Rather, the disallowance shall only affect the amount of taxes considered paid or accrued to any foreign country.

(iv) *Interest on foreign taxes.* Any interest expense incurred on a liability for foreign taxes is allocated and apportioned not under this paragraph (c) but under paragraph (a) of this section to foreign earned income and then to excluded foreign earned income and to that extent disallowed as a deduction under paragraph (a). In that regard, see also §1.861–8(e)(2) for the specific rules for allocation and apportionment of interest expense.

(d) *Examples.* The following examples illustrate the application of this section.

Example 1. In 1982 A, an architect, operates his business as a sole proprietorship in which capital is not a material income producing factor. A receives $1,000,000 in gross receipts, all of which is foreign source earned income, and incurs $500,000 of otherwise deductible business expenses definitely related to the foreign earned income. A elects to exclude $75,000 under section 911(a)(1). The expenses must be apportioned to excluded earned income as follows: $500,000×$75,000/1,000,000. Thus, $37,500 of the business expenses are not deductible.

Example 2. The facts are the same as in example 1, except that $100,000 of A's gross receipts is U.S. source earned income and $68,000 of A's business expenses are attributable to the U.S. source earned income. Thus, A has $900,000 of foreign earned income and $432,000 of deductions allocated to foreign earned income. The expenses apportioned to excluded earned income are $432,000×$75,000/$900,000, or $36,000, which are not deductible.

Example 3. B is a U.S. citizen, calendar year and cash basis taxpayer. B moves to foreign country N and maintains a tax home and is physically present there from July 1, 1984 through May 26, 1985. Among other possible periods, B is a qualified individual for 219 days in the year of the move. B pays $6,000 of otherwise deductible moving expenses in 1984. For 1984, B's foreign earned income is $60,000 and B excludes $47,869 ($80,000×219/366) under section 911(a). Under paragraph (b)(2) of this section, B's moving expenses are attributable to services performed in 1984. Under paragraph (b)(3) of this section, $6,000×$47,869/$60,000, or $4,789, of B's moving expense deduction is disallowed. B may deduct $1,211 of moving expenses on his 1984 return.

Example 4. The facts are the same as in example 3 except that B maintains a tax home and is physically present in foreign country N from October 9, 1984 through September 3, 1985. Among other possible periods, B is a qualified individual for no more than 119 days in 1984 and 281 days in 1985. B's foreign earned income for 1984 is $60,000. B's foreign earned income for 1985 is $150,000. Because B is a qualified individual for less than 120 days in the year of the move, under paragraph (b)(2) of this section, B's moving expenses are attributable to services performed in 1984 and 1985. At the close of 1984, B may either seek an extension of time to file under §1.911–7(c) or may file an income tax return without claiming the exclusions or deduction under section 911. B does not seek an extension and files without excluding foreign earned income; thus B may deduct his moving expenses in full. B later amends his 1984 return and excludes foreign earned income for that year. B excludes foreign earned income for 1985. B must determine the portion of the moving expense deduction that is disallowed. The portion of the moving expense deduction that is disallowed is determined by multiplying the otherwise allowable moving expense deduction by a fraction. The numerator of the fraction is the sum of amounts excluded under section 911(a) for 1984 and 1985, that is $26,082 or $80,000×119/365, plus $61,589, or $80,000×281/365, which totals $87,671. The denominator of the fraction is the sum of foreign earned income for 1984 and 1985, that is $60,000 plus $150,000, or $210,000. B's allowable moving expense deduction is $3,495, or $6,000−($6,000×$87,671/$210,000). If B does not file an amended 1984 return (and does not exclude foreign earned income for 1984), but excludes foreign earned income under section 911(a) for 1985, a portion of his moving expense deduction is disallowed, based on the same formula. The amount disallowed is $6,000×$61,589/$210,000, or $1,760. This amount may be recaptured either by filing an amended return for 1984 or by including it in income for 1985 (in which case it is not foreign earned income).

Example 5. C is a U.S. citizen, a self-employed individual, and a cash basis and calendar year taxpayer. For the entire 1982 taxable year C maintained his tax home and his bona fide residence in foreign country P. During 1982 C earned and received $120,000 of foreign earned income, none of which was attributable to employer provided amounts. C paid $40,000 of business expenses. C elected to exclude foreign earned income under section 911(a)(1) and claimed a housing cost amount deduction of $15,000. C received $10,000 of foreign source interest income which was included with C's earned income in a single tax base and taxed at graduated rates. For 1982, C paid $30,000 in income tax to foreign country P. The amount of C's business expenses that is properly apportioned to excluded amounts (and therefore, not deductible) equals $25,000, which is determined by multiplying the otherwise allowable deductions by C's excluded amounts over C's foreign earned income ($40,000×75,000/120,000). The amount of country P tax that is properly apportioned to excluded amounts (and therefore, not deductible or creditable) equals $20,000, which is determined by multiplying the tax of $30,000 by the following fraction:

$$\frac{\text{\$50,000 (\$75,000 excluded amounts less \$25,000 of deductible expenses allocable thereto)}}{\text{\$75,000 (((\$120,000 foreign earned income less \$40,000 of deductible expenses allocable thereto) less \$15,000 housing cost amount deduction allocable thereto) plus \$10,000 other taxable income).}}$$

Example 6. D is a U.S. citizen and an accrual basis and calendar year taxpayer for U.S. tax purposes. For the entire period from January 1, 1982 through December 31, 1983, D maintains his tax home and his bona fide residence in foreign country R. For purposes of R's income tax, D is a cash basis taxpayer and uses a fiscal year that begins on April 1 and ends on the following March 31. During his entire period of residence in R, D receives foreign earned income of $10,000 each month, all of which is attributable to employer provided amounts. For his foreign taxable year ending March 31, 1982, D pays $10,000 of income tax to R. For his foreign taxable year ending March 31, 1983, D pays $54,000 of income tax to R. Under paragraph (c)(2)(ii) of this section, all of the $10,000 of tax paid for this foreign taxable year ending March 31, 1982 is imposed on foreign earned income received in 1982, as is $40,500, or 9/12×$54,000, of tax paid for his foreign taxable year ending March 31, 1983. (D received $10,000 per month for the last 3 months of his foreign taxable year ending March 31, 1982, all of which are within his U.S. taxable year ending December 31, 1982 under paragraph (c)(2)(i) of this section, and $10,000 per month for each month of his foreign taxable year ending March 31, 1983, of which the first 9 months are within his U.S. taxable year ending December 31, 1982. Under paragraph (c)(2)(ii) of this section, foreign taxes are deemed to accrue on a pro rata basis to income as it is received or accrued. Thus, all of the $10,000 of foreign taxes imposed on the income received during D's foreign taxable year ending March 31, 1982 accrue to D's 1982 foreign earned income, as do 9/12 (or $90,000/120,000) of foreign taxes imposed on income received during D's foreign taxable year ending March 31, 1983, for purposes of determining the amount of D's foreign taxes that is disallowed.) For 1982, D has no deductible expenses, and elects to exclude his housing cost amount of $21,000 under section 911(a)(2) and foreign earned income of $75,000 under section 911(a)(1). The amount of D's foreign taxes disallowed for deduction or credit purposes for 1982 is $8,000 (that is, $10,000×$96,000/$120,000) of the taxes for his foreign taxable year ending March 31, 1982, plus $32,400 (that is, $40,500×$96,000/$120,000) of the taxes for his foreign taxable year ending March 31, 1983, or $40,400. From 1982, D has $2,000 ($10,000−$8,000) of deductible or creditable taxes accrued on March 31, 1982, and $8,100 ($40,500–$32,400) of deductible or creditable taxes accrued on March 31, 1983, after the disallowance based on his 1982 excluded income.

Example 7. E is a United States citizen, calendar year and cash basis taxpayer. E is physically present in and establishes his tax home in foreign country S on May 1, 1981. For purposes of country S, E's taxable year begins on April 1 and ends the following March 31. E receives foreign earned income of $15,000 each month beginning on May 1, 1981. At the end of his foreign taxable year ending on March 31, 1982, E pays $70,000 of income tax to S on $165,000 of foreign earned income. Under section 911, as in effect for taxable years beginning before January 1, 1982, E may not exclude any income that is earned or received during 1981. None of E's taxes paid in 1982 that are attributable to income earned or received in 1981 are subject to disallowance because, under paragraph (c)(2)(ii) of this section, the only taxes disallowed are those deemed to accrue on income earned and received after December 31, 1981, and excluded from gross income. The amount of E's taxes paid in 1982 that are attributable to 1981 is $50,909, or $70,000×$120,000/$165,000. E elects to exclude foreign earned income for 1982. The amount of E's taxes paid to S in 1982 that accrue to 1982 foreign earned income, and are therefore subject to disallowance based on excluded income, is $19,091, or $70,000×$45,000/$165,000.

(Sec. 911 (95 Stat. 194; 26 U.S.C. 911) and sec. 7805 (68A Stat. 917; 26 U.S.C. 7805) of the Internal Revenue Code of 1954)

[T.D. 8006, 50 FR 2973, Jan. 23, 1985]

§1.911–7 Procedural rules.

(a) *Elections of a qualified individual* —(1) *In general.* In order to receive either exclusion provided by section 911(a), a qualified individual must elect, separately with respect to each exclusion, to exclude foreign earned income under section 911(a)(1) and the housing cost amount under section 911(a)(2). Any such elections may be made on Form 2555 or on a comparable form. Each election must be filed either with the income tax return, or with an amended return, for the first taxable year of the individual for which the election is to be effective. An election once made remains in effect for that year and all subsequent years unless revoked under paragraph (b) of this section. Each election shall contain information sufficient to determine whether the individual is a qualified individual as provided in §1.911–2. The statement shall include the following information:

(i) The individual's name, address, and social security number;

(ii) The name of the individual's employer;

(iii) Whether the individual claimed exclusions under section 911 for earlier years after 1981 and within the five preceding taxable years;

(iv) Whether the individual has revoked a previously made election and the taxable year for which such revocation was effective;

(v) The exclusion or exclusions the individual is electing;

(vi) The foreign country or countries in which the individual's tax home is located and the date when such tax home was established;

(vii) The status (either bona fide residence or physical presence) under which the individual claims the exclusion;

(viii) The individual's qualifying period of residence or presence;

(ix) The individual's foreign earned income for the taxable year including the fair market value of all noncash remuneration; and,

(x) If the individual elects to exclude the housing cost amount, the individual's housing expenses.

(2) *Requirement of a return*—(i) *In general.* In order to make a valid election under this paragraph (a), the election must be made:

(A) With an income tax return that is timely filed (including any extensions of time to file),

(B) With a later return filed within the period prescribed in section 6511(a) amending the foregoing timely filed income tax return,

(C) With an original income tax return that is filed within one year after the due date of the return (determined without regard to any extension of time to file); this one year period does not constitute an extension of time for any purpose—it is merely a period during which a valid election may be made on a late return, or

(D) With an income tax return filed after the period described in paragraphs (a)(2)(i)(A), (B), or (C) of this section provided—

(*1*) The taxpayer owes no federal income tax after taking into account the exclusion and files Form 1040 with Form 2555 or a comparable form attached either before or after the Internal Revenue Service discovers that the taxpayer failed to elect the exclusion; or

(*2*) The taxpayer owes federal income tax after taking into account the exclusion and files Form 1040 with Form 2555 or a comparable form attached before the Internal Revenue Service discovers that the taxpayer failed to elect the exclusion.

(*3*) A taxpayer filing an income tax return pursuant to paragraph (a)(2)(i)(D)(*1*) or (*2*) of this section must type or legibly print the following statement at the top of the first page of the Form 1040: ‘‘Filed Pursuant to Section 1.911–7(a)(2)(i)(D).’’

(ii) *Election for 1982 and 1983 taxable years.* Solely for purposes of paragraph (a)(2)(i)(A) of this section, an income tax return for any taxable year beginning before January 1, 1984, shall be considered timely filed if it is filed on or before July 23, 1985.

(3) *Housing cost amount deduction.* An individual does not have to make an election in order to claim the housing cost amount deduction. However, such individual must provide the Commissioner with information sufficient to determine the individual's correct amount of tax. Such information shall include the following: The individual's name, address, and social security number; the name of the individual's employer; the foreign country in which the individual's tax home was established; the status under which the individual claims the deduction; the individual's qualifying period of residence or presence; the individual's foreign earned income for the taxable year; and the individual's housing expenses.

(4) *Effect of immaterial error or omission.* An inadvertent error or omission of information required to be provided to make an election under this paragraph (a) shall not render the election invalid if the error or omission is not material in determining whether the individual is a qualified individual or whether the individual intends to make the election.

(b) *Revocation of election*—(1) *In general.* An individual may revoke any election made under paragraph (a) of this section for any taxable year. A revocation must be made separately with respect to each election. The individual may revoke an election for any taxable year, including the first taxable year for which an election was effective, by filing a statement that the individual is revoking one or more of the previously made elections. The statement must be filed with the income tax return, or with an amended return, for the first taxable year of the individual for which the revocation is to be effective. A revocation once made is effective for that year and all subsequent years. If an election is revoked for any taxable year, including the first taxable year for which the election was effective, the individual may not, without the consent of the Commissioner, again make the same election until the sixth taxable year following the taxable year for which the revocation was first effective. For example, a qualified individual makes an election to exclude foreign earned income under section 911(a)(1) and files it with his 1982 income tax return. The individual files 1983 and 1984 income tax returns on which he excludes his foreign earned income. Then, within 3 years after filing his 1982 income tax return, the individual files an amended 1982 income tax return with a statement revoking his election to exclude foreign earned income under section 911(a)(1). The revocation of the election is effective for taxable years 1982, 1983, and 1984. The individual may not elect to exclude income under section 911(a)(1) for any taxable year before 1988, unless he obtains consent to reelect under paragraph (b)(2) of this section.

(2) *Reelection before sixth taxable year after revocation.* If an individual revoked an election under paragraph (b)(1) of this section and within five taxable years the individual wishes to reelect the same exclusion, then the individual may apply for consent to the reelection. The application for consent shall be made by requesting a ruling from the Associate Chief Counsel (Technical), National Office, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224. In determining whether to consent to reelection the Associate Chief Counsel or his delegate shall consider any facts and circumstances that may be relevant to the determination. Relevant facts and circumstances may include the following: a period of United States residence, a move from one foreign country to another foreign country with differing tax rates, a substantial change in the tax laws of the foreign country of residence or physical presence, and a change of employer.

(c) *Returns and extensions*—(1) *In general.* Any return filed before completion of the period necessary to qualify an individual for any exclusion of deduction provided by section 911 shall be filed without regard to any exclusion or deduction provided by that section. A claim for a credit or refund of any overpayment of tax may be filed, however, if the taxpayer subsequently qualifies for any exclusion or deduction under section 911. See section 6012(c) and §1.6012–1(a)(3), relating to returns to be filed and information to be furnished by individuals who qualify for any exclusion or deduction under section 911.

(2) *Extensions.* An individual desiring an extension of time (in addition to the automatic extension of time granted by §1.6081–2) for filing a return until after the completion of the qualifying period described in paragraph (c)(1) of this section for claiming any exclusion or deduction under section 911 may apply for an extension. An individual whose moving expense deduction is attributable to services performed in two years may apply for an extension of time for filing a return until after the end of the second year. The individual may make such application on Form 2350 or a comparable form. The application must be filed with the Director, Internal Revenue Service Center, Philadelphia, Pennsylvania 19255. The application must set forth the facts relied on to justify the extension of time requested and must include a statement as to the earliest date the individual expects to become entitled to any exclusion or deduction by reason of completion of the qualifying period.

(d) *Declaration of estimated tax.* In estimating gross income for the purpose of determining whether a declaration of estimated tax must be made for any taxable year, an individual is not required to take into account income which the individual reasonably believes will be excluded from gross income under the provisions of section 911. In computing estimated tax, however, the individual must take into account, among other things, the denial of the foreign tax credit for foreign taxes allocable to the excluded income (see §1.911–6(c)).

(Sec. 911 (95 Stat. 194; 26 U.S.C. 911) and sec. 7805 (68A Stat. 917; 26 U.S.C. 7805) of the Internal Revenue Code of 1954)

[T.D. 8006, 50 FR 2976, Jan. 23, 1985, as amended by T.D. 8480, 58 FR 34885, June 30, 1993]

§1.911–8 Former deduction for certain expenses of living abroad.

For rules relating to the deduction for certain expenses of living abroad applicable to taxable years beginning before January 1, 1982, see 26 CFR 1.913–1 through 1.913–13 as they appeared in the Code of Federal Regulations revised as of April 1, 1982.

(Sec. 911 (95 Stat. 194; 26 U.S.C. 911) and sec. 7805 (68A Stat. 917; 26 U.S.C. 7805) of the Internal Revenue Code of 1954)

[T.D. 8006, 50 FR 2977, Jan. 23, 1985

EARNED INCOME OF CITIZENS OF UNITED STATES

§1.912–1 Exclusion of certain cost-of-living allowances.

(a) Amounts received by Government civilian personnel stationed outside the continental United States as cost-of-living allowances in accordance with regulations approved by the President are, by the provisions of section 912(1), excluded from gross income. Such allowances shall be considered as retaining their characteristics under section 912(1) notwithstanding any combination thereof with any other allowance. For example, the cost-of-living portion of a ‘‘living and quarters allowance’’ would be excluded from gross income whether or not any other portion of such allowance is excluded from gross income.

(b) For purposes of section 912(1), the term ‘‘continental United States’’ includes only the 48 States existing on February 25, 1944 (the date of the enactment of the Revenue Act of 1943 (58 Stat. 21)) and the District of Columbia.

§1.912–2 Exclusion of certain allowances of Foreign Service personnel.

Gross income does not include amounts received by personnel of the Foreign Service of the United States as allowances or otherwise under the provisions of chapter 9 of title I of the Foreign Service Act of 1980 or the provisions of section 28 of the State Department Basic Authorities Act (formerly section 914 of title IX of the Foreign Service Act of 1946).

[T.D. 8256, 54 FR 28620, July 6, 1989]

§ 1.921–1T Temporary regulations providing transition rules for DISCs and FSCs.

(a) *Termination of a DISC*—(1) *At end of 1984.*

Q–1: What is the effect of the termination on December 31, 1984, of a DISC's taxable year?

A–1: Without regard to the annual accounting period of the DISC, the last taxable year of each DISC beginning during 1984 shall be deemed to close on December 31, 1984. The corporation's DISC election also shall be deemed revoked at the close of business on December 31, 1984. (A DISC that does not elect to be an interest charge DISC as of January 1, 1985, in addition to a corporation described in section 992(a)(3), shall be referred to as a ''former DISC''.) A corporation which wishes to be treated as a FSC, a small FSC, or an interest charge DISC must make an election as provided under paragraph (b) (Q & A #1) of this section.

(2) *Deemed distributions for short taxable years.*

Q–2: If the termination of the DISC's taxable year on December 31, 1984, results in a short taxable year, how are the deemed distributions under section 995(b)(1)(E) determined?

A–2: The deemed distributions are determined on the basis of the DISC's taxable income for its short taxable year ending on December 31, 1984. In computing the incremental distribution under section 995(b)(1)(E), the export gross receipts for the short taxable year must be annualized.

(3) *Qualification as a DISC for 1984.*

Q–3: Must the DISC satisfy all the tests set forth in section 992(a)(1) for the DISC's taxable year ending December 31, 1984?

A–3: All of the tests under section 992(a)(1), except the qualified assets test under section 992(a)(1)(B), must be satisfied.

(4) *Commissions for 1984.*

Q–4: Must commissions be paid by a related supplier to a DISC with respect to the DISC's taxable year ending December 31, 1984?

A–4: No.

Q–4A: Must commissions which were earned prior to January 1, 1985, be paid by a related supplier if the last date payment is required (as set forth in § 1.994–1(e)(3)) is after December 31, 1984?

A–4A: No.

(5) *Producer's loans of 1984.*

Q–5: Must the producer's loan rules under section 993(d) be satisfied with respect to the DISC's taxable year ending December 31, 1984?

A–5: Yes.

(6) *Accumulated DISC income.*

Q–6. Under what circumstances is any remaining accumulated DISC income treated as previously taxed income (and not taxed)?

A–6. The accumulated DISC income of a DISC (but not a DISC described in section 992(a)(3)) as of December 31, 1984, is treated as previously taxed income when actually distributed after December 31, 1984. Any amounts distributed by the former DISC (including a DISC which has elected to be an interest charge DISC) after December 31, 1984, shall be treated as made first out of current earnings and profits and then out of previously taxed income to the extent thereof. For purposes of the preceding sentence, amounts distributed before July 1, 1985, shall be treated as made first out of previously taxed income to the extent thereof. If property other than money is distributed and if such property was a qualified export asset within the meaning of section 993(b) on December 31, 1984, then for purposes of section 311, no gain or loss will be recognized on the distribution and the distributee will have the same basis in the property as the distributor.

Q–7: May a DISC that was previously disqualified, but has requalified as of December 31, 1984, treat any accumulated DISC income as previously taxed income?

A–7: If a DISC was previously disqualified, but has requalified as of December 31, 1984, any accumulated DISC income previously required to be taken into income upon prior disqualification shall not be treated as previously taxed income. All accumulated DISC income derived since requalification, however, will be treated as previously taxed income.

(7) *Distribution of previously taxed income.*

Q–8: What effect will the distribution of previously taxed income have on the earnings and profits of corporate shareholders of the former DISC?

A–8: The earnings and profits of the corporate shareholders of the former DISC will be increased by the amount of money and the adjusted basis of any property which is distributed out of previously taxed income.

Q–9: Will the distribution of the former DISC's accumulated DISC income as previously taxed income after December 31, 1984, result in a reduction in the shareholder's basis of the stock of the former DISC and consequent taxation of the excess of the distribution over such basis as capital gain under section 996(d)?

A–9: No. This distribution will be treated both as amounts representing deemed distributions under section 995(b)(1) and as previously taxed income. Thus, no capital gain will arise.

(8) *Qualifying distributions.*

Q–10: How is a qualifying distribution to satisfy the qualified export receipts tests under section 992(c)(1)(A) which is made with respect to the DISC's taxable year ending on December 31, 1984, treated?

A–10: The distribution will not be treated as previously taxed income but will be taxed to the shareholder of the former DISC, as provided under section 992(c) and 996(a)(2) and the regulations thereunder, in the shareholder's taxable year in which the distribution is made.

(9) *Deficiency distributions.*

Q–11: With respect to an audit adjustment made after December 31, 1984, may a deficiency distribution be made, and if so, in what manner may it be made?

A–11: A deficiency distribution may be made notwithstanding the fact that after December 31, 1984, the former DISC is a taxable corporation under subchapter C, has elected to be treated as an interest charge DISC, or has been liquidated, reorganized or is otherwise no longer in existence. However, such deficiency distribution shall be treated as made out of accumulated DISC income which is not previously taxed income because it will be treated as distributed prior to December 31, 1984, to the DISC's shareholders.

Q–11A: Must a former DISC remain in existence in order for a former DISC shareholder to take advantage of the spread provided in section 995(b)(2) with respect to DISC disqualification?

A–11A: No. With respect to distributions deemed to be received by a former DISC shareholder under section 995(b)(2) for taxable years beginning after December 31, 1984, if the former DISC shareholder elects, the rules of section 995(b)(2)(B) shall apply even though the former DISC does not continue in existence. If the former DISC is no longer in existence, the former DISC's shareholders will be deemed to have received the distribution on the last day of their taxable years over the applicable period of time determined under section 995(b)(2) as if the former DISC had remained in existence.

(10) *Deemed distribution for 1984.*

Q–12: How is the deemed distribution to a shareholder for the DISC's taxable year ending December 31, 1984, taken into account?

A–12 (i) If the taxable year of the DISC ending on December 31, 1984, (A) is the first taxable year of the DISC which begins in 1984, (B) begins after the date in 1984 on which the taxable year of the DISC's shareholder begins, and (C) if the DISC's shareholder makes an election under section 805(b)(3) of the Tax Reform Act of 1984, the deemed distribution under section 995(b) with respect to income derived by the DISC for such taxable year of the DISC shall be treated as received by the shareholder in 10 equal installments (unless the shareholder elects to be treated as receiving the deemed distribution in income over a smaller number of equal installments). The first installment shall be treated as received by the shareholder on the last day of the shareholder's second taxable year beginning in 1984 (if any), or if the shareholder had only one taxable year which began in 1984, on the last day of the shareholder's first taxable year beginning in 1985. One installment shall be treated as received by the shareholder on the last day of each succeeding taxable year of the shareholder until the entire amount of the DISC's 1984 deemed distribution has been included in the shareholder's taxable income. To make the election under section 805(b)(3) of the Tax Reform Act of 1984, the DISC shareholder must attach a statement to its timely filed tax return (including extensions) for its taxable year which includes December 31, 1984, indicating the total amount of the shareholder's pro rata share of the DISC's deemed distribution for 1984 (determined under section 995(b) of the Code without regard to the election under section 805(b)(3) of the Tax Reform Act of 1984), and the number of equal installments, if less than 10, over which the shareholder wishes to spread its pro rata share of the deemed distribution for 1984. If the election under section 805(b)(3) of the Tax Reform Act of 1984 is made, it may not be changed or revoked. In determining estimated tax payments, the portion of the deemed distribution includible in the shareholder's taxable income for any taxable year under this subdivision (i) shall be treated as received by the shareholder on the last day of such taxable year.

(ii) Except as provided in subdivision (i), the deemed distribution under section 995(b) with respect to income derived by the DISC for its taxable year ending on December 31, 1984, shall be included in the shareholder's taxable income for its taxable year which includes December 31, 1984. Thus, if the taxable year of the DISC and the DISC's shareholder both begin on January 1, 1984, and end on December 31, 1984 (or, if the taxable year of the DISC beginning in 1984 begins before the taxable year of the DISC's shareholder), the deemed distribution with respect to the DISC's taxable year ending on December 31, 1984, will be included in the DISC shareholder's taxable year ending on (or including) December 31, 1984, and the election described in subdivision (i) may not be made.

(iii) The provisions of this Question and Answer-12 apply without regard to any existence of the DISC after December 31, 1984, as an interest charge DISC.

Q–12A: If under section 805(b)(3) of the Tax Reform Act of 1984 the shareholders of the DISC are permitted to make an election to treat the DISC's 1984 deemed distribution as received over a 10-year period, must the DISC distribute that amount to its shareholders ratably over the 10-year period?

A–12A: No. Under section 805(b)(3) of the Tax Reform Act of 1984, if the DISC's deemed distribution for its taxable year which ended on December 31, 1984, is a qualified distribution, the shareholders of the DISC are permitted to make an election to treat the distribution as received over a 10-year period. The 10-year treatment applies even though the amount of the deemed distribution is distributed to the DISC's shareholders prior to the period in which the distribution is taken into income by the shareholders. In addition, under section 996(e) of the Code, the shareholder's basis in the stock of the DISC will be considered as increased, as of the date of liquidation, by the shareholder's pro rata share of the amount of the undistributed qualified distribution even though that amount is treated as received by the shareholder in later years. Further, the actual distribution in liquidation of the former DISC after 1984 will increase the earnings and profits of a corporate distributee, and the amount actually distributed shall be treated under the rules of section 996.

(11) *Conformity of accounting period.*

Q–13: May a DISC be established or change its annual accounting period for taxable years beginning after March 21, 1984, and before January 1, 1985?

A–13: A DISC that is established or that changes its annual accounting period after March 21, 1984, must conform its annual accounting period to that of its principal shareholder (the shareholder with the highest percentage of voting power as defined in section 441(h)).

(12) *DISC gains and distributions from U.S. sources.*

Q–14: What is the effective date of the amendment to section 996(g), made by section 801(d)(10) of the Tax Reform Act of 1984, which treats certain DISC gains and distributions as derived from sources within the United States?

A–14: Under section 805(a)(3) of the Act, the amendment to section 996(g) shall apply to all gains referred to in section 995(c) and all distributions out of accumulated DISC income including deemed distributions made on or after June 22, 1984.

(b) *Establishing and electing status as a FSC, small FSC or interest charge DISC*—(1) *Ninety-day period.*

Q–1: How does a corporation elect to be treated as a FSC, a small FSC, or an interest charge DISC?

A–1: A corporation electing FSC or small FSC status must file Form 8279. A corporation electing interest charge DISC status must file Form 4876A. A corporation electing to be treated as a FSC, small FSC, or interest charge DISC for its first taxable year shall make its election within 90 days after the beginning of that year. A corporation electing to be treated as a FSC, small FSC, or interest charge DISC for any taxable year other than its first taxable year shall make its election during the 90-day period immediately preceding the first day of that taxable year. The election to be a FSC, small FSC, or interest charge DISC may be made by the corporation, however, during the first 90 days of a taxable year, even if that taxable year is not the corporation's first taxable year, if that taxable year begins before July 1, 1985. Likewise, the election to be a FSC (or a small FSC) may be made during the first 90 days of any taxable year of a corporation if the corporation had in a prior taxable year elected small FSC (or FSC) status and the corporation revokes the small FSC (or FSC) election within the 90 day period. A corporation which was a DISC for its taxable year ending December 31, 1984, which wishes to be treated as an interest charge DISC beginning with its first taxable year beginning after December 31, 1984, may make the election to be treated as an interest charge DISC by filing Form 4876A on or before July 1, 1987. Also, if a corporation which has elected FSC, small FSC or interest charge DISC status, or a shareholder of that corporation, is acquired in a qualified stock purchase under section 338(d)(3), and if an election under section 338(a) is effective with regard to that corporation, the corporation may re-elect FSC, small FSC or interest charge DISC status, (whichever is applicable) not later than the date of the election under section 338(a), see section 338(g)(i) and §1.338–1(d). This re-election is necessary because the original elections are deemed terminated if an election is made under section 338(a). The rules contained in §1.992–2 (a)(1), (b)(1) and (b)(3) shall apply to the manner of making the election and the manner and form of shareholder consent.

(2) *FSC incorporated in a possession.*

Q–2: Where does a FSC which is incorporated in a U.S. possession file its election?

A–2: The election is filed with the Internal Revenue Service Center, Philadelphia, Pennsylvania 19255.

(3) *Information returns.*

Q–3: Must Form 5471 be filed with respect to the organization of a FSC pursuant to section 6046 or to provide information with respect to a FSC pursuant to section 6038?

A–3: A Form 5471 required under section 6046 need not be filed with respect to the organization of a FSC. The requirements of section 6046 shall be satisfied by the filing of a Form 8279 dealing with the election to be treated as a FSC or small FSC. However, a Form 5471 will be required with respect to a reorganization of a FSC (or small FSC) or an acquisition of stock of a FSC (or small FSC), as required under section 6046 and the regulations thereunder. Provided that a Form 1120 FSC is filed, a Form 5471 need not be filed to satisfy the requirements of section 6038.

(4) *Conformity of accounting period.*

Q–4: Since a FSC, small FSC, and interest charge DISC must use the same annual accounting period as the principal shareholder, must such corporation delay the beginning of its first taxable year beyond January 1, 1985 if the principal shareholder (the shareholder with the highest percentage of voting power as defined in section 441(h)) is not a calendar year taxpayer?

A–4: No. Where the principal shareholder is not a calendar year taxpayer, a corporation may elect to be treated as a FFSC, small FSC, or interest charge DISC for a taxable year beginning January 1, 1985. However, such corporation must close its first taxable year and adopt the annual accounting period of its principal shareholder as of the first day of the principal shareholder's first taxable year beginning in 1985. A FSC, small FSC, or interest charge DISC need not obtain the consent of the Commissioner under section 442 to conform its annual accounting period to the annual accounting period of its principal shareholder.

(5) *Dollar limitations for short taxable years.*

Q–5: If a small FSC or an interest charge DISC has a short taxable year, how are the dollar limitations on foreign trading export gross receipts and qualified export gross receipts, respectively, determined for small FSCs and interest charge DISCs?

A–5: The dollar limitations are to be prorated on a daily basis. Thus, for example, if for its 1985 taxable year a small FSC has a short taxable year of 73 days, then in determining exempt foreign trade income, any foreign trading gross receipts that exceed $1 million (73/365 × $5 million) will not be taken into account.

(6) *Change of accounting period.*

Q–6: If the principal shareholder of a FSC, a small FSC, or an interest charge DISC (hereinafter referred to as a ''FSC'') changes its annual accounting period or is replaced by a new principal shareholder during a taxable year, is it necessary for the FSC to change its annual accounting period?

A–6: If the principal shareholder changes its annual accounting period, the FSC must also change its annual accounting period to conform to that of its principal shareholder. If the voting power of the principal shareholder is reduced by an amount equal to at least 10 percent of the total shares entitled to vote and such shareholder is no longer the principal shareholder, the FSC must conform its accounting period to that of its new principal shareholder. However, in determining whether a shareholder is a principal shareholder, the voting power of the shareholders is determined as of the beginning of the FSC's taxable year. Thus, for example, assume that for 1985 a FSC adopts a calendar year period as its annual accounting period to conform to that of its principal shareholder. Assume further than in March 1985 there is a 10 percent change in voting power and a different shareholder whose annual accounting period begins on July 1 becomes the new principal shareholder. The FSC will not be required to adopt the annual accounting period of its new principal shareholder until July 1, 1986. The FSC will have a short taxable year for the period January 1 to June 30, 1986.

(7) *Transition transfers.*

Q–7. Under what circumstances may a DISC or former DISC transfer its assets to a FSC or small FSC without incurring any tax liability on the transfer?

A–7. A DISC or former DISC will recognize no income, gain, or loss on a transfer of its qualified assets (as defined in section 993(b)) to a FSC or small FSC if all of the following conditions are met:

(i) The assets transferred were held by the DISC on August 4, 1983, and were transferred by the DISC or former DISC to the FSC or small FSC in a transfer completed before January 1, 1986; and

(ii) The assets are transferred in a transaction which would qualify for nonrecognition under subchapter C of chapter 1 of the Code, or would so qualify but for section 367 of the Code.

In such case, section 367 shall not apply to the transfer.

In addition, other provisions of subchapter C will apply to the transfer, such as section 358 (basis to shareholders), section 362 (basis to corporations), and section 381 (carryovers in corporate acquisitions). In determining whether a transfer by a DISC to a FSC or small FSC qualifies for nonrecognition under subchapter C, a liquidation of the assets of the DISC into a parent corporation followed by a transfer by the parent of those assets to the FSC or small FSC will be treated as a transaction described in section 368(a)(1)(D).

Notwithstanding the foregoing answer, a taxpayer which transfers a right to use its corporate name to a FSC in a transaction described in sections 332, 351, 354, 356 and 361 shall not be treated as having sold that right under section 367(d) or as having transferred that right to an entity that is not a corporation under section 367(a) provided that the corporate name is used only by the FSC and is not licensed or otherwise made available to others by the FSC.

(8) *Completed contract method.*

Q–8: Under what conditions is a taxpayer using the completed contract method of accounting as defined in § 1.451–3(d) exempted from satisfying the foreign management and foreign economic process requirements of subsections (c) and (d) of section 924?

A–8: If the taxpayer has entered into a binding contract before March 16, 1984, or has on March 15, 1984, and at all times thereafter a firm plan, evidenced in writing, to enter the contract and enters into a binding contract by December 31, 1984, then the taxpayer will be treated as having satisfied the foreign management tests of section 924(c) for periods before December 31, 1984, and the foreign economic process tests of section 924(d) with respect to costs incurred before December 31, 1984, with respect to the transaction. The FSC rules will apply to the income from the long-term contract if an election is made and the general FSC requirements under section 922 are satisfied. However, such taxpayer need not satisfy the activities test under section 925(c) for activities which occur before January 1, 1985 in order to use the transfer pricing rules under section 925.

(9) *Long-term contract—before March 15, 1984.*

Q–9: Under what conditions is a taxpayer who enters into a binding long-term contract (*i.e.*, a contract which is not completed in the taxable year in which it is entered into) before March 15, 1984, but does not use the completed contract method of accounting exempted from satisfying the foreign management and economic process requirements of subsections (c) and (d) of section 924?

A–9: If a taxpayer enters into a binding contract before March 15, 1984, the taxpayer will be treated as having satisfied the foreign management tests of section 924(c) for periods before December 31, 1984, and the foreign economic process tests of section 924(d) with respect to costs incurred before December 31, 1984, but only with respect to income attributable to such contracts that is recognized before December 31, 1986. The FSC rules will apply to the income from the long-term contract if an election is made and the general FSC requirements under section 922 are satisfied. However, such taxpayer need not satisfy the activities test under section 925(c) for activities which occur before January 1, 1985, in order to use the transfer pricing rules under section 925.

(10) *Long-term contract—after March 15, 1984.*

Q–10: Under what conditions is a taxpayer who has a long-term contract (i.e., a contract which is not completed in the taxable year in which it is entered into) but does not use the completed contract method of accounting exempted from satisfying the foreign management and economic process requirements of subsections (c) and (d) of section 924 if such taxpayer enters into a binding contract after March 15, 1984 and before January 1, 1985?

A–10: If a taxpayer enters into a contract after March 15, 1984, and before January 1, 1985, the taxpayer will be treated as having satisfied the foreign management tests of section 924(c) for periods before December 31, 1984, and the foreign economic process tests of section 924(d) with respect to costs incurred before December 31, 1984, but only with respect to income attributable to such contract that is recognized before December 31, 1985.

The FSC rules will apply to the income from the long-term contract if an election is made and the general requirements under section 922 are satisfied. However, such taxpayer need not satisfy the activities test under section 925(c) for activities which occur before January 1, 1985 in order to use the transfer pricing rules under section 925.

(11) *Incomplete transactions.*

Q–11: In computing its foreign trade income, how should a FSC treat transfers of export property from a related supplier to a DISC which is subsequently resold by a FSC after the DISC's termination?

A–11: In applying the gross receipts and combined taxable income methods under section 925 (a)(1) and (a)(2), the transaction is treated as if the transfer of export property were made by the related supplier to the FSC except that the foreign management and economic processes tests under section 924 and the activities test under section 925(c) shall be deemed to be satisfied for purposes of the transaction.

(12) *Pre-effective date costs and activities.*

Q–12: Are costs incurred and activities performed prior to January 1, 1985 taken into account for purposes of satisfying the foreign management and foreign economic processes requirements of subsections (c) and (d) of section 924 and the activities test under section 925(c)?

A–12: For purposes of determining the costs incurred and the activities performed to be taken into account with respect to contracts entered into after December 31, 1984, only those costs incurred and activities performed after December 31, 1984, are taken into consideration. Costs incurred and activities performed by a related supplier prior to January 1, 1985 (or prior to the effective date of a corporation's election to be treated as a FSC if other than January 1, 1985) with respect to transactions occurring after January 1, 1985 (or after the effective date of a corporation's election to be treated as a FSC) need not be taken into account for purposes of computing the FSC's profit under section 925 but are treated for section 925(c) purposes as if they were performed on behalf of the FSC.

(13) *FSC and interest charge DISC.*

Q–13: Can a FSC and an interest charge DISC be members of the same controlled group?

A–13: A FSC and an interest charge DISC cannot be members of the same controlled group. If any controlled group of corporations of which an interest charge DISC is a member establishes a FSC, then any interest charge DISC which is a member of such group shall be treated as having terminated its status as an interest charge DISC.

(c) *Export Trade Corporations*—(1) *Previously taxed income.*

Q–1: Under what circumstances are earnings of an export trade corporation that have not been included in income under section 951 treated as previously taxed income previously included in the income of a U.S. shareholder for purposes of section 959 (and not taxed)?

A–1: A corporation which qualifies as an export trade corporation (ETC) with respect to its last taxable year beginning before January 1, 1985, and elects to discontinue operations as an ETC for all taxable years beginning after December 31, 1984, shall not be required to take into income earnings attributable to previously excluded export trade income, as defined in § 1.970–1(b), derived with respect to taxable years beginning before January 1, 1985. However, any amounts distributed by the former ETC (*i.e.* a corporation which was an ETC for its last taxable year beginning before January 1, 1985) shall be treated as being made out of current earnings and profits and then out of previously taxed income. For purposes of determining the shareholder's basis in the ETC stock, distributions of previously excluded export trade income shall be treated as if made out of previously taxed income which has already been included in gross income under section 951(a)(1)(B). Thus, no basis adjustment under section 961 is necessary. In addition, upon the sale or exchange of the stock of such corporation in a transaction described in section 1248(a), the earnings and profits of the corporation attributable to such previously untaxed income shall not be subject to section 1248(a).

(2) *Qualification as an ETC for last year.*

Q–2: Must an ETC satisfy all of the tests set forth in section 971(a)(1) for the ETC's last taxable year beginning before January 1, 1985?

A–2: All of the tests in section 971(a)(1) must be satisfied, except that for purposes of the working capital requirements set forth in section 971(c)(1), the working capital of the ETC at the close of its last taxable year beginning before January 1, 1985 shall be deemed reasonable.

(3) *Continuation of ETC status.*

Q–3: May a corporation which chooses to remain an ETC after December 31, 1984, continue to do so?

A–3: Yes. However, previously untaxed income of such ETC shall not be treated as previously taxed income in accordance with Q&A #1 of this section.

(4) *Discontinuation of ETC status.*

Q–4: How does an ETC make an election to discontinue its operation as an ETC?

A–4: The United States shareholders (as defined in section 951(b)) must file a statement of election on behalf of the ETC indicating the intent of the ETC to discontinue operations as an ETC for taxable years beginning after December 31, 1984. In addition, the statement of election must include the name, address, taxpayer identification number and stock interest of each

United States shareholder. The statement must also indicate that the corporation on behalf of which the shareholders are making the election qualified as an ETC for its last taxable year beginning before January 1, 1985, and also the amount of earnings attributable to previously excluded export trade income. The statement must be jointly signed by each United States shareholder with each shareholder stating under penalties of perjury that he or she holds the stock interest specified for such shareholder in the statement of election. A copy of the statement of election must be attached to Form 5471 (information return with respect to a foreign corporation) filed with respect to the ETC's last taxable year beginning before January 1, 1985.

(5) *Transition transfers.*

Q–5: Under what circumstances may an electing ETC transfer its assets to a FSC without incurring any tax liability on the transfer?

A–5: An electing ETC will recognize no income, gain, or loss on a transfer of its assets to a FSC but only if all of the following conditions are met:

(i) The assets transferred were held by the ETC on August 4, 1983, and were transferred by the ETC to the FSC in a transfer completed before January 1, 1986; and

(ii) The assets are transferred in a transaction which would qualify for nonrecognition under subchapter C of chapter 1 of the Code, or would so qualify but for section 367 of the Code.

In such case, section 367 shall not apply to the transfer. In addition, other provisions of subchapter C will apply to the transfer such as section 358 (basis to shareholders), section 362 (basis to corporation) and section 381 (carryovers in corporate acquisitions). In determining whether a transfer by an ETC to a FSC qualifies for nonrecognition under subchapter C, a liquidation of the assets of the ETC into a parent corporation followed by a transfer by the parent of those assets to the FSC will be treated as a transaction described in section 368(a)(1)(D).

(Secs. 803 and 805 of the Tax Reform Act of 1984 (98 Stat. 1001) and sec. 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805); sec. 805 (b)(3)(C) and (D) of the Tax Reform Act of 1984 (98 Stat. 1002), and sec. 7805 of the Code (68A Stat. 917; 26 U.S.C. 7805); secs. 367, 927, and 7805 of the Internal Revenue Code of 1954 (98 Stat. 662, 26 U.S.C. 367; 98 Stat. 663, 26 U.S.C. 367; 98 Stat. 993, 26 U.S.C. 927; 98 Stat. 994, 26 U.S.C. 927; and 68A Stat. 917, 26 U.S.C. 7805); sec. 805 of the Tax Reform Act of 1984 (Pub. L. 98–69, 98 Stat. 1000))

[T.D. 7983, 49 FR 40013, Oct. 12, 1984, as amended by T.D. 7992, 49 FR 48283, Dec. 12, 1984; T.D. 7993, 49 FR 48291, Dec. 12, 1984; T.D. 7992, 49 FR 49450, Dec. 20, 1984; T.D. 8126, 52 FR 6434, 6435, Mar. 3, 1987; T.D. 8515, 59 FR 2984, Jan. 20, 1994]

§1.921–2 Foreign Sales Corporation—general rules.

(a) *Definition of a FSC and the Effect of a FSC Election.*

Q–1. What is the definition of a Foreign Sales Corporation (hereinafter referred to as a "FSC" (All references to FSCs include small FSCs unless indicated otherwise))?

A–1. As defined in section 922(a), an FSC must satisfy the following eight requirements.

(i) The FSC must be a corporation organized or created under the laws of a foreign country that meets the requirements of section 927(e)(3) (a "qualifying foreign country") or a U.S. possession other than Puerto Rico (an "eligible possession"). See Q&As 3, 4, and 5 of §1.922–1.

(ii) A FSC may not have more than 25 shareholders at any time during the taxable year. See Q&A 6 of §1.922–1.

(iii) A FSC may not have any preferred stock outstanding during the taxable year. See Q&As 7 and 8 of §1.922–1.

(iv) A FSC must maintain an office outside of the United States in a qualifying foreign country or an eligible possession and maintain a set of permanent books of account (including invoices or summaries of invoices) at such office. See Q&As 9, 10, 11, 12, 13, 14, and 15 of § 1.922–1.

(v) A FSC must maintain within the United States the records required under section 6001. See Q&A 16 of § 1.922–1.

(vi) The FSC must have a board of directors which includes at least one individual who is not a resident of the United States at all times during the taxable year. See Q&As 17, 18, 19, 20, and 21 of § 1.922–1.

(vii) A FSC may not be a member, at any time during the taxable year, of any controlled group of corporations of which an interest charge DISC is a member. See Q&A 2 of this section and Q&A 13, of § 1.921–1T(b)(13).

(viii) A FSC must have made an election under section 927(f)(1) which is in effect for the taxable year. See Q&A 1 of § 1.921–1T(b)(1) and § 1.927(f)–1.

In addition, under section 441(h), the taxable year of a FSC must conform to the taxable year of its principal shareholder. See Q&A 4 of § 1.921–1T(b)(4).

Q–2. Does the reference to a DISC under section 922(a)(1)(F) which provides that a FSC cannot be a member, at any time during the taxable year, of any controlled group of corporations of which a DISC is a member refer solely to an interest charge DISC?

A–2. Yes.

(b) *Small FSC.*

Q–3. What is a small FSC?

A–3. A small FSC is a Foreign Sales Corporation which meets the requirements of section 922(a)(1) enumerated in Q&A 1 of this section as well as the requirements of section 922(b). Section 922(b) requires that a small FSC make a separate election to be treated as a small FSC. See Q&A 1 of § 1.921–1T(b) and § 1.927(f)–1. In addition, section 922(b) requires that the small FSC not be a member, at any time during the taxable year, of a controlled group of corporations which includes a FSC unless such FSC is a small FSC.

Q–4. What is the effect of an election as a small FSC?

A–4. Under section 924(b)(2), a small FSC need not meet the foreign management and economic processes tests of section 924(b)(1) in order to have foreign trading gross receipts. However, in determining the exempt foreign trade income of a small FSC, any foreign trading gross receipts for the taxable year in excess of $5 million are not taken into account. If the foreign trading gross receipts of a small FSC for the taxable year exceed the $5 million limitation, the FSC may select the gross receipts to which the limitation is allocated. In order to use the administrative pricing rules under section 925(a), a small FSC must satisfy the activities test under section 925(c). In addition, under section 441(h), the taxable year of a small FSC must conform to the taxable year of its principal shareholder (defined in Q&A 4 of § 1.921–1T(b)(4) as the shareholder with the highest percentage of its voting power).

Q–5. What is the effect on a small FSC (or FSC) (‘‘target’’) if it is acquired, directly or indirectly, by a corporation if that acquiring corporation (‘‘acquiring’’), or a member of the acquiring corporation's controlled group, is a FSC (or small FSC)?

A–5. Unless the corporations in the controlled group elect to terminate the FSC (or small (FSC) election of the acquiring corporation, the target's small FSC's (or FSC's) taxable year and election will terminate as of the day preceding the date the target small FSC and acquiring FSC became members of the same controlled group. The target small FSC will receive FSC benefits for the period prior to termination, but the $5 million small FSC limitation will be reduced to the amount which bears the same ratio to the $5 million as the number of days in the short year created by the termination bears to 365. The due date of the income tax return for the short taxable year created by this provision will be the date prescribed by section 6072(b), including extensions, starting with the last day of the short taxable year. If the short taxable year created by this provision ends prior to March 3, 1987, the filing date of the tax return for the short taxable year will be automatically extended until the earlier of May 18, 1987 or the date under section 6072 (b) assuming a short taxable year had not been created by these regulations.

(c) *Comparison of FSC to DISC.*

Q–6. How does a FSC differ from a DISC?

A–6. A DISC is a domestic corporation which is not itself taxable while a

FSC must be created or organized under the laws of a jurisdiction which is outside of the United States (including certain U.S. possessions) and may be taxable on its income except for its exempt foreign trade income. The DISC provisions enable a shareholder to obtain a partial deferral of tax on income from export sales and certain services, if 95 percent of its receipts and assets are export related. The FSC provisions contain no assets test, but a portion of income for export sales and certain services is exempt from U.S. taxes if the FSC satisfies certain foreign presence, foreign management, and foreign economic processes tests.

(d) *Organization of a FSC.*

Q–7. Under the laws of what countries may a FSC be organized?

A–7. A FSC may not be created or organized under the laws of the United States, a state, or other political subdivision. However, a FSC may be created or organized under the laws of a possession of the United States, including Guam. American Samoa, the Commonwealth of the Northern Mariana Islands and the Virgin Islands of the United States, but not Puerto Rico. These eligible possessions are located outside the U.S. customs territory. In addition, a FSC may incorporate under the laws of a foreign country that is a party to—

(i) An exchange of information agreement that meets the standards of the Caribbean Basin Economic Recovery Act of 1983 (Code section 274(h)(6)(C)), or

(ii) A bilateral income tax treaty with the United States if the Secretary certifies that the exchange of information program under the treaty carries out the purpose of the exchange of information requirements of the FSC legislation as set forth in section 927(e)(3), if the company is covered under the exchange of information program under subdivision (i) or (ii). The Secretary may terminate the certification. Any termination by the Secretary will be effective six months after the date of the publication of the notice of such termination in the FEDERAL REGISTER.

(e) *Foreign Trade Income.*

Q–8. How is foreign trade income defined?

A–8. Foreign trade income, defined in section 923(b), is gross income of an FSC attributable to foreign trading gross receipts. It includes both the profits earned by the FSC itself from exports and commissions earned by the FSC from products and services exported by others.

(f) *Investment Income and Carrying Charges.*

Q–9. What do the terms ‘‘investment income’’ and ‘‘carrying charges’’ mean?

A–9.

(i) Investment income means:

(A) Dividends,

(B) Interest,

(C) Royalties,

(D) Annuities,

(E) Rents (other than rents from the lease or rental of export property for use by the lessee outside of the United States);

(F) Gains from the sale of stock or securities,

(G) Gains from future transactions in any commodity on, or subject to the rules of, a board of trade or commodity exchange (other than gains which arise out of a bona fide hedging transaction reasonably necessary to conduct the business of the FSC in the manner in which such business is customarily conducted by others),

(H) Amounts includable in computing the taxable income of the corporation under part I of subchapter J, and

(I) Gains from the sale or other disposition of any interest in an estate or trust.

(ii) Carrying charges means:

(A) Charges that are imposed by a FSC or a related supplier and that are identified as carrying charges, (‘‘stated carrying charges’’) and

(B)(*1*) Charges that are considered to be included in the price of the property or services sold by an FSC or a related supplier, as provided under Q&As 1 and 2 of §1.927(d)–1, and

(*2*) Any other unstated interest.

Q–10. How are investment income and carrying charges treated?

A–10. Investment income and carrying charges are not foreign trading gross receipts. Investment income and carrying charges are includable in the taxable income of an FSC, except in the case of a commission FSC where carrying charges are treated as income of the related supplier, and are treated as income effectively connected with a trade or business conducted through a permanent establishment within the United States. The source of investment income and carrying charges is determined under sections 861, 862, and 863 of the Code.

(g) *Small Businesses.*

Q–11. What options are available to small businesses engaged in exporting?

A–11. A small business may elect to be treated as either a small FSC or an interest charge DISC. See Q&As 3 & 4 of § 1.921–2 relating to a small FSC. Rules with respect to interest charge DISCs are the subject of another regulations project.

[T.D. 8127, 52 FR 6469, Mar. 3, 1987]

§ 1.921–3T Temporary regulations; Foreign sales corporation general rules.

(a) *Exclusion*—(1) *Classifications of income.* The extent to which income of a FSC (any further reference to a FSC in this section shall include a small FSC unless indicated otherwise) is subject to the corporate income tax of section 11, or, in the alternative, section 1201(a), is dependent upon the allocation of the FSC's income to the following five categories:

(i) Exempt foreign trade income determined under section 923 and § 1.923–1T;

(ii) Non-exempt foreign trade income determined with regard to the administrative pricing rules of section 925(a)(1) or (2);

(iii) Non-exempt foreign trade income determined without regard to the administrative pricing rules of section 925(a)(1) or (2) (section 923(a)(2) non-exempt income as defined in section 927(d)(6));

(iv) Investment income and carrying charges; and

(v) Other non-foreign trade income.

(2) *Source and characterization of FSC income*—(i) *Exempt foreign trade income.* The exempt foreign trade income of a FSC determined under section 923 and § 1.923–1T is treated as foreign source income which is not effectively connected with a United States trade or business. See § 1.923–1T(a) for the definition of foreign trade income and § 1.923–1T(b) for the definition of exempt foreign trade income.

(ii) *Non-exempt foreign trade income determined with regard to the administrative pricing rules.* The FSC's non-exempt foreign trade income with respect to a transaction or group of transactions will be treated as United States source income which is effectively connected with the FSC's trade or business which is conducted through its permanent establishment within the United States if either of the administrative pricing rules of section 925(a)(1) or (2) is used to determine the FSC's foreign trade income from a transaction or group of transactions. See § 1.923–1T(b) for the definition of non-exempt foreign trade income.

(iii) *Non-exempt foreign trade income determined without regard to the administrative pricing rules.* The source and taxation of the FSC's non-exempt foreign trade income not classified in paragraph (a)(2)(ii) of this section will be determined under the appropriate sections of the Internal Revenue Code and the regulations under those sections. This type of income (section 923(a)(2) non-exempt income) includes both income that is not effectively connected with the conduct of a trade or business in the United States and income that is effectively connected.

(iv) *Investment income and carrying charges.* All of the FSC's investment income and carrying charges will be treated as income which is effectively connected with the FSC's trade or business which is conducted through its permanent establishment within the United States. The source of that income will be determined under the appropriate sections of the Internal Revenue Code and the regulations under those sections. See § 1.921–2(f) (Q & A9) for definition of investment income and carrying charges.

(v) *Non-foreign trade income (other than investment income and carrying charges).* The source and taxation of the FSC's non-foreign trade income (other than investment income and carrying charges) will be determined under the appropriate sections of the Internal Revenue Code and the regulations under those sections.

(b) *Allocation and apportionment of deductions.* Expenses, losses and deductions incurred by the FSC shall be allocated and apportioned under the rules set forth in §1.861–8 to the FSC's foreign trade income and to the FSC's non-foreign trade income. Any deductions incurred by the FSC on a transaction, or group of transactions, which are allocated and apportioned to the FSC's foreign trade income from that transaction, or group of transactions, shall be allocated on a proportionate basis between exempt foreign trade income and non-exempt foreign trade income.

(c) *Net operating losses and capital losses*—(1) *General rule.* (i) If a FSC for any taxable year incurs a deficit in earnings and profits attributable to foreign trade income determined without regard to the administrative pricing rules of section 925(a)(1) or (2), that deficit shall be applied to reduce current earnings and profits, if any, attributable to—

(A) First, exempt foreign trade income determined with regard to the administrative pricing rules,

(B) Second, non-exempt foreign trade income determined with regard to the administrative pricing rules,

(C) Third, investment income and carrying charges, and

(D) Fourth, other non-foreign trade income.

(ii) If a FSC for any taxable year incurs a deficit in earnings and profits attributable to non-foreign trade income (other than investment income, carrying charges and net capital losses), that deficit shall be applied to reduce current earnings and profits, if any, attributable to—

(A) First, investment income and carrying charges,

(B) Second, exempt foreign trade income determined with regard to the administrative pricing rules,

(C) Third, exempt foreign trade income determined without regard to the administrative pricing rules,

(D) Fourth, non-exempt foreign trade income determined with regard to the administrative pricing rules, and

(E) Fifth, section 923(a)(2) non-exempt income.

(iii) If a FSC for any taxable year incurs a deficit in earnings and profits attributable to investment income and carrying charges, that deficit shall be applied to reduce current earnings and profits, if any, attributable to—

(A) First, non-foreign trade income other than capital gains,

(B) Second, exempt foreign trade income determined with regard to the administrative pricing rules,

(C) Third, exempt foreign trade income determined without regard to the administrative pricing rules,

(D) Fourth, non-exempt foreign trade income determined with regard to the administrative pricing rules, and

(E) Fifth, section 923(a)(2) non-exempt income.

(iv) Net capital losses will be available for carryback or carryover pursuant to paragraph (c)(2) of this section.

(v) Because the no-loss rules provide that a related supplier may always compensate the FSC for its expenses either as part of the commission payment or as part of the transfer price if the administrative pricing rules are used (see §1.925(a)–1T(e)(1)(i)), a FSC will not have a deficit in its earnings and profits relating to foreign trade income determined with regard to the administrative pricing rules. To determine the amount of any division of earnings and profits for the purpose of determining under §1.926(a)–1T (a) and (b) the treatment and order of distributions, the portion of a deficit in earnings and profits chargeable under this paragraph to such division prior to such distribution shall be determined in a manner consistent with the rules in §1.316–2(b) for determining the amount of earnings and profits available on the date of any distribution.

(2) *Carryback or carryover of net operating losses and capital losses to other taxable years of a FSC (or former FSC).* (i) The amount of the deduction for the taxable year under section 172 for a net operating loss carryback or carryover, or under section 1212 for a capital loss carryback or carryover, shall be determined in the same manner as if the FSC were a foreign corporation which had not elected to be treated as a FSC. Thus, the amount of the deduction will be the same whether or not the corporation was a FSC in the year of the loss or in the year to which the loss is carried.

(ii) Any carryback or carryover of a FSC's (or former FSC's) net operating loss which is attributable to transactions which give rise to foreign trade income shall be charged—

(A) First, to earnings and profits attributable to exempt foreign trade income which is determined without regard to the administrative pricing rules,

(B) Second, to earnings and profits attributable to section 923(a)(2) non-exempt income,

(C) Third, to earnings and profits attributable to exempt foreign trade income determined with regard to the administrative pricing rules,

(D) Fourth, to earnings and profits attributable to non-exempt foreign trade income determined with regard to the administrative pricing rules,

(E) Fifth, to earnings and profits attributable to investment income and carrying charges (other than capital gain income), and

(F) Sixth, to earnings and profits attributable to non-foreign trade income (other than investment income, carrying charges and capital gain income).

(iii) Any carryback or carryover of a FSC's (or former FSC's) net operating loss which is attributable to non-foreign trade income (other than capital gain income) shall be charged—

(A) First, to earnings and profits attributable to non-foreign trade income (other than investment income, carrying charges and capital gain income),

(B) Second, to earnings and profits attributable to investment income and carrying charges,

(C) Third, to earnings and profits attributable to exempt foreign trade income determined with regard to the administrative pricing rules,

(D) Fourth, to earnings and profits attributable to non-exempt foreign trade income determined with regard to the administrative pricing rules,

(E) Fifth, to earnings and profits attributable to exempt foreign trade income which is determined without regard to the administrative pricing rules, and

(F) Sixth, to earnings and profits attributable to section 923(a)(2) non-exempt income.

(iv) Any carryback or carryover of a net operating loss to a year in which the corporation was (or is) a FSC from a taxable year in which the corporation was not a FSC shall be applied in a manner consistent with subdivision (iii) of this paragraph.

(d) *Credits against tax*—(1) *General rule*. Notwithstanding any other provision of chapter 1, subtitle A, a FSC is allowed under section 921(c) as credits against tax only the following credits:

(i) The foreign tax credit, section 27(a);

(ii) The credit for tax withheld at source on foreign corporations, section 33; and

(iii) The certain uses of gasoline and special fuels credit, section 34.

(2) *Foreign tax credit*. (i) The direct foreign tax credit of section 901(b)(4) as determined under section 906 for income, war profits, and excess profits taxes (or taxes in lieu thereof) paid or accrued to any foreign country or possession of the United States is allowed a FSC only to the extent that those taxes are attributable to the FSC's foreign source non-foreign trade income which is effectively connected with its conduct of a trade or business within the United States. See section 906(b)(5).

(ii) The foreign tax credit for domestic corporate shareholders in foreign corporations (the deemed paid credit) provided under section 901(a) as determined under section 902 is allowed for income, war profits, and excess profits taxes deemed paid or accrued by a FSC (or former FSC) only to the extent those taxes are deemed paid or accrued with respect to the FSC's (or former FSC's) section 923(a)(2) non-exempt income and its non-foreign trade income.

(iii) The foreign tax credit allowed by sections 901 and 903 for tax withheld at source is allowed only to the extent the dividends paid to the FSC's (or former FSC's) shareholder are attributable to the FSC's (or former FSC's) section 923(a)(2) non-exempt income and its non-foreign trade income.

(3) *Foreign tax credit limitation*. (i) For purposes of computation of the direct foreign tax credit of section 901(b)(4) as determined under section 906, the separate limitation of section 904(d)(1)(C) for the FSC's taxable income attributable to its foreign trade income will apply. The direct foreign tax credit is not allowed to a FSC with regard to

taxes it paid which are attributable to its foreign trade income. Since the foreign tax credit is not allowed for that type of income, the effect of the separate limitation is to remove the FSC's foreign trade income from the numerator of the fraction used to compute the FSC's overall foreign tax credit limitation.

(ii) A separate limitation under section 904(d)(1)(D) is provided for distributions from a FSC (or former FSC) that arise through operation of the deemed paid credit of section 902 and are attributable to foreign trade income earned during the period when the distributing corporation was a FSC. This limitation is computed by multiplying the FSC's shareholder's tentative United States tax by a fraction the numerator of which is the foreign source dividend (determined with regard to section 78) attributable to the foreign trade income less dividends received deductions and other expenses allocated and apportioned under §1.861–8 allowed to the shareholder and the denominator of which is the shareholder's worldwide income. The effect of this separate limitation is to remove dividends attributable to the FSC's foreign trade income from the numerator of the fraction used to compute the overall foreign tax credit limitation of the FSC's shareholder.

(iii) The separate limitation under section 904(d)(1)(D) also applies to the foreign tax credit allowed to a FSC shareholder by sections 901 and 903 for tax withheld at source on dividends paid by the FSC. The numerator of this fraction is the part of the dividend attributable to the FSC's foreign trade income and the denominator is the shareholder's worldwide income. The effect of this separate limitation is to remove dividends attributable to foreign trade income of a FSC (or former FSC) from the numerator of the fraction used to compute the overall foreign tax credit limitation of the FSC's shareholder.

(e) *Deduction for foreign income, war profits and excess profits taxes.* Under section 275(a)(4)(B), income, war profits and excess profits taxes imposed by a foreign country or possession of the United States may not be deducted by a FSC to the extent those taxes are paid or accrued with respect to its foreign trade income.

(f) *Payment of estimated tax.* Every FSC which is subject to tax under section 11 or 1201(a) and section 882 must make payment of its estimated tax in accordance with section 6154 and the regulations under that section. In determining the amount of the estimated tax, the FSC must treat the tax imposed by section 881 as though it were a tax imposed by section 11. See section 6154(g).

(g) *Accumulated earnings, personal holding company and foreign personal holding company.* The provisions covering the accumulated earnings tax (sections 531 through 537), personal holding companies (sections 541 through 547) and foreign personal holding companies (sections 551 through 558) apply to FSCs to the extent they would apply to foreign corporations that are not FSCs.

(h) *Subpart F income and increase of earnings invested in U.S. property.* For the mandatory inclusion in the gross income of the U.S. shareholders of the subpart F income and of the increase in earnings invested in U.S. property of a FSC, see sections 951 through 964 and the regulations under those sections. However, the foreign trade income (other than section 923(a)(2) non-exempt income) and, generally, the investment income and carrying charges of a FSC and any deductions which are allocated and apportioned to those classes of income, are not taken into account under sections 951 through 964. See sections 951(e) and 952(b).

(i) *Certain accumulations of earnings and profits.* For the inclusion in the gross income of U.S. persons as a dividend on the gain recognized on certain sales or exchanges of stock in a FSC, to the extent of certain earnings and profits attributable to the stock which were accumulated while the FSC was a controlled foreign corporation, see section 1248 and the regulations under that section. However, section 1248 and the regulations under that section do not apply to a FSC's earnings and profits attributable to foreign trade income, see section 1248(d)(6).

(j) *Limitations on certain multiple tax benefits.* The provisions of section 1561, Limitations on Certain Multiple Tax

Benefits in the Case of Certain Controlled Corporations, and section 1563, Definitions and Special Rules, and the regulations under those sections apply to a FSC and its controlled group.

[T.D. 8126, 52 FR 6435, Mar. 3, 1987]

§ 1.922–1 Requirements that a corporation must satisfy to be a FSC or a small FSC.

(a) *FSC requirements.*

Q–1. What are the requirements that a corporation must satisfy to be an FSC?

A–1. A corporation must satisfy all of the requirements of section 922(a).

(b) *Small FSC requirements.*

Q–2. What are the requirements that a corporation must satisfy to be a small FSC?

A–2. A corporation must satisfy all of the requirements of sections 922(a)(1) and (b).

(c) *Definition of corporation.*

Q–3. What type of entity is considered a corporation for purposes of qualifying as an FSC or a small FSC under section 922?

A–3. A foreign entity that is classified as a corporation under section 7701(a)(3) (other than an insurance company) is considered a corporation for purposes of this requirement.

(d) *Eligible possession.*

Q–4. For purposes of meeting the place of incorporation requirement of section 922(a)(1)(A), what is a possession of the United States?

A–4. For purposes of section 922(a)(1)(A), the possessions of the United States are Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, and the Virgin Islands of the United States (‘‘eligible possessions’’). Puerto Rico, although a possession for certain tax purposes, does not qualify as a jurisdiction in which a FSC or small FSC may be incorporated.

(e) *Qualifying countries.*

Q–5. For purposes of meeting the place of incorporation requirement of section 922(a)(1)(A), what is a foreign country and which foreign countries meet the requirements of section 927(e)(3)?

A–5. (i) A foreign country is a jurisdiction outside the 50 states, the District of Columbia, the Commonwealth of Puerto Rico, and the possessions of the United States. (ii) A list of the foreign countries that meet the requirements of section 927(e)(3) (’’qualifying countries’’) will be published from time to time in the FEDERAL REGISTER and the Internal Revenue Bulletin. A corporation is considered to be created or organized under the laws of a foreign country that meets the requirements of section 927(e)(3) only if the foreign country is a party to (A) an exchange of information agreement under the Caribbean Basin Economic Recovery Act (Code section 274(h)((6)(C)), or (B) a bilateral income tax treaty with the United States if the Secretary certifies that the exchange of information program under the treaty carries out the purposes of the exchange of information requirements of the FSC legislation as set forth in Code section 927(e)(3) and if the corporation is covered under exchange of information program under subdivision (A) or (B).

(f) *Number of shareholders.*

Q–6. Who is counted as a shareholder of a corporation for purposes of determining whether a corporation meets the limitation on the number of shareholders to no more than 25 under section 922(a)(1)(B)?

A–6. Solely for purposes of the limitation on the number of shareholders, the following rules apply:

(i) In general, an individual who owns an interest in stock of the corporation is counted as a shareholder. In the case of joint owners, each joint owner is counted as a shareholder. A member of a corporation’s board of directors who holds qualifying shares that are required to be owned by a resident of the country of incorporation is not counted as a shareholder.

(ii) A corporation that owns an interest in stock of the corporation is counted as a single shareholder.

(iii) An estate that owns an interest in stock of the corporation is counted as a single shareholder. If the limitation on number of shareholders is not satisfied by reason of the closing of an estate, the FSC will continue to qualify for the taxable year of the FSC in which the estate is closed.

(iv) A trust is not counted as a shareholder. In the case of a trust all of which is treated as owned by one or more persons under sections 671 through 679, those persons are counted as shareholders. In the case of all other trusts, a beneficiary is counted as a shareholder.

(v) A partnership is not counted as a shareholder. A general or limited partner is counted as a shareholder if it is a corporation, an individual, or an estate, under the rules contained in subdivisions (i) through (iii). A general or limited partner is not counted as a shareholder if it is a partnership or a trust; the rules contained in subdivision (iv) and this subdivision (v) apply to the determination of who is counted as a shareholder.

(g) *Class of stock.*

Q–7. What is preferred stock for purposes of determining whether a corporation satisfies the requirement under section 922(a)(1)(C) that no preferred stock be outstanding?

A–7. Preferred stock is stock that is limited and preferred as to dividends or distributions in liquidation.

Q–8. Can a corporation have outstanding more than one class of common stock?

A–8. Yes. However, the rights of a class of stock will be disregarded if the right has the effect of avoidance of Federal income tax. For instance, dividend rights may not be used to direct dividends from exempt foreign trade income to shareholders that have taxable income and to direct other dividends to shareholders that have met operating loss carryovers.

(h) *Office.*

Q–9. What is an office for purposes of determining whether a corporation satisfies the requirement of section 922(a)(1)(D)(i)?

A–9. An office is a place for the transaction of the business of the corporation. To be an office a place must meet all of the following requirements;

(i) *It must have a fixed location.* A transient location is not a fixed location.

(ii) *It must be a building or a portion of a building consisting of at least one room.* A room is a partitioned part of the inside of a building. The building or portion thereof used as the corporation's office must be large enough to accommodate the equipment required in subdivison (iii) of this answer 9 and the activity required in subdivision (iv) of this answer 9. However, an office is not limited to a room with communication equipment or an adjacent room. Noncontiguous space within the same building will also constitute an office if it is equipped for the retention of the documentation required to be stored by the FSC and if access to the necessary communication equipment is available for use by the FSC.

(iii) *It must be equipped for the performance of the corporation's business.* An office must be equipped for the communication and retention of information and must be supplied with communication services.

(iv) *It must be regularly used for some business activity of the corporation.* A corporation's business activities must include the maintenance of the documentation described in Q&A 12 of this section. These documents need not be prepared at the office. Any person, whether or not related to the corporation, may perform the business activities of the corporation at the office if the activity is performed pursuant to a contract, oral or written, for the performance of the activity on behalf of the corporation.

(v) *It must be operated, and owned or leased, by the corporation or by a person, whether or not related to the corporation, under contract to the corporation.*

(vi) *It must be maintained by the corporation or by a person, whether or not related, to the corporation, under contract to the corporation at all times during the taxable year.* In the case of a corporation newly organized as a FSC, thirty days may elapse between the time the corporation is organized as a FSC (*i.e.,* the first day for which the FSC election is effective) and the time an office is maintained by the corporation or a person under contract with the corporation. A place that meets the requirements in subdivision (i) through (vi) of this answer 9 can also be used for activities that are unrelated to the business activity of the corporation.

Q–10 Can a corporation locate an office in any foreign country if it has at least one office in a U.S. possession or in a foreign country that meets the requirements of section 927 (e)(3) as provided Q&A 5 of this section?

A–10. Yes.

Q–11. Must a corporation locate the office that is required under section 922(a)(1)(D)(i) in the country or possession of its incorporation?

A–11. No.

(i) *Documentation.*

Q–12. What documentation must be maintained at the corporation's office for purposes of section 922(a)(1)(D)(ii)?

A–12. At least the following documentation must be maintained at the corporation's office under section 922(a)(1)(D)(ii):

(i) The quarterly income statements, a final year-end income statement and a year-end balance sheet of the FSC; and

(ii) All final invoices (or a summary of them) or statements of account with respect to (A) sales by the FSC, and (B) sales by a related person if the FSC realizes income with respect to such sales. A final invoice is an invoice upon which payment is made by the customer. A invoice must contain, at a minimum, the customer's name or idenfitying number and, with respect to the transaction or transactions, the date, product or product code or service of service code, quantity, price, and amount due. In the alternative, a document will be acceptable as a final invoice even though it does not include all of the above listed information if the FSC establishes that the document is considered to be a final invoice under normal commercial practices. An invoice forwarded to the customer after payment has been tendered or received pursuant to a letter of credit, as a receipt for payment, satisfies this definition. A single final invoice may cover more than one transaction with a customer.

(iii) A summary of final invoices may be in any reasonable form provided that the summary contains all substantive information from the invoices. All substantive information includes the customer's name or identifying number, the invoice number, date, product or product code, and amount owed. In the alternative, all substantive information includes a summary of the information that is included on documents considered to be final invoices under normal commercial practice. A statement of account is any summary statement forwarded to a customer to inform of, or confirm, the status of transactions occurring within an accounting period during a taxable year that is not less than one month. A statement of account must contain, at a minimum, the customer's name or identifying number, date of the statement of account and the balance due (even if the balance due is zero) as of the last day of the accounting period covered by the statement of account. In the alternative, a document will be accepted as a statement of account even though it does not include all of the above listed information if the FSC establishes that the document is considered a statement of account under normal commercial practice. For these purposes, a document will be considered to be a statement of account under normal commercial practice if it is sent to domestic as well as to export customers in order to inform the customers of the status of transactions during an accounting period. With regard to quarterly income statements, a reasonable estimate of the FSC's income and expense items will be acceptable. If the FSC is a commission FSC, 1.83% of the related supplier's gross receipts will be considered a reasonable estimate of the FSC's income. The documents required by this Q&A 12 need not be prepared by the FSC. In addition they need not be prepared at the FSC's office.

(iv) The FSC will satisfy the requirement that the documents be maintained at its office even if not all final invoices (or summaries) or statements of account or items to be included on statements of account are maintained at its office as long as it makes a good faith effort to do so and provided that any failure to maintain the required documents is cured within a reasonable time of discovery of the failure.

Q–13. If the required documents are not prepared at the FSC's office, by what date must the documents be maintained at its office?

A–13. With regard to the applicable quarters of years prior to March 3, 1987, the quarterly income statements, final invoices (or summaries), or statements of account and the year-end balance sheet must be maintained at the FSC's office no later than the due date, including extensions, of the FSC tax return for the applicable taxable year in which the period ends. With regard to the applicable quarters or years ending after March 3, 1987, the quarterly income statements for the first three quarters of the FSC year must be maintained at the FSC's office no later than 90 days after the end of the quarter. The quarterly income statement for the fourth quarter of the FSC year, the final year-end income statement, the year-end balance sheet, and the final invoices (or summaries) or statements of account must be maintained at the FSC's office no later than the due date, including extensions, of the FSC tax return for the applicable taxable year.

Q–14. In what form must the documentation required under section 922(a)(1)(D)(ii) be maintained?

A–14. The documentation required to be maintained by the office may be originals or duplicates and may be in any form that qualifies as a record under Rev. Rul. 71–20, 1971–1 C.B. 392. Therefore, documentation may be maintained in the form of punch cards, magnetic tapes, disks, and other machine-sensible media used for recording, consolidating, and summarizing accounting transactions and records within a taxpayer's automatic data processing system. The corporation need not maintain at its office equipment capable of reading the machine-sensible media. That equipment, however, must be situated in a location that is readily accessible to the corporation. The equipment need not be owned by the corporation.

Q–15. How long must the documentation required under section 922(a)(1)(D)(ii) be maintained?

A–15. The documentation required under section 922(a)(1)(D)(ii) for a taxable year must be maintained at the FSC's office described in section 922(a)(1)(D)(i) until the period of limitations for assessment of tax for the taxable year has expired under section 6501.

Q–16. Under what circumstances will a coporation be considered to satisfy the requirement of section 922(a)(1)(D)(iii) that it maintain the records it is required to keep under section 6001 at a location within the United States?

A–16. A corporation will be considered to satisfy this requirement if the records required under section 6001 are kept by any person at any location in the United States provided that the records are retained in accordance with section 6001 and the regulations thereunder.

(j) *Board of directors.*

Q–17. What is a corporation's ''board of directors'' for purposes of the requirement under section 922(a)(1)(E) that, at all times during the taxable year, the corporation must have a board of directors which includes at least one individual who is not a resident of the United States?

A–17. The ''board of directors'' is the body that manages and directs the corporation according to the law of the qualifying country or eligible possession under the laws of which the corporation was created or organized.

Q–18. Can the member of the board of directors who is a nonresident of the United States be a citizen of the United States?

A–18. Yes. For purposes of meeting the requirement under section 922(a)(1)(E), the member of the board who cannot be a United States resident can be a United States citizen. The principles of section 7701(b) shall be used to determine whether a United States citizen is a United States resident.

Q–19. If the only member of the board of directors who is not a resident of the United States dies, or resigns, is removed from the board or becomes a resident of the United States will the corporation be considered to fail the requirement under section 922(a)(1)(E)?

A–19. If the corporation appoints a new member who is a nonresident of the United States to the board within 30 days after the death, resignation or removal of the former nonresident member, the corporation will be considered to satisfy the requirement under section 922(a)(1)(E). Also, the corporation will be considered to satisfy the requirement under section 922(a)(1)(E) if the corporation appoints a new member who is a nonresident of the United States to the board within 30 days after the corporation has knowledge, or reason to know, that the board's former nonresident member was in fact a resident of the United States.

Q–20. Is a nonresident alien individual who elects to be treated as a resident of the United States for a taxable year under section 6013(g) considered a nonresident of the United States for purposes of the requirement under section 922(a)(1)(E)?

A–20. Yes.

Q–21. Will the requirement that a FSC's board of directors have a nonresident member at all times during the taxable year be satisfied if the nonresident member is elected or appointed to the board of directors no later than 30 days after the first day for which the FSC election is effective?

A–21. Yes.

[T.D. 8127, 52 FR 6470, Mar. 3, 1987]

§ 1.923–1T Temporary regulations; exempt foreign trade income.

(a) *Foreign trade income.* Foreign trade income of a FSC is the FSC's gross income attributable to its foreign trading gross receipts. (Any further reference to a FSC in this section shall include a small FSC unless indicated otherwise.) If the FSC is the principal on the sale of export property which it purchased from a related supplier, the FSC's gross income is determined by subtracting from its foreign trading gross receipts the transfer price determined under the transfer pricing methods of section 925(a). If the FSC is the commission agent on the sale of export property by its related supplier, the FSC's gross income is the commission paid or payable by the related supplier to the FSC with respect to the transactions that would have generated foreign trading gross receipts had the FSC been the principal on the transaction. See § 1.925(a)–1T(f) *Examples 1* and *6* for illustrations of the computation of a FSC's foreign trade income, exempt foreign trade income and taxable income.

(b) *Exempt foreign trade income*—(1) *Determination.* (i) If a FSC uses either of the two administrative pricing rules, provided for by sections 925(a)(1) and (2), to determine its income from a transaction, or group of transactions, to which section 925 applies (see § 1.925(a)–1T(b)(2) (ii) and (iii)), 15/23 of the foreign trade income that it earns from the transaction, or group of transactions, will be exempt foreign trade income. If a FSC has a non-corporate shareholder (shareholders), 16/23 of its foreign trade income attributable to the noncorporate shareholder's (shareholders') proportionate interest in the FSC will be exempt foreign trade income. See section 291(a)(4).

(ii) If a FSC does not use the administrative pricing rules to determine its income from a transaction, or group of transactions, which gives rise to foreign trade income, 30 percent of its foreign trade income will be exempt foreign trade income. If a FSC has a noncorporate shareholder (shareholders), 32 percent of its foreign trade income attributable to the non-corporate shareholder's (shareholders') proportionate interest in the FSC will be exempt foreign trade income. See section 291(a)(4).

(iii) Exempt foreign trade income so determined under subdivisions (1)(i) and (ii) of this paragraph is treated as foreign source income which is not effectively connected with the conduct of a trade or business within the United States. See section 921(a).

(2) *Special rule for foreign trade income allocable to a qualified cooperative.* (i) Pursuant to section 923(a)(4), if a qualified cooperative is a shareholder of a FSC, the FSC's non-exempt foreign trade income determined by use of either of the administrative pricing methods of section 925(a)(1) or (2) which is allocable to the marketing of agricultural or horticultural products, or the providing of related services, for any taxable year will be treated as exempt foreign trade income to the extent that it is distributed to the qualified cooperative shareholder. A qualified cooperative is defined as any organization to which chapter 1, subchapter T, part 1 of the Code applies. See section 1381(a).

(ii) This special rule of section 923(a)(4) shall apply only if the distribution is made before the due date under section 6072(b), including extensions, for filing the FSC's income tax return for that year. Any distribution which satisfies this requirement will be treated as made on the last day of the

FSC's taxable year. In addition, this special rule shall apply only if the income of the cooperative is based on arm's length transactions between the cooperative and its members or patrons.

(iii) Income attributable to the marketing of agricultural or horticultural products, or the providing of related services, shall be allocated to the FSC shareholders on a per share basis. See §1.926(a)–1T(b) for ordering rules for distributions from a FSC.

(3) *Special rule for military property.* (i) Under section 923(a)(5), the exempt foreign trade income of a FSC relating to the disposition of, or services relating to, military property shall be equal to 50 percent of the amount which, but for section 923(a)(5), would be treated as exempt foreign trade income under section 923(a)(2) or (3). The foreign trade income no longer treated as exempt because of this special rule of section 923(a)(5) will remain income of the FSC and will be treated as non-exempt foreign trade income.

(ii) The term ''military property'' is defined in section 995(b)(3)(B) and includes any property which is an arm, ammunition, or implement of war designated in the munitions list published pursuant to section 38 of the International Security Assistance and Arms Export Control Act of 1976 (22 U.S.C. 2778) (which repealed and replaced the Military Security Act of 1954).

[T.D. 8126, 52 FR 6438, Mar. 3, 1987]

§1.924(a)–1T Temporary regulations; definition of foreign trading gross receipts.

(a) *In general.* The term ''foreign trading gross receipts'' means any of the five amounts described in paragraphs (b) through (f) of this section, except to the extent that any of the five amounts is an excluded receipt within the meaning of paragraph (g) of this section. These amounts will not be foreign trading gross receipts if the FSC is not managed outside the United States, pursuant to section 924(c), or if the economic processes with regard to a transaction, or group of transactions, that are required of a FSC by section 924(d) do not take place outside the United States. The requirement that these activities take place outside the United States does not apply to a small FSC. The activities required by sections 924 (c) and (d) may be performed either by the FSC or by any person (whether or not related to the FSC) acting under contract with the FSC for the performance of the required activities. Sections 1.924(c)–1 and 1.924(d)–1 provide rules to determine whether these requirements have been met. For purposes of this section—

(1) *FSC.* All references to a FSC in this section mean a FSC, except when the context indicates that such term means a corporation in the process of meeting the conditions necessary for that corporation to become a FSC. All references to a FSC in this section shall include a small FSC unless indicated otherwise.

(2) *Sale and lease.* The term ''sale'' includes an exchange or other disposition and the term ''lease'' includes a rental or a sublease. The term ''license'' includes a sublicense. All rules under this section applicable to leases of export property apply in the same manner to licenses of export property. See §1.927(a)–1T(f)(3) for a description of intangible property which cannot be export property.

(3) *Gross receipts.* The term ''gross receipts'' is defined by section 927(b) and §1.927(b)–1T.

(4) *Export property.* The term ''export property'' is defined by section 927(a) and §1.927(a)–1T.

(5) *Controlled group.* The term ''controlled group'' is defined by paragraph (h) of this section.

(6) *Related supplier and related party.* The terms related supplier and related party are defined by §1.927(d)–2T.

(b) *Sales of export property.* Foreign trading gross receipts of a FSC include gross receipts from the sale of export property by the FSC, or by any principal for whom the FSC acts as a commission agent (whether or not the principal is a related supplier), pursuant to the terms of a contract entered into with a purchaser by the FSC or by the principal at any time or by any other person and assigned to the FSC or the principal at any time prior to the shipment of the property to the purchaser. Any agreement, oral or written, which constitutes a contract at law, satisfies the contractual requirements of this paragraph. Gross receipts from the sale of export property, whenever received, do not constitute foreign trading gross receipts unless the seller (or the corporation acting as commission agent for the seller) is a FSC at the time of the shipment of the property to the purchaser. For example, if a corporation which sells export property under the installment method is not a FSC for the taxable year in which the property is shipped to the purchaser, gross receipts from the sale do not constitute foreign trading gross receipts for any taxable year of the corporation.

(c) *Leases of export property*—(1) *In general.* Foreign trading gross receipts of a FSC include gross receipts from the lease of export property provided that—

(i) The property is held by the FSC (or by a principal for whom the FSC acts as commission agent with respect to the lease) either as an owner or lessee at the beginning of the term of the lease, and

(ii) The FSC qualified (or was treated) as a FSC for its taxable year in which the term of the lease began.

(2) *Prepayment of lease receipts.* If the gross receipts from a lease of export property are prepaid, then—

(i) All the prepaid gross receipts are foreign trading gross receipts of a FSC if it is reasonably expected at the time of the prepayment that, throughout the term of the lease, the lease will meet the requirements of this paragraph and the property will be export property; or

(ii) If it is reasonably expected at the time of the prepayment that the prepaid receipts would not be foreign trading gross receipts throughout the term of the lease if those receipts were not received as a prepayment, then only those prepaid receipts, for the taxable years of the FSC for which they would be foreign trading gross receipts, are foreign trading gross receipts. Thus, for example, if a lessee makes a prepayment of the first and last years' rent, and it is reasonably expected that the leased property will be export property for the first half of the lease period but not the second half of such period, the amount of the prepayment which represents the first year's rent will be considered foreign trading gross receipts if it would otherwise qualify, whereas the amount of the prepayment which represents the last year's rent will not be considered foreign trading gross receipts.

(d) *Related and subsidiary services*—(1) *In general.* Foreign trading gross receipts of a FSC include gross receipts from services furnished by the FSC which are related and subsidiary to any sale or lease (as described in paragraph (b) or (c) of this section) of export property by the FSC or with respect to which the FSC acts as a commission agent, provided that the FSC derives foreign trading gross receipts from the sale or lease. The services may be performed within or without the United States.

(2) *Services furnished by the FSC.* Services are considered to be furnished by a FSC for purposes of this paragraph if the services are provided by—

(i) The person who sold or leased the export property to which the services are related and subsidiary, provided that the FSC acts as a commission agent with respect to the sale or lease of the property and with respect to the services,

(ii) The FSC as principal, or any other person pursuant to a contract with the FSC, provided the FSC acted as principal or commission agent with respect to the sale or lease of the property, or

(iii) A member of the same controlled group as the FSC if the sale or lease of the export property is made by another member of the controlled group provided, however, that the FSC acts as principal or commission agent with respect to the sale or lease and as commission agent with respect to the services.

(3) *Related services.* Services which may be related to a sale or lease of export property include but are not limited to warranty service, maintenance service, repair service, and installation service. Transportation (including insurance related to such transportation) will be related to a sale or lease of export property, if the cost of the transportation is included in the sale price or rental of the property or, if the cost is separately stated, is paid by the FSC (or its principal) which sold or leased the property to the person furnishing

the transportation service. Financing or the obtaining of financing for a sale or lease is not a related service for purposes of this paragraph. A service is related to a sale or lease of export property if—

(i) The service is of the type customarily and usually furnished with the type of transaction in the trade or business in which the sale or lease arose, and

(ii) The contract to furnish the service—

(A) Is expressly provided for in or is provided for by implied warranty under the contract of sale or lease,

(B) Is entered into on or before the date which is 2 years after the date on which the contract under which the sale or lease was entered into, provided that the person described in paragraph (d)(2) of this section which is to furnish the service delivers to the purchaser or lessor a written offer or option to furnish the services on or before the date on which the first shipment of goods with respect to which the service is to be performed is delivered, or

(C) Is a renewal of the services contract described in subdivisions (ii)(A) and (B) of this paragraph.

(4) *Subsidiary services*—(i) *In general.* Services related to a sale or lease of export property are subsidiary to the sale or lease only if it is reasonably expected at the time of the sale or lease that the gross receipts from all related services furnished by the FSC (as defined in this paragraph (d)(2)) will not exceed 50 percent of the sum of the gross receipts from the sale or lease and the gross receipts from related services furnished by the FSC (as described in this paragraph (d)(2)). In the case of a sale, reasonable expectations at the time of the sale are based on the gross receipts from all related services which may reasonably be performed at any time before the end of the 10-year period following the date of the sale. In the case of a lease, reasonable expectations at the time of the lease are based on the gross receipts from all related services which may reasonably be performed at any time before the end of the term of the lease (determined without regard to renewal options).

(ii) *Allocation of gross receipts from services.* In determining whether the services related to a sale or lease of export property are subsidiary to the sale or lease, the gross receipts to be treated as derived from the furnishing of services may not be less than the amount of gross receipts reasonably allocated to the services as determined under the facts and circumstances of each case without regard to whether—

(A) The services are furnished under a separate contract or under the same contract pursuant to which the sale or lease occurs, or

(B) The cost of the services is specified in the contract of sale or lease.

(iii) *Transactions involving more than one item of export property.* If more than one item of export property is sold or leased in a single transaction pursuant to one contract, the total gross receipts from the transaction and the total gross receipts from all services related to the transaction are each taken into account in determining whether the services are subsidiary to the transaction. However, the provisions of this subdivision apply only if the items could be included in the same product line, as determined under §1.925(a)–1T(c)(8).

(iv) *Renewed service contracts.* If under the terms of a contract for related services, the contract is renewable within 10 years after a sale of export property, or during the term of a lease of export property, related services to be performed under the renewed contract are subsidiary to the sale or lease if it is reasonably expected at the time of the renewal that the gross receipts from all related services which have been and which are to be furnished by the FSC (as described in paragraph (d)(2) of this section) will not exceed 50 percent of the sum of the gross receipts from the sale or lease and the gross receipts from related services furnished by the FSC (as so described). Reasonable expectations are determined as provided in subdivision (i) of this paragraph.

(v) *Parts used in services.* If a services contract described in paragraph (d)(3) of this section provides for the furnishing of parts in connection with the furnishing of related services, gross receipts from the furnishing of the parts are not taken into account in determining whether under this paragraph (d)(4) the services are subsidiary. See paragraph (b) or (c) of this section to determine whether the gross receipts from the furnishing of parts constitute foreign trading gross receipts. See § 1.927(a)–1T (c)(2) and (e)(3) for rules regarding the treatment of the parts with respect to the manufacture of export property and the foreign content of the property, respectively.

(5) *Relation to leases.* If the gross receipts for services which are related and subsidiary to a lease of property have been prepaid at any time for all the services which are to be performed before the end of the term of the lease, then the rules in paragraph (c)(2) of this section (relating to prepayment of lease receipts) will determine whether prepaid services under this paragraph (d)(5) are foreign trading gross receipts. Thus, for example, if it is reasonably expected that leased property will be export property for the first year of the term of the lease but will not be export property for the second year of the term, prepaid gross receipts for related and subsidiary services to be furnished in the first year may be foreign trading gross receipts. However, any prepaid gross receipts for the services to be furnished in the second year cannot be foreign trading gross receipts.

(6) *Relation with export property determination.* The determination as to whether gross receipts from the sale or lease of export property constitute foreign trading gross receipts does not depend upon whether services connected with the sale or lease are related and subsidiary to the sale or lease. Thus, for example, assume that a FSC receives gross receipts of $1,000 from the sale of export property and gross receipts of $1,100 from installation and maintenance services which are to be furnished by the FSC within 10 years after the sale and which are related to the sale. The $1,100 which the FSC receives for the services would not be foreign trading gross receipts since the gross receipts from the services exceed 50 percent of the sum of the gross receipts from the sale and the gross receipts from the related services furnished by the FSC. The $1,000 which the FSC receives from the sale of export property would, however, be foreign trading gross receipts if the sale met the requirements of paragraph (b) of this section.

(e) *Engineering and architectural services*—(1) *In general.* Foreign trading gross receipts of a FSC include gross receipts from engineering services (as described in paragraph (e)(5) of this section) or architectural services (as described in paragraph (e)(6) of this section) furnished by such FSC (as described in paragraph (e)(7) of this section) for a construction project (as defined in paragraph (e)(8) of this section) located, or proposed for location, outside the United States. Such services may be performed within or without the United States.

(2) *Services included.* Engineering and architectural services include feasibility studies for a proposed construction project whether or not such project is ultimately initiated.

(3) *Excluded services.* Engineering and architectural services do not include—

(i) Services connected with the exploration for oil or gas, or

(ii) Technical assistance or know-how. For purposes of this paragraph, the term ‘‘technical assistance or know-how’’ includes activities or programs designed to enable business, commerce, industrial establishments, and governmental organizations to acquire or use scientific, architectural, or engineering information.

(4) *Other services.* Receipts from the performance of construction activities other than engineering and architectural services constitute foreign trading gross receipts to the extent that the activities are related and subsidiary services (within the meaning of paragraph (d) of this section) with respect to a sale or lease of export property.

(5) *Engineering services.* For purposes of this paragraph, engineering services in connection with any construction project (within the meaning of paragraph (e)(8) of this section) include any professional services requiring engineering education, training, and experience and the application of special knowledge of the mathematical, physical, or engineering sciences to those professional services as consultation, investigation, evaluation, planning, design, or responsible supervision of construction for the purpose of assuring

compliance with plans, specifications, and design.

(6) *Architectural services.* For purposes of this paragraph, architectural services include the offering or furnishing of any professional services such as consultation, planning, aesthetic and structural design, drawings and specifications, or responsible supervision of construction (for the purpose of assuring compliance with plans, specifications, and design) or erection, in connection with any construction project (within the meaning of paragraph (e)(8) of this section).

(7) *Definition of ''furnished by the FSC''.* For purposes of this paragraph, the term ''furnished by the FSC'' means architectural and engineering services furnished:

(i) By the FSC,

(ii) By another person (whether or not that person is a United States person) pursuant to a contract entered into with the FSC at any time prior to the furnishing of the services, provided that the FSC acts as principal, or

(iii) By another person (whether or not that person is a United States person) pursuant to a contract for the furnishing of the services entered into by, or assigned to, the person at any time, provided that the FSC acts as a commission agent for the furnishing of the services.

(8) *Definition of ''construction project''.* For purposes of this paragraph, the term ''construction project'' includes the erection, expansion, or repair (but not including minor remodeling or minor repairs) of new or existing buildings or other physical facilities including, for example, roads, dams, canals, bridges, tunnels, railroad tracks, and pipelines. The term also includes site grading and improvement and installation of equipment necessary for the construction. Gross receipts from the sale or lease of construction equipment are not foreign trading gross receipts unless the equipment is export property.

(f) *Managerial services*—(1) *In general.* Foreign trading gross receipts of a first FSC for its taxable year include gross receipts from the furnishing of managerial services provided for an unrelated FSC or unrelated interest charge DISC to aid the unrelated FSC or unrelated interest charge DISC in deriving foreign trading gross receipts or qualified export receipts, as the case may be, provided that at least 50 percent of the first FSC's gross receipts for such year consists of foreign trading gross receipts derived from the sale or lease of export property and the furnishing of related and subsidiary services. For purposes of this paragraph, managerial services are considered furnished by a FSC if the services are provided—

(i) By the first FSC,

(ii) By another person (whether or not a United States person) pursuant to a contract entered into by that person with the first FSC at any time prior to the furnishing of the services, provided that the first FSC acts as principal with respect to the furnishing of the services, or

(iii) By another person (whether or not a United States person) pursuant to a contract for the furnishing of services entered into at any time prior to the furnishing of the services provided that the first FSC acts as commission agent with respect to those services.

(2) *Definition of ''managerial services''.* The term ''managerial services'' as used in this paragraph means activities relating to the operation of an unrelated FSC or an unrelated interest charge DISC which derives foreign trading gross receipts or qualified export receipts as the case may be from the sale or lease of export property and from the furnishing of services related and subsidiary to those sales or leases. The term includes staffing and operational services necessary to operate the unrelated FSC or unrelated interest charge DISC, but does not include legal, accounting, scientific, or technical services. Examples of managerial services are: conducting export market studies, making shipping arrangements, and contacting potential foreign purchasers.

(3) *Status of recipient of managerial services.* Foreign trading gross receipts of a first FSC include receipts from the furnishing of managerial services during any taxable year of a recipient of such services if the recipient qualifies as a FSC or interest charge DISC for the taxable year. For purposes of this paragraph, a recipient is deemed to qualify as a FSC or interest charge

DISC for its taxable year if the first FSC obtains from the recipient a copy of the recipient's election to be treated as a FSC or interest charge DISC together with the recipient's sworn statement that an election has been timely filed with the Internal Revenue Service Center. The recipient may mark out the names of its shareholders on a copy of its election to be treated as a FSC or interest charge DISC before submitting it to the first FSC. The copy of the election and the sworn statement of the recipient must be received by the first FSC within six months after the first FSC furnishes managerial services for the recipient. The copy of the election and the sworn statement of the recipient need not be obtained by the first FSC for subsequent taxable years of the recipient. A recipient of managerial services is not treated as a FSC or interest charge DISC with respect to the services performed during a taxable year for which the recipient does not qualify as a FSC or interest charge DISC if the first FSC performing such services does not believe or if a reasonable person would not believe (taking into account the furnishing FSC's managerial relationship with such recipient FSC or interest charge DISC) at the beginning of such taxable year that the recipient will qualify as a FSC or an interest charge DISC for such taxable year.

(g) *Excluded receipts*—(1) *In general.* Notwithstanding the provisions of paragraphs (b) through (f) of this section, foreign trading gross receipts of a FSC do not include any of the six amounts described in paragraphs (g)(2) through (7) of this section.

(2) *Sales and leases of property for ultimate use in the United States.* Property which is sold or leased for ultimate use in the United States does not constitute export property. See § 1.927(a)–1T(d)(4) relating to determination of where the ultimate use of the property occurs. Thus, foreign trading gross receipts of a FSC described in paragraph (b) or (c) of this section do not include gross receipts of the FSC from the sale or lease of this property.

(3) *Sales or leases of export property and furnishing of services accomplished by subsidy.* Foreign trading gross receipts of a FSC do not include gross receipts described in paragraphs (b) through (f) of this section if the sale or lease of export property or the furnishing of services is accomplished by a subsidy granted by the United States or any instrumentality thereof, see section 924(f)(1)(B). Subsidies covered by section 924(f)(1)(B) are listed in subdivisions (i) through (vi) of this paragraph.

(i) The development loan program, or grants under the technical cooperation and development grants program of the Agency for International Development, or grants under the military assistance program administered by the Department of Defense, pursuant to the Foreign Assistance Act of 1961, as amended (22 U.S.C. 2151) unless the FSC shows to the satisfaction of the Commissioner that, under the conditions existing at the time of the sale (or at the time of lease or at the time the services were rendered), the purchaser (or lessor or recipient of the services) had a reasonable opportunity to purchase (or lease or contract for services) on competitive terms and from a seller (or lessor or performer of services) who was not a U.S. person, goods (or services) which were substantially identical to such property (or services) and which were not manufactured, produced, grown, or extracted in the United States (or performed by a U.S. person);

(ii) The Public Law 480 program authorized under Title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1691, 1701–1714);

(iii) The Export Payment program of the Commodity Credit Corporation authorized by sections 5 (d) and (f) of the Commodity Credit Corporation Charter Act, as amended (15 U.S.C. 714c (d) and (f));

(iv) The section 32 export payment programs authorized by section 32 of the Act of August 24, 1935, as amended (7 U.S.C. 612c);

(v) The Export Sales program of Commodity Credit Corporation authorized by sections 5 (d) and (f) of the Commodity Credit Corporation Charter Act, as amended (15 U.S.C. 714c (d) and (f)), other than the GSM–4 program provided under 7 CFR part 1488, and section 407 of the Agricultural Act of 1949, as amended (7 U.S.C. 1427), for the purpose of disposing of surplus agricultural commodities and exporting or causing to be exported agricultural commodities; and

(vi) The Foreign Military Sales direct credit program (22 U.S.C. 2763) or the Foreign Military Sales loan guaranty program (22 U.S.C. 2764) if—

(A) The borrowing country is released from its contractual liability to repay the United States government with respect to those credits or guaranteed loans;

(B) The repayment period exceeds twelve years; or

(C) The interest rate charged is less than the market rate of interest as defined in 22 U.S.C. 2763(c)(2)(B);

unless the FSC shows to the satisfaction of the Commissioner that, under the conditions existing at the time of the sale, the purchaser had a reasonable opportunity to purchase, on competitive terms from a seller who was not a U.S. person, goods which were substantially identical to this property and which were not manufactured, produced, grown, or extracted in the United States. Information regarding whether an export is financed, in whole or in part, with funds derived from the programs identified in this subdivision may be obtained from the Comptroller, Defense Security Assistance Agency, Department of Defense, Washington, DC 20301.

(4) *Sales or leases of export property and furnishing of architectural or engineering services for use by the United States*—(i) *In general.* Foreign trading gross receipts of a FSC do not include gross receipts described in paragraph (b), (c), or (e) of this section if a sale or lease of export property, or the furnishing of architectural or engineering services, is for use by the United States or an instrumentality thereof in any case in which any law or regulation requires in any manner the purchase or lease of property manufactured, produced, grown, or extracted in the United States or requires the use of architectural or engineering services performed by a United States person. See section 924(f)(1)(A)(ii). For example, a sale by a FSC of export property to the Department of Defense for use outside the United States would not produce foreign trading gross receipts for the FSC if the Department of Defense purchased the property from appropriated funds subject to either any provision of the Department of Defense Federal Acquisition Regulations Supplement (48 CFR chapter 2) or any appropriations act for the Department of Defense for the applicable year if the regulations or appropriations act requires that the items purchased must have been grown, reprocessed, reused, or produced in the United States. The Department of Defense's regulations do not require that items purchased by the Department for resale in post or base exchanges and commissary stores located on United States military installations in foreign countries be items grown, reprocessed, reused or produced in the United States. Therefore, receipts arising from the sale by a FSC to those post or base exchanges and commissary stores will not be excluded from the definition of foreign trading gross receipts by this paragraph (g)(4).

(ii) *Direct or indirect sales or leases.* Any sale or lease of export property is for use by the United States or an instrumentality thereof if such property is sold or leased by a FSC (or by a principal for whom the FSC acts as commission agent) to—

(A) A person who is a related person with respect to the FSC or such principal and who sells or leases the property for use by the United States or an instrumentality thereof, or

(B) A person who is not a related person with respect to the FSC or such principal if, at the time of the sale or lease, there is an agreement or understanding that the property will be sold or leased for use by the United States or an instrumentality thereof (or if a reasonable person would have known at the time of the sale or lease that the property would be sold or leased for use by the United States or an instrumentality thereof) within 3 years after the sale or lease.

(iii) *Excluded programs.* The provisions of subdivisions (4)(i) and (ii) of this paragraph do not apply in the case of a purchase by the United States or an instrumentality thereof if the purchase is pursuant to—

(A) The Foreign Military Sales Act, as amended (22 U.S.C. 2751 *et seq.*), or a program under which the United States government purchases property for resale, on commercial terms, to a foreign government or agency or instrumentality thereof, or

(B) A program (whether bilateral or multilateral) under which sales to the United States government are open to international competitive bidding.

(5) *Services.* Foreign trading gross receipts of a FSC do not include gross receipts described in paragraph (d) of this section (concerning related and subsidiary services) if the services from which such gross receipts are derived are related and subsidiary to the sale or lease of property which results in excluded receipts under this paragraph.

(6) *Receipts within controlled group.* (i) For purposes of the transfer pricing methods of section 925(a), gross receipts of a corporation do not constitute foreign trading gross receipts for any taxable year of the corporation if at the time of the sale, lease, or other transaction resulting in the gross receipts, the corporation and the person from whom the gross receipts are directly or indirectly derived (whether or not such corporation and such person are the same person) are members of the same controlled group, and either

(A) The corporation and the person each qualifies as a FSC (or if related FSCs are commission agents of each party to the transaction) for its taxable year in which its receipts arise, or

(B) With regard to sale transactions, a sale of export property to a FSC (or to a related person if the FSC is the commission agent of the related person) by a non-FSC within the same controlled group follows any sale of the export property to a FSC (or to a related person if the FSC is the commission agent of the related person) within the same controlled group if foreign trading gross receipts resulted from the sale. Thus for example, assume that R, S, X, and Y are members of the same controlled group and that X and Y are FSCs. If R sells property to S and pays X a commission relating to that sale and if S sells the same property to an unrelated foreign party and pays Y a commission relating to that sale, the receipts received by X from the sale of such property by R to S will be considered to be derived from Y, a FSC which is a member of the same controlled group as X, and thus will not result in foreign trading gross receipts to X. The receipts received by Y from the sale to an unrelated foreign party may, however, result in foreign trading gross receipts to Y. For another example, if R and S both assign the commissions to X, receipts derived from the sale from R to S will be considered to be derived from X acting as commission agent for S and will not result in foreign trading gross receipts to X. Receipts derived by X from the sale of property by S to an unrelated foreign party may, however, constitute foreign trading gross receipts.

(ii) Section 1.927(a)–1T(f)(2) provides rules regarding property not constituting export property in certain cases where such property is leased to any corporation which is a member of the same controlled group as the lessor.

(7) *Factoring of receivables by a related supplier.* If an account receivable arising with respect to export property is transferred to any person for an amount reflecting a discount from the selling price of the export property, then the gross receipts from the sale which are treated as foreign trading gross receipts for purposes of computing a FSC's profit under the administrative pricing methods of section 925(a)(1) and (2) shall be reduced by the amount of the discount. See § 1.925(a)–1T(f) *Example 11* for illustration of how this special rule affects computation of combined taxable income of a FSC and its related supplier.

(h) *Definition of ''controlled group''.* For purposes of sections 921 through 927 and the regulations under those sections, the term ''controlled group'' has the same meaning as is assigned to the term ''controlled group of corporations'' by section 1563(a), except that (1) the phrase ''more than 50 percent'' is substituted for the phrase ''at least 80 percent'' each place the latter phrase appears in section 1563(a), and (2) section 1563(b) shall not apply. Thus, for example, a foreign corporation subject to tax under section 882 may be a member of a controlled group. Furthermore, two or more corporations (including a foreign corporation) are members of a controlled group at any time such corporations meet the requirements of section 1563(a) (as modified by this paragraph).

(i) *FSC's entitlement to income*—(1) *Application of administrative pricing rules of section 925(a).* A corporation which meets the requirements of section 922(a) (or section 922(b) if the corporation elects small FSC status) and §1.921–2(a) (Q&A1) to be treated as a FSC (or small FSC) for a taxable year is entitled to income, and the administrative pricing rules of section 925(a)(1) or (2) apply, in the case of any transaction described in §1.925(a)–1T(b)(iii) between the FSC and its related supplier (as defined in §1.927(d)–2T(a)) as long as the FSC, or someone under contract to it, satisfies the requirements of section 925(c). The requirements of section 925(c) must be met by a commission FSC as well as by a buy-sell FSC. See §1.925 (a)–1T(a)(3)(i) and (b)(2)(ii).

(2) *Other transactions.* In the case of a transaction to which the provisions of paragraph (i)(1) of this section do not apply but from which a FSC derives gross receipts, the income to which the FSC is entitled as a result of the transaction is determined pursuant to the terms of the contract for the transaction and, if applicable, section 482 and the regulations under that section. For applicability of the section 482 transfer pricing method, see §1.925(a)–1T (a)(3)(ii) and (b)(2)(i).

(j) *Small FSC limitation*—(1) *In general.* Under section 924(b)(2)(B), in determining exempt foreign trade income of a small FSC, the foreign trading gross receipts of the small FSC for the taxable year which exceed $5 million are not taken into account. The foreign trading gross receipts of the small FSC not taken into account for purposes of computing the small FSC's exempt foreign trade income shall be taken into account in computing the small FSC's non-exempt foreign trade income. If the foreign trading gross receipts of the small FSC exceed the $5 million limitation, the small FSC may select the gross receipts to which the limitation is allocated. See section 922(b) and §1.921–2(b) (Q&A3) for a definition of a small FSC.

(2) *Members of a controlled group limited to one $5 million amount*—(i) *General rule.* All small FSCs which are members of a controlled group on a December 31, shall, for their taxable years which include that December 31, be limited to one $5 million amount. The $5 million amount shall be allocated equally among the member small FSCs of the controlled group for their taxable years including that December 31, unless all of the member small FSCs consent to an apportionment plan providing for an unequal allocation of the $5 million amount. The apportionment plan shall provide for the apportionment of a fixed dollar amount to one or more of the corporations, and the sum of the amounts so apportioned shall not exceed the $5 million amount. If the taxable year including the December 31 of any member small FSC is a short period (as defined in section 443), the portion of the $5 million amount allocated to that member small FSC for that short period under the preceding sentence shall be reduced to the amount which bears the same ratio to the amount so allocated as the number of days in such short period bears to 365. The consent of each member small FSC to the apportionment plan for the taxable year shall be signified by a statement which satisfies the requirements of and is filed in the manner specified in §1.1561–3(b). An apportionment plan may be amended in the manner prescribed in §1.1561–3(c), except that an original or an amended plan may not be adopted with respect to a particular December 31 if at the time the original or amended plan is sought to be adopted, less than 12 full months remain in the statutory period (including extensions) for the assessment of a deficiency against any shareholder of a member small FSC the tax liability of which would change by the adoption of the original or amended plan. If less than 12 full months of the period remain with respect to any such shareholder, the director of the service center with which the shareholder files its income tax return will, upon request, enter into an agreement extending the statutory period for the limited purpose of assessing any deficiency against that shareholder attributable to the adoption of the original or amended apportionment plan.

(ii) *Membership determined under section 1563(b).* For purposes of this paragraph (j)(2), the determination of whether a small FSC is a member of a controlled group of corporations with respect to any taxable year shall be made in the manner prescribed in section 1563(b) and the regulations under that section.

(iii) *Certain short taxable years*—(A) *General rule.* If a small FSC has a short period (as defined in section 443) which does not include a December 31, and that small FSC is a member of a controlled group of corporations which includes one or more other small FSC's with respect to the short period, then the amount described in section 924(b)(2)(B) with respect to the short period of that small FSC shall be determined by—

(*1*) Dividing $5 million by the number of small FSCs which are members of that group on the last day of the short period, and

(*2*) Multiplying the result by a fraction, the numerator of which is the number of days in the short period and the denominator of which is 365.

For purposes of the preceding sentence, section 1563(b) shall be applied as if the last day of the short period were substituted for December 31. Except as provided in subdivision (2)(iii)(B) of this paragraph, the small FSC having a short period not including a December 31 may not enter into an apportionment plan with respect to the short period.

(B) *Exception.* If the short period not including a December 31 of two or more small FSCs begins on the same date and ends on the same date and those small FSCs are members of the same controlled group, those small FSCs may enter into an apportionment plan for such short period in the manner provided in subdivision (2)(i) of this paragraph with respect to the combined amount allowed to each of those small FSCs under subdivision (2)(iii)(A) of this paragraph.

[T.D. 8126, 52 FR 6438, Mar. 3, 1987]

§ 1.924(c)–1 Requirement that a FSC be managed outside the United States.

(a) *In general.* Section 924(b)(1)(A) provides that a FSC shall be treated as having foreign trading gross receipts for the taxable year only if the management of the FSC during the year takes place outside the United States, as provided in section 924(c). Section 924(c) and this section set forth the management activities that must take place outside the United States in order to satisfy the requirement of section 924(b)(1)(A). Paragraph (b) of this section provides rules for determining whether the requirements of section 924(c)(1) have been met. Section 924(c)(1) requires that all meetings of the board of directors of the FSC during the taxable year and all meetings of the shareholders of the FSC during the taxable year take place outside the United States. Paragraph (c) of this section provides rules for maintaining the FSC's principal bank account outside the United States as provided in section 924(c)(2). Paragraph (d) of this section provides rules for disbursements required by section 924(c)(3) to be made from bank accounts of the FSC maintained outside the United States.

(b) *Meetings of board of directors and meetings of shareholders must be outside the United States.* All meetings of the board of directors of the FSC and all meetings of the shareholders of the FSC that take place during a taxable year must take place outside the United States to meet the requirements of section 924(c)(1). Only meetings that are formally convened as meetings of the board of directors or as shareholder meetings will be taken into account in determining whether those requirements have been met. In addition, all such meetings must comply with the local laws of the foreign country or possession of the United States in which the FSC was created or organized. The local laws determine whether a meeting must be held, when and where it must be held (if it is held at all), who must be present, quorum requirements, use of proxies, and so on. Where the local law permits action by the board of directors or shareholders to be taken by written consent without a meeting, use of such procedure will not constitute a meeting for purposes of section 924(c)(1). Section 924(c)(1) and this section impose no other requirements except the requirement that meetings that are actually held take place outside the United States. If the participants in a meeting are not all physically present in the same location, the location of the meeting is determined by the location of the persons exercising a majority of the voting power (including proxies) participating in the meeting. For example, a FSC has five directors, and is organized in country A. Country A's law requires that a majority of the directors of a corporation must participate in a meeting to constitute a quorum (and, thus, a meeting), but there is no requirement that the meeting be held in country A or that the directors must be physically present to participate. One director is in country A, another director is in country B, and a third director is in the United States.

These three directors convene a meeting by telephone that constitutes a meeting under the law of country A. The meeting occurs outside the United States because the persons exercising a majority of the voting power participating in the meeting are located outside the United States.

(c) *Maintenance of the principal bank account outside the United States*—(1) *In general.* For purposes of section 924(c), the bank account that shall be regarded as the principal bank account of a FSC is the bank account from which the disbursements described in paragraph (d) of this section are made. A FSC may have more than one principal bank account. The bank account that is regarded as the principal bank account must be maintained in a foreign country which meets the requirements of section 927(e)(3), or in any possession of the United States (as defined in section 927(d)(5)), and it must be so maintained at all times during the taxable year. For taxable years beginning on or after February 19, 1987, a principal bank account or accounts must be designated on the annual return of the FSC by providing the bank name(s) and account number(s).

(2) *Maintenance of the account in a bank.* The bank account that is regarded as the principal bank account must be maintained in an institution that is engaged in the conduct of a banking, financing, or similar business, as defined in §1.954–2(d)(2)(ii) (without regard to whether it is a controlled foreign corporation). The institution may be a U.S. bank, provided that the account is maintained in a branch outside the United States.

(3) *Maintenance of an account outside the United States.* Maintenance of the principal bank account outside the United States means that the account regarded as the principal bank account must be an account maintained on the books of the banking institution at an office outside the United States, but does not require that access to the account may be made only outside the United States. Instructions providing for deposits into or disbursements from the account may originate in the United States without affecting the status of maintenance of the account outside the United States.

(4) *Maintenance of the account at all times during the taxable year.* The term ''at all times during the taxable year'' generally means for each day of the taxable year. In the case of a newly created or organized corporation, thirty days may elapse between the effective date of the corporation's election to be treated as a FSC and the date a bank account is opened without causing the FSC to fail the requirement that it maintain its principal bank account outside the United States at all times during the taxable year. For example, if a corporation is created or organized prior to January 1, 1985, and makes an election to be treated as a FSC within the first 90 days of 1985, the election is effective as of January 1, 1985. Thus, the FSC must open a bank account within 30 days of January 1, or as of January 31, 1985, to satisfy this requirement. Also, a FSC shall be treated as satisfying this requirement if the account that is regarded as its principal bank account is terminated during the taxable year, provided that (i) such termination is the result of circumstances beyond the FSC's control, and (ii) the FSC establishes a new principal bank account within thirty days after such termination. A FSC may close its principal bank account and replace it with another account that qualifies under this paragraph (c) as a principal bank account at any time provided that no lapse of time occurs between the closing of the principal

bank account and the opening of the replacement account.

(5) *Other accounts.* The FSC may maintain other bank accounts in addition to its principal bank account. Such other accounts may be located anywhere, without limitation. The mere existence of such other accounts will not cause the FSC to fail to satisfy the requirements of section 924(c).

(d) *Disbursement of dividends, legal and accounting fees, and salaries of officers and directors out of the principal bank account of the FSC*—(1) *In general.* All dividends, legal fees, accounting fees, salaries of officers of the FSC, and salaries or fees paid to members of the board of directors of the FSC that are disbursed during the taxable year must be disbursed out of bank account(s) of the FSC maintained outside the United States. Such an account is treated as the principal bank account of the FSC for purposes of section 924(c). Dividends, however, may be netted against amounts owed to the FSC (*e.g.*, commissions) by a related supplier through book entries. If the FSC regularly disburses its legal or accounting fees, salaries of officers, and salaries or fees of directors out of its principal bank account, the occasional, inadvertent payment by mistake of fact or law of such amounts out of another bank account will not be considered a disbursement by the FSC if, upon determination that such payment was made from another account, reimbursement to such other account is made from the principal bank account of the FSC within a reasonable period from the date of the determination. Disbursement out of the principal bank account of the FSC may be made by transferring funds from the principal bank account to a U.S. account of the FSC provided that (i) the payment of the dividends, salaries or fees to the recipients is made within 12 months of the transfer, (ii) the purpose of the expenditures is designated and, (iii) the payment of the dividends, salaries or fees is actually made out of the same U.S. account that received the disbursement from the principal bank account.

(2) *Reimbursement.* Legal or accounting fees, salaries of officers, and salaries or fees of directors that are paid by a related person wholly or partially on behalf of a FSC must be reimbursed by the FSC. The amounts paid by the related person are not considered disbursed by the FSC until the related person is reimbursed by the FSC. The related person must be reimbursed no later than the last date prescribed for filing the FSC's tax return (including extensions) for the taxable year to which the reimbursement relates. Any reimbursement for amounts paid on behalf of the FSC must be disbursed out of the FSC's principal bank account (and not netted against any obligation owed by the related person to the FSC), as set forth in paragraph (c) of this section. To determine the amounts paid on behalf of the FSC, the FSC may rely upon a written statement or invoice furnished to it by the related person which shows the following:

(i) The actual fees charged for performing the legal or accounting services for the FSC or, if such fees cannot be ascertained by the related person, a good faith estimate thereof, and the actual salaries or fees paid for services as officers and directors of the FSC, and

(ii) The person who performed or provided the services.

(3) *Good faith exception.* If, after the FSC has filed its tax return, a determination is made by the Commissioner that all or a part of the legal or accounting fees, salaries of officers, and salaries or fees of directors of the FSC were paid by a related person without receiving reimbursement, the FSC may, nonetheless, satisfy the requirements of section 924(c)(3) if the fees and salaries were paid by the related person in good faith, and the FSC reimburses the related person for the fees and salaries paid within 90 days after the determination. The reimbursement shall be treated as made as of the end of the taxable year of the FSC for which the reimbursement is made.

(4) *Dividends*—(i) *Definition.* For purposes of section 924(c) and this section only, the term ‘‘dividends’’ refers solely to cash dividends (including a dividend paid in a foreign functional currency) actually paid pursuant to a declaration or authorization by the FSC. Accordingly, a ‘‘dividend’’ will not include a constructive dividend that is deemed to be paid (regardless of the source of such constructive dividend)

or a distribution of property that is a dividend under section 316 other than a distribution of U.S. dollars or a foreign functional currency.

(ii) *Offset accounting entries.* Payment of dividends by the FSC to its related supplier may be in the form of an accounting entry offsetting an amount payable to the related supplier for the dividend against an existing debt owed to the FSC. The offset accounting entries must be clearly identified in the books of account of both the related supplier and the FSC.

(5) *Legal and accounting fees.* For purposes of this section, legal and accounting fees do not include salaries paid to legal and accounting employees of the FSC (or a related person). Legal and accounting fees are limited to fees paid to independent persons performing legal or accounting services for or with respect to the FSC.

(6) *Salaries of officers and directors.* For purposes of this section, salaries of officers and salaries or fees of directors are only those salaries or fees paid for services as officers or directors of the FSC. Salaries do not include reimbursed travel and entertainment expenses. If an individual officer, director, or employee of a related person is also an officer or director of a FSC and receives additional compensation for services performed for the FSC, the portion of the compensation paid to the individual which is for services performed for the FSC is required to be disbursed out of the FSC's principal bank account. For purposes of this section, the term ''compensation'' is defined as set forth in paragraphs (d)(1) and (2) of §1.415–2.

[T.D. 8125, 52 FR 5089, Feb. 19, 1987]

§1.924(d)–1 Requirement that economic processes take place outside the United States.

(a) *In general.* Section 924(b)(1)(B) provides that a FSC has foreign trading gross receipts from any transaction only if economic processes with respect to such transaction take place outside the United States as provided in section 924(d). Section 924(d) and this section set forth the rules for determining whether a sufficient amount of the economic processes of a transaction take place outside the United States. Generally, a transaction will qualify if the FSC satisfies two different requirements: Participation outside the United States in the sales portion of the transaction, and satisfaction of either the 50-percent or the 85-percent foreign direct cost test. The activities comprising these economic processes may be performed by the FSC or by any other person acting under contract with the FSC. (All references to ''FSC'' in §§1.924(d)–1 and 1.924(e)–1 shall mean the FSC or, if applicable, the person performing the relevant activity under contract on behalf of the FSC.) The FSC may act upon standing instructions from another person in the performance of any activity, whether a sales activity under paragraph (c) of this section or an activity relating to the disposition of export property under paragraph (d) of this section and §1.924(e)–1. The identity of the FSC as a separate entity is not required to be disclosed in the performance of any of the activities comprising the economic processes. Except as otherwise provided, the location of any activity is determined by the place where the activity is initiated by the FSC, and not by the location of any person transmitting instructions to the FSC.

(b) *Activities performed by another person*—(1) *In general.* Any person, whether domestic or foreign, and whether related or unrelated to the FSC, may perform any activity required to satisfy this section, provided that the activity is performed pursuant to a contract for the performance of that activity on behalf of the FSC. Such a contract may be any oral or written agreement which constitutes a contract at law. The person performing the activity is not required to enter into a contract directly with the FSC and, thus, may be a direct or indirect subcontractor of a person under contract with the FSC. For example, assume that a buy-sell FSC enters into an agreement with its related supplier in which the related supplier agrees to perform on behalf of the FSC all sales activities with respect to the FSC's transactions with its foreign customers. Through its existing agreements with a domestic unrelated person, the related supplier subcontracts the performance of these activities to the domestic unrelated person, who, in turn, subcontracts the performance of the sales activities to foreign sales agents. The sales activities performed by the foreign sales agents are considered to be performed on behalf of the FSC for purposes of meeting the requirements of section 924(d)(1)(A).

(2) *Proof of compliance.* If the FSC does not perform the activity itself, it must maintain records adequate to establish, with respect to each transaction or group of transactions, that the activity was performed and that the performance of such activity took place outside the United States. If the person who performed the activity on behalf of the FSC is an independent contractor, the FSC may rely upon a written declaration from that person stating that the activities were performed by that person on behalf of the FSC, and were performed outside the United States. An invoice or a receipt for payment will be considered to be such a written declaration if it specifies that the activities were performed outside the United States or specifies a particular place outside the United States where the activities were performed. If the person performing the activities on behalf of the FSC is a related person, the FSC must maintain records adequate to establish that the activities were actually performed and where the activities were performed. Such records may be stored with the related person provided that the FSC makes such records available to the Commissioner upon request.

(c) *Participation outside the United States in the sales portion of the transaction*—(1) *In general.* The requirement of section 924(d)(1)(A) is met with respect to the gross receipts of a FSC derived from any transaction if the FSC has participated outside the United States in the solicitation, the negotiation, or the making of the contract relating to such transaction (hereinafter described as ‘‘sales activities’’), as provided in this paragraph (c). A sale need not occur in order that the solicitation or negotiation tests be satisfied. Once the FSC has participated outside the United States in an activity that constitutes the solicitation, negotiation, or the making of the contract with respect to a transaction, any prior or subsequent activity by the FSC with respect to such transaction that would otherwise constitute the sales activity will be disregarded for purposes of determining whether the FSC has met the requirements of section 924(d)(1)(A). For example, if a FSC sells a product to a foreign customer by first meeting with the customer in New York to discuss the product and then by mailing to it from outside the United States a brochure describing the product, the prior meeting is disregarded and only the mailing is considered in determining whether there was solicitation outside the United States by the FSC with respect to the transaction which has occurred.

(2) *Solicitation (other than advertising).* For purposes of this paragraph (c), ‘‘solicitation’’ refers to any communication (by any method, including, but not limited to, telephone, telegraph, mail, or in person) by the FSC, at any time during the 12 month period (measured from the date the communication is mailed or transmitted) immediately preceding the execution of a contract relating to the transaction to a specific, targeted customer or potential customer, that specifically addresses the customer’s attention to the product or service which is the subject of the transaction. For purposes of paragraph (c)(2) of this section, communication by mail means depositing the communication in a mailbox. Except as provided in § 1.924(e)–1(a)(1) with respect to second mailings, activities that would otherwise constitute advertising (such as sending sales literature to a customer or potential customer) will be considered solicitation if the activities are directed at a specific, targeted customer or potential customer, and the costs of the activity are not taken into account as advertising under the foreign direct cost tests. Activities that would otherwise constitute sales promotion (such as a promotional meeting in person with a customer) will be considered to be solicitation if the activities are directed at a specific, targeted customer or potential customer, and the costs of the activity are not taken into account as sales promotion under the foreign direct cost tests. Except as provided in § 1.924(e)–1(a)(1) with respect to second

mailings, the same or similar activities cannot be considered both solicitation and advertising, or both solicitation and sales promotion, with respect to the same customer. Solicitation, however, may take place at the same time as, and in conjunction with, another sales activity. Additionally, it may take place with respect to any person, whether domestic or foreign, and whether or not related to the FSC.

(3) *Negotiation.* For purposes of this paragraph (c), ''negotiation'' refers to any communication by the FSC to a customer or potential customer aimed at an agreement on one or more of the terms of a transaction, including, but not limited to, price, credit terms, quantity, or time or manner of delivery. For purposes of this paragraph (c)(3), communication by mail has the same meaning as provided in paragraph (c)(2) of this section. Negotiation does not include the mere receipt of a communication from a customer (such as an order) that includes terms of a sale. Negotiation may take place at the same time as, and in conjunction with, another sales activity. Additionally, it may take place with respect to any person, whether domestic or foreign, and whether or not related to the FSC.

(4) *Making of a contract.* For purposes of this paragraph (c), ''making of a contract'' refers to performance by the FSC of any of the elements necessary to complete a sale, such as making an offer or accepting an offer. A requirements contract is considered an open offer to be accepted from time to time when the customer submits an order for a specified quantity. Thus, the acceptance of such an order will be considered the making of a contract. The written confirmation by the FSC to the customer of the acceptance of the open order will also be considered the making of a contract. Acceptance of an unsolicited bid or order is considered the ''making of a contract'' even if no solicitation or negotiation occurred with respect to the transaction. The written confirmation by the FSC to the customer of an oral or written agreement which confirms variable contract terms, such as price, credit terms, quantity, or time or manner of delivery, or specifies (directly or by cross-reference) additional contract terms will be considered the making of a contract. A written confirmation is any confirmation expressed in writing, including a telegram, telex, or other similar written communication. The making of a contract may take place at the same time as, and in conjunction with, another sales activity. Additionally, it may take place with respect to any person, whether domestic or foreign, and whether or not related to the FSC.

(5) *Grouping transactions.* Generally, the sales activities under this paragraph (c) are to be applied on a transaction-by-transaction basis. By annual election of the FSC, however, any of the sales activities may be applied on the basis of a group as set forth in this paragraph (c)(5). Any groupings used must be supported by adequate documentation of performance of activities relating to the groupings used. An election by the FSC to group transactions must be made on its annual income tax return. The FSC, however, may amend its tax return to group in a manner different from that elected on its original return before the expiration of the statute of limitations.

(i) *Standards of groups.* A determination by a FSC as to a grouping will be accepted by a district director if such determination conforms to any of the following standards:

(A) *Product or product line groupings.* A product or product line grouping may be based upon either a recognized trade or industry usage, or upon a two digit major group (or on any inferior classification or combination of inferior classifications within a major group) of the Standard lndustrial Classification as prepared by the Statistical Policy Division of the Office of Management and Budget, Executive Office of the President. For taxable years beginning on or before February 19, 1987, any sales activity that is performed outside the United States with respect to any transaction covered by the product or product line grouping during the FSC's taxable year shall apply to all transactions covered by the product or product line. However, for taxable years beginning after February 19, 1987, the requirement of section 924(d)(1)(A) is met with respect to all transactions covered by the product or product line grouping only if the sales activities are performed outside the United States with respect to customers with sales representing either:

(i) 20 percent or more of the foreign trading gross receipts of the product or product line grouping during the current year or

(ii) 50 percent or more of the foreign trading gross receipts of the product or product line grouping for the prior year irrespective of whether any sales occurred within the current year to the prior year customers.

If during the prior taxable year, the controlled group of which the FSC is a member had a DISC or interest charge DISC, the FSC may use the 50 percent rule with respect to the preceding DISC or interest charge DISC year, substituting qualified export receipts for foreign trading gross receipts. A corporation which has not been treated in the prior year as a FSC, interest charge DISC, or DISC does not have to meet either the 20 percent test or the 50 percent test for the first year in which it is treated as a FSC.

(B) *Customer groupings.* A customer grouping includes all transactions of the FSC with a particular customer during the FSC's taxable year. Thus, any sales activity that is performed outside the United States with respect to any transaction with the customer during the taxable year shall apply to all transactions within the customer grouping.

(C) *Contract groupings.* A contract grouping includes all transactions of the FSC under a particular contract for a taxable year. Thus, any sales activity that is performed outside the United States with respect to any transaction under the contract will apply to all transactions under the contract for such taxable year. For long-term contracts between unrelated parties, the sales activities tests need be satisfied only once for the life of the contract. With respect to requirements contracts and long-term contracts between related parties, the sales activities test must be satisfied annually.

(D) *Product or product line groupings within customer or contract groupings.* Groupings may be based upon product or product line groupings within customer or contract groupings. If, however, the primary grouping is a customer or contract grouping, the 20 percent test set forth in subdivision (A) of this paragraph relating to product or product line grouping will not be applicable.

(ii) *Transactions included in a grouping.* A choice by a FSC to group transactions shall generally apply to all transactions within the scope of that grouping. The choice of a grouping, however, applies only to transactions covered by the grouping and, for transactions not encompassed by the grouping, the determinations may be made on a transaction-by-transaction basis or other grouping basis. For example, a FSC may choose a product grouping with respect to one product and use the transaction-by-transaction method for another product within the same taxable year. In addition, if a FSC applies sales activity rules on the basis of other types of groupings, such as all sales to a particular customer, transactions included in those other groupings shall be excluded from product groupings.

(iii) *Different groupings allowed for different purposes.* A choice by the FSC to group transactions may be made separately for each of the sales activities under section 924(d)(1)(A). Groupings used for purposes of section 924(d)(1)(A) will have no relationship to groupings used for other purposes, such as satisfying the foreign direct cost tests. This paragraph (c)(5) does not apply for purposes of section 925.

(6) *Examples.* The provisions of this paragraph (c) may be illustrated by the following examples:

Example 1. In November, a calendar year FSC mailed from its foreign office its catalog to a potential foreign customer. The catalog displayed numerous products along with a brief description and the price of each. In February of the following year, the FSC sold to the customer a product displayed in the catalog. Since the FSC communicated with the customer during the 12-month period prior to the sale, although during the previous taxable year, the FSC participated outside the United States in the solicitation relating to the transaction.

Example 2. A FSC with a taxable year ending April 30, 1986, solicits customer X during that taxable year with respect to Product A. In the previous taxable year, the FSC sold product A to customers V, W, X, Y, Z, none of whom were customers in the taxable year ending April 30, 1986. The sales proceeds from sales to customer X represented 50 percent of the foreign trading gross receipts for the previous FSC year. The FSC meets the 50 percent test for product or product line grouping for the taxable year ending April 30, 1986. If the facts were changed so that there was not a FSC, DISC or interest charge DISC in the same controlled group in the previous taxable year, the single solicitation directed to any customer would qualify all transactions within the product group as meeting the solicitation requirement for that taxable year. For subsequent taxable years, the 50 percent test or the 20 percent test would be applicable.

Example 3. A FSC earns commissions on the sale of export property by its domestic related supplier to United States wholesalers for final sale to foreign customers. The related supplier receives an order from one of its United States wholesalers. The related supplier telephones the United States wholesaler to inform it of the new price and the probability of another price increase soon. The United States wholesaler orally agrees to the new price and the related supplier instructs the FSC to telex the wholesaler from its foreign office a confirmation that the product will be sold at the current new price. The written confirmation by the FSC of an oral agreement on a variable contract term constitutes the making of a contract. Thus, the requirements of section 924(d)(1)(A) are met with respect to the transaction relating to the product.

(d) *Satisfaction of either the 50-percent or the 85-percent foreign direct cost test*—(1) *In general.* Section 924(d)(1)(B) requires, in order for the gross receipts of a transaction to qualify as foreign trading gross receipts, that the foreign direct costs incurred by the FSC attributable to the transaction equal or exceed 50 percent of the total direct costs incurred by the FSC attributable to the transaction. The direct costs are those costs attributable to activities described in the five categories of section 924(e). Section 924(d)(2) provides that, instead of satisfying the 50-percent foreign direct cost test of section 924(d)(1)(B), the FSC may incur foreign direct costs attributable to activities described in each of two of those categories that equal or exceed 85 percent of the total direct costs incurred by the FSC attributable to the activity described in each of the two categories. If no direct costs are incurred by the FSC in a particular category, that category shall not be taken into account for purposes of determining satisfaction of either the 50-percent or the 85-percent foreign direct cost test. If any amount of direct costs is incurred in a particular category, that category shall be taken into account for purposes of the foreign direct costs tests.

(2) *Direct costs*—(i) *Definition of direct costs.* For purposes of section 924 (d), direct costs are those costs which are incident to and necessary for the performance of any activity described in section 924(e). Direct costs include the cost of materials which are consumed in the performance of the activity, and the cost of labor which can be identified or associated directly with the performance of the activity (but only to the extent of wages, salaries, fees for professional services, and other amounts paid for personal services actually rendered, such as bonuses or compensation paid for services on the basis of a percentage of profits). Direct costs also include the allowable depreciation deduction for equipment or facilities (or the rental cost for use thereof) that can be specifically identified or associated with the activity, as well as the contract price of an activity performed on behalf of the FSC by a contractor. If costs of services or the use of facilities are only incidentally related to the performance of an activity described in section 924(e), only the incremental cost is considered to be identified directly with the activity. For example, supervisory, administrative, and general overhead expenses, such as telephone service, normally are not identified directly with particular activities described in section 924(e). The cost of a long distance telephone call made to arrange for delivery of export property, however, is identified directly with the activities described in section 924(e)(2). Direct costs for purposes of section 924(d) do not necessarily include all of the expenses taken into account for purposes of determining the taxable income of the FSC or the combined taxable income of the FSC and its related supplier.

(ii) *Allocation of direct costs.* For purposes of this section only, if costs are identified with more than one activity (whether or not all of the activities are described in section 924(e)), the portion of the costs attributable to each activity shall be determined by allocating the costs among the activities in any manner that is consistently applied and, if applicable, that reasonably reflects relative costs that would be incurred by performing each activity independently. If costs of an activity are attributable to more than one transaction or grouping of transactions, the portion of the costs attributable to each transaction or grouping shall be determined by allocating the costs among the transactions or groupings in any manner that is consistently applied and, if applicable, that reasonably reflects relative costs that would be incurred by performing the activity independently with respect to each transaction or grouping.

(3) *Total direct costs.* The term ‘‘total direct costs’’ means all of the direct costs of any transaction attributable to activities described in any paragraph of section 924(e). For purposes of the 50-percent foreign direct cost test of section 924(d)(1)(B), total direct costs are determined based on the direct costs of all activities described in all of the paragraphs of section 924(e). For purposes of the 85-percent foreign direct cost test of section 924(d)(2), however, the total direct costs are determined separately for each paragraph of section 924(e). If more than one activity is included within a paragraph of section 924(e), direct costs must be incurred with respect to at least one activity listed in the paragraph. If costs are incurred with respect to more than one activity, all direct costs must be considered for purposes of satisfying the direct costs test.

(4) *Foreign direct costs.* The term ‘‘foreign direct costs’’ means the portion of the total direct costs of any transaction which is attributable to activities performed outside the United States. For purposes of the 50-percent foreign direct cost test, foreign direct costs are determined based on the direct costs of all activities described in all of the paragraphs of section 924(e). For purposes of the 85-percent foreign direct cost test, however, foreign direct costs are determined separately for each paragraph of section 924(e).

(5) *Fifty percent foreign direct cost test.* To satisfy the requirement of section 924(d)(1)(B), the foreign direct costs incurred by the FSC attributable to the transaction must equal or exceed 50 percent of the total direct costs attributable to the transaction. This test looks to the cost of the activities described in section 924(e) on an aggregate basis; therefore, it is not necessary that the foreign direct costs of each activity, or of each paragraph of section 924(e), equal or exceed 50 percent of the total direct costs of that activity or paragraph.

(6) *Eighty-five percent foreign direct cost test*—(i) *General rule.* To satisfy the requirement of section 924(d)(2), the foreign direct costs of a transaction incurred by the FSC attributable to activities described in each of at least two paragraphs of section 924(e) must equal or exceed 85 percent of the total direct costs attributable to activities described in that paragraph. This test looks to costs of the activities on a paragraph-by-paragraph basis (but not on an activity-by-activity basis). As an example, the foreign direct costs of advertising and sales promotion are aggregated with each other for this purpose, but they are not aggregated with the foreign direct costs of transportation.

(ii) *Satisfaction of the 85-percent test.* If, after the FSC files its tax return indicating that it has satisfied the 85-percent foreign direct cost test with respect to each of at least two paragraphs of subsection 924(e) and a determination is made by the Commissioner that the foreign direct costs attributable to one or both of the two paragraphs of section 924(e) specified on the return did not equal or exceed 85 percent of the total direct costs attributable to such activities, the FSC may, nonetheless, satisfy the 85-percent foreign direct cost test if the foreign direct costs attributable to any two paragraphs of section 924 (e) equal or exceed 85 percent of the total direct costs attributable to those other paragraphs.

(e) *Grouping transactions.* Generally, the foreign direct cost tests under paragraph (d) of this section are to be applied on a transaction-by-transaction basis. By annual election of the FSC, however, the foreign direct cost tests may be applied on a customer, contract or product or product line grouping basis. Any groupings used must be supported by adequate documentation of performance of activities and costs of activities relating to the groupings used. An election by the FSC to group transactions must be made on its annual income tax return. The FSC may, however, amend its tax return before the expiration of the statute of limitations under section 6501 of the Code to group in a manner different from that elected on its original return.

(1) *Standards for groupings.* A determination by a FSC as to a grouping will be accepted by the district director if such determination conforms to any of the following standards:

(i) *Product or product line groupings.* A product or product line grouping may be based either on a recognized trade or industry usage, or on a two digit major grouping (or on any inferior classification or combination of inferior classifications within a major grouping) of the Standard Industrial Classification as prepared by the Statistical Policy Division of the Office of Management and Budget, Executive Office of the President.

(ii) *Customer groupings.* A customer grouping includes all transactions of the FSC with a particular customer during the FSC's taxable year.

(iii) *Contract groupings.* A contract grouping includes all transactions of the FSC under a particular contract, including a requirements contract. The tests will be applied to all transactions within a contract grouping during each taxable year of the FSC; however, by election of the FSC, all transactions under a contract that occur in the first or the last year of the contract may be included with, respectively, the next succeeding or the immediately preceding taxable year in applying these tests. For example, if with respect to transactions during the first calendar year of a 5-year contract, a calendar year FSC incurs direct costs attributable to the transactions of $100X for advertising, all of which are foreign direct costs, and $10X for processing of customers orders and for arranging for delivery, $9X (or 90 percent of the total direct costs) of which are foreign direct costs, the FSC has satisfied the 85-percent foreign direct cost test with respect to those transactions for the taxable year. If with respect to transactions during the second year of the contract, the FSC only incurs $18X of direct costs for processing of customer orders and arranging for delivery, $15X (83.3 percent of the total direct costs) of which are foreign direct costs, the FSC may include the transactions from the first year of the contract to meet the 85-percent foreign direct cost test in the second taxable year. Thus, with respect to the transactions in the second year, the FSC satisfies the foreign direct costs test for advertising (because the entire $100X of direct costs are foreign direct costs) and for processing of customer orders and arranging for delivery (because of the $28X of direct costs, $24X or 85.7 percent of the total direct costs are foreign direct costs). If, however, with respect to transactions in the third year, the FSC satisfies the foreign direct costs test, those transactions cannot be included with the transactions in the fourth year. The FSC may aggregate the direct costs in the fourth and fifth years in the same manner as for the first and second years as described above in order to satisfy the 85 percent foreign direct costs test.

(iv) *Product or product line groupings within customer or contract groupings.* Groupings may be based on product or product line groupings within customer or contract groupings.

(2) *Transactions included in a grouping.* An election by the FSC to group transactions shall generally apply to all transactions within the scope of that grouping. The election of a grouping, however, applies only to transactions covered by the grouping and, as to transactions not encompassed by the grouping, the determinations may be made on a transaction-by-transaction basis or other grouping basis. For example, the FSC may elect a product grouping with respect to one product and elect the transaction-by-transaction method for another product within the same taxable year. In addition, if a FSC is permitted to apply either the 50-percent or the 85-percent foreign direct cost test on the basis of other types of groupings, such as all transactions with respect to a particular customer, transactions included

in those other groupings shall be excluded from product groupings.

(3) *Different groupings allowed for different purposes.* An election by the FSC to group transactions may be made separately for each of the activities relating to disposition of export property under section 924(d)(1)(B) or section 924(d)(2). Groupings used for purposes of section 924 will have no bearing on groupings for other purposes. This paragraph (e) does not apply for purposes of section 925.

(f) *Exception for foreign military property*—(1) *General rule.* The requirements of this section do not apply to any activities performed in connection with foreign military sales except those activities described in section 924(e). The FSC is deemed to have satisfied the requirements of section 924(d)(1)(A).

(2) *Example.* The principles of paragraph (f)(1) of this section may be illustrated by the following example:

Example. A FSC earns commissions on foreign military sales by its related supplier. All solicitation, negotiation, and contract making activities occur in the United States solely between the related supplier and the United States government. The property is delivered, title passes, and payment is made in the United States in accordance with standard United States government practices. The FSC incurs direct costs in the amount of $155X to process the government's orders and arrange for delivery of the goods, all of which are foreign direct costs. In addition, it incurs foreign direct costs in the amount of $250X for assembling and transmitting its final invoice to the government from outside the U.S. and foreign direct costs of $200X associated with receiving payment from the related supplier in accordance with the rules of § 1.924(e)–1(d)(2)(iii). No other activities occur with respect to the foreign military sales. The FSC has satisfied the 85-percent foreign direct cost test and thus has foreign trading gross receipts with respect to the foreign military sales. The fact that the FSC did not participate outside the United States in any of the sales activities has no bearing on the qualification of the receipts since the FSC is deemed to have met the requirements of section 924(d)(1)(A).

[T.D. 8125, 52 FR 5090, Feb. 19, 1987]

§ 1.924(e)–1 Activities relating to the disposition of export property.

(a) *Advertising and sales promotion.* For purposes of section 924(e), advertising and sales promotion are defined as follows.

(1) *Advertising*—(i) *Advertising defined*—(A) *General rule.* Advertising means the announcement or description of property or services described in section 924(a), in some medium of mass communication (such as radio, television, newspaper, trade journals, mass mailings, or billboards), in order to induce multiple customers or potential customers to buy or rent the property or services from the FSC or related supplier. Advertising is not required to be directed to the general public, but may be focused toward any group of export customers or potential export customers. Advertising except for the advertising described in § 1.924(e)–1(a)(1)(B) must describe one or more specific products or product lines (or services) and identify the product as a product offered by the FSC or related supplier. Advertising intended solely to build a favorable image of a company or group of companies is not included in this definition of advertising. Additionally, advertising primarily directed at customers or potential customers in the United States is not included in this definition of advertising, nor is advertising related to property or services not described in section 924(a).

(B) *Special rules for sales to distributors.* If the customer is a distributor (whether domestic or foreign, related or unrelated to the FSC), an expense that is incurred by the distributor and charged to the FSC or related supplier as a reduction in the purchase price or as a separate charge for an announcement or description described in paragraph (a)(1)(A) of this section to induce the distributor's customers, potential customers, or the ultimate users to buy or rent the property or services is advertising for these purposes (i) if the FSC incurs 20 percent or more of the total advertising costs of the distributor or (ii) if the FSC pays the total charge of an advertisement either directly or indirectly. For these purposes, a distributor is anyone other than an end user or a final consumer. A FSC may incur direct advertising costs to a foreign end consumer even though the FSC sells to a U.S. distributor.

(ii) *Direct costs of advertising.* Direct costs of advertising include costs of transmitting, displaying, or distributing the advertising to customers or potential customers and the costs of printing in the case of sales literature, but do not include fees paid to an independent advertising agency to develop the announcement or description, translation costs, or costs of preparing the announcement or description for potential use as advertising. Direct costs of sending sales literature to customers or potential customers may be taken into account as advertising costs as long as the activity is not taken into account for purposes of the sales activity requirements of §1.924(d)–1(c).

(iii) *Location of advertising*—(A) *General rule.* The location of advertising activity is the place to which the advertising is transmitted, displayed, distributed, mailed, or otherwise conveyed to the customers or potential customers (or in the case of advertising described in paragraph (a)(i)(B) of this section, the distributor's customers, or the ultimate users). For example, a television advertisement that is broadcast to a foreign country constitutes advertising activity outside the United States even though the broadcast signal originates in the United States. Therefore, the cost of that advertising activity is a foreign cost. The FSC may rely upon the distribution statistics of the publisher of print media or the broadcaster of broadcast media through which the advertising is distributed. If the distribution statistics show that 85 percent or more of the readership, radio listeners, or viewership are outside the United States, all direct costs of advertising are considered foreign direct costs of advertising.

(B) *Foreign editions of journals, magazines, etc.* Costs related to advertising in foreign English editions of U.S. publications as well as advertising in any publication in a foreign language are foreign direct costs.

(C) *United States editions.* Costs related to advertising in United States publications are not treated as direct costs even if the publication also has a foreign edition in English.

(iv) *Second mailings.* In general, direct costs of sending sales literature to customers may be treated as solicitation or advertising, but not both. A distinction may be made, however, between a first and second mailing so that one may be treated as advertising and the other may be treated as solicitation. To qualify under this second mailing rule, the two mailings must be generically different items such as a price list and a description of the product itself. An amended price list would not be distinguishable from an original price list and would, therefore, not constitute a second mailing.

(v) *Examples.* The principles of paragraph (a)(1) of this section may be illustrated by the following examples:

Example 1. The related supplier, under contract with a buy-sell FSC to advertise export product D on the ‘‘FSC's'' behalf to its foreign unrelated customers, engaged a French advertising agency to develop an advertising campaign to induce French customers to buy the product. As a part of the advertising campaign, the agency places a one-page advertisement in a relevant French trade journal. The advertisement constitutes advertising within the meaning of paragraph (a)(1) of this section.

Example 2. A United States weekly magazine publishes, in addition to its United States edition, a Canadian edition in English and a Mexican edition in Spanish. A FSC incurs costs of $200 X for a one-page display in each of the three editions for a total advertising cost of $600 X. The $200 X cost relating to the advertising in the United States edition is not a direct cost because it relates to United States sales. The total costs of $400 X relating to advertising in the English language Canadian edition and the Spanish language Mexican edition are foreign direct costs.

Example 3. A FSC earns commissions on the sale of export product E by its domestic related supplier to United States distributors for resale to Canadian retail customers. The related supplier, under contract with the FSC to advertise product E, pays an amount equal to 1 percent of its annual gross receipts with respect to product E under a cooperative advertising arrangement with the distributor. The amount, which represents 20 percent of the total advertising costs for product E, is reimbursed by the FSC. The 20-percent amount represents a significant portion of the total advertising costs and thus constitutes advertising within the meaning of paragraph (a)(1)(i) of this section.

Example 4. A FSC mails two items to each customer on its customer list within one taxable year. The first mailing consists of a price list which merely lists the various products by name and provides a price next to each product name. The second mailing consists of a brochure which fully describes and illustrates each product. The two mailings are generically different. Therefore, one mailing may be counted as advertising while the other mailing may be counted as solicitation.

(2) *Sales promotion*—(i) *Sales promotion defined.* Sales promotion means an appeal made in person to an export customer or potential export customer for the sale or rental of property or services described in section 924(a), made in the context of a trade show or customer meeting. A customer meeting means a periodic meeting (*e.g.*, quarterly, semi-annual, or annual) in which 10 or more customers or potential customers are reasonably expected to attend. However, for taxable years beginning before February 19, 1987, a customer meeting may, at the option of the taxpayer, mean any meeting with a customer or potential customer regardless of the frequency of the meetings or the number of customers or potential customers in attendance. A meeting, show or event in the United States that is primarily aimed at the export of goods or services described in section 924(a) constitutes sales promotion. Sales promotion does not include an appeal made in the context of any meeting, show or event primarily aimed at U.S. customers or an appeal for the sale or rental of property or services not described in section 924(a). Whether any meeting, show or event is primarily aimed at U.S. customers or at the export of goods or services described in section 924(a) shall be determined by all of the facts and circumstances including the announced objective of the meeting, show or event; the attendees; the location of the meeting, show or event; and the product or special feature of the product.

(ii) *Direct costs of sales promotion.* Direct costs of sales promotion include costs such as rental of space at trade shows, payments to organizers or other persons hired for the event, rental of display equipment and decorations for the event, and costs of maintaining a showroom. Direct costs of sales promotion also include costs for travel, meals, and lodging for direct sales people attending the event if these costs are paid by the FSC or related supplier. In the case of a customer meeting, direct costs of sales promotion include the costs of materials printed specifically for the meeting and the costs of travel, lodging, and food for both the direct sales people and customers or potential customers attending the meeting. Direct costs of sales promotion do not include the cost of salaries and commissions of direct sales people or the cost of discount coupons, samples of the product, or printed advertising materials that are used for general advertising as well as sales promotion.

(iii) *Location of sales promotion.* The location of sales promotion activity is the place where the trade show or customer meeting is held.

(iv) *Examples.* The principles of paragraph (a)(2)(i) of this section may be illustrated by the following examples:

Example 1. The related supplier sells various export products described in section 924(a) to its foreign customers. As a commission agent for the related supplier with respect to such sales, the FSC performs sales promotion. It contracts with the related supplier to serve as its agent for such purposes. To stimulate the sale of its export products, the related supplier conducts semi-annual meetings with the purchasing agents of its customers at its Kansas City headquarters. Ten or more purchasing agents are reasonably expected to attend each meeting. At such meetings, the purchasing agents see the related supplier's manufacturing facilities, visit with its executives, attend technical updates, and see new export products. These semi-annual customer meetings constitute sales promotion within the meaning of paragraph (a)(2)(i) of this section. Direct costs incurred with respect to the customer meetings are U.S. direct costs because the sales promotion activities occur within the United States.

Example 2. Assume the same facts as in *Example 1,* except that the related supplier exhibits products that only operate on 220 volts at a trade show in the United States. According to the trade show sponsors, the purpose of the show is to increase sales abroad of United States-manufactured products. Since the products exhibited are designed for operation in foreign countries and the purpose of the trade show is to boost sales in those countries, the trade show held in the United States is primarily aimed at the export products described in section 924(a) and not at United States customers. Thus, the trade show constitutes sales promotion within the meaning of paragraph (a)(2)(i) of this section and the direct costs incurred in connection with the trade show are treated as United States direct costs.

(b) *Processing of customer orders and arranging for delivery of the export property*. For purposes of section 924(e), the processing of customer orders and the arranging for delivery of the export property are defined in paragraph (b)(1) and paragraph (b)(2), respectively, of this section. For taxable years beginning after February 19, 1987, if the FSC performs the activities of processing of customer orders and arranging for delivery of the export property and elects to group its transactions, it is considered to have performed the activities with respect to all transactions in the grouping elected by the FSC under §1.924(d)–1(e) during the taxable year if it performs the activities of processing of customer orders and arranging for delivery of the export property with respect to customers generating 20 percent or more of foreign trading gross receipts within the elected grouping.

(1) *Processing of customer orders*—(i) *Processing of customer orders defined*. The processing of customer orders means notification by the FSC to the related supplier of the order and of the requirements for delivery. The related supplier may have independent knowledge of the order and requirements for delivery. If the FSC does not have a related supplier, the processing of customer orders means communication with the customer by any method such as telephone, telegram, or mail to acknowledge receipt of the order and requirements for delivery. Once the related supplier has been notified by the FSC, or the customer has received an acknowledgement from the FSC, of the order and requirements for delivery, subsequent or prior communications with respect to an order (such as changes in quantity or prospective delivery date) are not included in the definition of processing of customer orders.

(ii) *Direct costs of processing customer orders.* Direct costs of processing of customer orders include salaries of clerical personnel and costs of telephone, telegram, mail, or other communication media (including the costs of operating transmission equipment).

(iii) *Location of processing of customer orders.* The location of this activity is the place where the communication is initiated by the FSC.

(iv) *Examples.* The principles of paragraph (b)(1) of this section may be illustrated by the following examples:

Example 1. A domestic related supplier, using a FSC as its commission agent on the sale of export property to foreign customers, receives an order from one of its foreign customers. Information concerning the receipt of such order and its requirements for delivery are transmitted to the FSC. The FSC from its office outside the United States notifies the related supplier of the order and the requirements for delivery by telex. This notification by the FSC to the related supplier constitutes the processing of the customer's order within the meaning of paragraph (b)(1)(i) of this section. In addition, its direct costs of processing the customer's order are foreign direct costs because the communication is initiated by the FSC from outside the United States.

Example 2. A domestic unrelated supplier manufactures a product which it sells to a buy-sell FSC located in Germany for resale to the FSC's German customers. Upon receiving an order from one of its customers, the FSC telephones the customer from its German office to acknowledge receipt of the order and the requirements for delivery. The acknowledgement constitutes the processing of the customer's order within the meaning of paragraph (b)(1)(i) of this section and the direct costs attributable thereto are foreign direct costs.

(2) *Arranging for delivery*—(i) *Arranging for delivery defined.* The arranging for delivery of export property means the taking of necessary steps to have the export property delivered to the customer in accordance with the requirements of the order. Arranging for delivery does not include preparation of shipping documents (*e.g.,* bill of lading) or the property for shipment (*i.e.,* packaging or crating), or shipment of property (*i.e.,* transportation). Arranging for delivery does include communications with a carrier or freight forwarder to provide transportation (as defined in §1.924(e)–1(c)(1), but without regard to when the commission relationship for purposes of transportation begins) for the export property from the FSC or related supplier to the place where the customer takes possession of the property. Arranging for delivery also includes communications with the customer to notify the customer of the time and place of delivery. The carrier or freight forwarder and the customer

may already have knowledge of the information communicated. If the FSC has communicated with the carrier or freight forwarder, where applicable, and the customer to notify it of the time and place of delivery, prior or subsequent communications to either about delivery are not included in the definition of arranging for delivery.

(ii) *Direct costs of arranging for delivery.* The direct costs of arranging for delivery include salaries of clerical personnel and costs of telephone, telegraph, mail, and other communications media, but do not include any actual shipping costs.

(iii) *Location of arranging for delivery.* The location of arranging for delivery activity is the place where the activity is initiated by the FSC.

(iv) *Examples.* The principles of paragraph (b)(2)(i) of this section may be illustrated by the following examples:

Example 1. A FSC earns commissions on the sale of export property by its domestic related supplier to foreign customers. The shipment term of all of the related supplier's sales is F.O.B. (Free on Board) its manufacturing plant in Gary, Indiana. Thus, there is no transportation as defined in § 1.924(e)–1(c)(1) with respect to its sales. From its shipping department at the plant, the related supplier telephones carriers to arrange for delivery. It also notifies the FSC by mail of the time and place of delivery of the customer's orders. The FSC from its office outside the United States transmits the received information to the customers. Because there is no transportation to be arranged, this communication alone by the FSC to the customers to notify them of the time and place of delivery constitutes arranging for delivery within the meaning of paragraph (b)(2)(i) of this section.

Example 2. Assume the same facts as in *Example 1,* except that the shipment term of all of the related supplier's sales is C.I.F. (Cost, Insurance, Freight) and that the commission relationship for transportation begins after the export property leaves the United States customs territory. The related supplier telephones a trucking firm and an overseas carrier from its plant in Gary, Indiana to ascertain information on transporting its property by truck to the docks, and by overseas carrier from the docks to the place where the customer takes possession. Upon receiving the necessary information, the related supplier electronically transmits to the FSC the shipping information and the time and place of delivery to the customer. In addition, it instructs the FSC to communicate the necessary shipping information to the carriers to ensure shipment and to notify the customer of the time and place of delivery. The FSC does both from its office located outside of the United States. The communications by the FSC to the carriers and the customer constitute arranging for delivery within the meaning of paragraph (b)(2)(i) of this section.

(c) *Transportation*—(1) *Transportation defined.* For purposes of section 924(e), transportation means moving or shipping the export property during the period when the FSC owns or is responsible for the property, or, if the FSC is acting as a commission agent, during the period when the related supplier owns or is responsible for the property but after the commission relationship for purposes of transportation begins (even if the relationship begins after the property leaves the U.S. customs territory). The FSC or related supplier is treated as responsible for the property when it either has title, bears the risk of loss, or insures the property during shipment. Since a commission FSC will not generally have title or bear the risk of loss, it will, nevertheless, satisfy the transportation test if the related supplier has either title, bears the risk of loss, or insures the property during shipment. Examples of methods of shipping which would qualify as transportation include F.O.B. (Free on Board) destination, C.I.F. (Cost, Insurance, Freight), Ex Ship, and Ex Quay, but do not include C. & F. (Cost and Freight) or F.O.B. shipping point.

(2) *Direct costs of transportation.* The direct costs of transportation include the expenses of shipping, such as fees paid to carriers and freight forwarders, costs of freight insurance, and documentation fees. With respect to fungible commodities, direct costs include only those costs incurred after the goods have been identified to a contract. Transportation costs do not include any of the costs of arranging for delivery. The FSC is considered to engage in transportation activity whenever it pays the costs of shipping the export property and the property is shipped during the period when the FSC owns or is responsible for the property as provided in paragraph (c)(1) of this section. If the customer pays the shipping costs directly, the FSC is not considered to engage in transportation activity. If, however, the FSC

pays the shipping costs, the ultimate transfer of those costs to the customer will not disqualify the FSC from engaging in transportation for purposes of section 924(e) regardless of whether the costs are included in the sale price of the export property or separately stated.

(3) *Location of transportation.* The location of transportation activity is the area over which the property is transported. Thus, the portion of total direct costs of transportation treated as foreign direct costs is the portion attributable to transportation outside the United States, determined on the basis of the ratio of mileage outside the U.S. customs territory to total mileage. For purposes of determining mileage outside U.S. customs territory, goods are treated as leaving U.S. customs territory when they have been tendered to an international carrier for shipment to a foreign location, as long as they are not removed from the custody of the carrier before they reach a point outside U.S. customs territory. The same rule for determining mileage outside the U.S. customs territory will apply to freight forwarders if (i) the forwarder has the risk of loss or is an insurer of the goods, and (ii) the property is shipped on a single bill of lading issued to the FSC or its agent as the shipper.

(4) *Examples.* The principles of paragraph (c) of this section may be illustrated by the following examples:

Example 1. A buy-sell FSC sells export property to a customer located in Canada. The contract between the FSC and the customer requires that the property be shipped F.O.B. its Canadian destination. Under this shipment term, the FSC holds title and bears the risk of loss until the property is tendered at its Canadian destination. Thus, it is responsible for the property during shipment. The FSC instructs its related supplier to ship the property from its manufacturing facilities in St. Louis. The related supplier negotiates two contracts, one for domestic transportation and the second for foreign transportation. A domestic trucking firm transports the property to the Canadian border where a Canadian trucking company is used to transport the property to its Canadian destination. The documentation fees and the fees for the two trucking firms are paid by the FSC. Because the FSC paid the costs of shipping and the property was shipped during the period when the FSC was responsible for the property, the FSC has engaged in transportation activity, the direct costs of which are the fees paid by the FSC. If 70 percent of the mileage from St. Louis to the Canadian destination is associated with the transportation from the Canadian border to the Canadian destination, 70 percent of the FSC's direct transportation costs are foreign direct costs. If, instead of using two trucking firms, the FSC had tendered the goods to a freight forwarder for shipment to a foreign location and the freight forwarder assumed the risk of loss for the goods and issued a single bill of lading, all of the fees paid by the FSC to the freight forwarder would be foreign direct costs.

Example 2. A related supplier sells export property to its foreign customer in Liverpool, England. The contract between the related supplier and the customer requires that the property be shipped C.I.F. Liverpool. The related supplier engages the FSC as its commission agent with respect to its sales to the customer, requiring the FSC to provide transportation to the customer. The FSC contracts with the related supplier to provide the transportation on behalf of the FSC. The commission agreement between the related supplier and the FSC provides that the FSC's responsibilities with respect to transportation of the export property begins after the property leaves the U.S. customs territory. The related supplier hires a domestic trucking firm to transport the shipment to a New York City port where it is loaded on a cargo ship destined for Liverpool at a total cost of $3,000X, $2,750X of which is allocable to mileage from the U.S. customs territory to Liverpool, England. Because the related supplier insures the property during shipment under C.I.F., the property is shipped during the period when the related supplier is treated as responsible for the property. Thus, the FSC, as the related supplier's commission agent, has satisfied the transportation test. In addition, because the FSC's responsibilities with respect to transportation begins when the property leaves U.S. customs territory, the FSC's payment of $2,750X is a foreign direct cost of transportation. The remaining $250X is not a direct cost of transportation to the FSC because the amount was expended before the commission relationship between the FSC and related supplier began.

Example 3. A FSC earns commissions on sales by the related supplier of export property, all of which falls within a single two-digit SIC group. The related supplier is under contract to the FSC to perform on the FSC's behalf all of the section 924(e) activities attributable to the sales. Of all of the sales made during the year, the FSC has no transportation costs with respect to the sales to customer R because the shipment term is F.O.B. the related supplier's Chicago plant. With respect to the sales to customer S, the

FSC ships the property F.O.B. its destination and pays 100 percent of the transportation costs, all of which are foreign direct costs because the commission relationship for transportation begins outside the U.S. customs territory. For purposes of determining whether the FSC has satisfied the 85-percent foreign direct cost test for transportation, the FSC groups the sales by product. Because the transportation costs for sales to customer S are 100-percent foreign direct costs and because there are no transportation costs on sales to customer R, the FSC is considered to have met the 85-percent foreign direct cost test for transportation for all the sales in the single two-digit SIC group.

(d) *Determination and transmittal of a final invoice or statement of account and receipt of payment.* For purposes of section 924(e), the determination and transmittal of a final invoice or statement of account and the receipt of payment are defined as follows.

(1) *Determination and transmittal of a final invoice or statement of account*—(i) *Definitions*—(A) *In general.* The determination and transmittal of a final invoice or statement of account means the assembly of either a final invoice or statement of account and the forwarding of that document to the customer. A FSC may elect to send either final invoices or statements of account and disregard any costs of the alternative not elected. For taxable years beginning after February 19, 1987, a special grouping rule is provided. If the FSC assembles and forwards either a statement of account or a final invoice from outside the United States to customers with sales representing 50 percent of the current year foreign trading gross receipts within a product or product line grouping or to customers with sales representing 50 percent of the prior year foreign trading gross receipts within a product or product line grouping utilized for the current year, all other U.S. costs will be disregarded and the FSC will be deemed to have no U.S. costs with respect to the determination and transmittal of a final invoice or statement of account. If, during the prior taxable year, the controlled group of which the FSC is a member had a DISC or interest charge DISC, the FSC may apply the 50 percent rule by taking into account the customers and sales of the DISC or interest charge DISC for the preceding taxable year. If no foreign trading gross receipts (or qualified export receipts for DISC purposes) were received in the prior year either by the FSC or by a DISC or interest charge DISC within the controlled group of which the FSC is a member, the FSC must apply the 50 percent rule taking into account customers and foreign trading gross receipts for the current year. In the event that the 50 percent rule is not satisfied, all costs associated with assembly and forwarding of the selected documents (invoices or statements of account) must be included in the costs attributable to activities described in section 924(e)(4).

(B) *Final invoice defined.* A final invoice is an invoice upon which payment is made by the customer. A final invoice must contain the customer's name or identifying number and, with respect to the transaction or transactions, the date, product or service, quantity, price, and amount due. In the alternative, a document will be acceptable as a final invoice even though it does not include all of the above listed information if the FSC establishes that the document is considered to be a final invoice under normal commercial practices. An invoice forwarded to the customer after payment has been tendered or received pursuant to a letter of credit as a receipt for payment satisfies this definition.

(C) *Statement of account defined.* A statement of account is any summary statement forwarded to a customer to inform of, or confirm, the status of transactions occurring within an accounting period during a taxable year that is not less than one month. A statement of account must contain, at a minimum, the customer's name or identifying number, date of the statement of account as of the last day of the accounting period covered by the statement of account and the balance due (even if the balance due is zero). A single final invoice or statement of account can cover more than one transaction with one customer. In the alternative, a document will be accepted as a statement of account even though it does not include all of the above listed information if the FSC establishes that the document is considered a statement of account under normal commercial practice. For these purposes, a document will be considered to be a statement of account under normal commercial practices if it is sent to domestic as well as to export customers in order to inform the customers of the status of transactions during an accounting period. Additional information may be sent separately, such as summary statements forwarded to a related party for purposes of reconciling intercompany accounts for financial reporting requirements. If the information is sent separately, the direct costs associated with the assembly and forwarding of that information are not considered for purposes of section 924(d).

(D) *Assembly and forwarding defined.* Assembly means folding the documents (where applicable), filling envelopes, and addressing envelopes (if window envelopes are not used). Forwarding means mailing or delivery.

(ii) *Direct costs of determination and transmittal of final invoice or statement of account.* Direct costs of this activity include costs of office supplies, office equipment, clerical salaries and costs of mailing or other delivery services, if the costs can be identified or associated directly with the assembly and transmittal of a final invoice or statement of account. Costs of establishing a price, or of communicating prices or other billing information between the FSC and a related supplier are not direct costs of this activity. In addition, the costs of preparing and mailing the final invoices or statements of account to the FSC and the costs of accumulating and formatting data for invoicing or statements of account on computer discs, tapes, or some other storage media along with the costs of transmitting or transporting this data to the FSC are not direct costs of this activity.

(iii) *Location of determination and transmittal of a final invoice or statement of account.* For taxable years beginning before February 19, 1987, the location of this activity is the place where the final invoice or statement of account is assembled for forwarding to the customer or the place from which it is forwarded to the customer. Thus, the forwarding of the final invoice or statement of account from outside the United States is sufficient to source this activity outside the United States. For all other taxable years, the location of this activity is the place where the final invoice or statement of account is both assembled and forwarded to the customer.

(iv) *Examples.* The principles of paragraph (d)(1) of this section may be illustrated by the following examples, all of which apply to taxable years beginning on or after February 19, 1987.

Example 1. A related supplier sells export property to its foreign customers. The related supplier engages the FSC as its commission agent with respect to the sales, requiring the FSC to determine and transmit final invoices or statements of account to the customers with respect to the sales. Annually, the FSC assembles and forwards statements of account to customers representing 40 percent of current year export sales and 35 percent of prior year sales. The statements are sent from its office outside of the United States. The remaining statements of account are sent from the Albany, New York office of the related supplier. The statements are recognized in its industry as a statement of account. Although the statement does not contain all of the information described in §1.924(e)–1(d)(1)(i), it is sent to both domestic and foreign customers of the related supplier to inform the customer of the status of its transactions with the related supplier. The document qualifies as a statement of account under §1.924(e)–1(d)(1)(i); however, the 50 percent test set forth in §1.924(e)–1(d)–1(d)(1)(i)(A) is not satisfied. Therefore, the FSC must take into account all domestic direct costs attributable to assembly and forwarding of statements of account from its domestic office in determining whether the FSC has satisfied the direct costs test with respect to section 924(e)(4) and §924 (e)–1(d).

Example 2. Employees of a FSC, in the FSC's foreign office, fold and place in envelopes the sheet or sheets that constitute the final invoices provided by the related supplier. In addition, the employees address, affix postage to, and mail the envelopes. These activities constitute the determination and transmittal of the final invoices within the meaning of paragraph (d)(1)(i) of this section and, because the final invoices are assembled and forwarded to the customers from outside the United States, all the direct costs of the activities are foreign direct costs.

Example 3. The related supplier sends to the FSC's foreign office a computer tape to be used to prepare a statement of account. A management company, working under contract with the FSC, transcribes the data to a piece of paper which is a statement of account for purposes of §1.924(d)(1)(i), folds the document, and fills, affixes postage to, and mails the envelopes. Only the costs performed by the management company under contract with the FSC that constitute the assembly and forwarding of a statement of account under §1.924(e)–1(d)(1)(i)(D) are direct costs. Therefore, the costs attributable to transcribing the data to a piece of paper are not direct costs for purposes of section 924(e)(4).

(2) *Receipt of payment*—(i) *Receipt of payment defined.* Receipt of payment means the crediting of the FSC's bank account by an amount which is not less than 1.83 percent of the gross receipts (''gross receipts amount'') associated with the transaction. The FSC's bank account is not credited unless the FSC has the authority to withdraw the amount deposited. Where sales proceeds are factored or where payments from related foreign subsidiaries are netted against amounts owed to these foreign subsidiaries in an intercompany account, crediting of the FSC's bank account with no less than the gross receipts amount of the factoring proceeds or the proceeds, net of offsets, respectively, qualifies as receipt of payment. In addition, where a FSC is precluded from receiving a portion of the proceeds of the export transaction, the FSC may satisfy receipt of payment by receiving no less than the gross receipts amount of the remaining portion of the proceeds in its bank account. In the case of advance or progress payments, each payment constitutes a payment for receipt of payment purposes.

(ii) *Direct costs of receipt of payment.* Direct costs of receiving payment include the expenses of maintaining a bank account of the FSC in which payment is deposited, any fees or service charges incurred for converting the payment into U.S. currency, and any transfer fees incurred with respect to the transfer of funds into and out of the FSC's bank account in accordance with the 35 calendar day rule in paragraph (d)(2)(iii) of this section. The transfer fees and the fees or service charges incurred for currency conversion are considered to be foreign direct costs of receiving payment; however, exchange losses are not costs of receiving payment.

(iii) *Location of receipt of payment.* The location of this activity is the office of the banking institution at which the account is maintained. If payment is made by the purchaser directly to the FSC or the related supplier in the United States, and the FSC or related supplier transfers the gross receipts amount associated with the transaction to a bank account of the FSC outside the United States after receipt of payment (i.e., cash, check, wire transfer, etc.), but no later than 35 calendar days after receipt of good funds (i.e., the clearance of the check) the FSC is considered to have received payment outside the United States. Therefore, all transfer fees and the costs of the foreign bank account are treated as foreign direct costs. The United States bank costs are disregarded. If, however, the related supplier does not transfer the gross receipts amount within 35 calendar days, United States bank costs are not disregarded and are domestic direct costs. In either case, the transfer costs, currency conversion charges, and foreign bank costs remain foreign direct costs. The preceding rules apply both to commission FSCs and buy-sell FSCs.

(iv) *Examples.* The principles of paragraph (d)(2) of this section may be illustrated by the following examples:

Example 1. A FSC earns commissions on sales of export property by its related supplier. The related supplier manufactures and sells its export property to its foreign subsidiaries for resale in their respective countries. From time to time, the foreign subsidiaries will return products to the related supplier for credit and, from time to time, the foreign subsidiaries purchase products in their respective countries and sell such products to the related supplier. These transactions result in various amounts being owed to the foreign subsidiaries. Each month the various inter-company obligations are reviewed. The result of such review of intercompany indebtedness is a netting out of the various intercompany liabilities on the books, to the extent possible, and a flow of funds for the net obligation. Due to the nature of these transactions, the amounts owed by the foreign subsidiaries exceed the amounts which the related supplier owes to the foreign subsidiaries. The gross receipts amount (*i.e.*, 1.83 percent of this net amount) is credited to the FSC's bank account. This constitutes receipt of payment for purposes of paragraph (d)(2)(i) of this section.

Example 2. In a leveraged lease transaction, a FSC-lessor obtains purchase financing from a lending institution. The lending institution retains a security interest in the proceeds and requires that a portion of each rental payment be paid by the lessee directly to the lending institution. Since the FSC is precluded from receiving a portion of the proceeds of the export transaction, the FSC may satisfy the receipt of payment requirement by receiving the gross receipts amount with respect to the remaining proceeds.

Example 3. A buy-sell FSC sells its export property to a foreign customer and is paid by means of a ‘‘draw-down’’ letter of credit. Over a substantial period of time prior to delivery of the export property, amounts are advanced to the FSC under the letter of credit. At delivery, the remaining amount available is paid. Each payment made to the FSC constitutes a payment for receipt of payment purposes and thus the gross receipts amount related to each payment must be credited to the FSC's bank account.

Example 4. An FSC earns commissions on sales of export property by its related supplier. The related supplier regularly collects payments from its foreign customers in a San Francisco bank account and, after the San Francisco bank has collected on the checks, transfers, within 35 calendar days, the gross receipts amounts from its New York bank account to the FSC's bank account located outside the United States. The FSC incurred transfer fees of $160X in addition to a fee of $35X for the maintenance of the FSC's bank account outside the United States during the 35 calendar day period. The maintenance fee relating to the United States bank account for the 35 calendar day period is $45X. The receipt of payment test is met because the gross receipts amounts are transferred after payment but within 35 calendar days to the FSC's bank account located outside the United States. The transfer fees of $160X and the maintenance fee of $35X relating to the FSC's foreign bank account are foreign direct costs. The $45X maintenance fee related to the United States bank account is not a direct cost. If the gross receipts amounts had not been transferred to the FSC's foreign bank account within 35 calendar days, the $45X maintenance fee related to the United States bank account would be considered a United States direct cost. The transfer fee of $160X and the maintenance fee of $35X relating to the FSC's foreign bank account, however, would, nonetheless, be considered as foreign direct costs. The same funds received in San Francisco need not be transferred to the FSC's foreign bank account because money is fungible. For the same reason, the gross receipts amounts need not be transferred from the same bank account in which the payments are received.

(e) *Assumption of credit risk*—(1) *Assumption of credit risk defined.* For purposes of section 924(e), the assumption of credit risk means bearing the economic risk of nonpayment with respect to a transaction. If the FSC is acting as a commission agent for the related supplier, this risk is borne by the FSC if the commission contract transfers the costs of the economic risk of nonpayment with respect to the transaction from the related supplier to the FSC. The FSC may elect on its annual return to bear the economic risk of nonpayment with respect to its transactions during a taxable year by either—

(i) Assuming the risk of a bad debt in accordance with the rules of paragraph (e)(4)(i) of this section,

(ii) Obtaining insurance to cover nonpayment,

(iii) Investigating credit of a customer or a potential customer,

(iv) Factoring trade receivables, or

(v) Selling by means of letters of credit or banker's acceptances.

Only the alternative elected to be performed by the FSC during a taxable year is relevant for purposes of section 924(d). For example, if a buy-sell FSC elects to bear the economic risk of nonpayment with respect to its transaction during a taxable year by assuming the risk of a bad debt in accordance with the rules of paragraph (e)(4)(i) of this section, and also factors the transaction's trade receivables, only the direct costs of assuming the risk of a bad debt are relevant for purposes of section 924(d). For purposes of this paragraph, a potential customer is an unrelated person who is engaged in the purchase or sale of export property on whom an investigation is performed, but with whom no export sales contract is executed.

(2) *Direct costs of assumption of credit risk.* (i) With respect to assuming the risk of a bad debt, the direct costs of the assumption of credit risk in the case of a buy-sell FSC include debts that become uncollectible and charges taken into account in determining additions to bad debt reserves of the FSC. In the case of a commission FSC, the direct costs of the assumption of credit risk include the assumption of the

debts and charges of the related supplier attributable to export sales that are allowed as deductions under section 166.

(ii) With respect to insurance, the direct costs of the assumption of credit risk are the costs of obtaining insurance against the risk of nonpayment. Qualifying insurance must be obtained from an unrelated insurer and must cover the risk of nonpayment due to default and bankruptcy by the purchaser. Insurance obtained from a related insurer, or insurance that covers default and bankruptcy due to risks of war or political unrest without covering ordinary default or bankruptcy is not sufficient.

(iii) With respect to investigating credit, the direct costs of assumption of credit risk are the external costs of investigating credit for customers or potential customers, including costs of membership in a credit agency or association for that purpose (but not the costs of approving credit by an internal credit agency).

(iv) With respect to factoring trade receivables, the direct costs of assumption of credit risk are the costs of factoring trade receivables of related and unrelated customers (*e.g.* the amount of the discount and the fees relating to factoring).

(v) With respect to letters of credit or banker's acceptances, the direct costs of assumption of credit risk are the costs of letters of credit or banker's acceptances and the documentary collection costs.

(3) *Location of assumption of credit risk.* The location of the activity of assumption of credit risk is the location of the customer or obligor whose payment is at risk, except that the location of investigating credit is the location of the credit agency or association performing the investigation. A foreign branch of a United States corporation and a foreign office of the United States government are not foreign obligors for purposes of this test. A foreign branch of a United States credit investigation agency or association, however, is treated as located outside the United States.

(4) *Special rules*—(i) *Assuming the risk of a bad debt*—(A) *In general.* If a FSC chooses to bear the economic risk of nonpayment by assuming the risk of a bad debt with respect to a transaction or grouping of transactions and an actual bad debt loss on a foreign trading gross receipt is not incurred in any three consecutive years, the FSC will be deemed to have performed this activity during the first two years of the three year period. For the third year, the FSC will not be deemed to have performed this activity and must satisfy the 85 percent foreign direct costs test by satisfying any two paragraphs included within section 924(e) other than assumption of credit risk activity under section 924(e)(5). An actual bad debt loss will only satisfy the activity test with respect to a single three consecutive year period.

(B) *Example.* The principles of this paragraph may be illustrated by the following example:

Example. In year 1, a related supplier of a commission FSC incurs a bad debt with respect to foreign trading gross receipts owed by a foreign obligor. This expense is the only bad debt incurred with respect to foreign trading gross receipts in year 1. Therefore, the direct costs for the bearing of the economic risk of nonpayment for year 1 are all foreign direct costs and the 85-percent test is satisfied. In year 2, the FSC incurs a bad debt with respect to a U.S. broker/consolidator. The direct costs for year 2 are U.S. direct costs and, therefore, the 85-percent test is not satisfied. No bad debt is incurred in year 3. Because a bad debt with respect to a foreign obligor is incurred in year 1, the FSC is deemed to have satisfied the economic risk of nonpayment for each of years 1, 2 and 3.

(ii) *Grouping with respect to other risk activities.* For taxable years beginning after February 19, 1987, if a FSC elects to bear the economic risk of nonpayment by performing one of the activities described in paragraph (e) of this section and elects to group transactions, it is considered to have performed the elected activity with respect to all transactions within the group during the taxable year if it performs the activity in accordance with the following rules. If a FSC elects to factor trade receivables, at least 20 percent of the face amount of a group's receivables must be factored. If a FSC elects to sell by means of letters of credit or banker's acceptances, a fee must be incurred with respect to 20 percent of the foreign trading gross receipts attributable to sales within the group. If the FSC elects to obtain insurance to cover nonpayment, 20 percent of the face amount of receivables attributable to sales included in the §1.924(d)–1(e) grouping elected by the FSC must be insured. If a FSC elects to investigate credit of customers or potential customers, 20 percent of new or potential customers for which a credit investigation is performed must be investigated.

[T.D. 8125, 52 FR 5094, Feb. 19, 1987]

§1.925(a)–1T Temporary regulations; transfer pricing rules for FSCs.

(a) *Scope*—(1) *Transfer pricing rules.* In the case of a transaction described in paragraph (b) of this section, section 925 permits a related party to a FSC to determine the allowable transfer price charged the FSC (or commission paid to the FSC) by its choice of the three transfer pricing methods described in paragraphs (c)(2), (3), and (4) of this section: The ''1.83 percent'' gross receipts method and the ''23 percent'' combined taxable income method (the administrative pricing rules) of section 925(a)(1) and (2), respectively, and the section 482 method of section 925(a)(3). (Any further reference to a FSC in this section shall include a small FSC unless indicated otherwise.) Subject to the special no-loss rule of §1.925(a)–1T(e)(1)(iii), any, or all, of the transfer pricing methods may be used in the same taxable year of the FSC for separate transactions (or separate groups of transactions). If either of the administrative pricing methods (the gross receipts method or combined taxable income method) is applied to a transaction, the Commissioner may not make distributions, apportionments, or allocations as provided by section 482 and the regulations under that section. The transfer price charged the FSC (or the commission paid to the FSC) on a transaction with a person that is not a related party to the FSC may be determined in any manner agreed to by the FSC and that person. However, the Commissioner will use special scrutiny to determine whether a person selling export property to a FSC (or paying a commission to a FSC) is a related party to the FSC with respect to a transaction if the FSC earns a profit on the transaction in excess of the profit it would have earned had the administrative pricing rules applied to the transaction.

(2) *Special rules.* For rules as to certain ''incomplete transactions'' and for computing full costing combined taxable income, see paragraphs (c)(5) and (6) of this section. For a special rule as to cooperatives and computation of their combined taxable incomes, see paragraph (c)(7) of this section. Grouping of transactions for purposes of applying the administrative pricing method chosen is provided for by paragraph (c)(8) of this section.

The rules in paragraph (c) of this section are directly applicable only in the case of sales or exchanges of export property to a FSC for resale, and are applicable by analogy to leases, commissions, and services as provided in paragraph (d) of this section. For a rule providing for the recovery of the FSC's costs in an overall loss situation, see paragraph (e)(1)(i) of this section. Paragraph (e)(2) of this section provides for the applicability of section 482 to resales by the FSC to related persons or to sales between related persons prior to the sale to the FSC. Paragraph (e)(3) of this section provides for the creation of receivables if the transfer price, rental payment, commission or payment for services rendered is not paid by the due date of the FSC's income tax return for the taxable year under section 6072(b), including extensions provided for by section 6081. Provisions for the subsequent determination and further adjustment to the relevant amounts are set forth in paragraphs (e)(4) and (5) of this section. Paragraph (f) of this section has several examples illustrating the provisions of this section. Section 1.925(b)–1T prescribes the marginal costing rules authorized by section 925(b)(2). Section 1.927(d)–2T provides definitions of related supplier and related party.

(3) *Performance of substantial economic functions*—(i) *Administrative pricing methods.* The application of the administrative pricing methods of section 925 (a)(1) and (2) does not depend on the extent to which the FSC performs substantial economic functions beyond those required by section 925(c). See

paragraph (b)(2)(ii) of this section and § 1.924(a)–1T(i)(1).

(ii) *Section 482 method.* In order to apply the section 482 method of section 925(a)(3), the arm's length standards of section 482 and the regulations under that section must be satisfied. In applying the standards of section 482, all of the rules of section 482 will apply. Thus, if the FSC would not be recognized as a separate entity, it would also not be recognized on application of the section 482 method. Similarly, if a FSC performs no substantial economic function with respect to a transaction, no income will be allocable to the FSC under the section 482 method. See § 1.924(a)–1T(i)(2). If a related supplier performs services under contract with a FSC, the FSC will not be deemed to have performed substantial economic functions for purposes of the section 482 method unless it compensates the related supplier under the provisions of § 1.482–2(b)(1) through (7). See § 1.925(a)–1T(c)(6)(ii) for the applicability of the regulations under section 482 in determination of the FSC's profit under the administrative pricing methods.

(b) *Transactions to which section 925 applies*—(1) *In general.* The transfer pricing methods of section 925 (the administrative pricing methods and the section 482 method) will apply, generally, only if a transaction, or group of transactions, gives rise to foreign trading gross receipts (within the meaning of section 924(a) and § 1.924(a)–1T) to the FSC (or small FSC, as defined in section 922(b) and § 1.921–2(b) (Q&A3)). However, the transfer pricing methods will apply as well if the FSC is acting as commission agent for a related supplier with regard to a transaction, or group of transactions, on which the related supplier is the principal if the transaction, or group of transactions, would have resulted in foreign trading gross receipts had the FSC been the principal.

(2) *Application of the transfer pricing rules*—(i) *Section 482 method.* The section 482 transfer pricing method may be applied to any transaction between a related supplier and a FSC if the requirements of paragraph (a)(3)(ii) of this section have been met.

(ii) *Administrative pricing methods.* The administrative pricing methods may be applied in situations in which the FSC is either the principal or commission agent on the transaction, or group of transactions, only if the requirements of section 925(c) are met. Section 925(c) requires that the FSC performs all the activities described in subsections (d)(1)(A) and (e) of section 924 that are attributable to a particular transaction, or group of transactions. The FSC need not perform any activities with respect to a particular transaction merely to comply with section 925(c) if that activity would not have been performed but for the requirements of that subsection. The FSC need not perform all of the activities outside the United States. None of the activities need be performed outside the United States by a small FSC. Rather than the FSC itself performing the activities required by section 925(c), another person under contract, written or oral, directly or indirectly, with the FSC may perform the activities (see § 1.924(d)–1(b)). If a related supplier is performing the required activities on behalf of the FSC with regard to a transaction, or group of transactions, the requirements of section 925(c) will be met if the FSC pays the related supplier an amount equal to the direct and indirect expenses related to the required activities. See paragraph (c)(6)(ii) of this section for the amount of compensation due the related supplier. The payment made to the related supplier must be reflected on the FSC's books and must be taken into account in computing the FSC's and related supplier's combined taxable income. If it is determined that the related supplier was not compensated for all the expenses related to the required activities or if the entire payment is not reflected on the FSC's books or in computing combined taxable income, the administrative pricing methods may be used but proper adjustments will be made to the FSC's and related supplier's books or income. At the election of the FSC and related supplier, the requirements of section 925(c) will be deemed to have been met if the related supplier is paid by the FSC an amount equal to all of the costs under paragraph (c)(6)(iii)(D) of this section (limited by paragraph (c)(6)(ii) of this section) related to the export sale, other than expenses relating to activities performed directly by the FSC or by a person other than the related supplier, and if that payment is reflected on the FSC's books and in computing the FSC's and related supplier's combined taxable income on the transaction, or group of transactions. If it is determined that the related supplier was not compensated for all its expenses or if the entire payment is not reflected on the FSC's books or in computing combined taxable income, the administrative pricing methods may be used but proper adjustments will be made to the FSC's and related supplier's books or income. All activities that are performed in connection with foreign military sales are considered to be performed by the FSC, or under contract with the FSC, if they are performed by the United States government even though the United States government has not contracted for the performance of those activities. All actual costs incurred by the FSC and related supplier in connection with the performance of those activities must be taken into account, however, in determining the combined taxable income of the FSC and related supplier.

(iii) *Allowable transactions for purposes of the administrative pricing methods.* If the required performance of activities has been met, the administrative pricing methods may be applied to a transaction between a related supplier and a FSC only in the following circumstances.

(A) The related supplier sells export property (as defined in section 927(a) and §1.927(a)–1T) to the FSC for resale or the FSC acts as a commission agent for the related supplier on sales by the related supplier of export property to third parties, whether or not related parties. For purposes of this section, references to sales include references to exchanges or other dispositions.

(B) The related supplier leases export property to the FSC for sublease for a comparable period with comparable terms of payment, or the FSC acts as commission agent for the related supplier on leases of export property by the related supplier, to third parties whether or not related parties.

(C) Services are furnished by a FSC as principal or by a related supplier if a FSC is a commission agent for the related supplier which are related and subsidiary to any sale or lease by the FSC, acting as principal or commission agent, of export property under subdivision (iii)(A) and (B) of this paragraph.

(D) Engineering or architectural services for construction projects located (or proposed for location) outside of the United States are furnished by the FSC if the FSC is acting as principal, or by the related supplier if the FSC is a commission agent for the related supplier, with respect to the furnishing of the services to a third party whether or not a related party.

(E) The FSC acting as principal, or the related supplier where the FSC is a commission agent, furnishes managerial services in furtherance of the production of foreign trading gross receipts of an unrelated FSC or the production of qualified export receipts of an unrelated interest charge DISC.

This subdivision (iii)(E) shall not apply for any taxable year unless at least 50 percent of the gross receipts for such taxable year of the FSC or of the related supplier, whichever party furnishes the managerial services, is derived from activities described in subdivision (iii)(A), (B), or (C) of this paragraph.

(c) *Transfer price for sales of export property*—(1) *In general.* Under this paragraph, rules are prescribed for computing the allowable price for a transfer from a related supplier to a FSC in the case of a sale, described in paragraph (b)(2)(iii)(A) of this section, of export property.

(2) *The "1.83 percent" gross receipts method.* Under the gross receipts method of pricing, described in section 925(a)(1), the transfer price for a sale by the related supplier to the FSC is the price as a result of which the profit derived by the FSC from the sale will not exceed 1.83 percent of the foreign trading gross receipts of the FSC derived from the sale of the export property. Pursuant to section 925(d), the amount of profit derived by the FSC under this method may not exceed twice the amount of profit determined under, at the related supplier's election, either the combined taxable income method of §1.925(a)–1T(c)(3) or the marginal

costing rules of §1.925(b)–1T. For FSC taxable years beginning after December 31, 1986, if the related supplier elects to determine twice the profit determined under the combined taxable income method using the marginal costing rules, because of the no-loss rule of §1.925(a)–1T(e)(1)(i), the profit that may be earned by the FSC is limited to 100% of the full costing combined taxable income as determined under §1.925(a)–1T(c)(3) and (6). Interest or carrying charges with respect to the sale are not foreign trading gross receipts.

(3) *The "23 percent" combined taxable income method.* Under the combined taxable income method of pricing, described in section 925(a)(2), the transfer price for a sale by the related supplier to the FSC is the price as a result of which the profit derived by the FSC from the sale will not exceed 23 percent of the full costing combined taxable income (as defined in paragraph (c)(6) of this section) of the FSC and the related supplier attributable to the foreign trading gross receipts from such sale.

(4) *Section 482 method.* If the methods of paragraph (c)(2) and (3) of this section are inapplicable to a sale or if the related supplier does not choose to use them, the transfer price for a sale by the related supplier to the FSC is to be determined on the basis of the sales price actually charged but subject to the rules provided by section 482 and the regulations for that section and by §1.925(a)–1T(a)(3)(ii).

(5) *Incomplete transactions.* (i) For purposes of the gross receipts and combined taxable income methods, if export property which the FSC purchased from the related supplier is not resold by the FSC before the close of either the FSC's taxable year or the taxable year of the related supplier during which the export property was purchased by the FSC from the related supplier, then—

(A) The transfer price of the export property sold by the FSC during that year shall be computed separately from the transfer price of the export property not sold by the FSC during that year.

(B) With respect to the export property not sold by the FSC during that year, the transfer price paid by the FSC for that year shall be the related supplier's cost of goods sold (see paragraph (c)(6)(iii)(C) of this section) with respect to the property.

(C) For the subsequent taxable year during which the export property is resold by the FSC, an additional amount shall be paid by the FSC (to be treated as income for the later year in which it is received or accrued by the related supplier) equal to the excess of the amount which would have been the transfer price under this section had the transfer to the FSC by the related supplier and the resale by the FSC taken place during the taxable year of the FSC during which it resold the property over the amount already paid under subdivision (B) of this paragraph.

(D) The time and manner of payment of transfer prices required by subdivisions (i)(B) and (C) of this paragraph shall be determined under paragraphs (e)(3), (4) and (5) of this section.

(ii) For purposes of this paragraph, a FSC may determine the year in which it received property from a related supplier and the year in which it resells property in accordance with the method of identifying goods in its inventory properly used under section 471 or section 472 (relating respectively to the general rule for inventories and to the rule for LIFO inventories). Transportation expense of the related supplier in connection with a transaction to which this paragraph applies shall be treated as an item of cost of goods sold with respect to the property if the related supplier includes the cost of intracompany transportation between its branches, divisions, plants, or other units in its cost of goods sold (see paragraph (c)(6)(iii)(C) of this section).

(6) *Full costing combined taxable income*—(i) *In general.* For purposes of section 925 and this section, if a FSC is the principal on the sale of export property, the full costing combined taxable income of the FSC and its related supplier from the sale is the excess of the foreign trading gross receipts of the FSC from the sale over the total costs of the FSC and related supplier including the related supplier's cost of goods sold and its and the FSC's noninventoriable costs (see §1.471–11(c)(2)(ii)) which relate to the foreign trading gross receipts. Interest

or carrying charges with respect to the sale are not foreign trading gross receipts.

(ii) *Section 482 applicability.* Combined taxable income under this paragraph shall be determined after taking into account under paragraph (e)(2) of this section all adjustments required by section 482 with respect to transactions to which the section is applicable. If a related supplier performs services under contract with a FSC, the FSC shall compensate the related supplier an arm's length amount under the provisions of §1.482–2(b) (1) through (6). Section 1.482–2(b)(7), which provides that an arm's length charge shall not be deemed equal to costs or deductions with respect to services which are an integral part of the business activity of either the member rendering the services (*i.e.*, the related supplier) or the member receiving the benefit of the services (*i.e.*, the FSC), shall not apply if the administrative pricing methods of section 925(a)(1) and (2) are used to compute the FSC's profit and if the related supplier is the person rendering the services. Section 1.482–2(b)(7) shall apply, however, if a related person other than the related supplier is the person rendering the services or if the section 482 method of section 925(a)(3) is used to compute the FSC's profit. See §1.925(a)–1T(a)(3)(ii). For a special rule for computation of combined taxable income where the related supplier is a qualified cooperative shareholder of the FSC, see paragraph (c)(7) of this section.

(iii) *Rules for determination of gross receipts and total costs.* In determining the gross receipts of the FSC and the total costs of the FSC and related supplier which relate to such gross receipts, the rules set forth in subdivisions (iii)(A) through (E) of this paragraph shall apply.

(A) Subject to the provisions of subdivisions (iii)(B) through (E) of this paragraph, the methods of accounting used by the FSC and related supplier to compute their taxable incomes will be accepted for purposes of determining the amounts of items of income and expense (including depreciation) and the taxable year for which those items are taken into account.

(B) A FSC may, generally, choose any method of accounting permissible under section 446(c) and the regulations under that section. However, if a FSC is a member of a controlled group (as defined in section 927(d)(4) and §1.924(a)–1T(h)), the FSC may not choose a method of accounting which, when applied to transactions between the FSC and other members of the controlled group, will result in a material distortion of the income of the FSC or of any other member of the controlled group. Changes in the method of accounting of a FSC are subject to the requirements of section 446(e) and the regulations under that section.

(C) Cost of goods sold shall be determined in accordance with the provisions of §1.61–3. See sections 471 and 472 and the regulations thereunder with respect to inventories. With respect to property to which an election under section 631 applies (relating to cutting of timber considered as a sale or exchange), cost of goods sold shall be determined by applying §1.631–1 (d)(3) and (e) (relating to fair market value as of the beginning of the taxable year of the standing timber cut during the year considered as its cost).

(D) Costs (other than cost of goods sold) which shall be treated as relating to gross receipts from sales of export property are the expenses, losses, and deductions definitely related, and therefore allocated and apportioned thereto, and a ratable part of any other expenses, losses, or deductions which are not definitely related to any class of gross income, determined in a manner consistent with the rules set forth in §1.861–8. The deduction for depletion allowed by section 611 relates to gross receipts from sales of export property and shall be taken into account in computing the combined taxable income of the FSC and its related supplier.

(7) *Cooperatives and combined taxable income method.* If a qualified cooperative, as defined in section 1381(a), sells export property to a FSC of which it is a shareholder, the combined taxable income of the FSC and the cooperative shall be computed without taking into account deductions allowed under section 1382 (b) and (c) for patronage dividends, per-unit retain allocations and

nonpatronage distributions. The FSC and cooperative must take into account, however, when computing combined taxable income, the cooperative's cost of goods sold, or cost of purchases.

(8) *Grouping transactions.* (i) The determinations under this section are to be made on a transaction-by-transaction basis. However, at the annual choice made by the related supplier if the administrative pricing methods are used, some or all of these determinations may be made on the basis of groups consisting of products or product lines. The election to group transactions shall be evidenced on Schedule P of the FSC's timely filed U.S. income tax return (including extensions thereof) for the taxable year. No untimely or amended returns will be allowed to elect to group, to change a grouping basis, or to change from a grouping basis to a transaction-by-transaction basis. The rules of the previous two sentences of this paragraph (c)(8)(i) are applicable to taxable years beginning after December 31, 1997. For any taxable year beginning before January 1, 1998, for which a redetermination is otherwise permissible under paragraph (e)(4) of this section as in effect for taxable years beginning before January 1, 1998, a redetermination of grouping of transactions cannot be made later than the due date of the FSC's timely filed U.S. income tax return (including extensions thereof) for the FSC's first taxable year beginning after December 31, 1997. The language ''or grouping of transactions'' is removed from the fourth sentence of paragraph (e)(4) of this section, applicable to taxable years beginning after December 31, 1997.

(ii) A determination by the related supplier as to a product or a product line will be accepted by a district director if such determination conforms to either of the following standards: Recognized trade or industry usage, or the two-digit major groups (or any inferior classifications or combinations thereof, within a major group) of the Standard Industrial Classification as prepared by the Statistical Policy Division of the Office of Management and Budget, Executive Office of the President. A product shall be included in only one product line for purposes of this section if a product otherwise falls within more than one product line classification.

(iii) A choice by the related supplier to group transactions for a taxable year on a product or product line basis shall apply to all transactions with respect to that product or product line consummated during the taxable year. However, the choice of a product or product line grouping applies only to transactions covered by the grouping and, as to transactions not encompassed by the grouping, the determinations are to be made on a transaction-by-transaction basis. For example, the related supplier may choose a product grouping with respect to one product and use the transaction-by-transaction method for another product within the same taxable year. Sale transactions may not be grouped, however, with lease transactions.

(iv) For purposes of this section, transactions involving military property, as defined in section 923(a)(5) and § 1.923–1T(b)(3)(ii), may be grouped only with other military property included within the same product or product line grouping determined under the standards of subdivision (8)(ii) of this paragraph. Non-military property included within a product or product line grouping which includes military property may be grouped, at the election of the related supplier, under the general grouping rules of subdivisions (i) through (iii) of this paragraph.

(v) A special grouping rule applies to agricultural and horticultural products sold to the FSC by a qualified cooperative if the FSC satisfies the requirements of section 923(a)(4). Section 923(a)(4) increases the amount of the FSC's exempt foreign trade income with regard to sales of these products, see § 1.923–1T(b)(2). This special grouping rule provides that if the related supplier elects to group those products that no other export property may be included within that group. Export property which would have been grouped under the general grouping rules of subdivisions (i) through (iii) of this paragraph with the export property covered by this special grouping rule may be grouped, however, at the election of the related supplier, under the general grouping rules.

(vi) For rules as to grouping certain related and subsidiary services, see paragraph (d)(3)(ii) of this section.

(vii) If there is more than one FSC (or more than one small FSC) within a controlled group of corporations, the same grouping of transactions, if any, must be used by all FSCs (or small FSCs) within the controlled group. If the same grouping of transactions is required by this subdivision, and if grouping is elected, the same transfer pricing method must be used to determine each FSC's (or small FSC's) taxable income with respect to that grouping.

(viii) The product or product line groups that are established for purposes of determining combined taxable income may be different from the groups that are established with regard to economic processes (see §1.924(d)–1(e)).

(d) *Rules under section 925(a)(1) and (2) for transactions other than sales by a FSC.* The following rules are prescribed for purposes of applying the gross receipts method or combined taxable income method to transactions other than sales by a FSC.

(1) *Leases.* In the case of a lease of export property by a related supplier to a FSC for sublease by the FSC, the amount of rent the FSC must pay to the related supplier shall be computed in a manner consistent with the rules in paragraph (c) of this section for computing the transfer price in the case of sales and resales of export property under the gross receipts method or combined taxable income method. Transactions may not be so grouped on a product or product line basis under the rules of paragraph (c)(8) of this section as to combine in any one group of transactions both lease transactions and sale transactions.

(2) *Commissions.* If any transaction to which section 925 applies is handled on a commission basis for a related supplier by a FSC and if commissions paid to the FSC give rise to gross receipts to the related supplier which would have been foreign trading gross receipts under section 924(a) had the FSC made the sale directly then—

(i) The administrative pricing methods of section 925(a)(1) and (2) may be used to determine the FSC's commission income only if the requirements of section 925(c) (relating to activities that must be performed in order to use the administrative pricing methods) are met, see §1.925(a)–1T(b)(2)(ii).

(ii) The amount of the income that may be earned by the FSC in any year is the amount, computed in a manner consistent with paragraph (c) of this section, which the FSC would have been permitted to earn under the gross receipts method, the combined taxable income method, or the section 482 method if the related supplier had sold (or leased) the property or service to the FSC and the FSC had in turn sold (or subleased) to a third party, whether or not a related party.

(iii) The combined taxable income of a FSC and the related supplier from the transaction is the excess of the related supplier's gross receipts from the transaction which would have been foreign trading gross receipts had the sale been made by the FSC directly over the related supplier's and the FSC's total costs, excluding the commission paid or payable to the FSC, but including the related supplier's cost of goods sold and its and the FSC's noninventoriable costs (see §1.471–11(c)(2)(ii)) which relate to the gross receipts from the transaction. The related supplier's gross receipts for purposes of the administrative pricing methods shall be reduced by carrying charges, if any, as computed under §1.927(d)–1(a)(Q&A2). These carrying charges shall remain income of the related supplier.

(iv) The maximum commission the FSC may charge the related supplier is the amount of income determined under subdivisions (ii) and (iii) of this paragraph plus the FSC's total costs for the transaction as determined under paragraph (c)(6) of this section.

(3) *Receipts from services*—(i) *Related and subsidiary services attributable to the year of the export transaction.* The gross receipts for related and subsidiary services described in paragraph (b)(2)(iii)(C) of this section shall be treated as part of the receipts from the export transaction to which such services are related and subsidiary, but only if, under the arrangement between the FSC and its related supplier and the accounting method otherwise employed by the FSC, the income from

such services is includible for the same taxable year as income from such export transaction.

(ii) *Other services.* Income from the performance of related and subsidiary services will be treated as a separate type of income if subdivision (i) of this paragraph does not apply. Income from the performance of engineering and architectural services and certain managerial services, as defined in paragraphs (b)(2)(iii)(D) and (E), respectively, of this section, will in all situations be treated as separate types of income. If this subdivision (ii) applies, the amount of taxable income which the FSC may derive for any taxable year shall be determined under the arrangement between the FSC and its related supplier and shall be computed in a manner consistent with the rules in paragraph (c) of this section for computing the transfer price in the case of sales for resale of export property under the transfer pricing rules of section 925. Related and subsidiary services to which the above subdivision (i) of this paragraph does not apply may be grouped, under the rules for grouping of transactions in paragraph (c)(8) of this section, with the products or product lines to which they are related and subsidiary, so long as the grouping of services chosen is consistent with the grouping of products or product lines chosen for the taxable year in which either the products or product lines were sold or in which payment for the services is received or accrued. Grouping of transactions shall not be allowed with respect to the determination of taxable income which the FSC may derive from services described in paragraph (b)(2)(iii)(D) or (E) of this section whether performed by the FSC or by the related supplier. Those determinations shall be made only on a transaction-by-transaction basis.

(e) *Special rules for applying paragraphs (c) and (d) of this section*—(1) *Limitation on FSC income (''no loss'' rules).* (i) If there is a combined loss on a transaction or group of transactions, a FSC may not earn a profit under either the combined taxable income method or the gross receipts method. Also, for FSC taxable years beginning after December 31, 1986, in applying the gross receipts method, the FSC's profit may not exceed 100% of full costing combined taxable income determined under the full costing method of § 1.925(a)–1T(c)(3) and (6). This rule prevents pricing at a loss to the related supplier. The related supplier may in all situations set a transfer price or rental payment or pay a commission in an amount that will allow the FSC to recover an amount not in excess of its costs, if any, even if to do so would create, or increase, a loss in the related supplier.

(ii) For purposes of determining whether a combined loss exists, the basis for grouping transactions chosen by the related supplier under paragraph (c)(8) of this section for the taxable year shall apply.

(iii) If a FSC recognizes income while the related supplier recognizes a loss on a sale transaction under the section 482 method, neither the combined taxable income method nor the gross receipts method may be used by the FSC and related supplier (or by a FSC in the same controlled group and the related supplier) for any other sale transaction, or group of sale transactions, during a year which fall within the same three digit Standard Industrial Classification as the subject sale transaction. The reason for this rule is to prevent the segregation of transactions for the purposes of allowing the related supplier to recognize a loss on the subject transactions, while allowing the FSC to earn a profit under the administrative pricing methods on other transactions within the same three digit Standard Industrial Classification.

(2) *Relationship to section 482.* In applying the administrative pricing methods, it may be necessary to first take into account the price of a transfer (or other transaction) between the related supplier (or FSC) and a related party which is subject to the arm's length standard of section 482. Thus, for example, if a related supplier sells to a FSC export property which the related supplier purchased from related parties, the costs taken into account in computing the combined taxable income of the FSC and the related supplier are determined after any necessary adjustment under section 482 of the price paid by the related supplier

to the related parties. In applying section 482 to a transfer by a FSC to a related party, the parties are treated as if they were a single entity carrying on all the functions performed by the FSC and the related supplier with respect to the transaction. The FSC shall be allowed to receive under the section 482 standard the amount the related supplier would have received had there been no FSC.

(3) *Creation of receivables.* (i) If the amount of the transfer price or rental payment actually charged by a related supplier to a FSC or the sales commission actually charged by a FSC to a related supplier has not been paid, an account receivable and payable will be deemed created as of the due date under section 6072(b), including extensions provided for under section 6081, of the FSC's tax return for the taxable year of the FSC during which a transaction to which section 925 is applicable occurs. The receivable and payable will be in an amount equal to the difference between the amount of the transfer price or rental payment or commission determined under section 925 and this section and the amount (if any) actually paid or received. For example, a calendar year FSC's related supplier paid the FSC on July 1, 1985, a commission of $50 on the sale of export property. On September 15, 1986, the extended due date of the FSC's income tax return for taxable year 1985, the related supplier determined that the commission should have been $60. The additional $10 of commission had not been paid. Accordingly, an interest-bearing payable to the FSC from the related supplier in the amount of $10 was created as of September 15, 1986. A $10 interest bearing receivable was also created on the FSC's books.

(ii) An indebtedness arising under the above subdivision (i) shall bear interest at an arm's length rate, computed in the manner provided by §1.482–2(a)(2), from the due date under section 6072(b), including extensions provided for under section 6081, of the FSC's tax return for the taxable year of the FSC in which the transaction occurred which gave rise to the indebtedness to the date of payment of the indebtedness. The interest so computed shall be accrued and included in the taxable income of the person to whom the indebtedness is owed for each taxable year during which the indebtedness is unpaid if that person is an accrual basis taxpayer or when the interest is paid if a cash basis taxpayer. Because the transactions covered by this subdivision are between the related supplier and FSC, the carrying charges provisions of §1.927(d)–1(a) do not apply.

(iii) Payment of dividends, transfer prices, rents, commissions, service fees, receivables, or payables may be in the form of money, property, sales discount, or an accounting entry offsetting the amount due the related supplier, or FSC, whichever applies, against an existing debt of the other party to the transaction. This provision does not eliminate the requirement that actual cash payments be made by the related supplier to a commission FSC if the receipt of payment test of section 924(e)(4) is used to meet the foreign economic process requirements of section 924(d). The offset accounting entries must be clearly identified in both the related supplier's and FSC's books of account.

(4) *Subsequent determination of transfer price, rental income or commission.* The FSC and its related supplier would ordinarily determine under section 925 and this section the transfer price or rental payment payable by the FSC or the commission payable to the FSC for a transaction before the FSC files its return for the taxable year of the transaction. After the FSC has filed its return, a redetermination of those amounts by the Commissioner may only be made if specifically permitted by a Code provision or regulations under the Code. Such a redetermination would include a redetermination by reason of an adjustment under section 482 and the regulations under that section or section 861 and §1.861–8 which affects the amounts which entered into the determination. In addition, a redetermination may be made by the FSC and related supplier if their taxable years are still open under the statute of limitations for making claims for refund under section 6511 if they determine that a different transfer pricing method may be more beneficial. Also, the FSC and related supplier may redetermine the amount of

foreign trading gross receipts and the amount of the costs and expenses that are used to determine the FSC's and related supplier's profits under the transfer pricing methods. Any redetermination shall affect both the FSC and the related supplier. The FSC and the related suppler may not redetermine that the FSC was operating as a commission FSC rather than a buy-sell FSC, and vice versa. For the election to group transactions for purposes of applying the administrative pricing methods, see paragraph (c)(8)(i) of this section.

(5) *Procedure for adjustments to redeterminations.* (i) If a redetermination under paragraph (e)(4) of this section is made of the transfer price, rental payment or commission for a transaction, or group of transactions, the person who was underpaid under this redetermination shall establish (or be deemed to have established), at the date of the redetermination, an account receivable from the person with whom it engaged in the transaction equal to the difference between the amounts as redetermined and the amounts (if any) previously paid and received, plus the amount (if any) of the account receivable determined under paragraph (e)(3) of this section that remains unpaid. A corresponding account payable will be established by the person who underpaid the amount due.

(ii) An account receivable established in accordance with the above subdivision (5)(i) of this paragraph shall bear interest at an arm's length rate, computed in the manner provided by § 1.482–2(a)(2), from the day after the date the account receivable is deemed established to the date of payment. The interest so computed shall be accrued and included in the taxable income for each taxable year during which the account receivable is outstanding of an accrual basis taxpayer or when paid if a cash basis taxpayer.

(iii) In lieu of establishing an account receivable in accordance with the above subdivision (5)(i) of this paragraph for all or part of an amount due a related supplier, the related supplier and FSC are permitted to treat all or part of any current or prior distribution which was made by the FSC as an additional payment of transfer price or rental payment or repayment of commission (and not as a distribution) made as of the date the distribution was made. Any additional amount arising on the redetermination due the related supplier after this treatment shall be represented by an account receivable established under the above subdivision (5)(i) of this paragraph. To the extent that a distribution is so treated under this subdivision (5)(iii), it shall cease to qualify as a distribution for any Federal income tax purpose. If all or part of any distribution made to a shareholder other than the related supplier is recharacterized under this subdivision (5)(iii), the related supplier shall establish an account receivable from that shareholder for the amount so recharacterized. The Commissioner may prescribe by Revenue Procedure conditions and procedures that must be met in order to obtain the relief provided by this subdivision (5)(iii).

(iv) The procedure for adjustments to transfer price provided by this paragraph does not apply to incomplete transactions described in paragraph (c)(5) of this section. Such procedure will, however, be applied to any such transaction with respect to the taxable year in which the transaction is completed.

(f) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. In 1985, F, a FSC, purchases export property from R, a domestic manufacturer of export property A. R is F's related supplier. The sale from R to F is made under a written agreement which provides that the transfer price between R and F shall be that price which allocates to F the maximum amount permitted to be received under the transfer pricing rules of section 925. F resells property A in 1985 to an unrelated purchaser for $1,000. The terms of the sales contract between F and the unrelated purchaser provide that payment of the $1,000 sales price will be made within 90 days after sale. The purchaser pays the entire sales price within 60 days. F incurs indirect and direct expenses in the amount of $260 attributable to the sale which relate to the activities and functions referred to in section 924 (c), (d) and (e). In addition, F incurs additional expenses attributable to the sale in the amount of $35. R's cost of goods sold attributable to the export property is $550. R incurred direct selling expenses in connection with the sale of $50. R's deductible general and administrative expenses allocable to all gross income are $200.

Apportionment of those supportive expenses on the basis of gross income does not result in a material distortion of income and is a reasonable method of apportionment. R's direct selling expenses and its general and administrative expenses were not required to be incurred by F. R's gross income from sources other than the transaction is $17,550 resulting in total gross income of R and F (excluding the transfer price paid by F) of $18,000 ($450 plus $17,550). For purposes of this example, it is assumed that if R sold the export property to F for $690, the price could be justified as satisfying the standards of section 482. Under these facts, F may earn, under the combined taxable income method, the more favorable of the three transfer pricing rules, a profit of $23 on the sale. (Unless otherwise indicated, all examples in this section assume that the marginal costing method of §1.925(b)–1T does not result in a higher profit than the profit under the full costing combined taxable income method of paragraphs (c)(3) and (6) of this section.) F's profit and the transfer price to F from the transaction, using the administrative pricing methods, and F's profit if the transfer price is determined under section 482, would be as follows:

Combined taxable income:	
F's foreign trading gross receipts	$1,000.00
R's cost of goods sold	(550.00)
Combined gross income	450.00
Less:	
R's direct selling expenses	50.00
F's expenses	295.00
Apportionment of R's general and administrative expenses:	
R's total G/A expenses	200.00
Combined gross income	450.00
R's and F's total gross income (foreign and domestic)	18,000.00
Apportionment of G/A expenses:	
$200×$450/$18,000	5.00
Total	(350.00)
Combined taxable income	100.00

The section 482 method—Transfer price to F and F's profit:	
Transfer price to F	$690.00
F's profit:	
F's foreign trading gross receipts	1,000.00
Less:	
F's cost of goods sold	690.00
F's expenses	295.00
Total	(985.00)
F's profit	15.00

The gross receipts method—F's profit and transfer price to F:	
F's profit—lesser of 1.83% of F's foreign trading gross receipts ($18.30) or two times F's profit under the combined taxable income method ($46.00) (See below) (Unless otherwise indicated, all examples in this section assume that the marginal costing method of §1.925(b)–1T does not result in a higher profit than the profit under the full costing combined taxable income method)	18.30
Transfer price to F:	
F's foreign trading gross receipts	1,000.00
Less:	
F's expenses	295.00
F's profit	18.30
Total	(313.30)
Transfer price	686.70

The combined taxable income method— F's profit and transfer price to F:	
F's profit—23% of combined taxable income ($100)	$23.00
Transfer price to F:	
F's foreign trading gross receipts	1,000.00
Less:	
F's expenses	295.00
F's profit	23.00
Total	(318.00)
Transfer price	682.00

With a profit of $23 under the most favorable of the transfer pricing methods, F's exempt foreign trade income under section 923 would be $207.39, computed as follows:

F's foreign trading gross receipts	$1,000.00

F's costs of purchases (transfer price)	(682.00)
F's foreign trade income	318.00
F's exempt foreign trade income $318×15/23	207.39

F's taxable income would be $8.00, computed as follows:

F's foreign trade income	$318.00
F's exempt foreign trade income	(207.39)
F's non-exempt foreign trade income	110.61
Less:	
F's expenses allocable to non-exempt foreign trade income $295×$110.61/$318	(102.61)
F's taxable income	8.00

Of F's total expenses, $192.39 ($295×$207.39/$318) are allocated to F's exempt foreign trade income and are disallowed for purposes of computing F's taxable income.

Example 2. Assume the same facts as in *Example 1* except that the purchaser pays the entire sales price 96 days after delivery, well beyond the 60 day period in which payment must be made to avoid recharacterization of part of the contract price as carrying charges. Therefore, the contract price of $1,000 includes $10 of carrying charges, assuming a discount rate of 10%. See § 1.927(d)–1(a) (Q & A2) for computation method for determining amount of carrying charges. Under these facts, F may earn, under the combined taxable income method, the most favorable of the three transfer pricing rules, a profit of $20.73 on the sale. F's profit and the transfer price to F under the transfer pricing rules, assuming that a carrying charge is incurred, would be as follows:

Combined taxable income:	
F's foreign trading gross receipts	$990.00
R's cost of goods sold	(550.00)
Combined gross income	440.00
Less:	
R's direct selling expenses	50.00
R's apportioned G/A expenses:	
$200×$440/$18,000	4.89
F's expenses	295.00
Total	(349.89)
Combined taxable income	90.11

The combined taxable income method—F's profit and transfer price to F:	
F's profit—23% of combined taxable income ($90.11)	$20.73
Transfer price to F:	
F's foreign trading gross receipts	990.00
Less:	
F's expenses	295.00
F's profit	20.73
Total	(315.73)
Transfer price	674.27

The gross receipts method—F's profit and transfer price to F:	
F's profit—lesser of 1.83% of F's foreign trading gross receipts ($18.12) or two times F's profit under the combined taxable income method ($41.46)	$18.12
Transfer price to F: F's foreign trading gross receipts	990.00
Less:	
F's expenses	295.00
F's profit	18.12
Total	(313.12)
Transfer price	676.88

The section 482 method—Transfer price to F and F's profit:	
Transfer price to F	690.00
F's profit:	
F's foreign trading gross receipts	990.00
Less:	
F's cost of goods sold	690.00
F's expenses	295.00
Total	(985.00)
F's profit	5.00

Example 3. R and F are calendar year taxpayers. R, a domestic manufacturing company, owns all the stock of F, a FSC for the taxable year. During 1985, R produces and sells a product line of export property to F for $157, a price which can be justified as satisfying the arm's length price standard of section 482. The sale from R to F is made under a written agreement which provides that the transfer price between R and F shall be that price which allocates to F the maximum amount permitted to be received under the transfer pricing rules of section

925. F resells the export property for $200. R's cost of goods sold attributable to the export property is $115 so that the combined gross income from the sale of the export property is $85 (*i.e.*, $200 minus $115). R incurs $18 in direct selling expenses in connection with the sale of the property. R's deductible general and administrative expenses allocable to all gross income are $120. R's direct selling and its general and administrative expenses were not required to be incurred by F. R's gross income from sources other than the transaction is $5,015 resulting in total gross income of R and F (excluding the transfer price paid by F) of $5,100 (*i.e.*, $85 plus $5,015). F incurs $50 in direct and indirect expenses attributable to resale of the export property. Of those expenses, $45 relate to activities and functions referred to in section 924 (c), (d) and (e). The maximum profit which F may earn with respect to the product line is $3.66, computed as follows:

Combined taxable income:	
F's foreign trading gross receipts	$200.00
R's cost of goods sold	(115.00)
Combined gross income	85.00
Less:	
R's direct selling expenses	18.00
R's apportioned G/A expenses: $120×$85/$5,100	2.00
F's expenses	50.00
Total	(70.00)
Combined taxable income	15.00
The combined taxable income method—F's profit:	
F's profit—23% of combined taxable income ($15)	$ 3.45
The gross receipts method—F's profit:	
F's profit—lesser of 1.83% of F's foreign trading gross receipts ($3.66) or two times F's profit under the combined taxable income method ($6.90)	$3.66
The section 482 method—F's profit:	
F's foreign trading gross receipts	200.00
Less:	
F's cost of goods sold	157.00
F's expenses	50.00
Total	(207.00)
F's profit (loss)	(7.00)

Since the gross receipts method results in a greater profit to F ($3.66) than does either the combined taxable income method ($3.45) or the section 482 method (a loss of $7), and does not exceed twice the profit under the combined taxable income method, F may earn a maximum profit of $3.66. Accordingly, the transfer price from R to F may be readjusted as long as the transfer price is not readjusted below $146.34, computed as follows:

Transfer price to F:	
F's foreign trading gross receipts	$ 200.00
Less:	
F's expenses	50.00
F's profit	3.66
Total	(53.66)
Transfer price	146.34

Example 4. R and F are fiscal year May 31 year-end taxpayers. R, a domestic manufacturing company, owns all the stock of F, a FSC for the taxable year. During August of 1987, R produces and sells 100 units of export property A to F under a written agreement which provides that the transfer price between R and F shall be that price which allocates to F the maximum profit permitted to be received under the transfer pricing rules of section 925. Thereafter, the 100 units are resold for export by F for $950. R's cost of goods sold attributable to the 100 units is $650. R incurs costs, both direct and indirect, in the amount of $270 with regard to activities and functions referred to in section 924 (c), (d) and (e) which it was under contract with F to perform for F. R's direct selling expenses are $40. Those expenses were not required to be incurred by F. For purposes of this example, assume that R has no general and administrative expenses other than those relating to the section 924 (c), (d) and (e) activities and functions. F incurs expenses in the amount of $290 attributable to the resale which relate to the activities and functions referred to in section 924 (c), (d) and (e). Of that amount, $270 was paid to R under contract to perform the activities in section 924. The remaining $20 was paid to independent contractors. R chooses not to apply the section 482 transfer pricing method to determine F's profit on the transaction. F may not earn any income under either the gross receipts (see the special no-loss rule of paragraph (e)(1)(i) of this section) or the combined taxable income administrative pricing methods with respect to resale of the 100 units because there is a combined loss of $(30) on the transaction, computed as follows:

Combined taxable income:	
F's foreign trading gross receipts	$ 950.00
R's cost of goods sold	(650.00)
Combined gross income	300.00
Less:	
R's direct selling expenses	40.00
F's expenses	290.00
Total	(330.00)
Combined taxable income (loss)	(30.00)

Under paragraph (e)(1)(i) of this section, F is permitted to recover its expenses attributable to the sale ($290) even though such recovery results in a loss or increased loss to the related supplier. Accordingly, the transfer price from R to F may be readjusted as long as the transfer price is not readjusted below $660, computed as follows:

Transfer price to F:	
F's foreign trading gross receipts	$950.00
Less:	
F's expenses	(290.00)
Transfer price	660.00

Example 5. Assume the same facts as in *Example 4* except that F performs the section 924 (c), (d) and (e) activities and functions and that R chooses to apply the section 482 transfer pricing method. Under the standards of section 482, a transfer price from R to F of $650 is an arm's length price. Accordingly, the transfer price to F and F's profit on the subsequent resale of product A ($10) are as follows:

The section 482 method—Transfer price to F and F's profit:	
Transfer price to F	$650.00
F's profit:	
F's foreign trading gross receipts	950.00
F's cost of purchases	(650.00)
F's gross income	300.00
Less:	
F's expenses	(290.00)
F's profit	10.00

This sale of product A results in a loss to R of $40 (transfer price of $650 less R's cost of goods sold of $650 and direct selling expenses of $40). Since R chose to use the section 482 transfer pricing method on this loss transaction, under the special no loss rule of paragraph (e)(1)(iii) of this section, the administrative pricing methods of section 925(a)(1) and (2) may not be used for any other sale transactions, or group of sale transactions, during the same year of other products which fall within the same three digit Standard Industrial Classification as product A. F's profit, if any, on these sales must be computed under the section 482 transfer pricing method.

Example 6. R and F are calendar year taxpayers. R, a domestic manufacturing company, owns all the stock of F, a FSC for the taxable year. During 1985, R manufactures 100 units of export property A. R enters into a written agreement with F whereby F is granted a sales franchise with respect to export property A and F will receive commissions with respect to these exports equal to the maximum amount permitted to be received under the administrative pricing rules of section 925 (a)(1) and (2). Thereafter, the 100 units are sold for export by R for $1,000. The total sales price of $1,000 was paid by the purchaser to R within 60 days of the sales transaction. The entire $1,000 would have been foreign trading gross receipts had F been the principal on the sale. R's cost of goods sold attributable to the 100 units is $650. R's direct selling expenses so attributable are $50. R's deductible general and administrative expenses, other than those attributable to the section 924 (c), (d) and (e) activities and functions, allocable to all gross income are $200. Apportionment of those supportive expenses on the basis of gross income does not result in a material distortion of income and is a reasonable method of apportionment. R's direct selling expenses and the portion of the general and administrative expenses not relating to the activities and functions referred to in section 924 (c), (d) and (e) were not required to be incurred by F. R's gross income from sources other than the transaction is $17,650 resulting in total gross income of $18,000 ($350 plus $17,650). R and a related person perform on F's behalf the activities and functions referred to in section 924 (c), (d) and (e). In performing these activities, R and the related person incurred expenses, both direct and indirect, of $200 and $45, respectively. F pays $200 to R under contract and $50 to the related person. The maximum profit which F may earn under the franchise pursuant to the administrative pricing rules is $18.30, computed as follows:

Combined taxable income:	
R's gross receipts from the sale	$1,000.00
R's cost of goods sold	(650.00)
Combined gross income	350.00

Less:	
R's direct selling expenses	50.00
F's expenses	250.00
Apportionment of R's general and administrative expenses:	
R's total G/A expenses	200.00
Combined gross income	350.00
R's and F's total gross income (foreign and domestic)	18,000.00
Apportionment of G/A expenses:	
$200×$350/$18,000	3.89
Total	(303.89)
Combined taxable income	46.11

As reflected in the above computation, F included on its books $200 of expenses related to the section 924 activities and performed by R on behalf of F. R incurred $253.89 of expenses. These expenses were reflected on its books. Under paragraph (b)(2)(ii) of this section, R and F may elect to include all of the expenses related to the export sales on F's books. This will satisfy the requirements of section 925(c) without requiring an allocation of the expenses between R and F. Under this election, as reflected in the following computation, combined taxable income will still be $46.11 but, as reflected in a later part of this example, the commission due F will be increased by $253.89:

Combined taxable income:	
R's gross receipts from the sale	$1,000.00
R's cost of goods sold	(650.00)
Combined gross income	350.00
Less:	
F's expenses	(303.89)
Combined taxable income	46.11
The combined taxable income method—F's profit:	
F's profit—23% of combined taxable income ($46.11)	$10.61
The gross receipts method—F's profit:	
F's profit—lesser of 1.83% of R's gross receipts ($18.30) or two times F's profit under the combined taxable income method ($21.22)	$18.30

If the election provided for in paragraph (b)(2)(ii) of this section is not made, F may receive a commission from R in the amount of $268.30, computed as follows:

F's expenses	$250.00
F's profit	18.30
F's commission	268.30

This $268.30 is F's foreign trade income. F's exempt foreign trade income is $174.98 ($268.30×15/23). F's taxable income is $6.37, computed as follows:

F's foreign trade income	$268.30
F's exempt foreign trade income	(174.98)
F's non-exempt foreign trade income	93.32
Less:	
F's expenses allocable to non-exempt foreign trade income $250×$93.32/$268.30	(86.95)
F's taxable income	6.37

Of F's total expenses, $163.05 ($250×$174.98/$268.30) are allocated to F's exempt foreign trade income and are disallowed for purposes of computing F's taxable income.

If R and F make the election provided for in paragraph (b)(2)(ii) of this section, F may receive a commission from R in the amount of $322.19, computed as follows:

F's expenses	$303.89
F's profit	18.30
F's commission	322.19

With this election, this $322.19 is F's foreign trade income. F's exempt foreign trade income is $210.12 ($322.19×15/23). F's taxable income is still $6.37, computed as follows:

F's foreign trade income	$322.19
F's exempt foreign trade income	(210.12)
F's non-exempt foreign trade income	112.07
Less:	
F's expenses allocable to non-exempt foreign trade income $303.89×$112.07/$322.19	(105.70)
F's taxable income	6.37

Of F's total expenses, $198.19 ($303.89×$210.12/$322.19) are allocated to F's exempt foreign trade income and are disallowed for purposes of computing F's taxable income.

Example 7. Assume the same facts as in *Example 6* except that R's direct selling expenses are $60. The profit which F may earn under the franchise pursuant to the administrative pricing rules is $16.62, computed as follows:

Combined taxable income:	
R's gross receipts from the sale	$1,000.00
R's cost of goods sold	(650.00)
Combined gross income	350.00
Less:	
R's direct selling expenses	60.00
R's apportioned G/A expenses	3.89
F's expenses	250.00
	(313.89)
Combined taxable income	36.11
The combined taxable income method—F's profit:	
F's profit—23% of combined taxable income ($36.11)	8.31
The gross receipts method—F's profit:	
F's profit—lesser of 1.83% of R's gross receipts ($ 18.30) or two times F's profit under the combined taxable income method ($16.62)	16.62

F may receive a commission from R in the amount of $266.62, computed as follows:

F's expenses	$250.00
F's profit	16.62
F's commission	266.62

If the election provided for in paragraph (b)(2)(ii) of this section is made by R and F, the profit which F may earn under the franchise pursuant to the administrative pricing rules will remain at $16.62 but will be computed as follows:

Combined taxable income:	
R's gross receipts from the sale	$1,000.00
R's cost of goods sold	(650.00)
Combined gross income	350.00
Less: F's expenses	(313.89)
Combined taxable income	36.11
The combined taxable income method—F's profit:	
F's profit—23% of combined taxable income ($36.11)	8.31
The gross receipts method—F's profit:	
F's profit—lesser of 1.83% of R's gross receipts ($18.30) or two times F's profit under the combined taxable income method ($16.62)	16.62
F may receive a commission from R in the amount of $330.51, computed as follows:	
F's expenses	313.89
F's profit	16.62
F's commission	330.51

As illustrated by *Example 6,* F's exempt taxable income and taxable income will be the same regardless of which method is used to compute F's commission.

Example 8. Assume the same facts as in *Example 6* except that F's expenses are $300. With this assumption, there is a combined loss of $(3.89) on the transaction under the full costing combined taxable income method, computed as follows:

Combined taxable income:	
R's gross receipts from the sale	$1,000.00
R's cost of goods sold	(650.00)
Combined gross income	350.00
Less:	
R's direct selling expenses	50.00
R's apportioned G/A expenses	3.89
F's expenses	300.00
	(353.89)
Combined taxable income (loss)	(3.89)

Since there is a combined loss, F will not have a profit under the full costing combined taxable income method. However, for purposes of this example, it is assumed that under the marginal costing rules of § 1.925(b)–1T the maximum combined taxable income is $75 and the overall profit percentage limitation is $30. Accordingly, F's profit would be $6.90 (23% of $30) under the marginal costing rules. F's profit under the gross receipts method will be $13.80 (1.83% of $1,000 limited by section 925(d) to two times the profit determined under marginal costing). The commission F may receive from R is $313.80. Had all of the expenses been reflected on F's books pursuant to the election of paragraph (b)(2)(ii) of this section, F's commission would have been $367.69.

Example 9. Assume the same facts as in *Example 6* except that F's expenses are $300 and that the transaction occurred in 1987. F will not earn a profit under the sales franchise pursuant to the administrative pricing rules. This is shown by the following computation:

Combined taxable income:	
R's gross receipts from the sale	$1,000.00
R's cost of goods sold	(650.00)
Combined gross income	350.00
Less:	
R's direct selling expenses	50.00
R's apportioned G/A expenses	3.89
F's expenses	300.00
	(353.89)
Combined taxable income (loss)	(3.89)

F will not have a profit under the full costing combined taxable income method since there is a combined loss of $(3.89). Also, F will not have a profit under the gross receipts method due to section 925(d) and the special no loss rule of paragraph (e)(1)(i) of this section. In addition, F will not have a profit under the marginal costing rules because the profit may not exceed full costing combined taxable income, see § 1.925 (b)–1T(b)(4). Although F may not earn a profit, it is entitled to recoup its expenses. Therefore, the commission F may receive from R is $300.00. R will bear the entire loss. Had all of the expenses been reflected on F's books pursuant to the election of paragraph (b)(2)(ii) of this section, F's commission would have been $353.89.

Example 10. Assume the same facts as in *Example 6* except that R receives total payment of the sale price of $1,000 on the 96th day after delivery, well beyond the 60 day period in which payment must be made to avoid recharacterization of part of the contract price as carrying charges. Therefore, the contract price of $1,000 includes $10 of carrying charges, assuming a discount rate of 10%. See § 1.927(d)–1 (a) (Q & A2) for computation method for determining amount of carrying charges. This $10 of carrying charges is R's income. The profit which F may earn under the franchise pursuant to the administrative pricing rules is $16.66, computed as follows (the election of paragraph (b)(2)(ii) of this section is not made by R and F):

Combined taxable income:	
R's gross receipts from the sale	$990.00
R's cost of goods sold	(650.00)
Combined gross income	340.00
Less:	
R's direct selling expenses	50.00
R's apportioned G/A expenses: $200×$340/$18,000	3.78
F's expenses	250.00
Total	(303.78)
Combined taxable income	36.22
The combined taxable income method—F's profit: F's profit—23% of combined taxable income ($36.22)	$8.33
The gross receipts method—F's profit: F's profit—lesser of 1.83% of R's gross receipts ($18.12) or two times F's profit under the combined taxable income method ($16.66)	$16.66
F may receive a commission from R in the amount of $266.66, computed as follows:	
F's expenses	$250.00
F's profit	16.66
F's commission	266.66

Example 11. Assume the same facts as in *Example 6.* In addition, assume that R also manufactures products K, L, M, N, and P all of which are export property as defined in section 927(a). Product K is military property as defined in section 923(a)(5) and § 1.923–1T(b)(3)(ii). Assume further that products A, L, and P are included within product line X and that products K, L, M, and N are included within product line W. R has entered into a written agreement with F under which F is granted a sales franchise with respect to exporting the products. Under this agreement, F will receive commissions with respect to those exports equal to the maximum amount permitted to be received under the administrative pricing rules. The table set forth below details F's foreign trading gross receipts, R's cost of goods sold and R's and F's expenses allocable and apportioned under § 1.861–8 to the sale of products A, L, M, N, and P. For purposes of this example, it is assumed that R does not incur any general and administrative expenses. Because of the special grouping rule of paragraph (c)(8)(ii) of this section, product L may be included for purposes of the administrative pricing rules in only one product line, at the option of R. Also for these purposes, product K, which is military property, may not be grouped with products L, M, and N. See paragraph (c)(8)(iv) of this section. Under these facts, F will have profits under the franchise agreement from the sale of products A, L, M, N, and P and may receive commissions from R relating to the sale of those products, assuming the election of paragraph (b)(2)(ii) of this section is not made, in the following amounts:

	Profit	F's Expenses	Commissions
Product Line X (products A and P)	$36.34	$490.00	$526.34
Product Line W (products L, M, and N)	$40.48	$421.00	$461.48

On the sale of product K, R received gross receipts of $150. R's cost of goods sold was $130. R's and F's expenses allocable to product K totaled $10 ($7 of R's expenses and $3 of F's). Under the gross receipts method, F earned a profit of $2.75 (1.83% of $150) and $2.30 under the combined taxable income method. F may receive a commission, assuming the election of paragraph (b)(2)(ii) of this section is made by R and F, from R in the amount of $12.75, computed as follows:

F's expenses	$10.00
F's profit	2.75
F's commission	$12.75

	Product A	Product L	Product M	Product N	Product P	Total
Product Line X						
Combined Taxable Income						
R's GR From sale	$1,000	....	....	....	$1,000	$2,000
R's cost of goods sold	(650)	....	....	....	(650)	(1,300)
Combined gross income	350	....	....	....	350	700
Less:						
R's expenses	50	....	....	....	81	131
F's expenses	250	....	....	....	240	490
Total	(300)	....	....	....	(321)	(621)
Combined taxable income (loss)	$50	....	....	....	$29	$79
23% of CTI	$11.50	....	....	....	$6.67	$18.17
1.83% of GR from sale	$18.30	....	....	....	$13.34	$36.34
Product Line W						
Combined Taxable Income						
R's GR from sale	....	$1,000	$625	$1,800	....	$3,425

Example 12. R and F are calendar year taxpayers. R owns all the stock of F, an FSC for the taxable year. During 1985, R purchases 100 units of export property A from B, an unrelated domestic manufacturing company for $850. R's direct selling expenses so attributable are $20. R enters into a written agreement with F whereby F is granted a sales franchise with respect to export product A and F will receive commissions with respect to these exports equal to the maximum amount permitted to be received under the administrative pricing rules of section 925. Thereafter, the 100 units are sold for export by R for $1,050. R factors the trade receivable to unrelated person X for $1,000. Under §1.924(a)–1T(g)(7), total gross receipts for purposes of computing R's and F's combined taxable income is $1,000 (total receipts ($1,050) less the discount ($50)). This $1,000 would have been foreign trading gross receipts had F been the principal on the sale. For purposes of this example, it is assumed that R did not incur any general and administrative expenses. F incurs expenses in the amount of $110, all of which were performed by R under contract to F. The profit which F may earn under the franchise pursuant to the administrative pricing rules is $9.20 computed as follows:

Combined taxable income:	
R's gross receipts from the sale	$1,000.00
R's cost of goods sold	(850.00)
	150.00
Less:	
R's direct selling expenses	20.00
F's expenses	110.00
Total	130.00
Combined taxable income	$20.00
The combined taxable income method—F's profit:	
F's profit—23% of combined taxable income ($20)	$4.60

The gross receipts method—F's profit:	
F's profit—lesser of 1.83% of R's gross receipts ($18.30) or two times F's profit under the combined taxable income, method ($9.20)	$9.20

F may receive a commission from R in the amount of $119.20, computed as follows (the election of §1.925(a)–1T(b)(2)(ii) has not been made):

F's expenses	$110.00
F's profit	9.20
F's commission	$119.20

Example 13. R and F are calendar year taxpayers. R, a domestic manufacturing company, owns all the stock of F, an FSC for the taxable year. During March 1985, R manufactures office equipment, export property within the definition of section 927(a)(1), which it leases on April 1, 1985, to F for a term of 1 year at a monthly rental of $1,000, a rent which satisfies the standard of arm's length rental under section 482. F subleases the product on April 1, 1985, for a term of 1 year at a monthly rental of $1,200. R's cost for the product leased is $40,000. R's other deductible expenses attributable to the product are $200, all of which are incurred in 1985. Those expenses were not incurred under contract to F. F's expenses attributable to sublease of the export property are $1,150, all of which are incurred in 1985 directly by F. R depreciates the property on a straight line basis, using a half-year convention, assuming a 10 year recovery period (see section 168(f)(2)(C), §1.48–1(g)). The profit which F may earn with respect to the transaction is $1,483.50 for 1985 and $600 for 1986, computed as follows:

COMPUTATION FOR 1985

Combined taxable income:	
F's sublease rental receipts for year ($1,200 × 9 months)	$10,800.00
Less:	
R's depreciation (($40,000 ×1/10)×9/12)	3,000.00
R's expenses	200.00
F's expense	1,150.00
Total	(4,350.00)
Combined taxable income	6,450.00
The combined taxable income method—F's profit:	
F's profit—23% of combined taxable income ($6,450)	$1,483.50
The gross receipts method—F's profit:	
F's profit—lesser of 1.83% of F's foreign trading gross receipts ($197.64) or two times F's profit under the combined taxable income method ($2,967)	$197.64
The section 482 method—F's profit:	
F's sublease rental receipts for year	$10,800.00
Less:	
F's lease rental payments for year	9,000.00
F's expenses	1,150.00
Total	(10,150.00)
F's profit	650.00

Since the combined taxable income method results in greater profit to F ($1,483.50) than does either the gross receipts method ($197.64) or the section 482 method ($650), F may earn a profit of $1,483.50 for 1985. Accordingly, the monthly rental payable by F to R for 1985 may be readjusted as long as the monthly rental payable is not readjusted below $907.39, computed as follows:

Monthly rental payable by F to R for 1985:	
F's sublease rental receipts for year	$10,800.00
Less:	
F's expenses	1,150.00
F's profit	1,483.50
Total	(2,633.50)
Rental payable for 1985	8,166.50
Rental payable each month ($8,166.50/9 months)	$907.39

COMPUTATION FOR 1986

Combined taxable income:	
F's sublease rental receipts for year ($1,200 x 3 months)	$3,600.00
Less:	
R's depreciation (($40,000 x 1⁄10) x 3⁄12)	(1,000.00)
Combined taxable income	2,600.00

The combined taxable income method—F's profit:	
F's profit—23% of combined taxable income ($2,600)	598.00
The gross receipts method—F's profit:	
F's profit—lesser of 1.83% of F's foreign trading gross receipts ($3,600) or two times F's profit under the combined taxable income method ($1,196)	65.88
The section 482 method—F's profit:	
F's sublease rental receipts for year	$3,600.00
Less:	
F's lease rental payments for year	(3,000.00)
F's profit	600.00

Since the section 482 method results in a greater profit to F ($600) than does either the combined taxable income method ($598) or the gross receipts method ($65.88), F may earn a profit of $600 for 1986. Accordingly, the monthly rental payable by F to R for 1986 may be readjusted as long as the monthly rental payable is not readjusted below $1,000, computed as follows:

Monthly rental payable by F to R for 1986:	
F's sublease rental receipts for year	$3,600.00
Less:	
F's profit	(600.00)
Rental payable for 1986	3,000.00
Rental payable for each month ($3,000/3 months)	1,000.00

(g) *Effective date.* The provisions of this section and § 1.925(b)–1T apply with respect to taxable year ending after December 31, 1984, except that a corporation may not be a FSC for any taxable year beginning before January 1, 1985.

[T.D. 8126, 52 FR 6443, Mar. 3, 1987, as amended by T.D. 8764, 63 FR 10306, Mar. 3, 1998]

§ 1.925(b)–1T Temporary regulations; marginal costing rules.

(a) *In general.* This section prescribes the marginal costing rules authorized by section 925(b)(2). If under paragraph (c)(1) of this section a FSC is treated for its taxable year as seeking to establish or maintain a foreign market for sales of an item, product, or product line of export property (as defined in § 1.927(a)–1T) from which foreign trading gross receipts (as defined in § 1.924(a)–1T) are derived, the marginal costing rules prescribed in paragraph (b) of this section may be applied at the related supplier's election to compute combined taxable income of the FSC and related supplier derived from those sales. (Any further reference to a FSC in this section shall include a small FSC unless indicated otherwise.) The combined taxable income determined under these marginal costing rules may be used to determine whether the ''twice the amount determined under the combined taxable income method'' limitation for the 1.83% of gross receipts test of section 925(d) has been met.

For FSC taxable years beginning after December 31, 1986, if the marginal costing rules are used to determine the section 925(d) limitation, the FSC may not earn more than 100% of full costing combined taxable income determined under the full costing combined taxable income method of § 1.925(a)–1T(c)(3) and (6). The marginal costing rules may be applied even if the related supplier does not manufacture, produce, grow, or extract the export property sold. The marginal costing rules do not apply to sales of export property which in the hands of a purchaser related under section 954(d)(3) to the seller give rise to foreign base company sales income as described in section 954(d) unless, for the purchaser's year in which it resells the export property, section 954(b)(3)(A) is applicable or that income is under the exceptions in section 954(b)(4). In addition, the marginal costing rules do not apply to leases of property or to the performances of any services even if they are related and subsidiary services (as defined in § 1.924(a)–1T(d) and § 1.925(a)–1T(b)(2)(iii)(C)).

(b) *Marginal costing rules*—(1) *In general.* Marginal costing is a method under which only direct production costs of producing a particular item, product, or product line are taken into account for purposes of computing the combined taxable income of the FSC and its related supplier under section

925(a)(2). The costs to be taken into account are the related supplier's direct material and labor costs (as defined in §1.471–11(b)(2)(i)). Costs which are incurred by the FSC and which are not taken into account in computing combined taxable income are deductible by the FSC only to the extent of the FSC's non-foreign trade income. If the related supplier is not the manufacturer or producer of the export property that is sold, the related supplier's purchase price shall be taken into account.

(2) *Overall profit percentage limitation.* Under marginal costing, the combined taxable income of the FSC and its related supplier may not exceed the overall profit percentage (determined under paragraph (c)(2) of this section) multiplied by the FSC's foreign trading gross receipts if the FSC is the principal on the sale (or the related supplier's gross receipts if the FSC is a commission agent) from the sale of export property.

(3) *Grouping of transactions.* (i) In general, for purposes of this section, an item, product, or product line is the item or group consisting of the product or product line pursuant to §1.925(a)–1T(c)(8) used by the taxpayer for purposes of applying the full costing combined taxable income method of §1.925(a)–1T(c)(3) and (6). For the election to group transactions for purposes of applying the administrative pricing methods, see §1.925(a)-1T(c)(8)(i).

(ii) However, for purposes of determining the overall profit percentage under paragraph (c)(2) of this section, any product or product line grouping permissible under §1.925(a)–1T(c)(8) may be used at the annual choice of the FSC even though it may not be the same item or grouping referred to in subdivision (i) of this paragraph as long as the grouping chosen for determining the overall profit percentage is at least as broad as the grouping referred to in the above subdivision (i) of this paragraph. A product may be included for this purpose, however, in only one product group even though under the grouping rules it would otherwise fall in more than one group. Thus, the marginal costing rules will not apply with respect to any regrouping if the regrouping does not include any product (or products) that was included in the group for purposes of the full costing method.

(4) *Application of limitation on FSC income (''no loss'' rules).* The marginal costing rules of this section will not apply if there is a combined loss of the related supplier and the FSC determined in accordance with paragraph (b)(1) of this section. In addition, for FSC taxable years beginning after December 31, 1986, the profit determined under the marginal costing method may be allowed to the FSC only to the extent it does not exceed the FSC's and the related supplier's full costing combined taxable income determined under the full costing combined taxable income method of §1.925(a)–1T(c)(3) and (6). This rule prevents pricing at a loss to the related supplier. If either of these ''no loss'' rules apply, the related supplier may nonetheless charge a transfer price or pay a commission in an amount that will allow the FSC to recover an amount not in excess of its full costs, if any, even if to do so would create or increase a loss in the related supplier. The effect of these no-loss rules and of the overall profit percentage limitation of paragraph (c)(2) of this section is that the FSC's profit under these marginal costing rules is limited to the lesser of the following:

(i) 23% of maximum combined taxable income determined under the marginal costing rules,

(ii) 23% of the overall profit percentage limitation, or

(iii) For FSC taxable years beginning after December 31, 1986, 100% of the full costing combined taxable income determined under the full costing combined taxable income method of §1.925(a)–1T(c)(3) and (6).

(c) *Definitions*—(1) *Establishing or maintaining a foreign market.* A FSC shall be treated for its taxable year as seeking to establish or maintain a foreign market with respect to sales of an item, product, or product line of export property from which foreign trading gross receipts are derived if the combined taxable income computed under paragraph (b) of this section is greater than the full costing combined taxable income computed under the full costing combined taxable income method of §1.925(a)–1T(c)(3) and (6).

(2) *Overall profit percentage.* (i) For purposes of this section, the overall profit percentage for a taxable year of the FSC for a product or product line is the percentage which—

(A) The combined taxable income of the FSC and its related supplier from the sale of export property plus all other taxable income of its related supplier from all sales (domestic and foreign) of such product or product line during the FSC's taxable year, computed under the full costing method, is of

(B) The total gross receipts (determined under § 1.927(b)–1T) of the FSC and related supplier from all sales of the product or product line.

(ii) At the annual option of the related supplier, the overall profit percentage for the FSC's taxable year for all products and product lines may be determined by aggregating the amounts described in subdivisions (i)(A) and (B) of this paragraph of the FSC, and all domestic members of the controlled group (as defined in section 927(d)(4) and § 1.924(a)–1T(h)) of which the FSC is a member, for the FSC's taxable year and for taxable years of the members ending with or within the FSC's taxable year.

(iii) For purposes of determining the amounts in subdivisions (i) and (ii) of this paragraph, a sale of property between a FSC and its related supplier or between domestic members of the controlled group shall be taken into account only during the FSC's taxable year (or taxable year of the member ending within the FSC's taxable year) during which the property is ultimately sold to a person which is not related to the FSC or if related, is a foreign person that is not a FSC.

(3) *Full costing method.* For purposes of section 925 and this section, the term "full costing combined taxable income method" is the method for determining full costing combined taxable income set forth in § 1.925(a)–1T(c)(3) and (6).

(d) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. R and F are calendar year taxpayers. R, a domestic manufacturing company, owns all the stock of F, a FSC for the taxable year. During 1985, R produces and sells 100 units of export property A to F under a written agreement which provides that the transfer price between R and F shall be that price which allocates to F the maximum profit permitted to be received under the administrative pricing rules of section 925(a)(1) and (2). Thereafter, the 100 units are resold for export by F for $950. R's cost of goods sold attributable to the 100 units is $650 consisting in part of $400 of direct materials and $200 of direct labor. R incurs selling expenses directly attributable to the sale in the amount of $100. Those expenses were not required to be incurred by F. For purposes of this example, it is assumed that R does not have general and administrative expenses that are not definitely allocable to any item of gross income. F's expenses attributable to the resale of the 100 units are $120. For purposes of this example, R and F have gross receipts of $4,000 from all domestic and foreign sales. R's total cost of goods sold and total expenses relating to its foreign and domestic sales are $2,730 and $450, respectively. Under full costing, the combined taxable income will be $80, computed as follows:

Combined taxable income—full costing:	
F's foreign trading gross receipts	$950.00
R's cost of goods sold	(650.00)
Combined gross income	300.00
Less:	
R's direct selling expenses	100.00
F's expenses	120.00
Total	(220.00)
Combined taxable income (loss)	80.00

F's profit under the full costing combined taxable income method is $18.40, *i.e.*, 23% of full costing combined taxable income ($80). F's profit under the gross receipts method will be $17.39, *i.e.*, 1.83% of F's foreign trading gross receipts ($950). However, under the marginal costing rules, F would have a profit attributable to the export sale in the amount of $38.24, *i.e.*, 23% of combined taxable income as determined under the marginal costing rules (23% of $166.25). As shown by the computation below, the combined taxable income under marginal costing is limited to the overall profit percentage limitation ($166.25) since that amount is less than the maximum combined taxable income amount ($350):

Maximum combined taxable income (determined under paragraph (b)(1) of this section):	
F's foreign trading gross receipts	$950.00
Less:	
R's direct materials	400.00
R's direct labor	200.00
Total	(600.00)
Maximum combined total income	350.00
Overall profit percentage limitation calculation (determined under paragraph (c)(2) of this section):	
Gross receipts of R and F from all domestic and foreign sales	$4,000.00
R's cost of goods sold	(2,730.00)
Combined gross income	1,270.00
Less:	
R's expenses	450.00
F's expenses	120.00
Total	(570.00)
Total taxable income from all sales computed on a full costing method	700.00
Overall profit percentage (total taxable income ($700) divided by total gross receipts ($4,000)	17.5%
Overall profit percentage limitation Overall profit percentage times F's foreign trading gross receipts (17.5% times $950.00)	$166.25

The transfer price from R to F may be set at $791.76, computed as follows:

Transfer price to F:	
F's foreign trading gross receipts	$950.00
Less:	
F's expenses	120.00
F's profit	38.24
Total	(158.24)
Transfer price	791.76

Example 2. Assume the same facts as in *Example 1* except that F's expenses are $170. Under full costing, the combined taxable income will be $30, computed as follows:

Combined taxable income—full costing:	
F's foreign trading gross receipts	$950.00
R's cost of goods sold	(650.00)
Combined gross income	300.00
Less:	
R's expenses	100.00
F's expenses	170.00
Total	(270.00)
Combined taxable income (loss)	30.00

F's profit under the full costing combined taxable income method is $6.90, *i.e.*, 23% of combined taxable income, $30. Under the marginal costing rules, F may earn a profit attributable to the export sale in the amount of $35.51, *i.e.*, 23% of combined taxable income as determined under the marginal costing rules (23% of $154.38). Had the transaction occurred in 1987, F would have had a profit attributable to the export sale under these marginal costing rules of only $30, *i.e.*, 23% of combined taxable income as determined under the marginal costing rules (23% of $154.38) limited, for FSC taxable years beginning after December 31, 1986, to combined taxable income determined under full costing ($30), see paragraph (b)(4) of this section. F's profit under the gross receipts method will be $17.39 *i.e.*, 1.83% of F's foreign trading gross receipts ($950). The computations are as follows:

Maximum combined taxable income (determined under paragraph (b)(1) of this section):	
F's foreign trading gross receipts	$950.00
Less:	
R's direct materials	400.00
R's direct labor	200.00
Total	(600.00)
Maximum combined taxable income	350.00
Overall profit percentage limitation calculation (determined under paragraph (c)(2) of this section):	
Gross receipts of R and F from all domestic and foreign sales	4,000.00
R's cost of goods sold	(2,730.00)
Combined gross income	1,270.00

Less:	
R's expenses	450.00
F's expenses	170.00
Total	(620.00)
Total taxable income from all sales computed on a full costing method	650.00
Overall profit percentage (total taxable income ($650) divided by total gross receipts ($4,000))	16.25%
Overall profit percentage limitation Overall profit percentage times F's foreign trading gross receipts (16.25% times $950.00)	154.38

The transfer price from R to F may be set at $744.49, computed as follows:

Transfer price to F:	
F's foreign trading gross receipts	950.00
Less:	
F's expenses	170.00
F's profit	35.51
Total	(205.51)
Transfer price	744.49

Example 3. Assume the same facts as in *Example 1* except that the transaction occurs in 1987 and that F incurs expenses in the amount of $250. Since a $50 combined loss, as computed below, is incurred, F will not have any profit under either the full costing combined taxable income method, the gross receipts method or the marginal costing rules:

Combined taxable income—full costing:	
F's foreign trading gross receipts	$950.00
R's cost of goods sold	(650.00)
Combined gross income	300.00
Less:	
R's expenses	100.00
F's expenses	250.00
Total	(350.00)
Combined taxable income (loss)	(50.00)

The transfer price to R may be set at $700 so that F may recover its expenses.

Example 4. R and F are calendar year taxpayers. R, a domestic manufacturing company, owns all the stock of F, a FSC for the taxable year. During 1985, R manufactures export property A. R enters into a written agreement with F whereby F will receive a commission with respect to sales of export property A by R which result in gross receipts to R which would have been foreign trading gross receipts had F and not R been the principal on the sale. F will receive commissions with respect to such export sales equal to the maximum amount permitted to be received under the transfer pricing rules of section 925. The maximum commission may be earned by F under these marginal costing rules. In this example, R received $950 from the sale of export property A. R's cost of goods sold for that property was $620. R incurred direct selling expenses of $20. Also, it is assumed that R incurred total general and administrative expenses, in addition to those incurred relating to its contract to perform on behalf of F the functions and activities of section 924 (c), (d) and (e), of $50. R incurred direct and indirect expenses of $130 in performing those functions and activities on behalf of F. During 1985, R had gross receipts from all domestic and foreign sales of $3,500, total cost of goods sold and total expenses relating to the domestic and foreign sales of $1,600 and $259, respectively. The election provided for in § 1.925(a)–1T(b)(2)(ii) was not made by R and F.

Combined taxable income—full costing:		
R's gross receipts from the sale of the export property		$950.00
R's cost of goods sold		(620.00)
Combined gross income		330.00
Less:		
R's direct selling expenses		20.00
F's expenses		130.00
Apportionment of R's general and administrative expenses:		
R's total G/A expenses	$50	
Combined gross income	330	
R's total gross income	1,900	
Apportionment of G/A expenses $50 x $330/$1,900		8.68
Total		(158.68)
Combined taxable income (loss)		171.32

Maximum combined taxable income (determined under paragraph (b)(1) of this section):	
R's gross receipts from the sale of the export property	$950.00
Less:	
R's direct materials	450.00
R's direct labor	100.00
Total	(550.00)
Maximum combined taxable income	400.00
Overall profit percentage limitation calculation (determined under paragraph (c)(2) of this section):	
Gross receipts of R from all domestic and foreign sales	3,500.00
R's cost of goods sold	(1,600.00)
Combined gross income	1,900.00
Less:	
R's total expenses	259.00
F's total expenses	130.00
Total	(450.00)
Total taxable income from all sales computed on a full costing method	1,511.00
Overall profit percentage (total taxable income ($1,511) divided by total gross receipts ($3,500))	43.17%
Overall profit percentage limitation Overall profit percentage times R's gross receipts from the sale of export property (*i.e.,* 43.17% times $950.00)	410.12

Since the overall profit percentage limitation ($410.12) is greater than the maximum combined taxable income ($400), combined taxable income under marginal costing and for purposes of computing F's commission is limited to $400. Under these marginal costing rules, F will have a profit attributable to the sale of $92, *i.e.,* 23% of combined taxable income as determined under the marginal costing rules (23% of $400). Accordingly, the commission F receives from R is $222, *i.e.,* F's expenses ($130) plus F's profit ($92).

Example 5. Assume the same facts as in *Example 4,* except that R's gross receipts from the sale of export property which would have been foreign trading gross receipts had F been the principal on the sale are $1,050 and gross receipts from all sales, domestic and foreign, remain at $3,500. For purposes of applying the combined taxable income method, R and F may compute their combined taxable income attributable to the product line of export property under the marginal costing rules as follows:

Combined taxable income—full costing:	
R's gross receipts from the sale of the export property	$1,050.00
R's cost of goods sold	(620.00)
Combined gross income	430.00
Less:	
R's direct selling expenses	20.00
F's expenses	130.00
Apportionment of R's G/A expenses $50 x $430/$1,900	11.32
Total	(161.32)
Combined taxable income (loss)	268.68

Maximum combined taxable income (determined under paragraph (b)(1) of this section):	
R's gross receipts from the sale of export property	$1,050.00
Less:	
R's direct materials	450.00
R's direct labor	100.00
Total	(550.00)
Maximum combined taxable income	500.00
Overall profit percentage (see example 4)	43.17%
Overall profit percentage limitation (determined under paragraph (c)(2) of this section) (R's gross receipts from sale ($1,050.00) times the overall profit percentage (43.17%))	453.29

Since maximum combined taxable income ($500) is greater than the overall profit percentage limitation ($453.29), combined taxable income under marginal costing and for purposes of computing F's commission is limited to $453.29. Under these marginal costing rules, F will have a profit attributable to the sales of $104.26, *i.e.,* 23% of combined taxable income (23% of $453.29). Accordingly, the commission F receives from R is $234.26, *i.e.,* F's expenses ($130) plus F's profit ($104.26).

Example 6. Assume the same facts as in *Example 5,* except that F has expenses of $140 and R's cost of goods sold for the export sale was $900. R does not incur any direct selling expenses. Since cost of goods sold has increased by $280, R's total gross income has been reduced from $1,900 to $1,620. For purposes of applying the combined taxable income method, R and F may compute their combined taxable income under the marginal costing rules as follows:

Combined taxable income—full costing:	
R's gross receipts from the sale of export property	$1,050.00
R's cost of goods sold	(900.00)
Combined gross income	150.00
Less:	
F's expenses	140.00
Apportionment of R's G/A expenses $50 x $150/$1,620	4.63
Total	(144.63)
Combined taxable income (loss)	5.37
Maximum combined taxable income (determined under paragraph (b)(1) of this section):	
R's gross receipts from the sale of export property	$1,050.00
Less:	
R's direct materials	630.00
R's direct labor	200.00
Total	(830.00)
Maximum combined taxable income	220.00
Overall profit percentage limitation calculation (determined under paragraph (c)(2) of this section):	
Gross receipts of R and F from all domestic and foreign sales	$3,500.00
R's cost of goods sold	(1,880.00)
Combined gross income	1,620.000
Less:	
R's total expenses	259.00
F's total expenses	140.00
Total	(399.00)
Total taxable income from all sales computed on a full costing method	$1,221.00
Overall profit percentage (total taxable income ($1,221) divided by total gross receipts ($3,500))	34.89%
Overall profit percentage limitation—overall profit percentage times R's gross receipts from the sale of export property (i.e., 34.89% times $1,050)	$366.35

Since the overall profit percentage limitation ($366.35) is greater than the maximum combined taxable income ($220), combined taxable income under marginal costing and for purposes of computing F's commission is limited to $220. Under these marginal costing rules, F will have a profit attributable to the sale of $50.60, *i.e.*, 23% of combined taxable income as determined under the marginal costing rules (23% of $220). If the transaction occurred in 1987, F's profit would be limited, however, by paragraph (b)(4) of this section to the full costing combined taxable income of $5.37.

[T.D. 8126, 52 FR 6455, Mar. 3, 1987, as amended by T.D.8764, 63 FR 10306, Mar. 3, 1998]

§ 1.926(a)–1 Distributions to shareholders.

(a) *Treatment of distributions.* [Reserved] For guidance, see § 1.926(a)–1T(a).

(b) *Order of distribution*—(1) *In general*—(i) *Distributions by a FSC received by a shareholder in a taxable year of the shareholder beginning before January 1, 1990.* Any actual distribution to a shareholder by a FSC (all references to a FSC in this section shall include a small FSC and a former FSC) that is received by the shareholder in a taxable year of the shareholder beginning before January 1, 1990, and made out of earnings and profits shall be treated as made in the following order, to the extent thereof—

(A) Out of earnings and profits attributable to exempt foreign trade income determined solely because of operation of section 923(a)(4),

(B) Out of earnings and profits attributable to other exempt foreign trade income,

(C) Out of earnings and profits attributable to non-exempt foreign trade income determined under either of the administrative pricing methods of section 925(a)(1) or (2),

(D) Out of earnings and profits attributable to section 923(a)(2) non-exempt income, and

(E) Out of other earnings and profits.

(ii) *Distributions by a FSC received by a shareholder in a taxable year of the shareholder beginning after December 31, 1989.* Any actual distribution to a shareholder by a FSC that is received by the shareholder in a taxable year beginning after December 31, 1989, and that is made out of earnings and profits shall be treated as made in the following order, to the extent thereof—

(A) Out of earnings and profits attributable to exempt foreign trade income determined solely because of the operation of section 923(a)(4),

(B) Out of earnings and profits attributable to foreign trade income (other than exempt foreign trade income determined solely because of the operation of section 923(a)(4)) allocable to the marketing of agricultural or horticultural products (or the providing of related services) by a qualified cooperative which is a shareholder of the FSC,

(C) Out of earnings and profits attributable to non-exempt foreign trade income and other exempt foreign trade income determined under either of the administrative pricing methods of section 925(a)(1) and (2). Distributions out of this classification will be made on a pro rata basis so that 15/23 (16/23 with regard to distribution to a non-corporate shareholder) of each distribution will be out of earnings and profits attributable to exempt foreign trade income and the remainder will be out of earnings and profits attributable to non-exempt foreign trade income. To the extent the distributions are out of earnings and profits attributable to the disposition of, or services related to, military property, 7.5/23 (8/23 with regard to distributions to a non-corporate shareholder) of each distribution will be out of earnings and profits attributable to exempt foreign trade income and the remainder will be out of earnings and profits attributable to non-exempt foreign trade income,

(D) Out of earnings and profits attributable to other exempt foreign trade income determined under the transfer pricing method of section 925(a)(3),

(E) Out of earnings and profits attributable to section 923(a)(2) non-exempt income,

(F) Out of earnings and profits attributable to effectively connected income, as defined in section 245(c)(4)(B), and

(G) Out of other earnings and profits.

(2) *Determination of earnings and profits.* [Reserved] For guidance, see §1.926(a)–1T(b)(1).

(c) *Definition of ''former FSC''.* [Reserved] For guidance, see §1.926(a)–1T(c).

(d) *Personal holding company income.* [Reserved] For guidance, see §1.926(a)–1T(d).

(e) *Sale of stock if section 1248 applies.* [Reserved] For guidance, see §1.926(a)–1T(e).

[T.D. 8340, 56 FR 11093, Mar. 15, 1991]

§1.926(a)–1T Temporary regulations; distributions to shareholders.

(a) *Treatment of distributions.* Any distribution by a FSC (or former FSC) to its shareholder with respect to its stock will be includible in the shareholder's gross income in accordance with the provisions of section 301. (Any further reference to a FSC in this section shall include a small FSC unless indicated otherwise.) See section 245(c) for treatment of distributions to domestic corporate shareholders of the FSC. If earnings and profits of a FSC (or former FSC) attributable to foreign trade income are distributed to a shareholder which is a foreign person (or a nonresident alien individual), that distribution shall be treated as United States source income which is effectively connected with the conduct of a trade or business conducted through a permanent establishment of such shareholder within the United States. For this purpose, distributions to a foreign partnership, foreign trust, foreign estate or other foreign entities that would be treated as pass-through entities under U.S. law shall be treated as made directly to the partners of beneficiaries in proportion to their respective interest in the entity.

(b) *Order of distributions*—(1) *In general.* For guidance, see §1.926(a)–1(b)(1).

(2) *Determination of earnings and profits.* For purposes of this section, the earnings and profits of a FSC (or former FSC) shall be the earnings and

profits computed in accordance with the rules, where applicable, prescribed in § 1.964–1 (relating to determination of the earnings and profits of a foreign corporation) other than subsections (d) and (e) of that section.

(c) *Definition of ''former FSC''.* Under section 926(c), the term ''former FSC'' refers to a corporation which is not a FSC for a taxable year but which was a FSC for a prior taxable year. However, a corporation is not a former FSC for a taxable year unless such corporation has, at the beginning of such taxable year, earnings and profits attributable to foreign trade income. A corporation which is a former FSC for a taxable year is a former FSC for all purposes of the Code.

(d) *Personal holding company income*—(1) *Treatment of dividends.* Any amount includible in a shareholder's gross income as a dividend with respect to the stock of a FSC (or former FSC) under paragraph (a) of this section shall be treated as a dividend for all purposes of the Code, except that that part of the dividend attributable to foreign trade income, other than an amount attributable to section 923(a)(2) non-exempt income, shall not be considered in applying the personal holding company and foreign personal holding company provisions (sections 541 through 547 and 551 through 558, respectively).

(2) *Look through option.* With regard to distributions from a FSC (or former FSC) which are not treated as personal holding company income under paragraph (d)(1) of this section, the shareholder may, however, treat any amount of that distribution as an item of income described under section 543 (or section 553) (for example, rents) if it establishes to the satisfaction of the Commissioner that such amount is attributable to earnings and profits of the FSC derived from such item of income. For example, distributions from a FSC relating to section 923(a)(2) non-exempt income will be treated as dividends for purposes of the personal holding company provisions of sections 541 through 547 unless the look through option is elected. Under this option, if earnings and profits out of which those distributions are made are attributable to the lease of export property, the FSC shareholder may treat the distribution for purposes of the personal holding company provisions as rents rather than as dividends. This may be beneficial to the shareholder because rents are not considered under section 543(a)(2) as personal holding company income, if in general, rents constitute 50% or more of the shareholder's adjusted ordinary gross income.

(e) *Sale of stock if section 1248 applies.* For purposes of section 1248, the earnings and profits of a FSC (or former FSC) shall not include earnings and profits attributable to foreign trade income.

[T.D. 8126, 52 FR 6458, Mar. 3, 1987, as amended by T.D. 8340, 56 FR 11093, Mar. 15, 1991]

§ 1.927(a)–1T Temporary regulations; definition of export property.

(a) *General rule.* Under section 927 (a), except as otherwise provided with respect to excluded property in paragraphs (f), (g) and (h) of this section and with respect to certain short supply property in paragraph (i) of this section, export property is property in the hands of any person (whether or not a FSC) (any further reference to a FSC in this section shall include a small FSC unless indicated otherwise)—

(1) *U.S. manufactured, produced, grown or extracted.* Manufactured, produced, grown, or extracted in the United States by any person or persons other than a FSC (see paragraph (c) of this section),

(2) *Foreign use, consumption or disposition.* Held primarily for sale, lease or rental in the ordinary course of a trade or business by a FSC to a FSC or to any other person for direct use, consumption, or disposition outside the United States (see paragraph (d) of this section),

(3) *Foreign content.* Not more than 50 percent of the fair market value of which is attributable to articles imported into the United States (see paragraph (e) of this section), and

(4) *Non-related FSC purchaser or user.* Which is not sold, leased or rented by a FSC, or with a FSC as commission agent, to another FSC which is a member of the same controlled group (as defined in section 927(d)(4) and § 1.924(a)–1T(h)) as the FSC.

(b) *Services.* For purposes of this section, services (including the written communication of services in any form) are not export property. Whether an item is property or services shall be determined on the basis of the facts and circumstances attending the development and disposition of the item. Thus, for example, the preparation of a map of a particular construction site would constitute services and not export property, but standard maps prepared for sale to customers generally would not constitute services and would be export property if the requirements of this section were otherwise met.

(c) *Manufacture, production, growth, or extraction of property*—(1) *By a person other than a FSC.* Export property may be manufactured, produced, grown, or extracted in the United States by any person, provided that that person does not qualify as a FSC. Property held by a FSC which was manufactured, produced, grown or extracted by it at a time when it did not qualify as a FSC is not export property of the FSC. Property which sustains further manufacture, production or processing outside the United States prior to sale or lease by a person but after manufacture, production, processing or extraction in the United States will be considered as manufactured, produced, grown or extracted in the United States by that person only if the property is reimported into the United States for further manufacturing, production or processing prior to final export sale. In order to be considered export property, the property manufactured, produced, grown or extracted in the United States must satisfy all of the provisions of section 927(a) and this section.

(2) *Manufactured, produced or processed.* For purposes of this section, property which is sold or leased by a person is considered to be manufactured, produced or processed by that person or by another person pursuant to a contract with that person if the property is manufactured or produced, as defined in §1.954–3(a)(4). For purposes of this section, however, in determining if the 20% conversion test of §1.954–3(a)(4)(iii) has been met, conversion costs include assembly and packaging costs but do not include the value of parts provided pursuant to a services contract as described in §1.924(a)–1T(d)(3). In addition, for purposes of this section, the 20% conversion test is extended and applied to the export property's adjusted basis rather than to its cost of goods sold if it is leased or held for lease.

(d) *Foreign use, consumption or disposition*—(1) *In general.* (i) Under paragraph (a)(2) of this section, export property must be held primarily for the purpose of sale, lease or rental in the ordinary course of a trade or business, by a FSC to a FSC or to any other person, and the sale or lease must be for direct use, consumption, or disposition outside the United States. Thus, property cannot qualify as export property unless it is sold or leased for direct use, consumption, or disposition outside the United States. Property is sold or leased for direct use, consumption, or disposition outside the United States if the sale or lease satisfies the destination test described in subdivision (2) of this paragraph, the proof of compliance requirements described in subdivision (3) of this paragraph, and the use outside the United States test described in subdivision (4) of this paragraph.

(ii) *Factors not taken into account.* In determining whether property which is sold or leased to a FSC is sold or leased for direct use, consumption, or disposition outside the United States, the fact that the acquiring FSC holds the property in inventory or for lease prior to the time it sells or leases it for direct use, consumption, or disposition outside the United States will not affect the characterization of the property as export property. Fungible export property must be physically segregated from non-export property at all times after purchase by or rental by a FSC or after the start of the commission relationship between the FSC and related supplier with regard to the export property. Non-fungible export property need not be physically segregated from non-export property.

(2) *Destination test.* (i) For purposes of paragraph (d)(1) of this section, the destination test of this paragraph is satisfied with respect to property sold or leased by a seller or lessor only if it is delivered by the seller or lessor (or

an agent of the seller or lessor) regardless of the F.O.B. point or the place at which title passes or risk of loss shifts from the seller or lessor—

(A) Within the United States to a carrier or freight forwarder for ultimate delivery outside the United States to a purchaser or lessee (or to a subsequent purchaser or sublessee),

(B) Within the United States to a purchaser or lessee, if the property is ultimately delivered outside the United States (including delivery to a carrier or freight forwarder for delivery outside the United States) by the purchaser or lessee (or a subsequent purchaser or sublessee) within 1 year after the sale or lease,

(C) Within or outside the United States to a purchaser or lessee which, at the time of the sale or lease, is a FSC or an interest charge DISC and is not a member of the same controlled group as the seller or lessor,

(D) From the United States to the purchaser or lessee (or a subsequent purchaser or sublessee) at a point outside the United States by means of the seller's or lessor's own ship, aircraft, or other delivery vehicle, owned, leased, or chartered by the seller or lessor,

(E) Outside the United States to a purchaser or lessee from a warehouse, storage facility, or assembly site located outside the United States, if the property was previously shipped by the seller or lessor from the United States, or

(F) Outside the United States to a purchaser or lessee if the property was previously shipped by the seller or lessor from the United States and if the property is located outside the United States pursuant to a prior lease by the seller or lessor, and either (*1*) the prior lease terminated at the expiration of its term (or by the action of the prior lessee acting alone), (*2*) the sale occurred or the term of the subsequent lease began after the time at which the term of the prior lease would have expired, or (*3*) the lessee under the subsequent lease is not a related person with respect to the lessor and the prior lease was terminated by the action of the lessor (acting alone or together with the lessee).

(ii) For purposes of this paragraph (d)(2) (other than paragraphs (d)(2)(i)(C) and (F)(3)), any relationship between the seller or lessor and any purchaser, subsequent purchaser, lessee, or sublessee is immaterial.

(iii) In no event is the destination test of this paragraph (d)(2) satisfied with respect to property which is subject to any use (other than a resale or sublease), manufacture, assembly, or other processing (other than packaging) by any person between the time of the sale or lease by such seller or lessor and the delivery or ultimate delivery outside the United States described in this paragraph (d)(2).

(iv) If property is located outside the United States at the time it is purchased by a person or leased by a person as lessee, such property may be export property in the hands of such purchaser or lessee only if it is imported into the United States prior to its further sale or lease (including a sublease) outside the United States. Paragraphs (a)(3) and (e) of this section (relating to the 50 percent foreign content test) are applicable in determining whether such property is export property. Thus, for example, if such property is not subjected to manufacturing or production (as defined in paragraph (c) of this section) within the United States after such importation, it does not qualify as export property.

(3) *Proof of compliance with destination test*—(i) *Delivery outside the United States.* For purposes of paragraph (d)(2) of this section (other than subdivision (i)(C) thereof), a seller or lessor shall establish ultimate delivery, use, or consumption of property outside the United States by providing—

(A) A facsimile or carbon copy of the export bill of lading issued by the carrier who delivers the property,

(B) A certificate of an agent or representative of the carrier disclosing delivery of the property outside the United States,

(C) A facsimile or carbon copy of the certificate of lading for the property executed by a customs officer of the country to which the property is delivered,

(D) If that country has no customs administration, a written statement by the person to whom delivery outside the United States was made,

(E) A facsimile or carbon copy of the Shipper's Export Declaration, a monthly shipper's summary declaration filed with the Bureau of Customs, or a magnetic tape filed in lieu of the Shipper's Export Declaration, covering the property, or

(F) Any other proof (including evidence as to the nature of the property or the nature of the property or the nature of the transaction) which establishes to the satisfaction of the Commissioner that the property was ultimately delivered, or directly sold, or directly consumed outside the United States within 1 year after the sale or lease.

(ii) The requirements of subdivision (i)(A), (B), (C), or (E) of this paragraph will be considered satisfied even though the name of the ultimate consignee and the price paid for the goods is marked out provided that, in the case of a Shipper's Export Declaration or other document listed in subdivision (i)(E) of this paragraph or a document such as an export bill of lading, such document still indicates the country in which delivery to the ultimate consignee is to be made and, in the case of a certificate of an agent or representative of the carrier, that the document indicates that the property was delivered outside the United States.

(iii) A seller or lessor shall also establish the meeting of the requirement of paragraph (d)(2)(i) of this section (other than subdivision (i)(C) thereof), that the property was delivered outside the United States without further use, manufacture, assembly, or other processing within the United States.

(iv) For purposes of paragraph (d)(2)(i)(C) of this section, a purchaser or lessee of property is deemed to qualify as a FSC or an interest charge DISC for its taxable year if the seller or lessor obtains from the purchaser or lessee a copy of the purchaser's or lessee's election to be treated as a FSC or interest charge DISC together with the purchaser's or lessee's sworn statement that the election has been timely filed with the Internal Revenue Service Center. The copy of the election and the sworn statement of the purchaser or lessee must be received by the seller or lessor within 6 months after the sale or lease. A purchaser or lessee is not treated as a FSC or interest charge DISC with respect to a sale or lease during a taxable year for which the purchaser or lessee does not qualify as a FSC or interest charge DISC if the seller or lessor does not believe or if a reasonable person would not believe at the time the sale or lease is made that the purchaser or lessee will qualify as a FSC or interest charge DISC for the taxable year.

(v) If a seller or lessor fails to provide proof of compliance with the destination test as required by this paragraph (d)(3), the property sold or leased is not export property.

(4) *Sales and leases of property for ultimate use in the United States*—(i) *In general.* For purposes of paragraph (d)(1) of this section, the use test in this paragraph (d)(4) is satisfied with respect to property which—

(A) Under subdivision (4)(ii) through (iv) of this paragraph is not sold for ultimate use in the United States, or

(B) Under subdivision (4)(v) of this paragraph is leased for ultimate use outside the United States.

(ii) *Sales of property for ultimate use in the United States.* For purposes of subdivision (4)(i) of this paragraph, a purchaser of property (including components, as defined in subdivision (4)(vii) of this paragraph) is deemed to use the property ultimately in the United States if any of the following conditions exist:

(A) The purchaser is a related party with respect to the seller and the purchaser ultimately uses the property, or a second product into which the property is incorporated as a component, in the United States.

(B) At the time of the sale, there is an agreement or understanding that the property, or a second product into which the property is incorporated as a component, will be ultimately used by the purchaser in the United States.

(C) At the time of the sale, a reasonable person would have believed that the property or the second product would be ultimately used by the purchaser in the United States unless, in the case of a sale of components, the fair market value of the components at the time of delivery to the purchaser constitutes less than 20 percent of the fair market value of the second product into which the components are incorporated (determined at the time of completion of the production, manufacture, or assembly of the second product).

For purposes of subdivision (4)(ii)(B) of this paragraph, there is an agreement or understanding that property will ultimately be used in the United States if, for example, a component is sold abroad under an express agreement with the foreign purchaser that the component is to be incorporated into a product to be sold back to the United States. As a further example, there would also be such an agreement or understanding if the foreign purchaser indicated at the time of the sale or previously that the component is to be incorporated into a product which is designed principally for the United States market. However, such an agreement or understanding does not result from the mere fact that a second product, into which components exported from the United States have been incorporated and which is sold on the world market, is sold in substantial quantities in the United States.

(iii) *Use in the United States.* For purposes of subdivision (4)(ii) of this paragraph, property (including components incorporated into a second product) is or would be ultimately used in the United States by the purchaser if, at any time within 3 years after the purchase of such property or components, either the property is or the components (or the second product into which the components are incorporated) are resold by the purchaser for use by a subsequent purchaser within the United States or the purchaser or subsequent purchaser fails, for any period of 365 consecutive days, to use the property or second product predominantly outside the United States (as defined in subdivision (4)(vi) of this paragraph).

(iv) *Sales to retailers.* For purposes of subdivision (4)(ii)(C) of this paragraph, property sold to any person whose principal business consists of selling from inventory to retail customers at retail outlets outside the United States will be considered to be used predominantly outside the United States.

(v) *Leases of property for ultimate use outside the United States.* For purposes of subdivision (4)(i) of this paragraph, a lessee of property is deemed to use property ultimately outside the United States during a taxable year of the lessor if the property is used predominantly outside the United States (as defined in subdivision (4)(vi) of this paragraph) by the lessee during the portion of the lessor's taxable year which is included within the term of the lease. A determination as to whether the ultimate use of leased property satisfies the requirements of this subdivision is made for each taxable year of the lessor. Thus, leased property may be used predominantly outside the United States for a taxable year of the lessor (and thus, constitute export property if the remaining requirements of this section are met) even if the property is not used predominantly outside the United States in earlier taxable years or later taxable years of the lessor.

(vi) *Predominant use outside the United States.* For purposes of this paragraph (d)(4), property is used predominantly outside the United States for any period if, during that period, the property is located outside the United States more than 50 percent of the time. An aircraft, railroad rolling stock, vessel, motor vehicle, container, or other property used for transportation purposes is deemed to be used predominantly outside the United States for any period if, during that period, either the property is located outside the United States more than 50 percent of the time or more than 50 percent of the miles traversed in the use of the property are traversed outside the United States. However, property is deemed to be within the United States at all times during which it is engaged in transport between any two points within the United States, except where the transport constitutes uninterrupted international air transportation within the meaning of section 4262(c)(3) and the regulations under that section (relating to tax on air transportation of persons). An orbiting satellite is deemed to be located outside the United States. For purposes of applying section 4262(c)(3) to this subdivision, the term ''United States'' includes the Commonwealth of Puerto Rico.

(vii) *Component.* For purposes of this paragraph (d)(4), a component is property which is (or is reasonably expected to be) incorporated into a second product by the purchaser of such component by means of production, manufacture, or assembly.

(e) *Foreign content of property*—(1) *The 50 percent test.* Under paragraph (a)(3) of this section, no more than 50 percent of the fair market value of export property may be attributable to the fair market value of articles which were imported into the United States. For purposes of this paragraph (e), articles imported into the United States are referred to as ‘‘foreign content.’’ The fair market value of the foreign content of export property is computed in accordance with paragraph (e)(4) of this section. The fair market value of export property which is sold to a person who is not a related person with respect to the seller is the sale price for such property (not including interest, finance or carrying charges, or similar charges.)

(2) *Application of 50 percent test.* The 50 percent test is applied on an item-by-item basis. If, however, a person sells or leases a large volume of substantially identical export property in a taxable year and if all of that property contains substantially identical foreign content in substantially the same proportion, the person may determine the portion of foreign content contained in that property on an aggregate basis.

(3) *Parts and services.* If, at the time property is sold or leased the seller or lessor agrees to furnish parts pursuant to a services contract (as provided in §1.924(a)–1T(d)(3)) and the price for the parts is not separately stated, the 50 percent test is applied on an aggregate basis to the property and parts. If the price for the parts is separately stated, the 50 percent test is applied separately to the property and to the parts.

(4) *Computation of foreign content*—(i) *Valuation.* For purposes of applying the 50 percent test, it is necessary to determine the fair market value of all articles which constitutes foreign content of the property being tested to determine if it is export property. The fair market value of the imported articles is determined as of the time the articles are imported into the United States.

(A) *General rule.* Except as provided in paragraph (e)(4)(i)(B), the fair market value of the imported articles which constitutes foreign content is their appraised value, as determined under section 403 of the Tariff Act of 1930 (19 U.S.C. 1401a) in connection with their importation. The appraised value of the articles is the full dutiable value of the articles, determined, however, without regard to any special provision in the United States tariff laws which would result in a lower dutiable value.

(B) *Special election.* If all or a portion of the imported article was originally manufactured, produced, grown, or extracted in the United States, the taxpayer may elect to determine the fair market value of the imported articles which constitutes foreign content under the provisions of this paragraph (e)(4)(i)(B) if the property is subjected to manufacturing or production (as defined in paragraph (c) of this section) within the United States after importation. A taxpayer making the election under this paragraph may determine the fair market value of the imported articles which constitutes foreign content to be the fair market value of the imported articles reduced by the fair market value at the time of the initial export of the portion of the property that was manufactured, produced, grown, or extracted in the United States. The taxpayer must establish the fair market value of the imported articles and of the portion of the property manufactured, produced, grown, or extracted in the United States at the time of the initial export in accordance with subdivision (4)(ii)(B) of this paragraph.

(ii) *Evidence of fair market value*— (A) *General rule.* For purposes of subdivision (4)(i)(A) of this paragraph, the fair market value of the imported articles is their appraised value, which may be evidenced by the customs invoice issued on the importation of such articles into the United States. If the holder of the articles is not the importer (or a related person with respect to the importer), the appraised value of the articles may be evidenced by a certificate based upon information contained in the customs invoice and furnished to the holder by the person from whom the articles (or property incorporating the articles) were purchased. If a customs invoice or certificate described in the preceding sentences is not available to a person purchasing property, the person shall establish that no more than 50 percent of the fair market value of such property is attributable to the fair market value of articles which were imported into the United States.

(B) *Special election.* For purposes of the special election set forth in subdivision (4)(i)(B) of this paragraph, if the initial export is made to a controlled person within the meaning of section 482, the fair market value of the imported articles and of the portion of the articles that are manufactured, produced, grown, or extracted within the United States shall be established by the taxpayer in accordance with the rules under section 482 and the regulations under that section. If the initial export is not made to a controlled person, the fair market value must be established by the taxpayer under the facts and circumstances.

(iii) *Interchangeable component articles.* (A) If identical or similar component articles can be incorporated interchangeably into property and a person acquires component articles that are imported into the United States and other component articles that are not imported into the United States, the determination whether imported component articles were incorporated in the property that is exported from the United States shall be made on a substitution basis as in the case of the rules relating to drawback accounts under the customs laws. See section 313(b) of the Tariff Act of 1930, as amended (19 U.S.C. 1313(b)).

(B) The provisions of subdivision (4)(iii)(A) of this paragraph may be illustrated by the following example:

Example. Assume that a manufacturer produces a total of 20,000 electronic devices. The manufacturer exports 5,000 of the devices and subsequently sells 11,000 of the devices to a FSC which exports the 11,000 devices. The major single component article in each device is a tube which represents 60 percent of the fair market value of the device at the time the device is sold by the manufacturer. The manufacturer imports 8,000 of the tubes and produces the remaining 12,000 tubes. For purposes of this subdivision, in accordance with the substitution principle used in the customs drawback laws, the 5,000 devices exported by the manufacturer are each treated as containing an imported tube because the devices were exported prior to the sale to the FSC. The remaining 3,000 imported tubes are treated as being contained in the first 3,000 devices purchased and exported by the FSC. Thus, since the 50 percent test is not met with respect to the first 3,000 devices purchased and exported by the FSC, those devices are not export property. The remaining 8,000 devices purchased and exported by the FSC are treated as containing tubes produced in the United States, and those devices are export property (if they otherwise meet the requirements of this section).

(f) *Excluded property*—(1) *In general.* Notwithstanding any other provision of this section, the following property is not export property—

(i) Property described in subdivision (2) of this paragraph (relating to property leased to a member of controlled group),

(ii) Property described in subdivision (3) of this paragraph (relating to certain types of intangible property),

(iii) Products described in paragraph (g) of this section (relating to oil and gas products), and

(iv) Products described in paragraph (h) of this section (relating to certain export controlled products).

(2) *Property leased to member of controlled group*—(i) *In general.* Property leased to a person (whether or not a FSC) which is a member of the same controlled group as the lessor constitutes export property for any period of time only if during the period—

(A) The property is held for sublease, or is subleased, by the person to a third person for the ultimate use of the third person;

(B) The third person is not a member of the same controlled group; and

(C) The property is used predominantly outside the United States by the third person.

(ii) *Predominant use.* The provisions of paragraph (d)(4)(vi) of this section apply in determining under subdivision (2)(i)(C) of this paragraph whether the property is used predominantly outside the United States by the third person.

(iii) *Leasing rule.* For purposes of this paragraph (f)(2), leased property is deemed to be ultimately used by a member of the same controlled group as the lessor if such property is leased to a person which is not a member of the controlled group but which subleases the property to a person which is a member of the controlled group. Thus, for example, if X, a FSC for the taxable year, leases a movie film to Y, a foreign corporation which is not a member of the same controlled group as X, and Y then subleases the film to persons which are members of the controlled group for showing to the general public, the film is not export property. On the other hand, if X, a FSC for the taxable year, leases a movie film to Z, a foreign corporation which is a member of the same controlled group as X, and Z then subleases the film to Y, another foreign corporation, which is not a member of the same controlled group for showing to the general public, the film is not disqualified from being export property.

(iv) *Certain copyrights.* With respect to a copyright which is not excluded by subdivision (3) of this paragraph from being export property, the ultimate use of the property is the sale or exhibition of the property to the general public. Thus, if A, a FSC for the taxable year, leases recording tapes to B, a foreign corporation which is a member of the same controlled group as A, and if B makes records from the recording tape and sells the records to C, another foreign corporation, which is not a member of the same controlled group, for sale by C to the general public, the recording tape is not disqualified under this paragraph from being export property, notwithstanding the leasing of the recording tape by A to a member of the same controlled group, since the ultimate use of the tape is the sale of the records (*i.e.*, property produced from the recording tape).

(3) *Intangible property.* Export property does not include any patent, invention, model, design, formula, or process, whether or not patented, or any copyright (other than films, tapes, records, or similar reproductions, for commercial or home use), goodwill, trademark, tradebrand, franchise, or other like property. Although a copyright such as a copyright on a book or computer software does not constitute export property, a copyrighted article (such as a book or standardized, mass marketed computer software) if not accompanied by a right to reproduce for external use is export property if the requirements of this section are otherwise satisfied. Computer software referred to in the preceding sentence may be on any medium, including, but not limited to, magnetic tape, punched cards, disks, semi-conductor chips and circuit boards. A license of a master recording tape for reproduction outside the United States is not disqualified under this paragraph from being export property.

(g) *Oil and gas*—(1) *In general.* Under section 927(a)(2)(C), export property does not include oil or gas (or any primary product thereof).

(2) *Primary product from oil or gas.* A primary product from oil or gas is not export property. For purposes of this paragraph—

(i) *Primary product from oil.* The term ‘‘primary product from oil’’ means crude oil and all products derived from the destructive distillation of crude oil, including—

(A) Volatile products,

(B) Light oils such as motor fuel and kerosene,

(C) Distillates such as naphtha,

(D) Lubricating oils,

(E) Greases and waxes, and

(F) Residues such as fuel oil.

For purposes of this paragraph, a product or commodity derived from shale oil which would be a primary product from oil if derived from crude oil is considered a primary product from oil.

(ii) *Primary product from gas.* The term ‘‘primary product from gas’’ means all gas and associated hydrocarbon components from gas wells or oil wells, whether recovered at the lease or upon further processing, including—

(A) Natural gas,

(B) Condensates,

(C) Liquefied petroleum gases such as ethane, propane, and butane, and

(D) Liquid products such as natural gasoline.

(iii) *Primary products and changing technology.* The primary products from oil or gas described in subdivisions (2)(i) and (ii) of this paragraph and the processes described in those subdivisions are not intended to represent either the only primary products from oil or gas, or the only processes from which primary products may be derived under existing and future technologies. For example, petroleum coke, although not derived from the destructive distillation of crude oil, is a primary product from oil derived from an existing technology.

(iv) *Non-primary products.* For purposes of this paragraph, petrochemicals, medicinal products, insecticides and alcohols are not considered primary products from oil or gas.

(h) *Export controlled products*—(1) *In general.* Section 927(a)(2)(D) provides that an export controlled product is not export property. A product or commodity may be an export controlled product at one time but not an export controlled product at another time. For purposes of this paragraph, a product or commodity is an ''export controlled product'' at a particular time if at that time the export of such product or commodity is prohibited or curtailed under section 7(a) of the Export Administration Act of 1979, to effectuate the policy relating to the protection of the domestic economy set forth in paragraph (2)(C) of section 3 of the Export Administration Act of 1979. That policy is to use export controls to the extent necessary to protect the domestic economy from the excessive drain of scarce materials and to reduce the serious inflationary impact of foreign demand.

(2) *Products considered export controlled products*—(i) *In general.* For purposes of this paragraph, an export controlled product is a product or commodity, which is subject to short supply export controls under 15 CFR part 377. A product or commodity is considered an export controlled product for the duration of each control period which applies to such product or commodity. A control period of a product or commodity begins on and includes the initial control date (as defined in subdivision (2)(ii) of this paragraph) and ends on and includes the final control date (as defined in subdivision (2)(iii) of this paragraph).

(ii) *Initial control date.* The initial control date of a product or commodity which is subject to short supply export controls is the effective date stated in the regulations to 15 CFR part 377 which subjects the product or commodity to short supply export controls. If there is no effective date stated in these regulations, the initial control date of the product or commodity will be thirty days after the effective date of the regulations which subject the product or commodity to short supply export controls.

(iii) *Final control date.* The final control date of a product or commodity is the effective date stated in the regulations to 15 CFR part 377 which removes the product or commodity from short supply export controls. If there is no effective date stated in those regulations, the final control date of the product or commodity is the date which is thirty days after the effective date of the regulations which remove the product or commodity from short supply export control.

(iv) *Expiration of Export Administration Act.* An initial control date and final control date cannot occur after the expiration date of the Export Administration Act under the authority of which the short supply export controls were issued.

(3) *Effective dates*—(i) *Products controlled on January 1, 1985.* If a product or commodity was subject to short supply export controls on January 1, 1985, this paragraph shall apply to all sales, exchanges, other dispositions, or leases of the product or commodity made after January 1, 1985, by the FSC or by the FSC's related supplier if the FSC is the commission agent on the transaction.

(ii) *Products first controlled after January 1, 1985.* If a product or commodity becomes subject to short supply export controls after January 1, 1985, this paragraph applies to sales, exchanges, other dispositions, or leases of such product or commodity made on or after the initial control date of such product or commodity, and to owning such product or commodity on or after such date.

(iii) *Date of sales, exchange, lease, or other disposition.* For purposes of this paragraph (h)(3), the date of sale, exchange, or other disposition of a product or commodity is the date as of which title to such product or commodity passes. The date of a lease is the date as of which the lessee takes possession of a product or commodity. The accounting method of a person is not determinative of the date of sale, exchange, other disposition, or lease.

(i) *Property in short supply.* If the President determines that the supply of any property which is otherwise export property as defined in this section is insufficient to meet the requirements of the domestic economy, he may by Executive Order designate such property as in short supply. Any property so designated will be treated under section 927(a)(3) as property which is not export property during the period beginning with the date specified in such Executive Order and ending with the date specified in an Executive Order setting forth the President's determination that such property is no longer in short supply.

[T.D. 8126, 52 FR 6459, Mar. 3, 1987]

§1.927(b)–1T Temporary regulations; Definition of gross receipts.

(a) *General rule.* Under section 927(b), for purposes of sections 921 through 927, the gross receipts of a person for a taxable year are—

(1) *Business income.* The total amounts received or accrued by the person from the sale or lease of property held primarily for sale or lease in the ordinary course of a trade or business, and

(2) *Other income.* Gross income recognized from whatever source derived, such as, for example, from—

(i) The furnishing of services (whether or not related to the sale or lease of property described in subdivision (1) of this paragraph),

(ii) Dividends and interest (including tax exempt interest),

(iii) The sale at a gain of any property not described in subdivision (1) of this paragraph, and

(iv) Commission transactions to the extent described in paragraph (e) of this section.

(b) *Non-gross receipts items.* For purposes of paragraph (a) of this section, gross receipts do not include amounts received or accrued by a person from—

(1) *Loan transactions.* The proceeds of a loan or of the repayment of a loan, or

(2) *Non-taxable transactions.* A receipt of property in a transaction to which section 118 (relating to contribution to capital) or section 1032 (relating to exchange of stock for property) applies.

(c) *Non-reduction of total amounts.* For purposes of paragraph (a) of this section, the total amounts received or accrued by a person are not reduced by costs of goods sold, expenses, losses, a deduction for dividends received, or any other deductible amounts. The total amounts received or accrued by a person are reduced by returns and allowances.

(d) *Method of accounting.* For purposes of paragraph (a) of this section, the total amounts received or accrued by a person shall be determined under the method of accounting used in computing its taxable income. If, for example, a FSC receives advance or installment payments for the sale or lease of property described in paragraph (a)(1) of this section, for the furnishing of services, or which represent recognized gain from the sale of property not described in paragraph (a)(1) of this section, any amount of such advance payments is considered to be gross receipts of the FSC for the taxable year for which such amount is included in the gross income of the FSC.

(e) *Commission transactions*—(1) *In general*—(i) *With a related supplier.* In the case of transactions which give rise to a commission from the FSC's related supplier on the sale or lease of property or the furnishing of services by a principal, the FSC's gross income from all such transactions is the commission paid or payable to the FSC by the related supplier. The FSC's gross receipts for purposes of computing its profit under the administrative pricing methods of section 925(a)(1) and (2) shall be the gross receipts (other than gross receipts which would not be foreign trading gross receipts had they been received by the FSC) derived by the related supplier from the sale or lease of the property or from the furnishing of services, with respect to which the commissions are derived. Also, in determining whether the 50% test in section 924(a) has been met, the relevant gross receipts are the gross receipts of the related supplier.

(ii) *With an unrelated principal.* In the case of transactions which give rise to a commission from an unrelated principal to a FSC on the sale or lease of property or the furnishing of services by a principal, the amount recognized by the FSC as gross income from all such transactions shall be the commission received from the principal.

(2) *Selective commission arrangements*—(i) *In general.* A commission arrangement between the FSC and its related supplier may provide that the FSC will not be the related supplier's commission agent with respect to sales or leases of export property, or the furnishing of services, which do not result in foreign trading gross receipts. In addition, the commission agreement may provide that the FSC will not be the related supplier's commission agent on transactions which would result in a loss to the related supplier under the transfer pricing rules of section 925(a). In a buy-sell FSC situation, selective commission arrangements are not applicable. Determination of which transactions fall within the selective commission arrangement may be made up to the due date under section 6072(b), including extensions provided for under section 6081, of the FSC's income tax return for the taxable year of the FSC during which a transaction occurs.

(ii) *Example.* The treatment of a selective commission arrangement may be illustrated by the following example:

Example. A calendar year commission FSC (''F'') entered into a selective commission arrangement with related supplier RS which provided that F will not be RS's commission agent on transactions which would result in a loss to RS under the transfer pricing rules of section 925(a). During 1987, RS sold three different articles of export property A, B and C, all of which fall within the same three digit Standard Industrial Classification. In July of 1988, while preparing the FSC's 1987 income tax return, RS determined that the sale of export property A resulted in a loss to RS under the section 482 method of section 925(a)(3) and that applying that method to the sales of export property B and C resulted in only a small amount of income to both RS and F. In addition, RS determined that grouping export property B and C, while excluding export property A from the grouping, resulted in the highest profit to F under the combined taxable income administrative pricing method of section 925(a)(2). Using the same grouping, the gross receipts method of section 925(a)(1) would result in a lower profit to F. Under the special no-loss rule of § 1.925(a)–1T(e)(1)(iii), RS would be prohibited from using the combined taxable income administrative pricing method to determine F's profit for the grouping of export property B and C if it used the section 482 method on the sale of export property A. This results because there was a loss to RS on the sale of export property A. Under the selective commission arrangement, RS could exercise its option and exclude the sale of export property A. Since F is no longer deemed to have been operating as RS's commission agent on that sale, the combined taxable income method may be used to compute F's profit on the grouping of the sales of export property B and C.

(f) *Example.* The definition of gross receipts under this section may be illustrated by the following example:

Example. During 1985, M, a related supplier of N, is engaged in the manufacture of machines in the United States. N, a calendar year FSC, is engaged in the sale and lease of such machines in foreign countries. N furnishes services which are related and subsidiary to its sale and lease of those machines. N also acts as a commission agent in foreign countries for Z, an unrelated supplier, with respect to Z's sale of products. N receives dividends on stock owned by it, interest on loans, and proceeds from sales of business assets located outside the United States resulting in recognized gains and losses. N's gross receipts for 1985 are $3,550, computed on the basis of the additional facts assumed in the table below:

N's sales receipts for machines manufactured by M (without reduction for cost of goods sold and selling expenses)	$1,500
N's lease receipts for machines manufactured by M (without reduction for depreciation and leasing expenses)	500
N's gross income from related and subsidiary services for machines manufactured by M (without reduction for service expenses)	400
N's sales receipts for products manufactured by Z (without reduction for Z's cost of goods sold, commissions on sales and commission sales expenses)	550
Dividends received by N	150
Interest received by N	200
Proceeds received by N representing recognized gain (but not losses) for sales of business assets located outside the United States	250

N's gross receipts	3,550

[T.D. 8126, 52 FR 6464, Mar. 3, 1987]

§1.927(d)–1 Other definitions.

(a) *Carrying Charges.*

Q–1. Under what circumstances is the sales price of property or services sold by a FSC or a related supplier considered to include carrying charges as defined in subdivision (ii)(B)(*1*) of Q&A–9 of §1.921–2?

A–1. (i) The proceeds received from a sale of export property by a FSC or a related supplier (or the amount paid for services rendered or from rental of export property) may include carrying charges if any part of the sale proceeds (or service or rental payment) is paid after the end of the normal payment period. If the export property is sold or leased by, or if the services are rendered by, the FSC, the entire carrying charges amount as determined in Q&A–2 of this section will be the income of the FSC. If, however, the FSC is the commission agent of a related supplier on these transactions, the carrying charges amount so determined is income of the related supplier. The commission payable to the FSC will be computed by reducing the related supplier's gross receipts from the transaction by the amount of the carrying charges. No carrying charges will be assessed on the commissions paid by the related supplier to the FSC. The carrying charges provisions, likewise, do not apply to any other transaction that does not give rise to foreign trading gross receipts.

(ii) The normal payment period for a sale transaction is 60 days from the earlier of date of sale or date of exchange of property under the contract. For this purpose, the date of sale will be the date the sale is recorded on the seller's books of account under its normal accounting method. The date the transaction was recorded on the seller's books of account shall be disregarded if recording is delayed in order to delay the start of the normal payment period. In these circumstances, the earlier of the date of the contract or date of exchange of property will be deemed the date of sale. For related and subsidiary services that are not separately stated from the sale or lease transaction, the earlier of the date of the sale or date the export property is delivered to the purchaser is the applicable date. For related and subsidiary services which are separately stated from the sale or lease transaction and for other services, such as engineering and architectural services, the normal payment period is 60 days from the earlier of the date payment is due for the services or the date services under the contract are completed. The date of completion of a services contract is the date of final approval of the services by the recipient. With regard to transactions involving the lease or rental of export property, the normal payment period will begin on the date the rental payment is due under the lease. The date the normal payment period begins under this subdivision (ii) will be the same whether or not the transaction is with a related person.

(iii) The carrying charges are computed for the period beginning with the first day after the end of the normal payment period and ending with the date of payment. A FSC may elect at any time prior to the close of the statute of limitations of section 6501(a) for the FSC taxable year to treat the final date of payment stated in the contract as the date of payment if—

(A) The contracts for all transactions completed during the taxable year require that payment be received within the normal payment period,

(B) No more than 20% of transactions for which final payment is received in the taxable year involve payment after the end of the normal payment period. For FSC taxable years beginning after March 3, 1987, the 20% test will apply only to the dollar value of the transactions and not to the number of transactions. For prior taxable years, the 20% test will apply to either the dollar value of the transactions or to the number of transactions. The special grouping rules applicable to determination of the FSC's profit under the administrative pricing rules of section 925 may be applied to this elective provision. Accordingly, transactions may be grouped into product or product-line groupings to determine whether 20% or less of the dollar value (or number of transactions, if applicable) of the grouped transactions involve payment after the end of the normal payment period.

Q–2. How are carrying charges as defined in subdivision (ii)(B)(*1*) of Q&A 9 of § 1.921–9 computed?

A–2. If carrying charges as defined in subdivision (ii)(B)(*1*) of Q&A 9 of § 1.921–9 are considered to be included in the sale price of property income or rental payment services, the amount of the carrying charges is equal to the amount in subdivision (i) of this answer if the contract provides for stated interest or the amount in subdivisions (ii) or (iii) of this answer, whichever is applicable, if the contract does not so provide.

(i) If a contract provides for stated interest beginning on the day after the end of the normal payment period, carrying charges will accrue only if the stated interest rate is less than the short-term, monthly Federal rate as of the day after the end of normal payment period and then only to the extent the stated interest is less than the short-term, monthly Federal rate. The short-term, monthly Federal rate is that rate as determined for purposes of section 1274(d) and which is published in the Internal Revenue Bulletin. Carrying charges will not accrue, however, unless payments are made after the end of the normal payment period.

(ii) If a contract for a transaction does not provide for stated interest, and if the taxpayer does not elect the method described in subdivision (iii) of this answer, the amount of carrying charges is equal to the excess of—

(A) The amount of the sales price of property, services income or rental payment that is unpaid on the day after the end of the normal payment period, over

(B) The present value, as of the day after the end of the normal payment period, of all payments that are required to be made under the contract and that are unpaid on the day after the end of the normal payment period. The amount of the sales price of property, service income or rental payment is the amount under the contract whether it be the sales price, amount paid for services or the rental amount determined as of the actual payment date unless a FSC makes the election provided under subdivision (iii) of Q&A 1. If a FSC makes the election provided under subdivision (III) of Q&A 1, the amount of the sales price is the sales price, services income or rental payment under the contract determined as of the final payment date stated in the contract. All payments that are required to be made under the contract include the stated sales price, services income or rental payment as well as stated amounts of interest and carrying charges. The discount rate for the present value computation is simple interest at the short-term monthly Federal rate published in the Internal Revenue Bulletin, determined as of the day after the end of the normal payment period. The present value of a payment is calculated as follows:

$$P = S\frac{1}{(1+(i\times t))}$$

P=present value of a payment that is required and unpaid after the end of the normal payment period

S=amount of a payment that is required and unpaid after the end of the normal payment period

i=the short-term monthly Federal rate

t=the number of days after the end of the normal payment period and before date of payment divided by 365.

If a sale is made, or if services are completed, or if rent is due under a lease in a taxable year and the required date of payment is in a later taxable year, carrying charges for the first taxable year are computed for the number of days after the end of the normal payment period and before the end of the taxable year. For the following taxable year, carrying charges are computed for the number of days after the beginning of the taxable year and before the date of payment.

(iii) At the election of the taxpayer, the amount of carrying charges may be determined under the method described in this subdivision (iii). If the taxpayer elects this method, it must be used for all applicable transactions within the taxable year of the FSC. If this optional method is used, the computation of carrying charges must be made separately for transactions involving related persons and for those transactions involving unrelated persons. In addition, the computation of carrying charges must be made separately for each of the five types of income of the FSC (or of the related supplier if the related supplier is the principal on the transaction) listed in subparagraph (1) through (5) of section 924(a). These groupings are separate and distinct from the groupings that are established for purposes of determining the FSC's profit on the export transactions. The optional method allowed in this subdivision provides that the amount of carrying charges for a taxable year of a FSC (or related supplier if the related supplier is the principal on the export transaction) is computed using the average of receivables of unrelated persons (or of related persons) and the average time those receivables are outstanding. Receivables are included in this computation only if they are from transactions on which foreign trading gross receipts, as defined in section 924(a), are received by the FSC (or which are received by a related supplier of a FSC and which would have been foreign trading gross receipts had they been received by the FSC). Carrying charges are calculated under this method as follows:

CC=(AR) (I/365) (X) (Y)

CC=Carrying charges

AR=Average monthly receivables balance for the taxable year

I=The average short-term, monthly Federal rate for the year

X=The number of times receivables turn over in the year

Y=The number of days the average receivables are outstanding over 60 days.

This optional method is illustrated in *Example 5* in subdivision (v) of this answer.

(iv) The computation of carrying charges under this answer 2 applies only to the determination of carrying charges under subdivision (ii)(B)(*1*) of Q&A 9 of § 1.921–2 and does not apply to the determination of any other unstated interest or for any other purpose.

(v) The following examples illustrate the computation of carrying charges under this section:

Example 1. On January 1, 1985, a FSC sells export property for $10,000. The export property is delivered to the purchaser on January 10, 1985. The terms of the contract require payment within 90 days after sale. The normal payment period is 60 days. The FSC does not make an election under subdivision (iii) of Q&A. The contract does not require the payment of any interest or carrying charges. The purchaser pays the entire sales price on March 1, 1985. The sales price is not considered to include any carrying charges because the purchase paid the entire sales price within the normal payment period.

Example 2. The facts are the same as in example 1 except that the purchaser pays the entire sales price on April 6, 1985, 96 days after the earlier of the date of sale or date of delivery (*i.e.*, January 1, 1985). Therefore, the sales price is considered to include carrying charges computed as follows:

Step 1: Determines the short-term monthly Federal rate as of the earlier of date of sale or date of delivery. For purposes of this example, the rate is 10%.

Step 2: Determine the fraction of the year represented by the number of days after 60 days and before date of payment. In this example, the number of days beyond 60 is 96–60=36, which is divided by 365

$$\frac{36\text{ days}}{365\text{ days}} = .099\text{ fraction of the year}$$

Step. 3: Using the short-term monthly Federal rate and the fraction of the year, compute the present value of the payment.

$$P = S\frac{1}{\left(1+\left(i\times t\right)\right)}$$

$$P = \$10{,}000\,\frac{1}{\left(1+\left(.10\sqrt{099}\right)\right)}$$

P=$10,000 (.99)

P=$9,900

Step 4: Using the present value of all payments, compute the carrying charges.

Carrying Charges=Sales Price less Present Value.

$10,000	Sales Price
–9,900	Present Value
$100	Carrying charges

Example 3. On October 15, 1985, F, a FSC, leases export property to X for one month with a total rental due of $20,000. Under the terms of the lease, A agreed to pay F $10,000 on October 15, 1985, and the remaining $10,000 on January 15, 1986. The contract does not require the payment of any interest or carrying charges. The second $10,000 payment is made on January 3, 1986. This payment does not include any carrying charges because X paid the $10,000 before the start of the normal payment period.

Example 4. On October 15, 1985, F, a FSC, leases export property to X, for one month with a total amount due under the lease of $10,000, payable on October 15, 1985. X delays payment until January 19, 1986, which was 96 days after the start of the normal payment period. The 60 day normal payment period terminated on December 14, 1985. Therefore, the lease payment is considered to include carrying charges of $100 computed in the same manner as in *Example 2.* Of this $100, 17/36, or $47.22, is carrying charges for 1985 (*i.e.,* 17 days in December), and 19/36, or $52.78, is carrying charges for 1986.

Example 5. During 1986, F, a FSC, sold on account export properties A and B to related and unrelated persons.

(A) *Unrelated persons.* During 1986, the sales on account to unrelated persons totaled $6,000. On the last day of each of the months of 1986, F had total receivables from unrelated persons from sales of export properties A and B, as follows:

January 31	$1,400
February 28	1,400
March 31	1,000
April 30	1,000
May 31	1,200
June 30	1,300
July 31	1,000
August 31	1,300
September 30	1,500
October 31	1,100
November 30	1,200
December 31	1,000
	14,400

Carrying charges for 1986 with unrelated persons under the optional method of subdivision (iii) of this answer will be $19.23, computed as follows:

Step 1: Determine the average short-term, monthly Federal rate for the year. For purposes of this example, the rate is assumed to be 9%.

Step 2: Determine the average receivables for the year. This average is calculated by totaling the end of the month receivables balance of each month of the year and dividing by twelve. In this example, the average monthly receivables balance is $1,200, calculated as follows:

$$\$1{,}200=\$14{,}400/12$$

Step 3: Determine the number of times the receivables turn over during the year. This is calculated by dividing the sales on account for the year by the average monthly receivables balance for the year. For purposes of this example, receivables turned over 5 times for 1986, computed as follows:

$$5=\frac{\$6{,}000}{\$1{,}200}$$

Step 4: Determine the number of days the average receivables are outstanding in excess of 60 days. In this example, there are 13 receivable days in excess of 60 days, computed as follows:

$$13\,\text{days}=\left(\frac{365}{5}\right)-60\,\text{days}$$

Step 5: The amount of carrying charges, $19.23, is calculated by using the following equation:

CC=(AR) (I/365) (X)(Y)

CC=Carrying charges

AR=Average monthly receivables balance for the taxable year (step 2)

I=The average short-term monthly Federal rate for the year (step 1)

X=The number of times receivables turn over in the year (step 3)

Y=The number of days the average receivables are outstanding over 60 days (step 4).

CC=$19.23=($1,200) (.09/365) (5) (13)

(B) *Related persons.* Carrying charges, if any, on the sales on account to related persons must be computed separately using this optional method.

Q–3. Is a discount from the sales price of property or services for prompt payment considered to be stated carrying charges as defined in subdivision (ii)(A) of Q&A 9 of § 1.921–2?

A–3. No.

Q–4. Is the receipt of an arm's length factoring payment from an unrelated person considered a payment of the sales proceeds for purposes of determining whether payment is made within the normal payment period and the possible imposition of carrying charges?

A–4. Yes.

[T.D. 8127, 52 FR 6473, Mar. 3, 1987]

§ 1.927(d)–2T Temporary regulations; definitions and special rules relating to Foreign Sales Corporation.

(a) *Definition of related supplier.* For purposes of sections 921 through 927 and the regulations under those sections, the term ''related supplier'' means a related party which directly supplies to a FSC any property or services which the FSC disposes of in a transaction producing foreign trading gross receipts, or a related party which uses the FSC as a commission agent in the disposition of any property or services producing foreign trading gross receipts. A FSC may have different related suppliers with respect to different transactions. If, for example, X owns all the stock of Y, a corporation, and of F, a FSC, and X sells a product to Y which is resold to F, only Y is the related supplier of F. If, however, X sells directly to F and Y also sells directly to F, then, as to the transactions involving direct sales to F, each of X and Y is a related supplier of F.

(b) *Definition of related party.* The term ''related party'' means a person which is owned or controlled directly or indirectly by the same interests as the FSC within the meaning of section 482 and §1.482–1(a).

[T.D. 8126, 52 FR 6465, Mar. 3, 1987]

§1.927(e)–1 Special sourcing rule.

(a) *Source rules for related persons*—(1) *In general.* The income of a person described in section 482 from a sale of export property giving rise to foreign trading gross receipts of a FSC that is treated as from sources outside the United States shall not exceed the amount that would be treated as foreign source income earned by such person if the pricing rule under section 994 that corresponds to the rule used under section 925 with respect to such transaction applied to such transaction. This special sourcing rule also applies if the FSC is acting as a commission agent for the related supplier with respect to the transaction described in the first sentence of this paragraph (a)(1) that gives rise to foreign trading gross receipts and the transfer pricing rules of section 925 are used to determine the commission payable to the FSC. No limitation results under this section with respect to a transaction to which the section 482 pricing rule under section 925(a)(3) applies.

(2) *Grouping of transactions.* If, for purposes of determining the FSC's profits under the administrative pricing rules of sections 925(a) (1) and (2), grouping of transactions under §1.925(a)–1T(c)(8) was elected, the same grouping shall be used for making the determinations under the special sourcing rule in this section.

(3) *Corresponding DISC pricing rules*—(i) *In general.* For purposes of this section—

(A) The DISC gross receipts pricing rule of section 994(a)(1) corresponds to the gross receipts pricing rule of section 925(a)(1);

(B) The DISC combined taxable income pricing rule of section 994(a)(2) corresponds to the combined taxable income pricing rule of section 925(a)(2); and

(C) The DISC section 482 pricing rule of section 994(a)(3) corresponds to the section 482 pricing rule of section 925(a)(3).

(ii) *Special rules.* For purposes of this section—

(A) The DISC pricing rules of section 994(a)(1) and (2) shall be determined without regard to export promotion expenses;

(B) Qualified export receipts under section 994(a)(1) and

(2) Shall be deemed to be an amount equal to the foreign trading gross receipts arising from the transaction; and

(C) Combined taxable income for purposes of section 994(a)(2) shall be deemed to be an amount equal to the combined taxable income for purposes of section 925(a)(2) arising from the transaction.

(b) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. (i) R and F are calendar year taxpayers. R, a domestic manufacturing company, owns all the stock of F, which is a FSC acting as a commission agent for R. For the taxable year, R and F used the combined taxable income pricing rule of section 925(a)(2). For the taxable year, the combined taxable income of R and F is $100 from the sale of export property, as defined in section 927(a), manufactured by R using production assets located in the United States. Title to the export property passed outside of the United States.

(ii) Under section 925(a)(2), 23 percent of the $100 combined taxable income of R and F ($23) is allocated to F and the remaining $77 is allocated to R. Absent the special sourcing rule, under section 863(b) the $77 income allocated to R would be sourced $38.50 U.S. source and $38.50 foreign source. Under the special sourcing rule, the amount of foreign source income earned by a related supplier of a FSC shall not exceed the amount that would result if the corresponding DISC pricing rule applied. The DISC combined taxable income pricing rule of section 994(a)(2) corresponds to the combined taxable income pricing rule of section 925(a)(2). Under section 994(a)(2), $50 of the combined taxable income ($100 x .50) would be allocated to the DISC and the remaining $50 would be allocated to the related supplier. Under section 863(b), the $50 income allocated to the DISC's related supplier would be sourced $25 U.S. source and $25 foreign source. Accordingly, under the special sourcing rule, the foreign source income of R shall not exceed $25.

Example 2. (i) Assume the same facts as in *Example 1* except that R and F used the gross receipts pricing rule of section 925(a)(1). In addition, for the taxable year foreign trading gross receipts derived from the sale of the export property are $2,000.

(ii) Under section 925(a)(1), 1.83 percent of the $2,000 foreign trading gross receipts ($36.60) is allocated to F and the $63.40 remaining combined taxable income ($100−$36.60) is allocated to R. Absent the special sourcing rule, under section 863(b) the $63.40 income allocated to R would be sourced $31.70 U.S. source and $31.70 foreign source. Under the special sourcing rule, the amount of foreign source income earned by a related supplier of a FSC shall not exceed the amount that would result if the corresponding DISC pricing rule applied. The DISC gross receipts pricing rule of section 994(a)(1) corresponds to the gross receipts pricing rule of section 925(a)(1). Under section 994(a)(1), $80 ($2,000 × .04) would be allocated to the DISC and the $20 remaining combined taxable income would be allocated to the related supplier. Under section 863(b), the $20 income allocated to the DISC's related supplier would be sourced $10 U.S. source and $10 foreign source. Accordingly, under the special sourcing rule, the foreign source income of R shall not exceed $10.

(c) *Effective date.* The rules of this section are applicable to taxable years beginning after December 31, 1997.

[T.D. 8782, 63 FR 50144, Sept. 21, 1998]

§ 1.927(e)–2T Temporary regulations; effect of boycott participation on FSC and small FSC benefits.

(a) *International boycott factor.* If the FSC (or small FSC) or any member of the FSC's (or small FSC's) controlled group participates in or cooperates with an international boycott within the meaning of section 999, the FSC's (or small FSC's) exempt foreign trade income as determined under section 923 (a) shall be reduced by an amount equal to the product of the FSC's (or small FSC's) exempt foreign trade income multiplied by the international boycott factor determined under section 999. The amount of the reduction will be considered as non-exempt foreign trade income.

(b) *Specifically attributable taxes and income method.* If the taxpayer clearly demonstrates that the income earned for the taxable year is attributable to specific operations, then in lieu of applying the international boycott factor for such taxable year, the amount of the exempt foreign trade income as determined under section 923(a) that will be reduced by this section shall be the amount specifically attributable to the operations in which there was participation in or cooperation with an international boycott under section 999(b)(1). The amount of the reduction will be considered as non-exempt foreign trade income.

[T.D. 8126, 52 FR 6465, Mar. 3, 1987]

§ 1.927(f)–1 Election and termination of status as a Foreign Sales Corporation.

(a) *Election of status as a FSC or a small FSC.*

Q–1. What is the effect of an election by a corporation to be treated as a FSC or small FSC?

A–1. A valid election to be treated as a FSC or a small FSC applies to the taxable year of the corporation for which made and remains in effect for all succeeding taxable years in which the corporation qualifies to be a FSC unless revoked by the corporation or unless the corporation fails for five consecutive years to qualify as a FSC (in case of a FSC election) or as a small FSC (in case of a small FSC election).

Q–2. Can a corporation established prior to January 1, 1985 be treated as a FSC or a small FSC prior to making a FSC or a small FSC election?

A–2. A corporation cannot be treated as a FSC or a small FSC until it has made a FSC or a small FSC election. An election made within the first 90 days of 1985 relates back to January 1, 1985 unless the taxpayer indicates otherwise.

Q–3. If a shareholder who has not consented to a FSC or small FSC election transfers some or all of its shares before or during the first taxable year for which the election is made, may the holder of the transferred shares consent to the election?

A–3. A holder of the transferred shares may consent to a FSC or small FSC elction under the circumstances described in § 1.922–2(c)(1). The rules contained in § 1.992–(c) shall apply to the consent by a holder of transferred shares.

Q–4. If a shareholder who has consented to a FSC or a small FSC election transfers some or all of its shares before the first taxable year for which the election is made, must the holder of the transferred shares consent to the election?

A–4. Yes. Consent must be made by any recipient of such shares on or before the 90th day after the first day of such first taxable year. If such recipient fails to file his consent on or before such 90th day, and extension of time for filing such consent may be granted in the manner, and subject to the conditions, described in paragraph (b)(3) of § 1.992–2.

Q–5. May an election of a corporation to be a FSC or a small FSC be effective as of a time other than the start of the corporation's taxable year?

A–5. No.

Q–6. If a fiscal year foreign corporation was in existence on December 31, 1984, must it wait until the first day of its taxable year beginning after January 1, 1985, to elect FSC status?

A–6. No. If a fiscal year foreign corporation was in existence on December 31, 1984, its taxable year will be deemed to have terminated on that date if the foreign corporation elects FSC status to be effective January 1, 1985. An income tax return will be required for any short years created by the deemed closing of the taxable year unless the corporation is relieved from the necessity of making a return by section 6012 and the regulations under that section. If the corporation's taxable year is deemed closed by operation of this regulation, the filing date of tax returns for the short taxable year ended on December 31, 1984, will be automatically extended until May 18, 1987.

Q–7. What is the effect of an election to be treated as a FSC or as a small FSC if the corporation or any other member of the controlled group has in effect an election to be treated as an interest charge DISC?

A–7. The interest charge DISC election shall be treated as revoked for all purposes under the Code as of the date the FSC election is effective. An affirmative revocation of the DISC election is unnecessary. The FSC election shall take effect. As long as the FSC election remains in effect, neither the corporation nor any other member of the controlled group is permitted to elect to be treated as an interest charge DISC for any taxable year including any part of a taxable year during which the corporation's FSC election continues to be effective.

Q–8. What is the effect of an election to be treated as a small FSC if the corporation or any other member of the controlled group has in effect an election to be treated as a FSC?

A–8. As long as a FSC election remains in effect, neither the corporation nor any other member of the controlled group is permitted to elect to be treated as a small FSC for any taxable year including any part of a taxable year during which a FSC election continues to be effective. Any FSC within the controlled group must affirmatively revoke its FSC election for a taxable year including any part of a taxable year for which small FSC status is elected.

Q–9. What is the effect of an election to be treated as a FSC if the corporation or any other member of the controlled group has in effect an election to be treated as a small FSC?

A–9. As long as a small FSC election remains in effect, neither the corporation nor any other member of the controlled group is permitted to elect to be treated as a FSC for any taxable year including any part of the taxable year during which a small FSC election continues to be effective. Any small FSC within the controlled group must affirmatively revoke its small FSC election for a taxable year including any part of a taxable year for which FSC status is elected. An election to be treated as a small FSC is permitted if the corporation or any other member of the controlled group has in effect an election to be treated as a small FSC. For a special rule providing for conversion of a small FSC to a FSC within one taxable year, see § 1.921–1T(b)(1) (Q&A–1).

(b) *Termination of election of status as a FSC or a small FSC.*

Q–10. How is the status of a corporation as a FSC or as a small FSC terminated?

A–10. The status of a corporation as a FSC or as a small FSC is terminated through revocation or by its continued failure to be a FSC.

Q–11. For what taxable year may a corporation revoke its election to be treated as a FSC or as a small FSC?

A–11. A corporation may revoke its election to be treated as a FSC or as a small FSC for any taxable year of the corporation after the first taxable year for which the election is effective.

Q–12. When must a corporation revoke a FSC or a small FSC election if revocation is to be effective for the taxable year in which revocation takes place?

A–12. If a corporation files a statement revoking its election to be treated as a FSC or as a small FSC during the first 90 days of a taxable year (other than the first taxable year for which such election is effective), such revocation will be effective for such taxable year and all taxable years thereafter. If the corporation files a statement revoking its election to be treated as a FSC or a small FSC after the firs 90 days of a taxable year, the revocation will be effective for all taxable years following such taxable year.

Q–13. Can a FSC change its status to a small FSC, or can a small FSC change its status to a FSC as of a date other than the first day of a taxable year?

A–13. No. Since a revocation of an election to be a FSC or a small FSC is effective only for entire taxable year, a corporation's change between FSC and small FSC status is effective as of the first day of a taxable year.

Q–14. How may a corporation revoke an election by a corporation to be treated as a FSC or a small FSC?

A–14. A corporation may revoke its election by filing a statement that the corporation revokes its election under section 922(a) to be treated as a FSC or under section 922(b) to be treated as a small FSC. Such statement shall indicate the corporation's name, address, employer identification number, and the first taxable year of the corporation for which the revocation is to be effective. The statement shall be signed by any person authorized to sign a corporate return under section 6062. Such revocation shall be filed with the Service Center with which the corporation filed its return.

Q–15. What if the effect is a corporation that has elected to be treated as a FSC or a small FSC fails to qualify as a FSC because it does not meet the requirements of section 922 for a taxable year?

A–15. If a corporation that has elected to be treated as a FSC or a small FSC does not qualify as a FSC or a small FSC for a taxable year, the corporation will not be treated as a FSC or a small FSC for the taxable year. However, the failure of a corporation to qualify to be treated as a FSC or a small FSC for a taxable year does not terminate the election of the corporation to be treated as FSC or a small FSC unless the corporation does not qualify under section 922 for each of 5 consecutive taxable years, as provided in Q&A 16 of this section.

Q–16. Under what circumstances is the FSC or small FSC election terminated for continued failure to be a FSC?

A–16. If a corporation that has elected to be treated as a FSC or a small FSC does not qualify under section 922 to be treated as a FSC or small FSC for each of 5 consecutive taxable years, such election terminates and will not be effective for any taxable year after such fifth taxable year. Such termination will be effective automatically without notice to such corporation or to the Internal Revenue Service.

[T.D. 8127, 52 FR 6475, Mar. 3, 1987]

POSSESSIONS OF THE UNITED STATES

§ 1.931–1 Citizens of the United States and domestic corporations deriving income from sources within a certain possession of the United States.

(a) *Definitions.* (1) As used in section 931 and this section, the term ''possession of the United States'' includes American Samoa, Guam, Johnston Island, Midway Islands, the Panama Canal Zone, Puerto Rico, and Wake Island. However, the term does not include (i) the Virgin Islands and (ii), when used with respect to citizens of the United States, the term does not include Puerto Rico or, in the case of taxable years beginning after December 31, 1972, Guam.

(2) As used in section 931 and this section, the term ''United States'' includes only the States, the Territories of Alaska and Hawaii, and the District of Columbia.

(b) *General rule*—(1) *Qualifications.* In the case of a citizen of the United States or a domestic corporation satisfying the following conditions, gross income means only gross income from sources within the United States—

(i) If 80 percent or more of the gross income of such citizen or domestic corporation (computed without the benefit of section 931) for the 3-year period immediately preceding the close of the taxable year (or for such part of such period immediately preceding the close of such taxable year as may be applicable) was derived from sources within a possession of the United States, and

(ii) If 50 percent or more of the gross income of such citizen or domestic corporation (computed without the benefit of section 931) for such period or such part thereof was derived from the active conduct of a trade or business within a possession of the United States. In the case of a citizen, the trade or business may be conducted on his own account or as an employee or agent of another. The salary or other compensation paid by the United States to the members of its civil, military, or naval personnel for services rendered within a possession of the United States represents income derived from the active conduct of a trade or business within a possession of the United States. The salary or other compensation paid for services performed by a citizen of the United States as an employee of the United States or any agency thereof shall, for the purposes of section 931 and this section, be deemed to be derived from sources within the United States. Dividends received by a citizen from a corporation whose income was derived from the active conduct of a business within a possession of the United States, does not represent income derived from the active conduct of a trade or business within the possession of the United States even though such citizen was actively engaged in the management of such corporation. For a determination of income from sources within the United States, see part I (section 861 and following), subchapter N, chapter 1 of the Code, and section 931(i), and the regulations thereunder.

(2) *Relationship of sections 931 and 911.* A citizen of the United States who cannot meet the 80-percent and the 50-percent requirements of section 931 but who receives earned income from sources within a possession of the United States, is not deprived of the benefits of the provisions of section 911 (relating to the exemption of earned income from sources outside the United States), provided he meets the requirements thereof. In such a case none of the provisions of section 931 is applicable in determining the citizen's tax liability. For what constitutes earned income, see section 911(b).

(3) *Meaning of ''gross income'' on joint return.* In the case of a husband and wife making a joint return, the term ''gross income,'' as used in this section, means the combined gross income of the spouses.

(4) *Returns.* A citizen entitled to the benefits of section 931 is required to file with his individual return Form 1040 the schedule on Form 1040E. If a citizen entitled to the benefits of section 931 has no income from sources within the United States and does not receive within the United States any income derived from sources without the United States he is not required to file a return or the schedule on Form 1040E.

(5) *Illustration of the operation of section 931.* This section may be illustrated by the following example:

Example. On July 1, 1954, A, who is a citizen of the United States, went to a possession of the United States and established a business there which he actively conducted during the remainder of that year. His gross income from the business during such period was $20,000. In addition, he made a profit of $12,000 from the sale during the latter part of 1954 of some real estate located in such possession and not connected with his trade or business. In the first six months of 1954 he also derived $8,000 gross income from rental property located in the United States. He derived a like amount of gross income from such property during the last six months of 1954. On these facts, A may exclude the

$32,000 derived from sources within the possession of the United States, since he qualified under section 931 with respect to that amount. The period of July 1, 1954, through December 31, 1954, constitutes the applicable part of the 3-year period immediately preceding the close of the taxable year (the calendar year 1954), and for that period, 80 percent of A's gross income was derived from sources within a possession of the United States ($32,000, or 80 percent of $40,000) and 50 percent or more of A's gross income was derived from the active conduct of a trade or business within a possession of the United States ($20,000, or 50 percent of $40,000). A is required to report on his return for 1954 only the gross income derived by him from sources within the United States ($16,000 from the rental property located in the United States).

(c) *Amounts received in the United States.* Notwithstanding the provisions of section 931(a), there shall be included in the gross income of citizens and domestic corporations therein specified all amounts, whether derived from sources within or without the United States, which are received by such citizens or corporations within the United States. From the amounts so included in gross income there shall be deducted only the expenses properly apportioned or allocated thereto. For instance, if in the example set forth in paragraph (b)(5) of this section, the taxpayer during the latter part of 1954 returned to the United States for a few weeks and while there received the proceeds resulting from the sale of the real estate located in the possession, the profits derived from such transaction should be reported in gross income. Such receipt in the United States, however, would not deprive the taxpayer of the benefits of section 931 with respect to other items of gross income excluded by that section.

(d) *Deductions*—(1) *Individuals.* In the case of a citizen entitled to the benefits of section 931, the deductions allowed in computing taxable income, except the standard deduction and a deduction for one personal exemption (see sections 142(b)(2) and 931(e), respectively), are allowed only if and to the extent that they are connected with income from sources within the United States. The provisions of section 873 and the regulations thereunder, relating to the allowance to nonresident alien individuals, who at any time within the taxable year were engaged in trade or business within the United States, of the deductions provided in section 165(c)(2) and (3) for losses not connected with the trade or business, are applicable in the case of citizens entitled to the benefits of section 931. The provisions of section 873 (c) and the regulations thereunder pertaining to the allowance to such nonresident alien individuals of deductions for contributions provided in section 170 are also applied in the case of such citizens.

(2) *Corporations.* Corporations entitled to the benefits of section 931 are allowed the same deductions from their gross income arising from sources within the United States as are allowed to domestic corporations to the extent that such deductions are connected with such gross income, except that the so-called charitable contribution deduction provided by section 170 to corporations is allowed whether or not connected with income from sources within the United States. The proper apportionment and allocation of the deductions with respect to sources within and without the United States shall be determined as provided in part I (section 861 and following), subchapter N, chapter 1 of the Code, and the regulations thereunder.

(e) *Deduction for personal exemption.* A citizen of the United States entitled to the benefits of section 931 is allowed a deduction for only one exemption under section 151.

(f) *Allowance of deductions and credits.* Unless a citizen of the United States or a domestic corporation entitled to the benefits of section 931 shall file or cause to be filed with the district director a true and accurate return of total income from all sources within the United States, in the manner prescribed in subtitle F of the Code, the tax shall be collected on the basis of the gross income (not the taxable income) from sources within the United States. If such citizen or corporation fails to file a necessary income tax return, the Commissioner will cause a return to be made, including therein all income from sources within the United States and allowing no deductions or credits (except credit for tax withheld at source).

(g) *Foreign tax credit.* Persons entitled to the benefits of section 931 are not allowed the credits provided for in section 901 (relating to credits for taxes of foreign countries and possessions).

(h) *Internees.* If a citizen of the United States—

(1) Was interned by the enemy while serving as an employee within a possession of the United States; and

(2) Was confined in any place not within a possession of the United States, then

(i) Such place of confinement shall be considered as within a possession of the United States for the purposes of section 931; and

(ii) Section 931 (b) shall not apply to any compensation received within the United States by such citizen attributable to the period of time during which such citizen was interned by the enemy.

(i) *Employees of the United States.* For the purposes of section 931, amounts paid for services performed by a citizen of the United States as an employee of the United States or any agency thereof shall be deemed to be derived from sources within the United States.

(j) *Nonapplication to a DISC or shareholder thereof.* Section 931 does not apply to a corporation for a taxable year (1) for which it qualifies (or is treated) as a DISC or (2) during which it owns directly or indirectly at any time stock in a corporation which, at such time, is (or is treated as) a DISC or former DISC. (See section 992(a)(1) and (3), respectively, for the definitions of the terms ''DISC'' and ''former DISC''.) For example, assume X Corporation and Y Corporation have the same taxable years. On the first day of its taxable year, X owns and sells all of the stock in Y, Y on such day owns and sells all of the stock in Z Corporation, and Z qualifies as a DISC as of such day. Section 931 will not apply to X and Y for their taxable years. Section 931 will likewise not apply to Z for the taxable year for which it qualifies as a DISC.

(Secs. 7805 (68A Stat. 917; 26 U.S.C. 7805) and 7654(e) (86 Stat. 1496; 26 U.S.C. 7654 (c)) of the Internal Revenue Code of 1954)

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 7283, 38 FR 20825, Aug. 3, 1973; T.D. 7385, 40 FR 50260, Oct. 29, 1975]

§1.932–1 Status of citizens of U.S. possessions.

(a) *General rule*—(1) *Definition and treatment.* A citizen of a possession of the United States (except Puerto Rico and, for taxable years beginning after December 31, 1972, Guam), who is not otherwise a citizen or resident of the United States, including only the States and the District of Columbia, is treated for the purpose of the taxes imposed by subtitle A of the Code (relating to income taxes) as if he were a nonresident alien individual. However, for purposes of the tax imposed on self-employment income by chapter 2 of the Code, the term ''possession of the United States'' as used in section 932 and the preceding sentence does not include American Samoa, Guam, or the Virgin Islands. See section 1402(a)(9). See subpart A (section 871 and following), part II, subchapter N, chapter 1 of the Code, and the regulations thereunder, for rules relating to imposition of tax on nonresident alien individuals. For Federal income tax purposes, a citizen of a possession of the United States who is not otherwise a citizen of the United States is a citizen of a possession of the United States who has not become a citizen of the United States by naturalization in a State, Territory, or the District of Columbia. The fixed or determinable annual or periodical income from sources within the United States of a citizen of a possession of the United States who is treated as if he were a nonresident alien individual is subject to withholding. See section 1441.

(2) *Classification of citizens of United States possessions.* For the purpose of this section citizens of the possessions of the United States who are not otherwise citizens of the United States are divided into two classes:

(i) Citizens of possessions of the United States who at any time within the taxable year are not engaged in trade or business within the United States, and

(ii) Citizens of possessions of the United States who at any time within the taxable year are engaged in trade or business within the United States.

The provisions of subpart A (section 871 and following) and the regulations thereunder, applicable to nonresident alien individuals not engaged in trade or business within the United States are applicable to the citizens of possessions falling within the first class, while the provisions of such sections applicable to nonresident alien individuals who at any time within the taxable year are engaged in trade or business within the United States are applicable to citizens of possessions falling within the second class.

(b) *Nonapplication to citizen of Puerto Rico or Guam.* The provisions of section 932(a) and paragraph (a) of this section do not apply in the case of a citizen of Puerto Rico or, for taxable years beginning after December 31, 1972, a citizen of Guam. Thus, for example, any such citizen who is not a resident of the United States will not be treated by the United States as a nonresident alien individual for purposes of section 2 (b)(3)(A) or (d), relating to definitions and special rules; section 4(d)(1), relating to taxpayers not eligible to use the optional tax tables; section 37(h), relating to denial of retirement income credit; section 116(d), relating to taxpayers ineligible for dividend exclusion; section 142(b)(1), relating to taxpayers ineligible for standard deduction; section 152(b)(3), relating to definition of ''dependent''; section 402(a)(4), relating to distributions by the United States to nonresident aliens; section 545(d), relating to certain foreign corporations; section 565(e), relating to certain consent dividends; section 861(a)(1), relating to interest from sources within the United States; sections 871 to 877, relating to nonresident alien individuals; section 1303(b), relating to individuals not eligible for income averaging; section 1371(a)(3), relating to definition of small business corporation; section 1402(b), relating to definition of ''self-employment income''; section 1441, relating to withholding of tax on nonresident aliens; section 3401(a), relating to definition of wages; section 6013(a)(1), relating to inability to make a joint return; section 6015 (b) and (i), relating to declaration of estimated income tax by nonresident alien individuals; section 6017, relating to self-employment tax returns; section 6042(b)(2), relating to returns regarding payments of dividends; section 6049(b)(2), relating to returns regarding payments of interest; section 6072 (c), relating to time for filing returns of nonresident alien individuals; section 6091(b), relating to place for filing returns of nonresident aliens; and section 6096(a), relating to designation of tax payments to Presidential Election Campaign Fund. For other rules applicable to citizens of Puerto Rico, see §§ 1.1–1(b) and 1.933–1. For other rules applicable to citizens of Guam, see §§ 1.1–1(b) and 1.935–1 of this chapter (Income Tax Regulations) and § 301.7654–1 of this chapter (Regulations on Procedure and Administration).

(Secs. 7805 (68A Stat. 917; 26 U.S.C. 7805) and 7654(e) (86 Stat. 1496; 26 U.S.C. 7654 (e)) of the Internal Revenue Code of 1954)

[T.D. 6500, 25 FR 11910, Nov. 26, 1960, as amended by T.D. 7385, 40 FR 50260, Oct. 29, 1975]

§ 1.933–1 Exclusion of certain income from sources within Puerto Rico.

(a) *General rule.* An individual (whether a United States citizen or an alien), who is a bona fide resident of Puerto Rico during the entire taxable year, shall exclude from his gross income the income derived from sources within Puerto Rico, except amounts received for services performed as an employee of the United States or any agency thereof. Whether the individual is a bona fide resident of Puerto Rico shall be determined in general by applying to the facts and circumstances in each case the principles of §§ 1.871–2, 1.871–3, 1.871–4, and 1.871–5, relating to what constitutes residence or nonresidence, as the case may be in the United States in the case of an alien individual. Once bona fide residence in Puerto Rico has been established, temporary absence therefrom in the United States or elsewhere on vacation or business trips will not necessarily deprive an individual of his status as a bona fide resident of Puerto Rico. An individual taking up residence in Puerto Rico during the course of the taxable year is not entitled for such year to the exclusion provided in section 933.

(b) *Taxable year of change of residence from Puerto Rico.* A citizen of the United States who changes his residence from Puerto Rico after having been a bona fide resident thereof for a period of at least two years immediately preceding the date of such change in residence shall exclude from his gross income the income derived from sources within Puerto Rico which is attributable to that part of such period of Puerto Rican residence which preceded the date of such change in residence, except amounts received for services performed as an employee of the United States or any agency thereof.

(c) *Deductions.* In any case in which any amount otherwise constituting gross income is excluded from gross income under the provisions of section 933, there shall not be allowed as a deduction from gross income any items of expenses or losses or other deductions (except the deduction under section 151, relating to personal exemptions) properly allocable to, or chargeable against, the amounts so excluded from gross income.

§1.934–1 Limitation on reduction in income tax liability incurred to the Virgin Islands.

(a) *General rule.* Section 934(a) provides that tax liability incurred to the Virgin Islands shall not be reduced or remitted in any way, directly or indirectly, whether by grant, subsidy, or other similar payment, by any law enacted in the Virgin Islands, except to the extent provided in section 934 (b) or (c). For purposes of the preceding sentence, the term ‘‘tax liability’’ means the liability incurred to the Virgin Islands pursuant to subtitle A of the Code, as made applicable in the Virgin Islands by the Act of July 12, 1921 (48 U.S.C. 1397), or pursuant to section 28(a) of the Revised Organic Act of the Virgin Islands (48 U.S.C. 1642).

(b) *Exception for certain domestic and Virgin Islands corporations*—(1) *General rule.* Section 934(b) provides an exception to the application of section 934(a). Under this exception, section 934(a) does not apply with respect to tax liability incurred to the Virgin Islands by a domestic or Virgin Islands corporation for any taxable year (or for such part of such year as may be applicable) to the extent that such tax liability is attributable to income derived from sources without the United States, if such corporation satisfies the conditions provided in section 934(b)(1) and (2), and if the information required by section 934(d) is supplied. These conditions are enumerated in the remainder of this paragraph, and the information requirement is set forth in paragraph (d) of this section.

(2) *Conditions to be satisfied for exception.* A domestic or Virgin Islands corporation satisfies the conditions of section 934(b)(1) and (2) if—

(i) Eighty percent or more of the gross income of such corporation for the 3-year period immediately preceding the close of the taxable year (or for such part of such period immediately preceding the close of such taxable year as may be applicable) was derived from sources within the Virgin Islands; and

(ii) Fifty percent or more of the gross income of such corporation for such period (or such part thereof) was derived from the active conduct of a trade or business within the Virgin Islands.

(3) *Computation rule.* Except as provided in subparagraph (5) of this paragraph, tax liability incurred to the Virgin Islands by a domestic or Virgin Islands corporation for the taxable year (or such part of such year as may be applicable) attributable to income derived from sources without the United States shall be computed as follows:

(i) Add to the income tax liability incurred to the Virgin Islands any credit against the tax allowed under section 901(a);

(ii) Multiply by taxable income from sources without the United States for the applicable period;

(iii) Divide by total taxable income for the period;

(iv) Subtract any credit against the tax allowed under section 901(a). Tax liability incurred to the Virgin Islands attributable to income derived from sources without the United States, as computed in this subparagraph, however, shall not exceed the total amount of income tax liability actually incurred.

(4) *Examples.* The rule of the preceding subparagraph may be illustrated by the following examples:

Example 1. Corporation X, which satisfies the requirements of section 934(b), incurs an income tax liability to the Virgin Islands for taxable year 1963 of $290, as follows:

Taxable income from sources within the U.S	$200	
Taxable income from sources without the U.S	800	
Total taxable income		$1,000
Credit allowed under section 901(a)		10
Tax liability incurred to the Virgin Islands		290
The income tax liability incurred to the Virgin Islands attributable to income derived from sources without the United States is $230, computed as follows:		
(i) Tax liability incurred to the Virgin Islands	290	
Plus credit allowed under section 901(a)	10	
		300
(ii) Multiply by taxable income from sources without the U.S	800	
		240,000
(iii) Divide by total taxable income	1,000	
		240
(iv) Subtract credit allowed under section 901(a)	10	
		230

Example 2. Corporation Y, which satisfies the requirements of section 934(b), incurs an income tax liability to the Virgin Islands for taxable year 1963 of $140, as follows:

Taxable income from sources within the U.S	($300 net loss)	
Taxable income from sources without the U.S	800	
Total taxable income		$500
Credit allowed under section 901(a)		10
Tax liability incurred to the Virgin Islands		140
The income tax liability incurred to the Virgin Islands attributable to income derived from sources without the United States is 140, computed as follows:		
(i) Tax liability incurred to the Virgin Islands	140	
Plus credit allowed under section 901(a)	10	
		150
(ii) Multiply by taxable income from sources without the U.S.	800	
		120,000
(iii) Divide by total taxable income	500	
		240
(iv) Subtract credit allowed under section 901(a)	10	
		230

Since the $230 derived from the computation is in excess of the actual tax liability incurred, the income tax liability incurred to the Virgin Islands attributable to income derived from sources without the United States is limited to $140, the actual liability incurred.

(5) *Special computation rule for certain domestic corporations.* For purposes of section 934(b) and this paragraph, tax liability incurred to the Virgin Islands by a domestic corporation which is required to file an income tax return with the United States for the taxable year (or such part of such year as may be applicable) attributable to income derived from sources without the United States shall be the actual income tax liability incurred to the Virgin Islands for such year.

(6) *Source of income.* For purposes of section 934(b) and this paragraph, the income of a Virgin Islands corporation, and the sources from which the income of such corporation is derived, shall be determined as if such corporation were a domestic corporation. However, all amounts received by a corporation within the United States, whether derived from sources within or without the United States, shall be considered as being derived from sources within the United States. In determining the sources from which the income of a domestic or Virgin Islands corporation is derived, the principles of part 1 (section 861 and following), subchapter N, chapter 1 of the Code, and the regulations thereunder shall apply.

(c) *Exception for certain residents of the Virgin Islands*—(1) *General rule.* Section 934(c) provides another exception to the application of section 934(a). Under this exception, section 934(a) does not apply with respect to the tax liability incurred by an individual citizen of the United States to the Virgin Islands for any taxable year to the extent that such tax liability is attributable to income derived from sources within the Virgin Islands, if such individual is a bona fide resident of the Virgin Islands during the entire taxable year and if he supplies the information required under section 934(d).

(2) *Definition—bona fide resident and United States citizen.* In determining whether a United States citizen is a bona fide resident of the Virgin Islands, the principles of §§ 1.871–2, 1.871–3, 1.871–4, and 1.871–5, relating to the determination of residence and nonresidence in the United States, shall apply. Once

a bona fide residence in the Virgin Islands is established by an individual, temporary absence therefrom will not necessarily deprive such individual of his status as a bona fide resident of the Virgin Islands. For purposes of section 934(c), a citizen of the United States includes any individual who is a citizen of the United States by reason of being a citizen of any possession of the United States.

(3) *Computation rule.* For purposes of section 934(c) and this paragraph, tax liability incurred to the Virgin Islands for the taxable year attributable to income derived from sources within the Virgin Islands shall be computed as follows:

(i) Add to the income tax liability incurred to the Virgin Islands any credit against the tax allowed under section 901(a);

(ii) Multiply by taxable income from sources within the Virgin Islands;

(iii) Divide by total taxable income. Tax liability incurred to the Virgin Islands attributable to income derived from sources within the Virgin Islands, as computed in this subparagraph, however, shall not exceed the total amount of income tax liability actually incurred.

(4) *Examples.* The rule of the preceding subparagraph may be illustrated by the following examples:

Example 1. A, an individual who satisfies the requirements of section 934(c), incurs an income tax liability to the Virgin Islands for taxable year 1963 of $380, as follows:

Taxable income from sources within the Virgin Islands	$1,200	
Taxable income from sources without the Virgin Islands	800	
Total taxable income		$2,000
Credit allowed under section 901(a)		20
Tax liability incurred to the Virgin Islands		380
The income tax liability incurred to the Virgin Islands attributable to income derived from sources within the Virgin Islands is $240, computed as follows:		
(i) Tax liability incurred to the Virgin Islands	380	
Plus credit allowed under section 901(a)	20	
		400
(ii) Multiply by taxable income from sources within the Virgin Islands	1,200	
		480,000
(iii) Divide by total taxable income		$2,000
		240

Example 2. B, an individual who satisfies the requirements of section 934(c), incurs an income tax liability to the Virgin Islands for taxable year 1963 of $100, as follows:

Taxable income from sources within the Virgin Islands	$800	
Taxable income from sources without the Virgin Islands	(200 net loss)	
Total taxable income		$600
Credit allowed under section 901(a)		20
Tax liability incurred to the Virgin Islands		100
The income tax liability incurred to the Virgin Islands attributable to income derived from sources within the Virgin Islands is $100, computed as follows:		
(i) Tax liability incurred to the Virgin Islands	100	
Plus credit allowed under section 901(a)	20	
		120
(ii) Multiply by taxable income from sources within the Virgin Islands	800	
		96,000
(iii) Divide by total taxable income	600	
		160

Since the $160 derived from the computation is in excess of the actual tax liability incurred, the income tax liability incurred to the Virgin Islands attributable to income derived from sources within the Virgin Islands is limited to $100, the actual liability incurred.

(5) *Source of income.* For purposes of section 934(c) and this paragraph, in determining taxable income from sources within and without the Virgin Islands the principles of part 1 (section 861 and following), subchapter N, chapter 1 of the Code, and the regulations thereunder shall apply, except that—

(i) Any deductions for personal exemptions allowable under section 151 shall be deducted in computing taxable income from sources within the Virgin Islands but shall not be deducted in computing taxable income from sources without the Virgin Islands;

(ii) Amounts received for services performed as an employee of the United States or any agency thereof shall not be considered as income derived from sources within the Virgin Islands;

(iii) Gain or loss from the sale or exchange of any security (as defined in section 165(g)(2)) shall not be treated as derived from sources within the Virgin Islands.

(6) *Definition—''taxable income'' on a joint return.* In the case of a husband and wife making a joint return, the term ''taxable income'', as used in this paragraph, means the combined taxable income of both spouses.

(d) *Information required.* Section 934(d) provides that the exceptions in section 934 (b) and (c) shall apply only in the case of persons who supply such information as the Secretary or his delegate may by regulations prescribe for purposes of determining the applicability of such exceptions. The following portions of this paragraph, together with paragraphs (e) and (f) of this section, prescribe the information which must be filed. Any person seeking to come within an exception must provide the following information:

(1) The name and address of such person;

(2) If such person is one of two or more organizations, trades, or businesses (whether or not incorporated, whether or not organized in the United States, and whether or not affiliated) owned or controlled directly or indirectly by the same interests within the meaning of section 482 and the regulations thereunder—

(i) The name and address of each such organization, trade, or business;

(ii) The relationship which each such organization, trade, or business bears to the other organizations, trades, or businesses in such group;

(iii) The nature of the activity or activities conducted by each such organization, trade, or business.

(3) Any person seeking to come within an exception must make available for inspection by the Director of International Operations such records, and underlying contracts and documents, as are necessary to determine the applicability of section 934(b) or (c).

(e) *Information required—corporations.* Corporations seeking to come within the exception provided in section 934(b) shall, in addition to the information required by paragraph (d) of this section, submit the following information with respect to each taxable year:

(1) The date and place of incorporation;

(2) The name and address of any shareholder of record owning at any time during the taxable year 5 percent or more of the voting stock of any class or 5 percent or more of the value of any class of outstanding stock, and the nature and amount of the stock owned;

(3) For the 3-year period immediately preceding the close of the corporation's taxable year (or for such part of such period immediately preceding the close of such taxable year as may be applicable)—

(i) The total amount of its gross income;

(ii) The amount of such gross income derived from the active conduct of a trade or business within the Virgin Islands;

(iii) The amount of such gross income from sources within *(a)* the Virgin Islands, *(b)* the United States (including therein and specifically itemizing all amounts received within the United States), and (c) all other countries as a group;

(iv) The ratio which gross income derived from sources within the Virgin Islands bears to total gross income;

(v) The ratio which gross income derived from the active conduct of a trade or business within the Virgin Islands bears to total gross income.

(f) *Information required—individuals.* Individuals seeking to come within the exception provided in section 934(c) shall, in addition to the information required by paragraph (d) of this section, submit the following information with respect to each taxable year:

(1) The date on which such individual became a bona fide resident of the Virgin Islands;

(2) If such individual maintains a place of abode for himself or his family in the United States or elsewhere outside the Virgin Islands, the location of such place of abode and the purpose for which such place is maintained;

(3) The beginning and the ending dates of each period of absence from the Virgin Islands during such taxable year;

(4) The amount of gross income for such taxable year from sources within the Virgin Islands, excluding—

(i) The amount of gain or loss from the sale or exchange of any security, as defined in section 165(g)(2);

(ii) The amount of gross income received for services performed as an employee of the United States or any agency thereof.

(5) Any amounts excluded from gross income from sources within the Virgin Islands under subparagraph (4)(i) and (ii) of this paragraph.

(g) *Time and place for filing statement.* The statement, in duplicate, providing the information required under section 934(d) and paragraphs (d), (e), and (f) of this section shall be attached to the income tax return filed with the Government of the Virgin Islands for the taxable year with respect to which an exception is claimed under section 934 (b) or (c). If an exception is claimed with respect to any taxable year for which the time prescribed by law for filing the return expires prior to 30 days from the publication of these regulations, the required statement must be filed in duplicate on or before 90 days from the publication of these regulations. The return and statement must be available for examination by the Director of International Operations.

(h) *Effective date.* The provisions of this section shall apply to taxable years beginning after December 31, 1959.

[T.D. 6629, 27 FR 12791, Dec. 28, 1962]

§1.935–1 Coordination of U.S. and Guam individual income taxes.

(a) *Application of section*—(1) *Scope.* Section 935 and this section set forth the special rules relating to the filing of income tax returns, income tax liabilities, and estimated income tax of individuals described in subparagraph (2) of this paragraph. For additional rules relating to the collection of income tax at source on the wages of certain individuals, the furnishing of certain information with the returns of certain individuals, and the covering over to the treasury of Guam of net collections of income taxes imposed on certain individuals, see section 7654 and §301.7654–1 of this chapter (Regulations on Procedure and Administration).

(2) *Individuals covered.* This section shall apply for a taxable year to any individual who—

(i) Is a resident of Guam, whether or not he is a citizen of the United States,

(ii) Is a citizen of Guam but not otherwise a citizen of the United States,

(iii) Has income derived from Guam for the taxable year and is a citizen or resident of the United States, or

(iv) Files a joint return for the taxable year with any individual described in subdivision (i), (ii), or (iii) of this subparagraph.

(3) *Determination of residence and citizenship.* For purposes of this section, determinations of residence and citizenship for a taxable year shall be made (except as provided to the contrary in paragraphs (d)(1) and (2) of this section) as of the close of the taxable year. A citizen of the United States is any individual who is a citizen within the meaning of paragraph (c) of §1.1–1, except that the term does not include an individual who is a citizen of Guam but not otherwise a citizen of the United States. An individual who is a citizen of Guam but not otherwise a citizen of the United States is any individual who has become a citizen of the United States by birth or naturalization in Guam. Whether an individual is a resident of Guam or a resident of the United States shall generally be determined by applying to the facts and circumstances in each case the principles of §§1.871–2 through 1.871–5 relating to what constitutes residence or nonresidence, as the case may be, in the United States in the case of an alien individual. However, for special rules for determining the residence for tax purposes of individuals under military or naval orders, see section 514 of the Soldiers' and Sailors' Civil Relief Act of 1940, 50 App. U.S.C. 574. The residence of an individual, and, therefore, the jurisdiction with which he is required to file an income tax return under paragraph (b) of this section, may change from year to year.

(b) *Filing requirement*—(1) *Tax jurisdiction.* An individual described in paragraph (a)(2) of this section shall file his return of income tax for the taxable year—

(i) With the United States if he is a resident of the United States, whether or not he is a citizen of the United States,

(ii) With Guam if he is a resident of Guam, whether or not he is a citizen of Guam, or

(iii) If neither subdivision (i) nor (ii) of this subparagraph applies,

(A) With Guam if he is a citizen of Guam but not otherwise a citizen of the United States, as defined in paragraph (a)(3) of this section, or

(B) With the United States if he is a citizen of the United States, as defined in paragraph (a)(3) of this section. Thus, for example, if a U.S. citizen employed by the United States in Guam becomes a resident of Guam for the taxable year, he must file his return of income tax for such year with Guam. The tax shown on the return shall be paid to the jurisdiction with which such return is required to be filed and shall be determined by taking into account any credit under section 31 for tax withheld by Guam or the United States on wages, any credit under section 6402(b) for an overpayment of income tax to Guam or the United States, and any payments under section 6315 of estimated income tax paid to Guam or the United States. See paragraph (a)(3) of this section for the rule that determinations of residence and citizenship are to be made as of the close of the taxable year.

(2) *Joint returns.* In the case of married persons, if one or both spouses is an individual described in paragraph (a)(2) of this section and they file a joint return of income tax, the spouses shall file their joint return with, and pay the tax due on such return to, the jurisdiction where the spouse who has the greater adjusted gross income for the taxable year would be required under subparagraph (1) of this paragraph to file his return if separate returns were filed. For this purpose, adjusted gross income of each spouse is determined under section 62 and the regulations thereunder but without regard to community property laws; and, if one of the spouses dies, the taxable year of the surviving spouse shall be treated as ending on the date of such death.

(3) *Place for filing returns*—(i) *U.S. returns.* A return required under this paragraph to be filed with the United States shall be filed in accordance with § 1.6091–2, except that such return of a citizen or resident of the United States who is described in § 301.7654–1(a)(2) of this chapter (Regulations on Procedure and Administration) shall be filed with the Internal Revenue Service Center, 11601 Roosevelt Boulevard, Philadelphia, Pennsylvania 19155.

(ii) *Guam returns.* A return required under this paragraph to be filed with Guam shall be filed with the Commissioner of Revenue and Taxation, Agana, Guam 96910.

(4) *Tax accounting standards.* A taxpayer who has filed his return with one of the jurisdictions named in subparagraph (1) of this paragraph for a prior taxable year and is required to file his return for a later taxable year with the other such jurisdiction may not, for such later taxable year, change his accounting period, method of accounting, or any election to which he is bound with respect to his reporting of taxable income to the first jurisdiction unless he obtains the consent of the second jurisdiction to make such change. However, such change will not be effective for returns filed thereafter with the first jurisdiction unless before such later date of filing he also obtains the consent of the first jurisdiction to make such change. Any request for consent to make a change pursuant to this subparagraph must be made to the office where the return is required to be filed under subparagraph (3) of this paragraph and in sufficient time to permit a copy of the consent to be attached to the return for the taxable year.

(c) *Extent of liability for income tax*—(1) *Extension of territory*—(i) *General rule.* With respect to an individual who, for a taxable year, is described in paragraph (a)(2) of this section—

(A) For purposes of so much of the Internal Revenue Code of 1954 as relates to the normal taxes and the surtaxes imposed by chapter 1 thereof, the United States shall be treated, in a geographical and governmental sense, as including Guam, and

(B) For purposes of the Guam Territorial income tax (48 U.S.C. 1421i), Guam shall be treated, in a geographical and governmental sense, as including the United States except that this subdivision shall not apply for purposes of this section, section 7651, and section 7654.

(ii) *Application of general rule.* (A) The significance of the application of the rule of subdivision (i) of this subparagraph will depend upon the facts and circumstances of the particular case. The rule will not be applied where its application would be manifestly inapplicable or incompatible with the intent thereof. Thus, the rule will not be applied for purposes of section 3401, relating to definition of wages. Also, the rule will not be applied in determining the sources of dividends and interest from a domestic corporation. For example, if less than 20 percent of a domestic corporation's gross income is from U.S. sources for the period described in section 861(a)(1)(B) and (2)(A), but more than 20 percent of its gross income is from U.S. and Guam sources taken together for such period, the dividends and interest derived from it will be treated as derived from sources without the United States. In addition, for purposes of section 1372(e)(4), relating to whether an election of a small business corporation has been terminated because it derived more than 80 percent of its gross receipts from sources outside the United States, gross receipts from sources within Guam will be treated as gross receipts from sources outside the United States. On the other hand, some of the conclusions which may be reached as a result of the application of subdivision (i) of this subparagraph to a U.S. taxpayer (that is, an individual described in paragraph (b)(1)(i) or (iii)(B) of this section) are as follows. A U.S. taxpayer may not claim a foreign tax credit based upon his income from sources within Guam. Income tax paid to Guam may be taken into account under sections 31, 6315, and 6402(b) as payments to the United States. For purposes of section 116(a), relating to the partial exclusion of dividends received by individuals, dividends paid to a U.S. taxpayer by a corporation created or organized in Guam or under the law of Guam will be treated as dividends paid by a domestic corporation. Taxes paid to Guam and otherwise satisfying the requirements of section 164(a) will be allowed as a deduction under that section, but income taxes paid to Guam will be disallowed as a deduction under section 275(a).

(B) If a U.S. taxpayer has a net operating loss carryback or carryover under section 172, a foreign tax credit carryback or carryover under section 904, an investment credit carryback or carryover under section 46, a capital loss carryover under section 1212, or a charitable contributions carryover under section 170, the United States will take such carryback or carryover into account for a taxable year for which the taxpayer's return is required to be filed with the United States, and make a refund to the extent required under section 6402, even though the return of the taxpayer for the taxable year (whether beginning on, before, or after December 31, 1972) giving rise to the carryback or carryover was required to be filed with Guam.

(C) For purposes of income averaging of a U.S. taxpayer under sections 1301 through 1305, the taxpayer will not be denied status as an ''eligible individual'' merely because he was during the base period defined in section 1302(c)(2) treated under section 932 as a nonresident alien individual because he was a citizen of Guam but not otherwise a citizen of the United States. See section 1303(b). Furthermore, in determining the base period of such a U.S. taxpayer under section 1302(c)(2), taxable years for which a return was required to be filed with Guam shall be taken into account.

(D) In applying the Guam Territorial income tax the converse of the preceding rules under this subdivision will apply. Thus, for example, income tax paid to the United States may be taken into account under sections 31, 6315, and 6402(b) as payments to Guam. Moreover, a citizen of the United States (as defined in paragraph (a)(3) of this section) not a resident of Guam will not be treated as a nonresident alien individual for purposes of the Guam Territorial income tax. Thus, for example, a citizen of the United States (as so defined), or a resident of the United States, will not be treated as a nonresident alien individual for purposes of section 1371(a)(3) of the Guamanian Territorial income tax.

(2) *Liability to other jurisdiction*—(i) *Filing with Guam.* If for a taxable year

an individual is required under paragraph (b)(1) of this section to file a return with Guam, he is relieved of liability to file an income tax return with, and to pay an income tax to, the United States for the taxable year.

(ii) *Filing with the United States.* If for a taxable year an individual is required under paragraph (b)(1) of this section to file a return with the United States, he is relieved of liability to file an income tax return with, and to pay an income tax to, Guam for the taxable year.

(d) *Special rules for estimated income tax*—(1) *Declaration of estimated income tax.* If, under all the facts and circumstances existing at the date an individual is required to file a declaration of estimated income tax, there is reason to believe that he will, for the taxable year, be an individual described in paragraph (a)(2) of this section, he must file his declaration of estimated income tax (and all amendments thereof) with the jurisdiction with which he would be required to file a return under paragraph (b)(1) of this section if his taxable year had closed on the date he is first required to file a declaration of estimated income tax for the taxable year. Except as provided in paragraph (6) of this section (relating to underpayments of estimated income tax), payments of estimated income tax shall be made to the jurisdiction with which he is required to file the declaration even though for the taxable year he is required under paragraph (b)(1) of this section to file his return with the other jurisdiction. In determining the amount of such estimated income tax, income tax paid to Guam may be taken into account under sections 31 and 6402(b) as payments to the United States, and vice versa. For rules relating to the determination of, and time for filing, declarations of estimated tax, see sections 6015 and 6073; for rules relating to the time for paying installments of the tax, see section 6153.

(2) *Joint declaration of estimated income tax.* In the case of married persons, if, under all the facts and circumstances existing at the date a spouse is required to file a declaration of estimated income tax, there is reason to believe that he will, for the taxable year, be an individual described in paragraph (a)(2) of this section and the spouses file a joint declaration of estimated income tax, the spouses must file their joint declaration of estimated income tax (and all amendments thereof) with the jurisdiction where the spouse who has the greater estimated adjusted gross income for the taxable year would be required under subparagraph (1) of this paragraph to file his declaration of estimated income tax if separate declarations were filed. For this purpose, estimated adjusted gross income of each spouse for the taxable year is determined without regard to community property laws. Except as provided in paragraph (6) of this section, payments of estimated income tax shall be made to the jurisdiction with which the spouses are required to file the joint declaration.

(3) *Early filing of declarations.* If the individual or spouses have in fact filed a declaration or joint declaration of estimated income tax earlier than the time he or they are first required to file the declaration and such declaration was not filed where it is required to be filed under paragraph (d)(1) or (2) of this section, as the case may be, of this paragraph, only subsequent amendments of the declaration are required to be filed pursuant to such paragraph (d)(1) or (2) of this section with the other jurisdiction and only subsequent installments of the estimated income tax are required to be paid to the other jurisdiction.

(4) *Place for filing declarations.* A declaration of estimated income tax required under subparagraph (1) of this paragraph to be filed with Guam, shall be filed as prescribed in paragraph (b)(3)(ii) of this section. A declaration of estimated income tax required under subparagraph (1) of this paragraph to be filed with the United States shall be filed at the place prescribed by § 1.6073–1(c).

(5) *Liability to other jurisdiction*—(i) *Filing with Guam.* If, for a taxable year, an individual is required under this paragraph to file a declaration of estimated income tax with Guam, he is relieved of liability to file a declaration of estimated income tax (and any amendments thereof) with, and to make payments of estimated income

tax to, the United States for the taxable year.

(ii) *Filing with the United States.* If, for a taxable year, an individual is required under this paragraph to file a declaration of estimated income tax with the United States, he is relieved of liability to file a declaration of estimated income tax (and any amendments thereof) with, and to make payments of estimated income tax to, Guam for the taxable year.

(6) *Underpayments.* The liability of an individual described in paragraph (a)(2) of this section for underpayments of estimated income tax for a taxable year, as determined under section 6654 and the regulations thereunder, shall be to the jurisdiction with which he is required under paragraph (b) of this section to file his return for the taxable year.

(e) *Illustration.* The application of this section may be illustrated by the following examples:

Example 1. B, and individual, files returns on a calendar year basis. B is a resident of the United States at the time he is required to file his declaration of estimated income tax for 1974. If, under the facts and circumstances, B does not reasonably expect at the time he files his declaration of estimated income tax that he will be a resident of Guam at the close of 1974, he will not be subject to this section at the time of such filing. However, B subsequently receives Guam source income which necessitates an amendment of his declaration, and some time later in 1974 he becomes a resident of Guam for the remainder of the year. B is required under paragraph (d)(1) of this section to file his amended declaration with the United States and to make payments of the estimated tax to the United States. However, B is required to file his income tax return for 1974 with Guam and to make any underpayments of estimated tax to Guam, pursuant to paragraphs (b)(1) and (d)(6) of this section.

Example 2. C, an individual, files returns on a calendar year basis. On March 1, 1974, C is a resident of the United States, files his declaration of estimated income tax for 1974 with the United States, and pays his first installment of estimated tax to the United States. Prior to the date C would otherwise be required to file his declaration of estimated income tax for 1974 (April 15, 1974), C becomes a resident of Guam for the remainder of the year. C is required under paragraph (d)(1) of this section to make only his remaining payments of installments of estimated tax to Guam. C is also required to file his income tax return for 1974 with Guam and to make any underpayments of estimated tax to Guam, pursuant to paragraphs (b)(1) and (d)(6) of this section.

Example 3. D, an individual, files returns on a calendar year basis. On August 1, 1974, D ceases to be a resident of the United States for the year and becomes a resident of Guam for the remainder of the year. D is first required to file a declaration of estimated income tax for 1974 on September 15, 1974, because of his receipt of an extraordinary item of income after June 15, 1974. D is required under paragraph (d)(1) of this section to file his declaration with Guam and to make payments of the estimated tax to Guam. D is also required to file his income tax return for 1974 with Guam and to make any underpayments of estimated tax to Guam, pursuant to paragraphs (b)(1) and (d)(6) of this section.

(f) *Effective date.* This section shall apply for taxable years beginning after December 31, 1972.

(Secs. 7805 (68A Stat. 917; 26 U.S.C. 7805) and 7654(e) (86 Stat. 1496; 26 U.S.C. 7654 (e)) of the Internal Revenue Code of 1954)

[T.D. 7385, 40 FR 50261, Oct. 29, 1975]

§1.936–1 Elections.

(a) *Making an election.* A domestic corporation shall make an election under section 936(e), for any taxable year beginning after December 31, 1975, by filing Form 5712 on or before the later of—

(1) The date on which such corporation is required, pursuant to sections 6072(b) and 6081, to file its Federal income tax return for the first taxable year for which the election is made; or

(2) April 8, 1980.

Form 5712 shall be filed with the Internal Revenue Service Center, 11601 Roosevelt Boulevard, Philadelphia, Pennsylvania 19155 (Philadelphia Center).

(b) *Revoking an election.* Any corporation to which an election under section 936 (e) applies on February 8, 1980 is hereby granted the consent of the Secretary to revoke that election for the first taxable year to which the election applied. (The corporation may make a new election under §1.936–1 (a) for any subsequent taxable year.) The corporation shall make this revocation by sending to the Philadelphia Center a written statement of revocation on or before April 8, 1980.

(Secs. 7805 and 936(e) of the Internal Revenue Code of 1954 (68A Stat. 917 and 90 Stat. 1644; 26 U.S.C. 7805 and 936(e)))

[T.D. 7673, 45 FR 8588, Feb. 8, 1980; T.D. 7673, 45 FR 16174, Mar. 13, 1980]

§ 1.936–4 Intangible property income in the absence of an election out.

The rules in this section apply for purposes of section 936(h) and also for purposes of section 934(e), where applicable.

Q. 1: If a possessions corporation and its affiliates do not make an election under either the cost sharing or 50/50 profit split option, what rules will govern the treatment of income attributable to intangible property owned or leased by the possessions corporation?

A. 1: Intangible property income will be allocated to the possessions corporation's U.S. shareholders with the proration of income based on shareholdings. If a shareholder of the possessions corporation is a foreign person or a tax-exempt person, the possessions corporation will be taxable on that shareholder's pro rata amount of the intangible property income. If any class of the stock of a possessions corporation is regularly traded on an established securities market, then the intangible property income will be taxable to the possessions corporation rather than the corporation's U.S. shareholders. For these purposes, a United States shareholder includes any shareholder who is a United States person as described under section 7701(a)(30). The term ''intangible property income'' means the gross income of a possessions corporation attributable to any intangible property other than intangible property which has been licensed to such corporation since prior to 1948 and which was in use by such corporation on September 3, 1982.

Q. 2: What is the source of the intangible property income described in question 1?

A. 2: The intangible property income is U.S. source, whether taxed to U.S. shareholders or taxed to the possessions corporation. Such intangible property income, if treated as income of the possessions corporation, does not enter into the calculation of the 80-percent possessions source test or the 65-percent active trade or business test of section 936(a)(2)(A) and (B).

Q. 3: How will the amount of income attributable to intangible property be measured?

A. 3: Income attributable to intangible property includes the amount received by a possessions corporation from the sale, exchange, or other disposition of any product or from the rendering of a service which is in excess of the reasonable costs it incurs in manufacturing the product or rendering the service (other than costs incurred in connection with intangibles) plus a reasonable profit margin. A reasonable profit margin shall be computed with respect to direct and indirect costs other than (i) costs incurred in connection with intangibles, (ii) interest expense, and (iii) the cost of materials which are subject to processing or which are components in a product manufactured by the possessions corporation. Notwithstanding the above, certain taxpayers who have been permitted by the Internal Revenue Service in taxable years beginning before January 1, 1983, to use the cost-plus method of pricing without reflecting a return from intangibles, but including the cost of materials in the cost base, will not be precluded from doing so. (Sec. 3.02(3), Rev. Proc. 63–10, 1963–1 C.B. 490.) Thus, the Internal Revenue Service may continue in appropriate cases to permit such taxpayers to continue to report their income as they have been under existing procedures described in the previous sentence if it is appropriate under all the facts and circumstances and does not distort the income of the taxpayer.

Q. 4: If there is no intangible property related to a product produced in whole or in part by a possessions corporation, what method may the possessions corporation use to compute its income?

A. 4: The taxpayer may compute its income using the appropriate method as provided under section 482 and the regulations thereunder. The taxpayer may also elect the cost sharing or profit split method.

[T.D. 8090, 51 FR 21524, June 13, 1986]

§1.936–5 Intangible property income when an election out is made: Product, business presence, and contract manufacturing.

The rules in this section apply for purposes of section 936(h) and also for purposes of section 934(e), where applicable.

(a) *Definition of product.*

Q. 1: What does the term ‘‘product’’ mean?

A. 1: The term ‘‘product’’ means an item of property which is the result of a production process. The term ‘‘product’’ includes component products, integrated products, and end-product forms. A component product is a product which is subject to further processing before sale to an unrelated party. A component product may be produced from other items of property, and if it is so produced, may be treated as including or not including (at the choice of the possessions corporation) one or more of such other items of property for all purposes of section 936(h)(5). An integrated product is a product which is not subject to any further processing before sale to an unrelated party and which includes all component products from which it is produced. An end-product form is a product which—

(1) Is not subject to any further processing before sale to an unrelated party;

(2) Is produced from a component product or products; and

(3) Is treated as not including certain component products for all purposes of section 936(h)(5).

A possessions corporation may treat a component product, integrated product, or end-product form as its possession product even though the final stage or stages of production occur outside the possession. Further processing includes transformation, incorporation, assembly, or packaging.

Q. 2: If a possessions corporation produces both a component product and an integrated product (which by definition includes the end-product form), may the possessions corporation use the options under section 936(h)(5) to compute its income with respect to either the component product, the integrated product or the end-product form?

A. 2: Yes. The possessions corporation may choose to treat the component product, the integrated product, or the end-product form as the product for purposes of determining whether the possessions corporation satisfies the significant business presence test. The possessions corporation must treat the same item of property as its product (the possession product) for all purposes of section 936(h)(5) for that taxable year, including the significant business presence test under section 936(h)(5)(B)(ii), the possessions sales calculation under section 936(h)(5)(C)(i)(I), the determination of income under section 936(h)(5)(C)(i)(II), and the combined taxable income computations under section 936(h)(5)(C)(ii). Although the possessions corporation must treat the same item of property as its product for all purposes of section 936(h)(5) in a particular taxable year, its choice of the component product, integrated product or end-product form may be different from year to year. The possessions corporation must specify the possession product on a statement attached to its return (Schedule P of Form 5735). The possessions corporation may specify its choice by either listing the components that are included in the possession product or the components that are excluded from the possession product. The possessions corporation must file a separate Schedule P with respect to each possession product. The possessions corporation must attach to each Schedule P detailed computations indicating how the significant business presence test is satisfied with respect to the possession product identified in that Schedule P.

Q. 3: A possessions corporation produces a product that is sometimes sold to unrelated parties without further processing and is sometimes sold to unrelated parties after further processing. May the possessions corporation choose to treat the same item of property as the possession product even though in some cases it is an integrated product and in some cases it is a component product?

A. 3: Yes. Except as provided in questions and answers 4 and 5, the possessions corporation must designate a single possession product even though it is sometimes a component product and sometimes an integrated product.

Q. 4: A possessions corporation produces a product that is sometimes sold without further processing by any member of the affiliated group to unrelated parties or to related parties for their own consumption and is sometimes sold after further processing by any member of the affiliated group to unrelated parties or to related parties for their own consumption. May the possessions corporation designate two products as possession products?

A. 4: The possessions corporation may designate two or more possession products. The possessions corporation must use a consistent definition of the possession product for all items of property that are sold to unrelated parties or consumed by related parties at the same stage in the production process. The significant business presence test shall apply separately to each product designated by the possessions corporation. The possessions corporation shall compute its income separately with respect to each product.

Q. 5: A possessions corporation produces a product in one taxable year and does not sell all of the units that it produced. In the next taxable year the possessions corporation produces a product which includes the product produced in the prior year. The possessions corporation could not have satisfied the significant business presence test with respect to the units produced the first taxable year if the larger possession product had been designated. May the possessions corporation designate two possession products in the second year?

A. 5: Yes. The possessions corporation may designate two possession products. However, once a product has been designated for a particular year all sales of units produced in that year must be defined in the same manner. In addition, the taxpayer must maintain a significant business presence in a possession with respect to that product. Sales shall be deemed made first out of the current year's production. If all of the current year's production is sold and some inventory is liquidated, then the taxpayer's method of inventory accounting shall be applied to determine what year's layer of inventory is liquidated.

Example 1. A possessions corporation S, manufactures a bulk pharmaceutical in a possession. S transfers the bulk pharmaceutical to its U.S. parent, P, for encapsulation and sale by P to customers. S satisifes the significant business presence test with respect to the bulk pharmaceutical (the component product) and the combination of the bulk pharmaceutical and the capsule (the integrated product). S may use the cost sharing or profit split method to compute its income with respect to either the component product or the integrated product.

Example 2. The facts are the same as in example 1 except that S does not satisfy the significant business presence test with respect to the integrated product. S may use the cost sharing or profit split method to compute its income only with respect to the component product. However, if in a later taxable year S satisfies the significant business presence test with respect to the integrated product, then S may use the cost sharing or profit split method to compute its income with respect to that integrated product for that later taxable year.

Example 3. P, a domestic corporation, produces in bulk form in the United States the active ingredient for a pharmaceutical product, P transfers the bulk form to S, a wholly owned possessions corporation. S uses the bulk form to produce in Puerto Rico the finished dosage form drug. S transfers the drug in finished dosage form to P, which sells the drug to unrelated customers in the U.S. The direct labor costs incurred in Puerto Rico by S during its taxable year in formulating, filling and finishing the dosage form are at least 65 percent of the total direct labor costs incurred by the affiliated group in producing the bulk and finished forms during that period. S manufactures (within the meaning of section 954(d)(1)(A)) the finished dosage form. S has elected out under section 936(h)(5) under the profit split option for the drug product area (SIC 283). P and S may treat the bulk and finished dosage forms as parts of an integrated product. Since S satisfies the significant business presence requirement with respect to the integrated product, it is entitled to 50 percent of the combined taxable income on the integrated product.

Example 4. A possessions corporation, S. produces the keyboard of an electric typewriter and incorporates the keyboard with components acquired from a related corporation into finished typewriters. S does not satisfy the significant business presence test with respect to the typewriters (the integrated product). Therefore, S may use the cost sharing or profit split method to compute its income only with respect to a component product or end-product form. For taxable year 1983, S specifies on a statement attached to its return (Schedule P of Form 5735) that the possession product is the end-product form. The statement indentifies the components—for example, the keyboard structure and frame—which are included in the possession product. S's definition of the possession product will apply to all units of the electric typewriters which S produces in whole or in part in the possession and which are sold in 1983. Thus, all units of a given component incorporated into such typewriters will be treated in the same way. For example, all keyboards and all frames will be included in the possession product, and all electric drive mechanisms and rollers will be excluded from the possession product.

Example 5. Possessions corporation A produces printed circuit boards in a possession. The printed circuit boards are sold to unrelated parties. A also uses the boards to produce personal computers in the possession. A may designate two possession products: printed circuit boards and personal computers. The significant business presence test applies separately with respect to each of these products. Thus, for those printed circuit boards that are sold to unrelated parties, only the costs of the possessions corporation and the other members of the affiliated group that are incurred with respect to units of the printed circuit boards which are produced in whole or in part in the possessions and sold to third parties shall be taken into account. Conversely, with respect to personal computers, only the costs incurred with respect to the personal computers shall be taken into account. This would include the costs with respect to printed circuit boards that are incorporated into personal computers but not the costs incurred with respect to printed circuit boards that are sold without further processing to unrelated parties.

Example 6. Possessions corporation S produces integrated circuits in a possession. P, an affilate of S, produces circuit boards in the United States. P transfers the circuit boards to S. S assembles the integrated circuits and the circuit boards. S sells some of the loaded circuit boards to third parties. S retains some of the loaded circuit boards and incorporates them into central processing units. The central processing units are then sold to third parties. S may designate two possession products. S must use a consistent definition of the possession product for all units that are sold at the same stage in the production process. Thus, with respect to those units sold after assembly of the integrated circuits and the printed circuits boards, if S cannot satisfy the significant business presence test with respect to all the loaded circuit boards (the integrated product), then S must designate a lesser product, either the integrated circuit (the component product) or the loaded circuit board less the printed circuit board (the end-product form) as its possession product. With respect to the central processing units sold the same rule would apply. Thus, if S cannot satisfy the significant business presence test with respect to the entire central processing unit for all of the central processing units sold, S must designate some lesser product as its possession product.

Example 7. S is a possession corporation. In 1985, S produced 100 units of product X. Those units were finished into product Y in 1985 by affiliates of S. Product X is a component of product Y. In 1985, S satisfies the direct labor test with respect to product X but not with respect to product Y. S designates the component product X as its possession product. In 1986 S produces 100 units of product X and finishes those units into product Y. S would have satisfied the significant business presence test with respect to product X if S had designated product X as its possession product in 1986. In addition, in 1986 S satisfies the significant business presence test with respect to the integrated product Y. In 1986, S sells 150 units of Y. One hundred of those units would be deemed to be produced in 1986. With respect to those units S may designate the integrated product Y as its possession product. Under S's method of inventory accounting the remaining 50 units were determined to have been produced in 1985. With respect to those units S must define its possession product as it did for the taxable year in which those units were produced. Thus, S's possession product would be the component product X.

Q. 6: May an affiliated group establish groupings of possession products and treat the groupings as single products?

A. 6: An affiliated group may establish reasonable groupings of possession products based on similarities in the production processes of the possession products. Possession products that are grouped shall be treated as a single product. The determination of whether the production processes involved in producing the products that are to be grouped are similar is based on the production processes of the components that are included in the possession product. The affiliated group may establish new groupings each year. Any grouping which materially distorts a taxpayer's income or the application of the significant business presence test may be disallowed by the Commissioner. The mere fact that a grouping results in an increased allocation of income to the possessions corporation does not, of itself, create a material distortion of income. If the Commissioner determines that the taxpayer's grouping is improper with respect to one or more products in a group, then those products shall be excluded from the group. The effect of excluding a product or products from the group is that the taxpayer must demonstrate that the group without the excluded products (and each excluded product itself) satisfies the significant business presence test. If the group without the excluded products, or any of the excluded products themselves, fails to satisfy the significant business presence test, then the possessions corporation's income from those products shall be determined under section 936(h)(1) through (4) and the regulations thereunder.

Example 1. The following are examples of possession products the processes of production of which are sufficiently similar that they may be grouped and treated as a single product:

(A) Beverage bases or concentrates for different soft drinks or soft drink syrups, regardless of whether some include sweeteners and some do not:

(B) Different styles of clothing;

(C) Different styles of shoes;

(D) Equipment which relies on gravity to deliver solutions to patients intravenously;

(E) Equipment which relies on machines to deliver solutions to patients intravenously;

(F) Video game cartridges, even though the concept and design of each game title is, in part, protected against infringement by separate copyrights;

(G) All integrated circuits;

(H) All printed circuit boards; and

(I) Hardware and software if the software is one of several alternative types of software offered by the manufacturer and sold only with the hardware, and a purchaser of the hardware would ordinarily purchase one or more of the manufacturer-provided alternative types of software. In all other cases, hardware and software may not be grouped and treated as a single product.

Groupings (D) and (E) do not include any solutions which are delivered through the equipment described therein.

Example 2. A possessions corporation produces in Puerto Rico non-programmable, interactive cathode ray tube computer terminals that vary in price. These terminals all interact with a computer or controller to perform their functions of data entry, graphics word processing, and program development. The terminals can be purchased with options that include a built-in printer, different language keyboards, specialized cathode ray tubes, and different power supply features. All terminals are produced in one integrated process requiring the same skills and operations. The differences in the production of the terminals include differences in the number of printed circuit boards incorporated in each terminal, the use of unique keyboards, and the installation and testing of the built-in printer. Some difference in direct labor time to manufacture the terminals occurs, primarily due to the differing number and complexity of printed circuit boards incorporated into each terminal. Different model numbers are assigned to various computer terminals. A grouping by the taxpayer of all of the terminals as one product will be respected by the Service, unless the Service establishes that substantial distortion results. This grouping is proper because the processes of producing each of the terminals are similar.

Example 3. A possessions corporation, S produces several models of serial matrix impact printers and teleprinters. These products have differing performance standards based on such factors as speed (in characters per second), numbers of columns, and cost. The production process for all types of printers involves production of three basic elements: electronic circuitry, the printing head, and the mechanical parts. The process of producing all the printers is similar. Thus, all printers could be grouped and treated as a single product. S purchases electronic circuitry and mechanical parts from a U.S. affiliate. S performs manufacturing functions relative to the printing head and assembles and tests the finished printers. S does not satisfy the significant business presence test with respect to the integrated products. S therefore specifies on a statement attached to its return (Schedule P of Form 5735) that the possession product for both the serial matrix printers and the teleprinters is the end-product form. The statement identifies the components which are included in each possession product. S may group and treat as a single product the serial matrix printers and the teleprinters if both end-product forms include and exclude similar components. Thus, if the end-product form for both the serial matrix printers and the teleprinters includes the mechanical parts and excludes the electronic circuitry, then S may group and treat as a single product the two end-product forms. If, however, the end-product forms for the two items of property contain components that are not similar and as a result of this definition of the end-product forms the production processes involved in producing the two end-product forms are not similar, then S may not group the end-product forms.

Q. 7: Is the affiliated group permitted to include in a group an item of property that is not produced in whole or in part in a possession?

A. 7: No.

Example 1. Possessions corporation S produces 70 units of product A in a possession. P, an affiliate of S, produces 30 units of product A entirely in the United States. All of the units are sold to unrelated parties. The affiliated group is not permitted to group the 30 units of product A produced in the United States with the 70 units produced in the possession because those units are not produced in whole or in part in a possession.

Example 2. The facts are the same as in example 1 except that the 30 units of product A are transferred to possessions corporation S. S incorporates the 100 units of product A into product B. This incorporation takes place in the possession. S may group and treat as a single product all of the units of product B even though some of those units contain units of product A that were produced in the possession and some that were produced in the United States.

Q. 8: What factors should be disregarded in determining whether a particular grouping of similar items of property is reasonable?

A. 8: In general, differences in the following factors will be disregarded in determining whether a particular grouping of items of property is reasonable:

(1) Differences in testing requirements (*e.g.*, some products sold for military use may require more extensive or different testing than products sold for commercial use);

(2) Differences in the product specifications that are designed to accommodate the product to its area of use or for conditions under which used (*e.g.*, electrical products designed for ultimate use in the United States differ from electrical products designed for ultimate use in Europe);

(3) Differences in packaging or labeling (*e.g.*, differences in the number of units of the items shipped in one package); and

(4) Minor differences in the operations of the items of property.

Q. 9: What rules apply for purposes of determining whether pharmaceutical products are properly grouped and treated as a single product?

A. 9: The rules contained in questions and answers 6 through 8 of this section shall apply. Thus, an affiliated group may establish reasonable groupings based on similarities in the production processes of two or more possession products. In establishing a group the affiliated group may only compare the production processes involved in producing the possession products. The fact that two pharmaceutical products contain different active or inert ingredients is not relevant to the determination of whether the pharmaceutical products may be grouped. For example, if the possession products are bulk chemicals and the production processes involved in producing the bulk chemicals are similar, those bulk chemicals may be grouped and treated as a single product even though they contain different active or inert ingredients. The affiliated group may also group and treat as a single product the finished dosage form drug as long as the production processes involved in producing the finished dosage forms are similar. For these purposes, the production processes involved in producing the following classes of items shall be considered to be sufficiently similar that possession products delivered in a form described in one of the categories may be grouped with other possession products delivered in a form described in the same category.

The categories are:

(1) Capsules, tablets, and pills;

(2) Liquids, ointments, and creams; or

(3) Injectable and intravenous preparations.

No distinctions should be based on packaging, list numbers, or size of dosage. The affiliated group may group and treat as a single product the integrated product (combination of the bulk and the delivery form) only if all the production processes involved in producing the integrated products are similar. The rules of this question and answer are illustrated by the following examples.

Example 1. Possessions corporation S produces two chemical active ingredients X and Y. Both chemical ingredients are produced through the process of fermentation. The affiliated group is permitted to group and treat as a single product the two chemical ingredients.

Example 2. The facts are the same as in example 1 and possessions corporation S finishes chemical ingredient X into tablets and chemical ingredient Y into capsules. The affiliated group is permitted to group and treat as a single product the combination of the bulk pharmaceutical and the finishing because the production processes involved in producing the integrated products are similar.

Example 3. Possessions corporation S produces in a possession a bulk chemical X by fermentation. A United States affiliate, P, produces in the United States a bulk chemical, Y, by fermentation. Both bulk chemicals are finished by S in the possession. The finished dosage form of X is in pill form. The finished dosage form of Y is in injectable form. If S's possession product is the integrated product or the end-product form then S may not group X and Y because the production processes involved in producing the finished dosage form of X and Y are not similar. If S's possession product is the component then S may not group X and Y because the bulk chemical Y is not produced in whole or in part in a possession.

Q. 10: Will the fact that a manufacturer of a drug must submit a New Drug Application (''NDA'') or a supplemental NDA to the Food and Drug Administration have any effect on the definition or grouping of a product?

A. 10: No.

Q. 11: A possessions corporation which produced a product or rendered a type of service in a possession on or before September 3, 1982, is not required to meet the significant business presence test in a possession with respect to such product or type of service for its taxable years beginning before January 1, 1986 (the interim period). During such interim period, how will the term ''product'' be defined for purposes of allocating income under the cost sharing or profit split methods?

A. 11: During the interim period the product will be determined based on the activities performed by the possessions corporation within a possession on September 3, 1982. During the interim period the possessions corporation may compute its income under the cost sharing or profit split method only with respect to the product that is produced or manufactured within the meaning of section 954(d)(1)(A) within the possession. If the product is manufactured from a component or components produced by an affiliated corporation or a contract manufacturer, then the product will not be treated as including such component or components for purposes of the computation of income under the cost sharing or profit split methods. Thus, the possessions corporation is not entitled to any return on the intangibles associated with the component or components. Notwithstanding the preceding sentences, for taxable years beginning before January 1, 1986, a possessions corporation may compute its income under the cost sharing or profit split method with respect to a product which includes a component or components produced by an affiliated corporation or contract manufacturer if the possessions corporation satisfies with respect to such product the significant business presence test described in section 936(h)(5)(B)(ii) and the regulations thereunder.

Example 1. A possessions corporation, S, was manufacturing (within the meaning of section 954(d)(1)(A)) integrated circuits in a possession on September 3, 1982. S transferred those integrated circuits to related corporation P. P incorporated the integrated circuits into central processing units (CPUs in the United States) and sold the CPUs to unrelated parties. S continued to manufacture integrated circuits in the possession through Juanuary 1, 1986. For taxable years beginning before January 1, 1986, S may compute its income under the cost sharing or profit split method with respect to the integrated circuits regardless of whether S satisfies the significant business presence test. However, unless S satisfies the significant business presence test with respect to the central processing units, S may not compute its income under the cost sharing or profit split methods with respect to the CPUs, and thus, S is not entitled to any return on manufacturing intangibles associated with CPUs to the extent that they are not related to the integrated circuits produced by S, nor (except as provided in the profit split methods) to any return on marketing intangibles.

Example 2. A possessions corporation, S, was engaged on September 3, 1982, in the manufacture (within the meaning of section 954(d)(1)(A)) of a bulk pharmaceutical in Puerto Rico from raw materials. S sold the bulk pharmaceutical to its U.S. parent, P, for encapsulation and sale by P to customers as the product X. Because S was not engaged in the encapsulation of X, S is not considered to have manufactured the integrated product, X, in Puerto Rico. During the interim period, S may compute its income under the cost sharing or profit split methods with respect to the integrated product, X, only if S satisfies the significant business presence test with respect to X. S may compute its income under the cost sharing or profit split methods with respect to the component product (the bulk pharmaceutical).

Example 3. P is a domestic corporation that is not a possessions corporation. P manufactures a bulk pharmaceutical in the United States. P transfers the bulk pharmaceutical to its wholly owned subsidiary, S, a possessions corporation. On September 3, 1982, S was engaged in the encapsulation of the bulk pharmaceutical in Puerto Rico in a manner which satisfies the test of section 954(d)(1)(A). For taxable years beginning before January 1, 1986, S may compute its income under the cost sharing or profit split methods with respect to the end-product form the (the encapsulated drug) regardless of whether S meets the significant business presence test. However, unless S satisfies the significant business presence test with respect to the integrated product, S may not compute its income under the cost sharing or profit split methods with respect to the integrated product, and thus, S is not entitled to any return on the intangibles associated with the bulk pharmaceutical.

Q. 12: On September 3, 1982, a possessions corporation, S was engaged in the manufacture (within the meaning of section 954(d)(1)(A)) of X in a possession. During the interim period, after September 3, 1982, but before January 1, 1986, S produced Y, which differs from X in terms of minor design features. S did not produce Y in a possession on September 3, 1982. Will S be considered to have commenced production of a new product after September 3, 1982, for purposes of the application of the significant business presence test for the interim period?

A. 12: No. X and Y will be considered to be a single product, and therefore S will not be required to satisfy the business presence test separately with respect to Y during the interim period. In all cases in which the items of property produced on or before September 3, 1982 and the items of property produced after that date could have been grouped together under the guidelines provided in § 1.936–5(a) questions and answers 6 through 10, the possessions corporation will not be considered to manufacture a new product after September 3, 1982.

Q. 13: May the term ''product'' be defined differently for export sales than for domestic sales?

A. 13: Yes. For rules concerning the application of the separate election for export sales see § 1.936–7(b).

(b) *Requirement of significant business presence—(1) General rules.*

Q. 1: In general, a possessions corporation may compute its income under the cost sharing or profit split methods with respect to a product only if the possessions corporation has a significant business presence in a possession with respect to that product. When will a possession corporation be considered to have a significant business presence in a possession?

A. 1: For purposes of the cost sharing method, the significant business presence test is met if the possessions corporation satisfies either a value added test or a direct labor test. For purposes of the profit split method, the significant business presence test is met if the possessions corporation satisfies either a value added test or a direct labor test and also manufactures the product in the possession within the meaning of section 954(d)(1)(A).

Q. 2: How may a possessions corporation satisfy the direct labor test with respect to a product?

A. 2: The possessions corporation will satisfy the direct labor test with respect to a product if the direct labor costs incurred by the possessions corporation as compensation for services performed in a possession are greater than or equal to 65 percent of the direct labor costs of the affiliated group for units of the possession product produced during the taxable year in whole or in part by the possessions corporation.

Q. 3: How may a possessions corporation satisfy the value added test?

A. 3: In order to satisfy the value added test, the production costs of the possessions corporation incurred in the possession with respect to units of the possession product produced in whole or in part by the possessions corporation in the possession and sold or otherwise disposed of during the taxable year by the affiliated group to unrelated parties must be greater than or equal to twenty-five percent of the difference between gross receipts from such sales or other dispositions and the direct material costs of the affilated group for materials purchased for such units from unrelated parties.

Q. 4: Must the significant business presence test be met with respect to all units of the product produced during the taxable year by the affiliated group?

A. 4: No. The significant business presence test must be met with respect to only those units of the product produced during the taxable year in whole or in part by the possessions corporation in a possession.

Q. 5: For purposes of determining whether a possessions corporation satisfies the significant business presence test, how shall the possessions corporation treat the cost of components transferred to the possessions corporation by a member of the affiliated group?

A. 5: The treatment of the cost of components transferred from an affiliate depends on whether the possession product is treated as including the components for purposes of section 936(h). If it is, then for purposes of the value added test, the production costs associated with the component shall be treated as production costs of the affiliated group that are not incurred by the possessions corporation. Those production costs, other than the cost of materials, shall not be treated as a cost of materials. For purposes of the direct labor test and the alternative significant business presence test, the direct labor costs associated with such components shall be treated as direct labor costs of the affiliated group that are not incurred by the possessions corporation. If the possession product is treated as not including such component for purposes of section 936(h), then, solely for purposes of determining whether the possessions corporation satisfies the value added test, the cost of the component shall not be treated as either a cost of materials or as a production cost. For purposes of the direct labor test and the alternative significant business presence test, the direct labor costs associated with such component shall not be treated as direct labor costs of the affiliated group. If the possession product is treated as not including such component, then the possessions corporation shall not be entitled to any return on the intangibles associated with the manufacturing or marketing of the component.

Q. 6: May two or more related possessions corporations aggregate their production or direct labor costs for purposes of determining whether they satisfy the significant business presence test with respect to a single product?

A. 6: No.

Q. 7: A possessions corporation, S, purchases raw materials and components from an unrelated corporation which conducts business outside of a possession. The unrelated corporation is not a contract manufacturer. What is the treatment of such raw materials and components for purposes of the significant business presence test?

A. 7: Where Company S purchases raw materials or components from an unrelated corporation which is not a contract manufacturer, the raw materials and components are treated as materials, and the costs related thereto are treated as a cost of materials.

(2) *Direct labor costs.*

Q. 1: How is the term ''direct labor costs'' to be defined?

A. 1: The term ''direct labor costs'' has the same meaning which it has for purposes of § 1.471–11(b)(2)(i). Thus, direct labor costs include the cost of labor which can be identified or associated with particular units or groups of units of a specific product. The elements of direct labor include such items as basic compensation, overtime pay, vacation and holiday pay, sick leave pay (other than payments pursuant to a wage continuation plan under section 105(d)), shift differential, payroll taxes, and payments to a supplemental unemployment benefit plan paid or incurred on behalf of employees engaged in direct labor.

Q. 2: May a taxpayer treat a cost as a direct labor cost if it is not included in inventoriable costs under section 471 and the regulations thereunder?

A. 2: No. A cost may be treated as a direct labor cost only if it is included in inventoriable costs. However, a cost may be considered a direct labor cost even though the activity to which it relates would not constitute manufacturing under section 954(d)(1)(A) as long as the cost is included in inventoriable costs.

Q. 3: May the members of the affiliated group include as direct labor costs the labor element in indirect production costs?

A. 3: No. The labor element of indirect production costs may not be considered as part of direct labor costs.

Q. 4: Do direct labor costs include the costs which can be identified or associated with particular units or groups of units of a specific product if those costs could also be described as quality control and inspection?

A. 4: Yes. Direct labor costs include costs which can be identified or associated with particular units or groups of units of a specific product. Thus, if quality control and inspection is an integral part of the production process, then the labor associated with that quality control and inspection shall be considered direct labor. For example, integrated circuits are soldered to printed circuit boards by passing the boards over liquid solder. Employees inspect each of the boards and repair any imperfectly soldered joints discovered on that inspection. The labor associated with this process is direct labor. However, if a person performs random inspections on limited numbers of products, then that labor associated with those inspections shall be considered quality control and therefore indirect labor.

Q. 5: Do direct labor costs of the possessions corporation include only the costs which were actually incurred or do they take into account, in addition, any labor savings which result because the activities were performed in a possession rather than in the United States?

A. 5: Direct labor costs include only the costs which were actually incurred.

Q. 6: For purposes of determining whether a possessions corporation satisfies the significant business presence test for a taxable year with respect to a product, how shall the possessions corporation compute its direct labor costs of units of the product?

A. 6: The direct labor test shall be applied separately to products produced in whole or in part by the possessions corporation in the possession during each taxable year. Sales shall be deemed to be made first out of the current year's production. If sales are made only out of the current year's production, then the direct labor costs of producing those units that are sold shall be the pro rata portion of the total direct labor costs of producing all the units that are produced in whole or in part in the possession by the possessions corporation during the current year. If all of the current year's production is sold and some inventory is liquidated, then the direct labor test shall be applied separately to the current year's production and the liquidated inventory. The direct labor costs of producing the liquidated inventory shall be the pro rata portion of the total direct labor costs that were incurred in producing all the units that were produced in whole or in part by the possessions corporation in the possessions in the layer of liquidated inventory determined under the member's method of inventory accounting.

Example. S is a cash basis calendar year taxpayer that has made an election under section 936(a). In 1985 S produced 100 units of product X. Fifty percent of the direct labor costs of the affiliated group were incurred by S and were compensation for services performed in the possession. Thus, S did not satisfy the significant business presence test with respect to product X in taxable year 1985. During 1986 S produced 100 units of product X. One hundred percent of the direct labor costs of the affiliated group were incurred by S and were compensation for services performed in the possession. In 1986 S sells 150 units of product X. One hundred of those units are deemed to be from the units produced in 1986. With respect to those units S satisfies the significant business presence test. Under S's method of inventory accounting the remaining 50 units were determined to be produced in 1985. With respect to those units S does not satisfy the significant business presence test because only 50% of the direct labor costs incurred in producing those units were incurred by S and were compensation for services performed in the possession.

Q. 7: What is the result if in a particular taxable year the possessions corporation satisfies the significant business presence test with respect to units of the product produced in one year and fails the significant business with respect to units produced in another year?

A. 7: For those units of the product with respect to which the possession corporation satisfies the significant business presence test, the possessions corporation may compute its income under the provisions of section 936(h)(5). For those units of the product with respect to which the possessions corporations fails the significant business presence test, the possessions corporation must compute its income under section 936(h)(1) through (4).

Q. 8: Do direct labor costs include costs incurred in a prior taxable year with respect to units of the possession product that are finished in a later taxable year?

A. 8: Yes.

(3) *Direct material costs.*

Q. 1: How is the term ''direct material costs'' to be defined?

A. 1: Direct material costs include the cost of those materials which become an integral part of the specific product and those materials which are consumed in the ordinary course of manufacturing and can be identified or associated with particular units or groups of units of that product. See § 1.471–3 for the elements of direct material costs.

Q. 2: May a taxpayer treat a cost as a direct material cost if it is not included in inventoriable costs under section 471 and the regulations thereunder?

A. 2: A taxpayer may not treat such costs as direct material costs.

(4) *Production costs.*

Q. 1: How is the term ''production costs'' defined?

A. 1: The term ''production costs'' has the same meaning which it has for purposes of § 1.471–11(b) except that the term does not include direct material costs and interest. Thus, production costs include direct labor costs and fixed and variable indirect production costs (other than interest).

Q. 2: With respect to indirect production costs described in § 1.471–11(c)(2) (ii) and (iii), may a possessions corporation include these costs in production costs for purposes of section 936, if they are not included in inventoriable costs under section 471 and the regulations thereunder?

A. 2: No. A possessions corporation may include these costs only if they are included for purposes of section 471 and the regulations thereunder. If a possessions corporation and the other members of the affiliated group include and exclude different indirect production costs in their inventoriable costs, then, for purposes of the significant business presence test, the possessions corporation shall compute its production costs and the production costs of the other members of the affiliated group by subtracting from the production costs of each member all indirect costs included by that member that are not included in production costs by all other members of the affiliated group.

Q. 3: Does a change in a taxpayer's method of accounting for purposes of section 471 affect the taxpayer's computation of production costs for purposes of section 936?

A. 3: Yes. If a taxpayer changes its method of accounting for purposes of section 471, then the same change shall apply for purposes of section 936.

Q. 4: For purposes of determining whether a possessions corporation satisfies the significant business presence test for a taxable year with respect to a product, how shall the possessions corporation compute its costs of producing units of the product sold or otherwise disposed to unrelated parties during the taxable year?

A. 4: All members of the affiliated group may elect to use their current year production costs regardless of whether the members use the FIFO or LIFO method of inventory accounting. If some or all of the current year's production of a product is sold, then the production costs of producing those units sold shall be the pro rata portion of the total production costs of producing all the units produced in the current year. If all of the current year's production of a product is sold and some inventory is liquidated, then the production costs of producing the liquidated inventory shall be the pro rata portion of the production costs incurred in producing the layer of liquidated inventory as determined under the member's method of inventory accounting.

Q. 5: How should the members of the affiliated group determine the portion of their production costs that is allocable to units of the product sold or otherwise disposed of during the taxable year?

A. 5: The members of the affiliated group may use either standard production costs (so long as variances are not material), average production costs, or FIFO production costs to determine the production costs that will be considered to be attributable to units of the product sold or otherwise disposed of during the taxable year. However, all members of the affiliated group must use the same method.

Q. 6: When is the quality control and inspection of a product considered to be part of the production activity for that product?

A. 6: Quality control and inspection of a manufactured product before its sale or other disposition by the manufacturer, or before its incorporation into other products, is considered to be part of the indirect production activity for that initial product. Subsequent testing of a product to ensure that the product is compatible with other products is not a part of the production activity for the initial product.

When a component is incorporated into an end-product form and the end-product form is then tested, the latter testing will be considered to be a part of the indirect production activity for the end-product form and will not be considered to be a part of the production activity for the component.

Q. 7: For purposes of the significant business presence test and the allocation of income to a possessions corporation, what is the treatment of the cost of installation of a product?

A. 7: For purposes of the significant business presence test and the allocation of income to a possessions corporation, product installation costs need not be taken into account as costs incurred in the manufacture of that product, if the taxpayer keeps such permanent books of account or records as are sufficient to establish the fair market price of the uninstalled product. In such a case, the cost of installation materials, the cost of the labor for installation, and a reasonable profit for installation will not be included in the costs and income associated with the possession product. If the taxpayer does not keep such permanent books of account or records, then the cost of installation materials and the cost of labor for installation shall be treated as costs associated with the possession product and income will be allocated to the possessions corporation and its affiliates under the rules provided in these regulations.

Q. 8: For purposes of the significant business presence test and the allocation of income to a product or service, what is the treatment of the cost of servicing and maintaining a possession product that is sold to an unrelated party?

A. 8: The cost of servicing and maintaining a possession product after it is sold is not associated with the production of that product.

Q. 9: For purposes of the significant business presence test and the allocation of income to a possessions corporation, what is the treatment of the cost of samples?

A. 9: The cost of producing samples will be treated as a marketing expense and not as inventoriable costs for these purposes. However, for taxable years beginning prior to January 1, 1986, the cost of producing samples may be treated as either a marketing expense or as inventoriable costs.

(5) *Gross receipts.*

Q. 1: How shall the affiliated group determine gross receipts from sales or other dispositions by the affiliated group to unrelated parties of the possession product?

A. 1: Gross receipts shall be determined in the same manner as possession sales under the rules contained in §1.936–6(a)(2).

(6) *Manufacturing within the meaning of section 954(d)(1)(A).*

Q. 1: What is the test for determining, within the meaning of section 954(d)(1)(A), whether a product is manufactured or produced by a possessions corporation in a possession?

A. 1: A product is considered to have been manufactured or produced by a possessions corporation in a possession within the meaning of section 954(d)(1)(A) and §1.954–3(a)(4) if—

(i) The property has been substantially transformed by the possessions corporation in the possession;

(ii) The operations conducted by the possessions corporation in the possession in connection with the property are substantial in nature and are generally considered to constitute the manufacture or production of property; or

(iii) The conversion costs sustained by the possessions corporation in the possession, including direct labor, factory burden, testing of components before incorporation into an end product and testing of the manufactured product before sales account for 20 percent or more of the total cost of goods sold of the possessions corporation.

In no event, however, will packaging, repackaging, labeling, or minor assembly operations constitute manufacture or production of property. See particularly examples 2 and 3 of § 1.954–3(a)(4)(iii).

Q. 2: Does the requirement that a possession product be produced or manufactured in a possession within the meaning of section 954(d)(1)(A) apply to taxable years beginning before January 1, 1986?

A. 2: A possessions corporation must satisfy this requirement for taxable years beginning before January 1, 1986, in the following cases:

(i) If the possessions corporation makes a separate election under section 936(h)(5)(F)(iv)(II) with respect to export sales;

(ii) If the possessions corporation is electing as its possession product a product that is subject to the interim period rules of § 1.936–5(a) question and answer (10); or

(iii) If the possessions corporation is electing as its possession product a product that is not subject to the interim period rules of § 1.936–5 (a) question and answer (10) and the possessions corporation computes its income under the profit split method with respect to that product.

For rules concerning products first produced in a possession after September 3, 1982, see § 1.936–5(b)(7) question and answer (2).

(7) *Start-up operations.*

Q. 1: With respect to products not produced (and types of services not rendered) in the possession on or before September 3, 1982, when must a possessions corporation first satisfy the 25 percent value added test or the 65 percent direct labor test?

A. 1: A transitional period is established such that a possessions corporation engaged in start-up operations with respect to a product or service need not satisfy the 25 percent value added test or the 65 percent labor test until the third taxable year following the taxable year in which such product is first sold by the possessions corporation or such service is first rendered by the possessions corporation. During the transitional period, the applicable percentages for these tests will be as follows:

	Any year after 1982		
	1	2	3
Value added test	10	15	20
Labor test	35	45	55

Q. 2: Does the requirement that a possession product be produced or manufactured in a possessions within the meaning of section 954(d)(1)(A) apply to a product if the possessions corporation is engaged in start-up operations with respect to that product?

A. 2: The possessions corporation must produce or manufacture the possessions product within the meaning of section 954(d)(1)(A) if the possessions corporation computes its income with respect to that product under the profit split method.

Q. 3: When will a possessions corporation be considered to be engaged in start-up operations?

A. 3: A possessions corporation is engaged in start-up operations if it begins operations in a possession with respect to a product or type of service after September 3, 1982. Subject to the further provisions of this answer, a possessions corporation will be considered to begin operations with respect to a product if, under the rules of § 1.936–5(a) questions and answers (6) through (10), such product could not be grouped with any other item of property manufactured in whole or in part in the possessions by any member of the affiliated group in any preceding taxable year. Any improvement or other change in a possession product which does not substantially change the production process would not be deemed to create a new product. A change in the division of manufacturing activity between the possessions corporation and its affiliates with respect to an item of property will not give rise to a new product. If a possessions corporation was producing a possession product that was either a component product or an end-product form and the possessions corporation expands its operations in the same possession so that it is now producing a product that includes the earlier possession product, the possessions corporation will not be entitled to use the start-up significant business presence test unless the production costs incurred by the possessions corporation in the possession in producing a unit of its new possession product are at least double the production costs incurred by the possessions corporation in the possession in producing a unit of the earlier possession product. If any member of an affiliated group actually groups two or more items of property then, solely for the purposes of determining whether any item of property in that group is a new product, that grouping shall be respected. However, the fact that an affiliated group does not actually group two or more items of property shall be disregarded in determining whether any item of property is a new product. Notwithstanding the above, if a possessions corporation is producing a possession product in one possession and such corporation or a member of its affiliated group begins operations in a different possession, regardless of whether the items of property could be grouped, the affiliated group may treat the units of the item of property produced at the new site of operations in the different possession as a new product.

(8) *Alternative significant business presence test.*

Q. 1: Will the Secretary adopt a significant business presence test other than those set forth in section 936(h)(5)(B)(ii)?

A. 1: Yes. The following significant business presence test is adopted both for the transitional period and thereafter. A possessions corporation will have a significant business presence in a possession for a taxable year with respect to a product or type of service if—

(i) No less than 50 percent of the direct labor costs of the affiliated group for units of the product produced, in whole or in part, during the taxable year by the possessions corporation or for the type of service rendered by the possessions corporation during the taxable year are incurred by the possessions corporation as compensation for services performed in the possession; and

(ii) The direct labor costs of the possessions corporation for units of the product produced or the type of service rendered plus the base period construction costs are no less than 70 percent of the sum of such base period construction costs and the direct labor costs of the affiliated group for such units of the product produced or the type of service rendered.

Notwithstanding satisfaction of the above test, for purposes of determining whether a possessions corporation may compute its income under the profit split method, a possessions corporation will not be treated as having a significant business presence in a possession with respect to a product unless the possessions corporation manufactures the product in the possession within the meaning of section 954(d)(1)(A).

Q. 2: How is the term ‘‘base period construction costs’’ defined?

A. 2: The term ‘‘base period construction costs’’ means the average construction costs incurred by or on behalf of the possessions corporation for services in the possession during the taxable year and the preceding four taxable years for section 1250 property (as defined in section 1250(c) and the regulations thereunder) that is used for the production of the product or the rendering of the service in the possession, and which represents the original use of the section 1250 property. For purposes of the preceding sentence, if the possessions corporation was not in existence during one or more of the four preceding taxable years, its construction costs for that year or years shall be deemed to be zero. Construction costs include architects’ and engineers’ fees, labor costs, and overhead and profit (if the construction is performed by a person that is not a member of the affiliated group).

(c) *Definition and treatment of contract manufacturing.*

Q. 1: For purposes of determining whether a possessions corporation satisfies the significant business presence test with respect to a product, the costs incurred by the possessions corporation or by any of its affiliates in connection with contract manufacturing which is related to that product and is performed outside the possession shall be treated as direct labor costs of the affiliated group and shall not be treated as production costs of the possessions corporation or as material costs. How is the term ‘‘contract manufacturing’’ to be defined?

A. 1: The term ‘‘contract manufacturing’’ includes any arrangement between a possessions corporation (or another member of the affiliated group) and an unrelated person if the unrelated person:

(1) Performs work on inventory owned by a member of the affiliated group for a fee without the passage of title;

(2) Performs production activities (including manufacturing, assembling, finishing, or packaging) under the direct supervision and control of a member of the affiliated group; or

(3) Does not undertake any significant risk in manufacturing its product (*e.g.*, it is paid by the hour).

Q. 2: Does an arrangement between a member of the affiliated group and an unrelated party constitute contract manufacturing if the unrelated party uses an intangible owned or licensed by a member of the affiliated group?

A. 2: Such an arrangement will be treated as contract manufacturing if the unrelated party makes use of a patent owned or licensed by a member of the affiliated group in producing the product which becomes part of the possession product of the possessions corporation. In addition, such use of manufacturing intangibles other than patents may be treated as contract manufacturing if it is established that the arrangement has the effect of materially distorting the application of the significant business presence test. However, the preceding sentence shall not apply if the possessions corporation establishes that the arrangement was entered into for a substantial business purpose (e.g., to obtain the benefit of special expertise of the manufacturer or economies of scale). These rules shall not apply to such contract manufacturing performed in taxable years beginning before January 1, 1986, nor shall the rules apply to binding contracts for the performance of such contract manufacturing entered into before June 13, 1986.

Q. 3: For purposes of the significant business presence test, how shall a possessions corporation treat the cost of contract manufacturing performed within a possession?

A. 3: If the possessions corporation uses the value added test, it will be permitted to treat the cost of the contract manufacturing performed in a possession, not including material costs, as a production cost of the possessions corporation. If it uses the direct labor test or the alternative significant business presence test set forth in § 1.936–5(b)(8), it is permitted to treat the direct labor costs of the contract manufacturer associated with such contract manufacturing as a cost of direct labor of the possessions corporation. The allowable amount of the direct labor cost shall be determined in accordance with question and answer 4 below.

Q. 4: How are the amounts paid by a possessions corporation to a contract manufacturer for services rendered in a possession to be treated by the possessions corporation in computing the direct labor cost of the product to which such contract manufacturing relates?

A. 4: If the possessions corporation can establish the contract manufacturer’s direct labor cost which was incurred in the possession, such cost will be treated as incurred by the possessions corporation as compensation for services performed in the possession. If the possessions corporation cannot establish such cost, then 50 percent of the amount paid to such contract manufacturer may be treated as incurred by the possessions corporation as compensation for services performed in the possession: provided, that not more than 50 percent of the fair market value of the product manufactured by the contract manufacturer is attributable to articles shipped into the possession, and the possessions corporation receives a statement from the contract manufacturer that this test has been satisfied. If this fair market value test is not satisfied, then the cost of contract manufacturing performed within a possession shall not be treated as a production cost or a direct labor cost of either the possessions corporation or the affiliated group.

Q. 5: For purposes of the significant business presence test, what is the treatment of costs which are incurred by a member of the affiliated group (including the possessions corporation) for contract manufacturing performed outside of the possession with respect to an item of property which is a component of the possession product?

A. 5: If the possession product is treated as including such component, the cost of the contract manufacturing shall be treated as a direct labor cost of members of the affiliated group other than the possessions corporation for purposes of the direct labor test and the alternative significant business presence test, and shall not be treated as a production cost of the possessions corporation or as a cost of materials for purposes of the value added test. If the possession product is treated as not including such component, the cost of the contract manufacturing shall not be treated as a direct labor cost of any member of the affiliated group for purposes of the direct labor test and the alternative significant business presence test, and shall not be treated as a production cost of the possessions corporation or as a cost of materials for purposes of the value added test.

[T.D. 8090, 51 FR 21524, June 13, 1986; 51 FR 27174, July 30, 1986]

§1.936–6 Intangible property income when an election out is made: Cost sharing and profit split options; covered intangibles.

The rules in this section apply for purposes of section 936(h) and also for purposes of section 934(e) where applicable.

(a) *Cost sharing option*—(1) *Product area research.*

Q. 1: Cost sharing payments are based on research undertaken by the affiliated group in the ‘‘product area’’ which includes the possession product. The term ‘‘product area’’ is defined by reference to the three-digit classification under the Standard Industrial Classification (SIC) code. Which governmental agency has jurisdiction to decide the proper SIC category for any specfic product?

A. 1: Solely for the purpose of determining the tax consequences of operating in a possession, the Secretary or his delegate has exclusive jurisdiction to decide the proper SIC category under which a product is classified. For this purpose, the product area under which a product is classified will be determined according to the 1972 edition of the SIC code. From time to time and in appropriate cases, the Secretary may prescribe regulations or issue rulings determining the proper SIC category under which a particular product is to be classified, and may prescribe regulations for aggregating two or more three-digit classifications of the SIC code and for classifying product areas according to a system other than under the SIC code.

Q. 2: How is the term ‘‘affiliated group’’ defined for purposes of the cost sharing option?

A. 2: For purposes of the cost sharing option, the term ‘‘affiliated group’’ means the possessions corporation and all other organizations, trades or businesses (whether or not incorporated, whether or not organized in the United States, and whether or not affiliated) owned or controlled directly or indirectly by the same interests, within the meaning of section 482.

Q. 3: Are research and development expenditures that are included in product area research limited to research and development expenditures that are deductible under section 174 or that are incurred by U.S. affiliates?

A. 3: No, product area research is not limited to product area research expenditures deductible under section 174 or to expenses incurred by U.S. affiliates. Product area research also includes deductions permitted under section 168 with respect to research property which are not deductible under section 174; qualified research expenses within the meaning of section 30(b); payments (such as royalities) for the use of, or right to use, a patent, invention, formula, process, design, pattern or know-how; and a proper allowance for amounts incurred in the acquisition of manufacturing intangible property. In the case of an acquisition of depreciable or amortizable manufacturing intangible property, the annual amount of product area research shall be be equal to the allowable depreciation or amortization on the intangible property for the taxable year. In the case of an acquisition of nondepreciable or nonamortizable manufacturing intangible property, the amount expended for the acquisition shall be deemed to be amortized over a five year period and included in product area research in the year of the deemed amortization. Any contingent payment made with respect to the acquisition of nonamortizable manufacturing intangible property shall be treated as amounts incurred in the acquisition of nonamortizable manufacturing intangible property when paid or accrued.

Q. 4: Does royalty income from a person outside the affiliated group with respect to the manufacturing intangibles within a product area reduce the product area research pool within the same product area?

A. 4: Yes.

Q. 5: Does income received from a person outside the affiliated group from the sale of a manufacturing intangible reduce the product area research pool within the same product area?

A. 5: In determining product area research, the income from the sale attributable to noncontingent payments will reduce product area research ratably over the remaining useful life of the property in the case of an amortizable intangible and ratably over a 5-year period in the case of a nonamortizable intangible. Any income attributable to contingent amounts received with respect to the sale of manufacturing intangible property shall be treated as amounts received from the sale of the manufacturing intangible property in the year in which such contingent amounts are received or accrued.

Q. 6: If a member of an affiliated group incurs research and development expenses pursuant to a contract with an unrelated person who is entitled to exclusive ownership of all the technology resulting from the expenditures, is the amount of product area research reduced by the amount of such expenditures?

A. 6: To the extent that the product area research expenditures can be allocated solely to the technology produced for the unrelated person, such expenditures will not be included in product area research expenditures provided, however, that the unrelated person has exclusive ownership of all the technology resulting from these expenditures, and further that no member of the affiliated group has a right to use any of the technology.

Q. 7: What is the treatment of product area research expenditures attributable to a component where the component and the integrated product fall within different product areas?

A. 7: For purposes of the computation of product area research expenditures in the product area by the affiliated group, the product area in which the component falls is aggregated with the product area in which the integrated product falls. However, if the component product and integrated product are in separate SIC codes and if the component product is not included in the definition of the possession product, then the product area research expenditures are not aggregated. The same rule applies where the taxpayer elects a component product which encompasses another component product and the two component products fall into separate SIC codes. In such case, the product area in which the first component falls is aggregated with the product area in which the second component falls.

(2) *Possession sales and total sales.*

Q. 1: The cost sharing payment is the same proportion of the total cost of product area research which the amount of ‘‘possession sales’’ of the affiliated group bears to the ‘‘total sales’’ of the affiliated group within the product area. How are ‘‘possession sales’’ defined for purposes of the cost sharing fraction?

A. 1: The term ‘‘possession sales’’ means the aggregate sales or other dispositions of the possession product, to persons who are not members of the affiliated group, less returns and allowances and less indirect taxes imposed on the production of the product, for the taxable year. Except as otherwise indicated in § 1.936–6(a)(2), the sales price to be used is the sales price received by the affiliated group from persons who are not members of the affiliated group.

Q. 2: For purposes of the numerator of the cost sharing fraction, how are possession sales computed where the possession product is a component product or an end-product form?

A. 2: (i) The sales price of the component product or end-product form is determined as follows. With respect to a component product, an independent sales price from comparable uncontrolled transactions must be used if such price can be determined in accordance with §1.482–2(e)(2). If an independent sales price of the component product from comparable uncontrolled transactions cannot be determined, then the sales price of the component product shall be deemed to be equal to the transfer price, determined under the appropriate section 482 method, which the possessions corporation uses under the cost sharing method in computing the income it derives from the active conduct of a trade or business in the possession with respect to the component product. The possessions corporation in lieu of using the transfer price determined under the preceding sentence may treat the sales price for the component product as equal to the same proportion of the third party sales price of the integrated product which the production costs attributable to the component product bear to the total production cost for the integrated product. Production cost will be the sum of direct and indirect production costs as defined in §1.936–5(b)(4). If the possessions corporation determines the sales price of the component product using the production cost ratio, the transfer price used by the possessions corporation in computing its income from the component product under the cost sharing method may not be greater than such sales price.

(ii) With respect to an end-product form, the sales price of the end-product form is equal to the difference between the third party sales price of the integrated product and the independent sales price of the excluded component(s) from comparable uncontrolled transactions, if such price can be determined under §1.482–2(e)(2). If an independent sales price of the excluded component(s) from uncontrolled transactions cannot be determined, then the sales price of the end-product form shall be deemed to be equal to the transfer price, determined under the appropriate section 482 method, which the possessions corporation uses under the cost sharing method in computing the income it derives from the active conduct of a trade or business in the possession with respect to such end-product form. The possessions corporation in lieu of using the transfer price determined under the preceding sentence may use the production cost ratio method described above to determine the sales price of the end-product form (*i.e.*, the same proportion of the third party sales price of the integrated product which the production costs attributable to the end-product form bear to the total production costs for the integrated product). If the possessions corporation determines the sales price of the end-product form using the production cost ratio, the transfer price used by the possessions corporation in computing its income from the end-product form under the cost sharing method may not be greater than such sales price. For similar rules applicable to the profit split option see §1.936–6(b)(1), question and answer 12.

Q. 3: For purposes of determining possessions sales in the numerator of the cost sharing fraction, will the replacement part price of the product be treated as a price from comparable uncontrolled transactions?

A. 3: Prices for replacement parts are generally higher than prices for equipment sold as part of an original system. Thus, prices for replacement parts cannot generally be used directly as prices for comparable uncontrolled transactions. However, replacement part prices may be used for estimating comparable uncontrolled prices where the price differential can be reasonably determined and taken into account under §1.482–2(e)(2).

Q. 4: For purposes of determining possession sales in the cost sharing fraction, what is the treatment of components that are purchased by one possessions corporation from an affiliated possessions corporation and which are incorporated into a possession product where the transferor possessions corporation treats the transferred component as a possession product?

A. 4: When one possessions corporation purchases components from a second possessions corporation which is an affiliated corporation, the purchase price of the components paid to the second possessions corporation shall be subtracted from the sales proceeds of the product produced in the possession by the first possessions corporation, and only the remainder is included in the numerator of the cost sharing formula for the first corporation. For example, assume that N corporation manufactures a component for sale to O corporation for $100 (a price which reflects prices in comparable uncontrolled transactions). Both N and O are affiliated possessions corporations. N has designated that component product as its possession product. O then incorporates that product into a second product which is sold to customers for $300 N and O must make separate cost sharing payments. The cost sharing payment of N corporation is determined by including $100 as possession sales, and the payment of O is determined by subtracting that $100 purchase price from the $300 received from customers. Thus, the possessions sales amount of O is $200. This rule is intended to prevent the double counting of the sales of a component produced by one possessions corporation and incorporated into another product by an affiliated possessions corporation.

Q. 5: Are pre-TEFRA sales included in the cost sharing fraction?

A. 5: No. Pre-TEFRA sales are sales of products produced by the possessions corporation and transferred to an affiliate prior to a possessions corporation's first taxable year beginning after December 31, 1982. Pre-TEFRA sales are not included in either the numerator or denominator of the cost sharing fraction. If the U.S. affiliate uses the FIFO method of costing inventory, the pre-TEFRA inventory will be treated as the first inventory sold by the U.S. affiliate during the first year in which section 936(h) applies. If the U.S. affiliate uses the LIFO method of costing inventory (either dollar-value or specific goods LIFO), pre-TEFRA inventor will be treated as inventory sold by the U.S. affiliate in the year in which the U.S. afiliate's LIFO layer containing pre-TEFRA LIFO inventory is liquidated.

Q. 6: How are ''possession sales'' determined under the cost sharing formula if members of the affiliated group (other than the possessions corporation) include purchases of the possession product, X, in a dollar-value LIFO inventory pool (as provided under § 1.472–8)?

A. 6: Possession sales may be determined by applying the revenue identification method provided under paragraph (b)(1) Question and Answer 18 of this section.

Q. 7: Do possession sales include excise taxes paid by the possessions corporation when the product is sold for ultimate use or consumption in the possession?

A. 7: No. The amount of excise taxes is excluded from both the numerator and denominator of the cost sharing fraction.

Q. 8: How are ''total sales'' defined for purposes of the cost sharing fraction?

A. 8: The term ''total sales'' means aggregate sales or other dispositions of products in the same product area as the possession product, less returns and allowances and less indirect taxes imposed on the production of the product, for the taxable year to persons who are not members of the affiliated group. The sales price to be used is the sales price received by the affiliated group from persons who are not members of the affiliated group.

Q. 9: In computing that cost sharing payment, how are ''total sales'' computed if the dollar-value LIFO inventory pool includes some products which are not included in the product area (determined under the 3-digit SIC code) on which the denominator of the cost sharing fraction is based?

A. 9: In such case, the amount of the total sales within the product area to persons who are not members of the affiliated group by persons who are members of the affiliated group is determined by multiplying the total sales of the products within the dollar-value LIFO inventory pool by a fraction. The numerator of the fraction includes the dollar-value of purchases by members of the affiliated group (including the possessions corporation) of products within the product area made during the year, plus any added production costs (as defined in §1.471–11(b), (c), and (d) but not including the costs of materials) incurred by the affiliates during the same period. The denominator of the fraction includes the dollar-value of purchases by members of the affiliated group (including the possessions corporation) of products within the dollar-value LIFO inventory pool made during the same period (including any production costs, as described above, incurred by the affiliate during the same period). For these purposes, purchases of a possession product are determined on the basis of the possessions corporation's cost for its inventory purposes.

Q. 10: May a possessions corporation compute its income under the cost sharing method with respect to a possession product which the possessions corporation sells to a member of its affiliated group and which that member then leases to an unrelated person or uses in its own trade or business?

A. 10: Yes, provided that an independent sales price for the possession product from comparable uncontrolled transactions can be determined in accordance with §1.482–2(e)(2), and, provided further, that such member complies with the requirements of §1.936–6(a)(2), question and answer 14. If, however, there is a comparable uncontrolled price for an integrated product and the possession product is a component product or end-product form thereof, the possessions corporation may, if such member complies with the requirements of §1.936–6(a)(2), question and answer 14, compute its income under the cost sharing method with respect to such possession product. In that case, the cost sharing payment shall be computed under the following question and answer.

Q. 11: How are possession sales and total sales to be determined for purposes of computing the cost sharing payment with respect to a possession product which the possessions corporation sells to a member of its affiliated group where that member then leases the possession product to unrelated persons or uses it in its own trade or business?

A. 11: If the possessions corporation is entitled to compute its income from such sales of the possession product under the cost sharing method, both possession sales and total sales shall be determined as if the possession product had been sold by the affiliate to an unrelated person at the time the possession product was first leased or otherwise placed in service by the affiliate. The sales price on such deemed sale shall be equal to the independent sales price from comparable uncontrolled transactions determined in accordance with §1.482–2(e)(2), if any. If the possession product is a component product or an end-product form for which there is no such independent sales price but there is a comparable uncontrolled price for the integrated product which includes the possession product, the deemed sales price of the possession product shall be computed under the rules of §1.936–6(a)(2) question and answer 2. The full amount of income received under the lease shall be treated as income of (and taxed to) the affiliate and not the possessions corporation.

Q. 12: When may a possessions corporation take into account in computing total sales under the cost sharing method products in the same product area as the possession product (other than the possession product itself) where such products are leased by members of the affiliated group to unrelated persons or used by any such member in its own trade or business?

A. 12: For purposes of computing total sales under the cost sharing method, the possessions corporation may take into account products in the same product area as the possession product itself where such products are leased by members of the affiliated group to unrelated persons or used in the trade or business of any such member, but only if an independent sales price of such products from comparable uncontrolled transactions may be determined under §1.482–2(e)(2). In such cases, the units of such products which are leased or otherwise used internally by members of the affiliated group may be treated as sold to unrelated persons for such independent sales price for purposes of computing total sales.

Q. 13: Assuming that a possessions corporation is entitled to compute its income under the cost sharing method with respect to sales of a possession product to affiliates in cases where those affiliates lease units of the possession product to unrelated persons or use them internally, is the possessions corporation's income from the possession product any different than if the affiliates had sold the product to unrelated parties?

A. 13: No.

Q. 14: If a possessions corporation sells units of a possession product to a member of its affiliated group and that affiliate then leases those units to an unrelated person or uses the units in its own trade or business, what requirements must the affilate meet in order for the possessions corporation to be entitled to the benefits of the cost sharing method with respect to such units?

A. 14: (i) For taxable years of the possessions corporation beginning on or before June 13, 1986, the affiliate need not meet any special requirements in order for the possessions corporation to be entitled to the beneifts of the cost sharing method with respect to such units. Thus, the affiliate's basis in such units shall be equal to the transfer price used for computing the possessions corporation's gross income with respect to such units under section 936(h)(5)(C)(i)(II), and the income derived by the affiliate from such lease or internal use shall be reported by the affiliate when and to the extent actually derived. The affiliate shall not be deemed to have sold such units to an unrelated party at the time they were first leased or otherwise placed in service for any purpose other than the computation of possession sales and total sales. A similar rule applies to other products in the same product area as the possession product which are sold by any member in its own trade or business and which the possessions corporation takes into account in computing total sales under the cost sharing method.

(ii) For taxable years of the possessions corporations beginning after June 13, 1986, a possessions corporations will not be entitled to the benefits of the cost sharing method with respect to units of the possession product which the possessions corporation sells to an affiliate where the affiliate then leases such units to an unrelated person or uses them in its own trade or business, unless the affiliate agrees to be treated for all tax purposes as having sold such units to an unrelated party at the time they were first leased or otherwise placed in service by such affiliate. The affiliate must demonstrate such agreement by reporting its income from such units as if:

(A) It had sold such units to an unrelated person at such time at a price equal to the price used to compute possessions sales under § 1.936–6(a)(2), question and answer 11;

(B) It had immediately repurchased such units for the same price; and

(C) Its basis in such units for all subsequent purposes was equal to its cost basis from such deemed repurchase.

For treatment of other products in the same product area as the possession product see § 1.936–6(a)(2), question and answer 12.

(iii) The principles contained in questions and answers 11, 12, 13, and 14 are illustrated by the following example:

Example. Possessions corporation S and its affiliate A are calendar year taxpayers. In 1985, S manufactures 100 units of possession product X. S sells 50 units of X to unrelated persons in arm's length transactions for $10 per unit. In applying the cost sharing method to determine the portion of its gross income from such sales which qualifies for the possessions tax credit, S determines that $8 of the $10 sales price may be taken into account. S sells the remaining 50 units of X to A, and A then leases such units to unrelated persons. In 1985, A also manufacturers 100 units of product Y, the only other product in the same product area as X manufactured or sold by any member of the affiliated group. A manufactured the 100 units of Y at a cost of $15 per unit, sold 50 units of Y to unrelated persons in arm's length transactions for $20 per unit, and leased the remaining 50 units of Y to unrelated persons.

S may compute its income under the cost sharing method with respect to the 50 units of X it sold to A because S can determine an independent sales price of X from comparable uncontrolled transactions under § 1.482–2(e)(2). For purposes of computing both possessions sales and total sales, the 50 units of X sold to A will be deemed to have been sold by A to an unrelated person for $10 per unit. The income of S qualifying for the possessions tax credit from the sale of those

50 units of X to A, and A's basis in those units, will both be determined using the $8 transfer price determined under section 936 (h)(5)(C)(i)(II). For purposes of computing total sales in the denominator of the cost sharing fraction, S may also take into account the 50 units of Y leased by A to unrelated persons, as if A had sold those units for $20 per unit. A's basis in those units of Y will continue to be its actual cost basis of $15 per unit.

If all of the above transactions had occurred in 1987, S would be entitled to compute its income under the cost sharing method with respect to the 50 units of X it sold to A only if A agreed to be treated for all tax purposes as if it had sold such units for $10 per unit, realized income on such deemed sale of $2 per unit, repurchased such units immediately for $10 per unit, and then leased such units, which would then have a $10 per unit basis in A's hands. For purposes of computing total sales, S would be entitled to take into account the 50 units of X leased by A to unrelated persons as if A had sold such units for $20 per unit.

(3) *Credits against cost sharing payments.*

Q. 1: Is the cost of product area research paid or accrued by the possessions corporation in a taxable year creditable against the cost sharing payment?

A. 1: Yes, if the cost of the product area research is paid or accrued solely by the possessions corporation. Thus, payments by the possessions corporation under cost sharing arrangements with, or royalties paid to, unrelated persons are so creditable. Amounts (such as royalties) paid directly or indirectly to, or on behalf of, related persons and amounts paid under any cost sharing agreements with related persons are not creditable against the cost sharing payment.

Q. 2: Do royalties or other payments made by an affiliate of the possessions corporation to another member of the affiliated group reduce the cost sharing payment if such royalties or other payments are based, in part, on activity of the possessions corporation?

A. 2: No. Payments made between affiliated corporations do not reduce the cost sharing payment. Thus, for example, if a possessions corporation sells a component to a foreign affiliate for incorporation by the foreign affiliate into an integrated product sold to unrelated persons, and the foreign affiliate pays a royalty to the U.S. parent of the possessions corporation based on the total value of the integrated product, the cost sharing payment of the possessions corporation is not reduced.

(4) *Computation of cost sharing payment.*

Q. 1: S is a possessions corporation engaged in the manufacture and sale of four products (A, B, C, and D) all of which are classified under the same three-digit SIC code. S sells its production to a U.S. affiliate, P, which resells it to unrelated parties in the United States. P's third party sales of each of these products produced in whole or in part by S (computed as provided under paragraph (a)(2) of §1.936–6) are $1 million or a total of $4 million for A, B, C, and D. P's other sales of products in the same SIC code are $3,000,000; and the defined worldwide product area research of the affiliated group is $350,000. How should S compute the cost sharing amount for products A, B, C, and D?

A. 1: The cost sharing amount is computed separately for each product on Schedule P of Form 5735. S should use the following formula for each of the products A, B, C, and D:

$$\frac{\text{Sales to unrelated persons of possession product}}{\text{Total sales of products in SIC code}} \times \text{Worldwide product area research}$$

$$\frac{\$1{,}000{,}000}{\$7{,}000{,}000} \times \$350{,}000 = \$50{,}000$$

Q. 2: The facts are the same as in question 1 except that S manufactures product D under a license from an unrelated person. S pays the unrelated party an annual license fee of $20,000.

Thus, the worldwide product area research expense of the affiliated group is $370,000. How should the cost sharing payment be adjusted?

A. 2: The cost sharing fee should be reduced by the $20,000 license fee made as a direct annual payment to a third party on account of product D. The cost sharing payment with respect to product D in this example will be adjusted as follows:

$$\frac{\text{Sales to unrelated persons of possession product}}{\text{Total sales of products in SIC code}} \times \text{Worldwide product area research} - \text{Amount paid by the possessions corporation to an unrelated party}$$

$$\left(\frac{1{,}000{,}000}{\$7{,}000{,}000} \times \$370{,}000\right) - \$20{,}000 = \$32{,}857$$

Q. 3: The facts are the same as in question 1 except that S also manufactures and exports product E to a foreign affiliate, which resells it to unrelated persons for $1 million. S makes a separate election for its export sales. How should S compute the cost sharing amount for product E?

A. 3: The numerator of the cost sharing fraction is the aggregate sales or other dispositions by members of the affiliated group of the units of product E produced in whole or in part in the possession to persons who are not members of the affiliated group. The cost sharing amount for product E would be computed as follows:

$$\frac{\text{Export sales of E}}{\text{Total sales of products in SIC code (In this example, U. S. Sales of A, B, C, and D + export sales of E)}} \times \text{Worldwide product area research}$$

or

$$\frac{\$1{,}000{,}000}{(\$7{,}000{,}000 + \$1{,}000{,}000)} \times \$350{,}000 = \$43{,}750$$

Q. 4: The facts are the same as in question 1, except that S also receives $10,000 in royalty income from unrelated persons for the licensing of certain manufacturing intangible property rights. What is the amount of the product area research that must be allocated in determining the cost sharing amount?

A. 4: If the affiliated group receives royalty income from unrelated persons with respect to manufacturing intangibles in the same product area, then the product area research to be considered shall be first reduced by such royalty income. In this case, the amount of product area research to be used in determining S's cost sharing payment should be reduced by the $10,000 royalty payment received to $340,000.

Q. 5: May a possessions corporation redetermine the amount of its required cost sharing payment after filing its tax return?

A. 5: If after filing its tax return, a possessions corporation files an amended return, or if an adjustment is made on audit, either of which affects the amount of the cost sharing payment required, then a redetermination of the cost sharing payment must be made. See, however, section 936(h)(5)(C)(i)(III)(*a*) with respect to the increase in the cost sharing payment due to interest imposed under section 6601(a).

(5) *Effect of election under the cost sharing method.*

Q. 1: What is the effect of the cost sharing method?

A. 1: The cost sharing payment reduces the amount of deductions (and the amount of reductions in earnings and profits) otherwise allowable to the U.S. affiliates (other than tax-exempt affiliates) within the affiliated group as determined under section 936(h)(5)(C)(i)(I)(*b*) which have incurred research expenditures (as defined in §1.936–6(a)(1), question and answer (3) in the same product area for which the cost sharing option is elected, during the taxable year in which the cost sharing payment accrues. If there are no such U.S. affiliates, the reductions with respect to deductions and earnings and profits, as the case may be, are made with respect to foreign affiliates within the same affiliated group which have incurred product area research expenditures in such product area attributable to a U.S. trade or business. If there are no affiliates which have incurred research expenditures in such product area, the reductions are then made with respect to any other U.S. affiliate and, if there is no such U.S. affiliate, then to any other foreign affiliate. The allocations of these reductions in each case shall be made in proportion to the gross income of the affiliates. In the case of foreign affiliates, the allocation shall be made in proportion to gross income attributable to the U.S. trade or business or worldwide gross income, as the case may be. With respect to each group above, the reduction of deductions shall be applied first to deductions under section 174, then to deductions under section 162, and finally to any other deductions on a pro rata basis.

Q. 2: For purposes of estimated tax payments, when is the cost sharing amount deemed to accrue?

A. 2: The cost sharing amount is deemed to accrue to the appropriate affiliate on the last day of the taxable year of each such affiliate in which or with which the taxable year of the possessions corporation ends.

Q. 3: If the cost sharing method is elected and the year of accrual of the cost sharing payment to the appropriate affiliate (described in question and answer 1 of this paragraph (a)(5)) differs from the year of actual payment by the possessions corporation, in what year are the deductions of the recipients reduced?

A. 3: In the year the cost sharing payment has accrued.

Q. 4: What is the treatment of income from intangibles under the cost sharing method?

A. 4: Under the cost sharing method, a possessions corporation is treated as the owner, for purposes of obtaining a return thereon, of manufacturing intangibles related to a possession product. The term ''manufacturing intangible'' means any patent, invention, formula, process, design, pattern, or know-how. The possessions corporation will not be treated as the owner, for purposes of obtaining a return thereon, of any manufacturing intangibles related to a component product produced by an affiliated corporation and transferred to the possessions corporation for incorporation into the possession product, except in the case that the possession product is treated as including such component product for all purposes of section 936(h)(5). Further, the possessions corporation will not be treated as the owner, for purposes of obtaining a return thereon, of any marketing intangibles except ''covered intangibles.'' (See §1.936–6(c).)

Q. 5: If the cost sharing option is elected, is it necessary for the possessions corporation to be the legal owner of the manufacturing intangibles related to the possession product in order for the possessions corporation to receive a full return with respect to such intangibles?

A. 5: No. There is no requirement that manufacturing intangibles be owned by the possessions corporation.

Q. 6: How is income attributable to marketing intangibles treated under the cost sharing method?

A. 6: Except in the case of ''covered intangibles'' (see § 1.936–6(c)), the possessions corporation is not treated as the owner of any marketing intangibles, and income attributable to marketing intangible of the possessions corporation will be allocated to the possessions corporation's U.S. shareholders with the proration of income based on shareholdings. If a shareholder of the possessions corporation is a foreign, person or is otherwise tax exempt, the possessions corporation is taxable on that shareholder's pro rata amount of the intangible property income. If the possessions corporation is a corporation any class of the stock of which is regularly traded on an established securities market, then the income attributable to marketing intangibles will be taxable to the possessions corporation rather than the corporation's U.S. shareholders.

Q. 7: What is the source of the intangible property income described in question and answer 6?

A. 7: The intangible property income is U.S. source whether taxed to the U.S. shareholder or taxed to the possessions corporation and section 863 (b) does not apply for this purpose. However, such intangible property income, if treated as income of the possessions corporation, does not enter into the calculation of the 80-percent possession source test or the 65-percent active trade or business test.

Q.7a: What is the source of the taxpayer's gross income derived from a sale in the United States of a possession product purchased by the taxpayer (or an affiliate) from a corporation that has an election in effect under section 936, if the income from such sale is taken into account to determine benefits under cost sharing for the section 936 corporation? Is the result different if the taxpayer (or an affiliate) derives gross income from a sale in the United States of an integrated product incorporating a possession product purchased by the taxpayer (or an affiliate) from the section 936 corporation, if the taxpayer (or an affiliate) processes the possession product or an excluded component in the United States?

A.7a: Under either scenario, the income is U.S. source, without regard to whether the possession product is a component, end-product, or integrated product. Section 863 does not apply in determining the source of the taxpayer's income. This Q&A 7a is applicable for taxable years beginning on or after November 13, 1998.

Q. 8: May marketing intangible income, if any, be allocated to the possessions corporation with respect to custom-made products?

A. 8: No. If the cost sharing option is elected, then income attributable to marketing intangibles (other than ''covered intangibles'' described in § 1.936–6(c)) will be taxed as discussed in questions and answers 6 and 7 of paragraph (a)(5) of this section. It is immaterial whether the product is custom-made.

Q. 9: In order to sell a pharmaceutical product in the United States, a New Drug Application (''NDA'') for the product must be approved by the U.S. Food and Drug Administration. Is an NDA considered a manufacturing or marketing intangible for purposes of the allocation of income under the cost sharing method?

A. 9: A manufacturing intangible.

Q. 10: Can a copyright be, in whole or in part, a manufacturing intangible for purposes of the allocation of income under the cost sharing method?

A. 10: In general, a copyright is a marketing intangible. See section 936(h)(3)(B)(ii). However, copyrights may be treated either as manufacturing intangibles or nonmanufacturing intangibles (or as partly each) depending upon the function or the use of the copyright. If the copyright is used in manufacturing, it will be treated as a manufacturing intangible; but if it is used in marketing, even if it is also classified as know-how, it will be treated as a marketing intangible.

Q. 11: If the cost sharing option is elected and a patent is related to the product produced by the possessions corporation, does the return to the possessions corporation with respect to the manufacturing intangible include the make, use, and sell elements of the patent?

A. 11: Yes. A patent confers an exclusive right for 17 years to sell a product covered by the patent. During this period, the return to the possessions corporation includes the make, use and sell elements of the patent.

Q. 12: For purposes of the cost sharing option, may a safe haven rule be applied to determine the amount of marketing intangible income?

A. 12: No. The amount of marketing intangible income is determined on the basis of all relevant facts and circumstances. The section 482 regulations will continue to apply except to the extent modified by the election. Rev. Proc. 63–10 and Rev. Proc. 68–22 do not apply for this purpose.

Q. 13: If a product covered by the cost sharing election is sold by a possessions corporation to an affiliated corporation for resale to an unrelated party, may the resale price method under section 482 be used to determine the intercompany price of the possessions corporation?

A. 13: In general, the resale price method may be used if (a) no comparable uncontrolled price for the product exists, and (b) the affiliated corporation does not add a substantial amount of value to the product by manufacturing or by the provision of services which are reflected in the sales price of the product to the customer. The possessions corporation will not be denied use of the resale price method for purposes of such inter-company pricing merely because the reseller adds more than an insubstantial amount to the value of the product by the use of intangible property.

Q. 14: If a possessions corporation makes the cost sharing election and uses the cost-plus method under section 482 to determine the arm's-length price of a possession product, will the cost base include the cost of materials which are subject to processing or which are components in the possession product?

A. 14: A taxpayer may include the cost of materials in the cost base if it is appropriate under the regulations under §1.482–2(e)(4).

Q. 15: If the possessions corporation computes its income with respect to a product under the cost sharing method, and the price of the product is determined under the cost-plus method under section 482, does the cost base used in computing cost-plus under section 482 include the amount of the cost sharing payment?

A. 15: The amount of the cost sharing payment is included in the cost base. However, no profit with respect to the cost sharing payment will be allowed.

Q. 16: If a member of the affiliated group transfers to a possessions corporation a component which is incorporated into a possession product, how will the transfer price for the component be determined?

A. 16: The transfer price for the component will be determined under section 482, and as follows. If the possession product is treated as not including such component for purposes of section 936(h)(5), the transfer price paid for the component will include a return on all intangibles related to the component product. If the posssession product is treated as including such component for purposes of section 936(h)(5), then the transfer price paid for the component by the possessions corporation will not include a return on any manufacturing intangible related to the component product, and the possessions corporation will obtain the return on the manufacturing intangibles associated with the component.

Q. 17: If the possessions corporation computes its income with respect to a product under the cost sharing method, with respect to which units of the product shall the possessions corporation be treated as owning intangible property as a result of having made the cost sharing election?

A. 17: The possessions corporation shall not be treated as owning intangible property, as a result of having made the cost sharing election, with respect to any units of a possession product which were not taken into account by the possessions corporation in applying the significant business presence test for the current taxable year or for any prior taxable year in which the possessions corporation also had a significant business presence in the possession with respect to such product.

(b) *Profit split option*—(1) *Computation of combined taxable income.*

Q. 1: In determining combined taxable income from sales of a possession product, how are the allocations and apportionments of expenses, losses, and other deductions to be determined?

A. 1: (i) Expenses, losses, and other deductions are to be allocated and apportioned on a ''fully-loaded'' basis under § 1.861–8 to the combined gross income of the possessions corporation and other members of the affiliated group (other than foreign affiliates). For purposes of the profit split option, the term ''affiliated group'' is defined the same as under § 1.936–6 (a)(1) question and answer 2. The amount of research, development, and experimental expenses allocated and apportioned to combined gross income is to be determined under § 1.861–8(e)(3). The amount of research, development and experimental expenses and related deductions (such as royalties paid or accrued with respect to manufacturing intangibles by the possessions corporation or other domestic members of the affiliated group to unrelated persons or to foreign affiliates) allocated and apportioned to combined gross income shall in no event be less than the amount of the cost sharing payment that would have been required under the rules set forth in section 936(h)(5)(C)(i)(II) and paragraph (a) of this section if the cost sharing option had been elected. Other expenses which are subject to § 1.861–8(e) are to be allocated and apportioned in accordance with that section. For example, interest expense (including payments made with respect to bonds issued by the Puerto Rican Industrial, Medical and Environmental Control Facilities Authority (AFICA)) is to be allocated and apportioned under § 1.861–8(e)(2). With the exception of marketing and distribution expenses discussed below, the other remaining expenses which are definitely related to a class of gross income shall be allocated to that class of gross income and shall be apportioned on the basis of any reasonable method, as described in § 1.861–8 (b)(3) and (c)(1). Examples of such methods may include, but are not limited to, those specified in § 1.861–8(c)(1)(i) through (vi).

(ii) The class of gross income to which marketing and distribution expenses relate and shall be allocated is generally to be defined by the same ''product area'' as is determined for the relevant research, development, and experimental expenses (*i.e.*, the appropriate 3-digit SIC code), but shall include only gross income generated or reasonably expected to be generated from the geographic area or areas to which the expenses relate. It shall be presumed that marketing and distribution expenses relate to all product sales within the same product area. If, however, it can be established that any of these expenses are separately identifiable expenses, such as advertising, and relate, directly or indirectly, solely to a specific product or a specific group of products, such expenses shall be allocated to the class of gross income defined by the specific product or group of products. Thus, advertising and other separately identifiable marketing expenses which relate specifically and exclusively to a particular product must be allocated entirely to the gross income from that product, even though the taxpayer or other members of an affiliated group which includes the taxpayer produce and market other products in the same 3-digit SIC code classification. The mere display of a company logo or mention of a company name solely in the context of identifying the manufacturer shall not prevent an advertisement from relating specifically and exclusively to a particular product or group of products.

(iii) If marketing and distribution expenses are allocated to a class of gross income which consists both of income from sales of possession products (the statutory grouping) and other income such as from sale by U.S. affiliates of products not produced in the possession (the residual grouping), then these marketing and distribution expenses shall be apportioned on a ''fully loaded'' basis which reflects, to a reasonably close extent, the factual relationship between these deductions and the statutory and residual groupings of gross income. Apportionment methods based upon comparisons of amounts incurred before ultimate sale of a product (including apportionment on a comparison of costs of goods sold, other expenses incurred, or other comparisons set forth in § 1.861–8 (c)(1)(v), such as time spent) are not on a ''fully-loaded'' basis and do not reflect this required factual relationship. These deductions shall be apportioned on a basis of comparison of the amount of gross sales or receipts or another method if it is established that such method similarly reflects the required factual relationship. Thus, for example, a comparison of units sold may be used only where the units are of the same or similar value and are, thus, in fact comparable.

(iv) The rules for allocation and apportionment of marketing and distribution expenses may be illustrated by the following examples:

Example 1. Assume that possessions corporation A manufacturers prescription pharmaceutical product #1 for resale by P, its U.S. parent corporation, in the United States. Additionally, assume that P manufactures prescription pharmaceutical products #2 and #3 in the United States for sale there. Further, assume that all three products are within the same product area, and that marketing and distribution expenses are internally divided by P among the three products on the basis of time spent by sales persons of P on marketing of the three products, as follows:

Product #1	50X
Product #2	80X
Product #3	110X
Total	240X

These expenses of 240X are allocated to gross income generated by all three products and shall be apportioned on the basis of gross sales or receipts of product #1 as compared to products #2 and #3 or another method which similarly reflects the factual relationship between these expenses and gross income derived from product #1 and products #2 and #3. Thus, if a sales method were used and sales of product #1 accounted for one-third of sales receipts from the three products, 80X (240 ÷ 3) of marketing and distribution expenses would be apportioned to the combined gross income from product #1.

Example 2. Corporation B produces and sells Brand W whiskey, in the United States. B's subsidiary, S, which is a possessions corporation, produces soft drink extract in Puerto Rico which it sells to independent bottlers to produce Brand S soft drinks for sale in the United States. Corporation B's advertisements and other promotional materials for Brand W whiskey make no reference to Brand S soft drinks (or any other Corporation B products), and Brand S soft drink advertisements and other promotional materials make no reference to Brand W whiskey (or any other corporation B products). For purposes of section 936(h), the advertising and other promotional expenses for Brand W whiskey must be allocated entirely to the gross income from sales of Brand W whiskey and the advertising and other promotional expenses for Brand S soft drink must be allocated entirely to the gross income from the sales of soft drink extract, notwithstanding the fact that whiskey and soft drink extract are both included in SIC code 208. A similar result would apply, for example, to separately identifiable advertising and other marketing expenses which relate specifically and exclusively to one or the other of the following pairs of products: chewing gum and granulated sugar (SIC code 206); canned tuna fish and freeze-dried coffee (SIC code 209); children's underwear and ladies' brassieres (SIC code 234); aspirin tablets and prescription antibiotic tablets (SIC code 283); floor wax and perfume (SIC code 284); adhesives and inks (SIC code 289); semi-conductors and cathode-ray tubes (SIC code 367); batteries and extension cords (SIC code 369); bandages and dental supplies (SIC code 384); stainless steel flatware and jewelry parts (SIC code 391); children's toys and sporting goods (SIC code 394); hair curlers and zippers (SIC code 396); and paint brushes and linoleum tiles (SIC code 399).

Example 3. Assume the same facts as in Example 1 and that possessions corporation A also manufactures aspirin, a non-prescription product, for resale by its U.S. parent corporation, P. Further, assume that the advertising and separately identifiable marketing expenses which relate specifically and exclusively to aspirin sales total $100 and that these expenses are allocable solely to gross income derived from aspirin sales. The sales method continues to be used to apportion the marketing and distribution expenses related, directly or indirectly, to products #1, #2, and #3, and the apportionment of such expenses to product #1 for purposes of determining combined taxable income from product #1 will remain as stated in Example 1. None of the advertising and other separately identifiable marketing expenses which relate specifically and exclusively to aspirin will be taken into account in allocating and apportioning the marketing and distribution expenses relating to the gross income attributable to products #1, #2, and #3. Gross income attributable to aspirin will be considered as a separate class of gross income, and all the advertising and separately identifiable marketing expenses which relate specifically and exclusively to aspirin sales of $100 will be allocated to the class of gross income derived from aspirin sales. Similarly, none of the marketing and distribution expenses, directly or indirectly, related solely to the group of products #1, #2, and #3 will be taken into account in determining the combined taxable income from aspirin sales. the remaining marketing and distribution expenses which do not, directly or indirectly, relate solely to any specific product or group of products (*e.g.*, the salaries of a Vice-President of Marketing who has responsibility for marketing all products and his staff) shall be allocated and apportioned on the basis of the gross receipts from the sales of all of the products (or a similar method) in determining combined taxable income of any product.

Q. 2: How may the allocation and apportionment of expenses to combined gross income be verified?

A. 2: Substantiation of the allocation and apportionment of expenses will be required upon audit of the possessions corporation and affiliates. Detailed substantiation may be necessary, particularly where the entities are engaged in multiple lines of business involving distinct product areas. Sources of substantiation may include certified financial reports. Form 10–K's, annual reports, internal production reports, product line assembly work papers, and other relevant materials. In this regard, *see* § 1.861–8(f)(5).

Q. 3: Does section 936(h) override the moratorium provided by section 223 of the Economic Recovery Tax Act of 1981 and any subsequent similar moratorium?

A. 3: Yes. Thus, the allocation and apportionment of product area research described in question and answer 1 must be made without regard to the moratorium.

Q. 4: Is the cost of samples treated as a marketing expense?

A. 4: Yes. The cost of producing samples will be treated as a marketing expense and not as inventoriable costs for purposes of determining combined taxable income (and compliance with the significant business presence test). However, for taxable years beginning prior to January 1, 1986, the cost of producing samples may be treated as either a marketing expense or as inventoriable costs.

Q. 5: If a possessions corporation uses the profit split method to determine its taxable income from sales of a product, how does it determine its gross income for purposes of the 80-percent possession source test and the 65-percent active trade or business test of section 936(a)(2)?

A. 5: One-half of the deductions of the affiliated group (other than foreign affiliates) which are used in determining the combined taxable income from sales of the product are added to the portion of the combined taxable income allocated to the possessions corporation in order to determine the possessions corporation's gross income from sales of such product.

Q. 6: How will income from intangibles related to a possession product be treated under the profit split method?

A. 6: Combined taxable income of the possessions corporation and affiliates from the sale of the possession product will include income attributable to all intangibles, including both manufacturing and marketing intangibles, associated with the product.

Q. 7: Can a possessions corporation apply the profit split option to a possession product if no U.S. affiliates derive income from the sale of the possession product?

A. 7: Yes.

Q. 8: With respect to the factual situation discussed in question and answer 7 how is combined taxable income computed?

A. 8: The profit split option is applied to the taxable income of the possessions corporation from sales of the possession product to foreign affiliates and unrelated persons. Fifty percent of that income is allocated to the possessions corporation, and the remainder is allocated to the appropriate affiliates as described in question and answer 13 of this paragraph (b)(1).

Q. 9: May a possessions corporation compute its income under the profit split method with respect to units of a possession product which it sells to a U.S. affiliate if the U.S. affiliate leases such units to unrelated persons or to foreign affiliates or uses such units in its own trade or business?

A. 9: Yes, provided that an independent sales price for the possession product from comparable uncontrolled transactions can be determined in accordance with § 1.482–2 (e)(2). If, however, there is a comparable uncontrolled price for an integrated product and the possession product is a component product or end-product form thereof, the possessions corporation may compute its income under the profit split method with respect to such units. In either case, the possessions corporation shall compute combined taxable income with respect to such units under the following question and answer.

Q. 10: If the possessions corporation is entitled to use the profit split method in the situation described in *Q. 9* (leasing units of the possession product or use of such units in the taxpayer's own trade or business), how should it compute combined taxable income with respect to such units?

A. 10: (i) Combined taxable income shall be computed as if the U.S. affiliate had sold the units to an unrelated person (or to a foreign affiliate) at the time the units were first leased or otherwise placed in service by the U.S. affiliate. The sales price on such deemed sale shall be equal to the independent sales price from comparable uncontrolled transactions determined in accordance with §1.482–2(e)(2), if any.

(ii) If the possession product is a component product or an end-product form, the combined taxable income with respect to the possession product shall be determined under *Q&A. 12* of this paragraph (b)(1).

(iii) For purposes of determining the basis of a component product or an end-product form, the deemed sales price of such product must be determined. The deemed sales price of the component product shall be determined by multiplying the deemed sales price of the integrated product that includes the component product by a ratio, the numerator of which is the production costs of the component product and the denominator of which is the production costs of the integrated product that includes the component product. The deemed sales price of an end-product form shall be determined by multiplying the deemed sales price of the integrated product that includes the end-product form by a ratio, the numerator of which is the production costs of the end-product form and the denominator of which is the production costs of the integrated product that includes the end-product form. For the definition of production costs, see *Q&A. 12* of this paragraph (b)(1).

(iv)(A) If combined taxable income is determined under paragraph (v) of *A. 12* of this paragraph (b)(1), in the case of a component product, the deemed sales price shall be determined by using the actual sales price of that product when sold as an integrated product (as adjusted under the rules of the fourth sentence of §1.482–3(b)(2)(ii)(A)).

(B) If combined taxable income is determined under paragraph (v) of *A. 12* of this paragraph (b)(1), in the case of an end-product form, the deemed sales price shall be determined by subtracting from the deemed sales price of the integrated product that includes the end-product form (e.g., the leased property) the actual sales price of the excluded component when sold as an integrated product to an unrelated person (as adjusted under the rules of the fourth sentence of §1.482–3(b)(2)(ii)(A)).

(v) The full amount of income received under the lease shall be treated as income of (and be taxed to) the U.S. affiliate and not the possessions corporation.

Q. 11: In the situation described in question 9, how does the U.S. affiliate determine its basis in such units for purposes of computing depreciation and similar items?

A. 11: The U.S. affiliate shall be treated, for purposes of computing its basis in such units, as if it had repurchased such units immediately following the deemed sale and at the deemed sales price as provided in *Q&A. 10* of this paragraph (b)(1).

The principles of questions and answers 10 and 11 are illustrated by the following example:

Example: Possessions corporation S manufactures 100 units of possession product X. S sells 50 units of X to an unrelated person in an arm's length transaction for $10 per unit. S sells the remaining 50 units to its U.S. affiliate, A, which leases such units to unrelated persons. The combined taxable income for the 100 units of X is computed below on the basis of the given production, sales, and cost data:

Sales:	
1. Total sales by S to unrelated persons (50 x $10)	$500
2. Total deemed sales by A to unrelated persons (50 x $10)	500
3. Total gross receipts (line 1 plus line 2)	1,000
Total costs:	
4. Material costs	200
5. Production costs	300

6. Research expenses	0
7. Other expenses	100
8. Total (add lines 4 through 7)	600
Combined taxable income attributable to the 100 units of X:	
9. Combined taxable income (line 3 minus line 8)	400
10. Share of combined taxable income apportioned to S (50% of line 9)	200
11. Share of combined taxable income apportioned to A (line 9 minus line 10)	200
A's basis in 50 units of X leased by it to unrelated persons:	
12. 50 units times $10 deemed repurchase price	500

Subsequent leasing income is entirely taxed to A.

Q. 12: If the possession product is a component product or an end-product form, how is the combined taxable income for such product to be determined?

A. 12: (i) Except as provided in paragraph (v) of this *A. 12,* combined taxable income for a component product or an end-product form is computed under the production cost ratio (PCR) method.

(ii) Under the PCR method, the combined taxable income for a component product will be the same proportion of the combined taxable income for the integrated product that includes the component product that the production costs attributable to the component product bear to the total production costs (including costs incurred by the U.S. affiliates) for the integrated product that includes the component product. Production costs will be the sum of the direct and indirect production costs as defined under § 1.936–5(b)(4) except that the costs will not include any costs of materials. If the possession product is a component product that is transformed into an integrated product in whole or in part by a contract manufacturer outside of the possession, within the meaning of § 1.936–5(c), the denominator of the PCR shall be computed by including the same amount paid to the contract manufacturer, less the costs of materials of the contract manufacturer, as is taken into account for purposes of the significant business presence test under § 1.936–5(c) *Q&A. 5.*

(iii) Under the PCR method the combined taxable income for an end-product form will be the same proportion of the combined taxable income for the integrated product that includes the end-product form that the production costs attributable to the end-product form bear to the total production costs (including costs incurred by the U.S. affiliates) for the integrated product that includes the end-product form. Production costs will be the sum of the direct and indirect production costs as defined under § 1.936–5(b)(4) except that the costs will not include any costs of materials. If the possession product is an end-product form and an excluded component is contract manufactured outside of the possession, within the meaning of § 1.936–5(c), the denominator shall be computed by including the same amount paid to the contract manufacturer, less cost of materials of the contract manufacturer, as is also taken into account for purposes of the significant business presence test under § 1.936–5(c) *Q&A. 5.*

(iv) This paragraph (iv) of *A. 12* illustrates the computation of combined taxable income for a component product or end-product form under the PCR method. S, a possessions corporation, is engaged in the manufacture of microprocessors. S obtains a component from a U.S. affiliate, O. S sells its production to another U.S. affiliate, P, which incorporates the microprocessors into central processing units (CPUs). P transfers the CPUs to a U.S. affiliate, Q, which incorporates the CPUs into computers for sale to unrelated persons. S chooses to define the possession product as the CPUs. The combined taxable income for the sale of the possession product on the basis of the given production, sales, and cost data is computed as follows:

Production costs (excluding costs of materials):	
1. O's costs for the component	100
2. S's costs for the microprocessors	500
3. P's costs for the CPUs (the possession product)	200
4. Q's costs for the computers	400
5. Total production costs for the computer (Add lines 1 through 4)	1,200

6. Combined production costs for the CPU (the possession product) (Add lines 1 through 3)	800
7. Ratio of production costs for the CPUs (the possession product) to the production costs for the computer	0.667
Determination of combined taxable income for computers:	
Sales:	
8. Total possession sales of computers to unrelated customers and foreign affiliates	7,500
Total costs of O, S, P, and Q incurred in production of a computer:	
9. Production costs (enter from line 5)	1,200
10. Material costs	100
11. Total costs (line 9 plus line 10)	1,300
12. Combined gross income from sale of computers (line 8 minus line 11)	6,200
Expenses of the affiliated group (other than foreign affiliates) allocable and apportionable to the computers or any component thereof under the rules of §§1.861–8 through 1.861–14T and 1.936–6 (b)(1), Q&A. 1:	
13. Expenses (other than research expenses)	980
Research expenses of the affiliated group allocable and apportionable to the computers:	
14. Total sales in the 3-digit SIC Code	12,500
15. Possession sales of the computers (enter from line 8)	7,500
16. Cost sharing fraction (divide line 15 by line 14)	0.6
17. Research expenses incurred by the affiliated group in 3-digit SIC Code multiplied by 120 percent	700
18. Cost sharing amount (multiply line 16 by line 17)	420
19. Research of the affiliated group (other than foreign affiliates) allocable and apportionable under §§1.861–17 and 1.861–14T(e)(2) to the computers	300
20. Enter the greater of line 18 or line 19	420
Computation of combined taxable income of the computer and the CPU:	
21. Combined taxable income attributable to the computer (line 12 minus line 13 and line 20)	4,800
22. Combined taxable income attributable to CPUs (multiply line 21 by line 7) (production cost ratio)	3,200
23. Share of combined taxable income apportioned to S (50 percent of line 22) ..	1,600
Share of combined taxable income apportioned to U.S. affiliate(s) of S:	
24. Adjustments for research expenses (line 18 minus line 19 multiplied by line 7)	80
25. Adjusted combined taxable income (line 22 plus line 24)	3,280
26. Share of combined taxable income apportioned to affiliates of S (line 25 minus line 23)	1,680

(v)(A) If a possession product is sold by a taxpayer or its affiliate to unrelated persons in covered sales both as an integrated product and as a component product and the conditions of paragraph (v)(C) of this *A. 12* are satisfied, the taxpayer may elect to determine the combined taxable income derived from covered sales of the component product under this paragraph (v). In that case, the combined taxable income derived from covered sales of the component product shall be determined by using the same per unit combined taxable income as is derived from covered sales of the product as an integrated product, but subject to the limitation of paragraph (v)(D) of this *A. 12*.

(B) In the case of a possession product that is an end-product form, if all of the excluded components are also separately sold by the taxpayer or its affiliate to unrelated persons in uncontrolled transactions and the conditions of paragraph (v)(C) of this *A. 12* are satisfied, the taxpayer may elect to determine the combined taxable income of such end-product form under this paragraph (v). In that case, the combined taxable income derived from covered sales of the end-product form shall be determined by reducing the per unit combined taxable income from the integrated product that includes the end-product form by the per unit combined taxable income for excluded components determined under the rules of this paragraph (v), but subject to the limitation of paragraph (v)(D) of this

A. 12. For this purpose, combined taxable income of the excluded components must be determined under section 936 as if the excluded components were possession products.

(C) In the case of component products, this paragraph (v) applies only if the sales price of the possession product sold in covered sales as an integrated product (i.e., in uncontrolled transactions) would be the most direct and reliable measure of an arm's length price within the meaning of the fourth sentence of § 1.482–3(b)(2)(ii)(A) for the component product. For purposes of applying the fourth sentence of § 1.482–3(b)(2)(ii)(A), the sale of the integrated product that includes the component product is treated as being immediately preceded by a sale of the component (i.e. without further processing) in a controlled transaction. In the case of end-product forms, this paragraph (v) applies only if the sales price of excluded components separately sold in uncontrolled transactions would be the most direct and reliable measure of an arm's length price within the meaning of the fourth sentence of § 1.482–3(b)(2)(ii)(A) for all excluded components of an integrated product that includes an end-product form. For purposes of applying the fourth sentence of § 1.482–3(b)(2)(ii)(A), the sale of the integrated product that includes excluded components is treated as being immediately preceded by a sale of the excluded components (i.e. without further processing) in a controlled transaction. Under the fourth sentence of § 1.482–3(b)(2)(ii)(A), the uncontrolled transactions referred to in this paragraph (v)(C) must have no differences with the controlled transactions that would affect price, or have only minor differences that have a definite and reasonably ascertainable effect on price and for which appropriate adjustments are made (resulting in appropriate adjustments to the computation of combined taxable income). If such adjustments cannot be made, or if there are more than minor differences between the controlled and uncontrolled transactions, the method provided by this paragraph (v)(C) cannot be used. Thus, for example, these uncontrolled transactions must involve substantially identical property in the same or a substantially identical geographic market, and must be substantially identical to the controlled transaction in terms of their volumes, contractual terms, and market level. See § 1.482–3(b)(2)(ii)(B).

(D) In no case can the per unit combined taxable income as determined under paragraph (v)(A) or (B) of this *A. 12* be greater than the per unit combined taxable income of the integrated product that includes the component product or end-product form.

(E) The provisions of this paragraph (v) are illustrated by the following example. Taxpayer manufactures product A in a U.S. possession. Some portion of product A is sold to unrelated persons as an integrated product and the remainder is sold to related persons for transformation into product AB. The combined taxable income of integrated product A is $400 per unit and the combined taxable income of product AB is $300 per unit. The production cost ratio with respect to product A when sold as a component of product AB, is 2/3. Unless the taxpayer elects and satisfies the conditions of this paragraph (v), the combined taxable income with respect to A will be $200 per unit (combined taxable income for AB of $300 × the production cost ratio of 2/3). If, however, the comparability standards of paragraph (v)(C) of this *A. 12* are met, the taxpayer may elect to determine combined taxable income of product A when sold as a component of product AB using the same per unit combined taxable income as product A when sold as an integrated product. However, the per unit combined taxable income from sales of product A as a component product may not exceed the per unit combined taxable income on the sale of product AB. Therefore, the combined taxable income of component product A may not exceed $300 per unit.

(vi) Taxpayers that have not elected the percentage limitation under section 936(a)(1) for the first taxable year beginning after December 31, 1993, may do so if the taxpayer has elected the profit split method and computation of combined taxable income is affected by *Q&A.12* of this paragraph (b)(1).

(vii) The rules of *Q&A. 12* of this paragraph (b)(1) apply for taxable years ending after June 9, 1996. If, however, the election under paragraph (v) of *A. 12* of §1.936–6(b)(1) is made, this election must be made for the taxpayer's first taxable year beginning after December 31, 1993, and if not made effective for that year, the election cannot be made for any later taxable year. A successor corporation that makes the same or substantially similar products as its predecessor corporation cannot make an election under paragraph (v) of A.12 of §1.936–6(b)(1) unless the election was made by its predecessor corporation for its first taxable year beginning after December 31, 1993.

Q. 13: If the profit split option is elected, how is the portion of combined taxable income not allocated to the possessions corporation to be treated?

A. 13: (i) The income shall be allocated to affiliates in the following order, but no allocations will be made to affiliates described in a later category if there are any affiliates in a prior category—

(A) First, to U.S. affiliates (other than tax exempt affiliates) within the group (as determined under section 482) that derive income with respect to the product produced in whole or in part in the possession;

(B) Second, to U.S. affiliates (other than tax exempt affiliates) that derive income from the active conduct of a trade or business in the same product area as the possession product;

(C) Third, to other U.S. affiliates (other than tax-exempt affiliates);

(D) Fourth, to foreign affiliates that derive income from the active conduct of a U.S. trade or business in the same product area as the possession product (or, if the foreign members are resident in a country with which the U.S. has an income tax convention, then to those foreign members that have a permanent establishment in the United States that derives income in the same product area as the possession product); and

(E) Fifth, to all other affiliates.

(ii) The allocations made under paragraph (i)(A) of this *A. 13* shall be made on the basis of the relative gross income derived by each such affiliate with respect to the product produced in whole or in part in the possession. For this purpose, gross income must be determined consistently for each affiliate and consistently from year to year.

(iii) The allocations made under paragraphs (i)(B) and (i)(D) of this *A. 13* shall be made on the basis of the relative gross income derived by each such affiliate from the active conduct of the trade or business in the same product area.

(iv) The allocations made under paragraphs (i)(C) and (i)(E) of this *A. 13* shall be made on the basis of the relative total gross income of each such affiliate before allocating income under this section.

(v) Income allocated to affiliates shall be treated as U.S. source and section 863(b) does not apply for this purpose.

(vi) For purposes of determining an affiliate's estimated tax liability for income thus allocated for taxable years beginning prior to January 1, 1995, the income shall be deemed to be received on the last day of the taxable year of each such affiliate in which or with which the taxable year of the possessions corporation ends. For taxable years beginning after December 31, 1994, quarterly estimated tax payments will be required as provided under section 711 of the Uruguay Round Agreements, Public Law 103–465 (1994), page 230, and any administrative guidance issued by the Internal Revenue Service thereunder.

Q. 14: What is the source of the portion of combined taxable income allocated to the possessions corporation?

A. 14: Income allocated to the possessions corporation shall be treated as possession source income and as derived from the active conduct of a trade or business within the possession.

Q. 15: How is the profit split option to be applied to properly account for costs incurred in a year with respect to products which are sold by the possessions corporation to a U.S. affiliate during such year, but are not resold by the U.S. affiliate to persons who are not members of the affiliated group or to foreign affiliates until a later year?

A. 15: The rules under §1.994–1(c)(5) are to be applied. Incomplete transactions will not be taken into consideration in computing combined taxable income. Thus, for example, if in 1983, A, a possessions corporation, sells units of a product with a cost to A of $5000 to B corporation, its U.S. affiliate, which use the dollar-value LIFO method of costing inventory, and B sells units with a cost of $4000 (representing A's cost) to C corporation, a foreign affiliate, only $4000 of such costs shall be taken into consideration in computing the combined taxable income of the possessions corporation and U.S. affiliates for 1983. If a specific goods LIFO inventory method is used by B, the determination of whether A's goods remain in B's inventory shall be based on whether B's specific goods LIFO grouping has experienced an increment or decrement for the year on the specific LIFO cost of such units, rather than on an average unit cost of such units. If the FIFO method of costing inventory is used by B, transfers may be based on the cost of the specific units transferred or on the average unit production cost of the units transferred, but in each case a FIFO flow assumption shall be used to identify the units transferred. For a determination of which goods are sold by taxpayers using the LIFO method, see question and answer 19.

Q. 16: If a possessions corporation purchases materials from an affiliate and computes combined taxable income for a possession product which includes such materials, how are those materials to be treated in the possessions corporation's inventory?

A. 16: The cost of those materials is considered to be equal to the affiliate's cost using the affiliate's method of costing inventory.

Q. 17: If the possessions corporation uses the FIFO method of costing inventory and the U.S. affiliate uses the LIFO method of costing inventory, or *vice versa*, what method of costing inventory should be used in computing combined taxable income?

A. 17: The transferor corporation's method of costing inventory determines the cost of inventory for purposes of combined taxable income while the transferee corporation's method of costing inventory determines the flow. Assume, for example, that X corporation, a possessions corporation, using the FIFO method of costing inventory purchases materials from Y corporation, U.S. affiliate, also using the FIFO method. X corporation produces a product which it transfers to Z corporation, another U.S. affiliate using the LIFO method. Assume also that the final product satisfies the significant business presence test. Under the facts, the cost of the materials purchased by X from Y is Y's FIFO cost. The costs of the inventory transferred by X to Z are determined under X's FIFO method of accounting as is the flow of the inventory from X to Z. The costs added by Z are determined under Z's LIFO method of inventory, as is the flow of the inventory from Z to unrelated persons or foreign affiliates.

Q. 18: How are the costs of a possession product and the revenues derived from the sale of a possession product determined if the U.S. affiliate includes purchases of the possessions product in a dollar-value LIFO inventory pool (as provided under § 1.472–8)?

A. 18: The following method will be accepted in determining the revenues derived from the sale of a possession product and the costs of a possession product if the U.S. affiliate includes purchases of the possession product in a dollar-value LIFO inventory pool. The rules apply solely for the cost sharing and profit split options under section 936(h).

(i) *Revenue identification.* The identification of revenues derived from sales of a possession product must generally be made on a specific identification basis. The particular method employed by a taxpayer for valuing its inventory will have no impact on the determination of what units are sold or how much revenue is derived from such sales. Thus, if a U.S. affiliate sells both item A (a possession product) and item B (a non-possession product), the actual sales revenues received by the U.S. affiliate from item A sales would constitute possession product revenue for purposes of the profit split option and possession sales for purposes of the cost sharing option regardless of whether the U.S. affiliate values its inventories on the FIFO or the LIFO method. In instances where sales of item A (*i.e.*, the possession product) cannot be determined by use of specific identification (for example, in cases where items A and B are identical except that one is produced in the possession (item A) and the other (item B) is produced outside of the possession and it is not possible to segregate these items in the hands of the U.S. affiliate), it will be necessary to identify the portion of the combined sales of items A and B (which together can be identified on a specific identification basis) which is attributed to item A sales and the portion which is attributed to item B sales. The determination of the portion of aggregated sales attributable to item A and item B is independent of the LIFO method used to determine the cost of such sales and may be made under the following approach. A taxpayer may, for purposes of this section of the regulations, use the relative purchases (in units) of items A and B by the U.S. affiliate during the taxable year (or other appropriate measuring period such as the period during the taxable year used to determine current-year costs, *i.e.*, earliest acquisitions period, latest acquisitions period, etc.) in determining the ratio to apply against the combined items A and B sales revenue. If the sales exceed current purchases, the taxpayer can use a FIFO unit approach which identifies actual unit sales on a first-in, first-out basis. Revenue determination where specific identification is not possible is illustrated by the following example:

Example. At the end of year 1, there are 600 units of combined items A and B which are to be allocated between A and B on the basis of annual purchases of A and B units during year 1. During year 1, 1,000 units of item A, a possession product, and 2,000 units of item B, a non-possession product, were purchased. Thus, the 600 units in year 1 ending inventory are allocated 200 (i.e. ⅓) to item A units and 400 (i.e. ⅔) to item B units based on the relative purchases of A (1,000) and B (2,000) in year 1. These units appear as beginning inventory in year 2.

In year 2, 1,500 units of item A are purchased and 1,500 units of item B are purchased. However, 3,300 units of items A and B in the aggregate are sold for $600,000. The relative proportion of the $600,000 attributable to item A and to item B sales would be determined as follows:

Year 2 sales	Item A	Item B
Unit sales from opening inventory ..	200	400
Unit sale from current-year purchases	1,350	1,350
Total unit sales (3,300)	1,550	1,750
Percentage	47	53

$$\text{Revenues from Item A sales} \ldots\ldots\ldots\ldots\ldots\ldots\ 281{,}818 \left\{ \$600{,}000 \times \frac{1550}{3300} \right\}$$

$$\text{Revenues from Item B sales} \ldots\ldots\ldots\ldots\ldots\ldots\ \$318{,}182 \left\{ \$600{,}000 \times \frac{1750}{3300} \right\}$$

Year 2 Closing Inventory	Units
Item A	150
Item B	150

Thus, revenues from Item A sales for purposes of computing possession sales for the cost sharing option and revenues for the profit split option are $281,818.

(ii) *Cost identification.* The determination of the cost of possession product sales by the U.S. affiliate must be based on the LIFO inventory method of the U.S. affiliate. The LIFO cost of possession product sales will, for purposes of this section of the regulations, be determined by maintaining a separate LIFO cost for possession products in a taxpayer's opening and closing LIFO inventory and using this cost to calculate an independent cost of possession product sales. This separate LIFO cost for possession products in the LIFO pool of a taxpayer is to be determined as follows:

(A) Determine the base-year cost of possession products in ending inventory in a LIFO pool.

(B) Determine the percentage of the base-year cost of possession products in the pool as compared to the total base-year cost of all items in the pool.

(C) Multiply the percentage determined in step (B) of this subdivision (ii) by the ending LIFO inventory value of the pool to determine the deemed LIFO cost attributable to possession products in the pool.

(D) Subtract the LIFO cost of possession products in ending inventory in the pool (as calculated in step (C) of this subdivision (ii)) from the sum of:

(*1*) Possession product purchases for the year, plus

(*2*) The portion of the opening LIFO inventory value of the pool attributed to possession products (*i.e.*, the result obtained in step (C) of this subdivision (ii) for the prior year).

The number determined by this calculation is the LIFO cost of possession product sales from the taxpayer's LIFO pool.

Example: Assume that item A is a possession product and item B is a non-possession product and also assume the inventory and purchases with respect to the LIFO pool as provided below:

YEAR 1—ENDING INVENTORY

	No. of units	Base-year cost/unit	Base-year cost	Percent
Item A	100	$2.00	$200	20
Item B	200	4.00	800	80

YEAR 1—LIFO VALUE

	Base-year cost	Index	LIFO cost
Increment layer 2	$300	3.0	$900
Increment layer 1	400	2.0	800
Base layer	300	1.0	300
Pool total	$1,000		$2,000

YEAR 1—LIFO VALUE PER ITEM

	Base-year cost	LIFO value
Total pool	$1,000	$2,000
Item A	200	400
Item B	800	1,600

YEAR 2—PURCHASES

	Total purchases
Item A	$6,000
Item B	4,000

YEAR 2—ENDING INVENTORY

	No. of units	Base-year cost/unit	Base-year cost	Percent
Item A	200	$2.00	$400	50
Item B	100	4.00	400	50

YEAR 2—LIFO VALUE

	Base-year cost	Index	LIFO cost
Increment layer 2	$100	3.0	$300
Increment layer 1	400	2.0	800
Base layer	$300	1.0	300
Pool total	800		1,400

The year 2 LIFO cost of possession product A sales will be calculated as follows:

(1) Base-year cost of item in year 2 ending inventory=$400

(2) Percentage of item A base-year cost to total base-year cost ($400 ÷ $800) = 50%

(3) LIFO value of item A ($1,400 × 50%) = $700

(4) LIFO cost of item A sales is determined by adding to the beginning inventory in year 2 the purchases of item A in year 2 and subtracting from this amount the ending inventory in year 2 ($400 + $6000 − $700 = $5700). The beginning inventory in year 2 is determined by multiplying the LIFO cost of the year 1 ending inventory by a percentage of item A base year cost to the total base-year cost in year 1. The ending inventory in year 2 is determined under (3) above.

Q. 19: If a possession product is purchased from a possessions corporation by a U.S. affiliate using the dollar-value LIFO method of costing its inventory and is included in a LIFO pool of the U.S. affiliate which includes products purchased from the possessions corporation in pre-TEFRA years, how should the LIFO index computation of the U.S. affiliate be made in the first year in which section 936(h) applies and in subsequent taxable years?

A. 19: The U.S. affiliate should treat the first taxable year for which section 936(h) applies as a new base year in accordance with procedures provided by regulations under section 472. Thus, the opening inventory for the first year for which section 936(h) applies (valuing possession products purchased from the possessions corporation on the basis of the cost of such possession products), would equal the new base year cost of the inventory of such pool of the U.S. affiliate. Increments and decrements at new base year cost would be valued for LIFO purposes pursuant to the procedures provided by regulations under section 472.

Q. 20: If the possessions corporation computes its income with respect to a product under the profit split method, with respect to which units of the product shall the profit split method apply?

A. 20: The profit split method shall apply to units of the possession product produced in whole or in part by the possessions corporation in the possession and sold during the taxable year by members of the affiliated group (other than foreign affiliates) to unrelated parties or to foreign affiliates. In no event shall the profit split method apply to units of the product which were not taken into account by the possessions corporation in applying the significant business presence test for the current taxable year or for any prior taxable year in which the possessions corporation also had a significant business presence in the possession with respect to such product.

(2) *Pre-TEFRA inventory.*

Q. 1: How is pre-TEFRA inventory to be determined if the profit split option is elected and the FIFO method of costing inventory is used by the U.S. affiliate?

A. 1: Pre-TEFRA inventory is inventory which was produced by the possessions corporation and transferred to a U.S. affiliate prior to the possessions corporation's first taxable year beginning after December 31, 1982. Pre-TEFRA inventory will not be included for purposes of the profit split option. If the U.S. affiliate uses the FIFO method of costing inventory, the pre-TEFRA inventory will be treated as the first inventory sold by the U.S. affiliate during the first year in which section 936(h) applies and will not be included in the computation of combined taxable income for purposes of the profit split option. The treatment of pre-TEFRA inventory when FIFO costing is used by both the U.S. affiliate and the possessions corporation is illustrated by the following example in which FIFO unit costing is used:

Example. Assume the following:

	X		Y	
	Possessions corporation		U.S. affiliate	
	Number of units	Cost per unit	Number of units	Cost per unit
Beginning inventory ...	500	$150	200	$225
Units produced during 1983	1,000	200	....	....
Ending inventory	400	200	300	....

In 1983, the beginning inventory of X, a possessions corporation, is 500 units with a unit cost of $150 and the beginning inventory of Y, the U.S. affiliate, is 200 units with a unit cost of $225, which represents the section 482 price paid by Y. Y's beginning inventory in 1983 represents purchases made in 1982 of products produced by X in that year. Y sells all the units it purchases from X to Z, a foreign affiliate. In 1983, X produces 1000 units at a unit cost of $200 and sells 1100 units to Y (the difference between 1500 units, representing X's 1983 beginning inventory (500) and the units produced by X in 1983 (1000), and X's ending inventory of 400 units). Of the 1100 units sold by X to Y in 1983 only 800 units (and not 1000 units) which were sold by Y to Z are taken into consideration in computing combined taxable income for 1983. Since FIFO costing by the possessions corporation is used, the cost is $150 per unit for the first 500 units and $200 per unit for the remaining 300 units. The 200 units sold by X to Y in 1982 are pre-TEFRA inventory and are not included in the computation of combined taxable income for 1983. They are also treated as the first units sold by Y to Z in 1983. This inventory has a unit cost of $225, which reflects the section 482 transfer price from X to Y in 1982. Y's 1983 ending inventory of 300 units will not be taken into consideration in computing the combined taxable income of X and Y for 1983 because the units have not been sold to a foreign affiliate or to persons who are not members of the affiliated group. In a subsequent year when the units are sold to Z, the cost to X and selling price to Z of these units will enter into the computation of combined taxable income for that year.

(c) *Covered Intangibles.*

Q. 1: What are ‘‘covered intangibles’’ under section 936(h)(5)(C)(i)(II)?

A. 1: The term ‘‘covered intangibles’’ means (1) intangible property developed in a possession solely by the possessions corporation and owned by it, (2) manufacturing intangible property (described in section 936(h)(3)(B)(i)) which is acquired by the possessions corporation from unrelated persons, and (3) any other intangible property (described in section 936(h)(3)(B) (ii) through (v), to the extent not described in section 936(h)(3)(B)(i)) which relates to sales of products or services to unrelated persons for ultimate consumption or use in the possession in which the possessions corporation conducts its business. The possessions corporation is treated as the owner of covered intangibles for purposes of obtaining a return thereon.

Q. 2: Do covered intangibles include manufacturing intangible property which is acquired by an affiliate and subsequently transferred to the possessions corporation?

A. 2: No. In order for a manufacturing intangible to be treated as a covered intangible, the intangible property must be acquired directly by the possessions corporation from an unrelated person unless the manufacturing intangible was acquired by an affiliate from an unrelated person and was transferred to the possessions corporation by the affiliate prior to September 3, 1982.

Q. 3: If a possessions corporation licenses a manufacturing intangible from an unrelated party, will the licensed intangible be treated as a covered intangible?

A. 3: No.

Q. 4: How is ultimate consumption or use determined for purposes of the definition of covered intangibles?

A. 4: A product will be treated as having its ultimate use or consumption in a possession if it is sold by the possessions corporation to a related or unrelated person in a possession and is not resold or used or consumed outside of the possession within one year after the date of the sale.

Q. 5: Are sales of products that relate to covered intangibles excluded from the cost sharing fraction?

A. 5: If no manufacturing intangibles other than covered intangibles are associated with the possession product, then sales of such product will be excluded from the cost sharing fraction. If both covered and non-covered manufacturing intangibles are associated with the possession product, then sales of such product will be included in the cost sharing fraction.

Q. 6: If the cost sharing option is elected, is it necessary for the possessions corporation to be the legal owner of covered intangibles described in section 936(h)(5)(C)(i)(II)(*c*) related to the product in order for the possessions corporation to receive a full return with respect to such intangibles?

A. 6: No. For purposes of section 936(h), it is immaterial whether such covered intangibles are owned by the possessions corporation or by another member of the affiliated group. Moreover, if the legal owner of such covered intangibles which are subject to section 936(h)(5) is an affiliate of the possessions corporation, such person will not be required to charge an arm's-length royalty under section 482 to the possessions corporation.

[T.D. 8090, 51 FR 21532, June 13, 1986; 51 FR 27174, July 30, 1986, as amended by T.D. 8669, 61 FR 21367, May 10, 1996; 61 FR 39072, July 26, 1996; T.D. 8786, 63 FR 55025, Oct. 14, 1998]

§ 1.936–7 Manner of making election under section 936 (h)(5); special election for export sales; revocation of election under section 936(a).

The rules in this section apply for purposes of section 936(h) and also for purposes of section 934(e), where applicable.

(a) *Manner of making election.*

Q. 1: How does a possessions corporation make an election to use the cost sharing method or profit split method?

A. 1: A possessions corporation makes an election to use the cost sharing or profit split method by filing Form 5712–A and attaching it to its tax return. Form 5712–A must be filed on or before the due date (including extensions) of the tax return of the possessions corporation for its first taxable year beginning after December 31, 1982. The electing corporation must set forth on the form the name and the taxpayer identification number or address of all members of the affiliated group (including foreign affiliates not required to file a U.S. tax return). All members of the affiliated group must consent to the election. An authorized officer of the electing corporation must sign the statement of election and must declare that he has received a signed statement of consent from an authorized officer, director, or other appropriate official of each member of the affiliated group. The election is not valid unless all affiliates consent. However, a failure to obtain an affiliate's written consent will not invalidate the election out if the possessions corporation made a good faith effort to obtain all the necessary consents or the failure to obtain the missing consent was inadvertent. Subsequently created or acquired affiliates are bound by the election. If an election out is revoked under section 936(h)(5)(F)(iii), a new election out with respect to that product area cannot be made without the consent of the Commissioner. The possessions corporation shall file an amended Form 5712–A with its timely filed income tax return to reflect any changes in the names or number of the members of the affiliated group for any taxable year after the first taxable year to which the election out applies. By consenting to the election out, all affiliates agree to provide information necessary to compute the cost sharing payment under the cost sharing method or combined taxable income under the profit split method, and failure to provide such information shall be treated as a request to revoke the election out under section 936(h)(5)(F)(iii).

Q. 2: May the ‘‘election out’’ under section 936(h)(5) be made on a product-by-product basis, or must it be made on a wide basis?

A. 2: An electing corporation is required to treat products in the same product area in the same manner. Similarly, all possessions corporations in the same affiliated group that produce any products or render any services in the same product area must make the same election for all products that fall within the same product area. However, §1.936–7(b) provides that the electing corporation may make a different election for export sales than for domestic sales. The electing corporation or corporations may also make different elections for products that fall within different product areas.

Q. 3: May the possessions corporation elect to define product area more narrowly than the 3-digit SIC code?

A. 3: No. Certain alternatives, such as the 4-digit SIC code, would not be permitted under the statute. However, other methods for defining product area may be considered by the Commissioner in the future.

Q. 4: May a possessions corporation make an election out under the cost sharing method with respect to a product area if the affiliated group incurs no research, development or experimental costs in the product area?

A. 4: Yes. In that case the cost sharing payment will be zero.

Q. 5: If the significant business presence test is not satisfied for a product or type of service within the product area covered by the election out under section 936(h)(5) what rules will apply with respect to that product?

A. 5: With respect to the product which does not satisfy the significant business presence test, the provisions of section 936 (h)(1) through (h)(4) will apply to the allocation of income. However, if a cost sharing or a profit split election has been made with respect to the product area, the cost sharing payment or the research and development floor under section 936(h)(5)(C)(ii)(II) will not be reduced.

Q. 6: Is a taxpayer permitted to make a change of election with respect to the cost sharing and profit split methods?

A. 6: In general, once the election is properly made, it is binding for the first year in which it applies and all subsequent years (including upon any later created or acquired affiliates), and revocation is only permitted with the consent of the Commissioner of Internal Revenue. However, a taxpayer will be permitted to change its election once from the cost sharing method to the profit split method or *vice versa,* or from the method permitted under section 936 (h)(1) through (h)(4) to cost sharing or profit split or *vice versa,* without the consent of the Commissioner if the change is made on the taxpayer’s return for its first taxable year ending after June 13, 1986. Such change will apply to such taxable year and all subsequent taxable years, and, at the taxpayer’s option, may also apply to all prior taxable years for which section 936(h) was in effect. A change of election will be treated as an election subject to the procedures set forth above and to section 481 of the Internal Revenue Code.

Q. 7: If the Commissioner determines that a possessions corporation does not meet the 80-percent possession source test or the 65-percent active trade or business test (the ‘‘qualification tests’’) for any taxable year beginning after 1982, under what circumstances is the possessions corporation permitted to make a distribution of property after the close of its taxable year to meet the qualification tests?

A. 7: A possessions corporation may make a pro rata distribution of property to its shareholders after the close of the taxable year if the Commissioner determines that the possessions corporation does not satisfy the qualification tests (a) by reason of the exclusion from gross income of intangible income under section 936(h)(1)(B) or section 936(h)(5)(C)(i)(II) or (b) by reason of the allocation to the shareholders of the possessions corporation of income under section 936(h)(5)(C)(ii)(III); provided, however, that the determination of the Commissioner does not contain a finding that the failure of such corporation to satisfy the qualification tests was due, in whole or in part, to fraud with intent to evade tax or willful neglect on the part of the possessions corporation. The possessions corporation must designate the distribution at the time the distribution is made as a distribution to meet qualification requirements, and it will be subject to the provisions of section 936(h)(4). Such distributions will not qualify for the dividends received deduction.

Q. 8: If a possessions corporation owns stock in a subsidiary possessions corporation, any intangible property income allocated to the parent possessions corporation under section 936(h) will be treated as U.S. source income and taxable to the parent possessions corporation. Is the intangible property income taken into consideration in determining whether the parent possessions corporation meets the income tests of section 936(a)(2)?

A. 8: While taxable to the parent possessions corporation, the intangible property income does not enter into the calculation of the 80-percent possession source test or the 65-percent active trade or business test of section 936(a)(2)(A) and (B). This would also be the case if the subsidiary possessions corporation made a qualifying distribution under section 936(h)(4).

(b) *Separate election for export sales.*

Q. 1: What methods of computing income can a possessions corporation use under the separate election for export sales?

A. 1: The only two methods which are available under the separate election for export sales are the cost sharing method and the profit split method.

Q. 2: What is the definition of export sales for purposes of the separate election for export sales?

A. 2: The determination of export sales is based upon the destination of the product, *i.e.*, where it is to be used or consumed. If the product is sold to a U.S. affiliate, it will be treated as an export sale only if resold or otherwise transferred abroad to a foreign person (including a foreign affiliate or foreign branch of a U.S. affiliate) within one year from the date of sale to the U.S. affiliate for ultimate use or consumption outside the United States as provided under § 1.954–3(a)(3)(ii).

Q. 3: Assume that a possessions corporation sells a product to both foreign affiliates and foreign branches of U.S. affiliates. In addition, it sells the product to its U.S. parent for resale in the U.S. The possessions corporation makes a profit split election for domestic sales and a cost sharing election of export sales. Will the sales to foreign branches of U.S. affiliates be treated as exports subject to the cost sharing method or as domestic sales subject to the profit split method?

A. 3: The sales to a foreign branch of a U.S. corporation are exports if for ultimate use or consumption outside of the United States as provided under § 1.954–3(a)(3)(ii).

Q. 4: Under what circumstances may a possessions corporation make the separate election under section 936(h)(5)(F)(iv)(II) for computing its income from products exported to a foreign person when the income derived by such foreign person on the resale of such products is included in foreign base company income under section 954(a)?

A. 4: If the income derived by a foreign person on the resale of products manufactured, in whole or in part, by a possessions corporation is included in foreign base company income under section 954(a), then the possessions corporation may make the separate export election under section

936(h)(5)(F)(iv)(II) for computing its income from such products only if such foreign person has been formed or is availed of for substantial business reasons that are unrelated to an affiliated corporation's U.S. tax liability. For purposes of the proceding sentence, a foreign person will be considered to be formed or availed of for such substantial business reasons if the foreign person in the normal course of business purchases substantial quantities of products from both the possessions corporation and its affiliates for resale, and, in addition provides support services for affiliated companies such as centralized testing, marketing of products, management of local currency exposures, or other similar services. However, a foreign person that purchases and resells products only from a possessions corporation is presumed to be formed or availed of for other than such substantial business reasons, even if the foreign person provides additional services.

Q. 5: When will the ''manufacturing'' test set forth in subsection (d)(1)(A) of section 954 be applicable to the export sales of a product of a possessions corporation which makes a separate election for export sales?

A. 5: An electing corporation will be required to meet the ''manufacturing'' test set forth in subsection (d)(1)(A) of section 954 with respect to export sales of its product in each taxable year in which the separate election for export sales is in effect.

(c) *Revocation of election under section 936(a).*

Q. 1: When may an election under section 936(a) be revoked?

A. 1: An election under section 936(a) may be revoked during the first ten years of section 936 status only with the consent of the Commissioner, and without the Commissioner's consent after that time. The Commissioner hereby consents to all requests for revocation that are made with respect to the taxapayer's first taxable year beginning after December 31, 1982 provided that the section 936(a) election was in effect for the corporation's last taxable year beginning before January 1, 1983, if the taxpayer agrees not to re-elect section 936(a) prior to its first taxable year beginning after December 31, 1988. A taxpayer that wishes to revoke a section 936(a) election under the terms of the blanket revocation must attach a ''Statement of Revocation—Section 936'' to the taxpayer's timely filed return (including extensions) and must state that in revoking the election the taxpayer agrees not to re-elect section 936(a) prior to its first taxable year beginning after December 31, 1988. Other requests to revoke not covered by the Commissioner's blanket consent should be addressed to the District Director having jurisdiction over the taxpayer's tax return.

[T.D. 8090, 51 FR 21545, June 13, 1986]

§1.936–8T Qualified possession source investment income (temporary). [Reserved]

§1.936–9T Source of qualified possession source investment income (temporary). [Reserved]

§1.936–10 Qualified investments.

(a) *In general.* [Reserved]

(b) *Qualified investments in Puerto Rico.* [Reserved]

(c) *Qualified investment in certain Caribbean Basin countries*—(1) *General rule.* An investment of qualified funds described in this section shall be treated as a qualified investment of funds for use in Puerto Rico if the funds are used for a qualified investment in a qualified Caribbean Basin country. A qualified investment in a qualified Caribbean Basin country is a loan of qualified funds by a qualified financial institution (described in paragraph (c)(3) of this section) directly to a qualified recipient (described in paragraph (c)(9) of this section) or indirectly through a single financial intermediary for investment in active busines assets (as defined in paragraph (c)(4) of this section) in a qualified Caribbean Basin country (described in paragraph (c)(10)(ii) of this section) or for investment in development projects (as defined in paragraph (c)(5) of this section) in a qualified Caribbean Basin country, provided—

(i) The investment is authorized, prior to disbursement of the funds, by the Commissioner of Financial Institutions of Puerto Rico (or his delegate) pursuant to regulations issued by such Commissioner; and

(ii) The agreement, certification, and due diligency requirements under paragraphs (c)(11), (12), and (13) of this section are met.

A loan by a qualified financial institution shall not be disqualified merely because the loan transaction is processed by the central bank of issue of the country into which the loan is made pursuant to, and solely for purposes of complying with, the exchange control laws or regulations of such country. Further, a loan by a qualified financial institution shall not be disqualified merely because the loan is acquired by another person, provided such other person is also a qualified financial institution.

(2) *Termination of qualification*—(i) *In general.* An investment that, at any time after having met the requirements for a qualified investment in a qualified Caribbean Basin country under the terms of this paragraph (c), fails to meet any of the conditions enumerated in this paragraph (c) shall no longer be considered a qualified investment in a qualified Caribbean Basin country from the time of such failure, unless the investment satisfies the requirements for a timely cure described in paragraph (c)(2)(ii) of this section. Such a failure includes, but is not limited to, the occurrence of any of the following events:

(A) Active business assets cease to qualify as such;

(B) Proceeds from the investment are diverted for the financing of assets, projects, or operations that are not active business assets or development projects or are not the assests or the project of the qualified recipient;

(C) The holder of the qualified recipient's obligation is not a qualified financial institution;

(D) The qualified recipient's qualified business activity ceases to qualify as such; or

(E) The qualified Caribbean Basin country ceases to be a country described in paragraph (c)(10)(ii) of this section.

(ii) *Timely cure*—(A) *In general.* A timely cure shall be considered to have been made if the event or events that cause disqualification of the investment are corrected within a reasonable period of time. For purposes of this section, a reasonable period of time shall not exceed 60 days after such event or events come to the attention of the qualified recipient or the qualified financial institution or should have some to their attention by the exercise of reasonable diligence.

(B) *Due diligence requirements.* A time cure of a failure to comply with the due diligence requirements of paragraphs (c)(11), (12), and (13) of this section shall be considered to be made if the failure to comply is due to reasonable cause and, upon request of the Commissioner of Financial Institutions of Puerto Rico (or his delegate) or of the Assistant Commissioner (International) (or his authorized representative), the qualified financial institution (and its trustee or agent), if any), the financial intermediary, or the qualified recipient establishes to the satisfaction of the Commissioner of Financial Institutions of Puerto Rico (or his delegate) or of the Assistant Commissioner (International) (or his authorized representative) that it has exercised due diligence in ensuring that the funds were property disbursed to a qualified recipient and applied by or on behalf of such qualified recipient to uses that qualify the investment as an investment in qualified business assets or a development project under the provisions of this paragraph (c).

(iii) *Assumption of qualified recipient's obligation.* An investment shall not cease to qualify merely because the qualified recipient's obligation to the qualified financial institution (or to a financial intermediary, if any) is assumed by another person, provided such other person assumes the qualified recipient's agreement and certification requirements under paragraph (c)(11)(i) of this section and is either—

(A) A qualified recipient on the date of assumption, in which case such person shall be treated for purposes of this section as the original qualified recipient and shall be subject to all the requirements of this section for continued qualification of the loan as a qualified investment in a qualified Caribbean Basin country; or

(B) An international organization, the principal purpose of which is to foster economic development in developing countries and which is described in section 1 of the International Organizations Immunities Act (22 U.S.C. 288), if the assumption of the obligation is pursuant to a bona fide guarantee agreement.

(3) *Qualified financial institution*—(i) *General rule.* For purposes of section 936(d)(4)(A) and this section, a qualified financial institution includes only—

(A) A banking, financing, or similar business defined in § 1.864–4(c)(5)(i) that is an eligible institution described in paragraph (c)(3)(ii) of this section, but not including branches of such institution outside of Puerto Rico;

(B) A single-purpose entity described in paragraph (c)(3)(iii) of this section;

(C) The Government Development Bank for Puerto Rico;

(D) The Puerto Rico Economic Development Bank; and

(E) Such other entity as may be determined by the Commissioner by Revenue Procedure or other guidance published in the Internal Revenue Bulletin.

(ii) *Eligible institution.* An eligible institution means an institution—

(A) That is an entity organized under the laws of the Commonwealth of Puerto Rico or is the Puerto Rican branch of an entity organized under the laws of another jurisdiction, if such entity is engaged in a banking, financing, or similar business defined in § 1.864–4(c)(5)(i), and

(B) That is licensed as an eligible institution under Regulation No. 3582 (or any successor regulation) issued by the Commissioner of Financial Institutions of Puerto Rico (hereinafter ‘‘Puerto Rican Regulation No. 3582’’).

(iii) *Single-purpose entity.* A single-purpose entity is an entity that meets all of the following conditions:

(A) The entity is organized under the laws of the Commonwealth of Puerto Rico and is a corporation, a partnership or a trust, which conducts substantially all of its activities in Puerto Rico.

(B) The sole purpose of the entity is to use qualified funds from possessions corporations to make one or more qualified investments in a qualified Caribbean Basin country and the entity actually uses such funds only for such purpose.

(C) In the case of an entity that is a trust, one of the trustees is a qualified financial institution described in paragraph (c)(3)(i) of this section.

(D) The entity is licensed as an eligible institution under Puerto Rican Regulation No. 3582 (or any successor regulation).

(E) Any temporary investment by the entity for its own account of funds received from a possessions corporation, and the income from the investment thereof, and any temporary investment by the entity for its own account of principal and interest paid by a borrower to the entity, and the income from the investment thereof, are limited to investments in eligible activities, as described in section 6.2.4 of Puerto Rican Regulation No. 3582, as in effect on September 22, 1989.

(4) *Investments in active business assets*—(i) *In general.* For purposes of section 936(d)(4)(A)(i)(I) and this section and subject to the provisions of paragraph (c)(8) of this section, a loan qualifies as an investment in active business assets if—

(A) The amounts disbursed to a qualified recipient under the loan or bond issue are promptly applied (as defined in paragraphs (c)(6) and (7) of this section) by (or on behalf of) the qualified recipient solely for capital expenditures for the construction, rehabilitation (including demolition associated therewith), improvement, or upgrading of qualified assets described in paragraphs (c)(4)(ii)(A), (B), (E), and (F) of this section, for the acquisition of qualified assets described in paragraphs (c)(4)(ii)(B), (C), (E), and (F) of this section, for the expenditures described in paragraphs (c)(4)(ii)(D), (E), and (F) of this section, and, if applicable, for the financing of incidental expenditures described in paragraph (c)(4)(iii) of this section;

(B) The qualified recipient owns the assets for United States income tax purposes and uses them in a qualified business activity (as defined in paragraph (c)(4)(iv)); and

(C) The requirements of paragraph (c)(6) of this section (regarding temporary investments and time periods within which the funds must be invested) and of paragraph (c)(7) of this section (regarding the refinancing of existing funding and the time periods within which funding for investments must be secured) are satisfied.

(ii) *Definition of qualified assets.* For purposes of this paragraph (c), qualified assets mean—

(A) Real property;

(B) Tangible personal property (such as furniture, machinery, or equipment) that is not property described in section 1221(1) and that is either new property or property which at no time during the period specified in paragraph (c)(4)(v) of this section was used in a business activity in the qualified Caribbean Basin country in which the property is to be used;

(C) Rights to intangible property that is a patent, invention, formula, process, design, pattern, know-how, or similar item, or rights under a franchise agreement, provided that such rights—

(*1*) Were not at any time during the period specified in paragraph (c)(4)(v) of this section used in a business activity in the qualified Caribbean Basin country in which the rights are to be used,

(*2*) Are not rights the use of which gives rise, or would give rise if used, to United States source income, and

(*3*) Are not rights acquired by the qualified recipient from a person related (within the meaning of section 267(b), using ''10 percent'' instead of ''50 percent'' in the places where it appears) to the qualified recipient;

(D) Exploration and development expenditures incurred by a qualified recipient for the purpose of ascertaining the existence, location, extent or quality of any deposit of ore, oil, gas, or other mineral in a qualified Caribbean Basin country, as well as for purposes of developing such deposit (within the meaning of section 616 of the Code and the regulations thereunder);

(E) Living plants and animals (other than crops, plants, and animals that are acquired primarily to hold as inventory by the qualified recipient for resale in the ordinary course of trade or business) acquired in connection with a farming business (as defined in § 1.263–1T(c)(4)(i)), expenditures of a preparatory nature to prepare the land or area for farming (such as planting trees, drilling wells, clearing brush, leveling land, laying pipes, building roads, constructing tanks and reservoirs), expenditures for soil and water conservation of a type described in section 175(c)(1), and expenditures of a development nature incurred in connection with, and during, the preproductive period of property produced in a farming business (as defined in § 1.263–1T(c)(4)(ii));

(F) Other assets or expenditures that are not described in paragraphs (c)(4)(ii)(A) through (E) of this section and that the Commissioner may, by Revenue Procedure or other guidance published in the Internal Revenue Bulletin or by ruling issued to a qualified financial institution or qualified recipient upon its request, determine to be qualified assets.

(iii) *Incidental expenditures.* An amount in addition to the loan proceeds borrowed to make an investment in active business assets shall be considered an investment in active business assets if such amount is applied to finance expenditures that are incidental to making the investment in active business assets, provided such amount is disbursed at or about the same time the proceeds for making the investment in active business assets are disbursed. For purposes of this section, expenditures incidental to an investment in active business assets include only the following items:

(A) A reasonable amount of costs (other than the cost of credit enhancement or bond insurance premiums) associated with arranging the financing of an investment in active business assets, not to exceed 3.5 percent of the proceeds of the loan or bond issue.

(B) A reasonable amount of installation costs and other reasonable costs associated with placing an active business asset in service in the qualified business activity.

(C) An amount not in excess of 10 percent of the total amount of investment in qualified assets to finance the acquisition of inventory, and other working capital requirements, but if an investment is in connection with a manufacturing or farming business, the percentage limitation shall be 50 percent rather than 10 percent provided the excess over the 10 percent limitation is used to finance inventory property. For purposes of this paragraph (c), whether a business is a manufacturing business shall be determined under principles similar to those described in section 954(d)(1)(A) and the regulations thereunder; whether a business is a farming business shall be determined under §1.263–1T(c)(4)(i).

(D) An amount not in excess of 5 percent of the sum of the investment in active business assets and the costs described in paragraphs (c)(4)(iii)(A), (B), and (C) of this section for the refinancing of an existing debt of the qualified recipient if such refinancing is incidental to an investment in active business assets. For this purpose, the replacement of an existing loan arrangement shall not be considered the refinancing of an existing indebtedness to the extent that the funds under such loan arrangement have not yet been disbursed to the qualified recipient.

(iv) *Qualified business activity.* A qualified business activity is a lawful industrial or commercial activity that is conducted as an active trade or business (under principles similar to those described in §1.367(a)–2T(b) (2) and (3)) in a qualified Caribbean Basin country. A trade or business for purposes of this paragraph (c)(4)(iv) is any business activity meeting the principles of section 367 of the Code and described in Divisions A through I (excluding group 43 in Division E (relating to the United States Postal Service) and groups 84 (relating to museums, art galleries, and botanical and zoological gardens), 86 (relating to membership organizations), and 88 (relating to private households in Division I) of the 1987 Standard Industrial Classification Manual issued by the Executive Office of the President, Office of Management and Budget, or in the comparable provisions of any successor Standard Industrial Classification Manual that is adopted by the Commissioner of Internal Revenue in a notice, regulation, or other document published in the Internal Revenue Cumulative Bulletin.

(v) *Period of use.* The period referred to in paragraphs (c)(4)(ii)(B) and (C) of this section shall be a five year period preceding the date of acquisition with the loan proceeds, if the date of acquisition is on or before May 13, 1991. If the date of acquisition is after May 13, 1991, then the period specified in this paragraph (c)(4)(v) shall be three years preceding the date of acquisition with the loan proceeds.

(5) *Investments in development projects*—(i) *In general.* Subject to the provisions of paragraph (c)(8) of this section, this paragraph (c)(5)(i) describes the requirements in order for a loan by a qualified financial institution to qualify as an investment in a development project for purposes of section 936(d)(4)(A)(i)(II) and for this section.

(A) The amounts disbursed under the loan or bond issue must be promptly applied (as defined in paragraphs (c)(6) and (7) of this section) by (or on behalf of) the qualified recipient solely for one or more investments described in paragraph (c)(4)(i)(A) of this section and in any land, buildings, or other property functionally related and subordinate to a facility described in paragraph (c)(5)(ii) of this section (determined under principles similar to those described in §1.103–8(a)(3)), for use (under principles similar to those described in §1.367(a)–2T(b)(5)) in connection with one or more activities described in paragraph (c)(5)(i)(B) of this section.

(B) The activities referred to in paragraph (c)(5)(i)(A) of this section are—

(*1*) A development project described in paragraph (c)(5)(ii) of this section in a qualified Caribbean Basin country; or

(*2*) The performance in a qualified Caribbean Basin country of a non-commercial governmental function described in paragraph (c)(5)(iv) of this section;

(C) The qualified recipient must own the assets for United States income tax purposes;

(D) The requirements of paragraph (c)(6) of this section (regarding temporary investments and time periods within which the funds must be invested) and of paragraph (c)(7) of this section (regarding the refinancing of existing funding and time periods within which funding for investments must be secured) must be satisfied.

(ii) *Development project.* For purposes of this paragraph (c), a development project is one or more facilities in a qualified Caribbean Basin country that support economic development in that country and that satisfy the public use requirement of paragraph (c)(5)(iii) of this section. Examples of facilities that may meet the public use requirement include, but are not limited to—

(A) Transportation systems and equipment, including sea, surface, and air, such as roads, railways, air terminals, runways, harbor facilities, and ships and aircraft;

(B) Communications facilities;

(C) Training and education facilities related to qualified business activities;

(D) Industrial parks, including necessary support facilities such as roads; transmission lines for water, gas, electricity, and sewage; docks; plant sites preparations; power generation; sewage disposal; and water treatment;

(E) Sports facilities;

(F) Convention or trade show facilities;

(G) Sewage, solid waste, water, and electric facilities;

(H) Housing projects pursuant to a government program designed to provide affordable housing to low or moderate income families, based upon local standards; and

(I) Hydroelectric generating facilities.

(iii) *Public use requirement.* To satisfy the public use requirement in paragraph (c)(5)(ii) of this section, a facility must serve or be available on a regular basis for general public use, as contrasted with similar types of facilities which are constructed for the exclusive use of a limited number of persons as determined under principles similar to those described in § 1.103–8(a)(2).

(iv) *Non-commercial governmental functions.* For purposes of paragraph (c)(5)(i)(B) of this section, the term ‘‘non-commercial governmental functions’’ refers to activities that, under U.S. standards, are not customarily attributable to or carried on by private enterprises for profit and are performed for the general public with respect to the common welfare or which relate to the administration of some phase of government. For example, the operation of libraries, toll bridges, or local transportation services, and activities substantially equivalent to those carried out by the Federal Aviation Authority, Interstate Commerce Commission, or United States Postal Service, are considered non-commercial governmental functions. For purposes of this section, non-commercial government functions shall not include military activities.

(v) [Reserved]

(6) *Prompt application of borrowed proceeds.* This paragraph (c)(6) provides rules for determining whether amounts disbursed to a qualified recipient by a qualified financial institution (or a financial intermediary) shall be considered to have been promptly applied for the purpose of paragraphs (c)(4)(i)(A) and (c)(5)(i)(A) of this section.

(i) *In general.* Except as otherwise provided in paragraphs (c)(6)(ii) and (c)(7)(iii)(B) of this section, amounts disbursed to a qualified recipient by a qualified financial institution (or a financial intermediary) shall be considered to have been promptly applied for the purpose of paragraphs (c)(4)(i)(A) and (c)(5)(i)(A) of this section if the amounts are fully expended for any of the purposes described in paragraphs (c)(4)(i)(A) or (c)(5)(i)(A) of this section no later than six months from the date of such disbursement and any temporary investment of such funds by the qualified recipient during such period complies with the rules of paragraph (c)(6)(iii)(A) of this section. Where the amounts disbursed are bond proceeds described in paragraph (c)(6)(iv)(A) of this section, the six-month period shall begin on the date of issuance of the bonds. In the event the qualified financial institution (or financial intermediary) invests any part of the bond proceeds before disbursement of those proceeds to the qualified recipient, all earnings from any such investment shall be paid to the qualified recipient or applied for its benefit.

(ii) *Special rules for long term projects financed out of bond proceeds.* In the case of a long term project described in paragraph (c)(6)(iv)(B) of this section that is financed out of bond proceeds, the six-month period described in paragraph (c)(6)(i) of this section shall be extended with respect to the amount of bond proceeds used to fund the project for such reasonable period of time as shall be necessary until completion of the project or until beginning of production (in the case of a farming business), but, in any event, not to exceed three years from the date of issuance of the bonds, and only if—

(A) The project that is financed out of bond proceeds was identified as of the date of issue;

(B) A construction and expenditure plan certified by an independent expert (such as an engineer, an architect, or a farming expert) is filed with, and approved by, the Commissioner of Financial Institutions of Puerto Rico (or his delegate) prior to the date of issue, which makes a reasonable estimate, as of the date of filing of the plan, of the amounts and uses of the bond proceeds and the time of completion or production, and includes a schedule of progress payments until such time;

(C) The terms of the construction and expenditure plan are disclosed in the public offering memorandum, private placement memorandum, or similar document prepared for information or disclosure purposes in relation to the issuance of bonds; and

(D) Any temporary investment of the bond proceeds complies with the rules of paragraph (c)(6)(iii)(A) and (B) of this section.

(iii) *Temporary investments*—(A) *During six-month period.* During the six-month period described in paragraph (c)(6)(i) of this section, during the first six months of the period described in paragraph (c)(6)(ii) of this section, and during the 30-day period described in paragraph (c)(7)(iii)(A) of this section, loan proceeds disbursed to a qualified recipient, bond proceeds, and income from the investment thereof, may be held in unrestricted yield investments, provided such yield reflects normal market yield for such type of investments and provided the income from such investments, if any, is or would be sourced either in Puerto Rico or in a country in which the investment in active business assets or development project is to be made.

(B) *During other periods.* During any other period, any temporary investment of bond proceeds, and of income from such investments, shall be limited to investments in eligible activities. For purposes of this paragraph (c)(6)(iii)(B), the term ‘‘eligible activities’’ shall mean those investments described in section 6.2.4 of Puerto Rican Regulation No. 3582, as in effect on September 22, 1989.

(iv) *Definitions*—(A) *Bond proceeds.* For purposes of this paragraph (c), bond proceeds shall mean the proceeds from the issuance of obligations by way of a public offering or a private placement by a qualified financial institution for investment in active business assets or a development project that has been identified at the time of issue and is described in a public offering memorandum, private placement memorandum, or similar document prepared for information or disclosure purposes in relation to the issuance of the bonds.

(B) *Long term project.* For purposes of this section, the term long term project means—

(*1*) A project, whether or not under a contract, for the construction, rehabilitation, improvement, upgrading, or production of qualified assets, or for expenditures, described in paragraph (c)(4)(ii) of this section (other than paragraph (c)(4)(ii)(C) of this section), which is reasonably expected to require more than 12 months to complete; or

(*2*) The production of property in a farming business referred to in paragraph (c)(4)(ii)(E) of this section, which is reasonably expected to require a preproductive period in excess of 12 months.

(7) *Financing of previously incurred costs.* Loan or bond proceeds which are disbursed after a qualified recipient has paid or incurred part or all of the costs of acquiring active business assets or investing in a development project shall be considered to have been applied for such purposes only as provided in this paragraph (c)(7).

(i) *Replacement of temporary non-section 936 financing of a qualified investment.* This paragraph (c)(7)(i) prescribes the maximum time limits within which temporary non-section 936 financing of qualified investments may be replaced with section 936 funds without being considered a prohibited refinancing transaction. This paragraph (c)(7)(i) applies to the refinancing of costs incurred with respect to investments that, at the time the costs were first incurred, were either qualified investments in a qualified Caribbean Basin country or were investments by a qualified recipient in active business assets or a development project in a qualified Caribbean Basin country. This paragraph (c)(7)(i) applies also to the refinancing of costs incurred with respect to any other investment. However, in the latter case, the amount of costs that may be refinanced with section 936 funds is limited to the amount of costs that are incurred with respect to the investment after the investment becomes a qualified investment in a qualified Caribbean Basin country. For purposes of this paragraph (c)(7)(i), the time when costs are incurred shall be determined under principles similar to those applicable under section 461(h) dealing with the economic performance test for the accrual of deductible liabilities. This paragraph (c)(7)(i) applies only to the situations described in this paragraph (c)(7)(i).

(A) In the case of an investment in active business assets or a development project, a loan shall be a qualified investment for purposes of this paragraph (c) if the loan proceeds are disbursed, or the obligations are issued, no later than six months after the date on which the qualified recipient takes possession of the asset or the facility or, if earlier, places the asset or the facility in service. However, in the case of a small project described in paragraph (c)(8)(v) of this section, the six-month period shall be one year.

(B) In the case of an investment in active business assets or a development project that is part of a long term project described in paragraph (c)(6)(iv)(B) of this section, a loan shall also be a qualified investment for purposes of this paragraph (c) if the loan proceeds are disbursed, or the obligations are issued, no later than six months after completion of the project or, in the case of a farming business, after the beginning of production, and in any event, no later than three years after the date on which the first payment is made toward the eligible costs of the project. The amount of the qualified investment may not exceed the sum of—

(*1*) The eligible costs relating to investments described in paragraph (c)(4)(i)(A) in the case of an investment in active business assets, or the eligible costs relating to investments described in paragraph (c)(5)(i) of this section in the case of a development project, but only to the extent of the costs that are incurred after the date described in paragraph (c)(7)(i)(D) of this section, and

(*2*) The portion of unpaid interest that would be required to be capitalized under U.S. tax rules and that accrued on prior temporary non-section 936 financing from the date described in paragraph (c)(7)(i)(D) of this section through the date the section 936 loan proceeds are disbursed or the section 936 obligations are issued.

(C) In order to qualify for the special rules of this paragraph (c)(7)(i), a plan must be filed with the Commissioner of Financial Institutions of Puerto Rico (or his delegate) stating the qualified recipient's intention to refinance the costs of the long term project with section funds.

(D) The date referred to in paragraph (c)(7)(i)(B) (*1*) and (*2*) of this section is a date that is the later of—

(*1*) The date the plan described in paragraph (c)(7)(i)(C) is filed, or

(*2*) The date the investment becomes a qualified investment by a qualified recipient in active business assets or a development project in a qualified Caribbean Basin country.

(ii) *Refinancing of section 936 financing.* A section 936 loan or bond issue used to finance a qualified investment described in paragraph (c)(1) of this section may be refinanced with section 936 funds through a new loan or bond issue to the extent of the remaining principal balance on such existing qualified financing, increased by the amount of unpaid interest accrued through the date the new loan proceeds are disbursed or the new obligations are issued and that would be required to be capitalized under U.S. tax rules.

(iii) *Prompt application of borrowed proceeds*—(A) *In general.* In the case of a loan or bond issue described in paragraph (c)(7)(i) or (ii) of this section, the rules of paragraph (c)(6) of this section shall apply but the six-month period described in paragraph (c)(6)(i) of this section shall be limited to 30 days from the date of disbursement of loan proceeds to the qualified recipient or from the date of issuance in the case of a bond issue.

(B) *Special rules for long term projects financed out of bond proceeds.* In the case of a long term project described in paragraph (c)(6)(iv)(B) of this section that is financed out of bond proceeds, the 30-day period described in paragraph (c)(7)(iii)(A) of this section shall be extended with respect to the amount of bond proceeds used for the permanent financing of the long term project for such reasonable period of time as shall be necessary until completion of the project or beginning of production (in the case of a farming business), but, in any event, not to exceed three years from the date of issuance of the bonds. For purposes of this paragraph (c)(7)(iii)(B), the period of time shall be considered reasonable only if—

(*1*) A construction and expenditure plan certified by an independent expert (such as an engineer, an architect, or a farming expert) is filed with, and approved by, the Commissioner of Financial Institutions of Puerto Rico (or his delegate) prior to the date of issue, which makes a reasonable estimate, as of the date of issue, of the amounts and uses of the bond proceeds and the time of completion or production, and includes a schedule of progress payments until such time; and

(*2*) The terms of the construction and expenditure plan are disclosed in the public offering memorandum, private placement memorandum, or similar document prepared for information or disclosure purposes in relation to the bond issue.

(8) *Miscellaneous operating rules*—(i) *Sale and leaseback.* An asset that is acquired and leased back to the person from whom acquired does not constitute an investment in an active business asset or an investment in a development project.

(ii) *Use of asset in qualified business activity.* For purposes of paragraph (c)(4)(i)(B), an asset shall be considered used or held for use in a qualified business activity if it is used or held for use in such activity under principles similar to those described in § 1.367(a)-2T(b)(5), or a successor provision.

(iii) *Definition of capital expenditures.* For purposes of this paragraph (c), capital expenditures mean those expenditures described in section 263(a) of the Code (without regard to paragraphs (A) through (G) of section 263(a)(1)), and those costs required to be capitalized under section 263A with respect to property described in section 263A(b)(1), relating to self-constructed assets.

(iv) *Loans through certain financial intermediaries.* A loan by a qualified financial institution shall not be disqualified from being an investment in active business assets or in a development project merely because the proceeds are first lent to a financial intermediary (as defined in paragraph (c)(8)(iv)(H) of this section) which, in turn, on-lends the proceeds directly to a qualified recipient, provided the requirements of this paragraph (c)(8)(iv) are satisfied.

(A) The loan to the qualified recipient must satisfy the requirements of paragraph (c)(4)(i) of this section in the case of an investment in active business assets, or of paragraph (c)(5)(i) of this section in the case of an investment in a development project.

(B) The qualified recipient and the active business assets or development project in which the proceeds are to be invested must be identified prior to disbursement of any part of the proceeds by the qualified financial institution to the financial intermediary.

(C) The effective interest rate charged by the qualified financial institution to the financial intermediary must not exceed the average interest rate paid by the qualified financial institution with respect to its eligible funds, increased by such number of basis points as is required to provide reasonable compensation to the qualified financial institution for services performed and risks assumed with respect to the loan to the financial intermediary that are not ordinarily required to be performed or assumed with respect to a deposit, loan, repurchase agreement or other transfer of eligible funds with another qualified financial institution. The average interest rate shall be the average rate, determined on a daily basis, paid by the qualified financial institution on its eligible funds over the most recent quarter preceding the date on which the rate on the loan to the financial intermediary is committed.

(D) The effective interest rate charged by the financial intermediary to the qualified recipient must not exceed the effective interest rate charged to the financial intermediary by the qualified financial institution, increased by such number of basis points as is required to provide reasonable compensation to the financial intermediary for services performed and risks assumed with respect to the loan to the qualified recipient.

(E) The financial intermediary must borrow from the qualified financial institution under substantially the same terms as it lends to the qualified recipient. In particular, both loans must have disbursement terms, repayment schedules and maturity dates for interest and principal amounts such that the financial intermediary does not retain for more than 48 hours any of the funds disbursed by the qualified financial institution nor any of the funds paid by the qualified recipient in repayment of principal or interest on the loan.

(F) The financial institution and the financial intermediary must agree to comply with the due diligence requirements described in paragraphs (c)(11), (12), and (13) of this section;

(G) The time periods and temporary investments rules in paragraphs (c)(6) and (7) of this section must be complied with; and

(H) For purposes of this paragraph (c), the financial intermediary must be—

(*1*) An active trade or business which a person maintains in a qualified Caribbean Basin country and which consists of a banking, financing or similar business as defined in § 1.864–4(c)(5)(i) (other than a central bank of issue); or

(*2*) A public international organization, the principal purpose of which is to foster economic development in developing countries and which is described in section 1 of the International Organizations Immunities Act (22 U.S.C. 288).

For purposes of paragraphs (c)(8)(iv)(C) and (D) of this section, the determination of whether compensation is reasonable shall be made in relation to normal commercial practices for comparable transactions carrying a similar degree of commercial, currency and political risk. Reasonable credit enhancement fees and other reasonable fees and amounts charged to the financial intermediary or the qualified recipient with respect to the loan transaction in addition to interest shall be added to the interest cost in determining the effective interest rate.

(v) *Small project.* For purposes of this paragraph (c), a small project shall be a project (including the acquisition of an asset) for which the total amount of section 936 funds used for its financing does not exceed $1,000,000 in the aggregate, or such other amount as the Commissioner may publish, from time to time, in the Internal Revenue Bulletin.

(9) *Qualified recipient.* For purposes of this section, a qualified recipient is any person described in paragraph (c)(9)(i) or (ii) of this section. The term ‘‘person’’ means a person described in section 7701(a)(1) or a government (within the meaning of § 1.892–2T(a)(1)) of a qualified Caribbean Basin country.

(i) In the case of an investment described in paragraph (c)(4) of this section (relating to investments in active business assets), a qualified recipient is a person that carries on a qualified business activity in a qualified Caribbean Basin country, and complies with the agreement and certification requirements described in paragraph (c)(11)(i) of this section at all times during the period in which the investment remains outstanding.

(ii) In the case of an investment described in pargraph (c)(5) of this section (relating to investments in development projects), a qualified recipient is the borrower (including a person empowered by the borrower to authorize expenditures for the investment in the development project) that has authority to comply, and complies, with the agreement and certification requirements described in paragraph (c)(11)(i) of this section at all times during the period in which the investment remains outstanding.

(10) *Investments in a qualified Caribbean Basin country*—(i) *Rules for determining the place of an investment.* The rules of this paragraph (c)(10)(i) shall apply to determine the extent to which an investment in an active business asset or a development project will be

considered made in qualified Caribbean Basin Country.

(A) An investment in real property is considered made in the qualified Caribbean Basin country in which the real property is located.

(B) Except as otherwise provided in this paragraph (c)(10)(i)(B), an investment in tangible personal property is considered made in a qualified Caribbean Basin Country so long as the tangible personal property is predominantly used in that country. Whether property is used predominantly in a qualified Caribbean Basin country shall be determined under principles similar to those described in §1.48–1(g)(1), (g)(2)(ii), (g)(2)(iv), (g)(2)(vi), (g)(2)(viii), and (g)(2)(x) (relating to investment tax credits for property used outside the United States) as in effect on December 31, 1985. A vessel, container, or aircraft shall be considered for use predominantly in a qualified Caribbean Basin country in any year if it is used for transport to and from such country with some degree of frequency during that year and at least 30 percent of the income from the use of such vessel, container or aircraft for that year is sourced in such country under principles similar to those described in section 863(c)(1) and (2) (relating to source rules for certain transportation income). Cables and pipelines which are premanently installed as part of a communication or transportation system between a qualified Caribbean Basin country and another country or among several countries which include a qualified Caribbean Basin country shall be considered used in a qualified Caribbean Basin country to the extent of 50 percent of the portion of the facility that directly links the qualified country to another country or to a hub, unless it is established by notice or other guidance published in the Internal Revenue Bulletin or by ruling issued to a qualified institution or qualified recipient upon request that it is appropriate to attribute a greater portion of the cost of the facility to the qualified Caribbean Basin country.

(C) An investment in rights to intangible property is considered made in a qualified Caribbean Basin country to the extent such rights are used in that country. Where rights to intangible property are used shall be determined under principles similar to those described in §1.954–2T(b)(3)(vii) or a successor provision.

(ii) *Qualified Caribbean Basin country.* For purposes of this section, the term ‘‘qualified Caribbean Basin country’’ means any beneficiary country (within the meaning of section 212(a)(1)(A) of the Caribbean Basin Economic Recovery Act, Public Law 98–67 (Aug. 5, 1983), 97 Stat. 384, 19 U.S.C. 2702(a)(1)(A)), which meets the requirements of section 274(h)(6)(A)(i) and (ii) and the U.S. Virgin Islands, and includes the territorial waters and continental shelf thereof.

(11) *Agreements and certifications by qualified recipients and financial intermediaries*—(i) *In general.* In order for an investment to be considered a qualified investment under section 936(d)(4) and paragraph (c)(1) of this section, a qualified recipient must certify to the qualified financial institution (or to the financial intermediary, if the loan is made through a financial intermediary) on the date of closing of the loan agreement and on each anniversary date thereof, that it is a qualified recipient described in paragraph (c)(9) of this section. In addition, the qualified recipient must agree in the loan agreement with the qualified financial institution (or with the financial intermediary, if the loan is made through a financial intermediary)—

(A) To use the funds at all times during the period the loan is outstanding solely for the purposes and in the manner described in paragraph (c)(4) of this section (regarding investment in active business assets) or in paragraph (c)(5) of this section (regarding investment in development projects);

(B) To comply with the requirements of paragraph (c)(6) of this section (regarding temporary investments and time periods within which the funds must be invested) and paragraph (c)(7) of this section (regarding the refinancing of existing funding and the time periods within which funding for investments must be secured);

(C) To notify the Assistant Commissioner (International), the qualified financial institution (or the financial intermediary, if the loan is made through a financial intermediary), and the Commissioner of Financial Institutions of Puerto Rico (or his delegate) pursuant to paragraph (c)(14) of this section if it no longer is a qualified recipient or if, for any other reason, the investment has ceased to qualify as a qualified investment described in paragraph (c)(1) of this section, promptly upon the occurrence of such disqualifying event; and

(D) To permit examination by the office of the Assistant Commissioner (International) (or by the office of any District Director authorized by the Assistant Commissioner (International)) and the Commissioner of Financial Institutions of Puerto Rico (or his delegate) of all necessary books and records that are sufficient to verify that the funds were used for investments in active business assets or development projects in conformity with the terms of the loan agreement.

(ii) *Certification by a financial intermediary.* In the case of a loan by a qualified financial institution to a financial intermediary, the financial intermediary must certify to the qualified financial institution (using the procedures described in paragraph (c)(11)(i) of this section) that it is a financial intermediary described in paragraph (c)(8)(iv)(H) of this section, and must furnish to the qualified financial institution a copy of the qualified recipient's certification described in paragraph (c)(11)(i) of this section and of its loan agreement with the qualified recipient. In addition, the financial intermediary must agree in the loan agreement with the qualified financial institution:

(A) To comply with the requirements of paragraph (c)(8)(iv) of this section; and

(B) To permit examination by the office of the Assistant Commissioner (International) (or by the office of any District Director authorized by the Assistant Commissioner (International)) and the Commissioner of Financial Institutions of Puerto Rico (or his delegate) of all its necessary books and records that are sufficient to verify that the funds were used in conformity with the terms of the loan agreements.

(12) *Certification requirements.* In order for an investment to be considered a qualified investment under section 936(d)(4), section 936(d)(4)(C)(i) requires that both the person in whose trade or business such investment is made and the financial institution certify to the Secretary of the Treasury and the Commissioner of Financial Institutions of Puerto Rico that the proceeds of the loan will be promptly used to acquire active business assets or to make other authorized expenditures. This certification requirement is satisfied as to the qualified financial institution, the financial intermediary (if any), and the qualified recipient if the qualified financial institution submits a certificate to both the Assistant Commissioner (International) and to the Commissioner of Financial Institutions of Puerto Rico (or his delegate) pursuant to paragraph (c)(14) of this section upon authorization of the investment by the Commissioner of Financial Institutions and, in any event, prior to the first disbursement of the loan proceeds to the qualified recipient or to the financial intermediary (if any), in which the qualified financial institution—

(i) Represents that, as of the date of the certification, the qualified recipient and the financial intermediary (if any) have complied with the requirements described in paragraph (c)(11) of this section;

(ii) Describes the important terms of the loan to the financial intermediary (if any) and to the qualified recipient, including the amount of the loan, the nature of the investment, the basis for its qualification as an investment in active business assets or a development project under this section, the identity of the financial intermediary (if any) and of the qualified recipient, the qualified Caribbean Basin country involved, and the nature of the collateral or other security used, including any guarantee;

(iii) Agrees to permit examination by the Assistant Commissioner (International) (or by the office of any District Director authorized by the Assistant Commissioner (International)) and the Commissioner of Financial Institutions of Puerto Rico (or his delegate) of all its necessary books and records that are sufficient to verify that the funds were used for investments in active business assets or development projects in conformity with the terms of the loan agreement or agreements with the financial intermediary (if any) and with the qualified recipient; and

(iv) In the case of a single-purpose entity that is a qualified financial institution, discloses the name and address of the entity's trustee or agent, if any, that assists the qualified financial institution in the performance of its due diligence requirement under paragraph (c) of this section, and represents that the trustee or agent has agreed with the qualified financial institution to permit examination by the Assistant Commissioner (International) (or by the office of any District Director authorized by the Assistant Commissioner (International)) and the Commissioner of Financial Institutions of Puerto Rico (or his delegate) of all necessary books and records of such trustee or agent that are sufficient to verify that the funds were used for investments in active business assets or development projects in conformity with the terms of the loan agreement or agreements with the financial intermediary (if any) and with the qualified recipient.

(13) *Continuing due diligence requirements*. In order to maintain the qualification for an investment under paragraph (c)(1) of this section, the continuing due diligence requirements described in this paragraph (c)(13) must be satisfied.

(i) *Requirements of qualified recipient*. A qualified recipient must—

(A) Submit annually to the qualified financial institution or to the financial intermediary from which its qualified funds were obtained a copy of its most recent annual financial statement accompanied by an opinion of an independent accountant familiar with the financials of the qualified recipient disclosing the amount of the loan, the current outstanding balance of the loan, describing the assets financed with such loan and the qualified business activity in which such assets are used or the development project for which the loan is used, and stating that there are no reasons to doubt that the loan proceeds have been properly used and continue to be properly used, and

(B) Act in a manner consistent with its representations and agreements described in paragraph (c)(11) of this section.

(ii) *Requirements of qualified financial institutions*. Except as otherwise provided in paragraph (c)(13)(iii) of this section, a qualified financial institution described in paragraph (c)(3) of this section must maintain in its records and have available for inspection the documentation described in paragraph (c)(13)(ii)(A) or (B) of this section. In addition, the qualified financial institution is required to notify the Assistant Commissioner (International) and the Commissioner of Financial Institutions of Puerto Rico (or his delegate) pursuant to paragraph (c)(14) of this section upon becoming aware that a loan has ceased to be an investment in active business assets or a development project under this section. For purposes of this paragraph (c)(13)(ii), multiple loans for investment in a single qualified business activity or development project will be aggregated in determining what due diligence requirements apply.

(A) In the case of a small project described in paragraph (c)(8)(v) of this section, the following documents must be maintained and available for inspection:

(*1*) The loan application or other similar document;

(*2*) The financial statements of the qualified recipient filed as part of the loan application;

(*3*) The statement required by section 6.4.3(a)(iii) of Puerto Rican Regulation No. 3582 or any successor thereof, signed by the qualified recipient (or its duly authorized representative), acknowledging the receipt of the loan proceeds, describing the assets financed with such loan and the business activity in which such assets are to be used or the development project for which the funds will be utilized, the collateral to be provided for the transaction including any guarantee, and the basis for its qualification as a qualified recipient;

(*4*) The loan documents; and

(*5*) In the case of a qualified financial institution that is a single-purpose entity, a copy of the agreement with the entity's trustee or agent, if any, described in paragraph (c)(12)(iv) of this section.

(B) In the case of a disbursement concerning a project that is not a small project described in paragraph (c)(8)(v) of this section, the following documents must be maintained and available for inspection, in addition to the documents required by paragraph (c)(13)(ii)(A) of this section:

(*1*) A memorandum of credit prepared by an officer of the qualified financial institution (or, in the case of a single purpose entity, an agent of the entity or a trustee for the entity, if any) and signed by the officer of the qualified financial institution, containing the details of the investigation and review that the qualified financial institution, or its trustee or agent, if any, conducted in order to evaluate whether the investment is qualified under paragraph (c)(1) of this section and the opinion of the officer of the qualified financial institution, or the opinion of an officer of the agent of, or of the trustee for, the qualified financial institution, if any, that there is no reasonable ground for belief that the qualified funds will be diverted to a use that is not permitted under the provisions of this section; in making this investigation and review, factors that must be utilized are ones similar to those listed in Puerto Rico Regulation No. 3582, section 6.4.2;

(*2*) The annual financial statement of the qualified recipient; and

(*3*) The written report of an officer of the qualified financial institution, or of an officer of an agent of, or of the trustee for, the qualified financial institution, if any, documenting discussions, both before and after the disbursement of the loan proceeds, with each recipient's accounting, financial and executive personnel with respect to the proposed and actual use of the loan proceeds and his analysis of the annual financial statements of the qualified recipient including an analysis of the statement of sources and uses of funds. After the loan disbursement, such discussions and review shall occur annually during the term of the loan. Such report shall include the conclusion that in such officer's opinion there is no reasonable ground for belief that the qualified recipient is improperly utilizing the funds.

(iii) *Requirements in the case of a financial intermediary.* Where a qualified financial institution lends funds to a financial intermediary which are on-lent to a qualified recipient—

(A) The obligation to maintain the documentation described in paragraph (c)(13)(ii)(A) or (B) of this section shall apply only to the financial intermediary and not to the qualified financial institution and the provisions of paragraph (c)(13)(ii)(A) or (B) of this section shall be read so as to impose on the financial intermediary any obligation imposed on the qualified financial institution.

(B) The financial intermediary shall forward annually to the qualified financial institution a copy of the documentation it is required to maintain in its records pursuant to the provisions of this paragraph (c)(13)(iii) and shall notify the Assistant Commissioner (International), the Commissioner of Financial Institutions of Puerto Rico (or his delegate) and the qualified financial institution pursuant to paragraph (c)(14) of this section upon becoming aware that a loan has ceased to be an investment in active business assets or a development project under this section. The qualified financial institution must maintain in its records and have available for inspection the documentation furnished by the financial intermediary pursuant to this paragraph (c)(13)(iii)(B).

(C) The qualified financial institution shall cause one of its officers (or one of the officers of its agent or trustee, if any) to prepare a written report documenting his analysis of the documentation furnished by the financial intermediary pursuant to paragraph (c)(13)(iii)(B) of this section, his discussions, both before and after the disbursement of the loan proceeds, with the financial intermediary's accounting, financial and executive personnel with respect to the proposed and actual use of the loan proceeds, and his analysis of the annual financial statements of the qualified recipient including an analysis of the statement of sources and uses of funds. After the loan disbursement, such discussions and review shall occur annually during the term of the loan. Such report shall include the conclusion that in such officer's opinion there is no reasonable ground for belief that the qualified recipient is improperly utilizing the funds.

(14) *Procedures for notices and certifications.* Notices and certifications to the Assistant Commissioner (International) required under paragraphs (c)(11), (12) and (13) of this section shall be addressed to the attention of the Assistant Commissioner (International), Office of Taxpayer Service and Compliance, IN:C, 950 L'Enfant Plaza South, SW., Washington, DC 20024. Notices and certifications to the Commissioner of Financial Institutions of Puerto Rico required under paragraphs (c)(11), (12), and (13) of this section shall be addressed as follows: Commissioner of Financial Institutions, GPO Box 70324, San Juan, Puerto Rico 00936.

(15) *Effective date.* This paragraph (c) is effective May 13, 1991. It is applicable to investments by a possessions corporation in a financial institution that are used by a financial institution for investments in accordance with a specific authorization granted by the Commissioner of Financial Institutions of Puerto Rico (or his delegate) after September 22, 1989. However, the taxpayer may choose to apply §1.936–10T(c) for periods before June 12, 1991.

[T.D. 8350, 56 FR 21927, May 13, 1991]

§1.936–11T New lines of business prohibited (temporary).

(a) *In general.* A possessions corporation that is an existing credit claimant, as defined in section 936(j)(9)(A), and that adds a substantial new line of business during a taxable year, or that has a new line of business that becomes substantial during the taxable year, will cease to be an existing credit claimant as of the close of the taxable year ending before either such taxable year. The term *new line of business* is defined in paragraph (b) of this section. The term *substantial* is defined in paragraph (c) of this section. Paragraph (d) of this section provides examples illustrating the rules of paragraphs (a) through (c) of this section. Paragraph (e) of this section instructs a possessions corporation not to claim the Puerto Rico and possession tax credit on its return if it has added a substantial new line of business during the taxable year. Paragraph (f) of this section is the effective date provision.

(b) *New line of business*—(1) *In general.* A new line of business is any business activity of the possessions corporation that is not closely related to a pre-existing business of the possessions corporation. The term *closely related* is defined in paragraph (b)(2) of this section. The term *pre-existing business* is defined in paragraph (b)(3) of this section.

(2) *Closely related.* All the facts and circumstances must be considered, including paragraphs (b)(2)(i)(A) through (H) of this section, to determine whether a new activity is closely related to a pre-existing business of the possessions corporation, and thus is not a new line of business.

(i) *Factors.* The following factors will help to establish that a new activity is closely related to a pre-existing business activity of the possessions corporation—

(A) The activity provides products or services very similar to the products or services provided by the pre-existing business;

(B) The activity markets products and services to the same class of customers as that of the pre-existing business;

(C) The activity is of a type that is normally conducted in the same business location as the pre-existing business;

(D) The activity requires the use of similar operating assets as those used in the pre-existing business;

(E) The activity's economic success depends on the success of the pre-existing business;

(F) The activity is of a type that would normally be treated as a unit with the pre-existing business in the business' accounting records;

(G) If the activity and the pre-existing business are regulated or licensed, they are regulated or licensed by the same or similar governmental authority; and

(H) The United States Bureau of the Census assigns the activity the same six-digit North American Industry Classification System (NAICS) code or four-digit Industry Number Standard Identification code (SIC code) as the pre-existing business. In the case of a pre-existing business or activity that is listed under a NAICS code of 99999, Unclassified Establishments, or under a miscellaneous category (most NAICS codes that end in a ‘‘9’’ are miscellaneous categories), the similarity in NAICS codes is ignored as a factor in determining whether the activity is closely related to the pre-existing business. The dissimilarity of the NAICS code is considered in determining whether the activity is closely related to the pre-existing business. For purposes of this section, NAICS codes must be set forth in the North American Industry Classification System (United States) Manual that is in effect for the taxable year during which a new line of business is added. The official NAICS-United States Manual is available in both printed and electronic versions from the National Technical Information Service (NTIS) at 1–800–553–6847 or at the NTIS NAICS web site at <http://www.ntis.gov/naics>. In the case of a pre-existing business or activity that is listed under a SIC code of 9999, Nonclassifiable Establishments, or under a miscellaneous category (most SIC codes ending in ‘‘9’’ are miscellaneous categories), the similarity in SIC codes is ignored as a factor in determining whether the activity is closely related to the pre-existing business. The dissimilarity of the SIC codes is considered in determining whether the activity is closely related to the pre-existing business. The SIC codes are set forth in the Executive Office of the President, Office of Management and Budget, Standard Industrial Classification Manual, that is in effect for the taxable year during which a new line of business is added. A printed version of the official SIC Manual is available from the National Technical Information Service (NTIS) at 1–800–553–6847.

(ii) *Safe harbors.* An activity is closely related to a pre-existing business and thus is not a new line of business in the following three cases—

(A) If the activity is within the same six-digit NAICS code (or four-digit SIC code);

(B) If both the pre-existing business activity and the new activity are within the same five-digit NAICS code (or three-digit SIC code) and the facts relating to the new activity satisfy at least three of the factors listed in paragraph (b)(2)(i) (A) through (G) of this section; or

(C) If the pre-existing business is making a component product or end-product form, as defined in § 1.936–5(a)(1), Q & A1, and the new business activity is making an integrated product, or an end-product form with fewer excluded components, that is not within the same six-digit NAICS code (or four-digit SIC code) as the pre-existing business solely because the component product and the integrated product (or two end-product forms) have different end-uses.

(3) *Pre-existing business*—(i) *In general.* Except as provided in paragraph (b)(3) (ii) and (4) of this section, a business activity is a pre-existing business of the existing credit claimant if—

(A) The existing credit claimant was actively engaged in the activity within the possession on or before October 13, 1995; and

(B) The existing credit claimant has elected the benefits of the Puerto Rico and possession tax credit pursuant to an election which is in effect for the taxable year that includes October 13, 1995.

(ii) *Acquisition of all of the assets or stock of an existing credit claimant.* (A) If all the assets of a pre-existing business of an existing credit claimant are acquired by an affiliated or non-affiliated existing credit claimant which carries on the business activity of the predecessor existing credit claimant, the acquired business activity will be treated as a pre-existing business of the acquiring corporation. A non-affiliated acquiring corporation will not be bound by any section 936(h) election made by the predecessor existing credit claimant with respect to that business activity.

(B) Where all of the assets of a pre-existing business of an existing credit claimant are acquired by a corporation that is not an existing credit claimant, if the acquiring corporation makes a section 936(e) election for the taxable year in which the assets are acquired—

(*1*) The acquiring corporation will be treated as an existing credit claimant for the year of acquisition;

(*2*) The activity will be considered a pre-existing business of the acquiring corporation;

(*3*) The acquiring corporation will be deemed to satisfy the rules of section 936(a)(2) for the year of acquisition; and

(*4*) After making an election under section 936(e), a non-affiliated acquiring corporation will not be bound by elections under sections 936(a)(4) and (h) made by the predecessor existing credit claimant.

(C) A mere change in the stock ownership of a possessions corporation will not affect its status as an existing credit claimant for purposes of this section.

(4) *Timing rule.* The tests for a new line of business in this paragraph (whether the new activity is closely related to a pre-existing business) are applied only at the end of the taxable year during which the new activity is added.

(c) *Substantial*—(1) *In general.* For purposes of section 936 and section 30A, a new line of business is considered to be substantial as of the earlier of—

(i) The taxable year in which the possessions corporation derives more that 15 percent of its gross income from that new line of business (gross income test); or

(ii) The taxable year in which the possessions corporation directly uses in that new line of business more that 15 percent of its assets (assets test).

(2) *Gross income test.* The denominator in the gross income test is the amount that is the gross income of the possessions corporation for the current taxable year, while the numerator is the amount that is the gross income of the new line of business for the current taxable year. The gross income test is applied at the end of each taxable year. For purposes of this test, if a new line of business is added late in the taxable year, the income is not to be annualized in that year. In the case of a new line of business acquired through the purchase of assets, the gross income of such new line of business for the taxable year of the acquiring corporation that includes the date of acquisition is determined from the date of acquisition through the end of the taxable year. In the case of a consolidated group election made pursuant to section 936(i)(5), the test applies on a company by company basis and not on a consolidated basis.

(3) *Assets test*—(i) *Computation.* The denominator is the adjusted tax basis of the total assets of the possessions corporation for the current taxable year. The numerator is the adjusted tax basis of the total assets utilized in the new line of business for the current taxable year. The assets test is computed annually using all assets including cash and receivables.

(ii) *Exception.* A new line of business of a possessions corporation will not be treated as substantial as a result of meeting the assets test if an event that is not reasonably anticipated causes assets used in the new line of business of the possessions corporation to exceed 15 percent of the adjusted tax basis of the possession corporation's total assets. For example, an event that is not reasonably anticipated would include the destruction of plant and equipment of the pre-existing business due to a hurricane or other natural disaster, or other similar circumstances beyond the control of the possessions corporation. The expiration of a patent is not such an event and will not trigger this exception.

(d) *Examples.* The following examples illustrate the rules described in paragraphs (a), (b), and (c) of this section. In the following examples, X Corp. is an existing credit claimant unless otherwise indicated:

Example 1. X Corp. is a pharmaceutical corporation which manufactured bulk chemicals (a component product). In March 1997, X Corp. began to also manufacture pills (e.g., finished dosages or an integrated product). The new activity provides products very similar to the products provided by the pre-existing business. The new activity is of a type that is normally conducted in the same business location as the pre-existing business. The activity's economic success depends on the success of the pre-existing business. The manufacture of bulk chemicals is in NAICS code 325411, Medicinal and Botanical Manufacturing, while the manufacture of the pills is in NAICS code 325412, Pharmaceutical Preparation Manufacturing. Although the products have a different end-use, may be marketed to a different class of customers, and may not use similar operating assets, they are within the same five-digit NAICS code and the activity also satisfies paragraphs (b)(2)(i) (A), (C), and (E) of this section. The manufacture of the pills by X

Corp. will be considered closely related to the manufacture of the bulk chemicals. Therefore, X Corp. did not add a new line of business because it falls within the safe harbor rule of paragraph (b)(2)(ii)(B) of this section.

Example 2. X Corp. currently manufactures printed circuit boards in a possession. As a result of a technological breakthrough, X Corp. could produce the printed circuit boards more efficiently if it modified its existing production methods. Because demand was high, X Corp. expanded its facilities to support the production of its current products when it modified its production methods. After these modifications to the facilities and production methods, the products produced through the new technology were in the same six-digit NAICS code as products produced previously by X Corp. See paragraph (b)(2)(ii)(A) of this section. Therefore, X Corp. will not be considered to have added a new line of business for purposes of paragraph (b) of this section.

Example 3. X Corp. has manufactured Device A in Puerto Rico for a number of years and began to manufacture Device B in Puerto Rico in 1997. Device A and Device B are both used to conduct electrical current to the heart and are both sold to cardiologists. There is no significant change in the type of activity conducted in Puerto Rico after the transfer of the manufacturing of Device B to Puerto Rico. Similar manufacturing equipment, manufacturing processes and skills are used in the manufacture of both devices. Both are regulated and licensed by the Food and Drug Administration. The economic success of Device B is dependent upon the success of Device A only to the extent that the liability and manufacturing prowess with respect to one reflects favorably on the other. Depending upon the heart abnormality, the cardiologist may choose to use Device A, Device B or both on a patient. Both devices are within the same business sector of the taxpayer's business. The manufacture of Device A is in the six-digit NAICS code 339112, Surgical and Medical Instrument Manufacturing. The manufacture of Device B is in the six-digit NAICS code 334510, Electromedical and electro-therapeutic Apparatus Manufacturing. (The manufacture of Device A is in the four-digit SIC code 3845, Electromedical and Electrotheraputic Apparatus. The manufacture of Device B is in the four-digit SIC code 3841, Surgical and Medical Instruments and Apparatus.) The safe harbor of paragraph (b)(2)(ii)(B) of this section applies because the two activities are within the same three-digit SIC code and Corp. X satisfies paragraphs (b)(2)(i) (A), (B), (C), (D), (F), and (G) of this section.

Example 4. X Corp. has been manufacturing house slippers in Puerto Rico since 1990. Y Corp. is a U.S. corporation that is not affiliated with X Corp. and is not an existing credit claimant. Y Corp. has been manufacturing snack food in the United States. In 1997, X Corp. purchased the assets of Y Corp. and began to manufacture snack food in Puerto Rico. House slipper manufacturing is in the six-digit NAICS code 316212 (Four-digit SIC code 3142, House Slippers). The manufacture of snack foods falls under the six-digit NAICS code 311919, Other Snack Food Manufacturing (four-digit SIC code 2052, Cookies and Crackers (pretzels)). Because these activities are not within the same five or six digit NAICS code (or the same three or four-digit SIC code), and because snack food is not an integrated product that contains house slippers, the safe harbor of paragraph (b)(2)(ii) of this section cannot apply. Considering all the facts and circumstances, including the eight factors of paragraph (b)(2)(i) of this section, the snack food manufacturing activity is not closely related to the manufacture of house slippers, and is a new line of business, within the meaning of paragraph (b) of this section.

Example 5. X Corp. is an existing credit claimant that has elected the profit-split method for computing taxable income. P Corp. was not an existing credit claimant and manufactured a product in a different five-digit NAICS code than the product manufactured by X Corp. In 1997, X Corp. acquired the stock of P Corp. and liquidated P Corp. in a tax-free liquidation under section 332, but continued the business activity of P Corp. as a new business segment. Assume that this new business segment is a new line of business within the meaning of paragraph (c) of this section. In 1997, X Corp. has gross income from the active conduct of a trade or business in a possession computed under section 936(a)(2) of $500 million and the adjusted tax basis of its assets is $200 million. The new business segment had gross income of $60 million, or 12 percent of the X Corp. gross income, and the adjusted basis of the new segment's assets was $20 million, or 10 percent of the X Corp. total assets. In 1997, X Corp. does not derive more than 15 percent of its gross income, or directly use more that 15 percent of its total assets, from the new business segment. Thus, the new line of business acquired from P Corp. is not a *substantial* new line of business within the meaning of paragraph (c) of this section, and the new activity will not cause X Corp. to lose its status as an existing credit claimant during 1997. In 1998, however, the gross income of X Corp. grew to $750 million while the gross income of the new line of business grew to $150 million, or 20% of the X Corp. 1998 gross income. Thus, in 1998, the new line of business is substantial within the meaning of paragraph (c) of this section, and X Corp. loses its status as an existing credit claimant as of December 31, 1997.

(e) *Loss of status as existing credit claimant.* An existing credit claimant that adds a substantial new line of business in a taxable year, or that has a new line of business that becomes substantial in a taxable year, loses its status as an existing credit claimant as of the close of the taxable year ending before either such taxable year. In such case, the possession corporation must not claim the Puerto Rico and possession tax credit on its return for the taxable year in which the substantial new line of business is added or a new line of business becomes substantial.

(f) *Effective date*—(1) *General rule.* This section applies to taxable years of a possessions corporation beginning after August 19, 1998.

(2) *Election for retroactive application.* Taxpayers may elect to apply retroactively all the provisions of this section for any open taxable year beginning after December 31, 1995. Such election will be effective for the year of the election and all subsequent taxable years. This section will not apply to activities of pre-existing businesses for taxable years beginning before January 1, 1996.

[T.D. 8778, 63 FR 44389, Aug. 19, 1998]

CHINA TRADE ACT CORPORATIONS

§1.941–1 Special deduction for China Trade Act corporations.

In addition to the deductions from taxable income otherwise allowed such a corporation, a China Trade Act corporation is, under certain conditions, allowed an additional deduction in computing taxable income. This special deduction is an amount equal to the proportion of the taxable income derived from sources within Formosa and Hong Kong (determined without regard to this section and determined in a manner similar to that provided in part I (section 861 and following), subchapter N, chapter 1 of the Code, and the regulations thereunder) which the par value of the shares of stock of the corporation, owned on the last day of the taxable year by (a) persons resident in Formosa, Hong Kong, the United States, or possessions of the United States, and (b) individual citizens of the United States wherever resident, bears to the par value of the whole number of shares of stock of the corporation outstanding on that date. The decrease, by reason of such deduction, in the tax imposed by section 11 must not, however, exceed the amount of the special dividend referred to in section 941 (b), and is not allowable unless the special dividend has been certified to the Commissioner by the Secretary of Commerce.

§1.941–2 Meaning of terms used in connection with China Trade Act corporations.

(a) A China Trade Act corporation is one organized under the provisions of the China Trade Act, 1922 (15 U.S.C. chapter 4).

(b) The term ''special dividend'' means the amount which is distributed as a dividend to or for the benefit of such persons as on the last day of the taxable year were resident in Formosa, Hong Kong, the United States, or possessions of the United States, or were individual citizens of the United States, and owned shares of stock of the corporation. Such dividend must be distributed prior to or at the time fixed by law for filing the return of the corporation, including the period of any extension of time granted under rules and regulations prescribed by the Commissioner with the approval of the Secretary or his delegate. Such special dividend does not include any other amounts payable or to be payable to such persons or for their benefit by reason of their interest in the corporation and must be made in proportion to the par value of the shares of stock of the corporation owned by each.

(c) For the purposes of section 941, the shares of stock of a China Trade Act corporation are considered to be owned by the person in whom the equitable right to the income from such shares is in good faith vested.

(d) ''Taxable income derived from sources within Formosa and Hong Kong'' is the sum of the taxable income from sources wholly within Formosa and Hong Kong and that portion of the taxable income from sources partly within and partly without Formosa and Hong Kong which may be allocated to sources within Formosa and Hong Kong. The method of computing this income is similar to that described in part I (section 861 and following), subchapter N, chapter 1 of the Code, and the regulations thereunder.

§ 1.941–3 Illustration of principles.

The application of section 941 may be illustrated by the following example:

Example. (1) The A Company, a China Trade Act corporation, has taxable income (computed without regard to the deduction under section 941) for the calendar year 1954 of $200,000 and receives no dividends from domestic corporations. All of its stock on December 31, 1954, is owned on that date by persons resident in Formosa, Hong Kong, the United States, or possessions of the United States, or individual citizens of the United States. It distributes a special dividend amounting to $100,000 on February 15, 1955, which is certified by the Secretary of Commerce as provided in section 941(b). For the purpose of the tax imposed by section 11, it is necessary in this example to make two computations, first, without allowing the special deduction from taxable income on account of income derived from sources within Formosa and Hong Kong, and, second, allowing such deduction. The computations are as follows:

(2) First computation; without allowing the special deduction from taxable income.

Taxable income	$200,000
Normal tax (section 11 (b))	60,000
Surtax (section 11 (c))	38,500
Total income tax	98,500

(3) Second computation; allowing the special deduction from taxable income.

Taxable income	$200,000

Since the total taxable income is derived from sources within Formosa and Hong Kong and since the par value of the shares of stock of the corporation owned on the last day of the taxable year by (a) persons resident in Formosa, Hong Kong, the United States, or possessions of the United States, and (b) individual citizens of the United States wherever resident, is 100 percent of the par value of the total number of shares of stock of the corporation outstanding on that day, 100 percent of such taxable income is deductible.

Special deduction from taxable income	$200,000
Amount of income subject to tax under section 11	None

(4) Since the special dividend ($100,000) exceeds the diminution of the tax ($98,500) on account of the allowance of the special deduction from taxable income, the entire amount of the special deduction is allowable and the corporation has no income tax liability for 1954.

§ 1.943–1 Withholding by a China Trade Act corporation.

Dividends paid by a China Trade Act corporation to a nonresident alien individual, foreign partnership, or foreign corporation are subject to withholding of tax at source under § 1.1441–1. However, see paragraph (c) of § 1.1441–4 for exemption applicable to dividends paid to residents of Formosa or Hong Kong.

[T.D. 6908, 31 FR 16769, Dec. 31, 1966]

CONTROLLED FOREIGN CORPORATIONS

§ 1.951–1 Amounts included in gross income of United States shareholders.

(a) *In general.* If a foreign corporation is a controlled foreign corporation (within the meaning of section 957) for an uninterrupted period of 30 days or more (determined under paragraph (f) of this section) during any taxable year of such corporation beginning after December 31, 1962, every person—

(1) Who is a United States shareholder (as defined in section 951(b) and paragraph (g) of this section) of such corporation at any time during such taxable year, and

(2) Who owns (within the meaning of section 958(a)) stock in such corporation on the last day, in such year, on which such corporation is a controlled foreign corporation shall include in his gross income for his taxable year in which or with which such taxable year of the corporation ends, the sum of—

(i) Except as provided in section 963, such shareholder's pro rata share (determined under paragraph (b) of this section) of the corporation's subpart F income (as defined in section 952) for such taxable year of the corporation,

(ii) Such shareholder's pro rata share (determined under paragraph (c)(1) of this section) of the corporation's previously excluded subpart F income withdrawn from investment in less developed countries for such taxable year of the corporation,

(iii) Such shareholder's pro rata share (determined under paragraph (c)(2) of this section) of the corporation's previously excluded subpart F income withdrawn from investment in foreign base company shipping operations for such taxable year of the corporation, and

(iv) Such shareholder's pro rata share (determined under paragraph (d) of this section) of the corporation's increase in earnings invested in United States property for such taxable year of the corporation (but only to the extent such pro rata share is not excluded from such shareholder's gross income for his taxable year under section 959(a)(2)).

For purposes of determining whether a United States shareholder which is a domestic corporation is a personal holding company under section 542 and §1.542–1, the character of the amount includible in gross income of such domestic corporation under this paragraph shall be determined as if such amount were realized directly by such corporation from the source from which it is realized by the controlled foreign corporation. See paragraph (a) of §1.957–2 for special limitation on the amount of subpart F income in the case of a controlled foreign corporation described in section 957(b). See section 970(a) and §1.970–1 which provides for the reduction of subpart F income of export trade corporations.

(b) *Limitation on a United States shareholder's pro rata share of subpart F income*—(1) *In general.* For purposes of paragraph (a)(2)(i) of this section, a United States shareholder's pro rata share (determined in accordance with the rules of paragraph (e) of this section) of the foreign corporation's subpart F income for the taxable year of such corporation is—

(i) The amount which would have been distributed with respect to the stock which such shareholder owns (within the meaning of section 958(a)) in such corporation if on the last day, in such corporation's taxable year, on which such corporation is a controlled foreign corporation it had distributed pro rata to its shareholders an amount which bears the same ratio to its subpart F income for such taxable year as the part of such year during which such corporation is a controlled foreign corporation bears to the entire taxable year, reduced by—

(ii) The amount of distributions received by any other person during such taxable year as a dividend with respect to such stock, but only to the extent that such distributions do not exceed the dividend which would have been received by such other person if the distributions by such corporation to all its shareholders had been the amount which bears the same ratio to the subpart F income of such corporation for the taxable year as the part of such year during which such shareholder did not own (within the meaning of section 958(a)) such stock bears to the entire taxable year.

(2) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. A, a United States shareholder, owns 100 percent of the only class of stock of M, a controlled foreign corporation throughout 1963. Both A and M Corporation use the calendar year as a taxable year. For 1963, M Corporation derives $100 of subpart F income, has $100 of earnings and profits, and makes no distributions. A must include $100 in his gross income for 1963 under section 951(a)(1)(A)(i).

Example 2. The facts are the same as in example 1, except that instead of holding 100 percent of the stock of M Corporation for the entire year, A sells 60 percent of such stock to B, a nonresident alien, on May 26, 1963. Thus, M Corporation is a controlled foreign corporation for the period January 1, 1963, through May 26, 1963. A must include $40 ($100×146/365) in his gross income for 1963 under section 951(a)(1)(A)(i).

Example 3. The facts are the same as in example 1, except that instead of holding 100 percent of the stock of M Corporation for the entire year, A holds 60 percent of such stock on December 31, 1963, having acquired such interest on May 26, 1963, from B, a nonresident alien, who owned such interest from January 1, 1963. Before A's acquisition of such stock, M Corporation had distributed a dividend of $15 to B in 1963 with respect to such stock. A must include $21 in his gross income for 1963 under section 951(a)(1)(A)(i), such amount being determined as follows:

Corporation M's Subpart F income for 1963		$100
Less: Reduction under section 951(a)(2)(A) for period (1–1–63 through 5–26–63) during which M Corporation is not a controlled foreign corporation ($100×146/365)		40
Subpart F income for 1963 as limited by section 951(a)(2)(A)		60
A's pro rata share of subpart F income as determined under section 951 (a)(2)(A) (60 percent of $60)		36
Less: Reduction under section 951(a)(2)(B) for dividends received by B during 1963 with respect to the stock acquired by A in M Corporation:		
(i) Dividend received by B	15	

(ii) B's pro rata share of the amount which bears the same ratio to M Corporation's subpart F income for 1963 ($100) as the period during which A did not own (within the meaning of section 958(a)) his stock (146 days) bears to the entire taxable year (365 days) (60 percent of ($100×146/365))	24	
(iii) Amount of reduction (lesser of (i) or (ii))		15
A's pro rata share of Subpart F income as determined under section 951(a)(2)		21

Example 4. A, a United States shareholder, owns 100 percent of the only class of stock of P, a controlled foreign corporation throughout 1963, and P owns 100 percent of the only class of stock of R, a controlled foreign corporation throughout 1963. A and Corporations P and R each use the calendar year as a taxable year. For 1963, R Corporation derives $100 of subpart F income, has $100 of earnings and profits, and distributes a dividend of $20 to P Corporation. Corporation P has no income for 1963 other than the dividend received from R Corporation. A must include $100 in his gross income for 1963 under section 951(a)(1)(A)(i) as subpart F income of R Corporation for such year. Such subpart F income is not reduced under section 951(a)(2)(B) for the dividend of $20 paid to P Corporation because there was no part of the year 1963 during which A did not own (within the meaning of section 958(a)) the stock of R Corporation. By reason of the application of section 959(b), the $20 distribution from R Corporation to P Corporation is not again includible in the gross income of A under section 951(a).

Example 5. The facts are the same as in example 4, except that instead of holding the stock of R Corporation for the entire year, P Corporation acquires 60 percent of the only class of stock of R Corporation on March 14, 1963, from C, a nonresident alien, after R Corporation distributes in 1963 a dividend of $35 to C with respect to the stock so acquired by P Corporation. The stock interest so acquired by P Corporation was owned by C from January 1, 1963, until acquired by P Corporation. A must include $36 in his gross income for 1963 under section 951(a)(1)(A)(i), such amount being determined as follows:

Corporation R's Subpart F income for 1963		$100
Less: Reduction under section 951(a)(2)(A) for period (1–1–63 through 3–14–63) during which R Corporation is not a controlled foreign corporation ($100×73/365)		20
Subpart F income for 1963 as limited by section 951(a)(2)(A)		80
A's pro rata share of subpart F income as determined under section 951 (a)(2)(A) (60 percent of $80)		48
Less: Reduction under section 951(a)(2)(B) for dividends received by C during 1963 with respect to the stock indirectly acquired by A in R Corporation:		
(i) Dividend received by C	35	
(ii) C's pro rata share of the amount which bears the same ratio to R Corporation's Subpart F income for 1963 ($100) as the period during which A did not indirectly own (within the meaning of section 958(a)(2)) his stock (73 days) bears to the entire taxable year (365 days) (60 percent of ($100×73/365))	12	
(iii) Amount of reduction (lesser of (i) or (ii))		12
A's pro rata share of Subpart F income as determined under section 951 (a)(2)		36

(c) *Limitation on a United States shareholder's pro rata share of previously excluded subpart F income withdrawn from investments*—(1) *Investments in less developed countries.* For purposes of paragraph (a)(2)(ii) of this section, a United States shareholder's pro rata share (determined in accordance with the rules of paragraph (e) of this section) of the foreign corporation's previously excluded subpart F income withdrawn from investment in less developed countries for the taxable year of such corporation shall not exceed an amount which bears the same ratio to such shareholder's pro rata share of such income withdrawn (as determined under section 955(a)(3), as in effect before the enactment of the Tax Reduction Act of 1975, and paragraph (c) of § 1.955–1) for such taxable year as the part of such year during which such corporation is a controlled foreign corporation bears to the entire taxable year. See paragraph (c)(2) of § 1.955–1 for a special rule applicable to exclusions and withdrawals occurring before the date on which the United States shareholder acquires his stock.

(2) *Investments in foreign base company shipping operations.* For purposes of paragraph (a)(2)(iii) of this section, a United States shareholder's pro rata share (determined in accordance with the rules of paragraph (e) of this section) of the foreign corporation's previously excluded subpart F income withdrawn from investment in foreign base company shipping operations for the taxable year of such corporation shall not exceed an amount which bears the same ratio to such shareholder's pro rata share of such income withdrawn (as determined under section 955(a)(3) and paragraph (c) of § 1.955A–1) for such taxable year as the

part of such year during which such corporation is a controlled foreign corporation bears to the entire taxable year. See paragraph (c)(2) of §1.955A–1 for a special rule applicable to exclusions and withdrawals occurring before the date on which the United States shareholder acquires his stock.

(d) *Limitation on a United States shareholder's pro rata share of increase in investment in United States property.* For purposes of paragraph (a)(2)(iv) of this section, a United States shareholder's pro rata share (determined in accordance with the rules of paragraph (e) of this section) of the foreign corporation's increase in earnings invested in United States property for the taxable year of such corporation shall not exceed an amount which bears the same ratio to such shareholder's pro rata share of such increase (as determined under section 956(a)(2) and paragraph (c) of §1.956–1) for such taxable year as the part of such year during which such corporation is a controlled foreign corporation bears to the entire taxable year. The amount determined under the preceding sentence, however, shall be taken into account under paragraph (a)(2)(iv) of this section only to the extent such amount is not excluded from such shareholder's gross income for his taxable year under section 959(a)(2) and the regulations thereunder.

(e) *''Pro rata share'' defined*—(1) *In general.* For purposes of paragraphs (b), (c), and (d) of this section, a United States shareholder's pro rata share of a controlled foreign corporation's subpart F income, previously excluded subpart F income withdrawn from investment in less developed countries, previously excluded subpart F income withdrawn from investment in foreign base company shipping operations, or increase in earnings invested in United States property, respectively, for any taxable year is his pro rata share determined under paragraph (a) of §1.952–1, paragraph (c) of §1.955–1, paragraph (c) of §1.955A–1, or paragraph (c) of §1.956–1, respectively.

(2) *More than one class of stock.* If a controlled foreign corporation for a taxable year has more than one class of stock outstanding, the amount of such corporation's subpart F income, withdrawal, or increase in investment, for the taxable year which shall be taken into account with respect to any one class of such stock for purposes of subparagraph (1) of this paragraph shall be that amount which bears the same ratio to the total of such subpart F income, withdrawal, or increase in investment for such year as the earnings and profits which would be distributed with respect to such class of stock if all earnings and profits of such corporation for such year were distributed on the last day of such corporation's taxable year on which such corporation is a controlled foreign corporation bear to the total earnings and profits of such corporation for such taxable year. For purposes of the preceding sentence, if an arrearage in dividends for prior taxable years exists with respect to a class of preferred stock of such corporation, the earnings and profits for the taxable year shall be attributed to such arrearage only to the extent such arrearage exceeds the earnings and profits of such corporation remaining from prior taxable years beginning after December 31, 1962.

(3) *Discretionary power to allocate earnings to different classes of stock.* If the allocation of a foreign corporation's earnings and profits for the taxable year between two or more classes of stock depends upon the exercise of discretion by that body of persons which exercises with respect to such corporation the powers ordinarily exercised by the board of directors of a domestic corporation, the allocation of earnings and profits to such classes shall be made for purposes of this paragraph as if such classes constituted one class of stock in which each share has the same rights to dividends as any other share, unless a different method of allocation of earnings and profits is established as proper by the United States shareholder.

(4) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. Throughout its taxable year 1964, controlled foreign corporation A has outstanding 40 shares of common stock and 60 shares of 6-percent, nonparticipating, nonvoting, preferred stock with a par value of $100 per share. D, a United States citizen who uses the calendar year as a taxable year, owns 30 shares of the common, and 15 shares of the preferred, stock during 1964: Corporation A for 1964 has earnings and profits of $1,000, and income of $500 with respect to which amounts are required to be included in gross income of United States shareholders under section 951(a). In such case, if the total $1,000 of earnings and profits were distributed on December 31, 1964, $360 (0.06×$100×60) would be distributed with respect to A Corporation's preferred stock and $640 ($1,000 minus $360) would be distributed with respect to its common stock. Accordingly, of the $500 with respect to which amounts are required to be included in gross income of United States shareholders under section 951(a), $180 ($360/$1,000× $500) is allocated to the outstanding preferred stock and $320 ($640/$1,000×$500) is allocated to the outstanding common stock. D's pro rata share of such amounts for 1964 is $285 [($180×15/60)+($320× 30/40)].

Example 2. The facts are the same as in example 1, except that the preferred stock is cumulative and there is an arrearage in dividends with respect to such stock of $900; on December 31, 1963, Corporation A has accumulated earnings and profits for 1963 of $700; therefore, for purposes of this paragraph, Corporation A's earnings and profits for 1964 attributable to such arrearage may not exceed $200 ($900 minus $700). In such case, for purposes of this paragraph, if the $1,000 earnings and profits for 1964 were distributed on December 31, 1964, $560 [(0.06×$100×60)+$200] would be distributed with respect to A Corporation's preferred stock and $440 ($1,000 minus $560) would be distributed with respect to its common stock. Accordingly, of the $500 with respect to which amounts are required to be included in gross income of United States shareholders under section 951 (a), $280 ($560/$1,000×$500) is allocated to the outstanding preferred stock and $220 ($440/$1,000×$500) is allocated to the outstanding common stock. D's pro rata share of such amounts for 1964 is $235 [($280×15/ 60)+($220×30/40)].

(f) *Determination of holding period.* For purposes of sections 951 through 964, the holding period of an asset (including stock of a controlled foreign corporation) shall be determined by excluding the day on which such asset is acquired and including the day on which such asset is disposed of. The application of this paragraph may be illustrated by the following example:

Example. On June 30, 1963, United States person E acquires 70 of the 100 shares of the only class of stock of foreign corporation A from nonresident alien B, who until such time owns all such 100 shares. E sells 10 shares of stock of such corporation on November 30, 1963, and 60 shares on December 31, 1963, to nonresident alien F. Corporation A is a controlled foreign corporation for the period beginning with July 1, 1963, and extending through December 31, 1963. As to the 10 shares of stock sold on November 30, 1963, E is treated as not owning such shares at any time after November 30, 1963, nor before July 1, 1963. As to the remaining 60 shares of stock, E is treated as not owning them before July 1, 1963, or after December 31, 1963.

(g) *United States shareholder defined*—(1) *In general.* For purposes of sections 951 through 964, the term ''United States shareholder'' means, with respect to a foreign corporation, a United States person (as defined in section 957(d)) who owns within the meaning of section 958(a), or is considered as owning by applying the rules of ownership of section 958(b), 10 percent or more of the total combined voting power of all classes of stock entitled to vote of such foreign corporation.

(2) *Percentage of total combined voting power owned by United States person*—(i) *Meaning of combined voting power.* In determining for purposes of subparagraph (1) of this paragraph whether a United States person owns the requisite percentage of voting power of all classes of stock entitled to vote, consideration will be given to all the facts and circumstances in each case. In any case where—

(a) A foreign corporation has more than one class of stock outstanding, and

(b) One or more United States persons own (within the meaning of section 958) shares of any one class of stock which possesses the power to elect, appoint, or replace a person, or persons, who with respect to such corporation, exercise the powers ordinarily exercised by a member of the board of directors of a domestic corporation,

the percentage of the total combined voting power with respect to such corporation owned by any such United States person shall be his proportionate share of the percentage of the persons exercising the powers ordinarily exercised by members of the board of directors of a domestic corporation (described in *(b)* of this subdivision) which such class of stock (as a class) possesses the power to elect, appoint, or replace. In all cases, however, a United States person will be deemed to own 10 percent or more of the total combined voting power with respect to a foreign corporation if such person owns (within the meaning of section 958) 20 percent or more of the total number of shares of a class of stock of such corporation possessing one or more powers enumerated in paragraph (b)(1) of § 1.957–1. Whether a foreign corporation is a controlled foreign corporation for purposes of sections 951 through 964 shall be determined by applying the rules of section 957 and §§ 1.957–1 through 1.957–4.

(ii) *Illustration.* The application of this paragraph may be illustrated by the following examples:

Example 1. Foreign corporation S has two classes of capital stock outstanding, consisting of 60 shares of class A stock and 40 shares of class B stock. Each class of the outstanding stock is entitled to participate on a share for share basis in any dividend distributions by S Corporation. The owners of a majority of the class A stock are entitled to elect 7 of the 10 corporate directors, and the owners of a majority of the class B stock are entitled to elect the other 3 of the 10 directors. Thus, the class A stock (as a class) possesses 70 percent of the total combined voting power of all classes of stock entitled to vote of S Corporation, and the class B stock (as a class) possesses 30 percent of such voting power. D, a United States person, owns 31 shares of the class A stock and thus owns 36,167 percent (31/60×70 percent) of the total combined voting power of all classes of stock entitled to vote of S Corporation. By reason of the ownership of such voting power, D is a United States shareholder of S Corporation under section 951(b). For purposes of section 957, S Corporation is a controlled foreign corporation by reason of D's ownership of a majority of the class A stock, as illustrated in example 2 of paragraph (c) of § 1.957–1. E, a United States person, owns eight shares of the class A stock and thus owns 9.333 percent (8/60×70 percent) of the total combined voting power of all classes of stock entitled to vote of S Corporation. Since E owns only 9.333 percent of such voting power and less than 20 percent of the number of shares of the class A stock, he is not a United States shareholder of S Corporation under section 951(b). F, a United States person, owns 14 shares of the class B stock and thus owns 10.5 percent (14/40×30 percent) of the total combined voting power of all classes of stock entitled to vote of S Corporation. By reason of the ownership of such voting power, F is a United States shareholder of S Corporation under section 951(b).

Example 2. Foreign corporation R has three classes of stock outstanding, consisting of 10 shares of class A stock, 20 shares of class B stock, and 300 shares of class C stock. Each class of the outstanding stock is entitled to participate on a share for share basis in any distribution by R Corporation. The owners of a majority of the class A stock are entitled to elect 6 of the 10 corporate directors, and the owners of a majority of the class B stock are entitled to elect the other 4 of the 10 directors. The class C stock is not entitled to vote. D, E, and F, United States persons, each own 2 shares of the class A stock and 100 shares of the class C stock. As owners of a majority of the class A stock, D, E, and F elect 6 members of the board of directors. D, E, and F are United States shareholders of R Corporation under section 951(b) since each owns 20 percent of the total number of shares of the class A stock which possesses the power to elect a majority of the board of directors of R Corporation. For purposes of section 957, R Corporation is a controlled foreign corporation by reason of the ownership by D, E, and F of a majority of the class A stock, as illustrated in example 2 of paragraph (c) of § 1.957–1.

[T.D. 6795, 30 FR 935, Jan. 29, 1965, as amended by T.D. 7893, 48 FR 22507, May 19, 1983]

§ 1.951–2 Coordination of subpart F with election of a foreign investment company to distribute income.

A United States shareholder who for his taxable year is a qualified shareholder (within the meaning of section 1247(c)) of a foreign investment company with respect to which an election under section 1247(a) and the regulations thereunder is in effect for the taxable year of such company which ends with or within such taxable year of such shareholder shall not be required to include any amount in his gross income for his taxable year under paragraph (a) of § 1.951–1 with respect to such company for that taxable year of such company.

[T.D. 6795, 30 FR 937, Jan. 29, 1965]

§ 1.951–3 Coordination of subpart F with foreign personal holding company provisions.

A United States shareholder (as defined in section 951(b)) who is required under section 551(b) to include in his gross income for his taxable year his share of the undistributed foreign personal holding company income for the taxable year of a foreign personal holding company (as defined in section 552) which for that taxable year is a controlled foreign corporation (as defined in section 957) shall not be required to include in his gross income for his taxable year under section 951(a) and paragraph (a) of § 1.951–1 any amount attributable to the earnings and profits of such corporation for that taxable year of such corporation. If a foreign corporation is both a foreign personal holding company and a controlled foreign corporation for the same period which is only a part of its taxable year, then, for purposes of applying the immediately preceding sentence, such corporation shall be deemed to be, for such part of such year, a foreign personal holding company and not a controlled foreign corporation and the earnings and profits of such corporation for the taxable year shall be deemed to be that amount which bears the same ratio to its earnings and profits for the taxable year as such part of the taxable year bears to the entire taxable year. The application of this section may be illustrated by the following examples:

Example 1. A, a United States shareholder, owns 100 percent of the only class of stock of controlled foreign corporation M which, in turn, owns 100 percent of the only class of stock of controlled foreign corporation N. A and Corporations M and N use the calendar year as a taxable year. During 1963, N Corporation derives $40,000 of gross income all of which is foreign personal holding company income within the meaning of section 553; thus, N Corporation is a foreign personal holding company for such year within the meaning of section 552(a). For 1963, N Corporation has undistributed foreign personal holding company income (as defined in section 556(a)) of $30,000, derives $25,000 of subpart F income, and has earnings and profits of $32,000. During 1963, M Corporation derives $100,000 of gross income (including as a dividend under section 555(c)(2) the $30,000 of N Corporation's undistributed foreign personal holding company income), 65 percent of which is foreign personal holding company income within the meaning of section 553. Therefore, M Corporation is a foreign personal holding company for such year. For 1963, M Corporation has undistributed foreign personal holding company income (as defined in section 556(a)) of $90,000, determined by taking into account under section 552(c)(1) N Corporation's $30,000 of undistributed foreign personal holding company income for such year; in addition, M Corporation derives $50,000 of subpart F income and has earnings and profits of $92,000. Neither M Corporation nor N Corporation makes any actual distributions during 1963. A is required under section 551(b) to include in his gross income for 1963 as a dividend the $90,000 of M Corporation's undistributed foreign personal holding company income for such year. For 1963, A is not required to include in his gross income under section 951(a) any of the $50,000 subpart F income of M Corporation or of the $25,000 subpart F income of N Corporation.

Example 2. The facts are the same as in example 1, except that only 45 percent of M Corporation's gross income (determined by including under section 555(c)(2) the $30,000 of N Corporation's undistributed foreign personal holding company income) is foreign personal holding company income within the meaning of section 553; accordingly, M Corporation is not a foreign personal holding company for 1963. Since for such year M Corporation is not a foreign personal holding company, the undistributed foreign personal holding company income ($30,000) of N Corporation is not required under section 555(b) to be included in the gross income of M Corporation for 1963; as a result, such income is not required under section 551(b) to be included in the gross income of A for such year even though N Corporation is a foreign personal holding company for that year. For 1963, A is required to include $75,000 in his gross income under section 951(a)(1)(A)(i) and paragraph (a) of § 1.951–1, consisting of the $50,000 subpart F income of M Corporation and the $25,000 subpart F income of N Corporation.

Example 3. The facts are the same as in example 1, except that in 1963 N Corporation actually distributes $30,000 to M Corporation and M Corporation, in turn, actually distributes $90,000 to A. Under section 556 the undistributed foreign personal holding company income of both M corporation and N Corporation is thus reduced to zero; accordingly, no amount is included in the gross income of A under section 551(b) by reason of his interest in corporations M and N. A must include $75,000 in his gross income for 1963 under section 951(a)(1)(A)(i) and paragraph (a) of § 1.951–1, consisting of the $50,000 subpart F income of M Corporation and the $25,000 subpart F income of N Corporation. Of the $90,000 distribution received by A from M Corporation, $75,000 is excludable from his gross income under section 959(a)(1) as previously taxed earnings and profits; the remaining $15,000 is includible in his gross income for 1963 as a dividend.

Example 4. (a) A, a United States shareholder, owns 100 percent of the only class of stock of controlled foreign corporation P, organized on January 1, 1963. Both A and P Corporation use the calendar year as a taxable year. During 1963, 1964, and 1965, P Corporation is not a foreign personal holding company as defined in section 552(a); in each of such years, P Corporation derives dividend income of $10,000 which constitutes foreign personal holding company income (within the meaning of §1.954–2) but under 26 CFR 1.954–1(b)(1) (Revised as of April 1, 1975) excludes such amounts from foreign base company income as dividends received from, and reinvested in, qualified investments in less developed countries. Corporation P's earnings and profits accumulated for 1963, 1964, and 1965 and determined under paragraph (b)(2) of §1.955–1 are $40,000. For 1966, P Corporation is a foreign personal holding company, has predistribution earnings and profits of $10,000, derives $10,000 of income which is both foreign personal holding company income within the meaning of section 553 and subpart F income within the meaning of section 952, distributes $8,000 to A, and has undistributed foreign personal holding company income of $2,000 within the meaning of section 556. In addition, for 1966 P Corporation has a withdrawal (determined under section 955(a) as in effect before the enactment of the Tax Reduction Act of 1975 but without regard to its earnings and profits for such year) of $25,000 of previously excluded subpart F income from investment in less developed countries. A is required under section 551(b) to include in his gross income for 1966 as a dividend the $2,000 undistributed foreign personal holding company income. The $8,000 distribution is includible in A's gross income for 1966 under sections 61(a)(7) and 301 as a distribution to which section 316(a)(2) applies. Corporation P's $25,000 withdrawal of previously excluded subpart F income from investment in less developed countries is includible in A's gross income for 1966 under section 951(a)(1)(A)(ii) and paragraph (a)(2) of §1.951–1.

(b) If P Corporation's earnings and profits accumulated for 1963, 1964, and 1965 were $15,000, instead of $40,000, the result would be the same as in paragraph (a) of this example, except that a withdrawal of only $15,000 of previously excluded subpart F income from investment in less developed countries would be includible in A's gross income for 1966 under section 951(a)(1)(A)(ii) and paragraph (a)(2) of §1.951–1.

(c) The principles of this example also apply to withdrawals (determined under section 955(a), as in effect before the enactment of the Tax Reduction Act of 1975) of previously excluded subpart F income from investment in less developed countries effected after the effective date of such Act, and to withdrawals (determined under section 955(a), as amended by such Act) of previously excluded subpart F income from investment in foreign base company shipping operations.

Example 5. (a) The facts are the same as in paragraph (a) of example 4, except that, instead of having a $25,000 decrease in qualified investments in less developed countries for 1966, P Corporation invests $20,000 in tangible property (not described in section 956(b)(2)) located in the United States and such investment constitutes an increase (determined under section 956(a) but without regard to the earnings and profits of P Corporation for 1966) in earnings invested in United States property. Corporation P's earnings and profits accumulated for 1963, 1964, and 1965 and determined under paragraph (b)(1) of §1.956–1 are $22,000. The result is the same as in paragraph (a) of example 4, except that instead of including the $25,000 withdrawal, A must include $20,000 in his gross income for 1966 under section 951(a)(1)(B) and paragraph (a)(2)(iv) of §1.951–1 as an investment of earnings in United States property.

(b) If P Corporation's earnings and profits accumulated for 1963, 1964, and 1965 were $9,000 instead of $22,000, the result would be the same as in paragraph (a) of this example, except that only $9,000 would be includible in A's gross income for 1966 under section 951(a)(1)(B) and paragraph (a)(2)(iv) of §1.951–1 as an investment of earnings in United States property.

[T.D. 6795, 30 FR 937, Jan. 29, 1965, as amended by T.D. 7893, 48 FR 22508, May 19, 1983]

§1.952–1 Subpart F income defined.

(a) *In general.* For purposes of sections 951 through 964, a controlled foreign corporation's subpart F income for any taxable year shall, except as provided in paragraph (b) of this section and subject to the limitations of paragraphs (c) and (d) of this section, consist of the sum of—

(1) The income derived by such corporation for such year from the insurance of United States risks (determined in accordance with the provisions of section 953 and §§1.953–1 through 1.953–6),

(2) The income derived by such corporation for such year which constitutes foreign base company income (determined in accordance with the provisions of section 954 and §§1.954–1 through 1.954–8),

(3)(i) An amount equal to the product of—

(A) The income of such corporation other than income which—

(*1*) Is attributable to earnings and profits of the foreign corporation included in the gross income of a United States person under section 951 (other than by reason of this paragraph) (determined in accordance with the provisions of section 951 and §1.951–1), or

(*2*) Is described in section 952(b),

multiplied by

(B) The international boycott factor determined in accordance with the provisions of section 999(c)(1), or

(ii) In lieu of the amount determined under paragraph (a)(3)(i) of this section, the amount described under section 999(c)(2) of such international boycott income, and

(4) The sum of the amount of any illegal bribes, kickbacks, or other payments paid after November 3, 1976, by or on behalf of the corporation during the taxable year of the corporation directly or indirectly to an official, employee, or agent in fact of a government. An amount is paid by a controlled foreign corporation where it is paid by an officer, director, employee, shareholder or agent of such corporation for the benefit of such corporation. For purposes of this section, the principles of section 162(c) and the regulations thereunder shall apply. In the case of payments made after September 3, 1982, a payment is illegal if the payment would be unlawful under the Foreign Corrupt Practices Act of 1977 if the payor were a United States person. The fair market value of an illegal payment made in the form of property or services shall be considered the amount of such illegal payment.

Pursuant to section 951(a)(1)(A)(i) and § 1.951–1, a United States shareholder of such controlled foreign corporation must include his pro rata share of such subpart F income in his gross income for his taxable year in which or with which such taxable year of the foreign corporation ends. See section 952(a). However, see paragraph (a) of § 1.957–2 for special rule limiting the subpart F income to the income derived from the insurance of United States risks in the case of certain controlled foreign corporations described in section 957(b).

(b) *Exclusion of U.S. income*—(1) *Taxable years beginning before January 1, 1967.* For rules applicable to taxable years beginning before January 1, 1967, see 26 CFR 1.952–1(b)(1) (Revisedof April 1, 1975).

(2) *Taxable years beginning after December 31, 1966.* Notwithstanding paragraph (a) of this section, a controlled foreign corporation's subpart F income for any taxable year beginning after December 31, 1966, shall not include any item of income from sources within the United States which is effectively connected for that year with the conduct by such corporation of a trade or business in the United States unless, pursuant to a treaty to which the United States is a party, such item of income either is exempt from the income tax imposed by chapter 1 (relating to normal taxes and surtaxes) of the Code or is subject to such tax at a reduced rate.

Thus, for example, dividends received from sources within the United States by a foreign corporation engaged in business in the United States during the taxable year, which are not effectively connected for that year with the conduct of a trade or business in the United States by that corporation, shall not be excluded from subpart F income under section 952(b) and this subparagraph even though such dividends are subject to the tax of 30 percent imposed by section 881 (a). Also, for example, if, by reason of an income tax convention to which the United States is a party, an amount of interest from sources within the United States which is effectively connected for the taxable year with the conduct of a business in the United States by a foreign corporation is subject to tax under chapter 1 at a flat rate of 15 percent, as provided in § 1.871–12, such interest is not excluded from subpart F income under section 952(b) and this subparagraph. The deductions attributable to items of income which are excluded from subpart F income under this subparagraph shall not be taken into account for purposes of section 952.

(3) *Rule applicable under section 956 (b)(2).* For purposes only of paragraph (b)(1))(viii) of § 1.956–2, an item of income derived by a controlled foreign corporation from sources within the United States with respect to which for the taxable year a tax is imposed in accordance with section 882(a) shall be considered described in section 952(b) whether or not such item of income would have constituted subpart F income for such year.

(c) *Limitation on a controlled foreign corporation's subpart F income*—(1) *In general.* A United States shareholder's pro rata share (determined in accordance with the rules of paragraph (e) of

§1.951–1) of a controlled foreign corporation's subpart F income for any taxable year shall not exceed his pro rata share of the earnings and profits (as defined in section 964(a) and §1.964–1) of such corporation for such taxable year, computed as of the close of such taxable year without diminution by reason of any distributions made during such taxable year, minus the sum of—

(i) The amount, if any, by which such shareholder's pro rata share of—

(a) The sum of such corporation's deficits in earnings and profits for prior taxable years beginning after December 31, 1962, plus

(b) The sum of such corporation's deficits in earnings and profits for taxable years beginning after December 31, 1959, and before January 1, 1963 (reduced by the sum of the earnings and profits (as so defined) of such corporation for any of such taxable years) exceeds

(c) The sum of such corporation's earnings and profits for prior taxable years beginning after December 31, 1962, which, with respect to such shareholder, are allocated to other earnings and profits under section 959(c)(3) and §1.959–3; and

(ii) Such shareholder's pro rata share of any deficits in earnings and profits of other foreign corporations for a taxable year beginning after December 31, 1962, which are attributable to stock of such other foreign corporations owned by such shareholder within the meaning of section 958(a) and which, in accordance with section 952(d) and paragraph (d) of this section, are taken into account as a reduction in the controlled foreign corporation's earnings and profits for such taxable year.

For purposes of applying this subparagraph, the reduction (if any) provided by subdivision (i) of this subparagraph in a United States shareholder's pro rata share of the earnings and profits of a controlled foreign corporation shall be taken into account before the reduction provided by subdivision (ii) of this subparagraph. See section 952(c).

(2) *Special rules.* For purposes only of determining the limitation under subparagraph (1) of this paragraph on a United States shareholder's pro rata share of a controlled foreign corporation's subpart F income for any taxable year—

(i) *Status of foreign corporation.* The earnings and profits, or deficit in earnings and profits, of a foreign corporation for any taxable year shall be taken into account whether or not such foreign corporation is a controlled foreign corporation at the time such earnings and profits are derived or such deficit in earnings and profits is incurred.

(ii) *Deficits in earnings and profits taken into account only once.* A controlled foreign corporation's deficit in earnings and profits for any taxable year preceding the taxable year shall be taken into account for the taxable year only to the extent such deficit has not been taken into account under this paragraph, paragraph (d) of this section, or paragraph (d)(2)(ii) of §1.963–2 (applied as if section 963 had not been repealed by the Tax Reduction Act of 1975) in computing a minimum distribution, for any taxable year preceding the taxable year, to reduce earnings and profits of such preceding year of such controlled foreign corporation or of any other controlled foreign corporation. To the extent a controlled foreign corporation's (the ''first corporation'') excess foreign base company shipping deductions for any taxable year (determined under §1.955A–3(c)(2)(i)) reduce the foreign base company shipping income of another member of a related group (as defined in §1.955A–2(b)), such deductions shall not be taken into account in determining the earnings and profits or deficits in earnings and profits of such first corporation for such taxable year for purposes of this paragraph (c) and paragraph (d) of this section. The rule of the preceding sentence shall not apply to the extent the excess foreign base company shipping deductions of the first corporation reduce the foreign base company shipping income of another member of a related group below zero.

(iii) *Determination of pro rata share.* A United States shareholder's pro rata share of a controlled foreign corporation's earnings and profits, or deficit in earnings and profits, for any taxable year shall be determined in accordance with the principles of paragraph (e) of § 1.951–1 and paragraph (d)(2)(ii) of § 1.963–2.

(3) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. (a) A is a United States shareholder who owns 100 percent of the only class of stock of M Corporation, a controlled foreign corporation organized on January 1, 1963. Both A and M Corporation use the calandar year as a taxable year.

(b) During 1963, M Corporation derives $20,000 of subpart F income and has earnings and profits of $30,000. Corporation M makes no distributions to A during such year. The limitation under section 952(c) on M Corporation's subpart F income for 1963 is $30,000; and $20,000 is includible in A's gross income for such year under section 951(a)(1)(A)(i).

(c) On January 1, 1964, M Corporation acquires 100 percent of the only class of stock of N Corporation, a controlled foreign corporation which uses the calendar year as a taxable year. During 1964, N Corporation derives $6,000 of subpart F income, has $7,000 of earnings and profits, and distributes $5,000 to M Corporation. The limitation under section 952(c) on N Corporation's subpart F income for 1964 is $7,000; and $6,000 of subpart F income is includible in A's gross income for such year under section 951(a)(1)(A)(i).

(d) During 1964, M Corporation derives $8,000 of rents which constitute subpart F income, makes a $10,000 distribution to A, and has earnings and profits of $12,000 (including the $5,000 dividend received from N Corporation). The limitation under section 952(c) on M Corporation's subpart F income for 1964 is $7,000, determined as follows:

Corporation M's earnings and profits for 1964 (determined under section 964(a) and § 1.964–1 as of the close of such year without diminution for any distributions made during such year)	$12,000
Less: Corporation M's earnings and profits for 1964 described in section 959(b)	5,000
Limitation on M Corporation's Subpart F income for 1964	7,000

Thus, for 1964 with respect to A's interest in M Corporation, $7,000 of subpart F income is includible in his gross income under section 951(a)(1)(A)(i). The $10,000 dividend received from M Corporation is excludible from A's gross income for 1964 under section 959(a)(1) and paragraph (b) of § 1.959–1.

Example 2. A is a United States shareholder who owns 100 percent of the only class of stock of R Corporation which was organized on January 1, 1961. R Corporation is a controlled foreign corporation for the entire period after December 31, 1962, here involved. Both A and R Corporation use the calendar year as a taxable year. During 1963, R Corporation derives $25,000 of subpart F income and has $50,000 of earnings and profits. Corporation R has $15,000 of earnings and profits for 1961, and a deficit in earnings and profits of $45,000 for 1962. Thus, R Corporation has as of December 31, 1963, a net deficit in earnings and profits of $30,000 for the years 1961 and 1962. Corporation R makes no distributions to A during 1963. The limitation under section 952(c) on R Corporation's subpart F income for 1963 is $20,000 ($50,000 minus $30,000), and $20,000 of subpart F income is includible in A's gross income for 1963 under section 951(a)(1)(A)(i). During 1964, R Corporation derives $18,000 of subpart F income and has $30,000 of earnings and profits. Corporation R makes no distributions to A during 1964. The entire $18,000 of subpart F income is includible in A's gross income for 1964 under section 951(a)(1)(A)(i).

(d) *Treatment of deficits in earnings and profits attributable to stock of other foreign corporation indirectly owned by a United States shareholder*—(1) *In general.* For purposes of paragraph (c)(1)(ii) of this section, if—

(i) A United States shareholder owns (within the meaning of section 958(a)) stock in two or more foreign corporations in a chain of foreign corporations (as defined in subparagraph (2)(ii) of this paragraph), and

(ii) Any of the corporations in such chain has a deficit in earnings and profits for a taxable year beginning after December 31, 1962,

then, with respect to such shareholder and only for purposes of determining the limitation on subpart F income under paragraph (c) of this section, the earnings and profits for the taxable year of each such foreign corporation which is a controlled foreign corporation shall, in accordance with the rules of subparagraph (2) of this paragraph, be reduced to take into account any deficit in earnings and profits referred to in subdivision (ii) of this subparagraph. See section 952(d).

(2) *Special rules.* For purposes of this paragraph—

(i) *Applicable rules.* The special rules set forth in paragraph (c)(2) of this section shall apply.

(ii) *''Chain'' defined.* A chain of foreign corporations shall, with respect to a United States shareholder, include—

(a) Any foreign corporation in which such shareholder owns (within the meaning of section 958(a)(1)(A)) stock

but, only to the extent of the stock so owned and

(b) All foreign corporations in which such shareholder owns (within the meaning of section 958(a)(2)) stock, but only to the extent of the stock so owned by reason of his ownership of the stock referred to in *(a)* of this subdivision.

(iii) *Allocation of deficit.* If one or more foreign corporations (whether or not a controlled foreign corporation) includible in a chain of foreign corporations has a deficit in earnings and profits (determined under section 964(a) and §1.964–1) for the taxable year, the amount of deficit taken into account under section 952(d) with respect to a United States shareholder in such chain as a reduction in earnings and profits for the taxable year of a controlled foreign corporation includible in such chain shall be an amount which bears the same ratio to such shareholder's pro rata share of the total deficit in earnings and profits for the taxable year of all includible foreign corporations as his pro rata share of the earnings and profits (determined under paragraph (c) of this section but without regard to the provisions of subparagraph (1)(ii) of such paragraph) for the taxable year of such includible controlled foreign corporation bears to his pro rata share of the total earnings and profits (as so determined under paragraph (c) of this section) for the taxable year of all includible controlled foreign corporations. The amount of deficit taken into account under this subdivision with respect to any controlled foreign corporation includible in a chain of foreign corporations shall not exceed the United States shareholder's pro rata share of the controlled foreign corporation's earnings and profits for the taxable year.

(iv) *Taxable year.* The taxable year from which a deficit is allocated under this paragraph, and the taxable year to which such deficit is allocated to reduce earnings and profits, shall be the taxable year of the foreign corporation ending with or within the taxable year of the United States shareholder described in subparagraph (1)(i) of this paragraph.

(3) *Illustration.* The application of this paragraph may be illustrated by the following examples:

Example 1. (a) Domestic corporation M owns 100 percent, 20 percent, and 100 percent, respectively, of the only class of stock of foreign corporations A, B, and F, respectively. Corporation A owns 80 percent of the only class of stock of each of foreign corporations B and C, respectively. Corporation F owns 20 percent of such stock of C Corporation. Corporation B owns 75 percent of the only class of stock of foreign corporation D, and 50 percent of the only class of stock of each of foreign corporations G and H, respectively. C Corporation owns 75 percent of the only class of stock of foreign corporation E. All the corporations use the calendar year as a taxable year, and all of the foreign corporations, except corporations G and H, are controlled foreign corporations throughout the period here involved.

(b) The subpart F income, and the earnings and profits (determined under paragraph (c) of this section but without regard to subparagraph (1)(ii) of such paragraph) or deficit in earnings and profits (determined under section 964(a) and §1.964–1), of each of the foreign corporations for 1963 are as follows, the deficits being set forth in parentheses:

	Subpart F income	Earnings and profits (deficits)
A Corporation	$6,000	$18,000
B Corporation	....	(7,500)
C Corporation	....	(2,500)
D Corporation	4,000	5,000
E Corporation	12,000	15,000
F Corporation	8,000	20,250
G Corporation	....	(10,000)
H Corporation	....	7,000

(c) The chains of foreign corporations (within the meaning of subparagraph (2)(ii) of this paragraph) for 1963 are the ''A'' chain, consisting of corporations, A, B, C, D, E, G, and H, but only to the extent of M Corporation's stock interest in such corporations under section 958(a) by reason of its ownership of stock in A Corporation; the ''B'' chain, consisting of corporations B, D, G, and H, but only to the extent of M Corporation's stock interest in such corporations under section 958(a) by reason of its ownership of stock in B Corporation; and the ''F'' chain, consisting of corporations F, C, and E, but only to the extent of M Corporation's stock interest in such corporations under section 958(a) by reason of its ownership of stock in F Corporation.

(d) Corporation M's stock interest under section 958(a) in each of the chains of foreign corporations is as follows for 1963:

[In percent]

	A	B	C	D	E	F	G	H
A chain:								
Direct interest	100							
(100%×80%)		80						
(100%×80%)			80					
(80%×75%)				60				
(80%×75%)					60			
(80%×50%)							40	
(80%×50%)								40
B chain:								
Direct interest		20						
(20%×75%)				15				
(20%×50%)							10	
(20%×50%)								10
F chain:								
Direct interest						100		
(100%×20%)			20					
(20%×75%)					15			
Total interests	100	100	100	75	75	100	50	50

(e) Corporation M's pro rata share of the earnings and profits (determined under paragraph (c) of this section but without regard to subparagraph (1)(ii) of such paragraph), or of the deficit, of each controlled foreign corporation of each foreign corporation, respectively, includible in the respective chains for 1963 is as follows:

	Earnings and profits	Deficit
A chain:		
A Corporation (100%)	$18,000	
B Corporation (80%)		($6,000)
C Corporation (80%)		(2,000)
D Corporation (60%)	3,000	
E Corporation (60%)	9,000	
G Corporation (40%)		(4,000)
H Corporation (40%)	[1]	
Total	30,000	(12,000)
B chain:		
B Corporation (20%)		($1,500)
D Corporation (15%)	$750	
G Corporation (10%)		(1,000)
H Corporation (10%)	[1]	
Total	$750	($2,500)
F chain:		
F Corporation (100%)	20,250	
C Corporation (20%)		(500)
E Corporation (15%)	2,250	
Total	$22,500	(500)

[1] The earnings and profits of H Corporation are not included in the total earnings and profits for the chain because H Corporation is not a controlled foreign corporation.

(f) The amount by which M Corporation's pro rata share of the earnings and profits for 1963 of the controlled foreign corporations in each respective chain shall be reduced under section 952(d) by M Corporation's pro rata share of the deficits of corporations B, C, and G for 1963 is determined as follows:

		Amount of reduction
A chain:		
A Corporation ($12,000×$18,000/$30,000)		$7,200
D Corporation ($12,000×$3,000/$30,000)		1,200
E Corporation ($12,000×$9,000/$30,000)		3,600
Total		12,000
B chain:		
D Corporation ($2,500×$750/$750)	$2,500	
Limitation: M Corporation's pro-rata share of D Corporation's earnings and profits	750	
Allocation of used deficit ($750) to M Corporation's pro rata share of the deficits of corporations B and G:		
B Corporation ($750×($1,500/$2,500))	$450	
G Corporation ($750×($1,000/$2,500))	300	
Total	750	$750
F chain:		
F Corporation ($500×$20,250/$22,500)		450
E Corporation ($500×$2,250/$22,500)		50
Total		500

(g) Corporation M's pro rata share of the earnings and profits (determined after reduction for deficits under section 952(d)) for 1963 of each controlled foreign corporation in the respective chains, determined on a chain-by-chain basis, is determined as follows:

	Earnings and profits before reduction	Reduction (sec. 952(d))	Reduced earnings and profits
A chain:			
A Corporation	$18,000	$7,200	$10,800
D Corporation	3,000	1,200	1,800

	Earnings and profits before reduction	Reduction (sec. 952(d))	Reduced earnings and profits
E Corporation	9,000	3,600	5,400
B chain: D Corporation	750	750	
F chain:			
F Corporation	20,250	450	19,800
E Corporation	2,250	50	2,200

(h) Corporation M's pro rata share of each controlled foreign corporation's subpart F income, limited as provided by section 952(c) and paragraph (c) of this section, for 1963 which is includible in its gross income for such year under section 951(a)(1)(A)(i) and §1.951–1 is determined as follows:

	Subpart F income (before limitation)	Earnings and profit (sec. 952 (c))	Amount includible in income
A Corporation (100%)	$6,000	$10,800	$6,000
D Corporation (75%)	3,000	1,800	1,800
E Corporation (75%)	9,000	7,600	7,600
F Corporation (100%)	8,000	19,800	8,000
Total includible under sec. 951(a)(1)(A)(i)			23,400

Example 2. The facts are the same as in example 1 except that, in addition, for 1964, foreign corporations C, D, and E have no subpart F income and no earnings and profits and foreign corporations G and H have no earnings and profits. For 1964, B Corporation has subpart F income of $1,000 and earnings and profits (determined in accordance with section 964(a) and §1.964–1) of $1,500; A Corporation has subpart F income of $800 and earnings and profits of $1,000; and F Corporation has subpart F income of $500 and earnings and profits of $1,000. Such earnings and profits are determined without regard to distributions for 1964. Corporation B has an unused deficit in earnings and profits of $1,050 for 1963 ($1,500 minus $450) applicable to M Corporation's interest in such corporation (paragraph (f) of example 1), and, under paragraph (c)(1)(i)*(a)* of this section, with respect to M Corporation, such deficit reduces B Corporation's earnings and profits for 1964 to $450. Inasmuch as G Corporation is not a controlled foreign corporation for 1964, such corporation's unused deficit in earnings and profits of $700 for 1963 ($1,000 minus $300) applicable to M Corporation's interest in such corporation (paragraph (f) of example 1) may be used under paragraph (c)(1)(i)*(a)* of this section to reduce M Corporation's interest in G Corporation's earnings and profits in a later year or years for which G Corporation is a controlled foreign corporation. Corporation M's pro rata share of each controlled foreign corporation's subpart F income, limited as provided by section 952(c) and paragraph (c) of this section, for 1964 which is includible in its gross income for such year under section 951(a)(1)(A)(i) and §1.951–1 is determined as follows:

	Subpart F income (before limitation)	Earnings and profits (sec. 952(c))	Amount includible in income
A Corporation	$800	$1,000	$800
B Corporation	1,000	450	450
F Corporation	500	1,000	500

Example 3. The facts are the same as in example 2, except that for 1964 B Corporation has subpart F income of $550 and earnings and profits (determined in accordance with section 964(a) and §1.964–1) of $550; such earnings and profits are determined without regard to distributions for 1964. Under paragraph (c)(1)(i)(a) of this section, B Corporation's unused deficit of $1,050 for 1963 reduces its earnings and profits for 1964 with respect to M Corporation to zero. The remaining $500 of the unused deficit for 1963 applicable to M Corporation's interest in B Corporation may be used under paragraph (c)(1)(i)*(a)* of this section in later years to reduce M Corporation's interest in B Corporation's earnings and profits.

(e) *Application of current earnings and profits limitation*—(1) *In general.* If the subpart F income (as defined in section 952(a)) of a controlled foreign corporation exceeds the foreign corporation's earnings and profits for the taxable year, the subpart F income includible in the income of the corporation's United States shareholders is reduced under section 952(c)(1)(A) in accordance with the following rules. The excess of subpart F income over current year earnings and profits shall—

(i) First, proportionately reduce subpart F income in each separate category of the controlled foreign corporation, as defined in §1.904–5(a)(1), in which current earnings and profits are zero or less than zero;

(ii) Second, proportionately reduce subpart F income in each separate category in which subpart F income exceeds current earnings and profits; and

(iii) Third, proportionately reduce subpart F income in other separate categories.

(2) *Allocation to a category of subpart F income.* An excess amount that is allocated under paragraph (e)(1) of this section to a separate category must be further allocated to a category of subpart F income if the separate category contains more than one category of subpart F income described in section

952(a) or, in the case of foreign base company income, described in § 1.954–1(c)(1)(iii)(A) (*1*) or (*2*). In such case, the excess amount that is allocated to the separate category must be allocated to the various categories of subpart F income within that separate category on a proportionate basis.

(3) *Recapture of subpart F income reduced by operation of earnings and profits limitation.* Any amount in a category of subpart F income described in section 952(a) or, in the case of foreign base company income, described in § 1.954–1(c)(1)(iii)(A) (*1*) or (*2*) that is reduced by operation of the current year earnings and profits limitation of section 952(c)(1)(A) and this paragraph (e) shall be subject to recapture in a subsequent year under the rules of section 952(c)(2) and paragraph (f) of this section.

(4) *Coordination with sections 953 and 954.* The rules of this paragraph (e) shall be applied after the application of sections 953 and 954 and the regulations under those sections, except as provided in § 1.954–1(d)(4)(ii).

(5) *Earnings and deficits retain separate limitation character.* The income reduction rules of paragraph (e)(1) of this section shall apply only for purposes of determining the amount of an inclusion under section 951(a)(1)(A) from each separate category as defined in § 1.904–5(a)(1) and the separate categories in which recapture accounts are established under section 952(c)(2) and paragraph (f) of this section. For rules applicable in computing post-1986 undistributed earnings, see generally section 902 and the regulations under that section. For rules relating to the allocation of deficits for purposes of computing foreign taxes deemed paid under section 960 with respect to an inclusion under section 951(a)(1)(A), see § 1.960–1(i).

(f) *Recapture of subpart F income in subsequent taxable year*—(1) *In general.* If a controlled foreign corporation's subpart F income for a taxable year is reduced under the current year earnings and profits limitation of section 952(c)(1)(A) and paragraph (e) of this section, recapture accounts will be established and subject to recharacterization in any subsequent taxable year to the extent the recapture accounts were not previously recharacterized or distributed, as provided in paragraphs (f)(2) and (3) of this section.

(2) *Rules of recapture*—(i) *Recapture account.* If a category of subpart F income described in section 952(a) or, in the case of foreign base company income, described in § 1.954–1(c)(1)(iii)(A) (*1*) or (*2*) is reduced under the current year earnings and profits limitation of section 952(c)(1)(A) and paragraph (e) of this section for a taxable year, the amount of such reduction shall constitute a recapture account.

(ii) *Recapture.* Each recapture account of the controlled foreign corporation will be recharacterized, on a proportionate basis, as subpart F income in the same separate category (as defined in § 1.904–5(a)(1)) as the recapture account to the extent that current year earnings and profits exceed subpart F income in a taxable year. The United States shareholder must include his pro rata share (determined under the rules of § 1.951–1(e)) of each recharacterized amount in income as subpart F income in such separate category for the taxable year.

(iii) *Reduction of recapture account and corresponding earnings.* Each recapture account, and post-1986 undistributed earnings in the separate category containing the recapture account, will be reduced in any taxable year by the amount which is recharacterized under paragraph (f)(2)(ii) of this section. In addition, each recapture account, and post-1986 undistributed earnings in the separate category containing the recapture account, will be reduced in the amount of any distribution out of that account (as determined under the ordering rules of section 959(c) and paragraph (f)(3)(ii) of this section).

(3) *Distribution ordering rules*—(i) *Coordination of recapture and distribution rules.* If a controlled foreign corporation distributes an amount out of earnings and profits described in section 959(c)(3) in a year in which current year earnings and profits exceed subpart F income and there is an amount in a recapture account for such year, the recapture rules will apply first.

(ii) *Distributions reduce recapture accounts first.* Any distribution made by a controlled foreign corporation out of earnings and profits described in section 959(c)(3) shall be treated as made first on a proportionate basis out of the recapture accounts in each separate category to the extent thereof (even if the amount in the recapture account exceeds post-1986 undistributed earnings in the separate category containing the recapture account). Any remaining distribution shall be treated as made on a proportionate basis out of the remaining earnings and profits of the controlled foreign corporation in each separate category. See section 904(d)(3)(D).

(4) *Examples.* The application of paragraphs (e) and (f) of this section may be illustrated by the following examples:

Example 1. (i) A, a U.S. person, is the sole shareholder of CFC, a controlled foreign corporation formed on January 1, 1998, whose functional currency is the u. In 1998, CFC earns 100u of foreign base company sales income that is general limitation income described in section 904(d)(1)(I) and incurs a (200u) loss attributable to activities that would have produced general limitation income that is not subpart F income. In 1998 CFC also earns 100u of foreign personal holding company income that is passive income described in section 904(d)(1)(A), and 100u of foreign personal holding company income that is dividend income subject to a separate limitation described in section 904(d)(1)(E) for dividends from a noncontrolled section 902 corporation. CFC's subpart F income for 1998, 300u, exceeds CFC's current earnings and profits, 100u, by 200u. Under section 952(c)(1)(A) and paragraph (e) of this section, subpart F income is limited to CFC's current earnings and profits of 100u, all of which is included in A's gross income under section 951(a)(1)(A). The 200u of CFC's 1998 subpart F income that is not included in A's income in 1998 by reason of section 952(c)(1)(A) is subject to recapture under section 952(c)(2) and paragraph (f) of this section.

(ii) For purposes of determining the amount and type of income included in A's gross income and the amount and type of income in CFC's recapture account, the rules of paragraphs (e)(1) and (2) of this section apply. Under paragraph (e)(1)(i) of this section, the amount by which CFC's subpart F income exceeds its earnings and profits for 1998, 200u, first reduces from 100u to 0 CFC's subpart F income in the general limitation category, which has a current year deficit of (100u) in earnings and profits. Next, under paragraph (e)(1)(iii) of this section, the remaining 100u by which CFC's 1998 subpart F income exceeds earnings and profits is applied proportionately to reduce CFC's subpart F income in the separate categories for passive income (100u) and dividends from the noncontrolled section 902 corporation (100u). Thus, A includes 50u of passive limitation/foreign personal holding company income and 50u of dividends from the noncontrolled section 902 corporation/foreign personal holding company income in gross income in 1998. CFC has 100u in its general limitation/foreign base company sales income recapture account attributable to the 100u of foreign base company sales income that is not included in A's income by reason of the earnings and profits limitation of section 952(c)(1)(A). CFC also has 50u in its passive limitation recapture account, all of which is attributable to foreign personal holding company income, and 50u in its recapture account for dividends from the noncontrolled section 902 corporation, all of which is attributable to foreign personal holding company income.

(iii) For purposes of computing post-1986 undistributed earnings, the rules of sections 902 and 960, including the rules of §1.960–1(i), apply. Under §1.960–1(i), the general limitation deficit of (100u) is allocated proportionately to reduce passive limitation earnings of 100u and noncontrolled section 902 dividend earnings of 100u. Thus, passive limitation earnings are reduced by 50u to 50u (100u passive limitation earnings/200u total earnings in positive separate categories × (100u) general limitation deficit=50u reduction), and the noncontrolled section 902 corporation earnings are reduced by 50u to 50u (100u noncontrolled section 902 corporation earnings/200u total earnings in positive separate categories × (100u) general limitation deficit=50u reduction). All of CFC's post-1986 foreign income taxes with respect to passive limitation income and dividends from the noncontrolled section 902 corporation are deemed paid by A under section 960 with respect to the subpart F inclusions (50u inclusion/50u earnings in each separate category). After the inclusion and deemed-paid taxes are computed, at the close of 1998 CFC has a (100u) deficit in general limitation earnings (100u subpart F earnings + (200u) nonsubpart F loss), 50u of passive limitation earnings (100u of earnings attributable to foreign personal holding company income −50u inclusion) with a corresponding passive limitation/foreign personal holding company income recapture account of 50u, and 50u of earnings subject to a separate limitation for dividends from the noncontrolled section 902 corporation (100u earnings −50u inclusion) with a corresponding noncontrolled section 902 corporation/foreign personal holding company income recapture account of 50u.

Example 2. (i) The facts are the same as in *Example 1* with the addition of the following facts. In 1999, CFC earns 100u of foreign base company sales income that is general limitation income and 100u of foreign personal holding company income that is passive limitation income. In addition, CFC incurs (10u) of expenses that are allocable to its separate limitation for dividends from the noncontrolled section 902 corporation. Thus, CFC's subpart F income for 1999, 200u, exceeds CFC's current earnings and profits, 190u, by 10u. Under section 952(c)(1)(A) and paragraph (e) of this section, subpart F income is limited to CFC's current earnings and profits of 190u, all of which is included in A's gross income under section 951(a)(1)(A).

(ii) For purposes of determining the amount and type of income included in A's gross income and the amount and type of income in CFC's recapture accounts, the rules of paragraphs (e)(1) and (2) of this section apply. While CFC's general limitation post-1986 undistributed earnings for 1999 are 0 ((100u) opening balance + 100u subpart F income), CFC's general limitation subpart F income (100u) does not exceed its general limitation current earnings and profits (100u) for 1999. Accordingly, under paragraph (e)(1)(iii) of this section, the amount by which CFC's subpart F income exceeds its earnings and profits for 1999, 10u, is applied proportionately to reduce CFC's subpart F income in the separate categories for general limitation income, 100u, and passive income, 100u. Thus, A includes 95u of general limitation foreign base company sales income and 95u of passive limitation foreign personal holding company income in gross income in 1999. At the close of 1999 CFC has 105u in its general limitation/foreign base company sales income recapture account (100u from 1998 + 5u from 1999), 55u in its passive limitation/foreign personal holding company income recapture account (50u from 1998 + 5u from 1999), and 50u in its dividends from the noncontrolled section 902 corporation/foreign personal holding company income recapture account (all from 1998).

(iii) For purposes of computing post-1986 undistributed earnings in each separate category, the rules of sections 902 and 960, including the rules of § 1.960–1(i), apply. Thus, post-1986 undistributed earnings (or an accumulated deficit) in each separate category are increased (or reduced) by current earnings and profits or current deficits in each separate category. The accumulated deficit in CFC's general limitation earnings and profits (100u) is reduced to 0 by the addition of 100u of 1999 earnings and profits. CFC's passive limitation earnings of 50u are increased by 100u to 150u, and CFC's noncontrolled section 902 corporation earnings of 50u are decreased by (10u) to 40u. After the addition of current year earnings and profits and deficits to the separate categories there are no deficits remaining in any separate category. Thus, the allocation rules of § 1.960–1(i)(4) do not apply in 1999. Accordingly, in determining the post-1986 foreign income taxes deemed paid by A, post-1986 undistributed earnings in each separate category are unaffected by earnings in the other categories. Foreign taxes deemed paid under section 960 for 1999 would be determined as follows for each separate category: with respect to the inclusion of 95u of foreign base company sales income out of general limitation earnings, the section 960 fraction is 95u inclusion/0 total earnings; with respect to the inclusion of 95u of passive limitation income the section 960 fraction is 95u inclusion/150u passive earnings. Thus, no general limitation taxes would be associated with the inclusion of the general limitation earnings because there are no accumulated earnings in the general limitation category. After the deemed-paid taxes are computed, at the close of 1999 CFC has a (95u) deficit in general limitation earnings and profits ((100u) opening balance + 100u current earnings −95u inclusion), 55u of passive limitation earnings and profits (50u opening balance + 100u current foreign personal holding company income −95u inclusion), and 40u of earnings and profits subject to the separate limitation for dividends from the noncontrolled section 902 corporation (50u opening balance + (10u) expense).

Example 3. (i) A, a U.S. person, is the sole shareholder of *CFC*, a controlled foreign corporation whose functional currency is the u. At the beginning of 1998, CFC has post-1986 undistributed earnings of 275u, all of which are general limitation earnings described in section 904(d)(1)(I). CFC has no previously-taxed earnings and profits described in section 959(c)(1) or (c)(2). In 1998, CFC has a (200u) loss in the shipping category described in section 904(d)(1)(D), 100u of foreign personal holding company income that is passive income described in section 904(d)(1)(A), and 125u of general limitation manufacturing earnings that are not subpart F income. CFC's subpart F income for 1998, 100u, exceeds CFC's current earnings and profits, 25u, by 75u. Under section 952(c)(1)(A) and paragraph (e) of this section, subpart F income is limited to CFC's current earnings and profits of 25u, all of which is included in A's gross income under section 951(a)(1)(A). The 75u of CFC's 1998 subpart F income that is not included in A's income in 1998 by reason of section 952(c)(1)(A) is subject to recapture under section 952(c)(2) and paragraph (f) of this section.

(ii) For purposes of determining the amount and type of income included in A's gross income and the amount and type of income in CFC's recapture account, the rules of paragraphs (e)(1) and (2) of this section apply. Under paragraph (e)(1) of this section, the amount of CFC's subpart F income in excess of earnings and profits for 1998, 75u, reduces the 100u of passive limitation foreign personal holding company income. Thus, A includes 25u of passive limitation foreign personal holding company income in gross income, and CFC has 75u in its passive limitation/foreign personal holding company income recapture account.

(iii) For purposes of computing post-1986 undistributed earnings in each separate category the rules of sections 902 and 960, including the rules of §1.960–1(i), apply. Under §1.960–1(i), the shipping limitation deficit of (200u) is allocated proportionately to reduce general limitation earnings of 400u and passive limitation earnings of 100u. Thus, general limitation earnings are reduced by 160u to 240u (400u general limitation earnings/500u total earnings in positive separate categories × (200u) shipping deficit=160u reduction), and passive limitation earnings are reduced by 40u to 60u (100u passive earnings/500u total earnings in positive separate categories × (200u) shipping deficit=40u reduction). Five-twelfths of CFC's post-1986 foreign income taxes with respect to passive limitation earnings are deemed paid by A under section 960 with respect to the subpart F inclusion (25u inclusion/60u passive earnings). After the inclusion and deemed-paid taxes are computed, at the close of 1998 CFC has 400u of general limitation earnings (275u opening balance + 125u current earnings), 75u of passive limitation earnings (100u of foreign personal holding company income −25u inclusion), and a (200u) deficit in shipping limitation earnings.

Example 4. (i) The facts are the same as in *Example 3* with the addition of the following facts. In 1999, CFC earns 50u of general limitation earnings that are not subpart F income and 75u of passive limitation income that is foreign personal holding company income. Thus, CFC has 125u of current earnings and profits. CFC distributes 200u to A. Under paragraph (f)(3)(i) of this section, the recapture rules are applied first. Thus, the amount by which 1999 current earnings and profits exceed subpart F income, 50u, is recharacterized as passive limitation foreign personal holding company income. CFC's total subpart F income for 1999 is 125u of passive limitation foreign personal holding company income (75u current earnings plus 50u recapture account), and the passive limitation/foreign personal holding company income recapture account is reduced from 75u to 25u.

(ii) CFC has 150u of previously-taxed earnings and profits described in section 959(c)(2) (25u attributable to 1998 and 125u attributable to 1999), all of which is passive limitation earnings and profits. Under section 959(c), 150u of the 200u distribution is deemed to be made from earnings and profits described in section 959(c)(2). The remaining 50u is deemed to be made from earnings and profits described in section 959(c)(3). Under paragraph (f)(3)(ii) of this section, the dividend distribution is deemed to be made first out of the passive limitation recapture account to the extent thereof (25u). Under paragraph (f)(2)(iii) of this section, the passive limitation recapture account is reduced from 25u to 0. The remaining distribution of 25u is treated as made out of CFC's general limitation earnings and profits.

(iii) For purposes of computing post-1986 undistributed earnings, the rules of section 902 and 960, including the rules of §1.960–1(i), apply. Thus, the shipping limitation accumulated deficit of (200u) reduces general limitation earnings and profits of 450u and passive limitation earnings and profits of 150u on a proportionate basis. Thus, 100% of CFC's post-1986 foreign income taxes with respect to passive limitation earnings are deemed paid by A under section 960 with respect to the 1999 subpart F inclusion of 125u (100u inclusion (numerator limited to denominator)/100u passive earnings). No post-1986 foreign income taxes remain to be deemed paid under section 902 in connection with the 25u distribution from the passive limitation/foreign personal holding company income recapture account. One-twelfth of CFC's post-1986 foreign income taxes with respect to general limitation earnings are deemed paid by A under section 902 with respect to the distribution of 25u general limitation earnings and profits described in section 959(c)(3) (25u inclusion/300u general limitation earnings). After the deemed-paid taxes are computed, at the close of 1999 CFC has 425u of general limitation earnings and profits (400u opening balance + 50u current earnings—25u distribution), 0 of passive limitation earnings (75u recapture account + 75u current foreign personal holding company income—125u inclusion—25u distribution), and a (200u) deficit in shipping limitation earnings.

(5) *Effective date.* Paragraph (e) of this section and this paragraph (f) apply to taxable years of a controlled foreign corporation beginning after March 3, 1997.

[T.D. 6795, 30 FR 938, Jan. 29, 1965, as amended by T.D. 6892, 31 FR 11144, Aug. 23, 1966; T.D. 7293, 38 FR 32802, Nov. 28, 1973; T.D. 7545, 43 FR 19652, May 8, 1978; T.D. 7862, 47 FR 56490, Dec. 17, 1982; T.D. 7893, 48 FR 22508, May 19, 1983; T.D. 7894, 48 FR 22516, May 19, 1983; T.D. 8331, 56 FR 2846, Jan. 25, 1991; T.D. 8704, 62 FR 18, Jan. 2, 1997]

§1.952–2 Determination of gross income and taxable income of a foreign corporation.

(a) *Determination of gross income*—(1) *In general.* Except as provided in subparagraph (2) of this paragraph, the gross income of a foreign corporation for any taxable year shall, subject to the special rules of paragraph (c) of this section, be determined by treating such foreign corporation as a domestic corporation taxable under section 11 and by applying the principles of section 61 and the regulations thereunder.

(2) *Insurance gross income*—(i) *Life insurance gross income.* The gross income for any taxable year of a controlled foreign corporation which is engaged in the business of reinsuring or issuing insurance or annuity contracts and which, if it were a domestic corporation engaged only in such business, would be taxable as a life insurance company to which part I (sections 801 through 820) of subchapter L of chapter 1 of the Code applies, shall, subject to the special rules of paragraph (c) of this section, be the sum of—

(a) The gross investment income, as defined under section 804(b), except that interest which is excluded from gross income under section 103 shall not be taken into account;

(b) The sum of the items taken into account under section 809(c), except that advance premiums shall not be taken into account; and

(c) The amount by which the net long-term capital gain exceeds the net short-term capital loss.

(ii) *Mutual and other insurance gross income.* The gross income for any taxable year of a controlled foreign corporation which is engaged in the business of reinsuring or issuing insurance or annuity contracts and which, if it were a domestic corporation engaged only in such business, would be taxable as a mutual insurance company to which part II (sections 821 through 826) of subchapter L of chapter 1 of the Code applies or as a mutual marine insurance or other insurance company to which part III (sections 831 and 832) of subchapter L of chapter 1 of the Code applies, shall, subject to the special rules of paragraph (c) of this section, be—

(a) The sum of—

(1) The gross income, as defined in section 832(b)(1);

(2) The amount of losses incurred, as defined in section 832(b)(5); and

(3) The amount of expenses incurred, as defined in section 832(b)(6); reduced by

(b) The amount of interest which under section 103 is excluded from gross income.

(b) *Determination of taxable income*—(1) *In general.* Except as provided in subparagraph (2) of this paragraph, the taxable income of a foreign corporation for any taxable year shall, subject to the special rules of paragraph (c) of this section, be determined by treating such foreign corporation as a domestic corporation taxable under section 11 and by applying the principles of section 63.

(2) *Insurance taxable income.* The taxable income for any taxable year of a controlled foreign corporation which is engaged in the business of reinsuring or issuing insurance or annuity contracts and which, if it were a domestic corporation engaged only in such business, would be taxable as an insurance company to which subchapter L of chapter 1 of the Code applies shall, subject to the special rules of paragraph (c) of this section, be determined by treating such corporation as a domestic corporation taxable under subchapter L of chapter 1 of the Code and by applying the principles of §§ 1.953–4 and 1.953–5 for determining taxable income.

(c) *Special rules for purposes of this section*—(1) *Nonapplication of certain provisions.* Except where otherwise distinctly expressed, the provisions of subchapters F, G, H, L, M, N, S, and T of chapter 1 of the Internal Revenue Code shall not apply and, for taxable years of a controlled foreign corporation beginning after March 3, 1997, the provisions of section 103 of the Internal Revenue Code shall not apply.

(2) *Application of principles of § 1.964–1.* The determinations with respect to a foreign corporation shall be made as follows:

(i) *Books of account.* The books of account to be used shall be those regularly maintained by the corporation for the purpose of accounting to its shareholders.

(ii) *Accounting principles.* Except as provided in subparagraphs (3) and (4) of this paragraph, the accounting principles to be employed are those described in paragraph (b) of § 1.964–1. Thus, in applying accounting principles generally accepted in the United States for purposes of reflecting in the financial statements of a domestic corporation the operations of foreign affiliates, no adjustment need be made unless such adjustment will have a material effect, within the meaning of paragraph (a) of §1.964–1.

(iii) *Translation into United States dollars—(a) In general.* Except as provided in *(b)* of this subdivision, the amounts determined in accordance with subdivision (ii) of this subparagraph shall be translated into United States dollars in accordance with the principles of paragraph (d) of §1.964–1.

(b) Special rule. In any case in which the value of the foreign currency in relation to the United States dollar fluctuates more than 10 percent during any translation period (within the meaning of paragraph (d)(6) of §1.964–1), the subpart F income and non-subpart F income shall be separately translated as if each constituted all the income of the controlled foreign corporation for the translation period.

(iv) *Tax accounting methods.* The tax accounting methods to be employed are those established or adopted by or on behalf of the foreign corporation under paragraph (c) of §1.964–1. Thus, such accounting methods must be consistent with the manner of treating inventories, depreciation, and elections referred to in subdivisions (ii), (iii), and (iv) of paragraph (c)(1) of §1.964–1 and used for purposes of such paragraph; however, if, in accordance with paragraph (c)(6) of §1.964–1, a foreign corporation receives foreign base company income before any elections are made or before an accounting method is adopted by or on behalf of such corporation under paragraph (c)(3) of §1.964–1, the determinations of whether an exclusion set forth in section 954(b) applies shall be made as if no elections had been made and no accounting method had been adopted.

(v) *Exchange gain or loss*—(*a*) Exchange gain or loss, determined in accordance with the principles of §1.964–1(e), shall be taken into account for purposes of determining gross income and taxable income.

(b) Exchange gain or loss shall be treated as foreign base company shipping income (or as a deduction allocable thereto) to the extent that it is attributable to foreign base company shipping operations. The extent to which exchange gain or loss is attributable to foreign base company shipping operations may be determined under any reasonable method which is consistently applied from year to year. For example, the extent to which the exchange gain or loss is attributable to foreign base company shipping operations may be determined on the basis of the ratio which the foreign based company shipping income of the corporation for the taxable year bears to its total gross income for the taxable year, such ratio to be determined without regard to this subdivision (v).

(c) The remainder of the exchange gain or loss shall be allocated between subpart F income and non-subpart F income under any reasonable method which is consistently applied from year to year. For example, such remainder may be allocated to subpart F income in the same ratio that the gross subpart F income (exclusive of foreign base company shipping income) of the corporation for the taxable year bears to its total gross income (exclusive of foreign base company shipping income) for the taxable year, such ratio to be determined without regard to this subdivision (v).

(3) *Necessity for recognition of gain or loss.* Gross income of a foreign corporation (including an insurance company) includes gain or loss only if such gain or loss would be recognized under the provisions of the Internal Revenue Code if the foreign corporation were a domestic corporation taxable under section 11 (subject to the modifications of subparagraph (1) of this paragraph). See section 1002. However, a foreign corporation shall not be treated as a domestic corporation for purposes of determining whether section 367 applies.

(4) *Gross income and gross receipts.* The term ‘‘gross income’’ may not have the same meaning as the term ‘‘gross receipts’’. For example, in a manufacturing, merchandising, or mining business, gross income means the total sales less the cost of goods sold, plus any income from investments and from incidental or outside operations or sources.

(5) *Treatment of capital loss and net operating loss.* In determining taxable income of a foreign corporation for any taxable year—

(i) *Capital loss carryback and carryover.* The capital loss carryback and carryover provided by section 1212(a) shall not be allowed.

(ii) *Net operating loss deduction.* The net operating loss deduction under section 172(a) or the operations loss deduction under section 812 shall not be allowed.

(6) *Corporations which have insurance income.* For purposes of paragraphs (a)(2) and (b)(2) of this section, in determining whether a controlled foreign corporation which is engaged in the business of reinsuring or issuing insurance or annuity contracts and which, if it were a domestic corporation engaged only in such business, would be taxable as an insurance company to which subchapter L of chapter 1 of the Code applies, it is immaterial that—

(i) The corporation would be exempt from taxation as an organization described in section 501(a),

(ii) The corporation would not be taxable as an insurance company to which subchapter L of the Code applies, or

(iii) The corporation would be subject to the alternative tax for small mutual insurance companies provided by section 821(c).

[T.D. 6795, 30 FR 941, Jan. 29, 1965, as amended by T.D. 7893, 48 FR 22508, May 19, 1983; T.D. 7894, 48 FR 22516, May 19, 1983; T.D. 8704, 62 FR 20, Jan. 2, 1997]

§ 1.953–1 Income from insurance of United States risks.

(a) *In general.* The subpart F income of a controlled foreign corporation for any taxable year includes its income derived from the insurance of United States risks for such taxable year. See section 952(a)(1). A controlled foreign corporation shall have income derived from the insurance of United States risks for such purpose of it has taxable income, as determined under § 1.953–4 or § 1.953–5, which is attributable to the reinsuring or the issuing of any insurance or annuity contract in connection with United States risks, as defined in § 1.953–2 or § 1.953–3, and if it satisfies the 5-percent minimum premium requirement prescribed in paragraph (b) of this section. It is immaterial for purposes of this section whether the person insured or the beneficiary of any insurance, annuity, or reinsurance contract is, as to such corporation, a related person or a United States shareholder. For definition of the term ‘‘controlled foreign corporation’’ for purposes of taking into account income derived from the insurance of United States risks under section 953, see section 957 (a) and (b) and §§ 1.957–1 and 1.957–2.

(b) *5-percent minimum premium requirement.* A controlled foreign corporation shall not have income derived from the insurance of United States risks for purposes of this section unless the premiums received by such corporation during the taxable year which are attributable to the reinsuring and the issuing of insurance and annuity contracts in connection with the United States risks exceed 5 percent of the total premiums which are received by such corporation during such taxable year and which are attributable to the reinsuring and the issuing of insurance and annuity contracts in connection with all risks.

(c) *General definitions.* For purposes of §§ 1.953–1 to 1.953–6, inclusive—

(1) *Reinsurance, etc.* The terms ‘‘reinsurance’’, ‘‘insurance’’, and ‘‘annuity contract’’ have the same meaning which they have for purposes of applying section 809(c)(1) or section 832(b)(4), as the case may be.

(2) *Premiums.* The term ‘‘premiums’’ means the items taken into account for the taxable year under section 809(c)(1), or the amount computed for the taxable year under section 832(b)(4) without the application of subparagraph (B) thereof, as the case may be; except that, for purposes of determining the amount of premiums received in applying paragraph (b) of this section or paragraph (a) of § 1.953–3, advance premiums and deposits shall not be taken into account.

(3) *Insurance company.* The term ‘‘insurance company’’ has the same meaning which it has for purposes of applying section 801(a), determined by applying the principles of paragraph (a) of § 1.801–3.

(4) *Related person.* The term ‘‘related person’’, when used with respect to a

controlled foreign corporation, shall have the meaning assigned to it by paragraph (e) of §1.954–1.

(5) *Policy period.* With respect to any insurance or annuity contract under which a corporation is potentially liable at any time during its taxable year, the term ''policy period'' means with respect to such year each period of coverage under the contract if such period begins or ends with or within the taxable year, except that, if such period of coverage is more than one year, such term means such of the following periods as are applicable, each one of which is a policy period with respect to the taxable year:

(i) The one-year period which begins with the effective date of the contract and begins or ends with or within the taxable year,

(ii) The one-year period which begins with an anniversary of the contract and begins or ends with or within the taxable year, and

(iii) The period of less than one year if such period begins with an anniversary of the contract, ends with the date on which coverage under the contract terminates, and begins or ends with or within the taxable year.

For such purposes, the effective date of the contract is the date on which coverage under the contract begins, and the anniversary of the contract is the annual return of the effective date. The period of coverage under a contract is the period beginning with the effective date of the contract and ending with the date on which the coverage under the contract expires; except that, if the risk under the contract has been transferred by assumption reinsurance, the period of coverage shall end with the effective date of such transfer or, if the contract is canceled, with the effective date of cancellation. For this purpose, the term ''assumption reinsurance'' shall have the meaning provided by paragraph (a)(7)(ii) of §1.809–5. The application of this subparagraph may be illustrated by the following examples:

Example 1. Controlled foreign corporation A issues to domestic corporation M an insurance contract which provides coverage for the 2½ year period beginning on July 1, 1963. Corporation A uses the calendar year as the taxable year. For 1963, the policy period under such contract as to A Corporation is July 1, 1963, to June 30, 1964. For 1964, the policy periods under such contract as to A Corporation are July 1, 1963, to June 30, 1964, and July 1, 1964, to June 30, 1965. For 1965, the policy periods under such contract as to A Corporation are July 1, 1964, to June 30, 1965, and July 1, 1965, to December 31, 1965.

Example 2. The facts are the same as in example 1 except that M Corporation cancels the contract on August 31, 1963. For 1963, the policy period under such contract as to A Corporation is July 1, 1963, to August 31, 1963.

Example 3. The facts are the same as in example 1 except that on January 15, 1965, A Corporation cedes insurance under the contract to controlled foreign corporation B, which also uses the calendar year as the taxable year. For 1964, the policy periods under such contract as to A Corporation are July 1, 1963, to June 30, 1964, and July 1, 1964, to June 30, 1965. For 1965, the policy periods under such contract as to both A Corporation and B Corporation are July 1, 1964, to June 30, 1965, and July 1, 1965, to December 31, 1965.

Example 4. Controlled foreign corporation C, which uses the calendar year as the taxable year, issues to domestic corporation N an insurance contract which covers the marine risks in connection with shipping a machine to Europe. The contract does not specify the dates during which the machine is covered, but provides coverage from the time the machine is delivered alongside a named vessel in Hoboken, New Jersey, until the machine is delivered alongside such vessel in Liverpool, England. Such deliveries in New Jersey and England take place on February 1, and February 28, 1963, respectively. For 1963, the policy period under such contract as to C Corporation is February 1, to February 28, 1963.

(6) *Foreign country.* The term ''foreign country'' includes, where not otherwise expressly provided, a possession of the United States.

[T.D. 6781, 29 FR 18201, Dec. 23, 1964]

§1.953–2 Actual United States risks.

(a) *In general.* For purposes of paragraph (a) of §1.953–1, the term ''United States risks'' means risks described in section 953(a)(1)(A)—

(1) In connection with property in the United States (as defined in paragraph (b) of this section),

(2) In connection with liability arising out of activity in the United States (as defined in paragraph (c) of this section), or

(3) In connection with the lives or health of residents of the United States

(as defined in paragraph (d) of this section).

For purposes of section 953(a), the term ''United States'' is used in a geographical sense and includes only the States and the District of Columbia. Therefore, the reinsuring or the issuing of insurance or annuity contracts by a controlled foreign corporation in connection with property located in a foreign country or a possession of the United States, in connection with activity in a foreign country or a possession, or in connection with the lives or health of citizens of the United States who are not residents of the United States will not give rise to income to which paragraph (a) of § 1.953–1 applies, unless the income derived by the controlled foreign corporation from such contracts constitutes income derived in connection with risks which are deemed to be United States risks, as defined in § 1.953–3.

(b) *Property in the United States.* The term ''property in the United States'' means property, as defined in subparagraph (1) of this paragraph, which is in the United States, within the meaning of subparagraph (2) of this paragraph.

(1) *Property defined.* The term ''property'' means any interest of an insured in tangible (including real and personal) or intangible property. Such interests include, but are not limited to, those of an owner, landlord, tenant, mortgagor, mortgagee, trustee, beneficiary, or partner. Thus, for example, if insurance is issued against loss from fire and theft with respect to an insured's home and its contents, such risks are risks in connection with property, whether the insured is the owner or lessee and whether the contents include furniture or cash and securities. Furthermore, if insurance is issued against all risks of damage or loss with respect to the automobile of an insured, such risks are risks in connection with property, whether the risks insured against may be caused by the insured, another person, or natural forces.

(2) *United States location*—(i) *In general.* Property will be considered property in the United States when it is exclusively located in the United States. Conversely, property will be considered property not in the United States when it is exclusively located outside the United States. In addition, property which is ordinarily located in, but temporarily located outside, the United States will be considered property in the United States both when it is ordinarily located in, and when it is temporarily located outside, the United States if the premium which is attributable to the reinsuring or issuing of any insurance contract in connection with such property cannot be allocated to, or apportioned between, risks incurred when such property is actually located in the United States and risks incurred when it is actually located outside the United States. If such premium can be so allocated or apportioned on a reasonable basis, however, such property will be considered property not in the United States when it is actually located outside the United States. However, property will not be considered property in the United States if it is neither property which is exclusively located in the United States nor property which is ordinarily located in, but temporarily located outside, the United States. The rules prescribed in subdivision (ii) of this subparagraph shall apply in determining whether a premium can be allocated or apportioned on a reasonable basis to or between risks incurred when property is actually located in the United States and risks incurred when such property is actually located outside the United States. The rules prescribed in subdivisions (iii) through (x) of this subparagraph shall apply in determining whether property is, or will be considered, exclusively located in or outside the United States and whether property is, or will be considered, ordinarily located in the United States; such rules also limit the rule of premium allocation and apportionment prescribed in this subdivision and subdivision (ii) of this subparagraph. The determinations required by this subparagraph shall be made with respect to the location of property during the policy period applicable to the taxable year of the insuring or reinsuring corporation, or, if more than one policy period exists with respect to such taxable year, such determinations shall be

made separately with respect to the location of property during each such policy period.

(ii) *Premium allocation or apportionment.* Whether a premium can be allocated or apportioned on a reasonable basis to or between risks incurred when property is actually located in the United States and risks incurred when such property is actually located outside the United States shall depend on the intention of the parties to the insurance contract, as determined from its provisions and the facts and circumstances preceding its execution. Contract provisions on the basis of which the premium reasonably may be so allocated or apportioned include, but are not limited to, provisions which separately describe each risk covered, the period of coverage of each risk, the special warranties for each risk, the premium for each risk (or the basis for determining such premium), and the conditions of paying the premium for each risk. For purposes of this subdivision, it shall be unnecessary formally to make a separate policy with respect to each risk covered or with respect to each clause attached to the policy, provided that the intention of the parties to the contract is reasonably clear. For example, if in the ordinary course of carrying on an insurance business an insurance policy is issued which covers fire, theft, and water damage risks incurred when property is actually located in the United States and marine risks incurred when such property is actually located outside the United States and which, pursuant to accepted insurance principles, properly describes the premium rates as percentages of the amount of coverage as ''.825% plus .3% fire, etc. risks plus .12% water risks = 1.245%'', a reasonable basis exists to allocate a $124.50 premium paid for $10,000 of such coverage to $82.50 for foreign risks and $42.00 ($30.00+ $12.00) to United States risks.

(iii) *Property in general—(a) Ordinary and temporary location.* Except as otherwise provided in subdivisions (iv) through (x) of this subparagraph, the determination of whether property is ordinarily located in the United States will depend on all the facts and circumstances in each case. Property is ordinarily located in the United States if its location in the United States is regular, usual, or often occurring. However, in all cases property will be considered ordinarily located in the United States if it is actually located in the United States for an aggregate of more than 50 percent of the days in the applicable policy period whereas property will, under no circumstances, be considered ordinarily located in the United States if it is actually located in the United States for an aggregate of not more than 30 percent of the days in the applicable policy period. Property which is ordinarily located in the United States is temporarily located outside the United States when it is actually located outside the United States. For purposes of determining the number and percent of the days in an applicable policy period, the term ''day'' means, not any 24-consecutive-hour period, but a continuous period of twenty-four hours commencing from midnight and ending with the following midnight; in determining the location of property for such purposes, an amount of time which is at least one-half of such a day, but less than the entire day, shall be considered a day, and an amount of time which is less than one-half of such a day shall not be considered a day.

(b) Illustrations. The application of this subdivision may be illustrated by the following examples:

Example 1. Controlled foreign corporation A issues to domestic corporation M a comprehensive blanket or floater insurance policy which, for one year, covers inventory samples which M Corporation regularly ships from the United States in order to encourage sales. Such shipments are made on the condition that they be returned to the United States within 5 days after they are received. During the one-year policy period, such samples are sent from, and returned to, the United States 50 times, and during such one-year period are actually located in the United States for an aggregate of 120 days. Since the location of the samples in the United States during such one-year period is often recurring, they are property ordinarily located in, but temporarily located outside, the United States. Therefore, they will be considered property in the United States even though for such one-year period their location in the United States is not regular or usual and is not for an aggregate of more than 50 percent of the days in the policy period. However, if, by considering such factors as the terms and premium schedule of the insurance contract as well as the number, value, and duration of the location in and outside the United States, of such samples, the premium which is attributable to the issuing of such contract can be allocated to, or apportioned between, risks occurring when such samples are actually located in the United States and risks occurring when they are actually located outside the United States, such samples will be considered property not in the United States when they are actually located outside the United States.

Example 2. A machine, located for several years in a foreign branch of a United States manufacturer, is permanently transferred to the home office of such manufacturer, where it arrives on January 1, 1963, and remains for the remainder of 1963. Under a separate insurance contract issued by a controlled foreign corporation, which uses the calendar year as the taxable year, such machine is insured against damage for the three-year period commencing on May 1, 1962. Because of the change in location of the machine, the premiums are increased as of January 1, 1963. Since the machine is in the United States from January 1, 1963, to April 30, 1963, its location in the United States is regular and usual during the policy period of May 1, 1962, to April 30, 1963. Accordingly, the machine is ordinarily located in the United States for such policy period. However, since the premium which is attributable to the issuing of such contract is allocable to risks occurring when the machine is actually located in, and when it is actually located outside, the United States, such machine will be considered property not in the United States from May 1, 1962, through December 31, 1962.

(iv) *Commercial motor vehicles, ships, aircraft, railroad rolling stock, and containers.* Any motor vehicle, ship, aircraft, railroad rolling stock, or any container transported thereby, which is used exclusively in the commercial transportation of persons or property to or from the United States (including such transportation from one place to another in the United States) and is ordinarily located in the United States will be considered property in the United States both when such property is ordinarily located in, and when such property is temporarily located outside, the United States. Whether such property is used in the transportation of persons or property to or from the United States and is ordinarily located in the United States are issues to be determined from all the facts and circumstances in each case. However, in all cases such transportation property will be considered ordinarily located in the United States if either more than 50 percent of the miles traversed during the applicable policy period in the use of such property are traversed within the United States or such property is located in the United States more than 50 percent of the time during such period. Further, such transportation property will not at any time be considered property in the United States if either not more than 30 percent of the miles traversed during the applicable policy period in the use of such property are traversed within the United States or such property is located in the United States for not more than 30 percent of the time during such period. Nevertheless, if not more than 30 percent of the miles traversed during the applicable policy period in the use of such transportation property are traversed within the United States, such property will be considered ordinarily located in the United States if it is located in the United States more than 50 percent of the time during such period Moreover, if such transportation property is located in the United States for not more than 30 percent of the time during the applicable policy period, such property will be considered ordinarily located in the United States if more than 50 percent of the miles traversed during such period in the use of such property are traversed within the United States. If such transportation property is considered property in the United States because more than 50 percent of the miles traversed during the applicable policy period in the use of such property are traversed within the United States, the apportionment of premium provided in subdivision (i) of this subparagraph shall be made on a mileage basis. If, however, such property is considered property in the United States because such property is located in the United States more than 50 percent of the time during the applicable policy period, the apportionment of premium provided in subdivision (i) of this subparagraph shall be made on a time basis.

(v) *Noncommercial motor vehicles, ships, aircraft, and railroad rolling stock.*

Except as provided in subdivision (iv) of this subparagraph, any motor vehicle, ship or boat, aircraft, or railroad rolling stock which at any time is actually located in the United States and which either *(a)* is registered with the United States, a State (including any political subdivision thereof), or any agency thereof or *(b)*, if not so registered, is owned by a citizen, resident, or corporation of the United States will be considered property which is ordinarily located in the United States. Unless the premium which is attributable to the reinsuring or issuing of any insurance contract in connection with such property considered ordinarily located in the United States is specifically allocated under the contract to risks incurred when such property is actually located in the United States and to risks incurred when it is actually located outside the United States, such property will be considered property in the United States both when it is ordinarily located in, and when it is temporarily located outside, the United States; under no circumstances will such property be considered outside the United States on the basis of any apportionment of such premium.

(vi) *Property exported or imported by railroad or motor vehicle.* Any property which is exported from, or imported to, the United States by railroad or motor vehicle will be considered property ordinarily located in the United States which, when such property is not actually located in the United States, is temporarily located outside the United States. For example, if an insurance contract reinsured or issued in connection with property exported from the United States by motor vehicle covers risks commencing when such property is loaded on the motor vehicle at the United States warehouse and terminating when such property is unloaded at the foreign warehouse, and if the premium payable with respect to risks incurred when the property is in the United States and risks incurred when the property is in the foreign country is not separately stated, such property will be considered property in the United States only until such property is actually located outside the United States, provided that the premium can be properly apportioned (for example) on the basis of time or mileage, between risks incurred when the property is actually located in the United States and risks incurred when it is actually located outside the United States. If in such case the premium is not so apportionable, such property will be considered property in the United States both when such property is ordinarily located in, and when it is temporarily located outside, the United States.

(vii) *Property exported by ship or aircraft.* If an insurance contract which is reinsured or issued in connection with property which is exported from the United States by ship or aircraft covers risks all of which terminate when such property is placed aboard a ship or aircraft at the United States port of exit for shipment from the United States, such property will be considered property in the United States. If such insurance contract covers risks all of which commence when such property is placed aboard a ship or aircraft at the United States port of exit for shipment from the United States, such property will be considered property not in the United States. If such insurance contract covers risks commencing before, and terminating after, such property is placed aboard a ship or aircraft at the United States port of exit for shipment from the United States, such property will be considered property ordinarily located in the United States which, after such property is placed aboard such ship or aircraft at the United States port of exit, is temporarily located outside the United States. The application of this subdivision may be illustrated by the following example:

Example. A controlled foreign corporation issues an insurance contract in connection with property exported from the United States by ship. The contract covers risks commencing after such property is removed from the United States warehouse and terminating when such property is unloaded at the foreign port of entry. Assuming that the premium payable with respect to the risks incurred before and the risks incurred after the property is placed aboard the ship at the United States port of exit for shipment from the United States or with respect to the steps in handling such property during such coverage, such as transporting the property to the United States port of exit, unloading the property there, placing the property aboard the ship, holding the property aboard the ship in port, the actual voyage, and unloading the property at the foreign port of entry, is separately stated in, or is determinable from, such contract, the property will be considered property in the United States only until such property is placed aboard the ship at the United States port of exit for shipment from the United States. Assuming, however, that the premiums payable with respect to such steps, or with respect to the risks incurred before and the risks incurred after the property is placed aboard the ship at the United States port of exit, are not allocable or apportionable under the contract, such property will be considered property in the United States both before and after such property is placed aboard the ship at the United States port of exit.

(viii) *Property imported by ship or aircraft.* If an insurance contract which is reinsured or issued in connection with property which is imported to the United States by ship or aircraft covers risks all of which terminate when such property is unloaded at the United States port of entry, such property will be considered property not in the United States. If such insurance contract covers risks all of which commence after such property is unloaded at the United States port of entry, such property will be considered property in the United States. If such insurance contract covers risks commencing before, and terminating after, such property is unloaded at the United States port of entry, such property will be considered property ordinarily located in the United States which, before such property is unloaded at the United States port of entry, is temporarily located outside the United States. For an illustration pertaining to the allocation or apportionment of the premium, see the example in subdivision (vii) of this subparagraph.

(ix) *Shipments originating and terminating in the United States.* Any property which is shipped from one place in the United States to another place in the United States, on or over a foreign country, the high seas, or the coastal waters of the United States will be considered property actually located at all times in the United States. For example, property which is shipped from New York City to Los Angeles via the Panama Canal or from San Francisco to Hawaii or Alaska will be considered property actually located at all times in the United States.

(x) *Shipments originating and terminating in a foreign country.* Any property which is shipped by any means, or a combination of means, of transportation from one foreign country to another foreign country, or from a contiguous foreign country to the same contiguous foreign country, on or over the United States will be considered property exclusively located outside the United States. Notwithstanding the foregoing, any property which is shipped by any means, or a combination of means, of transportation from one contiguous foreign country to another contiguous foreign country on or over the United States will be considered property ordinarily located in the United States which, when such property is not actually located in the United States, is temporarily located outside the United States.

(c) *Liability from United States activity.* The term ''liability arising out of activity in the United States'' means a loss, as described in subparagraph (1) of this paragraph, or a liability, as described in subparagraph (2) of this paragraph, which could arise from activity performed in the United States, as defined in subparagraph (3) of this paragraph.

(1) *Loss described.* The term ''loss'' includes all loss of an insured which could arise from the occurrence of the event insured against except that such term does not include any loss in connection with property described in paragraph (b) of this section. For example, such term includes, in the case of a promoter of outdoor sporting events, the loss which could arise from the cancellation of such an event because of inclement weather.

(2) *Liability described.* The term ''liability'' includes all liability of an insured in tort, contract, property, or otherwise. It includes, for example, the liability of a principal for the acts of his agent, of a husband for the acts of his spouse, and of a parent for the acts of his child. The term not only includes the direct liability which may be incurred, for example, by a tortfeasor to the person harmed, but also the indirect liability which may be incurred, for example, by a manufacturer to the

purchaser at retail for a breach of warranty.

(3) *Activity in the United States*—(i) *In general.* A loss or liability will be considered a loss or liability which could arise from activity performed in the United States if the loss or liability would result, if at all, from an activity exclusively carried on in the United States. Conversely, a loss or liability will be considered a loss or liability which could not arise from activity performed in the United States if the loss or liability would result, if at all, from an activity exclusively carried on outside the United States. In addition, a loss or liability will be considered a loss or liability which could arise from activity performed in the United States if the loss or liability would result, if at all, from an activity ordinarily carried on in, but partly carried on outside, the United States. If the premium which is attributable to the reinsuring or issuing of any insurance contract in connection with an activity ordinarily carried on in, but partly carried on outside, the United States can, on a reasonable basis, be allocated to, or apportioned between, the risks incurred with respect to the activity carried on in, and the risks incurred with respect to the activity carried on outside, the United States, such loss or liability will be considered a loss or liability which could not arise from activity performed in the United States to the extent the loss or liability would result, if at all, from that activity carried on outside the United States. However, a loss or liability will not be considered a loss or liability which could arise from an activity performed in the United States if such loss or liability would result, if at all, from an activity which is neither exclusively carried on in the United States nor ordinarily carried on in, but partly carried on outside, the United States. The principles of paragraph (b)(2)(ii) of this section for allocating or apportioning a premium on a reasonable basis to or between risks incurred when property is actually located in the United States and risks incurred when such property is actually located outside the United States shall apply for allocating or apportioning a premium on a reasonable basis to or between the risks incurred with respect to the activity carried on in, and the risks incurred with respect to the activity carried on outside, the United States. The rules prescribed in subdivisions (ii) through (vi) of this subparagraph shall apply in determining whether an activity is, or will be considered, exclusively carried on in or outside the United States and whether an activity is, or will be considered, ordinarily carried on in the United States and in determining what is the activity which is performed by the insured from which a loss or liability results or could result; such rules also limit the rule of premium allocation and apportionment prescribed in this subdivision. The determinations required by this subparagraph shall be made with respect to the location of an activity of the insured performed during the policy period applicable to the taxable year of the insuring or reinsuring corporation, or, if more than one policy period exists with respect to such taxable year, such determinations shall be made separately with respect to the location of the activity during each such policy period.

(ii) *Substantial activity carried on in the United States.* The term ‘‘activity’’ is used in its broadest sense and includes the performance of an act unlawfully undertaken, the wrongful performance of an act lawfully undertaken, and the wrongful failure to perform an act lawfully required to be undertaken. With respect to a loss described in subparagraph (1) of this paragraph, the term ‘‘activity’’ includes the occurrence of the event insured against. The determination of whether an activity ordinarily is carried on in, but is partly carried on outside, the United States will depend on all the facts and circumstances in each case. An activity ordinarily is carried on in the United States if a substantial amount of such activity is carried on in the United States. Factors which will be taken into account in determining whether a substantial amount of activity is carried on in the United States are those which are connected with the activity and include, but are not limited to, the location of the insured's assets, the place where personal services are performed, and the place where sales occur, but only if such assets, services, and sales are connected with the activity. In all cases an activity will be considered substantially carried on in the United States if more than 50 percent of the insured's total assets, personal services, and sales, if any, connected with such activity are located, performed, or occur in the United States. On the other hand, an activity will, under no circumstances, be considered substantially carried on in the United States if not more than 30 percent of the insured's total assets, personal services, and sales, if any, connected with such activity are located, performed, or occur in the United States. For this purpose, the mean of the value of the total assets at the beginning and end of the policy period shall be used, determined by taking assets into account at their actual value (not reduced by liabilities), which, in the absence of affirmative evidence to the contrary, shall be deemed to be *(a)* face value in the case of bills receivable, accounts receivable, notes receivable, and open accounts held by an insured using the cash receipts and disbursements method of accounting and *(b)* adjusted basis in the case of all other assets. Personal services shall be measured by the amount of compensation paid or accrued for such services, and sales shall be measured by the volume of gross sales. An activity is carried on partly outside the United States if it is carried on, whether substantially or in substantially, outside the United States.

(iii) *Manufacturing, producing, constructing, or assembling activity.* If a person who manufactures, produces, constructs, or assembles property is liable with regard to the consumption or use of such property, such liability will be considered to result from the activity performed of manufacturing, producing, constructing, or assembling such property. If such person manufactures, produces, constructs, or assembles more than one type of product, the liability with regard to the consumption or use of one of such products will be considered to result from the activity performed of manufacturing, producing, constructing, or assembling that particular product. For example, the liability of a building contractor, which constructs apartment buildings only in the United States, for the improper construction of, or the failure to construct, an apartment building, will be considered to result from an activity exclusively carried on in the United States and will be considered a liability which could arise from activity performed in the United States. In further illustration, the liability (which is covered by a single policy of insurance) of a domestic corporation, which assembles refrigerators exclusively in the United States and manufactures automobiles both in a foreign country and in the United States through substantial activity carried on in each of such countries, for the negligent manufacturing of a part for one of the automobiles by the foreign branch, will be considered to result from an activity ordinarily carried on in, but partly carried on outside, the United States and will be considered a liability which could arise from activity performed in the United States.

(iv) *Selling activity.* If a person is liable with regard to selling activity performed, such liability will be considered, except as provided in subdivisions (iii), (v), and (vi) of this subparagraph, to result from such selling activity. A person will be considered to be engaged in selling activity if such person engages in an activity resulting in the sale of property. Thus, it is immaterial that, under the Code, such activity would not constitute engaging in or carrying on a trade or business in the country in which such activity is carried on, the property in the goods does not pass in such country, or delivery of the property is not made in such country. For example, if a foreign wholesale distributor, which manages its entire business operations in a foreign country and sells its inventory exclusively in the United States—its only contact in the United States being the promotion of such sales to United States retail outlets by advertising in trade publications and distributing sales catalogues—is liable for a breach of warranty with regard to the sale of property to a United States retail outlet, such liability will be considered to result from an activity exclusively carried on in the United States and will be considered a liability which could arise from activity performed in the United States.

(v) *Liability from service or driving activity—(a) In general.* If a person is liable with regard to any service activity performed, or is liable with regard to driving activity performed in connection with a motor vehicle, ship or boat, aircraft, or railroad rolling stock, whether or not exclusively used in the commercial transportation of persons or property, such liability will be considered to result from such service or driving activity. For example, if an oil company which drills for oil exclusively in a foreign country is liable with regard to the negligent handling by its employees of explosives in the course of such drilling there, such liability will be considered to result from an activity exclusively carried on outside the United States and will be considered a liability which could not arise from activity performed in the United States. In further illustration, if a corporation which services machinery exclusively in a foreign country under servicing contracts is liable with regard to the negligent repairing of a machine under such a contract, such liability will be considered to result from an activity exclusively carried on outside the United States and will be considered a liability which could not arise from activity performed in the United States.

(b) Location of activities in connection with transportation property. For purposes of *(a)* of this subdivision, service or driving activity performed in connection with a motor vehicle, ship or boat, aircraft, or railroad rolling stock, whether or not exclusively used in the commercial transportation of persons or property, will be considered activity performed in the United States if the activity is carried on at a time when such property is or will be considered, in accordance with subdivision (iv) or (v) of paragraph (b)(2) of this section, actually in the United States or ordinarily located in the United States. However, if the premium which is attributable to the reinsuring or issuing of any insurance contract in connection with such service or driving activity which is carried on at a time when such property is, or will be considered, ordinarily located in the United States can be allocated to, or apportioned between, the risks incurred when such property is actually located in the United States and risks incurred when it is actually located outside the United States, such liability will be considered a liability which could arise from activity performed in the United States only when such property is actually located in the United States. Any allocation or apportionment of premium under the preceding sentence shall be made in accordance with the rules of allocation and apportionment provided in subdivision (iv) or (v) of paragraph (b)(2) of this section. For example, if a person is liable with regard to the performance of services outside the United States in the operation of a motor vehicle which is used exclusively in the commercial transportation of persons to and from the United States and which, because more than 50 percent of the miles traversed during the applicable policy period in the use of such property are traversed within the United States, is considered ordinarily located in the United States, such liability will be considered to be a liability which could not arise from activity performed in the United States only to the extent that the premium which is attributable to the reinsuring or issuing of any insurance contract in connection with such service activity is apportioned on a mileage basis between the risks incurred when such motor vehicle is actually located in the United States and when such vehicle is actually located outside the United States. See paragraph (b)(2)(iv) of this section. In further illustration, if a person is liable with regard to his negligent driving of a motor vehicle which is not used exclusively in the commercial transportation of persons or property, which is registered with any State, and which is driven both in the United States and a foreign country, such liability will be considered a liability which could arise from activity performed in the United States, unless the premium which is attributable to the reinsuring or issuing of an insurance contract in connection with such driving performed in such motor vehicle ordinarily located in the United States is specifically allocated under

the contract to risks incurred with respect to driving performed in, and to risks incurred with respect to driving performed outside, the United States. See paragraph (b)(2)(v) of this section.

(c) Illustration. The application of this subdivision may be further illustrated by the following example:

Example. Controlled foreign corporation A is a wholly owned subsidiary of domestic corporation M. Both corporations are insurance companies and use the calendar year as the taxable year. Corporation M is exclusively engaged in issuing to owners of commercial rental property which is located in the United States insurance contracts which cover any harm which may be caused in 1963 by the tortious conduct of the owners' employees in managing and maintaining such property. The owners insured under such contracts include both residents and nonresidents of the United States. In 1963, M Corporation cedes to A Corporation one-half of the insurance contracts issued by M Corporation in that year, including the contracts issued to nonresidents. Income of A Corporation derived in 1963 from reinsuring the risks of M Corporation is income from the insurance of United States risks since all the insurance contracts reinsured by it are in connection with a liability which could arise from service activity performed in the United States.

(vi) *Liability from delivery of property.* If the person who is obligated to deliver property is liable with regard to such delivery, such liability will be considered to result from the activity performed of delivering such property. For example, if a corporation which exports all of its inventory from the United States to foreign countries or possessions of the United States is liable with regard to its failure to make delivery outside the United States of inventory it has sold, such liability will be considered to result from an activity exclusively carried on outside the United States and will be considered a liability which could not arise from activity performed in the United States. In further illustration, if a corporation which exports all of its inventory from a foreign country to the United States is liable with regard to its improper delivery in the United States of inventory it has sold, such liability will be considered to result from an activity exclusively carried on in the United States and will be considered a liability which could arise from activity performed in the United States.

(d) *Lives or health of United States residents.* Risks in connection with the lives or health of residents of the United States include those risks which are the subject of insurance contracts referred to in section 801(a), relating to the definition of a life insurance company. If the insured is a resident of the United States at the time the insurance contract is approved, the risk is in connection with the life or health of a resident of the United States for the period of coverage under the contract. However, if during such period of coverage the insured notifies the insurer, or circumstances known to the insurer indicate, that the insured is no longer a resident of the United States, the risk shall cease to be a risk in connection with the life or health of a resident of the United States for the policy period in which the insured gives such notice or such circumstances are known to the insurer, and for each subsequent policy period. Conversely, if the insured is a resident of a particular foreign country at the time the insurance contract is approved, the risk is in connection with the life or health of a resident of such foreign country for the period of coverage under the contract. However, if during such period of coverage the insured notifies the insurer, or circumstances known to the insurer indicate, that the insured is no longer a resident of such foreign country, the risk shall cease to be a risk in connection with the life or health of a resident of such particular foreign country for the policy period in which the insured gives such notice or such circumstances are known to the insurer, and for each subsequent policy period. In determining the country of residence of an insured, the principles of §§ 301.7701(b)–1 through 301.7701(b)–9 of this chapter, relating to the determination of residence and nonresidence in the United States and of foreign residence, shall apply. Citizens of the United States are not residents of the United States merely because of their citizenship. The application of this paragraph may be illustrated by the following example:

Example. Controlled foreign corporation A is a wholly owned subsidiary of domestic corporation M. Corporation A uses the calendar year as the taxable year and is engaged in the life insurance business in foreign country X. In 1963, A Corporation issues ordinary life insurance contracts on the lives of residents of the United States, including one issued on February 1, 1963, to R, a citizen of foreign country Y and a resident of the United States on such date. All activity in connection with the issuing of such contracts is transacted by mail. On May 1, 1963, R abandons his United States residence and establishes residence in foreign country Z. There are no circumstances known to A Corporation that R has changed his residence until R, on March 1, 1964, actually notifies A Corporation of that change. Income of A Corporation for the policy period of February 1, 1963, to January 31, 1964, from issuing such insurance contracts is income derived from the insurance of United States risks. However, income of A Corporation derived for the policy period of February 1, 1964, to January 31, 1965, from R's insurance contract is not income derived from the insurance of United States risks.

(Secs. 913(m) (92 Stat. 3106; 26 U.S.C. 913(m)), and 7805 (68A Stat. 917; 26 U.S.C. 7805), Internal Revenue Code of 1954)

[T.D. 6781, 29 FR 18202, Dec. 23, 1964, as amended by T.D. 7736, 45 FR 76143, Nov. 18, 1980; T.D. 8411, 57 FR 15241, Apr. 27, 1992]

§1.953–3 Risks deemed to be United States risks.

(a) *Artificial arrangements.* For purposes of paragraph (a) of §1.953–1, the term ''United States risks'' also includes under section 953(a)(1)(B) risks which are deemed to be United States risks. They are risks (other than United States risks described in section 953(a)(1)(A) and §1.953–2) which a controlled foreign corporation reinsures under an insurance or annuity contract, or with respect to which a controlled foreign corporation issues any insurance or annuity contract, in accordance with any arrangement whereby another corporation which is not a controlled foreign corporation receives an amount of premiums (for reinsuring or issuing any insurance or annuity contract in connection with the United States risks described in section 953(a)(1)(A) and §1.953–2) which is substantially equal to the amount of premiums which the controlled foreign corporation receives under its contracts. Arrangements to which this rule applies include those entered into by the controlled foreign corporation, by its United States shareholders, or by a related person.

(b) *Evidence of arrangements.* The determination of the existence of an arrangement referred to in paragraph (a) of this section shall depend on all the facts and circumstances in each case. In making this determination, it will be recognized that arrangements of this type generally are orally entered into outside the United States and that direct evidence of such an arrangement is not ordinarily available. Therefore, in determining the existence of such an arrangement, consideration will be given to whether or not there is substantial similarity between the type, location, profit margin expected, and loss experience of the risks which the corporation which is not a controlled foreign corporation insures or reinsures and the risks which the controlled foreign corporation insures or reinsures. Further, consideration will be given to the existence of prior similar arrangements between, and the identity of the directors or shareholders of, the corporation which is not a controlled foreign corporation, its shareholders, or related persons and the controlled foreign corporation, its shareholders, or related persons. However, the absence of such prior arrangements or identity of directors or shareholders will not of itself establish the nonexistence of an arrangement referred to in paragraph (a) of this section. In determining whether the amounts received by the controlled foreign corporation and the corporation which is not a controlled foreign corporation are substantially equal, the period in which the controlled foreign corporation receives premiums need not be the same as, or identical in length with, that of the corporation which is not a controlled foreign corporation nor limited to a taxable year of the controlled foreign corporation.

(c) *Illustrations.* The application of this section may be illustrated by the following examples:

Example 1. Controlled foreign corporation A is a wholly owned subsidiary of domestic corporation M. Foreign corporation B is a wholly owned subsidiary of foreign corporation R. All corporations use the calendar year as the taxable year. Corporations M and R, which are not related persons, agree that from July 1, 1963, through December 31, 1963, B Corporation will reinsure all risks of M Corporation which are United States risks described in section 953(a)(1)(A), and that from January 1, 1964, through June 30, 1964, A Corporation will reinsure all risks of R Corporation which are not United States risks described in section 953(a)(1)(A). The amount of premiums received by A Corporation and B Corporation, respectively, as a result of the agreement are substantially equal. The income of A Corporation derived in 1964 from reinsuring the risks of R Corporation is income derived from the insurance of United States risks described in section 953(a)(1)(B).

Example 2. Assume the same facts as in example 1, except that M and R Corporations also agree, as part of their arrangement, that from July 1, 1964, through December 31, 1964, B Corporation will reinsure all risks of M Corporation which are United States risks described in section 953(a)(1)(A), and that from January 1, 1965, through June 30, 1965, A Corporation will reinsure all risks of R Corporation which are not United States risks described in section 953(a)(1)(A). The amount of premiums derived by B Corporation from July 1, 1963, through December 31, 1963, under the agreement is not substantially equal to the amount of premiums derived by A Corporation from January 1, 1964, through June 30, 1964, and the amount of premiums derived by B Corporation from July 1, 1964, through December 31, 1964, is not substantially equal to the amount of premiums derived by A Corporation from January 1, 1965, through June 30, 1965. However, the aggregate amount of premiums received by B Corporation under the arrangement is substantially equal to the aggregate amount of premiums received by A Corporation. The income of A Corporation derived in 1964 and 1965 from reinsuring the risks of R Corporation is income derived from the insurance of United States risks described in section 953(a)(1)(B).

Example 3. Assume the same facts as in example 1, except that foreign corporation C is also a wholly owned subsidiary of R Corporation. Assume that C Corporation uses the calendar year as its taxable year. Assume further that M Corporation and R Corporation agree that from July 1, 1963, through December 31, 1963, B Corporation and C Corporation together will reinsure the United States risks described in section 953(a)(1)(A) of M Corporation. The amount of premiums received by B Corporation in respect of such United States risks is equal to one-third of the amount received by A Corporation in respect of the risks which are not United States risks described in section 953(a)(1)(A), and the amount of premiums received by C Corporation in respect of such United States risks is equal to two-thirds of the amount so received by A Corporation. The income of A Corporation derived in 1964 from reinsuring the risks of R Corporation is income derived from the insurance of United States risks described in section 953(a)(1)(B).

Example 4. Assume the same facts as in example 3, except that controlled foreign corporation D is also a wholly owned subsidiary of M Corporation and uses the calendar year as its taxable year. Assume further that M Corporation and R Corporation agree that in 1964 R Corporation will pay premiums of $300,000 to A Corporation and $700,000 to D Corporation to reinsure all risks of R Corporation which are not United States risks described in section 953(a)(1)(A), and that in 1963 M Corporation will pay premiums of $400,000 to B Corporation and $600,000 to C Corporation to reinsure all risks of M Corporation which are United States risks described in section 953(a)(1)(A). The income of A Corporation and D Corporation derived in 1964 from reinsuring the risks of R Corporation is income derived from the insurance of United States risks described in section 953(a)(1)(B).

Example 5. Controlled foreign corporation A is a wholly owned subsidiary of domestic insurance corporation M. Controlled foreign corporation B is a wholly owned subsidiary of domestic insurance corporation N. All corporations use the calendar year as the taxable year. As a result of an arrangement between M Corporation and N Corporation, in 1963 A Corporation reinsures all the United States risks described in section 953(a)(1)(A) of N Corporation, and B Corporation reinsures all the United States risks described in section 953(a)(1)(A) of M Corporation. The premiums and other consideration received by A Corporation and B Corporation in respect of such reinsurance are not substantially equal. The income of A Corporation and B Corporation in 1962 from reinsuring the risks of N Corporation and M Corporation, respectively, is income derived from the insurance of United States risks described in section 953(a)(1)(A) and is not income derived from the insurance or United States risks described in section 953(a)(1)(B).

Example 6. Assume the same facts as in example 5, except that B Corporation is not a controlled foreign corporation. The income of A Corporation in 1963 from reinsuring the risks of N Corporation is income derived from the insurance of United States risks described in section 953(a)(1)(A) and is not income derived from the insurance of United States risks described in section 953(a)(1)(B).

[T.D. 6781, 29 FR 18207, Dec. 23, 1964]

§ 1.953–4 Taxable income to which section 953 applies.

(a) *Taxable income defined*—(1) *Life insurance taxable income.* For a controlled foreign corporation which is engaged in the business of reinsuring or issuing insurance or annuity contracts and which, if it were a domestic corporation engaged only in such business, would be taxable as a life insurance company to which part I (sections 801 through 820) of subchapter L of the Code applies, the term ''taxable income'' means for purposes of paragraph (a) of §1.953–1 the gain from operations, as defined in section 809(b) and as modified by this section, derived from, and attributable to, the insurance of United States risks. For purposes of determining such taxable income, the provisions of section 802(b) (relating to the definition of life insurance company taxable income) shall not apply. Determinations for purposes of this subparagraph shall be made without regard to section 501(a).

(2) *Mutual and other insurance taxable income.* For a controlled foreign corporation which is engaged in the business of reinsuring or issuing insurance or annuity contracts and which, if it were a domestic corporation engaged only in such business, would be taxable as a mutual insurance company to which part II (sections 821 through 826) of subchapter L of the Code applies or a mutual marine insurance or other insurance company to which part III (sections 831 and 832) of subchapter L of the Code applies, the term ''taxable income'' means for purposes of paragraph (a) of §1.953–1 taxable income, as defined in section 832(a) and as modified by this section, derived from, and attributable to, the insurance of United States risks. Determinations for purposes of this subparagraph shall be made without regard to section 501(a).

(3) *Corporations not qualifying as insurance companies.* For special rules applicable under this section in the case of a controlled foreign corporation which, if it were a domestic corporation, would not qualify as an insurance company, see §1.953–5.

(b) *Certain provisions inapplicable.* In determining taxable income under this section, the following provisions of subchapter L of the Code shall not apply:

(1) Section 809(d)(4), relating to the operations loss deduction;

(2) Section 809(d)(5), relating to certain nonparticipating contracts;

(3) Section 809(d)(6), relating to certain accident and health insurance and group life insurance;

(4) Section 809(d)(10), relating to small business deduction;

(5) Section 817(b), relating to gain on property held on December 31, 1958, and certain substituted property acquired after 1958; and

(6) Section 832(c)(5), relating to capital losses.

(c) *Computation of reserves required by law*—(1) *Law applicable in determining reserves.* The reserves which will be taken into account as reserves required by law under section 801(b)(2), both in determining for any taxable year whether a controlled foreign corporation is a controlled foreign corporation described in paragraph (a)(1) or (2) of this section and in determining taxable income of such corporation for the taxable year under paragraph (a) of this section, shall be the following reserves:

(i) *Reserves required by the law of a State.* The reserves which are required by the law of the State or States to which the insurance business of the controlled foreign corporation is subject, but only with respect to its United States business, if any, which is taxable under section 819(a).

(ii) *Reserves deemed to be required.* To the extent of such controlled foreign corporation's insurance business not taxable under section 819(a)—

(a) Except as provided in *(b)* of this subdivision (ii), the reserves which would result if such reserves were determined by applying the minimum standards of the law of New York as if such controlled foreign corporation were an insurance company transacting all of its insurance business (other than its United States business which is taxable under section 819(a)) for such taxable year in such State, and

(b) With respect to all risks covered by insurance ceded to such controlled foreign corporation by an insurance company to which apply the provisions of subchapter L of the Code (determined without regard to section 501(a)) and in respect of which an election is made by or on behalf of such controlled foreign corporation to determine its reserves in accordance with this subdivision (b), the amount of reserves against

such risks which would result if all of such reserves were determined by applying the law of the State, to which the risks in the hands of such insurance company are subject, as if such controlled foreign corporation were an insurance company engaged in reinsuring such risks in such State.

(2) *Rules of application.* For purposes of subparagraph (1) of this paragraph, the following rules shall apply:

(i) *Life insurance reserves computed on preliminary term basis.* For purposes of determining under paragraph (a) of this section the taxable income of a controlled foreign corporation, an election may be made by or on behalf of such corporation that the amount of reserves which are taken into account as life insurance reserves with respect to contracts for which reserves are computed on a preliminary term basis shall be determined as provided in section 818(c). This election shall apply, subject to section 818(c), to all life insurance reserves of the controlled foreign corporation, whether or not reserves applicable to the United States business taxable under section 819(a). However, reserves determined as provided in section 818(c) shall not be taken into account in determining whether a controlled foreign corporation is a controlled foreign corporation described in paragraph (a)(1) or (2) of this section.

(ii) *Actual reserves required. (a)* A controlled foreign corporation will be considered to have a reserve only to the extent the reserve has been actually held during the taxable year for which such reserve is claimed.

(b) For determining when reserves are required by the law of a State, see paragraph (b) of § 1.801–5 of this chapter.

(iii) *Total reserves to be taken into account.* The total reserves of a controlled foreign corporation shall be taken into account in determining whether such corporation is a controlled foreign corporation described in paragraph (a)(1) or (2) of this section. Therefore, in making such determination, the reserves which, under subparagraph (1)(i) of this paragraph, are required by the law of any State shall be taken into account together with the reserves which, under subparagraph (1)(ii) of this paragraph, are deemed to be required. Moreover, reserves applicable to the reinsuring or the issuing of insurance or annuity contracts of both United States risks and foreign risks shall be taken into account. Finally, except as provided in subdivision (i) of this subparagraph, the reserves which are taken into account in determining whether a controlled foreign corporation is a controlled foreign corporation described in paragraph (a)(1) or (2) of this section shall be the same reserves which are taken into account in determining under paragraph (a) of this section the taxable income of such corporation.

(iv) *Method of comparing reserves when subject to more than one State.* If the insurance business of a controlled foreign corporation is subject to the law of more than one State, the amount of reserves taken into account under subparagraph (1)(i) of this paragraph shall be the amount of the highest aggregate reserve required by any State, determined as provided in paragraph (a) of § 1.801–5 of this chapter.

(d) *Domestic corporation tax attributes.* In determining taxable income of a controlled foreign corporation under this section there shall be allowed, except as provided in section 953(b), this section, and § 1.953–5, the exclusions and deductions from gross income which would be allowed if such corporation were a domestic insurance company engaged in the business of only reinsuring or issuing the insurance or annuity contracts which have been reinsured or issued by such corporation. For this purpose, the provisions of sections 819, 821(e), 822(e), 831(b), and 832(d), relating to foreign insurance companies, shall not apply; however, for the exclusion from the taxable income determined under section 953 of amounts derived from sources within the United States, see section 952(b) and paragraph (b) of § 1.952–1. Furthermore, taxable income shall be determined under this section without regard to section 882 (b) and (c), relating to gross income and deductions of a foreign corporation, and without regard to whether the controlled foreign corporation is carrying on an insurance business in the United States. For other rules relating to the determination of gross income and taxable income of a foreign corporation for purposes of subpart F, see §1.952–2.

(e) *Limitation on certain amounts in respect of United States risks.* In determining taxable income under this section the following amounts shall not, in accordance with section 953(b)(4), be taken into account except to the extent they are attributable to the reinsuring or issuing of any insurance or annuity contract in connection with United States risks described in §1.953–2 or §1.953–3:

(1) The amount of premiums determined under section 809(c)(1);

(2) The net decrease in reserves determined under section 809(c)(2);

(3) The net increase in reserves determined under section 809(d)(2); and

(4) The premiums earned on insurance contracts during the taxable year, as determined under section 832(b)(4). For the allocation and apportionment of such amounts to income from the insurance of United States risks, see paragraphs (f) and (g) of this section.

(f) *Items allocated or apportioned*—(1) *Rules of allocation or apportionment.* In determining taxable income under this section, first determine all items of income, expenses, losses, and other deductions which directly relate to the premiums received for the reinsuring or the issuing of any insurance or annuity contract in connection with United States risks, as defined in §§1.953–2 and 1.953–3, and allocate such items to the insurance of United States risks. For example, the deductions allowed by section 809(d)(1), relating to death benefits, section 809(d)(3), relating to dividends to policyholders, and section 809(d)(7), relating to the assumption by another person of liabilities under insurance contracts, shall be allocated to the insurance of United States risks to the extent they relate directly to the premiums received for reinsuring or issuing insurance or annuity contracts in connection with United States risks. Next, determine all items of income, expenses, losses, and other deductions which directly relate to the premiums received for the reinsuring or the issuing of any insurance or annuity contract in connection with foreign risks and allocate such items to the reinsuring of foreign risks. Finally, determine all items of income, expenses, losses, and other deductions which relate to the premiums received for the reinsuring or the issuing of any insurance or annuity contract in connection with both United States risks and foreign risks, and, except as provided in paragraph (g) of this section, apportion such items between the insurance of United States risks and the insurance of foreign risks in the manner prescribed in subparagraph (2) or (3) of this paragraph, as the case may be. As used in this section, the term ‘‘foreign risks’’ means risks which are not United States risks as defined in §1.953–2 or §1.953–3.

(2) *Method of apportionment in determination of life insurance taxable income*—(i) *Investment yield and net long-term capital gain.* Unless they can be allocated to the insurance of United States risks, as provided in subparagraph (1) of this paragraph, in determining a controlled foreign corporation's taxable income for any taxable year under paragraph (a)(1) of this section—

(a) The investment yield under section 804(c),

(b) The amount (if any) under section 809(b)(1)(B) by which the net long-term capital gain exceeds the net short-term capital loss, and

(c) Those deductions allowed under section 809(d)(8), (9), and (12) which relate to gross investment income shall be apportioned to the reinsuring and issuing of insurance and annuity contracts in connection with United States risks in an amount which bears the same ratio to each of such amounts of investment yield, excess gain, and deductions as the sum of the mean of each of the items described in section 810(c) at the beginning and end of the taxable year attributable to reinsuring and issuing any insurance and annuity contracts in connection with United States risks bears to the sum of the mean of each of the items described in section 810(c) at the beginning and end of the taxable year attributable to reinsuring and issuing all insurance and annuity contracts. Thus, for example, if the ratio which the sum of the mean of each of the items described in section 810(c) at the beginning and end of

the taxable year attributable to reinsuring and issuing insurance and annuity contracts in connection with United States risks bears to the sum of the mean of each of the items described in section 810(c) at the beginning and end of the taxable year attributable to reinsuring and issuing all insurance and annuity contracts in one to three, then, unless an allocation to the insurance of United States risks can be made as provided in subparagraph (1) of this paragraph, one-third of each of such amounts of investment yield, excess gain, and deductions shall be apportioned to the reinsuring and issuing of insurance and annuity contracts in connection with United States risks, and two-thirds of each of such amounts shall be apportioned to the reinsuring and issuing of insurance and annuity contracts in connection with foreign risks.

(ii) *Other income and deductions—(a) Amount taken into account.* In determining a controlled foreign corporation's taxable income for any taxable year under paragraph (a)(1) of this section, all items of income taken into account under section 809(c)(3), relating to other amounts of gross income, and the other deductions allowed under section 809(d)(12) to the extent that such other deductions do not relate to gross investment income shall be apportioned to the reinsuring and issuing of insurance and annuity contracts in connection with United States risks in an amount which bears the same ratio to each of such items of income or of such other deductions as the numerator determined under *(b)* of this subdivision bears to the denominator determined under *(c)* of this subdivision.

(b) Numerator. The numerator used for purposes of the apportionment under *(a)* of this subdivision shall be an amount which equals the amount determined under *(c)* of this subdivision, but only to the extent that the amount so determined is taken into account under paragraph (e) of this section in determining taxable income for the taxable year.

(c) Denominator. The denominator used for purposes of the apportionment under *(a)* of this subdivision shall be an amount which equals—

(1) The amount of premiums determined under section 809(c)(1) for the taxable year, plus

(2) The net decrease in reserves determined under section 809(c)(2) for such year, minus

(3) The net increase in reserves determined under section 809(d)(2) for such year.

(iii) *Reserves used in apportionment formula.* The rules for determining which reserves are taken into account in determining the taxable income of a controlled foreign corporation under paragraph (a) of this section shall also apply under subdivision (ii) *(b)* and *(c)* of this subparagraph in determining the net decrease in reserves under section 809(c)(2) or the net increase in reserves under section 809(d)(2). See paragraph (c) of this section.

(3) *Method of apportionment in determination of mutual and other insurance income*—(i) *In general.* In determining a controlled foreign corporation's taxable income for any taxable year under paragraph (a)(2) of this section, any item which is required to be apportioned under subparagraph (1) of this paragraph shall be apportioned to the reinsuring and issuing of insurance and annuity contracts in connection with United States risks in an amount which bears the same ratio to the total amount of such item as the amount of premiums earned on insurance contracts during the taxable year which is required to be taken into account by such corporation under paragraph (e)(4) of this section in determining such taxable income bears to the total amount of all its premiums earned (as determined under section 832(b)(4)) on insurance contracts during the taxable year.

(ii) *Reserves used in apportionment formula.* The principles of subparagraph (2)(iii) of this paragraph shall apply in determining the reserves included in premiums earned on insurance contracts during the taxable year for purposes of subdivision (i) of this subparagraph.

(g) *Separate accounting.* The methods of apportionment prescribed in subparagraphs (2) and (3) of paragraph (f) of this section for determining taxable income under this section shall not apply if the district director determines that the controlled foreign corporation, in good faith and unaffected by considerations of tax liability, regularly employs in its books of account a detailed segregation of receipts, expenditures, assets, liabilities, and net worth which clearly reflects the income derived from the reinsuring or issuing of insurance or annuity contracts in connection with United States risks. The district director, in making such determination, shall give effect to any foreign law, satisfactory evidence of which is presented by the United States shareholder to the district, director, which requires a reasonable segregation of those items of income, expense, losses, and other deductions which relate to determining such taxable income.

(h) *Illustration.* The application of paragraphs (e) and (f) of this section may be illustrated by the following example:

Example. Controlled foreign corporation A, incorporated under, and engaged in an insurance business subject to, the laws of foreign country X, is a wholly owned subsidiary of domestic corporation M. Both corporations use the calendar year as the taxable year. Corporation M is a life insurance company as defined in section 801(a); A Corporation would, if it were a domestic corporation, be taxable under part I of subchapter L of the Code. In 1963, A Corporation derives income from the insurance of United States risks as a result of reinsuring the life insurance policies issued by M Corporation on lives of residents of the United States. In 1963, A Corporation also issues policies of life insurance on individuals who are not residents of the United States, but its premiums from the reinsuring of United States risks exceed he 5-percent minimum premium requirement prescribed in paragraph (b) of §1.953–1. Based upon the facts set forth in paragraph (a) of this example, A Corporation for 1963 has taxable income under this section of $40,200, which is attributable to the reinsuring of life insurance contracts in connection with United States risks, determined in the manner provided in paragraphs (b), (c), and (d) of this example.

(a) A summary of the entire operations of A Corporation for 1963, determined under this section as though such corporation were a domestic life insurance company but without applying paragraph (f) of this section, is as follows:

Item	Attributable to all insurance	Attributable to reinsuring U.S. risks	Attributable to insuring foreign risks
Investment Income:			
(1) Investment yield under section 804(c)	$90,000	Unallocable	Unallocable
(2) Sum of the mean of each of the items described in section 810(c) at beginning and end of 1963	2,500,000	$1,000,000	$1,500,000
(3) Required interest under section 809(a)(2)	60,000	25,000	35,000
(4) Deductions allowed under section 809(d)(8), (9), and (12) which relate to gross investment income	10,000	Unallocable	Unallocable
Underwriting Income:			
(5) Premiums under section 809(c)(1)	600,000	200,000	400,000
(6) Net decrease in reserves under section 809(c)(2)	10,000	None	10,000
(7) Net increase in reserves under section 809(d)(2)	40,000	40,000	None
(8) Deductions allowed under section 809(d) (other than deduction allowed under section 809(d)(2) and other than those deductions allowed under section 809(d)(8), (9), and (12) which relate to gross investment income):			
(i) Allocable	330,000	110,000	220,000
(ii) Unallocable	60,000	Unallocable	Unallocable

(b) The unallocable investment yield ($90,000) under paragraph (a)(1) of this example and the unallocable deductions ($10,000) under paragraph (a)(4) relating to gross investment income are apportioned to the reinsuring of United States risks under paragraph (f)(1)(i) of this section in the amounts of $36,000, and $4,000, respectively, determined as follows:

(1) Sum of the mean of each of the items described in section 810(c) at beginning and end of 1963, attributable to reinsuring U.S. risks (paragraph (a)(2))	$1,000,000
(2) Sum of the mean of each of the items described in section 810(c) at beginning and end of 1963, attributable to all insurance (paragraph (a)(2))	$2,500,000
(3) Ratio of amount under subparagraph (1) to amount under subparagraph (2) ($1,000,000/$2,500,000)	40%
(4) Amount of investment yield attributable to reinsuring of U.S. risks (40% of $90,000)	$36,000
(5) Amount of such deductions attributable to reinsuring of U.S. risks (40% of $10,000)	$4,000

(c) The unallocable deductions ($60,000) under paragraph (a)(8)(ii) of this example which do not relate to gross investment income are apportioned to the reinsuring of United States risks under paragraph (f)(2)(ii) of this section in the amount of $16,800, determined as follows:

(1) The numerator determined under paragraph (f)(2)(ii)*(b)* of this section is $160,000, determined as follows:

(i) Premiums under section 809(c)(1) attributable to reinsuring U.S. risks (paragraph (a)(5))	$200,000	
(ii) Plus: Net decrease in reserves under section 809(c)(2) attributable to reinsuring U.S. risks (paragraph (a)(6))		$200,000
(iii) Less: Net increase in reserves under section 809(d)(2) attributable to reinsuring U.S. risks (paragraph (a)(7))		$40,000
		$160,000

(2) The denominator determined under paragraph (f)(2)(ii)(c) of this section is $570,000, determined as follows:

(i) Premiums under section 809(c)(1) attributable to all insurance (paragraph (a)(5))	$600,000	
(ii) Plus: Net decrease in reserves under section 809(c)(2) attributable to all insurance (paragraph (a)(6))	10,000	
		$610,000
(iii) Less: Net increase in reserves under section 809(d)(2) attributable to all insurance (paragraph (a)(7))		40,000
		$570,000

(3) Ratio which the numerator determined under subparagraph (1) bears to the denominator determined under subparagraph (2) ($160,000/$570,000)—28%.

(4) Amount of deductions attributable to reinsuring of U.S. risks (28% of $60,000)—$16,800.

(d) The taxable income of A Corporation for 1963 which constitutes its income derived from the insurance of United States risks for purposes of paragraph (a) of § 1.953–1 is $40,200, determined as follows:

	Attributable to all insurance		Attributable to reinsuring U.S. risks		Attributable to insuring foreign risks	
Item:						
(1) Investment yield under section 804(c) (paragraph (a)(1), unallocable but as apportioned under paragraph (b)(4)	$90,000		$36,000		$54,000	
(2) Less: Required interest under section 809(a)(2) (paragraph (a)(3))	60,000		25,000		35,000	
(3) Life insurance company's share of investment yield under section 809(b)(1)(A)	....	$30,000		$11,000		$19,000
Plus sum of:						
(4) Premiums under section 809(c)(1) (paragraph (a)(5))	600,000		200,000		400,000	
(5) Net decrease in reserves under section 809(c)(2) (paragraph (a)(6))	10,000	610,000	None	200,000	10,000	410,000
Sum determined under section 809(b)(1) ...	....	640,000		211,000		429,000
Less sum of:						
(6) Net increase in reserves under section 809(d)(2) (paragraph (a)(7))	40,000		40,000		None	
(7) Deductions allowed under section 809(d)(8), (9), and (12) which relate to gross investment income (paragraph (a)(4)), unallocable but as apportioned under paragraph (b)(5)	10,000		4,000		6,000	
(8) Deductions allowed under section 809(d) (other than deduction allowed under section 809(d)(2) and other than those deductions allowed under section 809(d)(8), (9), and (12) which relate to gross investment income) (paragraph (a)(8)):.						
(i) Allocable	330,000		110,000		220,000	
(ii) Unallocable, but as apportioned under paragraph (c)(4)	60,000	440,000	16,800	170,800	43,200	269,200
Gain from operations	....	200,000		40,200		159,800

[T.D. 6781, 29 FR 18207, Dec. 23, 1964]

§1.953–5 Corporations not qualifying as insurance companies.

(a) *In general.* A controlled foreign corporation is not excluded from the application of paragraph (a) of §1.953–1 because such corporation, if it were a domestic corporation, would not be taxable as an insurance company to which subchapter L of the Code applies. Thus, if a controlled foreign corporation reinsures or issues insurance or annuity contracts in connection with United States risks, as defined in §1.953–2 or §1.953–3, and satisfies the 5-percent minimum premium requirement prescribed in paragraph (b) of §1.953–1, such corporation may derive income from the insurance of United States risks even though the primary and predominant business activity of such corporation during the taxable year is not the issuing of insurance or annuity contracts or the reinsuring of risks underwritten by insurance companies.

(b) *Income from insurance of United States risks by noninsurance company.* For purposes of paragraph (a) of §1.953–1, the taxable income derived from the reinsuring or the issuing of any insurance or annuity contract in connection with United States risks by a controlled foreign corporation which, if it were a domestic corporation, would not be taxable as an insurance company to which subchapter L of the Code applies shall be determined under §1.953–4, subject to, and to the extent not inconsistent with, the special rules prescribed in paragraph (c) or (d) of this section, whichever applies.

(c) *Special rules in determining taxable income*—(1) *In general.* The rules prescribed in this paragraph apply in order to exclude from the determination under §1.953–4 of the taxable income described in paragraph (b) of this section those items of the controlled foreign corporation's gross income and deductions which are not attributable to the reinsuring and issuing of insurance and annuity contracts.

(2) *Life insurance taxable income*—(i) *Amount of investment yield taken into account.* For purposes of determining the taxable income of a controlled foreign corporation which would not be taxable as an insurance company to which subchapter L of the Code applies if it were a domestic corporation but would be taxable as an insurance company to which part I of such subchapter applies if it were a domestic insurance company engaged in the business of only reinsuring or issuing the insurance or annuity contracts which have been reinsured or issued by such corporation, the investment yield under section 804(c), the amount (if any) by which the net long-term capital gain exceeds the net short-term capital loss, and all items of income taken into account under section 809(c)(3) shall be taken into account, subject to the provisions of paragraphs (e) and (f) of §1.953–4, in an amount which bears the same ratio to each of such amounts of investment yield, excess gain, and income items, as the case may be, as the numerator determined under subdivision (ii) of this subparagraph bears to the denominator determined under subdivision (iii) of this subparagraph.

(ii) *Numerator.* The numerator used for purposes of the apportionment under subdivision (i) of this subparagraph shall be the sum of—

(a) The mean of each of the items described in section 810(c) at the beginning and end of the taxable year, determined in accordance with the rules prescribed in paragraph (c) of §1.953–4 for purposes of determining taxable income of a controlled foreign corporation under paragraph (a) of §1.953–4,

(b) The mean of other liabilities at the beginning and end of the taxable year which are attributable to the reinsuring and issuing of insurance and annuity contracts, and

(c) The mean of the earnings and profits accumulated by the controlled foreign corporation at the beginning and end of the taxable year (determined without diminution by reason of any distributions made during the taxable year) which are attributable to the reinsuring and issuing of insurance and annuity contracts.

(iii) *Denominator.* The denominator used for purposes of the apportionment under subdivision (i) of this subparagraph shall be the mean of the value of the total assets held by the controlled foreign corporation at the beginning and end of the taxable year, determined by taking assets into account at their actual value (not reduced by liabilities), which, in the absence of affirmative evidence to the contrary, shall be deemed to be (a) face value in the case of bills receivable, accounts receivable, notes receivable, and open accounts held by a controlled foreign corporation using the cash receipts and disbursements method of accounting and (b) adjusted basis in the case of all other assets.

(3) *Mutual and other insurance taxable income*—(i) *Amount of insurance income taken into account.* For purposes of determining the taxable income of a controlled foreign corporation which, if it were a domestic corporation, would not be taxable as an insurance company to which subchapter L of the Code applies but which if it were a domestic insurance company engaged in the business of only reinsuring or issuing the insurance or annuity contracts which have been reinsured or issued by such corporation, would be taxable as a mutual insurance company to which part II of subchapter L of the Code applies, or would be taxable as a mutual marine insurance or other insurance company to which part III of subchapter L of the Code applies, the sum of the items of gross income referred to in section 832(b)(1) (except the gross amount earned during the taxable year from underwriting income described in section 832(b)(1)(A)) reduced by the deductions allowable under section 832(c) which are related to such items of gross income shall be taken into account, subject to the provisions of paragraphs (e) and (f) of § 1.953–4, in an amount which bears the same proportion to the sum of such items of gross income reduced by such deductions as the numerator determined under subdivision (ii) of this subparagraph bears to the denominator determined under subdivision (iii) of this subparagraph.

(ii) *Numerator.* The numerator used for purposes of the apportionment under subdivision (i) of this subparagraph shall be the sum of—

(a) The mean of the controlled foreign corporation's unearned premiums at the beginning and end of the taxable year, determined under section 832(b)(4)(B) and in accordance with the rules prescribed in paragraph (c) of § 1.953–4 for purposes of determining taxable income of a controlled foreign corporation under paragraph (a) of § 1.953–4,

(b) The mean of such corporation's unpaid losses at the beginning and end of the taxable year, determined under section 832(b)(5)(B),

(c) The mean of the items described in section 810(c)(4) at the beginning and end of the taxable year, to the extent allowable to such corporation under section 832(c)(11),

(d) The mean of other liabilities at the beginning and end of the taxable year which are attributable to the reinsuring and issuing of insurance and annuity contracts, and

(e) The mean of the earnings and profits accumulated by such corporation at the beginning and end of the taxable year (determined without diminution by reason of any distributions made during the taxable year) which are attributable to the reinsuring and issuing of insurance and annuity contracts.

(iii) *Denominator.* The denominator used for purposes of the apportionment under subdivision (i) of this subparagraph shall be the mean of the value of the total assets held by the controlled foreign corporation at the beginning and end of the taxable year, determined in the manner prescribed in subparagraph (2)(iii) of this paragraph.

(d) *Separate accounting.* The special rules prescribed in paragraph (c) of this section shall not apply if the district director determines that the controlled foreign corporation, in good faith and unaffected by considerations of tax liability, regularly employs in its books of account a detailed segregation of receipts, expenditures, assets, liabilities, and net worth which clearly reflects the income derived from the reinsuring or issuing of insurance or annuity contracts. The district director, in making such determination, shall give effect to any foreign law, satisfactory evidence of which is presented by the United States shareholder to the district director, which requires a reasonable segregation of the insurance assets of the controlled foreign corporation.

[T.D. 6781, 29 FR 18211, Dec. 23, 1964]

§1.953–6 Relationship of sections 953 and 954.

(a) *Priority of application.* For purposes of determining the subpart F income of a controlled foreign corporation under section 952 for any taxable year, the provisions of section 954, relating to foreign base company income, shall be applied, after first applying section 953, only with respect to income which is not income derived from the insurance of United States risks under section 953. For example, the provisions of section 954 may be applied with respect to the income of a controlled foreign corporation which is not income derived from the insurance of United States risks under section 953 because such corporation does not satisfy the 5-percent minimum premium requirement prescribed in paragraph (b) of §1.953–1, even though such corporation has taxable income, as determined under §1.953–4, which is attributable to the reinsuring or the issuing of any insurance or annuity contracts in connection with United States risks. In addition, the provisions of section 954 may apply with respect to the income of a controlled foreign corporation to the extent such income is not allocated or apportioned under §1.953–4 to the insurance of United States risks.

(b) *Decrease in income not material.* It is not material that the income of a controlled foreign corporation is decreased as a result of the application of paragraph (a) of this section. Thus, in applying §1.953–4 to the income of a controlled foreign corporation described in paragraph (c)(2) of §1.953–5 which would, but for paragraph (a) of this section, be subject to the provisions of section 954, there shall be allowed, in determining the taxable income derived from the insurance of United States risks under §1.953–4, a deduction under section 809(a)(1) for the share of each and every item of investment yield set aside for policyholders; it is not material that in determining foreign base company income such deduction would not be allowed under section 954(b)(5). Further, income of a controlled foreign corporation which is required to be taken into account under section 953 in determining income derived from the insurance of United States risks and would, but for the provisions of paragraph (a) of this section, constitute foreign base company income under section 954 shall not be taken into account under section 954(b)(3)(B) in determining whether foreign base company income exceeds 70 percent of gross income for the taxable year.

(c) *Increase in income not material.* It is not material that the income of a controlled foreign corporation is increased as a result of the application of paragraph (a) of this section. Thus, in applying §1.953–4 to income of a controlled foreign corporation which would, but for paragraph (a) of this section, be subject to the provisions of section 954, it is not material that the dividends, interest, and gains from the sale or exchange of stock or securities derived from certain investments which would not be included in foreign personal holding company income under section 954(c)(3)(B) are included under section 953 in income derived from the insurance of United States risks. Further, income of a controlled foreign corporation which is required to be taken into account under section 953 in determining income derived from the insurance of United States risks and would, but for paragraph (a) of this section, constitute foreign base company income shall not be excluded under section 954(b)(3)(A) for the taxable year.

[T.D. 6781, 29 FR 18212, Dec. 23, 1964]

§1.954–0 Introduction.

(a) *Effective dates*—(1) *Final regulations*—(i) *In general.* Except as otherwise specifically provided, the provisions of §§1.954–1 and 1.954–2 apply to taxable years of a controlled foreign corporation beginning after November 6, 1995. If any of the rules described in §§1.954–1 and 1.954–2 are inconsistent with provisions of other regulations under subpart F, these final regulations are intended to apply instead of such other regulations.

(ii) *Election to apply final regulations retroactively*—(A) *Scope of election.* An election may be made to apply the final regulations retroactively with respect to any taxable year of the controlled foreign corporation beginning on or after January 1, 1987. If such an election is made, these final regulations must be applied in their entirety for such taxable year and all subsequent taxable years. All references to section 11 in the final regulations shall be deemed to include section 15, where applicable.

(B) *Manner of making election.* An election under this paragraph (a)(1)(ii) is binding on all United States shareholders of the controlled foreign corporation and must be made—

(*1*) By the controlling United States shareholders, as defined in § 1.964–1(c)(5), by attaching a statement to such effect with their original or amended income tax returns for the taxable year of such United States shareholders in which or with which the taxable year of the CFC ends, and including any additional information required by applicable administrative pronouncements, or

(*2*) In such other manner as may be prescribed in applicable administrative pronouncements.

(C) *Time for making election.* An election may be made under this paragraph (a)(1)(ii) with respect to a taxable year of the controlled foreign corporation beginning on or after January 1, 1987 only if the time for filing a return or claim for refund has not expired for the taxable year of any United States shareholder of the controlled foreign corporation in which or with which such taxable year of the controlled foreign corporation ends.

(D) *Revocation of election.* An election made under this paragraph (a)(1)(ii) may not be revoked.

(2) *Temporary regulations.* The provisions of §§ 4.954–1 and 4.954–2 of this chapter apply to taxable years of a controlled foreign corporation beginning after December 31, 1986 and on or before November 6, 1995. However, the provisions of § 4.954–2(b)(6) of this chapter continue to apply. For transactions entered into on or before October 10, 1995, taxpayers may rely on Notice 89–90, 1989–2 C.B. 407, in applying the temporary regulations.

(3) *§§ 1.954A–1 and 1.954A–2.* The provisions of §§ 1.954A–1 and 1.954A–2 (as contained in 26 CFR part 1 edition revised April 1, 1995) apply to taxable years of a controlled foreign corporation beginning before January 1, 1987. All references therein to sections of the Code are to the Internal Revenue Code of 1954 prior to the amendments made by the Tax Reform Act of 1986.

(b) *Outline of §§ 1.954–0, 1.954–1 and 1.954–2.*

§ 1.954–0 Introduction.

(a) Effective dates.

(1) Final regulations.

(i) In general.

(ii) Election to apply final regulations retroactively.

(A) Scope of election.

(B) Manner of making election.

(C) Time for making election.

(D) Revocation of election.

(2) Temporary regulations.

(3) §§ 1.954A–1 and 1.954A–2.

(b) Outline of §§ 1.954–0, 1.954–1, and 1.954–2.

§ 1.954–1 Foreign base company income.

(a) In general.

(1) Purpose and scope.

(2) Gross foreign base company income.

(3) Adjusted gross foreign base company income.

(4) Net foreign base company income.

(5) Adjusted net foreign base company income.

(6) Insurance income.

(7) Additional items of adjusted net foreign base company income or adjusted net insurance income by reason of section 952(c).

(b) Computation of adjusted gross foreign base company income and adjusted gross insurance income.

(1) De minimis and full inclusion tests.

(i) De minimis test.

(A) In general.

(B) Currency translation.

(C) Coordination with sections 864(d) and 881(c).

(ii) Seventy percent full inclusion test.

(2) Character of gross income included in adjusted gross foreign base company income.

(3) Coordination with section 952(c).

(4) Anti-abuse rule.

(i) In general.

(ii) Presumption.

(iii) Related persons.

(iv) Example.

(c) Computation of net foreign base company income.

(1) General rule.

(i) Deductions against gross foreign base company income.

(ii) Losses reduce subpart F income by operation of earnings and profits limitation.

(iii) Items of income.

(A) Income other than passive foreign personal holding company income.

(B) Passive foreign personal holding company income.

(2) Computation of net foreign base company income derived from same country insurance income.
(d) Computation of adjusted net foreign base company income or adjusted net insurance income.
(1) Application of high tax exception.
(2) Effective rate at which taxes are imposed.
(3) Taxes paid or accrued with respect to an item of income.
(i) Income other than passive foreign personal holding company income.
(ii) Passive foreign personal holding company income.
(4) Special rules.
(i) Consistency rule.
(ii) Coordination with earnings and profits limitation.
(iii) Example.
(5) Procedure.
(6) Coordination of full inclusion and high tax exception rules.
(7) Examples.
(e) Character of income.
(1) Substance of the transaction.
(2) Separable character.
(3) Predominant character.
(4) Coordination of categories of gross foreign base company income or gross insurance income.
(i) In general.
(ii) Income excluded from other categories of gross foreign base company income.
(f) Definition of related person.
(1) Persons related to controlled foreign corporation.
(i) Individuals.
(ii) Other persons.
(2) Control.
(i) Corporations.
(ii) Partnerships.
(iii) Trusts and estates.
(iv) Direct or indirect ownership.

§1.954–2 Foreign personal holding company income.

(a) Computation of foreign personal holding company income.
(1) Categories of foreign personal holding company income.
(2) Coordination of overlapping categories under foreign personal holding company provisions.
(i) In general.
(ii) Priority of categories.
(3) Changes in the use or purpose for which property is held.
(i) In general.
(ii) Special rules.
(A) Anti-abuse rule.
(B) Hedging transactions.
(iii) Example.
(4) Definitions and special rules.
(i) Interest.
(ii) Bona fide hedging transaction.
(A) Definition.
(B) Identification.
(C) Effect of identification and non-identification.
(*1*) Transactions identified.
(*2*) Inadvertent identification.
(*3*) Transactions not identified.
(*4*) Inadvertent error.
(*5*) Anti-abuse rule.
(iii) Inventory and similar property.
(A) Definition.
(B) Hedging transactions.
(iv) Regular dealer.
(v) Dealer property.
(A) Definition.
(B) Securities dealers.
(C) Hedging transactions.
(vi) Examples.
(vii) Debt instrument.
(b) Dividends, interest, rents, royalties and annuities.
(1) In general.
(2) Exclusion of certain export financing interest.
(i) In general.
(ii) Exceptions.
(iii) Conduct of a banking business.
(iv) Examples.
(3) Treatment of tax-exempt interest. [Reserved]
(4) Exclusion of dividends or interest from related persons.
(i) In general.
(A) Corporate payor.
(B) Payment by a partnership.
(ii) Exceptions.
(A) Dividends.
(B) Interest paid out of adjusted foreign base company income or insurance income.
(*1*) In general.
(*2*) Rule for corporations that are both recipients and payors of interest.
(C) Coordination with sections 864(d) and 881(c).
(iii) Trade or business requirement.
(iv) Substantial assets test.
(v) Valuation of assets.
(vi) Location of tangible property.
(A) In general.
(B) Exception.
(vii) Location of intangible property.
(A) In general.
(B) Exception for property located in part in the payor's country of incorporation.
(viii) Location of inventory and dealer property.
(A) In general.
(B) Inventory and dealer property located in part in the payor's country of incorporation.
(ix) Location of debt instruments.
(x) Treatment of certain stock interests.
(xi) Treatment of banks and insurance companies. [Reserved]
(5) Exclusion of rents and royalties derived from related persons.
(i) In general.
(A) Corporate payor.

(B) Payment by a partnership.
(ii) Exceptions.
(A) Rents or royalties paid out of adjusted foreign base company income or insurance income.
(B) Property used in part in the controlled foreign corporation's country of incorporation.
(6) Exclusion of rents and royalties derived in the active conduct of a trade or business.
(c) Excluded rents.
(1) Active conduct of a trade or business.
(2) Special rules.
(i) Adding substantial value.
(ii) Substantiality of foreign organization.
(iii) Active leasing expenses.
(iv) Adjusted leasing profit.
(3) Examples.
(d) Excluded royalties.
(1) Active conduct of a trade or business.
(2) Special rules.
(i) Adding substantial value.
(ii) Substantiality of foreign organization.
(iii) Active licensing expenses.
(iv) Adjusted licensing profit.
(3) Examples.
(e) Certain property transactions.
(1) In general.
(i) Inclusions.
(ii) Exceptions.
(iii) Treatment of losses.
(iv) Dual character property.
(2) Property that gives rise to certain income.
(i) In general.
(ii) Gain or loss from the disposition of a debt instrument.
(3) Property that does not give rise to income.
(f) Commodities transactions.
(1) In general.
(i) Inclusion in foreign personal holding company income.
(ii) Exception.
(iii) Treatment of losses.
(2) Definitions.
(i) Commodity.
(ii) Commodities transaction.
(iii) Qualified active sale.
(A) In general.
(B) Active conduct of a commodities business.
(C) Substantially all.
(D) Activities of employees of a related entity.
(E) Financial activities.
(iv) Qualified hedging transaction.
(A) In general.
(B) Exception.
(g) Foreign currency gain or loss.
(1) Scope and purpose.
(2) In general.
(i) Inclusion.
(ii) Exclusion for business needs.
(A) General rule.
(B) Business needs.
(C) Regular dealers.
(D) Example.
(iii) Special rule for foreign currency gain or loss from an interest-bearing liability.
(3) Election to characterize foreign currency gain or loss that arises from a specific category of subpart F income as gain or loss in that category.
(i) In general.
(ii) Time and manner of election.
(iii) Revocation of election.
(iv) Example.
(4) Election to treat all foreign currency gains or losses as foreign personal holding company income.
(i) In general.
(ii) Time and manner of election.
(iii) Revocation of election.
(5) Gains and losses not subject to this paragraph.
(i) Capital gains and losses.
(ii) Income not subject to section 988.
(iii) Qualified business units using the dollar approximate separate transactions method.
(iv) Gain or loss allocated under § 1.861–9. [Reserved]
(h) Income equivalent to interest.
(1) In general.
(i) Inclusion in foreign personal holding company income.
(ii) Exceptions.
(A) Liability hedging transactions.
(B) Interest.
(2) Definition of income equivalent to interest.
(i) In general.
(ii) Income from the sale of property.
(3) Notional principal contracts.
(i) In general.
(ii) Regular dealers.
(4) Income equivalent to interest from factoring.
(i) General rule.
(ii) Exceptions.
(iii) Factored receivable.
(iv) Examples.
(5) Receivables arising from performance of services.
(6) Examples.

[T.D. 8618, 60 FR 46508, Sept. 7, 1995; T.D. 8618, 60 FR 62024, Dec. 4, 1995; T.D. 8767, 63 FR 14615, Mar. 26, 1998]

§ 1.954–1 Foreign base company income.

(a) *In general*—(1) *Purpose and scope.* Section 954 and §§ 1.954–1 and 1.954–2 provide rules for computing the foreign base company income of a controlled foreign corporation. Foreign base company income is included in the subpart F income of a controlled foreign corporation under the rules of section 952. Subpart F income is included in the gross income of a United States shareholder of a controlled foreign corporation under the rules of section 951 and thus is subject to current taxation under section 1, 11 or 55 of the Internal Revenue Code. The determination of whether a foreign corporation is a controlled foreign corporation, the subpart F income of which is included currently in the gross income of its United States shareholders, is made under the rules of section 957.

(2) *Gross foreign base company income.* The gross foreign base company income of a controlled foreign corporation consists of the following categories of gross income (determined after the application of section 952(b))—

(i) Foreign personal holding company income, as defined in section 954(c);

(ii) Foreign base company sales income, as defined in section 954(d);

(iii) Foreign base company services income, as defined in section 954(e);

(iv) Foreign base company shipping income, as defined in section 954(f); and

(v) Foreign base company oil related income, as defined in section 954(g).

(3) *Adjusted gross foreign base company income.* The term *adjusted gross foreign base company income* means the gross foreign base company income of a controlled foreign corporation as adjusted by the de minimis and full inclusion rules of paragraph (b) of this section.

(4) *Net foreign base company income.* The term *net foreign base company income* means the adjusted gross foreign base company income of a controlled foreign corporation reduced so as to take account of deductions (including taxes) properly allocable or apportionable to such income under the rules of section 954(b)(5) and paragraph (c) of this section.

(5) *Adjusted net foreign base company income.* The term *adjusted net foreign base company income* means the net foreign base company income of a controlled foreign corporation reduced, first, by any items of net foreign base company income excluded from subpart F income pursuant to section 952(c) and, second, by any items excluded from subpart F income pursuant to the high tax exception of section 954(b). See paragraph (d)(4)(ii) of this section. The term *foreign base company income* as used in the Internal Revenue Code and elsewhere in the Income Tax Regulations means adjusted net foreign base company income, unless otherwise provided.

(6) *Insurance income.* The term *gross insurance income* includes all gross income taken into account in determining insurance income under section 953. The term *adjusted gross insurance income* means gross insurance income as adjusted by the de minimis and full inclusion rules of paragraph (b) of this section. The term *net insurance income* means adjusted gross insurance income reduced under section 953 so as to take into account deductions (including taxes) properly allocable or apportionable to such income. The term *adjusted net insurance income* means net insurance income reduced by any items of net insurance income that are excluded from subpart F income pursuant to section 952(b) or pursuant to the high tax exception of section 954(b). The term *insurance income* as used in subpart F of the Internal Revenue Code and in the regulations under that subpart means adjusted net insurance income, unless otherwise provided.

(7) *Additional items of adjusted net foreign base company income or adjusted net insurance income by reason of section 952(c).* Earnings and profits of the controlled foreign corporation that are recharacterized as foreign base company income or insurance income under section 952(c) are items of adjusted net foreign base company income or adjusted net insurance income, respectively. Amounts subject to recharacterization under section 952(c) are determined after adjusted net foreign base company income and adjusted net insurance income are otherwise determined under subpart F and are not again subject to any exceptions or special rules that would affect the amount of subpart F income. Thus, for example, items of gross foreign base company income or gross insurance income that are excluded from adjusted gross foreign base company income or adjusted gross insurance income because the de minimis test is met are subject to recharacterization under section 952(c). Further, the de minimis and full inclusion tests of paragraph (b)

of this section, and the high tax exception of paragraph (d) of this section, for example, do not apply to such amounts.

(b) *Computation of adjusted gross foreign base company income and adjusted gross insurance income*—(1) *De minimis and full inclusion tests*—(i) *De minimis test*—(A) *In general.* Except as provided in paragraph (b)(1)(i)(C) of this section, adjusted gross foreign base company income and adjusted gross insurance income are equal to zero if the sum of the gross foreign base company income and the gross insurance income of a controlled foreign corporation is less than the lesser of—

(*1*) 5 percent of gross income; or

(*2*) $1,000,000.

(B) *Currency translation.* Controlled foreign corporations having a functional currency other than the United States dollar shall translate the $1,000,000 threshold using the exchange rate provided under section 989(b)(3) for amounts included in income under section 951(a).

(C) *Coordination with sections 864(d) and 881(c).* Adjusted gross foreign base company income or adjusted gross insurance income of a controlled foreign corporation always includes income from trade or service receivables described in section 864(d)(1) or (6), and portfolio interest described in section 881(c), even if the de minimis test of this paragraph (b)(1)(i) is otherwise satisfied.

(ii) *Seventy percent full inclusion test.* Except as provided in section 953, adjusted gross foreign base company income consists of all gross income of the controlled foreign corporation other than gross insurance income and amounts described in section 952(b), and adjusted gross insurance income consists of all gross insurance income other than amounts described in section 952(b), if the sum of the gross foreign base company income and the gross insurance income for the taxable year exceeds 70 percent of gross income. See paragraph (d)(6) of this section, under which certain items of full inclusion foreign base company income may nevertheless be excluded from subpart F income.

(2) *Character of gross income included in adjusted gross foreign base company income.* The gross income included in the adjusted gross foreign base company income of a controlled foreign corporation generally retains its character as foreign personal holding company income, foreign base company sales income, foreign base company services income, foreign base company shipping income, or foreign base company oil related income. However, gross income included in adjusted gross foreign base company income because the full inclusion test of paragraph (b)(1)(ii) of this section is met is termed *full inclusion foreign base company income,* and constitutes a separate category of adjusted gross foreign base company income for purposes of allocating and apportioning deductions under paragraph (c) of this section.

(3) *Coordination with section 952(c).* Income that is included in subpart F income because the full inclusion test of paragraph (b)(1)(ii) of this section is met does not reduce amounts that, under section 952(c), are subject to recharacterization.

(4) *Anti-abuse rule*—(i) *In general.* For purposes of applying the de minimis test of paragraph (b)(1)(i) of this section, the income of two or more controlled foreign corporations shall be aggregated and treated as the income of a single corporation if a principal purpose for separately organizing, acquiring, or maintaining such multiple corporations is to prevent income from being treated as foreign base company income or insurance income under the de minimis test. A purpose may be a principal purpose even though it is outweighed by other purposes (taken together or separately).

(ii) *Presumption.* Two or more controlled foreign corporations are presumed to have been organized, acquired or maintained to prevent income from being treated as foreign base company income or insurance income under the de minimis test of paragraph (b)(1)(i) of this section if the corporations are related persons, as defined in paragraph (b)(4)(iii) of this section, and the corporations are described in paragraph (b)(4)(ii)(A), (B), or (C) of this section. This presumption may be rebutted by proof to the contrary.

(A) The activities carried on by the controlled foreign corporations, or the assets used in those activities, are substantially the same activities that were previously carried on, or assets that were previously held, by a single controlled foreign corporation. Further, the United States shareholders of the controlled foreign corporations or related persons (as determined under paragraph (b)(4)(iii) of this section) are substantially the same as the United States shareholders of the one controlled foreign corporation in a prior taxable year. A presumption made in connection with the requirements of this paragraph (b)(4)(ii)(A) may be rebutted by proof that the activities carried on by each controlled foreign corporation would constitute a separate branch under the principles of §1.367(a)–6T(g)(2) if carried on directly by a United States person.

(B) The controlled foreign corporations carry on a business, financial operation, or venture as partners directly or indirectly in a partnership (as defined in section 7701(a)(2) and §301.7701–3 of this chapter) that is a related person (as defined in paragraph (b)(4)(iii) of this section) with respect to each such controlled foreign corporation.

(C) The activities carried on by the controlled foreign corporations would constitute a single branch operation under §1.367(a)–6T(g)(2) if carried on directly by a United States person.

(iii) *Related persons.* For purposes of this paragraph (b), two or more persons are related persons if they are in a relationship described in section 267(b). In determining for purposes of this paragraph (b) whether two or more corporations are members of the same controlled group under section 267(b)(3), a person is considered to own stock owned directly by such person, stock owned with the application of section 1563(e)(1), and stock owned with the application of section 267(c). In determining for purposes of this paragraph (b) whether a corporation is related to a partnership under section 267(b)(10), a person is considered to own the partnership interest owned directly by such person and the partnership interest owned with the application of section 267(e)(3).

(iv) *Example.* The following example illustrates the application of this paragraph (b)(4).

Example. (i)(1) *USP* is the sole United States shareholder of three controlled foreign corporations: *CFC1, CFC2* and *CFC3.* The three controlled foreign corporations all have the same taxable year. The three controlled foreign corporations are partners in *FP,* a foreign entity classified as a partnership under section 7701(a)(2) and §301.7701–3 of the regulations. For their current taxable years, each of the controlled foreign corporations derives all of its income other than foreign base company income from activities conducted through *FP,* and its foreign base company income from activities conducted both jointly through *FP* and separately without *FP.* Based on the facts in the table below, the foreign base company income derived by each controlled foreign corporation for its current taxable year, including income derived from *FP,* is less than five percent of the gross income of each controlled foreign corporation and is less than $1,000,000:

	CFC1	CFC2	CFC3
Gross income	$4,000,000	$8,000,000	$12,000,000
Five percent of gross income	200,000	400,000	600,000
Foreign base company income	199,000	398,000	597,000

(2) Thus, without the application of the anti-abuse rule of this paragraph (b)(4), each controlled foreign corporation would be treated as having no foreign base company income after the application of the de minimis test of section 954(b)(3)(A) and paragraph (b)(1)(i) of this section.

(ii) However, under these facts, the requirements of paragraph (b)(4)(i) of this section are met unless the presumption of paragraph (b)(4)(ii) of this section is successfully rebutted. The sum of the foreign base company income of the controlled foreign corporations is $1,194,000. Thus, the amount of gross foreign base company income of each controlled foreign corporation will not be reduced by reason of the de minimis rule of section 954(b)(3)(A) and this paragraph (b).

(c) *Computation of net foreign base company income*—(1) *General rule.* The net foreign base company income of a controlled foreign corporation (as defined in paragraph (a)(4) of this section) is computed under the rules of this paragraph (c)(1). The principles of

§ 1.904–5(k) shall apply where payments are made between controlled foreign corporations that are related persons (within the meaning of section 954(d)(3)). Consistent with these principles, only payments described in § 1.954–2(b)(4)(ii)(B)(*2*) may be offset as provided in § 1.904–5(k)(2).

(i) *Deductions against gross foreign base company income.* The net foreign base company income of a controlled foreign corporation is computed first by taking into account deductions in the following manner:

(A) First, the gross amount of each item of income described in paragraph (c)(1)(iii) of this section is determined.

(B) Second, any expenses definitely related to less than all gross income as a class shall be allocated and apportioned under the principles of sections 861, 864 and 904(d) to the gross income described in paragraph (c)(1)(i)(A) of this section.

(C) Third, foreign personal holding company income that is passive within the meaning of section 904 (determined before the application of the high-taxed income rule of § 1.904–4(c)) is reduced by related person interest expense allocable to passive income under § 1.904–5(c)(2); such interest must be further allocated and apportioned to items described in paragraph (c)(1)(iii)(B) of this section.

(D) Fourth, the amount of each item of income described in paragraph (c)(1)(iii) of this section is reduced by other expenses allocable and apportionable to such income under the principles of sections 861, 864 and 904(d).

(ii) *Losses reduce subpart F income by operation of earnings and profits limitation.* Except as otherwise provided in § 1.954–2(g)(4), if after applying the rules of paragraph (c)(1)(i) of this section, the amount remaining in any category of foreign base company income or foreign personal holding company income is less than zero, the loss in that category may not reduce any other category of foreign base company income or foreign personal holding company income except by operation of the earnings and profits limitation of section 952(c)(1).

(iii) *Items of income*—(A) *Income other than passive foreign personal holding company income.* A single item of income (other than foreign personal holding company income that is passive) is the aggregate amount from all transactions that falls within a single separate category (as defined in § 1.904–5(a)(1)), and either—

(*1*) Falls within a single category of foreign personal holding company income as—

(*i*) Dividends, interest, rents, royalties and annuities;

(*ii*) Gain from certain property transactions;

(*iii*) Gain from commodities transactions;

(*iv*) Foreign currency gain; or

(*v*) Income equivalent to interest; or

(*2*) Falls within a single category of foreign base company income, other than foreign personal holding company income, as—

(*i*) Foreign base company sales income;

(*ii*) Foreign base company services income;

(*iii*) Foreign base company shipping income;

(*iv*) Foreign base company oil related income; or

(*v*) Full inclusion foreign base company income.

(B) *Passive foreign personal holding company income.* A single item of foreign personal holding company income that is passive is an amount of income that falls within a single group of passive income under the grouping rules of § 1.904–4(c)(3), (4) and (5) and a single category of foreign personal holding company income described in paragraphs (c)(1)(iii)(A)(*1*) (*i*) through (*v*).

(iv) *Effective date.* Paragraph (c)(1)(i) of this section does not apply to all amounts paid or accrued on or after March 23, 1998 except for amounts paid or accrued pursuant to arrangements entered into before March 23, 1998 and not substantially modified (including, for example, by expansion of the arrangement (whether by exercise of an option or otherwise) such as by an increase in the amount of or term of any borrowing, leasing or licensing constituting the arrangement, changes in direct or indirect control of any entity that is a party to the arrangement, or any similar measure which materially increases the tax benefit of the arrangement) on or after March 23, 1998. For rules applicable on or after March 23, 1998, see §1.954–1T(c)(1)(i).

(2) *Computation of net foreign base company income derived from same country insurance income.* Deductions relating to foreign base company income attributable to the issuing (or reinsuring) of any insurance or annuity contract in connection with risks located in the country under the laws of which the controlled foreign corporation is created or organized shall be allocated and apportioned in accordance with the rules set forth in section 953.

(d) *Computation of adjusted net foreign base company income or adjusted net insurance income*—(1) *Application of high tax exception.* Adjusted net foreign base company income (or adjusted net insurance income) equals the net foreign base company income (or net insurance income) of a controlled foreign corporation, reduced by any net item of such income that qualifies for the high tax exception provided by section 954(b)(4) and this paragraph (d). Any item of income that is foreign base company oil related income, as defined in section 954(g), or portfolio interest, as described in section 881(c), does not qualify for the high tax exception. See paragraph (c)(1)(iii) of this section for the definition of the term *item of income.* For rules concerning the treatment for foreign tax credit purposes of amounts excluded from subpart F under section 954(b)(4), see §1.904–4(c). A net item of income qualifies for the high tax exception only if—

(i) An election is made under section 954(b)(4) and paragraph (d)(5) of this section to exclude the income from the computation of subpart F income; and

(ii) It is established that the net item of income was subject to foreign income taxes imposed by a foreign country or countries at an effective rate that is greater than 90 percent of the maximum rate of tax specified in section 11 for the taxable year of the controlled foreign corporation.

(2) *Effective rate at which taxes are imposed.* The effective rate with respect to a net item of income shall be determined separately for each controlled foreign corporation in a chain of corporations through which a distribution is made. The effective rate at which taxes are imposed on a net item of income is—

(i) The United States dollar amount of foreign income taxes paid or accrued (or deemed paid or accrued) with respect to the net item of income, determined under paragraph (d)(3) of this section; divided by

(ii) The United States dollar amount of the net item of foreign base company income or insurance income, described in paragraph (c)(1)(iii) of this section, increased by the amount of foreign income taxes referred to in paragraph (d)(2)(i) of this section.

(3) *Taxes paid or accrued with respect to an item of income*—(i) *Income other than passive foreign personal holding company income.* The amount of foreign income taxes paid or accrued with respect to a net item of income (other than an item of foreign personal holding company income that is passive) for purposes of section 954(b)(4) and this paragraph (d) is the United States dollar amount of foreign income taxes that would be deemed paid under section 960 with respect to that item if that item were included in the gross income of a United States shareholder under section 951(a)(1)(A) (determined, in the case of a United States shareholder that is an individual, as if an election under section 962 has been made, whether or not such election is actually made). For this purpose, in accordance with the regulations under section 960, the amounts that would be deemed paid under section 960 shall be determined separately with respect to each controlled foreign corporation and without regard to the limitation applicable under section 904(a). The amount of foreign income taxes paid or accrued with respect to a net item of income, determined in the manner provided in this paragraph (d), will not be affected by a subsequent reduction in foreign income taxes attributable to a distribution to shareholders of all or part of such income.

(ii) *Passive foreign personal holding company income.* The amount of income taxes paid or accrued with respect to a net item of foreign personal holding company income that is passive for purposes of section 954(b)(4) and this paragraph (d) is the United States dollar amount of foreign income taxes that would be deemed paid under section 960 and that would be taken into account for purposes applying the provisions of § 1.904–4(c) with respect to that net item of income.

(4) *Special rules*—(i) *Consistency rule.* An election to exclude income from the computation of subpart F income for a taxable year must be made consistently with respect to all items of passive foreign personal holding company income eligible to be excluded for the taxable year. Thus, high-taxed passive foreign personal holding company income of a controlled foreign corporation must either be excluded in its entirety, or remain subject to subpart F in its entirety.

(ii) *Coordination with earnings and profits limitation.* If the amount of income included in subpart F income for the taxable year is reduced by the earnings and profits limitation of section 952(c)(1), the amount of income that is a net item of income, within the meaning of paragraph (c)(1)(iii) of this section, is determined after the application of the rules of section 952(c)(1).

(iii) *Example.* The following example illustrates the provisions of paragraph (d)(4)(ii) of this section. All of the taxes referred to in the following example are foreign income taxes. For simplicity, this example assumes that the amount of taxes that are taken into account as a deduction under section 954(b)(5) and the amount of the gross-up required under sections 960 and 78 are equal. Therefore, this example does not separately illustrate the deduction for taxes and gross-up.

Example. During its 1995 taxable year, CFC, a controlled foreign corporation, earns royalty income, net of taxes, of $100 that is foreign personal holding company income. CFC has no expenses associated with this royalty income. CFC pays $50 of foreign income taxes with respect to the royalty income. For 1995, CFC has current earnings and profits of $50. CFC's subpart F income, as determined prior to the application of this paragraph (d), exceeds its current earnings and profits. Thus, under paragraph (d)(4)(ii) of this section, the amount of CFC's only net item of income, the royalty income, will be limited to $50. The remaining $50 will be subject to recharacterization in a subsequent taxable year under section 952(c)(2). Because the amount of foreign income taxes paid with respect to this net item of income is $50, the effective rate of tax on the item, for purposes of this paragraph (d), is 50 percent ($50 of taxes/$50 net item + $50 of taxes). Accordingly, an election under paragraph (d)(5) of this section may be made to exclude the item of income from the computation of subpart F income.

(5) *Procedure.* An election made under the procedure provided by this paragraph (d)(5) is binding on all United States shareholders of the controlled foreign corporation and must be made—

(i) By the controlling United States shareholders, as defined in § 1.964–1(c)(5), by attaching a statement to such effect with their original or amended income tax returns, and including any additional information required by applicable administrative pronouncements; or

(ii) In such other manner as may be prescribed in applicable administrative pronouncements.

(6) *Coordination of full inclusion and high tax exception rules.* Notwithstanding paragraph (b)(1)(ii) of this section, full inclusion foreign base company income will be excluded from subpart F income if more than 90 percent of the adjusted gross foreign base company income and adjusted gross insurance company income of a controlled foreign corporation (determined without regard to the full inclusion test of paragraph (b)(1) of this section) is attributable to net amounts excluded from subpart F income pursuant to an election to have the high tax exception described in section 954(b)(4) and this paragraph (d) apply.

(7) *Examples.* (i) The following examples illustrate the rules of this paragraph (d). All of the taxes referred to in the following examples are foreign income taxes. For simplicity, these examples assume that the amount of taxes that are taken into account as a deduction under section 954(b)(5) and the amount of the gross-up required under sections 960 and 78 are equal. Therefore, these examples do not separately illustrate the deduction for taxes and gross-up. Except as otherwise stated, these examples assume there are no earnings, deficits, or foreign income taxes in the post-1986 pools of earnings and profits or foreign income taxes.

Example 1. (i) *Items of income.* During its 1995 taxable year, controlled foreign corporation *CFC* earns from outside its country of operation portfolio dividend income of $100 and interest income, net of taxes, of $100 (consisting of a gross payment of $150 reduced by a third-country withholding tax of $50). For purposes of illustration, assume that *CFC* incurs no expenses. None of the income is taxed in *CFC*'s country of operation. The dividend income was not subject to third-country withholding taxes. Pursuant to the operation of section 904, the interest income is high withholding tax interest and the dividend income is passive income. Accordingly, pursuant to paragraph (c)(1)(iii) of this section, *CFC* has two net items of income—

(1) $100 of foreign personal holding company (FPHC)/passive income (the dividends); and

(2) $100 of FPHC/high withholding tax income (the interest).

(ii) *Effective rates of tax.* No foreign tax would be deemed paid under section 960 with respect to the net item of income described in paragraph (i)(1) of this *Example 1.* Therefore, the effective rate of foreign tax is 0, and the item may not be excluded from subpart F income under the rules of this paragraph (d). Foreign tax of $50 would be deemed paid under section 960 with respect to the net item of income described in paragraph (i)(2) of this *Example 1.* Therefore, the effective rate of foreign tax is 33 percent ($50 of creditable taxes paid, divided by $150, consisting of the net item of foreign base company income ($100) plus creditable taxes paid thereon ($50)). The highest rate of tax specified in section 11 for the 1995 taxable year is 35 percent. Accordingly, the net item of income described in paragraph (i)(2) of this *Example 1* may be excluded from subpart F income if an election under paragraph (d)(5) of this section is made, since it is subject to foreign tax at an effective rate that is greater than 31.5 percent (90 percent of 35 percent). However, for purposes of section 904(d), it remains high withholding tax interest.

Example 2. (i) The facts are the same as in *Example 1,* except that *CFC*'s country of operation imposes a tax of $50 with respect to *CFC*'s dividend income (and thus *CFC* earns portfolio dividend income, net of taxes, of only $50). The interest income is still high withholding tax interest. The dividend income is still passive income (without regard to the possible applicability of the high tax exception of section 904(d)(2)). Accordingly, *CFC* has two items of income for purposes of this paragraph (d)—

(1) $50 of FPHC/passive income (net of the $50 foreign tax); and

(2) $100 of FPHC/high withholding tax interest income.

(ii) Each item is taxed at an effective rate greater than 31.5 percent. The net item of income described in paragraph (i)(1) of this *Example 2:* foreign tax ($50) divided by sum ($100) of net item of income ($50) plus creditable tax thereon ($50) equals 50 percent. The net item of income described in paragraph (i)(2) of this *Example 2:* foreign tax ($50) divided by sum ($150) of income item ($100) plus creditable tax thereon ($50) equals 33 percent. Accordingly, an election may be made under paragraph (d)(5) of this section to exclude either or both of the net items of income described in paragraphs (i)(1) and (2) of this *Example 2* from subpart F income. If no election is made the items would be included in the subpart F income of *CFC.*

Example 3. (i) The facts are the same as in *Example 1,* except that the $100 of portfolio dividend income is subject to a third-country withholding tax of $50, and the $150 of interest income is from sources within *CFC's* country of operation, is subject to a $10 income tax therein, and is not subject to a withholding tax. Although the interest income and the dividend income are both passive income, under paragraph (c)(1)(iii)(B) of this section they constitute separate items of income pursuant to the application of the grouping rules of § 1.904–4(c). Accordingly, *CFC* has two net items of income for purposes of this paragraph (d)—

(1) $50 (net of $50 tax) of FPHC/non-country of operation/greater than 15 percent withholding tax income; and

(2) $140 (net of $10 tax) of FPHC/country of operation income.

(ii) The item described in paragraph (i)(1) of this *Example 3* is taxed at an effective rate greater than 31.5 percent, but Item 2 is not. The net item of income described in paragraph (i)(1) of this *Example 3:* foreign tax ($50) divided by sum ($100) of net item of income ($50) plus creditable tax thereon ($50) equals 50 percent. The net item of income described in paragraph (i)(2) of this *Example 3:* foreign tax ($10) divided by sum ($150) of net item of income ($140) plus creditable tax thereon ($10) equals 6.67 percent. Therefore, an election may be made under paragraph (d)(5) of this section to exclude the net item of income described in paragraph (i)(1) of this *Example 3* but not the net item of income described in paragraph (i)(2) of this *Example 3* from subpart F income.

Example 4. The facts are the same as in *Example 3,* except that the $150 of interest income is subject to an income tax of $50 in *CFC*'s country of operation. Accordingly, *CFC*'s items of income are the same as in *Example 3,* but both items are taxed at an effective rate greater than 31.5 percent. The net item of income described in paragraph (i)(1) of *Example 3:* foreign tax ($50) divided by sum ($100) of net item of income ($50) plus creditable tax thereon ($50) equals 50 percent. The net item of income described in paragraph (i)(2) of *Example 3:* foreign tax ($50) divided by sum ($150) of net item of income

($100) plus creditable tax thereon ($50) equals 33 percent. Pursuant to the consistency rule of paragraph (d)(4)(i) of this section, an election made by *CFC*'s controlling United States shareholders must exclude from subpart F income both items of FPHC income under the high tax exception of section 954(b)(4) and this paragraph (d). The election may not be made only with respect to one item.

Example 5. The facts are the same as in *Example 1,* except that *CFC* earns $5 of portfolio dividend income and $150 of interest income. In addition, *CFC* earns $45 for performing consulting services within its country of operation for unrelated persons. *CFC*'s gross foreign base company income for 1995 of $155 ($150 of gross interest income and $5 of portfolio dividend income) is greater than 70 percent of its gross income of $200. Therefore, under the full inclusion test of paragraph (b)(1)(ii) of this section, *CFC*'s adjusted gross foreign base company income is $200, and under paragraph (b)(2) of this section, the $45 of consulting income is full inclusion foreign base company income. If *CFC* elects, under paragraph (d)(5) of this section, to exclude the interest income from subpart F income pursuant to the high tax exception, the $45 of full inclusion foreign base company income will be excluded from subpart F income under paragraph (d)(6) of this section because the $150 of gross interest income excluded under the high tax exception is more than 90 percent of *CFC*'s adjusted gross foreign base company income of $155.

(ii) The following examples generally illustrate the application of paragraph (c) of this section and this paragraph (d). *Example 1* illustrates the order of computations. *Example 2* illustrates the computations required by sections 952 and 954 and this § 1.954–1 if the full inclusion test of paragraph (b)(1)(ii) of this section is met and the income is not excluded from subpart F income under section 952(b). Computations in these examples involving the operation of section 952(c) are included for purposes of illustration only and do not provide substantive rules concerning the operation of that section. For simplicity, these examples assume that the amount of taxes that are taken into account as a deduction under section 954(b)(5) and the amount of the gross-up required under sections 960 and 78 are equal. Therefore, these examples do not separately illustrate the deduction for taxes and gross-up.

Example 1. (i) *Gross income. CFC,* a controlled foreign corporation, has gross income of $1000 for the current taxable year. Of that $1000 of income, $100 is interest income that is included in the definition of foreign personal holding company income under section 954(c)(1)(A) and § 1.954–2(b)(1)(ii), is not income from a trade or service receivable described in section 864(d)(1) or (6), or portfolio interest described in section 881(c), and is not excluded from foreign personal holding company income under any provision of section 952(b) or section 954(c). Another $50 is foreign base company sales income under section 954(d). The remaining $850 of gross income is not included in the definition of foreign base company income or insurance income under sections 954 (c), (d), (e), (f) or (g) or 953, and is foreign source general limitation income described in section 904(d)(1)(I).

(ii) *Expenses.* For the current taxable year, *CFC* has expenses of $500. This amount includes $8 of interest paid to a related person that is allocable to foreign personal holding company income under section 904, and $2 of other expense that is directly related to foreign personal holding company income. Another $20 of expense is directly related to foreign base company sales. The remaining $470 of expenses is allocable to general limitation income that is not foreign base company income or insurance income.

(iii) *Earnings and losses. CFC* has earnings and profits for the current taxable year of $500. In the prior taxable year, *CFC* had losses with respect to income other than gross foreign base company income or gross insurance income. By reason of the limitation provided under section 952(c)(1)(A), those losses reduced the subpart F income (consisting entirely of foreign source general limitation income) of *CFC* by $600 for the prior taxable year.

(iv) *Taxes.* Foreign income tax of $30 is considered imposed on the interest income under the rules of section 954(b)(4), this paragraph (d), and § 1.904–6. Foreign income tax of $14 is considered imposed on the foreign base company sales income under the rules of section 954(b)(4), paragraph (d) of this section, and § 1.904–6. Foreign income tax of $177 is considered imposed on the remaining foreign source general limitation income under the rules of section 954(b)(4), this paragraph (d), and § 1.904–6. For the taxable year of *CFC,* the maximum United States rate of taxation under section 11 is 35 percent.

(v) *Conclusion.* Based on these facts, if CFC elects to exclude all items of income subject to a high foreign tax under section 954(b)(4) and this paragraph (d), it will have $500 of subpart F income as defined in section 952(a) (consisting entirely of foreign source general limitation income) determined as follows:

Step 1—Determine gross income:

(1) Gross income	$1000

Step 2—Determine gross foreign base company income and gross insurance income:

(2) Interest income included in gross foreign personal holding company income under section 954(c)	100
(3) Gross foreign base company sales income under section 954(d)	50
(4) Total gross foreign base company income and gross insurance income as defined in sections 954 (c), (d), (e), (f) and (g) and 953 (line (2) plus line (3))	150
Step 3—Compute adjusted gross foreign base company income and adjusted gross insurance income:	
(5) Five percent of gross income (.05 × line (1))	50
(6) Seventy percent of gross income (.70 × line (1))	700
(7) Adjusted gross foreign base company income and adjusted gross insurance income after the application of the de minimis test of paragraph (b) (line (4), or zero if line (4) is less than the lesser of line (5) or $1,000,000) (if the amount on this line 7 is zero, proceed to Step 8)	150
(8) Adjusted gross foreign base company income and adjusted gross insurance income after the application of the full inclusion test of paragraph (b) (line (4), or line (1) if line (4) is greater than line (6))	150
Step 4—Compute net foreign base company income:	
(9) Expenses directly related to adjusted gross foreign base company sales income	20
(10) Expenses (other than related person interest expense) directly related to adjusted gross foreign personal holding company income	2
(11) Related person interest expense allocable to adjusted gross foreign personal holding company income under section 904	8
(12) Net foreign personal holding company income after allocating deductions under section 954(b)(5) and paragraph (c) of this section (line (2) reduced by lines (10) and (11))	90
(13) Net foreign base company sales income after allocating deductions under section 954(b)(5) and paragraph (c) of this section (line (3) reduced by line (9))	30
(14) Total net foreign base company income after allocating deductions under section 954(b)(5) and paragraph (c) of this section (line (12) plus line (13))	120
Step 5—Compute net insurance income:	
(15) Net insurance income under section 953	0
Step 6—Compute adjusted net foreign base company income:	
(16) Foreign income tax imposed on net foreign personal holding company income (as determined under section 954(b)(4) and this paragraph (d))	30
(17) Foreign income tax imposed on net foreign base company sales income (as determined under section 954(b)(4) and this paragraph (d))	14
(18) Ninety percent of the maximum United States corporate tax rate	31.5%
(19) Effective rate of foreign income tax imposed on net foreign personal holding company income ($90 of interest) under section 954(b)(4) and this paragraph (d) (line (16) divided by line (12))	33%
(20) Effective rate of foreign income tax imposed on $30 of net foreign base company sales income under section 954(b)(4) and this paragraph (d) (line (17) divided by line (13))	47%
(21) Net foreign personal holding company income subject to a high foreign tax under section 954(b)(4) and this paragraph (d) (zero, or line (12) if line (19) is greater than line (18))	90
(22) Net foreign base company sales income subject to a high foreign tax under section 954(b)(4) and this paragraph (d) (zero, or line (13) if line (20) is greater than line (18))	30
(23) Adjusted net foreign base company income after applying section 954(b)(4) and this paragraph (d) (line (14), reduced by the sum of line (21) and line (22))	0
Step 7—Compute adjusted net insurance income:	
(24) Adjusted net insurance income	0
Step 8—Additions to or reduction of adjusted net foreign base company income by reason of section 952(c):	
(25) Earnings and profits for the current year	500
(26) Amount subject to being recharacterized as subpart F income under section 952(c)(2) (excess of line (25) over the sum of lines (23) and (24)); if there is a deficit, then the limitation of section 952(c)(1) may apply for the current year	500
(27) Amount of reduction in subpart F income for prior taxable years by reason of the limitation of section 952(c)(1)	600

(28) Subpart F income as defined in section 952(a), assuming section 952(a)(3), (4), and (5) do not apply (the sum of line (23), line (24), and the lesser of line (26) or line (27))	500
(29) Amount of prior year's deficit to be recharacterized as subpart F income in later years under section 952(c) (excess of line (27) over line (26))	100

Example 2. (i) *Gross income. CFC,* a controlled foreign corporation, has gross income of $1000 for the current taxable year. Of that $1000 of income, $720 is interest income that is included in the definition of foreign personal holding company income under section 954(c)(1)(A) and § 1.954–2(b)(1)(ii), is not income from trade or service receivables described in section 864(d)(1) or (6), or portfolio interest described in section 881(c), and is not excluded from foreign personal holding company income under any provision of section 954(c) and § 1.954–2 or section 952(b). The remaining $280 is services income that is not included in the definition of foreign base company income or insurance income under sections 954 (c), (d), (e), (f), or (g) or 953, and is foreign source general limitation income for purposes of section 904(d)(1)(I).

(ii) *Expenses.* For the current taxable year, *CFC* has expenses of $650. This amount includes $350 of interest paid to related persons that is allocable to foreign personal holding company income under section 904, and $50 of other expense that is directly related to foreign personal holding company income. The remaining $250 of expenses is allocable to services income other than foreign base company income or insurance income.

(iii) *Earnings and losses. CFC* has earnings and profits for the current taxable year of $350. In the prior taxable year, *CFC* had losses with respect to income other than foreign base company income or insurance income. By reason of the limitation provided under section 952(c)(1)(A), those losses reduced the subpart F income of *CFC* (consisting entirely of foreign source general limitation income) by $600 for the prior taxable year.

(iv) *Taxes.* Foreign income tax of $120 is considered imposed on the $720 of interest income under the rules of section 954(b)(4), paragraph (d) of this section, and § 1.904–6. Foreign income tax of $2 is considered imposed on the services income under the rules of section 954(b)(4), paragraph (d) of this section, and § 1.904–6. For the taxable year of *CFC,* the maximum United States rate of taxation under section 11 is 35 percent.

(v) *Conclusion.* Based on these facts, if *CFC* elects to exclude all items of income subject to a high foreign tax under section 954(b)(4) and this paragraph (d), it will have $350 of subpart F income as defined in section 952(a), determined as follows.

Step 1—Determine gross income:	
(1) Gross income	$1000
Step 2—Determine gross foreign base company income and gross insurance income:	
(2) Gross foreign base company income and gross insurance income as defined in sections 954 (c), (d), (e), (f) and (g) and 953 (interest income)	720
Step 3—Compute adjusted gross foreign base company income and adjusted gross insurance income:	
(3) Seventy percent of gross income (.70 × line (1))	700
(4) Adjusted gross foreign base company income and adjusted gross insurance income after the application of the full inclusion rule of this paragraph (b)(1) (line (2), or line (1) if line (2) is greater than line (3))	1000
(5) Full inclusion foreign base company income under paragraph (b)(1)(ii) (line (4) minus line (2))	280
Step 4—Compute net foreign base company income:	
(6) Expenses (other than related person interest expense) directly related to adjusted gross foreign personal holding company income	50
(7) Related person interest expense allocable to adjusted gross foreign personal holding company income under section 904	350
(8) Deductions allocable to full inclusion foreign base company income under section 954(b)(5) and paragraph (c) of this section	250
(9) Net foreign personal holding company income after allocating deductions under section 954(b)(5) and paragraph (c) of this section (line (2) reduced by line (6) and line (7))	320
(10) Full inclusion foreign base company income after allocating deductions under section 954(b)(5) and paragraph (c) of this section (line (5) reduced by line (8))	30
(11) Total net foreign base company income after allocating deductions under section 954(b)(5) and paragraph (c) of this section (line (9) plus line (10))	350
Step 5—Compute net insurance income:	
(12) Net insurance income under section 953	0
Step 6—Compute adjusted net foreign base company income:	
(13) Foreign income tax imposed on net foreign personal holding company income (interest)	120

(14) Foreign income tax imposed on net full inclusion foreign base company income	2
(15) Ninety percent of the maximum United States corporate tax rate	31.5%
(16) Effective rate of foreign income tax imposed on $320 of net foreign personal holding company income under section 954(b)(4) and this paragraph (d) (line (13) divided by line (9))	38%
(17) Effective rate of foreign income tax imposed on $30 of net full inclusion foreign base company income under section 954(b)(4) and this paragraph (d) (line (14) divided by line (10))	7%
(18) Net foreign personal holding company income subject to a high foreign tax under section 954(b)(4) and this paragraph (d) (zero, or line (9) if line (16) is greater than line (15))	320
(19) Net full inclusion foreign base company income subject to a high foreign tax under section 954(b)(4) and this paragraph (d) (zero, or line (10) if line (17) is greater than line (15))	0
(20) Adjusted net foreign base company income after applying section 954(b)(4) and this paragraph (d) (line (11) reduced by the sum of line (18) and line (19))	30
Step 7—Compute adjusted net insurance income:	
(21) Adjusted net insurance income	0
Step 8—Reduction of adjusted net foreign base company income or adjusted net insurance income by reason of paragraph (d)(6) of this section:	
(22) Adjusted gross foreign base company income and adjusted gross insurance income (determined without regard to the full inclusion test of paragraph (b)(1) of this section) (line (4) reduced by line (5))	720
(23) Ninety percent of adjusted gross foreign base company income and adjusted gross insurance income (determined without regard to the full inclusion test of paragraph (b)(1)(ii) of this section) (90% of the amount on line (22))	648
(24) Net foreign base company income and net insurance income excluded from subpart F income under section 954(b)(4), increased by the amount of expenses that reduced this income under section 954(b)(5) and paragraph (c) of this section (line (18) increased by the sum of line (6) and line (7))	720
(25) Adjusted net full inclusion foreign base company income excluded from subpart F income under paragraph (d)(6) of this section (zero, or line (10) reduced by line (19) if line (24) is greater than line (23))	30
(26) Adjusted net foreign base company income after application of paragraph (d)(6) of this section (line (20) reduced by line (25))	0
Step 9—Additions to or reduction of subpart F income by reason of section 952(c):	
(27) Earnings and profits for the current year	350
(28) Amount subject to being recharacterized as subpart F income under section 952(c)(2) (excess of line (27) over the sum of line (21) and line (26)); if there is a deficit, then the limitation of 952(c)(1) may apply for the current year	350
(29) Amount of reduction in subpart F income for prior taxable years by reason of the limitation of section 952(c)(1)	600
(30) Subpart F income as defined in section 952(a), assuming section 952(a)(3), (4), and (5) do not apply (the sum of line (21) and line (26) plus the lesser of line (28) or line (29))	350
(31) Amount of prior years' deficit remaining to be recharacterized as subpart F income in later years under section 952(c) (excess of line (29) over line (28))	250

(e) *Character of income*—(1) *Substance of the transaction.* For purposes of section 954, income shall be characterized in accordance with the substance of the transaction, and not in accordance with the designation applied by the parties to the transaction. For example, an amount that is designated as rent by the taxpayer but actually constitutes income from the sale of property, royalties, or income from services shall not be characterized as rent but shall be characterized as income from the sale of property, royalties or income from services, as the case may be. Local law shall not be controlling in characterizing income.

(2) *Separable character.* To the extent the definitional provisions of section 953 or 954 describe the income or gain derived from a transaction, or any portion or portions thereof, that income or gain, or portion or portions thereof,

is so characterized for purposes of subpart F. Thus, a single transaction may give rise to income in more than one category of foreign base company income described in paragraph (a)(2) of this section. For example, if a controlled foreign corporation, in its business of purchasing personal property and selling it to related persons outside its country of incorporation, also performs services outside its country of incorporation with respect to the property it sells, the sales income will be treated as foreign base company sales income and the services income will be treated as foreign base company services income for purposes of these rules.

(3) *Predominant character.* The portion of income or gain derived from a transaction that is included in the computation of foreign personal holding company income is always separately determinable and thus must always be segregated from other income and separately classified under paragraph (e)(2) of this section. However, the portion of income or gain derived from a transaction that would meet a particular definitional provision under section 954 or 953 (other than the definition of foreign personal holding company income) in unusual circumstances may not be separately determinable. If such portion is not separately determinable, it must be classified in accordance with the predominant character of the transaction. For example, if a controlled foreign corporation engineers, fabricates, and installs a fixed offshore drilling platform as part of an integrated transaction, and the portion of income that relates to services is not accounted for separately from the portion that relates to sales, and is otherwise not separately determinable, then the classification of income from the transaction shall be made in accordance with the predominant character of the arrangement.

(4) *Coordination of categories of gross foreign base company income or gross insurance income*—(i) *In general.* The computations of gross foreign base company income and gross insurance income are limited by the following rules:

(A) If income is foreign base company shipping income, pursuant to section 954(f), it shall not be considered insurance income or income in any other category of foreign base company income.

(B) If income is foreign base company oil related income, pursuant to section 954(g), it shall not be considered insurance income or income in any other category of foreign base company income, except as provided in paragraph (e)(4)(i)(A) of this section.

(C) If income is insurance income, pursuant to section 953, it shall not be considered income in any category of foreign base company income except as provided in paragraph (e)(4)(i)(A) or (B) of this section.

(D) If income is foreign personal holding company income, pursuant to section 954(c), it shall not be considered income in any other category of foreign base company income, other than as provided in paragraph (e)(4)(i)(A), (B) or (C) of this section.

(ii) *Income excluded from other categories of gross foreign base company income.* Income shall not be excluded from a category of gross foreign base company income or gross insurance income under this paragraph (e)(4) by reason of being included in another category of gross foreign base company income or gross insurance income, if the income is excluded from that other category by a more specific provision of section 953 or 954. For example, income derived from a commodity transaction that is excluded from foreign personal holding company income under § 1.954–2(f) as income from a qualified active sale may be included in gross foreign base company income if it also meets the definition of foreign base company sales income. See § 1.954–2(a)(2) for the coordination of overlapping categories within the definition of foreign personal holding company income.

(f) *Definition of related person*—(1) *Persons related to controlled foreign corporation.* Unless otherwise provided, for purposes of section 954 and §§ 1.954–1 through 1.954–8 inclusive, the following persons are considered under section 954(d)(3) to be related persons with respect to a controlled foreign corporation:

(i) *Individuals.* An individual, whether or not a citizen or resident of the

United States, who controls the controlled foreign corporation.

(ii) *Other persons.* A foreign or domestic corporation, partnership, trust or estate that controls or is controlled by the controlled foreign corporation, or is controlled by the same person or persons that control the controlled foreign corporation.

(2) *Control*—(i) *Corporations.* With respect to a corporation, control means the ownership, directly or indirectly, of stock possessing more than 50 percent of the total voting power of all classes of stock entitled to vote or of the total value of the stock of the corporation.

(ii) *Partnerships.* With respect to a partnership, control means the ownership, directly or indirectly, of more than 50 percent (by value) of the capital or profits interest in the partnership.

(iii) *Trusts and estates.* With respect to a trust or estate, control means the ownership, directly or indirectly, of more than 50 percent (by value) of the beneficial interest in the trust or estate.

(iv) *Direct or indirect ownership.* For purposes of this paragraph (f), to determine direct or indirect ownership, the principles of section 958 shall be applied without regard to whether a corporation, partnership, trust or estate is foreign or domestic or whether or not an individual is a citizen or resident of the United States.

[T.D. 8618, 60 FR 46509, Sept. 7, 1995; 60 FR 62024, 62025, Dec. 4, 1995, as amended by T.D. 8704, 62 FR 20, Jan. 2, 1997; T.D. 8767, 63 FR 14615, Mar. 26, 1998]

§1.954–1T Foreign base company income (temporary).

(a) through (c)(1)(i) [Reserved]. For further guidance, see §1.954–1(a) through (c)(1).

(c)(1)(i) *Deductions against gross foreign base company income*—(A) *In general.* [Reserved]. For further guidance, see §1.954–1(c)(1)(i).

(B) *Special rule for deductible payments to certain non-fiscally transparent entities.* Notwithstanding any other provision of this section, except as provided in paragraph (c)(1)(i)(C) of this section, an expense (including a distributive share of any expense) that would otherwise be allocable under section 954(b)(5) against the subpart F income of a controlled foreign corporation shall not be allocated against subpart F income of the controlled foreign corporation resulting from the payment giving rise to the expense if—

(*1*) Such expense arises from a payment between the controlled foreign corporation and a partnership in which the controlled foreign corporation is a partner and the partnership is not regarded as fiscally transparent, as defined in §1.954–9T(a)(7), by any country in which the controlled foreign corporation does business or has substantial assets; and

(*2*) The payment from which the expense arises would have met the foreign tax reduction test of §1.954–9T(a)(3) and the tax disparity test of §1.954–9T(a)(5)(iv) if those provisions had been applicable to the payment.

(C) *Limitations.* Paragraph (c)(1)(i)(B) shall not apply to the extent that the controlled foreign corporation partner has no income against which to allocate the expense, other than its distributive share of a payment described in paragraph (c)(1)(i)(B) of this section. Similarly, to the extent an expense described in paragraph (c)(1)(i)(B) of this section exceeds the controlled foreign corporation partner's distributive share of the payment from which the expense arises, such excess amount of the expense may reduce subpart F income (other than such payment) to which it is properly allocable or apportionable under section 954(b)(5).

(D) *Example.* The following example illustrates the application of paragraph (c)(1)(i)(B) and (C) of this section:

Example. CFC, a controlled foreign corporation in Country A, is a 70 percent partner in partnership P, located in Country B. Country A's tax laws do not classify P as a fiscally transparent entity. The rate of tax in country B is 15 percent of the tax rate in country A. P loans $100 to CFC at a market rate of interest. In year 1, CFC pays P $10 of interest on the loan. The interest payment would have caused the recharacterization rules of §1.954–9T to apply if the payment were made between the entities described in §1.954–9T(a)(2). CFC's distributive share of P's interest income is $7, which is foreign personal holding company income to CFC under section 954(c). Under paragraph (c)(1)(i)(B) of this section, $7 of the $10 interest expense may not be allocated against any of CFC's subpart F income. However, to the extent the remaining $3 of interest expense is properly allocable to subpart F income of CFC other than its distributive share of P's interest income, this expense may offset such other subpart F income.

(E) *Effective date.* Paragraph (c)(1)(i)(B), (C) and (D) of this section shall apply to all amounts paid or accrued on or after March 23, 1998, except for amounts paid or accrued pursuant to arrangements entered into before March 23, 1998 and not substantially modified (including, for example, by expansion of the arrangement (whether by exercise of an option or otherwise) such as by an increase in the amount of or term of any borrowing, leasing or licensing constituting the arrangement, changes in direct or indirect control of any entity that is a party to the arrangement, or any similar measure which materially increases the tax benefit of the arrangement) on or after March 23, 1998. For rules applicable to amounts paid or accrued pursuant to arrangements entered into before March 23, 1998, see §1.954–1.

(c)(1)(ii) through (f) [Reserved]. For further guidance, see §1.954–1(c)(1)(ii) through (f).

[T.D. 8767, 63 FR 14616, Mar. 26, 1998]

§1.954–2 Foreign personal holding company income.

(a) *Computation of foreign personal holding company income*—(1) *Categories of foreign personal holding company income.* For purposes of subpart F and the regulations under that subpart, foreign personal holding company income consists of the following categories of income—

(i) Dividends, interest, rents, royalties, and annuities as described in paragraph (b) of this section;

(ii) Gain from certain property transactions as described in paragraph (e) of this section;

(iii) Gain from commodities transactions as described in paragraph (f) of this section;

(iv) Foreign currency gain as described in paragraph (g) of this section; and

(v) Income equivalent to interest as described in paragraph (h) of this section.

(2) *Coordination of overlapping categories under foreign personal holding company provisions*—(i) *In general.* If any portion of income, gain or loss from a transaction is described in more than one category of foreign personal holding company income (as described in paragraph (a)(2)(ii) of this section), that portion of income, gain or loss is treated solely as income, gain or loss from the category of foreign personal holding company income with the highest priority.

(ii) *Priority of categories.* The categories of foreign personal holding company income, listed from highest priority (paragraph (a)(2)(ii)(A) of this section) to lowest priority (paragraph (a)(2)(ii)(E) of this section), are—

(A) Dividends, interest, rents, royalties, and annuities, as described in paragraph (b) of this section;

(B) Income equivalent to interest, as described in paragraph (h) of this section without regard to the exceptions in paragraph (h)(1)(ii)(A) of this section;

(C) Foreign currency gain or loss, as described in paragraph (g) of this section without regard to the exclusion in paragraph (g)(2)(ii) of this section;

(D) Gain or loss from commodities transactions, as described in paragraph (f) of this section without regard to the exclusion in paragraph (f)(1)(ii) of this section; and

(E) Gain or loss from certain property transactions, as described in paragraph (e) of this section without regard to the exceptions in paragraph (e)(1)(ii) of this section.

(3) *Changes in the use or purpose for which property is held*—(i) *In general.* Under paragraphs (e), (f), (g) and (h) of this section, transactions in certain property give rise to gain or loss included in the computation of foreign personal holding company income if the controlled foreign corporation holds that property for a particular use or purpose. The use or purpose for which property is held is that use or purpose for which it was held for more than one- half of the period during which the controlled foreign corporation held the property prior to the disposition.

(ii) *Special rules*—(A) *Anti-abuse rule.* If a principal purpose of a change in use or purpose of property was to avoid including gain or loss in the computation of foreign personal holding company income, all the gain or loss from the disposition of the property is treated as foreign personal holding company income. A purpose may be a principal purpose even though it is outweighed by other purposes (taken together or separately).

(B) *Hedging transactions.* The provisions of paragraph (a)(3)(i) of this section shall not apply to bona fide hedging transactions, as defined in paragraph (a)(4)(ii) of this section. A transaction will be treated as a bona fide hedging transaction only so long as it satisfies the requirements of paragraph (a)(4)(ii) of this section.

(iii) *Example.* The following example illustrates the application of this paragraph (a)(3).

Example. At the beginning of taxable year 1, *CFC*, a controlled foreign corporation, purchases a building for investment. During taxable years 1 and 2, *CFC* derives rents from the building that are included in the computation of foreign personal holding company income under paragraph (b)(1)(iii) of this section. At the beginning of taxable year 3, *CFC* changes the use of the building by terminating all leases and using it in an active trade or business. At the beginning of taxable year 4, *CFC* sells the building at a gain. The building was not used in an active trade or business of *CFC* for more than one-half of the period during which it was held by *CFC*. Therefore, the building is considered to be property that gives rise to rents, as described in paragraph (e)(2) of this section, and gain from the sale is included in the computation of *CFC*'s foreign personal holding company income under paragraph (e) of this section.

(4) *Definitions and special rules.* The following definitions and special rules apply for purposes of computing foreign personal holding company income under this section.

(i) *Interest.* The term *interest* includes all amounts that are treated as interest income (including interest on a tax-exempt obligation) by reason of the Internal Revenue Code or Income Tax Regulations or any other provision of law. For example, interest includes stated interest, acquisition discount, original issue discount, de minimis original issue discount, market discount, de minimis market discount, and unstated interest, as adjusted by any amortizable bond premium or acquisition premium.

(ii) *Bona fide hedging transaction*—(A) *Definition.* The term *bona fide hedging transaction* means a transaction that meets the requirements of §1.1221–2 (a) through (c) and that is identified in accordance with the requirements of paragraph (a)(4)(ii)(B) of this section, except that in applying §1.1221–2(b)(1), the risk being hedged may be with respect to ordinary property, section 1231 property, or a section 988 transaction. A transaction that hedges the liabilities, inventory or other assets of a related person (as defined in section 954(d)(3)), that is entered into to assume or reduce risks of a related person, or that is entered into by a person other than a person acting in its capacity as a regular dealer (as defined in paragraph (a)(4)(iv) of this section) to reduce risks assumed from a related person, will not be treated as a bona fide hedging transaction. For an illustration of how this rule applies with respect to foreign currency transactions, see paragraph (g)(2)(ii)(D) of this section.

(B) *Identification.* The identification requirements of this section shall be satisfied if the taxpayer meets the identification and recordkeeping requirements of §1.1221–2(e). However, for bona fide hedging transactions entered into prior to March 7, 1996 the identification and recordkeeping requirements of §1.1221–2 shall not apply. Rather, for bona fide hedging transactions entered into on or after July 22, 1988 and prior to March 7, 1996 the identification and recordkeeping requirements shall be satisfied if such transactions are identified by the close of the fifth day after the day on which they are entered into. For bona fide hedging transactions entered into prior to July 22, 1988, the identification and recordkeeping requirements shall be satisfied if such transactions are identified reasonably contemporaneously with the date they are entered into, but no later than within the normal period prescribed under the method of accounting of the controlled foreign corporation used for financial reporting purposes.

(C) *Effect of identification and non-identification*—(*1*) *Transactions identified.* If a taxpayer identifies a transaction as a bona fide hedging transaction for purposes of this section, the identification is binding with respect to any loss arising from such transaction whether or not all of the requirements of paragraph (a)(4)(ii)(A) of this section are satisfied. Accordingly, such loss will be allocated against income that is not subpart F income (or, in the case of an election under paragraph (g)(3) of this section, against the category of subpart F income to which it relates) and apportioned among the categories of income described in section 904(d)(1). If the transaction is not in fact a bona fide hedging transaction described in paragraph (a)(4)(ii)(A) of this section, however, then any gain realized with respect to such transaction shall not be considered as gain from a bona fide hedging transaction. Accordingly, such gain shall be treated as gain from the appropriate category of foreign personal holding company income. Thus, the taxpayer's identification of the transaction as a hedging transaction does not itself operate to exclude gain from the appropriate category of foreign personal holding company income.

(*2*) *Inadvertent identification.* Notwithstanding paragraph (a)(4)(ii)(C)(*1*) of this section, if the taxpayer identifies a transaction as a bona fide hedging transaction for purposes of this section, the characterization of the loss is determined as if the transaction had not been identified as a bona fide hedging transaction if—

(*i*) The transaction is not a bona fide hedging transaction (as defined in paragraph (a)(4)(ii)(A) of this section);

(*ii*) The identification of the transaction as a bona fide hedging transaction was due to inadvertent error; and

(*iii*) All of the taxpayer's transactions in all open years are being treated on either original or, if necessary, amended returns in a manner consistent with the principles of this section.

(*3*) *Transactions not identified.* Except as provided in paragraphs (a)(4)(ii)(C)(*4*) and (*5*) of this section, the absence of an identification that satisfies the requirements of paragraph (a)(4)(ii)(B) of this section is binding and establishes that a transaction is not a bona fide hedging transaction. Thus, subject to the exceptions, the characterization of gain or loss is determined without reference to whether the transaction is a bona fide hedging transaction.

(*4*) *Inadvertent error.* If a taxpayer does not make an identification that satisfies the requirements of paragraph (a)(4)(ii)(B) of this section, the taxpayer may treat gain or loss from the transaction as gain or loss from a bona fide hedging transaction if—

(*i*) The transaction is a bona fide hedging transaction (as defined in paragraph (a)(4)(ii)(A) of this section);

(*ii*) The failure to identify the transaction was due to inadvertent error; and

(*iii*) All of the taxpayer's bona fide hedging transactions in all open years are being treated on either original or, if necessary, amended returns as bona fide hedging transactions in accordance with the rules of this section.

(*5*) *Anti-abuse rule.* If a taxpayer does not make an identification that satisfies all the requirements of paragraph (a)(4)(ii)(B) of this section but the taxpayer has no reasonable grounds for treating the transaction as other than a bona fide hedging transaction, then loss from the transaction shall be treated as realized with respect to a bona fide hedging transaction. Thus, a taxpayer may not elect to exclude loss from its proper characterization as a bona fide hedging transaction. The reasonableness of the taxpayer's failure to identify a transaction is determined by taking into consideration not only the requirements of paragraph (a)(4)(ii)(A) of this section but also the taxpayer's treatment of the transaction for financial accounting or other purposes and the taxpayer's identification of similar transactions as hedging transactions.

(iii) *Inventory and similar property*—(A) *Definition.* The term *inventory and similar property* (or *inventory or similar property*) means property that is stock in trade of the controlled foreign corporation or other property of a kind that would properly be included in the inventory of the controlled foreign corporation if on hand at the close of the taxable year (if the controlled foreign corporation were a domestic corporation), or property held by the controlled foreign corporation primarily for sale to customers in the ordinary course of its trade or business.

(B) *Hedging transactions.* A bona fide hedging transaction with respect to inventory or similar property (other than a transaction described in section 988(c)(1) without regard to section 988(c)(1)(D)(i)) shall be treated as a transaction in inventory or similar property.

(iv) *Regular dealer.* The term *regular dealer* means a controlled foreign corporation that—

(A) Regularly and actively offers to, and in fact does, purchase property from and sell property to customers who are not related persons (as defined in section 954(d)(3)) with respect to the controlled foreign corporation in the ordinary course of a trade or business; or

(B) Regularly and actively offers to, and in fact does, enter into, assume, offset, assign or otherwise terminate positions in property with customers who are not related persons (as defined in section 954(d)(3)) with respect to the controlled foreign corporation in the ordinary course of a trade or business.

(v) *Dealer property*—(A) *Definition.* Property held by a controlled foreign corporation is *dealer property* if—

(*1*) The controlled foreign corporation is a regular dealer in property of such kind (determined under paragraph (a)(4)(iv) of this section); and

(*2*) The property is held by the controlled foreign corporation in its capacity as a dealer in property of such kind without regard to whether the property arises from a transaction with a related person (as defined in section 954(d)(3)) with respect to the controlled foreign corporation. The property is not held by the controlled foreign corporation in its capacity as a dealer if the property is held for investment or speculation on its own behalf or on behalf of a related person (as defined in section 954(d)(3)).

(B) *Securities dealers.* If a controlled foreign corporation is a licensed securities dealer, only the securities that it has identified as held for investment in accordance with the provisions of section 475(b) or section 1236 will be considered to be property held for investment or speculation under this section. A licensed securities dealer is a controlled foreign corporation that is both a securities dealer, as defined in section 475, and a regular dealer, as defined in paragraph (a)(4)(iv) of this section, and that is either—

(*1*) Registered as a securities dealer under section 15(a) of the Securities Exchange Act of 1934 or as a Government securities dealer under section 15C(a) of such Act; or

(*2*) Licensed or authorized in the country in which it is chartered, incorporated, or organized to purchase and sell securities from or to customers who are residents of that country. The conduct of such securities activities must be subject to bona fide regulation, including appropriate reporting, monitoring, and prudential (including capital adequacy) requirements, by a securities regulatory authority in that country that regularly enforces compliance with such requirements and prudential standards.

(C) *Hedging transactions.* A bona fide hedging transaction with respect to dealer property shall be treated as a transaction in dealer property.

(vi) *Examples.* The following examples illustrate the application of paragraphs (a)(4)(ii), (iv) and (v) of this section.

Example 1. (i) *CFC1* and *CFC2* are related controlled foreign corporations (within the meaning of section 954(d)(3)) located in Countries F and G, respectively. *CFC1* and *CFC2* regularly purchase securities from and sell securities to customers who are not related persons with respect to *CFC1* or *CFC2* (within the meaning of section 954(d)(3)) in the ordinary course of their businesses and regularly and actively hold themselves out as being willing to, and in fact do, enter into either side of options, forward contracts, or other financial instruments. *CFC1* uses securities that are traded in securities markets in Country G to hedge positions that it enters into with customers located in Country F. *CFC1* is not a member of a securities exchange in Country G, so it purchases such securities from *CFC2* and unrelated persons that are registered as securities dealers in Country G and that are members of Country G securities exchanges. Such hedging transactions qualify as bona fide hedging transactions under paragraph (a)(4)(ii) of this section.

(ii) Transactions that *CFC1* and *CFC2* enter into with each other do not affect the determination of whether they are regular dealers. Because *CFC1* and *CFC2* regularly purchase securities from and sell securities to customers who are not related persons within the meaning of section 954(d)(3) in the ordinary course of their businesses and regularly and actively hold themselves out as being willing to, and in fact do, enter into either side of options, forward contracts, or other financial instruments, however, they qualify as regular dealers in such property within the meaning of paragraph (a)(4)(iv) of this section. Moreover, because *CFC1* purchases securities from *CFC2* as bona fide hedging transactions with respect to dealer property, the securities are dealer property under paragraph (a)(4)(v)(C) of this section. Similarly, because *CFC2* sells securities to *CFC1* in the ordinary course of its business as a dealer, the securities are dealer property under paragraph (a)(4)(v)(A) of this section.

Example 2. (i) *CFC* is a controlled foreign corporation located in Country B. *CFC* serves as the currency coordination center for the controlled group, aggregating currency risks incurred by the group and entering into hedging transactions that transfer those risks outside of the group. *CFC* regularly and actively holds itself out as being willing to, and in fact does, enter into either side of options, forward contracts, or other financial instruments with other members of the same controlled group. *CFC* hedges risks arising from such transactions by entering into transactions with persons who are not related persons (within the meaning of section 954(d)(3)) with respect to *CFC*. However, *CFC* does not regularly and actively hold itself out as being willing to, and does not, enter into either side of transactions with unrelated persons.

(ii) *CFC* is not a regular dealer in property under paragraph (a)(4)(iv) of this section and its options, forwards, and other financial instruments are not dealer property within the meaning of paragraph (a)(4)(v) of this section.

(vii) *Debt instrument.* The term *debt instrument* includes bonds, debentures, notes, certificates, accounts receivable, and other evidences of indebtedness.

(b) *Dividends, interest, rents, royalties, and annuities*—(1) *In general.* Foreign personal holding company income includes—

(i) Dividends, except certain dividends from related persons as described in paragraph (b)(4) of this section and distributions of previously taxed income under section 959(b);

(ii) Interest, except export financing interest as defined in paragraph (b)(2) of this section and certain interest received from related persons as described in paragraph (b)(4) of this section;

(iii) Rents and royalties, except certain rents and royalties received from related persons as described in paragraph (b)(5) of this section and rents and royalties derived in the active conduct of a trade or business as defined in paragraph (b)(6) of this section; and

(iv) Annuities.

(2) *Exclusion of certain export financing interest*—(i) *In general.* Foreign personal holding company income does not include interest that is export financing interest. The term *export financing interest* means interest that is derived in the conduct of a banking business and is export financing interest as defined in section 904(d)(2)(G). Solely for purposes of determining whether interest is export financing interest, property is treated as manufactured, produced, grown, or extracted in the United States if it is so treated under § 1.927(a)–1T(c).

(ii) *Exceptions.* Export financing interest does not include income from related party factoring that is treated as interest under section 864(d)(1) or (6) after the application of section 864(d)(7).

(iii) *Conduct of a banking business.* For purposes of this section, export financing interest is considered derived in the conduct of a banking business if, in connection with the financing from which the interest is derived, the corporation, through its own officers or staff of employees, engages in all the activities in which banks customarily engage in issuing and servicing a loan.

(iv) *Examples.* The following examples illustrate the application of this paragraph (b)(2).

Example 1. (i) *DS*, a domestic corporation, manufactures property in the United States. In addition to selling inventory (property described in section 1221(1)), *DS* occasionally sells depreciable equipment it manufactures for use in its trade or business, which is property described in section 1221(2). Less than 50 percent of the fair market value, determined in accordance with section 904(d)(2)(G), of each item of inventory or equipment sold by *DS* is attributable to products imported into the United States. *CFC*, a controlled foreign corporation with respect to which *DS* is a related person (within the meaning of section 954(d)(3)), provides loans described in section 864(d)(6) to unrelated persons for the purchase of property from *DS*. This property is purchased exclusively for use or consumption outside the United States and outside *CFC*'s country of incorporation.

(ii) If, in issuing and servicing loans made with respect to purchases from *DS* of depreciable equipment used in its trade or business, which is property described in section 1221(2) in the hands of *DS, CFC* engages in all the activities in which banks customarily engage in issuing and servicing loans, the interest accrued from these loans would be export financing interest meeting the requirements of this paragraph (b)(2) and, thus, not included in foreign personal holding company income. However, interest from the loans made with respect to purchases from *DS* of property that is inventory in the hands of *DS* cannot be export financing interest because it is treated as income from a trade or service receivable under section 864(d)(6) and the exception under section 864(d)(7) does not apply. Thus the interest from loans made with respect to this inventory is included in foreign personal holding company income under paragraph (b)(1)(ii) of this section.

Example 2. (i) *DS,* a domestic corporation manufactures property in the United States. *DS* wholly owns two controlled foreign corporations organized in Country A, *CFC1* and *CFC2. CFC1* has a substantial part of its assets used in its trade or business in Country A. *CFC1* purchases the property that *DS* manufactures and sells it without further manufacture for use or consumption within Country A. This property is inventory property, as described in section 1221(1), in the hands of *CFC1.* Less than 50 percent of the fair market value, determined in accordance with section 904(d)(2)(G), of each item of inventory sold by *CFC1* is attributable to products imported into the United States. *CFC2* provides loans described in section 864(d)(6) to unrelated persons in Country A for the purchase of the property from *CFC1.*

(ii) If, in issuing and servicing loans made with respect to purchases from *CFC1* of the inventory property, *CFC2* engages in all the activities in which banks customarily engage in issuing and servicing loans, the interest accrued from these loans would be export financing interest meeting the requirements of paragraph (b)(2) of this section. It is not treated as income from a trade or service receivable under section 864(d)(6) because the exception under section 864(d)(7) applies. Thus the interest is excluded from foreign personal holding company income.

Example 3. The facts are the same as in *Example 2* except that the property sold by *CFC1* is manufactured by *CFC1* in Country A from component parts that were manufactured by *DS* in the United States. The interest accrued from the loans by *CFC2* is not export financing interest as defined in section 904(d)(2)(G) because the property is not manufactured in the United States under §1.927(a)–1T(c). No portion of the interest is export financing interest as defined in this paragraph (b)(2). The full amount of the interest is, therefore, included in foreign personal holding company income under paragraph (b)(1)(ii) of this section.

(3) *Treatment of tax exempt interest.* For taxable years of a controlled foreign corporation beginning after March 3, 1997, foreign personal holding company income includes all interest income, including interest that is described in section 103 (see §1.952–2(c)(1)).

(4) *Exclusion of dividends or interest from related persons*—(i) *In general*—(A) *Corporate payor.* Foreign personal holding company income received by a controlled foreign corporation does not include dividends or interest if the payor—

(*1*) Is a corporation that is a related person with respect to the controlled foreign corporation, as defined in section 954(d)(3);

(*2*) Is created or organized under the laws of the same foreign country (the *country of incorporation*) as is the controlled foreign corporation; and

(*3*) Uses a substantial part of its assets in a trade or business in its country of incorporation, as determined under this paragraph (b)(4).

(B) *Payment by a partnership.* For purposes of this paragraph (b)(4), if a partnership with one or more corporate partners makes a payment of interest, a corporate partner will be treated as the payor of the interest—

(*1*) If the interest payment gives rise to a partnership item of deduction under the Internal Revenue Code or Income Tax Regulations, to the extent that the item of deduction is allocable to the corporate partner under section 704(b); or

(*2*) If the interest payment does not give rise to a partnership item of deduction under the Internal Revenue Code or Income Tax Regulations, to the extent that a partnership item reasonably related to the payment would be allocated to that partner under an existing allocation under the partnership agreement (made pursuant to section 704(b)).

(ii) *Exceptions*—(A) *Dividends.* Dividends are excluded from foreign personal holding company income under this paragraph (b)(4) only to the extent that they are paid out of earnings and profits that are earned or accumulated during a period in which—

(*1*) The stock on which dividends are paid with respect to which the exclusion is claimed was owned by the recipient controlled foreign corporation directly, or indirectly through a chain of one or more subsidiaries each of which meets the requirements of paragraph (b)(4)(i)(A) of this section; and

(*2*) Each of the requirements of paragraph (b)(4)(i)(A) of this section is satisfied or, to the extent earned or accumulated during a taxable year of the related foreign corporation ending on or before December 31, 1962, during a period in which the payor was a related corporation as to the controlled foreign corporation and the other requirements of paragraph (b)(4)(i)(A) of this section were substantially satisfied.

(*3*) This paragraph (b)(4)(ii)(A) is illustrated by the following example:

Example. A, a domestic corporation, owns all of the stock of *B*, a corporation created and organized under the laws of Country Y, and *C*, a corporation created and organized under the laws of Country X. The taxable year of each of the corporations is the calendar year. In Year 1, *B* earns $100 of income from the sale of products in Country Y that it manufactured in Country Y. *C* had no earnings and profits in Year 1. On January 1 of Year 2, *A* contributes all of the stock of *B* and *C* to Newco, a Country Y corporation, in exchange for all of the stock of Newco. Neither *B* nor *C* earns any income in Year 2, but at the end of Year 2 *B* distributes the $100 accumulated earnings and profits to Newco. Newco's income from the distribution, $100, is foreign personal holding company income because the earnings and profits distributed by *B* were not earned or accumulated during a period in which the stock of *B* was owned by Newco and in which each of the requirements of paragraph (b)(4)(i)(A) of this section was satisfied.

(B) *Interest paid out of adjusted foreign base company income or insurance income*—(*1*) *In general.* Interest may not be excluded from the foreign personal holding company income of the recipient under this paragraph (b)(4) to the extent that the deduction for the interest is allocated under § 1.954–1(a)(4) and (c) to the payor's adjusted gross foreign base company income (as defined in § 1.954–1(a)(3)), adjusted gross insurance income (as defined in § 1.954–1(a)(6)), or any other category of income included in the computation of subpart F income under section 952(a).

(*2*) *Rule for corporations that are both recipients and payors of interest.* If a controlled foreign corporation is both a recipient and payor of interest, the interest that is received will be characterized before the interest that is paid. In addition, the amount of interest paid or accrued, directly or indirectly, by the controlled foreign corporation to a related person (as defined in section 954(d)(3)) shall be offset against and eliminate any interest received or accrued, directly or indirectly, by the controlled foreign corporation from that related person. In a case in which the controlled foreign corporation pays or accrues interest to a related person, as defined in section 954(d)(3), and also receives or accrues interest indirectly from the related person, the smallest interest payment is eliminated and the amounts of all other interest payments are reduced by the amount of the smallest interest payment.

(C) *Coordination with sections 864(d) and 881(c).* Income of a controlled foreign corporation that is treated as interest under section 864(d)(1) or (6), or that is portfolio interest, as defined by section 881(c), is not excluded from foreign personal holding company income under section 954(c)(3)(A)(i) and this paragraph (b)(4).

(iii) *Trade or business requirement.* Except as otherwise provided under this paragraph (b)(4), the principles of section 367(a) apply for purposes of determining whether the payor has a trade or business in its country of incorporation and whether its assets are used in that trade or business. Property purchased or produced for use in a trade or business is not considered used in a trade or business before it is placed in service or after it is retired from service as determined in accordance with the principles of sections 167 and 168.

(iv) *Substantial assets test.* A substantial part of the assets of the payor will be considered to be used in a trade or business located in the payor's country of incorporation for a taxable year only if the average value of the payor's assets for such year that are used in the trade or business and are located in such country equals more than 50 percent of the average value of all the assets of the payor (including assets not used in a trade or business). The average value of assets for the taxable year is determined by averaging the values of assets at the close of each quarter of the taxable year. The value of assets is determined under paragraph (b)(4)(v) of this section, and the location of assets used in a trade or business of the payor is determined under paragraphs (b)(4)(vi) through (xi) of this section.

(v) *Valuation of assets.* For purposes of determining whether a substantial part of the assets of the payor are used in a trade or business in its country of incorporation, the value of assets shall be their fair market value (not reduced by liabilities), which, in the absence of affirmative evidence to the contrary, shall be deemed to be their adjusted basis.

(vi) *Location of tangible property*—(A) *In general.* Tangible property (other than inventory and similar property as defined in paragraph (a)(4)(iii) of this section, and dealer property as defined in paragraph (a)(4)(v) of this section) used in a trade or business is considered located in the country in which it is physically located.

(B) *Exception.* An item of tangible personal property that is used in the trade or business of a payor in the payor's country of incorporation is considered located within the payor's country of incorporation while it is temporarily located elsewhere for inspection or repair if the property is not placed in service in a country other than the payor's country of incorporation and is not to be so placed in service following the inspection or repair.

(vii) *Location of intangible property*—(A) *In general.* Intangible property (other than inventory and similar property as defined in paragraph (a)(4)(iii) of this section, dealer property as defined in paragraph (a)(4)(v) of this section, and debt instruments) is considered located entirely in the payor's country of incorporation for a quarter of the taxable year only if the payor conducts all of its activities in connection with the use or exploitation of the property in that country during that entire quarter. For this purpose, the country in which the activities connected to the use or exploitation of the property are conducted is the country in which the expenses associated with these activities are incurred. Expenses incurred in connection with the use or exploitation of an item of intangible property are included in the computation provided by this paragraph (b)(4) if they would be deductible under section 162 or includible in inventory costs or the cost of goods sold if the payor were a domestic corporation. If the payor conducts such activities through an agent or independent contractor, then the expenses incurred by the payor with respect to the agent or independent contractor shall be deemed to be incurred by the payor in the country in which the expenses of the agent or independent contractor were incurred by the agent or independent contractor.

(B) *Exception for property located in part in the payor's country of incorporation.* If the payor conducts its activities in connection with the use or exploitation of an item of intangible property, including goodwill (other than inventory and similar property, dealer property and debt instruments) during a quarter of the taxable year both in its country of incorporation and elsewhere, then the value of the intangible considered located in the payor's country of incorporation during that quarter is a percentage of the value of the item as of the close of the quarter. That percentage equals the ratio that the expenses incurred by the payor (described in paragraph (b)(4)(vii)(A) of this section) during the entire quarter by reason of activities that are connected with the use or exploitation of the item of intangible property and are conducted in the payor's country of incorporation bear to all expenses incurred by the payor during the entire quarter by reason of all such activities worldwide.

(viii) *Location of inventory and dealer property*—(A) *In general.* Inventory and similar property, as defined in paragraph (a)(4)(iii) of this section, and dealer property, as defined in paragraph (a)(4)(v) of this section, are considered located entirely in the payor's country of incorporation for a quarter of the taxable year only if the payor conducts all of its activities in connection with the production and sale, or purchase and resale, of such property in its country of incorporation during that entire quarter. If the payor conducts such activities through an agent or independent contractor, then the location of such activities is the place in which they are conducted by the agent or independent contractor.

(B) *Inventory and dealer property located in part in the payor's country of incorporation.* If the payor conducts its activities in connection with the production and sale, or purchase and resale, of inventory or similar property or dealer property during a quarter of the taxable year both in its country of incorporation and elsewhere, then the value of the inventory or similar property or dealer property considered located in the payor's country of incorporation during each quarter is a percentage of the value of the inventory or similar property or dealer property as of the close of the quarter. That percentage equals the ratio that the costs and expenses incurred by the payor during the entire quarter by reason of activities connected with the production and sale, or purchase and resale, of inventory or similar property or dealer property that are conducted in the payor's country of incorporation bear to all costs or expenses incurred by the payor during the entire quarter by reason of all such activities worldwide. A cost incurred in connection with the production and sale or purchase and resale of inventory or similar property or dealer property is included in this computation if it—

(*1*) Would be included in inventory costs or otherwise capitalized with respect to inventory or similar property or dealer property under section 61, 263A, 471, or 472 if the payor were a domestic corporation; or

(*2*) Would be deductible under section 162 if the payor were a domestic corporation and is definitely related to gross income derived from such property (but not to all classes of gross income derived by the payor) under the principles of § 1.861–8.

(ix) *Location of debt instruments.* For purposes of this paragraph (b)(4), debt instruments, other than debt instruments that are inventory or similar property (as defined in paragraph (a)(4)(iii) of this section) or dealer property (as defined in paragraph (a)(4)(v) of this section) are considered to be used in a trade or business only if they arise from the sale of inventory or similar property or dealer property by the payor or from the rendition of services by the payor in the ordinary course of a trade or business of the payor, and only until such time as interest is required to be charged under section 482. Debt instruments that arise from the sale of inventory or similar property or dealer property during a quarter are treated as having the same location, proportionately, as the inventory or similar property or dealer property held during that quarter. Debt instruments arising from the rendition of services in the ordinary course of a trade or business are considered located on a proportionate basis in the countries in which the services to which they relate are performed.

(x) *Treatment of certain stock interests.* Stock in a controlled foreign corporation (lower-tier corporation) that is incorporated in the same country as the payor and that is more than 50-percent owned, directly or indirectly, by the payor within the meaning of section 958(a) shall be considered located in the payor's country of incorporation and, solely for purposes of section 954(c)(3), used in a trade or business of the payor in proportion to the value of the assets of the lower-tier corporation that are used in a trade or business in the country of incorporation. The location of assets used in a trade or business of the lower-tier corporation shall be determined under the rules of this paragraph (b)(4).

(xi) *Treatment of banks and insurance companies.* [Reserved]

(5) *Exclusion of rents and royalties derived from related persons*—(i) *In general*—(A) *Corporate payor.* Foreign personal holding company income received by a controlled foreign corporation does not include rents or royalties if—

(*1*) The payor is a corporation that is a related person with respect to the controlled foreign corporation, as defined in section 954(d)(3); and

(*2*) The rents or royalties are for the use of, or the privilege of using, property within the country under the laws of which the controlled foreign corporation receiving the payments is created or organized (the country of incorporation).

(B) *Payment by a partnership.* For purposes of this paragraph (b)(5), if a partnership with one or more corporate partners makes a payment of rents or royalties, a corporate partner will be treated as the payor of the rents or royalties—

(*1*) If the rent or royalty payment gives rise to a partnership item of deduction under the Internal Revenue Code or Income Tax Regulations, to the extent the item of deduction is allocable to the corporate partner under section 704(b); or

(*2*) If the rent or royalty payment does not give rise to a partnership item of deduction under the Internal Revenue Code or Income Tax Regulations, to the extent that a partnership item reasonably related to the payment would be allocated to that partner under an existing allocation under the partnership agreement (made pursuant to section 704(b)).

(ii) *Exceptions*—(A) *Rents or royalties paid out of adjusted foreign base company income or insurance income.* Rents or royalties may not be excluded from the foreign personal holding company income of the recipient under this paragraph (b)(5) to the extent that deductions for the payments are allocated under section 954(b)(5) and §1.954–1(a)(4) and (c) to the payor's adjusted gross foreign base company income (as defined in §1.954–1(a)(3)), adjusted gross insurance income (as defined in §1.954–1(a)(6)), or any other category of income included in the computation of subpart F income under section 952(a).

(B) *Property used in part in the controlled foreign corporation's country of incorporation.* If the payor uses the property both in the controlled foreign corporation's country of incorporation and elsewhere, the part of the rent or royalty attributable (determined under the principles of section 482) to the use of, or the privilege of using, the property outside such country of incorporation is included in the computation of foreign personal holding company income under this paragraph (b).

(6) *Exclusion of rents and royalties derived in the active conduct of a trade or business.* Foreign personal holding company income shall not include rents or royalties that are derived in the active conduct of a trade or business and received from a person that is not a related person (as defined in section 954(d)(3)) with respect to the controlled foreign corporation. For purposes of this section, rents or royalties are derived in the active conduct of a trade or business only if the provisions of paragraph (c) or (d) of this section are satisfied.

(c) *Excluded rents*—(1) *Active conduct of a trade or business.* Rents will be considered for purposes of paragraph (b)(6) of this section to be derived in the active conduct of a trade or business if such rents are derived by the controlled foreign corporation (the lessor) from leasing any of the following—

(i) Property that the lessor has manufactured or produced, or has acquired and added substantial value to, but only if the lessor is regularly engaged in the manufacture or production of, or in the acquisition and addition of substantial value to, property of such kind;

(ii) Real property with respect to which the lessor, through its own officers or staff of employees, regularly performs active and substantial management and operational functions while the property is leased;

(iii) Personal property ordinarily used by the lessor in the active conduct of a trade or business, leased temporarily during a period when the property would, but for such leasing, be idle; or

(iv) Property that is leased as a result of the performance of marketing functions by such lessor if the lessor, through its own officers or staff of employees located in a foreign country, maintains and operates an organization in such country that is regularly engaged in the business of marketing, or of marketing and servicing, the leased property and that is substantial in relation to the amount of rents derived from the leasing of such property.

(2) *Special rules*—(i) *Adding substantial value.* For purposes of paragraph (c)(1)(i) of this section, the performance of marketing functions will not be considered to add substantial value to property.

(ii) *Substantiality of foreign organization.* For purposes of paragraph (c)(1)(iv) of this section, whether an organization in a foreign country is substantial in relation to the amount of rents is determined based on all of the facts and circumstances. However, such an organization will be considered substantial in relation to the amount of rents if active leasing expenses, as defined in paragraph (c)(2)(iii) of this section, equal or exceed 25 percent of the adjusted leasing profit, as defined in paragraph (c)(2)(iv) of this section.

(iii) *Active leasing expenses.* The term *active leasing expenses* means the deductions incurred by an organization of the lessor in a foreign country that are properly allocable to rental income and that would be allowable under section 162 to the lessor if it were a domestic corporation, other than—

(A) Deductions for compensation for personal services rendered by shareholders of, or related persons (as defined in section 954(d)(3)) with respect to, the lessor;

(B) Deductions for rents paid or accrued;

(C) Deductions that, although generally allowable under section 162, would be specifically allowable to the lessor (if the lessor were a domestic corporation) under any section of the Internal Revenue Code other than section 162; and

(D) Deductions for payments made to agents or independent contractors with respect to the leased property other than payments for insurance, utilities and other expenses for like services, or for capitalized repairs.

(iv) *Adjusted leasing profit.* The term *adjusted leasing profit* means the gross income of the lessor from rents, reduced by the sum of—

(A) The rents paid or incurred by the lessor with respect to such rental income;

(B) The amounts that would be allowable to such lessor (if the lessor were a domestic corporation) as deductions under sections 167 or 168 with respect to such rental income; and

(C) The amounts paid by the lessor to agents or independent contractors with respect to such rental income other than payments for insurance, utilities and other expenses for like services, or for capitalized repairs.

(3) *Examples.* The application of this paragraph (c) is illustrated by the following examples.

Example 1. Controlled foreign corporation *A* is regularly engaged in the production of office machines which it sells or leases to others and services. Under paragraph (c)(1)(i) of this section, the rental income of Corporation *A* from these leases is derived in the active conduct of a trade or business for purposes of section 954(c)(2)(A).

Example 2. Controlled foreign corporation *D* purchases motor vehicles which it leases to others. In the conduct of its short-term leasing of such vehicles in foreign country X, Corporation *D* owns a large number of motor vehicles in country X which it services and repairs, leases motor vehicles to customers on an hourly, daily, or weekly basis, maintains offices and service facilities in country X from which to lease and service such vehicles, and maintains therein a sizable staff of its own administrative, sales, and service personnel. Corporation *D* also leases in country X on a long-term basis, generally for a term of one year, motor vehicles that it owns. Under the terms of the long-term leases, Corporation *D* is required to repair and service, during the term of the lease, the leased motor vehicles without cost to the lessee. By the maintenance in country X of office, sales, and service facilities and its complete staff of administrative, sales, and service personnel, Corporation *D* maintains and operates an organization therein that is regularly engaged in the business of marketing and servicing the motor vehicles that are leased. The deductions incurred by such organization satisfy the 25-percent test of paragraph (c)(2)(ii) of this section; thus, such organization is substantial in relation to the rents Corporation *D* receives from leasing the motor vehicles. Therefore, under paragraph (c)(1)(iv) of this section, such rents are derived in the active conduct of a trade or business for purposes of section 954(c)(2)(A).

Example 3. Controlled foreign corporation *E* owns a complex of apartment buildings that it has acquired by purchase. Corporation *E* engages a real estate management firm to lease the apartments, manage the buildings and pay over the net rents to Corporation *E*. The rental income of Corporation *E* from such leases is not derived in the active conduct of a trade or business for purposes of section 954(c)(2)(A).

Example 4. Controlled foreign corporation *F* acquired by purchase a twenty-story office building in a foreign country, three floors of which it occupies and the rest of which it leases. Corporation *F* acts as rental agent for the leasing of offices in the building and employs a substantial staff to perform other management and maintenance functions. Under paragraph (c)(1)(ii) of this section, the rents received by Corporation *F* from such leasing operations are derived in the active conduct of a trade or business for purposes of section 954(c)(2)(A).

Example 5. Controlled foreign corporation *G* owns equipment that it ordinarily uses to perform contracts in foreign countries to drill oil wells. For occasional brief and irregular periods it is unable to obtain contracts requiring immediate performance sufficient to employ all such equipment. During such a period it sometimes leases such idle equipment temporarily. After the expiration of such temporary leasing of the property, Corporation *G* continues the use of such equipment in the performance of its own drilling contracts. Under paragraph (c)(1)(iii) of this section, rents Corporation *G* receives from such leasing of idle equipment are derived in the active conduct of a trade or business for purposes of section 954(c)(2)(A).

(d) *Excluded royalties*—(1) *Active conduct of a trade or business.* Royalties will be considered for purposes of paragraph (b)(6) of this section to be derived in the active conduct of a trade or business if such royalties are derived by the controlled foreign corporation (the licensor) from licensing—

(i) Property that the licensor has developed, created, or produced, or has acquired and added substantial value to, but only so long as the licensor is regularly engaged in the development, creation or production of, or in the acquisition of and addition of substantial value to, property of such kind; or

(ii) Property that is licensed as a result of the performance of marketing functions by such licensor if the licensor, through its own officers or staff of employees located in a foreign country, maintains and operates an organization in such country that is regularly engaged in the business of marketing, or of marketing and servicing, the licensed property and that is substantial in relation to the amount of royalties derived from the licensing of such property.

(2) *Special rules*—(i) *Adding substantial value.* For purposes of paragraph (d)(1)(i) of this section, the performance of marketing functions will not be considered to add substantial value to property.

(ii) *Substantiality of foreign organization.* For purposes of paragraph (d)(1)(ii) of this section, whether an organization in a foreign country is substantial in relation to the amount of royalties is determined based on all of the facts and circumstances. However, such an organization will be considered substantial in relation to the amount of royalties if active licensing expenses, as defined in paragraph (d)(2)(iii) of this section, equal or exceed 25 percent of the adjusted licensing profit, as defined in paragraph (d)(2)(iv) of this section.

(iii) *Active licensing expenses.* The term *active licensing expenses* means the deductions incurred by an organization of the licensor in a foreign country that are properly allocable to royalty income and that would be allowable under section 162 to the licensor if it were a domestic corporation, other than—

(A) Deductions for compensation for personal services rendered by shareholders of, or related persons (as defined in section 954(d)(3)) with respect to, the licensor;

(B) Deductions for royalties paid or incurred;

(C) Deductions that, although generally allowable under section 162, would be specifically allowable to the licensor (if the controlled foreign corporation were a domestic corporation) under any section of the Internal Revenue Code other than section 162; and

(D) Deductions for payments made to agents or independent contractors with respect to the licensed property.

(iv) *Adjusted licensing profit.* The term *adjusted licensing profit* means the gross income of the licensor from royalties, reduced by the sum of—

(A) The royalties paid or incurred by the licensor with respect to such royalty income;

(B) The amounts that would be allowable to such licensor as deductions under section 167 or 197 (if the licensor were a domestic corporation) with respect to such royalty income; and

(C) The amounts paid by the licensor to agents or independent contractors with respect to such royalty income.

(3) *Examples.* The application of this paragraph (d) is illustrated by the following examples.

Example 1. Controlled foreign corporation *A*, through its own staff of employees, owns and operates a research facility in foreign country X. At the research facility, employees of Corporation *A* who are scientists, engineers, and technicians regularly perform experiments, tests, and other technical activities, that ultimately result in the issuance of patents that it sells or licenses. Under paragraph (d)(1)(i) of this section, royalties received by Corporation *A* for the privilege of using patented rights that it develops as a result of such research activity are derived in the active conduct of a trade or business for purposes of section 954(c)(2)(A), but only so long as the licensor is regularly engaged in the development, creation or production of, or in the acquisition of and addition of substantial value to, property of such kind.

Example 2. Assume that Corporation *A* in *Example 1,* in addition to receiving royalties for the use of patents that it develops, receives royalties for the use of patents that it acquires by purchase and licenses to others without adding any value thereto. Corporation *A* generally consummates royalty agreements on such purchased patents as the result of inquiries received by it from prospective licensees when the fact becomes known in the business community, as a result of the filing of a patent, advertisements in trade journals, announcements, and contacts by employees of Corporation *A*, that Corporation *A* has acquired rights under a patent and is interested in licensing its rights. Corporation *A* does not, however, maintain and operate an organization in a foreign country that is regularly engaged in the business of marketing the purchased patents. The royalties received by Corporation *A* for the use of the purchased patents are not derived in the active conduct of a trade or business for purposes of section 954(c)(2)(A).

Example 3. Controlled foreign corporation *B* receives royalties for the use of patents that it acquires by purchase. The primary business of Corporation *B*, operated on a regular basis, consists of licensing patents that it has purchased raw from inventors and, through the efforts of a substantial staff of employees consisting of scientists, engineers, and technicians, made susceptible to commercial application. For example, Corporation *B*, after purchasing patent rights covering a chemical process, designs specialized production equipment required for the commercial adaptation of the process and, by so doing, substantially increases the value of the patent. Under paragraph (d)(1)(i) of this section, royalties received by Corporation *B* from the use of such patent are derived in the active conduct of a trade or business for purposes of section 954(c)(2)(A).

Example 4. Controlled foreign corporation *C* receives royalties for the use of a patent that it developed through its own staff of employees at its facility in country X. Corporation *C* has developed no other patents. It does not regularly employ a staff of scientists, engineers or technicians to create new products to be patented. Further, it does not purchase and license patents developed by others to which it has added substantial value. The royalties received by Corporation *C* are not derived from the active conduct of a trade or business for purposes of section 954(c)(2)(A).

Example 5. Controlled foreign corporation *D* finances independent persons in the development of patented items in return for an ownership interest in such items from which it derives a percentage of royalty income, if any, subsequently derived from the use by others of the protected right. Corporation *D* also attempts to increase its royalty income from such patents by contacting prospective licensees and rendering to licensees advice that is intended to promote the use of the patented property. Corporation *D* does not, however, maintain and operate an organization in a foreign country that is regularly engaged in the business of marketing the patents. Royalties received by Corporation *D* for the use of such patents are not derived in the active conduct of a trade or business for purposes of section 954(c)(2)(A).

(e) *Certain property transactions*—(1) *In general*—(i) *Inclusions.* Gain from certain property transactions described in section 954(c)(1)(B) includes the excess of gains over losses from the sale or exchange of—

(A) Property that gives rise to dividends, interest, rents, royalties or annuities, as described in paragraph (e)(2) of this section;

(B) Property that is an interest in a partnership, trust or REMIC; and

(C) Property that does not give rise to income, as described in paragraph (e)(3) of this section.

(ii) *Exceptions.* Gain or loss from certain property transactions described in section 954(c)(1)(B) and paragraph (e)(1)(i) of this section does not include gain or loss from the sale or exchange of—

(A) Inventory or similar property, as defined in paragraph (a)(4)(iii) of this section;

(B) Dealer property, as defined in paragraph (a)(4)(v) of this section; or

(C) Property that gives rise to rents or royalties described in paragraph (b)(6) of this section that are derived in the active conduct of a trade or business from persons that are not related persons (as defined in section 954(d)(3)) with respect to the controlled foreign corporation.

(iii) *Treatment of losses.* Section 1.954–1(c)(1)(ii) provides for the treatment of losses in excess of gains from the sale or exchange of property described in paragraph (e)(1)(i) of this section.

(iv) *Dual character property.* Property may, in part, constitute property that gives rise to certain income as described in paragraph (e)(2) of this section or, in part, constitute property that does not give rise to any income as described in paragraph (e)(3) of this section. However, property that is described in paragraph (e)(1)(i)(B) of this section cannot be dual character property. Dual character property must be treated as two separate properties for purposes of paragraph (e)(2) or (3) of this section. Accordingly, the sale or exchange of such dual character property will give rise to gain or loss that in part must be included in the computation of foreign personal holding company income under paragraph (e)(2) or (3) of this section, and in part is excluded from such computation. Gain or loss from the disposition of dual character property must be bifurcated under this paragraph (e)(1)(iv) pursuant to the method that most reasonably reflects the relative uses of the property. Reasonable methods may include comparisons in terms of gross income generated or the physical division of the property. In the case of real property, the physical division of the property will in most cases be the most reasonable method available. For example, if a controlled foreign corporation owns an office building, uses 60 percent of the building in its trade or business, and rents out the other 40 percent, then 40 percent of the gain recognized on the disposition of the property would reasonably be treated as gain that is included in the computation of foreign personal holding company income under this paragraph (e)(1). This paragraph (e)(1)(iv) addresses the contemporaneous use of property for dual purposes. For rules concerning changes in the use of property affecting its classification for purposes of this paragraph (e), see paragraph (a)(3) of this section.

(2) *Property that gives rise to certain income*—(i) *In general.* Property the sale or exchange of which gives rise to foreign personal holding company income under this paragraph (e)(2) includes property that gives rise to dividends, interest, rents, royalties or annuities described in paragraph (b) of this section, including—

(A) Property that gives rise to export financing interest described in paragraph (b)(2) of this section; and

(B) Property that gives rise to income from related persons described in paragraph (b)(4) or (5) of this section.

(ii) *Gain or loss from the disposition of a debt instrument.* Gain or loss from the sale, exchange or retirement of a debt instrument is included in the computation of foreign personal holding company income under this paragraph (e) unless—

(A) In the case of gain—

(*1*) It is interest (as defined in paragraph (a)(4)(i) of this section); or

(*2*) It is income equivalent to interest (as described in paragraph (h) of this section); and

(B) In the case of loss—

(*1*) It is directly allocated to, or treated as an adjustment to, interest income (as described in paragraph (a)(4)(i) of this section) or income equivalent to interest (as defined in paragraph (h) of this section) under any provision of the Internal Revenue Code or Income Tax Regulations; or

(*2*) It is required to be apportioned in the same manner as interest expense under section 864(e) or any other provision of the Internal Revenue Code or Income Tax Regulations.

(3) *Property that does not give rise to income.* Except as otherwise provided in this paragraph (e)(3), for purposes of this section, the term *property that does not give rise to income* includes all rights and interests in property (whether or not a capital asset) including, for example, forwards, futures and options.

Property that does not give rise to income shall not include—

(i) Property that gives rise to dividends, interest, rents, royalties or annuities described in paragraph (e)(2) of this section;

(ii) Tangible property (other than real property) used or held for use in the controlled foreign corporation's trade or business that is of a character that would be subject to the allowance for depreciation under section 167 or 168 and the regulations under those sections (including tangible property described in § 1.167(a)–2);

(iii) Real property that does not give rise to rental or similar income, to the extent used or held for use in the controlled foreign corporation's trade or business;

(iv) Intangible property (as defined in section 936(h)(3)(B)), goodwill or going concern value, to the extent used or held for use in the controlled foreign corporation's trade or business;

(v) Notional principal contracts (but see paragraphs (f)(2), (g)(2) and (h)(3) of this section for rules that include income from certain notional principal contracts in gains from commodities transactions, foreign currency gains and income equivalent to interest, respectively); or

(vi) Other property that is excepted from the general rule of this paragraph (e)(3) by the Commissioner in published guidance. See § 601.601(d)(2) of this chapter.

(f) *Commodities transactions*—(1) *In general*—(i) *Inclusion in foreign personal holding company income.* Foreign personal holding company income includes the excess of gains over losses from commodities transactions.

(ii) *Exception.* Gains and losses from qualified active sales and qualified hedging transactions are excluded from the computation of foreign personal holding company income under this paragraph (f).

(iii) *Treatment of losses.* Section 1.954–1(c)(1)(ii) provides for the treatment of losses in excess of gains from commodities transactions.

(2) *Definitions*—(i) *Commodity.* For purposes of this section, the term *commodity* includes tangible personal property of a kind that is actively traded or with respect to which contractual interests are actively traded.

(ii) *Commodities transaction.* The term *commodities transaction* means the purchase or sale of a commodity for immediate (spot) delivery or deferred (forward) delivery, or the right to purchase, sell, receive, or transfer a commodity, or any other right or obligation with respect to a commodity accomplished through a cash or off-exchange market, an interbank market, an organized exchange or board of trade, or an over-the-counter market, or in a transaction effected between private parties outside of any market. Commodities transactions include, but are not limited to—

(A) A futures or forward contract in a commodity;

(B) A leverage contract in a commodity purchased from a leverage transaction merchant;

(C) An exchange of futures for physical transaction;

(D) A transaction, including a notional principal contract, in which the income or loss to the parties is measured by reference to the price of a commodity, a pool of commodities, or an index of commodities;

(E) The purchase or sale of an option or other right to acquire or transfer a commodity, a futures contract in a commodity, or an index of commodities; and

(F) The delivery of one commodity in exchange for the delivery of another commodity, the same commodity at another time, cash, or nonfunctional currency.

(iii) *Qualified active sale*—(A) *In general.* The term *qualified active sale* means the sale of commodities in the active conduct of a commodities business as a producer, processor, merchant or handler of commodities if substantially all of the controlled foreign corporation's business is as an active producer, processor, merchant or handler of commodities. The sale of commodities held by a controlled foreign corporation other than in its capacity as an active producer, processor, merchant or handler of commodities is not a qualified active sale. For example, the sale by a controlled foreign corporation of commodities that were held for investment or speculation would not be a qualified active sale.

(B) *Active conduct of a commodities business.* For purposes of this paragraph, a controlled foreign corporation is engaged in the active conduct of a commodities business as a producer, processor, merchant or handler of commodities only with respect to commodities for which each of the following conditions is satisfied—

(*1*) It holds the commodities directly, and not through an agent or independent contractor, as inventory or similar property (as defined in paragraph (a)(4)(iii) of this section) or as dealer property (as defined in paragraph (a)(4)(v) of this section); and

(*2*) With respect to such commodities, it incurs substantial expenses in the ordinary course of a commodities business from engaging in one or more of the following activities directly, and not through an independent contractor—

(*i*) Substantial activities in the production of the commodities, including planting, tending or harvesting crops, raising or slaughtering livestock, or extracting minerals;

(*ii*) Substantial processing activities prior to the sale of the commodities, including the blending and drying of agricultural commodities, or the concentrating, refining, mixing, crushing, aerating or milling of commodities; or

(*iii*) Significant activities as described in paragraph (f)(2)(iii)(B)(*3*) of this section.

(*3*) For purposes of paragraph (f)(2)(iii)(B)(*2*)(*iii*) of this section, the significant activities must relate to—

(*i*) The physical movement, handling and storage of the commodities, including preparation of contracts and invoices, arranging freight, insurance and credit, arranging for receipt, transfer or negotiation of shipping documents, arranging storage or warehousing, and dealing with quality claims;

(*ii*) Owning and operating facilities for storage or warehousing; or

(*iii*) Owning or chartering vessels or vehicles for the transportation of the commodities.

(C) *Substantially all.* Substantially all of the controlled foreign corporation's business is as an active producer, processor, merchant or handler of commodities if the sum of its gross receipts from all of its qualified active sales (as defined in this paragraph (f)(2)(iii) without regard to the substantially all requirement) of commodities and its gross receipts from all of its qualified hedging transactions (as defined in paragraph (f)(2)(iv) of this section, applied without regard to the substantially all requirement of this paragraph (f)(2)(iii)(C)) equals or exceeds 85 percent of its total gross receipts for the taxable year (computed as though the corporation were a domestic corporation). In computing gross receipts, the District Director may disregard any sale or hedging transaction that has as a principal purpose manipulation of the 85 percent gross receipts test. A purpose may be a principal purpose even though it is outweighed by other purposes (taken together or separately).

(D) *Activities of employees of a related entity.* For purposes of this paragraph (f), activities of employees of an entity related to the controlled foreign corporation, who are made available to and supervised on a day-to-day basis by, and whose salaries are paid by (or reimbursed to the related entity by), the controlled foreign corporation, are treated as activities engaged in directly by the controlled foreign corporation.

(E) *Financial activities.* For purposes of this paragraph (f), a corporation is not engaged in a commodities business as a producer, processor, merchant or handler of commodities if its business is primarily financial. For example, the business of a controlled foreign corporation is primarily financial if its principal business is making a market in notional principal contracts based on a commodities index.

(iv) *Qualified hedging transaction*—(A) *In general.* The term *qualified hedging transaction* means a bona fide hedging transaction, as defined in paragraph (a)(4)(ii) of this section, with respect to qualified active sales (other than transactions described in section 988(c)(1) without regard to section 988(c)(1)(D)(i)).

(B) *Exception.* The term *qualified hedging transaction* does not include transactions that are not reasonably necessary to the conduct of business of the controlled foreign corporation as a producer, processor, merchant or handler of a commodity in the manner in which such business is customarily and usually conducted by others.

(g) *Foreign currency gain or loss*—(1) *Scope and purpose.* This paragraph (g) provides rules for the treatment of foreign currency gains and losses. Paragraph (g)(2) of this section provides the general rule. Paragraph (g)(3) of this section provides an election to include foreign currency gains or losses that would otherwise be treated as foreign personal holding company income under this paragraph (g) in the computation of another category of subpart F income. Paragraph (g)(4) of this section provides an alternative election to treat any net foreign currency gain or loss as foreign personal holding company income. Paragraph (g)(5) of this section provides rules for certain gains and losses not subject to this paragraph (g).

(2) *In general*—(i) *Inclusion.* Except as otherwise provided in this paragraph (g), foreign personal holding company income includes the excess of foreign currency gains over foreign currency losses attributable to any section 988 transactions (foreign currency gain or loss). Section 1.954–1(c)(1)(ii) provides rules for the treatment of foreign currency losses in excess of foreign currency gains. However, if an election is made under paragraph (g)(4) of this section, the excess of foreign currency losses over foreign currency gains to which the election would apply may be apportioned to, and offset, other categories of foreign personal holding company income.

(ii) *Exclusion for business needs*—(A) *General rule.* Foreign currency gain or loss directly related to the business needs of the controlled foreign corporation is excluded from foreign personal holding company income.

(B) *Business needs.* Foreign currency gain or loss is directly related to the business needs of a controlled foreign corporation if—

(*1*) The foreign currency gain or loss—

(*i*) Arises from a transaction (other than a hedging transaction) entered into, or property used or held for use, in the normal course of the controlled foreign corporation's trade or business, other than the trade or business of trading foreign currency;

(*ii*) Arises from a transaction or property that does not itself (and could not reasonably be expected to) give rise to subpart F income other than foreign currency gain or loss;

(*iii*) Does not arise from a transaction described in section 988(c)(1)(B)(iii); and

(*iv*) Is clearly determinable from the records of the controlled foreign corporation as being derived from such transaction or property; or

(*2*) The foreign currency gain or loss arises from a bona fide hedging transaction, as defined in paragraph (a)(4)(ii) of this section, with respect to a transaction or property that satisfies the requirements of paragraphs (g)(2)(ii)(B)(*1*)(*i*) through (*iii*) of this section, provided that any gain or loss arising from such transaction or property that is attributable to changes in exchange rates is clearly determinable from the records of the CFC as being derived from such transaction or property. For purposes of this paragraph (g)(2)(ii)(B)(*2*), a hedging transaction will satisfy the aggregate hedging rules of § 1.1221–2(c)(7) only if all (or all but a de minimis amount) of the aggregate risk being hedged arises in connection with transactions or property that satisfy the requirements of paragraphs (g)(2)(ii)(B)(*1*)(*i*) through (*iii*) of this section, provided that any gain or loss arising from such transactions or property that is attributable to changes in exchange rates is clearly determinable from the records of the CFC as being derived from such transactions or property.

(C) *Regular dealers.* Transactions in dealer property (as defined in paragraph (a)(4)(v) of this section) described in section 988(c)(1)(B) or (C) that are entered into by a controlled foreign corporation that is a regular dealer (as defined in paragraph (a)(4)(iv) of this section) in such property in its capacity as a dealer will be treated as directly related to the business needs of the controlled foreign corporation under paragraph (g)(2)(ii)(A) of this section.

(D) *Example.* The following example illustrates the provisions of this paragraph (g)(2).

Example. (i) *CFC1* and *CFC2* are controlled foreign corporations located in Country B, and are members of the same controlled group. *CFC1* is engaged in the active conduct of a trade or business that does not produce any subpart F income. *CFC2* serves as the currency coordination center for the controlled group, aggregating currency risks incurred by the group and entering into hedging transactions that transfer those risks outside of the group. Pursuant to this arrangement, and to hedge the currency risk on a non-interest bearing receivable incurred by *CFC1* in the normal course of its business, on Day 1 *CFC1* enters into a forward contract to sell Japanese Yen to CFC2 in 30 days. Also on Day 1, *CFC2* enters into a forward contract to sell Yen to unrelated Bank X on Day 30. *CFC2* is not a regular dealer in Yen spot and forward contracts, and the Yen is not the functional currency for either *CFC1* or *CFC2*.

(ii) Because the forward contract entered into by *CFC1* to sell Yen hedges a transaction entered into in the normal course of *CFC1*'s business that does not give rise to subpart F income, it qualifies as a bona fide hedging transaction as defined in paragraph (a)(4)(ii) of this section. Therefore, *CFC1*'s foreign exchange gain or loss from that forward contract will not be treated as foreign personal holding company income or loss under this paragraph (g).

(iii) Because the forward contract to purchase Yen was entered into by *CFC2* in order to assume currency risks incurred by *CFC1* it does not qualify as a bona fide hedging transaction, as defined in paragraph (a)(4)(ii) of this section. Thus, foreign exchange gain or loss recognized by *CFC2* from that forward contract will be foreign personal holding company income. Because *CFC2* entered into the forward contract to sell Yen in order to hedge currency risks of *CFC1,* that forward contract also does not qualify as a bona fide hedging transaction. Thus, *CFC2*'s foreign currency gain or loss arising from that forward contract will be foreign personal holding company income.

(iii) *Special rule for foreign currency gain or loss from an interest-bearing liability.* Except as provided in paragraph (g)(5)(iv) of this section, foreign currency gain or loss arising from an interest-bearing liability is characterized as subpart F income and non-subpart F income in the same manner that interest expense associated with the liability would be allocated and apportioned between subpart F income and non-subpart F income under §§1.861–9T and 1.861–12T.

(3) *Election to characterize foreign currency gain or loss that arises from a specific category of subpart F income as gain or loss in that category*—(i) *In general.* For taxable years of a controlled foreign corporation beginning on or after November 6, 1995, the controlling United States shareholders of the controlled foreign corporation may elect, under this paragraph (g)(3), to exclude foreign currency gain or loss otherwise includible in the computation of foreign personal holding company income under this paragraph (g) from the computation of foreign personal holding company income under this paragraph (g) and include such foreign currency gain or loss in the category (or categories) of subpart F income (described in section 952(a), or, in the case of foreign base company income, described in §1.954–1(c)(1)(iii)(A) (*1*) or (*2*)) to which such gain or loss relates. If an election is made under this paragraph (g)(3) with respect to a category (or categories) of subpart F income described in section 952(a), or, in the case of foreign base company income, described in §1.954–1(c)(1)(iii)(A) (*1*) or (*2*), the election shall apply to all foreign currency gain or loss that arises from—

(A) A transaction (other than a hedging transaction) entered into, or property used or held for use, in the normal course of the controlled foreign corporation's trade or business that gives rise to income in that category (or categories) and that is clearly determinable from the records of the controlled foreign corporation as being derived from such transaction or property; and

(B) A bona fide hedging transaction, as defined in paragraph (a)(4)(ii) of this section, with respect to a transaction or property described in paragraph (g)(3)(i)(A) of this section. For purposes of this paragraph (g)(3)(i)(B), a hedging transaction will satisfy the aggregate hedging rules of §1.1221–2(c)(7) only if all (or all but a de minimus amount) of the aggregate risk being hedged arises in connection with transactions or property that generate the same category of subpart F income described in section 952(a), or, in the case of foreign base company income, described in §1.954–1(c)(1)(iii)(A) (*1*) or (*2*).

(ii) *Time and manner of election.* The controlling United States shareholders, as defined in §1.964–1(c)(5), make the election on behalf of the controlled foreign corporation by filing a statement with their original income tax returns for the taxable year of such United States shareholders ending with or within the taxable year of the controlled foreign corporation for which the election is made, clearly indicating that such election has been made. If the controlling United States shareholders elect to apply these regulations retroactively, under § 1.954–0(a)(1)(ii), the election under this paragraph (g)(3) may be made by the amended return filed pursuant to the election under § 1.954–0(a)(1)(ii). The controlling United States shareholders filing the election statement described in this paragraph (g)(3)(ii) must provide copies of the election statement to all other United States shareholders of the electing controlled foreign corporation. Failure to provide copies of such statement will not cause an election under this paragraph (g)(3) to be voidable by the controlled foreign corporation or the controlling United States shareholders. However, the District Director has discretion to void the election if it is determined that three was no reasonable cause for the failure to provide copies of such statement. The statement shall include the following information—

(A) The name, address, taxpayer identification number, and taxable year of such United States shareholder;

(B) The name, address, and taxable year of the controlled foreign corporation for which the election is effective; and

(C) Any additional information required by the Commission by administrative pronouncement.

(iii) *Revocation of election.* This election is effective for the taxable year of the controlled foreign corporation for which it is made and all subsequent taxable years of such corporation unless revoked by or with the consent of the Commissioner.

(iv) *Example.* The following example illustrates the provisions of this paragraph (g)(3).

Example. (i) *CFC,* a controlled foreign corporation, is a sales company that earns foreign base company sales income under section 954(d). *CFC* makes an election under this paragraph (g)(3) to treat foreign currency gains or losses that arise from a specific category (or categories) of subpart F income (as described in section 952(a), or, in the case of foreign base company income, as described in § 1.954–1(c)(1)(iii)(A) (*1*) or (*2*)) as that type of income. *CFC* aggregates the currency risk on all of its transactions that generate foreign base company sales income and hedges this net currency exposure.

(ii) Assuming no more than a de minimus amount of risk in the pool of risks being hedged arises from transactions or property that generate income other than foreign base company sales income, pursuant to its election under (g)(3), *CFC*'s net foreign currency gain from the pool and the hedging transactions will be treated as foreign base company sales income under section 954(d), rather than as foreign personal holding company income under section 954(c)(1)(D). If the pool of risks and the hedging transactions generate a net foreign base company sales loss, however, *CFC* must apply the rules of § 1.954–1(c)(1)(ii).

(4) *Election to treat all foreign currency gains or losses as foreign personal holding company income*—(i) *In general.* If the controlling United States shareholders make an election under this paragraph (g)(4), the controlled foreign corporation shall include in its computation of foreign personal holding company income the excess of foreign currency gains over losses or the excess of foreign currency losses over gains attributable to any section 988 transaction (except those described in paragraph (g)(5) of this section) and any section 1256 contract that would be a section 988 transaction but for section 988(c)(1)(D). Separate elections for section 1256 contracts and section 988 transactions are not permitted. An election under this paragraph (g)(4) supersedes an election under paragraph (g)(3) of this section.

(ii) *Time and manner of election.* The controlling United States shareholders, as defined in § 1.964–1(c)(5), make the election on behalf of the controlled foreign corporation in the same time and manner as provided in paragraph (g)(3)(ii) of this section.

(iii) *Revocation of election.* This election is effective for the taxable year of the controlled foreign corporation for which it is made and all subsequent taxable years of such corporation unless revoked by or with the consent of the Commissioner.

(5) *Gains and losses not subject to this paragraph*—(i) *Capital gains and losses.* Gain or loss that is treated as capital gain or loss under section 988(a)(1)(B) is not foreign currency gain or loss for purposes of this paragraph (g). Such gain or loss is treated as gain or loss from the sale or exchange of property that is included in the computation of foreign personal holding company income under paragraph (e)(1) of this section. Paragraph (a)(2) of this section provides other rules concerning income described in more than one category of foreign personal holding company income.

(ii) *Income not subject to section 988.* Gain or loss that is not treated as foreign currency gain or loss by reason of section 988 (a)(2) or (d) is not foreign currency gain or loss for purposes of this paragraph (g). However, such gain or loss may be included in the computation of other categories of foreign personal holding company income in accordance with its characterization under section 988 (a)(2) or (d) (for example, foreign currency gain that is treated as interest income under section 988(a)(2) will be included in the computation of foreign personal holding company income under paragraph (b)(ii) of this section).

(iii) *Qualified business units using the dollar approximate separate transactions method.* This paragraph (g) does not apply to any DASTM gain or loss computed under §1.985–3(d). Such gain or loss is allocated under the rules of §1.985–3 (e)(2)(iv) or (e)(3). However, the provisions of this paragraph (g) do apply to section 988 transactions denominated in a currency other than the United States dollar or the currency that would be the qualified business unit's functional currency were it not hyperinflationary.

(iv) *Gain or loss allocated under §1.861–9.* [Reserved]

(h) *Income equivalent to interest*—(1) *In general*—(i) *Inclusion in foreign personal holding company income.* Except as provided in this paragraph (h), foreign personal holding company income includes income equivalent to interest as defined in paragraph (h)(2) of this section.

(ii) *Exceptions*—(A) *Liability hedging transactions.* Income, gain, deduction or loss that is allocated and apportioned in the same manner as interest expense under the provisions of §1.861–9T is not income equivalent to interest for purposes of this paragraph (h).

(B) *Interest.* Amounts treated as interest under section 954(c)(1)(A) and paragraph (b) of this section are not income equivalent to interest for purposes of this paragraph (h).

(2) *Definition of income equivalent to interest*—(i) *In general.* The term *income equivalent to interest* includes income that is derived from—

(A) A transaction or series of related transactions in which the payments, net payments, cash flows or return predominantly reflect the time value of money;

(B) Transactions in which the payments (or a predominant portion thereof) are, in substance, for the use or forbearance of money;

(C) Notional principal contracts, to the extent provided in paragraph (h)(3) of this section;

(D) Factoring, to the extent provided in paragraph (h)(4) of this section;

(E) Conversion transactions, but only to the extent that gain realized with respect to such a transaction is treated as ordinary income under section 1258;

(F) The performance of services, to the extent provided in paragraph (h)(5) of this section;

(G) The commitment by a lender to provide financing, if any portion of such financing is actually provided;

(H) Transfers of debt securities subject to section 1058; and

(I) Other transactions, as provided by the Commissioner in published guidance. See §601.601(d)(2) of this chapter.

(ii) *Income from the sale of property.* Income from the sale of property will not be treated as income equivalent to interest by reason of paragraph (h)(2)(i)(A) or (B) of this section. Income derived by a controlled foreign corporation will be treated as arising from the sale of property only if the corporation in substance carries out sales activities. Accordingly, an arrangement that is designed to lend the form of a sales transaction to a transaction that in substance constitutes an advance of funds will be disregarded. For example, if a controlled foreign corporation acquires property on 30-

day payment terms from one person and sells that property to another person on 90-day payment terms and at prearranged prices and terms such that the foreign corporation bears no substantial economic risk with respect to the purchase and sale other than the risk of non-payment, the foreign corporation has not in substance derived income from the sale of property.

(3) *Notional principal contracts*—(i) *In general.* Income equivalent to interest includes income from notional principal contracts denominated in the functional currency of the taxpayer (or a qualified business unit of the taxpayer, as defined in section 989(a)), the value of which is determined solely by reference to interest rates or interest rate indices, to the extent that the income from such transactions accrues on or after August 14, 1989.

(ii) *Regular dealers.* Income equivalent to interest does not include income earned by a regular dealer (as defined in paragraph (a)(4)(iv) of this section) from notional principal contracts that are dealer property (as defined in paragraph (a)(4)(v) of this section).

(4) *Income equivalent to interest from factoring*—(i) *General rule.* Income equivalent to interest includes factoring income. Except as provided in paragraph (h)(4)(ii) of this section, the term *factoring income* includes any income (including any discount income or service fee, but excluding any stated interest) derived from the acquisition and collection or disposition of a factored receivable. The amount of income equivalent to interest realized with respect to a factored receivable is the difference (if a positive number) between the amount paid for the receivable by the foreign corporation and the amount that it collects on the receivable (or realizes upon its sale of the receivable). The rules of this paragraph (h)(4) apply only with respect to the tax treatment of factoring income derived from the acquisition and collection or disposition of a factored receivable and shall not affect the characterization of an expense or loss of either the person whose goods or services gave rise to a factored receivable or the obligor under a receivable.

(ii) *Exceptions.* Factoring income shall not include—

(A) Income treated as interest under section 864(d)(1) or (6) (relating to income derived from trade or service receivables of related persons), even if such income is treated as not described in section 864(d)(1) by reason of the same-country exception of section 864(d)(7);

(B) Income derived from a factored receivable if payment for the acquisition of the receivable is made on or after the date on which stated interest begins to accrue, but only if the rate of stated interest equals or exceeds 120 percent of the Federal short-term rate (as defined under section 1274) (or the analogous rate for a currency other than the dollar) as of the date on which the receivable is acquired by the foreign corporation; or

(C) Income derived from a factored receivable if payment for the acquisition of the receivable by the foreign corporation is made only on or after the anticipated date of payment of all principal by the obligor (or the anticipated weighted average date of payment of a pool of purchased receivables).

(iii) *Factored receivable.* For purposes of this paragraph (h)(4), the term *factored receivable* includes any account receivable or other evidence of indebtedness, whether or not issued at a discount and whether or not bearing stated interest, arising out of the disposition of property or the performance of services by any person, if such account receivable or evidence of indebtedness is acquired by a person other than the person who disposed of the property or provided the services that gave rise to the account receivable or evidence of indebtedness. For purposes of this paragraph (h)(4), it is immaterial whether the person providing the property or services agrees to transfer the receivable at the time of sale (as by accepting a third-party charge or credit card) or at a later time.

(iv) *Examples.* The following examples illustrate the application of this paragraph (h)(4).

Example 1. DP, a domestic corporation, owns all of the outstanding stock of *FS,* a controlled foreign corporation. *FS* acquires accounts receivable arising from the sale of property by unrelated corporation *X.* The receivables have a face amount of $100, and after 30 days bear stated interest equal to at least 120 percent of the applicable Federal short-term rate (determined as of the date the receivables are acquired by *FS*). *FS* purchases the receivables from *X* for $95 on Day 1 and collects $100 plus stated interest from the obligor under the receivables on Day 40. Income (other than stated interest) derived by *FS* from the factored receivables is factoring income within the meaning of paragraph (h)(4)(i) of this section and, therefore, is income equivalent to interest.

Example 2. The facts are the same as in *Example 1,* except that, rather than collecting $100 plus stated interest from the obligor under the factored receivables on Day 40, *FS* sells the receivables to controlled foreign corporation *Y* on Day 15 for $97. Both the income derived by *FS* on the factored receivables and the income derived by *Y* (other than stated interest) on the receivables are factoring income within the meaning of paragraph (h)(4)(i) of this section, and therefore, constitute income equivalent to interest.

Example 3. The facts are the same as in *Example 1,* except that *FS* purchases the receivables from *X* for $98 on Day 30. Income derived by *FS* from the factored receivables is excluded from factoring income under paragraph (h)(4)(ii)(B) of this section and, therefore, does not give rise to income equivalent to interest.

Example 4. The facts are the same as in *Example 3,* except that it is anticipated that all principal will be paid by the obligor of the receivables by Day 30. Income derived by *FS* from this maturity factoring of the receivables is excluded from factoring income under paragraph (h)(4)(ii)(C) of this section and, therefore, does not give rise to income equivalent to interest.

Example 5. The facts are the same as in *Example 4,* except that *FS* sells the factored receivables to *Y* for $99 on Day 45, at which time stated interest is accruing on the unpaid balance of $100. Because interest was accruing at the time *Y* acquired the receivables at a rate equal to at least 120 percent of the applicable Federal short-term rate, income derived by *Y* from the factored receivables is excluded from factoring income under paragraph (h)(4)(ii)(B) of this section and, therefore, does not give rise to income equivalent to interest.

Example 6. DP, a domestic corporation engaged in an integrated credit card business, owns all of the outstanding stock of *FS*, a controlled foreign corporation. On Day 1, individual *A* uses a credit card issued by *DP* to purchase shoes priced at $100 from *X*, a foreign corporation unrelated to *DP*, *FS*, or *A*. On Day 7, *X* transfers the receivable (which does not bear stated interest) arising from *A*'s purchase to *FS* in exchange for $95. *FS* collects $100 from *A* on Day 45. Income derived by *FS* on the factored receivable is factoring income within the meaning of paragraph (h)(4)(i) of this section and, therefore, is income equivalent to interest.

(5) *Receivables arising from performance of services.* If payment for services performed by a controlled foreign corporation is not made until more than 120 days after the date on which such services are performed, then the income derived by the controlled foreign corporation constitutes income equivalent to interest to the extent that interest income would be imputed under the principles of section 483 or the original issue discount provisions (sections 1271 through 1275), if—

(i) Such provisions applied to contracts for the performance of services;

(ii) The time period referred to in sections 483(c)(1) and 1274(c)(1)(B) were 120 days rather than six months; and

(iii) The time period referred to in section 483(c)(1)(A) were 120 days rather than one year.

(6) *Examples.* The following examples illustrate the application of this paragraph (h).

Example 1. CFC, a controlled foreign corporation, promises that Corporation *A* may borrow up to $500 in principal for one year beginning at any time during the next three months at an interest rate of 10 percent. In exchange, Corporation *A* pays *CFC* a commitment fee of $2. Pursuant to this agreement, *CFC* lends $80 to Corporation *A*. As a result, the entire $2 fee is included in the computation of *CFC'* s foreign personal holding company income under paragraph (h)(2)(i)(G) of this section.

Example 2. (i) At the beginning of its current taxable year, *CFC,* a controlled foreign corporation, purchases at face value a one-year debt instrument issued by Corporation *A* having a $100 principal amount and bearing a floating rate of interest set at the London Interbank Offered Rate (LIBOR) plus one percentage point. Contemporaneously, *CFC* borrows $100 from Corporation *B* for one year at a fixed interest rate of 10 percent, using the debt instrument as security.

(ii) During its current taxable year, *CFC* accrues $11 of interest from Corporation *A* on the bond. Because interest is excluded from the definition of income equivalent to interest under paragraph (h)(1)(ii)(B) of this section, the $11 is not income equivalent to interest.

(iii) During its current taxable year, *CFC* incurs $10 of interest expense with respect to the borrowing from Corporation *B*. That expense is allocated and apportioned to, and reduces, subpart F income to the extent provided in section 954(b)(5) and §§ 1.861–9T through 1.861–12T and 1.954–1(c).

Example 3. (i) On January 1, 1994, *CFC*, a controlled foreign corporation with the United States dollar as its functional currency, purchases at face value a 10-year debt instrument issued by Corporation *A* having a $100 principal amount and bearing a floating rate of interest set at LIBOR plus one percentage point payable on December 31st of each year. *CFC* subsequently determines that it would prefer receiving a fixed rate of return. Accordingly, on January 1, 1995, *CFC* enters into a 9-year interest rate swap agreement with Corporation *B* whereby Corporation *B* promises to pay *CFC* on December 31st of each year an amount equal to 10 percent on a notional principal amount of $100. In exchange, *CFC* promises to pay Corporation *B* an amount equal to LIBOR plus one percentage point on the notional principal amount.

(ii) On December 31, 1995, *CFC* receives $9 of interest income from Corporation *A* with respect to the debt instrument. On the same day, *CFC* receives a total of $10 from Corporation *B* and pays $9 to Corporation *B* with respect to the interest rate swap.

(iii) The $9 of interest income is foreign personal holding income under section 954(c)(1). Pursuant to § 1.446–3(d), *CFC* recognizes $1 of swap income for its 1995 taxable year that is also foreign personal holding company income because it is income equivalent to interest under paragraph (h)(2)(i)(C) of this section.

Example 4. (i) *CFC*, a controlled foreign corporation, purchases commodity X on the spot market for $100 and, contemporaneously, enter into a 3–month forward contract to sell commodity X for $104, a price set by the forward market.

(ii) Assuming that substantially all of *CFC*'s expected return is attributable to the time value of the net investment, as described in section 1258(c)(1), the transaction is a conversion transaction under section 1258(c). Accordingly, any gain treated as ordinary income under section 1258(a) will be foreign personal holding company income because it is income equivalent to interest under paragraph (h)(2)(i)(E) of this section.

[T.D. 8618, 60 FR 46517, Sept. 7, 1995; 60 FR 58731, Nov. 28, 1995; 60 FR 62025, 62026, Dec. 4, 1995, as amended by T.D. 8704, 62 FR 21, Jan. 2, 1997]

§ 1.954–2T Foreign personal holding company income (temporary).

(a)(1) through (4) [Reserved]. For further guidance, see § 1.954–2(a) through (4).

(5) *Special rules applicable to distributive share of partnership income*—(i) *Application of related person exceptions where payment reduces foreign tax of payor.* If a partnership receives an item of income that reduced the foreign income tax of the payor (determined under the principles of § 1.954–9T(a)(3)), to determine the extent to which a controlled foreign corporation's distributive share of such item of income is foreign personal holding company income, the exceptions contained in section 954(c)(3) shall apply only if—

(A)(*1*) Any such exception would have applied to exclude the income from foreign personal holding company income if the controlled foreign corporation had earned the income directly (determined by testing, with reference to such controlled foreign corporation, whether an entity is a related person, within the meaning of section 954(d)(3), or is organized under the laws of, or uses property in, the foreign country in which the controlled foreign corporation is created or organized); and

(*2*) The distributive share of such income is not in respect of a payment made by the controlled foreign corporation to the partnership; and

(B)(*1*) The partnership is created or organized, and uses a substantial part of its assets in a trade or business in the country under the laws of which the controlled foreign corporation is created or organized (determined under the principles of § 1.954–2(b)(4));

(*2*) The partnership is regarded as fiscally transparent, as defined in § 1.954–9T(a)(7), by all countries under the laws of which the controlled foreign corporation is created or organized or has substantial assets; or

(*3*) The income is taxed in the year when earned at an effective rate of tax (determined under the principles of § 1.954–1(d)(2)) that is not less than 90 percent of, and not more than five percentage points less than, the effective rate of tax that would have applied to such income under the laws of the country in which the controlled foreign corporation is created or organized if such income were earned directly by the controlled foreign corporation partner from local sources.

(ii) *Certain other exceptions applicable to foreign personal holding company income.* [Reserved].

(iii) *Effective date.* Paragraph (a)(5)(i) of this section shall apply to all amounts paid or accrued on or after March 23, 1998, except for amounts paid or accrued pursuant to arrangements entered into before March 23, 1998 and not substantially modified (including, for example, by expansion of the arrangement (whether by exercise of an option or otherwise) such as by an increase in the amount of or term of any borrowing, leasing or licensing constituting the arrangement, changes in direct or indirect control of any entity that is a party to the arrangement, or any similar measure which materially increases the tax benefit of the arrangement) on or after March 23, 1998.

(6) *Special rules applicable to exceptions from foreign personal holding company income treatment in circumstances involving hybrid branches*—(i) *In general.* In the case of a payment between a controlled foreign corporation (or its hybrid branch, as defined in §1.954–9T(a)(6)) and the hybrid branch of a related controlled foreign corporation, the exceptions contained in section 954(c)(3) shall apply only if the payment would have qualified for the exception if the payor were a separate controlled foreign corporation created or organized in the jurisdiction where foreign tax is reduced and the payee were a separate controlled foreign corporation created or organized under the laws of the jurisdiction in which the payment is subject to tax (other than a withholding tax).

(ii) *Exception where no tax reduction or tax disparity*. Paragraph (a)(6)(i) of this section shall not apply unless the payment would have met the foreign tax reduction test of §1.954–9T(a)(3) and the tax disparity test of §1.954–9T(a)(5)(iv) if those provisions had been applicable to the payment.

(iii) *Effective date.* The rules of this section shall apply to all amounts paid or accrued on or after January 16, 1998, except for amounts paid or accrued pursuant to arrangements entered into before January 16, 1998, and not substantially modified (including, for example, by expansion of the arrangement (whether by exercise of an option or otherwise) such as by an increase in the amount of or term of any borrowing, leasing or licensing constituting the arrangement, changes in direct or indirect control of any entity that is a party to the arrangement, or any similar measure which materially increases the tax benefit of the arrangement) on or after January 16, 1998.

(b) through (h) [Reserved]. For further guidance, see §1.954–2(b) through (h).

[T.D. 8767, 63 FR 14616, Mar. 26, 1998]

§1.954–3 Foreign base company sales income.

(a) *Income included*—(1) *In general*—(i) *General rules.* Foreign base company sales income of a controlled foreign corporation shall, except as provided in subparagraphs (2), (3), and (4) of this paragraph, consist of gross income (whether in the form of profits, commissions, fees, or otherwise) derived in connection with (*a*) the purchase of personal property from a related person and its sale to any person, (*b*) the sale of personal property to any person on behalf of a related person, (*c*) the purchase of personal property from any person and its sale to a related person, or (*d*) the purchase of personal property from any person on behalf of a related person. See section 954(d)(1). This section shall apply to the purchase and/or sale of personal property, whether or not such property was purchased and/or sold in the ordinary course of trade or business, except that income derived in connection with the sale of tangible personal property will not be considered to be foreign base company sales income if such property is sold to an unrelated person, as defined in paragraph (e)(2) of §1.954–1, after substantial use has been made of the property by the controlled foreign corporation in its trade or business. This section shall not apply to the excess of gains over losses from sales or exchanges of securities or from futures transactions, to the extent such excess gains are includible in foreign personal holding company income of the controlled foreign corporation under §1.954–2 or foreign base company shipping income under §1.954–6; nor shall it apply to the sale of the controlled foreign corporation's property (other than its stock in trade or other property of a kind which would properly be included in its inventory if on hand at the close of the taxable year, or property held primarily for sale to customers in the ordinary course of its trade or business) if substantially all the property of such corporation is sold pursuant to the discontinuation of the trade or business previously carried on by such corporation. The term ''any person'' as used in this subparagraph includes a related person, as defined in paragraph (e)(1) of § 1.954–1.

(ii) *Special rule—(a) In general.* The term ''personal property'' as used in section 954(d) and this section shall not include agricultural commodities which are not grown in the United States (within the meaning of section 7701(a)(9)) in commercially marketable quantities. All of the agricultural commodities listed in table I shall be considered grown in the United States in commercially marketable quantities. Bananas, black pepper, cocoa, coconut, coffee, crude rubber, and tea shall not be considered grown in the United States in commercially marketable quantities. All other agricultural commodities shall not be considered grown in the United States in commercially marketable quantities when, in consideration of all of the facts and circumstances of the individual case, such commodities are shown to be produced in the United States in insufficient quantity and quality to be marketed commercially. The term ''agricultural commodities'' includes, but is not limited to, livestock, poultry, fish produced in fish farms, fruit, furbearing animals as well as the products of truck farms, ranches, nurseries, ranges, and orchards. A fish farm is an area where fish are grown or raised (artificially protected and cared for), as opposed to merely caught or harvested. However, the term ''agricultural commodities'' shall not include timber (either standing or felled), or any commodity at least 50 percent of the fair market value of which is attributable to manufacturing or processing, determined in a manner consistent with the regulations under section 993(c) (relating to the definition of export property). For purposes of applying such regulations, the term ''processing'' shall be deemed not to include handling, packing, packaging, grading, storing, transporting, slaughtering, and harvesting. Subdivision (ii) shall apply in the computation of foreign base company sales income for taxable years of controlled foreign corporations beginning after December 31, 1975, and to taxable years of U.S. shareholders (within the meaning of section 951(b)) within which or with which such taxable years of such foreign corporations end.

(b) Table.

TABLE I—AGRICULTURAL COMMODITIES GROWN IN THE UNITED STATES IN COMMERCIALLY MARKETABLE QUANTITIES

Livestock and Products

Beeswax
Cattle and calves
Chickens
Chicken eggs
Ducks
Geese
Goats
Hogs
Honey
Horses
Milk
Mink
Mohair
Rabbits
Sheep and lambs
Turkeys
Wool

Crops

Tangerines
Tobacco

TABLE I—AGRICULTURAL COMMODITIES GROWN IN THE UNITED STATES IN COMMERCIALLY MARKETABLE QUANTITIES—Continued

Hay
Honeydew melons
Hops
Lemons
Tomatoes
Walnuts
Watermelons
Wheat

(iii) The application of this subparagraph may be illustrated by the following examples:

Example 1. Controlled foreign corporation A, incorporated under the laws of foreign country X, is a wholly owned subsidiary of domestic corporation M. Corporation A purchases from M Corporation, a related person, articles manufactured in the United States and sells the articles in the form in which purchased to P, not a related person, for delivery and use in foreign country Y. Gross income of A Corporation derived from the purchase and sale of the personal property is foreign base company sales income.

Example 2. Corporation A in example 1 also purchases from P, not a related person, articles manufactured in country Y and sells the articles in the form in which purchased to foreign corporation B, a related person, for use in foreign country Z. Gross income of A Corporation derived from the purchase and sale of the personal property is foreign base company sales income.

Example 3. Controlled foreign corporation C, incorporated under the laws of foreign country X, is a wholly owned subsidiary of domestic corporation N. By contract, N Corporation agrees to pay C Corporation, a related person, a commission equal to 6 percent of the gross selling price of all personal property shipped by N Corporation as the result of orders solicited by C Corporation in foreign countries Y and Z. In fulfillment of such orders, N Corporation ships products manufactured by it in the United States. Corporation C does not assume title to the property sold. Gross commissions received by C Corporation from N Corporation in connection with the sale of such property for use in countries Y and Z constitute foreign base company sales income.

Example 4. Controlled foreign corporation D, incorporated under the laws of foreign country Y, is a wholly owned subsidiary of domestic corporation R. In 1964, D Corporation acquires a United States manufactured lathe from R Corporation. In 1972, after having made substantial use of the lathe in its manufacturing business, D Corporation sells the lathe to an unrelated person for use in foreign country Z. Gross income from the sale of the lathe is not foreign base company sales income since it is sold to an unrelated person after substantial use has been made of it by D Corporation in its business.

Example 5. Controlled foreign corporation E, incorporated under the laws of foreign country Y, is a wholly owned subsidiary of domestic corporation P. Corporation E purchases from P Corporation articles manufactured by P Corporation outside of country Y and sells the articles to F Corporation, an unrelated person, for use in foreign country Z. Corporation E finances the purchase of the articles by F Corporation by agreeing to accept payment over an extended period of time and receives not only the purchase price but also interest and service fees. All gross income of E Corporation derived in connection with the purchase and sale of the personal property, including interest and service fees derived from financing the sale to F Corporation, constitutes foreign base company sales income.

(2) *Property manufactured, produced, constructed, grown, or extracted within the country in which the controlled foreign corporation is created or organized.* Foreign base company sales income does not include income derived in connection with the purchase and sale of personal property (or purchase or sale of personal property on behalf of a related person) in a transaction described in subparagraph (1) of this paragraph if the property is manufactured, produced, constructed, grown, or extracted in the country under the laws of which the controlled foreign corporation which purchases and sells the property (or acts on behalf of a related person) is created or organized. See section 954(d)(1)(A). The principles set forth in subparagraph (4) of this paragraph with respect to the manufacture, production, or construction of personal property shall apply under this subparagraph in determining what constitutes manufacture, production, or construction of property. The application of this subparagraph may be illustrated by the following examples:

Example 1. Controlled foreign corporation A, incorporated under the laws of foreign country X, is a wholly owned subsidiary of domestic corporation M. Corporation A purchases coffee beans grown in country X from foreign corporation P, a related person, and sells the beans to M Corporation, a related person, for use in the United States. Income from the purchase and sale of the coffee beans by A Corporation is not foreign base company sales income since the beans were grown in country X.

Example 2. Controlled foreign corporation B, incorporated under the laws of foreign country X, is a wholly owned subsidiary of controlled foreign corporation C, also incorporated under the laws of country X. Corporation B purchases and imports into country X rough diamonds mined in foreign country Y; in country X it cuts, polishes, and shapes the diamonds in a process which constitutes manufacturing within the meaning of subparagraph (4) of this paragraph. Corporation B sells the finished diamonds to C Corporation, a related person, which in turn sells them for use in foreign country Z. Since for purposes of this subparagraph the finished diamonds are manufactured in country X, gross income derived by C Corporation from their sale is not foreign base company sales income.

(3) *Property sold for use, consumption, or disposition within the country in which the controlled foreign corporation is created or organized*—(i) *In general.* Foreign base company sales income does not include income derived in connection with the purchase and sale of personal property (or purchase or sale of personal property on behalf of a related person) in a transaction described in subparagraph (1) of this paragraph, *(a)* if the property is sold for use, consumption, or disposition in the country under the laws of which the controlled foreign corporation which purchases and sells the property (or sells on behalf of a related person) is created or organized or *(b),* where the property is purchased by the controlled foreign corporation on behalf of a related person, if such property is purchased for use, consumption, or disposition in the country under the laws of which such controlled foreign corporation is created or organized. See section 954(d)(1)(B).

(ii) *Rules for determining country of use, consumption, or disposition.* As a general rule, personal property which is sold to an unrelated person will be presumed for purposes of this subparagraph to have been sold for use, consumption, or disposition in the country of destination of the property sold; for such purpose, the occurrence in a country of a temporary interruption in shipment of goods shall not constitute such country the country of destination. However, if at the time of a sale of personal property to an unrelated person the controlled foreign corporation knew, or should have known from the facts and circumstances surrounding the transaction, that the property probably would not be used, consumed, or disposed of in the country of destination, the controlled foreign corporation must determine the country of ultimate use, consumption, or disposition of the property or the property will be presumed to have been used, consumed, or disposed of outside the country under the laws of which the controlled foreign corporation is created or organized. A controlled foreign corporation which sells personal property to a related person is presumed to sell such property for use, consumption, or disposition outside the country under the laws of which the controlled foreign corporation is created or organized unless such corporation establishes the use made of the property by the related person; once it has established that the related person has disposed of the property, the rules in the two preceding sentences relating to sales by a controlled foreign corporation to an unrelated person will apply at the first stage in the chain of distribution at which a sale is made by a related person to an unrelated person. Notwithstanding the preceding provisions of this subdivision, a controlled foreign corporation which sells personal property to any person all of whose business except for an insubstantial part consists of selling from inventory to retail customers at retail outlets all within one country may assume at the time of such sale to such person that such property will be used, consumed, or disposed of within such country.

(iii) *Fungible goods.* For purposes of this subparagraph, a controlled foreign corporation which sells to a purchaser personal property which because of its fungible nature cannot reasonable be specifically traced to other purchasers and to the countries of ultimate use, consumption, or disposition shall, unless such corporation establishes a different disposition as being proper, treat such property as being sold, for ultimate use, consumption, or disposition in those countries, and to those other purchasers, in the same proportions in which property from the fungible mass of the first purchaser is sold in the regular course of business by such first purchaser. No apportionment need be made, however, on the basis of sporadic sales by the first purchaser.

This subdivision shall apply only in a case where the controlled foreign corporation knew, or should have known from the facts and circumstances surrounding the transaction, the manner in which the first purchaser disposes of goods from the fungible mass.

(iv) *Illustrations.* The application of this subparagraph may be illustrated by the following examples:

Example 1. Controlled foreign corporation A, incorporated under the laws of foreign country X, and controlled foreign corporation B, incorporated under the laws of foreign country Y, are related persons. Corporation A purchases from B Corporation electric transformers produced by B Corporation in country Y and sells the transformers to D Corporation, an unrelated person, for installation in a factory building being constructed in country X. Since the personal property purchased and sold by A Corporation is to be used within the country in which A Corporation is incorporated, income of A Corporation derived from the purchase and sale of the electric transformers is not foreign base company sales income.

Example 2. Controlled foreign corporation C, incorporated under the laws of foreign country X, is a wholly owned subsidiary of domestic corporation N. Corporation C purchases from N Corporation sewing machines manufactured in the United States by N Corporation and sells the sewing machines to retail department stores, unrelated persons, located in foreign country X. The entire activities of the department stores to which C Corporation sells the machines consist of selling goods from inventory to retail customers at retail outlets in country X. Under these circumstances, at the time of sale C Corporation may assume the sewing machines will be used, consumed, or disposed of in country X, and no attempt need be made by C Corporation to determine where the sewing machines will ultimately be used by the customers of the retail department stores. Gross income of C Corporation derived from the sales to the department stores located in country X is not foreign base company sales income.

Example 3. Controlled foreign corporation D, incorporated under the laws of foreign country Y, and controlled foreign corporation E, incorporated under the laws of foreign country X, are related persons. Corporation D purchases from E Corporation sulphur extracted by E Corporation from deposits located in country X. Corporation D sells the sulphur to F Corporation, an unrelated person, for delivery to F Corporation’s storage facilities located in country Y. At the time of the sale of the sulphur from D Corporation to F Corporation, D Corporation knows that F Corporation is actively engaged in the business of selling a large amount of sulphur in country Y but also that F Corporation sells, in the normal course of its business, 25 percent of its sulphur for ultimate consumption in foreign country Z. However, D Corporation has no knowledge at the time of sale whether any portion of the particular shipment it sells to F Corporation will be resold by F Corporation for ultimate use, consumption, or disposition outside country Y. Moreover, delivery of the sulphur to F Corporation’s storage facilities constitutes more than a temporary interruption in the shipment of the sulphur. Under such circumstances, D Corporation may, but is not required to, trace the ultimate disposition by F Corporation of the personal property sold to F Corporation; however, if D Corporation does not trace the ultimate disposition and if it does not establish a different disposition as being proper, 25 percent of the sulphur sold by D Corporation to F Corporation will be treated as being sold for consumption in country Z and 25 percent of the gross income from the sale of sulphur by D Corporation to F Corporation will be treated as foreign base company sales income.

Example 4. Controlled foreign corporation G, incorporated under the laws of foreign country X, is a wholly owned subsidiary of domestic corporation P. Corporation G purchases from P Corporation toys manufactured in the United States by P Corporation and sells the toys to R, an unrelated person, for delivery to a duty-free port in country X. Instructions for the assembly and operation of the toys are printed in a language which is not commonly used in country X. From the facts and circumstances surrounding the sales to R, G Corporation knows, or should know, that the toys will probably not be used, consumed, or disposed of within country X. Therefore, unless G Corporation determines the use to be made of the toys by R, such property will be presumed to have been sold by R for use, consumption, or disposition outside of country X, and the entire gross income of G Corporation derived from the sales will be considered foreign base company sales income.

(4) *Property manufactured or produced by the controlled foreign corporation*—(i) *In general.* Foreign base company sales income does not include income of a controlled foreign corporation derived in connection with the sale of personal property manufactured, produced, or constructed by such corporation in whole or in part from personal property which it has purchased. A foreign corporation will be considered, for purposes of this subparagraph, to have manufactured, produced, or constructed personal property which it

sells if the property sold is in effect not the property which it purchased. In the case of the manufacture, production, or construction of personal property, the property sold will be considered, for purposes of this subparagraph, as not being the property which is purchased if the provisions of subdivision (ii) or (iii) of this subparagraph are satisfied. For rules of apportionment in determining foreign base company sales income derived from the sale of personal property purchased and used as a component part of property which is not manufactured, produced, or constructed, see subparagraph (5) of this paragraph.

(ii) *Substantial transformation of property.* If purchased personal property is substantially transformed prior to sale, the property sold will be treated as having been manufactured, produced, or constructed by the selling corporation. The application of this subdivision may be illustrated by the following examples:

Example 1. Controlled foreign corporation A, incorporated under the laws of foreign country X, operates a paper factory in foreign country Y. Corporation A purchases from a related person wood pulp grown in country Y. Corporation A, by a series of processes, converts the wood pulp to paper which it sells for use in foreign country Z. The transformation of wood pulp to paper constitutes the manufacture or production of property for purposes of this subparagraph.

Example 2. Controlled foreign corporation B, incorporated under the laws of foreign country X, purchases steel rods from a related person which produces the steel in foreign country Y. Corporation B operates a machining plant in country X in which it utilizes the purchased steel rods to make screws and bolts. The transformation of steel rods to screws and bolts constitutes the manufacture or production of property for purposes of this subparagraph.

Example 3. Controlled foreign corporation C, incorporated under the laws of foreign country X, purchases tuna fish from unrelated persons who own fishing boats which catch such fish on the high seas. Corporation C receives such fish in country X in the condition in which taken from the fishing boats and in such country processes, cans, and sells the fish to related person D, incorporated under the laws of foreign country Y, for consumption in foreign country Z. The transformation of such fish into canned fish constitutes the manufacture or production of property for purposes of this subparagraph.

(iii) *Manufacture of a product when purchased components constitute part of the property sold.* If purchased property is used as a component part of personal property which is sold, the sale of the property will be treated as the sale of a manufactured product, rather than the sale of component parts, if the operations conducted by the selling corporation in connection with the property purchased and sold are substantial in nature and are generally considered to constitute the manufacture, production, or construction of property. Without limiting this substantive test, which is dependent on the facts and circumstances of each case, the operations of the selling corporation in connection with the use of the purchased property as a component part of the personal property which is sold will be considered to constitute the manufacture of a product if in connection with such property conversion costs (direct labor and factory burden) of such corporation account for 20 percent or more of the total cost of goods sold. In no event, however, will packaging, repackaging, labeling, or minor assembly operations constitute the manufacture, production, or construction of property for purposes of section 954(d)(1). The application of this subdivision may be illustrated by the following examples:

Example 1. Controlled foreign corporation A, incorporated under the laws of foreign country X, sells industrial engines for use, consumption, and disposition outside country X. Corporation A, in connection with the assembly of such engines, performs machining and assembly operations. In addition, A Corporation purchases, from related and unrelated persons, components manufactured in foreign country Y. On a per unit basis, A Corporation's selling price and costs of such engines are as follows:

Selling price			$400
Cost of goods sold:			
Material—			
Acquired from related persons	$100		
Acquired from others	40		
Total material		$140	
Conversion costs (direct labor and factory burden)		70	
Total cost of goods sold		210	
Gross profit		190	
Administrative and selling expenses		50	

Taxable income		140

The conversion costs incurred by A Corporation are more than 20 percent of total costs of goods sold ($70/$210 or 33 percent). Although the product sold, an engine, is not sufficiently distinguishable from the components to constitute a substantial transformation of the purchased parts within the meaning of subdivision (ii) of this subparagraph, A Corporation will be considered under this subdivision to have manufactured the product it sells.

Example 2. Controlled foreign corporation B, incorporated under the laws of foreign country X, operates an automobile assembly plant. In connection with such activity, B Corporation purchases from related persons assembled engines, transmissions, and certain other components, all of which are manufactured outside of country X; purchases additional components from unrelated persons; conducts stamping, machining, and subassembly operations; and has a substantial investment in tools, jigs, welding equipment, and other machinery and equipment used in the assembly of an automobile. On a per unit basis, B Corporation's selling price and costs of such automobiles are as follows:

Selling price			$2,500
Cost of goods sold:			
Material—			
Acquired from related persons	$1,200		
Acquired from others	275		
Total material		$1,475	
Conversion costs (direct labor and factory burden)		25	
Total cost of goods sold			1,800
Gross profit			700
Administrative and selling expenses			300
Taxable income			400

The product sold, an automobile, is not sufficiently distinguishable from the components purchased (the engine, transmission, etc.) to constitute a substantial transformation of purchased parts within the meaning of subdivision (ii) of this subparagraph. Although conversion costs of B Corporation are less than 20 percent of total cost of goods sold ($325/$1800 or 18 percent), the operations conducted by B Corporation in connection with the property purchased and sold are substantial in nature and are generally considered to constitute the manufacture of a product. Corporation B will be considered under this subdivision to have manufactured the product it sells.

Example 3. Controlled foreign corporation C, incorporated under the laws of foreign country X, purchases from related persons radio parts manufactured in foreign country Y. Corporation C designs radio kits, packages component parts required for assembly of such kits, and sells the parts in a knocked-down condition to unrelated persons for use outside country X. These packaging operations of C Corporation do not constitute the manufacture, production, or construction of personal property for purposes of section 954(d)(1).

(5) *Rules for apportionment of income derived from the sale of purchased components used in property not manufactured, produced, or constructed.* The foreign base company sales income derived by a controlled foreign corporation for the taxable year from sales of personal property purchased and used as a component part of property which is not manufactured, produced, or constructed by such corporation within the meaning of subparagraph (4) of this paragraph shall, unless the records of the controlled foreign corporation show that a different apportionment of income is proper or unless all the income from such sales is treated as foreign base company sales income, be determined by first making for such year the following separate classifications and subclassifications with respect to the property which is sold and then by apportioning the income for such year from such sales in accordance with the rules of this subparagraph:

(i) A classification of the cost of components used in the property which is sold into two classes consisting of the cost of components manufactured, produced, constructed, grown, or extracted—

(a) Within the country under the laws of which the controlled foreign corporation is created or organized, and

(b) Outside such country;

(ii) A subclassification of the class described in subdivision (i) *(b)* of this subparagraph into—

(a) The cost of such components purchased from unrelated persons, and

(b) The cost of such components purchased from related persons;

(iii) A classification of the income derived from such sales into two classes consisting of income derived from sales for use, consumption, or disposition—

(a) Within the country under the laws of which the controlled foreign

corporation is created or organized, and

(b) Outside such country; and

(iv) A subclassification of the class described in subdivision (iii) *(b)* of this subparagraph into income from—

(a) Sales to unrelated persons, and

(b) Sales to related persons.

The foreign base company sales income for the taxable year from purchases of the property from related persons and sales to unrelated persons shall be the amount which bears to the amount described in subdivision (iv) *(a)* of this subparagraph the same ratio that the amount described in subdivision (ii) *(b)* of this subparagraph bears to the total cost of components used in the product which is sold. The foreign base company sales income for the taxable year from purchases of the property from related persons and sales to related persons is the amount which bears to the amount described in subdivision (iv) *(b)* of this subparagraph the same ratio that the amount described in subdivision (ii) *(b)* of this subparagraph bears to the total cost of components used in the product which is sold.

The foreign base company sales income for the taxable year from purchases of the property from unrelated persons and sales to related persons is the amount which bears to the amount described in subdivision (iv) *(b)* of this subparagraph the same ratio that the amount described in subdivision (ii) *(a)* of this subparagraph bears to the total cost of components used in the product which is sold. The application of this subparagraph may be illustrated by the following examples:

Example 1. Controlled foreign corporation C, which is incorporated under the laws of foreign country X, uses the calendar year as the taxable year. For 1964, C Corporation purchases radio parts of which some are manufactured in foreign country Y; and others, in country X. Some of the parts manufactured in country Y are purchased from related persons. Corporation C uses the purchased parts in radio kits which it designs and sells for assembly by its customers, unrelated persons, some of whom use the kits outside country X. Unless the records of C Corporation show that a different apportionment of income is proper, the foreign base company sales income for 1964 is determined in the following manner upon the basis of the following factual classifications for such year:

Cost of components purchased from all persons:		
Manufactured within country X		$20
Manufactured outside country X		40
Total cost		60
Cost of components manufactured outside country X:		
Purchased from unrelated persons		10
Purchased from related persons		30
Total cost		40
Gross income from sales:		
Gross receipts from sales		120
Cost of goods sold:		
Components	$60	
Direct labor and factory burden	10	70
Gross income		50
Gross income from sales:		
For use within country X		26
For use outside country X		24
Gross income		50
Foreign base company sales income from purchases from related persons and sales to unrelated persons ($24×$30/$60)		12

Example 2. The facts are the same as in example 1 except that none of the purchases are from related persons and some of the sales for use outside country X are to related persons. Unless the records of C Corporation show that a different apportionment of income is proper, the foreign base company sales income for 1964 is determined in the following manner upon the basis of the following additional factual classification for such year:

Gross income from sales for use outside country X—	
To unrelated persons	$8
To related persons	16
Total gross income	24
Foreign base company sales income from purchases from unrelated persons and sales to related persons ($16×$40/$60)	10.67

Example 3. The facts are the same as in example 1 except that some of the sales for use outside country X are to related persons as in example 2. Unless the records of C Corporation show that a different apportionment of income is proper, the foreign base company sales income for 1964 is determined in the following manner:

Foreign base company sales income from purchases from related persons and sales to unrelated persons ($8×$30/$60)	$4.00
Foreign base company sales income from purchases from related persons and sales to related persons ($16×$30/$60)	8.00

Foreign base company sales income from purchases from unrelated persons and sales to related persons ($16×$10/$60)	2.67
Total foreign base company sales income	14.67

(b) *Branches of controlled foreign corporation treated as separate corporations*—(1) *General rules for determining when to apply separate treatment*—(i) *Sales or purchase branch—(a) In general.* If a controlled foreign corporation carries on purchasing or selling activities by or through a branch or similar establishment located outside the country under the laws of which such corporation is created or organized and the use of the branch or similar establishment for such activities has substantially the same tax effect as if the branch or similar establishment were a wholly owned subsidiary corporation of such controlled foreign corporation, the branch or similar establishment and the remainder of the controlled foreign corporation will be treated as separate corporations for purposes of determining foreign base company sales income of such corporation. See section 954(d)(2).

(b) Allocation of income and comparison of effective rates of tax. The determination as to whether such use of the branch or similar establishment has the same tax effect as if it were a wholly owned subsidiary corporation of the controlled foreign corporation shall be made by allocating to such branch or similar establishment only that income derived by the branch or establishment which, when the special rules of subparagraph (2)(i) of this paragraph are applied, is described in paragraph (a) of this section (but determined without applying subparagraphs (2), (3), and (4) of such paragraph). The use of the branch or similar establishment for such activities will be considered to have substantially the same tax effect as if it were a wholly owned subsidiary corporation of the controlled foreign corporation if the income allocated to the branch or similar establishment under the immediately preceding sentence is, by statute, treaty obligation, or otherwise, taxed in the year when earned at an effective rate of tax that is less than 90 percent of, and at least 5 percentage points less than, the effective rate of tax which would apply to such income under the laws of the country in which the controlled foreign corporation is created or organized, if, under the laws of such country, the entire income of the controlled foreign corporation were considered derived by the corporation from sources within such country from doing business through a permanent establishment therein, received in such country, and allocable to such permanent establishment, and the corporation were managed and controlled in such country.

(c) Use of more than one branch. If a controlled foreign corporation carries on purchasing or selling activities by or through more than one branch or similar establishment located outside the country under the laws of which such corporation is created or organized, or by or through one or more such branches or similar establishments in a case where subdivision (ii) of this subparagraph also applies, then *(b)* of this subdivision shall be applied separately to the income derived by each such branch or similar establishment (by treating such purchasing or selling branch or similar establishment as if it were the only branch or similar establishment of the controlled foreign corporation and as if any such other branches or similar establishments were separate corporations) in determining whether the use of such branch or similar establishment has substantially the same tax effect as if such branch or similar establishment were a wholly owned subsidiary corporation of the controlled foreign corporation.

(ii) *Manufacturing branch—(a) In general.* If a controlled foreign corporation carries on manufacturing, producing, constructing, growing, or extracting activities by or through a branch or similar establishment located outside the country under the laws of which such corporation is created or organized and the use of the branch or similar establishment for such activities with respect to personal property purchased or sold by or through the remainder of the controlled foreign corporation has substantially the same tax effect as if the branch or similar establishment were a wholly owned subsidiary corporation of such controlled foreign corporation, the branch or similar establishment and the remainder of the controlled foreign corporation will be treated as separate corporations for purposes of determining foreign base company sales income of such corporation. See section 954(d)(2).

(b) Allocation of income and comparison of effective rates of tax. The determination as to whether such use of the branch or similar establishment has substantially the same tax effect as if the branch or similar establishment were a wholly owned subsidiary corporation of the controlled foreign corporation shall be made by allocating to the remainder of such controlled foreign corporation only that income derived by the remainder of such corporation, which, when the special rules of subparagraph (2)(i) of this paragraph are applied, is described in paragraph (a) of this section (but determined without applying subparagraphs (2), (3), and (4) of such paragraph). The use of the branch or similar establishment for such activities will be considered to have substantially the same tax effect as if it were a wholly owned subsidiary corporation of the controlled foreign corporation if income allocated to the remainder of the controlled foreign corporation under the immediately preceding sentence is, by statute, treaty obligation, or otherwise, taxed in the year when earned at an effective rate of tax that is less than 90 percent of, and at least 5 percentage points less than, the effective rate of tax which would apply to such income under the laws of the country in which the branch or similar establishment is located, if, under the laws of such country, the entire income of the controlled foreign corporation were considered derived by such corporation from sources within such country from doing business through a permanent establishment therein, received in such country, and allocable to such permanent establishment, and the corporation were created or organized under the laws of, and managed and controlled in, such country.

(c) Use of one or more sales or purchase branches in addition to a manufacturing branch. If, with respect to personal property manufactured, produced, constructed, grown, or extracted by or through a branch or similar establishment located outside the country under the laws of which the controlled foreign corporation is created or organized, purchasing or selling activities are carried on by or through more than one branch or similar establishment, or by or through one or more branches or similar establishments located outside such country, of such corporation, then *(b)* of this subdivision shall be applied separately to the income derived by each such purchasing or selling branch or similar establishment (by treating such purchasing or selling branch or similar establishment as though it alone were the remainder of the controlled foreign corporation) for purposes of determining whether the use of such manufacturing, producing, constructing, growing, or extracting branch or similar establishment has substantially the same tax effect as if such branch or similar establishment were a wholly owned subsidiary corporation of the controlled foreign corporation.

(2) *Special rules*—(i) *Determination of treatment as a wholly owned subsidiary corporation.* For purposes of determining under this paragraph whether the use of a branch or similar establishment which is treated as a separate corporation has substantially the same tax effect as if the branch or similar establishment were a wholly owned subsidiary corporation of a controlled foreign corporation—

(a) Treatment as separate corporations. The branch or similar establishment will be treated as a wholly owned subsidiary corporation of the controlled foreign corporation, and such branch or similar establishment will be deemed to be incorporated in the country in which it is located.

(b) Activities treated as performed on behalf of remainder of corporation. With respect to purchasing or selling activities performed by or through the branch or similar establishment, such purchasing or selling activities shall—

(1) With respect to personal property manufactured, produced, constructed, grown, or extracted by the controlled foreign corporation, or

(2) With respect to personal property (other than property described in *(1)* of this subdivision *(b)*) purchased or sold,

or purchased and sold, by the controlled foreign corporation,

be treated as performed on behalf of the controlled foreign corporation.

(c) Activities treated as performed on behalf of branch. With respect to manufacturing, producing, constructing, growing, or extracting activities performed by or through the branch or similar establishment, purchasing or selling activities performed by or through the remainder of the controlled foreign corporation with respect to the personal property manufactured, produced, constructed, grown, or extracted by or through the branch or similar establishment shall be treated as performed on behalf of the branch or similar establishment.

(d) Determination of hypothetical tax. To the extent applicable, the principles of paragraph (b)(4)(ii) of §1.954–1 shall be used in determining, under subdivision (i) of subparagraph (1) of this paragraph, the effective rate of tax which would apply to the income of the branch or similar establishment under the laws of the country in which the controlled foreign corporation is created or organized, or in determining, under subdivision (ii) of such subparagraph, the effective rate of tax which would apply to the income of the branch or similar establishment under the laws of the country in which the manufacturing, producing, constructing, growing, or extracting branch or similar establishment is located.

(e) Tax laws to be taken into account. Tax determinations shall be made by taking into account only the income, war profits, excess profits, or similar tax laws (or the absence of such laws) of the countries involved.

(ii) *Determination of foreign base company sales income.* Once it has been determined under subparagraph (1) of this paragraph that a branch or similar establishment and the remainder of the controlled foreign corporation are to be treated as separate corporations, the determination of whether such branch or similar establishment, or the remainder of the controlled foreign corporation, as the case may be, has foreign base company sales income shall be made by applying the following rules:

(a) Treatment as separate corporations. The branch or similar establishment will be treated as a wholly owned subsidiary corporation of the controlled foreign corporation, and such branch or similar establishment will be deemed to be incorporated in the country in which it is located.

(b) Activities treated as performed on behalf of remainder of corporation. With respect to purchasing or selling activities performed by or through the branch or similar establishment, such purchasing or selling activities shall—

(1) With respect to personal property manufactured, produced, constructed, grown, or extracted by the controlled foreign corporation, or

(2) With respect to personal property (other than property described in *(1)* of this subdivision *(b)*) purchased or sold, or purchased and sold, by the controlled foreign corporation,

be treated as performed on behalf of the controlled foreign corporation.

(c) Activities treated as performed on behalf of branch. With respect to manufacturing, producing, constructing, growing, or extracting activities performed by or through the branch or similar establishment, purchasing or selling activities performed by or through the remainder of the controlled foreign corporation with respect to the personal property manufactured, produced, constructed, grown, or extracted by or through the branch or similar establishment shall be treated as performed on behalf of the branch or similar establishment.

(d) Items not to be twice included in income. Income which is classified as foreign base company sales income as a result of the application of subdivision (i) of subparagraph (1) of this paragraph shall not be again classified as foreign base company sales income as a result of the application of subdivision (ii) of such subparagraph.

(e) Comparison with ordinary treatment. Income derived by the branch or similar establishment, or by the remainder of the controlled foreign corporation, shall not be considered foreign base company sales income if the income would not be so considered if it were derived by a separate controlled foreign corporation under like circumstances.

(f) Priority of application. If income derived by the branch or similar establishment, or by the remainder of the controlled foreign corporation, from a transaction would be classified as foreign base company sales income of such controlled foreign corporation under section 954(d)(1) and paragraph (a) of this section, the income shall, notwithstanding this paragraph, be treated as foreign base company sales income under paragraph (a) of this section and the branch or similar establishment shall not be treated as a separate corporation with respect to such income.

(3) *Inclusion of amounts in gross income of United States shareholders.* A branch or similar establishment of a controlled foreign corporation and the remainder of such corporation shall be treated as separate corporations under this paragraph solely for purposes of determining the foreign base company sales income of each such corporation and for purposes of including an amount in subpart F income of the controlled foreign corporation under section 953(a). See section 954(b)(3) and paragraph (d)(4) of § 1.954–1 for rules relating to the treatment of a branch or similar establishment of a controlled foreign corporation and the remainder of such corporation as separate corporations for purposes of independently determining if the foreign base company income of each such corporation is less than 10 percent, or more than 70 percent, of its gross income. For all other purposes, however, a branch or similar establishment of a controlled foreign corporation and the remainder of such corporation shall not be treated as separate corporations. For example, if the controlled foreign corporation has a deficit in earnings and profits to which section 952(c) applies, the limitation of such section on the amount includable in the subpart F income of such corporation will apply. Moreover, income, war profits, or excess profits taxes paid by a branch or similar establishment to a foreign country will be treated as having been paid by the controlled foreign corporation for purposes of section 960 (relating to special rules for foreign tax credit) and the regulations thereunder. Also, income of a branch or similar establishment, treated as a separate corporation under this paragraph, will not be treated as dividend income of the controlled foreign corporation of which it is a branch or similar establishment.

(4) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. Controlled foreign corporation A, incorporated under the laws of foreign country X, is engaged in the manufacturing business in such country. Corporation A negotiates sales of its products for use outside of country X through a sales office, branch B, maintained in foreign country Y. These activities constitute the only activities of A Corporation. Country X levies an income tax at an effective rate of 50 percent on the income of A Corporation derived by the manufacturing plant in country X but does not tax the sales income of A Corporation derived by branch B in country Y. Country Y levies an income tax at an effective rate of 10 percent on the sales income derived by branch B but does not tax the income of A Corporation derived by the manufacturing plant in country X. If the sales income derived by branch B were, under the laws of country X, derived from sources within country X by A Corporation, such income would be taxed by such country at an effective rate of 50 percent. In determining foreign base company sales income of A Corporation, branch B is treated as a separate wholly owned subsidiary corporation of A Corporation, the 10 percent rate of tax on branch B's income being less than 90 percent of, and at least 5 percentage points less than, the 50 percent rate. Income derived by branch B, treated as a separate corporation, from the sale by or through it for use, consumption, or disposition outside country Y of the personal property produced in country X is treated as income from the sale of personal property on behalf of A Corporation, a related person, and constitutes foreign base company sales income. The remainder of A Corporation, treated as a separate corporation, derives no foreign base company sales income since it produces the product which is sold.

Example 2. Controlled foreign corporation C is incorporated under the laws of foreign country X. Corporation C maintains branch B in foreign country Y. Branch B manufactures articles in country Y which are sold through the sales offices of C Corporation located in country X. These activities constitute the only activities of C Corporation. Country Y levies an income tax at an effective rate of 30 percent on the manufacturing profit of C Corporation derived by branch B but does not tax the sales income of C Corporation derived by the sales offices in country X. Country X does not impose an income, war profits, excess profits, or similar tax, and no tax is paid to any foreign country with respect to income of C Corporation which is not derived by branch B. If C Corporation were incorporated under the laws of country Y, the sales income of the sales offices in country X would be taxed by country Y at an effective rate of 30 percent. In determining foreign base company sales income of C Corporation, branch B is treated as a separate wholly owned subsidiary corporation of C Corporation, the zero rate of tax on the income derived by the remainder of C Corporation being less than 90 percent of, and at least 5 percentage points less than, the 30 percent rate. Branch B, treated as a separate corporation, derives no foreign base company sales income since it produces the product which is sold. Income derived by the remainder of C Corporation, treated as a separate corporation, from the sale by or through it for use, consumption, or disposition outside country X of the personal property produced in country Y is treated as income from the sale of personal property on behalf of branch B, a related person, and constitutes foreign base company sales income.

Example 3. Controlled foreign corporation E, incorporated under the laws of foreign country X, is a wholly owned subsidiary of controlled foreign corporation D, also incorporated under the laws of country X. Corporation E maintains branch B in foreign country Y. Both corporations use the calendar year as the taxable year. In 1964, E Corporation's sole activity, carried on through branch B, consists of the purchase of articles manufactured in country X by D Corporation, a related person, and the sale of the articles through branch B for use outside country X. The income of E Corporation derived by branch B from such transactions is taxed to E Corporation by country X only at the time E Corporation distributes such income to D Corporation and is then taxed on the basis of what the tax (a 40 percent effective rate) would have been if the income had been derived in 1964 by E Corporation from sources within country X from doing business through a permanent establishment therein. Country Y levies an income tax at an effective rate of 50 percent on income derived from sources within such country, but the income of branch B for 1964 is effectively taxed by country Y at a 5 percent rate since, under the laws of such country, only 10 percent of branch B's income is derived from sources within such country. Corporation E makes no distributions to D Corporation in 1964. In determining foreign base company sales income of E Corporation for 1964, branch B is treated as a separate wholly owned subsidiary corporation of E Corporation, the 5 percent rate of tax on branch B's income being less than 90 percent of, and at least 5 percentage points less than, the 40 percent rate. Income derived by branch B, treated as a separate corporation, from the sale by or through it for use, consumption, or disposition outside country Y of the personal property produced in country X is treated as income from the sale of personal property on behalf of E Corporation, a related person, and constitutes foreign base company sales income.

Example 4. Controlled foreign corporation F, incorporated under the laws of foreign country X, is a wholly owned subsidiary of domestic corporation M. Corporation F, through its branch B in foreign country Y, purchases from controlled foreign corporation G, a wholly owned subsidiary of M Corporation incorporated under the laws of foreign country Z, personal property which G Corporation manufactures in country Z. Corporation F sells such property for use in foreign country W. Since the income of F Corporation from such purchases and sales is classified as foreign base company sales income under section 954(d)(1) and paragraph (a) of this section, branch B will not be treated as a separate corporation with respect to such income even if the tax differential between countries X and Y would otherwise justify such treatment.

Example 5. Controlled foreign corporation A, incorporated under the laws of foreign country X, is engaged in manufacturing articles through its home office, located in country X, and selling such articles through branch B, located in foreign country Y, and through branch C, located in foreign country Z, for use outside country X. These activities constitute the only activities of A Corporation for its taxable year 1963. Each such country levies an income tax on only the income derived from sources within such country, and all income derived in 1963 by the home office, branch B, and branch C, respectively, is derived from sources within countries X, Y, and Z, respectively. The income and income taxes of A Corporation for 1963 are as follows:

	X Country	Y Country	Z Country
Income of:			
Home office	$200,000	....	....
Branch B	....	$100,000	....
Branch C	....	....	$100,000
Income tax	$100,000	$20,000	$20,000
Effective rate of tax	50%	20%	20%

By applying subparagraph (1)(i) of this paragraph and by treating branch B as though it were the only branch of A Corporation, branch B is treated as a separate wholly owned subsidiary corporation of A Corporation in determining foreign base company sales income of A Corporation for 1963, the 20 percent rate of tax on the income of such branch being less than 90 percent of, and at least 5 percentage points less than, the 50 percent rate of tax which would apply to the income of branch B under the laws of country X if, under the laws of such country, all the income of A Corporation for 1963 derived through the home office and branch B were derived from sources within country X. Moreover, by applying subparagraph (1)(i) of this paragraph and by treating branch C as though it were the only branch of A Corporation, branch C is treated as a separate wholly owned subsidiary corporation of A Corporation, the 20 percent rate of tax on the income of such branch being less than 90 percent of, and at least 5 percentage points less than, the 50 percent rate of tax which would apply to the income of branch C under the laws of country X if, under the laws of such country, all the income of A Corporation for 1963 derived through the home office and branch C were derived from sources within country X. The income derived by branch B and branch C, respectively, each treated as a separate corporation, from the sale by or through each of them for use, consumption, or disposition outside country Y and country Z, respectively, is treated as income from the sale of personal property on behalf of A Corporation, a related person, and constitutes foreign base company sales income for 1963. The home office of A Corporation, treated as a separate corporation, derives no foreign base company sales income for 1963 since it produces the articles which are sold.

Example 6. Controlled foreign corporation A, incorporated under the laws of foreign country X is engaged in manufacturing articles through branch B, located in foreign country Y, and selling such articles through branch C, located in foreign country Z, and through its home office, located in country X, for use outside country X. These activities constitute the only activities of A Corporation for its taxable year 1963. Each such country levies an income tax on only the income derived from sources within such country, and all income derived in 1963 by the home office, branch B, and branch C, respectively, is derived from sources within countries X, Y, and Z, respectively. The income and income taxes of A Corporation for 1963 are as follows:

	X Country	Y Country	Z Country
Income of:			
Home office	$100,000	....	....
Branch B	....	$200,000	....
Branch C	....	....	$100,000
Income tax	$20,000	$100,000	$20,000
Effective rate of tax	20%	50%	20%

In determining foreign base company sales income of A Corporation for 1963 neither branch B nor branch C is treated, by applying subparagraph (1)(i) of this paragraph, as a separate wholly owned subsidiary corporation of A Corporation since branch B derives no income from the purchase or sale of personal property and since, in the case of branch C treated as though it were the only branch of A Corporation, the 20 percent rate of tax on the income of branch C is not less than 90 percent of, and not as much as 5 percentage points less than, the 20 percent rate of tax which would apply to the income of branch C under the laws of country X if, under the laws of such country, all the income of A Corporation for 1963 derived through the home office and branch C were derived from sources within country X. However, by applying subparagraph (1)(ii) of this paragraph and by treating the home office in country X as though it alone were the remainder of A Corporation, branch B is treated as a separate wholly owned subsidiary corporation of A Corporation, the 20 percent rate of tax on the income of the home office being less than 90 percent of, and at least 5 percentage points less than, the 50 percent rate of tax which would apply to the income of the home office under the laws of country Y if, under the laws of such country, all the income of A Corporation for 1963 derived through the home office and branch B were derived from sources within country Y. Moreover, by applying subparagraph (1)(ii) of this paragraph and by treating branch C as though it alone were the remainder of A Corporation, branch B and branch C are treated as separate wholly owned subsidiary corporations of A Corporation, the 20 percent rate of tax on the income of branch C being less than 90 percent of, and at least 5 percentage points less than, the 50 percent rate of tax which would apply to the income of branch C under the laws of country Y if, under the laws of such country, all the income of A Corporation for 1963 derived through branch B and branch C were derived from sources within country Y. The income derived by the home office and branch C, respectively, each treated as a separate corporation, from the sale by or through each of them for use, consumption, or disposition outside country X and country Z, respectively, is treated as income from the sale of personal property on behalf of branch B, a related person, and constitutes foreign base company sales income for 1963. Branch B, treated as a separate corporation, derives no foreign base company sales income since it produces the articles which are sold.

Example 7. Controlled foreign corporation A, incorporated under the laws of foreign country X, is engaged in manufacturing articles through branch B, located in foreign country Y, and selling such articles through the home office, located in country X, and through branch C, located in foreign country Z, for use outside country X. These activities constitute the only activities of A Corporation for its taxable year 1963. Each such country levies an income tax on only the income derived from sources within such country, and all income derived in 1963 by the home office, branch B, and branch C, respectively, is derived from sources within countries X, Y, and Z, respectively. The income and income taxes of A Corporation for 1963 are as follows:

	X Country	Y Country	Z Country
Income of:			
Home office	$100,000	....	....
Branch B	....	$200,000	....
Branch C	....	....	$100,000
Income tax	$40,000	$100,000	$20,000
Effective rate of tax	40%	50%	20%

By applying subparagraph (1)(i) of this paragraph and by treating branch C as though it were the only branch of A Corporation, branch C is treated as a separate wholly owned subsidiary corporation of A Corporation in determining foreign base company sales income of A Corporation for 1963, the 20 percent rate of tax on the income of branch C being less than 90 percent of, and at least 5 percentage points less than, the 40 percent rate of tax which would apply to the income of branch C under the laws of country X if, under the laws of such country, all the income of A Corporation for 1963 derived through the home office and branch C were derived from sources within country X. In addition, by applying subparagraph (1)(ii) of this paragraph and by treating the home office in country X as though it alone were the remainder of A Corporation, branch B is treated as a separate wholly owned subsidiary corporation of A Corporation, the 40 percent rate of tax on the income of the home office being less than 90 percent of, and at least 5 percentage points less than, the 50 percent rate of tax which would apply to the income of the home office under the laws of country Y if, under the laws of such country, all the income of A Corporation for 1963 derived through the home office and branch B were derived from sources within country Y. Moreover, by applying subparagraph (1)(ii) of this paragraph and by treating branch C as though it alone were the remainder of A Corporation, branch B and branch C would again be treated as separate wholly owned subsidiary corporations of A Corporation, the 20 percent rate of tax on the income of branch C being less than 90 percent of, and at least 5 percentage points less than, the 50 percent rate of tax which would apply to the income of branch C under the laws of country Y if, under the laws of such country, all the income of A Corporation for 1963 derived through branch B and branch C were derived from sources within country Y; however, for purposes of determining foreign base company sales income of A Corporation for 1963, only the classification under subparagraph (1)(i) of this paragraph shall, by reason of the application of subparagraph (2)(ii)*(d)* of this paragraph, be applied with respect to the income derived by branch C. The income derived by the home office and branch C, respectively, each treated as a separate corporation, from the sale by or through each of them for use, consumption, or disposition outside country X and country Z, respectively, is treated as income from the sale of personal property on behalf of branch B, a related person, and constitutes foreign base company sales income for 1963. Branch B, treated as a separate corporation, derives no foreign base company sales income since it produces the articles which are sold.

(c) *Shipping income for taxable years beginning after December 31, 1975.* For taxable years beginning after December 31, 1975, foreign base company shipping income (as determined under §1.954–6) of a controlled foreign corporation shall not also be considered foreign base company sales income of that controlled foreign corporation.

[T.D. 6734, 29 FR 6392, May 15, 1964, as amended by T.D. 7545, 43 FR 32754, May 8, 1978; T.D. 7893, 48 FR 22508, May 19, 1983; T.D. 7894, 48 FR 22523, May 19, 1983]

§1.954–4 Foreign base company services income.

(a) *Items included.* Except as provided in paragraph (d) of this section, foreign base company services income means income of a controlled foreign corporation, whether in the form of compensation, commissions, fees, or otherwise, derived in connection with the performance of technical, managerial, engineering, architectural, scientific, skilled, industrial, commercial, or like services which—

(1) Are performed for, or on behalf of a related person, as defined in paragraph (e)(1) of §1.954–1, and

(2) Are performed outside the country under the laws of which the controlled foreign corporation is created or organized.

(b) *Services performed for, or on behalf of, a related person*—(1) *Specific cases.* For purposes of paragraph (a)(1) of this section, ‘‘services which are performed for, or on behalf of, a related person’’ include (but are not limited to) services performed by a controlled foreign corporation in a case where—

(i) The controlled foreign corporation is paid or reimbursed by, is released from an obligation to, or otherwise receives substantial financial benefit from, a related person for performing such services;

(ii) The controlled foreign corporation performs services (whether or not with respect to property sold by a related person) which a related person is, or has been, obligated to perform;

(iii) The controlled foreign corporation performs services with respect to property sold by a related person and the performance of such services constitutes a condition or a material term of such sale; or

(iv) Substantial assistance contributing to the performance of such services has been furnished by a related person or persons.

(2) *Special rules*—(i) *Guaranty of performance.* Subparagraph (1)(ii) of this paragraph shall not apply with respect to services performed by a controlled foreign corporation pursuant to a contract the performance of which is guaranteed by a related person, if *(a)* the related person's sole obligation with respect to the contract is to guarantee performance of such services, *(b)* the controlled foreign corporation is fully obligated to perform the services under the contract, and *(c)* the related person (or any other person related to the controlled foreign corporation) does not in fact *(1)* pay for performance of, or perform, any of such services the performance of which is so guaranteed or *(2)* pay for performance of, or perform, any significant services related to such services. If the related person (or any other person related to the controlled foreign corporation) does in fact pay for performance of, or perform, any of such services or any significant services related to such services, subparagraph (1)(ii) of this paragraph shall apply with respect to the services performed by the controlled foreign corporation pursuant to the contract the performance of which is guaranteed by the related person, even though such payment or performance is not considered to be substantial assistance for purposes of subparagraph (1)(iv) of this paragraph. For purposes of this subdivision, a related person shall be considered to guarantee performance of the services by the controlled foreign corporation whether it guarantees performance of such services by a separate contract of guaranty or enters into a service contract solely for purposes of guaranteeing performance of such services and immediately thereafter assigns the entire contract to the controlled foreign corporation for execution.

(ii) *Application of substantial assistance test.* For purposes of subparagraph (1)(iv) of this paragraph—

(a) Assistance furnished by a related person or persons to the controlled foreign corporation shall include, but shall not be limited to, direction, supervision, services, know-how, financial assistance (other than contributions to capital), and equipment, material, or supplies.

(b) Assistance furnished by a related person or persons to a controlled foreign corporation in the form of direction, supervision, services, or know-how shall not be considered substantial unless either *(1)* the assistance so furnished provides the controlled foreign corporation with skills which are a principal element in producing the income from the performance of such services by such corporation or *(2)* the cost to the controlled foreign corporation of the assistance so furnished equals 50 percent or more of the total cost to the controlled foreign corporation of performing the services performed by such corporation. The term ''cost'', as used in this subdivision *(b),* shall be determined after taking into account adjustments, if any, made under section 482.

(c) Financial assistance (other than contributions to capital), equipment, material, or supplies furnished by a related person to a controlled foreign corporation shall be considered assistance only in that amount by which the consideration actually paid by the controlled foreign corporation for the purchase or use of such item is less than the arm's length charge for such purchase or use. The total of such amounts so considered to be assistance in the case of financial assistance, equipment, material, and supplies furnished by all related persons shall be compared with the profits derived by the controlled foreign corporation from

the performance of the services to determine whether the financial assistance, equipment, material, and supplies furnished by a related person or persons are by themselves substantial assistance contributing to the performance of such services. For purposes of this subdivision *(c)*, determinations shall be made after taking into account adjustments, if any, made under section 482 and the term ''consideration actually paid'' shall include any amount which is deemed paid by the controlled foreign corporation pursuant to such an adjustment.

(d) Even though assistance furnished by a related person or persons to a controlled foreign corporation in the form of direction, supervision, services, or know-how is not considered to be substantial under *(b)* of this subdivision and assistance furnished by a related person or persons in the form of financial assistance (other than contributions to capital), equipment, material, or supplies is not considered to be substantial under *(c)* of this subdivision, such assistance may nevertheless constitute substantial assistance when taken together or in combination with other assistance furnished by a related person or persons which in itself is not considered to be substantial.

(e) Assistance furnished by a related person or persons to a controlled foreign corporation in the form of direction, supervision, services, or know-how shall not be taken into account under *(b)* or *(d)* of this subdivision unless the assistance so furnished assists the controlled foreign corporation directly in the performance of the services performed by such corporation.

(3) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. Controlled foreign corporation A is paid by related corporation M for the installation and maintenance of industrial machines which M Corporation manufactures and sells to B Corporation. Such installation and maintenance services by A Corporation are performed for, or on behalf of, M Corporation for purposes of section 954(e).

Example 2. Controlled foreign corporation B enters into a contract with an unrelated person to drill an oil well in a foreign country. Domestic corporation M owns all the outstanding stock of B Corporation. Corporation B employs a relatively small clerical and administrative staff and owns the necessary well-drilling equipment. Most of the technical and supervisory personnel who oversee the drilling of the oil well by B Corporation are regular employees of M Corporation who are temporarily employed by B Corporation. In addition, B Corporation hires on the open market unskilled and semiskilled laborers to work on the drilling project. The services performed by B Corporation under the well-drilling contract are performed for, or on behalf of, a related person for purposes of section 954(e) because the services of the technical and supervisory personnel which are provided by M Corporation are of substantial assistance in the performance of such contract in that they assist B Corporation directly in the execution of the contract and provide B Corporation with skills which are a principal element in producing the income from the performance of such contract.

Example 3. Controlled foreign corporation F enters into a contract with an unrelated person to construct a dam in a foreign country. Domestic corporation M owns all the outstanding stock of F Corporation. Corporation F leases or buys from M Corporation, on an arm's length basis, the equipment and material necessary for the construction of the dam. The technical and supervisory personnel who design and oversee the construction of the dam are regular full-time employees of F Corporation who are not on loan from any related person. The principal clerical work, and the financial accounting, required in connection with the construction of the dam by F Corporation are performed, on a remunerated basis, by full-time employees of M Corporation. All other assistance F Corporation requires in completing the construction of the dam is paid for by that corporation and furnished by unrelated persons. The services performed by F Corporation under the contract for the construction of the dam are not performed for, or on behalf of, a related person for purposes of section 954(e) because the clerical and accounting services furnished by M Corporation do not assist F Corporation directly in the performance of the contract.

Example 4. Controlled foreign corporation D, a wholly owned subsidiary of domestic corporation M, procures and enters a contract with an unrelated person to construct a superhighway in a foreign country, but such person enters the contract only on the condition that M Corporation agrees to perform, or to pay for the performance by some person other than D Corporation of, the services called for by the contract if D Corporation should fail to complete their performance. Corporation D is capable of performing such contract. No related person as to D Corporation pays for, or performs, any services called for by the contract, or pays for, or performs, any significant services related to such services. The construction of the superhighway by D Corporation is not considered for purposes of section 954(e) to be the performance of services for, or on behalf of M Corporation.

Example 5. Domestic corporation M is obligated under a contract with an unrelated person to construct a superhighway in a foreign country. At a later date M Corporation assigns the entire contract to its wholly owned subsidiary, controlled foreign corporation C, and the unrelated person releases M Corporation from any obligation under the contract. The construction of such highway by C Corporation is considered for purposes of section 954(e) to be the performance of services for, or on behalf of, M Corporation.

Example 6. Domestic corporation M enters a contract with an unrelated person to construct a superhighway in a foreign country. Corporation M immediately assigns the entire contract to its wholly owned subsidiary, controlled foreign corporation C. The unrelated person does not release M Corporation of its obligation under the contract, the sole purpose of these arrangements being to have M Corporation guarantee performance of the contract by C Corporation. Corporation C is capable of performing the construction contract. Neither M Corporation nor any other person related to C Corporation pays for, or performs, any services called for by the construction contract or at any time pays for, or performs, any significant services related to the services performed under such contract. The construction of the superhighway by C Corporation is not considered for purposes of section 954(e) to be the performance of services for, or on behalf of, M Corporation.

Example 7. The facts are the same as in example 6 except that M Corporation, preparatory to entering the construction contract, prepares plans and specifications which enable the submission of bids for the contract. Since M Corporation has performed significant services related to the services the performance of which it has guaranteed, the construction of such highway by C Corporation is considered for purposes of section 954(e) to be the performance of services for, or on behalf of, M Corporation.

Example 8. Domestic corporation M manufactures an industrial machine which requires specialized installation. Corporation M sells the machines for a basic price if the contract of sale contains no provision for installation. If, however, the customer agrees to employ controlled foreign corporation E, a wholly owned subsidiary of M Corporation, to install the machine and to pay E Corporation a specified installation charge, M Corporation sells the machine at a price which is less than the basic price. The installation services performed by E Corporation for customers of M Corporation purchasing the machine at the reduced price are considered for purposes of section 954(e) to be performed for, or on behalf of, M Corporation.

Example 9. Domestic corporation M manufactures and sells industrial machines with a warranty as to their performance conditional upon their installation and maintenance by a factory-authorized service agency. Controlled foreign corporation F, a wholly owned subsidiary of M Corporation, is the only authorized service agency. Any installation or maintenance services performed by F Corporation on such machines are considered for purposes of section 954(e) to be performed for, or on behalf of, M Corporation.

Example 10. Domestic corporation M manufactures electric office machines which it sells at a basic price without any provision for, or understanding as to, adjustment or maintenance of the machines. The machines require constant adjustment and maintenance services which M Corporation, certain wholly owned subsidiaries of M Corporation, and certain unrelated persons throughout the world are qualified to perform. From among the numerous persons qualified and available to perform adjustment and maintenance services with respect to such office machines, foreign corporation B, a customer of M Corporation, employs controlled foreign corporation G, a wholly owned subsidiary of M Corporation, to adjust and maintain the office machines which B Corporation purchases from M Corporation. The adjustment and maintenance services performed by G Corporation for B Corporation are not considered for purposes of section 954(e) to be performed for, or on behalf of, M Corporation.

(c) *Place where services are performed.* The place where services will be considered to have been performed for purposes of paragraph (a)(2) of this section will depend on the facts and circumstances of each case. As a general rule, services will be considered performed where the persons performing services for the controlled foreign corporation which derives income in connection with the performance of technical, managerial, architectural, engineering, scientific, skilled, industrial, commercial, or like services are physically located when they perform their duties in the execution of the service activity resulting in such income. Therefore, in many cases, total gross income of a controlled foreign corporation derived in connection with each service contract or arrangement performed for or on behalf of a related person must be apportioned, between income which is not foreign base company services income and that which is foreign base company services income, on a basis of employee-time spent within the foreign country under the laws of which the controlled foreign corporation is created or organized and employee-time spent without the foreign country under the laws of which such corporation is created or organized. In allocating time spent within and without the foreign country under the laws of which the controlled foreign corporation is created or organized, relative weight must also be given to the value of the various functions performed by persons in fulfillment of the service contract or arrangement. For example, clerical work will ordinarily be assigned little value, while services performed by technical, highly skilled, and managerial personnel will be assigned greater values in relation to the type of function performed by each individual.

(d) *Items excluded.* Foreign base company services income does not include—

(1) Income derived in connection with the performance of services by a controlled foreign corporation if—

(i) The services directly relate to the sale or exchange of personal property by the controlled foreign corporation,

(ii) The property sold or exchanged was manufactured, produced, grown, or extracted by such controlled foreign corporation, and

(iii) The services were performed before the sale or exchange of such property by the controlled foreign corporation;

(2) Income derived in connection with the performance of services by a controlled foreign corporation if the services directly relate to an offer or effort to sell or exchange personal property which was, or would have been, manufactured, produced, grown, or extracted by such controlled foreign corporation whether or not a sale or exchange of such property was in fact consummated; or

(3) For taxable years beginning after December 31, 1975, foreign base company shipping income (as determined under §1.954–6).

[T.D. 6734, 29 FR 6399, May 15, 1964, as amended by T.D. 6981, 33 FR 16497, Nov. 13, 1968; T.D. 7893, 48 FR 22523, May 19, 1983]

§1.954–5 Increase in qualified investments in less developed countries; taxable years of controlled foreign corporations beginning before January 1, 1976.

For rules applicable to taxable years of controlled foreign corporations beginning before January 1, 1976, see section 954(b)(1) (as in effect before the enactment of the Tax Reduction Act of 1975) and 26 CFR 1.954–5 (Revised as of April 1, 1975).

[T.D. 7893, 48 FR 22508, May 19, 1983]

§1.954–6 Foreign base company shipping income.

(a) *Scope*—(1) *In general.* This section prescribes rules for determining foreign base company shipping income under the provisions of section 954(f), as amended by the Tax Reduction Act of 1975.

(2) *Effective date.* (i) The rules prescribed in this section apply to taxable years of foreign corporations beginning after December 31, 1975, and to taxable years of United States shareholders (as defined in section 951 (b)) within which or with which such taxable years of such foreign corporations end.

(ii) Except as described in paragraph (b)(1)(viii) of this section, foreign base company shipping income does not include amounts earned by a foreign corporation in a taxable year of such corporation beginning before January 1, 1976. See example 1 of paragraph (g)(2) of this section for an illustration of the effect of this subparagraph on partnership income. See example 3 of paragraph (f)(4)(ii) of this section for an illustration of the effect of this subparagraph on certain dividend income. See paragraph (f)(5)(iii) of this section for the effect of this subparagraph on certain interest and gains.

(b) *Definitions*—(1) *Foreign base company shipping income.* The term ‘‘foreign base company shipping income’’ means—

(i) Gross income derived from, or in connection with, the use (or hiring or leasing for use) of any aircraft or vessel in foreign commerce (see paragraph (c) of this section),

(ii) Gross income derived from, or in connection with, the performance of services directly related to the use of any aircraft or vessel in foreign commerce (see paragraph (d) of this section),

(iii) Gross income incidental to income described in subdivisions (i) and (ii) of this subparagraph, as provided in paragraph (e) of this section,

(iv) Gross income derived from the sale, exchange, or other disposition of any aircraft or vessel used or held for use (by the seller or by a person related to the seller) in foreign commerce,

(v) In the case of a controlled foreign corporation, dividends, interest, and gains described in paragraph (f) of this section,

(vi) Income described in paragraph (g) of this section (relating to partnerships, trusts, etc.),

(vii) Exchange gain, to the extent allocable to foreign base company shipping income (see § 1.952–2(c)(2)(v)(*b*), and

(viii) In the case of a controlled foreign corporation and at its option, dividends, interest, and gains attributable to income derived from aircraft and vessels (as defined in 26 CFR 1.954–1(b)(2) (Revised as of April 1, 1975)) by a less developed country shipping company (described in § 1.955–5(b)) in taxable years beginning after December 31, 1962, and before January 1, 1976. The portion of a dividend, interest, or gain attributable to such income shall be determined by the same method as that for determining the portion of a dividend, interest, or gain attributable to foreign base company shipping income under paragraphs (f)(4), (5), and (6) of this section, but without regard to paragraphs (f)(6)(ii) and (iv)(B).

(2) *Foreign base company shipping operations.* For purposes of sections 951 through 964, the term ‘‘foreign base company shipping operations’’ means the trade or business from which gross income described in subparagraph (1)(i) and (ii) of this paragraph is derived.

(3) *Foreign commerce.* For purposes of sections 951 through 964—

(i) An aircraft or vessel is used in foreign commerce to the extent it is used in transportation of property or passengers—

(A) Between a port (or airport) in the United States or possession of the United States and a port (or airport) in a foreign country, or

(B) Between a port (or airport) in a foreign country and another in the same country or between a port (or airport) in a foreign country and one in another foreign country.

Thus, for example, a trawler, a factory ship, and an oil drilling ship are not considered to be used in foreign commerce. On the other hand, a cruise ship which visits one or more foreign ports is considered to be so used. Notwithstanding subdivision (i)(B) of this paragraph (b)(3), foreign base company income does not include income derived from, or in connection with, the use of an aircraft or vessel in transportation of property or passengers between a port (or airport) in a foreign country and another port (or airport) in the same country if both the foreign corporation is created or organized and the aircraft or vessel is registered in that country.

(ii) The term *vessel* includes all water craft and other artificial contrivances of whatever description and at whatever stage of construction, whether on the stocks or launched, which are used or are capable of being used or are intended to be used as a means of transportation on water. This definition does not apply for purposes of section 956(b)(2)(G) and § 1.956–2(b)(1)(ix).

(iii) The term *port* means any place (whether on or off shore) where aircraft or vessels are accustomed to load or unload goods or to take on or let off passengers.

(iv) Any vessel (such as a lighter or beacon lightship) which serves other vessels used in foreign commerce (within the meaning of subdivision (i) of this subparagraph) shall, to the extent so used, also be considered to be used in foreign commerce.

(v) For the meaning of the term ‘‘foreign country’’, see section 638(2).

(4) *Use in foreign commerce.* For purposes of sections 951 through 964, the use of an aircraft or vessel in foreign commerce includes the hiring or leasing (or subleasing) of an aircraft or vessel to another for use in foreign commerce. Thus, for example, an aircraft or vessel is ‘‘used in foreign commerce’’ within the meaning of section 955(b)(1)(A) if such aircraft or vessel is chartered (whether pursuant to a

bareboat charter, time charter, or otherwise) to another for use in foreign commerce.

(5) *Related person.* With respect to a controlled foreign corporation, the term ''related person'' means a related person as defined in §1.954–1(e)(1), and the term ''unrelated person'' means an unrelated person as defined in §1.954–1(e)(2).

(c) *Aircraft or vessel income*—(1) *In general.* The term ''income derived from, or in connection with, the use (or hiring or leasing for use) of any aircraft or vessel in foreign commerce'' as used in paragraph (b)(1)(i) of this section means—

(i) Income derived from transporting passengers or property by aircraft or vessel in foreign commerce and

(ii) Income derived from hiring or leasing an aircraft or vessel to another for use in foreign commerce.

(2) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. Foreign corporation C owns a foreign flag vessel which it charters under a long-term charter to foreign corporation D. The vessel is used by D as a tramp which has no fixed or regular schedule. The vessel carries bulk and packaged cargoes, as well as occasional passengers, under charter parties, contracts of affreightment, or other contracts of carriage. The carriage of cargoes and passengers is between a port in the United States and a port in a foreign country or between a port in one foreign country and another port in the same or a different foreign country. The charter hire paid to C by D constitutes income derived from the use of the vessel in foreign commerce, but is not foreign base company income to the extent the charter hire is allocable to income derived from the use of the vessel between ports in the same foreign country in which both C is incorporated and the vessel is registered. The charter hire and freight and passenger revenue (including demurrage and dead freight) derived by D also constitute income derived from the use of the vessel in foreign commerce, but is not foreign base company income to the extent the charter hire and freight and passenger revenue are allocable to the use of the vessel between ports in the same foreign country in which both D is incorporated and the vessel is registered.

Example 2. (a) Foreign corporation E owns a foreign flag tanker which it charters under a long-term bareboat charter to foreign corporation F for use in foreign commerce. F produces oil in a foreign country and ships the oil to other foreign countries and to the United States. The vessel, when not engaged in carrying F's oil, is used to carry bulk cargoes for unrelated persons in foreign commerce as opportunity offers. The charger hire received by E constitutes income derived from the use of the vessel in foreign commerce. The income derived by F from carrying bulk cargoes for unrelated persons also constitutes income derived from the use of the vessel in foreign commerce.

(b) F is forced to lay up the vessel as a result of adverse market developments. Pursuant to the terms of the charter, F continues to pay charter hire to E during the period of lay-up. The charter hire received by E during the period of lay-up constitutes income derived from the use of the vessel in foreign commerce.

Example 3. (a) A shipment of cheese is loaded into a container owned by controlled foreign corporation S at the consignor's place of business in Hamar, Norway. The cheese is transported to Milan, Italy, by the following routings:

(1) Overland by road from Hamar, Norway, to Gothenburg, Sweden, by unrelated motor carriers via Oslo, Norway,

(2) By sea from Gothenburg to Rotterdam, Netherlands, by feeder vessel under foreign flag, time chartered to S by unrelated owner,

(3) By sea from Rotterdam to Algeciras, Spain, by feeder vessel under foreign flag, time chartered to S by unrelated owner.

(4) By sea from Algeciras to Genoa, Italy, by line-haul vessel under U.S. flag, chartered by S from related company, and

(5) Overland from Genoa to Milan, Italy, by unrelated motor carrier.

(b) The consignor pays S total charges of $1,710, and S pays $676 to unrelated third parties, which amounts may be broken down as follows:

Description of charges	Amount billed to customer and collected by S	Revenue collected by S on behalf of an unrelated party	Costs paid to unrelated 3d party and absorbed by S
Ocean freight	$1,420	....	....
Trucking charge of empty equipment to shipper's facility	50	$50	....
Trucking charges Hamar to Oslo	60	60	....
Trucking charges Oslo to Gothenburg	....	....	$315
Trucking charges Genoa to Milan	180	180	....
Brokerage Commission in Europe	....	....	71
Total	1,710	290	386

(c) Of the $1,710 amount billed to the consignor and collected by S, $290 is collected by S on behalf of unrelated third parties. This

$290 amount is not includable in S's gross income, and is therefore not includable in S's foreign base company shipping income. The remaining $1,420 amount (i.e., $1,710 − $290) is includable in S's foreign base company shipping income. The $386 amount paid by S to unrelated third parties and absorbed by S is deductible from foreign base company shipping income under § 1.954–1(c).

(d) *Services directly related*—(1) *In general.* The term ''income derived from, or in connection with, the performance of services directly related to the use of an aircraft or vessel in foreign commerce'', as used in paragraph (b)(1)(ii) of this section, means—

(i) Income derived from, or in connection with, the performance of services described in subparagraph (2) or (3) of this paragraph, and

(ii) Income treated as foreign base company shipping income under subparagraph (4) of this paragraph.

(2) *Intragroup services.* The services described in this subparagraph are services performed for a person who is the owner, lessor, lessee or operator of an aircraft or vessel used in foreign commerce, by such person or by a person related to such person, and which fall into one or more of the following categories:

(i) Terminal services, such as dockage, wharfage, storage, lights, water, refrigeration, and similar services;

(ii) Stevedoring and other cargo handling services;

(iii) Container related services (including the rental of containers and related equipment) performed either in connection with the local drayage or inland haulage of cargo or in the course of transportation in foreign commerce;

(iv) Services performed by tugs, lighters, barges, scows, launches, floating cranes, and other similar equipment;

(v) Maintenance and repairs;

(vi) Training of pilots and crews;

(vii) Licensing of patents, know-how, and similar intangible property developed and used in the course of foreign base company shipping operations;

(viii) Services performed by a booking, operating, or managing agent; and

(ix) Any service performed in the course of the actual transportation of passengers or property.

(3) *Services for passenger, consignor, or consignee.* The services described in this subparagraph are services provided by the operator (or person related to the operator) of an aircraft or vessel in foreign commerce for the passenger, consignor, or consignee, such as—

(i) Services described in one or more of the categories set out in subparagraphs (2)(i) through (iv) and (ix) of this paragraph,

(ii) The rental of staterooms, berths, or living accommodations and the furnishing of meals,

(iii) Barber shop and other services to passengers aboard vessels,

(iv) Excess baggage, and

(v) Demurrage, dispatch, and dead freight.

(4) *The 70-percent test.* At the option of the foreign corporation all the gross income for a taxable year derived by a foreign corporation from any facility used in connection with the performance of services described in one or more of the categories set out in subparagraph (2)(i) through (ix) of this paragraph is foreign base company shipping income if more than 70 percent of such gross income for either—

(i) Such taxable year, or

(ii) Such taxable year and the two preceding taxable years,

is foreign base company shipping income (determined without regard to this subparagraph). Thus, for example, if 80 percent of the gross income derived by a controlled foreign corporation at a stevedoring facility is treated as foreign base company shipping income under subparagraph (2) of this paragraph, then the remaining 20 percent is treated as foreign base company shipping income under this subparagraph.

(5) *Rules for applying subparagraph (4).* (i) Solely for purposes of applying subparagraphs (4) of this paragraph, foreign base company shipping income and gross income shall be deemed to include an arm's length charge (see paragraph (h)(5) of this section) for services performed by the foreign corporation for itself.

(ii) In determining whether services performed by a foreign corporation are performed at a single facility or at two or more different facilities, all of the facts and circumstances involved will be taken into account. Ordinarily, all services performed by a foreign corporation within a single port area will be considered performed at a single facility.

(iii) The application of this subparagraph and subparagraph (4) of this paragraph may be illustrated by the following example in which it is assumed that the foreign corporation has chosen to apply the 70-percent test of subparagraph (4):

Example. (a) Controlled foreign corporation X uses the calendar year as the taxable year. For 1976, X is divided into two operating divisions, A and B. Division A operates a number of vessels in foreign commerce. Division B operates a terminal facility at which it performs services described in subparagraph (2)(i) of this paragraph for vessels some of which are operated by division A, some of which are operated by persons related to X, and some of which are operated by persons unrelated to X. For 1976, X includes under subparagraph (5) as foreign base company shipping income and gross income, for purposes of subparagraph (4), an arm's length charge for services performed for itself. For 1976, the gross income derived by division B is reconstructed for purposes of subparagraph (4) of this paragraph as follows, based on the facts shown in the following table:

(1) Gross income derived from persons unrelated to *X*	$20
(2) Gross income derived from persons related to *X*	10
(3) Actual gross income (line (1) plus line (2))	30
(4) Hypothetical gross income derived from division A (determined by the application of subdivision (i) of this subparagraph)	70
(5) Total reconstructed gross income (line (3) plus line (4))	100

(b) Since 80 percent of the reconstructed gross income derived by division B would be treated as foreign base company shipping income under subparagraph (2) of this paragraph, the entire $30 amount of the gross income actually derived by division B is treated as foreign base company shipping income under subparagraph (4) of this paragraph.

(6) *Arm's length charge.* For purposes of this section, the arm's length charge for services performed by a foreign corporation for itself shall be determined by applying the principles of section 482 and the regulations thereunder as if the party for whom the services are performed and the party by whom the services are performed were not the same person, but were controlled taxpayers within the meaning of §1.482–1(a)(4).

(7) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. Controlled foreign corporation A acts as a managing agent for foreign corporation B, a related person which contracts to construct and charter a foreign flag vessel for use in foreign commerce. As managing agent for B, A performs a broad range of services relating to the use of the vessel, including arranging for, and supervising of, construction and chartering of the vessel, and handling of operating services after construction is completed. The income derived by A from its management and operating services constitutes income derived in connection with the performance of services directly related to the use of the vessel in foreign commerce.

Example 2. Controlled foreign corporation C uses the calendar year as the taxable year. During 1976, C is engaged in the trade or business of acting as a steamship agent solely for unrelated persons. C's activities as steamship agent range from ''husbanding'' (i.e., arranging for fuel, supplies and port services, and attending to crew and customs matters) to the solicitation and booking of cargo at a number of foreign ports. None of C's other gross income for 1976 is foreign base company shipping income. Under these circumstances, C's gross income derived from its steamship agency does not constitute foreign base company shipping income.

(e) *Incidental income*—(1) *In general.* Foreign base company shipping income includes all incidental income derived by a foreign corporation in the course of its active conduct of foreign base company shipping operations.

(2) *Examples.* Examples of incidental income derived in the course of the active conduct of foreign base company shipping operations include—

(i) Gain from the sale, exchange or other disposition of assets which are related shipping assets within the meaning of §1.955A–2(b),

(ii) Income derived from temporary investments described in §1.955A–2(b)(2)(i) and (iii),

(iii) Interest on accounts receivable and evidences of indebtedness described in §1.955A–2(b)(2)(ii),

(iv) Income derived from granting concessions to others aboard aircraft or vessels used in foreign commerce,

(v) Income derived from stock and currency futures described in § 1.955A–2(b)(2)(vii) and (viii),

(vi) Income derived by the lessor of an aircraft or vessel used in foreign commerce from additional rentals for the use of related equipment (such as a complement of containers), and

(vii) Interest derived by the seller from a purchase money mortgage loan in respect of the sale of an aircraft or vessel described in § 1.955A–2(a)(1)(i).

(f) *Certain dividends, interest, and gain*—(1) *In general.* (i) The foreign base company shipping income of a controlled foreign corporation (referred to in subdivision (ii)(A) of this paragraph (f)(1) as ''first corporation'') includes—

(A) Dividends and interest received from foreign corporations listed in subdivision (ii) of this paragraph (f)(1), and

(B) Gain recognized from the sale, exchange, or other disposition of stock or obligations of foreign corporations listed in subdivision (ii) of this paragraph (f)(1),

but only to the extent that such dividends, interest, and gains are attributable to foreign base company shipping income of the foreign corporations listed in subdivision (ii) of this paragraph (f)(1).

(ii) The foreign corporations referred to in subdivision (i) of this paragraph (f)(1) are—

(A) Foreign corporations with respect to which the first corporation (see subdivision (i) of this paragraph (f)(1)) would be deemed under section 902(b) to pay taxes,

(B) Controlled foreign corporations which are related persons (within the meaning of section 954(d)(3)), and

(C) Less developed country shipping companies described in § 1.955–5(b).

(2) *Corporation deemed to pay taxes.* (i) For purposes of this paragraph, a controlled foreign corporation would be deemed under section 902(b) to pay taxes in respect of any other foreign corporation if such controlled foreign corporation would be deemed, for purposes of applying section 902(a) to any United States shareholder of such controlled foreign corporation, to pay taxes in respect of dividends which were received from such other foreign corporation (whether or not such other foreign corporation actually pays any taxes or dividends). Solely for purposes of this subdivision, each United States shareholder (within the meaning of section 951(b)) shall be deemed to be a domestic corporation.

(ii) The application of subdivision (i) of this subparagraph may be illustrated by the following examples:

Example 1. Domestic corporation M owns 100 percent of the one class of stock of controlled foreign corporation X, which in turn owns 40 percent of the one class of stock of foreign corporation Y. Y is not a controlled foreign corporation. For purposes of subdivision (1) of this subparagraph, X is deemed to pay taxes in respect of Y.

Example 2. The facts are the same as in example 1, except that United States shareholder A, an individual, owns 80 percent of the stock of corporation X, and United States shareholders B and C, parent and child, own the other 20 percent in equal shares. For purposes of applying this paragraph to all three United States shareholders (A, B, and C), X is deemed to pay taxes in respect of Y.

(3) *Obligation defined.* For purposes of this section, the term ''obligation'' means any bond, note, debenture, certificate, or other evidence of indebtedness, and a debt recorded in the books of account of both the creditor and the debtor. In the absence of legal, governmental, or business reasons to the contrary, the indebtedness must bear interest or be issued at a discount.

(4) *Dividends.* (i) For purposes of this paragraph and § 1.954–1(b)(2), the portion of a dividend which is attributable to foreign base company shipping income is that amount which bears the same ratio to the total dividend received as the earnings and profits out of which such dividend is paid that are attributable to foreign base company shipping income bears to the total earnings and profits out of which such dividend is paid. For purposes of this subdivision, the source of the earnings and profits out of which a distribution is made shall be determined under section 316(a), except that the source of the earnings and profits out of which a distribution is made by a controlled foreign corporation with respect to stock owned (within the meaning of section 958(a)) by a United States

shareholder of such controlled foreign corporation shall be determined under §1.959–3.

(ii) The application of this subparagraph may be illustrated by the following examples:

Example 1. Domestic corporation M owns 100 percent of the one class of stock of controlled foreign corporation X, which in turn owns 40 percent of the one class of stock of foreign corporation Y. Y, which is not (and has not been) either a controlled foreign corporation or a less developed country shipping company, makes a distribution of $100 to X. Under section 316(a), such distribution is made out of Y's earnings and profits for 1978. Sixty percent of Y's earnings and profits for 1978 are attributable to foreign base company shipping income. As a result, $60 of the $100 distribution constitutes foreign base company shipping income to X under subdivision (i) of this subparagraph.

Example 2. The facts are the same as in example 1, except that under section 316(a) $20 of the $100 dividend is paid out of Y's earnings and profits for 1979, and the other $80 is paid out of Y's earnings and profits for 1978. Thirty percent of Y's earnings and profits for 1979 are attributable to foreign base company shipping income. Since 60 percent of Y's earnings and profits for 1978 are also attributable to foreign base company shipping income, $54, i.e. (.60×$80)+(.30×$20), of the $100 distribution constitutes foreign base company shipping income to X under subdivision (i) of this subparagraph.

Example 3. The facts are the same as in example 1 except that under section 316(a) the $100 dividend is made out of Y's earnings and profits for 1972. Since under paragraph (a)(2)(ii) of this section foreign base company shipping income does not include amounts earned by a foreign corporation (not a less developed country shipping company) in a taxable year beginning before January 1, 1978, no amount of such $100 distribution constitutes foreign base company shipping income to X under subdivision (i) of this subparagraph.

Example 4. Domestic corporation N owns 100 percent of the one class of stock of controlled foreign corporation S, which in turn owns 100 percent of the one class of stock of controlled foreign corporation T. T makes a distribution of $100 to S, of which $80 is allocable under §1.959–3 to earnings and profits for 1977 which are described in §1.959–3(b)(2), and $20 is allocable to earnings and profits for 1978 which are described in §1.959–3(b)(3). The $80 amount is excluded from S's gross income under section 959(b) and therefore is not included in S's foreign base company shipping income. One hundred percent of T's earnings and profits for 1978 described in §1.959–3(b)(3) were attributable to reinvested foreign base company shipping income. As a result, the entire $20 amount is included in S's foreign base company shipping income under this paragraph. See §1.954–1(b)(2) for the rule that such $20 amount may be excluded from the foreign base company income of S.

(5) *Interest and gain.* (i) Except as provided in subdivisions (ii) and (iii) of this subparagraph, the portion of any interest paid by a foreign corporation, or gain recognized from the sale, exchange, or other disposition of stock or obligations of a foreign corporation, which is attributable to the foreign base company shipping income of such foreign corporation is that amount which bears the same ratio to such interest or gain as the foreign base company shipping income of such corporation for the period described in subparagraph (6) of this paragraph bears to its gross income for such period.

(ii) Interest which is paid by a controlled foreign corporation is attributable to such corporation's foreign base company shipping income to the same extent that such interest is allocable (under the principles of §1.954–1(c)) to its foreign base company shipping income.

(iii) If interest is paid by a foreign corporation, or if stock obligations of a foreign corporation are sold, exchanged, or otherwise disposed of, during a taxable year of such foreign corporation beginning before January 1, 1976, then no portion of such interest or gain is attributable to foreign base company shipping income.

(iv) Solely for purposes of subdivision (i) of this subparagraph, if a controlled foreign corporation (the "first corporation") owns more than 10 percent of the stock of another controlled foreign corporation (the "second corporation"), then

(A) The gross income of the first corporation for any taxable year shall be—

(*1*) Increased by its pro rata share of the gross income of the second corporation for the taxable year which ends with or within such taxable year of the first corporation, and

(*2*) Decreased by the amount of any dividends received from the second corporation; and

(B) The foreign base company shipping income of the first corporation for any taxable year shall be—

(*1*) Increased by its pro rata share of the foreign base company shipping income of the second corporation for the taxable year which ends with or within such taxable year of the first corporation, and

(*2*) Decreased by the amount of any dividends received from the second corporation which constitute foreign base company income.

(v) Solely for purposes of applying subdivision (i) of this subparagraph, the district director shall make such other adjustments to the gross income and the foreign base company shipping income of any foreign corporation as are necessary to properly determine the extent to which any interest or gain is attributable to foreign base company shipping income, including proper adjustments to reflect any transaction during the test period described in subparagraph (6) of this paragraph to which section 332, 351, 354, 355, 356, or 361 applies.

(6) *Test period.* (i) Except as provided in subdivisions (ii) and (iii) of this subparagraph the period described in this subparagraph with respect to any foreign corporation is the 3-year period ending with the close of such corporation's taxable year preceding the year during which interest was paid or stock or obligations were sold, exchanged, or otherwise disposed of, or such part of such period as such corporation was in existence.

(ii) The period described in this paragraph shall not include any part of a taxable year beginning before January 1, 1976.

(iii) If interest is paid by a foreign corporation, or if stock or obligations of a foreign corporation are sold, exchanged, or otherwise disposed of during its first taxable year, then the period described in this paragraph shall be such first taxable year.

(iv) For purposes of subdivision (iii) of this subparagraph, the first taxable year of a foreign corporation is the later of—

(A) The first taxable year of its existence, or

(B) Its first taxable year beginning after December 31, 1975.

(g) *Income from partnerships, trusts, etc.*—(1) *In general.* The foreign base company shipping income of any foreign corporation includes—

(i) Its distributive share of the gross income of any partnership, and

(ii) Any amounts includible in its gross income under section 652(a), 662(a), 671, or 691(a),

to the extent that such items would have been includible in its foreign base company shipping income had they been realized by it directly.

(2) *Illustrations.* The application of subparagraph (1) of this paragraph may be illustrated by the following examples:

Example 1. Controlled foreign corporations X and Y are equal partners in partnership P. The taxable years end on December 31 for X, June 30 for Y, and March 31 for P. In the fiscal year ending March 31, 1976, P's sole business activity is the use of a vessel in foreign commerce. P derives gross income of $200 from the use of the vessel, and incurs expenses, taxes, and other deductions of $160. Assume X's distributive share of such $200 of P's gross income is $100, all of which is includible in X's gross income. If X had realized its distributive share of $100 directly, then the amount which would have been includible in X's foreign base company shipping income under this paragraph is the portion allocable to the months of January, February, and March of 1976. Such amount, $25 (i.e., ½ × $200 × 3 months/12 months), is included in X's foreign base company shipping income for its taxable year ending December 31, 1976. Similarly, X is entitled under this paragraph to a deduction from foreign base company shipping income of $20 (i.e., ½ × $160 × 3 months/12 months). Since foreign base company shipping income does not include amounts earned by a foreign corporation (not a less developed country shipping corporation) in a taxable year beginning before January 1, 1976, Y has no foreign base company shipping income (under this paragraph or otherwise) for its taxable year beginning on July 1, 1975.

Example 2. The facts are the same as in example 1, except that P incurs expenses, taxes, and deductions of $240 in its taxable year ending on March 31, 1976. Accordingly, $25 is includible in X's foreign base company shipping income, and the amount deductible therefrom under this paragraph is $30 (i.e., ½ × $240 × 3 months/12 months).

(3) *Other income.* Except as expressly provided in subparagraph (1) of this paragraph, foreign base company shipping income does not include any amount includible in the gross income of a controlled foreign corporation

under part I of subchapter J (section 641 and following, relating to estates, trusts, and beneficiaries), and gains from the sale or other disposition of any interest in an estate or trust.

(h) *Additional rules*—(1) *Gross income.* For purposes of this section and §1.955A–2, the gross income of a foreign corporation (whether or not a controlled foreign corporation) shall be determined in accordance with the provisions of section 952 and §1.952–2. Thus, for example, section 883 (relating to exclusions from gross income of foreign corporations) is inapplicable under §1.952–2 (a)(1) and (c)(1). In addition, the gross income of a controlled foreign corporation shall be determined, with respect to a United States shareholder of such controlled foreign corporation, by excluding distributions received by such corporation which are excluded from gross income under section 959(b) with respect to such shareholder.

(2) *Earnings and profits.* For purposes of this section, the earnings and profits of a foreign corporation (whether or not a controlled foreign corporation) shall be determined in accordance with the provisions of section 964 and the regulations thereunder.

(3) *No double counting.* No item of gross income shall be counted as foreign base company shipping income under more than one provision of this section. For example, If $200 of gross income derived from the use of a lighter is treated as foreign base company shipping income under both paragraphs (b)(1)(i) and (ii) of this section, then such $200 is counted only once as foreign base company shipping income. A taxpayer may choose under which provision to include an item of income.

(4) *Losses.* (i) Generally, if a controlled foreign corporation has losses which are properly allocable to foreign base company shipping income, the extent to which such losses are deductible from such income shall be determined by treating such foreign corporation as a domestic corporation and applying the principles of section 63. See §§1.954–1(c) and 1.952–2(b). Thus for example, losses from sales or exchanges of capital assets are allowable only to the extent of gains from such sales or exchanges.

(ii) If gain from the sale, exchange, or other disposition of any stock or obligation would be treated (to any extent) as foreign base company shipping income, then loss from such sale, exchange, or other disposition is properly allocable to foreign base company shipping income (to the same extent).

(iii) In determining the extent to which any loss on the disposition of a qualified investment in foreign base company shipping operations is deductible from foreign base company shipping income, it is immaterial that such loss is taken into account under §1.955A–1(b)(1)(ii) as a reduction in the amount of the decrease in (withdrawal from) qualified investments in foreign base company shipping operations.

(5) *Hypothetical charges.* Under paragraph (d)(5)(i) of this section and §1.955A–2(a)(4)(ii)(A), gross income may be deemed to include hypothetical arm's length charges for services performed by a controlled foreign corporation for itself. Under paragraph (d)(2) of this section, certain of these hypothetical charges may be treated as foreign based company shipping income. Such hypothetical charges are deemed to be income solely for purposes of applying the ‘‘extent of use’’ tests prescribed by paragraph (d)(4) of this section and §1.955A–2(a)(4). Charges for services performed by a controlled foreign corporation for itself shall in no event be included in income for any other purposes.

[T.D. 7894, 48 FR 22523, May 19, 1983]

§1.954–7 Increase in qualified investments in foreign base company shipping operations.

(a) *Determination of investments at close of taxable year*—(1) *In general.* Under section 954(g), the increase in qualified investments in foreign base company shipping operations, for purposes of section 954(b)(2) and paragraph (b)(1) of §1.954–1, of any controlled foreign corporation for any taxable year is, except as provided in paragraph (b) of this section, the amount by which—

(i) The controlled foreign corporation's qualified investments in foreign base company shipping operations at the close of the taxable year, exceed

(ii) Its qualified investments in foreign base company shipping operations at the close of the preceding taxable year.

(2) *Preceding taxable year.* For purposes of this section, a taxable year which begins before January 1, 1976, may be a preceding taxable year.

(3) *Cross-reference.* See section 955 (b) and § 1.955A–2 for the definition of the term ''qualified investments in foreign base company shipping operations''.

(b) *Election to determine investments at close of following taxable year*—(1) *General rule.* In lieu of determining an increase in qualified investments in foreign base company shipping operations for a taxable year in the manner provided in paragraph (a) of this section, a United States shareholder of a controlled foreign corporation may make an election under section 955(b)(3) to determine the increase for the corporation's taxable year by ascertaining the amount by which—

(i) Such corporation's qualified investments in foreign base company shipping operations at the close of the taxable year immediately following such taxable year, exceed

(ii) Its qualified investments in foreign base company shipping operations at the close of the taxable year immediately preceding such following taxable year.

(2) *Election with respect to first taxable year.* Notwithstanding subparagraph (1) of this paragraph, if an election is made without consent by a United States shareholder under § 1.955A–4 (b)(1) with respect to a controlled foreign corporation, the increase in such controlled foreign corporation's qualified investments in foreign base company shipping operations for the first taxable year to which such election applies shall be the amount by which—

(i) Such corporation's qualified investments in foreign base company shipping operations at the close of the taxable year immediately following such first taxable year, exceed

(ii) Its qualified investments in foreign base company shipping operations at the close of the taxable year immediately preceding such first taxable year.

(3) *Manner of making election.* For the manner of making an election under section 955(b)(3), and for rules pertaining to the revocation of such an election, see § 1.955A–4.

(4) *Coordination with prior law.* If a United States shareholder makes an election without consent under § 1.955A–4(b)(1) with respect to a controlled foreign corporation, then such corporation's increase in qualified investments in foreign base company shipping operations for the first taxable year to which such election applies shall be determined by disregarding any change which occurs during such taxable year in the amount of such corporation's investments in stock or obligations of a less developed country shipping company described in § 1.955–5 (b) if both of the following conditions exist:

(i) Such taxable year is the first taxable year of such corporation which begins after December 31, 1975, and

(ii) Such United States shareholder has elected to determine the change in such corporation's qualified investments in less developed countries for its last taxable year beginning before January 1, 1976, under § 1.954–5(b) or § 1.955–3.

(5) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. (a) Controlled foreign corporation X is a wholly owned subsidiary of domestic corporation M. X uses the calendar year as the taxable year. The amounts of X's qualified investments in foreign base company shipping operations at the close of 1975 through 1979 are as follows:

Qualified investments at December 31, 1975 ...	$16,000
Qualified investments at December 31, 1976 ...	17,000
Qualified investments at December 31, 1977 ...	23,000
Qualified investments at December 31, 1978 ...	28,000
Qualified investments at December 31, 1979 ...	30,000

(b) Assume that M properly files without consent a timely election under § 1.955A–4(b)(1) to determine X's increase for 1976 in qualified investments in foreign base company shipping operations pursuant to this paragraph, and that the election remains in force through 1978. Then X's increases for 1976 through 1978 in qualified investments in foreign base company shipping operations are as follows:

Increase for 1976 ($23,000 minus $16,000)	$7,000
Increase for 1977 ($28,000 minus $23,000)	5,000
Increase for 1978 ($30,000 minus $28,000)	2,000

Example 2. Assume the same facts as in example 1, except that M never files an election under § 1.955A–4(b)(1). X's increases for 1976 through 1978 in qualified investments in

foreign base company shipping operations are as follows:

Increase for 1976 ($17,000 minus $16,000)	$1,000
Increase for 1977 ($23,000 minus $17,000)	6,000
Increase for 1978 ($28,000 minus $23,000)	5,000

Example 3. The facts are the same as in example 1, except that X's qualified investments in foreign base company shipping operations include an investment in less developed country shipping companies described in §1.955–5(b) of $500 on December 31, 1975, and $750 on December 31, 1976. Assume further that M has made an election under section 955(b)(3) (as in effect before the enactment of the Tax Reduction Act of 1975) with respect to X's taxable year 1975. Then X's increase in qualified investments in foreign base company shipping operations for 1976 is $6,750 (i.e., $7,000 − $250).

(c) *Illustration.* The application of this section may be illustrated by the following example:

Example. (a) Controlled foreign corporation X uses the calendar year as the taxable year. On December 31, 1975, X's qualified investments in foreign base company shipping operations (determined as provided in §1.955A–2(g)) consist of the following amounts:

Cash	$6,000
Readily marketable securities	1,000
Stock of related controlled foreign corporations	4,000
Traffic and other receivables	14,000
Marine insurance claims receivables	1,000
Foreign income tax refunds receivable	1,000
Prepaid shipping expenses and shipping inventories ashore	1,000
Vessel construction funds	0
Vessels	123,000
Vessel plans and construction in progress	3,000
Containers and chassis	0
Terminal property and equipment	2,000
Shipping office (land and building)	1,000
Vessel spare parts ashore	1,000
Performance deposits	2,000
Deferred charges	2,000
Stock of less developed country shipping company described in §1–955–5(b)	10,000
	172,000

(b) On December 31, 1976, X's qualified investments in foreign base company shipping operations (determined as provided in §1.955A–2(g)) consists of the following amounts:

Cash	$5,000
Readily marketable securities	2,000
Stock of related controlled foreign corporations	4,000
Traffic and other receivables	16,000
Foreign income tax refunds receivable	3,000
Prepaid shipping expenses and shipping inventories ashore	2,000
Vessel construction funds	1,000
Vessels	117,000
Vessel plans and construction in progress	12,000
Containers and chassis	4,000
Terminal property and equipment	2,000
Shipping office (land and building)	1,000
Vessel spare parts ashore	1,000
Performance deposits	2,000
Deferred charges	2,000
Stock of less developed country shipping company described in §1.955–5(b)	0
	174,000

(c) For 1976, X's increase in qualified investments in foreign base company shipping operations is $2,000, which amount is determined as follows:

Qualified investments at Dec. 31, 1976	$174,000
Qualified investments at Dec. 31, 1975	172,000
Increase for 1976	2,000

[T.D. 7894, 48 FR 22528, May 19, 1983]

§1.954–8 Foreign base company oil related income.

(a) *Foreign base company oil related income*—(1) *In general.* Under section 954(g), the foreign base company oil related income of a controlled foreign corporation (except as provided under paragraph (b) of this section) consists of the items of foreign oil related income ("FORI") described in section 907(c)(2) and (3), other than such income derived from a source within a foreign country in connection with—

(i) Oil or gas which was extracted from an oil or gas well located in that foreign country ("extraction exception"), or

(ii) Oil, gas, or a primary product of oil or gas which is sold by the controlled foreign corporation or a related person for use or consumption within that country or is loaded in that country on a vessel or aircraft as fuel for the vessel or aircraft ("use or consumption exception").

A taxpayer claiming the use or consumption exception must establish its applicability on the basis of facts and circumstances. For special rules for applying the extraction exception, see paragraph (c) of this section.

(2) *Source of income.* The source of foreign base company oil related income is determined generally under the principles of §§1.861–1 to 1.863–5. See §1.863–6. Thus, income from the performance of a service generally is sourced in the country where the service is performed. See §1.861–4. Underwriting income from insuring a foreign oil related activity is sourced at the location of the risk. See section 861(a)(7) and §1.953–2.

(3) *Primary product.* The term "primary product" of oil or gas has the

meaning given this term by § 1.907(c)–1(d)(5) and (6).

(4) *Vessel.* For the definition of the term ''vessel'', see § 1.954–6(b)(3)(ii).

(5) *Foreign country.* For purposes of this section, the term ''foreign country'' has the same meaning as in section 638 (relating to continental shelf areas). Thus, for example, oil or gas extracted from a sea area will be deemed to be extracted in the country which has exclusive rights of exploitation of natural resources with respect to that area if the other conditions of section 638 are met.

(6) *Country of use or consumption.* For rules for determining the country of use or consumption, see § 1.954–3(a)(3)(ii).

(7) *Insurance income.* For purposes of this section, income derived from or attributable to insurance of section 907(c)(2) activities means taxable income as defined in section 832(a) and as modified by the principles of § 1.953–4 (other than as the section is applied to life insurance).

(8) *Fuel product.* For purposes of this section, the term ''fuel product'' means oil, gas or a primary product of oil or gas.

(9) *Effective date.* The provisions of section 954(g) and this section are applicable to taxable years of foreign corporations beginning on or after January 1, 1983, and to taxable years of United States shareholders in which or with which those taxable years of foreign corporations end.

(b) *Exemption for small oil producers*—(1) *In general.* Foreign base company oil related income does not include any income of a foreign corporation which is not a large oil producer.

(2) *Large oil producer.* A corporation is a large oil producer (within the meaning of section 954(g)(2)) if the average daily production (extraction) of foreign crude oil and natural gas by the related group which includes the corporation and related persons (within the meaning of section 954(d)(3)) for the taxable year or immediately preceding taxable year is 1,000 or more barrels. The average daily production of foreign crude oil or natural gas for any taxable year (and the conversion of cubic feet of natural gas into barrels) is determined under rules similar to the rules of section 613A, except that only crude oil or natural gas from a well located outside the United States is taken into account.

(c) *Special rules for applying the extraction exception of paragraph (a)(1)(i) of this section*—(1) *Refining income described in section 907(c)(2)(A).* With regard to a controlled foreign corporation's refining income from the processing of minerals extracted (by the taxpayer or by any other person) from oil or gas wells into their primary products, as described in section 907(c)(2)(A), a pro rata method will be applied for purposes of determining the part of the refining income that qualifies for the extraction exception of paragraph (a)(1)(i) of this section. The pro rata method will be based on the proportion that the barrels of the fuel product extracted in the country of processing bears to the total barrels of the fuel product processed in that country and will apply regardless of the country of sale of the primary product.

(2) *Marketing income described in section 907(c)(2)(C).* With regard to a controlled foreign corporation's marketing income from the distribution or sale of minerals extracted from oil or gas wells or of primary products, as described in section 907(c)(2)(C), a pro rata method will be applied for purposes of determining the part of the marketing income that qualifies for the extraction exception of paragraph (a)(1)(i) of this section. When applying the pro rata method to the sale of a fuel product other than a primary product, the pro rata method will be based on the proportion that the barrels of the fuel product extracted in the country of sale bears to the total barrels of the fuel product sold in that country. When applying the pro rata method to the sale of primary products, the method will be based on the proportion that the barrels of the fuel product extracted in the country of sale bears to the total barrels of the fuel product processed. For purposes of applying the pro rata method, data of the controlled foreign corporation's related group (as defined in section 954(g)(2)(C)) will be taken into account. The pro rata method will not apply, however, if the mineral or primary

product is purchased by the controlled foreign corporation from a person not within the controlled foreign corporation's related group. In that situation, the marketing income will be presumed to qualify for the extraction exception if the country of the source of the marketing income is a net exporter of crude oil or gas, whichever is relevant. If the country of the source of the marketing income is not a net exporter of crude oil or gas, whichever is relevant, the marketing income will be presumed not to qualify for the extraction exception. The controlled foreign corporation may, however, rebut this latter presumption by demonstrating on the basis of all the facts and circumstances that its marketing income does qualify for the extraction exception. If a primary product that is acquired from a person within the controlled foreign corporation's related group is commingled with like products acquired from persons not within that related group, the pro rata method based on the proportion that the barrels of the fuel product extracted in the country of sale bears to the total barrels of the fuel product processed will be applied to that portion of the total products sold that was purchased from persons within the related group, to the extent that that person did not sell product purchased from an unrelated person, and either the presumption or facts and circumstances will determine the characterization of the remainder.

(3) *Transportation income described in section 907(c)(2)(B).* With regard to a controlled foreign corporation's income from the transportation of minerals from oil and gas wells or of primary products, as described in section 907(c)(2)(B), the rules set forth in paragraph (c)(2) of this section will apply for purposes of determining the part of the transportation income that qualifies for the extraction exception of paragraph (a)(1)(i) of this section.

(4) *Illustrations.* The following examples illustrate the application of this paragraph.

Example 1. Controlled foreign corporation M has a refinery in foreign country A that refines 250x barrels of oil during its taxable year beginning in 1984. It is determined that 125x barrels of its 250x barrels were extracted in country A. M sold 150x barrels of its 250x barrels in country A for consumption in country A which resulted in $225x of income from refining and $225x of marketing income, as described in section 907(c)(2)(C). M also sold within foreign country B, for consumption in country B, 100x barrels of its 250x barrels which resulted in an additional $150x of income from refining for M and $170x of marketing income for M. The 100x barrels sold by M within country B, a contiguous country, were transported from M's refinery in country A to country B by a pipeline which is owned by M, and M recognized a total of $10x of income from the transportation of the 100x barrels. Of this $10x, $8x was recognized in country A and $2x was recognized in country B. Under the source of income rules of paragraph (a)(2) of this section, income from refining is considered derived from the country in which the refining occurs and not from the country where the sale of the refined product occurs.

(i) *M's refining income.* M has $75x of foreign base company oil related income with respect to its refining of the 250x barrels, determined as follows:

(A) Total amount of income from refining attributable to oil refined in country A by M	$375x
(B) Amount of income from refining with respect to oil sold for consumption ($225x) in country A (use or consumption exception under paragraph (a)(1)(ii) of this section	(225x)
(C) Pro rate amount of income from refining attributable to sales in country B considered extracted from country A ($150x times 125x barrels/250x barrels) (extraction exception under paragraph (a)(1)(i) of this section	*(75x)*
(D) Foreign base company oil related income	*$75x*

(ii) *M's marketing income.* M does not have foreign base company oil related income with respect to its sale of the 100x barrels in country B and 150x barrels in country A because the $170x and $225x, respectively, of marketing income was derived from the country in which the oil was sold for consumption (an exception under paragraph (a)(1)(ii) of this section).

(iii) *M's transportation income.* M does not have foreign base company oil related income with respect to its $2x of pipeline transportation income recognized in country B because the income was derived from the country in which the 100x barrels were sold for consumption, an exception under paragraph (a)(1)(ii) of this section. With regard to the $8x of pipeline transportation income recognized in country A, however, M has $4x of foreign base company oil related income since of the total barrels refined in country A (250x) only one-half were extracted in that country. Therefore, only one-half of the transportation income qualifies for the extraction exception of paragraph (a)(1)(i) of this section.

(iv) *M's extraction income.* M does not have foreign base company oil related income for its extraction activity because extraction income is excluded in all events. See section 954(g)(1)(A).

Example 2. Assume the same facts as in *Example 1* except that M sold all of the 250x barrels of refined oil in country A. In addition, assume that country A is a net exporter of crude oil. As in *Example 1,* M sold 150x barrels for consumption in country A with the same resulting income. M sold in country A the remaining 100x barrels to unrelated controlled foreign corporation N which resulted in an additional $150x of income from refining for M and $170x of marketing income for M. N immediately resold in country A for export those 100x barrels. N did not commingle the 100x barrels with any other refined oil. N earned $10x of marketing income on that sale.

(i) *M's refining income.* M has $75x foreign base company oil related income with respect to its refining of the 250x barrels determined as follows:

(A) Total amount of income from refining attributable to oil refined in country A by M	$375x
(B) Amount of income from refining with respect to oil sold for consumption ($225x) in country A (use or consumption exception under paragraph (a)(1)(ii) of this section)	(225x)
(C) Pro rata amount of income from refining attributable to sales in country A (for consumption outside of country A) considered extracted from country A ($150x times 125x barrels/250x barrels) (extraction exception under paragraph (a)(1)(i) of this section)	*(75x)*
(D) Foreign base company oil related income	*$75x*

(ii) *M's marketing income.* M does not have foreign base company oil related income with respect to its marketing income from the sale of the 150x barrels in country A because the $225x of marketing income was derived from the country in which the oil was sold for consumption (an exception under paragraph (a)(1)(ii) of this section). M has $85x of foreign base company oil related income with respect to its marketing income from sale to N of the 100x barrels, determined as follows:

(A) Total amount of marketing income from the sale	$170x
(B) Pro rata amount of marketing income attributable to oil product considered extracted in country A ($170x times 125x barrels/250x barrels) (extraction exception under paragraph (a)(1)(i) of this section)	(85x)
(C) Foreign base company oil related income	*$85x*

(iii) *N's marketing income.* N is not related to M. Therefore, since N sold the 100x barrels in country A, a net exporter of crude oil, and since N did not commingle the 100x barrels with other refined products, it is presumed that all of the 100x barrels were extracted in country A. Accordingly, all of N's $10x of marketing income is excepted under paragraph (a)(1)(i) of this section.

Example 3. Assume the same facts as in *Example 2* except that N is related to M. Characterization of M's income remains the same as in *Example 2.* N will have, however, $5x of foreign base company oil related income with regard to its marketing income, determined as follows:

(i) Total amount of marketing income from the sale	$10x
(ii) Pro rata amount of marketing income considered extracted from country A ($10x times 125x barrels/250x barrels) (extraction exception under paragraph (a)(1)(i) of this section)	*5x*
(iii) Foreign base company oil related income	*$5x*

Example 4. Assume that controlled foreign corporation M has a refinery in foreign country A that refines 200x barrels of oil during its taxable year beginning in 1984. It is determined that 100x barrels of that oil were extracted in country A and that the other 100x barrels were extracted in country B. Neither country A nor country B is a net exporter of crude oil. In addition, M purchased from an unrelated country A refiner 100x barrels of already refined oil. M does not know where this oil was extracted. These 100x barrels of purchased refined oil were commingled with the 200x barrels of refined oil from M's refinery. M sold 225x barrels of refined oil in country A for consumption in country A which resulted in $250x of income from refining and $225x of marketing income. M sold within foreign country B for consumption outside of country B 75x barrels of refined oil which resulted in $100x of income from refining and $75x of marketing income. The refined product was transported between country A and country B by an unrelated person.

(i) *M's refining income.* With regard to the sales in country A, M has $50x of foreign base company oil related income with respect to its refining of the 100x barrels, determined as follows:

(A) Total amount of income from refining attributable to oil refined in country A by M	$350x
(B) Amount of income from refining with respect to oil sold for consumption in country A ($250x) (use or consumption exception under paragraph (a)(1)(ii) of this section)	

(250x)

(C) Pro rata amount of income from refining attributable to sales in country B considered extracted from country A ($100x times 100x barrels/200x barrels) (extraction exception under paragraph (a)(1)(i) of this section) *(50x)*

(D) Foreign base company oil related income *$50x*

(ii) *M's marketing income.* Since the barrels from M's refinery and those that M purchased were commingled, a portion, as follows, of the marketing income is deemed to derive from both purchased and refined products. Since M refined 200x barrels and purchased 100x barrels, its marketing income of $225x from the sale of the 225x barrels in country A for consumption in country A will be deemed to consist of $150x (200x/300x × $225x) from the sale of products refined by M and $75x (100x/300x × $225x) from the sale of purchased products. Likewise, its marketing income of $75x from the sale of the 75x barrels in country B for consumption outside of country B will be deemed to consist of $50x (200x/300x × $75x) from the sale of products refined by M and $25x (100x/300x × $75x) from the sale of purchased products.

(A) *Purchased products.* M is considered as having $75x of marketing income from the sale of purchased products in country A for consumption in country A. None of this marketing income is foreign base company oil related income since the marketing income is earned in country A, the country of consumption. See paragraph (a)(1)(ii) of this section. All of the $25x of M's marketing income from the sale of purchased products in country B will be foreign base company oil related income. The exception at paragraph (a)(1)(ii) of this section does not apply since the refined oil is not sold for use or consumption in country B. Likewise, the extraction exception under paragraph (a)(1)(i) of this section does not apply. The purchased product cannot be presumed to be extracted in country B since country B is not a net exporter of crude oil. In addition, M cannot show, on a facts and circumstances basis, that purchased products were refined from crude oil extracted in country B.

(B) *Products refined by M.* With regard to M's marketing income attributable to the sale of products refined by M, M does not have any foreign base company oil related income with regard to its $150x of marketing income in country A since that income was derived from the country in which the oil was sold for consumption (the use or consumption exception under paragraph (a)(1)(ii) of this section). M has $25x of foreign base company oil related income with regard to its $50x of marketing income in country B determined as follows:

(*1*) Total amount of income from marketing attributable to oil refined by M and sold in country B $50x

(*2*) Pro rata amount of income from marketing attributable to sales in country B considered extracted from country B ($50x times 100x barrels/200x barrels) (extraction exception under paragraph (a)(1)(i) of this section) *(25x)*

(*3*) Foreign base company oil related income *$25x*

[T.D. 8331, 56 FR 2847, Jan. 25, 1991; 56 FR 11511, Mar. 19, 1991]

§1.954–9T Hybrid branches (temporary).

(a) *Subpart F income arising from certain payments involving hybrid branches*—(1) *Payment causing foreign tax reduction gives rise to additional subpart F income.* The non-subpart F income of the controlled foreign corporation will be recharacterized as subpart F income, to the extent provided in paragraph (a)(5) of this section, if—

(i) A hybrid branch payment, as defined in paragraph (a)(6) of this section, is made between the entities described in paragraph (a)(2) of this section;

(ii) The hybrid branch payment reduces foreign tax, as determined under paragraph (a)(3) of this section; and

(iii) The hybrid branch payment is treated as falling within a category of foreign personal holding company income under the rules of paragraph (a)(4) of this section.

(2) *Hybrid branch payment between certain entities*—(i) *In general.* Paragraph (a)(1) of this section shall apply to hybrid branch payments between—

(A) A controlled foreign corporation and its hybrid branch;

(B) Hybrid branches of a controlled foreign corporation;

(C) A partnership in which a controlled foreign corporation is a partner (either directly or through one or more branches or other partnerships) and a hybrid branch of the partnership; or

(D) Hybrid branches of a partnership in which a controlled foreign corporation is a partner (either directly or through one or more branches or other partnerships).

(ii) *Hybrid branch payment involving partnership*—(A) *Fiscally transparent partnership.* To the extent of the controlled foreign corporation's proportionate share of a hybrid branch payment, the rules of paragraphs (a)(3), (4) and (5) of this section shall be applied by treating the hybrid branch payment between the partnership and the hybrid branch as if it were made directly between the controlled foreign corporation and the hybrid branch, or as if the hybrid branches of the partnership were hybrid branches of the controlled foreign corporation, if the hybrid branch payment is made between—

(*1*) A fiscally transparent partnership in which a controlled foreign corporation is a partner (either directly or through one or more branches or other fiscally transparent partnerships) and the partnership's hybrid branch; or

(*2*) Hybrid branches of a fiscally transparent partnership in which a controlled foreign corporation is a partner (either directly or through one or more branches or other fiscally transparent partnerships).

(B) *Non-fiscally transparent partnership.* To the extent of the controlled foreign corporation's proportionate share of a hybrid branch payment, the rules of paragraphs (a)(3) and (4) and (a)(5)(iv) of this section shall be applied to the non-fiscally transparent partnership as if it were the controlled foreign corporation, if the hybrid branch payment is made between—

(*1*) A non-fiscally transparent partnership in which a controlled foreign corporation is a partner (either directly or through one or more branches or other partnerships) and the partnership's hybrid branch; or

(*2*) Hybrid branches of a non-fiscally transparent partnership in which a controlled foreign corporation is a partner (either directly or through one or more branches or other partnerships).

(C) *Examples.* The following examples illustrate the application of this paragraph (a)(2)(ii).

Example 1. CFC, a controlled foreign corporation in Country A, is a 90 percent partner in partnership P, which is treated as fiscally transparent under the laws of Country A. P has a hybrid branch, BR, in Country B. P makes an interest payment of $100 to BR. Under Country A law, CFC's 90 percent share of the payment reduces CFC's Country A income tax. Under paragraph (a)(2)(ii)(A) of this section, the recharacterization rules of this section are applied by treating the payment as if made by CFC to BR. Ninety dollars of CFC's non-subpart F income, to the extent available, and subject to the earnings and profits and tax rate limitations of § 1.954–9T(a)(5), is recharacterized as subpart F income.

Example 2. CFC, a controlled foreign corporation in Country A, is a 90 percent partner in partnership P, which is treated as fiscally transparent under the laws of Country A. P has two branches in Country B, BR1 and BR2. BR1 is treated as fiscally transparent under the laws of Country A. BR2 is a hybrid branch. BR1 makes an interest payment of $100 to BR2. Under paragraph (a)(2)(ii)(A) of this section, the payment by BR1, the fiscally transparent branch, is treated as a payment by P, and the deemed payment by P, a fiscally transparent partnership, is treated as made by CFC. Under Country A law, CFC's 90 percent share of BR1's payment reduces CFC's Country A income tax. Ninety dollars of CFC's non-subpart F income, to the extent available, and subject to the earnings and profits and tax rate limitations of § 1.954–9T(a)(5), is recharacterized as subpart F income.

(3) *Application when payment reduces foreign tax.* For purposes of paragraph (a)(1) of this section, a hybrid branch payment reduces foreign tax when the foreign tax imposed on the income of the payor or any owner of the payor is less than the foreign tax that would have been imposed on such income had the hybrid branch payment not been made, or the hybrid branch payment creates or increases a loss or deficit or other tax attribute which may be carried back or forward to reduce the foreign income tax of the payor or any owner in another year (determined by taking into account any refund of such tax made to the payor, payee or any other person).

(4) *Hybrid branch payment that is included within a category of foreign personal holding company income*—(i) *In general.* For purposes of paragraph (a)(1) of this section, whether the hybrid branch payment is treated as income included within a category of foreign personal holding company income is determined by treating a hybrid branch that is either the payor or recipient of the hybrid branch payment as a separate wholly-owned subsidiary corporation of the controlled foreign corporation that is incorporated in the jurisdiction under the laws of which such hybrid branch is created, organized for foreign law purposes, or has substantial assets. Thus, the hybrid

branch payment will be treated as included within a category of foreign personal holding company income if, taking into account any specific exceptions for that category, the payment would be included within a category of foreign personal holding company income if the branch or branches were treated as separately incorporated for U.S. tax purposes.

(ii) *Extent to which controlled foreign corporation and hybrid branches treated as separate entities.* For purposes other than the determination under paragraph (a)(4)(i) of this section, a controlled foreign corporation and its hybrid branch, a partnership and its hybrid branch, or hybrid branches shall not be treated as separate entities. Thus, for example, if a controlled foreign corporation, including all of its hybrid branches, has an overall deficit in earnings and profits to which section 952(c) applies, the limitation of such section on the amount includible in the subpart F income of such corporation will apply. Similarly, for purposes of applying the de minimis and full inclusion rules of section 954(b)(3), a controlled foreign corporation and its hybrid branch, or hybrid branches shall not be treated as separate corporations. Further, a hybrid branch payment that would reduce foreign personal holding company income under section 954(b)(5) if made between two separate entities will not create an expense if made between a controlled foreign corporation and its hybrid branch, a partnership and its hybrid branch, or hybrid branches.

(5) *Recharacterization of income attributable to current earnings and profits as subpart F income*—(i) *General rule.* Non-subpart F income of a controlled foreign corporation in an amount equal to the excess of earnings and profits of the controlled foreign corporation for the taxable year over subpart F income, as defined in section 952(a), will be recharacterized as subpart F income under paragraph (a)(1) of this section only to the extent provided under paragraphs (a)(5)(ii) through (vi) of this section.

(ii) *Subpart F income.* For purposes of determining the excess of current earnings and profits over subpart F income under paragraph (a)(1) of this section, the amount of subpart F income is determined before the application of the rules of this section but after the application of the rules of sections 952(c) and 954(b). Further, such amount is determined by treating the controlled foreign corporation and all of its hybrid branches as a single corporation.

(iii) *Recharacterization limited to gross amount of hybrid branch payment*—(A) *In general.* The amount recharacterized as subpart F income under paragraph (a)(1) of this section is limited to the amount of the hybrid branch payment.

(B) *Exception for duplicative payments.* [Reserved].

(iv) *Tax disparity rule*—(A) *In general.* Paragraph (a)(1) of this section will apply only if the hybrid branch payment falls within the tax disparity rule. The hybrid branch payment falls within the tax disparity rule if it is taxed in the year when earned at an effective rate of tax that is less than 90 percent of, and at least 5 percentage points less than, the hypothetical effective rate of tax imposed on the hybrid branch payment, as determined under paragraph (a)(5)(iv)(B) of this section.

(B) *Hypothetical effective rate of tax*—(*1*) *In general.* The hypothetical effective rate of tax imposed on the hybrid branch payment is—

(*i*) For the taxable year of the payor in which the hybrid branch payment is made, the amount of income taxes that would have been paid or accrued by the payor if the hybrid branch payment had not been made, less the amount of income taxes paid or accrued by the payor; divided by

(*ii*) The amount of the hybrid branch payment.

(*2*) *Hypothetical effective rate of tax when hybrid branch payment causes or increases loss or deficit.* If the hybrid branch payment causes or increases a loss or deficit of the payor for foreign tax purposes, and such loss or deficit can be carried forward or back, the hypothetical effective rate of tax imposed on the hybrid branch payment is the effective rate of tax that would be imposed on the taxable income of the payor for the year in which the foreign law payment is made if the payor's taxable income were equal to the amount of the hybrid branch payment.

(C) *Examples.* The application of this paragraph (a)(5)(iv) is illustrated by the following examples.

Example 1. In 1998, CFC organized in Country A had net income of $60 from manufacturing for Country A tax purposes. It also had a branch (BR) in Country B. BR is a hybrid entity under paragraph (a)(1) of this section. CFC made a payment of $40 to BR, which was a hybrid branch payment under paragraph (a)(6) of this section, and was treated by CFC as a deductible payment for Country A tax purposes. CFC paid $30 of Country A taxes in 1998. It would have paid $50 of Country A taxes without the deductible payment. Country A did not impose any withholding tax on the $40 payment to BR. Country B also did not impose a tax on the $40 received by BR. Therefore, the effective rate of tax on that payment is 0%. Furthermore, the hypothetical effective rate of tax on the $40 hybrid branch payment is 50% ($50 – $30/$40). The effective rate of tax (0%) is less than 90% of, and more than 5 percentage points less than, this hypothetical rate of tax of 50%. As a result, the $40 hybrid branch payment falls within the tax disparity rule of this paragraph (a)(5)(iv).

Example 2. Assume the same facts as in *Example 1,* except that CFC has a loss of $100 for the year for Country A tax purposes. Under Country A law, CFC can carry the loss forward for use in subsequent years. CFC paid no Country A taxes in 1998. The rate of tax in Country A is graduated from 20% to 50%. If the $40 hybrid branch payment were the only item of taxable income of CFC, Country A would have imposed tax at an effective rate of 30%. The effective rate of tax (0%) is less than 90 percent of, and more than 5 percentage points less than, the hypothetical effective rate of tax (30%) imposed on the hybrid branch payment. As a result, the $40 hybrid branch payment falls within the tax disparity rule of this paragraph (a)(5)(iv).

Example 3. Assume the same facts as in *Example 1,* except that Country B imposes tax on the $40 hybrid payment to BR at an effective rate of 50%. The effective rate of 50% is equal to the hypothetical effective rate of tax. As a result, the hybrid branch payment does not fall within the tax disparity rule of this paragraph (a)(5)(iv) and, thus, the recharacterization rules of paragraph (a)(1) of this section do not apply. See also the special high tax exception of paragraph (a)(5)(v) of this section.

(v) *Special high tax exception*—(A) *In general.* Paragraph (a)(1) of this section shall not apply if the non-subpart F income recharacterized as subpart F income under this section was subject to foreign income taxes imposed by a foreign country or countries at an effective rate that is greater than 90 percent of the maximum rate of tax specified in section 11 for the taxable year of the controlled foreign corporation.

(B) *Effective rate of tax.* The effective rate of tax imposed on the net amount of the hybrid branch payment is determined under the principles of § 1.954–1(d)(2) and (3). See paragraph (c) of this section for the application of section 960 to amounts recharacterized as subpart F income under this section.

(vi) *No carryback or carryforward of amounts in excess of current year earnings and profits limitation.* To the extent that some or all of the amount required to be recharacterized under this section is not recharacterized as subpart F income because the hybrid branch payment exceeds the amount that can be recharacterized, as determined under paragraph (a)(5)(i) of this section, this excess shall not be carried back or forward to another year.

(6) *Definitions.* For purposes of this section—

Entity means any person that is treated by the United States or any jurisdiction as other than an individual.

Hybrid branch means an entity that—

(i) Has a single owner (including ownership through branches) that is either a controlled foreign corporation or a partnership in which a controlled foreign corporation is a partner (either directly or indirectly through one or more branches or partnerships);

(ii) Is treated as fiscally transparent by the United States; and

(iii) Is treated as non-fiscally transparent by the country in which the payor entity, any owner of a fiscally-transparent payor entity, the controlled foreign corporation, or any intermediary partnership is created, organized or has substantial assets.

Hybrid branch payment means the gross amount of any payment (including any accrual) which, under the tax laws of any foreign jurisdiction to which the payor is subject, is regarded as a payment between two separate entities but which, under U.S. income tax principles, is not income to the recipient because it is between two parts of a single entity.

(7) *Fiscally transparent and non-fiscally transparent.* For purposes of this section an entity shall be treated as

fiscally transparent with respect to an interest holder of the entity, if such interest holder is required, under the laws of any jurisdiction to which it is subject, to take into account separately, on a current basis, such interest holder's share of all items which, if separately taken into account by such interest holder, would result in an income tax liability for the interest holder in such jurisdiction different from that which would result if the interest holder did not take the share of such items into account separately. A non-fiscally transparent entity is an entity that is not fiscally transparent under this paragraph (a)(7).

(b) *Election to change classification*—(1) *In general.* If a hybrid branch subject to the provisions of paragraph (a) of this section is an entity that has made an election under §301.7701–3(c)(1) of this chapter to be disregarded as an entity separate from its owner, such entity may elect to change its classification to that of an association taxable as a corporation, under the procedures described in §301.7701–3(c) of this chapter, without regard to the limitation of §301.7701–3T(c)(1)(iv) of this chapter, but only if such election is made on or before the last day of the first taxable year beginning on or after January 1, 1998. An election made pursuant to this paragraph (b)(1) is effective as of the first day of such taxable year. The 75 day limitation on retroactivity in §301.7701–3(c)(1)(iii) of this chapter does not apply.

(2) *Limitation.* An entity can elect to change its classification under the provisions of this paragraph only one time.

(c) *Application of section 960*—For purposes of determining the amount of taxes deemed paid under section 960, the amount of non-subpart F income recharacterized as subpart F income under this section shall be treated as attributable to income in separate categories, as defined in §1.904–5(a)(1), in proportion to the ratio of non-subpart F income in each such category to the total amount of non-subpart F income of the controlled foreign corporation for the taxable year.

(d) *Effective dates*—(1) *Hybrid branches of controlled foreign corporations.* With respect to hybrid branch payments described in paragraph (a)(2)(i)(A) and (B) of this section, the rules of this section shall apply to all amounts paid or accrued on or after January 16, 1998, except for amounts paid or accrued pursuant to arrangements entered into before January 16, 1998, and not substantially modified (including, for example, by expansion of the arrangement (whether by exercise of an option or otherwise) such as by an increase in the amount of or term of any borrowing, leasing or licensing constituting the arrangement, changes in direct or indirect control of any entity that is a party to the arrangement, or any similar measure which materially increases the tax benefit of the arrangement) on or after January 16, 1998.

(2) *Hybrid branches of partnerships in which controlled foreign corporations are partners.* With respect to hybrid branch payments described in paragraph (a)(2)(i)(C) and (D) of this section, the rules of this section shall apply to all amounts paid or accrued on or after March 23, 1998, except for amounts paid or accrued pursuant to arrangements entered into before March 23, 1998 and not substantially modified (including, for example, by expansion of the arrangement (whether by exercise of an option or otherwise) such as by an increase in the amount of or term of any borrowing, leasing or licensing constituting the arrangement, changes in direct or indirect control of any entity that is a party to the arrangement, or any similar measure which materially increases the tax benefit of the arrangement) on or after March 23, 1998.

[T.D. 8767, 63 FR 14617, Mar. 26, 1998]

§1.955–0 Effective dates.

(a) *Section 955 as in effect before the enactment of the Tax Reduction Act of 1975*—(1) *In general.* In general, §§1.955–1 through 1.955–6 are applicable with respect to withdrawals of previously excluded subpart F income from qualified investment in less developed countries for taxable years of foreign corporations beginning after December 31, 1962, and to taxable years of United States shareholders (as defined in section 951(b)) within which or with which such taxable years of such foreign corporations end. However, such sections are effective with respect to withdrawals of amounts invested in less developed country shipping companies described in section 955(c)(2) (as in effect before the enactment of the Tax Reduction Act of 1975) only for taxable years of foreign corporations beginning before January 1, 1976, and for taxable years of United States shareholders (as defined in section 951(b)) within which or with which such taxable years of such foreign corporations end. For rules applicable to withdrawals of amounts invested in less developed country shipping companies described in section 955(c)(2) (as in effect before such enactment), in taxable years of foreign corporations beginning after December 31, 1975, see section 955(b)(5) (as amended by such Act) and §§1.955A–1 through 1.955A–4.

(2) *References.* Except as otherwise provided therein, all references contained in §§1.955–1 through 1.955–6 to section 954 or 955 or to the regulations under section 954 are to those sections and regulations as in effect before the enactment of the Tax Reduction Act of 1975. For regulations under section 954 (as in effect before such enactment), see 26 CFR §1.954–1 through 1.954–5 (Revised as of April 1, 1975). For taxable years of foreign corporations beginning after December 31, 1975, and for taxable years of United States shareholders (as described in section 951(b)) within which or with which such taxable years of such foreign corporations end, the definitions of less developed countries and less developed country corporations contained in section 902(d) (as amended by such Act) and §1.902–2 apply for purposes of determining the credit for corporate stockholders in foreign corporations under section 902.

(b) *Section 955 as amended by the Tax Reduction Act of 1975.* Except as otherwise provided therein, §§1.955A–1 through 1.955A–4 are applicable to taxable years of foreign corporations beginning after December 31, 1975, and to taxable years of United States shareholders (as defined in section 951(b)) within which or with which such taxable years of such foreign corporations end.

[T.D. 7893, 48 FR 22508, May 19, 1983, as amended by T.D. 7894, 48 FR 22529, May 19, 1983]

§1.955–1 Shareholder's pro rata share of amount of previously excluded subpart F income withdrawn from investment in less developed countries.

(a) *In general.* Pursuant to section 951(a)(1)(A)(ii) and the regulations thereunder, a United States shareholder of a controlled foreign corporation must include in its gross income its pro rata share (as determined in accordance with paragraph (c) of this section) of the amount of such controlled foreign corporation's previously excluded subpart F income which is withdrawn for any taxable year from investment in less developed countries. Section 955 provides rules for determining the amount of a controlled foreign corporation's previously excluded subpart F income for any taxable year of the corporation beginning after December 31, 1962, that is withdrawn from investment in less developed countries for any taxable year of the corporation beginning before January 1, 1976. Except for investment in less developed country shipping companies, section 955 also provides rules for determining the amount of a controlled foreign corporation's previously excluded subpart F income for any taxable year of the corporation beginning after December 31, 1962, which is withdrawn from investment in less developed countries in taxable years of the corporation beginning after December 31, 1975. To determine the amount of a controlled foreign corporation's previously excluded subpart F income withdrawn from investment in less developed country shipping companies described in section 955(c)(2) in taxable years of a controlled foreign corporation beginning after December 31, 1975, see section 955(b)(5) (as in effect after amendment by the Tax Reduction Act of 1975) and §§1.955A–1 through 1.955A–4. For effective dates, see §1.955–0.

(b) *Amount withdrawn by controlled foreign corporation*—(1) *In general.* For purposes of sections 951 through 964, the amount of a controlled foreign corporation's previously excluded subpart F income which is withdrawn for any taxable year from investment in less developed countries is an amount equal to the decrease for such year in such corporation's qualified investments in less developed countries. Such decrease is, except as provided in §1.955–3—

(i) An amount equal to the excess of the amount of its qualified investments in less developed countries at the close of the preceding taxable year over the amount of its qualified investments in less developed countries at the close of the taxable year, minus

(ii) The amount (if any) by which recognized losses on sales or exchanges by such corporation during the taxable year of qualified investments in less developed countries exceed its recognized gains on sales or exchanges during such year of qualified investments in less developed countries,

but only to the extent that the net amount so determined does not exceed the limitation determined under subparagraph (2) of this paragraph. See §1.955–2 for determining the amount of qualified investments in less developed countries.

(2) *Limitations applicable in determining decreases*—(i) *General.* The limitation referred to in subparagraph (1) of this paragraph for any taxable year of a controlled foreign corporation shall be the lesser of the following two limitations:

(a) The sum of the controlled foreign corporation's earnings and profits (or deficit in earnings and profits) for the taxable year, computed as of the close of the taxable year without diminution by reason of any distributions made during the taxable year, plus the sum of its earnings and profits (or deficits in earnings and profits) accumulated for prior taxable years beginning after December 31, 1962, (including prior taxable years beginning after December 31, 1975) or,

(b) The sum of the amounts excluded under section 954(b)(1) and paragraph (b)(1) of §1.954–1 from the foreign base company income of such corporation for all prior taxable years, minus the sum of the amounts (determined under this paragraph) of its previously excluded subpart F income withdrawn from investment in less developed countries for all prior taxable years.

(ii) *Treatment of earnings and profits.* For purposes of determining earnings and profits of a controlled foreign corporation under subdivision (i)(*a*) of this subparagraph, such earnings and profits shall be considered not to include any amounts which are attributable to—

(*a*)(*1*) Amounts which, for the current taxable year, are included in the gross income of a United States shareholder of such controlled foreign corporation under section 951(a)(1)(A)(i) or (iii), or

(*2*) Amounts which, for any prior taxable year, have been included in the gross income of a United States shareholder of such controlled foreign corporation under section 951(a) and have not been distributed; or

(b)(1) Amounts which, for the current taxable year, are included in the gross income of a United States shareholder of such controlled foreign corporation under section 551(b) or would be so included under such section but for the fact that such amounts were distributed to such shareholder during the taxable year, or

(2) Amounts which, for any prior taxable year, have been included in the gross income of a United States shareholder of such controlled foreign corporation under section 551(b) and have not been distributed.

The rules of this subdivision apply only in determining the limitation on a controlled foreign corporation's decrease in qualified investments in less developed countries. See section 959 and the regulations thereunder for limitations on the exclusion from gross income of previously taxed earnings and profits.

(3) *Taxable years beginning after December 31, 1975.* (i) In the case of a taxable year of a controlled foreign corporation beginning after December 31, 1975, §1.955–2(b)(5) must be applied in determining the amount of its qualified investments in less developed countries on both of the determination dates applicable to such taxable year.

(ii) The application of this subparagraph may be illustrated by the following examples:

Example 1. (a) Controlled foreign corporation M uses the calendar year as the taxable year. Throughout 1974 through 1976, M owns 100 percent of the only class of stock of foreign corporation N, a less developed country shipping company described in §1.955–5(b), and M owns no other stock or obligations. The amount taken into account under §1.955–2(d) with respect to the stock of N is $10,000 at the close of 1974, 1975, and 1976. The amount of M's previously excluded subpart F income which is withdrawn for 1975 (a year to which § 1.955–2(b)(5) does not apply) from investment in less developed countries is zero, determined as follows:

(1) Qualified investments in less developed countries at the close of 1974	$10,000
(2) Less: qualified investments in less developed countries at the close of 1975	10,000
(3) Balance	0

(Further computations similar to those set out in lines (iv) through (ix) of example 1 of paragraph (d) of this section are unnecessary because the balance in line (3) of this example is zero.)

(b) As a result of § 1.955–2(b)(5)(ii), the amount of M's previously excluded subpart F income which is withdrawn for 1976 from investment in less developed countries is zero, determined as follows:

(1) Qualified investments in less developed countries at the close of 1975	$0
(2) Less: qualified investments in less developed countries at the close of 1976	0
(3) Balance	0

Example 2. The facts are the same as in example 1, except that foreign corporation N is a less developed country corporation described in § 1.955–5(a). The amount of M's previously excluded subpart F income withdrawn for 1976 from investment in less developed countries is zero, determined as follows:

(1) Qualified investments in less developed countries at the close of 1975	$10,000
(2) Less: qualified investments in less developed countries at the close of 1976	10,000
(3) Balance	0

(c) *Shareholder's pro rata share of amount withdrawn by controlled foreign corporation*—(1) *In general.* A United States shareholder's pro rata share of a controlled foreign corporation's previously excluded subpart F income withdrawn for any taxable year from investment in less developed countries is his pro rata share of the amount withdrawn for such year by such corporation, as determined under paragraph (b) of this section. See section 955(a)(3).

(2) *Special rule.* A United States shareholder's pro rata share of the net amount determined under paragraph (b)(2)(i)*(b)* of this section with respect to any stock of the controlled foreign corporation owned by such shareholder shall be determined without taking into account any amount attributable to a period prior to the date on which such shareholder acquired such stock. See section 1248 and the regulations thereunder for rules governing treatment of gain from sales or exchanges of stock in certain foreign corporations.

(d) *Illustrations.* The application of this section may be illustrated by the following examples:

Example 1. A, a United States shareholder, owns 60 percent of the only class of stock of M Corporation, a controlled foreign corporation throughout the entire period here involved. Both A and M Corporation use the calendar year as a taxable year. Corporation M's qualified investments in less developed countries at the close of 1964 amount to $125,000; and, at the close of 1965, to $75,000. During 1965, M Corporation realizes recognized gains of $5,000 and recognized losses of $15,000, on sales of qualified investments in less developed countries. Corporation M's earnings and profits for 1965 and its accumulated earnings and profits for 1963 and 1964 amount to $45,000, as determined under paragraph (b)(2) of this section. The amount excluded under section 954(b)(1) for 1963 from its foreign base company income is $75,000, and the amount of its previously excluded subpart F income withdrawn for 1964 from investment in less developed countries is $25,000. The amount of M Corporation's previously excluded subpart F income withdrawn for 1965 from investment in less developed countries is $40,000, and A's pro rata share of such amount is $24,000, determined as follows:

(i) Qualified investments in less developed countries at the close of 1964	$125,000
(ii) Less: Qualified investments in less developed countries at the close of 1965	75,000
(iii) Balance	50,000
(iv) Less: Excess of recognized losses over recognized gains on sales during 1965 of qualified investments in less developed countries ($15,000 less $5,000)	10,000
(v) Tentative decrease in qualified investments in less developed countries for 1965	40,000
(vi) Earnings and profits for 1963, 1964, and 1965	45,000

(vii) Excess of amount excluded under section 954(b)(1) from foreign base company income for 1963 ($75,000 over amount of previously excluded subpart F income withdrawn for 1964 from investment in less developed countries ($25,000)	50,000
(viii) M Corporation's amount of previously excluded subpart F income withdrawn for 1965 from investment in less developed countries (item (v), but not to exceed the lesser of item (vi) or item (vii))	40,000
(ix) A's pro rata share of M Corporation's amount of previously excluded subpart F income withdrawn for 1965 from investment in less developed countries (60 percent of $40,000)	$24,000

Example 2. The facts are the same as in example 1, except that M Corporation's earnings and profits (determined under paragraph (b)(2) of this section) for 1963, 1964, and 1965 (item (vi)) are $30,000 instead of $45,000. Corporation M's amount of previously excluded subpart F income withdrawn for 1965 from investment in less developed countries is $30,000. A's pro rata share of such amount is $18,000 (60 percent of $30,000).

Example 3. The facts are the same as in example 1, except that the excess of the amount excluded under section 954(b)(1) for 1963 from M Corporation's foreign base company income over the amount of its previously excluded subpart F income withdrawn for 1964 from investment in less developed countries (item (vii)) is $20,000 instead of $50,000. Corporation M's amount of previously excluded subpart F income withdrawn for 1965 from investment in less developed countries is $20,000. A's pro rata share of such amount is $12,000 (60 percent of $20,000).

[T.D. 6683, 28 FR 11178, Oct. 18, 1963, as amended by T.D. 6795, 30 FR 942, Jan. 29, 1965; T.D. 7893, 48 FR 22509, May 19, 1983; T.D. 7894, 48 FR 22529, May 19, 1983]

§1.955–2 Amount of a controlled foreign corporation's qualified investments in less developed countries.

(a) *Included property.* For purposes of sections 951 through 964, a controlled foreign corporation's ‘‘qualified investments in less developed countries'' are items of property (other than property excluded under paragraph (b)(1) of this section) owned directly by such corporation on the applicable determination date for purposes of section 954(f) or section 955(a)(2) and consisting of one or more of the following:

(1) Stock of a less developed country corporation if the controlled foreign corporation owns (within the meaning of paragraph (b)(2) of this section) on the applicable determination date 10 percent or more of the total combined voting power of all classes of stock of such less developed country corporation;

(2) An obligation (as defined in paragraph (b)(3) of this section) of a less developed country corporation which, at the time of acquisition (as defined in paragraph (b)(4) of this section) of such obligation by the controlled foreign corporation, has a maturity of one year or more, but only if the controlled foreign corporation owns (within the meaning of paragraph (b)(2) of this section) on the applicable determination date 10 percent or more of the total combined voting power of all classes of stock of such less developed country corporation; and

(3) An obligation (as defined in paragraph (b)(3) of this section) of a less developed country, including obligations issued or guaranteed by the government of such country or of a political subdivision thereof and obligations of any agency or instrumentality of such country, in which such country is financially committed. The application of this subparagraph may be illustrated by the following example:

Example. A, a political subdivision of foreign country X, constructs and operates a toll bridge. Country X is a less developed country throughout the period here involved. A issues bonds under an indenture which provides for amortization of the principal and interest of such bonds only out of the net revenues derived from operation of the bridge. The bonds of A are obligations in which X country is financially committed and, in the hands of a controlled foreign corporation, are qualified investments in less developed countries.

(b) *Special rules*—(1) *Excluded property.* For purposes of paragraph (a) of this section, property which is disposed of within 6 months after the date of its acquisition shall be excluded from a controlled foreign corporation's qualified investments in less developed countries. However, the fact that property acquired by a controlled foreign corporation has not been held on an applicable determination date for more than 6 months after the date of its acquisition shall not prevent such property from being included in the controlled foreign corporation's qualified investments in less developed countries on such date. Proper adjustments shall be made subsequently, however, to exclude any item of property so included, if the property is in fact disposed of within 6 months after the date of its acquisition. See section 955(b)(4).

(2) *Determination of stock ownership.* In determining for purposes of paragraphs (a)(1) and (2) of this section whether a controlled foreign corporation owns 10 percent or more of the total combined voting power of all classes of stock of a less developed country corporation, only stock owned directly by such controlled foreign corporation shall be taken into account and the provisions of section 958 and the regulations thereunder shall not apply. See section 958(a)(1).

(3) *Obligation defined.* For purposes of paragraphs (a)(2) and (3) of this section, the term ''obligation'' means any bond, note, debenture, certificate, or other evidence of indebtedness. In the absence of legal, governmental, or business reasons to the contrary, the indebtedness must bear interest or be issued at a discount.

(4) *Date of acquisition.* For purposes of paragraphs (a)(2) and (b)(5)(i) of this section, stock or an obligation shall be considered acquired by a foreign corporation as of the date such corporation acquires an adjusted basis in the stock or obligation. For this purpose, in a case in which a foreign corporation acquires stock or an obligation in a transaction (other than a reorganization of the type described in section 368(a)(1)(E) or (F)) in which no gain or loss would be recognized had the transaction been between two domestic corporations, such corporation will be considered to have acquired an adjusted basis in such stock or obligation as of the date such transaction occurs.

(5) *Taxable years beginning after December 31, 1975.* For taxable years beginning after December 31, 1975, qualified investments in less developed countries do not include—

(i) Any property acquired after the latest determination date applicable to a taxable year beginning before December 31, 1975,

(ii) Stock or obligations of a less developed country shipping company described in § 1.955–5(b), and

(iii) Stock or obligations which were not treated as qualified investments in less developed countries on the later of the two determination dates applicable to the preceding taxable year.

See § 1.955–1(b)(3) for rules relating to the application of this subparagraph. See § 1.955A–2(h) for rules relating to the treatment of investments in stock or obligations described in subdivision (ii) of this subparagraph as qualified investments in foreign base company shipping operations.

(6) *Determination dates.* For purposes of subparagraph (5) of this paragraph and § 1.955–1(b)(3), the determination dates applicable to a taxable year of a controlled foreign corporation are—

(i) Except as provided in subdivision (ii) of this subparagraph, the close of such taxable year and the close of the preceding taxable year, and

(ii) With respect to a United States shareholder who has made an election under section 955(b)(3) to determine such corporation's increase in qualified investments in less developed countries at the close of the following taxable year, the close of such taxable year and the close of the taxable year immediately following such taxable year.

(c) *Termination of designation as a less developed country.* For purposes of sections 951 through 964, property which would constitute a qualified investment in a less developed country but for the fact that a foreign country or United States possession has, after the acquisition of such property by the controlled foreign corporation, ceased to be a less developed country shall be treated as a qualified investment in a less developed country. The application of this paragraph may be illustrated by the following example:

Example. On December 31, 1969, in accordance with the provisions of § 1.955–4, the designation of the foreign country X as an economically less developed country is terminated. Corporation M, a controlled foreign corporation, has $50,000 of qualified investments in country X acquired before December 31, 1969. After 1969 such investments are treated as qualified investments in a less developed country notwithstanding the termination of the status of X Country as an economically less developed country. However, if such qualified investments of M Corporation are reduced to $40,000, each United States shareholder of M Corporation is required, subject to the provisions of § 1.955–1, to include his pro rata share of the $10,000 decrease in his gross income under section 951(a)(1)(A)(ii) and the regulations thereunder.

(d) *Amount attributable to property*—(1) *General rule.* For purposes of this section, the amount taken into account with respect to any property which constitutes a qualified investment in a less developed country shall be its adjusted basis as of the applicable determination date, reduced by any liability (other than a liability described in subparagraph (2) of this paragraph) to which such property is subject on such date. To be taken into account under this subparagraph, a liability must constitute a specific charge against the property involved. Thus, a liability evidenced by an open account or a liability secured only by the general credit of the controlled foreign corporation will not be taken into account. On the other hand, if a liability constitutes a specific charge against several items of property and cannot definitely be allocated to any single item of property, the liability shall be apportioned against each of such items of property in that ratio which the adjusted basis of such item on the applicable determination date bears to the adjusted basis of all such items at such time. A liability in excess of the adjusted basis of the property which is subject to such liability shall not be taken into account for the purpose of reducing the adjusted basis of other property which is not subject to such liability.

(2) *Excluded charges.* For purposes of subparagraph (1) of this paragraph, a specific charge created with respect to any item of property principally for the purpose of artificially increasing or decreasing the amount of a controlled foreign corporation's qualified investments in less developed countries will not be recognized; whether a specific charge is created principally for such purpose will depend upon all the facts and circumstances of each case. One of the factors that will be considered in making such a determination with respect to a loan is whether the loan is from a related person, as defined in section 954(d)(3) and paragraph (e) of §1.954–1.

(3) *Statement required.* If for purposes of this section a United States shareholder of a controlled foreign corporation reduces the adjusted basis of property which constitutes a qualified investment in a less developed country on the ground that such property is subject to a liability, he shall attach to his return a statement setting forth the adjusted basis of the property before the reduction and the amount and nature of the reduction.

(4) *Taxable years beginning after December 31, 1975.* For taxable years beginning after December 31, 1975, the amount taken into account under subparagraph (1) of this paragraph with respect to any property which constitutes a qualified investment in less developed countries shall not exceed the amount taken into account with respect to such property at the close of the preceding taxable year.

[T.D. 6683, 28 FR 11179, Oct. 18, 1963, as amended by T.D. 7894, 48 FR 22529, May 19, 1983]

§1.955–3 Election as to date of determining qualified investments in less developed countries.

(a) *Nature of election.* In lieu of determining the increase for a taxable year of a foreign corporation beginning before January 1, 1976, under the provisions of section 954(f) and paragraph (a) of §1.954–5, or the decrease under the provisions of section 955(a)(2) and paragraph (b) of §1.955–1, in a controlled foreign corporation's qualified investments in less developed countries for a taxable year in the manner provided in such provisions, a United States shareholder of such controlled foreign corporation may elect, under the provisions of section 955(b)(3) and this section, to determine such increase in accordance with the provisions of paragraph (b) of §1.954–5 and to determine such decrease by ascertaining the amount by which—

(1) Such controlled foreign corporation's qualified investments in less developed countries at the close of such taxable year exceed its qualified investments in less developed countries at the close of the taxable year immediately following such taxable year, and reducing such excess by

(2) The amount determined under paragraph (b)(1)(ii) of §1.955–1 for such taxable year,

subject to the limitation provided in paragraph (b)(2) of § 1.955–1 for such taxable year. An election under this section may be made with respect to each controlled foreign corporation with respect to which a person is a United States shareholder within the meaning of section 951(b), but the election may not be exercised separately with respect to the increases and the decreases of such controlled foreign corporation. If an election is made under this section to determine the increase of a controlled foreign corporation in accordance with the provisions of paragraph (b) of § 1.954–5, subsequent decreases of such controlled foreign corporation shall be determined in accordance with this paragraph and not in accordance with paragraph (b) of § 1.955–1.

(b) *Time and manner of making election*—(1) *Without consent.* An election under this section with respect to a controlled foreign corporation shall be made without the consent of the Commissioner by a United States shareholder's filing a statement to such effect with his return for his taxable year in which or with which ends the first taxable year of such controlled foreign corporation in which—

(i) Such shareholder owns, within the meaning of section 958(a), or is considered as owning by applying the rules of ownership of section 958(b), 10 percent or more of the total combined voting power of all classes of stock entitled to vote of such controlled foreign corporation, and

(ii) Such controlled foreign corporation realizes foreign base company income from which amounts are excluded under section 954(b)(1) and paragraph (b)(1) of § 1.954–1.

The statement shall contain the name and address of the controlled foreign corporation and identification of such first taxable year of such corporation. For taxable years of a foreign corporation beginning after December 31, 1975, no election under this section with respect to a controlled foreign corporation may be made without the consent of the Commissioner.

(2) *With consent.* An election under this section with respect to a controlled foreign corporation may be made by a United States shareholder at any time with the consent of the Commissioner. Consent will not be granted unless the United States shareholder and the Commissioner agree to the terms, conditions, and adjustments under which the election will be effected. Consent will not be granted if the first taxable year of the controlled foreign corporation with respect to which the shareholder desires to compute an amount described in section 954(b)(1) in accordance with the election provided in this section begins after December 31, 1975. The application for consent to elect shall be made by the United States shareholder's mailing a letter for such purpose to the Commissioner of Internal Revenue, Washington, DC 20224. The application shall be mailed before the close of the first taxable year of the controlled foreign corporation with respect to which the shareholder desires to compute an amount described in section 954(b)(1) in accordance with the election provided in this section. The application shall include the following information:

(i) The name, address, and taxable year of the United States shareholder;

(ii) The name and address of the controlled foreign corporation;

(iii) The first taxable year of the controlled foreign corporation for which income is to be computed under the election;

(iv) The amount of the controlled foreign corporation's qualified investments in less developed countries at the close of its preceding taxable year; and

(v) The sum of the amounts excluded under section 954(b)(1) and paragraph (b)(1) of § 1.954–1 from the foreign base company income of the controlled foreign corporation for all prior taxable years during which such shareholder was a United States shareholder of such corporation and the sum of the amounts of its previously excluded subpart F income withdrawn from investment in less developed countries for all prior taxable years during which such shareholder was a United States shareholder of such corporation.

(c) *Effect of election*—(1) *General.* Except as provided in subparagraphs (3) and (4) of this paragraph, an election under this section with respect to a controlled foreign corporation shall be binding on the United States shareholder and shall apply to all qualified investments in less developed countries acquired, or disposed of, by such controlled foreign corporation during the taxable year following its taxable year for which income is first computed under the election and during all succeeding taxable years of such corporation.

(2) *Returns.* Any return of a United States shareholder required to be filed before the completion of a period with respect to which determinations are to be made as to a controlled foreign corporation's qualified investments in less developed countries for purposes of computing such shareholder's taxable income shall be filed on the basis of an estimate of the amount of the controlled foreign corporation's qualified investments in less developed countries at the close of the period. If the actual amount of such investments is not the same as the amount of the estimate, the United States shareholder shall immediately notify the Commissioner. The Commissioner will thereupon redetermine the amount of tax of such United States shareholder for the year or years with respect to which the incorrect amount was taken into account. The amount of tax, if any, due upon such redetermination shall be paid by the United States shareholder upon notice and demand by the district director. The amount of tax, if any, shown by such redetermination to have been overpaid shall be credited or refunded to the United States shareholder in accordance with the provisions of sections 6402 and 6511 and the regulations thereunder.

(3) *Revocation.* Upon application by the United States shareholder, the election made under this section may, subject to the approval of the Commissioner, be revoked. Approval will not be granted unless the United States shareholder and the Commissioner agree to the terms, conditions, and adjustments under which the rev- ocation will be effected. Unless such agreement provides otherwise, the change in the controlled foreign corporation's qualified investments in less developed countries for its first taxable year for which income is computed without regard to the election previously made will be considered to be zero for purposes of effectuating the revocation. The application for consent to revocation shall be made by the United States shareholder's mailing a letter for such purpose to the Commissioner of Internal Revenue, Washington, DC 20224. The application shall be mailed before the close of the first taxable year of the controlled foreign corporation with respect to which the shareholder desires to compute the amounts described in section 954(b)(1) or 955(a) without regard to the election provided in this section. The application may also be filed in a taxable year beginning after December 31, 1975. The application shall include the following information:

(i) The name, address, and taxpayer identification number of the United States shareholder;

(ii) The name and address of the controlled foreign corporation;

(iii) The taxable year of the controlled foreign corporation for which such amounts are to be so computed;

(iv) The amount of the controlled foreign corporation's qualified investments in less developed countries at the close of its preceding taxable year;

(v) The sum of the amounts excluded under section 954(b)(1) and paragraph (b)(1) of §1.954–1 from the foreign base company income of the controlled foreign corporation for all prior taxable years during which such shareholder was a United States shareholder of such corporation and the sum of the amounts of its previously excluded subpart F income withdrawn from investment in less developed countries for all prior taxable years during which such shareholder was a United States shareholder of such corporation; and

(vi) The reasons for the request for consent to revocation.

(4) *Transfer of stock.* If during any taxable year of a controlled foreign corporation—

(i) A United States shareholder who has made an election under this section with respect to such controlled foreign corporation sells, exchanges, or otherwise disposes of all or part of his stock in such controlled foreign corporation, and

(ii) The foreign corporation is a controlled foreign corporation immediately after the sale, exchange, or other disposition,

then, with respect to the stock so sold, exchanged, or disposed of, the controlled foreign corporation's acquisitions and dispositions of qualified investments in less developed countries for such taxable year shall be considered to be zero. If the United States shareholder's successor in interest is entitled to and does make an election under paragraph (b)(1) of this section to determine the controlled foreign corporation's increase in qualified investments in less developed countries for the taxable year in which he acquires such stock, such increase with respect to the stock so acquired shall be determined in accordance with the provisions of paragraph (b)(1) of § 1.954–5. If the controlled foreign corporation realizes no foreign base company income from which amounts are excluded under section 954(b)(1) and paragraph (b)(1) of § 1.954–1 for the taxable year in which the United States shareholder's successor in interest acquires such stock and such successor in interest makes an election under paragraph (b)(1) of this section with respect to a subsequent taxable year of such controlled foreign corporation, the increase in the controlled foreign corporation's qualified investments in less developed countries for such subsequent taxable year shall be determined in accordance with the provisions of paragraph (b)(2) of § 1.954–5.

(d) *Illustrations.* The application of this section may be illustrated by the following examples:

Example 1. Foreign corporation A is a wholly owned subsidiary of domestic corporation M. Both corporations use the calendar year as a taxable year. In a statement filed with its return for 1963, M Corporation makes an election under section 955(b)(3) and the election remains in force for the taxable year 1964. At December 31, 1964, A Corporation's qualified investments in less developed countries amount to $100,000; and, at December 31, 1965, to $80,000. For purposes of paragraph (a)(1) of this section, A Corporation's decrease in qualified investments in less developed countries for the taxable year 1964 is $20,000 and is determined by ascertaining the amount by which A Corporation's qualified investments in less developed countries at December 31, 1964 ($100,000) exceed its qualified investments in less developed countries at December 31, 1965 ($80,000).

Example 2. The facts are the same as in example 1 except that A Corporation experiences no changes in qualified investments in less developed countries during its taxable years 1966 and 1967. If M Corporation's election were to remain in force, A Corporation's acquisitions and dispositions of qualified investments in less developed countries during A Corporation's taxable year 1968 would be taken into account in determining whether A Corporation has experienced an increase or a decrease in qualified investments in less developed countries for its taxable year 1967. However, M Corporation duly files before the close of A Corporation's taxable year 1967 an application for consent to revocation of M Corporation's election under section 955(b)(3), and, pursuant to an agreement between the Commissioner and M Corporation, consent is granted by the Commissioner. Assuming such agreement does not provide otherwise, A Corporation's change in qualified investments in less developed countries for its taxable year 1967 is zero because the effect of the revocation of the election is to treat acquisitions and dispositions of qualified investments in less developed countries actually occurring in 1968 as having occurred in such year rather than in 1967.

Example 3. The facts are the same as in example 2 except that A Corporation's qualified investments in less developed countries at December 31, 1968, amount to $70,000. For purposes of paragraph (b)(1)(i) of § 1.955–1, the decrease in A Corporation's qualified investments in less developed countries for the taxable year 1968 is $10,000 and is determined by ascertaining the amount by which A Corporation's qualified investments in less developed countries at December 31, 1967 ($80,000) exceed its qualified investments in less developed countries at December 31, 1968 ($70,000).

Example 4. The facts are the same as in example 1 except that on September 30, 1965, M Corporation sells 40 percent of the only class of stock of A Corporation to N Corporation, a domestic corporation. Cor- poration N uses the calendar year as a taxable year. Corporation A remains a controlled foreign corporation immediately after such sale of its stock. Corporation A's qualified investments in less developed countries at December 31, 1966, amount to $90,000. The changes in A Corporation's qualified investments in less developed countries occurring in its taxable year 1965 are considered to be zero with respect to the 40-percent stock interest acquired by N Corporation. The entire $20,000 reduction in A Corporation's qualified investments in less developed countries which occurs during the taxable year 1965 is taken into account by M Corporation for purposes of paragraph (a)(1) of this section in determining its tax liability for the taxable year 1964. Corporation A's increase in qualified investments in less developed countries for the taxable year 1965 with respect to the 60-percent stock interest retained by M Corporation is $6,000 and is determined by ascertaining M Corporation's pro rata share (60 percent) of the amount by which A Corporation's qualified investments in less developed countries at December 31, 1968 ($90,000) exceed its qualified investments in less developed countries at December 31, 1965 ($80,000). Corporation N does not make an election under section 955(b)(3) in its return for its taxable year 1966. Corporation A's increase in qualified investments in less developed countries for the taxable year 1966 with respect to the 40-percent stock interest acquired by N Corporation is $4,000.

[T.D. 6683, 28 FR 11180, Oct. 18, 1963, as amended by T.D. 7893, 48 FR 22509, May 19, 1983; T.D. 7894, 48 FR 22530, May 19, 1983]

§1.955–4 Definition of less developed country.

(a) *Designation by Executive order.* For purposes of sections 951 through 964, the term ''less developed country'' means any foreign country (other than an area within the Sino-Soviet bloc) or any possession of the United States with respect to which, on the first day of the foreign corporation's taxable year, there is in effect an Executive order by the President of the United States designating such country or possession as an economically less developed country for purposes of such sections. Each territory, department, province, or possession of any foreign country other than a country within the Sino-Soviet bloc may be treated as a separate foreign country for purposes of such designation if the territory, department, province, or possession is overseas from the country of which it is a territory, department, province, or possession. Thus, for example, an overseas possession of a foreign country may be designated by Executive order as an economically less developed country even though the foreign country itself has not been designated as an economically less developed country; or the foreign country may be so designated even though the overseas possessions of such country have not been designated as economically less developed countries. The term ''possession of the United States'', for purposes of section 955(c)(3) and this section, shall be construed to have the same meaning as that contained in paragraph (b)(2) of §1.957–3.

(b) *Countries not eligible for designation.* Section 955(c)(3) provides that no designation by Executive order may be made under section 955(c)(3) and paragraph (a) of this section with respect to—

Australia, Austria, Belgium, Canada, Denmark, France, Germany (Federal Republic), Hong Kong, Italy, Japan, Liechtenstein, Luxembourg, Monaco, Netherlands, New Zealand, Norway, Union of South Africa, San Marino, Sweden, Switzerland, United Kingdom.

(c) *Termination of designation.* Section 955(c)(3) provides that, after the President has designated any foreign country or possession of the United States as an economically less developed country for purposes of sections 951 through 964, he may not terminate such designation (either by issuing an Executive order for the purpose of terminating such designation or by issuing an Executive order which has the effect of terminating such designation) unless, at least 30 days prior to such termination, he has notified the Senate and the House of Representatives of his intention to terminate such designation. If such 30-day notice is given, no action by the Congress of the United States is necessary to effectuate the termination. The requirement for giving 30-day notice to the Senate and House of Representatives applies also to the termination of a designation with respect to an overseas territory, department, province, or possession of a foreign country. See paragraph (c) of §1.955–2 for the effect of a termination of a Presidential designation upon property which would be a qualified investment in a less developed country but for the fact of such termination.

[T.D. 6683, 28 FR 11182, Oct. 18, 1963]

§1.955–5 Definition of less developed country corporation.

(a) *Less developed country corporation*—(1) *In general.* For purposes of sections 951 through 964, the term ''less developed country corporation'' means a foreign corporation described in paragraph (b) of this section and also any foreign corporation—

(i) Which is engaged in the active conduct of one or more trades or businesses during the entire taxable year;

(ii) Which derives 80 percent or more of its gross income, if any, for such taxable year from sources within less developed countries, as determined under the provisions of § 1.955–6; and

(iii) Which has 80 percent or more in value (within the meaning of paragraph (d) of this section) of its assets on each day of such taxable year consisting of one or more of the following items of property:

(a) Property (other than property described in (*b*) through (*h*) of this subdivision) which is used, or held for use, in such trades or businesses and is located in one or more less developed countries;

(b) Money;

(c) Deposits with persons carrying on the banking business;

(d) Stock of any other less developed country corporation;

(e) Obligations (within the meaning of paragraph (b)(3) of § 1.955–2) of another less developed country corporation which at the time of their acquisition (within the meaning of paragraph (b)(4) of § 1.955–2) by the foreign corporation have a maturity of one year or more;

(f) Obligations (within the meaning of paragraph (b)(3) of § 1.955–2) of any less developed country;

(g) Investments which are required to be made or held because of restrictions imposed by the government of any less developed country; and

(h) Property described in section 956(b)(2).

For purposes of this subparagraph, if a foreign corporation is a partner in a foreign partnership, as defined in section 7701(a)(2) and (5) and the regulations thereunder, such corporation will be considered to be engaged in the active conduct of a trade or business to the extent and in the manner in which the partnership is so engaged and to own directly its proportionate share of each of the assets of the partnership. For purposes of subdivision (i) of this subparagraph, a newly-organized foreign corporation will be considered engaged in the active conduct of a trade or business from the date of its organization if such corporation commences business operations as soon as practicable after such organization. In the absence of affirmative evidence showing that the 80-percent requirement of subdivision (iii) of this subparagraph has not been satisfied on each day of the taxable year, such requirement will be considered satisfied if it is established to the satisfaction of the district director that such requirement has been satisfied on the last day of each quarter of the taxable year of the foreign corporation. For purposes of subdivision (iii) of this subparagraph, property (other than stock in trade or other property of a kind which would properly be included in inventory of the foreign corporation if on hand at the close of the taxable year, or property held primarily for sale to customers in the ordinary course of the trade or business of the foreign corporation) purchased for use in a trade or business and temporarily located outside less developed countries will be considered located in less developed countries if, but only if, such property is shipped to and received in less developed countries promptly after such purchase.

(2) *Special rules.* For purposes of subparagraph (1)(iii)*(a)* of this paragraph—

(i) *Treatment of receivables.* Bills receivable, accounts receivable, notes receivable and open accounts shall be considered to be used in the trade or business and located in less developed countries if, but only if—

(a) Such obligations arise out of the rental of property located in less developed countries, the performance of services within less developed countries, or the sale of property manufactured, produced, grown, or extracted in less developed countries, but only to the extent that the aggregate amount of such obligations at any time during the taxable year does not exceed an amount which is ordinary and necessary to carry on the business of both parties to the transactions if such transactions are between unrelated persons or, if such transactions are between related persons, an amount which would be ordinary and necessary to carry on the business of both parties to the transactions if such transactions were between unrelated persons;

(b) In the case of bills receivable, accounts receivable, notes receivable, and open accounts arising out of transactions other than those referred to in (*a*) of this subdivision—

(1) If the obligor is an individual such individual is a resident of one or more less developed countries and of no other country which is not a less developed country;

(2) If the obligor is a corporation which as to the foreign corporation is a related person as defined in section 954(d)(3) and paragraph (e) of §1.954–1, such obligor meets, with respect to the period ending with the close of its annual accounting period in which occurs the date on which the obligation is incurred, the 80-percent gross income requirement of paragraph (b)(1)(ii) of §1.955–6.

(3) If the obligor is a corporation which as to the foreign corporation is not a related person as defined in section 954(d)(3) and paragraph (e) of §1.954–1, it is reasonable, on the basis of ascertainable facts, for the obligee to believe that the obligor meets, with respect to such period, the 80-percent gross income requirement of paragraph (b)(1)(ii) of §1.955–6.

(ii) *Location of interests in real estate.* Interests in real estate such as leaseholds of land or improvements thereon, mortgages on real property (including interests in mortgages on leaseholds of land or improvements thereon), and mineral, oil, or gas interests shall be considered located in less developed countries if, but only if, the underlying real estate is located in less developed countries.

(iii) *Location of certain other intangibles.* Intangible property (other than any such property described in subdivision (i) or (ii) of this subparagraph) used in the trade or business of the foreign corporation shall be considered to be located in less developed countries in the same ratio that the amount of the foreign corporation's tangible property and property described in subdivision (i) or (ii) of this subparagraph used in its trades or businesses and located or deemed located in less developed countries bears to the total amount of its tangible property and property described in subdivision (i) or (ii) of this subparagraph used in its trades or businesses.

(3) *Illustration.* The provisions of subparagraph (1) of this paragraph may be illustrated by the following example:

Example. Foreign corporation A is formed on November 1, 1963, to engage in the business of manufacturing and selling radios in Brazil, a less developed country as of November 1, 1963. Corporation A uses the calendar year as a taxable year. Shortly after it is formed, A Corporation acquires a plant site and begins construction of a plant which is completed on August 1, 1964. Corporation A commences business operations as soon as practicable and continues such operations through December 31, 1964, and thereafter. Corporation A will be considered for purposes of subparagraph (1)(i) of this paragraph to be engaged in the active conduct of a trade or business for its entire taxable years ending on December 31, 1963, and 1964. The plant site and the plant (while under construction and after completion) will be considered to be property held during such taxable years for use in A Corporation's trade or business.

(b) *Shipping companies.* For purposes of sections 951 through 964, the term ''less developed country corporation'' also means any foreign corporation—

(1) Which has 80 percent or more of its gross income, if any, for the taxable year consisting of one or more of—

(i) Gross income derived—

(a) From, or in connection with, the using (or hiring or leasing for use) in foreign commerce of aircraft or vessels registered under the laws of a less developed country,

(b) From, or in connection with, the performance of services directly related to the use in foreign commerce of aircraft or vessels registered under the laws of a less developed country, or

(c) From the sale or exchange of aircraft or vessels registered under the laws of a less developed country and used in foreign commerce by such foreign corporation;

(ii) Dividends and interest received or accrued from other foreign corporations which are less developed country corporations within the meaning of this paragraph and 10 percent or more of the total combined voting power of all classes of stock of which is owned at the time such dividends and interest are so received or accrued by such foreign corporation; and

(iii) Gain from the sale or exchange of stock or obligations of other foreign corporations which are less developed country corporations within the meaning of this paragraph and 10 percent or more of the total combined voting power of all classes of stock of which is owned by such foreign corporation immediately before such sale or exchange; and

(2) Which has 80 percent or more in value (within the meaning of paragraph (d) of this section) of its assets on each day of the taxable year consisting of—

(i) Assets used, or held for use, for the production of income described in subparagraph (1) of this paragraph, or in connection with the production of such income, whether or not such income is received during the taxable year, and

(ii) Property described in section 956(b)(2).

In the absence of affirmative evidence showing that the 80-percent requirement of this subparagraph has not been satisfied on each day of the taxable year such requirement will be considered satisfied if it is established to the satisfaction of the district director that such requirement has been satisfied on the last day of each quarter of the taxable year of the foreign corporation. The provisions of this subparagraph may be illustrated by the following example:

Example. Foreign corporation A is formed on November 1, 1963, for the purpose of constructing and operating a vessel and, on that date, enters a charter agreement which provides that such vessel will be registered under the laws of Liberia, a less developed country as of November 1, 1963, and operated between South American and European ports. Corporation A uses the calendar year as a taxable year. Construction of the vessel is completed on September 1, 1965, and the vessel is registered under the laws of Liberia and operated between South American and European ports through December 31, 1965, and thereafter. The charter and the vessel (while under construction and after completion), or any interest of A Corporation in such assets, will be considered assets which are held by A Corporation during its taxable years ending on December 31, 1963, 1964, and 1965, for use in the production of income described in subparagraph (1) of this paragraph.

(c) *Determination of stock ownership.* In determining for purposes of paragraph (b)(1)(ii) and (iii) of this section whether a foreign corporation owns 10 percent or more of the total combined voting power of all classes of stock of a less developed country corporation, only stock owned directly by such foreign corporation shall be taken into account and the provisions of section 958 and the regulations thereunder shall not apply. See section 958(a)(1).

(d) *Determination of value.* For purposes of paragraphs (a)(1)(iii) and (b)(2) of this section—

(1) *General.* Except as provided in subparagraph (2) of this paragraph, the value at which property shall be taken into account is its actual value (not reduced by liabilities) which, in the absence of affirmative evidence to the contrary, shall be deemed to be its adjusted basis.

(2) *Treatment of certain receivables.* The value at which receivables described in paragraph (a)(2)(i) of this section and held by a foreign corporation using the cash receipts and disbursements method of accounting shall be taken into account is their actual value (not reduced by liabilities) which, in the absence of affirmative evidence to the contrary, shall be deemed to be their face value.

[T.D. 6683, 28 FR 11182, Oct. 18, 1963]

§1.955–6 Gross income from sources within less developed countries.

(a) *General.* For purposes of paragraph (a)(1)(ii) of §1.955.5, the determination whether a foreign corporation has derived 80 percent or more of its gross income from sources within less developed countries for any taxable year shall be made by the application of the provisions of sections 861 through 864, and §§1.861–1 through 1.863–5, in application of which the name of a less developed country shall be substituted for ‘‘the United States’’, except that if income is derived by the foreign corporation from—

(1) Interest (other than interest to which subparagraph (3) of this paragraph applies), the rules set forth in paragraph (b) of this section shall apply;

(2) Dividends, the rules set forth in paragraph (c) of this section shall apply; or

(3) Income (including interest) derived in connection with the sale of

tangible personal property, the rules set forth in paragraph (d) of this section shall apply.

The source of income described in subparagraph (1), (2), or (3) of this paragraph shall be determined solely under the rules of this section and without regard to the rules of sections 861 through 864, and the regulations thereunder.

(b) *Interest*—(1) *In general.* Except as provided in subparagraph (2) of this paragraph and paragraph (d) of this section, gross income derived by the foreign corporation from interest on any indebtedness—

(i) Of an individual shall be treated as income from sources within a less developed country if, but only if, such individual is a resident of one or more less developed countries and of no other country which is not a less developed country.

(ii) Of a corporation shall be treated as income from sources within less developed countries if, but only if, 80 percent or more of the gross income of the payer corporation for the 3-year period ending with the close of its annual accounting period in which such interest is paid, or for such part of such 3-year period as such corporation has been in existence, or for such part of such 3-year period as occurs on and after the beginning of such corporation's first annual accounting period beginning after December 31, 1962, whichever period is shortest, was derived from sources within less developed countries as determined in accordance with the principles of this section; or

(iii) Of a less developed country, including obligations issued or guaranteed by the government of such country or of a political subdivision thereof and obligations of any agency or instrumentality of such country, in which such country is financially committed shall be treated as income from sources within such country.

(2) *Special rule.* Gross income derived by the foreign corporation from interest on obligations of the United States shall be treated as income from sources within less developed countries without regard to the provisions of subparagraph (1) of this paragraph.

(3) *Payers other than related persons.* For purposes of subparagraph (1)(ii) of this paragraph, a payer corporation which as to the recipient corporation is not a related person as defined in section 954(d)(3) and paragraph (e) of §1.954–1 shall be deemed to have satisfied the 80-percent gross income requirement if, on the basis of ascertainable facts, it is reasonable for the recipient corporation to believe that such requirement is satisfied.

(c) *Dividends*—(1) *In general.* Gross income derived by the foreign corporation from dividends, as defined in section 316 and the regulations thereunder, shall be treated as income from sources within less developed countries if, but only if, 80 percent or more of the gross income of the payer corporation for the 3-year period ending with the close of its annual accounting period in which such dividends are distributed, or for such part of such 3-year period as such corporation has been in existence, or for such part of such 3-year period as occurs on and after the beginning of such corporation's first annual accounting period beginning after December 31, 1962, whichever period is shortest, was derived from sources within less developed countries as determined in accordance with the principles of this section.

(2) *Payers other than related persons.* See paragraph (b)(3) of this section for rule governing satisfaction of the 80-percent gross income requirement by payers other than related persons.

(d) *Sale of tangible personal property*—(1) *In general.* Income (whether in the form of profits, commissions, fees, interest, or otherwise) derived by the foreign corporation in connection with the sale of tangible personal property shall be treated as income from sources within less developed countries if, but only if—

(i) Such property is produced (within the meaning of subparagraph (2) of this paragraph) within less developed countries; or

(ii) Such property is sold for use, consumption, or disposition within less developed countries even though produced outside less developed countries and the selling corporation is engaged within less developed countries, in connection with sales of such property, in continuous operational activities which are substantial in relation to such sales, as evidenced, for example, by the maintenance within less developed countries of a substantial sales or service organization or substantial facilities for the storage, handling, transportation, assembly, packaging, or servicing of such property.

(2) *Production defined.* For purposes of this paragraph, the term ''produced'' means manufactured, grown, extracted, or constructed and includes a substantial transformation of property purchased for resale or the manufacture of a product when purchased components constitute part of the property which is sold. See paragraph (a)(4)(ii) and (iii) of § 1.954–3 for a statement and illustration of the principles set forth in the preceding sentence.

[T.D. 6683, 28 FR 11183, Oct. 18, 1963, as amended by T.D. 6688, 28 FR 11632, Oct. 31, 1963]

§ 1.955A–1 Shareholder's pro rata share of amount of previously excluded subpart F income withdrawn from investment in foreign base company shipping operations.

(a) *In general.* Section 955 provides rules for determining the amount of a controlled foreign corporation's previously excluded subpart F income which is withdrawn for any taxable year beginning after December 31, 1975, from investment in foreign base company shipping operations. Pursuant to section 951(a)(1)(A)(iii) and the regulations thereunder, a United States shareholder of such controlled foreign corporation must include in his gross income his pro rata share of such amount as determined in accordance with paragraph (c) of this section.

(b) *Amount withdrawn by controlled foreign corporation*—(1) *In general.* For purposes of sections 951 through 964, the amount of a controlled foreign corporation's previously excluded subpart F income which is withdrawn for any taxable year from investment in foreign base company shipping operations is an amount equal to the decrease for such year in such corporation's qualified investments in foreign base company shipping operations. Such decrease is, except as provided in § 1.955A–4—

(i) An amount equal to the excess of the amount of its qualified investments in foreign base company shipping operations at the close of the preceding taxable year over the amount of its qualified investments in foreign base company shipping operations at the close of the taxable year, minus

(ii) The amount (if any) by which recognized losses on sales or exchanges by such corporation during the taxable year of qualified investments in foreign base company shipping operations exceed its recognized gains on sales or exchanges during such year of qualified investments in foreign base company shipping operations,

but only to the extent that the net amount so determined does not exceed the limitation determined under subparagraph (2) of this paragraph. See § 1.955A–2 for determining the amount of qualified investments in foreign base company shipping operations.

(2) *Limitation applicable in determining decreases*—(i) *In general.* The limitation referred to in subparagraph (i) of this paragraph for any taxable year of a controlled foreign corporation shall be the lesser of the following two limitations:

(A) The sum of (*1*) the controlled foreign corporation's earnings and profits (or deficit in earnings and profits) for the taxable year, computed as of the close of the taxable year without diminution by reason of any distribution made during the taxable year, (*2*) the sum of its earnings and profits (or deficits in earnings and profits) accumulated for prior taxable years beginning after December 31, 1975, and (*3*) the amount described in subparagraph (3) of this paragraph; or

(B) The sum of the amounts excluded under section 954(b)(2) (see subparagraph (4) of this paragraph) from the foreign base company income of such corporation for all prior taxable years beginning after December 31, 1975, minus the sum of the amounts (determined under this paragraph) of its previously excluded subpart F income withdrawn from investment in foreign base company shipping operations for all such prior taxable years.

(C) For purposes of the immediately preceding subparagrah (B), the amount excluded under section 954(b)(2) for a taxable year of a controlled foreign corporation (the ''first corporation'') includes (*1*) an amount excluded under section 954(b)(2) by another corporation which is a member of a related group (as defined in §1.955A–3(b)(1)) attributable to the first corporation's excess investment (see §1.955A–3(c)(4)) for a taxable year beginning after December 31, 1983, (*2*) an amount excluded by a corporation under §1.954–1(b)(4)(ii)(*b*) by reason of the application of the carryover rule there set forth, and (*3*) an amount equal to the first corporation's pro rata share of a group excess deduction (see §1.955A–3(c)(2)) of a related group for a taxable year beginning after December 31, 1983 (but not in excess of that portion of such pro rata share which would reduce the first corporation's foreign base company shipping income to zero). Such amounts will not be treated as excluded under section 954(b)(2) by any other corporation.

(ii) *Certain exclusions from earnings and profits.* For purposes of determining the earnings and profits of a controlled foreign corporation under subdivision (i)(A)(*1*) and (*2*) of this subparagraph, such earnings and profits shall be considered not to include any amounts which are attributable to—

(A)(*1*) Amounts which, for the current taxable year, are included in the gross income of a United States shareholder of such controlled foreign corporation under section 951(a)(1)(A)(i), or

(*2*) Amounts which, for any prior taxable year, have been included in the gross income of a United States shareholder of such controlled foreign corporation under section 951(a) and have not been distributed; or

(B)(*1*) Amounts which, for the current taxable year, are included in the gross income of a United States shareholder of such controlled foreign corporation under section 551(b) or would be so included under such section but for the fact that such amounts were distributed to such shareholder during the taxable year, or

(*2*) Amounts which, for any prior taxable year, have been included in the gross income of a United States shareholder of such controlled foreign corporation under section 551(b) and have not been distributed.

The rules of this subdivision apply only in determining the limitation on a controlled foreign corporation's decrease in qualified investments in foreign base company shipping operations. See section 959 and the regulations thereunder for rules relating to the exclusion from gross income of previously taxed earnings and profits.

(3) *Carryover of amounts relating to investments in less developed country shipping companies*—(i) *In general.* The amount described in this subparagraph for any taxable year of a controlled foreign corporation beginning after December 31, 1975, is the lesser of—

(A) The excess of the amount described in subdivision (ii) of this subparagraph, over the amount described in subdivision (iii) of this subparagraph, or

(B) The limitation determined under subdivision (iv) of this subparagraph.

(ii) *Previously excluded subpart F income invested in less developed country shipping companies.* The amount described in this subdivision for all taxable years of a controlled foreign corporation beginning after December 31, 1975, is the lesser of—

(A) The amount of such corporation's qualified investments (determined under §1.955–2 other than paragraph (b)(5) thereof) in less developed country shipping companies described in §1.955–5(b) at the close of the last taxable year of such corporation beginning before January 1, 1976, or

(B) The limitation determined under §1.955–1(b)(2)(i)(*b*) (relating to previously excluded subpart F income) for the first taxable year of such corporation beginning after January 1, 1976.

(iii) *Amounts previously carried over.* The amount described in this subdivision for any taxable year of a controlled foreign corporation shall be the sum of the excesses determined for each prior taxable year beginning after December 31, 1976, of—

(A) The amount (determined under this paragraph) of such corporation's previously excluded subpart F income withdrawn from investment in foreign base company shipping operations, over

(B) The sum of the earnings and profits determined under subparagraph (2)(i)(A)(*1*) and (*2*) of this paragraph.

(iv) *Extent attributable to accumulated earnings and profits.* The limitation determined under this subdivision for any taxable year of a controlled foreign corporation is the sum of such controlled foreign corporation's earnings and profits (or deficits in earnings and profits) accumulated for taxable years beginning after December 31, 1962, and before January 1, 1976. For purposes of the preceding sentence, earnings and profits shall be determined by excluding the amounts described in subparagraph (2)(ii)(A) and (B) of this paragraph.

(v) *Illustration.* The application of this subparagraph may be illustrated by the following example:

Example. (a) Throughout the period here involved, A is a United States shareholder of controlled foreign corporation M. M is not a foreign personal holding company, and M uses the calendar year as the taxable year.

(b) The amount described in this subparagraph for M's taxable year 1978 with respect to A is determined as follows, based on the facts shown in the following table:

(1) Investment in less developed country shipping companies on December 31, 1975 (subdivision (ii)(A) amount)	$10,000
(2) § 1.955–1(b)(2)(i)(*b*) limitation for 1976 (previously excluded subpart F income not withdrawn from investment in less developed countries) (subdivision (ii)(B) amount)	50,000
(3) Subdivision (ii) amount (lesser of lines (1) and (2))	10,000
(4) Subdivision (iii) amount: Excess for 1977 of M's previously excluded subpart F income withdrawn from investment in foreign base country shipping operations, $3,000, over the sum of the amounts determined under subparagraphs (2)(i)(A)(*1*) and (*2*) of this paragraph, $1,000	2,000
(5) Excess of line (3) over line (4)	8,000
(6) Sum of M's earnings and profits accumulated for 1962 through 1975, determined on December 31, 1978	26,000
(7) Amount described in this subparagraph for 1978 (lesser of line (5) and line (6))	8,000

(c) For 1978, M's earnings and profits (reduced as provided in § 1.955–1(b)(2)(ii)(*a*)(*1*)) are $19,000, and the amount of M's previously excluded subpart F income withdrawn from investment in less developed countries determined under § 1.955–1(b)) is $42,000. Consequently, $23,000 of M's earnings and profits accumulated for 1962 through 1975 are attributable to such $42,000 amount, and will therefore be excluded under subparagraph (2)(ii))(A)(*2*) of this paragraph from M's earnings and profits accumulated for 1962 through 1975, determined as of December 31, 1979. No other portion of M's earnings and profits accumulated for 1962 through 1975 is distributed or included in the gross income of a United States shareholder in 1978.

(d) The amount described in this subparagraph for M's taxable year 1979 with respect to A is determined as follows, based on the additional facts shown in the following table:

(1) Subdivision (ii) amount (line (3) from paragraph (b) of this example)		$10,000
(2) Subdivision (iii) amount: (i) Excess for 1977 from line (4) of paragraph (b) of this example		2,000
(ii) Plus: excess for 1978 of M's previously excluded subpart F income withdrawn from investment in foreign base country shipping operations, $6,000, over the sum of the amounts determined under subparagraphs (2)(i)(A)(*1*) and (*2*) of this paragraph, $25,000	0	
(iii) Subdivision (iii) amount		2,000
(3) Excess of line (1) over line (2)(iii)		8,000
(4) Sum of M's earnings and profits accumulated for 1962 through 1975, determined on December 31, 1979 ($26,000 minus $23,000)		3,000
(5) Amount described in this subparagraph for 1979 (lesser of line (3) and line (4))		3,000

(4) *Amount excluded.* For purposes of subparagraph (2)(i)(B) of this paragraph, the amount excluded under section 954(b)(2) from the foreign base company income of a controlled foreign corporation for any taxable year beginning after December 31, 1975, is the excess of—

(i) The amount which would have been equal to the subpart F income of such corporation for such taxable year if such corporation had had no increase in qualified investments in foreign base company shipping operations for such taxable year, over

(ii) The subpart F income of such corporation for such taxable year.

(c) *Shareholder's pro rata share of amount withdrawn by controlled foreign corporation*—(1) *In general.* A United States shareholder's pro rata share of a controlled foreign corporation's previously excluded subpart F income withdrawn for any taxable year from investment in foreign base company shipping operations is his pro rata share of the amount withdrawn for such year by such corporation, as determined under paragraph (b) of this section. See section 955(a)(3). Such pro rata share shall be determined in accordance with the principles of §1.195–1(e).

(2) *Special rule.* A United States shareholder's pro rata share of the net amount determined under paragraph (b)(2)(i)(B) of this section with respect to any stock of the controlled foreign corporation owned by such shareholder shall be determined without taking into account any amount attributable to a period prior to the date on which such shareholder acquired such stock. See section 1248 and the regulations thereunder for rules governing treatment of gain from sales or exchanges of stock in certain foreign corporations.

(d) *Illustrations.* The application of this section may be illustrated by the following examples:

Example 1. A, a United States shareholder, owns 60 percent of the only class of stock of M Corporation, a controlled foreign coporation throughout the entire period here involved. Both A and M use the calendar year as a taxable year. The amount of M's previously excluded subpart F income withdrawn for 1978 from investment in foreign base company shipping operations is $40,000, and A's pro rata share of such amount is $24,000 determined as follows based on the facts shown in the following table:

(a) Qualified investments in foreign base company shipping operations at the close of 1977	$125,000
(b) Less: qualified investments in foreign base company shipping operations at the close of 1978 ..	75,000
(c) Balance	50,000
(d) Less: excess of recognized losses ($15,000) over recognized gains ($5,000) on sales during 1978 of qualified investments in foreign base company shipping operations	10,000
(e) Tentative decrease in qualified investment in foreign base company shipping operations for 1978	40,000
(f) Earnings and profits for 1976, 1977, and 1978	45,000
(g) Plus: amount determined under paragraph (b)(3) of this section	0
(h) Earnings and profits limitation	45,000
(i) Excess of amount excluded under section 954(b)(2) from foreign base company income for 1976 ($75,000) over amount of previously excluded subpart F income withdrawn for 1977 from investment in foreign base company shipping operations ($25,000)	50,000
(j) M's amount of previously excluded subpart F income withdrawn for 1978 from investment in foreign base company shipping operations (item (e), but not to exceed the lesser of item (h) or item (i)	40,000
(k) A's pro rata share of M Corporation's amount of previously excluded subpart F in come withdrawn for 1978 from investment in foreign base company shipping operations (60 percent of $40,000)	24,000

Example 2. The facts are the same as in example 1, except that M's earnings and profits (determined under paragraph (b)(2) of this section) for 1976, 1977, and 1978 (item (f)) are $30,000 instead of $45,000. M's amount of previously excluded subpart F income withdrawn for 1978 from investment in foreign base company shipping operations is $30,000. A's pro rata share of such amount is $18,000 (60 percent of $30,000).

Example 3. The facts are the same as in example 1, except that the excess of the amount excluded under section 954(b)(2) for 1976 from M Corporation's foreign base company income over the amount of its previously excluded subpart F income withdrawn for 1977 from investment in foreign base company shipping operations (item (i)) is $20,000 instead of $50,000. M's amount of previously excluded subpart F income withdrawn for 1978 from investment in foreign base company shipping operations is $20,000. A's pro rata share of such amount is $12,000 (60 percent of $20,000).

[T.D. 7894, 48 FR 22530, May 19, 1983; 48 FR 40888, Sept. 12, 1983]

§1.955A–2 Amount of a controlled foreign corporation's qualified investments in foreign base company shipping operations.

(a) *Qualified investments*—(1) *In general.* Under section 955(b), for purposes of sections 951 through 964, a controlled foreign corporation's "qualified investments in foreign base company shipping operations" are investments in—

(i) Any aircraft or vessel, to the extent that such aircraft or vessel is used (or hired or leased for use) in foreign commerce,

(ii) Related shipping assets (within the meaning of paragraph (b) of this section),

(iii) Stock or obligations of a related controlled foreign corporation, to the extent provided in paragraph (c) of this section,

(iv) A partnership, to the extent provided in paragraph (d) of this section, and

(v) Stock or obligations of a less developed country shipping company described in § 1.955–5(b), as provided in paragraph (h) of this section.

(2) *Coordination of provisions.* No amount shall be counted as a qualified investment in foreign base company shipping operations under more than one provision of this section. Thus, for example, if a $10,000 investment in stock of a controlled foreign corporation is treated as a qualified investment in foreign base company shipping operations under both subparagraphs (1)(iii) and (v) of this paragraph, then such $10,000 is counted only once as a qualified investment in foreign base company shipping operations.

(3) *Definitions.* If the meaning of any term is defined or explained in § 1.954–6, then such term shall have the same meaning when used in this section.

(4) *Extent of use.* (i) For purposes of subparagraph (1)(i) of this paragraph and paragraph (b)(1) of this section, the extent to which an asset of a controlled foreign corporation is used during a taxable year in foreign base company shipping operations shall be determined on the basis of the proportion for such year which the foreign base company shipping income derived from the use of such asset bears to the total gross income derived from the use of such asset.

(ii) For purposes of determining under subdivision (i) of this subparagraph the amounts of foreign base company shipping income and gross income of a controlled foreign corporation—

(A) Such amounts shall be deemed to include an arm's length charge (see § 1.954–6(h)(5)) for services performed by such corporation for itself,

(B) Such amounts shall be deemed to include an arm's length charge for the use of an asset (such as a vessel under construction or laid up for repairs) which is held for use in foreign base company shipping operations, but is not actually so used,

(C) Foreign base company shipping income shall be deemed to include amounts earned in taxable years beginning before January 1, 1976, and

(D) The district director shall make such other adjustments to such amounts as are necessary to properly determine the extent to which any asset is used in foreign base company shipping operations.

(b) *Related shipping assets*—(1) *In general.* For purposes of this section, the term ''related shipping asset'' means any asset which is used (or held for use) for or in connection with the production of income described in § 1.954–6(b)(1)(i) or (ii), but only to the extent that such asset is so used (or is so held for use).

(2) *Examples.* Examples of assets of a controlled foreign corporation which are used (or held for use) for or in connection with the production of income described in subparagraph (1) of this paragraph include—

(i) Money, bank deposits, and other temporary investments which are reasonably necessary to meet the working capital requirements of such corporation in its conduct of foreign base company shipping operations,

(ii) Accounts receivable and evidences of indebtedness which arise from the conduct of foreign base company shipping operations by such corporation or by a related person,

(iii) Amounts (other than amounts described in subdivision (i) of this subparagraph) deposited in bank accounts or invested in readily marketable securities pursuant to a specific, definite, and feasible plan to purchase any tangible asset for use in foreign base company shipping operations,

(iv) Amounts paid into escrow to secure the payment of (A) charter hire for an aircraft, vessel, or other asset used in foreign base company shipping operations or (B) a debt which constitutes a specific charge against such an asset,

(v) Capitalized expenditures (such as progress payments) made under a contract to purchase any asset for use in foreign base company shipping operations,

(vi) Prepaid expense and deferred charges incurred in the course of foreign base company shipping operations,

(vii) Stock acquired and retained to insure a source of supplies or services used in the conduct of foreign base company shipping operations, and

(viii) Currency futures acquired and retained as a hedge against international currency fluctuations in connection with foreign base company shipping operations.

(3) *Limitations*—(i) *Vessels generally.* Notwithstanding any other provision of this paragraph, the term ''related shipping assets'' does not include any money or other intangible assets of a controlled foreign corporation, to the extent that such assets are permitted to accumulate in excess of the reasonably anticipated needs of the business.

(ii) *Safe harbor.* If a controlled foreign corporation accumulates money or other intangible assets pursuant to a plan to purchase one or more vessels for use in foreign commerce, and if—

(A) The amount so accumulated, plus

(B) The sum of the amounts accumulated by other controlled foreign corporations which are related persons (within the meaning of section 954(d)(3)) pursuant to similar plans, does not exceed 110 percent of a reasonable down payment on each vessel planned to be purchased within a reasonable period, then such plan will be considered to be feasible. For purposes of the preceding sentence, a reasonable down payment shall not exceed 28 percent of the total cost of acquisition. The determination dates applicable to the taxable year of a controlled foreign corporation are those set forth in paragraph (c)(2)(ii) of this section. In the case of accumulation of assets which do not come within the safe harbor limitation of this subdivision (ii), in determining whether such assets have accumulated beyond the reasonably anticipated needs of the business, factors to be taken into account include, but are not limited to, the availability of financing to purchase a vessel and the availability of a vessel suitable for the purposes to which the vessel is to be put.

(iii) *Other assets.* In determining whether a plan to purchase any asset other than a vessel for use in foreign base company shipping operations is feasible, principles similar to those stated in subdivision (ii) of this subparagraph shall be applied.

(4) *Cross-reference.* See §1.954–7(c) for additional illustrations bearing on the application of this paragraph.

(c) *Stock and obligations*—(1) *In general.* Investments by a controlled foreign corporation (the ''first corporation'') in stock or obligations of a second controlled foreign corporation which is a related person (within the meaning of section 954(d)(3) are considered to be qualified investments in foreign base company shipping operations to the extent that the assets of such second corporation are used (or held for use) in foreign base company shipping operations. See subparagraph (2) of this paragraph. However, an investment in an obligation of the second corporation will not be considered a qualified investment in foreign base company shipping operations if the obligation represents a liability which constitutes a specific charge (nonrecourse or otherwise) against an asset of the second corporation which is not either—

(i) An aircraft or vessel used (or held for use) to some extent in foreign commerce, or

(ii) An asset described in paragraphs (a)(1)(ii) through (v) of this section.

(2) *Extent of use.* On any determination date applicable to a taxable year of the first corporation, the extent to which the assets of the second corporation are used in foreign base company shipping operations shall be determined on the basis of the proportion which the amount of such second corporation's qualified investments in foreign base company shipping operations bears to its net worth, such proportion to be determined at the close of the second corporation's last taxable year which ends on or before such determination date. For purposes of the preceding sentence—

(i) A controlled foreign corporation's net worth is the total adjusted basis of the corporate assets reduced by the total outstanding principal amount of the corporate liabilities, and

(ii) The determination dates applicable to a taxable year of a controlled foreign corporation are—

(A) Except as provided in (B) of this subdivision, the close of such taxable year and the close of the preceding taxable year, and

(B) With respect to a United States shareholder who has made an election under section 955(b)(3) to determine such corporation's increase in qualified investments in foreign base company shipping operations at the close of the following taxable year, the close of such taxable year and the close of the taxable year immediately following such taxable year.

(3) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. On December 31, 1976, controlled foreign corporation X owns 100 percent of the single class of stock of controlled foreign corporation Y. X and Y both use the calendar year as the taxable year. On December 31, 1976, Y's assets consist of a vessel used in foreign commerce, related shipping assets, and other assets unrelated to its foreign base company shipping operations. On such date Y has qualified investments in foreign base company shipping operations (determined under paragraph (g) of this section) of $60,000, and a net worth of $100,000. If X's investment in the stock of Y is $50,000, then $30,000 of such amount, i.e.,

$$\frac{\$60,000}{\$100,000} \times \$50,000$$

is a qualified investment in foreign base company shipping operations.

Example 2. The facts are the same as in example 1, except that on December 31, 1976, Y's assets consist entirely of a vessel used in foreign commerce and related shipping assets, Y has qualified investments in foreign base company shipping operations (determined under paragraph (g) of this section) of $16,000 and (therefore) a net worth of $16,000. If X's investment in the stock of Y is $50,000, then the entire $50,000, i.e.,

$$\frac{\$16,000}{\$16,000} \times \$50,000$$

is a qualified investment in foreign base company shipping operations.

Example 3. On December 31, 1980, controlled foreign corporation J owns two notes of controlled foreign corporation K, which is a related person (within the meaning of section 954(d)(3)). Both J and K use the calendar year as the taxable year. J's adjusted basis in each of the two notes is $100,000. The first note is secured only by the general credit of K. The second note is secured by (and, therefore, constitutes a specific charge on) a hotel owned by K in a foreign country. On December 31, 1980, K has qualified investments in foreign base company shipping operation with an adjusted basis of $500,000 (before applying the rules of paragraph (g) of this section). The adjusted basis of all of K's corporate assets is $1,100,000. K's only liabilities are the two notes. The amount of K's qualified investments in foreign base company shipping operations (determined under paragraph (g) of this section) is $450,000. K's net worth is $900,000. The amount of J's qualified investment in foreign base company shipping operations in respect of the first note is $50,000, *i.e.*,

$$\frac{\$450,000}{\$900,000} \times \$100,000$$

The amount of J's qualified investment in respect of the second note is zero (see the last sentence of paragraph (c)(1) of this section).

(d) *Partnerships*—(1) *In general.* A controlled foreign corporation's investment in a partnership at the close of any taxable year of such corporation shall be considered a qualified investment in foreign base company shipping operations to the extent of the proportion which such corporation's foreign base company shipping income for such taxable year would bear to its gross income for such taxable year if—

(i) Such corporation had realized no income other than its distributive share of the partnership gross income, and

(ii) Such corporation's income were adjusted in accordance with the rules stated in paragraphs (a)(4)(ii)(B) and (D) of this section.

(2) *Transitional rule.* For purposes of subparagraph (1)(i) of this paragraph, the controlled foreign corporation's distributive share of the partnership gross income shall not include any amount attributable to income earned by the partnership before the first day of such corporation's first taxable year beginning after December 31, 1975.

(3) *Cross-reference.* See paragraph (g)(4) of this section for rules relating to the determination of the amount of a controlled foreign corporation's investment in a partnership.

(e) *Trusts*—(1) *In general.* An investment in a trust is not a qualified investment in a foreign base company shipping operations.

(2) *Grantor trusts.* Notwithstanding subparagraph (1) of this pargraph, if a controlled foreign corporation is treated as the owner of any portion of a trust under subpart E of part I of subchapter J (relating to grantors and others treated as substantial owners), then for purposes of this section such controlled foreign corporation is deemed to be the actual owner of such portion of the assets of the trust. Accordingly, its investments in such assets (as determined under paragraph (g)(5) of this section) may be treated as a qualified investment in foreign base company shipping operations.

(3) *Definitions.* For purposes of this section, the term ''trust'' means a trust as defined in §301.7701–4.

(f) *Excluded property.* For purposes of paragraph (a) of this section, property acquired principally for the purpose of artificially increasing the amount of a controlled foreign corporation's qualified investments in foreign base company shipping operations will not be recognized; whether an item of property is acquired principally for such purpose will depend upon all the facts and circumstances of each case. One of the factors that will be considered in making such a determination with respect to an item of property is whether the item is disposed of within 6 months after the date of its acquisition.

(g) *Amount attributable to property*—(1) *General rule.* For purposes of this section, the amount taken into account under section 955(b)(4) with respect to any property which constitutes a qualified investment in foreign base company shipping operations shall be its adjusted basis as of the applicable determination date, reduced by the outstanding principal amount of any liability (other than a liability described in subparagraph (2) of this paragraph) to which such property is subject on such date including a liability secured only by the general credit of the controlled foreign corporation. Liabilities shall be taken into account in the following order:

(i) The adjusted basis of each and every item of corporate property shall be reduced by any specific charge (nonrecourse or otherwise) to which such item is subject. For this purpose, if a liability constitutes a specific charge against several items of property and cannot definitely be allocated to any single item of property, the specific charge shall be apportioned against each of such items of property in that ratio which the adjusted basis of such item on the applicable determination date bears to the adjusted basis of all such items on such date. The excess against property over the adjusted basis of such property shall be taken into account as a liability secured only by the general credit of the corporation.

(ii) A liability which is evidenced by an open account or which is secured only by the general credit of the controlled foreign corporation shall be apportioned against each and every item of corporate property in that ratio which the adjusted basis of such item on the applicable determination date (reduced as provided in subdivision (i) of this subparagraph) bears to the adjusted basis of all the corporate property on such date (reduced as provided in subdivision (i) of this subparagraph); provided that no liability shall be apportioned under this subdivision against any stock or obligations described in paragraph (h)(1) of this section.

(2) *Excluded charges.* For purposes of subparagraph (1) of this paragraph, a liability created principally for the purpose of artificially increasing or decreasing the amount of a controlled foreign corporation's qualified investments in foreign base company shipping operations will not be recognized. Whether a liability is created principally for such purpose will depend upon all the facts and circumstances of each case. One of the factors that will be considered in making such a determination with respect to a loan is whether the loan was both created after November 20, 1974, and is from a related person, as defined in section 954(d)(3) and paragraph (e) of §1.954–1. Another such factor is whether the liability was created after March 29, 1975, in a taxable year beginning before January 1, 1976. For purposes of this

paragraph (g)(2), payments on liabilities which are represented by an open account are credited against the account transactions arising earliest in time.

(3) *Statement required.* If for purposes of this section the adjusted basis of property which constitutes a qualified investment in foreign base company shipping operations by a controlled foreign corporation is reduced on the ground that such property is subject to a liability, each United States shareholder shall attach to his return a statement setting forth the adjusted basis of the property before the reduction and the amount and nature of the reduction.

(4) *Partnership interest.* If a controlled foreign corporation is a partner in a partnership, its investment in the partnership taken into account under section 955(b)(4) shall be its adjusted basis in the partnership determined under section 722 or 742, adjusted as provided in section 705, and reduced as provided in subparagraph (1) of this paragraph. (However, if the partnership is not engaged solely in the conduct of foreign base company shipping operations, such amount shall be taken into account only to the extent provided in paragraph (d)(1) of this section).

(5) *Grantor trust.* If a controlled foreign corporation is deemed to own a portion of the assets of a trust under paragraph (e)(2) of this section then the amount taken into account under section 955 (b)(4) with respect to such assets shall be determined as provided in subparagraph (1) of this paragraph by the application of the following rules:

(i) Such controlled foreign corporation's adjusted basis in such assets shall be deemed to be a proportionate share of the trust's adjusted basis in such assets, and

(ii) A proportionate share of the liabilities of the trust shall be deemed to be liabilities of such controlled foreign corporation and to constitute specific charges against such assets.

(6) *Translation into United States dollars.* The amounts determined in accordance with this paragraph shall be translated into United States dollars in accordance with the principles of § 1.964–1(e)(4).

(h) *Investments in shipping companies under prior law*—(1) *In general.* If an amount invested in stock or obligations of a less developed country shipping company described in § 1.955–5(b) is treated as a qualified investment in less developed countries under § 1.955–2 (applied without regard to paragraph (b)(5)(ii) thereof) on the applicable determination date for purposes of section 954(g) or section 955(a)(2) with respect to a taxable year beginning after December 31, 1975, then such amount shall be treated as a qualified investment in foreign base company shipping operations on such determination date. See section 955(b)(5).

(2) *Effect on prior law.* See § 1.955–2(b)(5)(ii) for the rule that investments which are treated as qualified investments in foreign base company shipping operations under subparagraph (1) of this paragraph shall not be treated as qualified investments in less developed countries for purposes of section 951(a)(1)(A)(ii).

(3) *Illustration.* The application of this paragraph may be illustrated by the following example:

Example. (a) Throughout the period here involved, controlled foreign corporation X owns 100 percent of the single class of stock of controlled foreign corporation Y, X and Y each use the calendar years as the taxable year. At the close of 1975, X's $50,000 investment in the stock of Y is treated as a qualified investment in less developed countries under § 1.955–2 (applied without regard to § 1.955–2(b)(5)(ii), and Y is a less developed country shipping company described in § 1.955–5(b).

(b) On December 31, 1976, Y is still a less developed country shipping company and X's $50,000 investment in the stock of Y is still treated as a qualified investment in less developed countries under § 1.955–2 (applied without regard to § 1.955–2(b)(5)(ii). Under subparagraph (1) of this paragraph X's entire $50,000 investment in the stock of Y is treated as a qualified investment in foreign base company shipping operations.

(c) For 1977, Y's gross income is $10,000 and Y's foreign base company shipping income is $7,500. Since Y fails to meet the 80-percent income test of § 1.955–5(b)(1), Y is no longer a less developed country shipping company described in § 1–955–5(b), and X's investment in the stock of Y is no longer treated as a qualified investment in less developed countries under § 1.955–2 (applied without regard to § 1.955–2(b)(5)(ii). However, assume that on December 31, 1977, Y's net worth (as defined in paragraph (c)(2)(1) of this section) is $100,000, that Y's qualified investments in foreign base company shipping operations (determined under this section) on December 31, 1977, are $75,000, and that X's investment in the stock of Y (as determined under paragraph (g) of this section) continues to be $50,000. Then $67,500, i.e.,

$$\frac{\$75,000}{\$100,000}\times\$50,000$$

of X's $50.000 investment in the stock of Y is treated as a qualified investment in foreign company shipping operations under paragraph (c) of this section.

(d) For 1978, all of Y's gross income is foreign base company shipping income. Although Y is again a less developed country shipping company described in §1.955–5(b), X's investment in the stock of Y is no longer treated as a qualified investment in less developed countries under §1.955–2(b)(5)(iii). Thus, X's investment in the stock of Y is not treated as a qualified investment in foreign base company shipping operations under subparagraph (1) of this paragraph. However, X's investment in the stock of Y may be so treated under another provision of this section, as was the case in item (c) of this example.

(Secs. 955 (b)(2) and 7805 of the Internal Revenue Code of 1954 (89 Stat. 63; 26 U.S.C. 955(b)(2), and 68A Stat. 917; 26 U.S.C. 7805))

[T.D. 7894, 48 FR 22532, May 19, 1983; 48 FR 40888, Sept. 12, 1983, as amended by T.D. 7959, 49 FR 22280, May 29, 1984]

§1.955A–3 Election as to qualified investments by related persons.

(a) *In general.* If a United States shareholder elects the benefits of section 955(b) 2 with respect to a related group (as defined in paragraph (b)(1) of this section) of controlled foreign corporations, then an investment in foreign base company shipping operation made by one member of such group will be treated as having been made by another member to the extent provided in paragraph (c)(4) of this section, and each member will be subject to the other provisions of paragraph (c) of this section. An election once made shall apply for the taxable year for which it is made and for all subsequent years unless the election is revoked or a new election is made to add one or more controlled foreign corporations to election coverage. For the manner of making an election under section 955(b)(2), and for rules relating to the revocation of such an election, see paragraph (d) of this section. For rules relating to the coordination of sections 955(b)(2) and 955(b)(3), see paragraph (e) of this section.

(b) *Related group*—(1) *Related group defined.* The term "related group" means two or more controlled foreign corporations, but only if all of the following requirements are met:

(i) All such corporations use the same taxable year.

(ii) The same United States shareholder controls each such corporation within the meaning of section 954(d)(3) at the end of such taxable year, and

(iii) Such United States shareholder elects to treat such corporations as a related group.

(iv) If any of the corporations is on a 52–53 week taxable year and if all of the taxable years of the corporations end within the same 7-day period, the rule of paragraph (b)(1)(i) of this section shall be deemed satisfied.

(v) An election under paragraph (b)(1)(iii) of this section will not be valid in the case of an election by a U.S. shareholder (the "first U.S. shareholder") if—

(A) The first U.S. shareholder controls a second U.S. shareholder,

(B) The second U.S. shareholder controls one or more controlled foreign corporations, and

(C) Any of the controlled foreign corporations are the subject of the election by the first U.S. shareholder,

unless the second U.S. shareholder consents to the election by the first U.S. shareholder.

(2) *Group taxable years defined.* The "group taxable year" is the common taxable year of a related group.

(3) *Limitation.* If a United States shareholder elects to treat two or more corporations as a related group for a group taxable year (the "first group taxable year"), then such United States shareholder (and any other United States shareholder which is controlled by such shareholder) may not also elect to treat two or more other corporations as a related group for a group taxable year any day of which falls within the first group taxable year.

(4) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example 1. Domestic corporation M owns 100 percent of the only class of stock of controlled foreign corporations A, B, C, D, and E. A, B, and C use the calendar year as the taxable year. D and E use the fiscal year ending on June 30 as the taxable year. M may elect to treat A, B and C as a related group. However, M may not elect to treat C, D, and E as a related group.

Example 2. The facts are the same as in example 1. In addition, M elects to treat A, B, and C as a related group for the group taxable year which ends on December 31, 1976. M may not also elect to treat D and E as a related group for the group taxable year ending on June 30, 1977.

Example 3. United States shareholder A owns 60 percent of the only class of stock of controlled foreign corporation X and 40 percent of the only class of stock of controlled foreign corporation Y. United States shareholder B owns the other 40 percent of the stock of X and the other 60 percent of the stock of Y. Neither A nor B (nor both together) may elect to treat X and Y as a related group.

(c) *Effect of election.* If a United States shareholder elects to treat two or more controlled foreign corporations as a related group for any group taxable year then, for purposes of determining the foreign base company income (see § 1.954–1) and the increase or decrease in qualified investments in foreign base company shipping operations (see §§ 1.954–7. 1.955A–1, and 1.955A–4) of each member of such group for such year, the following rules shall apply:

(1) *Intragroup dividends.* The gross income of each member of the related group shall be deemed not to include dividends received from any other member of such group, to the extent that such dividends are attributable (within the meaning of § 1.954–6(f)(4)) to foreign base company shipping income. In determining net foreign base company shipping income, deductions allocable to intragroup dividends attributable to foreign base company shipping income shall not be allowed.

(2) *Group excess deduction.* (i) The deductions allocable under § 1.954–1(c) to the foreign base company shipping income of each member of the related group shall be deemed to include such member's pro rata share of the group excess deduction.

(ii) The group excess deduction for the group taxable year is the sum of the excesses for each member of the related group (having an excess) of—

(A) The member's deductions (determined without regard to this subparagraph) allocable to foreign base company shipping income for such year, over

(B) The member's foreign base company shipping income for such year.

(iii) A member's pro rata share of the group excess deduction is the amount which bears the same ratio to such group excess deduction as—

(A) The excess of such member's foreign base company shipping income over the deductions (so determined) allocable thereto, bears to

(B) The sum of such excesses for each member of the related group having an excess.

(iv) For purposes of this subparagraph, ''foreign base company shipping income'' means foreign base company shipping income (as defined in § 1.954–6), reduced by excluding therefrom all amounts which are—

(A) Excluded from subpart F income under section 952(b) (relating to exclusion of United States income) or

(B) Excluded from foreign base company income under section 954(b)(4) (relating to exception for foreign corporation not availed of to reduce taxes).

(v) The application of this subparagraph may be illustrated by the following example:

Example. Controlled foreign corporations X, Y, and Z are a related group for calendar year 1976. The excess group deduction for 1976 is $9, X's pro rata share of the group excess deduction is $6, and Y's pro rata share is $3, determined as follows on the basis of the facts shown in the following table:

	X	Y	Z	Group
(1) Gross shipping income	$100	$90	$90	....
(2) Shipping deductions	60	70	80	....
(3) Net shipping income	40	20	(9)	....
(4) Group excess deduction	....	....	....	80
(5) X's pro rata share of group excess deduction ($9×$40/$60)	6	....	....	....
(6) Y's pro rata share of group excess deduction ($9×$20/$60)	....	3	....	....

(3) *Intragroup investments.* On both of the determination dates applicable to

the group taxable year for purposes of section 954(g) or section 955(a)(2), the qualified investments in foreign base company shipping operations of each member of the related group shall be deemed not to include stock of any other member of the related group. In addition, neither the gains nor the losses on dispositions of such stock during the group taxable year shall be taken into account under §1.955A–1(b)(1)(ii) in determining the decrease in qualified investments in foreign base company shipping operations of any member of such related group.

(4) *Group excess investment.* (i) On the later (and only the later) of the two determination dates applicable to the group taxable year for purposes of section 954(g) or section 955(a)(2), the qualified investments in foreign base company shipping operations of each member of the related group shall be deemed to include such member's pro rata share of the group excess investment.

(ii) The group excess investment for the group taxable year is the sum of the excess for each member of the related group (having an excess) of—

(A) The member's increase in qualified investments in foreign base company shipping operations (determined under §1.954–7 after the application of subparagraph (3) of this paragraph) for such year, over

(B) The member's foreign base company shipping income for such year.

(iii) A member's pro rata share of the group excess investment is the amount which bears the same ratio to such group excess investment as—

(A) Such member's shortfall, in qualified investments bears to

(B) the sum of the shortfalls in qualified investments of each member of such related group having a shortfall.

(iv) If a member has an increase in qualified investments in foreign base company shipping operations (determined as provided in §1.954–7 after the application of subparagraph (3) of this paragraph) for the group taxable year, then such member's ''shortfall in qualified investments'' is the excess of—

(A) Such member's foreign base company shipping income for such year, over

(B) Such increase.

(v) If a member has a decrease in qualified investments in foreign base company shipping operations (determined under §1.955A–1(b)(1) or §1.955A–4(a), whichever is applicable, after the application of subparagraph (3) of this paragraph) for the group taxable year, then such member's ''shortfall in qualified investments'' is the sum of—

(A) Such member's foreign base company shipping income for such year and

(B) Such decrease.

(vi) For purposes of this subparagraph, ''foreign base company shipping income'' means foreign base company shipping income (as defined in subparagraph (2)(iv) of this paragraph), reduced by the deductions allocable thereto under §1.954–1(c) (including the additional deductions described in subparagraph (2) of this paragraph).

(vii) The application of paragraphs (c)(1), (3), and (4) of this section may be illustrated by the following example:

Example. (a) Controlled foreign corporations R, S, and T are a related group for calendar year 1977. R and S do not own the stock of any member of the related group.

(b) On December 31, 1977, T has qualified investments in foreign base company shipping operations (determined without regard to paragraphs (c)(3) and (4)) of $105, of which $15 consists of stock of S. After application of paragraph (c)(3) (but before application of paragraph (c)(4)), on December 31, 1977, T has qualified investments in foreign base company shipping operations of $90, determined as follows:

(1) Qualified investments (determined without regard to paragraph (c)(3)) on December 31, 1977	$105
(2) Less: Qualified investments in stock of another member of a related group (as required by paragraph (c)(3))	15
(3) Balance	90

(c) During 1977, T's foreign base company shipping income is $180, determined without regard to paragraph (c)(1). Included in the $180 is $5 in dividends in respect of T's stock in S. During 1977, T has shipping deductions of $91. Of T's shipping deductions, $1 is allocable to the dividends from S. After application of paragraph (c)(1), T's net shipping income during 1977 is $85, determined as follows:

(1) Foreign base company shipping income ...	....	$180
(2) Less: intragroup dividends (as required by paragraph (c)(1))	....	5
(3) Balance	....	175
(4) Shipping deductions	$91	....

(5) Less: deductions allocable to intragroup dividends (as required by paragraph (c)(1))	1	....
(6) Balance	90	....
(7) Net shipping income (line (3) minus line (6))	....	85

(d) During 1977 (without regard to paragraph (c)(4)), R's increase in qualified investments in foreign base company shipping operations is $120; S's decrease is $55; and T's increase is $35, determined on the basis of the facts shown in the following table. In all cases, the listed amounts of qualified investments on December 31, 1976, reflect any adjustments required by paragraph (c)(3) for 1976, but not any adjustment required by paragraph (c)(4) for 1976 (see §§ 1.955A–3 (c)(3) and (4)(i)).

	R	S	T
(1) Qualified investments on December 31, 1977 (in the case of T, taken from line (3) of part (b) of this example)	$220	$150	$90
(2) Qualified investments on December 31, 1976	100	205	55
(3) Increase (decrease) (line (1) minus line (2))	120	(55)	35

(e) In 1977, R's net shipping income is $100; S's is $95; and T's is $85, determined as follows:

	R	S	T
(1) Gross foreign base company shipping income (in the case of T, taken from line (3) of part (c) of this example)	$200	$180	$175
(2) Shipping deductions (in the case of T, taken from line (6) of part (c) of this example)	100	85	90
(3) Net shipping income (line (1) minus line (2))	100	95	85

(f) By application of paragraph (c)(4) for 1977, S's pro rata share of the group excess investment is $15, and T's pro rata share is $5, determined as follows:

	R	S	T	Group
(1) Net shipping income (taken from line (3) of part (e) of this example)	$100	$95	$85	....
(2) Increase (decrease) in qualified investments (taken from line (3) of part (d) of this example)	120	(55)	35	....
(3) Excess investment	20	....	....	$20
(4) Shortfall	....	150	50	200
(5) S's pro rata share of group excess investment ($20×$150/$200)	....	15	....	....
(6) T's pro rata share of group excess investment ($20×$50/$200)	....	....	5	....

(g) After application of paragraph (c)(4), for purposes of determining their increase or decrease in qualified investments in foreign base company shipping operations for 1977, on December 31, 1977, the amount of R's qualified investments is $200; the amount of S's is $165; and the amount of T's is $95, determined as follows:

	R	S	T
(1) Qualified investments on December 31, 1977 (taken from line (1) of part (d) of this example)	$220	$150	$90
(2) Plus: pro rata share of group excess investment (as required by paragraph (c)(4)) (taken from lines (5) and (6) of part (f) of this example)	....	15	5
(3) Minus: Excess investment treated as investments of related group members (taken from line (3) of part (f) of this example)	20	....	....
(4) Total qualified investments	200	165	95

(h) After application of paragraph (c)(1), (3), and (4), during 1977, R's increase in qualified investments in foreign base company shipping operations is $100; S's decrease is $40; and T's increase is $40, determined as set forth in the table below. In all cases, the listed amounts of qualified investments on December 31, 1976, reflect any similar adjustments required by paragraph (c)(3) for 1976, but not any adjustment required by paragraph (c)(4) for 1976 (see § 1.955A–3(c)(3) and (4)(i)).

	R	S	T
(1) Qualified investments on December 31, 1977 (taken from line (4) of part (g) of this example)	$200	$165	$95
(2) Qualified investments on December 31, 1976 (see line (2) of part (d) of this example)	100	205	55
(3) Increase (decrease) (line (1) minus line (2))	100	(40)	40

(5) *Collateral effect.* (i) An election under this section by a United States shareholder to treat two or more controlled foreign corporations as a related group for a group taxable year shall have no effect on—

(A) Any other United States shareholder (including a minority shareholder of a member of such related group).

(B) Any other controlled foreign corporation, and

(C) The foreign personal holding company income, foreign base company sales income, and foreign base company services income, and the deductions allocable under §1.954–1(c) thereto, of any member of such related group.

(ii) See §1.952–1(c)(2)(ii) for the effect of an election under this section on the computation of earnings and profits and deficits in earnings and profits under section 952 (c) and (d).

(iii) The application of this subparagraph may be illustrated by the following example:

Example. United States shareholder A owns 80 percent of the only class of stock of controlled foreign corporations X and Y. United States shareholder B owns the other 20 percent of the stock of X and Y. X and Y both use the calendar year as the taxable year. A elects to treat X and Y as a related group for 1977. For purposes of determining the amounts includible in B's gross income under section 951(a) in respect of X and Y, the election made by A shall be disregarded and all of B's computations shall be made without regard to this section, as illustrated in §1.952–3(d).

(d) *Procedure*—(1) *Time and manner of making election.* A United States shareholder shall make an election under this section to treat two or more controlled foreign corporations as a related group for a group taxable year and subsequent years by filing a statement to such effect with the return for the taxable year within which or with which such group taxable year ends. The statement shall include the following information:

(i) The name, address, taxpayer identification number, and taxable year of the United States shareholder;

(ii) The name, address, and taxable year of each controlled foreign corporation which is a member of the related group and is to be subject to the election; and

(iii) A schedule showing the calculations by which the amounts described in this section have been determined for the taxable year for which the election is first effective. With respect to each subsequent taxable year to which the election applies, a new schedule showing calculations of such amounts for that taxable year must be filed with the return for that taxable year. A consent to an election required by paragraph (b)(1)(v) of this section shall include the same information required for the election statement.

(2) *Revocation.* (i) Except as provided in subdivision (ii) of this subparagraph, an election under this section by a United States shareholder shall be binding for the group taxable year for which it is made and for subsequent years.

(ii) Upon application by the United States shareholder (and any other United States shareholder controlled by such shareholder which consented under paragraph (b)(1)(v) of this section to the election), an election made under this section may, subject to the approval of the Commissioner, be revoked. An application to revoke the election, as of a specified group taxable year, with respect to one or more (but not all) controlled foreign corporations, subject to an election shall be deemed to be an application to revoke the election. Approval will not be granted unless a material and substantial change in circumstances occurs which could not have been anticipated when the election was made. The application for consent to revocation shall be made by mailing a letter for such purpose to Commissioner of Internal Revenue, Attention: T:C:C, Washington, DC 20224, containing a statement of the facts which justify such consent. If a member of a related group subject to an election ceases to meet the requirements of paragraph (b) of this section for membership in the group by reason of any action taken by it or any member of the group or the electing United States shareholder, then the election will be deemed to be revoked as of the beginning of the taxable year in which such action occurred. If such action is taken principally for the purpose of revoking the election without applying for and obtaining the approval of the Commissioner to the revocation, then no further election covering any member of that related group may be made by any United States shareholder for the remainder of the taxable year in which the action occurred and the five succeeding taxable years.

(e) *Coordination with section 955(b)(3).* If a United States shareholder elects under this section to treat two or more controlled foreign corporations as a related group for any taxable year, and if such United States shareholder is required under §1.955A–4(c)(2) for purposes of filing any return to estimate the qualified investments in foreign base company shipping operations of any member of such group, then such United States shareholder shall, for purposes of filing such return, determine the amount includible in his gross income in respect of each member of such related group on the basis of such estimate. If the actual amount of such investments is not the same as the amount of the estimate, the United States shareholder shall immediately notify the Commissioner. The Commissioner will thereupon redetermine the amount of tax of such United States shareholder for the year or years with respect to which the incorrect amount was taken into account. The amount of tax, if any, due upon such redetermination shall be paid by the United States shareholder upon notice and demand by the district director. The amount of tax, if any, shown by such redetermination to have been overpaid shall be credited or refunded to the United States shareholder in accordance with the provisions of sections 6402 and 6511 and the regulations thereunder. If a United States shareholder elects under this section and if the United States shareholder has made an election under section 955(b)(3) as to at least one member of the related group, then the qualified investment amounts necessary for the calculations of paragraphs (c)(3) and (4) of this section shall be obtained, for each member of the related group, as of the determination dates applicable to each of the members.

(f) *Illustrations.* The application of this section may be illustrated by the following examples:

Example 1. (a) Controlled foreign corporations X and Y are wholly owned subsidiaries of domestic corporation M, X and Y use the calendar year as the taxable year. For 1977, X and Y are not export trade corporations (as defined in section 971(a)), nor have they any income derived from the insurance of United States risks (within the meaning of section 963(a)). M does not elect to treat X and Y as a related group for 1977.

(b) For 1977, X and Y each have gross income (determined as provided in §1.951–6(h)(1)) of $1,000. X's foreign base company income is $20 and Y's foreign base company imcome is $0, determined as follows, based on the facts shown in the following table:

	X	Y
(1) Foreign lease company shipping income	$1,000	$1,000
(2) Less: amounts excluded from subpart F income under section 952(b) (relating to U.S. income) and amounts excluded from foreign base company income under section 945(b)(4) (relating to corporation not availed of to reduce taxes)	0	0
(3) Balance	1,000	1,000
(4) Less: deductions allocable under §1.954–1(c) to balance	800	1,040
(5) Remaining balance	200	0
(6) Less: Increase in qualified investments in foreign base company shipping operations	180	....
(7) Foreign base company income	20	....

(c) For 1977, Y has a withdrawal of previously excluded Subpart F income from investment in foreign base company shipping operations of $20, determined as follows, on the basis of the facts shown in the following table:

(1) Qualified investments in foreign base company shipping operations at December 31, 1976	$1,210
(2) Less: qualified investments in foreign base company shipping operations at December 31, 1977	1,170
(3) Balance	40
(4) Less: excess of recognized losses over recognized gains on sales during 1977 of qualified investments in foreign base company shipping operations	20
(5) Tentative decrease in qualified investments in foreign base company shipping operations for 1977	20
(6) Limitation described in §1.955A–1(b)(2)	160
(7) Y's amount of previously excluded subpart F income withdrawn from investment in foreign base company shipping operations (lesser of lines (5) and (6))	20

Example 2. (a) The facts are the same as in example 1, except that M does elect to treat X and Y as a related group for 1977.

(b) The group excess deduction, which is solely attributable to Y's net shipping loss, is $40 (i.e., $1,040 − $1,000). Since X is the only member of the related group with net shipping income, X's pro rata share of the group excess deduction is the entire $40 amount.

(c) X's foreign base company income for 1977 is zero, determined as follows:

(1) Preliminary net foreign base company shipping income (line (b)(5) of example 1)	$200
(2) Less: X's pro rata share of group excess deduction	40

(3) Remaining balance	160
(4) Less: increase in qualified investments in foreign base company shipping operations	180
(5) Foreign base company income	0

(d) The group excess investment, which is solely attributable to X's excess investment, is $20 (i.e., $180 minus $160). Since Y is the only member of the related group with a shortfall in qualified investments, Y's share of the group excess investment is the entire $20 amount.

(e) During 1976 and 1977, Y owns no stock of X. Y's withdrawal of previously excluded subpart F income from investment in foreign base company shipping operations for 1977 is zero, determined as follows:

(1) Qualified investments at December 31, 1976	$1,210
(2)(i) Qualified investments at December 31, 1977 (determined without regard to paragraph (c)(4) of this section)	1,170
(ii) Y's pro rata share of group excess investment	20
(iii) Total qualified investments at December 31, 1977 (Line (i) plus line (ii)	1,190
(3) Balance (line (1) minus line (2)(iii)	20
(4) Less: excess of recognized losses over recognized gains on sales during 1977 of qualified investments in foreign base company shipping operations	20
(5) Decrease in qualified investments for 1977	0

(Secs. 955 (b)(2) and 7805 of the Internal Revenue Code of 1954 (89 Stat. 63; 26 U.S.C. 955(b)(2), and 68A Stat. 917; 26 U.S.C. 7805))

[T.D. 7894, 48 FR 22535, May 19, 1983; 48 FR 40888, Sept. 12, 1983, as amended by T.D. 7959, 49 FR 22280, May 29, 1984]

§1.955A–4 Election as to date of determining qualified investment in foreign base company shipping operations.

(a) *Nature of election.* In lieu of determining the increase under the provisions of section 954(g) and §1.954–7(a) or the decrease under the provisions of section 955(a)(2) and §1.955A–1(b) in a controlled foreign corporation's qualified investments in foreign base company shipping operations for a taxable year in the manner provided in such provisions, a United States shareholder of such controlled foreign corporation may elect, under the provisions of section 955(b)(3) and this section, to determine such increase in accordance with the provisions of §1.954–7(b) and to determine such decrease by ascertaining the amount by which—

(1) Such controlled foreign corporation's qualified investments in foreign base company shipping operations at the close of such taxable year exceed its qualified investments in foreign base company shipping operations at the close of the taxable year immediately following such taxable year, and reducing such excess by

(2) The amount determined under §1.955A–1(b)(1)(ii) for such taxable year subject to the limitation provided in §1.995A–1(b)(2) for such taxable year. An election under this section may be made with respect to each controlled foreign corporation with respect to which a person is a United States shareholder within the meaning of section 951(b), but the election may not be exercised separately with respect to the increases and the decreases of such controlled foreign corporation. If an election is made under this section to determine the increase of a controlled foreign corporation in accordance with the provisions of §1.954–7(b), subsequent decreases of such controlled foreign corporation shall be determined in accordance with this paragraph and not in accordance with §1.955A–1(b).

(b) *Time and manner of making election*—(1) *Without consent.* An election under this section with respect to a controlled foreign corporation shall be made without the consent of the Commissioner by a United States shareholder's filing a statement to such effect with his return for his taxable year in which or with which ends the first taxable year of such controlled foreign corporation in which—

(i) Such shareholder is a United States shareholder, and

(ii) Such controlled foreign corporation realizes foreign base company shipping income, as defined in §1.954–6.

The statement shall contain the name and address of the controlled foreign corporation and identification of such first taxable year of such corporation.

(2) *With consent.* An election under this section with respect to a controlled foreign corporation may be made by a United States shareholder at any time with the consent of the Commissioner. Consent will not be granted unless the United States shareholder and the Commissioner agree to the terms, conditions, and adjustments

under which the election will be effected. The application for consent to elect shall be made by the United States shareholder's mailing a letter for such purpose to the Commissioner of Internal Revenue, Washington, DC 20224. The application shall be mailed before the close of the first taxable year of the controlled foreign corporation with respect to which the shareholder desires to compute an amount described in section 954(b)(2) in accordance with the election provided in this section. The application shall include the following information.

(i) The name, address, and taxpayer identification number, and taxable year of the United States shareholder;

(ii) The name and address of the controlled foreign corporation;

(iii) The first taxable year of the controlled foreign corporation for which income is to be computed under the election;

(iv) The amount of the controlled foreign corporation's qualified investments in foreign base company shipping operations at the close of its preceding taxable year; and

(v) The sum of the amounts excluded under section 954(b)(2) and §1.954–1(b)(1) from the foreign base company income of the controlled foreign corporation for all prior taxable years during which such shareholder was a United States shareholder of such corporation and the sum of the amounts of its previously excluded subpart F income withdrawn from investment in foreign base company shipping operations for all prior taxable years during which such shareholder was a United States shareholder of such corporation.

(c) *Effect of election*—(1) *General.* Except as provided in subparagraphs (3) and (4) of this paragraph, an election under this section with respect to a controlled foreign corporation shall be binding on the United States shareholder and shall apply to all qualified investments in foreign base company shipping operations acquired, or disposed of, by such controlled foreign corporation during the taxable year following its taxable year for which income is first computed under the election and during all succeeding taxable years of such corporation.

(2) *Returns.* Any return of a United States shareholder required to be filed before the completion of a period with respect to which determinations are to be made as to a controlled foreign corporation's qualified investments in foreign base company shipping operations for purposes of computing such shareholder's taxable income shall be filed on the basis of an estimate of the amount of the controlled foreign corporation's qualified investments in foreign base company shipping operations at the close of the period. If the actual amount of such investments is not the same as the amount of the estimate, the United States shareholder shall immediately notify the Commissioner. The Commissioner will thereupon redetermine the amount of tax of such United States shareholder for the year or years with respect to which the incorrect amount was taken into account. The amount of tax, if any, due upon such redetermination shall be paid by the United States shareholder upon notice and demand by the district director. The amount of tax, if any, shown by such redetermination to have been overpaid shall be credited or refunded to the United States shareholder in accordance with the provisions of sections 6402 and 6511 and the regulations thereunder.

(3) *Revocation.* Upon application by the United States shareholder, the election made under this section may, subject to the approval of the Commissioner, be revoked. Approval will not be granted unless the United States shareholder and the Commissioner agree to the terms, conditions, and adjustments under which the revocation will be effected. Unless such agreement provides otherwise, the change in the controlled foreign corporation's qualified investments in foreign base company shipping operations for its first taxable year for which income is computed without regard to the election previously made will be considered to be zero for purposes of effectuating the revocation. The application for consent to revocation shall be made by the United States shareholder's mailing a letter for such purpose to the Commissioner of Internal Revenue, Washington, DC 20224. The application shall be mailed before the close of the first

taxable year of the controlled foreign corporation with respect to which the shareholder desires to compute the amounts described in section 954(b)(2) or 955(a) without regard to the election provided in this section. The application shall include the following information:

(i) The name, address, and taxpayer identification number of the United States shareholder:

(ii) The name and address of the controlled foreign corporation;

(iii) The taxable year of the controlled foreign corporation for which such amounts are to be computed;

(iv) The amount of the controlled foreign corporation's qualified investments in foreign base company shipping operations at the close of its preceding taxable year;

(v) The sum of the amounts excluded under section 954(b)(2) and §1.954–1(b)(1) from the foreign base company income of the controlled foreign corporation for all prior taxable years during which such shareholder was a United States shareholder of such corporation and the sum of the amounts of its previously excluded subpart F income withdrawn from investment in foreign base company shipping operations for all prior taxable years during which such shareholder was a United States shareholder of such corporation; and

(vi) The reasons for the request for consent to revocation.

(4) *Transfer of stock.* If during any taxable year of a controlled foreign corporation—

(i) A United States shareholder who has made an election under this section with respect to such controlled foreign corporation sells, exchanges, or otherwise disposes of all or part of his stock in such controlled foreign corporation, and

(ii) The foreign corporation is a controlled foreign corporation immediately after the sale, exchange, or other disposition,

then, with respect to the stock so sold, exchanged, or disposed of, the change in the controlled foreign corporation's qualified investments in foreign base company shipping operations for such taxable year shall be considered to be zero. If the United States shareholder's successor in interest is entitled to and does make an election under paragraph (b)(1) of this section to determine the controlled foreign corporation's increase in qualified investments in foreign base company shipping operations for the taxable year in which he acquires such stock, such increase with respect to the stock so acquired shall be determined in accordance with the provisions of §1.954–7(b)(1). If the controlled foreign corporation realizes no foreign base company income from which amounts are excluded under section 954(b)(2) and §1.954–1(b)(1) for the taxable year in which the United States shareholder's successor in interest acquires such stock and such successor in interest makes an election under paragraph (b)(1) of this section with respect to a subsequent taxable year of such controlled foreign corporation, the increase in the controlled foreign corporation's qualified investments in foreign base company shipping operations for such subsequent taxable year shall be determined in accordance with the provisions of §1.954–7(b)(2).

(d) *Illustrations.* The application of this section may be illustrated by the following examples:

Example 1. Foreign corporation A is a wholly owned subsidiary of domestic corporation M. Both corporations use the calendar year as a taxable year. In a statement filed with its return for 1977, M makes an election under section 955(b)(3) and the election remains in force for the taxable year 1978. At December 31, 1978, A's qualified investments in foreign base company shipping operations amount to $100,000; and, at December 31, 1979, to $80,000. For purposes of paragraph (a)(1) of this section, A Corporation's decrease in qualified investments in foreign base company shipping operations for the taxable year 1978 is $20,000 and is determined by ascertaining the amount by which A Corporation's qualified investments in foreign base company shipping operations at December 31, 1978 ($100,000) exceed its qualified investments in foreign base company shipping operations at December 31, 1979 ($80,000).

Example 2. The facts are the same as in example 1 except that A experiences no changes in qualified investments in foreign base company shipping operations during its taxable years 1980 and 1981. If M's election were to remain in force, A's acquisitions and dispositions of qualified investments in foreign base company shipping operations during A's taxable year 1982 would be taken into account in determining whether A has experienced an increase or a decrease in qualified investments in foreign base company shipping operations for its taxable year 1981. However, M duly files before the close of A's taxable year 1981 as application for consent to revocation of M Corporation's election under section 955(b)(3), and, pursuant to an agreement between the Commissioner and M, consent is granted by the Commissioner. Assuming such agreement does not provide otherwise, A's change in qualifed investments in foreign base company shipping operations for its taxable year 1981 is zero because the effect of the revocation of the election is to treat acquisitions and dispositions of qualified investments in foreign base company shipping operations actually occurring in 1982 as having occurred in such year rather than in 1981.

Example 3. The facts are the same as in example 2 except that A's qualified investments in foreign base company shipping operations at December 31, 1982, amount to $70,000. For purposes of paragraph (b)(1)(i) of § 1.955A–1, the decrease in A's qualified investments in foreign base company shipping operations for the taxable year 1982 is $10,000 and is determined by ascertaining the amount by which A's qualified investments in foreign base company shipping operations at December 31, 1981 ($80,000) exceed its qualified investments in foreign base company shipping operations at December 31, 1982 ($70,000).

Example 4. The facts are the same as in example 1. Assume further that on September 30, 1979, M sells 40 percent of the only class of stock of A to N Corporation, a domestic corporation. N uses the calendar year as a taxable year. A remains a controlled foreign corporation immediately after such sale of its stock. A's qualified investments in foreign base company shipping operations at December 31, 1980, amount to $90,000. The changes in A Corporation's qualified investments in foreign base company shipping operations occurring in its taxable year 1979 are considered to be zero with respect to the 40-percent stock interest acquired by N Corporation. The entire $20,000 reduction in A Corporation's qualified investments in foreign base company shipping operations which occurs during the taxable year 1979 is taken into account by M for purposes of paragraph (c)(1) of this section in determining its tax liability for the taxable year 1978. A's increase in qualified investments in foreign base company shipping operations for the taxable year 1979 with respect to the 60-percent stock interest retained by M is $6,000 and is determined by ascertaining M's pro rata share (60 percent) of the amount by which A's qualified investments in foreign base company shipping operations at December 31, 1980 ($90,000) exceed its qualified investments in foreign base company shipping operations at December 31, 1979 ($80,000). N does not make an election under section 955(b)(3) in its return for its taxable year 1980. Corporation A's increase in qualified investments in foreign base company shipping operations for the taxable year 1980 with respect to the 40-percent stock interest acquired by N is $4,000.

[T.D. 7894, 48 FR 22539, May 19, 1983]

§ 1.956–1 Shareholder's pro rata share of a controlled foreign corporation's increase in earnings invested in United States property.

(a) *In general.* Section 956(a)(1) and paragraph (b) of this section provide rules for determining the amount of a controlled foreign corporation's earnings invested in United States property at the close of any taxable year. Such amount is the aggregate amount invested in United States property to the extent such amount would have constituted a dividend if it had been distributed on such date. Subject to the provisions of section 951(a)(4) and the regulations thereunder, a United States shareholder of a controlled foreign corporation is required to include in his gross income his pro rata share, as determined in accordance with paragraph (c) of this section, of the controlled foreign corporation's increase for any taxable year in earnings invested in United States property but only to the extent such share is not excludable from his gross income under the provisions of section 959(a)(2) and the regulations thereunder.

(b) *Amount of a controlled foreign corporation's investment of earnings in United States property*—(1) *Dividend limitation.* The amount of a controlled foreign corporation's earnings invested at the close of its taxable year in United States property is the aggregate amount of such property held, directly or indirectly, by such corporation at the close of its taxable year to the extent such amount would have constituted a dividend under section 316 and §§ 1.316–1 and 1.316–2 (determined after the application of section 955(a)) if it had been distributed on such closing day. For purposes of this subparagraph, the determination of whether an amount would have constituted a dividend if distributed shall be made without regard to the provisions of section 959(d) and the regulations thereunder.

(2) *Aggregate amount of United States property.* For purposes of determining an increase in earnings invested in United States property for any taxable year beginning after December 31, 1975, the aggregate amount of United States property held by a controlled foreign corporation at the close of—

(i) Any taxable year beginning after December 31, 1975, and

(ii) The last taxable year beginning before January 1, 1976 does not include stock or obligations of a domestic corporation described in section 956(b)(2)(F) or movable property described in section 956(b)(2)(G).

(3) *Treatment of earnings and profits.* For purposes of making the determination under subparagraph (1) of this paragraph as to whether an amount of investment would have constituted a dividend if distributed at the close of any taxable year of a controlled foreign corporation, earnings and profits of the controlled foreign corporation shall be considered not to include any amounts which are attributable to—

(i) Amounts which have been included in the gross income of a United States shareholder of such controlled foreign corporation under section 951(a)(1)(B) (or which would have been so included but for section 959(a)(2)) and have not been distributed, or

(ii)*(a)* Amounts which are included in the gross income of a United States shareholder of such controlled foreign corporation under section 551(b) or would be so included under such section but for the fact that such amounts were distributed to such shareholder during the taxable year, or

(b) Amounts which, for any prior taxable year, have been included in the gross income of a United States shareholder of such controlled foreign corporation under section 551(b) and have not been distributed.

The rules of this subparagraph apply only in determining the limitation on a controlled foreign corporation's increase in earnings invested in United States property. See section 959 and the regulations thereunder for limitations on the exclusion from gross income of previously taxed earnings and profits.

(4) [Reserved]

(c) *Shareholder's pro rata share of increase*—(1) *General rule.* A United States shareholder's pro rata share of a controlled foreign corporation's increase for any taxable year in earnings invested in United States property is the amount determined by subtracting the shareholder's pro rata share of—

(i) The controlled foreign corporation's earnings invested in United States property at the close of its preceding taxable year, as determined under paragraph (b) of this section, reduced by amounts paid by such corporation during such preceding taxable year to which section 959(c)(1) and the regulations thereunder apply, from his pro rata share of

(ii) The controlled foreign corporation's earnings invested in United States property at the close of its current taxable year, as determined under paragraph (b) of this section.

(2) *Illustration.* The application of this paragraph may be illustrated by the following examples:

Example 1. A is a United States shareholder and direct owner of 60 percent of the only class of stock of R Corporation, a controlled foreign corporation during the entire period here involved. Both A and R Corporation use the calendar year as a taxable year. Corporation R's aggregate investment in United States property on December 31, 1964, which would constitute a dividend (as determined under paragraph (b) of this section) if distributed on such date is $150,000. During the taxable year 1964, R Corporation distributed $50,000 to which section 959(c)(1) applies. Corporation R's aggregate investment in United States property on December 31, 1965, is $250,000; and R Corporation's current and accumulated earnings and profits on such date (determined as provided in paragraph (b) of this section) are $225,000. A's pro rata share of R Corporation's increase for 1965 in earnings invested in United States property is $75,000, determined as follows:

(i) Aggregate investment in United States property on December 31, 1965		$250,000
(ii) Current and accumulated earnings and profits on December 31, 1965		225,000
(iii) Amount of earnings invested in United States property on December 31, 1965, which would constitute a dividend if distributed on such date (lesser of item (i) or item (ii))		225,000
(iv) Aggregate investment in United States property on December 31, 1964, which would constitute a dividend if distributed on such date	$150,000	

Less: Amounts distributed during 1964 to which section 959(c)(1) applies	50,000	100,000
(v) R Corporation's increase for 1965 in earnings invested in United States property (item (iii) minus item (iv))		125,000
(vi) A's pro rata share of R Corporation's increase for 1965 in earnings invested in United States property (item (v) times 60 percent)		75,000

Example 2. The facts are the same as in example 1, except that R Corporation's current and accumulated earnings and profits on December 31, 1965, are $100,000 instead of $225,000. Accordingly, even through R Corporation's aggregate investment in United States property on December 31, 1965, of $250,000 exceeds the net amount ($100,000) taken into account under subparagraph (1)(i) of this paragraph as of December 31, 1964, by $150,000, there is no increase for taxable year 1965 in earnings invested in United States property because of the dividend limitation of paragraph (b)(1) of this section. Corporation R's aggregate investment in United States property on December 31, 1966, is unchanged ($250,000) Corporation R's current and accumulated earnings and profits on December 31, 1966, are $175,000, and, as a consequence, its aggregate investment in United States property which would constitute a dividend if distributed on that date is $175,000. Corporation R pays no amount during 1965 to which section 959(c)(1) applies. Corporation R's increase for the taxable year 1966 in earnings invested in United States property is $75,000, and A's pro rata share of that amount is $45,000 ($75,000 times 60 percent).

(d) *Date and basis of determinations.* The determinations made under paragraph (c)(1)(i) of this section with respect to the close of the preceding taxable year of a controlled foreign corporation and under paragraph (c)(1)(ii) with respect to the close of the current taxable year of such controlled foreign corporation, for purposes of determining the United States shareholder's pro rata share of such corporation's increased investment of earnings in United States property for the current taxable year, shall be made as of the last day of the current taxable year of such corporation but on the basis of stock owned, within the meaning of section 958(a) and the regulations thereunder, by such United States shareholder on the last day of the current taxable year of the foreign corporation on which such corporation is a controlled foreign corporation. See the last sentence of section 956(a)(2). The application of this paragraph may be illustrated from the following example:

Example. Domestic corporation M owns 60 percent of the only class of stock of A Corporation, a controlled foreign corporation during the entire period here involved. Both M Corporation and A Corporation use the calendar year as a taxable year. Corporation A's investment of earnings in United States property at the close of the taxable year 1963 is $100,000, as determined under paragraph (b) of this section, and M Corporation includes its pro rata share of such amount ($60,000) in gross income for its taxable year 1963. On June 1, 1964, M Corporation acquires an additional 25 percent of A Corporation's outstanding stock from a person who is not a United States person as defined in section 957(d). Corporation A's investment of earnings in United States property at the close of the taxable year 1964, as determined under paragraph (b) of this section, is unchanged ($100,000). Corporation A pays no amount during 1963 to which section 959(c)(1) applies. Corporation M is not required, by reason of the acquisition in 1964 of A Corporation's stock, to include an additional amount in its gross income with respect to A Corporation's investment of earnings in United States property even though the earnings invested in United States property by A Corporation attributable to the stock acquired by M Corporation were not previously taxed. The determination made under paragraph (c)(1)(i) of this section as well as the determination made under paragraph (c)(1)(ii) of this section with respect to A Corporation's investment for 1964 of earnings in United States property are made on the basis of stock owned by M Corporation (85 percent) at the close of 1964.

(e) *Amount attributable to property*—(1) *General rule.* Except as provided in subparagraph (2) of this paragraph, for purposes of paragraph (b)(1) of this section the amount taken into account with respect to any United States property shall be its adjusted basis, as of the applicable determination date, reduced by any liability (other than a liability described in subparagraph (3) of this paragraph) to which such property is subject on such date. To be taken into account under this subparagraph, a liability must constitute a specific charge against the property involved. Thus, a liability evidenced by an open account or a liability secured only by the general credit of the controlled foreign corporation will not be taken into account. On the other hand, if a liability constitutes a specific charge against several items of property and cannot definitely be allocated to any single item of property, the liability shall be apportioned against each of such items of property in that ratio which the adjusted basis of such item on the applicable determination date bears to the adjusted basis of all such items at such time. A liability in excess of the adjusted basis of the property which is subject to such liability shall not be taken into account for the purpose of reducing the adjusted basis of other property which is not subject to such liability.

(2) *Rule for pledges and guarantees.* For purposes of this section the amount taken into account with respect to any pledge or guarantee described in paragraph (c)(1) of §1.956–2 shall be the unpaid principal amount on the applicable determination date of the obligation with respect to which the controlled foreign corporation is a pledgor or guarantor.

(3) *Excluded charges.* For purposes of subparagraph (1) of this paragraph, a specific charge created with respect to any item of property principally for the purpose of artificially increasing or decreasing the amount of a controlled foreign corporation's investment of earnings in United States property will not be recognized; whether a specific charge is created principally for such purpose will depend upon all the facts and circumstances of each case. One of the factors that will be considered in making such a determination with respect to a loan is whether the loan is from a related person, as defined in section 954 (d)(3) and paragraph (e) of §1.954–1.

(4) *Statement required.* If for purposes of this section a United States shareholder of a controlled foreign corporation reduces the adjusted basis of property which constitutes United States property on the ground that such property is subject to a liability, he shall attach to his return a statement setting forth the adjusted basis of the property before the reduction and the amount and nature of the reduction.

(Secs. 956(c), 7805, Internal Revenue Code of 1954 (76 Stat. 1017, 68A Stat. 917; (26 U.S.C. 956(c) and 7805 respectively)))

[T.D. 6704, 29 FR 2600, Feb. 20, 1964, as amended by T.D. 6795, 30 FR 942, Jan. 29, 1965; T.D. 7712, 45 FR 52374, Aug. 7, 1980; T.D. 8209, 53 FR 22171, June 14, 1988]

§1.956–1T Shareholder's pro rata share of a controlled foreign corporation's increase in earnings invested in United States property (temporary).

(a) [Reserved]

(b)(1)–(3) [Reserved]

(4) *Treatment of certain investments of earnings in United States Property*—(i) *Special rule.* For purposes of §1.956–1(b)(1) of the regulations, a controlled foreign corporation will be considered to hold indirectly (A) the investments in United States property held on its behalf by a trustee or a nominee or (B) at the discretion of the District Director, investments in U.S. property acquired by any other foreign corporation that is controlled by the controlled foreign corporation, if one of the principal purposes for creating, organizing, or funding (through capital contributions or debt) such other foreign corporation is to avoid the application of section 956 with respect to the controlled foreign corporation. For purposes of this paragraph (b), a foreign corporation will be controlled by the controlled foreign corporation if the foreign corporation and the controlled foreign corporation are related parties under section 267(b). In determining for purposes of this paragraph (b) whether two or more corporations are members of the same controlled group under section 267(b)(3), a person is considered to own stock owned directly by such person, stock owned with the application of section 1563(e)(1), and stock owned with the application of section 267(c). The following examples illustrate the application of this paragraph.

Example 1. P, a domestic corporation, owns all of the outstanding stock of FS1, a controlled foreign corporation, and all of the outstanding stock of FS2, also a controlled foreign corporation. FS1 sells products to FS2 in exchange for trade receivables due in 60 days. FS2 has no earnings and profits. FS1 has substantial accumulated earnings and profits. FS2 loans to P an amount equal to the debt it owes FS1. FS2 pays the trade receivables according to the terms of the receivables. FS1 will not be considered to hold indirectly the investment in United States property under this paragraph (b)(4), because there was no transfer of funds to FS2.

Example 2. The facts are the same as in Example 1, except that FS2 does not pay the receivables. FS1 is considered to hold indirectly the investment in United States property under this paragraph (b)(4), because there was a transfer of funds to FS2, a principal purpose of which was to avoid the application of section 956 to FS1.

(ii) *Effective date.* This section is effective June 14, 1988, with respect to investments made on or after June 14, 1988.

(c)–(d) [Reserved]

(e)(1)–(4) [Reserved]

(e)(5) *Excluded charges*—(i) *Special rule.* For purposes of § 1.956–1(e)(1) of the regulations, in the case of an investment in United States property consisting of an obligation of a related person, as defined in section 954(d)(3) and paragraph (e) of § 1.954–1, a liability will not be recognized as a specific charge if the liability representing the charge is with recourse with respect to the general credit or other assets of the investing controlled foreign corporation.

(ii) *Effective date.* This section is effective June 14, 1988, with respect to investments made on or after June 14, 1988.

[T.D. 8209, 53 FR 22171, June 14, 1988]

§ 1.956–2 Definition of United States property.

(a) *Included property*—(1) *In general.* For purposes of section 956(a) and § 1.956–1, United States property is (except as provided in paragraph (b) of this section) any property acquired (within the meaning of paragraph (d)(1) of this section) by a foreign corporation (whether or not a controlled foreign corporation at the time) during any taxable year of such foreign corporation beginning after December 31, 1962, which is—

(i) Tangible property (real or personal) located in the United States;

(ii) Stock of a domestic corporation;

(iii) An obligation (as defined in paragraph (d)(2) of this section) of a United States person (as defined in section 957(d)); or

(iv) Any right to the use in the United States of—

(a) A patent or copyright,

(b) An invention, model, or design (whether or not patented),

(c) A secret formula or process, or

(d) Any other similar property right, which is acquired or developed by the foreign corporation for use in the United States by any person. Whether a right described in this subdivision has been acquired or developed for use in the United States by any person is to be determined from all the facts and circumstances of each case. As a general rule, a right actually used principally in the United States will be considered to have been acquired or developed for use in the United States in the absence of affirmative evidence showing that the right was not so acquired or developed for such use.

(2) *Illustrations.* The application of the provisions of this paragraph may be illustrated by the following examples:

Example 1. Foreign corporation R uses as a taxable year a fiscal year ending on June 30. Corporation R acquires on June 1, 1963, and holds on June 30, 1963, $100,000 of tangible property (not described in section 956(b)(2)) located in the United States. Corporation R's aggregate investment in United States property at the close of its taxable year ending June 30, 1963, is zero since the property which is acquired on June 1, 1963, is not acquired during a taxable year of R Corporation beginning after December 31, 1962. Assuming no change in R Corporation's aggregate investment in United States property during its taxable year ending June 30, 1964, R Corporation's increase in earnings invested in United States property for such taxable year is zero.

Example 2. Foreign corporation S uses the calendar year as a taxable year and is a controlled foreign corporation for its entire taxable year 1965. Corporation S is not a controlled foreign corporation at any time during its taxable years 1963 and 1964. Corporation S owns on December 31, 1964, $100,000 of tangible property (not described in section 956(b)(2)) located in the United States which it acquires during taxable years beginning after December 31, 1962. Corporation S's aggregate investment in United States property on December 31, 1964, is $100,000. Corporation S's current and accumulated earnings and profits (determined as provided in paragraph (b) of §1.956–1) as of December 31, 1964, are in excess of $100,000. Assuming no change in S Corporation's aggregate investment in United States property during its taxable year 1965, S Corporation's increase in earnings invested in United States property for such taxable year is zero.

Example 3. Foreign corporation T uses the calendar year as a taxable year and is a controlled foreign corporation for its entire taxable years 1963, 1964, and 1966. At December 31, 1964, T Corporation's investment in United States property is $100,000. Corporation T is not a controlled foreign corporation at any time during its taxable year 1965 in which it acquires $25,000 of tangible property (not described in section 956(b)(2)) located in the United States. On December 31, 1965, T Corporation holds the United States property of $100,000 which it held on December 31, 1964, and, in addition, the United States property acquired in 1965. Corporation T's aggregate investment in United States property at December 31, 1965, is $125,000. Corporation T's current and accumulated earnings and profits (determined as provided in paragraph (b) of §1.956–1) as of December 31, 1965, are in excess of $125,000, and T Corporation pays no amount during 1965 to which section 959 (c)(1) applies. Assuming no change in T Corporation's aggregate investment in United States property during its taxable year 1966, T Corporation's increase in earnings invested in United States property for such taxable year is zero.

(b) *Exceptions*—(1) *Excluded property.* For purposes of section 956(a) and paragraph (a) of this section, United States property does not include the following types of property held by a foreign corporation:

(i) Obligations of the United States.

(ii) Money.

(iii) Deposits with persons carrying on the banking business, unless the deposits serve directly or indirectly as a pledge or guarantee within the meaning of paragraph (c) of this section. See paragraph (e)(2) of §1.956–1.

(iv) Property located in the United States which is purchased in the United States for export to, or use in, foreign countries. For purposes of this subdivision, property to be used outside the United States will be considered property to be used in a foreign country. Whether property is of a type described in this subdivision is to be determined from all the facts and circumstances in each case. Property which constitutes export trade assets within the meaning of section 971(c)(2) and paragraph (c)(3) of §1.971–1 will be considered property of a type described in this subdivision.

(v) Any obligation (as defined in paragraph (d)(2) of this section) of a United States person (as defined in section 957(d)) arising in connection with the sale or processing of property if the amount of such obligation outstanding at any time during the taxable year of the foreign corporation does not exceed an amount which is ordinary and necessary to carry on the trade or business of both the other party to the sale or processing transaction and the United States person, or, if the sale or processing transaction occurs between related persons, would be ordinary and necessary to carry on the trade or business of both the other party to the sale or processing transaction and the United States person if such persons were unrelated persons. Whether the amount of an obligation described in this subdivision is ordinary and necessary is to be determined from all the facts and circumstances in each case.

(vi) Any aircraft, railroad rolling stock, vessel, motor vehicle, or container used in the transportation of persons or property in foreign commerce and used predominantly outside the United States. Whether transportation property described in this subdivision is used in foreign commerce and predominantly outside the United States is to be determined from all the facts and circumstances in each case. As a general rule, such transportation property will be considered to be used predominantly outside the United States if 70 percent or more of the miles traversed (during the taxable year at the close of which a determination is made under section 956(a)(2)) in the use of such property are traversed outside the United States or if such property is located outside the United States 70 percent of the time during such taxable year.

(vii) An amount of assets described in paragraph (a) of this section of an insurance company equivalent to the unearned premiums or reserves which are ordinary and necessary for the proper conduct of that part of its insurance business which is attributable to contracts other than those described in section 953(a)(1) and the regulations thereunder. For purposes of this subdivision, a reserve will be considered ordinary and necessary for the proper conduct of an insurance business if, under the principles of paragraph (c) of § 1.953–4, such reserve would qualify as a reserve required by law. See paragraph (d)(3) of § 1.954–2 for determining, for purposes of this subdivision, the meaning of insurance company and of unearned premiums.

(viii) For taxable years beginning after December 31, 1975, the voting or nonvoting stock or obligations of an unrelated domestic corporation. For purposes of this subdivision, an unrelated domestic corporation is a domestic corporation which is neither a United States shareholder (as defined in section 951(b)) of the controlled foreign corporation making the investment, nor a corporation 25 percent or more of whose total combined voting power of all classes of stock entitled to vote is owned or considered as owned (within the meaning of section 958 (b)) by United States shareholders of the controlled foreign corporation making the investment. The determination of whether a domestic corporation is an unrelated corporation is made immediately after each acquisition of stock or obligations by the controlled foreign corporations.

(ix) For taxable years beginning after December 31, 1975, movable drilling rigs or barges and other movable exploration and exploitation equipment (other than a vessel or an aircraft) when used on the Continental Shelf (as defined in section 638) of the United States in the exploration for, development, removal, or transportation of natural resources from or under ocean waters. Property used on the Continental Shelf includes property located in the United States which is being constructed or is in storage or in transit within the United States for use on the Continental Shelf. In general, the type of property which qualifies for the exception under this subdivision includes any movable property which would be entitled to the investment credit if used outside the United States in certain geographical areas of the Western Hemisphere pursuant to section 48(a)(2)(B)(x) (without reference to sections 49 and 50).

(x) An amount of—

(a) A controlled foreign corporation's assets described in paragraph (a) of this section equivalent to its earnings and profits which are accumulated after December 31, 1962, and are attributable to items of income described in section 952(b) and the regulations thereunder, reduced by the amount of

(b) The earnings and profits of such corporation which are applied in a taxable year of such corporation beginning after December 31, 1962, to discharge a liability on property, but only if the liability was in existence at the close of such corporation's taxable year immediately preceding its first taxable year beginning after December 31, 1962, and the property would have been United States property if it had been acquired by such corporation immediately before such discharge.

For purposes of this subdivision, distributions made by such corporation for any taxable year shall be considered first made out of earnings and profits for such year other than earnings and profits referred to in (*a*) of this subdivision.

(2) *Statement required.* If a United States shareholder of a controlled foreign corporation excludes any property from the United States property of such controlled foreign corporation on the ground that section 956(b)(2) applies to such excluded property, he shall attach to his return a statement setting forth, by categories described in paragraph (a)(1) of this section, the amount of United States property of the controlled foreign corporation and, by categories described in subparagraph (1) of this paragraph, the amount of such property which is excluded.

(c) *Treatment of pledges and guarantees*—(1) *General rule.* Except as provided in subparagraph (4) of this paragraph, any obligation (as defined in paragraph (d)(2) of this section) of a United States person (as defined in section 957(d)) with respect to which a controlled foreign corporation is a pledgor or guarantor shall be considered for purposes of section 956(a) and paragraph (a) of this section to be United States property held by such controlled foreign corporation.

(2) *Indirect pledge or guarantee.* If the assets of a controlled foreign corporation serve at any time, even though indirectly, as security for the performance of an obligation of a United States person, then, for purposes of paragraph (c)(1) of this section, the controlled foreign corporation will be considered a pledgor or guarantor of that obligation. For this purpose the pledge of stock of a controlled foreign corporation will be considered as the indirect pledge of the assets of the corporation if at least 66 2/3 percent of the total combined voting power of all classes of stock entitled to vote is pledged and if the pledge of stock is accompanied by one or more negative covenants or similar restrictions on the shareholder effectively limiting the corporation's discretion with respect to the disposition of assets and the incurrence of liabilities other than in the ordinary course of business. This paragraph (c)(2) applies only to pledges and guarantees which are made after September 8, 1980. For purposes of this paragraph (c)(2) a refinancing shall be considered as a new pledge or guarantee.

(3) *Illustrations.* The following examples illustrate the application of this paragraph (c):

Example 1. A, a United States person, borrows $100,000 from a bank in foreign country X on December 31, 1964. On the same date controlled foreign corporation R pledges its assets as security for A's performance of A's obligation to repay such loan. The place at which or manner in which A uses the money is not material. For purposes of paragraph (b) of §1.956–1, R Corporation will be considered to hold A's obligation to repay the bank $100,000, and, under the provisions of paragraph (e)(2) of §1.956–1, the amount taken into account in computing R Corporation's aggregate investment in United States property on December 31, 1964, is the unpaid principal amount of the obligation on that date ($100,000).

Example 2. The facts are the same as in example 1, except that R Corporation participates in the transaction, not by pledging its assets as security for A's performance of A's obligation to repay the loan, but by agreeing to buy for $1,00,000 at maturity the note representing A's obligation if A does not repay the loan. Separate arrangements are made with respect to the payment of the interest on the loan. The agreement of R Corporation to buy the note constitutes a guarantee of A's obligation. For purposes of paragraph (b) of §1.956–1, R Corporation will be considered to hold A's obligation to repay the bank $100,000, and, under the provisions of paragraph (e)(2) of §1.956–1, the amount taken into account in computing R Corporation's aggregate investment in United States property on December 31, 1964, is the unpaid principal amount of the obligation on that date ($100,000).

Example 3. A, a United States person, borrows $100,000 from a bank on December 10, 1981, pledging 70 percent of the stock of X, a controlled foreign corporation, as collateral for the loan. A and X use the calendar year as their taxable year. in the loan agreement, among other things, A agrees not to cause or permit X Corporation to do any of the following without the consent of the bank:

(a) Borrow money or pledge assets, except as to borrowings in the ordinary course of business of X Corporation;

(b) Guarantee, assume, or become liable on the obligation of another, or invest in or lend funds to another;

(c) Merge or consolidate with any other corporation or transfer shares of any controlled subsidiary;
